

- Assess data and performance metrics to enhance program performance
- Inform strategic planning activities at the Bureau, division, and individual exchange program levels
- Supplement the information ECA program officers receive from their award recipients and exchange participants to provide a comprehensive view of programmatic activities
- Respond quickly and reliably to ad-hoc requests from Congress, the Office of Management and Budget (OMB), and internal Department of State stakeholders

In order to collect data for the MODE Framework, the ECA Evaluation Division intends to conduct ongoing surveys of program participants, alumni, and participant host and home communities to monitor program performance, assess impact, and identify issues for further evaluation. Specifically, ECA will coordinate with award recipients to provide standard survey questions for both foreign national and U.S. citizen exchange participants immediately after completing the exchange (“Participant Post-Program Survey”). ECA’s Evaluation Division also intends to administer standard surveys to foreign national and U.S. citizen exchange alumni roughly one year, three years and five years after completing their exchange experience. Conducting post-program surveys, particularly after three and five years, will provide information on the impact of ECA programs and insight into the achievements of participants.

To examine multiplier effects of ECA exchange programs on foreign and U.S. communities and institutions that sponsor, support, or provide exchange programs support or services, ECA intends to administer standard surveys to foreign and U.S. host community members (individuals or institutions) where feasible.

Methodology

In previous years, the ECA Evaluation Division surveyed foreign alumni from a sample of 10 ECA programs. The suggested MODE Framework data collections represent an expansion to include American participants and standardization of the data collection tools. Additionally, ECA has not collected these data in a systematic manner from U.S. and foreign host community members in the past.

Currently, ECA award recipients administer post-program surveys to their participants as part of their internal program monitoring data collection approach. ECA intends to

leverage this ongoing survey process by providing program awardees standard indicators (we estimate anywhere from 10–15 for each award) and corresponding data collection questions, depending on the program orientation. In many instances, these standard indicators and questions will supplant existing awardee defined comparable indicators and questions with ECA defined uniform data requirements. This will ensure the data ECA gathers are valid and reliable across the range of exchange programs.

Director.
