As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper

performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission’s burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might “further reduce the information collection burden for small business concerns with fewer than 25 employees.”

Information Collection Being Reviewed by the Federal Communications Commission

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act of 1995 (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to

further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written PRA comments should be submitted on or before November 9, 2020. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email PRA@fcc.gov and to Nicole.Ongele@fcc.gov.

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele, (202) 418-2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060-1139.

Title: FCC Consumer Broadband Services Testing and Measurement.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Businesses or other for-profit and individuals or households.

Number of Respondents and Responses: 501,020 respondents and 501,020 responses.

Estimated Time per Response: 1 hour-200 hours.

Frequency of Response: Biennial reporting requirement and third-party disclosure requirement.

Obligation to Respond: Voluntary. Statutory authority for this information collection is contained in the Broadband Data Improvement Act of 2008, Public Law 110-385, Stat 4096, 103(c)(1).

Total Annual Burden: 46,667 hours.

Total Annual Costs: No Cost.

Nature and Extent of Confidentiality: All participation in the Measuring Broadband America Program is voluntary and any participant can decline to participate at any time. No volunteers' personally identifying information (PII) such as name, phone number, or street addresses will be transmitted to the Commission from the contractor as a matter of vendor policy and agency privacy policy. SamKnows maintains a series of administrative, technical, and physical safeguards to protect against the transmission of PII. At point of registration, individuals will be given full disclosure in a "privacy statement" highlighting what

information will be collected. Fixed Broadband ISP Partners receive PII about volunteers to confirm the validity of the information against their subscription records, but will be bound by a non-disclosure agreement that will maintain various administrative, technical and physical safeguards to protect the information and limit its use. Mobile Broadband ISP Partners have access to five kinds of information, including location and time of data collection, device type and operating system version, cellular performance and characteristics, and download, upload speed and other broadband performance, also restricted by a non-disclosure agreement that will maintain various administrative, technical and physical safeguards to protect the information and limit its use. ISP Partners providing support to the testing program will likewise be bound to the same series of administrative, technical and physical safeguards developed by SamKnows. In addition, all third parties supporting the program directly will be bound by a "Code of Conduct" to ensure all participate and act in good faith and with other legally enforceable documents such as non-disclosure agreements.

Privacy Act Impact Assessment: This information collection effects individuals or households. However, personally identifiable information (PII) such as name, phone number, or street addresses is not being collected by, made available to or made accessible by the Commission but instead by third parties including SamKnows, a third party contractor, and internet Service Provider (ISP) Partners.

Needs and Uses: The Commission will submit this expiring collection after this 60-day comment period to the Office of Management and Budget (OMB) to obtain the full three-year clearance.

This study's collection of information on actual speeds and performance of fixed and mobile broadband connections delivered to consumers by ISPs has been reported to be of great value to academic researchers, manufacturers and technology providers, broadband providers, public interest groups and other diverse stakeholders. Validation of fixed broadband subscribed speeds as opposed to actual speeds by participating ISPs remains unique to this program and provides a context for measured speeds. Mobile broadband performance information is measured using the FCC Speed Test app for Android and iOS devices to test the upload and download speeds, latency and packet loss, as well as the wireless
