The *Magnuson-Stevens Fishery Conservation and Management Act* established the Western Pacific Fishery Management Council (Council), to develop fishery ecosystem plans (FEP) for fisheries in the United States (U.S.) exclusive economic zone (EEZ) and high seas of the Pacific Islands region. These plans, if approved by the Secretary of Commerce, are implemented in Federal regulations by the National Oceanic and Atmospheric Administration's (NOAA) National Marine Fisheries Service (NMFS) and enforced by NOAA's Office of Law Enforcement (OLE) and the U.S. Coast Guard (USCG), in cooperation with state and territorial agencies. FEPs regulate fishing to prevent overfishing and to ensure the long-term productivity and social and economic benefit of the resources.

Regulations at 50 CFR 665, Subpart F, require that a vessel used to fish with longline gear for western Pacific pelagic management unit species (PMUS), land or transship longline caught PMUS, or receive longline caught PMUS from a longline vessel, within the Exclusive Economic Zone (EEZ) or management subarea around U.S. islands in the central and western Pacific must be registered to a valid Federal fishing permit. The regulations also require that a vessel used to fish with squid jig gear for pelagic squid species listed in the western Pacific PMUS within the EEZ or management subareas around U.S. islands in the central and western Pacific, or fish with troll and handline gear for PMUS in allowed locations within the EEZ around each of the Pacific Remote Island Areas (PRIA), must be registered to a valid Federal fishing permit.

Regulations at 50 CFR parts 665, Subparts D and E, require that the owner of a vessel used to fish for, land, or transship bottomfish management unit species (BMUS) using a large vessel (50 ft or longer) in the Guam management subarea, fish commercially for BMUS in the Commonwealth of the Northern Mariana Islands management subarea, or fish for BMUS in allowed locations within the EEZ around each of the PRIA, must register it to a valid Federal fishing permit.

Regulations at 50 CFR parts 665, Subparts B, C, D, and E, require that the owner of a vessel used to fish for, land, or transship crustacean management unit species (CMUS) in the EEZs or management subareas around American Samoa, Hawaii, Guam, Northern Mariana Islands, or in allowed locations within the EEZ around each of the PRIA, must register it to a valid Federal

fishing permit. The regulations also require that a vessel used to fish for precious corals within the EEZ or management subarea around U.S. islands in the central and western Pacific must be registered to a valid Federal fishing permit for a specific precious coral permit area.

This collection of information is needed for permit issuance, to identify actual or potential participants in the fishery, determine qualifications for permits, and to help measure the impacts of management controls on the participants in the fishery. The permit program is also an effective tool in the enforcement of fishery regulations and facilitates communication between NMFS and fishermen.

This collection will be revised to remove the instruction to mail applications to NMFS as the office is currently unable to accept or process mail. Individuals will be able to submit applications electronically either through secure email or by applying directly through the National Permit System for the Hawaii longline limited entry permit.
