

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange believes that the proposed rule change will improve competition by providing market participants with another option when determining where to execute orders and post liquidity.

The Exchange believes that the proposed change would increase both intermarket and intramarket competition by incenting participant Members to direct their orders to MIAX PEARL Equities, which will enhance the quality of quoting and increase the volume traded here. To the extent that there is an additional competitive burden on non-participant Members, the Exchange believes that this is appropriate because the Proposed Program should incent Members to direct additional order flow to MIAX PEARL Equities, and thus provide additional liquidity that enhances the quality of its markets and increases the volume traded on MIAX PEARL Equities. To the extent that this purpose is achieved, all of the Exchange's market participants should benefit from the improved market liquidity. Enhanced market quality and increased transaction volume that results from the anticipated increase in order flow directed to the Exchange will benefit all market participants and improve competition on the Exchange and MIAX PEARL Equities in particular.

Given the robust competition for volume among equities markets, many of which offer the same products, implementing a program to attract order flow like the one being proposed in this filing is consistent with the above-mentioned goals of the Act. This is especially true for the smaller equities markets, such as MIAX PEARL Equities in particular, which is competing for volume with much larger exchanges that dominate the equities trading industry. MIAX PEARL has no history in the trading of equities, so it is unlikely that the Proposed Program could cause any competitive harm to the equities markets or to market participants. Rather, the Proposed Program is an attempt by a new equities market to attract order volume away from larger competitors by adopting an innovative pricing strategy, as evidenced by the volume thresholds of the Proposed Program that represent fractions of equities Total Consolidated Volume. The Exchange notes that if the Proposed Program resulted in a modest average

daily trading volume in equities executed on MIAX PEARL, it would represent a minimal reduction in volume of its larger competitors in the industry. The Exchange believes that the Proposed Program will help further competition, because market participants will have yet another option in determining where to execute orders and post liquidity if they factor the benefits of MIAX PEARL equity participation into the determination. The Exchange notes that other exchanges have engaged in the practice of incentivizing increased order flow in order to attract liquidity providers through equity sharing arrangements.²⁷ In addition, as mentioned above, the Exchange previously adopted an equity rights program and now simply seeks to adopt the Proposed Program to include MIAX PEARL Equities.²⁸
