BILLING CODE 6750–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Agency for Healthcare Research
and Quality, HHS.

ACTION: Notice.

SUMMARY: This notice announces the
intention of the Agency for Healthcare
Research and Quality (AHRQ) to request
that the Office of Management and
Budget (OMB) approve the proposed
information collection project
“Identifying and Testing Strategies for
Management of Opioid Use and Misuse
in Older Adults in Primary Care
Practices.” This proposed information
collection was previously published in
the **Federal Register** on June 8, 2020
and allowed 60 days for public
comment. No comments were received
by AHRQ. The purpose of this notice is
to allow an additional 30 days for public
comment.

DATES: Comments on this notice must be
received by 30 days after date of
publication of this notice.

ADDRESSES: Written comments and
recommendations for the proposed
information collection should be sent
within 30 days of publication of this
notice to www.reginfo.gov/public/do/PRAMain. Find this particular
information collection by selecting
“Currently under 30-day Review—Open
for Public Comments” or by using the
search function.

FOR FURTHER INFORMATION CONTACT:
Doris Lefkowitz, AHRQ Reports
Clearance Officer, (301) 427–1477, or by
email at doris.lefkowitz@ahrq.hhs.gov.

SUPPLEMENTARY INFORMATION:

Proposed Project

Identifying and Testing Strategies for Management of Opioid Use and Misuse in Older Adults in Primary Care Practices

The goals of this project are to assess
and describe the current prevalence,
awareness, and management of opioid
use, misuse, and abuse in older adults,

and identify gaps and areas of needed
research. Additionally, this project will
support primary care practices (PCP) in
developing and testing innovative
strategies, approaches, and/or tools for
opioid management within the context
of facilitated learning collaboratives,
culminating in a Compendium of
Strategies for opioid management in
older adults in primary care settings.
Through this project, AHRQ is
addressing the gaps in knowledge
around opioid use in older adults in
primary care settings. To accomplish
this we are synthesizing what is known
about the development and testing of
innovative strategies, approaches, and/
or tools for opioid management of older
adults with pain on opioid medication,
and/or opioid use disorder.

This study is being conducted by
AHRQ through its contractor, Abt
Associates Inc., pursuant to AHRQ’s
statutory authority to conduct and
support research on healthcare and on
systems for the delivery of such care,
including activities with respect to the
quality, effectiveness, efficiency,
appropriateness and value of healthcare
services and with respect to quality
measurement and improvement. 42
U.S.C. 299a(a)(1) and (2).

Method of Collection

To achieve the goals of this project the
following data collections will be
implemented:

1. We will conduct a web-based
survey of primary care clinicians who
care for older adults. The purpose of the
survey is to assess primary care
clinician experiences caring for older
adult patients with chronic pain on
opioids. The survey will be sent to 5,000
randomly selected primary care
clinicians.

2. Participating learning collaborative
practices will be asked to implement
strategies related to each of the key areas
on the continuum: prevention,
management and treatment of opioid
use, misuse and OUD in older adults.
We will collect primary data via
observations, interviews, and a survey,
and secondary data including practice
and learning collaborative documents.
The following primary data collection
activities are proposed:

a. PCP Clinical Staff Survey. A brief
web-based survey will be emailed to all
clinical staff participating in the
learning collaborative at baseline before
starting implementation and
approximately 15 months later. We
assumed 20 clinical staff per clinic site,
and 24 clinics for a total of 480 staff.

b. Interviews. In-depth interviews will
occur with up to three staff at each
health care organization participating in

the learning collaborative, for a total of
up to 72 individuals. The evaluation
team will conduct these interviews
with:

c. Quality Improvement (QI)
champion for the initiative in the clinics
at baseline, mid-point and post-
implementation

d. Two additional staff (e.g. clinician,
information technology analyst,
behavioral health specialist) per
organization (mid-point and post-
implementation).

3. Self-Assessment. The QI champion
will complete a self-assessment tool at
baseline. A similar tool is used in the
Six Building Blocks program and the
Centers for Disease Control (CDC)
Opioid QI Collaborative. This tool is for
clinics or health systems to assess the
status of their QI efforts to improve
opioid prescribing, and the extent to
which care is consistent with the CDC
Opioid Prescribing Guidelines.

4. Quality Improvement Measures.
Each clinic will report quarterly on the
QI measures. The QI measures include
both process and outcome measures.
Process measures are reflective of
recommended clinical strategies or tools
being implemented, and outcome
measures examine intermediate
outcomes. A data analyst at each
organization will provide aggregate
reports of the specified QI measures to
the evaluation team on a quarterly basis
over the course of a 15-month period.
The QI measures are measures of opioid
prescribing that are critical for
understanding the potential
improvements in opioid prescribing in
implementing the strategies.

Estimated Annual Respondent Burden

Exhibit 1 presents estimates of the
reporting burden hours for the data
collection efforts. Time estimates are
based on prior experiences and what
can reasonably be requested of
participating providers (survey) and
PCPs. The number of respondents listed
in column A, Exhibit 1 reflects a
projected response rate for data
collection efforts.

1. *Provider web-based survey.* A
survey will be sent to 5,000 randomly
selected primary care clinicians. The
survey will include no more than 30
items and is expected to take
approximately 15 minutes to complete.
We anticipate a 30% response rate,
resulting in 1,500 completed surveys.

2. PCP Learning Collaboratives Primary Data Collection.

a. *PCP Learning Collaborative Clinical
Staff Survey.* A brief survey will be
emailed to all clinicians at baseline
before starting implementation and
approximately 15 months later. We

assume 20 clinical staff per clinic site, and 24 clinics for a total of 480 staff. We assume 360 clinical staff will complete the survey based on a 75% response rate. It is expected to take up to 20 minutes to complete.

b. *Interviews.* In-depth interviews will occur with up to 3 staff at each health care organization, for a total of up to 72 individuals. The evaluation team will conduct these interviews, each lasting up to 30 minutes with:

i. QI champion for the initiative in the clinics at baseline, mid-point and post-implementation.

ii. Two additional staff (e.g., clinician, information technology analyst, behavioral health specialist) per PCP at mid-point and post-implementation.

c. *Self-Assessment.* A self-assessment tool used in the Six Building Blocks program, and CDC Opioid QI Collaborative for clinics or health systems will be provided to practices to assess where they are in their QI efforts to improve opioid prescribing, and the extent to which care is consistent with the CDC Opioid Prescribing Guideline. The QI champion or lead for the effort in each of the 24 participating PCPs will respond to the self-assessment which will take approximately 15 minutes to complete.

d. *QI Measures.* Aggregate reports of the specified quality measures will be provided on a quarterly basis over the course of a 15-month period by a data analyst at each PCP. This activity will involve 12 individuals at each learning

collaborative for a total of 24. We assume 40 hours total for each data analyst to collect and provide these data: twenty hours to develop a system for pulling these measures and five hours to pull and submit these reports each quarter. The QI measures are measures of opioid prescribing that are critical for understanding the potential improvements in opioid prescribing in implementing strategies and tools for management of opioid use, misuse, and abuse. Each health care organization is asked to report quarterly on the QI measures. Clinics may obtain these measures from electronic health record (EHR) data, or they may not have the sophistication or capacity to do that and may track these measures using Excel files or other methods.

EXHIBIT 1—ESTIMATED ANNUALIZED BURDEN HOURS

Data collection method or project activity	Number of respondents	Number of responses per respondent	Hours per response	Total burden hours
	(A.)	(B.)	(C.)	(D.)
1. Web-Based Provider Survey ¹	1500	1	15/60	375
2a. Learning Collaborative Clinical Staff Survey ²	360	2	20/60	240
2bi. Learning Collaborative QI Champion Interview	24	3	30/60	36
2bii. Learning Collaborative Staff Interview	48	2	30/60	48
2c. Learning Collaborative Self-Assessment	24	1	15/60	6
2di. Learning Collaborative QI Measures—develop system	24	1	20	480
2dii. Learning Collaborative QI Measures—pull and submit	24	4	5	480
Total	2028	n/a	n/a	1665

¹ Number of respondents reflects a 30% response rate.

² Number of respondents reflects a sample size assuming a 75% response rate.

Exhibit 2, below, presents the estimated annualized cost burden

associated with the respondents' time to participate in this research. The total

cost burden is estimated to be about \$72,145.62.

EXHIBIT 2—ESTIMATED ANNUALIZED COST BURDEN

Data collection method or project activity	Number of respondents	Total burden hours	Average hourly wage rate *	Total cost burden
1. Web-Based Provider Survey ¹	1500	375	\$101.82	\$38,182.50
2a. Learning Collaborative Clinical Staff Survey ²	360	240	39.42	9,460.80
2bi. Learning Collaborative QI Champion Interview ³	24	36	54.68	1,968.48
2bii. Learning Collaborative Staff Interview ⁴	48	48	39.42	1,892.16
2c. Learning Collaborative Self-Assessment ⁵	24	6	54.68	328.08
2di. Learning Collaborative QI Measures—develop system ⁶	24	480	21.16	10,156.80
2dii. Learning Collaborative QI Measures—pull and submit ⁷	24	480	21.16	10,156.80
Total	2028	1917	n/a	72,145.62

Mean hourly wage rates for these groups of occupations were obtained from the Bureau of Labor & Statistics on "Occupational Employment and Wages, May 2018" found at the following URL: http://www.bls.gov/oes/current/oes_nat.htm#b29-0000.htm.

¹ The average hourly rate of \$101.82 for the provider survey was calculated based on the 2018

mean hourly wage rate for family and general practitioners, (occupation code 29-1062).

² The average hourly rate of \$39.42 for the learning collaborative clinical staff survey was calculated based on the 2018 mean hourly wage rate for medical and health services managers (occupation code 29-0000).

³ The average hourly rate of \$54.68 for QI champion interviews was calculated based on the 2018 mean hourly wage rate for medical and health services managers (occupation code 11-9111).

⁴ The average hourly rate of \$39.42 for staff interviews was calculated based on the 2018 mean

hourly wage rate for medical and health services managers (occupation code 29-0000).

⁵ The average hourly rate of \$54.68 for the Learning Collaborative QI champion to complete the self-assessment was calculated based on the 2018 mean hourly wage rate for medical and health services managers (occupation code 11-9111).

⁶ The average hourly rate of \$21.16 to develop the Learning Collaborative QI measures was calculated

Request for Comments

In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501–3520, comments on AHRQ's information collection are requested with regard to any of the following: (a) Whether the proposed collection of information is necessary for the proper performance of AHRQ's health care research and health care information dissemination functions, including whether the information will have practical utility; (b) the accuracy of AHRQ's estimate of burden (including hours and costs) of the proposed collection(s) of information; (c) ways to enhance the quality, utility and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information upon the respondents, including the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and included in the Agency's subsequent request for OMB approval of the proposed information collection. All comments will become a matter of public record.

Dated: August 26, 2020.

Virginia L. Mackay-Smith,

Associate Director.

BILLING CODE 4160–90–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES**Administration for Children and Families****Submission for OMB Review; Temporary Assistance for Needy Families (TANF) Data Reporting for Work Participation (OMB #0970–0338)**

AGENCY: Office of Family Assistance, Administration for Children and Families, Health and Human Services (HHS).

ACTION: Request for public comment.

SUMMARY: The Administration for Children and Families (ACF) is requesting a 3-year extension of the Temporary Assistance for Needy Families (TANF) Data Reporting for Work Participation (formerly titled the Deficit Reduction Act of 2005 TANF Final Rule; OMB #0970–0338). Information collections include the TANF data verification procedures, the TANF Data Report, the Separate State Program (SSP)—Maintenance of Effort (MOE) Data Report, the Caseload Reduction Documentation Process, and the Reasonable Cause/Corrective Compliance Documentation Process. We are proposing to continue these information collections without change.

DATES: *Comments due within 30 days of publication.* OMB must make a decision about the collection of information between 30 and 60 days after publication of this document in the **Federal Register**. Therefore, a comment

is best assured of having its full effect if OMB receives it within 30 days of publication.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

SUPPLEMENTARY INFORMATION:

Description: ACF is requesting a 3-year extension of the following information collections: TANF data verification procedures, the TANF Data Report, the SSP–MOE Data Report, the Caseload Reduction Documentation Process, and the Reasonable Cause/Corrective Compliance Documentation Process (OMB #0970–0338). The data and information from these reports and processes are used for program analysis and oversight, including the calculation and administration of the work participation rate and associated penalties. Congress provides Federal funds to operate TANF programs in the states, the District of Columbia, Guam, Puerto Rico, the U.S. Virgin Islands, and for approved federally recognized tribes and Alaskan Native Villages. We are proposing to continue these information collections without change.

Respondents: The 50 states of the United States, the District of Columbia, Guam, Puerto Rico, and the U.S. Virgin Islands.

ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Annual number of responses per respondent	Average burden hours per response	Total annual burden hours
Preparation and Submission of Data Verification Procedures §§ 261.60–261.63	54	1	640	34,560
Caseload Reduction Documentation Process, ACF–202 §§ 261.41 & 261.44	54	1	120	6,480
Reasonable Cause/Corrective Compliance Documentation Process §§ 262.4, 262.6, & 262.7; § 261.51	54	2	240	25,920
TANF Data Report Part 265	54	4	2,201	475,416
SSP–MOE Data Report—Part 265	29	4	714	82,824
TANF Sampling and Statistical Methods Manual § 265.5	30	4	48	5,760

based on the 2018 mean hourly wage rate for medical records and health information technicians (occupation code 29–2071).

⁷ The average hourly rate of \$21.16 to pull and submit the Learning Collaborative QI measures was calculated based on the 2018 mean hourly wage rate

for medical records and health information technicians (occupation code 29–2071).
