FEDERAL REGISTER

Vol. 85 Monday,

No. 178 September 14, 2020

Pages 56471–57076

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

The seal of the National Archives and Records Administration authenticates the Federal Register as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

How To Cite This Publication: Use the volume number and the page number. Example: 85 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1210

[Document Number AMS–SC–19–0109]

Watermelon Research and Promotion Plan; Realignment

AGENCY: Agricultural Marketing Service.

ACTION: Final rule.

SUMMARY: This rule realigns the representation on the National Watermelon Promotion Board (Board) under the Agricultural Marketing Service's (AMS) regulations regarding a national research and promotion program for watermelons. This rule reduces the number of production districts and the number of importers on the Board, accordingly. This rule also makes administrative changes to other provisions of the Watermelon Research and Promotion Plan (Plan).

DATES: Effective October 14, 2020.

FOR FURTHER INFORMATION CONTACT: Stacy Jones King, Agricultural Marketing Specialist, Promotion and Economics Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, Room 1406–S, Stop 0244, Washington, DC 20250–0244; telephone: (202) 731–2117; facsimile: (202) 205–2800; or electronic mail: *Stacy.JonesKing@usda.gov.*

SUPPLEMENTARY INFORMATION: This final rule affecting 7 CFR part 1210 is authorized under the Watermelon Research and Promotion Act (Act) (7 U.S.C. 4901–4916). The Watermelon Research and Promotion Plan is codified at 7 CFR part 1210.

Executive Orders 12866, 13563, and 13771

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules and promoting flexibility. This final rule falls within a category of regulatory actions that the Office of Management and Budget (OMB) exempted from Executive Order 12866 review. Additionally, because this rule does not meet the definition of a significant regulatory action it does not trigger the requirements contained in Executive Order 13771. *See* OMB's Memorandum titled ''Interim Guidance Implementing Section 2 of the Executive Order of January 30, 2017, titled 'Reducing Regulation and Controlling Regulatory Costs' '' (February 2, 2017).

Executive Order 13175

This final rule has been reviewed in accordance with the requirements of Executive Order 13175, Consultation and Coordination with Indian Tribal Governments. The review reveals that this rule will not have substantial and direct effects on Tribal governments and will not have significant Tribal implications.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. It is not intended to have retroactive effect.

Under section 1650 of the Act (7 U.S.C. 4909), a person subject to an order may file a written petition with USDA stating that the plan, any provision of the plan, or any obligation imposed in connection with the plan, is not established in accordance with the law, and request a modification thereof or an exemption therefrom. The petitioner will have the opportunity for a hearing on the petition. Thereafter, USDA will issue a ruling on the petition. If the petitioner disagrees with USDA's ruling, the petitioner may file, within 20 days, an appeal in the U.S. District Court for the district where the petitioner is an inhabitant or in which the person's principal place of business is located.

Background

This rule realigns the Board's representation and procedures under the Plan. The realignment reduces the number of production districts under the Plan for producer and handler representation on the Board, and proportionally reduces the number of importer seats from twelve to nine. The Board administers the Plan with oversight by USDA. Under the Plan, assessments are collected from watermelon producers, handlers and importers. The assessments are used to strengthen watermelon's position in the marketplace and to establish, maintain, and expand markets for watermelons.

Board Membership

Currently, § 1210.320(a) specifies that the Board shall be comprised of producers, handlers, importers and one public representative appointed by the Secretary. Pursuant to § 1210.320(b), the Plan originally divided the United States into seven districts of comparable production volumes of watermelons, and each district is allocated two producer members and two handler members. Section 1210.320(d) specifies that importer representation on the Board shall be proportionate to the percentage of assessments paid by importers to the Board, except that at least one representative of importers shall serve on the Board.

The current Board is comprised of 41 members—14 producers (two from each district), 14 handlers (two from each district), 12 importers, and one public member.

Review of U.S. Production

Section 1210.320(c) requires the Board, at least every five years, to review the districts to determine whether realignment is necessary. In conducting the review, the Board must consider: (1) The most recent three years of USDA production reports or Board assessment reports if USDA production reports are unavailable; (2) shifts and trends in quantities of watermelon produced, and (3) other relevant factors. As a result of the review, the Board may recommend to USDA that the districts be realigned.

Pursuant to section 1210.501, the seven current districts are as follows:

District 1—The State of Florida;

District 2—The States of Kentucky, North Carolina, South Carolina, Tennessee, Virginia and West Virginia;

District 3—The State of Georgia;

District 4—The States of Connecticut, Delaware, Illinois, Indiana, Maine, Maryland, Massachusetts, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Wisconsin, and Washington, DC;

District 5—The State of California;

District 6—The State of Texas;

District 7—The States of Alabama, Alaska, Arizona, Arkansas, Colorado, Hawaii, Idaho, Iowa, Kansas, Louisiana, Minnesota, Mississippi, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oklahoma, Oregon, South Dakota, Utah, Washington, and Wyoming.

The districts listed above were recommended by the Board in 2016 and established through rulemaking by USDA in 2017 (82 FR 44966).

In 2019, the Board's Executive Committee conducted a review of the U.S. watermelon production districts to determine whether realignment was necessary. The committee held teleconferences on August 14 and September 11, 2019, and reviewed production data for 2016, 2017 and 2018 from USDA's National Agricultural Statistics Service's (NASS) Vegetables Annual Summary for 2018 and Market News Reports. Due to changes in the geographical coverage of USDA's data collection on watermelon production, Board assessment data was used for the states for which USDA data was not available. To protect personally identifiable information (PII) of watermelon producers and handlers, the average of 2016–2018 assessment data was converted to a percentage of production. The combined data is shown in Table 1 below.

TABLE 1—STATE PRODUCTION BASED ON USDA AND BOARD ASSESSMENT DATA 2016–2018

State	Percent of 3-year average of U.S. production
Alabama	0.2
Arizona	2.9
Arkansas	0.8

Oregon	1.0
South Carolina	1.8
Texas	11.8
Virginia	0.3
Washington	1.1

Upon review, the Board, at its October 26, 2019 meeting, recommended a reduction in the number of U.S. production districts from seven to five, resulting in a total of ten producer members and ten handler members. The proposed action recommended eliminating two districts, retaining two districts as drawn, and creating three new production districts as follows:

District 1—The State of Florida (no change);

District 2—The State of Georgia (formerly District 3).

District 3—The States of Alabama, Arkansas, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas.

District 4—The States of Connecticut, Delaware, Illinois, Indiana, Kentucky, Maryland, Massachusetts, Maine, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, Wisconsin, and Washington, DC.

District 5—The States of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming.

As shown in Table 2, each district will represent close to 20 percent of the total U.S. production, with a range of approximately 18 to 24.5 percent. USDA has reviewed NASS, Market News, and Board assessment data, and as shown in Table 2, determined that the production estimates are consistent with the Board's recommendation.

TABLE 2—PERCENT OF U.S. PRODUCTION BY DISTRICT [1]

District	Board data (%)	USDA analysis (%)	Difference (%)
1	17.8	18.2	+0.4
2	18.0	18.0	None
3	19.0	19.2	+0.2
4	20.6	20.7	+0.1
5	24.5	23.9	−0.6

Section 1210.501 will be revised accordingly.

Review of Imports

Section 1210.320(e) requires USDA to evaluate the average annual percentage of assessments paid by importers during the three-year period preceding the date of the evaluation and adjust, to the extent practicable, the number of importer representatives on the Board.

Table 4 below shows domestic and import assessment data for watermelons for the years 2016, 2017 and 2018. The data is from the Board's financial audits for 2016, 2017 [2] and 2018.

[1] Table values were rounded to the nearest percent.

[2] National Watermelon Promotion Board, Financial Statements and Supplementary Information, Years Ending March 31, 2016, 2017, and 2018, BDO USA, LLP.

TABLE 4—U.S. AND IMPORT ASSESSMENT DATA FOR 2016–2018

Year	Domestic (U.S.) assessments	Import assessments	Total
2016	$2,319,704	$1,172,834	$3,492,538
2017	2,347,522	1,049,875	3,397,397
2018	2,311,116	1,041,244	3,352,360
3-Year Average	2,326,114	1,087,984	3,414,098
Percent of Total	68 percent	32 percent	

Based on this data, the three-year average annual import assessments for watermelons for 2016–2018 was $1,087,984, approximately 32 percent of the Board's assessment income. To make the number of importers on the Board proportionate to the assessments paid as well as to the percentages of U.S. watermelon produced by the reduced number of production districts, the number of importers should decrease from twelve to nine members.

With this amendment, the new composition of board membership will be reflected in section 1210.502. According to the Board, this action will accurately reflect the distribution of the production and handling of watermelons, and the resulting reduced number of producer, handler, and importer seats will contribute to the effective administration of the program.

Final Regulatory Flexibility Act Analysis

In accordance with the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), AMS is required to examine the economic impact of this rule on small entities. Accordingly, AMS has considered the economic impact of this action on such entities.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions so that small businesses will not be disproportionately burdened. The Small Business Administration defines, in 13 CFR part 121, small agricultural producers as those having annual receipts of no more than $1,000,000 and small agricultural service firms (handlers and importers) as those having annual receipts of no more than $30 million.

According to the Board, there are 505 producers, 140 handlers, and 252 importers who were required to pay assessments under the Plan in 2018. NASS data for the 2018 crop year estimated about 350.5 hundredweight (cwt.) of watermelons were produced per acre in the United States, and the 2018 grower price was $16.90 per cwt.[3] Thus, the value of watermelon production per acre in 2018 averaged about $5,923 (350.5 cwt. × $16.90). At that average valuation, a producer would have to farm over 169 acres to receive an annual income from watermelons of $1,000,000 ($1,000,000 divided by $5,923 per acre equals approximately 169 acres). Using 2017 USDA Census of Agriculture data, a maximum of 373 farms had watermelon acreage greater than or equal to 100 acres, and 13,147 out of a total of 13,520 farms producing watermelons reported less than 100 acres of watermelon on their farms.[4] Therefore, assuming watermelon producers operate no more than one farm, a majority of all U.S. watermelon farms would be classified as small businesses.

Also based on the Board's data, using a price of $0.169 per pound and the number of pounds handled annually, none of the watermelon handlers have receipts over the $30 million threshold.[5] [6] Therefore, all watermelon handlers will be considered small businesses. A handler would have to ship over 177 million pounds of watermelons to be considered large (177,514,793 × $0.169 f.o.b. equals approximately $30,000,000).

Based on 2018 Customs data, over 99 percent of watermelon importers shipped less than $30 million worth of watermelons that year. Based on the above-mentioned data the majority of watermelon producers, handlers and importers that will be affected by this rule will be classified as small entities.

Regarding the value of the commodity, based on 2018 NASS data, the value of the U.S. watermelon crop was about $656.6 million.[7] According to Customs data, the value of 2018 imports was about $312.4 million.

The rule revises sections 1210.321, 1210.403, 1210.501 and 1210.502 of the Plan to reduce the number of U.S. production districts from seven to five, thus eliminating two districts, retaining two districts as drawn, and creating three new districts. Accordingly, section 1210.320 requires the number of importer members to also decrease proportionately from 12 to 9 members, for a total of 30 Board members. The revisions are administrative in nature; therefore, there should be no economic impact on producers, handlers, or importers.

Under the program, the United States is currently divided into seven districts of comparable production volumes of watermelons, and each district is allocated two producer members and two handler members. Further, importer representation on the Board must be, to the extent practicable, proportionate to the percentage of assessments paid by importers, except there must be at least one importer on the Board.

Regarding the economic impact of the proposed rule on affected entities, neither the reduction in the number of production districts nor the reduction in Board membership imposes any additional costs on industry members. The recommended changes are necessary to improve the Board's ability to ensure both a quorum at Board meetings and a sufficient number of potential nominees. Further, the accompanying reduction of importer seats from twelve to nine provides for the equitable representation of producers, handlers and importers on the Board.

Regarding alternatives, the Board considered another scenario in realigning the districts. This scenario (Scenario 1) would have divided the U.S. into four production districts as follows:

District 1 would be comprised of the States of Florida, North Carolina, and South Carolina;

[3] Vegetables, 2018 Summary, March 2019, USDA, p. 10.; *https://downloads.usda.library.cornell.edu/usda-esmis/files/02870v86p/gm80j322z/5138jn50j/vegean19.pdf.*

[4] 2017 Census of Agriculture, April 11, 2019, USDA, National Agricultural Statistics Service, p. 39; *https://www.nass.usda.gov/Publications/AgCensus/2017/Full_Report/Volume_1,_Chapter_1_US/usv1.pdf.*

[5] Vegetables, 2018 Summary, March 2019, USDA, *https://downloads.usda.library.cornell.edu/usda-esmis/files/02870v86p/gm80j322z/5138jn50j/vegean19.pdf.*

[6] National Watermelon Promotion Board assessment records, 2016–2018.

[7] Vegetables, 2018 Summary, March 2019, USDA, p. 10.

District 2 would be comprised of the States of Connecticut, Delaware, Georgia, Maryland, Massachusetts, Maine, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, and Washington, DC;

District 3 would be comprised of the States of Alabama, Arkansas, Illinois, Indiana, Kentucky, Louisiana, Mississippi, Ohio, Oklahoma, Tennessee, and Texas.

District 4 would be comprised of the States of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Iowa, Kansas, Michigan, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, Wisconsin, and Wyoming.

In accordance with the Plan, both scenarios preserve the composition of 2 producers and 2 handlers per district. Ultimately the Board recommended Scenario 2 at their October 26, 2019, retaining the State of Florida as District 1, changing the district designation for Georgia from District 3 to District 2, and creating new Districts 3, 4, and 5.

The changes to the size of the Board, number of production districts, and number of importer members are administrative in nature and have no economic impact on entities covered under the program. As some producers and handlers operate in multiple districts, they would be able to seek nomination for a district of their choice.

Reporting and Recordkeeping Requirements

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Plan's information collection requirements have been previously approved by OMB under OMB control number 0581–0093. This rule does not result in a change to the information collection and recordkeeping requirements previously approved and does not impose additional reporting requirements or recordkeeping burden on domestic producers, handlers, or importers of watermelon.

As with all Federal research and promotion programs, reports and forms are periodically reviewed to reduce information requirements and duplication by industry and public-sector agencies. USDA has not identified any relevant Federal rules that duplicate, overlap, or conflict with this rule. AMS is committed to complying with the E-Government Act, to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

The Board met on October 26, 2019, and recommended realignment of the Board by reducing the number of production districts and proportionally reducing the number of importer seats on the Board from twelve to nine.

A proposed rule concerning this action was published in the **Federal Register** on April 27, 2020 (85 FR 23248). A 30-day comment period ending May 27, 2020, was provided to allow interested persons to submit comments.

Analysis of Comments

Eleven comments were received in response to the proposed rule. Of those eleven comments, ten supported the proposed realignment and reduction in production districts and the reduction of three importer seats. One comment expressed concerns with the proposal.

The comments that supported the proposed changes concur that the proposal accurately reflects changes in the volume of imports and the geographical distribution of watermelon production in the United States. Further, the consolidation of some districts also reflects consolidations throughout the watermelon industry and will make it easier for the Board to find qualified candidates to fill vacancies. Several commenters mentioned that as an added benefit, the reduction in Board membership will also reduce costs for Board meetings, thereby leaving more funds available for watermelon research and promotion activities.

One comment expressed concerns with the proposed rule. The commenter expressed concern that the justification for the Board's recommendation was ambiguous because the ''other relevant factors'' considered as part of the § 1210.320(c) review were not formally defined or explained in the proposal. At its October 26, 2019 Board meeting, which was open to the public, the Board discussed three relevant factors in addition to the production and import data presented in the proposal. First, Board members shared their observations that consolidation in the watermelon industry over the past decade had substantially reduced the number of eligible producers and handlers in the production districts as they are currently drawn. A related issue also discussed was the fact that despite concerted outreach efforts, obtaining enough candidates and nominees to be considered for appointment to the Board had become extremely difficult in recent years. Finally, several members observed that attendance at Board meetings has declined to the point where it is consistently difficult to ensure a quorum.

No changes have been made to the proposed rule based on the comments received.

After consideration of all relevant matters presented, including the information and recommendation submitted by the Board, the comments received, and other relevant information, it is hereby found that this rule, as hereinafter set forth, is consistent with and would effectuate the purposes of the Act.

List of Subjects in 7 CFR Part 1210

Administrative practice and procedure, Advertising, Consumer information, Marketing agreements, Reporting and recordkeeping requirements, Watermelon promotion.

For the reasons set forth in the preamble, 7 CFR part 1210 is amended as follows:

PART 1210—WATERMELON RESEARCH AND PROMOTION PLAN

■ 1. The authority citation for 7 CFR part 1210 continues to read as follows:

Authority: 7 U.S.C. 4901–4916 and 7 U.S.C. 7401.

Subpart C—Rules and Regulations

■ 2. In § 1210.321, revise paragraph (f)(1) to read as follows:

§ 1210.321 Realignment of districts.

* * * * *

(f) * * *

(1) No State in a multi-State district shall have more than three producer and handler representatives concurrently on the Board.

* * * * *

■ 3. In § 1210.403, revise paragraph (c) to read as follows:

§ 1210.403 Voting Procedures.

* * * * *

(c) In multi-State districts, the convention chairperson will direct the eligible producer voters and handler voters from each State to caucus separately for the purpose of electing a State spokesperson for each group. Election of each State spokesperson shall be by simple majority of all individual voters in attendance. In lieu of written ballots, a State spokesperson may be elected by voice vote or a show of hands. The role of the State spokesperson is to coordinate State voting and to cast all State votes.

* * * * *

■ 4. Revise § 1210.501 to read as follows:

§ 1210.501 Realignment of districts.

In accordance with § 1210.320(c) of the Plan, the districts shall be as follows:

(a) *District 1*—The State of Florida.

(b) *District 2*—The State of Georgia.

(c) *District 3*—The States of Alabama, Arkansas, Louisiana, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, and Texas.

(d) *District 4*—The States of Connecticut, Delaware, Illinois, Indiana, Kentucky, Maryland, Massachusetts, Maine, Michigan, New Hampshire, New Jersey, New York, Ohio, Pennsylvania, Rhode Island, Vermont, Virginia, West Virginia, Wisconsin, and Washington, DC.

(g) *District 5*—The States of Alaska, Arizona, California, Colorado, Hawaii, Idaho, Iowa, Kansas, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, North Dakota, Oregon, South Dakota, Utah, Washington, and Wyoming.

■ 5. Revise § 1210.502 to read as follows:

§ 1210.502 Board members.

The Board consists of 10 producers, 10 handlers, nine importers, and one public member appointed by the Secretary.

Bruce Summers,

Administrator, Agricultural Marketing Service.

DEPARTMENT OF ENERGY

10 CFR Parts 429 and 430

[EERE–2017–BT–TP–0005]

RIN 1904–AD67

Energy Conservation Program: Test Procedure for Fluorescent Lamp Ballasts

AGENCY: Office of Energy Efficiency and Renewable Energy, Department of Energy.

ACTION: Final rule.

SUMMARY: On March 18, 2019, the U.S. Department of Energy (''DOE'') published a notice of proposed rulemaking (''NOPR'') to amend the test procedure for fluorescent lamp ballasts. That proposed rulemaking serves as the basis for the final rule. Specifically, in this final rule, DOE updates references to industry standards; clarifies the selection of reference lamps; removes extraneous requirements in the stabilization procedure; provides a second stabilization option for measuring ballast luminous efficiency; and revises the test procedure for measuring standby mode energy consumption.

DATES: The effective date of this rule is October 14, 2020. The final rule changes will be mandatory for product testing starting March 15, 2021. The incorporation by reference of certain publications listed in this rulemaking is approved by the Director of the Federal Register on October 14, 2020. The incorporation by reference of certain other publications listed in this rulemaking was approved by the Director of the Federal Register on June 3, 2011.

ADDRESSES: The docket, which includes **Federal Register** notices, comments, and other supporting documents/materials, is available for review at *http://www.regulations.gov.* All documents in the docket are listed in the *http://www.regulations.gov* index. However, some documents listed in the index, such as those containing information that is exempt from public disclosure, may not be publicly available.

A link to the docket web page can be found at *https://www.regulations.gov/docket?D=EERE-2017-BT-TP-0005.* The docket web page contains instructions on how to access all documents, including public comments, in the docket.

For further information on how to review the docket contact the Appliance and Equipment Standards Program staff at (202) 287–1445 or by email: *ApplianceStandardsQuestions@ee.doe.gov.*

FOR FURTHER INFORMATION CONTACT: Ms. Lucy deButts, U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Office, EE–5B, 1000 Independence Avenue SW, Washington, DC 20585–0121. Telephone: (202) 287–1604. Email: *ApplianceStandardsQuestions@ee.doe.gov.*

Ms. Sarah Butler, U.S. Department of Energy, Office of the General Counsel, GC–33, 1000 Independence Avenue SW, Washington, DC 20585–0121. Telephone: (202) 586–1777. Email: *Sarah.Butler@hq.doe.gov.*

SUPPLEMENTARY INFORMATION: DOE maintains previously approved incorporation by references and incorporates by reference the following industry standards into 10 CFR part 430:

ANSI C78.81, (''ANSI C78.81–2016''), American National Standard for Electric Lamps—Double-Capped Fluorescent Lamps—Dimensional and Electrical Characteristics, approved June 29, 2016.

ANSI C78.375A–2014, (''ANSI C78.375A''), American National Standard for Electric Lamps—Fluorescent Lamps—Guide for Electrical Measures, approved August 28, 2014.

ANSI/NEMA C78.901–2016, (''ANSI C78.901–2016''), American National Standard for Electric Lamps—Single-Based Fluorescent Lamps—Dimensional and Electrical Characteristics, ANSI approved August 23, 2016.

ANSI C82.1–2004 (R2008, R2015), (''ANSI C82.1''), American National Standard for Lamp Ballasts—Line Frequency Fluorescent Lamp Ballast, approved November, 20, 2015.

ANSI C82.2–2002 (R2007, R2016), (''ANSI C82.2''), American National Standard for Lamp Ballasts—Method of Measurement of Fluorescent Lamp Ballasts, approved July 12, 2016.

ANSI C82.3–2016, (''ANSI C82.3''), American National Standard for Lamp Ballasts—Reference Ballasts for Fluorescent Lamps, approved April 8, 2016.

ANSI/NEMA C82.11–2017, (''ANSI C82.11''), American National Standard for Lamp Ballasts—High-frequency Fluorescent Lamp Ballasts, approved January 23, 2017.

ANSI C82.13–2002, (''ANSI C82.13''), American National Standard for Lamp Ballasts—Definitions for Fluorescent Lamps and Ballasts, approved July 23, 2002.

ANSI C82.77–2002, (''ANSI C82.77''), Harmonic Emission Limits—Related Power Quality Requirements for Lighting Equipment, approved January 17, 2002.

I. Authority and Background

Fluorescent lamp ballasts are included in the list of ''covered products'' for which DOE is authorized to establish and amend energy conservation standards and test procedures. (42 U.S.C. 6292(a)(13)) DOE's energy conservation standards and test procedures for fluorescent lamp ballasts are currently prescribed in the Code of Federal Regulations (''CFR'') at 10 CFR 430.32(m) and 10 CFR 430.23(q), respectively. The following sections discuss DOE's authority to establish test procedures for fluorescent lamp ballasts and relevant background information regarding DOE's consideration of test procedures for these products.

A. Authority

The Energy Policy and Conservation Act, as amended (''EPCA''),[1] authorizes DOE to regulate the energy efficiency of a number of consumer products and certain industrial equipment. (42 U.S.C. 6291–6317) Title III, Part B[2] of EPCA established the Energy Conservation Program for Consumer Products Other Than Automobiles, which sets forth a variety of provisions designed to improve energy efficiency. These consumer products include fluorescent lamp ballasts, the subject of this document. (42 U.S.C. 6292(a)(13))

The energy conservation program under EPCA consists essentially of four parts: (1) Testing, (2) labeling, (3) Federal energy conservation standards, and (4) certification and enforcement procedures. Relevant provisions of EPCA specifically include definitions (42 U.S.C. 6291), test procedures (42 U.S.C. 6293), labeling provisions (42 U.S.C. 6294), energy conservation standards (42 U.S.C. 6295), and the authority to require information and reports from manufacturers. (42 U.S.C. 6296)

The testing requirements consist of test procedures that manufacturers of covered products must use as the basis for (1) certifying to DOE that their products comply with the applicable energy conservation standards adopted under EPCA (42 U.S.C. 6295(s)), and (2) making representations about the efficiency of those products (42 U.S.C. 6293(c)). Similarly, DOE must use these test procedures to determine whether the products comply with any relevant standards promulgated under EPCA. (42 U.S.C. 6295(s))

Federal energy efficiency requirements for covered products established under EPCA generally supersede State laws and regulations concerning energy conservation testing, labeling, and standards. (42 U.S.C. 6297) DOE may, however, grant waivers of Federal preemption for particular State laws or regulations, in accordance with the procedures and other provisions of EPCA. (42 U.S.C. 6297(d))

Under 42 U.S.C. 6293, EPCA sets forth the criteria and procedures DOE must follow when prescribing or amending test procedures for covered products. EPCA provides that any test procedures prescribed or amended under this section shall be reasonably designed to produce test results which measure energy efficiency, energy use or estimated annual operating cost of a covered product during a representative average use cycle or period of use and shall not be unduly burdensome to conduct. (42 U.S.C. 6293(b)(3))

In addition, EPCA requires that DOE amend its test procedures for all covered products to integrate measures of standby mode and off mode energy consumption into the overall energy efficiency, energy consumption, or other energy descriptor, unless the current test procedure already incorporates the standby mode and off mode energy consumption, or if such integration is technically infeasible. (42 U.S.C. 6295(gg)(2)(A)) If an integrated test procedure is technically infeasible, DOE must prescribe separate standby mode and off mode energy use test procedures for the covered product, if a separate test is technically feasible. (*Id.*) Any such amendment must consider the most current versions of the International Electrotechnical Commission (''IEC'') Standard 62301 (''IEC 62301'')[3] and IEC Standard 62087[4] as applicable. (42 U.S.C. 6295(gg)(2)(A))

If DOE determines that a test procedure amendment is warranted, it must publish a proposed test procedure and offer the public an opportunity to present oral and written comments on it. (42 U.S.C. 6293(b)(2))

EPCA also requires that, at least once every 7 years, DOE evaluate test procedures for each type of covered product, including fluorescent lamp ballasts, to determine whether amended test procedures would more accurately or fully comply with the requirements for the test procedures to not be unduly burdensome to conduct and be reasonably designed to produce test results that reflect energy efficiency, energy use, and estimated operating costs during a representative average use cycle or period of use. (42 U.S.C. 6293(b)(1)(A)) If the Secretary determines, on his own behalf or in response to a petition by any interested person, that a test procedure should be prescribed or amended, the Secretary shall promptly publish in the **Federal Register** proposed test procedures and afford interested persons an opportunity to present oral and written data, views, and arguments with respect to such procedures. The comment period on a proposed rule to amend a test procedure shall be at least 60 days and may not exceed 270 days. In prescribing or amending a test procedure, the Secretary shall take into account such information as the Secretary determines relevant to such procedure, including technological developments relating to

[1] All references to EPCA in this document refer to the statute as amended through America's Water Infrastructure Act of 2018, Public Law 115–270 (October 23, 2018).

[2] For editorial reasons, upon codification in the U.S. Code, Part B was redesignated Part A.

[3] IEC Standard 62301, *Household electrical appliances—Measurement of standby power* (Edition 2.0, 2011–01).

[4] IEC Standard 62087, *Methods of measurement for the power consumption of audio, video, and related equipment* (Edition 3.0, 2011–04).

energy use or energy efficiency of the type (or class) of covered products involved. (42 U.S.C. 6293(b)(2)) If DOE determines that test procedure revisions are not appropriate, DOE must publish its determination not to amend the test procedures. DOE is publishing this final rule in satisfaction of the 7-year review requirement specified in EPCA. (42 U.S.C. 6293(b)(1)(A))

DOE's test procedure for fluorescent lamp ballasts appears at 10 CFR part 430, subpart B, appendix Q (''appendix Q''). DOE's energy conservation standards for fluorescent lamp ballasts can be found at 10 CFR 430.32(m) and require a minimum power factor and minimum ballast luminous efficiency (''BLE''). In this final rule, DOE updates references to industry standards; clarifies the selection of reference lamps; provides a second stabilization option for measuring ballast luminous efficiency; and revises the test procedure for measuring standby mode energy consumption.

B. Background

DOE published a final rule establishing an active mode test procedure for fluorescent lamp ballasts on April 24, 1991. 56 FR 18677. DOE last completed a full review of the active mode test procedure for fluorescent lamp ballasts on May 4, 2011. 76 FR 25211. Some of the key amendments in that test procedure final rule included updates to industry standards, adopting BLE as the metric for measuring energy efficiency of fluorescent lamp ballasts, and expanding the test procedure to apply to additional products.

DOE published a final rule establishing a standby mode energy consumption test procedure for fluorescent lamp ballasts on October 22, 2009. 74 FR 54445. DOE determined that, according to EPCA's definition of standby mode,[5] fluorescent lamp ballasts capable of standby mode operation are designed to operate in, or function as, a lighting control system where auxiliary control devices send signals to the ballast; and at zero light output, the ballast is standing by, connected to a main power source without being disconnected by an on-off switch or other type of relay. Further, DOE determined that it is not possible for fluorescent lamp ballasts to meet EPCA's definition of ''off mode,''[6] because there is no condition in which the ballast is connected to the main power source and is not in a mode already accounted for in either active mode or standby mode. 74 FR 54445, 54448.

DOE published final rules establishing and amending energy conservation standards for fluorescent lamp ballasts on September 19, 2000, and November 14, 2011, respectively. 65 FR 56740; 76 FR 70547. DOE also published final rules on February 4, 2015, June 5, 2015, and April 29, 2016, to correct and clarify certain requirements and specifications in the CFR relating to energy conservation standards and test procedures. 80 FR 5896; 80 FR 31971; 81 FR 25595. On June 23, 2015, DOE initiated a rulemaking to review energy conservation standards for fluorescent lamp ballasts by publishing a **Federal Register** notice announcing a public meeting and availability of the framework document (''June 2015 framework document''). 80 FR 35886. On October 22, 2019, DOE published a notice of proposed determination (''NOPD'') initially determining that energy conservation standards for fluorescent lamp ballasts do not need to be amended. 84 FR 56540 (''October 2019 NOPD''). DOE held a webinar open to the public on October 30, 2019, during which it described the analyses and results from the October 2019 NOPD and requested comments.[7]

On March 18, 2019, DOE published in the **Federal Register** a NOPR proposing amendments to the fluorescent lamp ballast (''FLB'') test procedure. 84 FR 9910 (''March 2019 NOPR''). This document addresses information and comments received in response to the March 2019 NOPR and details the amendments to the test procedure adopted in this final rule.

DOE received six written comments in response to the March 2019 NOPR from the interested parties listed in Table I.1 of this document.

TABLE I.1—WRITTEN COMMENTS RECEIVED IN RESPONSE TO MARCH 2019 NOPR

Organization(s)	Reference in this NOPR	Organization type

II. Synopsis of the Final Rule

In this final rule, DOE amends 10 CFR 430.3, 10 CFR 430.23(q), and appendix Q as follows: (1) Updates references to industry standards; (2) clarifies the selection of reference lamps; (3) removes extraneous requirements in the stabilization procedure; (4) provides a second stabilization option for measuring BLE; and (5) revises the test procedure for measuring standby mode energy consumption.

The amendments adopted for appendix Q are summarized in Table II.1 compared to the current test procedure as well as the reason for the adopted change.

[5] EPCA defines ''standby mode'' as the condition in which an energy-using product—(1) is connected to a main power source; and (2) offers 1 or more of the following user-oriented or protective functions: (i) To facilitate the activation or deactivation of other functions (including active mode) by remote switch (including remote control), internal sensor, or timer. (ii) Continuous functions, including information or status displays (including clocks) or sensor-based functions. (42 U.S.C. 6295(gg)(1)(A)(iii))

[6] EPCA defines ''off mode'' as ''the condition in which an energy-using product—(I) is connected to a main power source; and (II) is not providing any standby or active mode function.'' (42 U.S.C. 6295(gg)(1)(A)(ii))

[7] A transcript of the public webinar and supporting documents are available in the docket for this proposed determination at: *https://www.regulations.gov/docket?D=EERE-2015-BT-STD-0006.*

TABLE II.1—SUMMARY OF CHANGES IN THE AMENDED TEST PROCEDURE

Current DOE test procedure	Amended test procedure	Attribution
References the 2002 version of ANSI C82.11 for testing high frequency ballasts.	Adds checks on inrush current and references lamp datasheets in ANSI C78.81 and ANSI C78.901 for appropriate maximum glow current.	Industry update to ANSI C82.11.
References lamp datasheets in ANSI C78.81 to specify the appropriate reference lamp to use when testing a particular ballast.	The 2016 version of ANSI C78.81 updates the high frequency characteristics of three lamps currently referenced in Table A.	Industry update to ANSI C78.81.
References lamp datasheets in IEC 60081 Amendment 4 to specify the appropriate reference lamp to use when testing a particular ballast.	Amendment 6 of IEC 60081 updates the high frequency characteristics of two lamps currently referenced in Table A.	Industry update to IEC 60081.
Does not provide detail to determine which lamp to use for testing when ballasts can operate lamps of more than one base type.	Adds direction for how to select a reference lamp to use for testing fluorescent lamp ballasts designed and marketed to operate lamps of multiple base types.	Improve representativeness of test results.
Measures lamp arc voltage, current, and power once per second during stabilization.	Measures lamp arc voltage, current, and power once per minute during stabilization.	Reduce test burden while maintaining representative results.
Operates ballast for no longer than one hour until stable operating conditions are met.	No maximum operating time until stable operating conditions are met.	Reduce test burden while maintaining representative results.
Has one method of stabilization where lamp arc voltage, current, and power are measured once per second until the difference between the maximum and minimum values do not exceed one percent over a four minute moving window.	Allows a second stabilization option where an oven is used to heat the ballasts prior to testing and lamp arc voltage, current, and power are measured once per minute.	Reduce test burden while maintaining representative results.
Measures standby mode power by referencing ANSI C82.2.	References IEC 62301 to measure standby mode power.	Improve the repeatability and reproducibility of test results.
Ballast connects to reference lamp while measuring standby mode power.	Reference lamps are not required when measuring standby mode power.	Reduce test burden while maintaining representative results.
Standby power test conditions are based on conditions defined in ANSI C82.2, which do not include instructions specifying input voltage.	Standby power test conditions are based on conditions defined in appendix Q for the active mode measurement, which include specifications for which input voltage to operate ballasts designed and marketed to operate at multiple input voltages.	Improve representativeness, repeatability, and reproducibility of test results.

DOE is also amending the reporting requirements under 10 CFR 429.26 to require reporting average total lamp arc power, a value that is already determined in appendix Q; specify rounding requirements for average total lamp arc power; and remove references to values no longer required.

DOE has determined that the amendments described in section III of this document and adopted in this final rule will not alter the measured efficiency of fluorescent lamp ballasts, and that the test procedure will not be unduly burdensome to conduct. Discussion of DOE's actions are addressed in detail in section III of this document.

The effective date for the amended test procedure adopted in this final rule is October 14, 2020. Representations of energy use or energy efficiency must be based on testing in accordance with the amended test procedures beginning March 15, 2021.

III. Discussion

A. Scope of Applicability

This rulemaking applies to fluorescent lamp ballasts, which are devices that can start and operate fluorescent lamps by providing a starting voltage and current and limiting the current during normal operation. 10 CFR 430.2. DOE defines a fluorescent lamp as a lamp of certain shapes, lengths, bases, and wattages [8] that is a low pressure mercury electric-discharge source in which a fluorescing coating transforms some of the ultraviolet energy generated by the mercury discharge into light. 10 CFR 430.2.

DOE received comments regarding potential amendments to FLB energy conservation standards. NEMA commented that the market for fluorescent lamps and fluorescent lamp ballasts (particularly, dimming ballasts) is decreasing substantially due to the transition to solid-state lighting (''SSL''). (NEMA, No. 3 at p. 2) [9] NEMA stated that manufacturers are not currently investing, nor are expected to invest, material resources in fluorescent lamp ballasts. *Id.* NEMA added there have been no technological changes since the adoption of the current FLB standards and amending these standards will not result in new investment but rather discontinuance of products. *Id.* ASAP/ACEEE stated it could take many years for existing fluorescent systems to transition to SSL, and fluorescent lighting is still competitive on a lifecycle cost basis. (ASAP/ACEEE, No. 8 at p. 1)

Lutron asserted that amended FLB standards are not technologically feasible due to lack of any technological breakthrough in FLB technology and are not economically justified due to the FLB market decline. (Lutron, No. 6 at p. 2) Lutron added that amended FLB standards are unlikely to meet the energy savings threshold envisioned in the Process Rule. *Id.*

As discussed, DOE issued the October 2019 NOPD in which it initially determined that energy conservation standards for fluorescent lamp ballasts do not need to be amended. 84 FR 56540. DOE will address potential

[8] See definition of ''fluorescent lamps'' in 10 CFR 430.2 for the specific lamps defined as fluorescent lamps.

[9] A notation in the form ''NEMA, No. 3 at p. 2'' identifies a written comment: (1) Made by NEMA; (2) recorded in document number 3 that, unless otherwise specified, is filed in the docket of this test procedure rulemaking (Docket No. EERE–2017–BT–TP–0005–0003) and available for review at *http://www.regulations.gov;* and (3) which appears on page 2 of document number 3.

amendments to the energy conservation standards under that separate review.

Lutron stated DOE should adopt a ''No-Rule Rule'' and not amend FLB test procedures for the following reasons: (1) No technological breakthroughs or investments in fluorescent lamp ballasts since the last rulemaking, (2) decline in FLB sales due to adoption of light emitting diode (''LED'') technology, (3) ballasts are highly efficient, and dimming ballasts already save significant energy over standard non-dimming ballasts, and (4) updating test procedures may result in a significant regulatory burden for manufacturers without achieving energy savings. (Lutron, No. 6 at p. 2)

NEMA stated that, while it was appropriate to update the FLB test procedure as proposed, compliance to the changes should not be effective until amendments to FLB standards are justified in accordance with EPCA. NEMA asserted that some manufacturers may incur higher test cost burdens which should only be imposed if amended FLB standards are justified. (NEMA, No. 3 at pp. 2–3) Lutron stated that, if a ''No-Rule-Rule'' is not possible, it agreed with NEMA's suggestion of aligning the compliance date of amended FLB test procedures and amended FLB standards. (Lutron, No. 6 at pp. 2–3)

In the March 2019 NOPR, DOE preliminarily determined that the proposed amendments to its FLB test procedure would not change measured values; and therefore, would not require manufacturers to retest fluorescent lamp ballasts previously tested and certified under the previous test procedure. The amendments being adopted in this final rule further align the DOE test procedure with industry standards and best practices and clarify existing test methods. As described, DOE has determined that the amendments adopted in this final rule will not alter the measured efficiency of fluorescent lamp ballasts; hence, there is no need to delay the compliance date of the amendments. Additionally, DOE has determined the amendments being adopted in this final rule do not add regulatory burden (see section III.I of this document).

ASAP/ACEEE commented that DOE should address the issue resulting from the statutory exclusion from the definition of general service fluorescent lamps (''GSFLs'') those lamps with a color rendering index (''CRI'') of 87 or greater (''high CRI''). They stated that the exclusion has allowed large numbers of inexpensive T12 [10] linear fluorescent lamps with high CRI to be sold and that these lamps are significantly less efficient than standards-compliant GSFLs. ASAP/ACEEE stated that the sale of high CRI T12 lamps has allowed a continued market for T12 ballasts, and thereby inefficient T12 fluorescent lighting systems.[11] (ASAP/ACEEE, No. 8 at p. 3)

As noted, this rulemaking addresses the test procedure for fluorescent lamp ballasts and does not address GSFLs. The amendments to the test procedure adopted in this final rule are updates to industry standard references and clarifications to the test methods and do not impact the sale of fluorescent lamp ballasts or associated products such as fluorescent lamps.

B. Updates to Industry Standards

The FLB test procedure references several industry standards. Industry periodically updates its testing standards to account for changes in technology and/or developments in test methodology and/or test instruments. In the March 2019 NOPR, DOE identified updated versions of the referenced industry standards incorporated by reference for appendix Q as shown in Table III.1 of this document. 84 FR 9910, 9913.

TABLE III.1—INDUSTRY STANDARDS REFERENCED IN APPENDIX Q WITH UPDATED VERSIONS ADOPTED IN FINAL RULE

Industry standard currently referenced in Appendix Q	Updated versions adopted in this Final Rule *
ANSI C82.11 [12] version 2002 (sections 2.1 and 2.4.1 of appendix Q)	ANSI C82.11 [13] version 2017.
ANSI C82.1 [14] version 2004 (sections 2.1, 2.3.1, and 2.4.1 of appendix Q).	ANSI C82.1 [15] version 2015.
ANSI C82.2 [16] version 2002 (sections 2.1, 2.2.1, 2.2.2, 2.2.3, 2.4.1, 2.4.3, 2.5.1.6, 2.5.1.7, 2.5.1.8, 3.2.1, 3.3.1, and 3.3.3 of appendix Q).	ANSI C82.2 [17] version 2016.
ANSI C82.3 [18] version 2002 (section 2.4.1 of appendix Q)	ANSI C82.3 [19] version 2016.
ANSI C78.375 [20] version 1997 (section 2.4.2 of appendix Q)	ANSI C78.375A [21] version 2014.
ANSI C78.901 [22] version 2005 (Table A of appendix Q)	ANSI C78.901 [23] version 2016.
ANSI C78.81 [24] version 2010 (sections 1.6, 1.7, 1.8, 2.1, 2.3.1, 2.4.1, and Table A of appendix Q).	ANSI C78.81 [25] version 2016.
IEC 60081 Amendment 4, Edition 5, 2010 [26] (Table A of appendix Q)	IEC 60081 Amendment 6, Edition 5, 2017. [27]

* Note: Additionally, this final rule incorporates by reference ANSI C82.77–2002 and IEC 62301 Edition 2.0 in appendix Q.

In the March 2019 NOPR, DOE compared updated and current versions

[10] T indicates the tubular shape of the lamp and the 12 is the diameter in eighths of an inch (*i.e.,* 12/8 inches).

[11] DOE's findings in previous rulemakings of GSFL energy conservation standards have shown that T8 lamps have a higher lamp efficacy (lumens per watt) than comparable T12 lamps. See documents from previous rulemaking at *https://www.regulations.gov/docket?D=EERE-2011-BT-STD-0006.*

Continued

to determine, as directed by EPCA, whether incorporating by reference the latest industry standards would alter measured energy efficiency. (42 U.S.C. 6293(e)(1)) For ANSI C82.2, DOE identified no substantial changes in the 2016 version compared to the 2002 version. For ANSI C82.1, DOE identified no substantial changes in the 2015 version compared to the 2004 version. For ANSI C78.375A, DOE identified no changes in the 2014 version compared to the 1997 version in the ambient conditions or electrical instruments instructions, for which the industry standard is referenced. 84 FR 9910, 9914–9916.

For ANSI C82.11, DOE identified several key changes in the 2017 version compared to the 2002 version. For ANSI C82.3, DOE identified several key changes in the 2016 version compared to the 2002 version. In the March 2019 NOPR DOE tentatively determined these changes would not result in changes to measured values of BLE because the differences do not result in substantive changes to test setup or methodology. 84 FR 9910, 9916.

ANSI C78.81, ANSI C78.901, and IEC 60081 consist of lamp datasheets referenced by Table A of the DOE FLB test procedure to specify the appropriate reference lamp to use when testing a particular ballast. In the March 2019 NOPR, DOE tentatively determined changes to the values of reference lamp characteristics in the latest 2016 versions of ANSI C78.81 and ANSI C 78.901 and IEC 60081 Amendment 6 are within testing tolerances and therefore, will have minimal impact on current requirements. However, the 2016 versions of ANSI C78.81 and ANSI C78.901 remove the low frequency specifications from lamp datasheets for the 32 W 4-foot medium bipin T8 lamp, 59 W 8-foot single pin T8 lamp, and 32 W 2-foot U-shaped medium bipin T8 lamp. Low frequency lamp characteristics and reference ballast characteristics are necessary to determine the appropriate reference lamp for testing low frequency ballasts. In the March 2019 NOPR, DOE proposed adding the low frequency specifications absent in the latest versions of the industry standards directly in appendix Q to ensure measured values are not impacted. 84 FR 9910, 9916–9917.

NEMA supported DOE's proposal to incorporate up-to-date industry standards. (NEMA, No. 3 at p. 3) ASAP/ACEEE also supported the updates if they improve the accuracy of the test procedures, avoid biasing the results, and provide representative results. (ASAP/ACEEE, No. 8 at p. 2) ASAP/ACEEE added that they were not aware of any such problems with the updates proposed. *Id.*

Consistent with its assessment in the March 2019 NOPR, DOE has determined that, because updates to industry standard references do not involve substantive changes to the test setup and methodology, they would not affect measured values. DOE has not identified any potential for bias or non-representative results under these updates as proposed. DOE has determined that incorporation by reference of the latest versions of industry standards will better align DOE's test procedure with updates to test methods that industry considers to be improvements to previous methods and also increase the clarity of DOE test methods. Hence, in this final rule DOE incorporates by reference for appendix Q the industry standards ANSI C78.81–2016, ANSI C78.375A–2014, ANSI C78.901–2016, ANSI C82.1–2004 (R2008, R2015), ANSI C82.2–2002 (R2007, R2016) (referred to as ANSI C82.2–2016 in this rulemaking), ANSI C82.3–2016, ANSI C82.11–2017, ANSI C82.77 and IEC 60081 Amendment 6 (see Table III.1).

Additionally, DOE is ensuring that the necessary low frequency specifications no longer in ANSI C78.81–2016 or ANSI C78.901–2016 remain available in appendix Q. Hence, in this final rule, for the 32 W 4-foot medium bipin T8 lamp, 59 W 8-foot single pin T8 lamp, and 32 W 2-foot U-shaped medium bipin T8 lamp, DOE is specifying directly in new section 2.3.3 of appendix Q the following low frequency specifications: (1) The low frequency lamp characteristics (*i.e.,* arc wattage, approximate cathode wattage, total wattage, voltage, and current), (2) reference ballast characteristics (*i.e.,* rated input voltage, reference current, impedance) and (3) cathode heating requirements for rapid start circuits. These specifications are the same as those in the earlier versions of the standards, ANSI C78.81–2010 and ANSI C78.901–2005.

In the March 2019 NOPR, DOE also proposed to incorporate by reference for appendix Q the following industry standards not already incorporated: (1) ANSI C82.77–2002 [28] because this standard is explicitly referenced by ANSI C82.11–2017, which DOE proposed to incorporate by reference; and (2) IEC 62301 [29] because it provides specific instructions for standby mode measurements. 84 FR 9910, 9914–9917.

Signify suggested that DOE reference the 2014 version of ANSI C82.77 rather than the 2002 version and noted that ANSI is currently working on an update, with expected publication in 2019. Signify specified that the two major changes in the 2014 version were to describe harmonic current limits for LED lighting and the displacement and harmonic factor optional power quality metric. (Signify, No. 7 at p. 1)

For testing high frequency ballasts, DOE's test procedure references the 2002 version of ANSI C82.11, which DOE is updating to the 2017 version in this final rule. While ANSI C82.11–2002 provides the limits for harmonic distortion of input currents, ANSI C82.11–2017 references ANSI C82.77–2002 for these limit specifications. The harmonic distortion input current limits in ANSI C82.77–2002 are the same as those specified in ANSI C82.11–2002. Because the update to ANSI C82.11 references the 2002 version of ANSI C82.77, DOE proposed to incorporate by reference ANSI C82.77–2002 into appendix Q. 84 FR 9910, 9915. Additionally, in its normative references section, ANSI C82.11–2017 states that at the time of publication the editions indicated are valid and lists the 2002 version of ANSI C82.77. While the section also encourages the possibility of applying the most recent editions, at the time of publication of ANSI C82.11–2017, the 2014 version of ANSI C82.77 was available but not referenced by the standard. The harmonic distortion input current limits for modular office furniture, which includes fluorescent lamp sources, is 155 percent in the 2014 version compared to 32 percent in the 2002 version. DOE notes that the key changes in the 2014 version of ANSI C82.77 noted by stakeholders are not

[22] ANSI Standard C78.901, *American National Standards for Electric Lamps—Single-Based Fluorescent Lamps—Dimensional and Electrical Characteristics* (approved March 23, 2005).

[23] ANSI Standard C78.901, *American National Standards for Electric Lamps—Single-Based Fluorescent Lamps—Dimensional and Electrical Characteristics* (approved August 23, 2016).

[24] ANSI Standard C78.81, *American National Standard For Electric Lamps—Double-Capped Fluorescent Lamps— Dimensional and Electrical Characteristics* (approved January, 14, 2010).

[25] ANSI Standard C78.81, *American National Standard For Electric Lamps—Double-Capped Fluorescent Lamps— Dimensional and Electrical Characteristics* (approved June 29, 2016).

[26] *IEC Standard—Double-capped fluorescent lamps—Performance specifications,* (Amendment 4, Edition 5.0) (approved February 2010).

[27] *IEC Standard—Double Capped Fluorescent Lamps—Performance specifications,* (Amendment 6, Edition 5.0) (approved August 2017).''

[28] ANSI Standard C82.77, *American National Standard—Harmonic Emission Limits—Related Power Quality Requirements* (approved January 17, 2002).

[29] IEC 62301, *Household electrical appliances—Measurement of standby power* (Edition 2.0, 2011–01).

relevant (*i.e.,* LED lighting harmonic current limits and optional power quality metric) to DOE's FLB test procedure. Therefore, in this final rule DOE is adopting the 2002 version of ANSI C82.77 for incorporation by reference.

DOE also received comments on IEC 62301, which it proposed for incorporation by reference for measurements of standby mode power of fluorescent lamp ballasts. These comments are discussed in section III.E of this document, which specifically addresses standby mode and addresses the related comments.

C. Definitions

In the March 2019 NOPR, DOE proposed several updates to definitions related to the FLB test procedure. Currently, ''designed and marketed'' means that the intended application of the lamp is clearly stated in all publicly available documents (*e.g.,* product literature, catalogs, and packaging labels).[30] In the March 2019 NOPR, DOE proposed to specify explicitly that the term also includes the intended application of ballast consistent with the application of the definition of ''designed and marketed'' to fluorescent lamp ballasts. 84 FR 9910, 9917.

DOE also proposed to update definitions for the instant-start, programmed-start, and rapid-start starting methods in appendix Q. Specifically, DOE proposed to add language to these definitions stating that these starting methods are typically indicated on publicly available documents of a fluorescent lamp ballast. DOE finds that this language will provide further guidance in identifying the starting method of the ballast.

Additionally, DOE proposed to remove the following terms in appendix Q that are currently defined but will no longer be used in the revised test procedure: ''AC control signal,'' ''cathode heating,'' ''DC control signal,'' ''F34T12 lamp,'' ''F96T12/ES lamp,'' ''F96T12HO/ES lamp,'' ''PLC control signal,'' and ''wireless control signal.'' ''AC control signal'' and ''DC control signal'' are not reflective of the products currently available on the market, and the rest of the terms are not used in the FLB test procedure.

NEMA and Signify agreed with DOE's proposed removal of unused definitions. (NEMA, No. 3 at p. 3; Signify, No. 7 at p. 3) DOE has determined that the removal of definitions described in this section will improve the clarity of FLB test procedure and will not affect measured values.

Hence, in this final rule DOE is (1) updating the term ''designed and marketed'' in 10 CFR 430.2 to include the intended application of ballasts, (2) updating language in definitions of ''instant-start,'' ''programmed-start,'' and ''rapid-start,'' and (3) removing the following terms in the Definitions section of appendix Q: ''AC control signal,'' ''cathode heating,'' ''DC control signal,'' ''F34T12 lamp,'' ''F96T12/ES lamp,'' ''F96T12HO/ES lamp,'' ''PLC control signal,'' and ''wireless control signal.''

D. Amendments to Active Mode Test Method

1. General

In the March 2019 NOPR, DOE proposed several updates to appendix Q regarding instrumentation, test setup, test conditions, and measurements. DOE also proposed a general instruction in section 2.1 (''Active Mode Procedure'') that specifications in referenced industry standards that are recommended, stated as ''shall'' or ''should'' be met, or that are not clearly mandatory are, for purposes of the DOE test procedure, mandatory (unless they conflict with language in appendix Q) to ensure testing is conducted in a uniform manner by different entities to yield consistent results. 84 FR 9910, 9918. DOE received no comments on this proposed change. DOE has determined this is not a substantive change to the test procedure, and will not change measured values. DOE is adopting section 2.1 as proposed.

2. Instrumentation

In the March 2019 NOPR, DOE proposed to reference section 9 (''Electrical Instruments'') of ANSI C78.375A–2014 in section 2.2 (''Instruments'') of the active mode test procedure instead of referencing ANSI C82.2 generally. The reference to ANSI C82.2 is being updated from the 2002 version to the 2016 version in this final rule. Both versions of ANSI C82.2 reference ANSI C78.375A–1997 but also specify that the latest version of ANSI C78.375 applies. The latest version of ANSI C78.375 (the 2014 version) makes no updates to its electrical instruments section compared to the 1997 version (see section III.B). 84 FR 9910, 9919.

DOE did not receive any comments on these proposed amendments. DOE has determined that directly referencing ANSI C78.375A–2014 improves the readability of the DOE test procedure by identifying subsequently referenced industry standards, that this change does not make substantive changes to the test procedure, and that this amendment will not change measured values. In this final rule, DOE adopts the clarifications regarding references to industry standards in the ''Instrumentation'' section as described in this section.

3. Test Setup

In the March 2019 NOPR, DOE proposed several amendments to section 2.3 (''Test Setup'') of the active mode test procedure in appendix Q. These included: (1) More precisely referencing industry standards, (2) renaming the ''Power Analyzer'' subsection to ''Test Circuits'' and clarifying the specified power analyzer capabilities, (3) clarifying selection of reference lamps, and (4) clarifying instructions for identifying the reference lamp.

a. References to Industry Standards

Section 2.3.1 of the active mode test procedure in appendix Q references ANSI C82.1 and ANSI C78.81 without specific instruction regarding applicability to low- or high-frequency ballasts. In the March 2019 NOPR, DOE proposed to specify use of ANSI C82.1 to test low-frequency ballasts and use of ANSI C82.11 to test high-frequency ballasts. 84 FR 9910, 9918. DOE also proposed to remove the reference to ANSI C78.81, which contains no wiring instructions. *Id.* In conjunction with referencing ANSI C82.1, DOE proposed to add an instruction to disregard section 5.3 (''Ballast Output'') of the standard. *Id.* Section 5.3 of ANSI C82.1 specifies minimum power factor requirements, which may be confused with the minimum power factor requirements set forth in DOE's energy conservation standards for fluorescent lamp ballasts (see 10 CFR 430.32(m)). In referencing ANSI C82.11, DOE proposed to disregard section 5.3.1 (''Ballast Factor'') in the standard because the DOE test procedure does not specify determination of ballast factor. 84 FR 9910, 9918. DOE also proposed to disregard Annex D (''Dimming Ballast Energy Efficiency Test Method'') and section 5.13 (''Ballast Efficiency'') in ANSI C82.11 for the active mode test procedure of measuring BLE at full light output, a metric that is different from ballast efficiency described in these sections. 84 FR 9910, 9918–9919.

DOE did not receive any comments on the proposed amendments. DOE has determined that these updates provide clearer instructions on using referenced

[30] The definition of ''designed and marketed'' is applicable to terms related to the following covered lighting products: Fluorescent lamp ballasts; fluorescent lamps; general service fluorescent lamps; general service incandescent lamps; general service lamps; incandescent lamps; incandescent reflector lamps; medium base compact fluorescent lamps; and specialty application mercury vapor lamp ballasts. 10 CFR 430.2.

industry standards and do not make substantive changes to the test procedure or change measured values. In this final rule, DOE adopts the clarifications regarding references to industry standards in the ''Test Setup'' section as described in this section.

b. Updates to Power Analyzer

In the March 2019 NOPR, DOE also proposed to rename the ''Power Analyzer'' section (section 2.3.2 of appendix Q) to ''Test Circuits'' because it provides instructions regarding not only the power analyzer but also for connecting the power supply, ballast, and lamp in the appropriate circuit. Section 2.3.2.1 of appendix Q requires that the power analyzer must have ''n + 1'' channels where ''n'' is the number of lamps the ballast can operate. In the March 2019 NOPR, DOE also proposed to specify that ''n'' is the maximum number of lamps the ballast is designed and marketed to operate, to ensure that the power analyzer has enough channels. 84 FR 9910, 9918.

DOE did not receive any comments on the proposed amendments. DOE has determined these updates provide clearer instructions regarding the power analyzer setup and do not make substantive changes to the test procedure or change measured values. In this final rule, DOE adopts the clarifications regarding the power analyzer setup as described in this section.

c. Selection of Reference Lamps

As compared to when DOE initially established a test procedure for fluorescent lamp ballasts, the market now offers certain ballasts that each can operate lamps of more than one lamp base type and diameter—for example, ballasts that can operate T5 (miniature bipin), T8 (medium bipin), and T12 lamps (both recessed double contact and slimline). Because appendix Q currently does not specify which reference lamp to select for these types of ballasts, in the March 2019 NOPR, DOE proposed to provide additional direction in appendix Q. First, DOE proposed in newly added section 2.3.3.3 that a ballast designed and marketed to operate lamps of multiple base types, except for sign ballasts, must be tested with one base type in the following order of decreasing preference: Medium bipin, miniature bipin, single pin, and recessed double contact. 84 FR 9910, 9918. Second, DOE proposed in newly added section 2.3.3.4 to require, after selecting the base type, a ballast designed and marketed to operate lamps of multiple diameters must be tested with one diameter in the following order of decreasing preference: T8, T5, or T12. *Id.*

NEMA stated that base type has less influence on efficiency measurements than the number and type of lamps being operated, emphasizing that the number of lamps is more relevant. (NEMA, No. 3 at p. 3) Signify commented that, while DOE's proposed criteria may work, because DOE's efficiency standard for fluorescent lamp ballasts is a function of the ballast circuit and output power, it would be simpler to specify choosing the maximum lamp power for multi-lamp type ballasts. Signify stated that testing for the highest lamp power results in testing for the highest efficiency requirement. Signify added that the ballast will operate at its maximum power with the maximum load regardless of lamp base type. (Signify, No. 7 at pp. 2–4)

DOE based the proposed selection of the base type and diameter of the reference lamp for ballasts that can operate multiple lamp types on the most common products on the market. As noted by commentators, base type does not impact lamp power. However, lamp diameters may impact lamp power. Hence, the order of preference dictated by most common diameter may not always result in selecting the lamp diameter with the maximum lamp power. Testing ballasts that can operate multiple lamp types with the most common lamp type provides test results more appropriately representative of an average period of use. (See, 42 U.S.C. 6293(b)(3)) DOE also notes that, regardless of the selection of base type or diameter, section 2.3.1.4 of appendix Q already requires that the ballast be tested connected to the maximum number of lamps the ballast is designed and marketed to operate.

DOE has determined the updates to the selection of reference lamps for ballasts that can operate more than one lamp type adds consistency and repeatability to the test procedure and do not make substantive changes to the test procedure or change measured values. In this final rule, DOE adopts the selection criteria for reference lamps for ballasts that can operate more than one lamp type as described in this section.

d. Reference Lamp Identification

Section 2.3.1.3 of appendix Q, which pertains to testing in active mode, specifies that the fluorescent lamp used for testing must be a reference lamp as defined in ANSI C82.13 and be seasoned for at least 12 hours. ANSI C82.13 states that reference lamps are ''seasoned lamps which under stable operating conditions and in conjunction with the specified reference ballast operate at'' certain voltage, wattage, and current. In the March 2019 NOPR, DOE proposed further clarification in newly added section 2.3.3.1 that the reference lamp be tested with a reference ballast that meets the criteria of the 2016 version of ANSI C82.3, the industry standard for reference ballasts of fluorescent lamps. ANSI C82.13 also states that reference lamps must meet certain voltage, wattage, and current criteria under stable operating conditions. Hence, DOE also proposed to include the stabilization criteria for reference lamps as specified in newly added section 2.5.2.1 of appendix Q. 84 FR 9910, 9918.

In the March 2019 NOPR, DOE also proposed to remove references to ''rapid-start lamps'' and ''instant-start lamps'' in the ''Ballast Type'' column in Table A. The starting method (*e.g.* rapid start, instant start) is dictated by the type of ballast, and the lamp datasheet referenced by Table A for each lamp type provides the appropriate reference lamp specifications for the applicable starting method. As such, including the lamps' associated starting method in the Ballast Type column of this table is unnecessary and potentially confusing. DOE also proposed changing the title of the table from Table A to Table 1. 84 FR 9910, 9916, 9932.

DOE did not receive any comments on the proposed amendments related to the reference lamps. DOE has determined these updates provide explicit instructions to ensure correct procedures and requirements are followed when identifying a reference lamp that meets the definition in ANSI C82.13. DOE has further determined that these amendments do not make substantive changes to the test procedure or change measured values. In this final rule, DOE adopts the changes relating to identifying reference lamps described in this section.

4. Test Conditions

Section 2.4 of appendix Q, which pertains to the active mode test procedure, generally references ANSI C82.2 for all test conditions. In the March 2019 NOPR, DOE proposed to specifically reference ANSI C82.2–2016 sections 3 ''Pertinent measurements'' and 4 ''Electrical supply characteristics—test ballast measurement circuits.'' DOE also proposed to remove instructions in section 2.4.1 of appendix Q regarding normative references in ANSI C82.2, since DOE proposed directly referencing industry standards when necessary rather than relying generally on the normative references in ANSI C82.2.

Similarly, section 2.4.2 of appendix Q generally references ANSI C78.375 to specify requirements for room temperature and air circulation in the test facility. In the March 2019 NOPR, DOE proposed to specifically reference ANSI C78.375A–2014 section 4, ''Ambient Conditions for Lamp Measurements,'' which contains the appropriate information for temperature and air movement requirements.

DOE did not receive any comments on these proposed amendments. DOE determined that these updates provide more direct references to industry standards, and do not make substantive changes to the test procedure or change measured values. In this final rule, DOE is revising general references to ANSI C82.2 and ANSI C78.375A in section 2.4 of appendix Q to provide more precise references to sections 3 and 4 of ANSI C82.2–2016 and section 4 of ANSI C78.375A–2014, as described in this section.

5. Test Method for Ballast Luminous Efficiency

In the March 2019 NOPR, DOE proposed the following amendments to section 2.5 (''Test Method'') of appendix Q, which pertains to the active mode test procedure: (1) Revising the stabilization procedure, including adding a second stabilization option, and (2) requiring measuring lamp arc current and voltage as root mean square (''RMS'') values.

a. Stabilization Criteria

In response to the June 2015 framework document, Signify (as Philips Lighting) recommended DOE adopt a second stabilization option to use when measuring BLE that was developed by industry stakeholders. (Philips Lighting, Docket EERE–2015–BT–STD–0006, No. 8 at pp. 2–5) This stabilization option was also supported by comments from NEMA and Universal Lighting Technologies (''ULT''). (NEMA, Docket EERE–2015–BT–STD–0006, No. 12 at p. 2; ULT, Docket EERE–2015–BT–STD–0006, No. 6 at p. 2) DOE evaluated the second stabilization option as recommended by Signify and proposed its adoption in the March 2019 TP NOPR (''Option 2''). 84 FR 9910, 9919. The Option 2 stabilization method proposed would incorporate by reference the method in Annex D of ANSI C82.11. Specifically, DOE proposed that stable operating conditions under this option be determined according to steps 1 through 6 of section D.2.1 in Annex D of ANSI C82.11.

NEMA and Signify supported DOE's proposal to allow the Option 2 stabilization method for measuring the BLE of ballasts at full light output, stating it reduces testing burden and data management complexity without affecting the accuracy of energy efficiency measurements. (NEMA, No. 3 at p. 4; Signify, No. 7 at p. 6) NEMA suggested DOE offer both Option 1 and Option 2 stabilization methods because some manufacturers will choose to continue with the Option 1 method. (NEMA, No. 3 at p. 4) ASAP/ACEEE supported use of the optional Option 2 stabilization method so long as it is statistically comparable to the current method. ASAP/ACEEE asked DOE to demonstrate that the two options provide statistically identical results before allowing the Option 2 stabilization method. (ASAP/ACEEE, No. 8 at p. 2)

DOE has determined that the second stabilization method will save overall testing time, particularly when testing large batches of ballasts. In response to the June 2015 framework document, Signify (as Philips Lighting) provided BLE test data using both methods for T5 and T8 rapid start and T8 instant start ballasts. For each type of ballast, Philips tested five units of four different models and provided an average BLE for each model at 120 V and 277 V. (Philips Lighting, Docket EERE–2015–BT–STD–0006, No. 8, pp. 2–5) [31] Because the data did not include total lamp arc power for the ballast models, DOE could not conduct an analysis of how these reported values would comply with FLB standards. DOE did again review and compare the methodologies of the two options. Option 2 is different from Option 1 as follows: (1) Option 2 involves pre-heating the ballast in an oven and pre-burning the lamp with a similar ballast while Option 1 does not; and (2) Option 2 requires reaching stable conditions over a five-minute window while Option 1 requires a four-minute window. DOE has determined the difference between the two methods is not substantive enough to yield different final represented values. Pre-heating the ballast will mainly allow the ballasts to be stabilized more quickly and the difference between a five-minute and four-minute window is minimal. Therefore, DOE has determined that Option 2 only impacts the time it takes to achieve stabilization and does not impact final represented values. In this final rule DOE adopts the second stabilization option (''Option 2'') as described in the March 2019 NOPR.

Currently, section 2.5.1.2.1 of appendix Q requires that lamp arc voltage, current, and power be measured once per second while determining stability. In the March 2019 NOPR, DOE proposed to modify the requirement that lamp arc voltage, current, and power be measured once per second, to require instead that those factors be measured once per minute in the Option 1 stabilization method. The once-per-minute requirement is already incorporated in the Option 2 stabilization method. 84 FR 9910, 9919–9920.

NEMA and Signify supported DOE's proposal to change the sampling frequency from one second to one minute in the Option 1 stabilization method, asserting the change will reduce the data storage needs and associated costs. (NEMA, No. 3 at p. 3; Signify, No. 7 at pp. 4–5) NEMA added that lamp-and-ballast systems have high thermal mass and that temperature does not change quickly, thereby generating redundant data at a per-second sampling frequency. (NEMA, No. 3 at p. 3)

As stated in the March 2019 NOPR, DOE reviewed the stabilization criteria in IES LM–9 (proposed in the Option 2 stabilization method) and tentatively determined that taking measurements once per minute to determine if a fluorescent lamp has stabilized is sufficient to determine if a fluorescent lamp ballast has stabilized. 84 FR 9910, 9919. Therefore, DOE has determined that a per-second sampling frequency is unnecessary and its removal would not impact final steady-state conditions reached. In this final rule, DOE is changing the sampling frequency from one second to one minute in the Option 1 stabilization method.

Section 2.5.1.2 of appendix Q currently requires operating the ballast at full output for at least 15 minutes but no longer than 1 hour until stable operating conditions are reached. In the March 2019 NOPR, DOE stated that it does not find a need to restrict the maximum time required to achieve stable operating conditions and therefore proposed to remove the maximum time of one hour required to achieve stable operating conditions in the Option 1 stabilization method. 84 FR 9910, 9919–9920.

NEMA and Signify supported changing the requirement that fluorescent lamp ballasts cannot be operated for longer than one hour to determine stable operating conditions. NEMA stated that in some cases, especially with ballasts that are

[31] These documents were submitted to the docket of DOE's rulemaking to review energy conservation standards for fluorescent lamp ballasts (Docket No. EERE–2015–BT–STD–0006).

potted,[32] it may take some time for ballast components to reach optimal operating temperature. Signify stated that, for a ballast tested with an amalgam lamp or any other energy saving lamp type, the proposed change may reduce test costs by preventing repeat testing if the system has not stabilized in an hour. (NEMA, No. 3 at pp. 3–4; Signify, No. 7 at p. 5) ASAP/ACEEE expressed concern that lifting the one hour restriction may result in test data being collected before ballasts achieve stable operating conditions. (ASAP/ACEEE, No. 8 at p. 2)

Per both Option 1 and Option 2 stabilization methods, a lamp-ballast system is determined to be stable when the differences in measured values of each lamp arc voltage, current, and power do not exceed one percent over a four-minute moving window. To achieve stabilization, this criterion must be met even if the stabilization period exceeds one hour. Hence, in this final rule DOE is removing the maximum stabilization time requirement, as it is irrelevant in determining whether final steady-state conditions have been reached.

b. Measurements

Based on general industry practice of electrical circuit measurements, DOE has interpreted the measurements for lamp arc current and lamp arc voltage to be RMS values. In the March 2019 NOPR, DOE proposed to make explicit this industry practice. 84 FR 9910, 9920.

DOE did not receive any comments on this proposed amendment. DOE has determined that these updates provide clearer instructions on taking measurements consistent with industry practice and do not make substantive changes to the test procedure or change measured values. In this final rule, DOE adopts the explicit direction that measurements of lamp arc current and lamp arc voltage must be RMS values.

In the March 2019 NOPR, DOE also proposed to amend references to sections of ANSI C82.2 as they pertain to taking measurements. 84 FR 9910, 9920. Specifically, DOE proposed to remove references to sections 3.2.1 and 4 of ANSI C82.2 for measuring input current and voltage. DOE initially determined that 3.2.1 of ANSI C82.2 lists parameters to measure for ballast input operating conditions and provides no measurement specifications and that section 4 of ANSI C82.2 provides electrical supply specifications relevant to test conditions but not measurements. *Id.* DOE also proposed to retain the reference to section 7 of ANSI C82.2, but add instruction to disregard references to Figure 1 and Figure 3, as Figure 1 is not relevant for input power measurements and Figure 3 is unnecessary as it specifies a circuit to measure current in rapid start ballasts, which is already provided in the DOE test procedure. *Id.*

NEMA supported DOE's proposal to replace the existing ANSI C82.2 references stating: Section 3.2.1 referenced the ballast efficiency factor metric and not BLE; and the referenced figures showed separate wattage, voltage and current meters, whereas modern testing facilities would be using power analyzers to take measurements. (NEMA, No. 3 at p. 4) Signify suggested DOE retain section 4, stating that several technical requirements in section 4 affect electrical and energy efficiency measurements. (Signify, No. 7 at p. 7)

DOE agrees that section 4 of ANSI C82.2 is a pertinent section to reference. Because it provides electrical supply specifications, DOE references it in the ''Test Conditions'' section rather than in the ''Test Method'' section of the active mode test procedure. DOE has determined that section 3.2.1 of ANSI C82.2 is unnecessary, as it only lists parameters to measure for ballast input operating conditions but provides no measurement specifications. Regarding the referenced figures, only Figure 2 in ANSI C82.2, which involves measuring a ballast's input voltage and current, is relevant to taking input measurements. Hence, in this final rule, in the ''Test Method'' section of the active mode test procedure, DOE removes references to sections 3.2.1 and 4 for measuring input voltage and input current, and instead specifies section 7 with the exclusion of Figure 1 and Figure 3 for measuring input power, input voltage, and input current.

6. Measuring Ballast Performance at Less Than Full Light Output

In the March 2019 NOPR, DOE assessed comments received in response to the June 2015 framework document regarding measuring the performance of fluorescent lamp ballasts at dimmed light output levels and proposed a method to measure ballast efficiency (''BE'') at reduced light output levels for representations in the marketplace. 84 FR 9910, 9920–9921. The proposed BE measurement was the ballast output power divided by the ballast input power, where the ballast output power includes not only the lamp arc power but also the filament power (*i.e.,* ''cathode power'') and power provided for other features such as networking and sensors. Thus, the proposed BE measurement was different than BLE, which does not include filament power in the ballast output power measurement. The proposal did not require manufacturers to test for and measure BE; but, if a manufacturer were to choose to make representations of BE at reduced light output levels, it would have been required to use the test procedure for the BE metric provided in Annex D of ANSI C82.11–2017. Consistent with Annex D, DOE's proposed test method would have applied only to measurements at light output levels at or greater than 50 percent of full light output and require use of the Option 2 stabilization method (see section III.D.5.a of this document). 84 FR 9910, 9921.

DOE received several comments on the proposed test method for measuring BE at reduced light output levels. NEMA stated that, when dimming a fluorescent lamp ballast, cathode heat must be applied [33] to ensure that the reduction in the arc discharge current does not result in shortened lamp lifetime. NEMA asserted that power required to maintain cathode heat (*i.e.,* cathode power, filament power) must be included in the ballast output power measurement. NEMA added that, because the arc discharge and cathode heating currents flow through the same wire and low levels of power are being measured, it is not possible to make reliable measurements below 50 percent light output. (NEMA, No. 3 at p. 4) Signify supported DOE's proposed test method for BE, stating that the test procedures in ANSI C82.11–2014 provide a high level of accuracy and repeatability for measurements at 50 percent and full light output. (Signify, No. 7 at p. 6)

NEMA described a multi-channel measurement approach for BE testing that relies on 13 time-synchronized channels for a 4-lamp fluorescent lamp ballast to capture the input and output power in the same time interval. NEMA stated this approach would require (1) three power analyzers, each costing about $20,000, as most power analyzers have a maximum of six channels, and (2) a test management computer system and software costing about $5,000 to control and synchronize the analyzers. NEMA stated that, while some labs may have this equipment, others may not and may choose not to make the expenditure; resulting in some manufacturers not making BE

[32] In electronics, ''potting'' refers to the process of filling an electronic assembly with a solid or gelatinous compound to provide shock and vibration resistance, as well as protection against moisture and corrosion.

[33] NEMA referenced NEMA Standard LL–9 2011 for guidance related to cathode heat requirements during dimming.

representations of some or all of their products that may require it. (NEMA, No. 3 at p. 5) Signify stated that the test method for measuring BE at reduced light outputs does not necessarily require purchasing new equipment, as power analyzers are also used to measure BLE. Signify explained that the test method can be implemented utilizing (1) a dedicated multi-channel power analyzer, (2) two or more power analyzers used simultaneously, or (3) one power analyzer measuring one lamp port at a time. Signify noted that a multi-channel power analyzer can cost between $2,200 to $20,000, which is comparable to a power analyzer. Signify also stated that the test method for measuring BE would already be adopted by any lab that is accredited to National Voluntary Laboratory Accreditation Program and that tests ballasts at reduced light output levels per ANSI standards. (Signify, No. 7 at pp. 9, 13–14)

Lutron asserted that the efficiency measurement of ballasts at reduced light outputs specified in ANSI C82.11–2014 is slightly different than that required to meet CEC's Title 20 energy efficiency regulations for deep-dimming [34] fluorescent lamp ballasts, and therefore may require significant re-testing without resulting in any energy savings. Lutron added that testing efficiency at reduced light output will be very expensive, as it requires highly specialized equipment and third-party labs will be able to test only a few samples per day. Lutron also noted that the test method for measuring BE at reduced light outputs had been available in ANSI C82.11 since 2014, giving manufacturers ample opportunity to begin publishing such efficiencies. Lutron stated it did not foresee an equivalent DOE test method to increase the use of this metric, as manufacturers are no longer investing in fluorescent technology. (Lutron, No. 6 at pp. 2–3)

CEC and CA IOUs stated that DOE's proposed BE metric is an inappropriate measurement of efficiency at reduced light outputs, as it does not count cathode power used at lower light outputs as a loss. (CA IOUs, No. 5 at p. 1; CEC, No. 4 at p. 1) CEC stated that, while certain dimming levels require cathode heating to protect against lamp failure, this is not necessary at all dimming levels. (CEC, No. 4 at p. 2) CA IOUs stated that the BE metric would result in falsely high efficiency ratings, and CEC asserted that the BE metric would allow any amount of cathode power to be used, whether necessary or not. (CA IOUs, No. 5 at p. 1; CEC, No. 4 at p. 2)

ASAP/ACEEE stated that energy efficiency ratings for dimmable ballasts should reflect both the light level output at which a ballast must provide cathode power to sustain lamp ignition and the efficiency of the ballast to illuminate the lamp. They recommended DOE review comments submitted by CEC to revise the proposed BE test method. (ASAP/ACEEE, No. 8 at pp. 1–2) CA IOUs stated that, while cathode power is required at lower lamp currents, it is not necessary at typical lamp currents nearer to full output, and multiple manufacturers employ cathode ''cut out'',[35] which removes cathode power when it is not required. CA IOUs stated that cathode cut out can result in significant energy savings and should be considered a key metric for determining ballast efficiency. CA IOUs added this can only be done using the BLE metric at low light output levels. CA IOUs stated DOE should include testing for both BE and BLE regardless of light output level. (CA IOUs, No. 5 at pp. 3–4)

CEC also suggested alternative options including (1) requiring measurement of both ballast BLE and BE for any performance measurements at light levels less than 100 percent, (2) requiring the BLE measurement at the light level output just above the threshold where cathode heating would be necessary as well as at light levels above this threshold, and measurement of BE at light outputs below this level,[36] or (3) an alternative method that allows for the amount of, and cut-in light level output point of, cathode power to be measured. (CEC, No. 4 at pp. 1–3)

ASAP/ACEEE expressed concern that DOE's proposed test method does not specifically measure cathode power at any light output less than 100 percent. (ASAP/ACEEE, No. 8 at pp. 1–2) CEC added that the technical challenges to measuring the BLE at light output levels less than 50 percent should not be a reason for DOE to not develop appropriate efficiency metrics and standards for dimming ballasts. (CEC, No. 4 at pp. 3–4)

DOE is maintaining the metric of BLE at full light output for representations and for determining compliance with the current energy conservation standards. The BLE metric accounts for cathode power as a loss because DOE's test procedure isolates lamp arc voltage by capturing cathode power in the input power measurement, but not in the output power measurement (which is quantified as total lamp arc power). 76 FR 25216 (May 4, 2011). Therefore, all else being equal, ballasts that use cathode power are measured as less efficient at full light output than those that do not because cathode power increases the measured input power but not the measured total lamp arc power.

Based on further consideration, including the comments received, DOE is not adopting a BE test method. DOE proposed the BE measurement to include cathode power in ballast output power to account for its necessary use at reduced light output levels. Regarding determining at what light output level cathode power is necessary, manufacturers can apply different cathode cut out designs. DOE does not have data on the light output levels at which cathode power is applied and current product marketing material does not specify the cathode cut out light output level. The industry standard, NEMA Standard LL9–2011, specifies minimum and maximum voltages across cathodes in dimmed operation. However, incorporating such parameters in a metric may influence manufacturer choice as to cathode cut designs that can be employed in fluorescent lamp ballasts. A lamp and ballast manufacturer may be able to employ only the minimum amount of cathode power necessary because the lamp can be designed to only require the minimum amount of cathode power, while a manufacturer that produces only ballasts may have to provide more cathode power to ensure that its ballasts can operate all lamps since the minimum amount of cathode power required can vary by lamp. DOE finds that it is important to allow for flexibility in designing ballasts, and a metric should not favor one approach over another.

Given these issues the proposed BE test method may not provide an accurate representation of efficiency for all dimmable ballasts at all reduced light outputs. DOE is not aware of an industry standard at this time that provides a test method to accurately capture the efficiency of a ballast at reduced light output levels. Additionally, current energy conservation standards for fluorescent lamp ballasts do not require efficiency measurements at lower light outputs. Because the proposed BE test method may not provide the most accurate representations, and such a test method is not necessary for compliance, DOE is

[34] ''Deep-dimming fluorescent lamp ballast'' means a fluorescent ballast that is capable of operating lamps in dimmed operating modes at any number of levels at or below 50 percent of full output. California Title 20 Appliance Efficiency Regulations.

[35] The term ''cut out'' refers to removing all power to the lamp electrodes after lamp ignition.

[36] CEC suggested using NEMA Standard LL9–2011, section 2.2 to develop this method.

not adopting a test method for measuring ballast efficiency at reduced light outputs in this final rule.

E. Amendments to Standby Mode Test Method

Currently, the measurement of standby mode power is not required to determine compliance with energy conservation standards for fluorescent lamp ballasts. However, if a manufacturer chooses to make any representations with respect to the standby mode power use of fluorescent lamp ballasts, section 3 of appendix Q requires standby mode power testing to be performed in accordance with ANSI C82.2.

EPCA directs DOE to establish test procedures to include standby mode energy consumption, ''taking into consideration the most current versions of Standards 62301 and 62087 of the International Electrotechnical Commission[.]'' (42 U.S.C. 6295(gg)(2)(A)) IEC Standard 62087 applies only to audio, video, and related equipment, and therefore is not relevant to lighting products. The current standby mode test procedure is consistent with procedures outlined in IEC Standard 62301, which applies generally to household electrical appliances. 74 FR 54445, 54449 (Oct. 22, 2009). To provide a test method that would be familiar to FLB manufacturers at the time the standby mode test procedure was initially established, DOE referenced language and methodologies presented in 2002 edition of ANSI C82.2. *Id.*

In the March 2019 NOPR, DOE proposed requiring stabilization and subsequent measurement of standby mode energy consumption according to the measurements in section 5 of IEC 62301 (edition 2.0), instead of ANSI C82.2. IEC 62301, which applies generally to household electrical appliances, provides requirements specifically for measuring standby mode energy consumption, whereas ANSI C82.2 does not. For consistency within the test procedure and to reduce the test burden, DOE also proposed that the appendix Q requirements for instruments, test setup and test conditions for the active mode test procedure be followed for standby power measurements. (This includes direction regarding the input voltage at which to test when the ballast can operate at multiple input voltages, which is not currently specified by the current test conditions referenced in ANSI C82.2.) Furthermore, unlike the active mode test procedure, DOE proposed not to require use of reference lamps because lamps are not turned on during the measurement of standby mode power consumption. Additionally, DOE proposed that whatever lamp to which the ballast is connected be turned on initially at full light output for the purpose of ensuring the ballast is not defective. 84 FR 9910, 9921–9922.

NEMA stated that DOE should not incorporate IEC 62301 at this time, as the IEC is currently working on lighting-specific standards and adoption of a less-appropriate method of measurement could negatively impact the product sector. (NEMA, No. 3 at p. 5) Similarly, Signify suggested DOE should wait for either ANSI or IEC to publish a standby power test method for fluorescent lamp ballasts, and noted that IEC is currently considering developing a standby power test method for lighting devices based on IEC 62301, but that the committee found it necessary to make some changes, explanations, and adaptations to the appliances standby power test method provided in IEC 62301. (Signify, No. 7 at p. 8) Lutron agreed with NEMA's comments that, if DOE needs to reference a standard for standby power, it should wait to reference the lighting-specific IEC standard under development. Lutron further stated in its written comments that during the public meeting for the Process Rule,[37] stakeholder discussion had included the possibility that test procedures may need to be updated quickly with the consensus of all stakeholders. Lutron stated that such a consensus could be achievable for adopting a lighting-specific IEC standard for FLB standby mode power measurements. (Lutron, No. 6 at p. 3)

Fluorescent lamp ballasts are included in the scope of the IEC 63201, which applies to electrical products with a rated input voltage between 100 V a.c. to 250 V a.c. for single phase products and 130 V a.c. to 480 V a.c. for other products. DOE has determined that the instructions and criteria specified in IEC 62301 for stabilization and subsequent measurement of standby mode power consumption are appropriate for fluorescent lamp ballasts. DOE has not received any comments specifying technical reasons as to why the use of IEC 62301 would not result in representative FLB standby mode power measurements. Moreover, IEC 62301 provides specific instruction regarding the measurement of standby power, whereas the currently referenced industry test procedure, ANSI C82.2, does not. DOE is largely maintaining the same instruments, test setup, and test conditions to measure standby mode power as are used to measure active mode power; these requirements are largely contained in ANSI C82.2. IEC 62301 is only referenced regarding stabilization and when taking the actual power measurement as the stabilization and power measurement of a ballast that is not operating a lamp is not included in ANSI C82.2.

DOE acknowledges that industry is in the process of developing a lighting-specific standby mode power test method, but at the present, no such industry standard has been issued. DOE will review any such industry standby mode power test method once it becomes available. At this time, DOE has determined that IEC 62301 is more appropriate for measuring standby mode power than the currently referenced ANSI C82.2, which makes no mention of standby mode power. As such DOE is amending appendix Q to reference IEC 62301 in place of ANSI C82.2 for the measurement of standby mode power consumption.

CEC supported DOE's proposed standby mode test method if it explicitly captures ballast features not associated with light output such as networking and sensors. (CEC, No. 4 at p. 4) ASAP/ACEEE also supported the recommendation of the CA IOUs provided in response to the June 2015 framework document[38] that ballasts with communication and control capabilities be tested with the ballasts connected to a network and with communication and control capabilities enabled. (ASAP/ACEEE, No. 8 at pp. 2–3)

Section 3.2.1 of appendix Q specifies that, if standby mode power is measured, fluorescent lamp ballasts that are designed and marketed for connection to control devices must be tested with all commercially available compatible control devices connected in all possible configurations. DOE is maintaining this instruction in this final rule as it sufficiently addresses connection of all features necessary for the operation of the fluorescent lamp ballast designed and marketed to connect to control devices.

ASAP/ACEEE requested DOE provide the technical basis for DOE's initial determination in the March 2019 NOPR that specific lamps to which the ballast is connected do not affect standby mode energy, as well as the applicability to all

[37] Information regarding the Process Rule can be found on *https://www.regulations.gov,* Docket number EERE–2017–BT–STD–0062–0163 at *https://www.regulations.gov/document?D=EERE-2017-BT-STD-0062-0163.*

[38] ASAP/ACEEE referenced the CA IOUs comment submitted under Docket No. EERE–2015–BT–STD–0006.

fluorescent lamp ballasts. (ASAP/ACEEE, No. 8 at pp. 2–3)

Regarding connection of lamps, DOE tested the standby mode power consumption of certain digital ballasts with 1 to 3 different types of controllers with and without lamps connected to the ballast. Table III.2 shows standby mode power consumption measurements for a ballast and controller combination with and without lamps connected and differences in power consumption.

TABLE III.2—STANDBY MODE POWER CONSUMPTION WITH AND WITHOUT LAMPS

Ballast and controller combination	Standby power consumption with lamps (mW)	Standby power consumption without lamps (mW)	Difference in standby power consumption (mW)
1	595	590	5
2	590	591	−1
3	592	592	0
4	91.9	87.5	4.4
5	91.2	86.6	4.6
6	88.3	87.1	1.2
7	903	904	−1

DOE found that the difference in standby mode power consumption with lamps versus without lamps ranged from 0 milliwatts (''mW'') to 5 mW. These differences are within general tolerances of measurements. Per IEC 62301 section 5, for products that have power measurements equal to or less than 1 W, stability is achieved when the power difference is at or less than 10 mW/h across a certain time period. Using the stability criteria of 10 mW/h as a general guideline for expected fluctuations in measurements, DOE finds differences in observed power measurements with lamps versus without lamps to be de minimis. Hence, DOE has determined that testing with or without a lamp does not impact measured values and therefore, the lamp connected to the ballast does not impact measured values. Further, standby power consumption is measured after lamps at full light output are turned off. In this state, the power being consumed by the ballast cannot be applicable to the lamp, as fluorescent lamps do not have any features that consume standby power, nor is there any residual power consumption from the lamp having been turned on.

ASAP/ACEEE also suggested the standby mode test procedure reference the active mode test procedure sections pertaining to instrumentation and connection of lamps. (ASAP/ACEEE, No. 8 at pp. 2–3) As stated previously, DOE is applying the requirements in the active mode test procedure for instrumentation and test setup to the standby power measurements.

DOE has determined that the proposed amendments to the standby mode energy consumption test procedure provide further clarity to the test steps by referencing a more appropriate industry standard for the actual measurement of power and that the proposed amendments do not affect measured values. Therefore, in this final rule, DOE adopts the amendments to the standby mode test procedure for fluorescent lamp ballasts as described in this section.

F. Amendments to 10 CFR 430.23(q)

In the March 2019 NOPR, DOE proposed to remove paragraphs specifying the calculation of estimated annual energy consumption and estimated annual operating cost for fluorescent lamp ballasts in 10 CFR 430.23(q), as these calculations are not required by DOE or the Federal Trade Commission. DOE also proposed to add a paragraph in 10 CFR 430.23(q) to calculate power factor using appendix Q. 84 FR 9910, 9922. Signify supported DOE's proposal to include a description of power factor calculation and remove calculations for estimated annual energy consumption and annual operating cost. (Signify, No. 7 at p. 8)

DOE has determined that these proposed updates to 10 CFR 430.23(q) provide further clarification and would not impact current requirements of the DOE test procedure or measured values. In this final rule DOE adopts the changes to 10 CFR 430.23(q) described in this section.

G. Amendments to 10 CFR 429.26

In the March 2019 NOPR, DOE proposed explicitly requiring reporting average total lamp arc power in certification reports for fluorescent lamp ballasts. Average total lamp arc power, a value that is already determined in appendix Q, is necessary to determine the required minimum BLE for an FLB model. Manufacturers are already reporting average total lamp arc power when certifying basic models, thus, DOE does not expect any changes in burden. DOE also proposed to require that average total lamp arc power be rounded to the nearest tenth of a watt. Additionally, DOE proposed to specify that the represented value of average total lamp arc power must be equal to the mean of the sample. Finally, DOE proposed to remove ''annual energy operating costs'' in 10 CFR 429.26(a)(2)(i), as this value is not required by DOE or the Federal Trade Commission. 84 FR 9910, 9922.

DOE did not receive any comments on the proposed amendments to the reporting requirements. DOE has determined that these proposed updates to 10 CFR 429.26 provide further clarification and would not impact current requirements of the DOE test procedure, change measured values, or change the current reporting burden. In this final rule, DOE adopts the changes to 10 CFR 429.26 described in this section.

H. Effective and Compliance Dates

The effective date for the adopted test procedure amendment is October 14, 2020. EPCA prescribes that all representations of energy efficiency and energy use, including those made on marketing materials and product labels, must be made in accordance with an amended test procedure, beginning 180 days after publication of the final rule in the **Federal Register**. (42 U.S.C. 6293(c)(2)) EPCA provides an allowance for individual manufacturers to petition DOE for an extension of the 180-day period if the manufacturer may experience undue hardship in meeting the deadline. (42 U.S.C. 6293(c)(3)) To receive such an extension, petitions must be filed with DOE no later than 60 days before the end of the 180-day period and must detail how the manufacturer will experience undue hardship. (*Id.*)

I. Test Procedure Costs and Impact

EPCA requires that test procedures adopted by DOE not be unduly burdensome to conduct. In this final rule, DOE amends the existing test procedure for fluorescent lamp ballasts by providing a second stabilization option for measuring BLE. The amendments also: (1) Update references to industry standards; (2) clarify the selection of reference lamps; (3) remove extraneous requirements in the stabilization procedure; and (4) revise the test procedure for measuring standby mode energy consumption. DOE has determined that the test procedure as amended by this final rule will not be unduly burdensome for manufacturers to conduct and instead will decrease the test burden for manufacturers.

This final rule will result in a net cost savings to manufacturers, as presented in Table III.3 and Table III.4 of this document.

TABLE III.3—SUMMARY OF COST IMPACTS FOR FLUORESCENT LAMP BALLASTS

Category	Present value (thousand 2016$)	Discount rate (percent)
Cost Savings:		
Reduction in Future Testing Costs	74	3
	28	7
Total Net Cost Impact:		
Total Net Cost Impacts	(74)	3
	(28)	7

TABLE III.4—SUMMARY OF ANNUALIZED COST IMPACTS FOR FLUORESCENT LAMP BALLASTS

Category	Annualized value (2016$)	Discount rate (percent)
Cost Savings:		
Reduction in Future Testing Costs	2,222	3
	1,982	7
Total Net Cost Impact:		
Total Net Cost Impacts	(2,222)	3
	(1,982)	7

Further discussion of the cost impacts of the test procedure amendments are presented in the following paragraphs.

a. Option 2 Stabilization Method

In this final rule, DOE is allowing manufacturers to use a second stabilization option (*i.e.,* ''Option 2'') when measuring BLE. As described in section III.D.5.a, the Option 2 stabilization method would minimize the time the test lamps are off, thereby reducing the stabilization time and, consequently, the overall testing time. DOE estimates the cost savings of the Option 2 stabilization method to be $2,519 annually. This estimate is based on a savings of 15 minutes per ballast test (due to reduced stabilization time). Inputs to the calculation were updated in this notice to reflect the most recent known values. Based on a median hourly labor rate of $40.96 [39] per electrical engineering technician (this includes an inflation factor of 31 percent to account for the cost of providing benefits), DOE estimates the savings to be $10.24 per ballast test, or $40.96 per basic model, assuming four ballast tests per basic model. DOE does not expect all manufacturers to choose to use the Option 2 stabilization method. Based on the manufacturers that already possess the equipment necessary for Option 2 (*i.e.,* an oven for ballasts), DOE estimates that only four manufacturers (comprising about 18 percent of FLB manufacturers) will choose to utilize the Option 2 stabilization method. DOE estimates that these manufacturers combined offer about 246 basic models of fluorescent lamp ballasts, comprising about 54 percent of all basic models certified in DOE's Compliance Certification Database.[40] New basic models of fluorescent lamp ballasts are introduced and certified to DOE about once every four years. Thus, DOE estimates overall annualized industry savings due to proposing the Option 2 stabilization method to be $2,222 at a 3 percent discount rate and $1,982 at a 7 percent discount rate. In summary, DOE's analysis indicates that allowing the Option 2 stabilization method would result in a reduction of future testing (see Table III.3 and Table III.4).

DOE has determined that the amendment to allow manufacturers to use the Option 2 stabilization method will not require changes to the designs of fluorescent lamp ballasts, and that the amendments will not impact the utility of such product or impact the availability of available FLB options. The amendments will not impact the representations of FLB energy efficiency. Manufacturers will be able to rely on data generated under the test procedure in effect prior to the adoption of this amendment. As such, retesting of fluorescent lamp ballasts will not be required solely as a result of DOE's adoption of this amendment to the test procedure.

b. Additional Amendments

The remainder of the amendments adopted in this final rule will not impact test costs: (1) Updating references to industry standards; (2) clarifying the selection of reference lamps; (3) removing extraneous requirements in the stabilization procedure; and (4) revising the test procedure for measuring standby mode energy consumption.

[39] Bureau of Labor Statistics, Occupational Employment Statistics, available at: *https://www.bls.gov/oes/current/oes173023.htm (May 2018).* Last accessed January 9, 2020.

[40] DOE's Compliance Certification Database is available at *https://www.regulations.doe.gov/certification-data/#q=Product_Group_s%3A**. Last accessed January 9, 2020.

First, in this final rule, DOE is incorporating by reference newer versions of already referenced industry standards in DOE's FLB test procedure (see section III.B). Regarding the adoption of the latest versions of industry standards, Signify stated that there would hardly be any additional burden to a testing facility that has been accredited to the current edition of ANSI standards, and further the use of the latest versions would keep testing facilities up-to-date on current technologies and provide access to more modern test methods. (Signify, No.7, p. 14)

Second, in this final rule, DOE is providing additional clarifications on how to select reference lamps to address, in particular, new products on the market (*i.e.,* ballasts that can operate multiple lamp types) (see section III.D.3.c). The additional direction on selecting reference lamps reflects the current FLB market.

Third, this final rule removes a maximum operating time for stabilization and changes the requirement to take measurements from once per second to once per minute during the stabilization process (see section III.D.5.a). DOE finds that these changes to the stabilization process will have no impact on costs or test burden. Removing the maximum operating time may prevent the restart of the stabilization procedure in certain cases, but due to the unpredictable nature, DOE is unable to quantify how many products may experience an increase or decrease in stabilization time. The reduction in the frequency (*i.e.,* seconds to minute) of measuring data during stabilization will reduce the amount of data required to determine stabilization. However, because this data is collected electronically, changing the measurement frequency results in no cost savings based on time and labor.

Finally, for taking standby mode measurements in this final rule, DOE changes the industry standard reference from ANSI C82.2 to IEC 62301 Section 5; specifies that use of reference lamps is not required; and aligns instrumentation, test setup, and test conditions for taking active mode measurements with standby mode measurements (see section III.E). IEC 62301 Section 5 provides detailed instructions but does not change the overall method of obtaining power measurements and does not require new or additional instrumentation. Currently manufacturers are not making representations of standby power mode.

DOE has determined that the amendments described above do not require additional measurements, steps, or instruments, and therefore will have no impact on cost. Manufacturers will be able to rely on data generated under the test procedure in effect prior to the adoption of this amendment.

IV. Procedural Issues and Regulatory Review

A. Review Under Executive Order 12866

The Office of Management and Budget (''OMB'') has determined that this test procedure rulemaking does not constitute a ''significant regulatory action'' under section 3(f) of Executive Order 12866, Regulatory Planning and Review, 58 FR 51735 (Oct. 4, 1993). Accordingly, this action was not subject to review under the Executive order by the Office of Information and Regulatory Affairs (''OIRA'') in OMB.

B. Review Under Executive Orders 13771 and 13777

On January 30, 2017, the President issued Executive Order (E.O.) 13771, ''Reducing Regulation and Controlling Regulatory Costs.'' E.O. 13771 stated the policy of the executive branch is to be prudent and financially responsible in the expenditure of funds, from both public and private sources. E.O. 13771 stated it is essential to manage the costs associated with the governmental imposition of private expenditures required to comply with Federal regulations.

Additionally, on February 24, 2017, the President issued E.O. 13777, ''Enforcing the Regulatory Reform Agenda.'' E.O. 13777 required the head of each agency designate an agency official as its Regulatory Reform Officer (''RRO''). Each RRO oversees the implementation of regulatory reform initiatives and policies to ensure that agencies effectively carry out regulatory reforms, consistent with applicable law. Further, E.O. 13777 requires the establishment of a regulatory task force at each agency. The regulatory task force is required to make recommendations to the agency head regarding the repeal, replacement, or modification of existing regulations, consistent with applicable law. At a minimum, each regulatory reform task force must attempt to identify regulations that:

(i) Eliminate jobs, or inhibit job creation;

(ii) Are outdated, unnecessary, or ineffective;

(iii) Impose costs that exceed benefits;

(iv) Create a serious inconsistency or otherwise interfere with regulatory reform initiatives and policies;

(v) Are inconsistent with the requirements of Information Quality Act, or the guidance issued pursuant to that Act, in particular those regulations that rely in whole or in part on data, information, or methods that are not publicly available or that are insufficiently transparent to meet the standard for reproducibility; or

(vi) Derive from or implement Executive Orders or other Presidential directives that have been subsequently rescinded or substantially modified.

DOE concludes that this rulemaking is consistent with the directives set forth in these executive orders. This final rule is estimated to result in a cost savings. The final rule yields annualized cost savings of approximately $1,982 using a perpetual time horizon discounted to 2016 at a 7 percent discount rate. Therefore, this final rule is an E.O. 13771 deregulatory action.

C. Review Under the Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of a final regulatory flexibility analysis (''FRFA'') for any final rule where the agency was first required by law to publish a proposed rule for public comment, unless the agency certifies that the rule, if promulgated, will not have a significant economic impact on a substantial number of small entities. As required by Executive Order 13272, ''Proper Consideration of Small Entities in Agency Rulemaking,'' 67 FR 53461 (August 16, 2002), DOE published procedures and policies on February 19, 2003 to ensure that the potential impacts of its rules on small entities are properly considered during the DOE rulemaking process. 68 FR 7990. DOE has made its procedures and policies available on the Office of the General Counsel's website: *http://energy.gov/gc/office-general-counsel.* DOE certified in the March 2019 NOPR that the adopted amendments will not have a significant economic impact on a substantial number of small entities. The factual basis of this certification is set forth in the following paragraphs.

The Small Business Administration (''SBA'') considers a business entity to be a small business, if, together, with its affiliates, it employs less than a threshold number of workers specified in 13 CFR part 121. These size standards and codes established by the North American Industry Classification System (''NAICS'') and are available at *https://www.sba.gov/document/support--table-size-standards.* FLB manufacturing is classified under NAICS 335311, ''Power, Distribution, and Specialty Transformer Manufacturing.'' The SBA sets a threshold of 750 employees or fewer for an entity to be considered as a small business for this category.

To estimate the number of companies that could be small businesses that manufacture these ballasts, DOE conducted a market survey using publicly available information. DOE's research involved reviewing information provided by trade associations (*e.g.,* NEMA), information from individual company websites, market research tools (*i.e.,* Hoover's reports) and DOE's Certification Compliance Database. DOE screened out companies that do not meet the definition of a ''small business'' or are completely foreign owned and operated. DOE identified no small businesses that manufacture fluorescent lamp ballasts in the United States. DOE requested comment on its tentative determination that there are no small businesses that manufacture fluorescent lamp ballasts in the United States. NEMA was not aware of any small businesses that manufacture fluorescent lamp ballasts in the United States. (NEMA, No. 3 at pp. 5–6) Signify stated that it did not have sufficient data to comment on this topic. (Signify, No. 7 at p. 16)

Based on the criteria outlined earlier and the reasons discussed in this section, DOE previously certified in the March 2019 TP NOPR that the amendments adopted in this final rule will not have a significant economic impact on a substantial number of small entities. The factual basis for this certification has not changed. Therefore, DOE concludes that the cost effects accruing from the final rule would not have a ''significant economic impact on a substantial number of small entities,'' and that the preparation of a FRFA is not warranted. DOE has submitted a certification and supporting statement of factual basis to the Chief Counsel for Advocacy of the Small Business Administration for review under 5 U.S.C. 605(b).

D. Review Under the Paperwork Reduction Act of 1995

Manufacturers of fluorescent lamp ballasts must certify to DOE that their products comply with any applicable energy conservation standards. To certify compliance, manufacturers must first obtain test data for their products according to the DOE test procedures, including any amendments adopted for those test procedures. DOE has established regulations for the certification and recordkeeping requirements for all covered consumer products and commercial equipment, including fluorescent lamp ballasts. (See generally 10 CFR part 429.) The collection-of-information requirement for the certification and recordkeeping is subject to review and approval by OMB under the Paperwork Reduction Act (''PRA''). This requirement has been approved by OMB under OMB control number 1910–1400. Public reporting burden for the certification is estimated to average 35 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

DOE is adopting slight modifications to the reporting requirements for fluorescent lamp ballasts. DOE received no comments on its proposal and has determined that these updates to 10 CFR 429.26 do not impact current reporting burden.

Notwithstanding any other provision of the law, no person is required to respond to, nor shall any person be subject to a penalty for failure to comply with, a collection of information subject to the requirements of the PRA, unless that collection of information displays a currently valid OMB Control Number.

E. Review Under the National Environmental Policy Act of 1969

In this final rule, DOE establishes test procedure amendments that it expects will be used to develop and implement future energy conservation standards for fluorescent lamp ballasts. DOE has determined that this rule falls into a class of actions that are categorically excluded from review under the National Environmental Policy Act of 1969 (42 U.S.C. 4321 *et seq.*) and DOE's implementing regulations at 10 CFR part 1021. Specifically, DOE has determined that adopting test procedures for measuring energy efficiency of consumer products and industrial equipment is consistent with activities identified in 10 CFR part 1021, appendix A to subpart D, A5 and A6. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

F. Review Under Executive Order 13132

Executive Order 13132, ''Federalism,'' 64 FR 43255 (August 4, 1999), imposes certain requirements on agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. The Executive order requires agencies to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and to carefully assess the necessity for such actions. The Executive order also requires agencies to have an accountable process to ensure meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications. On March 14, 2000, DOE published a statement of policy describing the intergovernmental consultation process it will follow in the development of such regulations. 65 FR 13735. DOE examined this final rule and determined that it will not have a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. EPCA governs and prescribes Federal preemption of State regulations as to energy conservation for the products that are the subject of this final rule. States can petition DOE for exemption from such preemption to the extent, and based on criteria, set forth in EPCA. (42 U.S.C. 6297(d)) No further action is required by Executive Order 13132.

G. Review Under Executive Order 12988

Regarding the review of existing regulations and the promulgation of new regulations, section 3(a) of Executive Order 12988, ''Civil Justice Reform,'' 61 FR 4729 (Feb. 7, 1996), imposes on Federal agencies the general duty to adhere to the following requirements: (1) Eliminate drafting errors and ambiguity; (2) write regulations to minimize litigation; (3) provide a clear legal standard for affected conduct rather than a general standard; and (4) promote simplification and burden reduction. Section 3(b) of Executive Order 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation (1) clearly specifies the preemptive effect, if any; (2) clearly specifies any effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction; (4) specifies the retroactive effect, if any; (5) adequately defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of Executive Order 12988 requires Executive agencies to review regulations in light of applicable standards in sections 3(a) and 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOE has completed the required review and determined that, to the extent permitted by law, this final rule meets the relevant standards of Executive Order 12988.

H. Review Under the Unfunded Mandates Reform Act of 1995

Title II of the Unfunded Mandates Reform Act of 1995 (''UMRA'') requires each Federal agency to assess the effects of Federal regulatory actions on State, local, and Tribal governments and the private sector. Public Law 104–4, sec. 201 (codified at 2 U.S.C. 1531). For a regulatory action resulting in a rule that may cause the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of $100 million or more in any one year (adjusted annually for inflation), section 202 of UMRA requires a Federal agency to publish a written statement that estimates the resulting costs, benefits, and other effects on the national economy. (2 U.S.C. 1532(a), (b)) The UMRA also requires a Federal agency to develop an effective process to permit timely input by elected officers of State, local, and Tribal governments on a proposed ''significant intergovernmental mandate,'' and requires an agency plan for giving notice and opportunity for timely input to potentially affected small governments before establishing any requirements that might significantly or uniquely affect small governments. On March 18, 1997, DOE published a statement of policy on its process for intergovernmental consultation under UMRA. 62 FR 12820; also available at *http://energy.gov/gc/office-general-counsel.* DOE examined this final rule according to UMRA and its statement of policy and determined that the rule contains neither an intergovernmental mandate, nor a mandate that may result in the expenditure of $100 million or more in any year, so these requirements do not apply.

I. Review Under the Treasury and General Government Appropriations Act, 1999

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any rule that may affect family well-being. This final rule will not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOE has concluded that it is not necessary to prepare a Family Policymaking Assessment.

J. Review Under Executive Order 12630

DOE has determined, under Executive Order 12630, ''Governmental Actions and Interference with Constitutionally Protected Property Rights'' 53 FR 8859 (March 18, 1988), that this regulation will not result in any takings that might require compensation under the Fifth Amendment to the U.S. Constitution.

K. Review Under Treasury and General Government Appropriations Act, 2001

Section 515 of the Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516 note) provides for agencies to review most disseminations of information to the public under guidelines established by each agency pursuant to general guidelines issued by OMB. OMB's guidelines were published at 67 FR 8452 (Feb. 22, 2002), and DOE's guidelines were published at 67 FR 62446 (Oct. 7, 2002). DOE has reviewed this final rule under the OMB and DOE guidelines and has concluded that it is consistent with applicable policies in those guidelines.

L. Review Under Executive Order 13211

Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use,'' 66 FR 28355 (May 22, 2001), requires Federal agencies to prepare and submit to OMB, a Statement of Energy Effects for any significant energy action. A ''significant energy action'' is defined as any action by an agency that promulgated or is expected to lead to promulgation of a final rule, and that (1) is a significant regulatory action under Executive Order 12866, or any successor order; and (2) is likely to have a significant adverse effect on the supply, distribution, or use of energy; or (3) is designated by the Administrator of OIRA as a significant energy action. For any significant energy action, the agency must give a detailed statement of any adverse effects on energy supply, distribution, or use if the regulation is implemented, and of reasonable alternatives to the action and their expected benefits on energy supply, distribution, and use.

This regulatory action is not a significant regulatory action under Executive Order 12866. Moreover, it would not have a significant adverse effect on the supply, distribution, or use of energy, nor has it been designated as a significant energy action by the Administrator of OIRA. Therefore, it is not a significant energy action, and, accordingly, DOE has not prepared a Statement of Energy Effects.

M. Review Under Section 32 of the Federal Energy Administration Act of 1974

Under section 301 of the Department of Energy Organization Act (Pub. L. 95–91; 42 U.S.C. 7101), DOE must comply with section 32 of the Federal Energy Administration Act of 1974, as amended by the Federal Energy Administration Authorization Act of 1977. (15 U.S.C. 788; ''FEAA'') Section 32 essentially provides in relevant part that, where a proposed rule authorizes or requires use of commercial standards, the notice of proposed rulemaking must inform the public of the use and background of such standards. In addition, section 32(c) requires DOE to consult with the Attorney General and the Chairman of the Federal Trade Commission (''FTC'') concerning the impact of the commercial or industry standards on competition.

The modifications to the test procedure for fluorescent lamp ballasts adopted in this final rule incorporates testing methods contained in the following commercial standards:

(1) ANSI Standard C78.901, ''American National Standard for Electric Lamps—Single-Based Fluorescent Lamps—Dimensional and Electrical Characteristics,'' 2016;

(2) ANSI C78.81–2016, ''American National Standard for Electric Lamps—Double-Capped Fluorescent Lamps—Dimensional and Electrical Characteristics,'' 2016;

(3) ANSI C78.375A, ''American National Standard for Electric Lamps—Fluorescent Lamps—Guide for Electrical Measures,'' 2014;

(4) ANSI Standard C82.11–2017, ''American National Standard for Lamp Ballasts—High Frequency Fluorescent Lamp Ballasts—Supplements,'' 2017;

(5) ANSI Standard C82.77, ''American National Standard for Lighting Equipment—Harmonic Emission Limits—Related Power Quality Requirements for Lighting Equipment,'' 2002;

(6) ANSI Standard C82.1, ''American National Standard for Lamp Ballasts—Line Frequency Fluorescent Lamp Ballast,'' 2015;

(7) ANSI Standard C82.2, ''American National Standard for Lamp Ballasts—Method of Measurement of Fluorescent Lamp Ballasts,'' 2016;

(8) ANSI Standard C82.3, (''ANSI C82.3'') ''American National Standard for Lamp Ballasts—Reference Ballasts for Fluorescent Lamps,'' approved April 8, 2016.

99) IEC Standard 60081, ''Double Capped Fluorescent Lamps—Performance specifications (Amendment 6, Edition 5.0, August 2017),'' 2013; and

(10) IEC Standard 62301, ''Household electrical appliances—Measurement of standby power (Edition 2.0, January 2011),'' 2011.

DOE has evaluated these standards and is unable to conclude whether they fully comply with the requirements of section 32(b) of the FEAA (*i.e.,* whether they were developed in a manner that fully provides for public participation, comment, and review.) DOE has consulted with both the Attorney General and the Chairman of the FTC about the impact on competition of using the methods contained in these standards and has received no comments objecting to their use.

N. Congressional Notification

As required by 5 U.S.C. 801, DOE will report to Congress on the promulgation of this rule before its effective date. The report will state that it has been determined that this rule is not a ''major rule'' as defined by 5 U.S.C. 804(2).

O. Description of Materials Incorporated by Reference

In this final rule, DOE incorporates by reference the test standard published by ANSI, titled ''American National Standard for Electric Lamps—Single-Based Fluorescent Lamps—Dimensional and Electrical Characteristics,'' ANSI/NEMA C78.901–2016. ANSI C78.901–2016 is an industry accepted test standard that describes physical and electrical characteristics of single-based fluorescent lamps. The test procedure adopted in this final rule references sections of ANSI C78.901–2016 for characteristics of reference lamps that must be used when testing fluorescent lamp ballasts. ANSI C78.901–2016 is readily available on ANSI's website at *http://webstore.ansi.org/.*

In this final rule, DOE incorporates by reference the test standard published by ANSI, titled ''American National Standard for Electric Lamps—Double-Capped Fluorescent Lamps—Dimensional and Electrical Characteristics,'' ANSI C78.81–2016. ANSI C78.81–2016 is an industry accepted test standard that describes the physical and electrical characteristics of double-capped fluorescent lamps. The test procedure adopted in this final rule references sections of ANSI C78.81–2016 for characteristics of reference lamps that must be used when testing fluorescent lamp ballasts. ANSI C78.81–2016 is readily available on ANSI's website at *http://webstore.ansi.org/.*

In this final rule, DOE incorporates by reference the test standard published by ANSI, titled ''American National Standard for Electric Lamps—Fluorescent Lamps—Guide for Electrical Measures,'' ANSI C78.375A–2014. ANSI C78.375A–2014 is an industry accepted test standard that describes procedures for measuring the electrical characteristics of fluorescent lamps. The test procedure adopted in this final rule references sections of ANSI C78.375A–2014 for testing performance of fluorescent lamp ballasts. ANSI C78.375A–2014 is readily available on ANSI's website at *http://webstore.ansi.org/.*

In this final rule, DOE incorporates by reference the test standard published by ANSI, titled ''American National Standard for Lamp Ballasts—High Frequency Fluorescent Lamp Ballasts—Supplements,'' ANSI/NEMA C82.11–2017. ANSI/NEMA C82.11–2017 is an industry accepted test standard that describes characteristics and measurements of high frequency fluorescent lamp ballasts. The test procedure adopted in this final rule references sections of ANSI/NEMA C82.11–2017 for testing performance of fluorescent lamp ballasts. ANSI/NEMA C82.11–2017 is readily available on ANSI's website at *http://webstore.ansi.org/.*

In this final rule, DOE maintains the incorporation by reference of the test standard published by ANSI, titled ''American National Standard for Lamp Ballasts—Definitions for Fluorescent Lamps and Ballasts,'' ANSI C82.13–2002. ANSI C82.13–2002 is an industry accepted standard that that provides definitions for terms used in ANSI C78 and ANSI C82 series standards for fluorescent lamps and ballasts. ANSI C82.13–2002, incorporated by reference provides definitions for terms used in the DOE test procedure for fluorescent lamp ballasts. ANSI C82.13–2002 is readily available on ANSI's website at *http://webstore.ansi.org/.*

In this final rule, DOE incorporates by reference sections of the test standard published by ANSI, titled ''American National Standard Harmonic Emission Limits—Related Power Quality Requirements for Lighting Equipment,'' ANSI C82.77–2002. ANSI C82.77–2002 is an industry accepted standard that describes maximum harmonic emission limits for lighting equipment. ANSI/NEMA C82.11–2017, incorporated by reference in this final rule for testing high frequency fluorescent lamp ballasts, references ANSI C82.77–2002 to determine the maximum harmonic emission limits of the input current to the ballast. ANSI C82.77–2002 is readily available on ANSI's website at *http://webstore.ansi.org/.*

In this final rule, DOE incorporates by reference the test standard published by ANSI, titled ''American National Standard for Lamp Ballasts—Line Frequency Fluorescent Lamp Ballast,'' ANSI C82.1–2004 (R2008, R2015). ANSI C82.1–2004 (R2008, R2015) (also referred to in this rulemaking as ''ANSI C82.1–2015'') is an industry accepted test standard that describes characteristics and measurements of line frequency fluorescent lamp ballasts. The test procedure adopted in this final rule references ANSI C82.1–2004 (R2008, R2015) for testing performance of fluorescent lamp ballasts. ANSI C82.1–2004 (R2008, R2015) is readily available on ANSI's website at *http://webstore.ansi.org/.*

In this final rule, DOE incorporates by reference the test standard published by ANSI, titled ''American National Standard for Lamp Ballasts—Method of Measurement of Fluorescent Lamp Ballasts,'' ANSI C82.2–2002 (R2007, R2016). ANSI C82.2–2002 (R2007, R2016) (also referred to in this rulemaking as ANSI C82.2–2016) is an industry accepted standard for testing line frequency fluorescent lamp ballasts. The 2016 version is a reaffirmation of the 2002 version. ANSI C82.2–2002 (R2007, R2016) is readily available on ANSI's website at *http://webstore.ansi.org/.*

In this final rule, DOE incorporates by reference the test standard published by ANSI, titled ''American National Standard for Lamp Ballasts—Reference Ballasts for Fluorescent Lamps,'' ANSI C82.3–2016. ANSI C82.3–2016 (also referred to in this rulemaking as ANSI C82.3) is an industry accepted standard that describes characteristics and requirements of fluorescent lamp reference ballasts. The test procedure adopted in this final rule references ANSI C82.3–2016 for determining a reference fluorescent lamp to use when testing the performance of fluorescent lamp ballasts. ANSI C82.3–2016 is readily available on ANSI's website at *http://webstore.ansi.org/.*

In this final rule, DOE incorporates by reference the test standard published by IEC, titled, ''Double Capped Fluorescent Lamps—Performance specifications (IEC 60081:1997/AMD6, Amendment 6, Edition 5.0, August 2017),'' IEC 60081 Amendment 6. IEC 60081 Amendment 6 is an industry accepted test standard that describes physical and electrical characteristics of double-capped fluorescent lamps. The test procedure adopted in this final rule reference sections of IEC 60081 Amendment 6 for characteristics of reference lamps that must be used when testing fluorescent lamp ballasts. IEC 60081 Amendment 6 is readily available on IEC's website at *https://webstore.iec.ch/home.*

In this final rule, DOE incorporates by reference the test standard published by IEC, titled ''Household electrical appliances—Measurement of standby power (Edition 2.0, January 2011),'' IEC 62301 (Edition 2.0). IEC 62301 (Edition 2.0) is an industry accepted test standard that describes measurements of electrical power consumption in standby mode, off mode, and network mode. The test procedure adopted in this final rule reference sections of IEC 62301 (Edition 2.0) for testing standby mode power consumption of fluorescent lamp ballasts. IEC 62301 (Edition 2.0) is readily available on IEC's website at *https://webstore.iec.ch/home.*

V. Approval of the Office of the Secretary

The Secretary of Energy has approved publication of this final rule.

List of Subjects

10 CFR Part 429

Administrative practice and procedure, Confidential business information, Energy conservation, Household appliances, Reporting and recordkeeping requirements.

10 CFR Part 430

Administrative practice and procedure, Confidential business information, Energy conservation, Household appliances, Imports, Incorporation by reference, Intergovernmental relations, Small businesses.

Signing Authority

This document of the Department of Energy was signed on July 1, 2020, by Alexander N. Fitzsimmons, Deputy Assistant Secretary for Energy Efficiency, Energy Efficiency and Renewable Energy, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on July 2, 2020.

Treena V. Garrett,

Federal Register Liaison Officer, U.S. Department of Energy.

For the reasons stated in the preamble, DOE amends parts 429 and 430 of chapter II of title 10, Code of Federal Regulations as set forth below:

PART 429—CERTIFICATION, COMPLIANCE, AND ENFORCEMENT FOR CONSUMER PRODUCTS AND COMMERCIAL AND INDUSTRIAL EQUIPMENT

■ 1. The authority citation for part 429 continues to read as follows:

Authority: 42 U.S.C. 6291–6317; 28 U.S.C. 2461 note.

■ 2. Section 429.26 is amended by:

■ a. Revising the introductory text of paragraph (a)(2)(i);

■ b. Adding paragraph (a)(2)(iii); and

■ c. Revising paragraphs (b)(2) and (c).

The revisions and addition read as follows:

§ 429.26 Fluorescent lamp ballasts.

(a) * * *

(2) * * *

(i) Any represented value of the energy consumption of a basic model for which consumers would favor lower values shall be greater than or equal to the higher of:

* * * * *

(iii) The represented value of average total lamp arc power must be equal to the mean of the sample,

$$\bar{x} = \frac{1}{n}\sum_{i=1}^{n} x_i$$

Where:

$\bar{x}$ is the sample mean;
n is the number of units in the sample; and
x_i is the i^{th} unit.

(b) * * *

(2) Pursuant to § 429.12(b)(13), a certification report must include the following public product-specific information: The ballast luminous efficiency, the average total lamp arc power, the power factor, the number of lamps operated by the ballast, and the type of lamps operated by the ballast (*i.e.,* wattage, base, shape, diameter, and length).

(c) *Rounding requirements.* (1) Round ballast luminous efficiency to the nearest thousandths place.

(2) Round power factor to the nearest hundredths place.

(3) Round average total lamp arc power to the nearest tenth of a watt.

PART 430—ENERGY CONSERVATION PROGRAM FOR CONSUMER PRODUCTS

■ 3. The authority citation for part 430 continues to read as follows:

Authority: 42 U.S.C.6291–6309; 28 U.S.C. 2461 note.

■ 4. Section 430.2 is amended by revising the definition of ''Designed and marketed'' to read as follows:

§ 430.2 Definitions.

* * * * *

Designed and marketed means that the intended application of the lamp or ballast is clearly stated in all publicly available documents (*e.g.,* product literature, catalogs, and packaging labels). This definition is applicable to terms related to the following covered lighting products: Fluorescent lamp ballasts; fluorescent lamps; general service fluorescent lamps; general service incandescent lamps; general service lamps; incandescent lamps; incandescent reflector lamps; medium base compact fluorescent lamps; and specialty application mercury vapor lamp ballasts.

* * * * *

■ 5. Section 430.3 is amended by:

■ a. Revising paragraph (a);

■ b. Removing the references ''§ 430.2, § 430.32, appendix Q,'' and adding in their place ''§§ 430.2 and 430.32'' in paragraph (e)(5);

■ c. Removing the words ''appendix Q and'' in paragraph (e)(6);

■ d. Removing the words '', appendix Q,'' in paragraph (e)(7);

■ e. Redesignating paragraphs (e)(17) through (21) as (e)(22) through (26);

■ f. Redesignating paragraphs (e)(6) through (16) as follows:

Old paragraph	New paragraph
(e)(6)	(e)(7)
(e)(7)	(e)(9)
(e)(8)	(e)(10)
(e)(9)	(e)(12)
(e)(10)	(e)(13)
(e)(11)	(e)(14)
(e)(12)	(e)(15)
(e)(13)	(e)(16)
(e)(14)	(e)(17)
(e)(15)	(e)(19)
(e)(16)	(e)(20)

■ g. Adding new paragraphs (e)(6), (8), and (11);

■ h. Revising newly redesignated paragraphs (e)(15) and (16);

■ i. Removing the words ''appendix Q and'' in newly redesignated paragraph (e)(17);

■ j. Adding new paragraph (e)(18);

■ k. Revising newly redesignated paragraph (e)(19);

■ l. Adding new paragraph (e)(21);

■ m. Adding Note 1 to paragraph (e);

■ n. Revising paragraph (o)(2); and

■ o. Removing the references ''appendices C1, D1, D2, G, H, I, J2, N, O, P, X, X1, Y, Z, BB, and CC to subpart B'' in paragraph (o)(6) and adding in their place the references ''appendices C1, D1, D2, G, H, I, J2, N, O, P, Q, X, X1, Y, Z, BB, and CC to subpart B''.

The revisions and additions read as follows:

§ 430.3 Materials incorporated by reference.

(a) *General.* We incorporate by reference the following standards into this part. The material listed has been approved for incorporation by reference by the Director of the Federal Register in accordance with 5 U.S.C. 552(a) and 1 CFR part 51. To enforce any edition other than that specified in this section, the Department of Energy must publish a document in the **Federal Register** and the material must be available to the public. All approved material is available for inspection at U.S. Department of Energy, Office of Energy Efficiency and Renewable Energy, Building Technologies Program, 6th Floor, 950 L'Enfant Plaza, SW, Washington, DC 20024, (202) 586–2945, or go to: *www1.eere.energy.gov/buildings/appliance__standards/.* Standards can be obtained from the sources listed in this section. Material is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fedreg.legal@nara.gov,* or go to: *www.archives.gov/federal-register/cfr/ibr-locations.html.*

* * * * *

(e) * * *

(6) ANSI C78.81–2016, (''ANSI C78.81–2016''), American National Standard for Electric Lamps—Double-Capped Fluorescent Lamps—Dimensional and Electrical Characteristics, approved June 29, 2016, IBR approved for appendix Q to subpart B.

* * * * *

(8) ANSI C78.375A–2014, (''ANSI C78.375A''), American National Standard for Electric Lamps—Fluorescent Lamps—Guide for Electrical Measures, approved August 28, 2014, IBR approved for appendix Q to subpart B.

* * * * *

(11) ANSI/NEMA C78.901–2016 (''ANSI C78.901–2016''), American National Standard for Electric Lamps—Single-Based Fluorescent Lamps—Dimensional and Electrical Characteristics, ANSI approved August 23, 2016, IBR approved for appendix Q to subpart B.

* * * * *

(15) ANSI C82.1–2004 (R2008, R2015), (''ANSI C82.1''), American National Standard for Lamp Ballasts—Line Frequency Fluorescent Lamp Ballasts, approved November 20, 2015; IBR approved for appendix Q to subpart B.

(16) ANSI C82.2–2002 (R2007, R2016), (''ANSI C82.2''), American National Standard for Lamp Ballasts—Method of Measurement of Fluorescent Lamp Ballasts, approved July 12, 2016, IBR approved for appendix Q to subpart B.

* * * * *

(18) ANSI C82.3–2016, (''ANSI C82.3''), American National Standard for Reference Ballasts for Fluorescent Lamps, approved April 8, 2016; IBR approved for appendix Q to subpart B.

(19) ANSI/NEMA C82.11–2017, (''ANSI C82.11''), American National Standard for Lamp Ballasts—High-Frequency Fluorescent Lamp Ballasts, approved January 23, 2017; IBR approved for appendix Q to subpart B.

* * * * *

(21) ANSI C82.77–2002, (''ANSI C82.77'') Harmonic Emission Limits—Related Power Quality Requirements for Lighting Equipment, approved January 17, 2002; IBR approved for appendix Q to subpart B.

* * * * *

Note 1 to paragraph (e). The standards referenced in paragraphs (e)(6), (8), (11), (15), (16), (18), (19), and (21) of this section were all published by National Electrical Manufacturers Association (NEMA) and are also available from National Electrical Manufacturers Association, 1300 North 17th Street, Suite 900, Rosslyn, Virginia 22209, *https://www.nema.org/Standards/Pages/default.aspx.*

* * * * *

(o) * * *

(2) IEC 60081:1997/AMD6, (''IEC 60081''), Double-capped fluorescent lamps—Performance specifications (Amendment 6, Edition 5.0, August 2017); IBR approved for appendix Q to subpart B.

* * * * *

■ 6. Section 430.23 is amended by revising paragraph (q) to read as follows:

§ 430.23 Test procedures for the measurement of energy and water consumption.

* * * * *

(q) *Fluorescent lamp ballasts.* (1) Calculate ballast luminous efficiency (BLE) using appendix Q to this subpart.

(2) Calculate power factor using appendix Q to this subpart.

* * * * *

■ 7. Appendix Q to subpart B of part 430 is revised to read as follows:

Appendix Q to Subpart B of Part 430—Uniform Test Method for Measuring the Energy Consumption of Fluorescent Lamp Ballasts

Note regarding effective date: After October 14, 2020 and prior to March 15, 2021 any representations with respect to energy use or efficiency of fluorescent lamp ballasts must be in accordance with the results of testing pursuant to this appendix or the test procedures as they appeared in appendix Q to this subpart revised as of January 1, 2020. On or after March 15, 2021, any representations, including certifications of compliance for ballasts subject to any energy conservation standard, made with respect to the energy use or efficiency of fluorescent lamp ballasts must be made in accordance with the results of testing pursuant to this appendix.

0. Incorporation by Reference

DOE incorporated by reference ANSI C78.81–2016, ANSI C78.375A, ANSI C78.901–2016, ANSI C82.1, ANSI 82.2, ANSI 82.3, ANSI 82.11, ANSI C82.13, ANSI 82.77, IEC 60081, and IEC 62301, each in their entirety in § 430.3; however, only enumerated provisions of ANSI C78.375A, ANSI C82.2, and IEC 62301 are applicable to this appendix, as follows:

(a) ANSI C78.375A, as follows:

(i) Section 4, Ambient conditions for temperature measurement, as specified in section 2.4.2 of this appendix; and

(ii) Section 9, Electrical instruments, as specified in sections 2.2.1, 2.2.2, and 2.2.3 of this appendix.

(b) ANSI C82.2, as follows:

(i) Section 3, Pertinent measurements, as specified in section 2.4.1 of this appendix;

(ii) Section 4, Electrical supply characteristics—test ballast measurement circuits, as specified in section 2.4.1 of this appendix; and

(iii) Section 7, Test measurements circuits, as specified in sections 2.5.6, 2.5.7, and 2.5.8 of this appendix.

(c) IEC 62301 as follows:

(i) Section 5, Measurements, as specified in sections 3.4.3 and 3.4.4 of this appendix.

1. Definitions

1.1. *Average total lamp arc power* means the sample mean of the total lamp arc power of the ballast units tested.

1.2. *Dimming ballast* means a ballast that is designed and marketed to vary its output and that can achieve an output less than or equal to 50 percent of its maximum electrical output.

1.3. *High frequency ballast* is as defined in ANSI C82.13 (incorporated by reference; see § 430.3).

1.4. *Instant-start* is the starting method used in instant-start systems as defined in ANSI C82.13, as typically indicated on publicly available documents of a fluorescent lamp ballast (*e.g.,* product literature, catalogs, and packaging labels).

1.5. *Low-frequency ballast* is a fluorescent lamp ballast that operates at a supply frequency of 50 to 60 Hz and operates the lamp at the same frequency as the supply.

1.6. *Programmed-start* is the starting method used in a programmed-start system as defined in ANSI C82.13, as typically indicated on publicly available documents of a fluorescent lamp ballast (*e.g.,* product literature, catalogs, and packaging labels).

1.7. *Rapid-start* is the starting method used in rapid-start type systems as defined in ANSI C82.13, as typically indicated on publicly available documents of a fluorescent lamp ballast (*e.g.,* product literature, catalogs, and packaging labels).

1.8. *Reference lamp* is a fluorescent lamp that meets the operating conditions of a reference lamp as defined by ANSI C82.13.

1.9. *Residential ballast* means a fluorescent lamp ballast that meets Federal Communications Commission (FCC) consumer limits as set forth in 47 CFR part

18 and is designed and marketed for use only in residential applications.

1.10. *RMS* is the root mean square of a varying quantity.

1.11 *Sign Ballast* means a ballast that has an Underwriters Laboratories Inc. Type 2 rating and is designed and marketed for use only in outdoor signs.

2. Active Mode Procedure for Measuring BLE at Full Light Output

2.1. Where ANSI C82.2 (incorporated by reference; see § 430.3) references ANSI C82.1, use ANSI C82.1 (incorporated by reference; see § 430.3) for testing low-frequency ballasts and use ANSI C82.11 (incorporated by reference; see § 430.3) for testing high-frequency ballasts. In addition when applying ANSI C82.2, use the standards ANSI C78.375A, ANSI C78.81–2016, ANSI C82.1, ANSI C82.11, ANSI C82.13, ANSI C82.3, ANSI C82.77, and ANSI C78.901–2016 (incorporated by reference; see § 430.3) instead of the normative references in ANSI 82.2. Specifications in referenced standards that are recommended, that ''shall'' or ''should'' be met, or that are not clearly mandatory, are mandatory. In cases where there is a conflict between any industry standard(s) and this appendix, the language of the test procedure in this appendix takes precedence over the industry standard(s).

2.2. Instruments

2.2.1. All instruments must meet the specifications of section 9 of ANSI C78.375A.

2.2.2. *Power Analyzer.* In addition to the specifications in section 9 of ANSI C78.375A, the power analyzer must have a maximum 100 pF capacitance to ground and frequency response between 40 Hz and 1 MHz.

2.2.3. *Current Probe.* In addition to the specifications in section 9 of ANSI C78.375A, the current probe must be galvanically isolated and have frequency response between 40 Hz and 20 MHz.

2.3. Test Setup

2.3.1. Connect the ballast to a main power source and to the fluorescent lamp(s) as specified in this section. Ensure the ballast is connected to fluorescent lamp(s) according to any manufacturer's wiring instructions on or sold with each unit (including those provided online). To test a low-frequency ballast, follow ANSI C82.1 but disregard section 5.3 of ANSI C82.1. To test a high-frequency ballast, follow ANSI C82.11 but disregard sections 5.3.1 and 5.13 and Annex D of ANSI C82.11.

2.3.2. In the test setup, all wires used in the apparatus, including any wires from the ballast to the lamps and from the lamps to the measuring devices, must meet the following specifications:

2.3.2.1. Use the wires provided by the ballast manufacturer and only the minimum wire length necessary to reach both ends of each lamp. If the wire lengths supplied with the ballast are too short to reach both ends of each lamp, add the minimum additional wire length necessary to reach both ends of each lamp, using wire of the same wire gauge(s) as the wire supplied with the ballast. If no wiring is provided with the ballast, use 18 gauge or thicker wire.

2.3.2.2. Keep wires loose. Do not shorten or allow bundling of any wires. Separate all wires from each other, and ground them to prevent parasitic capacitance.

2.3.3. Test each ballast with only one fluorescent lamp type. Select the one type of fluorescent lamp for testing as follows:

2.3.3.1. Each fluorescent lamp must meet the specifications of a reference lamp as defined by ANSI C82.13, be seasoned at least 12 hours, and be stabilized as specified in 2.5.2.1 of this appendix. Test each reference lamp with a reference ballast that meets the criteria of ANSI C82.3. For low frequency ballasts that operate:

(a) 32 W 4-foot medium bipin T8 lamps, use the following reference lamp specifications: 30.8 W, arc wattage; 1.7 W, approximate cathode wattage (with 3.6 V on each cathode); 32.5 W, total wattage; 137 V, voltage; 0.265 A, current. Test the selected reference lamp with the following reference ballast specifications: 300 V, rated input voltage; 0.265 A, reference current; 910 ohms, impedance. Use the following cathode heat requirements for rapid start: 3.6 V nominal, voltage; 2.5 V min, 4.4 V max, limits during operation; 11.0 ohms +/− 0.1 ohms, dummy load resistor; 3.4 V min, 4.5 V max, voltage across dummy load.

(b) 59 W 8-foot single pin T8 lamps, use the following reference lamp specifications: 60.1 W, arc wattage; 270.3 V, voltage; 0.262 A, current. Test the selected reference lamp with the following reference ballast specifications: 625 V, rated input voltage; 0.260 A, reference current; 1960 ohms, impedance.

(c) 32 W 2-foot U-shaped medium bipin T8 lamps, use the following reference lamp specifications: 30.5 W, arc wattage; 1.7 W, approximate cathode wattage (with 3.6 V on each cathode); 32.2 W, total wattage; 137 V, voltage; 0.265 A, current. Test the selected reference lamp with the following reference ballast specifications: 300 V, rated input voltage; 0.265 A, reference current; 910 ohms, impedance. Use the following cathode heat requirements for rapid start: 3.6 V nominal, voltage; 2.5 V min, 4.4 V max, limits during operation; 11.0 ohms +/- 0.1 ohms, dummy load resistor; 3.4 V min, 4.5 V max, voltage across dummy load.

2.3.3.2 For any sign ballast designed and marketed to operate both T8 and T12 lamps, use a T12 lamp as specified in Table 1 of this appendix.

2.3.3.3. For any ballast designed and marketed to operate lamps of multiple base types, select lamp(s) of one base type, in the following order of decreasing preference: Medium bipin, miniature bipin, single pin, or recessed double contact.

2.3.3.4. After selecting the base type (per section 2.3.3.3), select the diameter of the reference lamp. Any ballast designed and marketed to operate lamps of multiple diameters, except for any sign ballast capable of operating both T8 and T12 lamps, must be tested with lamps of one of those diameters, selected in the following order of decreasing preference: T8, T5, or T12.

2.3.3.5. Connect the ballast to the maximum number of lamps (lamp type as determined by 2.3.3.2, 2.3.3.3, and 2.3.3.4 of this section) the ballast is designed and marketed to operate simultaneously.

For any ballast designed and marketed to operate both 4-foot medium bipin lamps and 2-foot U-shaped lamps, test with the maximum number of 4-foot medium bipin lamp(s).

2.3.3.6. Test each ballast with the lamp type specified in Table A of this section that corresponds to the lamp diameter and base type the ballast is designed and marketed to operate.

TABLE 1 TO SECTION 2.3.3.6—LAMP-AND-BALLAST PAIRINGS AND FREQUENCY ADJUSTMENT FACTORS

Ballast type	Lamp type: Lamp diameter and base	Lamp type: Nominal lamp wattage	Frequency adjustment factor (β): Low-frequency	Frequency adjustment factor (β): High-frequency
Ballasts that operate straight-shaped lamps (commonly referred to as 4-foot medium bipin lamps) with medium bipin bases and a nominal overall length of 48 inches.	T8 MBP (Data Sheet 7881–ANSI–1005–4) *.	32	0.94	1.0
	T12 MBP (Data Sheet 7881–ANSI–1006–1) *.	34	0.93	1.0
Ballasts that operate U-shaped lamps (commonly referred to as 2-foot U-shaped lamps) with medium bipin bases and a nominal overall length between 22 and 25 inches.	T8 MBP (Data Sheet 78901–ANSI–4027–2) *.	32	0.94	1.0
	T12 MBP **	34	0.93	1.0
Ballasts that operate lamps (commonly referred to as 8-foot-high output lamps) with recessed double contact bases and a nominal overall length of 96 inches.	T8 HO RDC (Data Sheet 7881–ANSI–1501–2) *.	86	0.92	1.0
	T12 HO RDC (Data Sheet 7881–ANSI–1017–1) *.	95	0.94	1.0

TABLE 1 TO SECTION 2.3.3.6—LAMP-AND-BALLAST PAIRINGS AND FREQUENCY ADJUSTMENT FACTORS—Continued

Ballast type	Lamp type		Frequency adjustment factor (β)	
	Lamp diameter and base	Nominal lamp wattage	Low-frequency	High-frequency
Ballasts that operate lamps (commonly referred to as 8-foot slimline lamps) with single pin bases and a nominal overall length of 96 inches.	T8 slimline SP (Data Sheet 7881–ANSI–1505–1) *. T12 slimline SP (Data Sheet 7881–ANSI–3006–1) *.	59 60	0.95 0.94	1.0 1.0
Ballasts that operate straight-shaped lamps (commonly referred to as 4-foot miniature bipin standard output lamps) with miniature bipin bases and a nominal length between 45 and 48 inches.	T5 SO Mini-BP (Data Sheet 60081–IEC–6640–7) *.	28	0.95	1.0
Ballasts that operate straight-shaped lamps (commonly referred to as 4-foot miniature bipin high output lamps) with miniature bipin bases and a nominal length between 45 and 48 inches.	T5 HO Mini-BP (Data Sheet 60081–IEC–6840–6) *.	54	0.95	1.0
Sign ballasts that operate lamps (commonly referred to as 8-foot high output lamps) with recessed double contact bases and a nominal overall length of 96 inches.	T8 HO RDC (Data Sheet 7881–ANSI–1501–2) *. T12 HO RDC (Data Sheet 7881–ANSI–1019–1) *.	86 † 110	0.92 0.94	1.0 1.0

MBP, Mini-BP, RDC, and SP represent medium bipin, miniature bipin, recessed double contact, and single pin, respectively.

* Data Sheet corresponds to ANSI C78.81–2016, ANSI C78.901–2016, or IEC 60081 page number (incorporated by reference; see § 430.3).

** No ANSI or IEC Data Sheet exists for 34 W T12 MBP U-shaped lamps. For ballasts designed and marketed to operate only T12 2-foot U-shaped lamps with MBP bases and a nominal overall length between 22 and 25 inches, select T12 U-shaped lamps designed and marketed as having a nominal wattage of 34 W.

† This lamp type is commonly marketed as 110 W; however, the ANSI C78.81–2016 Data Sheet (incorporated by reference; see § 430.3) lists nominal wattage of 113 W. Test with specifications for operation at 0.800 amperes (A).

2.3.4. Test Circuits

2.3.4.1. The power analyzer test setup must have exactly n + 1 channels, where n is the maximum number of lamps (lamp type as determined by sections 2.3.3.2, 2.3.3.3, and 2.3.3.4 of this appendix) a ballast is designed and marketed to operate. Use the minimum number of power analyzers possible during testing. Synchronize all power analyzers. A system may be used to synchronize the power analyzers.

2.3.4.2. *Lamp Arc Voltage.* Attach leads from the power analyzer to each fluorescent lamp according to Figure 1 of this section for rapid- and programmed-start ballasts; Figure 2 of this section for instant-start ballasts operating single pin (SP) lamps; and Figure 3 of this section for instant-start ballasts operating medium bipin (MBP), miniature bipin (mini-BP), or recessed double contact (RDC) lamps. The programmed- and rapid-start ballast test setup includes two 1000 ohm resistors placed in parallel with the lamp pins to create a midpoint from which to measure lamp arc voltage.

2.3.4.3. *Lamp Arc Current.* Position a current probe on each fluorescent lamp according to Figure 1 of this section for rapid- and programmed-start ballasts; Figure 2 of this section for instant-start ballasts operating SP lamps; and Figure 3 of this section for instant-start ballasts operating MBP, mini-BP, and RDC lamps.

For the lamp arc current measurement, set the full transducer ratio in the power analyzer to match the current probe to the power analyzer.

$$Full\ Transducer\ Ratio = \frac{I_{in}}{V_{out}} \times \frac{R_{in}}{R_{in} + R_s}$$

Where: I_{in} is the current through the current transducer, V_{out} is the voltage out of the transducer, R_{in} is the power analyzer impedance, and R_s is the current probe output impedance.

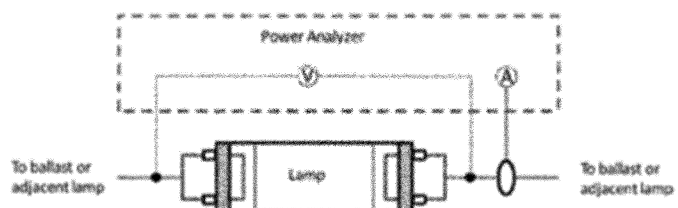

Figure 3: Instant-Start Ballasts that Operate MBP, mini-BP, and RDC Lamps Instrumentation Setup

BILLING CODE 6450–01–C

2.4. Test Conditions

2.4.1. Establish and maintain test conditions for testing fluorescent lamp ballasts in accordance with sections 3 and 4 of ANSI C82.2.

2.4.2. *Room Temperature and Air Circulation.* Maintain the test area at 25 ±1 °C, with minimal air movement as defined in section 4 of ANSI C78.375A.

2.4.3. *Input Voltage.* For any ballast designed and marketed for operation at only one input voltage, test at that specified voltage. For any ballast that is neither a residential ballast nor a sign ballast but is designed and marketed for operation at multiple voltages, test the ballast at 277 V ±0.1%. For any residential ballast or sign ballast designed and marketed for operation at multiple voltages, test the ballast at 120 V ±0.1%.

2.5. Test Method

2.5.1. Connect the ballast to the selected fluorescent lamps (as determined in section 2.3.3 of this appendix) and to measurement instrumentation as specified in the Test Setup in section 2.3 of this appendix.

2.5.2. Determine stable operating conditions according to Option 1 or Option 2.

2.5.2.1. Option 1. Operate the ballast for at least 15 minutes before determining stable operating conditions. Determine stable operating conditions by measuring lamp arc voltage, current, and power once per minute in accordance with the setup described in section 2.3 of this appendix. The system is stable once the difference between the maximum and minimum for each value of lamp arc voltage, current, and power divided by the average value of the measurements do not exceed one percent over a four minute moving window. Once stable operating conditions are reached, measure each of the parameters described in sections 2.5.3 through 2.5.9 of this appendix.

2.5.2.2 Option 2. Determine stable operating conditions for lamp arc voltage, current, and power according to steps 1 through 6 of section D.2.1 in Annex D of ANSI C82.11.

2.5.3. *Lamp Arc Voltage.* Measure lamp arc voltage in volts (RMS) using the setup in section 2.3.4.2.

2.5.4. *Lamp Arc Current.* Measure lamp arc current in amps (RMS) using the setup in section 2.3.4.3 of this appendix.

2.5.5. *Lamp Arc Power.* The power analyzer must calculate output power by using the measurements from sections 2.5.3 and 2.5.4 of this appendix.

2.5.6. *Input Power.* Measure the input power in watts to the ballast in accordance with section 7 of ANSI C82.2 (disregard references to Figure 1 and Figure 3).

2.5.7. *Input Voltage.* Measure the input voltage in volts (RMS) to the ballast in accordance with section 7 of ANSI C82.2 (disregard references to Figure 1 and Figure 3).

2.5.8. *Input Current.* Measure the input current in amps (RMS) to the ballast in accordance with section 7 of ANSI C82.2 (disregard references to Figure 1 and Figure 3).

2.5.9. *Lamp Operating Frequency.* Measure the frequency of the waveform delivered from the ballast to any lamp used in the test in accordance with the setup in section 2.3 of this appendix.

2.6. Calculations

2.6.1. Calculate ballast luminous efficiency (BLE) as follows (do not round values of total lamp arc power and input power prior to calculation):

$$Ballast\ Luminous\ Efficiency = \frac{Total\ Lamp\ Arc\ Power}{Input\ Power} \times \beta$$

Where: Total Lamp Arc Power is the sum of the lamp arc powers for all lamps operated by the ballast as measured in section 2.5.5 of this appendix, Input Power is as determined by section 2.5.6 of this appendix, and β is equal to the frequency adjustment factor in Table 1 of this appendix.

2.6.2. Calculate Power Factor (PF) as follows (do not round values of input power, input voltage, and input current prior to calculation):

$$PF = \frac{Input\ Power}{Input\ Voltage\ \times Input\ Current}$$

Where: Input Power is measured in accordance with section 2.5.6 of this appendix, Input Voltage is measured in accordance with section 2.5.7 of this appendix, and Input Current is measured in accordance with section 2.5.8 of this appendix.

3. Standby Mode Procedure

3.1. The measurement of standby mode power is required to be performed only if a manufacturer makes any representations with respect to the standby mode power use of the fluorescent lamp ballast. When there is a conflict, the language of the test procedure in this appendix takes precedence over IEC 62301 (incorporated by reference; see § 430.3). Specifications in referenced standards that are not clearly mandatory are mandatory. Manufacturer's instructions, such as ''instructions for use'' referenced in IEC 62301 mean the manufacturer's instructions that come packaged with or appear on the unit, including on a label. It may include an online manual if specifically referenced (*e.g.,* by date or version number) either on a label or in the packaged instructions. Instructions that appear on the unit take precedence over instructions available electronically, such as through the internet.

3.2. Test Setup

3.2.1. Take all measurements with instruments as specified in section 2.2 of this appendix. Fluorescent lamp ballasts that are designed and marketed for connection to control devices must be tested with all commercially available compatible control devices connected in all possible configurations. For each configuration, a separate measurement of standby power must be made in accordance with section 3.4 of this appendix.

3.2.2. Connect each ballast to the maximum number of lamp(s) as specified in section 2.3 (specifications in 2.3.3.1 are optional) of this appendix. Note: ballast operation with reference lamp(s) is not required.

3.3. Test Conditions

3.3.1. Establish and maintain test conditions in accordance with section 2.4 of this appendix.

3.4. Test Method and Measurements

3.4.1. Turn on all of the lamps at full light output.

3.4.2. Send a signal to the ballast instructing it to have zero light output using the appropriate ballast communication protocol or system for the ballast being tested.

3.4.3. Stabilize the ballast prior to measurement using one of the methods as specified in section 5 of IEC 62301.

3.4.4. Measure the standby mode energy consumption in watts using one of the methods as specified in section 5 of IEC 62301.

NATIONAL CREDIT UNION ADMINISTRATION

12 CFR Part 701

RIN 3133–AF06

Chartering and Field of Membership

AGENCY: National Credit Union Administration (NCUA).

ACTION: Final rule.

SUMMARY: The NCUA Board (Board) is amending its chartering and field of membership (FOM) rules with respect to applicants and existing federal credit unions (FCUs) seeking a community charter approval, expansion, or conversion, in response to an August 2019 opinion and order issued by the D.C. Circuit Court of Appeals. First, the Board is re-adopting a provision to allow an applicant to designate a Combined Statistical Area (CSA), or an individual, contiguous portion thereof, as a well-defined local community (WDLC), provided that the chosen area has a population of 2.5 million or less. Second, with respect to communities based on a Core-Based Statistical Area (CBSA), or a portion thereof, the Board is providing additional explanation to support its decision to eliminate the requirement to serve the CBSA's core area as provided for in its comprehensive 2016 FOM rulemaking known as FOM1. Third, the Board is clarifying existing requirements and adding an explicit provision to its rules regarding potential discrimination in the FOM selection for CSAs and CBSAs.

DATES: This final rule is effective September 14, 2020.

FOR FURTHER INFORMATION CONTACT: For program issues: Martha Ninichuk, Director, or JeanMarie Komyathy, Deputy Director; Office of Credit Union Resources and Expansion, at 1775 Duke Street, Alexandria, VA 22314 or telephone (703) 518–1140. For legal issues: Ian Marenna, Associate General Counsel, or Marvin Shaw, Staff Attorney, Office of General Counsel, at the above address or telephone (703) 518–6540.

SUPPLEMENTARY INFORMATION:

I. Background

In a notice of proposed rulemaking and supplemental statement published on November 7, 2019,[1] the Board: (1) Proposed to re-adopt the presumptive WDLC option consisting of a CSA or an individual, contiguous portion of a CSA, provided that the chosen area, whether it is an entire CSA or a portion of one, is no more than 2.5 million;[2] (2) explained further, with additional reasoning and factual support, the basis for eliminating the core area service requirement for FCUs that choose a CBSA as a WDLC; and (3) proposed to amend the NCUA's regulations regarding community FOM applications, amendments, and expansions for CSAs and CBSAs to require the applicant to explain why it

[1] 84 FR 59989.

[2] References to CSAs or portions thereof in this final rule should be understood to carry this 2.5 million population limit. As noted above, an applicant may select an entire CSA as its WDLC if its population is 2.5 million or below. Alternatively, if the CSA's population is greater than 2.5 million, the applicant may still base its WDLC on the CSA, but must select an individual, contiguous portion of the CSA that has a population no greater than 2.5 million. Applicants also have the option of requesting areas outside these parameters. However, because these types of areas are not presumptive WDLCs, applicants must submit a narrative and supporting documentation establishing how the residents interact or share common interests. Please refer to NCUA Letter to Federal Credit Unions 18–FCU–02 (*https://www.ncua.gov/regulation-supervision/letters-credit-unions-other-guidance/requests-serve-well-defined-local-community-using-narrative-approach*) for additional background.

selected its FOM and to demonstrate that its selection will serve low- and moderate-income segments of a community. The proposed rule also included express authority for the NCUA to review and evaluate the foregoing explanation and submission regarding low- and moderate-income individuals, and to reject an application if the agency determines that the FCU's selection reflects discrimination. The Board proposed to apply this provision to CSAs and CBSAs. As detailed further below, the Board is adopting and finalizing all aspects of the proposed rule without change. The following sections provide background on this rulemaking.

A. Overview

Under the Federal Credit Union Act (Act), seven or more individuals may create an FCU by presenting a proposed charter (referred to in the Act as the organization certificate) to the Board.[3] These individuals, referred to as ''subscribers,'' must pledge to deposit funds for shares in the FCU and describe the FCU's proposed FOM.[4] An FOM consists of those persons and entities eligible for membership based on an FCU's type of charter. Before granting an FCU charter, the Board must complete an appropriate investigation and determine the character and fitness of the subscribers, the economic advisability of establishing the FCU, and the conformity of the proposed charter with the Act.[5] Under the Act, FCUs may choose from two general categories of FOM: Common-bond and community.[6]

The NCUA's Chartering and Field of Membership Manual, incorporated as Appendix B to Part 701 of the NCUA regulations (Chartering Manual),[7] implements the chartering and FOM requirements that the Act establishes for FCUs. The Chartering Manual provides that the NCUA will grant a charter if the FOM requirements are met, the subscribers are of good character and fit to represent the proposed FCU, and the establishment of the FCU is economically advisable.[8] In addition, ''[i]n unusual circumstances . . . [the] NCUA may examine other factors, such as other federal law or public policy, in deciding if a charter should be approved.''[9]

In adopting the Credit Union Membership Access Act of 1998 (CUMAA), which amended the Act, Congress reiterated its longstanding support for credit unions, noting their ''specific mission of meeting the credit and savings needs of consumers, especially persons of modest means.''[10] As amended by CUMAA, the Act provides a choice among three charter types: A single group sharing a single occupational or associational common bond;[11] a multiple common bond consisting of groups each of which have a distinct occupational or associational common bond among members of the group;[12] and a community consisting of ''persons or organizations within a well-defined local community, neighborhood, or rural district.''[13]

Congress expressly delegated to the Board substantial authority in the Act to define what constitutes a WDLC, neighborhood, or rural district for purposes of ''making any determination'' regarding a community FCU,[14] and to establish applicable criteria for any such determination.[15] To qualify as a WDLC, neighborhood, or rural district, the Board requires the proposed area to have ''specific geographic boundaries,'' such as those of ''a city, township, county (single or multiple portions of a county) or a political equivalent, school districts or a clearly identifiable neighborhood.''[16] The boundaries themselves may consist of political borders, streets, rivers, railroad tracks, or other static geographical features.[17] The Board continues to emphasize that common interests or interaction among residents within those boundaries are essential features of a local community.

Until 2010, the Chartering Manual required FCUs seeking to establish an area as a WDLC to submit for NCUA approval a narrative, supported by documentation, that demonstrated indicia of common interests or interaction among residents of a proposed community (the ''narrative model'') if the community extended beyond a single political jurisdiction (SPJ).[18] A WDLC was (and still is) required to consist of a contiguous area, as reflected in the current text of the Chartering Manual.[19] In 2010, the Board replaced the narrative model in favor of an objective model that provided FCUs a choice between two statistically based ''presumptive communities'' that each by definition qualifies as a WDLC (the ''presumptive community model'').[20] Further, the Board carefully considered the expertise and reasoning of the agencies that devised the statistical areas in deciding to designate these areas as WDLCs. In particular, the Board noted its agreement with the Office of Management and Budget (OMB) that commuting patterns within statistical areas demonstrate a high degree of social and economic integration with the central county.[21] Under the presumptive community model, approval is not automatic; rather, there is a multiple-step process. Once a presumptive WDLC is established, an FCU is still required to demonstrate its ability to serve its entire proposed community, as demonstrated by the required business and marketing plans. Then, the NCUA's staff, including the Office of Credit Union Resources and Expansion (CURE), the Office of General Counsel (OGC), and Regional Offices, review the application to ensure the applicant has established that it can serve its entire proposed community.

One kind of presumptive community is an ''[SPJ] . . . or any contiguous portion thereof,'' regardless of

[14] *Id.* 1759(g)(1)(A).

[15] *Id.* 1759(g)(1)(B). The Circuit Court cited this express delegation in its August 2019 decision, which is discussed in detail below. *Am. Bankers Ass'n* v. *Nat'l Credit Union Admin.,* 934 F.3d 649, 663 (D.C. Cir. 2019).

[16] Appendix B, Ch. 2, section V.A.2.

[17] Appendix B, Ch. 2, section V.A.5.

[18] 75 FR 36257 (June 25, 2010).

[19] Appendix B., Ch. 2., section V.A.2. The Chartering Manual also contained this requirement in 2003 under the narrative model. 68 FR 18334 (Apr. 15, 2003). ''The well-defined local community, neighborhood, or rural district may be met if: The area to be served is multiple contiguous political jurisdictions, *i.e.,* a city, county, or their political equivalent, or any *contiguous* portion thereof and if the population of the requested well-defined area does not exceed 500,000.'' (emphasis added). While the specific wording of this provision has been revised since 2003, the NCUA has always required that a WDLC consist of a contiguous area, dating back to 1999.

[20] As explained in the 2010 final rule that discontinued the use of the narrative model, the Board ''does not believe it is beneficial to continue the practice of permitting a community charter applicant to provide a narrative statement with documentation to support the credit union's assertion that an area containing multiple political jurisdictions meets the standards for community interaction and/or common interests to qualify as a WDLC. As [the proposed rule] noted, the narrative approach is cumbersome, difficult for credit unions to fully understand, and time consuming. . . . While not every area will qualify as a WDLC under the statistical approach, NCUA stated it believes the consistency of this objective approach will enhance its chartering policy, assure the strength and viability of community charters, and greatly ease the burden for any community charter applicant.'' 75 FR 36257, 36260 (June 25, 2010).

[21] 75 FR 36257, 36259 (June 25, 2010).

population.[22] The second is a single CBSA [23] (as defined above) as designated by the U.S. Census Bureau, or a well-defined portion thereof, which under the 2010 final rule was subject to a 2.5 million population limit.[24]

B. 2015 and 2016 Rulemakings

On November 19, 2015, the Board approved a proposed rule to amend various provisions of the Chartering Manual, including the WDLC and rural district options for community FOMs (2015 Proposed Rule).[25] As relevant here, in the 2015 Proposed Rule, the Board proposed to amend the community FOM options by: (1) Eliminating the requirement for an FCU serving a CBSA to serve its core area; (2) permitting FCUs to serve a portion of a CBSA up to a 2.5 million population limit, even if the CBSA's total population is greater than 2.5 million; [26] (3) permitting FCUs to serve CSAs,[27] which combine contiguous CBSAs, or a portion of a CSA, provided that the chosen area has a population no greater than 2.5 million; (4) permitting FCUs to apply to the NCUA to add adjacent areas to existing WDLCs consisting of SPJs, CBSAs, or CSAs, based on a showing of interaction by residents on both sides of the adjacent areas; and (5) increasing the population limit for rural district FOMs from the greater of 250,000 or 3 percent of the relevant state's population to 1 million, subject to a requirement that the rural district not expand beyond the states immediately contiguous to the state in which the FCU has its headquarters.

On October 27, 2016, the Board approved two rulemakings relating to the Chartering Manual. One was a final rule and the other a proposed rule. In the final rule,[28] the Board adopted the five provisions of the 2015 Proposed Rule that are set forth above (2016 Final Rule, which is also known as FOM1). In the proposed rule, the Board proposed additional changes to the community charter provisions (2016 Proposed Rule).[29] Specifically, the Board proposed permitting an applicant for a community charter to submit a narrative to establish the existence of a WDLC as an alternative to stand alongside the SPJ and presumptive statistical community options. According to the proposed rule, the proposed narrative model would serve the same purpose as in years prior to 2010, when the narrative model was used exclusively. Further, the Board proposed permitting an FCU to designate a portion of a statistical area as its community without regard to metropolitan division boundaries.

C. March 2018 Federal District Court Decision

The American Bankers Association (ABA) challenged several community FOM provisions adopted in the 2016 Final Rule under the Administrative Procedure Act (APA).[30] On March 29, 2018, the U.S. District Court for the District of Columbia (District Court) upheld, or left in place, three provisions and vacated two provisions of the 2016 Final Rule).[31] The court held that Congress had delegated sufficient statutory authority to the Board to issue such regulations under *Chevron* v. *Natural Resource Defense Council.*[32] Specifically, the court upheld the provision allowing an FCU to serve areas within a CBSA that do not include the CBSA's core, holding that the definition was a reasonable interpretation of ''local community'' and that the elimination of the core area service requirement was supported by the administrative record. The court also upheld the provision allowing an FCU to add an adjacent area to a presumptive community, similarly holding that this provision was reasonable under the Act, and that the Board chose reasonable factors to evaluate whether adjacent areas are part of the same local community. Also, the court upheld the elimination of the requirement that a CBSA as a whole have a population of no more than 2.5 million in order for even a portion of the CBSA to qualify as a WDLC, holding that the plaintiff had waived this challenge by failing to raise it in the rulemaking.

The District Court vacated the provision defining any individual portion of a CSA, up to a population limit of 2.5 million, as a WDLC, holding that it was contrary to the Act. Finally, the District Court vacated the provision to increase the population limit to 1 million people for rural districts, also finding it contrary to the Act.

Both parties appealed this decision. The NCUA appealed the court's rulings on CSAs and rural districts. The ABA appealed only the ruling on the core area service requirement. The CSA and rural district provisions remained vacated while the appeal was pending. Accordingly, the NCUA rescinded approvals granted under those provisions and ceased approving new applications. The NCUA filed a notice with the court on April 19, 2018, stating that it did not interpret the court's March 29, 2018, order as mandating de-listing of members who joined FCUs under the vacated provisions. The notice also stated that the ABA did not intend to seek an order de-listing such members.

D. 2018 Final Rule

On June 21, 2018, while the appeal was pending, the Board adopted certain limited aspects of the 2016 Proposed Rule in a final rule (2018 Final Rule).[33] Specifically, the 2018 Final Rule amended the Chartering Manual to: (1) Allow an FCU seeking to serve a community FOM to submit a narrative to support its chosen area, as an alternative to the presumptive community options; and (2) eliminate the requirement that a WDLC based on a CBSA must be confined to a single metropolitan division within a CBSA. For the narrative model for establishing a WDLC for a community FOM, the Board established a public hearing process for any such proposed

[22] Appendix B, Ch. 2, section V.A.2 of the Chartering Manual defines ''single political jurisdiction'' as ''a city, county, or their political equivalent, or any single portion thereof.''

[23] A CBSA is composed of the country's Metropolitan Statistical Areas and Micropolitan Statistical Areas. ''Metropolitan Statistical Areas'' are defined by OMB as having ''at least one urbanized area of 50,000 or more population, plus adjacent territory that has a high degree of social and economic integration with the core as measured by commuting ties.'' ''Micropolitan Statistical Areas'' are identical to Metropolitan Statistical Areas except that their urbanized areas are smaller, *i.e.,* the urbanized area contains at least 10,000 but fewer than 50,000 people. A ''Metropolitan Division'' is a subdivision of a large Metropolitan Statistical Area. Specifically, a Metropolitan Division is ''a county or group of counties within a Metropolitan Statistical Area that has a population core of at least 2.5 million.'' OMB Bulletin No. 15–01 (July 15, 2015).

[24] *Id.* ''A total population cap of 2.5 million is appropriate in a multiple political jurisdiction context to demonstrate cohesion in the community.'' 75 FR 36257, 36260 (June 25, 2010).

[25] 80 FR 76748 (Dec. 10, 2015).

[26] Similar to CSAs, as discussed in note 2, this provision allows an applicant to serve an entire CBSA if its population is no greater than 2.5 million. If the CBSA's population exceeds 2.5 million, an applicant may still base its WDLC on the CBSA but must select an individual, contiguous area that has a population no greater than 2.5 million.

[27] CSAs are composed of adjacent CBSAs that share what OMB calls ''substantial employment interchange.'' OMB characterizes CSAs as ''representing larger regions that reflect broader social and economic interactions, such as wholesaling, commodity distribution, and weekend recreational activities, and are likely to be of considerable interest to regional authorities and the private sector.'' OMB Bulletin No. 15–01.

[28] 81 FR 88412 (Dec. 7, 2016).

[29] 81 FR 78748 (Nov. 9, 2016).

community with a population greater than 2.5 million. Further, with regard to the change to CBSA limitations based on metropolitan division boundaries, no commenters objected to this technical change. In addition, in light of the March 2018 District Court Decision vacating the CSA option, the Board removed the CSA option from the Chartering Manual while it amended the portions of the Chartering Manual that contained this option. The 2018 Final Rule contained no statement on the validity of the CSAs or any other indication that the Board had decided to abandon or re-visit this definition. Because the 2016 Proposed Rule did not propose any changes to the rural district definition, the Board did not amend or remove the rural district provision in the 2018 Final Rule.

E. August 2019 Circuit Court Decision

On August 20, 2019, a three-judge panel of the D.C. Circuit Court of Appeals (Circuit Court) issued a decision on the appeal.[34] The Circuit Court, in a unanimous decision, found that the Board acted within its statutory authority and thus reversed the District Court's rulings on CSAs and rural districts and directed the District Court to enter summary judgment for the NCUA on both issues. The Circuit Court also reversed the ruling on the core area service requirement for CBSAs, remanding the issue to the agency for further explanation without vacating the provision.

With respect to CSAs and rural districts up to 1 million people, the Circuit Court held that both provisions are consistent with the Act and were reasonably explained. First, the court found the CSA provision consistent with the ''local community'' provision of the Act.[35] Further, the Circuit Court found that the CSA definition, which is based on commuting relationships, rationally advances the statutory purpose of ensuring an affinity or common bond among members.[36] The court also found that the definition rationally advances the Act's safety and soundness purposes.[37] On this point, the court found that allowing for larger communities could promote the economic viability of community FCUs.[38] The court also held that the 2018 Final Rule's removal of the CSA option from the Chartering Manual did not render that issue moot, citing evidence of the Board's intention to re-promulgate this provision if the court upheld it.[39]

Second, the court held that the expansion of the rural district definition to areas including 1 million people is consistent with the Act.[40] The court found that the term ''rural district'' does not connote specific population or geographic constraints.[41] The court also found that the Board reasonably explained the expansion, including the 2016 Final Rule's discussion of the agency's experience with several larger rural districts under the pre-2016 rule.[42]

On one limited issue, the Circuit Court asked for additional explanation in reversing the District Court's ruling on the core area service requirement and directed the District Court to enter summary judgment for the plaintiff on this provision and remand, without vacating, this provision to the agency for further explanation.[43] The Circuit Court held that this provision is consistent with the Act, but that the 2016 Final Rule did not adequately explain it in light of the concern that commenters raised about the potential for FCUs to engage in redlining or gerrymandering of CBSAs to avoid serving minority or low-income individuals.[44] Accordingly, the Circuit Court directed the District Court to remand this provision without vacating it, and noted that it expected the Board to act ''expeditiously.''[45] The Circuit Court did not prescribe a specific deadline or procedure for the Board to follow. Therefore, this provision and approvals that the agency has granted under it remain in effect.

Currently, the Chartering Manual does not contain CSAs or portions thereof as an option for a WDLC. As a result of the Circuit Court finding the Board acted within its authority, the Board proposed to re-adopt the provision allowing a CSA or an individual, contiguous portion of a CSA, to be a presumptive statistical-based WDLC, provided that the chosen area has a population of no more than 2.5 million. The 2016 Final Rule's expanded definition of rural districts remained in the Chartering Manual and was upheld by the court's decision. Accordingly, the Board did not address rural districts in the proposed rule.[46] Finally, the Board provided further explanation and support, and proposed to add a provision to the Chartering Manual with respect to potential discrimination to address the Circuit Court decision. The Board issued the proposed rule promptly after the decision in light of the Circuit Court's expectation that the agency act expeditiously to provide further explanation on the CBSA core area service requirement.

II. Summary of Proposed Rule and Further Explanation of Core Area Service Requirement

On November 7, 2019, the Board published a notice proposing to amend its FOM rules with respect to applicants for a community charter approval, expansion, or conversion, in response to the Circuit Court's August 2019 opinion and order. First, the Board proposed re-adopting a provision to allow an applicant to designate a CSA, or an individual, contiguous portion thereof, as a WDLC, provided that the chosen area has a population of 2.5 million or less. Second, with respect to communities based on a CBSA or a portion thereof, the Board provided additional explanation for its decision to eliminate the core service requirement in the 2016 Final Rule. Third, the Board clarified existing requirements and proposed to add an explicit provision to its rules regarding potential discrimination in the FOM selection for CSAs and CBSAs.

III. Summary of Comments on the Proposed Rule

The Board received approximately 128 comments, including from bank and credit union trade associations, state leagues and associations, credit unions, and banks. A number of banks submitted a form letter opposing the proposal, particularly with respect to the elimination of the core area service provision.

Credit union-affiliated commenters generally supported the proposal to reinstate the CSA provision and eliminate the CBSA core area service requirement for community charters. Several credit union-affiliated commenters opposed additional requirements for the marketing and business plan to establish service to core

[46] On October 4, 2019, the ABA filed a petition for rehearing *en banc* with respect to the panel's ruling on the CSA and rural district provisions. The NCUA responded to this petition, upon order of the court, on November 21, 2019. On December 12, 2019, the D.C. Circuit issued a *per curiam* (summary) order denying the petition. The Circuit Court issued its mandate to terminate the appeal on December 31, 2019, and the District Court entered summary judgment in accordance with the mandate on January 7, 2020. On March 11, 2020, the ABA filed a petition for a writ for certiorari requesting the U.S. Supreme Court review the Circuit Court decision. On June 29, 2020, the Supreme Court denied the ABA's petition. 2020 WL 3492665.

areas or low- and moderate-income individuals, viewing such requirements as unnecessary and burdensome.

Banks and bank trade associations provided comments largely opposing the proposed rule and the Board's objectives. These comments focused on eliminating the core area service requirement. Approximately 113 banks submitted various form letters opposing the proposal to eliminate the core requirement. The form letters criticized the proposal, emphasizing their belief that ''urban core areas deserve access to financial services'' and that the proposal would result in redlining. These commenters advocated that the Board adopt provisions similar to those issued by bank regulatory agencies that implement the Community Reinvestment Act (CRA). Specifically, they requested community-chartered credit unions account for low-, moderate-, and middle-income census tracts being excluded from the FOM and whether financial services are adequately being provided to those areas. Further, these commenters requested that an FCU be required to explain how people in the excluded core can access credit facilities if the FCU does not include the core.

The ABA [47] stated that the CSA and CBSA core provisions were ''seriously flawed'' and should be withdrawn unless the Board made significant modifications. The ABA relied extensively on the District Court decision that was unanimously reversed by the Circuit Court. Details of the comments are provided below in the discussion of the final rule.

IV. Final Rule

A. General

The Board has determined that it is appropriate and consistent with the Act to adopt the FOM chartering provisions described above, as proposed. Accordingly, the Board is amending its FOM rules with respect to applicants for a community charter approval, expansion, or conversion, in response to the 2019 opinion and order issued by the Circuit Court. First, the Board is re-adopting the provision to allow an applicant to designate a CSA, or an individual, contiguous portion thereof, as a WDLC, provided that the chosen area has a population of 2.5 million or less. Second, with respect to communities based on a CBSA or a portion thereof, the Board is providing additional explanation and support for its decision to eliminate the requirement to serve the CBSA's core area, as provided for in the 2016 Final Rule. In light of comments and consistent with the Circuit Court decision, the Board is clarifying existing requirements and adding an explicit provision to its rules regarding potential discrimination in the FOM selection for CSAs and CBSAs. Each of these three topics is discussed below.

B. Statutory Background and General Principles

Before responding to specific comments, the Board believes it is appropriate to explain the overall statutory basis for its FOM regulations applicable to chartering FCUs. In Section 2 of CUMAA, Congress set forth its ''Findings'' as follows:

The Congress finds the following:

(1) The American credit union movement began as a cooperative effort to serve the productive and provident credit needs of individuals of modest means.

(2) Credit unions continue to fulfill this public purpose, and current members and membership groups should not face divestiture from the financial services institutions of their choice as a result of recent court action.

(3) To promote thrift and credit extension, a meaningful affinity and bond among members, manifested by a commonality of routine interaction, shared and related work experiences, interests, or activities, or the maintenance of an otherwise well understood sense of cohesion or identity is essential to fulfillment of credit unions' public mission.

(4) Credit unions, unlike many other participants in the financial services market, are exempt from Federal and most State taxes because they are member-owned, democratically operated, not-for-profit organizations generally managed by volunteer boards of directors and because they have the specific mission of meeting the credit and savings needs of consumers, especially persons of modest means.

(5) Improved credit union safety and soundness provisions will enhance the public benefit that citizens receive from these cooperative financial service institutions.

These congressional findings—to encourage and improve financial access to credit to people of modest means, to enhance consumer choice, community affinity and common bonds, and to promote the safety and soundness of credit unions—are bolstered by specific provisions of CUMAA. For instance, Title 1 of that law addresses ''credit union membership,'' including the express provision in section 109 for the Board to establish regulations to encourage the chartering of community and multiple common bond FCUs. This section includes provisions encouraging formation of FCUs to encourage providing financial services to underserved communities and people of modest means. Title II of CUMAA mandates that the Board protect the National Credit Union Share Insurance Fund (NCUSIF) by issuing stricter safety and soundness provisions, including enhanced accounting standards in section 201. Title III of CUMAA includes capitalization and net worth requirements to ''resolve the problems of the insured credit unions at the least possible long-term loss to the [NCUSIF].'' Title III also sets forth specific mandates, including issuing regulations for prompt corrective action; capitalization requirements (including the submission of net worth restoration plans; earnings retention requirements; and prior written approval requirements for credit unions that are not adequately capitalized); certification of NCUSIF equity ratios; increased share insurance premiums; and periodic evaluation of access to liquidity. Title IV of CUMAA includes assurances for independent decision making in connection with certain charter conversions. Congress patterned these safety and soundness provisions after provisions applicable to the Federal Deposit Insurance Corporation (FDIC) and other banking regulatory agencies to ensure the safety and soundness of banks and protect the FDIC's insurance fund.

As CUMAA indicates, Congress directed the Board to consider multiple responsibilities, including encouraging access for financial services to people of modest means, encouraging competition among providers of financial services, and protecting taxpayers by enhancing the safety and soundness of the credit union system and protecting the NCUSIF. In contrast, banks have a more limited focus, including the interests of shareholders. This is illustrated in the ABA's comment letter, which states that the organization ''represents banks of all sizes and charters and is the voice of the nation's $18 trillion banking industry, which is composed of small, regional, and large banks that together employ more than 2 million people, safeguard more than $414 trillion in deposits, and extend $10.4 trillion in loans.'' [48]

[47] The ABA's submission included approximately 350 pages (14 pages were new comments, and the remainder consisted of attachments that included the ABA's legal filings and the District Court and Circuit Court decisions discussed above).

[48] In contrast, Federal credit unions have $803 billion in assets, employ roughly 160,000 people, safeguard $670 billion in shares and deposits, and extended $561 billion in loans.

Although the ABA's comment seems to oppose the Board's authority to construe the statute and promulgate substantive FOM rules based on consideration of the purposes of the Act, the Circuit Court made clear that Congress entrusted the NCUA with an express delegation of authority to reasonably construe the statutory field of membership terms, and to promulgate appropriate rules.[49] The Board also wishes to clarify the record in light of inaccurate statements in parts of the ABA's comments and litigation motions (which were appended to the ABA's comment letter).[50] Examples of factual misstatements in the ABA's ''Petition for Rehearing En Banc for Appellee-Cross-Appellant,'' which the ABA attached to its comment on this rulemaking, include the following. The Board wishes to clarify and correct these points, which pertain to the rulemaking generally:

- The ABA states that CSAs ''automatically qualify as 'local communities' ''[51] and ''The agency retains no discretion to determine that any application of its 'local community' or 'rural district' rule is unreasonable.''[52] In fact, such a CSA would be a ''presumptive community'' for which an applicant requests approval and provides a business and marketing plan to support an application. Then, NCUA staff in CURE reviews the application and in consultation with OGC for legal issues and the Office of Examination and Insurance and the Regional Office for safety and soundness concerns, may grant, deny or seek additional information.
- The ABA incorrectly states that there were ''hundreds of examples—and not a single counter-example—showing the agency's definitions fall outside the reasonable range of ambiguity of those terms.''[53] In oral argument before the Circuit Court, on behalf of the Board, the Department of Justice provided several examples.[54]
- The ABA incorrectly states Congress added the term ''local'' in the 1998 Act and then the Supreme Court ''reversed one such effort which would have allowed credit unions to be comprised of multiple unrelated employer groups (*NCUA* v. *First Nat'l Bank & Trust,* 522 U.S. 479 (1998).[55] In fact, the Supreme Court ruling came first on February 25, 1998, and then several months later Congress enacted CUMAA on August 7, 1998, including adding the term ''local.'' Also, the term ''local'' applies to community charters, while the Supreme Court decision focused on associational common bonds.
- The ABA references ''as applied'' challenges in 2004 in Utah and 2008 in Pennsylvania.[56] In fact, these cases challenged the sufficiency of administrative determinations that the NCUA made under the narrative model to establishing a community charter; this is a regulatory framework which has not been in effect for over a decade and was superseded by the new presumptive community rules adopted by notice-and-comment rulemaking in 2010 and supplemented in 2016. Thus, these pre-2010 cases are not relevant to the current challenge to presumptive communities set forth in the 2016 Final Rule.

The ABA also errs in stating: ''The panel relied on a separate regulation that requires credit unions to submit a business plan showing how the credit union would serve the proposed 'local community.' ''[57] In fact, both the presumptive community provisions for CSAs and CBSAs and the business and marketing plan requirements are in the same regulation.[58] The ABA further argued that ''[t]he rule leaves the agency with no discretion to determine that a particular application of its rule is unreasonable.''[59] In fact, for the reasons noted above, approval for a presumptive community is not automatic; an applicant must establish through its business and marketing plan that it can serve the community, as the Circuit Court observed.[60] All charter applications involve an iterative process between an applicant and the agency, with agency staff requiring the applicant to make modifications in approximately 95 percent of these applications. The NCUA chartering process is in this regard comparable to those that the federal banking agencies administer.[61] For example the Federal Reserve Board's application materials state: ''Starting a bank involves a long organization process that could take a year or more, and permission from at least two regulatory authorities. Extensive information about the organizer(s), the business plan, senior management team, finances, capital adequacy, risk management infrastructure, and other relevant factors must be provided to the appropriate authorities.''[62]

C. Proposal To Re-Adopt the CSA Community Charter Option

The Board proposed allowing a CSA (or a single portion thereof) to be a presumptive WDLC, subject to a 2.5 million population limit. In the proposed rule, the Board proposed to re-adopt this option in light of the Circuit Court decision reversing the District Court and upholding this provision in the 2016 Final Rule. The Board observed that the factual record regarding CSAs is materially identical to what existed in 2016. The only change that the Board proposed from the CSA option adopted in the 2016 Final Rule is clarifying language in the text of the Chartering Manual on the requirement that an FCU select a single, contiguous portion of a CSA to meet the WDLC requirement. The Board sought comments on this proposed action generally and specifically requested comments beyond the many it considered when it first adopted the CSA provision in FOM1.

Commenters generally supported the proposal to readopt the CSA provision. The ABA was the only commenter opposing it; no other bank-affiliated commenter addressed this proposal. In contrast, credit union commenters stated that CSAs are ''sufficiently compact to promote interaction and common interests among its residents'' and thus qualify as a WDLC. Other commenters stated that re-proposing this provision is consistent with the evolution in servicing members, as technology, financial services, and communities change. One commenter stated that adopting the CSA option is consistent with OMB designations that establish that there are sufficient interactions and common interests. Some commenters provided examples of CSAs, noting that cities in a CSA are ''intrinsically linked through both recreation and work.''

[49] *Am. Bankers Ass'n,* 934 F.3d at 663.

In opposing the proposal, the ABA stated that defining a CSA as a ''single local community'' is unreasonable and unlawful. The ABA largely relied on the District Court opinion, which was unanimously reversed by the Circuit Court. The ABA provided examples of CSAs that it believes might not be a WDLC and contended that CSAs have a ''daisy-chain nature'' in which opposite ends have little connection. It then stated that the Circuit Court indicated that some CSAs might not be a WDLC and thus could be challenged on an ''as applied'' basis. The ABA further stated that the term ''local community'' should not automatically include a CSA. Rather, it stated that any presumption that a CSA is a local community should be rebuttable. The ABA further stated that the Board should not adopt these provisions while litigation remains pending, including the possibility of an appeal to the Supreme Court.

After reviewing the comments in light of the unanimous Circuit Court decision to affirm the Board's adoption of a CSA as a presumptive community, the Board has determined that it is appropriate and consistent with the Act to amend the Chartering Manual to allow a CSA to be re-established as a presumptive WDLC. Much of the ABA's argument relied on the District Court decision that was unanimously rejected by the three-judge Circuit Court panel. In applying *Chevron,* the Circuit Court stated: ''We appreciate the District Court's conclusions, made after a thoughtful analysis of the Act. But we ultimately disagree with many of them. In this facial challenge, we review the rule not as armchair bankers or geographers, but rather as lay judges cognizant that Congress expressly delegated certain policy choices to the NCUA. After considering the Act's text, purpose, and legislative history, we hold the agency's policy choices 'entirely appropriate' for the most part. *Chevron,* 467 U.S. at 865.'' [63] With respect to CSAs, the Circuit Court, in rejecting the District Court's analysis, stated:

> In addition to being consistent with the Act's text, the Combined Statistical Area definition rationally advances the Act's underlying purposes. In the 1998 amendments, Congress made two relevant findings about purpose. First, legislators found ''essential'' to the credit-union system a ''meaningful affinity and bond among members, manifested by a commonality of routine interaction [;] shared and related work experiences, interests, or activities [;] or the maintenance of an otherwise well-understood sense of cohesion or identity.'' § 2, 112 Stat. at 914. Second, Congress highlighted the importance of ''credit union safety and soundness,'' because a credit union on firm financial footing ''will enhance the public benefit that citizens receive.'' [64]

The Circuit Court explicitly rejected the ABA's assertion that CSAs have a ''daisy chain'' nature, linking multiple metropolitan areas that have nothing to do with those at opposite ends of the chain. As the court stated:

> [T]he NCUA's definition does not readily create general, widely dispersed regions. *Cf. First Nat'l Bank III,* 522 U.S. at 502 (indicating that community credit unions may not be 'composed of members from an unlimited number of unrelated geographical units'. Combined Statistical Areas are geographical units well-accepted within the government. *See* [81 FR at 88414]. Because they essentially are regional hubs, the Combined Statistical Areas concentrate around central locations. . . . The NCUA rationally believed that such 'real-world interconnections would qualify as the type of mutual bonds suggested by the term 'local community.' . . . Thus, the agency reasonably determined that Combined Statistical Areas ''simply unif[y], as a single community,'' already connected neighboring regions. [*See* 81 FR at 88,415.] [65]

The ABA's misinterpretation of the *Chevron* doctrine was further repudiated by the entire Circuit Court, which rejected the ABA's petition for a rehearing *en banc.* The Board emphasizes that the ABA repeatedly misstates the regulatory framework for approving a presumptive community, both in its court filings and in its comment letter on the proposed rule. Under the regulatory provisions in the Chartering Manual, established by notice-and-comment rulemaking, there is no automatic approval of an application based on a CSA. Rather, an applicant would have to establish in its application that it can serve the entire community, as documented in its business and marketing plan. A further constraint on any such CSA or portion thereof is that its population cannot exceed 2.5 million people. As the Circuit Court noted:

> We might well agree with the District Court that the approval of such a geographical area would contravene the Act. But even so, the Association would need much more to mount its facial pre-enforcement challenge in this case. As the Supreme Court repeatedly has held, ''the fact that petitioner can point to a hypothetical case in which the rule might lead to an arbitrary result does not render the rule'' facially invalid. *Am. Hosp. Ass'n* v. *NLRB,* 499 U.S. 606, 619 (1991); *see also EPA* v. *EME Homer City Generation, L.P. (EME Homer),* 572 U.S. 489, 524 (2014) (''The possibility that the rule, in uncommon particular applications, might exceed [the agency]'s statutory authority does not warrant judicial condemnation of the rule in its entirety.''); *INS* v. *Nat'l Ctr. for Immigrants' Rights, Inc.,* 502 U.S. 183, 188 (1991) (''That the regulation may be invalid as applied in s[ome] cases . . . does not mean that the regulation is facially invalid because it is without statutory authority.''); *cf. Barnhart* v. *Thomas,* 540 U.S. 20, 29 (2003) (''Virtually *every* legal (or other) rule has imperfect applications in particular circumstances.'').
>
> Here, the Association's complaint and the District Court's accompanying worry strike us as too conjectural. The NCUA must assess the ''economic advisability of establishing'' the proposed credit union before approving it, [12 U.S.C. 1754], and as part of the assessment, the organizers must propose a ''realistic'' business plan showing how the institution and its branches would serve all members in the local community, *see* [12 CFR. part 701, app. B, ch. 1 section IV.D.] The Association has failed to demonstrate the plausibility of a local community that is defined like the hypothetical narrow, multi-state strip and accompanies a realistic business plan. And if the agency were to receive and approve such an application, a petitioner can make an as-applied challenge. *See, e.g., EME Homer,* 572 U.S. at 523–24; *Buongiorno,* 912 F.2d at 510.[66]

Thus, existing regulatory provisions guard against the extreme examples posited by the ABA, which claims incorrectly that the Board must approve them under the Chartering Manual. The Board agrees with the ABA and the Circuit Court that any application for a presumptive community, including one based on a CSA, can be challenged on an as applied, case-by-case basis. Given this regulatory framework, which is subject to judicial review, the Board agrees with the Circuit Court's reasoning in concluding that re-establishing the CSA as a presumptive community is entirely consistent with the express authority delegated to the Board by Congress. This provision also advances the Act's dual purposes of promoting common bonds while addressing safety and soundness considerations by ensuring that FCUs remain economically viable.

[63] *Am. Bankers Ass'n,* 934 F.3d at 656. *See also* with respect to CSAs: ''The NCUA possesses vast discretion to define terms because Congress expressly has given it such power. But the authority is not boundless. The agency must craft a reasonable definition consistent with the Act's text and purposes; that is central to the review we apply at *Chevron's* second step. Here, the NCUA's definition meets the standard.'' *Id.* at 664.

[65] *Id.* at 666–67.

[66] *Id.* at 668.

B. Proposal: Elimination of the Core Requirement for CBSA Community Charters

In the proposed rule, the Board addressed the Circuit Court's concern regarding the potential for discriminatory redlining or gerrymandering of FOMs based on a portion of a CBSA that excludes the core area. In accordance with the Circuit Court's order, the Board provided further explanation for the provision of the 2016 Final Rule that eliminated the requirement for an FCU to serve the core area when it chooses to base its FOM on a portion of a CBSA. As background and context for these considerations, the Board explained differences between the chartering processes for FCUs and other types of financial institutions, with particular reference to the CRA provisions that Congress has applied solely to banks and federal savings associations. The Board explained that Congress intentionally excluded credit unions from the CRA and established a different regulatory framework for how credit unions provide financial services to low- and moderate-income people. In addition to differences between banks and credit unions, the Board further explained that Congress established different regulatory incentives for government-sponsored enterprises, such as Fannie Mae and Freddie Mac.

In addition to these legislative differences, the proposal set forth additional reasons, including quantitative data, to support its decision to eliminate the core area service requirement. To this end, the Board reviewed the record from the 2016 Final Rule and observed that removing the core area service requirement would better allow FCUs flexibility to serve low- or moderate-income segments of communities in areas outside the cores. The Board noted that this consideration is consistent with a view that credit union-affiliated commenters expressed in response to the 2015 Proposed Rule. After reviewing the judicial decisions in this matter and comment letters from the 2015 and 2016 rulemaking, the Board determined that enhancing flexibility is consistent with its decision to eliminate the core area service requirement.

As an independent basis to support this decision, the Board presented and considered supplemental data relating to CBSAs to further support eliminating the core area service requirement. The Board noted that the data showed that a substantial majority of core areas in CBSAs receive service from community FCUs. In addition, the Board identified several CBSAs in which low- or moderate-income individuals could receive greater access to financial services, if FCUs are permitted to serve an FOM consisting of the non-core areas of those CBSAs. Specifically, the Board observed that household income is sometimes higher in certain neighborhoods in a CBSA's core as compared to suburban areas in adjacent counties outside the core. Retaining the core area service requirement would often require an applicant to provide financial services to relatively wealthy individuals in high-income areas who have ample options for their financial needs. Thus, the Board reasoned that the requirement may result in a potential applicant for a community charter either not seeking a charter for the low- to moderate-income areas or expending resources on wealthier areas in the core that have less need for such new services and access to credit. Based on that analysis, the Board found that this requirement may decrease potential credit opportunities for low- and moderate-income segments of communities in some circumstances. By removing the core area service requirement provision, the Board anticipated that a potential FCU applicant could focus its limited resources to better serve such less affluent communities.

In addition to those examples and analysis, the Board considered data reflecting that community FCUs tend to serve most CBSA core areas across the country. The NCUA's data (which are publicly available) show that a substantial majority of CBSAs, including their core areas, are currently served by community-based FCUs. FCUs of various other charter types also serve core areas across the country. In addition, FCUs currently serve the entirety of several of the most populous SPJs in the country—Los Angeles County, California; Houston, Texas; Philadelphia, Pennsylvania; and San Antonio, Texas. If any of these pre-existing FCUs sought to modify their FOM to exclude an urban core, such a request would be subject to scrutiny by the NCUA to determine whether the FCU was engaged in discriminatory practices or whether it might leave the urban core underserved.[67] Moreover, any member of these pre-existing FCUs could alert the NCUA of any potentially discriminatory practices, for which the NCUA could take appropriate action.[68] Because of this expansive coverage of core areas by pre-existing community FCUs, the Board found further support that it is reasonable to eliminate the core area service requirement.

Furthermore, the Board noted that approximately 700 community-based FCUs are currently designated as low-income credit unions (LICUs) pursuant to the Act and the NCUA's regulations.[69] These FCUs have the potential to serve over 10 million members across the country. As directed by Congress, the NCUA accords this designation to credit unions that predominantly serve low-income members. By obtaining this designation, credit unions gain greater flexibility in accepting nonmember deposits,[70] are exempt from the aggregate loan limit on business loans that otherwise applies to all federally insured credit unions,[71] may offer secondary capital accounts to strengthen their capital base,[72] and gain access to grants and loans from the Community Development Revolving Loan Program for Credit Unions.[73] Accordingly, the Board observed that community-based FCUs have both strong incentives and a strong record of providing service to low-income segments of communities.

Separately, the Board cited the agency's experience in implementing this provision since 2016 as a further indication of the non-discriminatory bases that FCUs have for pursuing this option. For example, in applications granted by the agency between 2016 and 2019 under this provision, the agency identified no discrimination. The Board detailed the reasons that the three FCUs approved under this provision had for their FOM selection, which centered on limited capacity or the ability to serve areas outlying a heavily populated core area, such as New York City. In light of that actual record, in addition to the data and examples, the Board found that the risk of discrimination is minimal and that FCUs have invoked the subject provision to serve areas outside the core that would otherwise have been omitted if the core area service requirement had been in place.

Comments were mixed on whether it is appropriate to eliminate the core area service requirement. While every credit union-affiliated commenter that addressed this specific proposal supported it, bankers opposed the Board's decision to eliminate the core service requirement.

[67] The new provisions in the Chartering Manual, discussed in detail below, would address this issue. App. 1, Ch. V.A.8.

[68] *Id.*

[69] 12 U.S.C. 1757(6); 12 CFR 701.34.

[70] 12 U.S.C. 1757(6).

[71] 12 U.S.C. 1759a(b)(2)(A).

[72] 12 CFR 701.34(b)–(d). Credit unions must submit a secondary capital plan under § 701.34(b)(1) before issuing secondary capital accounts.

[73] 12 CFR 705.2.

Credit union-affiliated commenters stated that eliminating the core service requirement will not encourage discriminatory lending practices, noting that FCUs have a history of providing financial services to the underserved, and unlike banks do not have a history of redlining. Additional reasons commenters provided for supporting the proposal include that it:

• Allows an FCU to request an FOM that more reasonably fits its ability to serve, thereby facilitating services to potential customers and that requiring service to the entire core may unreasonably stretch an applicant's resources;

• Provides FCUs added flexibility to serve low- and moderate-income communities in areas outside the core;

• Allows FCUs to focus on how best to allocate limited resources to allow service to low-income members and areas;

• Accommodates changing demographics in which core areas are wealthier, while suburbs are more diverse but poorer;

• Recognizes that FCUs have valid business reasons for choosing to serve or not to serve a CBSA's core; and

• Provides the NCUA added authority to reject applications that may be based on discriminatory intent.

These commenters further stated that the ABA's lawsuit would limit access of some low-income people to financial services. Specifically, they argued that implementing outdated and burdensome CRA requirements would reduce flexibility to serve poorer communities because FCUs may be required to serve wealthier cores, while reducing service to poorer areas. Consistent with the proposed rule's discussion, a commenter cited a *New York Times* article identifying demographic changes in downtown populations in Raleigh, Brooklyn, Atlanta, Indianapolis, Philadelphia, Nashville, Houston, Denver, and Chicago.[74]

Commenters noted that even without additional requirements, FCUs—like banks—are subject to numerous anti-discrimination laws, and the NCUA[75] already has authority to oversee compliance. In addition to the Equal Credit Opportunity Act of 1974 (ECOA)[76] and the Fair Housing Act of 1968,[77] the Home Mortgage Disclosure Act (HMDA)[78] mandates that FCUs provide extensive data on lending practices, thereby providing an additional mechanism to identify discriminatory lending trends. Further, compliance with fair lending laws is a core responsibility of an FCU's board of directors. Also, similar to bank regulatory examiners, NCUA examiners, who are trained to identify fair lending violations, are empowered to take appropriate action against FCUs relating to lending activity.

In contrast, bank-affiliated commenters opposed eliminating the core requirement, stating:

• The NCUA did not address the Circuit Court's concern that a community credit union can engage in redlining or gerrymandering to create a community of higher-income members;

• The NCUA should consider the effect on excluded portions of communities, without regard to the business needs of the credit union, in light of FCUs' mission of serving those of modest means;

• The NCUA needs to consider access to full-service branches, even though not statutorily mandated;[79]

• The NCUA should substantiate the statement in the proposed rule regarding FCUs serving most CBSA core areas across the country;

• The proposed rule did not consider two Government Accountability Office (GAO) studies that conclude that credit unions serve a lower percentage of people of modest means than banks;

• The fact that some CBSAs have lower-income people outside the core does not justify a blanket rule permitting FCUs to exclude core areas;

• Credit unions should undergo examinations similar to the CRA reviews that bank regulators conduct;

• FCUs should demonstrate whether: (1) The revised geographic boundaries outside the core would result in more low- and moderate-income individual[80] populations being served, (2) financial services are provided to the excluded areas, and (3) the excluded area will have access to financial services;

• The NCUA's consumer compliance program is not sufficient to ensure compliance with consumer compliance laws;

• The NCUA's consumer compliance practices are not sufficient to safeguard against illegal discrimination, stating the NCUA conducted 25 fair lending exams in 2018 (less than 2013) even though credit unions have added 22 million members since 2013; and

• The NCUA's complaint process does not address nonmembers seeking FOM expansions.

Accordingly, some of the bank-affiliated commenters requested that the NCUA withdraw the proposal because, as the ABA opined, "credit unions have a special mission of serving persons of modest means" and that it is "the Board's responsibility to carry out this mission." These commenters further requested that the NCUA require that FCUs demonstrate a compelling interest or need to exclude urban cores. They also requested that the NCUA provide for public input to allow community groups to weigh in on excluding the core area.

In response to supplemental information in the proposed rule regarding income distribution within and outside the core in several CBSAs, several commenters provided specific examples of credit unions serving wealthier communities while not adding branches in less affluent communities. The ABA specifically referenced Cleveland and Detroit to illustrate charters that may be approved by the NCUA under this provision where they contended lower-income and minority residents might be excluded from the FOM. Similarly, a Michigan banker referenced a state-chartered credit union's activities in Michigan.[81] In addition, the ABA questioned the proposed rule's examples of CBSAs in which some portions—represented by ZIP codes—outside the core area have lower median income than the relevant core areas. The ABA questioned the use of ZIP codes because the NCUA's chartering rules do not recognize ZIP codes as WDLCs. The ABA also stated that the fact that there may be relatively affluent parts of the urban core of some CBSAs, in which median incomes exceed those in some outlying suburbs, does not justify a blanket rule that credit unions may

[74] Badger. E., Bui Q, & Gebeloff R (Apr. 27, 2019), "The Neighborhood is Mostly Black. The Home Buyers Are Mostly White," *The New York Times, available at: https://www.nytimes.com/interactive/2019/04/27/upshot/diversity-housing-maps-raleigh-gentrification.html.*

[75] The NCUA, along with the Consumer Financial Protection Bureau (CFPB), FDIC, Federal Reserve, and the OCC, is a member of the Federal Financial Institutions Examination Council (FFIEC), which coordinates the supervision of financial institutions,

[77] Public Law 90–284.

[78] Public Law 94–200.

[79] No bank-affiliated commenter directly addressed the proposed rule's discussion about how Congress established different regulatory structures to provide financial services for underserved people and communities for different financial institutions. Specifically, Congress mandated the CRA for banks and federal savings association. In contrast, Congress declined applying the CRA to credit unions; rather, understanding the differences among financial institutions, Congress tailored different incentives for credit unions and government sponsored enterprises to facilitate providing financial services to people in underserved communities.

[80] The commenters referred to these groups as "LMIs."

[81] The Board notes that because the credit union referenced by the banker is state-chartered, it is not subject to the NCUA's chartering rules.

exclude all, or any part of, the urban core from their service area. According to the ABA, such a rule would permit FCUs to choose to serve only high-income areas of the CBSA, while excluding low-income areas.

Based on its review of the comments along with incorporating the rationale set forth in the proposed rule, the Board has determined that eliminating the core area service requirement is appropriate and consistent with the Act. In doing so, the Board reiterates its statement in the proposed rule that it sees each of the supporting points that it set forth as sufficient on its own to support eliminating this requirement. Considered together, these points cumulatively provide a reasoned basis for this action. As noted above, in establishing its FOM requirements, the Board must consider both providing increased access to consumers of modest means and enhancing safety and soundness and protecting the NCUSIF (and thus taxpayers). Based on its experience in analyzing community charters in light of the statutory provisions, the Board has determined that eliminating the core service requirement advances these congressional mandates. As discussed in the proposal, affording applicants for community charters the flexibility to match their financial resources with an underserved community will increase the likelihood that more low- to moderate-income consumers will be served, and enhances safety and soundness, because the applicant will be better able to serve a community without over-extending its resources. The inflexible regulatory requirement suggested by the bankers would likely result in not only providing fewer underserved communities access to financial services, but may result in more credit union failures.

As discussed in the proposed rule, of the approximately 50 community charters reviewed by the agency since the 2016 Final Rule took effect, the Board has approved only three community charters in which the applicant requested a CBSA that excluded the core. As the following table reflects, these charters are primarily for FCUs with assets ranging from $158 million to $281 million.[82] Thus, they illustrate the critical need for enhanced flexibility by not mandating service to the core area. Such flexibility may be crucial to the FCU's decision to seek a community in an area, especially near a major—and expensive—population center such as New York City, Boston, Washington, DC, or Cleveland.

Credit union	City	State	Approx. assets	Approved community
Palisades FCU	Pearl River	NY	$181 mil	Rockland County, NY and Bergen County, NJ (population 1.2 million) is a portion of larger New York-Jersey City-White Plains, NY-NJ Metropolitan Division (core under former rule would have been either New York City or New York County (Manhattan).
NYMEO FCU	Frederick	MD	$281 mil	Montgomery, Washington, Carroll, and Howard Counties, Maryland and Jefferson and Berkley Counties, West Virginia.
LorMet Community FCU	Amherst	OH	$158 mil	Expanded community charter to serve Lorain County, Ohio and the cities of Westlake, Bay Village and Rocky River, located in Cuyahoga County, Ohio.

For instance, the LorMet Community FCU provides a direct, real world, response to the ABA's reference to the Cleveland CBSA. The Cleveland-Elyria Ohio MSA—centered in Cuyahoga County—has 980 census tracts [83] with a population of 2,057,009. It is comprised of the following counties with these populations: Cuyahoga County (Cleveland)—1,243,857, Geauga County—94,031, Lake County—230,514, Lorain County—309,461, and Medina County—150,439.

LorMet Community FCU has 18,778 current members, three branches, and assets of $158 million. It was originally a state chartered credit union that served employees of a single occupation. LorMet converted to a federal community charter in 2000 to better diversify due to downturns in domestic manufacturing activities. Specifically, Lorain County suffered automotive and other manufacturing plant closures. The FCU's original community charter served people who live, work, worship, or attend school in and businesses and other legal entities located in Lorain County, Ohio, which is directly adjacent to Cuyahoga's western border. LorMet sought to expand to three small towns in Cuyahoga: Westlake (population 32,293), Bay Village (population 15,328), and Rocky River (population 20,264). The combined populations of these three towns represent less than six percent of Cuyahoga's total population. The agency approved the community charter request, which would allow the credit union to expand its indirect loan program to attract new members. Management based the credit union's service area on the areas covered by two automobile dealers with longstanding involvement in the credit union's indirect loan program. The indirect loan program served as an important driver of the credit union's loan acquisition, growth, and income. Absent the Board's decision to eliminate the core area service requirement, it would be highly impracticable for LorMet to serve all of Cuyahoga County, which has a population approximately 400 percent larger than Lorain County and 20 times more than the proposed expansion, within existing resources.

Similarly, the Detroit-Warren-Dearborn CBSA—centered in Wayne County—has 1,594 census tracts with a population of 4,326,442. This CBSA also includes five other counties: Lapeer—population 88,028, Livingston—population 191,224, Macomb—population 874,759, Oakland—population 1,259,201, and St. Clair—population 159,337. With respect to the named counties, each of the core areas has census tracts with both lower-income residents and significant wealthy areas of gentrification. For instance, one of Detroit's most affluent neighborhoods, Gross Pointe, is in Wayne County. Ten miles away and on the border with Wayne County, both Oakland and Macomb counties have some of the poorest segments of the CBSA. Thus, relative wealth at times does not correlate with the county in which a resident lives, as distressed core areas often have affluent residents, and suburban counties adjacent to the core area have extremely poorer ones. Thus, similar to the proposal's examples of Washington, DC and Atlanta, the

[82] The Small Business Administration considers any financial institution with assets under $600 million a small business. *See* 13 CFR 121.201, ''Small Business Size Standards by NAICS.'' This designation includes credit unions as well as banks.

[83] Each census tract has approximately 3,200 residents, thus offering an opportunity for a wide disparity in incomes.

same situation holds true for Cleveland and Detroit.

Counties adjacent to Cleveland and Detroit have faced significant economic challenges due to the loss of manufacturing jobs. For instance, in Lorain County, both Ford and US Steel closed manufacturing plans; and in Macomb County, General Motors closed plants. Eliminating the core area service requirement makes it more likely that an FCU would seek a community charter in these economically distressed adjacent counties than if they were required to seek a charter for the entire CBSA. It would be economically far more difficult, and potentially impossible, for a smaller FCU to provide financial services to both the core county and adjacent areas.

While nothing in the Chartering Manual prohibits an applicant from pursuing a charter for an entire CBSA up to 2.5 million people, a mandate requiring such service may dangerously and needlessly increase risk by overextending the resources of an FCU, especially a smaller one.[84] As discussed above, mandating that a community charter applicant serve the named core communities such as Cuyahoga in Cleveland and Wayne in Detroit may result in two harmful outcomes. First, an overextended smaller FCU is more likely to fail. Second, a potential applicant faced with having to serve both the named core as well as an adjacent area might make the business decision not to pursue an application at all, thereby reducing access to financial services for some low- and moderate-income consumers. Therefore, providing FCUs with limited resources more options will provide more low- and moderate-income people greater access to financial services.

The ABA also questioned why the NCUA had not addressed two GAO studies regarding the credit union industry. The first study (GAO–07–29) from 2006 indicated that 31 percent of credit union customers are of ''modest means'' as compared to 41 percent of bank customers.[85] The second GAO study (GAO–04–91) from 2003 concluded that credit unions provide a ''slightly lower'' percentage of their mortgage loans to low- and moderate-income households than banks.[86] The age of the studies as well as data limitations cast significant doubt on their usefulness to this rulemaking.[87] GAO–07–29 was issued in 2006 and relied on two-year old (2004) data from the Survey of Consumer Finances (SCF). GAO–04–91 was issued in 2003 and based its analysis on 2001 mortgage data from the HMDA database. Further, as the GAO itself acknowledged in both studies, the limitations inherent to the data require caution in their interpretation. In the case of GAO–07–29, the study noted that ''as an approximation of income levels, SCF data have certain limitations for measuring the income characteristics of credit union members.'' [88] GAO–04–91 provided that ''relying on HMDA data to evaluate credit union service to low- and moderate-income households has limitations'' due to the smaller size of credit unions and the fact they generally make more consumer loans than residential mortgage loans.[89] Also, the two studies inconsistently distinguished between FCUs and state-chartered credit unions [90] in presenting the statistics that the ABA cites. Given the questionable utility of these outdated studies which relied on data that preceded the Subprime Mortgage Crisis and the Great Recession, the Board believes that its actual experience with implementing the rule along with the more timely data presented in the November 7, 2019, proposed rule, as well as in the earlier FOM rules, better reflect the relevant policy and legal considerations.

The Board also notes that the ABA contended that the small number of approvals under this provision since 2016 suggests that the Board lacks sufficient experience to support what it terms a ''sweeping conclusion'' that FCUs have legitimate, nondiscriminatory purposes for using this provision. To the contrary, the Board finds that these limited approvals confirm the Board's conclusion. As noted in the proposed rule, eliminating the core area service requirement may benefit FCUs with more limited resources. The fact that FCUs have not used this provision extensively, but rather more selectively, tends to dispel the ABA's stated concern that FCUs will use the provision to avoid serving low- and moderate-income people. Instead, the Board's experience in analyzing community charter applications, regardless of the volume of applications and approvals, tends to show that FCUs have used the provision as the Board expected.

Further, as noted in the proposed rule, in light of changes in demographics and population trends, many core areas have residents with higher incomes compared to proximately close areas outside the core. In the proposed rule, the Board provided examples of this phenomenon of CBSAs, including Washington, DC and Atlanta. Commenters provided support for this phenomenon of many other gentrifying CBSAs, including the *New York Times* story discussed above. This phenomenon is further reflected by the demographics in Detroit and Cleveland.[91] No commenter provided convincing arguments or information to counter this factual consideration.

Regarding the ABA's comment concerning the Washington, DC and Atlanta examples in the proposed rule and questioning the use of ZIP codes to delineate portions of these CBSAs, the Board notes that the ABA does not dispute the income figures or provide evidence that in such CBSAs, an FCU could use the CBSA provision without the core area service requirement to compose an FOM that would likely contain more low-income individuals than if the FCU served the core area to the exclusion of outlying areas. Regarding the use of ZIP codes, the Board agrees that these designations do not constitute WDLCs under the Chartering Manual. Rather, the different ZIP codes correlate with areas within these CBSAs and were used to illustrate varying median income levels within well-recognized segments of these communities. Further, ZIP codes are more readily understood by the general public than other geographic designations such as census tracts. Accordingly, the Board continues to believe that such examples illustrate the potential benefits of eliminating the core area service requirement for CBSAs.

Similarly, with respect to the ABA's contention that a blanket rule permitting omission of the core area is not justified by the fact that more affluent people reside inside the core areas (and less affluent ones live outside the core) in some CBSAs, the Board believes that the real life examples more appropriately reflect current demographic and corresponding housing and income

[84] As of March 31, 2020, 74 percent of all FCUs have total assets under $100 million. Further, 60 percent of community-based FCUs have total assets under $100 million.

[90] State chartered credit unions are not subject to NCUA's Chartering regulations. Further, some states provide more expansive chartering opportunities.

[91] For example, Shaker Heights in Cuyahoga is one of Cleveland's most affluent neighborhoods.

trends. The Board acknowledges, as it did in the proposed rule, that the phenomenon of outlying areas outside the cores having higher incomes is not universal. It is true in some instances, and the Board finds that eliminating the core area service requirement will make it more likely that FCUs with limited resources can select FOMs with more low- and moderate-income people in a safe and sound manner. The ABA's unsubstantiated concern that FCUs may use this provision to exclude low- and moderate-income people in other instances does not override this significant benefit to the rule. Also, this concern is independently addressed by the new provision that the Board is adopting in the Chartering Manual, discussed below, to provide the agency more explicit authority to address the ABA's concern, if FCUs do attempt to use the provision in order to exclude low- and moderate-income people from their FOMs.

In addition, the Board considered the recommendation by many banks that FCUs should be subject to the same CRA reviews that the banks undergo. The Board finds this recommendation misplaced because it addresses community service and lending activity after an FCU selects its FOM. As the Board noted in the proposed rule and discussed in detail in the 2016 Final Rule, under the Chartering Manual, the agency conducts periodic reviews of FCUs to determine whether they are serving their communities as stated in their initial FOM applications. These periodic reviews are conducted in addition to fair lending and safety and soundness examinations. The bank commenters did not explain why these existing procedures are insufficient in their view and also did not explain how the strength of reviews that the agency conducts after FOM selection is relevant to the validity of the provisions addressing how FCUs may designate their FOMs in the first instance. As the Circuit Court observed, FOM selection and post-selection community service are distinct,[92] and the agency will continue to conduct these periodic reviews for their intended purpose. Accordingly, the Board has established two sets of requirements. The Chartering Manual's requirement for an applicant to submit a business and marketing plan is prospective in nature and requires an applicant for a new or expanded charter to provide information about how it intends to serve the new community. The business and marketing plan requirement is supplemented by the periodic review requirement, which specifies that agency staff will evaluate how well a credit union has served its new community.

The ABA also indicated that eliminating the core area service requirement would result in disparate treatment for minorities, stating that ''NCUA must consider whether approval of a proposed service area that excludes the urban core of the community will have a discriminatory *effect.*'' [93] Throughout the ABA's comments, it refers many times to ''low income or minority individuals.'' [94] The Board finds that this rule addresses potential disparate impact on low-income or minority individuals in several significant ways.

First, as detailed in the preceding section, based on the Board's consideration of the evidence and public comments, the Board finds that eliminating the core area service requirement is likely to enhance service to areas outlying the cores, which may allow FCUs to respond to the trend of low-income and minority individuals moving to suburbs in greater numbers than in the past. Thus, the Board is not persuaded that maintaining this chartering option and the flexibility it provides will by its nature have a disparate impact on low-income or minority people.

Second, as detailed in this rulemaking, in the 2016 Final Rule, and in the Circuit Court's August 2019 opinion,[95] many pre-existing FCUs serve core areas where low-income and minority residents live. The Board found in the 2016 Final Rule that its periodic reviews of community service and enforcement of applicable anti-discrimination laws effectively address discriminatory practices that might occur separate from the initial chartering process, and the Circuit Court found that these measures could address such discrimination. This established process and the agency's experience in its administration indicate that the agency is well-equipped to address discrimination in the chartering process as it has in the post-chartering phase without the need to adopt a disparate impact or effects-based standard.

Third, as a complement to the post-chartering review and regulation, the Board is adopting the new provisions in the Chartering Manual detailed in the section below to provide explicit authority for the Board to address intentional discrimination in the chartering process. These provisions also directly address the ABA's concern.

For each of these individual reasons, the Board concludes that this final rule addresses the ABA's concern. As noted in the Circuit Court's opinion, this final rule would not bar the ABA from challenging such approved applications on an as-applied basis. But, the ABA's concerns are unfounded and do not provide persuasive reasons not to adopt this final rule, which is consistent with the Act.

The Board also notes that the ABA's statement about LICUs not serving all people of modest means in the country is misplaced. The ABA contends that the proposed rule's discussion of LICUs is not persuasive because LICUs have potential to serve only 3 percent of the United States population and that 11 percent of the population is below the poverty line. The Board did not state that LICUs have the potential or do serve all people of modest means in the United States. Instead, the Board enumerated the benefits of low-income designation as further, independent support for its finding that FCUs are unlikely to engage in redlining or gerrymandering because there is a strong incentive to compose FOMs that have larger percentages of low-income people in order to attain this designation, as set forth in detail above and in the proposed rule.

Similarly, the Board observes that the ABA does not factually dispute the statement in the proposed rule that FCUs serve the majority of CBSA core areas in the country. The ABA, which has access to public data on FOMs across the country, did not adduce or provide any contrary information or specifically question the conclusion. This information, like the information about LICUs, constitutes further, independent support for affirming this provision. As amply illustrated in the proposed rule and in this final rule, it is not the sole basis for support, and nor is it necessary to sustain the provision given the other strong reasons detailed in the proposed rule. Nevertheless, the Board continues to find this fact compelling because it confirms that

[92] 934 F.3d at 670.

[93] Emphasis in original.

[94] The Board acknowledges that there may be overlap between low-income and minority groups. Nevertheless, the ABA should be aware that in applying statutes and the ensuing regulatory regime, the threshold issue is always whether Congress applied the provisions to that entity. In its comment, the ABA conflates the CRA's purpose of providing financial services to underserved areas with ''disparate impact'' considerations that affect minority borrowers. By contrast, in the ABA's extensive comments to an advance notice of proposed rulemaking issued by the OCC and FDIC, the ABA made no mention of disparate impact, suggesting it views these concepts as distinct. ABA Comment Letter, Reforming the Community Reinvestment Act Regulatory Framework, Docket ID OCC–2018–0008, *available at https://www.aba.com/-/media/documents/comment-letter/cl-cra20181115.pdf?rev=a8d598e9460341e78a4d76aa004dd244.*

[95] *Am. Bankers Ass'n,* 934 F.3d at 970.

FCUs provide services to a broad range of areas across the country, including CBSA core areas. In addition, in response to the ABA's supposition that the Board noted this fact to suggest that other institutions are doing the work of serving those of modest means, the Board emphasizes that the agency does and will continue to evaluate each individual application on its own merits. The fact that FCUs already provide services to many low- and moderate-income individuals reinforces that FCUs have a strong history of doing so.

Based on its experience with community chartering, as bolstered by this legal analysis of the statutes that address providing financial services to people of modest means, the Board has determined that its decision to eliminate the core service requirement is appropriate and consistent with the legislation. Not only does the flexibility afforded by this regulatory decision incentivize the chartering of more community-based FCUs to serve people of modest means, but allowing an applicant to tailor its community to its residents and particular circumstances will increase economic viability. Thus, FCUs will likely have fewer safety and soundness concerns and will be less likely to fail. The Board further notes that nothing in the rule precludes an FCU from serving an entire CBSA up to the 2.5 million population limit, just that such an FCU is not mandated to do so. Statistics provided in the proposed rule indicated that FCUs already provide financial services to the vast majority of CBSA core areas. Thus, the bankers' proffered concerns that many low- and moderate-income people will not obtain such access is without merit.

Further, the bankers' dismissive response to the various fair lending laws, such as ECOA, HMDA, and the Fair Housing Act to which FCUs are subject is without merit, particularly because banks are subject to the same statutes and regulations. The NCUA—along with the CFPB, FDIC, Federal Reserve, and OCC—is a member of the Federal Financial Institutions Examination Council (known as the FFIEC) and thus extensively coordinates with those agencies on consumer compliance programs. Like bank consumer compliance examiners, NCUA examiners seek to ensure compliance with these consumer protection statutes and regulations. Further, the boards of directors of both banks and credit unions are on notice and fully aware that compliance with such consumer safeguards is essential and that non-compliance with fair lending statutes expose them to reputational risk, legal risk, and compliance risk, including enforcement actions and fines.[96]

These safeguards provide further support for the Board's determination that it is appropriate to eliminate the core area service mandate. The Board notes that the core area service requirement is a regulatory provision adopted in 2010 by a notice-and-comment rulemaking and is not required by the Act. After several years of experience with the provision, the Board determined that this provision was not necessary to further the Act's purposes. Further, the Board notes that the ABA's request that the Board demonstrate a ''compelling interest or need'' to exclude the core misunderstands the applicable law. A fundamental principle of administrative law under the APA is that an agency is required to provide a rational basis that the rule is not ''arbitrary, capricious, an abuse of discretion or otherwise not in accordance with the law.''[97] As described above and consistent with the Circuit Court's decision, the agency's decision to eliminate the core requirement is fully consistent with and advances the statutory mandate as described in the ''Findings'' section and various provisions in CUMAA. Eliminating the provision not only furthers financial access to people of modest means, but enhances the safety and soundness of credit unions and the share insurance fund.

The bankers' additional request to allow for public input from community groups to weigh in on excluding core areas is neither necessary nor appropriate. By approving new FCU charters, the Board is expanding choices for consumers, including those of modest means, and providing additional competition to other financial institutions. Such expanded choice and competition is in the interest of all consumers. Nothing in the approval of a new FCU requires an individual or community group to do anything other than potentially benefit from expanded alternatives.

D. Added Provision in Chartering Manual Addressing Service to Low- and Moderate-Income Individuals

The Board proposed amending the Chartering Manual to clarify and bolster the NCUA's authority to review applications to serve community-based FOMs consisting of CSAs or CBSAs to ensure that the FCU's requested community is not selected in order to exclude low- or moderate-income individuals. Under current provisions in the Chartering Manual, an applicant must detail how it will implement its business and marketing plan; the unique needs of various demographic groups in the proposed community; how the FCU will market to each group, particularly underserved groups; which community based organizations the FCU will target for outreach efforts; the FCU's marketing and budget projections dedicating resources to reach new members; and the FCU's timetable for implementation. Under the proposed rule, an FCU would be required to demonstrate that its choice of FOM, including choosing not to serve the core, is based on sound legal and business judgment and not an attempt to redline or discriminate on an illegal basis. This provision was proposed to supplement existing requirements for applicants to submit acceptable business plans, which applies to all community-based FOM applications.

Separately, and to complement this proposed requirement, the Board proposed to amend the Chartering Manual to clarify and bolster the NCUA's authority to reject applications to serve community-based FOMs consisting of CSAs or CBSAs, if the agency determines that the FCU's application is based on discriminatory intent or a desire to exclude low- or moderate-income individuals. The Board stated that this provision, if adopted, would serve as an additional means to address the issue that the Circuit Court raised regarding redlining and other forms of illegal discrimination. This provision was proposed to add to the existing provisions under which applicants must submit acceptable business plans, which applies to all community-based FOM applications.

Further, to make certain that the agency has explicit discretion to ensure that the FCU applicant will not seek to exclude service to low- and moderate-income segments of communities, the Board proposed to amend the Chartering Manual to provide that the NCUA may require additional information on how the FCU's business needs support its selection, conduct any further inquiry that it deems appropriate, and reject either an initial charter application or an expansion or amendment request if the NCUA determines that a community-based FCU has chosen its specific geographic area in order to exclude low- or moderate-income or underserved people.

The Board further discussed how it would expect CURE, in consultation

[96] ''Wells Fargo, Philadelphia reach settlement in redlining lawsuit,'' *The American Banker, available at https://www.americanbanker.com/news/wells-fargo-philadelphia-reach-settlement-in-redlining-lawsuit.*

[97] 5 U.S.C. 706.

with other agency offices, to implement this provision if it were adopted. Specifically, without proposing to require applicants to submit extensive information that might slow down the overall application process, the Board stated that CURE might consider other information in determining whether further review is needed, including, but not limited to, inclusion or exclusion of predominantly low- or moderate-income census tracts within a statistical area, the statements and supporting information from the applicant FCU regarding how it intends to serve low- and moderate-income individuals, and, if applicable, the FCU's record of consumer compliance or fair lending violations.

The Board found that this approach is appropriate because it expands on the existing principle and provision in Chapter 1 of the Chartering Manual that the NCUA may examine other factors in unusual cases when deciding whether to grant a charter, including other federal laws and public policy.[98] Further, the Board observed that it would also be consistent with the purposes animating the NCUA's organic Act, which recognizes that FCUs ''have the specified mission of meeting the credit and savings needs of consumers, especially persons of modest means.'' [99]

Banks and a few credit union-affiliated commenters generally supported or did not address such additional requirements. One commenter stated that the NCUA needs to require heightened documentation and explanations for FCUs seeking to exclude the core and how low-income residents will be served. Thus, the commenter believed that it is appropriate for the NCUA to request additional information on how an FCU's business needs would support its selection. This commenter viewed such a provision as not unreasonably burdensome, given that the NCUA may request such information only as warranted. Those favoring what they termed ''reasonable'' requirements stated that the current policy provides that the NCUA will review FCUs' plans to ensure service to such people. One commenter stated the proposed additional requirements were consistent with the Circuit Court decision, which indicated the requirement should be more explicit in terms of demonstrating service to underserved individuals.

In addition to their general support of additional requirements (subject to recommendations to strengthen the requirements), bankers also requested they have advance notice and the opportunity to participate in administrative proceedings, which they viewed as necessary to prevent the Board from ''acting as a rubber stamp.'' The ABA suggested strengthening the new proposed factor by requiring FCUs to show that their chosen service area will advance the mission of serving low- and moderate-income persons and reiterated its assertion that an FCU's business needs should not justify excluding such persons. The ABA also reiterated that the NCUA should look at the effect on excluded parts of communities, and not just at discriminatory intent. Other bank-affiliated comments made similar recommendations for increasing the NCUA's scrutiny of such applications, including by allowing FCU members to vote on any proposal for an FCU to leave its portion of the community.

In contrast, several of the credit-union affiliated commenters opposed the proposed regulatory provisions, which they characterized as requiring an applicant to demonstrate nondiscrimination in service area selections that show an FCU's ability to serve underserved individuals. These commenters were concerned that the proposed procedures were unreasonably vague and that it was not clear what type of additional information FCUs need to submit to demonstrate service to people of modest means. Specifically, some commenters requested that the NCUA should expressly include examples of evidence like income distribution or other statistical evidence in the Chartering Manual and not just in the preamble. They also expressed concern that these requirements would unnecessarily complicate and delay the application process. Several commenters requested that the NCUA define what this section in the business plan should include (including through the issuance of model form or guidance) and requested that the section not be so overly complicated or lengthy that it will entail additional cost or significant time.

Commenters made several additional observations about the new requirements. Several commenters stated that certain information should not be required in the marketing and business plan submission. The inclusion or exclusion of certain census tracts should not raise negative inferences, provided that an FCU has stated a rational explanation, using sound business judgment for the area selected. Similarly, one commenter questioned the use of an FCU's record of consumer compliance or fair lending violations. The commenter stated the NCUA should clarify the basis for this criterion. Commenters identified other concerns, including the difficulty in determining whether an applicant was not choosing a service area based on discriminatory factors. One commenter stated that it should be NCUA's responsibility to prove discriminatory intent rather than the applicant's responsibility to disprove it. Another commenter expressed concern about the potential to increase safety and soundness risk by focusing on service to low-income areas.

After reviewing the comments, the Board has decided to adopt the modifications to the Chartering Manual's provisions addressing an FCU's ability to provide financial services to people of modest means, as proposed. The Board notes that some commenters characterized the requirement as placing the burden on applicants to establish conclusively that the requested community charter would not discriminate against people of modest means. This is not the case; the applicant will be required to provide a narrative in the business and marketing plan establishing that the requested community will provide financial services to people of modest means. CURE, along with other divisions in the agency, will review the plan to ensure that the applicant's requested community will in fact provide such services to people of modest means. CURE staff has the option of approving the application, requesting additional information, or rejecting the application. The final rule further clarifies the Chartering Manual by stating in the new provision that illegal discrimination will form a basis for rejection, consistent with the discussion in the proposed rule preamble [100] and building on the existing principle in Chapter 1 of the Chartering Manual that permits the agency to consider other federal laws in deciding on an application.

The Board emphasizes that these changes essentially make explicit what had been required with respect to providing communities with financial services. Specifically, an applicant's business and marketing plan for a community charter has been required and will continue to be required to establish that it can provide financial services to people of modest means by providing demographic information such as income, race, gender, and financial resources. In addition, an applicant will continue to provide in the business and marketing plan its near-term and longer-term plans with respect to types of financial products

[98] Appendix B, Ch. 1, Section I.

[99] 12 U.S.C. 1751 note.

[100] 84 FR 59998 (Nov. 7, 2019).

and services that may appeal to people of modest means. Such products include various savings accounts and loan programs (including first-time car-buying loans, 125 percent automobile financing, PALs and similar programs). Additionally, specific information continues to be required about advertising and marketing activities and potential branching considerations. Thus, the Board agrees with the ABA's comment that ''FCUs [should] show that their chosen service area will advance the mission of serving low- and moderate-income persons.'' The Board has determined that this provision will advance that mission.

The Board finds no utility or justification for the suggestion that it provide advance notice and the opportunity to participate in administrative proceedings. The new, excessively burdensome procedures suggested by the bankers would impose additional administrative and economic burdens on both the applicants—many of which are small entities—and agency staff. These burdens are unnecessary and counterproductive because, as noted elsewhere in this final rule, FOM and chartering determinations may already be challenged on an as applied, case-by-case basis. Further, the resulting delays and possible introduction of superfluous information in the charter approval process would defeat the purposes of the presumptive community model. As the Board noted in the preamble to the proposed rule, the model was adopted to expedite charter approvals through the use of objectively verifiable statistical data.[101]

In addition, the Board finds that the proposal to add express authority for the NCUA to reject an application in appropriate circumstances is reasonable. As discussed in the proposed rule, this proposed provision builds on the existing principle in the Chartering Manual that the NCUA may consider other laws and public policy in reviewing a charter application. Far from creating a vague standard, the proposed provision establishes a more concrete implementation of this principle in the specific context of service to low- and moderate-income segments of communities. Accordingly, the Board adopts this provision as proposed. The Board declines to introduce further prescriptive details or requirements into the Chartering Manual, or to establish specific deadlines for agency action, in order to maintain flexibility for the agency and applicants. Specifically, the Board has determined that it is neither necessary nor appropriate to establish a model form; however, the Board emphasizes that the Chartering Manual provides significant guidance on the preparation of charter applications. Providing a model form would reduce flexibility without any significant corresponding benefit. As the agency and FCUs gain experience with the new provision, which is closely tied to the existing provisions, the agency can consider the need for any additional guidance.

At the same time, the Board has considered the comments by the ABA and other bank-affiliated commenters recommending that the Board consider the effects of discrimination against low- and moderate-income people, as well as intent or purpose. Conversely, some credit union-affiliated commenters opined that the Board should not consider discriminatory effects or impact and sought clarification of the standard. After carefully considering these comments, the Board clarifies that under the new provision in the Chartering Manual, it will focus on evidence of discriminatory intent or purpose. This standard is consistent with the text of the provision, as proposed, which states that the Board will consider whether the FOM was selected ''in order to exclude'' low- and moderate-income people. Similarly, this standard is responsive to the concern that the Circuit Court raised about FCUs potentially engaging in gerrymandering or redlining, both of which signify intentional exclusion. Contrary to the suggestions of some of the bank-affiliated commenters, there is no legal requirement applicable to FCUs that would mandate imposing an effects-based standard.

Further, as an independent basis to decline to adopt this suggestion, the Board concludes that an effects-based standard would be inappropriate. First, there is no clear or easily applicable test for what would constitute an acceptable or unacceptable disparate effect. Second, the commenters provide no evidence to suggest that an effects test, rather than an intent or purpose test, would necessarily result in different approvals or disapprovals of prospective FCU charters or expansions or amendments to existing FCU charters. The Board believes it is appropriate to adopt an intent or purpose test initially, so that both FCUs and the agency can develop familiarity with the process. After developing that experience, it might be appropriate in the future for the Board to revisit the standard and determine whether an effect test would be desirable, manageable, or result in materially different outcomes.

Likewise, the Board disagrees with the ABA and some of the other bank-affiliated commenters that asserted that an FCU's limited resources should not, by itself, justify excluding portions of a CBSA or CSA. As the Board details in the section above, in some instances, this flexibility may enable FCUs to serve more low- and moderate-income people safely and soundly. No other legal standard applies that would require additional explanation. In any event, the Board does agree with the ABA and other bank-affiliated commenters that the explanation should be consistent with FCUs' mission of meeting the needs of people of modest means, as well as the statutory purpose of ensuring the safety and soundness of FCUs.

Accordingly, the Board has determined that it is appropriate to avoid overly prescriptive provisions that would mandate certain types of quantitative or other information (in addition to the substantial, detailed information that applicants already provide under the Chartering Manual's requirements). Specifically, the Board has determined that there is no need to require an applicant to provide specific income distribution data or census tract information in addition to the extensive information that applicants provide under existing provisions in the Chartering Manual. Requiring such additional information would be unreasonably burdensome and costly without corresponding benefits.

D. Miscellaneous Comments

With respect to timing, some credit unions stated the NCUA should act quickly and not delay finalizing the provisions. In contrast, bank trade associations commented that the rule was not ''ripe'' because neither the full Circuit Court[102] nor the Supreme Court had adjudicated the rule. Thus, in their opinion, the proposal was premature until ''all current legal challenges have been exhausted.'' They stated that such a final agency action could harm or confuse consumers. The Board is issuing this final rule after the Supreme Court's June 29, 2020 denial of the ABA's petition for a writ of certiorari. Therefore, this concern is rendered moot.

Commenters also raised a few issues that are outside the scope of this rulemaking. For instance, a few commenters stated that the NCUA should align the federal chartering rules with state rules, because several states

[101] *See* 84 FR 59989, 59991 (Nov. 7, 2019).

[102] Subsequent to the comment period closing date, the full D.C. Circuit denied the ABA's petition to review the decision *en banc.*

have more liberal rules, resulting in conversions from federal to state charters. The Board is aware that under the dual chartering system, state laws may differ from federal ones. The Board sought to enhance the federal charter through FOM1 and the other recent rulemakings, within the constraints of the Act. Given that state chartering laws are often more permissive than the Act, the Board sought to allow more expansive chartering opportunities at the federal level. This serves to foster parity between state and federal laws and is in the interest of providing access to more financial services and furthering safety and soundness.

Another commenter requested that the NCUA should issue guidance on use of the narrative in applications and best practices. The Board notes that further discussion of the narrative approach is beyond the scope of this rulemaking proposal.

One commenter stated its support for a provision in the proposal to allow an FCU to designate a portion of a CBSA as a WDLC without regard to metropolitan division boundaries. The Board notes that this issue was resolved in the Board's June 2018 final rule (referred to as FOM2).[103]

V. Regulatory Procedures

Regulatory Flexibility Act

The Regulatory Flexibility Act requires the NCUA to prepare an analysis to describe any significant economic impact a regulation may have on a substantial number of small entities.[104] For purposes of this analysis, the NCUA considers small credit unions to be those having under $100 million in assets.[105] Although this final rule is anticipated to economically benefit FCUs that choose to charter, expand, or convert to a community charter, the NCUA certifies that it would not have a significant economic impact on a substantial number of small credit unions.

Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501 *et seq.*) requires that the Office of Management and Budget (OMB) approve all collections of information by a Federal agency from the public before they can be implemented. Respondents are not required to respond to any collection of information unless it displays a current, valid OMB control number.

In accordance with the PRA, the information collection requirements included in this final rule has been submitted to OMB for approval under control number 3133–0015.

Executive Order 13132

Executive Order 13132 encourages independent regulatory agencies to consider the impact of their actions on state and local interests. In adherence to fundamental federalism principles, the NCUA, an independent regulatory agency as defined in 44 U.S.C. 3502(5), voluntarily complies with the executive order. Primarily because this final rule applies to FCUs exclusively, it will not have a substantial direct effect on the states, on the connection between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. The NCUA has determined that this final rule does not constitute a policy that has federalism implications for purposes of the executive order.

Assessment of Federal Regulations and Policies on Families

The NCUA has determined that this final rule would not affect family well-being within the meaning of Section 654 of the Treasury and General Government Appropriations Act, 1999.[106]

Small Business Regulatory Enforcement Fairness Act

The Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121) (SBREFA) generally provides for congressional review of agency rules.[107] A reporting requirement is triggered in instances where the NCUA issues a final rule as defined in the APA.[108] An agency rule, in addition to being subject to congressional oversight, may also be subject to a delayed effective date if the rule is a ''major rule.''[109] As required by SBREFA, the NCUA submitted this final rule to the OMB for it to determine if the final rule is a ''major rule'' for purposes of SBREFA. OMB determined that this final rule is not a major rule. The NCUA also will file appropriate reports with Congress and the Government Accountability Office so this rule may be reviewed.

List of Subjects in 12 CFR Part 701

Credit, Credit unions, Reporting and recordkeeping requirements.

By the National Credit Union Administration Board on July 30, 2020.

Gerard Poliquin,

Secretary of the Board.

For the reasons stated above, the Board is amending 12 CFR part 701, appendix B as follows:

PART 701—ORGANIZATION AND OPERATION OF FEDERAL CREDIT UNIONS

■ 1. The authority for part 701 continues to read as follows:

Authority: 12 U.S.C. 1752(5), 1755, 1756, 1757, 1758, 1759, 1761a, 1761b, 1766, 1767, 1782, 1784, 1785, 1786, 1787, 1788, and 1789. Section 701.6 is also authorized by 15 U.S.C. 3717. Section 701.31 is also authorized by 15 U.S.C. 1601 *et seq.;* 42 U.S.C. 1981 and 3601–3610. Section 701.35 is also authorized by 42 U.S.C. 4311–4312.

■ 2. In appendix B to part 701, in chapter 2, section V.A.2 is revised, section V.A.8 is added, and section V.B is revised to read as follows:

Appendix B to Part 701—Chartering and Field of Membership Manual

* * * * *

Chapter 2—Field of Membership Requirements for Federal Credit Unions

* * * * *

V—Community Charter Requirements

* * * * *

V.A.2—Definition of Well-Defined Local Community and Rural District

In addition to the documentation requirements in Chapter 1 to charter a credit union, a community credit union applicant must provide additional documentation addressing the proposed area to be served and community service policies, as well as the business plan requirements set forth in this Chapter. An applicant must meet all of these requirements to obtain NCUA approval.

An applicant has the burden of demonstrating to NCUA that the proposed community area meets the statutory requirements of being: (1) Well-defined, and (2) a local community or rural district. The applicant also has the burden of demonstrating that with respect to the proposed community, it has the capacity to provide financial services to low- and moderate-income areas of the community. The agency will reject any application that fails to establish the criteria set forth above.

For an applicant seeking a community charter for a Statistical Area with multiple political jurisdictions with a population of 2.5 million people or more, the Office of Credit Union Resources and Expansion (CURE) shall: (1) Publish a notice in the **Federal Register** seeking comment from interested parties about the proposed community and (2) conduct a public hearing about this application.

''Well-defined'' means the proposed area has specific geographic boundaries.

[103] 83 FR 30289 (June 28, 2018).

[104] 5 U.S.C. 603(a).

[105] 80 FR 57512 (Sept. 24, 2015).

[106] Public Law 105–277, 112 Stat. 2681 (1998).

[107] 5 U.S.C. 801–804.

[108] 5 U.S.C. 551.

[109] 5 U.S.C. 804(2).

Geographic boundaries may include a city, township, county (single, multiple, or portions of a county) or a political equivalent, school districts, or a clearly identifiable neighborhood.

The well-defined local community requirement is met if:

• Single Political Jurisdiction—the area to be served is a recognized Single Political Jurisdiction, *i.e.,* a city, county, or their political equivalent, or any single portion thereof.

• Statistical Area—A statistical area is all or an individual portion of a Combined Statistical Area (CSA) or a Core-Based Statistical Area (CBSA) designated by the U.S. Census Bureau, including a Metropolitan Statistical Area. To meet the well-defined local community requirement, the CSA or CBSA or a portion thereof, must be contiguous and have a population of 2.5 million or less people. An individual portion of a statistical area need not conform to internal boundaries within the area, such as metropolitan division boundaries within a Core-Based Statistical Area.

• Compelling Evidence of Common Interests or Interaction—In lieu of a statistical area as defined above, this option is available when a credit union seeks to initially charter a community credit union; to expand an existing community; or to convert to a community charter. Under this option, the credit union must demonstrate that the areas in question are contiguous and further demonstrate a sufficient level of common interests or interaction among area residents to qualify the area as a local community. For that purpose, an applicant must submit for NCUA approval a narrative, supported by appropriate documentation, establishing that the area's residents meet the requirements of a local community.

To assist a credit union in developing its narrative, Appendix 6 of this Manual identifies criteria a narrative should address, and which NCUA will consider in deciding a credit union's application to: Initially charter a community credit union; to expand an existing community, including by an adjacent area addition; or to convert to a community charter. In any case, the credit union must demonstrate, through its business and marketing plans, its ability and commitment to serve the entire community for which it seeks NCUA approval.

An area of any geographic size qualifies as a Rural District if:

• The proposed district has well-defined, contiguous geographic boundaries;

• The total population of the proposed district does not exceed 1,000,000;

• Either more than 50% of the proposed district's population resides in census blocks or other geographic units that are designated as rural by either the Consumer Financial Protection Bureau or the United States Census Bureau, OR the district has a population density of 100 persons or fewer per square mile; and

• The boundaries of the well-defined rural district do not exceed the outer boundaries of the states that are *immediately contiguous* to the state in which the credit union maintains its headquarters (*i.e.,* not to exceed the outer perimeter of the layer of states immediately surrounding the headquarters state).

The common bond affinity groups that apply to well-defined local communities also apply to Rural Districts.

The requirements in Chapter 2, Sections V.A.4 through V.G also apply to a credit union that serves a rural district.

* * * * *

V.A.8—Community Selection Requirements and Review

The NCUA will not approve an application for a community charter consisting of all or a portion of a CSA or a CBSA, including an initial application, amendment, or expansion, unless the applicant demonstrates in its business and marketing plan that (1) the credit union will serve a community that is contiguous and (2) the credit union will provide financial services to low- and moderate-income and underserved people, and that the credit union has not selected its service area in order to exclude low- and moderate-income and underserved people or to engage in illegal discrimination. Upon receipt of this material, the NCUA will evaluate the business and marketing plan to ensure that low- and moderate-income and underserved people will be served and that the credit union has not selected the service area in order to exclude such people or to engage in illegal discrimination. This requirement is in addition to the requirement to document in the business and marketing plan the realistic assumptions that support the credit union's viability and its plan to serve its entire FOM.

The NCUA may conduct such further inquiry or evaluation as it deems appropriate, as authorized by 12 U.S.C. 1754 and consistent with the principles of this Manual, other federal laws, and public policy. If the NCUA determines that the credit union's submission is inaccurate or unsupported, it may deny that application on those grounds, regardless of whether the application satisfies the other criteria for initial chartering, amendment, or expansion.

V.B Field of Membership Amendments

A community credit union may amend its field of membership by adding additional affinities or removing exclusionary clauses. This can be accomplished with a housekeeping amendment.

A community credit union also may expand its geographic boundaries. Persons who live, work, worship, or attend school within the proposed well-defined local community, neighborhood or rural district must have common interests and/or interact. The credit union must follow the requirements of Section V.A.4 and Section V.A.8 of this chapter.

A community credit union that is based on a Single Political Jurisdiction, a Statistical Area (*e.g.,* Core Based Statistical Area or Combined Statistical Area) or a rural district may expand its geographic boundaries to add a bordering area, provided the area is well defined and the credit union demonstrates that persons who live, work, worship, or attend school within the proposed expanded community (*i.e.,* on both sides of the boundary separating the existing community and the bordering area) have common interests and/or interact. Such a credit union applying to expand its geographic boundaries to add a bordering area must follow a streamlined version of the business plan requirements of Section V.A.4 of this chapter and the expanded community would be subject to the corresponding population limit—2.5 million in the case of a Single Political Jurisdiction, or a Statistical Area and 1 million in the case of a rural district. The streamlined business plan requirements for adding a bordering area are:

• Anticipated marginal financial impact on the credit union of adding the proposed bordering area, including the need for additional employees and fixed assets, and the associated costs;

• A description of the current and, if applicable, proposed office/branch structure specific to serving the proposed bordering area;

• A marketing plan addressing how the new community will be served for the 24-month period after the proposed expansion of a community charter, including detailing how the credit union will address the unique needs of any demographic groups in the proposed bordering community not presently served by the credit union and how the credit union will market to any new groups; and

• Details, terms and conditions of any new financial products, programs, and services to be introduced as part of this expansion.

[FR Doc. 2020–16988 Filed 9–11–20; 8:45 am]

BILLING CODE 7535–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA–2020–0491; Airspace Docket No. 20–ASO–16]

RIN 2120–AA66

Amendment of Class E Airspace; Guntersville, AL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action amends Class E airspace extending upward from 700 feet above the surface at Guntersville Municipal Airport-Joe Starnes Field (formerly Guntersville Municipal Airport), Guntersville, AL, to accommodate new area navigation (RNAV) global positioning system (GPS) instrument approach procedures serving this airport. This action also updates the geographic coordinates of the airport. Controlled airspace is necessary for the safety and management of instrument flight rules (IFR) operations in the area.

DATES: Effective 0901 UTC, November 5, 2020. The Director of the Federal

Register approves this incorporation by reference action under Title 1 Code of Federal Regulations part 51, subject to the annual revision of FAA Order 7400.11 and publication of conforming amendments.

ADDRESSES: FAA Order 7400.11D, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at *http://www.faa.gov/air_traffic/publications/.* For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; Telephone: (202) 267–8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11D at NARA, email *fedreg.legal@nara.gov* or go to *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

FOR FURTHER INFORMATION CONTACT: John Fornito, Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Ave, College Park, GA 30337; Telephone (404) 305–6364.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rule regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it amends Class E airspace at Guntersville Municipal Airport-Joe Starnes Field, Guntersville, AL, to support IFR operations in the area.

History

The FAA published a notice of prosed rulemaking in the **Federal Register** (85 FR 34148, June 3, 2020) for Docket No. FAA–2020–0491 to amend Class E airspace extending upward from 700 feet above the surface at Guntersville Municipal Airport-Joe Starnes Field, Guntersville, AL, from a 6.3-mile radius to a 7-mile radius. In addition, the FAA proposed to update the airport's name and geographic coordinates to coincide with the FAA's aeronautical database.

Interested parties were invited to participate in this rulemaking effort by submitting written comments on the proposal to the FAA. No comments were received.

Class E airspace designations are published in Paragraph 6005, of FAA Order 7400.11D, dated August 8, 2019, and effective September 15, 2019, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

Availability and Summary of Documents for Incorporation by Reference

This document amends FAA Order 7400.11D, Airspace Designations and Reporting Points, dated August 8, 2019, and effective September 15, 2019. FAA Order 7400.11D is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11D lists Class A, B, C, D, and E airspace areas, air traffic routes, and reporting points.

The Rule

This amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 amends Class E airspace extending upward from 700 feet above the surface at Guntersville Municipal Airport-Joe Starnes Field, Guntersville, AL, from a 6.3-mile radius to a 7-mile radius. In addition, the FAA updates the airport's name and geographic coordinates to coincide with the FAA's aeronautical database. These changes are necessary for continued safety and management of IFR operations in the area.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It therefore: (1) Is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that only affects air traffic procedures an air navigation, it is certified that this rule, when promulgated, does not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

The FAA has determined that this action qualifies for categorical exclusion under the National Environmental Policy Act in accordance with FAA Order 1050.1F, "Environmental Impacts: Policies and Procedures," paragraph 5–6.5a. This airspace action is not expected to cause any potentially significant environmental impacts, and no extraordinary circumstances exist that warrant preparation of an environmental assessment.

Adoption of the Amendment

In consideration of the foregoing, the Federal Aviation Administration amends 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11D, Airspace Designations and Reporting Points, dated August 8, 2019, effective September 15, 2019, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ASO AL E5 Guntersville, AL [Amended]

Guntersville Municipal Airport-Joe Starnes Field, AL

(Lat. 34°24′22″ N, long. 86°15′39″ W)

That airspace extending upward from 700 feet above the surface within a 7-mile radius of Guntersville Municipal Airport-Joe Starnes Field.

Issued in College Park, Georgia, on September 4, 2020.

Andreese C. Davis,

Manager, Airspace & Procedures Team South, Eastern Service Center, Air Traffic Organization.

[Docket No. USCG–2018–0955]

RIN 1625–AA09

Drawbridge Operation Regulation; Belle River, LA

AGENCY: Coast Guard, DHS.

ACTION: Final rule.

SUMMARY: The Coast Guard is changing the operating schedule that governs the State Route 70 pontoon bridge across Belle River, mile 23.8, at Pierre Part, Assumption Parish, Louisiana. During June, July and August this bridge will open on signal on the hour from 6 a.m. to 10 p.m. This rule is being changed to decrease vehicle congestion during the summer.

DATES: This rule is effective October 14, 2020.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov.* Type USCG–2018–0955 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Mr. Doug Blakemore, Eighth Coast Guard District Bridge Administrator; telephone (504) 671–2128, email *Douglas.A.Blakemore@uscg.mil.*

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
LADOTD Louisiana Department of Transportation and Development
OMB Office of Management and Budget
NPRM Notice of Proposed Rulemaking (Advance, Supplemental)
SR State Route
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

On April 16, 2019 the Coast Guard published a notice of temporary deviation from regulations entitled Drawbridge Operation Regulations, Belle River, LA in the **Federal Register** (84 FR 15581), to collect and analyze information on vehicle and vessel traffic congestion on SR 70 created when the drawbridge opens to vessel traffic during periods of high vehicle traffic. We received five comments. All were in favor of the regulation change.

On May 13, 2020 the Coast Guard published a notice of proposed rulemaking entitled Drawbridge Operation Regulations, Belle River, LA in the **Federal Register** (85 FR 28542), to seek public comments on whether the Coast Guard should consider modifying the current operating schedule to the SR70 drawbridge. We received 0 comments.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority 33 U.S.C. 499.

LADOTD requested to change the drawbridge operating schedule for the SR70 pontoon bridge across the Belle River, mile 23.8, at Pierre Part, Assumption, LA. This bridge currently opens on signal except that from 10 p.m. to 6 a.m., the draw opens on signal if at least four hours' notice is given. LADOTD requested to open the bridge on signal on the hour during June, July and August from 6 a.m. to 10 p.m. each day.

This waterway is heavily used by recreational vessels during the summer months. The bridge has a vertical clearance of zero feet in the closed to vessel traffic position and unlimited vertical clearance in the open to vessel traffic position.

During a 105 day period LADOTD measured the vehicle and vessel queues created when the bridge opened on the hour. LADOTDs analysis of this data demonstrated that opening the bridge on the hour (vice on signal) reduced the average vehicle queue from 105 vehicles to 25 vehicles. There were no vessel queues created by this change.

This change reduces vehicle congestion during summer months and provides for the reasonable needs of navigation.

IV. Discussion of Comments, Changes and the Final Rule

There were 5 comments during the temporary regulation change and no comments during the NPRM. The Coast Guard provided a comment period of 60 days during each of these changes. Based on the LADOTD data this rule decreases vehicle congestion and provides vessels with the reasonable ability to use the waterway. We identified no impacts on marine navigation with this rule.

V. Regulatory Analyses

The Coast Guard has developed this rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive Orders, and we discuss First Amendment rights of protesters.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, it has not been reviewed by the Office of Management and Budget (OMB) and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

This regulatory action determination is based on the lack of commercial vessel traffic on this waterway, and the recreational boats that routinely transit the bridge under the proposed schedule. Those vessels with a vertical clearance requirement of less than 9.7 feet above mean high water may transit the bridge at any time, and the bridge will open in case of emergency at any time. This regulatory action takes into account the reasonable needs of vessel and vehicular traffic.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard received 0 comments from the Small Business Administration on this rule. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the bridge may be small entities, for the reasons stated in section V.A. above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule calls for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Government

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Management Directive 023–01, Rev.1, associated implementing instructions, and Environmental Planning Policy COMDTINST 5090.1 (series) which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f). The Coast Guard has determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule promulgates the operating regulations or procedures for drawbridges and s categorically excluded from further review, under paragraph L49, of Chapter 3, Table 3–1 of the U.S. Coast Guard Environmental Planning Implementation Procedures.

Neither a Record of Environmental Consideration nor a Memorandum for the Record are required for this rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; and Department of Homeland Security Delegation No. 0170.1.

■ 2. Revise § 117.424 to read as follows:

§ 117.424 Belle River.

The draw of the SR70 bridge, mile 23.8 near Belle River, shall open on signal; except that, from 10 p.m. to 6 a.m., the draw shall open on signal if at least four hours notice is given, and from June 1 through August 31 the draw shall open on signal on the hour from 6 a.m. to 10 p.m. The bridge shall open anytime at the direction of the District Commander.

Dated: August 18, 2020.

John P. Nadeau,

Rear Admiral, U.S. Coast Guard, Commander, Eighth Coast Guard District.

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 165

[Docket Number USCG–2020–0525]

RIN 1625–AA00

Safety Zone; Victoria Barge Canal, Victoria, TX

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for parts of the navigable waters of the Victoria Barge Canal from approximate position 28°30′49″ N, 096°48′08″ W to approximate position 28°31′48″ N, 096°48′172″ W. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards associated with SH–35 bridge fender repair operations. Entry of vessels or persons into this zone is prohibited unless specifically authorized by the Captain of the Port Sector Corpus Christi.

DATES: This rule is effective without actual notice from September 14, 2020 through 5 p.m. on September 19, 2020. For purposes of enforcement, actual notice will be used 7 a.m. on August 31, 2020 through September 14, 2020.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov,* type USCG–2020–0525 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Lieutenant Commander Margaret Brown, Sector Corpus Christi Waterways Management Division, U.S. Coast Guard; telephone 361–939–5130, email *Margaret.A.Brown@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is impracticable. We must establish this safety zone immediately and lack sufficient time to provide a reasonable comment period and then consider those comments before issuing the rule.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be contrary to the public interest because immediate action is needed to respond to the potential safety hazards associated with the damaged fenders on the SH–35 Bridge.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034. The Captain of the Port Sector Corpus Christi (COTP) is establishing a temporary safety zone for parts of the navigable waters of the Victoria Barge Canal from approximate position 28°30′49″ N, 096°48′08″ W to approximate position 28°31′48″ N, 096°48′172″ W. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards associated with SH–35 bridge fender repair operations.

IV. Discussion of the Rule

This rule establishes a temporary safety zone August 31, 2020 through September 19, 2020, from 7 a.m. through 12 p.m. and 1 p.m. through 5 p.m. each day, Monday through Saturday and will be enforced during SH–35 bridge fender repairs. No vessel or person is permitted to enter the temporary safety zone during the enforcement period without obtaining permission from the COTP or a designated representative.

Persons or vessels seeking to enter the safety zone must request permission from the COTP or a designated representative on VHF–FM channel 16 or by telephone at 361–939–0450. If permission is granted, all persons and vessels shall comply with the instructions of the COTP or designated representative.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

This regulatory action determination is based on the size, location, and duration of the safety zone. This safety zone covers an area of the navigable waters of the Victoria Barge Canal from approximate position 28°30′49″ N, 096°48′08″ W to approximate position 28°31′48″ N, 096°48′172″ W for the purposes of SH–35 bridge fender repairs August 31, 2020 through September 19, 2020, from 7 a.m. through 12 p.m. and 1 p.m. through 5 p.m. each day, Monday through Saturday. Moreover, the Coast Guard will issue Local Notices to Mariners, Safety Marine Information Broadcasts, and Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01 and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves establishment of a temporary safety zone for navigable waters of Victoria Barge Canal from approximate position 28°30′49″ N, 096°48′08″ W to approximate position 28°31′48″ N, 096°48′172″ W. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards associated with SH–35 bridge fender repair operations. It is categorically excluded from further review under paragraph L60(a) in Table 3–1 of U.S. Coast Guard Environmental Planning Implementing Procedures 5090.1. A Record of Environmental Consideration supporting this determination is available in the docket where indicated under **ADDRESSES**.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T08–0525 to read as follows:

§ 165.T08–0525 Safety Zone; Victoria Barge Canal, Victoria, TX.

(a) *Location.* The following area is a safety zone: All navigable waters of the Victoria Barge Canal from approximate position 28°30′49″ N, 096°48′08″ W to approximate position 28°31′48″ N, 096°48′172″ W. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards associated with SH–35 bridge fender repair operations.

(b) *Effective period.* The section is effective August 31, 2020 through September 19, 2020, from 7 a.m. through 12 p.m. and 1 p.m. through 5 p.m. each day, Monday through Saturday.

(c) *Regulations.* (1) According to the general regulations in § 165.23 of this part, entry into this temporary safety zone is prohibited unless authorized by the Captain of the Port Sector Corpus Christi (COTP) or a designated representative.

(2) Persons or vessels seeking to enter the safety zone must request permission from the COTP on VHF–FM channel 16 or by telephone at 361–939–0450.

(3) If permission is granted, all persons and vessels shall comply with the instructions of the COTP or designated representative.

(d) *Information broadcasts.* The COTP or a designated representative will inform the public of the enforcement times and date for this safety zone through Broadcast Notices to Mariners, Local Notices to Mariners, and/or Safety Marine Information Broadcasts as appropriate.

Dated: September 1, 2020.

J.B. Gunning,

Captain, U.S. Coast Guard, Acting Captain of the Port Sector Corpus Christi.

33 CFR Part 165

[Docket Number USCG–2020–0543]

RIN 1625–AA00

Safety Zone; Corpus Christi Ship Channel, Corpus Christi, TX

AGENCY: Coast Guard, DHS.

ACTION: Temporary final rule.

SUMMARY: The Coast Guard is establishing a temporary safety zone for the navigable waters of the Corpus Christi Ship Channel within the Inner Harbor from position 27°49′7.80″ N, 097°28′28.69″ W to position 27°49′0.12″ N, 097°27′54.09″ W. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards created by the salvage of the Dredge WAYMON BOYD adjacent to the channel. Entry of vessels into this zone is permitted with restrictions: Vessels shall not over take or pass other vessels within the zone, and vessels must operate at a slowbell only.

DATES: This rule is effective without actual notice from September 14, 2020 through 12 noon on September 15, 2020. For the purposes of enforcement, actual notice will be used from August 23, 2020 through September 14, 2020.

ADDRESSES: To view documents mentioned in this preamble as being available in the docket, go to *https://www.regulations.gov,* type USCG–2020–0543 in the ''SEARCH'' box and click ''SEARCH.'' Click on Open Docket Folder on the line associated with this rule.

FOR FURTHER INFORMATION CONTACT: If you have questions on this rule, call or email Lieutenant Commander Margaret Brown, Sector Corpus Christi Waterways Management Division, U.S. Coast Guard; telephone 361–939–5130, email *Margaret.A.Brown@uscg.mil.*

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
NPRM Notice of proposed rulemaking
§ Section
U.S.C. United States Code

II. Background Information and Regulatory History

The Coast Guard is issuing this temporary rule without prior notice and opportunity to comment pursuant to authority under section 4(a) of the

Administrative Procedure Act (APA) (5 U.S.C. 553(b)). This provision authorizes an agency to issue a rule without prior notice and opportunity to comment when the agency for good cause finds that those procedures are ''impracticable, unnecessary, or contrary to the public interest.'' Under 5 U.S.C. 553(b)(B), the Coast Guard finds that good cause exists for not publishing a notice of proposed rulemaking (NPRM) with respect to this rule because it is impracticable. We must establish this safety zone immediately and lack sufficient time to provide a reasonable comment period and then consider those comments before issuing the rule.

Under 5 U.S.C. 553(d)(3), the Coast Guard finds that good cause exists for making this rule effective less than 30 days after publication in the **Federal Register**. Delaying the effective date of this rule would be contrary to the public interest because immediate action is needed to respond to the potential safety hazards associated with the salvage of Dredge WAYMON BOYD.

III. Legal Authority and Need for Rule

The Coast Guard is issuing this rule under authority in 46 U.S.C. 70034. The Captain of the Port Sector Corpus Christi (COTP) has determined that potential hazards associated with the salvage of Dredge WAYMON BOYD. The purpose of this rule is to ensure safety of vessels and persons on these navigable waters in the safety zone.

IV. Discussion of the Rule

This rule establishes a temporary safety zone from August 23, 2020 through 12 noon September 15, 2020, and will be enforced during dredge salvage operations. Entry of vessels into this zone is permitted with restrictions: Vessels shall not over take or pass other vessels within the zone, and vessels must operate at a slowbell only.

Persons or vessels transiting the safety zone should check-in with the Harbormaster's Office 30 minutes prior to transit on VHF Channel 12 or 361–882–1773 to allow diving operations to safely secure if needed.

V. Regulatory Analyses

We developed this rule after considering numerous statutes and Executive orders related to rulemaking. Below we summarize our analyses based on a number of these statutes and Executive orders, and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This rule has not been designated a ''significant regulatory action,'' under Executive Order 12866. Accordingly, this rule has not been reviewed by the Office of Management and Budget (OMB), and pursuant to OMB guidance it is exempt from the requirements of Executive Order 13771.

This regulatory action determination is based on the size, location, and duration of the safety zone. This safety zone covers the navigable waters of the Corpus Christi Ship Channel within the Inner Harbor from position 27°49′7.80″ N, 097°28′28.69″ W to position 27°49′0.12″ N, 097°27′54.09″ W for the purposes of protecting personnel and the environment from dangers created by the salvage of Dredge WAYMON BOYD. Moreover, the Coast Guard will issue Local Notices to Mariners, Safety Marine Information Broadcasts, and Broadcast Notice to Mariners via VHF–FM marine channel 16 about the zone.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, as amended, requires Federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term ''small entities'' comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities.

While some owners or operators of vessels intending to transit the safety zone may be small entities, for the reasons stated in section V.A above, this rule will not have a significant economic impact on any vessel owner or operator.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

Small businesses may send comments on the actions of Federal employees who enforce, or otherwise determine compliance with, Federal regulations to the Small Business and Agriculture Regulatory Enforcement Ombudsman and the Regional Small Business Regulatory Fairness Boards. The Ombudsman evaluates these actions annually and rates each agency's responsiveness to small business. If you wish to comment on actions by employees of the Coast Guard, call 1–888–REG–FAIR (1–888–734–3247). The Coast Guard will not retaliate against small entities that question or complain about this rule or any policy or action of the Coast Guard.

C. Collection of Information

This rule will not call for a new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520).

D. Federalism and Indian Tribal Governments

A rule has implications for federalism under Executive Order 13132, Federalism, if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this rule does not have tribal implications under Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, because it does not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section above.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. Though this rule will not result in such an expenditure, we do discuss the effects of this rule elsewhere in this preamble.

F. Environment

We have analyzed this rule under Department of Homeland Security Directive 023–01 and Environmental Planning COMDTINST 5090.1 (series), which guide the Coast Guard in complying with the National Environmental Policy Act of 1969 (42 U.S.C. 4321–4370f), and have determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This rule involves establishment of a temporary safety zone for the navigable waters of the Corpus Christi Ship Channel within the Inner Harbor from position 27°49′7.80″ N, 097°28′28.69″ W to position 27°49′0.12″ N, 097°27′54.09″ W. The safety zone is needed to protect personnel, vessels, and the marine environment from potential hazards created by salvage Dredge WAYMON BOYD. It is categorically excluded from further review under paragraph L60(a) in Table 3–1 of U.S. Coast Guard Environmental Planning Implementing Procedures 5090.1. A Record of Environmental Consideration supporting this determination is available in the docket where indicated under **ADDRESSES**.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

List of Subjects in 33 CFR Part 165

Harbors, Marine safety, Navigation (water), Reporting and recordkeeping requirements, Security measures, Waterways.

For the reasons discussed in the preamble, the Coast Guard amends 33 CFR part 165 as follows:

PART 165—REGULATED NAVIGATION AREAS AND LIMITED ACCESS AREAS

■ 1. The authority citation for part 165 continues to read as follows:

Authority: 46 U.S.C. 70034, 70051; 33 CFR 1.05–1, 6.04–1, 6.04–6, and 160.5; Department of Homeland Security Delegation No. 0170.1.

■ 2. Add § 165.T08–0543 to read as follows:

§ 165.T08–0543 Safety Zone; Corpus Christi Ship Channel, Corpus Christi, TX

(a) *Location.* The following area is a safety zone: The navigable waters of the Corpus Christi Ship Channel within the Inner Harbor from position 27°49′7.80″ N, 097°28′28.69″ W to position 27°49′0.12″ N, 097°27′54.09″ W.

(b) *Effective period.* The section is effective from August 23, 2020 through 12 noon on September 15, 2020.

(c) *Regulations.* (1) According to the general regulations in § 165.23 of this part, Entry of vessels into this zone is permitted with restrictions: Vessels shall not over take or pass other vessels within the zone, and vessels must operate at a slowbell only.

(d) *Information broadcasts.* The COTP or a designated representative will inform the public of the enforcement times and date for this safety zone through Broadcast Notices to Mariners, Local Notices to Mariners, and/or Safety Marine Information Broadcasts as appropriate.

Dated: September 1, 2020.

J.B. Gunning,

Captain, U.S. Coast Guard, Acting Captain of the Port Sector Corpus Christi.

[FR Doc. 2020–19854 Filed 9–11–20; 8:45 am]

BILLING CODE 9110–04–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

EPA–R09–OAR–2019–0655; FRL–10012–28–Region 9 Air Plan Approval; California; San Joaquin Valley Unified Air Pollution Control District and Feather River Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve revisions to the San Joaquin Valley Unified Air Pollution Control District (SJVUAPCD or District) and the Feather River Air Quality Management District (FRAQMD) portions of the California State Implementation Plan (SIP) under the Clean Air Act (CAA or Act). For the SJVUAPCD, these revisions concern a rule intended to track information related to emissions of volatile organic compounds (VOCs) and particulate matter (PM) from commercial charbroilers, and an administrative rule for the registration of certain emission units historically exempted from the SJVUAPCD's permit requirements. We are approving into the California SIP amendments to a SJVUAPCD local rule, which require owners and operators of commercial underfired charbroilers to submit a one-time information report and which subject certain underfired charbroilers to registration and weekly recordkeeping requirements. We are also approving a SJVUAPCD rule addressing registration requirements for these and certain other emission units. For the FRAQMD, these revisions concern a negative declaration for the Control Techniques Guidelines (CTG) for the Oil and Natural Gas Industry.

DATES: This rule is effective October 14, 2020.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2019–0655. All documents in the docket are listed on the *https://www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information the disclosure of which is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through *https://www.regulations.gov,* or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Stanley Tong, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone: (415) 947–4122 or by email at *tong.stanley@epa.gov.* Or Nicole Law, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone: (415) 947–4126 or by email at *law.nicole@epa.gov.*

SUPPLEMENTARY INFORMATION: Throughout this document, ''we,'' ''us'' and ''our'' refer to the EPA.

Table of Contents

I. Proposed Action
II. Public Comments and EPA Responses
III. EPA Action
IV. Incorporation by Reference
V. Statutory and Executive Order Reviews

I. Proposed Action

On May 29, 2020 (85 FR 32327), the EPA proposed to approve the following documents listed in Table 1 into the California SIP.

TABLE 1—SUBMITTED DOCUMENTS

Local agency	Rule or document	Adopted/ amended	Submitted
SJVUAPCD	Rule 2250—Permit-Exempt Equipment Registration	Adopted 10/19/2006	[1] 4/30/2020
SJVUAPCD	Rule 4692—Commercial Charbroiling	Amended 06/21/2018	[2] 11/21/2018
FRAQMD	Reasonably Available Control Technology (RACT) State Implementation Plan (SIP) Revision for the South Sutter County Portion of the Sacramento Metropolitan Nonattainment Area for 8-Hour ozone—Negative Declaration for Control Techniques Guidelines for the Oil and Natural Gas Industry.	Adopted 08/06/2018	[3] 12/07/2018

We proposed to approve SJVUAPCD Rule 2250 and amended Rule 4692, and FRAQMD's negative declaration for the Control Techniques Guidelines for the Oil and Natural Gas Industry (EPA–453/B–16–001), because we determined that they comply with the relevant CAA requirements. Our proposed action contains more information on the documents and our evaluation.

II. Public Comments and EPA Responses

The EPA's proposed action provided a 30-day public comment period. The public comment period closed on June 29, 2020. During this period, we received one anonymous comment that supported our proposed approval.

III. EPA Action

No comments were submitted that change our assessment of the rules and negative declaration as described in our proposed action. Therefore, as authorized in section 110(k)(3) of the Act, the EPA is fully approving the documents listed in Table 1 into the California SIP.

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with the requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of the SJVUAPCD rules described in the amendments to 40 CFR part 52 set forth below. The EPA has made, and will continue to make, these documents available through *www.regulations.gov* and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.,* as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by November 13, 2020. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to

[1] This submittal was transmitted to the EPA by a letter from CARB dated April 30, 2020.

[2] This submittal was transmitted to the EPA by a letter from CARB dated November 16, 2018.

[3] This submittal was transmitted to the EPA by a letter from CARB dated December 2, 2018.

enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Particulate Matter, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: July 31, 2020.

John Busterud,

Regional Administrator, Region IX.

For the reasons stated in the preamble, the EPA amends Part 52, chapter I, title 40 of the Code of Federal Regulations as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.220 is amended by adding paragraphs (c)(310)(i)(A)(*2*) and (c)(379)(i)(C)(*8*), revising paragraph (c)(527)(i)(B) and adding paragraph (c)(540) to read as follows:

§ 52.220 Identification of plan—in part.

* * * * *

(c) * * *

(310) * * *

(i) * * *

(A) * * *

(*2*) Previously approved on June 3, 2003 in paragraph (c)(310)(i)(A)(*1*) of this section and now deleted with replacement in paragraph (c)(527)(i)(B)(*1*) of this section, Rule 4692, adopted on March 21, 2002.

* * * * *

(379) * * *

(i) * * *

(C) * * *

(*8*) Previously approved on November 3, 2011 in paragraph (c)(379)(i)(C)(*5*) of this section and now deleted with replacement in paragraph (c)(527)(i)(B)(*1*) of this section, Rule 4692, ''Commercial Charbroiling,'' amended on September 17, 2009.

* * * * *

(527) * * *

(i) * * *

(B) San Joaquin Valley Unified Air Pollution Control District.

(*1*) Rule 4692, ''Commercial Charbroiling,'' amended on June 21, 2018.

(*2*) [Reserved]

* * * * *

(540) New regulations for the following APCD were submitted on April 30, 2020, by the Governor's designee, as an attachment to a letter dated April 30, 2020.

(i) Incorporation by reference.

(A) San Joaquin Valley Unified Air Pollution Control District.

(*1*) Rule 2250, ''Permit-Exempt Equipment Registration,'' adopted October 19, 2006.

BILLING CODE 6560–50–P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

45 CFR Part 1173

RIN 3136–AA42

Processes and Procedures for Issuing Guidance Documents

AGENCY: National Endowment for the Humanities; National Foundation on the Arts and the Humanities.

ACTION: Final rule.

SUMMARY: This final rule sets forth the National Endowment for the Humanities' (NEH) internal policies and procedures governing the issuance of guidance documents as required by Executive Order 13891, ''Promoting the Rule of Law Through Improved Agency Guidance Documents'' (E.O. 13891).

DATES: This final rule is effective on October 14, 2020.

FOR FURTHER INFORMATION CONTACT: Lisette Voyatzis, Deputy General Counsel, 400 7th Street SW, Room 4060, Washington, DC 20506; (202) 606–8322; *gencounsel@neh.gov.*

SUPPLEMENTARY INFORMATION:

1. Background

NEH is adopting this final rule pursuant to E.O. 13891,[1] which requires federal agencies to finalize regulations, or amend existing regulations as necessary, that set forth processes and procedures for issuing guidance documents. In compliance with E.O. 13891, this final rule establishes NEH's policy, procedures, and responsibilities for issuing guidance documents in order to ensure that the agency performs the required review and clearance before issuance and follows all stages of the rulemaking process.

2. Compliance

Administrative Procedure Act of 1946

Under the Administrative Procedure Act, an agency may waive the normal notice and comment procedures if the action is a rule of agency organization, procedure, or practice. *See* 5 U.S.C. 553(b)(A). This final rule merely incorporates the requirements set forth in E.O. 13891 into NEH's internal policy and procedures for issuing guidance documents. Accordingly, NEH has concluded that there is good cause to publish this rule without prior public notice and comment.

E.O. 12866, Regulatory Planning and Review, and E.O. 13563, Improving Regulation and Regulatory Review

This action is not significant under E.O. 12866.

E.O. 13771, Reducing Regulation and Controlling Regulatory Costs

This action is not expected to be an E.O. 13771 regulatory action because this action is not significant under E.O. 12866.

E.O. 13132, Federalism

This rulemaking does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

E.O. 12988, Civil Justice Reform

This rulemaking meets the applicable standards set forth in section 3(a) and 3(b)(2) of E.O. 12988. Specifically, this final rule is written in clear language designed to help reduce litigation.

E.O. 13175, Indian Tribal Governments

Under the criteria in E.O. 13175, NEH evaluated this final rule and determined that it will not have any potential effects on Federally recognized Indian Tribes.

E.O. 12630, Takings

Under the criteria in E.O. 12630, this rulemaking does not have significant takings implications. Therefore, a takings implication assessment is not required.

Regulatory Flexibility Act of 1980

This rulemaking will not have a significant adverse impact on a substantial number of small entities, including small businesses, small governmental jurisdictions, or certain small not-for-profit organizations.

Paperwork Reduction Act of 1995

This rulemaking does not impose an information collection burden under the Paperwork Reduction Act. This action contains no provisions constituting a collection of information pursuant to the Paperwork Reduction Act.

Unfunded Mandates Reform Act of 1995

This rulemaking does not contain a Federal mandate that will result in the expenditure by State, local, and Tribal governments, in the aggregate, or by the private sector of $100 million or more in any one year.

National Environmental Policy Act of 1969

This final rule will not have a significant effect on the human environment.

[1] 84 FR 55235 (Oct. 9, 2019).

Small Business Regulatory Enforcement Fairness Act of 1996

This action pertains to agency management, personnel, and organization and does not substantially affect the rights or obligations of nonagency parties. Accordingly, it is not a ''rule'' as that term is used by the Congressional Review Act (Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996), and the reporting requirement of 5 U.S.C. 801 does not apply.

E-Government Act of 2002

All information about NEH required to be published in the **Federal Register** may be accessed at *www.neh.gov.* The website *https://www.regulations.gov* contains electronic dockets for NEH's rulemakings under the Administrative Procedure Act of 1946.

Plain Writing Act of 2010

To ensure this final rule was written in plain and clear language so that it can be used and understood by the public, NEH modeled the language of this final rule on the Federal Plain Language Guidelines.

List of Subjects in 45 CFR 1173

Administrative practice and procedure.

■ For the reasons stated in the preamble, the National Endowment for the Humanities adds 45 CFR part 1173 to read as follows:

PART 1173—PROCESSES AND PROCEDURES FOR ISSUING GUIDANCE DOCUMENTS

Sec.
1173.1 Purpose and scope.
1173.2 Definition of guidance document.
1173.3 Review and clearance.
1173.4 Requirements for clearance.
1173.5 Public access to guidance documents.
1173.6 Waiver of publication of guidance documents.
1173.7 Good faith cost estimates.
1173.8 Definition of significant guidance document.
1173.9 Procedures for significant guidance documents.
1173.10 Notice-and-comment procedures.
1173.11 Petitions to withdraw or modify guidance.
1173.12 Rescinded guidance.
1173.13 Exigent circumstances.
1173.14 Reports to Congress and the Government Accountability Office (GAO).
1173.15 No judicial review or enforceable rights.

Authority: 5 U.S.C. 301; 20 U.S.C. 956.

§ 1173.1 Purpose and scope.

(a) This part prescribes general procedures that apply to guidance documents issued by the National Endowment for the Humanities (NEH).

(b) This part governs all NEH employees and contractors (collectively, NEH staff) involved with all phases of issuing NEH guidance documents.

(c) This part applies to all NEH guidance documents in effect on or after October 14, 2020.

§ 1173.2 Definition of guidance document.

(a) For purposes of this part, the term guidance document means any agency statement of general applicability, intended to have future effect on the behavior of regulated parties, that sets forth a policy on a statutory, regulatory, or technical issue, or an interpretation of a statute or regulation, but does not include the following:

(1) Rules promulgated pursuant to notice and comment under 5 U.S.C. 553 or similar statutory provisions;

(2) Rules exempt from rulemaking requirements under 5 U.S.C. 553(a);

(3) Rules of agency organization, procedure, or practice;

(4) Decisions of agency adjudications under 5 U.S.C. 554 or similar statutory provisions;

(5) Internal guidance directed to the issuing agency or other agencies that is not intended to have substantial future effect on the behavior of regulated parties;

(6) Internal executive branch legal advice or legal opinions addressed to executive branch officials;

(7) Agency statements of specific applicability, including advisory or legal opinions directed to particular parties about circumstance-specific questions (*e.g.,* case or investigatory letters responding to complaints, warning letters), notices regarding particular locations or facilities (*e.g.,* guidance pertaining to the use, operation, or control of a government facility or property), and correspondence with individual persons or entities (*e.g.,* congressional correspondence), except documents ostensibly directed to a particular party but designed to guide the conduct of the broader regulated public;

(8) Legal briefs, other court filings, or positions taken in litigation or enforcement actions;

(9) Agency statements that do not set forth a policy on a statutory, regulatory, or technical issue or an interpretation of a statute or regulation, including speeches and individual presentations, editorials, media interviews, press materials, or congressional testimony that do not set forth for the first time a new regulatory policy;

(10) Guidance pertaining to military or foreign affairs functions;

(11) Grant solicitations and awards;

(12) Contract solicitations and awards; or

(13) Purely internal agency policies or guidance directed solely to NEH staff or other federal agencies that are not intended to have substantial future effect on the behavior of regulated parties.

§ 1173.3 Review and clearance.

All NEH guidance documents, as defined in § 1173.2, require review and clearance in accordance with this part. All agency guidance documents must be reviewed and cleared by NEH's Office of the General Counsel (OGC).

§ 1173.4 Requirements for clearance.

The NEH OGC's review and clearance of guidance documents shall ensure that each guidance document the agency proposes to issue satisfies the following requirements:

(a) The guidance document complies with all relevant statutes and regulations (including any statutory deadlines for agency action);

(b) The guidance document identifies or includes:

(1) The term ''guidance'' or its functional equivalent;

(2) A concise name for the guidance document;

(3) The NEH office or division issuing the guidance document;

(4) A unique identifier, including, at a minimum, the date of issuance, title of the document, and a number assigned by NEH's OGC (or, in the case of a significant guidance document, the Z–RIN (regulatory identification number));

(5) The general topic that the guidance document addresses;

(6) Citations to applicable statutes and regulations;

(7) A statement noting whether the guidance is intended to revise or replace any previously issued guidance and, if so, sufficient information to identify the previously issued guidance; and

(8) A concise summary of the guidance document's content.

(c) The guidance document avoids using mandatory language, such as ''shall,'' ''must,'' ''required,'' or ''requirement,'' unless the language is describing an established statutory or regulatory requirement or is addressed to NEH staff and will not foreclose NEH's consideration of positions advanced by affected private parties;

(d) The guidance document is written in plain and understandable English; and

(e) All guidance documents include a clear and prominent statement declaring that the contents of the document do not have the force and effect of law, are not meant to bind the public in any way, and the document is intended only to provide clarity to the public regarding existing requirements under the law or NEH's policies.

§ 1173.5 Public access to guidance documents.

NEH will:

(a) Oversee the creation of a guidance portal on the agency's website;

(b) Ensure all effective guidance documents, identified by a unique identifier as described in § 1173.4(b)(4), are on the guidance portal in a single, searchable, indexed database, and available to the public;

(c) Note on the agency's guidance portal that guidance documents lack the force and effect of law, except as authorized by law or as incorporated into a contract;

(d) Maintain and publish on NEH's guidance portal a means for the public to comment electronically on any guidance documents that are subject to notice-and-comment procedures, and to submit requests electronically for issuance, reconsideration, modification, or rescission of guidance documents in accordance with § 1173.11;

(e) Include on the agency's guidance portal the date on which all guidance documents were posted to the website and a hyperlink to all guidance documents;

(f) Receive and address complaints from the public that NEH is not following the requirements of OMB's Good Guidance Bulletin or that NEH is improperly treating a guidance document as a binding requirement;

(g) Note on the agency's guidance portal that any guidance document not posted on the guidance portal is rescinded, and that neither the agency nor a party may cite, use, or rely on any guidance document that is not posted on the guidance portal, except to establish historical facts; and

(h) Include a link to this part on the agency's guidance portal.

§ 1173.6 Waiver of publication of guidance documents.

(a) Sections 1173.5(b) and (e) do not apply to guidance documents for which a waiver has been applied from the OMB Director pursuant to Subsection 3(c) of Executive Order (E.O.) 13891.

(b) Requests for waivers must be written and signed by a senior policy official at the agency.

§ 1173.7 Good faith cost estimates.

(a) NEH will, to the extent practicable, make a good faith effort to estimate the likely economic cost impact of the guidance document to determine whether the document might be significant.

(b) When assessing or explaining whether it believes a guidance document is significant, NEH will, at a minimum, provide the same level of analysis that would be required for a major determination under the Congressional Review Act.[2]

(c) When OMB's Office of Information and Regulatory Affairs (OIRA) determines that a guidance document will be economically significant, NEH will conduct and publish an assessment of the potential costs and benefits of the regulatory action (which may entail a regulatory impact analysis) of the sort that would accompany an economically significant rulemaking, to the extent reasonably possible.

§ 1173.8 Definition of significant guidance document.

(a) The term *significant guidance document* means a guidance document that will be disseminated to regulated entities or the general public and that may reasonably be anticipated:

(1) To lead to an annual effect on the economy of $100 million or more or adversely affect in a material way the United States economy, a sector of the United States economy, productivity, competition, jobs, the environment, public health or safety, or state, local, or tribal governments or communities;

(2) To create serious inconsistency or otherwise interfere with an action that another federal agency has taken or planned;

(3) To alter materially the budgetary impact of entitlements, grants, user fees, or loan programs or the rights and obligations of recipients thereof; or

(4) To raise novel legal or policy issues arising out of legal mandates, the President's priorities, or the principles set forth in E.O. 12866, as further amended.

(b) The term significant guidance document does not include the categories of documents excluded by this part or any other category of guidance documents that NEH's OGC, in consultation with OIRA, has exempted in writing.

§ 1173.9 Procedures for significant guidance documents.

(a) NEH will make an initial, preliminary determination about a guidance document's significance. Thereafter, NEH will submit the document to OIRA to determine whether a guidance document is significant, unless the guidance is otherwise exempted from such a determination by the Administrator of OIRA.

(b) If OIRA designates a guidance document as significant, NEH will submit the guidance document to OIRA for review under E.O. 12866 prior to issuing it; and NEH will process significant guidance in compliance with the applicable requirements for regulations or rules, including significant regulatory actions, as set forth in E.O. 12866, E.O. 13563, E.O. 13609, E.O. 13771, and E.O. 13777.

(c) The NEH Chairperson signs or approves significant guidance documents.

§ 1173.10 Notice-and-comment procedures.

Except as provided in paragraph (b) of this section, all proposed NEH guidance documents determined to be significant guidance documents within the meaning of § 1173.8 will be subject to the following informal notice-and-comment procedures.

(a) NEH's OGC will:

(1) Publish a notice in the **Federal Register** announcing that a draft of the proposed guidance document is publicly available;

(2) Post the draft guidance document on its website, at *www.neh.gov/guidance;*

(3) Invite public comment on the draft document for a minimum of thirty (30) days; and

(4) Prepare and post a public response to major concerns raised in the comments, as appropriate, on its guidance portal, either before or when the guidance document is finalized and issued.

(b) The requirements of paragraph (a) of this section will not apply to any significant guidance documents or categories of significant guidance documents for which NEH's OGC finds—in consultation with OIRA, the proposing NEH office/division, and the NEH Chairperson—good cause that notice and public procedure thereon are impracticable, unnecessary, or contrary to the public interest (and incorporates the finding of good cause and a brief statement of reasons therefor in the issued guidance).

(c) Where appropriate, NEH's OGC may recommend to the NEH Chairperson that a particular guidance document that is otherwise of importance to the agency's interests should also be subject to the informal notice-and-comment procedures described in paragraph (a) of this section.

[2] See OMB Memorandum M–19–14, Guidance on Compliance with the Congressional Review Act (April 11, 2019).

§ 1173.11 Petitions to withdraw or modify guidance.

(a) Any person may submit a petition to NEH requesting withdrawal or modification of any effective guidance document by writing to the NEH Office of the General Counsel at: *gencounsel@neh.gov,* or National Endowment for the Humanities, Attn: Office of the General Counsel, 400 Seventh Street SW, Washington, DC 20506.

(b) The petition must:

(1) Describe the nature of the request and provide the title or substance of the guidance you are requesting that NEH withdraw or modify; and

(2) Explain, with justification, how the document should be modified or why the document should be withdrawn.

(c) NEH will review each request and determine whether to grant the request or deny it in whole or in part. NEH will respond to all requests in a timely manner, but no later than ninety (90) days after receipt of the request.

§ 1173.12 Rescinded guidance.

(a) NEH's OGC, in consultation with the NEH office/division that issued the guidance document, shall determine whether to rescind a guidance document.

(b) Once rescinded, NEH will remove the hyperlink to the guidance document from the guidance portal. The agency will list on the guidance portal, for at least one year after rescission, the guidance document's name, title, unique identifier, and date of rescission.

(c) No NEH office/division or NEH staff may cite, use, or rely on guidance documents that are rescinded, except to establish historical facts.

§ 1173.13 Exigent circumstances.

In emergency situations, or when NEH is required by statutory deadline or court order to act more quickly than normal review procedures allow, NEH will notify OIRA as soon as possible and, to the extent practicable, comply with the requirements of this part at the earliest opportunity. Wherever practicable, NEH should schedule its proceedings to permit sufficient time to comply with the procedures set forth in this part.

§ 1173.14 Reports to Congress and the Government Accountability Office (GAO).

Unless otherwise determined in writing, NEH will, upon issuing a guidance document, submit a report to Congress and GAO in accordance with the procedures described in the Congressional Review Act.

§ 1173.15 No judicial review or enforceable rights.

This part is intended to improve the internal management of the National Endowment for the Humanities. As such, it is for the use of NEH personnel only and is not intended to, and does not, create any right or benefit, substantive or procedural, enforceable at law or in equity by any party against the United States, its agencies or other entities, its officers or employees, or any other person.

Dated: August 18, 2020.

Caitlin Cater,

Attorney-Advisor, National Endowment for the Humanities.

BILLING CODE 7536–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 54

[WC Docket Nos. 19–126, 10–90; FCC 20–5; FRS 16999]

Rural Digital Opportunity Fund, Connect America Fund

AGENCY: Federal Communications Commission.

ACTION: Final rule; announcement of effective date.

SUMMARY: In this document, the Federal Communications Commission (Commission) announces that the Office of Management and Budget (OMB) has approved, for a period of three years, an information collection associated with the rules for the Connect America Fund Phase II and Rural Digital Opportunity Fund auctions contained in the Commission's *Rural Digital Opportunity Fund Order,* FCC 20–5. This document is consistent with the *Rural Digital Opportunity Fund Order,* which stated that the Commission would publish a document in the **Federal Register** announcing the effective date of the new information collection requirements.

DATES: The amendments to § 54.804(b) and (c) published at 85 FR 13773, March 10, 2020 are effective September 14, 2020.

FOR FURTHER INFORMATION CONTACT: Alexander Minard, Wireline Competition Bureau at (202) 418–7400 or TTY (202) 418–0484. For additional information concerning the Paperwork Reduction Act information collection requirements contact Nicole Ongele at (202) 418–2991 or via email at *Nicole.Ongele@fcc.gov.*

SUPPLEMENTARY INFORMATION: The Commission submitted revised information collection requirements for review and approval by OMB, as required by the Paperwork Reduction Act (PRA) of 1995, on June 22, 2020. OMB approved the new information collection requirements on August 4, 2020. The information collection requirements are contained in the Commission's *Rural Digital Opportunity Fund Order,* FCC 20–5, published at 85 FR 13773, March 10, 2020. The OMB Control Number is 3060–1256. The Commission publishes this document as an announcement of the effective date of the rules published on March 10, 2020. If you have any comments on the burden estimates listed in the following, or how the Commission can improve the collections and reduce any burdens caused thereby, please contact Nicole Ongele, Federal Communications Commission, Room 1–A620, 445 12th Street SW, Washington, DC 20554. Please include the OMB Control Number, 3060–1256, in your correspondence. The Commission will also accept your comments via email at *PRA@fcc.gov.* To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

Synopsis

As required by the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), the Commission is notifying the public that it received OMB approval on August 4, 2020, for the information collection requirements contained in 47 CFR 54.804(b) and (c) published at 85 FR 13773, March 10, 2020. Under 5 CFR part 1320, an agency may not conduct or sponsor a collection of information unless it displays a current, valid OMB Control Number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the Paperwork Reduction Act that does not display a current, valid OMB Control Number. The OMB Control Number is 3060–1256. The foregoing notice is required by the Paperwork Reduction Act of 1995, Public Law 104–13, October 1, 1995, and 44 U.S.C. 3507.

The total annual reporting burdens and costs for the respondents are as follows:

OMB Control Number: 3060–1256.

OMB Approval Date: August 4, 2020.

OMB Expiration Date: August 31, 2023.

Title: Application for Connect America Fund Phase II and Rural Digital Opportunity Fund Auction Support.

Form Number: FCC Form 683.

Type of Review: Revision of a currently approved collection.

Respondents: Business or other for-profit entities, Not-for-profit institutions, and State, Local or Tribal Governments.

Number of Respondents and Responses: 530 respondents; 1,060 responses.

Estimated Time per Response: 2–12 hours (on average).

Frequency of Response: Annual reporting requirements, on occasion reporting requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection 47 U.S.C. 154, 214, 254 and 303(r) of the Communications Act of 1934, as amended.

Total Annual Burden: 7,420 hours.

Total Annual Cost(s): No cost.

Nature and Extent of Confidentiality: Although most information collected in FCC Form 683 will be made available for public inspection, the Commission will withhold certain information collected in FCC Form 683 from routine public inspection. Specifically, the Commission will treat certain financial and technical information submitted in FCC Form 683 as confidential. In addition, an applicant may use the abbreviated process under 47 CFR 0.459(a)(4) to request confidential treatment of the audited financial statements that are submitted during the post-selection review process. However, if a request for public inspection for this technical or financial information is made under 47 CFR 0.461, and the applicant has any objections to disclosure, the applicant will be notified and will be required to justify continued confidential treatment. To the extent that an applicant seeks to have other information collected in FCC Form 683 or during the post-selection review process withheld from public inspection, the applicant may request confidential treatment pursuant to 47 CFR 0.459.

Privacy Act Impact Assessment: No impact(s).

Needs and Uses

Connect America Fund Phase II Auction

On November 18, 2011, the Commission released the *USF/ICC Transformation Order and Further Notice of Proposed Rulemaking,* WC Docket No. 10–90 et al., FCC 11–161 (*USF/ICC Transformation Order and/or FNPRM*), which comprehensively reformed and modernized the high-cost program within the universal service fund to focus support on networks capable of providing voice and broadband services. Among other things, the Commission created the Connect America Fund (CAF) and concluded that support in price cap areas would be provided through a combination of ''a new forward-looking model of the cost of constructing modern multi-purpose networks'' and a competitive bidding process (CAF Phase II auction or Auction 903). The Commission also sought comment in the accompanying *USF/ICC Transformation FNPRM* on proposed rules governing the CAF Phase II auction, including basic auction design and the application process.

In the CAF Phase II auction, service providers competed to receive support of up to $1.98 billion over 10 years to offer voice and broadband service in unserved high-cost areas. The information collection requirements reported under this collection are the result of several Commission decisions to implement the reform adopted in the *USF/ICC Transformation Order* and move forward with conducting the CAF Phase II auction. In the *April 2014 Connect America Order,* WC Docket No. 10–90 et al., FCC 14–54, the Commission adopted various rules regarding participation in the CAF Phase II auction, the term of support, and the eligible telecommunications carrier (ETC) designation process. In the *Phase II Auction Order,* WC Docket No. 10–90 et al., FCC 16–64, the Commission adopted rules to govern the CAF Phase II auction, including the adoption of a two-stage application process, which includes a pre-auction short-form application to be submitted by parties interested in bidding in the CAF Phase II auction and a post-auction long-form application that must be submitted by winning bidders seeking to become authorized to receive CAF Phase II auction support. The Commission concluded, based on its experience with auctions and consistent with the record, that this two-stage application process balances the need to collect information essential to conducting a successful auction and authorizing CAF Phase II support with administrative efficiency.

On January 30, 2018, the Commission adopted a public notice that established the final procedures for the CAF Phase II auction, including the long-form application disclosure and certification requirements for winning bidders seeking to become authorized to receive CAF Phase II auction support. *See Phase II Auction Procedures Public Notice,* WC Docket No. 17–182 et al., FCC 18–6. The Commission also adopted the *Phase II Auction Order on Reconsideration,* WC Docket No. 10–90 et al., FCC 18–5, which modified the Commission's letter of credit rules to provide some additional relief for CAF Phase II auction support recipients by reducing the costs of maintaining a letter of credit.

The Commission reduces the number of respondents that are subject to this collection now that the CAF Phase II auction winning bidders have been announced.

Rural Digital Opportunity Fund Auction

On February 7, 2020 the Commission released the *Rural Digital Opportunity Fund Order,* WC Docket Nos. 19–126, 10–90, FCC 20–5 which will commit up to $20.4 billion over the next decade to support up to gigabit speed broadband networks in rural America. The funding will be allocated through a multi-round, reverse, descending clock auction that favors faster services with lower latency and encourages intermodal competition in order to ensure that the greatest possible number of Americans will be connected to the best possible networks, all at a competitive cost.

To implement the Rural Digital Opportunity Fund auction, the Commission adopted new rules for the Rural Digital Opportunity Fund auction, including the adoption of a two-stage application process. Like with the CAF Phase II auction, this process includes a pre-auction short-form application to be submitted by parties interested in bidding in the Rural Digital Opportunity Fund auction (FCC Form 183) and a post-auction long-form application that must be submitted by winning bidders (or their designees) seeking to become authorized to receive Rural Digital Opportunity Fund support (FCC Form 683). The Commission received approval for the short-form application (FCC Form 183) in a separate collection under the OMB control number 3060–1252.

The Commission plans to submit at a later date additional revisions or new collections for OMB review to address other reforms adopted in the above-referenced Order.

The Commission therefore revises this information collection to reflect these requirements to determine the recipients of Connect America Phase II auction and Rural Digital Opportunity Fund auction support.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[CG Docket No. 17–59; FCC 20–96; FRS 16971]

Advanced Methods To Target and Eliminate Unlawful Robocalls

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: In this document, the Commission adopts two safe harbors for voice service providers that block calls in certain situations, and adopts certain measures to ensure that erroneous blocking is quickly remedied. Specifically, the Commission adopts a safe harbor from liability under the Communications Act and the Commission's rules for terminating voice service providers that block calls on an opt-out basis based on reasonable analytics designed to identify unwanted calls, so long as those take into account information provided by caller ID authentication where available for a particular call. Second, the Commission adopts a safe harbor enabling voice service providers to block traffic from bad-actor upstream voice service providers that continue to allow unwanted calls to traverse their networks. Finally, the Commission requires that blocking providers furnish a single point of contact to resolve unintended or inadvertent blocking, and emphasizes that, when blocking, they should make all reasonable efforts to ensure that critical calls, such as those from Public Safety Answering Points (PSAPs), are not blocked and that they should never block calls to 911. These rules both respond to voice service providers that seek assurance that their good-faith blocking will not result in liability if they inadvertently block wanted calls and implement the call blocking provisions of the TRACED Act, and provide safeguards against erroneous blocking.

DATES: Effective October 14, 2020.

FOR FURTHER INFORMATION CONTACT: Jerusha Burnett, Consumer Policy Division, Consumer and Governmental Affairs Bureau, email at *jerusha.burnett@fcc.gov* or by phone at (202) 418–0526.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's *Report and Order,* in CG Docket No. 17–59, FCC 20–96, adopted on July 16, 2020, and released on July 17, 2020. The *Further Notice of Proposed Rulemaking* that was adopted concurrently with the *Report and Order* published July 31, 2020 at 85 FR 46063. The full text of document FCC 20–96 is available for public inspection and copying via the Commission's Electronic Comment Filing System (ECFS). The full text of document FCC 20–96 and any subsequently filed documents in this matter may also be found by searching ECFS at: *http://apps.fcc.gov/ecfs/* (insert CG Docket No. 17–59 into the Proceeding block). To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov,* or call the Consumer and Governmental Affairs Bureau at (202) 418–0530 (voice).

Final Paperwork Reduction Act of 1995 Analysis

The *Report and Order* does not contain any new or modified information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. It, therefore, does not contain any new or modified information collection burden for small business concerns with fewer than 25 employees, pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4).

Congressional Review Act

The Commission sent a copy of the *Report and Order* to Congress and the Government Accountability Office pursuant to the Congressional Review Act, *see* 5 U.S.C. 801(a)(1)(A).

Synopsis

1. With the *Report and Order,* the Commission takes specific and concrete steps to further protect consumers against unwanted calls. The Commission adopts a safe harbor from liability under the Communications Act and its rules for terminating voice service providers that block calls based on reasonable analytics designed to identify unwanted calls, so long as those take into account information provided by STIR/SHAKEN (or, for non-IP based calls, any other effective call authentication framework that satisfies the Pallone-Thune Telephone Robocall Abuse Criminal Enforcement And Deterrence (TRACED) Act) when such information is available for a particular call. And the Commission establishes a second safe harbor enabling voice service providers to block traffic from bad-actor upstream voice service providers that continue to allow unwanted calls to traverse their networks. Finally, the Commission requires that blocking providers furnish a single point of contact to resolve unintended or inadvertent blocking, and emphasizes that, when blocking, they should make all reasonable efforts to ensure that critical calls, such as those from PSAPs, are not blocked and that they should never block calls to 911.

Safe Harbors

2. Consistent with the TRACED Act and in light of the record garnered in response to the Commission's *Call Blocking Declaratory Ruling and Further Notice,* the Commission adopts two safe harbors from liability under the Communications Act and the Commission's rules for certain call blocking by voice service providers. The first is a call-by-call safe harbor based on reasonable analytics including caller ID authentication information. The second safe harbor targets bad-actor upstream voice service providers who do not police their networks to minimize bad traffic after being notified of such traffic.

3. *Scope of Safe Harbor Protection.* The safe harbors the Commission establishes here will protect blocking providers from liability arising from any obligations related to completing the call under the Communications Act and the Commission's rules.

Safe Harbor Based on Reasonable Analytics

4. First, the Commission adopts a safe harbor from liability under the Communications Act and the Commission's rules for the unintended or inadvertent blocking of wanted calls where terminating voice service providers block based on reasonable analytics that include caller ID authentication information and the consumer is given the opportunity to opt out. Consistent with the Commission's statement in the *Call Blocking Declaratory Ruling,* published at 84 FR 29387, June 24, 2019, *and Further Notice (NPRM),* published at 84 FR 29478, June 24, 2019; and Congress' guidance in the TRACED Act, the Commission requires terminating voice service providers that take advantage of this safe harbor to offer these services without a line-item charge to consumers.

5. *Caller ID Authentication Requirement.* To avail themselves of the safe harbor, terminating voice service providers must incorporate caller ID authentication information into their reasonable analytics programs. At this time, only the STIR/SHAKEN caller ID authentication framework satisfies this requirement. As the Commission explains, however, should it later identify other effective caller ID authentication methods that would

satisfy the TRACED Act, including non-IP methods, those methods would also satisfy its requirements here.

6. At a minimum, a terminating voice service provider seeking safe harbor protection must have deployed an effective caller ID authentication framework within their own network, accept caller ID authentication information transmitted by an upstream voice service provider, and incorporate that information into its analytics where that information is available. The terminating voice service provider may also rely on this safe harbor even when blocking calls where caller ID authentication information is not available, so long as it incorporates caller ID authentication information into its analytics wherever possible.

7. In recognition of commenter concerns, and of the need to adapt to evolving threats, the Commission gives terminating voice service providers flexibility in how to incorporate authentication into their analytics. They may, for example, take into account the level of attestation, including looking at what level of attestation has historically been present where such data is available. The Commission reiterates that voice service providers must apply analytics reasonably in a non-discriminatory, competitively neutral manner.

8. The TRACED Act acknowledges that voice service providers' ability to deploy STIR/SHAKEN varies because, in part, it is not designed to work on non-IP networks. As a result, this requirement means that terminating voice service providers with exclusively non-IP based networks will not be able to avail themselves of the safe harbor immediately. Should industry develop alternative caller ID authentication technologies that it later determines satisfy this requirement under the TRACED Act, those technologies would also be sufficient to claim the safe harbor. Further, the Commission recognizes that all terminating voice service providers are likely to receive calls from upstream voice service providers with non-IP networks. If a portion of the calls received by the terminating voice service provider are authenticated and the terminating voice service provider is verifying those calls and incorporating that information into a program of reasonable analytics, the safe harbor would still be available for the blocking of calls from non-IP networks. Limiting the safe harbor to authenticated calls could encourage bad actors to ensure that their calls originate or transit on non-IP networks, undermining the value of the safe harbor.

Safe Harbor for Blocking of Bad-Actor Providers

9. The Commission clarifies that voice service providers may block calls from certain bad-actor upstream voice service providers and establishes a safe harbor from liability related to call completion obligations arising under the Communications Act and the Commission's rules for this blocking. Unlike the reasonable analytics safe harbor, the Commission focuses here on criteria that clearly indicate a particular upstream voice service provider is facilitating, or at a minimum shielding, parties originating illegal calls.

10. *Permitting Provider-Based Blocking.* Until very recently, the Commission has only authorized call blocking for particular calls, not based on the provider. Here, the Commission clarifies that voice service providers are permitted to block calls from ''bad-actor'' upstream voice service providers. Specifically, the Commission makes clear that a voice service provider may block calls from an upstream voice service provider that, when notified that it is carrying bad traffic by the Commission, fails to effectively mitigate such traffic or fails to implement effective measures to prevent new and renewing customers from using its network to originate illegal calls. The notification from the Commission will be based on information obtained through traceback, likely in coordination with the Traceback Consortium. Failure of the bad-actor provider to sign calls may be an additional factor in this notification.

11. *Notification and Effective Mitigation Measures.* If the Commission identifies illegal traffic on the network, it may notify the voice service provider that it is passing identified bad traffic and that specific calls are illegal. Upon receipt of this notification, the voice service provider should promptly investigate and, if necessary, prevent the illegal caller from continuing to use the network to place illegal calls. If the upstream voice service provider fails to take effective mitigation measures within 48 hours, a voice service provider may then, after notifying the Commission as discussed below, block calls from this bad-actor provider. Similarly, if the upstream voice service provider fails to implement effective measures to prevent new and renewing customers from using its network to originate illegal calls, a voice service provider may also block calls from this bad-actor provider.

12. A notified voice service provider should inform the Commission and the Traceback Consortium within 48 hours of steps it has taken to mitigate the illegal traffic. A voice service provider that is aware of the notice provided to an upstream voice service provider must consider whether the steps taken were sufficient to effectively mitigate the identified bad traffic. The Commission declines to mandate specific metrics to make this determination, but expects that they will generally involve a significant reduction in the traffic stemming from a particular illegal calling campaign or regarding calls from the particular upstream voice service provider. The voice service provider may meet this criterion if it determines, in good faith and upon a rational basis, that the upstream voice service provider has failed to effectively mitigate the illegal traffic. The Commission expects the voice service provider to inform the upstream voice service provider of that determination in order to give the upstream voice service provider another opportunity to take further mitigation steps. In addition, before taking any action to block calls of the upstream voice service provider, a voice service provider must provide the Commission with notice and a brief summary of its basis for making such a determination. By obtaining such information from both parties, the Commission will be in a position to monitor the actions of both parties prior to commencement of any blocking.

13. A notified voice service provider should also inform the Commission and the Traceback Consortium within a reasonable period of time of the steps it takes to prevent new and renewing customers from originating illegal calls. Failure to provide this information within a reasonable time shall be equivalent to having failed to have effective measures in place for purposes of the safe harbor. Where upstream voice service providers disclose their measures, a voice service provider may in good faith assess whether the measures are effective based on objective criteria, such as whether customers can show a legitimate business need for those services. Again, before taking any action to block calls of the upstream voice service provider, a voice service provider must provide the Commission with notice and a brief summary of its basis for making such a determination.

14. *Risk of Legal Calls Being Blocked.* The Commission finds that the benefits of this safe harbor outweigh the potential costs of blocking some legal calls in the process. Voice service providers are in the best position to detect and combat this problem. Accordingly, the Commission believes that enabling voice service providers to

use all available technologies and methodologies at their disposal without fear of liability is crucial to combat illegal calls. This safe harbor encourages voice service providers to both mitigate bad traffic once they have actual notice of that traffic, and to take proactive steps to prevent their networks from being used to transmit illegal calls.

Protections Against Erroneous Blocking

15. *Protections for Critical Calls.* The Commission requires that all voice service providers must make all reasonable efforts to ensure that calls from PSAPs and government outbound emergency numbers are not blocked.

16. Calls to PSAPs via 911 are also extremely important and the Commission makes clear that they should never be blocked unless the voice service provider knows without a doubt that the calls are unlawful. Though some unwanted and illegal calls may reach 911 call centers, the Commission believes that 911 call centers themselves are best equipped to determine how to handle the calls they receive.

17. *Point of Contact for Blocking Disputes.* The Commission requires that any voice service provider that blocks calls must designate a single point of contact for callers, as well as other voice service providers, to report blocking errors at no charge to callers or other voice service providers.

18. Blocking providers must investigate and resolve these blocking disputes in a reasonable amount of time and at no cost to the caller, so long as the complaint is made in good faith. What amount of time is ''reasonable'' may vary depending on the specific circumstances of the blocking and the resolution of the blocking dispute, and pending further developments in the record Blocking providers must also publish contact information clearly and conspicuously on their public-facing websites. The Commission further requires that when a caller makes a credible claim of erroneous blocking and the voice service provider determines that the calls should not have been blocked, a voice service provider must promptly cease blocking calls from that number unless circumstances change. Finally, because the TRACED Act requires that the establishment of a safe harbor be consistent with the Act's requirement of ''transparency and effective redress options,'' the Commission confirms that implementation of these redress mechanisms is a condition of obtaining the protections of the safe harbors it establishes in the *Report and Order.*

19. Consistent with what the Commission permitted in June 2019, consumers may choose, either via opt in or opt out consent, to have their terminating voice service provider block categories of calls that may include legal calls. In these cases, terminating voice service providers are not obliged to cease blocking such calls merely because the caller claims they are legal. Rather, a terminating voice service provider's analysis should hinge on whether the disputed calls fit within the blocking categories to which their customers have consented.

20. *No Critical Calls List at this Time.* The Commission declines to adopt a Critical Calls List at this time, in light of a record largely in opposition and in recognition that such a list would likely to do more harm than good. The Commission does not, however, foreclose the possibility of adopting such a list at a future point in time should circumstances change.

Final Regulatory Flexibility Analysis

21. As required by the Regulatory Flexibility Act of 1980 (RFA), as amended, an Initial Regulatory Flexibility Analysis (IRFA) was incorporated into the *Declaratory Ruling and Further Notice.* The Commission sought written public comment on the proposals in the *NPRM,* including comment on the IRFA. The comments received are discussed below. The Final Regulatory Flexibility Analysis (FRFA) conforms to the RFA.

Need for, and Objectives of, the Order

22. The *Report and Order* takes important steps in the fight against illegal robocalls by enabling terminating voice service providers to block certain calls before they reach consumers' phones while also requiring certain protections for lawful calls. The rules the Commission adopts today outline two safe harbors for terminating voice service providers that block calls in these circumstances. First, the *Report and Order* establishes a safe harbor for terminating voice service providers that block calls on a default, opt-out, basis based on reasonable analytics so long as those analytics include caller ID authentication information and the customer is given sufficient information to make an informed choice. Second, it establishes a safe harbor for voice service providers that block and then cease accepting all traffic from an upstream voice service provider that, when notified that it is carrying bad traffic by the Commission, fails to effectively mitigate such traffic or fails to implement effective measures to prevent new and renewing customers from using its network to originate illegal calls. The *Report and Order* also adopts rules to ensure that callers and other voice service providers can resolve potential erroneous blocking and to require all voice service providers to make all reasonable efforts to ensure that critical calls complete.

23. *Reasonable Analytics.* The *Report and Order* provides a safe harbor from liability under the Communication Act and the Commission's rules for voice service providers that block calls based on reasonable analytics that must include Caller ID authentication information, so long as consumers are given a meaningful opportunity to opt out. This safe harbor builds on the blocking the Commission made clear was permitted under the *Declaratory Ruling and Further Notice* and adds the requirement that voice service provides incorporate Caller ID authentication information into their analytics programs.

24. *Bad Actor Providers.* Additionally, the *Report and Order* establishes a safe harbor for terminating voice service providers that block calls from upstream voice service providers that, when notified that it is carrying bad traffic by the Commission, fails to effectively mitigate such traffic or fails to implement effective measures to prevent new and renewing customers from using its network to originate illegal calls. This safe harbor incentivizes bad-actor providers to better police their networks by raising the cost of passing bad traffic.

25. *Other Issues.* The *Report and Order* clarifies that any terminating voice service provider that blocks calls must designate a single point of contact for callers to report blocking errors at no charge. It further makes clear that blocking providers must investigate and resolve these blocking disputes in a reasonable amount of time that is consistent with industry best practices. To avoid abuse, the *Report and Order* declines to mandate a Critical Calls List at this time. It does, however, make clear that the Commission expects all voice service providers will take all possible steps to ensure that calls from PSAPs and government outbound emergency numbers are not blocked. Finally, it makes clear that calls to 911 should never be blocked unless the voice service provider knows without a doubt that the calls are unlawful.

Summary of Significant Issues Raised by Public Comments in Response to the IRFA

26. In the *Declaratory Ruling and Further Notice,* the Commission solicited comments on how to minimize the economic impact of the new rules

on small business. The Commission received four comments either directly referencing the IRFA or addressing small business concerns. Two of these comments focused on concerns about the ability of small businesses to implement STIR/SHAKEN and how this would impact the safe harbors proposed in the *Further Notice.* The remaining two comments focused on small business challenge mechanism issues.

27. *SHAKEN/STIR.* Both ITTA and Spoofcard raised concerns about safe harbors contingent on SHAKEN/STIR, noting that many small voice service providers have TDM networks and therefore will not be able to implement SHAKEN/STIR quickly. ITTA instead argues for a safe harbor for blocking based on reasonable analytics, while Spoofcard simply argues against blocking based solely on SHAKEN/STIR. The Commission recognizes that some small voice service providers will not be able to implement SHAKEN/STIR quickly. The first safe harbor the Commission adopts in the *Report and Order* does not prevent these voice service providers from blocking pursuant to the *Declaratory Ruling.* Additionally, as other effective Caller ID authentication technologies are developed, they may also satisfy the requirements of the first safe harbor. Finally, neither safe harbor the Commission adopts permits blocking solely on SHAKEN/STIR.

28. *Challenge Mechanisms.* Capio highlighted the importance of a robust challenge mechanism for small businesses. Both Capio and CUNA called for this mechanism to be offered free of charge, with CUNA noting that this is particularly important for small businesses such as credit unions. In the *Report and Order,* the Commission requires terminating voice service providers to designate a single point of contact for resolving blocking disputes and make contact information clear and conspicuous on their public-facing websites. The Commission further requires terminating voice service providers to resolve disputes in a reasonable amount of time, noting that what is reasonable may vary on a case-by-case basis. Finally, the Commission requires that this be offered at no charge to callers.

Response to Comments by the Chief Counsel for Advocacy of the Small Business Administration

29. Pursuant to the Small Business Jobs Act of 2010, which amended the RFA, the Commission is required to respond to any comments filed by the Chief Counsel for Advocacy of the Small Business Administration (SBA), and to provide a detailed statement of any change made to the proposed rules as a result of those comments. The Chief Counsel did not file any comments in response to the proposed rules in this proceeding.

Description of Projected Reporting, Recordkeeping, and Other Compliance Requirements for Small Entities

30. The *Report and Order* makes clear that voice service providers may block calls in certain circumstances and provides safe harbors for that blocking. The *Report and Order* also adopts certain protections for lawful callers. These changes affect small and large companies equally and apply equally to all the classes of regulated entities identified above.

31. *Reporting and Recordkeeping Requirements.* The *Report and Order* establishes blocking safe harbors that will require terminating providers that choose to block to maintain certain records to ensure that their blocking is in compliance with the safe harbor. The specific records that a terminating provider would need to retain will depend on the particular safe harbor the terminating provider is relying on as well as their specific blocking program. Terminating providers that choose to block calls based on reasonable analytics including caller ID authentication information will need to maintain records on calls blocked, as well as opt-out decisions made by consumers. These records are necessary to ensure that opt-out requests are honored and to aid in resolving blocking disputes. Terminating providers that choose to block all calls from a bad-actor upstream provider will need to retain information relevant to that decision to ensure that all requirements were met prior to blocking and to help respond to blocking disputes. Originating, intermediate, and terminating providers will also need to communicate with other providers regarding traceback, illegal traffic, and measures to prevent new customers from originating illegal traffic.

Steps Taken To Minimize the Significant Economic Impact on Small Entities, and Significant Alternatives Considered

32. The RFA requires an agency to describe any significant alternatives that it has considered in reaching its approach, which may include the following four alternatives, among others: (1) The establishment of differing compliance or reporting requirements or timetables that take into account the resources available to small entities; (2) the clarification, consolidation, or simplification of compliance or reporting requirements under the rule for small entities; (3) the use of performance, rather than design, standards; and (4) an exemption from coverage of the rule, or any part thereof, for small entities.

33. The Commission considered feedback from the *Declaratory Ruling and Further Notice* in crafting the final order. The Commission evaluated the comments with the goal of removing regulatory roadblocks and giving industry the flexibility to block calls while still protecting the interests of lawful callers. For example, the rules the Commission adopts are permissive rather than mandatory, allowing small businesses to determine whether, and what type of, blocking is the correct approach for their network. A terminating provider may choose to block based on reasonable analytics, including caller ID authentication information, and benefit from that safe harbor. Should a terminating provider do so, they have flexibility to design their own reasonable analytics program and make that program either opt out or opt in. Alternatively, or in addition to that blocking, a terminating provider may choose to block all calls from an originating or intermediate provider that fails to meet the criteria the Commission lays out in the bad-actor provider safe harbor. The Commission recognizes small business concerns regarding the difficulty of deploying SHAKEN/STIR. Small businesses that cannot rapidly deploy SHAKEN/STIR have alternative blocking options, such as those from the *Declaratory Ruling and Further Notice* to ensure that they are not left behind. The Commission further took the concerns of small business into consideration in establishing the requirements to make challenging erroneous blocking simpler and at no cost to the caller.

34. The Commission does not see a need to establish a special timetable for small entities to reach compliance with the modification to the rules. No small business has asked for a delay in implementing the rules. Small businesses may avoid compliance costs entirely by declining to block robocalls, or may delay implementation of call blocking indefinitely to allow for more time to come into compliance with the rules. Similarly, there are no design standards or performance standards to consider in this rulemaking.

The Commission will send a copy of the *Report and Order,* including this FRFA, in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional Review Act.

Ordering Clauses

35. Pursuant to sections 4(i), 201, 202, 227, 227b, 251(e), 303(r), and 403 of the Communications Act of 1934, as amended, 47 U.S.C. 154(i), 201, 202, 227, 227b, 251(e), 303(r), and 403, the *Report and Order* is adopted and that part 64 of the Commission's rules, 47 CFR 64.1200, is amended.

List of Subjects in 47 CFR Part 64

Communications common carriers, Reporting and recordkeeping requirements, Telecommunications, Telephone.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

Final Rules

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 part 64 as follows:

PART 64—MISCELLANEOUS RULES RELATING TO COMMON CARRIERS

■ 1. The authority citation for part 64 continues to read as follows:

Authority: 47 U.S.C. 154, 201, 202, 217, 218, 220, 222, 225, 226, 227, 227b, 228, 251(a), 251(e), 254(k), 262, 403(b)(2)(B), (c), 616, 620, 1401–1473, unless otherwise noted; Pub. L. 115–141, Div. P, sec. 503, 132 Stat. 348, 1091.

■ 2. Amend § 64.1200 by
■ a. Adding paragraph (f)(17);
■ b. Revising paragraph (k) introductory text, paragraphs (k)(3) and (4) and adding paragraphs (k)(5) through (8).

The additions and revisions read as follows:

§ 64.1200 Delivery restrictions.

* * * * *

(f) * * *

(17) The term *effectively mitigate* means identifying the source of the traffic and preventing that source from continuing to originate traffic of the same or similar nature.

* * * * *

(k) Voice service providers may block calls so that they do not reach a called party as follows:

* * * * *

(3) A terminating provider may block a voice call without liability under the Communications Act or the Commission's rules where:

(i) Calls are blocked based on the use of reasonable analytics designed to identify unwanted calls;

(ii) Those analytics include consideration of caller ID authentication information where available;

(iii) A consumer may opt out of blocking and is provided with sufficient information to make an informed decision;

(iv) All analytics are applied in a non-discriminatory, competitively neutral manner;

(v) Blocking services are provided with no additional line-item charge to consumers; and

(vi) The terminating provider provides, without charge to the caller, the redress requirements set forth in paragraph (k)(8) of this section.

(4) A provider may block voice calls or cease to accept traffic from an originating or intermediate provider without liability under the Communications Act or the Commission's rules where the originating or intermediate provider, when notified by the Commission, fails to effectively mitigate illegal traffic within 48 hours or fails to implement effective measures to prevent new and renewing customers from using its network to originate illegal calls. Prior to initiating blocking, the provider shall provide the Commission with notice and a brief summary of the basis for its determination that the originating or intermediate provider meets one or more of these two conditions for blocking.

(5) A provider may not block a voice call under paragraphs (k)(1) through (4) of this section if the call is an emergency call placed to 911.

(6) A provider may not block calls under paragraphs (k)(1) through (4) of this section unless that provider makes all reasonable efforts to ensure that calls from public safety answering points and government emergency numbers are not blocked.

(7) For purposes of this section, a provider may rely on Caller ID information to determine the purported originating number without regard to whether the call, in fact originated from that number.

(8) Any terminating provider blocking pursuant to this subsection must provide a single point of contact, readily available on the terminating provider's public-facing website, for handling call blocking error complaints and must resolve disputes within a reasonable time. When a caller makes a credible claim of erroneous blocking and the terminating provider determines that the calls should not have been blocked, the terminating provider must promptly cease blocking calls from that number unless circumstances change. The terminating provider may not impose any charge on callers for reporting, investigating, or resolving blocking error complaints.

BILLING CODE 6712–01–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 648

[Docket No. 200420–0118]
[RTID 0648–XA453]

Fisheries of the Northeastern United States; Scup Fishery; Adjustment to the 2020 Winter II Quota

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Temporary rule; in-season adjustment.

SUMMARY: NMFS adjusts the 2020 Winter II commercial scup quota and per-trip Federal landing limit. This action is necessary to comply with Framework Adjustment 3 to the Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan that established the rollover of unused commercial scup quota from the Winter I to Winter II period. This notice is intended to inform the public of this quota and trip limit change.

DATES: Effective October 1, 2020, through December 31, 2020.

FOR FURTHER INFORMATION CONTACT: Laura Hansen, Fishery Management Specialist, (978) 281–9225; or *Laura.Hansen@noaa.gov.*

SUPPLEMENTARY INFORMATION: NMFS published a final rule for Framework Adjustment 3 to the Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan in the **Federal Register** on November 3, 2003 (68 FR 62250), implementing a process to roll over unused Winter I commercial scup quota (January 1 through April 30) to be added to the Winter II period quota (October 1 through December 31) (50 CFR 648.122(d)). The framework also allows adjustment of the commercial possession limit for the Winter II period dependent on the amount of quota rolled over from the Winter I period. The Winter II period start date was changed from November 1 to October 1 as a part of Framework Adjustment 12 (83 FR 17314; April 19, 2018).

For 2020, the initial Winter II quota is 3,543,336 pounds (lb) (1,607 metric tons (mt)). The best available landings information indicates that 4,850,963 lb (2,200 mt) remain of the 10,027,597 lb (4,548 mt) Winter I quota. Consistent with Framework 3, the full amount of unused 2020 Winter I quota is being transferred to Winter II, resulting in a revised 2020 Winter II quota of

8,394,299 lb (3,808 mt). Because the amount transferred is between 4.5 and 5.0 million lb (2,041 mt and 2,268 mt), the Federal per trip possession limit will increase from 12,000 lb (5.4 mt) to 24,000 lb (10.9 mt), as outlined in the final rule that established the possession limit and quota rollover procedures for this year, published on May 15, 2020 (85 FR 29345).

Classification

NMFS issues this action pursuant to section 305(d) of the Magnuson-Stevens Act. This action is required by 50 CFR 648.122(d), which was issued pursuant to section 304(b), and is exempted from review under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), there is good cause to waive prior notice and an opportunity for public comment on this action, as notice and comment would be contrary to the public interest. This action transfers unused quota from the Winter I Period to the Winter II Period to make it accessible to the commercial scup fishery. If implementation of this inseason action is delayed to solicit prior public comment, the objective of the fishery management plan to achieve the optimum yield from the fishery could be compromised. Deteriorating weather conditions during the latter part of the fishing year may reduce fishing effort, and could also prevent the annual quota from being fully harvested. This would conflict with the agency's legal obligation under the Magnuson-Stevens Fishery Conservation and Management Act to achieve the optimum yield from a fishery on a continuing basis, resulting in a negative economic impact on vessels permitted to fish in this fishery. Moreover, the rollover process being applied here was the subject of notice and comment rulemaking, and the range of potential trip limit changes were outlined in the final 2018 scup specifications that were published December 22, 2017; which were developed through public notice and comment. Based on these considerations, there is good cause under 5 U.S.C. 553(d)(3) to waive the 30-day delayed effectiveness period for the reasons stated above.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 9, 2020.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

Proposed Rules

Federal Register

Vol. 85, No. 178

Monday, September 14, 2020

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

OFFICE OF PERSONNEL MANAGEMENT

5 CFR Part 316

RIN 3206–AN92

Temporary and Term Employment

AGENCY: Office of Personnel Management.

ACTION: Proposed rule.

SUMMARY: The Office of Personnel Management (OPM) is proposing rules that would allow agencies to make term appointments in Science, Technology, Engineering, Mathematics (STEM) occupations; positions needed to stand-up, operate, and close-out time-limited organizations which have a specific statutory appropriation; and time-limited projects which have been funded through specific appropriation; for up to 10 years. OPM is proposing this rule to provide agencies with greater flexibility to staff foreseeably long-term projects of a STEM nature when the need for the work is not permanent, and other time-limited work when authorized by specific funding by Congress. The intended effect of this change is to allow agencies the flexibility and discretion to hire individuals with knowledge, skills and abilities tailored to a specific project or Congressional funded work that may not be required on a permanent basis or transferable to other functions of the agency. This longer term appointment may also assist agencies in recruiting individuals with specialized STEM knowledge who prefer the opportunity to work on a project-by-project basis to build their resumes and maintain current skills.

DATES: OPM must receive comments on or before November 10, 2020.

ADDRESSES: You may submit comments, identified by docket number and/or Regulatory Information Number (RIN) and title, by any of the following methods:

• *Federal Rulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

All submissions received must include the agency name and docket number or RIN for this document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: Michelle Glynn at (202) 606–1571, by fax at (202) 606–3340, TDD at (202) 418–3134, or by email at *Michelle.Glynn@opm.gov*.

SUPPLEMENTARY INFORMATION: OPM is proposing to amend its rules pertaining to term employment to allow agencies to make term appointments in certain STEM occupations; positions needed to stand-up, operate, and close-out time-limited organizations which have a specific statutory appropriation; and time-limited projects which have been funded through specific appropriation; for up to 10 years. To do this, OPM is amending its regulations at 5 CFR part 316, subpart C, by adding a new paragraph to § 316.301 which authorizes agencies to hire individuals into STEM occupations and positions needed in support of other time-limited work when authorized by specific funding by Congress, for up to 10 years.

Under current regulations at 5 CFR part 316, subpart C, agencies have the discretion to make term appointments for a period of more than 1 year but not more than 4 years to any positions for which the need for an employee's services is not permanent. If an agency wishes to extend the term beyond four years or make an initial appointment of more than 4 years, it must obtain OPM's approval. 5 CFR 316.301. OPM recognizes, however, that the work performed by STEM positions, and positions needed in support of projects and organizations specifically funded by Congress, often lasts longer than 4 years. For example, it may be cyclical and often project based (*e.g.,* developing a research concept, initial research to prove feasibility, and testing/evaluation) and must continue until the goal or purpose of the work has been accomplished. Such work may include, but is not limited to, the need to collect data or conduct research (including medical research) regarding a certain trend or phenomenon, sometimes over time; perform STEM analysis of this data or research; and prepare reports of findings and recommendations, based on the data and analysis; or develop and implement new Information Technology (IT) projects or programs. In some instances, the work performed by these individuals may be affected by environmental factors or other external circumstances beyond the agency's control, which may result in the need for a lengthier appointment.

In addition, a study using Burning Glass [1] data suggests that the pace of technological change is driving a STEM skills gap, with new technological advancements continually demanding new skills of STEM workers and making some existing skills obsolete. (Deming, David J.; Noray, Kadeem L, STEM Careers and the Changing Skill Requirements of Work. The National Bureau of Economic Research, Revised June 2019.) The authors state, ''Using a near-universe of online job vacancy data collected between 2007 and 2017 by the employment analytics firm Burning Glass Technologies (BG), we show that job skill requirements change significantly over the course of a decade. We use the BG data to calculate a systematic measure of job skill change, and show that skill demands in STEM occupations have changed especially quickly. The faster rate of change in STEM is driven both by more rapid obsolescence of old skills and by faster adoption of new skills.'' Moreover, there is a 13 percent projected growth of STEM jobs in the United States between 2017 and 2027. (Feiman, Joseph, Can STEM Qualifications Hold The Key To The Future Of Cybersecurity? (Forbes September 11, 2019), citing Economy Modeling Specialists International 2017, *ecs.org/vital-signs-notes-and-sources/.* Given this high demand, agencies will need the flexibility and agility to attract and retain talent, for a significant period of time, with up-to-date knowledge and training in the STEM fields for time-limited projects. This regulation will allow agencies to hire new STEM personnel and grant their own extension of the term appointments, if initially hired for less than 10 years, to allow agencies the ability to shape their

[1] Employment analytics firm Burning Glass Technologies (BGT).

workforce with greater agility to meet current and emerging mission needs. Affording agencies the option to use longer term appointments in lieu of contracting will allow the agency to have STEM hires to be placed in managerial or supervisory positions throughout the life cycle of a time-limited project. In addition, this regulation may help agencies better compete for STEM talent because Federal term employment will offer individuals more job security and benefits (*e.g.,* health insurance, life insurance and participation in the Thrift Savings Plan (TSP) than would contract work to individuals interested in working on special projects in order to keep abreast of new technology and enhance their skills.

OPM is proposing use of this authority for any STEM occupation, regardless of occupational group. This includes a variety of professional and technical positions in numerous occupational groups (*e.g.,* Natural Resources Management and Biological Sciences; medical, hospital, dental, and public health, and information technology).

In addition, OPM is proposing to extend this flexibility to cover positions needed in support of time-limited organizations or projects which have been specifically funded by Congress (*i.e.,* the organization or project has been funded outside of, or in addition to, an agency's usual appropriation). Work of this nature oftentimes requires positions to be filled initially for an unknown period of time. This uncertainty may result in recruitment and retention challenges when agencies are endeavoring to implement and support expressed Congressional interest these organizations or projects.

Under current OPM regulation, the duration of a term appointment is limited to four years and agencies may not extend a term appointment beyond four years without OPM approval. OPM is proposing that an agency may appoint individuals in STEM positions, positions needed in support of projects and organizations specifically funded by Congress, for a term of more than 1 year up to a term of 10 years, and, if the initial appointment is less than 10 years, an agency may extend the appointment up to the 10-year limit in increments determined by the agency. The vacancy announcement used to fill these position must state that the agency has the option of extending the term appointment up to the 10-year limit. No appointment made under this section may last longer than 10 years from the date of the initial appointment. When using this authority, an agency must follow the procedures and requirements of 5 CFR part 316, subpart C, for purposes of selection, tenure, and trial periods.

OPM's current regulations provide that OPM may approve the extension of 4-year appointment if the extension is ''clearly justified'' and is consistent with applicable statutory provisions. 5 CFR 316.301(b). OPM believes that agencies that perform time-limited projects that require the specialized STEM skills, or which are in support of organizations or projects specifically funded by Congress, are in the best position to assess how long the project should continue, and should have the ability to act quickly when, in the agency's judgment, additional time is necessary. OPM believes this flexibility promotes retention and continuity, workforce planning, and minimizes disruptions during project work because term employees may be less likely to leave if they know their employment for the anticipated life of the project is secure rather than face an uncertain future awaiting a process under which their agency requests and must receive OPM extension approval for continuing work on the same project. Accordingly, OPM is not requiring agencies to obtain OPM approval to take advantage of the full 10-year term appointment under the proposed rule. However, agencies will be subject to OPM oversight regarding whether they are using this appointment appropriately. OPM does not intend this rule to be a substitute for a permanent workforce or for appointing employees to permanent positions for work of a permanent nature. OPM intends this rule to be used only for STEM work that is genuinely time-limited in nature; or for positions needed to stand-up, operate, and close-out time-limited organizations which have a specific statutory appropriation; and time-limited projects which have been funded through specific appropriation.

Lastly, OPM is proposing to modify § 316.302(b)(7) to allow an agency to reappoint an individual who previously served on a 10-year term appointment to a position in the same agency appropriate for filling up to the 10-year maximum limit. Combined service under the previous term appointment(s) cannot exceed 10 years. We are also proposing to modify this section to include reappointments made pursuant to § 316.301(b), so as attune reappointments to such positions with those for 4-year term appointments made pursuant to § 316.301(a), and those made under proposed § 316.301(c). This proposed modification parallels current regulatory language for individuals serving on 4-year term appointments made under § 316.301(a).

OPM invites comments on all aspects of the proposed regulation. OPM is particularly interested in testing its conclusions regarding the anticipated benefits of this regulation, additional examples of relevant agency experience, information regarding any potential benefits of this rule or possible drawbacks, and suggestions for possible improvements.

Regulatory Flexibility Act

We certify that this regulation will not have a significant impact on a substantial number of small entities because it applies only to Federal agencies and employees.

E.O. 13563 and E.O. 12866, Regulatory Review

Executive Orders 13563 and 12866 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been designated a ''significant regulatory action,'' under Executive Order 12866.

Executive Order 13771: Reducing Regulation and Controlling Regulatory Costs

The Executive Order 13771 designation for any final rule resulting from these proposed regulations will be informed by comments received. The preliminary Executive Order 13771 designation for this proposed rule is deregulatory.

This regulation provides substantial flexibility to agencies, and therefore generates cost savings for these agencies. As a result, we consider this rule to be a deregulatory action under Executive Order 13771.

E.O. 13132, Federalism

This regulation will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 13132, it is determined that this rule does not have sufficient federalism implications to warrant preparation of a Federalism Assessment.

E.O. 12988, Civil Justice Reform

This regulation meets the applicable standard set forth in section 3(a) and (b)(2) of Executive Order 12988.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local, or tribal governments of more than $100 million annually. Thus, no written assessment of unfunded mandates is required.

Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35)

This regulatory action will not impose any additional reporting or recordkeeping requirements under the Paperwork Reduction Act.

List of Subjects in 5 CFR Part 316

Employment, Government employees.

Office of Personnel Management.

Alexys Stanley,

Regulatory Affairs Analyst.

Accordingly, we propose to amend 5 CFR part 316 as follows:

PART 316—TEMPORARY AND TERM EMPLOYMENT

■ 1. Revise the authority citation for part 316 to read as follows:

Authority: 5 U.S.C. 3301, 3302; E.O. 10577, 3 CFR, 1954–1958 Comp., p. 218; 5 CFR 2.2(c).

Subpart C—Term Employment

■ 2. Amend § 316.301 by adding paragraph (c) to read as follows:

§ 316.301 Purpose and duration.

* * * * *

(c) An agency may make a term appointment for a period of more than 1 year but not more than 10 years to any science, technology, engineering, mathematics (STEM) position when the need for an employee's services is not permanent; or for positions needed to stand-up, operate, and close-out time-limited organizations which have a specific statutory appropriation; or time-limited projects which have been funded through specific congressional appropriation. An agency may extend an appointment made for more than 1 year but fewer than 10 years up to the 10-year limit in increments determined by the agency. The vacancy announcement must state that the agency has the option of extending a term appointment under this section up to the 10-year limit. No appointment made under this section may last longer than 10 years from the date of the initial appointment.

■ 3. Amend § 316.302 by revising paragraph (b)(7) to read as follows:

§ 316.302 Selection of term employees.

* * * * *

(b) * * *

(7) Reappointment on the basis of having left a term appointment prior to serving the 4-year maximum amount of time allowed under the appointment per § 316.301(a), the maximum time allowed for an appointment authorized under this paragraph (b), or the 10-year maximum amount of time allowed under § 316.301(c). Reappointment must be to a position in the same agency for filling under the original term appointment and for which the individual qualifies. Combined service under the original term appointment and reappointment must not exceed the 4-year limit for positions pursuant to § 316.301(a), the maximum time allowed for an appointment authorized under § 316.301(b), or the 10-year limit under § 316.301(c), as appropriate; or

BILLING CODE 6325–39–P

DEPARTMENT OF AGRICULTURE

Food Safety and Inspection Service

9 CFR Parts 352, 354, and 412

[Docket No. FSIS–2019–0019]

RIN 0583–AD78

Prior Label Approval System: Expansion of Generic Label Approval

AGENCY: Food Safety and Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: The Food Safety and Inspection Service (FSIS) is proposing to amend its inspection regulations to expand the circumstances under which FSIS will generically approve the labels of meat, poultry, and egg products. FSIS is also proposing to cease evaluating generically approved labels submitted to FSIS for review.

DATES: Submit comments on or before November 13, 2020.

ADDRESSES: FSIS invites interested persons to submit comments on this document. Comments may be submitted by one of the following methods:

• *Federal eRulemaking Portal:* This website provides commenters the ability to type short comments directly into the comment field on the web page or to attach a file for lengthier comments. Go to *http://www.regulations.gov.* Follow the on-line instructions at that site for submitting comments.

• *Mail, including CD–ROMs, etc.:* Send to Docket Clerk, U.S. Department of Agriculture, Food Safety and Inspection Service, 1400 Independence Avenue SW, Mailstop 3758, Room 6065, Washington, DC 20250–3700.

• *Hand or Courier-Delivered Submittals:* Deliver to 1400 Independence Avenue SW, Room 6065, Washington, DC 20250–3700.

Instructions: All items submitted by mail or electronic mail must include the Agency name and docket number FSIS–2019–0019. Comments received in response to this docket will be made available for public inspection and posted without change, including any personal information, to *http://www.regulations.gov.*

Docket: For access to background documents or comments received, call (202) 720–5627 to schedule a time to visit the FSIS Docket Room at 1400 Independence Avenue SW, Room 6065, Washington, DC 20250–3700.

FOR FURTHER INFORMATION CONTACT: Rachel Edelstein, Acting Assistant Administrator, Office of Policy and Program Development, by telephone at (202) 720–0399.

SUPPLEMENTARY INFORMATION:

Executive Summary

To prevent the introduction of adulterated or misbranded products into commerce, the Food Safety and Inspection Service (FSIS) implements a prior approval program for labels intended to be used on federally inspected meat, poultry, and egg products (9 CFR part 412). Without approved labels, these products may not be sold, offered for sale, or otherwise distributed in commerce.

Certain categories of labels or renderings of such labels (sketch labels) must be submitted to FSIS for review and approval before use. However, FSIS considers certain labels that comply with the Agency's labeling rules to be ''generically'' approved. Such labels are not submitted to FSIS, because they are deemed approved and may be applied to product in commerce.

Generic label approval has been in place in some form since 1983. FSIS has previously expanded the categories of labeling claims eligible for generic approval, most recently in 2013 (78 FR 66826, November 7, 2013). FSIS has also published a proposed rule that, if finalized as proposed, would permit generic approval for egg product labels (83 FR 6314, February 13, 2018). FSIS is now proposing to expand the categories of meat, poultry, and egg product labels that it will deem generically approved and thus not required to be submitted to FSIS. Specifically, under this proposal the following labels would no longer need to be submitted to FSIS for approval: (1) Labels on products for export that deviate from FSIS requirements; (2) labels that list ingredients in the ingredients statement as being certified ''organic'' (*e.g.,* organic garlic) under the Agricultural Marketing Service (AMS) National Organic Program; (3) labels that display geographic landmarks, such as a foreign country's flag, monument, or map; (4) labels that make ''negative'' claims identifying the absence of certain ingredients or types of ingredients (*e.g.,* statements such as ''No MSG Added,'' ''Preservative Free,'' ''No Milk,'' ''No Pork,'' or ''Made Without Soy''); and (5) labels of products that receive voluntary FSIS inspection (*e.g.,* exotic species under 9 CFR part 352). Finally, FSIS is proposing to cease evaluating labels submitted to FSIS that are eligible for generic approval.

These reforms would result in an estimated 33.8 percent reduction in label submissions (based on fiscal year 2019 data) and reduce Agency costs expended to evaluate the labels (see Table 1). There will not be any negative food safety impacts from this proposal, based on FSIS's experience evaluating these types of labels and the ability of inspection personnel to continue to verify labeling requirements in the field.

There is no cost burden for the industry or FSIS for the proposed rule. This is shown in Table 1 below, which summarizes the costs and benefits of the proposed rule. Industry would experience cost savings of $468,864, annualized at the 7 percent discount rate over 10 years, from the reduction in preparing and submitting certain labels for FSIS evaluation. FSIS would experience cost savings of $235,690, annualized at the 7 percent discount rate over 10 years, from the reduction in label evaluations.

TABLE 1—SUMMARY OF ANNUALIZED COSTS AND BENEFITS

	Costs	Cost savings	Net benefits
Industry	$0	$468,864	$468,864
Agency	0	235,690	235,690
Total	0	704,554	704,554

Note: Estimates are annualized using a 7 percent discount rate over 10 years.

I. Background

The Federal Meat Inspection Act (FMIA) (21 U.S.C. 601 *et seq.*), Poultry Products Inspection Act (PPIA) (21 U.S.C. 451 *et seq.*), and Egg Products Inspection Act (EPIA) (21 U.S.C. 1031 *et seq.*) direct the Secretary of Agriculture to maintain inspection programs designed to ensure that meat, poultry, and egg products are safe, wholesome, not adulterated, and properly marked, labeled, and packaged. These laws prohibit the sale of products under any false or misleading name, marking, or labeling and require the Secretary to approve product marking and labeling (21 U.S.C. 457(c), 607(d), and 1036(b)). The Department's longstanding interpretation of these provisions is that they require the Secretary or his or her representative to approve all labels to be used on federally inspected and passed, domestic and imported, meat, poultry and egg products, before the products may be distributed in commerce.

To implement these provisions, FSIS uses a prior approval program for labels on federally inspected meat, poultry, and egg products (9 CFR part 412). Without approved labels, meat, poultry, and egg products may not be sold, offered for sale, or otherwise distributed in commerce.

A. Current Label Regulations

The meat, poultry, and egg products labeling regulations require that meat, poultry, and egg products are truthfully labeled, and that the labeling provides the necessary product information for consumers to make informed purchasing decisions.

There are up to eight features required on meat, poultry, and egg product labels. The required features include: (1) The standardized, common or usual, or descriptive name, of the product (9 CFR 317.2(e), 381.117, and 590.411(c)(1)); (2) an ingredients statement containing the common or usual name of each ingredient of the product listed in descending order of predominance (9 CFR 317.2(f), 381.118, and 590.411(c)(1)); (3) the name and place of business of the manufacturer, packer, or distributor (9 CFR 317.2(g), 381.122, and 590.411(c)(2)); (4) an accurate statement of the net quantity of contents (9 CFR 317.2(h), 381.121, and 590.411(c)(4)); (5) the inspection legend, including the number of the official establishment (9 CFR 312.2(b), 317.2(i), 381.96, 381.123, and 590.411(c)(5)); (6) a handling statement if the product is perishable, *e.g.,* ''Keep Frozen'' or ''Keep Refrigerated'' (9 CFR 317.2(k), 381.125(a), and 590.410(a)(1)–(2)); (7) nutrition labeling for applicable meat and poultry products (9 CFR part 317, subpart B; part 381, subpart Y; and 590.411(e)); [1] and (8) safe handling instructions if the meat or poultry component of the product is not ready-to-eat (9 CFR 317.2(l) and 381.125(b)). In addition, imported meat, poultry, and egg products must bear the country of origin under the product name (9 CFR 327.14(b)(1), 381.205(a), and 590.950(a)(2)).

These required features must appear on the immediate containers of domestic products (9 CFR part 317, subpart A, and part 381, subpart N) and imported products (9 CFR part 327 and part 381, subpart T; 590.411(c); and 590.950(a)). The meat inspection regulations define an ''immediate container'' as ''the receptacle or other covering in which any product is directly contained or wholly or partially enclosed'' (9 CFR 301.2). The EPIA and poultry products inspection regulations define an ''immediate container'' as ''any consumer package; or any other container in which poultry products,

[1] Nutrition labeling for egg products must comply with the provisions of 21 CFR part 101, promogulated under the Federal Food, Drug, and Cosmetic Act and the Fair Packaging and Labeling Act [9 CFR 590.411(e)].

not consumer packaged, are packed'' (21 U.S.C. 1033(d)(1) and 9 CFR 381.1(b)).

The principal display panel, information panel, or other surface of the product label must prominently display the mandatory features. The first six features described above, and the labeling of country of origin for imported products in accordance with 9 CFR 327.14 and 381.205, have been required by the meat and poultry inspection regulations for decades. FSIS published regulations that require the nutrition labeling of cooked or heat-treated multi-ingredient meat and poultry products and the display of safe handling instructions in 1993 and 1994, respectively. Given industry's familiarity with these requirements, FSIS typically finds establishments in compliance with its labeling regulations.

The regulations contain other provisions to ensure that no statement, word, picture, design, or device that is false or misleading in any particular, or that conveys any false impression, or that gives any false indication of origin, identity, or quality, appears in any marking or other labeling (9 CFR 317.8, 381.129, and 590.411(f)(1)). Pursuant to the authority contained in section 7(e) of the FMIA (21 U.S.C. 607(e)), section 8(d) of the PPIA (21 U.S.C. 457(d)), and section 7(b) of the EPIA (21 U.S.C. 1036(b)), the Administrator of FSIS may withhold the use of any marking or labeling that is false or misleading, within the meaning of the FMIA, PPIA, and EPIA and their implementing regulations.

B. Current Prior Label Approval System

Under the current regulations, FSIS evaluates sketches of some labels for approval, and approves others generically, *i.e.,* without submission to FSIS for sketch approval. A sketch label is a printer's proof or other version that clearly shows all required label features, size, location, and indication of final color (9 CFR 412.1(d)). To obtain sketch label approval, domestic meat and poultry establishments, egg product plants, and certified foreign establishments that are eligible to export product to the United States, or their representatives, are required to submit sketch labels to FSIS for evaluation, except when the label is generically approved by the Agency under 9 CFR 412.2.

These firms submit sketch labels accompanied by FSIS Form 7234–1 (11/16/2011), ''Application for Approval of Labels, Marking or Device,'' to the Agency for evaluation. In addition to the required label information, any special claims or statements that the establishment intends to make (*e.g.,* quality claims, animal production raising claims, product origin claims, or nutrient content claims) must be included on the label, along with documentation supporting the claim. The label application must contain the basic information about the establishment and the product, including:

1. Establishment number;
2. Product name;
3. Product formulation;
4. Processing procedures and handling information;
5. Firm name and address;
6. Total available labeling space of the container;
7. Size of the principal display panel; and
8. The Hazard Analysis and Critical Control Point category under which the establishment is producing the meat or poultry product.

FSIS's Labeling and Program Delivery Staff (LPDS), in the Office of Policy and Program Development (OPPD), verifies that sketch labels comply with the applicable requirements. Since July 1, 1996, a final version of a verified sketch label does not have to be submitted to the Agency for evaluation and approval (60 FR 67444, December 29, 1995).[2] All labels are subject to verification for compliance with Agency regulations by FSIS inspectors to ensure that they are accurate, truthful, and not misleading.

C. Generic Label Approval

FSIS allows certain meat, poultry, and egg product labels that bear all required labeling features and that comply with the Agency's labeling regulations to be generically approved (9 CFR 412.2(a)(1)). Generically approved labels do not need to be submitted to FSIS for sketch approval before they can be used on products in commerce. Generic label approval requires that all mandatory label features are prominent and conform to FSIS regulations. Although such labels are not submitted to FSIS for approval, they are deemed to be approved and, therefore, may be applied to product in accordance with the Agency's prior label approval system.

Generic label approval has been in place in some form since 1983. That year, FSIS promulgated regulations that granted limited label approval authority to Inspectors-In-Charge (IICs) at official establishments and provided generic approval to limited types of labels (*e.g.,* labels for raw, single ingredient meat and poultry products) (48 FR 11410, March 18, 1983). The rulemaking's intent was to reduce the number of labels and other materials submitted for FSIS evaluation and to ease the paperwork burden on official establishments.

Even with the changes made by the rule, the number of labels submitted to the Agency continued to grow. During fiscal year 1991, the Agency processed approximately 167,500 labels. Of these, FSIS approved approximately 87,500 final labels and 60,000 sketch labels. FSIS disapproved approximately 20,000 labels.

On December 29, 1995, FSIS published a final rule that outlined the types of labels and modifications to labels that were deemed to be approved without submission to FSIS, provided that the label displayed all mandatory label features in conformance with applicable Federal regulations (60 FR 67444). The following labeling was deemed generically approved in that final rule: Labels on products with a standard of identity specified in FSIS regulations or *Food Standards and Labeling Policy Book*[3] (''*Policy Book*''); labels for raw, single-ingredient products that do not bear special claims; labels for containers of meat and poultry products sold under contract specifications to the Federal Government; labels for shipping containers that contain fully labeled immediate containers; labels for products not intended for human food (*e.g.,* for the pharmaceutical industry) and for poultry heads and feet to be exported for processing as human food, provided specific regulatory requirements are met; meat and poultry inspection legends that comply with 9 CFR parts 312, 316, and 381, subpart M; labeling on inserts, tags, liners, posters, and like devices that are not misleading and do not reference products; labels for consumer test products not intended for sale; and labels that were previously sketch approved by FSIS and contain no modifications or only certain listed modifications.

The 1995 final rule also transferred responsibility for maintaining labeling records from IICs to official establishments in the United States and to foreign establishments certified as meeting U.S. requirements under foreign inspection systems. For labels that still required FSIS review, the final rule removed the requirement that firms submit final labels for FSIS approval; thus, today, firms must only submit

[2] On February 13, 2018 FSIS published the *Egg Products Inspection Regulations* proposed rule (83 FR 6314). If the rule is finalized as proposed, FSIS will also not require submission of final versions of sketch labels for egg products.

[3] Available at: *https://www.fsis.usda.gov/wps/portal/fsis/topics/regulatory-compliance/labeling/Labeling-Policies.*

sketch labels. In the preamble to the 1995 final rule, FSIS stated that it intended to expand generic labeling after it completed an assessment of the modified system (60 FR 67444, 67448).

As explained in the preamble to the 2011 rule, FSIS completed this assessment in 1998 (76 FR 75809, December 5, 2011). FSIS surveyed industry to measure the effects of the generic approval program and sampled 1,513 labels for compliance with Federal regulations and policies. FSIS concluded that the great majority of establishments effectively used generically approved labels and that the gradual implementation of generic label provisions under the 1995 final rule was effective.

In 2011, FSIS published a proposed rule to replace the extensive list of generically approved meat and poultry labeling with a simpler set of label categories required to be submitted for Agency approval. FSIS proposed to require submission of: Labels for temporary approval, labels for products produced under religious exemption, labels for export with labeling deviations, and labeling with special statements and claims (76 FR 75809). FSIS also proposed to combine the label approval regulations for meat and poultry products (9 CFR 317.4 and 381.132) into a new part, 9 CFR part 412.

FSIS finalized the 2011 proposed rule on November 7, 2013 (78 FR 66826). The final rule codified the labeling categories and combined the meat and poultry labeling regulations as proposed. However, upon consideration of comments, FSIS finalized the rule with four changes (78 FR 66826, 66827). First, FSIS decided to continue to review generic labels that establishments voluntarily submit for approval; but, the Agency also made clear that such labels would receive lower review priority than non-generic labels. Second, FSIS clarified that special statements or claims (except for ''natural'' and negative claims) that are defined in FSIS's regulations or in the *Policy Book* are deemed to be generically approved. Third, FSIS determined that a label bearing a child-nutrition (CN) box will not be considered to have a special statement or claim on it that would require sketch approval by FSIS because such information was evaluated for approval by AMS. Finally, the Agency stated that it would no longer add new entries to the *Policy Book;* however, already existing entries may be revised or removed.

In the regulatory text of the 2013 final rule, FSIS stated that it would assess compliance by selecting samples of generically approved labels from establishments [9 CFR 412.2(a)(2)]. Additionally, after the final rule was published, FSIS received questions about the effectiveness of generic approval. To address these concerns and to establish a protocol for the future national assessment, the FSIS Office of Policy and Program Development (OPPD) conducted a limited assessment of labels.

OPPD conducted this assessment over a three-week period in September 2016.[4] Labeling policy experts traveled to five Federal meat and poultry establishments within the commuting area of FSIS headquarters in Washington, DC. Both large and small establishments were visited, including at least one corporation. In each establishment, the labeling policy experts assessed compliance of a representative sample of the generically approved label records on file. At the close of each assessment, the labeling policy experts held a closeout meeting with the FSIS inspection personnel and the establishment management. At this meeting, the labeling policy experts explained any deficiencies, determined if temporary approval was needed for deficient labels, and made recommendations for changes in the establishment's generic label approval and records management process. An assessment summary letter of this closeout meeting was provided to the establishment, inspection personnel, and the FSIS Office of Field Operations District Manager.

This assessment found a high level of compliance with the requirements. During examination of 270 labels, FSIS identified only three labels with deficiencies necessitating label revocation, and none of these deficiencies involved food safety. During the closing meetings with establishments, inspection and industry personnel determined that more outreach would significantly improve compliance. FSIS has initiated more outreach regarding labeling requirements, as discussed later in this document.

On February 13, 2018, FSIS published the proposed rule, *Egg Products Inspection Regulations* (83 FR 6314). This rule proposed several changes to FSIS's egg product inspection program, one of which adopted by reference FSIS's generic label approval regulation into the egg products regulations (9 CFR 590.412). If the rule is finalized as proposed, egg products will be eligible for generic approval of product labels on the same basis as meat and poultry product labels.

II. Proposed Rule

Since the 2013 rulemaking that established the categories of labels requiring sketch approval, FSIS has gained significant, additional experience evaluating labels required to be submitted and approved. From that experience, the Agency has concluded that the current label regulations continue to require industry to submit for approval a significant number of labels that could successfully be generically approved. FSIS is therefore proposing changes to its regulations to reduce the number of labels submitted for evaluation by FSIS and to lessen the paperwork burden on official establishments. The reduction in staff time spent approving these labels would allow the Agency to better focus on other consumer protection and food safety activities, such as developing guidance materials, answering labeling policy questions, providing outreach to stakeholders, and ensuring inspection program personnel (IPP) effectively verify that establishments meet labeling requirements. All labels used at official establishments would still be subject to FSIS verification activities in the field. These activities are further described in the section III. ''Surveillance and Enforcement'' below.

First, FSIS is proposing to extend generic label approval to products only intended for export that deviate from domestic labeling requirements, by removing 9 CFR 412.1(c)(2). FSIS maintains an Export Library that lists requirements for exported products that foreign authorities have officially communicated to FSIS, including labeling requirements.[5] At times, foreign country labeling requirements conflict with domestic requirements. FSIS regulations (9 CFR 317.7 and 381.128) permit export product labels to deviate from FSIS's domestic labeling requirements in order to comply with foreign country requirements or to be marketed more easily in a foreign country.[6] FSIS IPP verify whether product for export meets requirements listed in the Export Library, including

[4] Methodology available at: *https://www.fsis.usda.gov/wps/portal/fsis/topics/regulatory-compliance/labeling/labeling-policies/assessment-generically-approved-label.*

[5] The Export Library is available at: *https://www.fsis.usda.gov/wps/portal/fsis/topics/international-affairs/exporting-products/export-library-requirements-by-country.*

[6] Although there is no specific equivalent regulation for egg products, FSIS follows the same policy because such products, intended exclusively for export, must comply with foreign countries' requirements and are therefore not considered misbranded.

labeling, when certifying products for export. Verification of foreign requirements is ultimately determined by each foreign country's competent authority.

Second, FSIS is proposing to revise the types of ''special statements and claims'' requiring label submission by providing for generic approval of three additional types of claims. FSIS has observed through its prior label approval system that errors, omissions, and misrepresentations are rare on these types of labels. The proposed changes are to be made by amending 9 CFR 412.1(e) and 412.2(b).

The following types of claims would be generically approved:

a. ''Organic'' claims that appear in a product label's ingredients statement, which designate an ingredient as certified ''organic'' under AMS's National Organic Program. The ingredients statement on these product labels designates specific ingredients as organic (*e.g.,* organic garlic). FSIS would no longer require the submission and evaluation of supporting documentation to verify that such ingredients are indeed certified as organic by an AMS-recognized third-party certifier. However, FSIS would continue to require that labels certifying a total product as organic to be submitted for FSIS evaluation.

b. ''Geographic landmarks'' displayed on a product label, such as a foreign country's flag, monument, or map. For example, the following claims displayed on a product label would no longer require sketch approval: A polish flag depicted on a Polish sausage product label, or an outline of the State of Nevada depicted on a product label for beef produced in Nevada.

c. ''Negative'' claims made on product labels that identify the absence of certain ingredients or types of ingredients. For example, statements such as ''No MSG Added,'' ''Preservative Free,'' ''No Milk,'' ''No Pork,'' or ''Made Without Soy,'' on product labels that do not list these ingredients in the ingredients statement would no longer have to be evaluated by FSIS before use. However, FSIS evaluation of labels that bear negative claims relating to the raising of the animal from which the product is derived (*e.g.,* ''no antibiotics administered'') or negative claims relating to the use of genetically modified ingredients would continue to be required.

Third, FSIS is proposing to permit generic approval of the labels of products that receive voluntary FSIS inspection. FSIS provides several types of voluntary inspection services under the authority of the Agricultural Marketing Act (AMA) (7 U.S.C. 1621 *et seq.*), including inspection for: Rabbits (9 CFR part 354), certain non-amenable species of livestock and poultry animals, such as elk, bison, and migratory water fowl (9 CFR part 352, subpart A, and 9 CFR part 362); and products containing meat or poultry but are not under FSIS jurisdiction, *e.g.,* closed-faced sandwiches (9 CFR 350(c)). At present, labels for some products produced under these voluntary inspection programs are not covered under the Agency's generic approval regulations at 9 CFR 412. FSIS is proposing to permit generic approval for them on the same basis as amenable meat, poultry, and egg products by amending the relevant program regulations where needed to include references to 9 CFR part 412.[7] For clarity, FSIS will also modify 9 CFR 352.1 to update the section heading and remove unnecessary language.

Finally, FSIS is proposing to cease evaluating generically approved labels submitted voluntarily to LPDS for review. In the 2013 rulemaking that expanded the categories of labels eligible for generic approval, commenters requested to be allowed to continue submitting generic labels for FSIS guidance, evaluation, and approval. FSIS agreed to continue evaluating generic labels that were submitted, giving such labels secondary priority after labels requiring evaluation. Since the 2013 final rule, producers have become more familiar with FSIS's generic labeling requirements, and FSIS has provided additional guidance to assist them in designing compliant labels. Therefore, FSIS's evaluation of otherwise generic labels no longer represents an efficient use of Agency resources.

Comprehensive labeling guidance, including the *FSIS Compliance Guideline for Label Approval,*[8] is available at FSIS's website.[9] Information available includes a PowerPoint presentation titled ''Labeling 101,'' [10] which is used by the Agency as a teaching tool at workshops on meat and poultry label requirements. FSIS also provides guidance on allergen labeling and nutrition labeling,[11] a Label Submission Checklist,[12] a glossary of meat and poultry labeling terms,[13] the *Policy Book,* and questions and answers on various topics, such as generic approval, and the labeling of ingredients.[14]

FSIS will continue to conduct outreach to assist label submitters with labeling compliance in the form of webinars, industry group meetings, training for inspectors, guidance documents published on the FSIS website, and archived public askFSIS questions. Additionally, FSIS provides significant resources to assist label submitters on labels that require FSIS approval prior to use. These include askFSIS, a web portal that allows industry, IPP, and other stakeholders to submit technical and policy-related questions directly to OPPD.[15] Establishments may also contact FSIS for assistance with labeling questions. FSIS offers resources to assist small and very small plants, including the Small Plant Help Desk, which may be contacted by phone or email and answers questions on FSIS requirements.[16]

In June 2020, the USDA Office of Inspector General (OIG) concluded an audit of FSIS product labeling oversight (OIG audit #24601–0002–23, ''Controls Over Meat, Poultry, and Egg Product Labels'').[17] In response to the audit recommendations concerning FSIS oversight of generic labeling, the Agency agreed that it would continue to enhance its outreach efforts to ensure establishments are aware of applicable mandatory labeling features for generic

[7] The regulations providing for voluntary inspection of non-FSIS-jurisdiction products that contain meat or poultry (9 CFR 350(c)) and products containing non-amenable species of poultry (9 CFR part 362) already adopt 9 CFR part 412 by reference. For this reason, FSIS does not need to make additional regulatory changes to these parts in order to permit generic approval of labels for products receiving these services.

labels. FSIS also agreed to update its internal policies to improve IPP label verification activities. Such verification activities are described in section III. ''Surveillance and Enforcement'' below. FSIS does not believe that the audit's findings or FSIS's responses to the audit affect this proposal.

III. Surveillance and Enforcement

Official establishments are required to label meat, poultry, and egg products with labels that are neither false nor misleading and that comply with FSIS's regulations. This is true whether the labels require sketch approval or may be generically approved. Establishments are required to keep records of all labels in accordance with 9 CFR 320.1(b)(10) for meat products, 9 CFR 381.175(b)(6) for poultry products, and 9 CFR 590.200(c) for egg products. These records must include a copy of the final label, the product formulation, processing procedures, and any supporting documentation needed to show that the label complies with the Federal meat, poultry, and egg regulations. Such records must be made available to any duly authorized representative of the Secretary upon request (9 CFR 320.4 and 590.200(b)).

IPP periodically perform a General Labeling Task assigned through FSIS's Public Health Inspection System (PHIS) as part of their regular label verification activities. This task is described in FSIS Directive 7221.1, *Prior Labeling Approval.* It includes verifying that establishments maintain records of the selected labels in accordance with 9 CFR 320.1(b)(10), 381.175(b)(6), and 590.200(c). IPP also verify that final labels applied to product contain all mandatory labeling features and are otherwise in compliance with the applicable regulations by evaluating establishments' labeling records and the labels themselves (*e.g.,* to verify that the ingredients statement on the label matches the product formula).

IPP document in PHIS any noncompliance found, *e.g.,* if a required labeling feature is missing or if a label requires LPDS evaluation but such evaluation is not documented in the records.[18] Establishments may take corrective action by obtaining label approval through LPDS, bringing the labels into compliance with a pressure sensitive sticker, or by replacing the noncompliant labels with labels that have received prior approval and are in compliance with FSIS's regulations. Final labels that are not in compliance with the regulations may still be granted temporary approval under the conditions listed in 9 CFR 412.1(f). IPP will retain any product bearing a label not in compliance with regulatory requirements as well as those that require, but have not received, LPDS approval. Pursuant to 9 CFR 500.8, FSIS may rescind approval of any false or misleading labels.[19]

FSIS relies on these verification tasks, in addition to evaluation by LPDS, to ensure that meat, poultry, and egg product labels are truthful and not misleading. Designating some product labels as generically approved, while maintaining inspection activities for all labels, promotes the effective use of Agency resources. This expansion of generic label approval will not affect consumer protection because FSIS will continue to evaluate labeling that has consumer safety or economic implications, *e.g.,* special statements and claims and requests for temporary approval. For example, FSIS will continue to review labeling that claims product is organic or all natural, makes statements regarding the raising of the animals from which products were derived, displays nutrition factual statements (*e.g.,* 10 g protein per serving) on the label, or includes certified claims (*e.g.,* ''Certified Gluten Free'') on the label.[20]

FSIS invites public comment on these proposed changes and requests data and additional suggestions for ways to make FSIS's generic labeling program more effective and efficient. FSIS considered three alternatives to this proposal: Taking no action; the proposed rule, except industry would still have the option to have LPDS evaluate labels that would otherwise be generically approved; and allowing all labels to be generically approved. Although FSIS ultimately decided on the current proposal, the Agency will continue to consider the alternatives described below (under the section titled ''Alternative Regulatory Approaches'') based on the information received.

IV. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This proposed rule has been designated a ''significant'' regulatory action under section 3(f) of E.O. 12866. Accordingly, the rule has been reviewed by the Office of Management and Budget under E.O. 12866.

Need for the Rule

The proposed rule would expand the types of meat, poultry and egg product labels that can be generically approved by FSIS. This would reduce the number of labels evaluated by FSIS and reduce the costs to industry. The labels submitted for FSIS evaluation are becoming more complex and more time-consuming for industry to prepare and for FSIS to evaluate. The proposed rule would improve the efficiency of the label approval system by expanding generic labeling and making the system more convenient and cost efficient for the industry. This proposed rule also would enhance market efficiency by promoting a faster introduction of new products into the marketplace to meet consumer demand.

Baseline

Based on FSIS's Label Submission and Approval System (LSAS)[21] data, FSIS evaluated 15,459 unique labels during the 2019 fiscal year (FY). Of these, 5,229 (33.8 percent) would have been generically approved under the proposed rule. This amount (5,229) includes 632 labels currently eligible for generic approval, which firms voluntarily submitted for FSIS review. Many of the 15,459 labels were evaluated by FSIS more than once because they were returned to the producer to primarily make other types of corrections and then resubmitted for FSIS evaluation. FSIS has observed through its prior label approval system that corrections on the types of claims FSIS is proposing to generically approve are rare. In FY 2019, there were 26,158

[18] If IPP are not performing the General Labeling task but observe a product label that is not in compliance with Federal meat and poultry regulations, they will initiate a directed General Labeling task, retain affected product, and document the noncompliance in PHIS as described above.

[19] If FSIS rescinds or refuses to approve a label, it must explain its reasoning in a written notice, provide an opportunity for the establishment to modify the label, and advise the establishment of its appeal rights (9 CFR 500.8(b)).

[20] For an extensive list of labeling that requires FSIS approval, see the *FSIS Compliance Guideline for Label Approval.* Available at: *https://www.fsis.usda.gov/wps/wcm/connect/bf170761-33e3-4a2d-8f86-940c2698e2c5/Label-Approval-Guide.pdf?MOD=AJPERES.*

[21] FSIS's Label Submission and Approval System (LSAS) is a web-based software application that integrates and implements an electronic label application process for establishments to submit label applications to FSIS.

label adjudications, which included each time a label was evaluated. See Table 2 below for additional details.

each time a label was evaluated. See Table 2 below for additional details.

TABLE 2—LABEL EVALUATIONS AND ADJUDICATIONS, FY 2016–2019

[Pre proposed rule]

FSIS labels	2016	2017	2018	2019
Labels FSIS Would Not have Evaluated Under the Proposed Rule	8,534	5,812	6,025	5,229
Total Labels FSIS Evaluated *	22,846	17,958	17,635	15,459
Total Label Adjudications **	30,857	25,125	27,580	26,158

* This is the total number of labels FSIS evaluated, including the labels that would have been generically approved under the proposed rule.
** Label adjudications include some labels being revaluated.

FSIS expanded the types of labels and label changes that may be generically approved several times, starting in 1983 when the Agency evaluated 130,000 labels. In 1991, the number of labels evaluated peaked at 167,500. The 1995 final rule (60 FR 67444) amended the prior label approval process by expanding the types of labels and label changes that may be generically approved. From 2003–2010, the number of label adjudication per year averaged 57,457, with a minimum of 43,255 in 2003 and a maximum of 66,061 in 2010. The 2013 final rule (78 FR 66826, November 7, 2013) further expanded generic labeling, decreasing the number of label adjudications to 30,857 in FY 2016 (Table 2). FSIS also proposed to permit generic approval for certain egg product labels in 2018 (83 FR 6314, February, 13, 2018).

The number of FSIS label adjudications decreased after the expansions of generically approved labels. However, the remaining label submissions after each expansion are more time-consuming for industry to prepare and for FSIS to evaluate. This is because the labels requiring submission after each expansion are generally more complex, with special statements or claims that require FSIS to evaluate a significant amount of supporting documentation.

Expected Costs of the Proposed Rule

The proposed rule would not impose any new cost on producers that submit labels for FSIS evaluation. Instead, the proposed rule would reduce the regulatory burden on producers that currently submit labels for evaluation and does not change the recordkeeping requirements. Producers already are using generically approved labels and maintaining all labeling records, and thus are experienced in submitting labels for FSIS evaluation.

Expected Benefits of the Proposed Rule Industry Impacts

Industry would realize cost savings from the reduction in FSIS label submissions under the proposed rule. Industry is required to use FSIS Form 7234–1 (OMB control number: 0583–0092) for the initial FSIS label submission. The estimated time to complete this form is 75 minutes per response, which includes reviewing instructions, searching existing data sources, gathering and maintaining the data needed (recordkeeping), and completing and reviewing the collection of information.[22] FSIS estimates 15 minutes of the 75 minutes are dedicated to recordkeeping. The recordkeeping time is not included in the proposed rule's regulatory impact analysis because the recordkeeping requirements are not changing under the proposed rule; that is, even if the establishment does not need to submit the label to FSIS, the establishment is still required to maintain records to support the label. Therefore, the average industry time to prepare one label submission for FSIS evaluation is 60 minutes (75 minutes − 15 minutes). FSIS also assumed food scientists and technologists would perform this work at a mean hourly wage of $36.63.[23] A benefits and overhead factor of two[24] was applied to estimate the total labor cost per label submission of $73.26.

To determine the annual reduction of label submissions, FSIS relied on the average number of labels that FSIS would not have evaluated under the proposed rule from 2016 to 2019, which was 6,400 labels, ((8,534 + 5,812 + 6,025 + 5,229)/4), Table 2. Accordingly, FSIS estimates a decrease of 64,000 label evaluations over 10 years under the proposed rule (6,400 * 10). As shown in Table 3, FSIS estimates that industry would realize a discounted cost savings of $3,293,105 (at a 7 percent discount rate) and $3,999,505 (at a 3 percent discount rate) by FSIS generically approving an additional 64,000 labels over a 10-year period. The cost savings would be $468,864 when annualized at the 7 and 3 percent discount rate, over 10 years.

TABLE 3—ESTIMATED INDUSTRY COST SAVINGS

[2019 Dollars]

Total industry cost savings from reduced need for FSIS label evaluation	Present value cost savings at 7%	Present value cost savings at 3%
Total over 10 years	$3,293,105	$3,999,505
Annualized total over 10 years	468,864	468,864

[22] FSIS Form 7234–1 Application for Approval of Labels, Marking or Device. Last modified 11/16/2011. Available at: *https://www.fsis.usda.gov/wps/portal/fsis/forms/*.

[23] BLS Occupational Employment Statistics, Occupational Employment and Wages, May 2019. 19–1021 Food Scientists and Technologists. <*https://www.bls.gov/news.release/pdf/ocwage.pdfoes/current/oes191012.htm#nat*> Accessed on 4/30/2020. Last Modified 03/30/2020.

[24] To be consistent with analyses done by the Department of Health and Human Services, this analysis accounts for fringe benefits and overhead by multiplying wages by a factor of 2.

Agency Impacts

During FY 2019, FSIS employed 14 labeling analysts in LPDS with an average hourly salary of $64.75 (($47.52 * 36.25%) + 47.52 = $64.75 for a GS–13 step 1,[25] with an adjusted benefits factor of 36.25 percent).[26] On average, LPDS analysts evaluate labels four hours per day, five days a week, at a cost of $18,130 per week. If the proposed rule is adopted, LPDS analysts would evaluate labels for three hours per day, five days a week, at a cost of $13,598 per week, because of the reduction in labels submitted to FSIS.

If this proposed rule is adopted, the Agency would realize a discounted cost savings of $1,655,388 (at a 7 percent discount rate) and $2,010,484 (at a 3 percent discount rate) for adjudicating fewer labels over a 10-year period. The cost savings would be $235,690 when annualized at the 7 and 3 percent discount rate over 10 years. See Table 4 for additional details. However, this cost savings from fewer staff hours dedicated towards adjudicating labels would be redirected towards other Agency priority initiatives, such as developing and updating policy and guidance documents, answering questions from askFSIS and other sources, and performing outreach activities. We also anticipate an overall faster label review process from the decline in LPDS label evaluations. This would allow new labels to enter the market faster.

TABLE 4—ESTIMATED AGENCY COST SAVINGS

[2019 Dollars]

Total agency cost savings from reduced need for FSIS label evaluation	Present value cost savings at 7%	Present value cost savings at 3%
Total over 10 years	$1,655,388	$2,010,484
Annualized total over 10 years	235,690	235,690

Net Benefits

This proposed rule would be net beneficial because it would reduce the costs to establishments, from submitting fewer labels for FSIS evaluation, while imposing no additional cost burden. The net benefit derived from the proposed rule is estimated to be $4,948,493 ($3,293,105 in establishment savings plus $1,655,388 in Agency savings) discounted at the 7 percent discount rate over a 10-year period. When annualized at the 7 percent discount rate over 10 years, the net cost savings is estimated to be $704,554. See Table 5 for details.

TABLE 5—ESTIMATED AGENCY COST SAVINGS

[2019 Dollars]

Total agency and industry cost savings from reduced need for FSIS label evaluation	Present value cost savings at 7%	Present value cost savings at 3%
Total over 10 years	$4,948,493	$6,009,989
Annualized total over 10 years	704,554	704,554

Alternative Regulatory Approaches

The Agency considered three alternatives to the proposed rule. The proposed rule was chosen as the least burdensome regulatory approach. The summary of the costs and benefits for the considered alternatives are outlined in Table 6 below.

TABLE 6—REGULATORY ALTERNATIVES CONSIDERED

Alternative	Benefits	Costs	Net benefit
(1) Take No Action	No Benefit	No potential industry or Agency cost savings.	Net benefits are less than alternative 3.
(2) The Proposed Rule, Except Industry Would Still Have the Option to Have LPDS Evaluate Labels that Would Otherwise be Generically Approved.	Industry could benefit from additional FSIS evaluation.	Potential for inefficient use of Agency resources. Industry would also incur costs of submitting the labels and waiting for FSIS evaluation.	Net benefits are less than alternative 3. Although industry could marginally benefit from additional FSIS evaluation, sufficient guidance is available for labels that can be generically approved. Also, industry and the Agency would incur costs from submitting and evaluating such labels.

[25] Salary Table 2019–DCB for the locality pay area of Washington-Baltimore-Arlington, DC-MD-VA-WV-PA. Effective January 2019. Available at: *https://www.opm.gov/policy-data-oversight/pay-leave/salaries-wages/salary-tables/pdf/2019/DCB_h.pdf.*

[26] Nussle, Jim. (2008). M–08–13: MEMORANDUM FOR THE HEADS OF EXECUTIVE DEPARTMENTS AND AGENCIES. Executive Office of the President. Available at: *https://www.whitehouse.gov/sites/whitehouse.gov/files/omb/memoranda/2008/m08-13.pdf.*

TABLE 6—REGULATORY ALTERNATIVES CONSIDERED—Continued

Alternative	Benefits	Costs	Net benefit
(3) The Proposed Rule	Potential industry cost savings of $468,864 and Agency cost savings of $235,690, annualized at the 7 percent discount rate over 10 years.	No Cost	Net benefits are $704,554 annualized at the 7 percent discount rate over 10 years.
(4) Allow All FSIS Labels to be Generically Approved.	The Agency and industry would benefit from time savings by eliminating FSIS label evaluation.	Costs include potentially increasing the number of misbranded products.	Net benefits are less than alternative 3 as the potential costs of misbranded products from eliminating FSIS label evaluation outweighs the time savings benefit.

Alternative 1—No Action (Baseline)

FSIS considered keeping the current regulations and taking no action. Taking no action would mean that industry and the Agency would not experience costs savings from the reduction of labels submitted for FSIS evaluation under the proposed rule. Industry would therefore not realize the estimated reduction of 64,000 label submissions over 10 years and would not experience an annualized cost savings of $468,864 at the 7 percent discount rate over 10 years. The Agency would not experience time savings from the reduction of label evaluations. Therefore, the Agency rejects this alternative.

Alternative 2—The Proposed Rule, Except Industry Would Still Have the Option To Have LPDS Evaluate Labels That Would Otherwise be Generically Approved

FSIS considered an alternative of proposing the same generically approved label categories except FSIS would continue to evaluate those labels that would otherwise be generically approved. Currently, industry can submit labels that can be generically approved for voluntary FSIS evaluation, although this evaluation is not needed prior to entering the market. When industry submits these types of labels for voluntary FSIS evaluation, they are reviewed with a lower priority than other labels, and thus take more time for FSIS to approve. Although industry may marginally benefit from the additional FSIS evaluation, the process is inefficient and raises unnecessary costs. Industry could more quickly get FSIS assistance on these types of labels through other guidance, such as askFSIS.

In addition, FSIS would have to take the time to process and evaluate these labels, when reviewer time could be spent on higher priorities, such as food safety and policy related issues (*e.g.,* concerning allergens). Industry would also incur costs in preparing and submitting the labels for FSIS evaluation while they could get FSIS help through other outlets without incurring these expenses. For these reasons, FSIS rejects this alternative.

Alternative 3—The Proposed Rule

The proposed rule yields cost savings for both the industry and the Agency. There is no additional cost burden from the proposed rule. The potential cost savings for industry is $468,864, annualized at the 7 percent discount rate over 10 years. This covers the time industry saves from not preparing and submitting the labels for FSIS evaluation.

The potential cost savings for FSIS is $235,690, annualized at the 7 percent discount rate over 10 years. This covers the time FSIS saves from not evaluating the proposed generically approved labels. Since there is no additional burden for this proposed rule, FSIS determined this to be the preferred alternative.

Alternative 4—All Labels Are Generically Approved

FSIS also considered an alternative that would allow all labels to be generically approved, requiring no prior approval by FSIS. This alternative may increase the number of misbranded products going into commerce, as LPDS would no longer verify the information on complex labels. An increase in misbranded products that contain incorrect, false, or misleading information may result in a loss of consumer confidence in information on food labels. There is also cost associated with discarding and reprinting misbranded labels that the industry may suffer. Therefore, FSIS believes the labels that would still require prior evaluation under the proposed rule, such as labels with animal raising or natural claims, benefit from LPDS evaluation due to the complex nature and need for supporting documentation of these claims.

This alternative would yield time savings for industry from no longer preparing and submitting labels for FSIS evaluation. FSIS would also experience time savings from no longer evaluating these labels. However, the potential costs of misbranded products entering commerce, resulting from the elimination of all LPDS label evaluation, would outweigh the benefits of the time savings.

V. Regulatory Flexibility Act Assessment

The FSIS Administrator has made a preliminary determination that this proposed rule would not have a significant economic impact on a substantial number of small entities in the United States, as defined by the Regulatory Flexibility Act (5 U.S.C. 601). This determination was made because small producers would experience costs savings from the reduced number of label submissions for FSIS evaluation.

Based on LSAS and the Public Health Information System (PHIS) [27] data, FSIS estimates 92.3 percent (4,825/5,229) of the label submissions in 2019, which would have been generically approved under the proposed rule, are from small or very small Hazard Analysis and Critical Control Point (HACCP) sized establishments. Under the HACCP size definitions, large establishments have 500 or more employees and small establishments have fewer than 500 but more than 10 employees. Very small establishments have fewer than 10 employees or annual sales of less than $2.5 million. Small and very small establishments, like large establishments, follow the same standards for generic and sketch approval of labels. Small and very small producers, therefore, would not be disadvantaged because the proposed

[27] PHIS is FSIS's electronic data analytic system, used to collect, consolidate, and analyze data in order to improve public health.

rule would minimize the regulatory burden on all producers.

Based on 2019 LSAS data, about 12 percent (627/5,229) of labels that would have been generically approved under the proposed rule, were submitted from 19 label consultant firms. These firms are very small, usually having one to four employees. Many of these firms provide a range of services, including label courier services, label consultation and regulatory compliance, or label design. This proposed rule may impact their label courier business. However, the impact on these firms is small as their other business, such as label consultations, would not be affected. Therefore, this proposed rule would not have a significant economic impact on the small label consultant firms.

VI. Executive Order 13771

Consistent with E.O. 13771 (82 FR 9339, February 3, 2017), FSIS has estimated that this proposed rule would yield cost savings. Assuming a 7 percent discount rate, a perpetual time horizon, and a starting year of 2021, the proposed rule, if finalized, is estimated to yield approximately $502,337 (2016$) in annual cost savings. Therefore, if finalized as proposed, this rule would be an E.O. 13771 deregulatory action.

VII. Paperwork Reduction Act

FSIS has reviewed the paperwork and recordkeeping requirements in this proposed rule in accordance with the Paperwork Reduction Act (44 U.S.C. 3501, *et seq.*). The Administrator has determined that the proposed rule would not create any additional collection, paperwork, or recordkeeping burdens.

FSIS is proposing to expand the circumstances under which it will generically approve the labels of meat, poultry, and processed egg products. Under this final rule, more official and foreign establishments will be able to use the generic approval of product labels. As a result, fewer labels will need to be submitted and evaluated by FSIS. The relevant information collection, 0583–0092, Marking, Labeling, and Packaging, will have a net reduction of 6,400 burden hours because of the increased use of generic labeling.

VIII. E-Government Act

FSIS and USDA are committed to achieving the purposes of the E-Government Act (44 U.S.C. 3601, *et seq.*) by, among other things, promoting the use of the internet and other information technologies and providing increased opportunities for citizen access to Government information and services, and for other purposes.

IX. Executive Order 12988, Civil Justice Reform

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. Under this rule: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) no administrative proceedings will be required before parties may file suit in court challenging this rule.

X. Executive Order 13175, Consultation and Coordination With Indian Tribal Governments

This rule has been reviewed in accordance with the requirements of Executive Order 13175, Consultation and Coordination with Indian Tribal Governments. Executive Order 13175 requires Federal agencies to consult and coordinate with tribes on a government-to-government basis on policies that have tribal implications, including regulations, legislative comments or proposed legislation, and other policy statements or actions that have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes or on the distribution of power and responsibilities between the Federal Government and Indian tribes.

The USDA's Office of Tribal Relations (OTR) has assessed the impact of this rule on Indian tribes and determined that this rule does not to our knowledge, have tribal implications that require tribal consultation. If a tribe requests consultation, FSIS will work with the OTR to ensure meaningful consultation is provided where changes, additions, and modifications identified herein are not expressly mandated by Congress.

XI. USDA Non-Discrimination Statement

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs). Remedies and complaint filing deadlines vary by program or incident.

How To File a Complaint of Discrimination

To file a complaint of discrimination, complete the USDA Program Discrimination Complaint Form, which may be accessed online at *http://www.ocio.usda.gov/sites/default/files/docs/2012/Complain_combined_6_8_12.pdf,* or write a letter signed by you or your authorized representative.

Send your completed complaint form or letter to USDA by mail, fax, or email:

Mail: U.S. Department of Agriculture, Director, Office of Adjudication, 1400 Independence Avenue SW, Washington, DC 20250–9410.

Fax: (202) 690–7442.

Email: program.intake@usda.gov.

Persons with disabilities who require alternative means for communication (Braille, large print, audiotape, etc.), should contact USDA's TARGET Center at (202) 720–2600 (voice and TDD).

XIII. Environmental Impact

Each USDA agency is required to comply with 7 CFR part 1b of the Departmental regulations, which supplements the National Environmental Policy Act regulations published by the Council on Environmental Quality. Under these regulations, actions of certain USDA agencies and agency units are categorically excluded from the preparation of an Environmental Assessment (EA) or an Environmental Impact Statement (EIS) unless the agency head determines that an action may have a significant environmental effect (7 CFR 1b.4(b)). FSIS is among the agencies categorically excluded from the preparation of an EA or EIS (7 CFR 1b.4(b)(6)).

FSIS has determined that this proposed rule, which would refine the Agency's existing label approval program, will not create any extraordinary circumstances that would result in this normally excluded action having a significant individual or cumulative effect on the human environment. Therefore, this action is appropriately subject to the categorical exclusion from the preparation of an environmental assessment or environmental impact statement provided under 7 CFR 1b.4(6) of the U.S. Department of Agriculture regulations.

XIII. Congressional Review Act

Pursuant to the Congressional Review Act at 5 U.S.C. 801 *et seq.,* the Office of Information and Regulatory Affairs has determined that this document is not a ''major rule,'' as defined by 5 U.S.C. 804(2).

XIV. Additional Public Notification

Public awareness of all segments of rulemaking and policy development is important. Consequently, FSIS will announce this **Federal Register** publication on-line through the FSIS web page located at: *http://www.fsis.usda.gov/federal-register.*

FSIS will also announce and provide a link to it through the FSIS *Constituent Update,* which is used to provide information regarding FSIS policies, procedures, regulations, **Federal Register** notices, FSIS public meetings, and other types of information that could affect or would be of interest to our constituents and stakeholders. The *Constituent Update* is available on the FSIS web page. Through the web page, FSIS is able to provide information to a much broader, more diverse audience. In addition, FSIS offers an email subscription service which provides automatic and customized access to selected food safety news and information. This service is available at: *http://www.fsis.usda.gov/subscribe.* Options range from recalls to export information, regulations, directives, and notices. Customers can add or delete subscriptions themselves and have the option to password protect their accounts.

List of Subjects

9 CFR Part 352

Food labeling, Meat inspection, Reporting and recordkeeping requirements.

9 CFR Part 354

Administrative practice and procedure, Animal diseases, Food labeling, Meat inspection, Rabbits and rabbit products, Reporting and recordkeeping requirements, Signs and symbols.

9 CFR Part 412

Food labeling, Food packaging, Meat and meat products, Meat inspection, Poultry and poultry products, Reporting and recordkeeping requirements.

For the reasons set forth in the preamble, FSIS is proposing to amend 9 CFR Chapter III as follows:

PART 352—EXOTIC ANIMALS AND HORSES; VOLUNTARY INSPECTION

■ 1. The authority citation for part 352 continues to read as follows:

Authority: 7 U.S.C. 1622, 1624; 7 CFR 2.17(g) and (i), 2.55.

■ 2. In § 352.7:

■ a. Revise the section heading;

■ b. Remove from the introductory text the phrase ''Wording and form of inspection mark.''; and

■ c. Add a sentence at the end of the introductory text.

The revision and addition read as follows:

§ 352.7 Marking and labeling of inspected products.

* * * * *

All labels intended for use on inspected and passed exotic animal products must be approved in accordance with Part 412 of this chapter.

* * * * *

PART 354—VOLUNTARY INSPECTION OF RABBITS AND EDIBLE PRODUCTS THEREOF

■ 3. The authority citation for part 354 continues to read as follows:

Authority: 7 U.S.C. 1622, 1624; 7 CFR 2.17(g) and (i), 2.55.

■ 4. Revise § 354.60 to read as follows:

§ 354.60 Approval of official identification.

All labels intended for use on inspected and passed rabbit products which bear any official identification must be approved in accordance with Part 412 of this chapter.

PART 412—LABEL APPROVAL

■ 5. The authority citation for part 412 continues to read as follows:

Authority: 21 U.S.C. 451–470, 601–695; 7 CFR 218, 2.53.

■ 6. In § 412.1, remove and reserve paragraph (c)(2) and revise paragraph (e) to read as follows:

§ 412.1 Label approval.

* * * * *

(e) ''Special statements and claims'' are statements, claims, logos, trademarks, and other symbols on labels as defined in this paragraph.

(1) The following are considered special statements and claims:

(i) Those not defined in the Federal meat and poultry products inspection regulations or the Food Standards and Labeling Policy Book;

(ii) ''Natural'' claims, regardless of whether they are defined in the Food Standards and Labeling Policy Book.

(iii) Health claims (including graphic representations of hearts), ingredient and processing method claims (*e.g.,* high-pressure processing), structure-function claims, claims regarding the raising of animals (*e.g.,* ''no antibiotics administered''), products labeled as organic (except for those where only individual ingredients are labeled as organic), and instructional or disclaimer statements concerning pathogens (*e.g.,* ''for cooking only'' or ''not tested for E. coli O157:H7'').

(2) The following are not considered special statements and claims:

(i) Allergen statements (*e.g.,* ''contains soy'') applied in accordance with the Food Allergen Labeling and Consumer Protection Act.

(ii) Negative claims regarding ingredients not listed in the ingredients statement (*i.e.,* ''No MSG Added,'' ''Preservative Free,'' ''No Milk,'' ''No Pork,'' or ''Made Without Soy'').

(iii) Statements that characterize a product's nutrient content in compliance with Title 9 of the CFR, such as ''low fat.''

(iv) Claims related to geographical significance, such as ''German Brand Made in the US,'' or those that make a country of origin statement on the label of any meat or poultry product ''covered commodity,'' or displays of geographic landmarks, such as a foreign country's flag, monument, or map.

* * * * *

■ 7. Revise § 412.2(b) to read as follows:

§ 412.2 Approval of generic labels.

* * * * *

(b) Generically approved labels are labels that bear all applicable mandatory labeling features (*i.e.,* product name, handling statement, ingredients statement, the name and place of business of the manufacturer, packer or distributor, net weight, legend, safe handling instructions, and nutrition labeling) in accordance with Federal regulations and do not bear special statements and claims as defined in paragraph 412.1(e) of this part.

Done at Washington, DC.

Paul Kiecker,

Administrator.

[NRC–2017–0227]

RIN 3150–AK19

Physical Security for Advanced Reactors

AGENCY: Nuclear Regulatory Commission.

ACTION: Preliminary proposed rule language; notice of availability.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is making preliminary proposed rule language for the Alternative Physical Security Requirements for Advanced Reactors rulemaking available to the public. The NRC is not requesting public comment at this time; however, the public will have an opportunity to provide comment when the proposed rule is published in the future.

DATES: The preliminary proposed rule language is available on September 14, 2020.

ADDRESSES: Please refer to Docket ID NRC–2017–0227 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

• *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2017–0227. Address questions about NRC docket IDs to Carol Gallagher; telephone: 301–415–3463; email: *Carol.Gallagher@nrc.gov.* For technical questions, contact the individuals listed in the **FOR FURTHER INFORMATION CONTACT** section of this document.

• *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* The preliminary proposed rule language is available in ADAMS under Accession No. ML20182A157.

• *Attention:* The Public Document Room (PDR), where you may examine and order copies of public documents is currently closed. You may submit your request to the PDR via email at *PDR.Resource@nrc.gov* or call 1–800–397–4209 between 8:00 a.m. and 4:00 p.m. (EST), Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Dennis Andrukat, Office of Nuclear Material Safety and Safeguards, telephone: 301–415–3561, email: *Dennis.Andrukat@nrc.gov;* or Nanette Valliere, Office of Nuclear Reactor Regulation, telephone: 301–415–8462, email: *Nanette.Valliere@nrc.gov.* Both are staff of the U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001.

SUPPLEMENTARY INFORMATION: The preliminary proposed rule language has been revised from the version provided in support of an April 22, 2020 public meeting. The revisions address NRC consideration of public comments received during and after the April 22, 2020, public meeting. The preliminary proposed rule language is available in ADAMS under Accession No. ML20182A157. For more information, see the public meeting summary at ADAMS Accession No. ML20189A274.

The NRC is not requesting public comment at this time; however, the public will have an opportunity to provide comment when the proposed rule is published in the **Federal Register** in the future.

Dated September 3, 2020.

For the Nuclear Regulatory Commission.

Ho K. Nieh,

Director, Office of Nuclear Reactor Regulation.

Federal Acquisition Regulation: Protecting Life in Global Health Assistance

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: DoD, GSA, and NASA are proposing to amend the Federal Acquisition Regulation (FAR) to implement the Protecting Life in Global Health Assistance policy in connection with the Presidential Memorandum regarding ''The Mexico City Policy,'' dated January 23, 2017.

DATES: Interested parties should submit written comments at the address shown below on or before November 13, 2020 to be considered in the formation of the final rule.

ADDRESSES: Submit comments in response to FAR Case 2018–002 to *Regulations.gov: http://www.regulations.gov.* Submit comments via the Federal eRulemaking portal by searching for ''FAR Case 2018–002''. Select the link ''Comment Now'' that corresponds with ''FAR Case 2018–002''. Follow the instructions provided at the ''Comment Now'' screen. Please include your name, company name (if any), and ''FAR Case 2018–002'' on your attached document. If your comment cannot be submitted using *https://www.regulations.gov,* call or email the points of contact in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions. Instructions: Please submit comments only and cite ''FAR case 2018–002'' in all correspondence related to this case. Comments received generally will be posted without change to *http://www.regulations.gov,* including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check *www.regulations.gov,* approximately two to three days after submission to verify posting.

FOR FURTHER INFORMATION CONTACT: *Farpolicy@gsa.gov* or call 202–969–4075. Please cite ''FAR Case 2018–002''.

SUPPLEMENTARY INFORMATION:

I. Background and Authority

A. Background

DoD, GSA, and NASA are proposing to revise the FAR to implement the Presidential Memorandum regarding ''The Mexico City Policy'', issued on January 23, 2017. This Presidential Memorandum reinstated the 2001 Presidential Memorandum on the ''Mexico City Policy,'' and directed the Secretary of State, in coordination with the Secretary of Health and Human Services, to implement a plan to extend the requirements of the Mexico City Policy to ''global health assistance furnished by all departments or agencies'' to the extent allowable by law.

The Mexico City Policy was first issued by President Reagan in 1984 and required foreign nongovernmental organizations (NGOs) to agree, as a condition of receiving U.S. Agency for International Development (USAID) family planning assistance, not to perform or actively promote abortion as a method of family planning with any source of funds. Under the Mexico City Policy, U.S. NGOs did not themselves have to agree that they would not perform or actively promote abortion as a method of family planning, but they were required to flow down the policy's requirements to foreign NGOs receiving family planning assistance under their awards. The Mexico City Policy was rescinded by President Clinton in 1993, reinstated by President Bush in 2001, and rescinded by President Obama in 2009. When in effect previously, the Mexico City Policy's requirements only applied to USAID family planning assistance and, from 2003–2009, to certain State Department activities; and it only applied to Federal assistance and not contracts.

To extend the Mexico City Policy as directed under the January 23, 2017, Presidential Memorandum, the Secretary of State approved on May 9, 2017, a plan to implement the manner in which U.S. Government Departments and Agencies will apply the provisions of the Mexico City Policy to foreign NGOs that receive U.S. funding for global health assistance. The plan, called ''Protecting Life in Global Health Assistance'' (PLGHA), expanded the application of the Mexico City Policy in three respects, to the extent allowable by law. First, it extended the policy to all affected Federal agencies. Second, it extended the policy to all global health assistance. Third, it required the extension of the policy to contracts in addition to Federal assistance. Each of these points is addressed further below. The PLGHA policy applies to foreign NGOs (including contractors); U.S. entities are not subject to the specific policy requirement not to perform or actively promote abortion as a method of family planning with any source of funds, but they must agree to flow down the policy requirements to foreign NGOs in accordance with the terms and conditions of their contracts.

1. Affected Federal Agencies

The PLGHA policy applies to all Federal agencies receiving global health assistance funding, including USAID, the State Department, the Department of Health and Human Services (HHS), and the DoD. To the extent other Federal agencies receive global health assistance funding through interagency transfer, they may also be required to apply the PLGHA terms in contracts with such funding, in accordance with FAR subparts 17.5 or 17.7.

2. Affected Global Health Assistance

The PLGHA policy applies to ''global health assistance''. This includes funding for international health programs, such as for Human Immunodeficiency Virus/Acquired Immunodeficiency Syndrome; maternal and child health; nutrition; infectious diseases, including malaria and tuberculosis; global health security; and voluntary family planning and reproductive health. More information about the scope of ''global health assistance'' is set forth below under ''II. Discussion and Analysis—Applicability of the PLGHA Policy.''

3. Affected Awards

The State Department's PLGHA implementation plan called for affected Federal agencies to take steps to apply the policy to Federal assistance (grants and cooperative agreements) and contracts. The PLGHA policy does not apply to global health assistance to foreign national or local governments, public international organizations and other multilateral entities in which sovereign nations participate.

For Federal assistance, affected Federal agencies developed a PLGHA standard provision, which they have included, starting in May 2017, in all new Federal assistance awards that use global health assistance funding and existing awards when amended to add new funding for global health assistance.

For contracts, this rule proposes to include a new clause entitled ''Protecting Life in Global Health Assistance'' in applicable contracts and subcontracts funded partially or wholly with global health assistance funding. The PLGHA implementation plan directs Federal agencies to take appropriate steps to apply the policy to new contracts; the plan would also apply to existing contracts, to the extent practicable, when modified to add funding.

4. Purpose

The PLGHA policy is consistent with the Presidential directive in the Presidential Memorandum—that no U.S. taxpayer money should support foreign organizations that perform or actively promote abortion as a method of family planning in other nations. Affected Federal agencies provide significant global health assistance funding through contracts each year. It is critical that such funding is also subject to the PLGHA terms and conditions to effect the President's directive.

All foreign contractors will be eligible to receive global health assistance funding if they agree to abide by the terms of the PLGHA policy in their contract or subcontract. PLGHA does not reduce the amount of global health assistance funding the United States Government makes available. The United States remains strongly committed to supporting health programs around the world.

5. More Information

More information about the 2017 Presidential Memorandum and the

PLGHA policy is available in the following:

• Presidential Memorandum on the Mexico City Policy (82 FR 8495, January 23, 2017).

• U.S. Agency for International Development's (USAID) website at *https://www.usaid.gov/global-health/legislative-policy-requirements.*

B. Authority

The President has broad discretion to set the terms and conditions on which the United States provides foreign assistance. The United States provides global health assistance through various Federal agencies, under the authorities granted to those Federal agencies, including the Foreign Assistance Act (FAA) (22 U.S.C. 2151 *et seq.*). The State Department and USAID, as well as other Federal agencies that receive foreign assistance funds from the State Department and USAID, rely on the authorities under the FAA. Under the FAA, the President is authorized to furnish foreign assistance for voluntary population planning, health programs, and to promote economic or political stability ''on such terms and conditions as [the President] may determine.'' See, *e.g.,* section 104(b) of the FAA (22 U.S.C. 2151b(b)) (assistance for family planning and population growth); section 104(c)(1) of the FAA (22 U.S.C. 2151b(c)(1)) (health assistance); section 531 of the FAA (22 U.S.C. 2346) (assistance to promote economic or political stability). The President, through the issuance of the January 23, 2017, Presidential Memorandum, has exercised his broad discretion to set the terms and conditions of U.S. foreign assistance relating to global health programs, including by applying the PLGHA policy to contracts.

II. Discussion and Analysis

A. Applicability of the PLGHA Policy

The PLGHA policy applies to all global health assistance funding, to the extent allowable by law. Under this policy, ''global health assistance funding'' is Federal funding used for international health activities that is authorized under the FAA, and funded from the Global Health Programs; Economic Support Fund; or Assistance for Europe, Eurasia, and Central Asia appropriations, including successor appropriations, under the annual Department of State, Foreign Operations, and Related Programs Appropriations Act.

Global health assistance funding excludes the following:

(1) Humanitarian assistance;

(2) USAID's American Schools and Hospitals Abroad Program activities;

(3) USAID's Food for Peace activities;

(4) USAID's Water Supply and Sanitation activities reported under Program Area HL.8 or successor program under the State Department's Foreign Assistance Standardized Program Structure; and

(5) USAID's Vulnerable Children activities reported under Program Area ES 4.1 or successor program under the State Department's Foreign Assistance Standardized Program Structure.

The policy applies to U.S. Government contracts funded with global health assistance funding that provide supplies or services for international health activities performed partially or wholly outside the United States (the 50 states, the District of Columbia, and outlying areas). This includes technical assistance and training of foreign individuals or entities as well as services listed in FAR 37.203(b)(1)–(6).

The policy will not apply to—

(1) Contracts at or below the micro-purchase threshold, as defined in FAR 2.101;

(2) Contracts for personal services with individuals; or

(3) Contracts for the acquisition of commercial items, including pharmaceuticals, medical supplies, logistics support, data management, freight forwarding, and warehousing.

B. Requirements Applicable to U.S. Contractors

As noted above, while U.S. contractors are not themselves subject to the PLGHA policy, they are required to flow down the PLGHA requirements to any foreign contractor with whom they subcontract, where applicable. Specifically, the proposed rule would require that, in signing a contract or subcontract funded with global health assistance funds, U.S. contractors and U.S. subcontractors at any tier agree that they shall not subcontract for global health assistance under the contract with a foreign contractor unless such foreign contractor agrees, as part of the subcontract, that it shall not, during the term of the award: (1) Perform or actively promote abortion as a method of family planning outside the United States (the 50 states, the District of Columbia, and outlying areas); or (2) provide financial support to any other foreign NGO that conducts such activities.

C. Requirements Applicable to Foreign Contractors

Foreign contractors that perform a contract with global health assistance funds will be subject to the PLGHA requirements. Specifically, such foreign contractors shall agree not to perform or actively promote abortion as a method of family planning or to provide financial support to any other foreign NGO that conducts such activities. In addition, a foreign contractor shall agree that it will not subcontract for global health assistance under its award with another foreign contractor unless such subcontractor agrees that it shall not, during the term of the award, (1) perform or actively promote abortion as a method of family planning outside the United States (the 50 states, the District of Columbia, and outlying areas) or (2) provide financial support to any other foreign NGO that conducts such activities. The term ''foreign NGO,'' as used in the rule, excludes public international organizations.

The contractor or subcontractor is not required to impose these requirements on foreign NGOs that are not receiving a subcontract and are only the beneficiaries of the training or technical assistance provided by the contractor or subcontractor.

D. Additional Requirements

The proposed rule further provides that, where the contract requires Government consent to subcontract, the contractor shall describe the due diligence it performed on the subcontractor related to the PLGHA requirements.

The proposed rule permits the furnishing of global health assistance funding under a contract to a foreign government or foreign-government-owned (parastatal) organization even if the organization includes abortion in its health program, provided that no global health assistance funds under the contract are used in support of the abortion activity of the foreign government or foreign-government-owned (parastatal) organization, and that such funds are placed in a segregated account to ensure they are not used for such activity.

Further, the proposed rule states that in the event of a conflict between the rule and an affirmative duty of a health care provider required under local law to provide abortion counseling or referrals, such compliance will not be considered a violation of the rule.

Finally, the proposed rule requires that the contractor insert certain terms of the clause in all subcontracts at any tier, except for subcontracts at or below the micro-purchase threshold; subcontracts for the acquisition of commercial items; and subcontracts for personal services with individuals.

E. Violations

The proposed rule sets forth specific requirements for responding to violations of contract terms. Specifically, the Government shall terminate the performance of work under the contract in accordance with the termination clause of the contract, if the foreign contractor violates its undertakings, unless the Government determines that other corrective action or remedy is warranted. If the contractor has reason to believe that the subcontractor has violated any requirement of the contract, the contractor shall consult with the contracting officer and provide full cooperation prior to terminating the subcontract or determining that other corrective action is warranted.

Furthermore, the proposed rule provides the circumstances under which violations by the subcontractor of any requirement in the contract will be imputed to the contractor—if the contractor knowingly subcontracts with a foreign subcontractor that does not abide by the requirements of the policy; where the contractor fails to make reasonable due diligence efforts prior to awarding a subcontract, and the subcontractor did not abide by its contractual terms required in the clause; or where the contractor knows, or has reason to know, of a violation by its subcontractor but fails to terminate the subcontract or take other corrective action.

III. Applicability to Contracts at or Below the Simplified Acquisition Threshold (SAT) and for Commercial Items, Including Commercially Available Off-the-Shelf (COTS) Items

A. Applicability to Contracts at or Below the SAT

The PLGHA policy does not apply to contracts below the micro-purchase threshold.

B. Applicability to Contracts for the Acquisition of Commercial Items, Including Commercially Available Off-the-Shelf Items

DoD, GSA, and NASA do not intend to apply the PLGHA policy to contracts for the acquisition of commercial items.

IV. Expected Cost Impact on the Public

The following is a summary of the impact on contractors awarded contracts that include the new FAR clause:

(1) All foreign contractors, whether prime or sub-recipients, of global health assistance funding must agree that (1) they will not perform or actively promote abortion as a method of family planning, or (2) provide financial support to any other foreign nongovernmental organization that conduct such activities. Notably, the new clause will be included in new awards and, to the extent practicable, in existing awards when modified to add funding. For the existing awards that will include the new clause, if a foreign prime contractor or subcontractor refuses to comply with this prohibition, the government and/or prime contractors would need to either not award a contract to that entity if they had otherwise been the selected offeror, or terminate an existing contract. The government or prime contractor would then have to find and contract or subcontract with an alternative entity that would agree to this prohibition. We expect that domestic entities would incur costs for ensuring the compliance of their foreign contractors with this rule.

(2) The primary costs to contractors (both U.S. and foreign) and foreign subcontractors associated with the rule may include increased compliance costs such as training, development of compliance tools, ongoing monitoring activities, etc.

(3) Foreign contractors and foreign subcontractors will be required to allow the Government, at any reasonable time announced or unannounced, to—

(i) Inspect the documents and materials maintained or prepared by the contractor in the usual course of its operations that describe the health activities implemented by the contractor or subcontractor, including reports, brochures and service statistics;

(ii) Observe the health activities conducted by the contractor or subcontractor;

(iii) Consult with health care personnel of the contractor or subcontractor; and

(iv) Obtain a copy of audited financial statements or reports of the contractor or subcontractor; as applicable.

(4) All contractors will be required to request Government approval prior to treating the health activities of two or more organizations that are affiliates as separate, when determining whether a foreign firm is eligible for a subcontract funded with global health assistance funding. This would entail contract employees preparing and submitting a written justification to the government explaining why the entities should be considered separate.

(5) When preparing requests for a contracting officer's consent to subcontract, contractor must include a written description of the due diligence it has performed on the subcontractor relating to the requirements of the new clause. Activities could include inspecting financial and programmatic documents; interviewing witnesses and employees; and inspecting facilities; as well as drafting the description.

(6) All contractors will be required to review the health activities of subcontractors that are suspected of violating the terms of the FAR clause 52.225–X and to provide the results of any of those reviews to the Government. This would require contractor employees to inspect financial and programmatic documents; interview witnesses and employees; and inspect facilities.

(7) All contractors will be required to place in a segregated account any global health assistance funds transferred to a foreign government or parastatal that includes abortion in its health program. This would require the contractor overseeing that the foreign government or parastatal contractor or subcontractor is maintaining a separate bank account. The foreign government or parastatal contractor or subcontractor would have to open and maintain a separate bank account for these award funds.

DoD, GSA, and NASA have performed a regulatory cost analysis on this proposed rule. The following is a summary of the estimated cost calculated in from FY2016–FY2018 at a 3 and 7 percent discount rate and in perpetuity:

Summary	Public	Government	Total
Present Value (3%) (millions)	$30.0	$39.3	$69.3
Annualized Costs (3%) (millions)	.9	1.2	2.1
Present Value (7%) (millions)	21.6	28.0	49.6
Annualized Costs (7%) (millions)	1.5	2.0	3.5

V. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is a significant regulatory action and, therefore, was subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

VI. Executive Order 13771

This proposed rule is considered an E.O. 13771 regulatory action. We estimate that this rule generates $2.1 million in annualized costs, discounted at 7 percent relative to year 2016, over a perpetual time horizon. More details on the costs associated with this rule can be found in the expected cost impact section of the rule.

VII. Regulatory Flexibility Act

DoD, GSA, and NASA do not expect this rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.* However, an Initial Regulatory Flexibility Analysis (IRFA) has been performed, and is summarized as follows:

This action is necessary to implement the Presidential Memorandum Regarding the Mexico City Policy, issued on January 23, 2017. This Presidential Memorandum reinstated the 2001 Presidential Memorandum on the ''Mexico City Policy,'' and directed the Secretary of State, in coordination with the Secretary of Health and Human Services, to implement a plan to extend the requirements of the Mexico City Policy to ''global health assistance furnished by all departments or agencies'' to the extent allowable by law.

To extend the Mexico City Policy as directed under the January 23, 2017, Presidential Memorandum, the Secretary of State approved, on May 9, 2017, a plan to implement the manner in which U.S. Government Departments and Agencies will apply the provisions of the Mexico City Policy to foreign NGOs that receive U.S. funding for global health assistance. The plan, called ''Protecting Life in Global Health Assistance'' (PLGHA), expanded the application of the Mexico City Policy in three respects, to the extent allowable by law. First, it extended the policy to all affected Federal agencies. Second, it extended the policy to all global health assistance. Third, it required the extension of the policy to contracts in addition to Federal assistance.

The objective of this proposed rule is to ensure contractors are aware of the requirement to comply with the PLGHA policy, pursuant to the PLGHA plan approved by the Secretary of State further to the January 23, 2017, Presidential memorandum.

The President has broad discretion to set the terms and conditions on which the United States provides foreign assistance. The United States provides global health assistance through various Federal agencies, under the authorities granted to those Federal agencies, including the Foreign Assistance Act (FAA) (22 U.S.C. 2151 *et seq.*). The Department of State and USAID, as well as other Federal agencies that receive foreign assistance funds from the Department of State and USAID, rely on the authorities under the FAA. Under the FAA, the President is authorized to furnish foreign assistance for voluntary population planning, health programs, and to promote economic or political stability ''on such terms and conditions as [the President] may determine.'' See, *e.g.,* section 104(b) of the FAA (22 U.S.C. 2151b(b)) (assistance for family planning and population growth); section 104(c)(1) of the FAA (22 U.S.C. 2151b(c)(1)) (health assistance); section 531 of the FAA (22 U.S.C. 2346) (assistance to promote economic or political stability). The President, through the issuance of the January 23, 2017, Presidential Memorandum, has exercised his broad discretion to set the terms and conditions of U.S. foreign assistance relating to global health programs, including by applying the PLGHA policy to contracts.

The PLGHA policy applies to foreign nongovernmental organizations (including contractors). Although U.S. entities are not themselves subject to the policy (not to perform or actively promote abortion as a method of family planning with any source of funds), they must agree to flow down the policy requirements to foreign nongovernmental organizations under their contracts.

This proposed rule is not expected to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Analysis Act, 5 U.S.C. 601, *et seq.* U.S. contractors are not themselves subject to the policy (not to perform or actively promote abortion as a method of family planning with any source of funds), but they must agree to flow down the PLGHA requirements to subcontractors and ensure that foreign subcontractors comply with the policy. This rule applies to foreign prime contractors.

Based on data available from FY2016–FY2018, we estimate that approximately 253 contractors would be affected by this rule. Of that we estimate that 45 small businesses would be affected; equating to 18 percent of the total contractors affected.

This rule does impose new reporting, recordkeeping and other compliance requirements. The rule includes requirements for access to documents, records, and processes to conduct inspections for compliance purposes. U.S. contractors will be responsible for the oversight of their foreign subcontractors. The foreign contractors will be subject to this requirement. Instances of these requirements are—

a. 52.225–XX(c)(2)(i) Inspection of documents and materials (foreign primes)—

''(c) *Foreign prime contractors.* This paragraph (c) applies only to foreign prime contractors, and does not affect any contractual rights between U.S. prime contractors and the U.S. Government:

(2) The Contractor shall allow authorized representatives of the Government to, at any reasonable time, announced or unannounced, consistent with the terms of this contract—

(i) Inspect the documents and materials maintained or prepared by the Contractor in the usual course of its operations that describe the health activities implemented by the Contractor, including reports, brochures, and service statistics'';

b. 52.225–XX(j)(1)(ii)(A) Inspection of documents and materials (foreign subcontractors)—

''(j) *Obligations regarding foreign subcontracts.*

(1) The Contractor shall ensure that foreign subcontractors at any tier that receive global health assistance funding agree to the following additional terms:

(ii) The Contractor and authorized representatives of the Government may, at any reasonable time, announced or unannounced, consistent with the terms of this contract, perform any of the following:

(A) Inspect the documents and materials maintained or prepared by the subcontractor in the usual course of its operations that describe the health activities of the subcontractor, including reports, brochures, and service statistics.''

c. 52.225–XX(e) Consent to subcontract (all primes and subcontractors)—

''(e) *Consent to subcontract.* If the contract includes the clause at FAR 52.244–2, Subcontracts, and requires the Contractor to obtain consent prior to entering into a subcontract, then the Contractor shall provide to the Contracting Officer, in the consent request, a description of the due diligence performed by the Contractor on the subcontractor relating to the requirements in this clause.

d. 52.225–XX(g)(2) Review of health program for violations (all primes and subcontractors)—

''(g) *Government independent inquiries.*

(2) In the event that the Contractor or the Government has reason to believe that a foreign subcontractor may have violated the requirements of this clause, the Contractor shall review the health program of the foreign subcontractor to determine whether such a violation has occurred. The Contractor shall provide the Contracting Officer the results of the review.''

e. 52.225–XX(j)(2) and (j)(3) Review of health program for violations (foreign subcontractors)—

''(j) *Obligations regarding foreign subcontracts.*

(2) In the event that the Contractor or the Government has reason to believe that a foreign subcontractor may have violated the

requirements of this clause, the Contractor shall review the health program of the subcontractor to determine whether such a violation has occurred.

(3) If the Contractor has reason to believe that the subcontractor has violated any requirement of this clause, the Contractor shall consult with the Contracting Officer and provide full cooperation prior to terminating the subcontract or determining that other corrective action is warranted.''

The rule does not duplicate, overlap, or conflict with any other Federal rules. DoD, GSA, and NASA were unable to identify any alternatives to the rule that would reduce the impact on small entities and still meet the requirements.

The Regulatory Secretariat Division has submitted a copy of the IRFA to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the IRFA may be obtained from the Regulatory Secretariat Division. DoD, GSA, and NASA invite comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

DoD, GSA, and NASA will also consider comments from small entities concerning the existing regulations in subparts affected by the rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C. 610 (FAR Case 2018–002), in correspondence.

VIII. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) applies. The proposed rule contains information collection requirements. Accordingly, the Regulatory Secretariat Division has submitted a request for approval of a new information collection requirement concerning FAR Case 2018–002, Protecting Life in Global Health Assistance to the Office of Management and Budget.

A. Public reporting burden for this collection of information is estimated to average 35.8 hours per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information.

The annual reporting burden is estimated as follows:

* *Respondents:* 253.
* *Responses per respondent:* 4.3.
* *Total annual responses:* 1,089.
* *Preparation hours per response:* 35.8.
* *Total response burden hours:* 38,992.

B. Request for Comments Regarding Paperwork Burden.

Submit comments, including suggestions for reducing this burden, not later than November 13, 2020 to: FAR Desk Officer, OMB, Room 10102, NEOB, Washington, DC 20503, and a copy to the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW, 2nd Floor, Washington, DC 20405–0001.

Public comments are particularly invited on: Whether this collection of information is necessary for the proper performance of functions of the FAR, and will have practical utility; whether our estimate of the public burden of this collection of information is accurate, and based on valid assumptions and methodology; ways to enhance the quality, utility, and clarity of the information to be collected; and ways in which we can minimize the burden of the collection of information on those who are to respond, through the use of appropriate technological collection techniques or other forms of information technology.

Requesters may obtain a copy of the supporting statement from the General Services Administration, Regulatory Secretariat Division (MVCB), 1800 F Street NW, 2nd Floor, Washington, DC 20405–0001. Please cite OMB Control Number 9000–00XX, Title, in all correspondence.

The rule contains information collection requirements that require the approval of the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35).

List of Subjects in 48 CFR Parts 1, 7, 25, 44, and 52

Government procurement.

William F. Clark,

Director, Office of Government-wide Acquisition Policy, Office of Acquisition Policy, Office of Government-wide Policy.

Therefore, DoD, GSA, and NASA propose amending 48 CFR parts 1, 7, 25, 44, and 52 as set forth below:

■ 1. The authority citation for 48 CFR parts 1, 7, 25, 44, and 52 continues to read as follows:

Authority: 40 U.S.C. 121(c); 10 U.S.C. chapter 137; and 51 U.S.C. 20113.

PART 1—FEDERAL ACQUISITION REGULATIONS SYSTEM

■ 2. In section 1.106, amend the table by adding an entry for ''52.225–XX'' in numerical order to read as follows:

1.106 OMB approval under the Paperwork Reduction Act.

* * * * *

FAR segment	OMB control No.
* * *	* *
52.225–XX	9000–XXXX
* * *	* *

PART 7—ACQUISITION PLANNING

■ 3. Add section 7.10X to read as follows:

7.10X Additional requirements for global health assistance acquisitions.

When planning to procure supplies or services for global health assistance, the requiring activity is responsible for notifying the contracting officer, in writing, when the contract will be funded partially or wholly with global health assistance funding, as defined in 25.100X–4.

PART 25—FOREIGN ACQUISITION

■ 4. Add section 25.100X to read as follows:

25.100X Protecting Life in Global Health Assistance.

25.100X–1 Scope of section.

This section implements the ''Protecting Life in Global Health Assistance'' policy approved by the Secretary of State on May 9, 2017, as directed by the Presidential Memorandum regarding The Mexico City Policy, dated January 23, 2017.

25.100X–2 Authority.

(a) Foreign Assistance Act of 1961 (22 U.S.C. 2151 *et seq.*).

(b) Presidential Memorandum on the Mexico City Policy (Memorandum of January 23, 2017, 3 CFR, 2017 Comp., p. 435.).

25.100X–3 Applicability.

This section applies to all executive agencies that implement programs or activities funded partially or wholly with global health assistance funding as defined in 25.100X–4.

25.100X–4 Definitions.

As used in this section—

Abortion as a method of family planning means abortion when it is for the purpose of spacing births. This includes, but is not limited to, abortions performed for the physical or mental health of the mother and abortions performed for fetal abnormalities, but does not include abortions performed if the life of the mother would be endangered if the fetus were carried to term, or abortions performed following rape or incest.

Actively promote abortion as a method of family planning means for an organization to commit resources, financial or other, in a substantial or continuing effort to increase the availability or use of abortion as a method of family planning.

(1) This includes, but is not limited to, the following activities:

(i) Operating a service-delivery site that provides, as part of its regular program, counseling, including advice and information, regarding the benefits and/or availability of abortion as a method of family planning;

(ii) Providing advice that abortion as a method of family planning is an available option or encouraging women to consider abortion (passively responding to a question regarding where a safe, legal abortion may be obtained is not considered active promotion if a woman who is already pregnant specifically asks the question, she clearly states that she has already decided to have a legal abortion, and the healthcare provider reasonably believes that the ethics of the medical profession in the host country requires a response regarding where it may be obtained safely and legally);

(iii) Lobbying a foreign government to legalize or make available abortion as a method of family planning or lobbying such a government to continue the legality of abortion as a method of family planning; and

(iv) Conducting a public information campaign outside the United States (the 50 states, the District of Columbia, and outlying areas), regarding the benefits and/or availability of abortion as a method of family planning.

(2) Excluded from this definition are referrals for abortion as a result of rape or incest, or if the life of the mother would be endangered if she were to carry the fetus to term. Also excluded from this definition is the treatment of injuries or illnesses caused by legal or illegal abortions, for example, post-abortion care.

(3) Action by an individual acting in the individual's capacity to actively promote abortion as a method of family planning shall not be attributed to an organization with which the individual is associated, provided that the individual is neither on duty nor acting on the organization's premises, and the organization neither endorses nor provides financial support for the action and takes reasonable steps to ensure that he or she does not improperly represent that the individual is acting on behalf of the organization.

Foreign contractor means a contractor or subcontractor organized or existing under the laws of a country other than the United States (the 50 states, the District of Columbia, and outlying areas). This excludes public international organizations.

Foreign nongovernmental organization means any nongovernmental organization or entity, whether non-profit or profit making, organized or existing under the laws of a country other than the United States (the 50 states, the District of Columbia, and outlying areas). This excludes public international organizations.

Global health assistance funding is Federal funding used for international health activities that is authorized under the Foreign Assistance Act of 1961, and funded from the Global Health Programs; Economic Support Fund; or Assistance for Europe, Eurasia, and Central Asia appropriations, including successor appropriations, under the annual Department of State, Foreign Operations, and Related Programs Appropriations Act. Global health assistance funding excludes funding for—

(1) Humanitarian assistance;

(2) U.S. Agency for International Development's (USAID's) American Schools and Hospitals Abroad Program activities;

(3) USAID's Food for Peace activities;

(4) USAID's Water Supply and Sanitation activities reported under Program Area HL.8 or successor program under the Department of State's Foreign Assistance Standardized Program Structure; and

(5) USAID's Vulnerable Children activities reported under Program Area ES 4.1 or successor program under the Department of State's Foreign Assistance Standardized Program Structure.

Perform abortions means to operate a facility where abortions are provided as a method of family planning. Excluded from this definition is the treatment of injuries or illnesses caused by legal or illegal abortions, for example, post-abortion care.

Provide financial support means to provide funding, from any source, to a foreign nongovernmental organization through a contract, subcontract, other written agreement or donation of funds; it does not include the provision of funding through contracts, subcontracts, or other written agreements for commercial items as defined under 2.101, except for commercial items to be used primarily to perform abortions as a method of family planning.

Public international organization means an organization—

(1) Designated as a public international organization under the International Organizations Immunities Act; or

(2) Treated as a public international organization pursuant to the regulations or policies of an Executive agency.

25.100X–5 Policy.

(a) The Protecting Life in Global Health Assistance policy is that executive agencies take appropriate actions to ensure that foreign nongovernmental organizations agree that they shall not perform or actively promote abortion as a method of family planning, nor provide financial support to any other foreign nongovernmental organization that conducts such activities, during the term of a contract funded with global health assistance funding. This policy applies to Federal assistance awards, as well as contracts containing the clause at 52.225–XX, Protecting Life in Global Health Assistance. For more information about the Protecting Life in Global Health Assistance policy, see the U.S. Agency for International Development's (USAID) website at *https://www.usaid.gov/global-health/legislative-policy-requirements.*

(b) To comply with the Protecting Life in Global Health Assistance policy, a foreign contractor or subcontractor is required to agree not to perform or actively promote abortion as a method of family planning or provide financial support to any other foreign nongovernmental organization that conducts such activities. U.S. contractors are required to flow this requirement down to all foreign subcontracts subject to this policy.

25.100X–6 Procedures.

(a) When the requiring activity notifies the contracting officer in writing that global health assistance funding is to be used for the procurement (see 7.10X), the contracting officer shall include the clause at 52.225–XX, Protecting Life in Global Health Assistance prescribed at 25.100X–7;

(b) When providing consent to subcontract with a foreign subcontractor in accordance with subpart 44.2, the contracting officer must ensure that the contractor has provided a description of the due diligence performed by the contractor on the subcontractor relating to the requirements in clause 52.225–XX (see 44.202–2(a)(14)).

25.100X–7 Contract clauses.

(a) Insert the clause at 52.225–XX, Protecting Life in Global Health Assistance, in solicitations and contracts that—

(1) Provide supplies or services for international health activities that are funded partially or wholly with global health assistance funding, including

contracts for technical assistance and training of foreign individuals or entities and services listed in 37.203(b)(1)–(6); and

(2) Are performed partially or wholly outside the United States (the 50 states, the District of Columbia, and outlying areas).

(b) The clause is not required to be used for—

(1) Contracts at or below the micro purchase threshold, as defined in FAR 2.101;

(2) Contracts for personal services with individuals; or

(3) Contracts for the acquisition of commercial items.

PART 44—SUBCONTRACTING POLICIES AND PROCEDURES

■ 5. Amend section 44.202–2 by adding paragraph (a)(14) to read as follows:

44.202–2 Considerations.

(a) * * *

(14) When the clause at 52.225–XX, Protecting Life in Global Health Assistance, is in the contract, has the contractor included a description of the due diligence performed on the subcontractor relating to the requirements of the clause.

* * * * *

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

■ 6. Add section 52.225–XX to read as follows:

52.225–XX Protecting Life in Global Health Assistance.

As prescribed in 25.100X–7, insert the following clause:

Protecting Life in Global Health Assistance (DATE)

(a) *Definitions.* As used in this clause–

Abortion as a method of family planning means abortion when it is for the purpose of spacing births. This includes, but is not limited to, abortions performed for the physical or mental health of the mother and abortions performed for fetal abnormalities, but does not include abortions performed if the life of the mother would be endangered if the fetus were carried to term, or abortions performed following rape or incest.

Actively promote abortion as a method of family planning means for an organization to commit resources, financial or other, in a substantial or continuing effort to increase the availability or use of abortion as a method of family planning.

(1) This includes, but is not limited to, the following activities:

(i) Operating a service-delivery site that provides, as part of its regular program, counseling, including advice and information, regarding the benefits and/or availability of abortion as a method of family planning;

(ii) Providing advice that abortion as a method of family planning is an available option or encouraging women to consider abortion (passively responding to a question regarding where a safe, legal abortion may be obtained is not considered active promotion if a woman who is already pregnant specifically asks the question, she clearly states that she has already decided to have a legal abortion, and the healthcare provider reasonably believes that the ethics of the medical profession in the host country requires a response regarding where it may be obtained safely and legally);

(iii) Lobbying a foreign government to legalize or make available abortion as a method of family planning or lobbying such a government to continue the legality of abortion as a method of family planning; and

(iv) Conducting a public information campaign outside the United States (the 50 states, the District of Columbia, and outlying areas), regarding the benefits and/or availability of abortion as a method of family planning.

(2) This does not include referrals for abortion as a result of rape or incest, or if the life of the mother would be endangered if she were to carry the fetus to term. Also excluded from this definition is the treatment of injuries or illnesses caused by legal or illegal abortions, for example, post-abortion care.

(3) Action by an individual acting in the individual's capacity to actively promote abortion as a method of family planning shall not be attributed to an organization with which the individual is associated, provided that the individual is neither on duty nor acting on the organization's premises, and the organization neither endorses nor provides financial support for the action and takes reasonable steps to ensure that he or she does not improperly represent that the individual is acting on behalf of the organization.

Foreign contractor means a contractor or subcontractor organized or existing under the laws of a country other than the United States (the 50 states, the District of Columbia, and outlying areas). This excludes public international organizations.

Foreign nongovernmental organization means any nongovernmental organization or entity, whether nonprofit or profit making, organized or existing under the laws of a country other than the United States (the 50 states, the District of Columbia, and outlying areas). This excludes public international organizations.

Full cooperation,

(1) Means, at a minimum—

(i) Disclosure to the Government information sufficient to identify the nature and extent of a violation;

(ii) Providing timely and complete responses to Government auditors' and investigators' requests for documents and access to employees with information; and

(iii) Cooperating fully in providing reasonable access to its facilities and staff (both inside and outside the U.S.) to allow contracting agencies and other responsible Federal agencies to conduct audits, investigations, or other actions to ascertain compliance with this clause.

(2) Does not—

(i) Foreclose any contractor rights arising in law, this regulation, or the terms of the contract;

(ii) Require the Contractor to waive its attorney-client privilege or the protections afforded by the attorney work product doctrine;

(iii) Require any officer, director, owner, employee, or agent of the Contractor, including a sole proprietor, to waive his or her attorney client privilege or Fifth Amendment rights; or

(iv) Restrict the Contractor from—

(A) Conducting an internal investigation; or

(B) Defending a proceeding or dispute arising under the contract or related to a potential or disclosed violation.

Global health assistance funding is Federal funding used for international health activities that is authorized under the Foreign Assistance Act of 1961, and funded from the Global Health Programs; Economic Support Fund; or Assistance for Europe, Eurasia, and Central Asia appropriations, including successor appropriations, under the annual Department of State, Foreign Operations, and Related Programs Appropriations Act. Global health assistance funding excludes funding for—

(1) Humanitarian assistance;

(2) U.S. Agency for International Development's (USAID's) American Schools and Hospitals Abroad Program activities;

(3) USAID's Food for Peace activities;

(4) USAID's Water Supply and Sanitation activities reported under Program Area HL.8 or successor program under the Department of State's Foreign Assistance Standardized Program Structure; and

(5) USAID's Vulnerable Children activities reported under Program Area ES 4.1 or successor program under the Department of State's Foreign Assistance Standardized Program Structure.

Parastatal means a foreign-government-owned organization operated as a commercial company or other organization, including nonprofits, or enterprises in which foreign governments or foreign agencies have a controlling interest.

Perform abortions means to operate a facility where abortions are provided as a method of family planning. Excluded from this definition is the treatment of injuries or illnesses caused by legal or illegal abortions, for example, post-abortion care.

Provide financial support means to provide funding, from any source, to a foreign nongovernmental organization through a contract, subcontract, other written agreement or donation of funds; it does not include the provision of funding through contracts, subcontracts, or other written agreements for commercial items as defined under 2.101, except for commercial items to be used primarily to perform abortions as a method of family planning.

Public international organization means an organization—

(1) Designated as a public international organization under the International Organizations Immunities Act; or

(2) Treated as a public international organization pursuant to the regulations or policies of an Executive agency.

(b) *Prime contractor.* The Contractor shall not subcontract for supplies or services using global health assistance funding under this contract with a foreign contractor unless the subcontractor at any tier agrees, by entering into such subcontract, that it shall not, during the term of the subcontract—

(1) Perform or actively promote abortion as a method of family planning, outside the United States (the 50 states, the District of Columbia, and outlying areas); or

(2) Provide financial support to any other foreign nongovernmental organization that conducts such activities.

(c) *Foreign prime contractors.* This paragraph (c) applies only to foreign prime contractors, and does not affect any contractual rights between U.S. prime contractors and the U.S. Government:

(1) The Contractor shall not, during the term of this contract—

(i) Perform or actively promote abortion as a method of family planning outside the United States (the 50 states, the District of Columbia, and outlying areas); or

(ii) Provide financial support to any other foreign nongovernmental organization that conducts such activities.

(2) The Contractor shall allow authorized representatives of the Government to, at any reasonable time, announced or unannounced, consistent with the terms of this contract—

(i) Inspect the documents and materials maintained or prepared by the Contractor in the usual course of its operations that describe the health activities implemented by the Contractor, including reports, brochures, and service statistics;

(ii) Observe the health activities conducted by the Contractor;

(iii) Consult with healthcare personnel of the Contractor; and

(iv) Obtain a copy of audited financial statements or reports of the Contractor; as applicable.

(3) The Government shall terminate the performance of work under this contract in accordance with the termination clause of this contract for any violation of this clause unless the Government determines that other corrective action or remedy is warranted. In addition to other remedies available to the Government, the Contractor's failure to comply with the requirements of this clause may result in—

(i) Suspension of contract payments until the Contractor has taken appropriate remedial action; and/or

(ii) Suspension or debarment.

(d) *Subcontractor eligibility.* When the Contractor is determining whether a foreign contractor is eligible for a subcontract with global health assistance funding under this contract, the action of separate nongovernmental organizations shall not be imputed to the subcontractor, unless, in the judgment of the Government, a separate nongovernmental organization is being used purposefully to avoid the requirements of the clause.

(1) Separate nongovernmental organizations are those that have distinct legal existence in accordance with the laws of the countries in which they are organized. Foreign organizations that are separately organized shall not be considered separate if they are affiliates (see definition at FAR 2.101).

(2) The Contractor may request the Government's approval to treat as separate the health activities of two or more organizations, which would be considered affiliates under paragraph (d)(1) of this clause.

(3) In the event the Contractor makes a request under paragraph (d)(2) of this clause, the Contractor shall provide a written justification to the Government that the health activities of the organizations are sufficiently distinct to warrant not imputing the activity of one to the other.

(e) *Consent to subcontract.* If the contract includes the clause at FAR 52.244–2, Subcontracts, and requires the Contractor to obtain consent prior to entering into a subcontract, then the Contractor shall provide to the Contracting Officer, in the consent request, a description of the due diligence performed by the Contractor on the subcontractor relating to the requirements in this clause.

(f) *Violations.* Violations by the subcontractor of any requirement in this clause will be imputed to the Contractor only if—

(1) The Contractor knowingly provides global health assistance funding in a subcontract under this contract to a foreign contractor that performs or actively promotes abortion as a method of family planning;

(2) The Contractor failed to make reasonable due diligence efforts prior to providing global health assistance funding in a subcontract under this contract to a foreign contractor, and the subcontractor did not abide by its contractual terms required in this clause; or

(3) The Contractor knows or has reason to know, by virtue of the monitoring that the contractor is required to perform under the terms of this contract, that a subcontractor has violated any of the contract terms required by this clause, and the Contractor fails to terminate the subcontract or fails to take other appropriate corrective action.

(g) *Government independent inquiries.* (1) The Government may make independent inquiries in the community served by a foreign contractor or subcontractor under this contract regarding whether it performs or actively promotes abortion as a method of family planning.

(2) In the event that the Contractor or the Government has reason to believe that a foreign subcontractor may have violated the requirements of this clause, the Contractor shall review the health program of the foreign subcontractor to determine whether such a violation has occurred. The Contractor shall provide the Contracting Officer the results of the review.

(h) *Foreign Governments and parastatals.* The Contractor may award a contract with global health assistance funding to a foreign government or parastatal even though the foreign government or parastatal includes abortion in its health program, provided that no global health assistance funding shall be used under this contract in support of the abortion activity of the foreign government or parastatal, and any funds transferred to the foreign government or parastatal shall be placed in a segregated account to ensure that such funds are not used to support the abortion activity of the foreign government or parastatal.

(i) *Affirmative duty exception.* In the event of a conflict between a term of this clause and an affirmative duty of a healthcare provider required under local law to provide counseling about and referrals for abortion as a method of family planning, compliance with such law shall not trigger a violation of this clause.

(j) *Obligations regarding foreign subcontracts.* (1) The Contractor shall ensure that foreign subcontractors at any tier that receive global health assistance funding agree to the following additional terms:

(i) The subcontractor shall not, during the term of the subcontract

(A) Perform or actively promote abortion as a method of family planning outside the United States (the 50 states, the District of Columbia, and outlying areas); or

(B) Provide financial support to any other foreign nongovernmental organization that conducts such activities.

(ii) The Contractor and authorized representatives of the Government may, at any reasonable time, announced or unannounced, consistent with the terms of this contract, perform any of the following:

(A) Inspect the documents and materials maintained or prepared by the subcontractor in the usual course of its operations that describe the health activities of the subcontractor, including reports, brochures, and service statistics.

(B) Observe health activities conducted by the subcontractor.

(C) Consult with healthcare personnel of the subcontractor.

(D) Obtain a copy of audited financial statements or reports of the subcontractor, as applicable.

(2) In the event that the Contractor or the Government has reason to believe that a foreign subcontractor may have violated the requirements of this clause, the Contractor shall review the health program of the subcontractor to determine whether such a violation has occurred.

(3) If the Contractor has reason to believe that the subcontractor has violated any requirement of this clause, the Contractor shall consult with the Contracting Officer and provide full cooperation prior to terminating the subcontract or determining that other corrective action is warranted.

(k) *Subcontracts.* The Contractor shall insert the terms of this clause, except paragraphs (b), (c) and (e), in all subcontracts awarded with global health assistance funding at any tier except for subcontracts—

(1) At or below the micro-purchase threshold, as defined at FAR 2.101;

(2) For personal services with individuals; or

(3) For the acquisition of commercial items.

RIN 9000–AN99

Federal Acquisition Regulation: Maximizing Use of American-Made Goods, Products, and Materials

AGENCY: Department of Defense (DoD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Proposed rule.

SUMMARY: DoD, GSA, and NASA are proposing to amend the Federal Acquisition Regulation (FAR) to implement an Executive order (E.O.) addressing domestic preferences in Government procurement.

DATES: Interested parties should submit written comments at the address shown below on or before November 13, 2020 to be considered in the formation of the final rule.

ADDRESSES: Submit comments in response to FAR Case 2019–016 to *http://www.regulations.gov.* Submit comments via the Federal eRulemaking portal by searching for ''FAR Case 2019–016''. Select the link ''Comment Now'' that corresponds with ''FAR Case 2019–016.'' Follow the instructions provided on the screen. Please include your name, company name (if any), and ''FAR Case 2019–016'' on your attached document. If your comment cannot be submitted using *https://www.regulations.gov,* call or email the points of contact in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

Instructions: Please submit comments only and cite ''FAR Case 2019–016'' in all correspondence related to this case. All comments received will be posted without change to *http://www.regulations.gov,* including any personal and/or business confidential information provided. To confirm receipt of your comment(s), please check *https://www.regulations.gov,* approximately two to three days after submission to verify posting.

FOR FURTHER INFORMATION CONTACT: Ms. Zenaida Delgado, Procurement Analyst, at 202–969–7207 or *zenaida.delgado@gsa.gov* for clarification of content. For information pertaining to status or publication schedules, contact the Regulatory Secretariat Division at 202–501–4755 or *GSARegSec@gsa.gov.* Please cite FAR Case 2019–016.

SUPPLEMENTARY INFORMATION:

I. Background

Congress passed the Buy American Act during the Great Depression to foster American industry by protecting it from foreign competition for Federal procurement contracts. The Buy American Act is codified at 41 U.S.C. Chapter 83 as the Buy American statute and provides pricing preferences to offerors who certify their compliance with the domestic purchasing requirements stated in the Act. Specifically, it requires public agencies to procure articles, materials, and supplies that were mined, produced, or manufactured in the United States, substantially all from domestic components, subject to exceptions for nonavailability of domestic products, unreasonable cost of domestic products, and when it would not be in the public interest to buy domestic products.

The key to understanding the Buy American statute, which is implemented in FAR part 25, is determining whether the solicited goods or ''end products'' or ''construction material'' are domestic, *i.e.,* were mined, produced, or manufactured in the United States, substantially from components mined, produced, or manufactured in the United states. The analysis of whether a manufactured end product or construction material qualifies as domestic is done using a two-part test.

1. The end product or construction material must be manufactured in the United States.

2. More than 50 percent of all component parts (determined by cost of the components) must also be mined, produced, or manufactured in the United States.

The factor of 50 percent in the existing FAR definition came from E.O. 10582, Prescribing Uniform Procedures for Certain Determinations under the Buy American Act, available via the internet at *https://www.archives.gov/federal-register/codification/executive-order/10582.html.* E.O. 10582 interpreted the statutory requirement that domestic products must be manufactured ''substantially all'' from domestic components as meaning in excess of 50 percent. If a product meets this two-part test, then it can be considered a ''domestic end product'' or ''domestic construction material'' under the Buy American statute. End products or construction material that do not qualify as domestic under this test are treated as foreign.

The Buy American statute is waived in situations where the United States has reciprocal trade agreements, including the World Trade Organization Government Procurement Agreement (WTO GPA). Generally, the dollar value of the acquisition determines which of the trade agreements applies. Exceptions to the applicability of the trade agreements are described in FAR subpart 25.4. The FAR clauses implementing the Trade Agreements Act allow the Government to purchase end items that are ''substantially transformed'' in countries that are parties to such trade agreements without regard to the source or cost of the components. On acquisitions under the WTO GPA, end products that are ''substantially transformed'' in the United States are considered ''U.S.-made end products'' and they are not subject to the Buy American statute or E.O. 13881.

On July 15, 2019, the President signed E.O. 13881, Maximizing Use of American-Made Goods, Products, and Materials (84 FR 34257, July 18, 2019). This E.O. changes FAR clauses implementing the Buy American statute by increasing the—

1. Domestic content requirements; and

2. Price preference for domestic products.

Increased Domestic Content Requirements

Under E.O. 13881, the domestic content requirement for iron and steel end products increases to 95 percent. For everything else, the domestic content requirement increases from 50 percent to exceeds 55 percent of the cost of all components. E.O. 13881 creates a new separate higher domestic content standard for iron and steel end products. This distinction does not currently appear in the FAR clauses implementing the Buy American statute. But it has been around for many years in domestic preference requirements governing certain federal grant programs, such as the Federal Transit Administration's Buy America regulations applicable to grantees. DoD procurements are affected by the increased domestic content requirements of E.O. 13881; the changes will be implemented in the Defense Federal Acquisition Regulation Supplement (DFARS) through DFARS Case 2019–D045, Maximizing Use of American-Made Goods.

Increase Preference for Domestic Offers

The Buy American statute does not prohibit the purchase of foreign end products or use of foreign construction material. Instead, it encourages the use of domestic end products and construction material by imposing a price preference for domestic end products and construction material. Under current Buy American regulations, large businesses receive a 6 percent price preference. Small businesses get a 12 percent price preference. For DoD procurements, the price preference for end products from both large and small businesses is 50 percent. The 6 percent price preference was originally established by E.O. 10582, which permitted the head of an executive agency to determine that a greater differential is appropriate. In October 1958, the Assistant Secretary of Defense (Supply and Logistics) and the Assistant Secretary of State agreed that a differential of 12 percent would be used for offers from small business (see Armed Services Procurement Regulation (ASPR), 1955 edition, Revision 45, 20 April 1959, Case 58–99).

E.O. 13881 increases the price preference from 6 percent to 20 percent for large businesses and from 12 percent to 30 percent for small businesses. The E.O. does not impact the 50 percent preference for DoD procurements, because the DoD percentage exceeds the requirements of the E.O.

II. Discussion and Analysis

A. Applicability of the Executive Order 13881 to Construction Material

Although the E.O. addresses only ''end products'' in section 2, the Councils have interpreted the term ''end product'' in the E.O. to include ''construction material.'' The E.O. doesn't define the term end product, but in both the title and section 1, addresses maximizing the use of American-made goods, products, and materials, not just end products. Furthermore, section 3 of the E.O. states that it will supersede section 2(a) of E.O. 10582, which addressed ''materials,'' and has been interpreted in the FAR to cover both end products and construction materials. In addition, the policy relating to iron and steel products has primary impact on the acquisition of construction materials. The Recovery Act applied the restrictions on acquisition of domestic iron and steel products solely to construction materials (see FAR subpart 25.6). Not addressing construction material in this rule would be contrary to the goal of the E.O. to maximize the use of American-made products.

B. Definitions

1. This rule proposes to amend the definitions of ''domestic construction material'' and ''domestic end product'' at FAR 25.003 and in the applicable clauses at FAR 52.225–1, 52.225–3, 52.225–9, and 52.225–11, and references at FAR 52.212–3(f)(1) and (g)(1)(iii), 52.225–2(a), and 52.225–4(c), as well as the policy discussion of these definitions at FAR 25.001(c)(1), 25.101(a)(2), and 25.201(b), to include the new E.O. requirement that for ''domestic construction material'' or a ''domestic end product'' that does not consist wholly or predominantly of iron or steel or a combination of both, the cost of domestic components must exceed 55 percent of the cost of all components.

2. A new paragraph is added in each definition to address end products or construction materials that consist wholly or predominantly of iron or steel or a combination of both, respectively, to require that the cost of iron and steel not produced in the United States as estimated in good faith by the contractor, must constitute less than 5 percent of the cost of all components. This addition to the definitions was derived and integrated with existing FAR coverage as follows:

a. Iron and steel end product means an end product or construction material that consists wholly or predominantly of iron or steel or a combination of both.

b. Predominantly of iron or steel or a combination of both means the cost of the iron and steel content in an item that exceeds 50 percent of the total cost of all its components. Basing the predominance on cost, rather than weight, is consistent with the requirement of the E.O. that the foreign iron and steel content be limited to less than 5 percent of the cost of all components.

c. Foreign iron and steel means iron and steel not produced in the United States. This is consistent with the definition of ''foreign iron and steel'' under the Recovery Act (see FAR 25.602–1(a)(1)(ii)).

d. When addressing construction materials or end products that are wholly or predominantly iron or steel or a combination of both, it is unnecessary to address unmanufactured construction material or unmanufactured end products, respectively, because the Government does not buy unmanufactured iron and steel end products and construction materials.

e. ''Produced in the United States'' is taken from FAR subpart 25.6, and applies to the iron and steel in construction material and end products that consist wholly or predominantly of iron or steel or a combination of both.

f. The definition of ''steel'' is taken from FAR subpart 25.6.

g. Because of the difficulty of estimating the cost of all foreign iron and steel content, the rule proposes a good faith estimate by the contractor, with the exception of fasteners, which, as explained in section II.C., are defined and treated separately.

h. The requirement that components of unknown origin be treated as foreign has been incorporated into the definitions of ''domestic end product'' and ''domestic construction material'' for those items that do not consist wholly or predominantly of iron or steel or a combination of both. This requirement is comparable to the other requirements already in the definition such as the treatment of domestically nonavailable components and scrap generated in the United States as domestic. This makes it clearer that this is only applicable to items that do not consist wholly or predominantly of iron or steel or a combination of both.

i. The rule revises the term ''component test'' to ''domestic content test,'' which can apply to either the component content of other than iron or steel products test, or the iron and steel content of iron or steel products, as applicable. With regard to manufactured supplies and materials (whether end products or construction materials), the Buy American statute requires that in order to be considered domestic, such materials and supplies shall have been manufactured in the United States ''substantially all from articles, materials, or supplies mined produced, or manufactured in the United States.''

E.O. 10582 interpreted this requirement by stating that materials shall be considered to be of foreign origin if the cost of foreign products used in such materials constitutes 50 percent or more of the cost of all the products used in such materials. When incorporated into the FAR, the term ''component'' was substituted for the term ''product'' and this has been referred to as the ''component test''. Although E.O. 13881 retains similar language with regard to end products other than iron and steel end products, just changing the percentage from 50 percent to 45 percent, E.O. 13881 does not reference the term ''product'' when referring to the cost of iron and steel used in iron and steel end products. It states that ''the cost of foreign iron and steel used in such iron and steel end products constitutes 5 percent or more of the cost of all the products used in such iron and steel end products.'' Thus, the test for iron and steel is no longer a ''component test'' but a test of the cost of iron and steel content.

C. Partial Reinstatement of the Domestic Content Test of the Buy American Statute for Iron and Steel Products

In 2009, the Administrator for Federal Procurement Policy waived what is now called the domestic content test (previously called the component test) for commercially available off-the-shelf (COTS) items based on a determination made pursuant to 41 U.S.C. 1907. See FAR Case 2000–305, January 15, 2009, 74 FR 2713. Furtherance of the Buy American statute was driven by retention of the requirement that the product must still be manufactured in the United States.

The proposed rule would partially restore the domestic content test for COTS items as it pertains to iron and steel products. The bulk of iron and steel products acquired by the Government are primarily COTS items, used as construction material. Roll-back of the waiver is necessary to give full effect to the E.O.'s requirement that domestic iron and steel products shall not contain more than 5 percent foreign iron and steel.

At the same time, the proposed rule would continue to waive the domestic content test for iron and steel fasteners. Fastener is defined as a hardware device that mechanically joins or affixes two or more objects together. Examples of fasteners are nuts, bolts, pins, rivets, nails, clips, and screws. Fasteners are generally so small, inexpensive and comingled that trying to keep track of the origin of all fasteners would create an administrative burden that would outweigh any benefit to the American iron and steel industrial base. The proposed partial reinstatement of the domestic content test for products that consist wholly or predominantly of iron or steel or a combination of both would require changes to the list of inapplicable laws at FAR 12.505(a), the definitions of ''domestic construction material'' and ''domestic end product,'' and various other conforming changes wherever waiver of the now domestic content test is mentioned (FAR 25.001(c)(1), 25.100(a)(4), 25.101(a)(2), 25.200(a)(4), 25.201(b)(2), 52.225–1(b), 52.225–3(c), 52.225–9(b), and 52.225–11(b)).

D. Evaluation Factor for Determination of Unreasonable Cost

The new E.O. also increases the evaluation factors to be applied to offers of foreign end products or construction material when determining whether the cost of offered domestic end products or construction material is unreasonable. For acquisitions of end products, the factor of 20 percent is to be applied to a foreign offer if the potential domestic awardee is other than a small business, and a 30 percent factor is to be applied if the potential awardee would be a small business (see FAR 25.105(b), 25.204, 25.502(c), 25.604, 25.605, 52.225–9(b)(3)(i), 52.225–11((b)(4)(i), and the Recovery Act clauses at 52.225–21 through 52.225–24). Consistent with current FAR coverage for acquisitions of foreign construction material under a construction contract, the higher preference for small businesses is inapplicable, because under a construction contract, there are not separately identifiable offers on each item of construction material, but it is part of an overall bid on the project. The foreign material is evaluated on the basis of market research, not a specific competing offer. Thus, only the 20 percent factor would be applied to construction material.

E. Applicability to Acquisitions Funded by the Recovery Act

Projects funded with monies from section 1605 of the American Recovery and Reinvestment Act of 2009 (the Recovery Act) (Pub. L. 111–5) are subject to more stringent requirements for use of domestic manufactured construction material, particularly iron and steel (see FAR subpart 25.6). The Recovery Act restrictions apply only to construction projects using funds appropriated under that Act. Most of those funds have now been obligated and expended, and there is very little continued applicability of these regulations.

The Recovery Act does not apply to unmanufactured construction material, which is therefore still covered by the Buy American statute. The increased requirements of the new E.O. for domestic content for manufactured construction material are therefore inapplicable to acquisitions under the Recovery Act.

However, the 20 percent factor that applies to construction contracts covered by the Buy American statute, only applies to the unmanufactured construction material of a construction contract otherwise covered by the Recovery Act. Accordingly, the 6 percent factor is revised to 20 percent at FAR 25.604(c)(2) and 25.605 and in the following Recovery Act provisions and clause:

52.225–21, Required Use of American Iron, Steel, and Manufactured Goods—Buy American Statute—Construction Materials.

52.225–22, Notice of Required Use of American Iron, Steel, and Manufactured Goods—Buy American Statute—Construction Materials.

52.225–23, Required Use of American Iron, Steel, and Manufactured Goods—Buy American Statute—Construction Materials Under Trade Agreements.

52.225–24, Notice of Required Use of American Iron, Steel, and Manufactured Goods—Buy American Statute—Construction Materials Under Trade Agreements.

III. Applicability to Contracts at or Below the Simplified Acquisition Threshold (SAT) and for Commercial Items, Including Commercially Available Off-the-Shelf (COTS) Items

This proposed rule does not add any new provisions or clauses, nor change the applicability of existing provisions or clauses to contracts at or below the SAT and contracts for the acquisition of commercial items, including COTS items.

However, this rule does propose to apply the domestic content test of the Buy American statute, as implemented by E.O. 13881, to COTS items that consist wholly or predominantly of iron and steel (excluding fasteners). In accordance with 41 U.S.C. 1907, since 2008, the domestic content test of the Buy American statute has been waived for COTS items, in part due to the complexity and cost of keeping track of components in a world of global sourcing where the Government is not a market driver. However, the domestic content test for the iron and steel items does not require tracking of all components, only a good faith assurance that not more than 5 percent of the iron and steel content is foreign. In addition, absent restoration of the domestic content test, the E.O. 13881 requirement with regard to iron and steel construction material would have very little effect.

As explained above, the domestic content waiver for COTS items would continue to apply to iron and steel fasteners, such as nuts, bolts, pins, rivets, nails, clips, and screws, which are generally so small, inexpensive and comingled that trying to keep track of the origin of all fasteners would create an administrative burden that would outweigh any benefit to the American iron and steel industrial base.

IV. Executive Orders 12866 and 13563

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This is a significant regulatory action and, therefore, was subject to review under section 6(b) of E.O. 12866, Regulatory Planning and Review, dated September 30, 1993. This rule is not a major rule under 5 U.S.C. 804.

V. Expected Impact of the Proposed Rule

The current FAR clauses implementing the Buy American statute apply to a narrow set of procurements. Also, because the FAR Council is leaving the COTS items exception in place for most COTS items, the heightened domestic content requirements will not be applicable to those procurements.

When this rule is implemented, domestic industries supplying domestic end products are likely to benefit from a competitive advantage. Based on the E.O., it is unclear if the pool of qualified suppliers would be reduced, resulting in less competition (and a possible increase in prices that the Government will pay to procure these products).

At least three arguments point to the possibility that any increased burden, on contractors in particular, could be small if not de minimis: (1) Familiarization costs should be low, (2) some, if not many, contractors may already be able to meet the more stringent threshold, and (3) costs incurred by contractors who adjust their supply chains so that their end products qualify as domestic will enjoy a larger price preference that should help to offset these costs over time. Each of these arguments is explained below.

First, DoD, GSA, and NASA do not anticipate significant cost from contractor familiarization with the rule given the history of rulemaking and E.O.s in this area. The basic mechanics of the Buy American statute (*e.g.,* definitions, how and when the price preference is used to favor domestic end products, certifications required of offerors to demonstrate end products are domestic) remain unchanged and continue to reflect processes that are decades old.

Second, some, if not many, contractors may already be able to comply with the lower foreign content requirement needed to meet the definition of domestic end product under E.O. 13881 and the proposed rule. Laws such as the SECURE Technology Act, Public Law 115–390, which requires a series of actions to strengthen the Federal infrastructure for managing supply chain risks, are placing significantly increased emphasis on Federal agencies and Federal Government contractors to identify and reduce risk in their supply chains. One way to reduce supply chain risk is to increase domestic sourcing of content. In addition, in the context of iron and steel, many laws already in place call for more stringent content. For example, the Recovery Act required that all construction material for a project for the construction, alteration, maintenance, or repair of a public building or a public work in the United States, consisting wholly or predominantly of iron or steel, had to be produced in the United States when using Recovery Act funds, to the extent consistent with trade agreements (see FAR 25.602–1, implementing section 1605 of the Recovery Act). In addition, Federal contractors who also work on contracts funded under Federal grants may, in some cases, find that the steel, iron, and manufactured goods used in the project be produced in the United States, as is the case for certain funding administrated by the Federal Transit Administration for public transportation projects (see 49 U.S.C. 5323(j)). Accordingly, it is possible that the Federal market for iron and steel has already done significant retooling and could meet the requirements of E.O. 13881 without too much additional effort.

Third, it is anticipated that some contractors' products and construction materials may not meet the definition of domestic end product and construction material unless the contractors take steps to adjust their supply chains to increase the domestic content. Those contractors that make a business decision not to modify their supply chains will still be able to bid on Federal contracts but will no longer enjoy a price preference. Those contractors that sell to civilian agencies and retool their supply sources to meet the more stringent threshold will have a more generous price preference applied to their products—*i.e.,* 20 percent generally under the new rule vs. 6 percent under the current rule; 30 percent if the seller is a small business vs. 12 percent under the current rule. These stronger preferences, which are designed as an incentive to encourage more domestic sourcing, may help to offset costs of meeting the new standards.

This rule has the potential to slightly increase the estimated percentage of foreign offers. It can only impact products that are made in the United States as follows: Iron or steel that has a content of 5 percent or more of foreign iron or steel; or other products, other than COTS items, that have a content of 45 to 50 percent foreign components. Offerors of such products have an option to increase the domestic content and continue to offer domestic products, in which case they may benefit from the increased preference for domestic products, or they may choose to continue to offer the same product, which will now be evaluated as foreign. We do not have any data on how many currently domestic products would fall into this category. Nor do we have any knowledge as to which option an offeror of such products would select. With regard to the increased price preference for domestic offers, we note that robust competition among vendors offering domestic products will decrease the extent to which the Government could pay an additional 20 to 30 percent for domestic products above and beyond the cost of otherwise equivalent foreign products.

DoD, GSA, and NASA do not expect a significant cost impact on the public but lack data to make a definitive determination and seek information from the public to assist with this analysis. Feedback is requested on the following questions:

(1) What industry do you represent? Are you a manufacturer or a reseller?

(2) For manufacturers and resellers of end products other than iron and steel—

(a) Do you currently meet the higher standards specified in the proposed rule for a domestic end product or construction material or would you have to make adjustments to your supply chain to meet the new requirements?

(b) If you would have to make adjustments to your supply chain in response to changes proposed here, do you plan to do so?

(c) If the answer to question (b) is yes, how much do you think it will cost to make these changes, and to what extent do you believe this cost will be offset by the increased preference applicable to purchases by civilian agencies if you move toward products with higher domestic content?

(3) For sellers of iron and steel, what, if any, adjustments do you anticipate having to make to your supply chain to meet the new requirements, and how much do acquisition costs vary between iron and steel with less or equal than 95 percent domestic content, and greater than 95 percent domestic content?

(4) Section 4 of E.O. 13881 directed consideration of the ''feasibility and desirability'' of further decreases in the threshold percentage of foreign content allowed for an end product other than

iron or steel to be considered domestic from the 45 percent proposed in this rule to 25 percent. Accordingly, DoD, GSA, and NASA encourage manufacturers and resellers of end products other than iron and steel to provide input on the feasibility and desirability of adopting this more stringent standard by addressing the following—

(a) Could you currently meet a 25 percent foreign content requirement for domestic end products or construction material or would you have to make adjustments to your supply chain to do so?

(b) If you would have to make adjustments to your supply chain to meet a 25 percent requirement, would you do so?

(c) If the answer to question (b) is yes, how much do you think it would cost to come into compliance, how much would acquisition costs for these materials rise, and to what extent do you believe this cost would be offset by the increased preference applicable to purchases by civilian agencies?

(d) Do you think it is preferable to work towards a 25 percent threshold incrementally? If so, why and what incremental change would you propose over what period of time?

VI. Executive Order 13771

DoD, GSA, and NASA do not expect this to be considered a regulatory action under E.O. 13771, Reducing Regulation and Controlling Regulatory Costs, because this rule is expected to have a de minimis burden impact on the public (see section V of this preamble).

VII. Regulatory Flexibility Act

DoD, GSA, and NASA do not expect this rule to have a significant economic impact on a substantial number of small entities within the meaning of the Regulatory Flexibility Act, 5 U.S.C. 601, *et seq.,* because this rule does not impose new requirements just changes to the existing percentages. This rule proposes to make adjustments to the required percentage of domestic content and the existing percentages for the price evaluation preferences in an effort to decrease the amount of foreign-sourced content in a U.S. manufactured product to promote economic and national security, help stimulate economic growth, and create jobs.

Nevertheless, an Initial Regulatory Flexibility Analysis (IRFA) has been performed and summarized as follows:

This case amends the FAR to implement an Executive order regarding maximizing the use of American-made goods, products, and materials.

The objective of this proposed rule is to strengthen domestic preferences under the Buy American statute, as required by E.O. 13881, by changing how a domestic product is defined and how the price of a domestic product is determined to be unreasonable.

In accordance with Federal Procurement Data System data for fiscal years (FY) 2017, 2018, and 2019 for new awards with foreign place of performance for construction valued over the micro-purchase threshold and awards for supplies to unique small businesses; this rule will apply to only the 8 percent of foreign construction awards which were made to small businesses and, only 14 percent of foreign supply awards were made to small businesses.

Buy American statute	FY 2017	FY 2018	FY 2019	Median
	SB/Total	SB/Total	SB/Total	SB %
Construction	18/217 = 8%	13/223 = 6%	15/199 = 8%	8%
Supplies	153/1,200 = 13	164/1,161 = 14	164/1,048 = 16	14

This rule is covered under the existing information collection requirements associated with the Buy American statute. The rule will strengthen domestic preferences under the Buy American statute and provide small businesses the opportunity and incentive to deliver U.S. manufactured products from domestic suppliers. It is expected that this rule will benefit U.S. small business manufacturers, including those of iron or steel.

This rule does not duplicate, overlap, or conflict with any other Federal rules.

DoD, GSA, and NASA were unable to identify any significant alternatives.

The Regulatory Secretariat Division has submitted a copy of the IRFA to the Chief Counsel for Advocacy of the Small Business Administration. A copy of the IRFA may be obtained for the Regulatory Secretariat Division. DoD, GSA, and NASA invite comments from small business concerns and other interested parties on the expected impact of this rule on small entities.

DoD, GSA, and NASA will also consider comments from small entities concerning the existing regulations in subparts affected by the rule in accordance with 5 U.S.C. 610. Interested parties must submit such comments separately and should cite 5 U.S.C 610 (FAR Case 2019–016), in correspondence.

VIII. Paperwork Reduction Act

The Paperwork Reduction Act (44 U.S.C. chapter 35) does apply; however, these changes to the FAR do not impose additional information collection requirements to the paperwork burden previously approved under the Office of Management and Budget Control Number 9000–0024, Buy American, Trade Agreements, and Duty-Free Entry-FAR Sections Affected: 52.225–2; 52.225–4, 52.225–6, 52.225–8 thru 52.225–12, and 52.225–21 & 52.225–23.

List of Subjects in 48 CFR Parts 12, 25, and 52

Government procurement.

William F. Clark,

Director, Office of Government-wide Acquisition Policy, Office of Acquisition Policy, Office of Government-wide Policy.

Therefore, DoD, GSA, and NASA propose amending 48 CFR parts 12, 25, and 52 as set forth below:

■ 1. The authority citation for 48 CFR parts 12, 25, and 52 continues to read as follows:

Authority: 40 U.S.C. 121(c); 10 U.S.C. chapter 137; and 51 U.S.C. 20113.

PART 12—ACQUISITION OF COMMERCIAL ITEMS

■ 2. Amend section 12.505 by revising paragraph (a) to read as follows:

12.505 Applicability of certain laws to contracts for the acquisition of COTS items.

* * * * *

(a)(1) The portion of 41 U.S.C. 8302, American Materials Required for Public Use, paragraph (a)(1) that reads ‘‘substantially all from articles, materials, or supplies mined, produced, or manufactured in the United States,’’ Buy American—Supplies, domestic content test, except as provided in 25.101(a)(2)(ii) (see 52.225–1 and 52.225–3).

(2) The portion of 41 U.S.C. 8303, Contracts for Public Works, paragraph (a)(2) that reads ‘‘substantially all from articles, materials, or supplies mined, produced, or manufactured in the United States,’’ Buy American—Construction Materials, domestic content test, except as provided in 25.201(b)(2)(ii)(see 52.225–9 and 52.225–11).

* * * * *

PART 25—FOREIGN ACQUISITION

■ 3. Amend section 25.001 by revising paragraph (c)(1) to read as follows:

25.001 General.

* * * * *

(c) * * *

(1) The Buy American statute uses a two-part test to define a ''domestic end product'' or ''domestic construction material'' (manufactured in the United States and a domestic content test). The domestic content test has been waived for acquisition of commercially available off-the-shelf items, except a product that consists wholly or predominantly of iron or steel or a combination of both (excluding fasteners) (see 25.101(a) and 25.201(b)).

* * * * *

■ 4. Amend section 25.003 by—

■ a. Revising the definitions ''Domestic construction material'' and ''Domestic end product''; and

■ b. Adding in alphabetical order the definitions ''Fastener'', ''Predominantly of iron or steel or a combination of both'', and ''Steel''.

The revisions and additions read as follows:

25.003 Definitions.

* * * * *

Domestic construction material means—

(1) For use in subparts other than 25.6—

(i) For construction material that does not consist wholly or predominantly of iron or steel or a combination of both—

(A) An unmanufactured construction material mined or produced in the United States; or

(B) A construction material manufactured in the United States, if—

(*1*) The cost of the components mined, produced, or manufactured in the United States exceeds 55 percent of the cost of all its components. Components of foreign origin of the same class or kind for which nonavailability determinations have been made are treated as domestic. Components of unknown origin are treated as foreign; or

(*2*) The construction material is a COTS item; or

(ii) For construction material that consists wholly or predominantly of iron or steel or a combination of both, a construction material manufactured in the United States if the cost of iron and steel not produced in the United States (excluding fasteners) as estimated in good faith by the contractor, constitutes less than 5 percent of the cost of all the components used in such construction material (produced in the United States means that all manufacturing processes of the iron or steel must take place in the United States, except metallurgical processes involving refinement of steel additives); or

(2) For use in subpart 25.6, see the definition in 25.601.

Domestic end product means—

(1) For an end product that does not consist wholly or predominantly of iron or steel or a combination of both—

(i) An unmanufactured end product mined or produced in the United States;

(ii) An end product manufactured in the United States, if—

(A) The cost of its components mined, produced, or manufactured in the United States exceeds 55 percent of the cost of all its components. Components of foreign origin of the same class or kind as those that the agency determines are not mined, produced, or manufactured in sufficient and reasonably available commercial quantities of a satisfactory quality are treated as domestic. Components of unknown origin are treated as foreign. Scrap generated, collected, and prepared for processing in the United States is considered domestic; or

(B) The end product is a COTS item; or

(2) For an end product that consists wholly or predominantly of iron or steel or a combination of both, an end product manufactured in the United States, if the cost of iron and steel not produced in the United States (excluding fasteners) as estimated in good faith by the contractor, constitutes less than 5 percent of the cost of all the components used in the end product (produced in the United States means that all manufacturing processes of the iron or steel must take place in the United States, except metallurgical processes involving refinement of steel additives).

* * * * *

Fastener means a hardware device that mechanically joins or affixes two or more objects together. Examples of fasteners are nuts, bolts, pins, rivets, nails, clips, and screws.

* * * * *

Predominantly of iron or steel or a combination of both means that the cost of the iron and steel content in an item exceeds 50 percent of the total cost of all its components.

Steel means an alloy that includes at least 50 percent iron, between .02 and 2 percent carbon, and may include other elements.

* * * * *

■ 5. Amend section 25.100 by—

■ a. Removing from the end of paragraph (a)(2) ''and'';

■ b. Redesignating paragraph (a)(3) as paragraph (a)(4);

■ c. Adding a new paragraph (a)(3); and

■ d. Revising the newly redesignated paragraph (a)(4).

The addition and revision read as follows:

25.100 Scope of subpart.

(a) * * *

(3) Executive Order 13881, July 15, 2019; and

(4) Waiver of the domestic content test of the Buy American statute for acquisition of commercially available off-the-shelf (COTS) items in accordance with 41 U.S.C. 1907, but see 25.101(a)(2)(ii).

* * * * *

■ 6. Amend section 25.101 by—

■ a. Removing from paragraph (a) introductory text ''statute uses'' and adding ''statute and E.O. 13881 use'' in its place;

■ b. Revising paragraph (a)(2);

■ c. Removing from paragraph (b) ''component test'' and adding ''domestic content test'' in its place; and

■ d. Removing from paragraph (c) ''Subpart 25.5'' and adding ''subpart 25.5'' in its place.

The revision reads as follows:

25.101 General.

(a) * * *

(2)(i) Except for an end product that consists wholly or predominantly of iron or steel or a combination of both, the cost of domestic components must exceed 55 percent of the cost of all the components. In accordance with 41 U.S.C. 1907, this domestic content test of the Buy American statute has been waived for acquisitions of COTS items (see 12.505(a)) (but see paragraph (a)(2)(ii) of this section).

(ii) For an end product that consists wholly or predominantly of iron or steel or a combination of both, the cost of iron and steel not produced in the United States (excluding fasteners) as estimated in good faith by the contractor, must constitute less than 5 percent of the cost of all the components used in the end product. This domestic content test of the Buy American statute has not been waived for acquisitions of COTS items in this category, except for fasteners.

* * * * *

25.105 [Amended]

■ 7. Amend section 25.105 by—

■ a. Removing from paragraph (b)(1) ''6 percent'' and adding ''20 percent'' in its place; and

■ b. Removing from paragraph (b)(2) ''12 percent'' and ''Subpart 19.5'' and adding ''30 percent'' and ''subpart 19.5'' in their places, respectively.

■ 8. Amend section 25.200 by—
■ a. Removing from the end of paragraph (a)(2) ''and'';
■ b. Redesignating paragraph (a)(3) as paragraph (a)(4);
■ c. Adding a new paragraph (a)(3); and
■ d. Revising the newly redesignated paragraph (a)(4).

The addition and revision read as follows:

25.200 Scope of subpart.

(a) * * *

(3) Executive Order 13881, July 15, 2019; and

(4) Waiver of the domestic content test of the Buy American statute for acquisitions of commercially available off-the-shelf (COTS) items in accordance with 41 U.S.C. 1907, but see 25.201(b)(2)(ii).

* * * * *

■ 9. Revise section 25.201 to read as follows:

25.201 Policy.

(a) Except as provided in 25.202, use only domestic construction materials in construction contracts performed in the United States.

(b) The Buy American statute restricts the purchase of construction materials that are not domestic construction materials. For manufactured construction materials, the Buy American statute and E.O. 13881 use a two-part test to define domestic construction materials.

(1) The article must be manufactured in the United States; and

(2)(i) Except for construction material that consists wholly or predominantly of iron or steel or a combination of both, the cost of domestic components must exceed 55 percent of the cost of all the components. In accordance with 41 U.S.C. 1907, this domestic content test of the Buy American statute has been waived for acquisitions of COTS items (see 12.505(a)).

(ii) For construction material that consists wholly or predominantly of iron or steel or a combination of both, the cost of iron and steel not produced in the United States (excluding fasteners) as estimated in good faith by the contractor, must constitute less than 5 percent of the cost of all the components used in such construction material. This domestic content test of the Buy American statute has not been waived for acquisitions of COTS items in this category, except for fasteners.

25.204 [Amended]

■ 10. Amend section 25.204 in paragraph (b) by removing ''6 percent'' and adding ''20 percent'' in its place.

■ 11. Amend section 25.504–1 by—
■ a. Revising the table in paragraph (a)(1);
■ b. Removing from paragraph (a)(2) ''12 percent'' and ''$11,200'' and adding ''30 percent'' and ''$13,000'' in their places, respectively; and
■ c. Removing from paragraph (b)(2) ''12 percent'' and ''$11,424'' and adding ''30 percent'' and ''$13,260'' in their places, respectively.

The revision reads as follows:

25.504–1 Buy American statute.

(a)(1) * * *

Offer A	$16,000	Domestic end product, small business.
Offer B	15,700	Domestic end product, small business.
Offer C ...	10,000	U.S.-made end product (not domestic), small business.

* * * * *

■ 12. Amend section 25.504–2 by revising the table to read as follows:

25.504–2 WTO GPA/Caribbean Basin Trade Initiative/FTAs.

* * * * *

Offer A	$304,000	U.S.-made end product (not domestic).
Offer B	303,000	U.S.-made end product (domestic), small business.
Offer C ...	300,000	Eligible product.
Offer D ...	295,000	Noneligible product (not U.S.-made).

* * * * *

■ 13. Amend section 25.504–3 by—
■ a. Revising the entry ''Offer B'' in the table in paragraph (a);
■ b. Revising the entry ''Offer B'' in the table in paragraph (b); and
■ c. Revising entries ''Offer B'' and ''Offer C'' in the table in paragraph (c).

The revisions read as follows:

25.504–3 FTA/Israeli Trade Act.

(a) * * *

*	*	* * *
Offer B ...	$100,000	Eligible product.

* * * * *

(b) * * *

*	*	* * *
Offer B ...	$103,000	Noneligible product.

* * * * *

(c) * * *

*	*	* * *
Offer B ...	$103,000	Eligible product.
Offer C ...	100,000	Noneligible product.

* * * * *

■ 14. Amend section 25.504–4 by—
■ a. In paragraph (a)—
■ i. Revising the table;
■ ii. In STEP 1, Items 3 and 5, removing ''6 percent'' and adding ''20 percent'' in their places, respectively; and
■ iii. Revising STEP 2 and 3.
■ b. Revising paragraph (b).

The revisions read as follows:

25.504–4 Group award basis.

(a) * * *

Item	Offers		
	A	B	C
1	DO = $55,000	EL = $56,000	NEL = $50,000.
2	NEL = 13,000	EL = 10,000	EL = 13,000
3	NEL = 11,500	DO = 12,000	DO = 10,000
4	NEL = 24,000	EL = 28,000	NEL = 22,000
5	DO = 18,000	NEL = 10,000	DO = 14,000
Total	121,500	116,000	109,000

* * * * *

STEP 2: Evaluate Offer C against the tentative award pattern for Offers A and B:

Item	Offers		
	Low offer	Tentative award pattern from A and B	C
1	A	DO = $55,000	* NEL = $60,000.
2	B	EL = 10,000	EL = 13,000
3	B	DO = 12,000	DO = 10,000
4	A	NEL = 24,000	NEL = 22,000
5	B	*NEL = 12,000	DO = 14,000
Total		113,000	119,000

* Offer + 20 percent.

On a line item basis, apply a factor to any noneligible offer if the other offer for that line item is domestic.

For Item 1, apply a factor to Offer C because Offer A is domestic and the acquisition was not covered by the WTO GPA. The evaluated price of Offer C, Item 1, becomes $60,000 ($50,000 plus 20 percent). Apply a factor to Offer B, Item 5, because it is a noneligible product and Offer C is domestic. The evaluated price of Offer B is $12,000 ($10,000 plus 20 percent). Evaluate the remaining items without applying a factor.

STEP 3: The tentative unrestricted award pattern from Offers A and B is lower than the evaluated price of Offer C. Award the combination of Offers A and B. Note that if Offer C had not specified all-or-none award, award would be made on Offer C for line items 3 and 4, totaling an award of $32,000.

(b) *Example 2.*

Item	Offers		
	A	B	C
1	DO = $50,000	EL = $50,500	NEL = $50,000.
2	NEL = 10,300	NEL = 10,000	EL = 10,200
3	EL = 20,400	EL = 21,000	NEL = 20,200
4	DO = 10,500	DO = 10,300	DO = 10,400
Total	91,200	91,800	90,800

Problem: The solicitation specifies award on a group basis. Assume the Buy American statute applies and the acquisition cannot be set aside for small business concerns. All offerors are large businesses.

Analysis: (See 25.503(c))

STEP 1: Determine which of the offers are domestic (see 25.503(c)(1)):

	Domestic (percent)	Determination
A	$50,000 (Offer A1) + $10,500 (Offer A4) = $60,500 $60,500/$91,200 (Offer A Total) = 66.3%.	Domestic.
B	$10,300 (Offer B4)/$91,800 (Offer B Total) = 11.2%	Foreign.
C	$10,400 (Offer C4)/$90,800 (Offer C Total) = 11.5%	Foreign.

STEP 2: Determine whether foreign offers are eligible or noneligible offers (see 25.503(c)(2)):

	Domestic + eligible (percent)	Determination
A	N/A (Both Domestic)	Domestic.
B	$50,500 (Offer B1) + $21,000 (Offer B3) + $10,300 (Offer B4) = $81,800 $81,800/$91,800 (Offer B Total) = 89.1%.	Eligible.
C	$10,200 (Offer C2) + $10,400 (Offer C4) = $20,600 $20,600/$90,800 (Offer C Total) = 22.7%.	Noneligible.

STEP 3: Determine whether to apply an evaluation factor (see 25.503(c)(3)). The low offer (Offer C) is a foreign offer. There is no eligible offer lower than the domestic offer. Therefore, apply the factor to the low offer. Addition of the 20 percent factor (use 30 percent if Offer A is a small business) to Offer C yields an evaluated price of $108,960 ($90,800 + 20 percent). Award on Offer A (see 25.502(c)(4)(ii)). Note that, if Offer A were greater than Offer B, an evaluation factor would not be applied, and award would be on Offer C (see 25.502(c)(3)).

25.601 [Amended]

■ 15. Amend section 25.601 by removing the definition "Steel".

25.604 [Amended]

■ 16. Amend section 25.604 in paragraph (c)(2) by removing ''6 percent'' and adding ''20 percent'' in its place.

25.605 [Amended]

■ 17. Amend section 25.605 by—

■ a. Removing from paragraph (a)(2) ''6 percent'' and adding ''20 percent'' in its place; and

■ b. Removing from paragraph (a)(3) ''.06'' and adding ''.20'' in its place.

PART 52—SOLICITATION PROVISIONS AND CONTRACT CLAUSES

■ 18. Amend section 52.212–3 by—

■ a. Revising the date of the provision; and

■ b. Revising paragraphs (f)(1), (g)(1)(i), the first sentence of (g)(1)(ii), and (g)(1)(iii) introductory text.

The revisions read as follows:

52.212–3 Offeror Representations and Certifications—Commercial Items.

* * * * *

Offeror Representations and Certifications—Commercial Items (DATE)

* * * * *

(f) * * *

(1)(i) The Offeror certifies that each end product, except those listed in paragraph (f)(2) of this provision, is a domestic end product.

(ii) The Offeror shall list as foreign end products those end products manufactured in the United States that do not qualify as domestic end products.

(iii) The terms ''domestic end product,'' ''end product,'' ''foreign end product,'' and ''United States'' are defined in the clause of this solicitation entitled ''Buy American-Supplies.''

* * * * *

(g)(1) * * *

(i)(A) The Offeror certifies that each end product, except those listed in paragraph (g)(1)(ii) or (iii) of this provision, is a domestic end product.

(B) The terms ''Bahrainian, Moroccan, Omani, Panamanian, or Peruvian end product,'' ''domestic end product,'' ''end product,'' ''foreign end product,'' ''Free Trade Agreement country,'' ''Free Trade Agreement country end product,'' ''Israeli end product,'' and ''United States'' are defined in the clause of this solicitation entitled ''Buy American—Free Trade Agreements—Israeli Trade Act.''

(ii) The Offeror certifies that the following supplies are Free Trade Agreement country end products (other than Bahrainian, Moroccan, Omani, Panamanian, or Peruvian end products) or Israeli end products as defined in the clause of this solicitation entitled ''Buy American—Free Trade Agreements—Israeli Trade Act.''

* * * * *

(iii) The Offeror shall list those supplies that are foreign end products (other than those listed in paragraph (g)(1)(ii) of this provision) as defined in the clause of this solicitation entitled ''Buy American—Free Trade Agreements—Israeli Trade Act.'' The Offeror shall list as other foreign end products those end products manufactured in the United States that do not qualify as domestic end products.

* * * * *

■ 19. Amend section 52.212–5 by—

■ a. Revising the date of the clause; and

■ b. Removing from paragraphs (b)(48) and (b)(49)(i) through (iv) ''(MAY 2014)'' and adding ''(DATE)'' in their places, respectively.

The revision reads as follows:

52.212–5 Contract Terms and Conditions Required To Implement Statutes or Executive Orders—Commercial Items.

* * * * *

Contract Terms and Conditions Required To Implement Statutes or Executive Orders—Commercial Items (DATE)

* * * * *

■ 20. Amend section 52.213–4 by—

■ a. Revising the date of the clause; and

■ b. Removing from paragraph (b)(1)(xvii) introductory text ''(MAY 2014)'' and adding ''(DATE)'' in its place.

The revision reads as follows:

52.213–4 Terms and Conditions—Simplified Acquisitions (Other Than Commercial Items).

* * * * *

Terms and Conditions—Simplified Acquisitions (Other Than Commercial Items) (DATE)

* * * * *

■ 21. Amend section 52.225–1 by—

■ a. Revising the date of the clause;

■ b. In paragraph (a):

■ i. Revising the definition ''Domestic end product''; and

■ ii. Adding in alphabetical order the definitions ''Fastener'' and ''Steel''; and

■ c. Revising paragraph (b).

The revisions and additions read as follows:

52.225–1 Buy American—Supplies.

* * * * *

Buy American—Supplies (DATE)

(a) * * *

Domestic end product means—

(1) For an end product that does not consist wholly or predominantly of iron or steel or a combination of both—

(i) An unmanufactured end product mined or produced in the United States;

(ii) An end product manufactured in the United States, if—

(A) The cost of its components mined, produced, or manufactured in the United States exceeds 55 percent of the cost of all its components. Components of foreign origin of the same class or kind as those that the agency determines are not mined, produced, or manufactured in sufficient and reasonably available commercial quantities of a satisfactory quality are treated as domestic. Components of unknown origin are treated as foreign. Scrap generated, collected, and prepared for processing in the United States is considered domestic; or

(B) The end product is a COTS item; or

(2) For an end product that consists wholly or predominantly of iron or steel or a combination of both, an end product manufactured in the United States, if the cost of iron and steel not produced in the United States (excluding fasteners) as estimated in good faith by the contractor, constitutes less than 5 percent of the cost of all the components used in the end product (produced in the United States means that all manufacturing processes of the iron or steel must take place in the United States, except metallurgical processes involving refinement of steel additives).

* * * * *

Fastener means a hardware device that mechanically joins or affixes two or more objects together. Examples of fasteners are nuts, bolts, pins, rivets, nails, clips, and screws.

* * * * *

Steel means an alloy that includes at least 50 percent iron, between .02 and 2 percent carbon, and may include other elements.

* * * * *

(b) 41 U.S.C. chapter 83, Buy American, provides a preference for domestic end products for supplies acquired for use in the United States. In accordance with 41 U.S.C. 1907, the domestic content test of the Buy American statute is waived for an end product that is a COTS item (see 12.505(a)(1)), except that for an end product that consists wholly or predominantly of iron or steel or a combination of both, the domestic content test is applied only to the iron and steel content of the end product, excluding fasteners.

* * * * *

■ 22. Amend section 52.225–2 by revising the date of the provision and paragraph (a) to read as follows:

52.225–2 Buy American Certificate.

* * * * *

Buy American Certificate (DATE)

(a)(1) The Offeror certifies that each end product, except those listed in paragraph (b) of this provision, is a domestic end product.

(2) The Offeror shall list as foreign end products those end products manufactured in the United States that do not qualify as domestic end products.

(3) The terms ‘‘domestic end product,’’ ‘‘end product,’’ and ‘‘foreign end product’’ are defined in the clause of this solicitation entitled ‘‘Buy American—Supplies.’’

* * * * *

■ 23. Amend section 52.225–3 by—
■ a. Revising the date of the clause;
■ b. In paragraph (a):
■ i. Revising the definition ‘‘Domestic end product’’; and
■ ii. Adding in alphabetical order the definitions ‘‘Fastener’’ and ‘‘Steel’’;
■ c. Revising the second sentence of paragraph (c);
■ d. Revising the date in the introductory text and the second sentence of paragraph (c) of Alternate I;
■ e. Revising the date in the introductory text and the second sentence of paragraph (c) of Alternate II; and
■ f. Revising the date in the introductory text and the second sentence of paragraph (c) of Alternate III.

The revisions and additions read as follows:

52.225–3 Buy American—Free Trade Agreements—Israeli Trade Act.

* * * * *

Buy American—Free Trade Agreements—Israeli Trade Act (DATE)

(a) * * *

Domestic end product means—

(1) For an end product that does not consist wholly or predominantly of iron or steel or a combination of both—

(i) An unmanufactured end product mined or produced in the United States;

(ii) An end product manufactured in the United States, if—

(A) The cost of its components mined, produced, or manufactured in the United States exceeds 55 percent of the cost of all its components. Components of foreign origin of the same class or kind as those that the agency determines are not mined, produced, or manufactured in sufficient and reasonably available commercial quantities of a satisfactory quality are treated as domestic. Components of unknown origin are treated as foreign. Scrap generated, collected, and prepared for processing in the United States is considered domestic; or

(B) The end product is a COTS item; or

(2) For an end product that consists wholly or predominantly of iron or steel or a combination of both, an end product manufactured in the United States, if the cost of iron and steel not produced in the United States (excluding fasteners) as estimated in good faith by the contractor, constitutes less than 5 percent of the cost of all the components used in the end product (produced in the United States means that all manufacturing processes of the iron or steel must take place in the United States, except metallurgical processes involving refinement of steel additives).

■ 25. Amend section 52.225–9 by—
■ a. Revising the date of the clause;
■ b. In paragraph (a):
■ i. Revising the definition ‘‘Domestic construction material’’; and
■ ii. Adding in alphabetical order the definitions ‘‘Fastener’’ and ‘‘Steel’’;
■ c. Revising paragraph (b)(1); and
■ d. Removing from paragraph (b)(3)(i) ‘‘6 percent’’ and adding ‘‘20 percent’’ in its place.

The revisions and additions read as follows:

52.225–9 Buy American—Construction Materials.

* * * * *

Buy American—Construction Materials (DATE)

(a) * * *

Domestic construction material means—

(1) For construction material that does not consist wholly or predominantly of iron or steel or a combination of both—

(i) An unmanufactured construction material mined or produced in the United States; or

(ii) A construction material manufactured in the United States, if—

(A) The cost of its components mined, produced, or manufactured in the United States exceeds 55 percent of the cost of all its components. Components of foreign origin of the same class or kind for which nonavailability determinations have been made are treated as domestic. Components of unknown origin are treated as foreign; or

(B) The construction material is a COTS item.

(2) For construction material that consists wholly or predominantly of iron or steel or a combination of both, a construction material manufactured in the United States if the cost of iron and steel not produced in the United States (excluding fasteners) as estimated in good faith by the contractor, constitutes less than 5 percent of the cost of all components used in such construction material (produced in the United States means that all manufacturing processes of the iron or steel must take place in the United States, except metallurgical processes involving refinement of steel additives).

Fastener means a hardware device that mechanically joins or affixes two or more objects together. Examples of fasteners are nuts, bolts, pins, rivets, nails, clips, and screws.

* * * * *

Steel means an alloy that includes at least 50 percent iron, between .02 and 2 percent carbon, and may include other elements.

* * * * *

(b) * * * (1) This clause implements 41 U.S.C. chapter 83, Buy American, by providing a preference for domestic construction material. In accordance with 41 U.S.C. 1907, the domestic content test of the Buy American statute is waived for construction material that is a COTS item, except that for construction material that consists wholly or predominantly of iron or steel or a combination of both, the domestic content test is applied only to the iron and steel content of the construction materials, excluding fasteners. (See FAR 12.505(a)(2)). The Contractor shall use only domestic construction material in performing this contract, except as provided in paragraphs (b)(2) and (b)(3) of this clause.

* * * * *

■ 26. Amend section 52.225–11 by—
■ a. Revising the date of the clause;
■ b. In paragraph (a):
■ i. Revising the definition ''Domestic construction material''; and
■ ii. Adding in alphabetical order the definitions ''Fastener'' and ''Steel'';
■ c. Revising paragraph (b)(1);

[FR Doc. 2020–20116 Filed 9–11–20; 8:45 am]

BILLING CODE 6820–EP–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 600

[RTID 0648–XA356]

Magnuson-Stevens Act Provisions; General Provisions for Domestic Fisheries; Pacific Coast Groundfish Fishery; Application for an Exempted Fishing Permit

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notification; request for comments.

SUMMARY: NMFS announces the receipt of an exempted fishing permit application titled, ''*Year-round Coastwide Midwater Rockfish EFP: Monitoring and Minimizing Salmon Bycatch When Targeting Rockfish in the Shorebased IFQ Fishery, 2021–2022.*'' The application, submitted by the West Coast Seafood Processors Association, Environmental Defense Fund, Oregon Trawl Commission, and Midwater Trawlers Cooperative, requests a permit to test whether removing certain gear, time, and area restrictions for vessels fishing under the West Coast Groundfish Trawl Rationalization Program's Shorebased Individual Fishing Quota Program may impact the nature and extent of bycatch of prohibited species (*e.g.,* Chinook salmon). This exempted fishing permit would allow participating groundfish bottom and midwater trawl vessels more flexibility than allowed in current regulations to target pelagic rockfish species, such as widow, chilipepper, and yellowtail rockfish. Regulations under the Magnuson-Stevens Fishery Conservation and Management Act require publication of this notification to provide interested parties the opportunity to comment on applications for proposed exempted fishing permits.

DATES: Comments must be received no later than 5 p.m., local time on September 29, 2020.

ADDRESSES: You may submit comments on this document, identified by NOAA–NMFS–2020–0097, by the following method:

- *Electronic Submissions:* Submit all electronic public comments via the Federal e-Rulemaking Portal. Go to *www.regulations.gov/#!docketDetail;D=NOAA-NMFS-2020-0097,* click the ''Comment Now!'' icon, complete the required fields, and enter or attach your comments. The EFP application will be available under ''Supporting and Related Materials'' through the same link.

Instructions: Comments sent by any other method, to any other address or individual, or received after the end of the comment period, may not be considered by NMFS. All comments received are a part of the public record and would generally be posted for public viewing on *www.regulations.gov* without change. All personal identifying information (*e.g.,* name, address, etc.), confidential business information, or otherwise sensitive information submitted voluntarily by the sender would be publicly accessible. NMFS would accept anonymous comments (enter ''N/A'' in the required fields if you wish to remain anonymous). Attachments to electronic comments would be accepted in Microsoft Word, Excel, or Adobe PDF file formats only.

FOR FURTHER INFORMATION CONTACT: Lynn Massey, West Coast Region, NMFS, at (562) 436–2462, *lynn.massey@noaa.gov.*

SUPPLEMENTARY INFORMATION: This action is authorized by the Pacific Coast Groundfish Fishery Management Plan (FMP) and regulations at 50 CFR 600.745, which allow NMFS Regional Administrators to authorize exempted fishing permits (EFPs) to test fishing activities that would otherwise be prohibited.

At the June 2020 Pacific Fishery Management Council (Council) meeting, the Council voted to recommend that NMFS approve an EFP application titled, ''*Year-round Coastwide Midwater Rockfish EFP: Monitoring and Minimizing Salmon Bycatch When Targeting Rockfish in the Shorebased IFQ Fishery, 2021–2022*'' (herein referred to as the ''2021 Trawl Gear EFP'') for the 2021 fishing year, and made the preliminary decision to recommend continuing the EFP project in 2022. The applicants (*i.e.,* the West Coast Seafood Processors Association, Environmental Defense Fund, Oregon Trawl Commission, and Midwater Trawlers Cooperative) submitted the application as a renewal request to continue EFP research conducted since 2017; the multi-year EFP project is collectively referred to as the ''Trawl Gear EFP.'' The Trawl Gear EFP project allows up to 60 vessels participating in the West Coast Groundfish Trawl Rationalization Program's Limited Entry Shorebased Individual Fishing Quota (IFQ) Program to test whether removing certain gear, time, and area restrictions may impact the nature and extent of bycatch of protected and prohibited species (*i.e.,* Chinook salmon, coho, eulachon, and green sturgeon). Since 2017, NMFS has annually modified the suite of exemptions allowed under the Trawl Gear EFP project as certain groundfish regulations are lifted or revised. For a history of the authorized exemptions, see 81 FR 96437 (December 30, 2016) for the 2017 EFP, 82 FR 52882 (November 15, 2017) for the 2018 EFP, 83 FR 61603 (November 30, 2018) for the 2019 EFP, and 84 FR 56246 (October 22, 2019) for the 2020 EFP. Exemptions originally proposed by the applicants and published in the **Federal Register** notice for the 2020 Trawl Gear EFP were later modified to reflect regulatory changes to groundfish closed areas implemented via Amendment 28 to the Pacific Coast Groundfish FMP (*See* 84 FR 63966, November 19, 2019). The modified 2020 Trawl Gear EFP exemptions are consistent with the exemptions requested by the applicants for the 2021 and 2022 Trawl Gear EFPs (see below list).

For the 2021 Trawl Gear EFP project, the application requests exemptions from the following limited entry trawl fisheries regulations:

- For vessels fishing with *bottom trawl* groundfish gear:
  - The requirement to use selective flatfish trawl gear, and the prohibition on using small footrope gear other than selective flatfish trawl gear between 42° and 40°10′ North latitude (N) and shoreward of the boundary line approximating the 100 fathom (fm) depth contour (*See* § 660.130(c)(2)(i) and (c)(2)(ii)); and
  - The requirement that selective flatfish trawl must be a two-seamed net with no more than two riblines, excluding the codend (*See* § 660.130(b)(1)(ii)(A)).
- For vessels fishing with *midwater trawl* groundfish gear:
  - The prohibition on fishing outside the primary season dates for the Pacific whiting IFQ fishery (See § 660.112(b)(x) and § 660.130(c)(3));
  - The prohibition on fishing south of 40°10′ N lat. shoreward of the boundary line approximating the 150 fm depth contour (*See* § 660.130(c)(3)(ii) and (c)(4)(ii)(B)).
- For vessels fishing with *either midwater or bottom trawl* groundfish gear:
  - The prohibition on retaining certain prohibited species (*See* § 660.12 (a)(1)); and
  - The requirement to discard certain prohibited species at sea (*See* § 660.140 (g)(1)).

If NMFS approves this EFP, vessels fishing on an EFP trip with limited entry bottom trawl gear would be permitted to use any small footrope gear that meets the definition in regulations at § 660.11 between 42° N lat. and 40°10′ N lat and shoreward of the 100 fm depth contour. Vessels fishing on an EFP trip with limited entry bottom trawl gear would also be permitted to use both two- and four-seam selective flatfish trawl nets with two- or four-riblines, excluding the codend. Vessels fishing on an EFP trip with limited entry midwater trawl gear would be permitted to fish south of 40°10′ N lat. shoreward of the 150 fm depth contour. Additionally, vessels fishing on an EFP trip with limited entry midwater trawl gear would not be constrained to the Pacific whiting primary season dates in existing groundfish regulations. Participating vessels would be required to carry observers or use a NMFS-approved electronic monitoring system on 100 percent of trips, as is currently required in the IFQ program. Participating vessels would also be required to retain all salmon (excluding salmon already sampled by NMFS' West Coast Groundfish Observer Program) until offloading.

A goal of this EFP project is to collect information on the effects of lifting the restrictions described above on bycatch, including bycatch of Endangered Species Act (ESA)-listed salmon, eulachon, and green sturgeon. Previous analyses suggest that bycatch rates of these ESA-listed species could increase as a result of the changes in gear configurations from the Trawl Gear EFP. However, because a targeted fishery for chilipepper, widow, and yellowtail rockfish has not existed in more than a decade, and because the current groundfish trawl fishery has changed considerably in recent years, available data may have limited utility for predicting current impacts to protected and prohibited species in fisheries conducted with the exemptions that would be allowed under this EFP application being considered. NMFS staff worked with the applicants to inform their development of this EFP application, advising on what might increase the ability of fishery participants to target pelagic rockfish species while also minimizing bycatch to the extent practicable and ensuring adequate bycatch information can be collected. To address potential increased protected and prohibited species encounters, the Council recommended that EFP applicants adhere to area-based Chinook salmon bycatch limits for midwater trawl and bottom trawl EFP vessels in 2021 and 2022. Under this proposal, if Chinook salmon catch on EFP trips for either gear type reaches the applicable bycatch limit, NMFS would revoke the EFP for that gear type for the remainder of the year. If this EFP is approved, NMFS would set a bycatch limit of 1,000 Chinook salmon north of 42° N lat. and 100 Chinook salmon south of 42° N lat. for vessels declared into the EFP, regardless of gear type. If either of these bycatch limits are reached, NMFS would revoke the EFP for both gear types in the respective management area (*i.e.,* north or south of 42° N lat.).

The application includes a requirement to retain and land salmon bycatch on all EFP trips, consistent with current requirements for vessels participating in the shoreside Pacific whiting fishery. The intent of this provision is to provide a complete census of salmon bycatch for each EFP trip and maximize the amount of biological and genetic salmon samples. In the event that more salmon are landed than what the onboard observer can sample, the vessel would notify their respective state fish and wildlife agency upon returning to port to give them the opportunity to collect and sample the excess salmon bycatch.

The EFP applicants have not proposed a specific list of participating vessels, but consistent with previous years, are proposing that NMFS publish a public notice to gauge interest from limited entry groundfish midwater and bottom trawl vessels. Depending on the amount of interest and where vessels may be fishing, NMFS may need to limit participation by time and area to mitigate potential impacts.

Information collected under the EFP would be used to support analysis for potential new gear regulations and modifications to existing gear regulations. Because many of the current gear regulations have been in place for more than ten years, it is difficult for NMFS, the Council, and industry to predict the impacts of removing these regulations. In the past 10 years, the industry has changed significantly. Reduction in capacity, innovations in gear technologies, and changes in management have all contributed to these changes. The information collected through the fishing under this EFP would help demonstrate what potential impacts, if any, today's fleet may have if some of the current gear, area, and time regulations are modified from what is currently in regulation. NMFS has already used data from the prior years of the EFP project to modify regulations that were no longer necessary due to changes in the groundfish fishery and the improved status of several overfished groundfish stocks. For example, data from the 2017 and 2018 EFPs helped modify regulations that restricted the use and configuration of trawl gear via a December 3, 2018 final rule (*See* 83 FR 62269).

NMFS is proposing to approve the 2021 Trawl Gear EFP, and preliminarily approve the 2022 Trawl Gear EFP, covering all the exemptions stated above, following the conclusion of the public comment period and review of public comment. NMFS would not issue another **Federal Register** notice soliciting public comment on renewing the Trawl Gear EFP for 2022 unless: (1) The applicants modify and resubmit their application to NMFS; (2) changes to relevant trawl fisheries regulations warrant a revised set of exemptions authorized under the EFP project; or (3) NMFS' understanding of the current biological and economic impacts from EFP fishing activities substantially changes. Pending approval, NMFS would issue the permits for the EFP project to the vessel owner or designated representative as the ''EFP holder.'' NMFS intends to use an adaptive management approach in which NMFS may revise requirements and protocols to improve the program without issuing another **Federal Register** notice, provided that the modifications fall within the scope of the original EFP. In addition, the applicants may request minor modifications and extensions to the EFP throughout the course of research. NMFS may grant EFP modifications and extensions without further public notice if the changes are essential to facilitate completing the proposed research and result in only a minimal change in the scope or impacts of the initially approved EFP request.

NMFS analyzed the potential effects of implementing the 2018 Trawl Gear EFP in an environmental assessment (EA), dated December 2017 (Available at: *http://www.westcoast.fisheries.noaa.gov*). In that EA, NMFS stated that it anticipated issuing additional, similar, one-year EFPs that would cover a portion or all of the components discussed in the EA. Those EFPs would be supported by the analyses in the EA, as long as there were not substantial changes to the affected environment (*e.g.,* status of the stock), components of the EFP (*i.e.,* gear, area, and time restrictions), or unanticipated effects on the environment from permitting fishing activities that were not discussed in the EA's analysis. Since the 2021 and 2022 Trawl Gear EFPs meet those criteria, NMFS does not anticipate any environmental impacts from the 2021–2022 Trawl Gear EFP beyond those analyzed in the EA for the 2018 Trawl Gear and future similar EFPs. NMFS welcomes public comment on the NEPA coverage for this EFP.

After publication of this document in the **Federal Register**, NMFS may approve and issue permits for the EFP project after the close of the public comment period. NMFS will consider comments submitted in deciding whether to approve the application as requested. NMFS may approve the application in its entirety or may make any alterations needed to achieve the goals of the EFP.

Authority: 16 U.S.C. 1801 *et seq.,* 16 U.S.C. 773 *et seq.,* and 16 U.S.C. 7001 *et seq.*

Dated: August 25, 2020.

Jennifer M. Wallace,

Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

Notices

Federal Register

Vol. 85, No. 178

Monday, September 14, 2020

DEPARTMENT OF AGRICULTURE

Farm Service Agency

Commodity Credit Corporation

[Docket ID CCC–2020–0007]

Notice of Funds Availability (NOFA); Seafood Trade Relief Program (STRP)

AGENCY: Commodity Credit Corporation, Farm Service Agency, USDA.

ACTION: Notice.

SUMMARY: The Seafood Trade Relief Program (STRP) provides payments to eligible commercial fishermen of seafood commodities that have been impacted by trade actions of foreign governments resulting in the loss of exports. This document announces the availability of STRP funds for eligible active commercial fishermen as specified in this document, consistent with the Presidential Memorandum issued on June 24, 2020, ''Protecting the United States Lobster Industry.'' The Farm Service Agency (FSA) administers STRP on behalf of the Commodity Credit Corporation (CCC). Payments are for the purpose of expanding or aiding in the expansion of domestic markets for U.S. caught and sold seafood.

DATES: *Application period:* September 14, 2020, through December 14, 2020.

Comment Date: We will consider comments on the Paperwork Reduction Act that we receive by: November 13, 2020.

ADDRESSES: We invite you to submit comments on the information collection requirements for STRP. You may submit comments by any of the following methods, although FSA and CCC prefer that you submit comments electronically through the Federal eRulemaking Portal:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov* and search for Docket ID CCC–2020–0007. Follow the online instructions for submitting comments.
- *Mail:* William L. Beam, Deputy Administrator, Farm Programs, Farm Service Agency, USDA, 1400 Independence Ave. SW, Washington, DC 20250. In your comment, specify the docket ID CCC–2019–0007.

All comments received, including those received by mail, will be posted without change and publicly available on *http://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: William L. Beam, Deputy Administrator for Farm Programs, telephone: (202) 720–3175.

SUPPLEMENTARY INFORMATION:

Background

The Presidential Memorandum issued on June 24, 2020, ''Protecting the United States Lobster Industry,'' (*https://www.whitehouse.gov/presidential-actions/memorandum-protecting-united-states-lobster-industry/*) directs USDA to consider taking appropriate action, as permitted by law, to provide assistance to eligible U.S. commercial fishermen with seafood production that have been impacted by trade actions of foreign governments resulting in the loss of exports. USDA, in consultation with the Department of Commerce, determined that assistance was appropriate and will be made available under section 5(e) of the CCC Charter Act (15 U.S.C. 714c). This section authorizes CCC to act to increase the domestic consumption of agricultural commodities by expanding or aiding in the expansion of domestic markets or by developing or aiding in the development of new and additional markets, marketing facilities, and uses for such commodities. FSA administers STRP on behalf of CCC.

Definitions

For STRP, the following definitions apply. These definitions of ''commercial fishing'' and ''exclusive economic zone (EEZ)'' are consistent with the definitions in the regulations of the Magnuson Stevens Fishery Conservation And Management Act, National Oceanic And Atmospheric Administration, Department Of Commerce (see 50 CFR 600.10, 622.2, and 635.2).

Commercial fishing means fishing that is intended to, or results in, the barter, trade, transfer, or sale of fish, but does not include aquaculture with the exception of geoducks and salmon.

Exclusive economic zone (EEZ) means the zone established by Presidential Proclamation 5030, 3 CFR part 22, dated March 10, 1983, and is that area adjacent to the United States that, except where modified to accommodate international boundaries, encompasses all waters from the seaward boundary of each of the coastal states to a line on which each point is 200 nautical miles (370.40 km) from the baseline from which the territorial sea of the United States is measured.

Eligibility and Payment Limits for STRP

This document announces the availability of STRP payments for commercial fishermen with seafood production reported as U.S. harvested in calendar year 2019. U.S. caught and sold seafood includes those fish or shellfish caught by U.S. vessels in Canadian waters covered by the Treaty Between the Governments of Canada and the United States on Pacific Albacore Tuna Vessels and Port Privileges.

Eligible STRP production only includes marine species that are harvested by commercial fisherman who hold a valid federal or state license or permit to catch seafood, and such marine species are brought to shore and sold or transferred to another party that must be a legally permitted or licensed seafood dealer or processed at sea and sold by the same legally permitted entity that harvested or processed the product. Any seafood that is not sold to a permitted dealer or by a permitted dealer if the catch is processed at sea is ineligible for payment. Only those species and types of seafood listed in the table in this document are eligible for STRP payments. Geoducks and salmon are the only aquaculture production with estimated trade damages of more than $5 million as required by STRP.

No person or legal entity, excluding a joint venture or general partnership, as determined by the regulations in 7 CFR part 1400 may receive, directly or indirectly, more than $250,000 in payments made pursuant to this NOFA.

In general, STRP applicants with an average adjusted gross income (AGI) of $900,000 or more are not eligible to receive an STRP payment. Specifically, the $900,000 average AGI limitation provisions in 7 CFR part 1400 relating to limits on payments for persons or legal entities, excluding joint ventures and general partnerships, apply to each commercial fisherman as an applicant for STRP. The average AGI will be calculated for a person or legal entity based on the 3 complete tax years that precede the year for which the payment is made (for 2020 the tax years are 2016, 2017, and 2018). However, if the average AGI of a person or legal entity is greater than $900,000, the person or entity is not eligible to receive a STRP payment, unless at least 75 percent of the adjusted gross income of the person or entity is derived from farming, ranching, forestry, seafood production, or related activities.

State and local governments are not eligible.

In general, foreign persons are not eligible for STRP payments. Specifically, the foreign persons rules in 7 CFR part 1400, subpart E apply in determining eligibility for payments made according to this NOFA and for purposes of application of this subpart under this NOFA, production of seafood will be treated as production on a farm.

When applying, the U.S. commercial fisherman applicant will certify to FSA, on form CCC–916, the ownership share in pounds of the commercially produced seafood as reported to Federal and State fisheries, this includes harvested production in Territories of the U.S.. In order to be eligible for STRP, U.S. commercial fishermen operations must be in business at the time of application. Those commercial fishermen operations that are not in business at the time of application are therefore ineligible for STRP. A person or legal entity will be ineligible for STRP, if for a portion or all of the 2020 calendar year, such person or legal entity either:

- Does not have an ownership interest in the production; or
- Does not have a Federal or State permit for commercial fishing to harvest seafood.

Applicants must comply with the provisions of:

- This NOFA; and
- Form CCC–916 (and any required production evidence, if requested by FSA).

Application Process

Each eligible commercial fisherman applies for STRP participation once by completing a ''2020 Seafood Trade Relief Program (STRP) Application'' (form CCC–916), which is available on *www.farmers.gov* and in FSA county offices. Each applicant must submit a complete form CCC–916 either in person, by mail, email, or facsimile to an FSA county office. Applicants may submit form CCC–916 in any county office nationwide. If a producer who applies must submit additional documentation for eligibility, such as certifications of compliance with payment limitation on form CCC–902 and adjusted gross income provisions on form CCC–941, or proof of a commercial license, those additional documents and forms must be submitted no later than 60 days from the date the producer signs the application.

No STRP payment will be issued until an applicant certifies, as applicable, the quantity of 2019 commercial production reported in pounds to Federal or State fisheries. The applicant must certify to the total commercial production by the application period deadline as specified in this document.

Trade Disruptions

There remain retaliatory tariffs by China on American seafood exports, which continue to disrupt seafood markets. The extent of those disruptions can be measured by estimating the extent to which seafood trade can reasonably be expected to be impacted by those retaliatory tariffs relative to pre-tariff trade.

The STRP rates were calculated using USDA's assessment of the expected trade damage using partial equilibrium trade modeling. The model for each commodity is based on economic theory and each employ modeling frameworks and parameters widely recognized and utilized in both the academic and trade policy communities. Based on the increased tariff, the models simulate the expected reduction in U.S. exports to the retaliatory partner market, holding other factors constant. Trade damages are calculated as the difference in trade with the tariff and the baseline (without the tariff).

The expected trade impacts depend on several factors, including the tariff levels, the amount of production affected by the trade disruption, the sensitivity of the retaliating country's consumers to higher prices due to the tariffs, and the availability of substitutes for U.S. products. The trade model factors all of these variables and the damage results provide an estimate for the adjustment costs due to the trade disruption. The rates are determined by allocating the adjustment costs over the affected supply to obtain a per-unit basis.

The methodology is similar to the approach USDA employed to estimate the trade damages for U.S. commodities affected by retaliatory tariffs to establish commodity payment rates for the Market Facilitation Program (MFP) and purchase targets for the Food Purchase and Distribution Program (FPDP). USDA provided a detailed accounting of how those gross damage estimates were calculated which may be found here:

2018 MFP and FPDP: https://www.usda.gov/sites/default/files/documents/USDA_Trade_Methodology_Report_2018.pdf.

2019 MFP and FPDP: https://www.usda.gov/sites/default/files/documents/USDA_Trade_Methodology_Report_2019.pdf.

Payment Rates and Payment Calculations

Data on impacted seafood tariffs [1] and global trade flows of seafood products in 2017 [2] was used to estimate gross trade damages. Average domestic landings between 2017 and 2019 were used to determine payment rates per pound of eligible commodity.[3] Commodities with estimated trade damages of less than $5 million were not considered.

Species group [1]	Value of China's imports of U.S. seafood products (2017) [2] (in million $)	Trade damage (model estimates) (in million $)	U.S. domestic landings (2017–2019) [3] (in million lbs)
Salmon	$319	$135	840
Sole, Flounder, and Turbot	185	78	525
Pacific Cod	177	75	545
Lobsters	167	71	142

[1] The average size of China's retaliatory tariff on U.S. seafood products is 30%.

[2] Trade Data Monitor.

[3] NOAA fisheries.

Species group [1]	Value of China's imports of U.S. seafood products (2017) [2] (in million $)	Trade damage (model estimates) (in million $)	U.S. domestic landings (2017–2019) [3] (in million lbs)
Crabs (Dungeness, King, Snow, and Southern tanner)	113	48	103
Pollock	90	38	3,368
Atka Mackerel, Sablefish, Goosefish, Pacific ocean perch	80	34	330
Squid	76	32	160
Tunas	18	7.5	59
Geoduck	15	6.4	8.4
Herrings	14	5.9	137

[1] Commodities with estimated trade damages of less than $5 million were not considered.
[2] Source: Trade Data Monitor.
[3] Source: NOAA fisheries

The STRP seafood payment rate is on a per pound basis as shown in the following table.

Seafood	Rate ($/lb.)
Atka mackerel	$0.10
Crab -Dungeness	0.47
Crab, King	0.47
Crab, Snow	0.47
Crab, Southern Tanner	0.47
Flounder	0.15
Geoduck	0.76
Goosefish	0.10
Herring	0.04
Lobster	0.50
Pacific Cod	0.14
Pacific Ocean Perch	0.10
Pollock	0.01
Sablefish	0.10
Salmon	0.16
Sole	0.15
Squid	0.20
Tuna	0.13
Turbot	0.15

Those payment rates reflect the estimated severity of the impact of trade disruptions to U.S. seafood caught and sold commercially, and the adjustment to new trade patterns for the types of seafood products identified in this document.

The actual production (in pounds) used to calculate an STRP payment under this document is not to exceed the 2019 reported commercial production in which the applicant had an ownership share (greater than zero shares) for seafood caught in U.S. territorial waters, including seafood caught in EEZs as authorized by treaties between the United States and Canada. The STRP payment, subject to the payment limit, will be calculated as follows:

Commercial Fisherman's Share of Production of Seafood Commodity (in pounds) × STRP Payment Rate

For example, a commercial fisherman submits an application specifying cod landings for 2019 as 375,000 pounds. FSA calculates the payment by multiplying 375,000 × $0.14.

Production Evidence

To apply for an STRP payment for seafood, on the application, the applicant commercial fisherman will certify the amount of commercial landings in pounds for the 2019 season. If requested by FSA, the commercial fisherman must also provide supporting documentation to provide production evidence for the amount and type of certified landings.

Examples of acceptable documentation for production evidence include: legal commercial fishing production records that are determined acceptable by the FSA county committee as verified by the appropriate Federal or State fishery management agency.

Paperwork Reduction Act Requirements

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), FSA is requesting comments from interested individuals and organizations on the information collection activities related to STRP. After the 60-day period ends, the information collection request will be submitted to OMB for the 3-year approval to cover STRP information collection.

To start the STRP information collection approval, prior to publishing this document, FSA received emergency approval from OMB for 6 months. The emergency approval covers STRP information collection activities.

Title: Seafood Trade Relief Program (STRP).

OMB Control Number: 0560–New.

Type of Request: New Collection.

Abstract: This information collection is required to support all STRP information collection activities (applicable notifications published in the **Federal Register**) to provide payments to the eligible applicants, with respect to seafood that have been impacted by trade actions of foreign governments resulting in the loss of exports. The information collection is necessary to evaluate the application and other required paperwork for determining the commercial fisherman's eligibility and assist in commercial fisherman's payment calculations.

To start the STRP collection approval, FSA received emergency approval from OMB for 6 months. The emergency approval covers this NOFA and any other STRP information collection activities.

For the following estimated total annual burden on respondents, the formula used to calculate the total burden hour is the estimated average time per response multiplied by the estimated total annual responses.

Public reporting burden for this information collection is estimated to include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed and completing and reviewing the collections of information.

Type of Respondents: Commercial fishermen.

Estimated Annual Number of Respondents: 43,000.

Estimated Number of Reponses per Respondent: 5.03.

Estimated Total Annual Responses: 216,300.

Estimated Average Time per Response: 0.399 hours.

Estimated Total Annual Burden on Respondents: 86,308 hours.

FSA is requesting comments on all aspects of this information collection to help us to:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the FSA, including whether the information will have practical utility;

(2) Evaluate the accuracy of the FSA's estimate of burden including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this document, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission for Office of Management and Budget approval.

Environmental Review

The environmental impacts for STRP have been considered in a manner consistent with the provisions of the National Environmental Policy Act (NEPA, 42 U.S.C. 4321–4347), the regulations of the Council on Environmental Quality (40 CFR parts 1500–1508), and the FSA regulation for compliance with NEPA (7 CFR part 799).

As previously stated, the intent of STRP is to provide financial assistance to commercial fishermen for expanding or aiding in the expansion of domestic markets for U.S. commercially caught and sold seafood, because seafood commodities have been impacted by trade actions of foreign governments resulting in the loss of exports. The limited discretionary aspects of STRP (for example, determining AGI and payment limitations) were designed to be consistent with established FSA and CCC programs, but also take into account certain differences associated with seafood production from crop production. These discretionary aspects do not have the potential to impact the human environment as they are administrative. Accordingly, the following Categorical Exclusions in 7 CFR part 799.31 apply:

- § 799.31(b)(6)(iii) applies to financial assistance to supplement income, manage the supply of agricultural commodities, or influence the cost and supply of such commodities; and
- § 799.31(b)(6)(iv) applies to individual farm participation in FSA programs where no ground disturbance or change in land use occurs as a result of the proposed action or participation.

No Extraordinary Circumstances (§ 799.33) exist. As such, the implementation of STRP and the participation in STRP do not constitute major Federal actions that would significantly affect the quality of the human environment, individually or cumulatively. Therefore, CCC will not prepare an environmental assessment or environmental impact statement for this action and this document serves as documentation of the programmatic environmental compliance decision for this federal action.

Federal Assistance Programs

The title and number of the Federal assistance programs, as found in the Catalog of Federal Domestic Assistance, to which this document applies is 10.131—Seafood Trade Relief Program.

Richard Fordyce,

Administrator, Farm Service Agency.

Robert Stephenson,

Executive Vice President, Commodity Credit Corporation.

[FR Doc. 2020–20143 Filed 9–9–20; 11:15 am]

BILLING CODE 3410–05–P

DEPARTMENT OF AGRICULTURE

Forest Service

Information Collection: Federal and Non-Federal Financial Assistance Instruments

AGENCY: Forest Service, Agriculture (USDA).

ACTION: Notice; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Forest Service is seeking comments from all interested individuals and organizations on the adoption of a new form to replace multiple versions of a currently approved information collection, OMB 0596–0217, Federal and Non-Federal Financial Assistance Instruments.

DATES: Comments must be received in writing on or before November 13, 2020 to be assured of consideration. Comments received after that date will be considered to the extent practicable.

ADDRESSES: Comments concerning this notice should be addressed to Jacqueline Henry, USDA Forest Service, Director for Office of Grants and Agreements, 1400 Independence Ave. SW, Mailstop 1138, Washington, DC 20250.

Comments also may be submitted via facsimile to 703–605–4776 or by email to: *jacqueline.henry@usda.gov.*

The public may inspect comments received at USDA Forest Service, 1400 Independence Ave. SW, Washington, DC 20250, during normal business hours. Visitors are encouraged to call ahead to 703–605–4776 to facilitate entry to the building.

FOR FURTHER INFORMATION CONTACT: Jacqueline Henry, Director for Office of Grants and Agreements, telephone 703–605–4776.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339, 24 hours a day, 7 days a week, including holidays.

SUPPLEMENTARY INFORMATION:

Title: Federal and Non-Federal Financial Assistant Instruments.

OMB Number: 0596–0217.

Expiration Date of Approval: 11/30/2017.

Type of Request: Renewal with change.

Abstract: In order to perform specific Forest Service activities, Congress created several authorities to assist the Agency in carrying out its mission. The Forest Service issues partnership agreements under specific authorities exempt from the Federal Grants and Cooperative Agreements Act (FGCAA). This collection is for a new form that will be used to enter into the following agreement types by the Forest Service:

(1) Participating Agreements (replaces FS–1500–16 and 16A through 16G),

(2) Cost-Reimbursable Agreement (replaces FS–1500–12),

(3) Joint Venture Agreement (replaces FS–1500–14 and 14A),

(4) Cooperative Research and Development Agreements (replaces FS1500–13 through 13B); and,

(5) Challenge Cost-Share Agreement (replaces FS–1500–10 and 10A through 10C).

In addition to Federal Financial Assistance (FFA), Congress created specific authorizations for acts outside the scope of the FGCAA. Appropriations language was developed to convey authority for the Forest Service to enter into relationships that are outside the scope of the FGCAA. The Forest Service implements these authorizations using instruments such as collection agreements, FGCAA exempted agreements, memorandums of understanding, and other agreements which mutually benefit participating parties. These instruments fall outside the scope of the Federal Acquisition Regulations (FAR) and often require financial plans and statements of work. Forest Service employees collect information from cooperating parties from the pre-award to the closeout stage via telephone calls, emails, postal mail, and person-to-person meetings to create, develop, and administer these funded and non-funded agreements. The multiple means for respondents to communicate their responses include forms, non-forms, electronic documents, face-to-face, telephone, and internet. The scope of information collected varies; however, it typically includes the project type, project scope, financial plan, statement of work, and cooperator's business information.

The Forest Service would not be able to create, develop, and administer these funded and non-funded agreements without the collected information. The Agency would also be unable to develop or monitor projects, make or receive payments, or identify financial and accounting errors.

Estimate of Annual Burden: 1 to 4 hours annually per person.

Type of Respondents: Non-profit and for profit institutions; institutions of higher education; State, local, and Native American tribal governments, individuals; foreign governments; and organizations.

Estimated Annual Number of Respondents for New Form: 1,875.

Estimated Annual Number of Responses per Respondent: 1 to 4.

Estimated Total Annual Burden on Respondents: 7,500 hours.

Comment is invited on: (1) Whether this collection of information is necessary for the stated purposes and the proper performance of the functions of the Agency, including whether the information will have practical or scientific utility; (2) the accuracy of the Agency's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on respondents, including the use of automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All comments received in response to this notice, including names and addresses when provided, will be a matter of public record. Comments will be summarized and included in the submission for Office of Management and Budget approval.

Jacqueline Henry,

Director, Grants and Agreements Policy.

[FR Doc. 2020–20195 Filed 9–11–20; 8:45 am]

BILLING CODE 3411–15–P

DEPARTMENT OF AGRICULTURE

Forest Service

Tongass National Forest, Thorne Bay Ranger District; Alaska; Twin Mountain II Timber Sale

AGENCY: Forest Service, Agriculture (USDA).

ACTION: Notice of intent to prepare an environmental impact statement.

SUMMARY: The Forest Service will prepare an Environmental Impact Statement (EIS) for the Twin Mountain II Timber Sale, which proposes to offer timber for harvest in the Staney and Red Bay areas within the Thorne Bay Ranger District, Tongass National Forest. The Proposed Action would offer for harvest about 42 million board feet of timber from approximately 3,000 acres. In addition, transportation management activities such as road construction, reconstruction, maintenance and decommissioning are proposed.

DATES: Comments concerning the scope of the analysis must be received by [October 14, 2020. The draft EIS is expected December 2020 and the final EIS is expected May 2021.

ADDRESSES: Send written comments to the Thorne Bay Ranger District, Attn: Twin Mountain II Timber Sale, P.O. Box 19001, Thorne Bay, Alaska, 99919. Comments may also be sent electronically to *https://cara.ecosystem management.org/Public/CommentInput?Project=58626,* or via facsimile to 907–828–3309. In all correspondence, include your name, address, and organization name if you are commenting as a representative of an organization.

FOR FURTHER INFORMATION CONTACT: Lucy Maldonado, Planning Staff, Thorne Bay Ranger District, P.O. Box 19001, Thorne Bay, Alaska 99919 or by phone at 907–828–3250.

Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday.

SUPPLEMENTARY INFORMATION: This EIS will tier to and incorporate by reference the 2016 Tongass Land and Resource Management Plan (Forest Plan) Amendment Final EIS. The project area is located on Prince of Wales Island, approximately 75 to 100 miles west of Ketchikan, Alaska, within the Staney and Red Bay areas of the Thorne Bay Ranger District, Tongass National.

Purpose and Need for Action

The purpose of the Twin Mountain II Timber Sale is to implement the 2016 Forest Plan direction to move the project area toward the desired future conditions described in the plan. More specifically, the purpose is to manage the timber resource for production of sawtimber and other wood products and to meet multiple resource objectives. There is a need to provide a sustainable level of forest products to contribute to the economic sustainability of the region. Providing old-growth timber would preserve a viable timber industry by providing timber volume in an economically efficient manner while providing jobs and opportunities for Southeast Alaska residents.

Proposed Action

The Forest Service proposes to make approximately 42 million board feet (MMBF) of old growth timber available to offer for harvest and construct and reconstruct roads in the Staney and Red Bay areas within the Thorne Bay Ranger District. Timber would be made available to offer for harvest up to 3,000 acres of old-growth forest in the Modified Landscape and Timber Production land use designation areas, using one or more timber sales that would be implemented over the course of 5 to 10 years. The proposed action includes about 1,800 acres of even-aged management and about 1,200 acres of uneven-aged management, with estimated volume for even-aged management being 32.4 MMBF and 9.6 MMBF for uneven-aged management. The proposed action includes approximately 3 miles of new National Forest System road construction, 11 miles of new temporary road construction, and the reconditioning of approximately 35 miles of existing roads. Existing rock quarries would be used as available or new quarries would be developed as necessary to provide materials for road construction. Existing log transfer facilities at El Capitan, Exchange Cove, Lab Bay, Naukati, and Winter Harbor could be used. Under the proposed action, no young growth timber is proposed to be made available for harvest and no activities would occur within designated roadless areas. No special timber cutting prescriptions around communities are included in the proposed action.

Responsible Official

The Responsible Official for this project is the Tongass Forest Supervisor, Earl Stewart.

Nature of Decision To Be Made

Given the purpose and need of the project, the Forest Supervisor will review alternatives and consider the environmental consequences of those alternatives in making his decisions, including: (1) Whether to select the proposed action or another alternative; (2) the effects of road construction, reconstruction, and closure; (3) mitigation measures and monitoring; and (4) whether there may be a significant restriction to subsistence resources.

Preliminary Issues

Preliminary concerns identified by the interdisciplinary team include: (1) Designing an economical timber sale(s) that contributes to meeting market demand; (2) effects of timber harvest and road construction on wildlife, including habitat, travel corridors, and subsistence use of deer; and (3) effects of timber harvest and road construction on watershed condition.

Permits or Licenses Required

All necessary permits will be obtained prior to project implementation.

Scoping Process

This notice of intent initiates the scoping process, which guides the development of the EIS. The Forest Service is soliciting internal and external input on the issues, impacts, and alternatives that will be addressed in the EIS. Scoping packages will be distributed to interested parties who have subscribed through an electronic mailing list to receive project information. Individuals and organizations wishing to subscribe may do so at: *https://public.govdelivery.com/accounts/USDAFS/subscriber/new?preferences=true.*

Additionally, there will be opportunities for involvement including open houses and subsistence hearings held in Prince of Wales Island communities. Project information, meeting announcements, notices, and documents will be provided on the project web page at: *http://www.fs.fed.us/nepa/nepa_project_exp.php?project=58626.*

Forest Service regulations at 36 CFR part 218, subparts A and B (78 FR18481–18504) regarding the project-level, predecisional administrative review process applies to projects and activities implementing land management plans. The Twin Mountain II Timber Sale is an activity implementing the Forest Plan and is subject to 36 CFR 218.

Only individuals or entities who submit timely and specific written comments concerning this project during this or other designated public comment periods established by the Responsible Official will be eligible to file an objection. It is important that reviewers provide their comments at such times and in such manner that they are useful to the agency's preparation of the EIS. Therefore, comments should be provided prior to the close of the comment period and should clearly articulate the reviewer's concerns and contentions.

Comments received in response to this solicitation, including names and addresses of those who comment, will be part of the public record for this proposed action. While comments submitted anonymously will be accepted and considered, they will not provide the submitters standing to participate in the predecisional review process.

Allen Rowley,

Associate Deputy Chief, National Forest System.

[FR Doc. 2020–20190 Filed 9–11–20; 8:45 am]

BILLING CODE 3411–15–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–29–2020]

Foreign-Trade Zone (FTZ) 148—Knoxville, Tennessee; Authorization of Production Activity; CoLinx, LLC; (Tapered Roller Bearing Unit and Gearhead Kitting) Crossville, Tennessee

On May 7, 2020, CoLinx, LLC (CoLinx) submitted a notification of proposed production activity to the FTZ Board for its facility within FTZ 148, in Crossville, Tennessee.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (85 FR 29397–29398, May 15, 2020). On September 4, 2020, the applicant was notified of the FTZ Board's decision that no further review of the activity is warranted at this time. The production activity described in the notification was authorized, subject to the FTZ Act and the FTZ Board's regulations, including Section 400.14.

Dated: September 4, 2020.

Andrew McGilvray,

Executive Secretary.

[FR Doc. 2020–20219 Filed 9–11–20; 8:45 am]

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[B–57–2020]

Foreign-Trade Zone (FTZ) 7—Mayaguez, Puerto Rico; Notification of Proposed Production Activity; Patheon Puerto Rico, Inc. (Pharmaceutical Products); Manatí, Puerto Rico

Patheon Puerto Rico, Inc. (Patheon), submitted a notification of proposed production activity to the FTZ Board for its facility in Manatí, Puerto Rico. The notification conforming to the requirements of the regulations of the FTZ Board (15 CFR 400.22) was received on September 2, 2020.

Patheon already has authority to produce certain pharmaceutical products within Subzone 7L. The current request would add a foreign status material to the scope of authority. Pursuant to 15 CFR 400.14(b), additional FTZ authority would be limited to the specific foreign-status material described in the submitted notification (as described below) and subsequently authorized by the FTZ Board.

Production under FTZ procedures could exempt Patheon from customs duty payments on the foreign-status material used in export production. On its domestic sales, for the foreign-status material noted below, Patheon would be able to choose the duty rates during customs entry procedures that apply to its already authorized finished products (duty-free). Patheon would be able to avoid duty on the foreign-status material which becomes scrap/waste. Customs duties also could possibly be deferred or reduced on foreign-status production equipment.

The material sourced from abroad is microcrystalline cellulose (duty rate 5.2%). The request indicates that microcrystalline cellulose is subject to duties under Section 301 of the Trade Act of 1974 (Section 301), depending on the country of origin. The applicable Section 301 decisions require subject merchandise to be admitted to FTZs in privileged foreign status (19 CFR 146.41).

Public comment is invited from interested parties. Submissions shall be addressed to the Board's Executive Secretary and sent to: *ftz@trade.gov.* The closing period for their receipt is October 26, 2020.

A copy of the notification will be available for public inspection in the ''Reading Room'' section of the Board's website, which is accessible via *www.trade.gov/ftz.*

For further information, contact Christopher Wedderburn at *Chris.Wedderburn@trade.gov* or (202) 482–1963.

Dated: September 9, 2020.

Elizabeth Whiteman,

Acting Executive Secretary.

Foreign-Trade Zone (FTZ) 183—Austin, Texas; Authorization of Production Activity; Rohr, Inc. (Aircraft Engine Parts); San Marcos, Texas

On May 8, 2020, Rohr, Inc. submitted a notification of proposed production activity to the FTZ Board for its facility within Subzone 183D, in San Marcos, Texas.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (85 FR 30928, May 21, 2020). On September 8, 2020, the applicant was notified of the FTZ Board's decision that no further review of the activity is warranted at this time. The production activity described in the notification was authorized, subject to the FTZ Act and the FTZ Board's regulations, including Section 400.14.

Dated: September 8, 2020.

International Trade Administration

Announcement of Upcoming US–UK Financial Innovation Partnership (FIP) Trade Mission to the United Kingdom and Education Trade Mission to India

AGENCY: International Trade Administration, Department of Commerce.

SUMMARY: The United States Department of Commerce, International Trade Administration (ITA) is announcing two upcoming trade missions that will be recruited, organized, and implemented by ITA. These missions are: US-UK Financial Innovation Partnership Trade Mission to the United Kingdom—June 21–24, 2021; Education Trade Mission to India—August 2–7, 2021. A summary of each mission is found below. Application information and more detailed mission information, including the commercial setting and sector information, can be found at the trade mission website: *https://www.trade.gov/trade-missions.* For each mission, recruitment will be conducted in an open and public manner, including publication in the **Federal Register**, posting on the Commerce Department trade mission calendar (*https://www.trade.gov/trade-missions-schedule*) and other internet websites, press releases to general and trade media, direct mail, broadcast fax, notices by industry trade associations and other multiplier groups, and publicity at industry meetings, symposia, conferences, and trade shows.

FOR FURTHER INFORMATION CONTACT: Gemal Brangman, Trade Promotion Programs, Industry and Analysis, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone (202) 482–3773.

SUPPLEMENTARY INFORMATION:

The Following Conditions for Participation Will Be Used for Each Mission

Applicants must submit a completed and signed mission application and supplemental application materials, including adequate information on their products and/or services, primary market objectives, and goals for participation to allow the Department of Commerce to evaluate their application. If the Department of Commerce receives an incomplete application, the Department may either: reject the application, request additional information/clarification, or take the lack of information into account when evaluating the application. If the requisite minimum number of participants is not selected for the mission by the recruitment deadline, the mission may be cancelled.

Each applicant must also certify that the products and services it seeks to export through the mission are either produced in the United States, or, if not, are marketed under the name of a U.S. firm and have at least 51% U.S. content by value. In the case of an organization, the applicant must certify that, for each entity to be represented by the organization, the products and/or services the represented firm or service provider seeks to export are either produced in the United States or, if not, marketed under the name of a U.S. firm and have at least 51% U.S. content.

An organization applicant must certify to the above for all of the companies it seeks to represent on the mission.

In addition, each applicant must:

- Certify that the export of products and services that it wishes to market through the mission is in compliance with U.S. export controls and regulations;
- Certify that it has identified any matter pending before any bureau or office in the Department of Commerce;
- Certify that it has identified any pending litigation (including any administrative proceedings) to which it is a party that involves the Department of Commerce; and
- Sign and submit an agreement that it and its affiliates (1) have not and will not engage in the bribery of foreign officials in connection with a company's/participant's involvement in this mission, and (2) maintain and enforce a policy that prohibits the bribery of foreign officials.

In the case of a trade association/organization, the applicant must certify that each firm or service provider to be represented by the association/organization can make the above certifications.

The Following Selection Criteria Will Be Used for Each Mission

Targeted mission participants are U.S. firms, services providers and organizations (universities, research institutions, or financial services trade associations) providing or promoting U.S. products and services that have an interest in entering or expanding their business in the mission's destination country. The following criteria will be evaluated in selecting participants:

- Suitability of the applicant's (or in the case of an organization, represented firm's or service provider's) products or services to these markets;
- The applicant's (or in the case of an organization, represented firm's or service provider's) potential for business in the markets, including likelihood of exports resulting from the mission; and
- Consistency of the applicant's (or in the case of an organization, represented firm's or service provider's) goals and objectives with the stated scope of the mission.

Balance of applicant's size and location may also be considered during the review process.

Referrals from a political party or partisan political group or any information, including on the application, containing references to political contributions or other partisan political activities will be excluded from the application and will not be considered during the selection process. The sender will be notified of these exclusions.

Trade Mission Participation Fees

If and when an applicant is selected to participate on a particular mission, a payment to the Department of Commerce in the amount of the designated participation fee below is required. Upon notification of acceptance to participate, those selected have 5 business days to submit payment or the acceptance may be revoked.

Participants selected for a trade mission will be expected to pay for the cost of personal expenses, including, but not limited to, international travel, lodging, meals, transportation, communication, and incidentals, unless otherwise noted. Participants will, however, be able to take advantage of U.S. Government rates for hotel rooms. In the event that a mission is cancelled, no personal expenses paid in anticipation of a mission will be reimbursed. However, participation fees for a cancelled mission will be reimbursed to the extent they have not already been expended in anticipation of the mission.

If a visa is required to travel on a particular mission, applying for and obtaining such a visa will be the responsibility of the mission participant. Government fees and processing expenses to obtain such a visa are not included in the participation fee. However, the Department of Commerce will provide instructions to each participant on the procedures required to obtain business visas.

Trade Mission members participate in trade missions and undertake mission-related travel at their own risk. The nature of the security situation in a given foreign market at a given time cannot be guaranteed. The U.S. Government does not make any representations or guarantees as to the safety or security of participants. The U.S. Department of State issues U.S. Government international travel alerts and warnings for U.S. citizens available at *https://travel.state.gov/content/travel/en/traveladvisories/traveladvisories.html/*. Any question regarding insurance coverage must be resolved by the participant and its insurer of choice.

Definition of Small- and Medium-Sized Enterprise

For purposes of assessing participation fees, an applicant is a small or medium-sized enterprise (SME) if it qualifies under the Small Business Administration's (SBA) size standards (*https://www.sba.gov/document/support--table-size-standards*), which vary by North American Industry Classification System (NAICS) Code. The SBA Size Standards Tool [*https://www.sba.gov/size-standards/*] can help you determine the qualifications that apply to your company.

Mission List: (additional information about each mission can be found at *https://www.trade.gov/trade-missions*).

U.S.-UK Financial Innovation Partnership Trade Mission to the United Kingdom

Dates: June 21–24, 2021

Summary

The United States Department of Commerce, International Trade Administration (ITA) is organizing a financial services trade mission to the United Kingdom in conjunction with the United States-United Kingdom Financial Innovation Partnership Initiative from June 21 to 24, 2021.

The purpose of the U.S.-UK Financial Innovation Partnership (FIP) trade mission is to expand opportunities for U.S. companies at the intersection of financial services, technology and international commerce. The FIP was established in May 2019 with the intent of encouraging collaboration in the private sector, sharing information and expertise about regulatory practices, and promoting growth and innovation. The FIP focuses on two main areas—regulatory engagement and commercial engagement. The FIP also seeks to promote a dynamic private sector that supports entrepreneurs and new business models—a necessary driver of financial innovation. The FIP was specifically mentioned during the first round of U.S.-UK Free Trade Agreement negotiations in May 2020, as an important bilateral dialogue that reflects a bilateral commitment to open markets and the importance of the financial services sector.

The FIP commercial engagement pillar provides for enhanced and regular opportunities for the private sector in one country to engage with industry associations and market participants in the other country. Participants in the FIP Trade Mission will gain market insights, make industry contacts, solidify business strategies, and discuss enabling policies, with the primary goal of increasing U.S. exports of products and services to the UK. The FIP mission will include, where available, customized business appointments with pre-screened potential business partners, such as buyers, agents, distributors and/or joint venture partners; meetings with subnational and/or local government officials and industry leaders; and networking events.

Proposed Timetable

Monday, June 21, 2021	• Trade Mission Participants Arrive. • No Host Dinner/Delegation Meet Up/Evening Activity (i.e., London Eye).
Tuesday, June 22, 2021	• Opening Breakfast at Winfield House (Regents Park). • FCA Sandbox Discussion (Stratford). • Level 39 Accelerator Show Round and Visit with Key Tenants (Canary Wharf). • Evening Reception—TBC Bank/Venue in Canary Wharf.
Wednesday, June 23, 2021	• 7:30 am Opening of London Stock Exchange Networking, Ceremony, and Information on Listing on the Exchange (St Paul's).

	• Bank of England Show Round and Discussion (Bank). • Delegation: Lunch on Own (Bank/Various); DAS: Programming with DIT Counterparts (Whitehall). • FIP Roundtable Discussion with HMG, FinTech Alliance at U.S. Embassy (Vauxhall). • Evening Reception (Sponsored/Venue TBC).
Thursday, June 24, 2021	• Pitch Fest Half Day Forum at U.S. Embassy (Vauxhall). • *Official Trade Mission Program Concludes.*

* **Note:** The final schedule and potential site visits will depend on the availability of host government and business officials, specific goals of mission participants, and ground transportation.

Participation Requirements

All parties interested in participating in the trade mission must complete and submit an application package for consideration by the Department of Commerce. All applicants will be evaluated on their ability to meet certain conditions and best satisfy the selection criteria as outlined below. A minimum of 10 and maximum of 15 firms and/or trade associations will be selected to participate in the mission from the applicant pool.

Fees and Expenses

After a firm or trade association has been selected to participate on the mission, a payment to the Department of Commerce in the form of a participation fee is required. The participation fee for the United States—United Kingdom Financial Innovation Partnership (FIP) trade mission will be $2,800 for small or medium-sized enterprises (SMEs); and $4,500 for large firms or organization. The fee for each additional firm representative (large firm or SME/trade organization) is $750. When an applicant is selected to participate on the mission, a payment to the Department of Commerce in the amount of the designated participation fee is required. Upon notification that they have been selected to participate, those selected have 5 business days to submit payment or the acceptance may be revoked.

Timeframe for Recruitment and Application

Mission recruitment will be conducted in an open and public manner, including publication in the **Federal Register**, posting on the Commerce Department trade mission calendar (*https://www.trade.gov/trade-missions-schedule*) and other internet websites, press releases to general and trade media, direct mail, notices by industry trade associations and other multiplier groups, and publicity at industry meetings, symposia, conferences, and trade shows. Recruitment for the mission will begin immediately and conclude no later than December 18, 2020. The U.S. Department of Commerce will review applications and inform applicants of selection decisions on a comparative basis. Applications received after December 18, 2020, will be considered only if space and scheduling constraints permit.

Education Trade Mission to India

Dates: August 2–7, 2021

Summary

The United States Department of Commerce, International Trade Administration, U.S. Commercial Service is organizing an education industry trade mission to three cities in India: New Delhi, Bengaluru and Mumbai from August 2 to 7, 2021. This mission will include representatives from regionally accredited graduate and undergraduate schools, educational technology companies, and state study consortia whose members are also appropriately accredited at the regional level. This mission will seek to connect U.S. educational institutions and businesses operating in the educational sector to potential students, university/institution partners, and education consultants in India. The mission will include one-on-one appointments with potential partners, embassy briefings, and student fairs and networking events in New Delhi, Bengaluru, and Mumbai to recruit Indian students to the United States.

In addition to the three cities in the mission, participants may choose optional spin offs in up to four markets (Kolkata, Ahmedabad, Hyderabad and Chennai) in India, for business-to-business meetings.

Proposed Timetable

New Delhi	Travel Day/Arrival in New Delhi. *Optional No Host Cultural Activities*.
Monday, August 2, 2021	New Delhi: Briefing, One-on-One matchmaking meetings; Hosted Lunch; Evening: Icebreaker Reception.
Tuesday, August 3, 2021	Half day site visit—or student fair; Late afternoon departure for Bengaluru.
Bengaluru	Travel Day/Arrival in Bengaluru. Optional Local Tour/Activities.
Wednesday, August 4, 2021	Bengaluru: Briefing, One-on-One matchmaking meetings; Hosted Lunch.
Thursday, August 5, 2021	Half day site visit—or student fair; Late afternoon departure for Mumbai.
Mumbai	Travel Day/Arrival in Mumbai. *Optional No Host Cultural Activities*.
Friday, August 6, 2021	Mumbai: Briefing, One-on-One matchmaking meetings; Hosted Lunch. Student fair.
Saturday, August 7, 2021	Half day site visit—or partner event; Evening Wheels-up.

Participation Requirements

All parties interested in participating in the U.S. Department of Commerce Education Trade Mission to India must complete and submit an application package for consideration by the Department of Commerce. All applicants will be evaluated on their ability to meet certain conditions and best satisfy the selection criteria as outlined below.

A minimum of 15 and a maximum of 30 educational institutions/study state consortia/companies will be selected to participate in the mission. All selected participants will travel to three cities in India and will have the option to choose additional business-to-business side meetings in up to four markets in India as a spinoff for an additional cost.

The Trade Mission is open to U.S. educational institutions/study state consortia/U.S. educational technology companies that are new to India and those with existing business in India that are seeking to expand their market share. U.S. educational technology companies should offer unique, state-of-the-art, innovative solutions.

Fees and Expenses

After an educational institution/study state consortium/company has been selected to participate on the mission, a payment to the Department of Commerce in the form of a participation fee is required.

For the trade mission, the participation fee will be $4,326 for a small- or medium-sized enterprise (SME)* and $5,915 for large firms. Additional participants representing the same institution may participate for a fee of $500 each. Participants who choose the optional spinoff opportunity for additional business-to-business meetings in up-to four markets (Kolkata, Ahmedabad, Hyderabad and Chennai) in India, can participate for a fee of $950 per city.

The mission registration fee includes market briefings, U.S. Embassy officer consultations, networking receptions, lunch and coffee breaks, as well as transportation associated with the mission program in the region.

Timeframe for Recruitment and Application

Mission recruitment will be conducted in an open and public manner, including publication in the **Federal Register**, posting on the Commerce Department trade mission calendar on *https://www.trade.gov/trade-missions-schedule* and other internet websites, press releases to the general and trade media, direct mail and broadcast fax, notices by industry trade associations and other multiplier groups and announcements at industry meetings, symposia, conferences, and trade shows.

Recruitment for the mission will begin immediately and conclude no later than June 30, 2021. The U.S. Department of Commerce will review applications and make selection decisions on a rolling basis until the maximum of 30 participants are selected. After the close of the recruitment period, educational institutions/study state consortia/companies will be considered only if space and scheduling constraints permit.

New England Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The New England Fishery Management Council (Council, NEFMC) will hold a three-day meeting to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Due to federal and state travel restrictions and updated guidance from the Centers for Disease Control and Prevention related to COVID–19, this meeting will be conducted entirely by webinar.

DATES: The webinar meeting will be held on Tuesday, Wednesday, and Thursday, September 29, September 30, and October 1, 2020, beginning at 9 a.m. on September 29 and 8:30 a.m. on September 30 and October 1.

ADDRESSES: All meeting participants and interested parties can register to join the webinar at *https://register.gotowebinar.com/register/5172076717962269709.*

Council address: New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950; telephone: (978) 465–0492; *www.nefmc.org.*

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492, ext. 113.

SUPPLEMENTARY INFORMATION:

Agenda

Tuesday, September 29, 2020

After introductions and brief announcements, NMFS's Regional Administrator for the Greater Atlantic Regional Fisheries Office (GARFO) will swear in new and reappointed Council members. The Council then will conduct its 2020–21 election of officers. Reports on recent activities will be next. The Council will hear from its Chairman and Executive Director, GARFO's Regional Administrator, liaisons from the Northeast Fisheries Science Center (NEFSC) and Mid-Atlantic Fishery Management Council, staff from the Atlantic States Marine Fisheries Commission (ASMFC), and representatives from NOAA General Counsel, NOAA's Office of Law Enforcement, the U.S. Coast Guard, the Northeast Trawl Advisory Panel (NTAP), the Northwest Atlantic Fisheries Organization (NAFO), the NMFS Highly Migratory Species Advisory Panel, and the South Atlantic Council's Dolphin/Wahoo Advisory Panel. The Skate Committee Report will follow. The Council will receive: (1) A presentation on the Skate Annual Monitoring Report covering fishing year 2019; and (2) a progress report on Amendment 5 to the Northeast Skate Complex Fishery Management Plan (FMP). This update will focus on the development of a problem statement, goals, and objectives for potentially developing a limited access program through Amendment 5. Members of the public then will have the opportunity to speak during an open comment period on issues that relate to Council business but are not included on the published agenda for this meeting. The Council asks the public to limit remarks to 3–5 minutes. These comments will be received through the webinar. A guide for how to publicly comment through the webinar is available on the Council website at *https://s3.amazonaws.com/nefmc.org/NEFMC-meeting-remote-participation_generic.pdf.*

Following the lunch break, the Council will receive a report from the Northeast Fisheries Science Center on the peer review of the Spring 2020 Management Track Stock Assessments for Atlantic herring, longfin squid, butterfish, and surfclams and ocean quahogs. The Scientific and Statistical Committee (SSC) then will present its recommendations for overfishing limits (OFLs) and acceptable biological catches (ABCs) for the 2021–2023 Atlantic herring fishing years. The Atlantic Herring Committee report will be next with three items: (1) The Council will take final action on Framework Adjustment 8, which includes 2021–2023 specifications for the herring fishery and adjusts measures in the Atlantic Herring FMP that may inhibit the Atlantic mackerel fishery from achieving optimum yield; (2) the Council will receive an update on Framework Adjustment 7, which is an action under development to protect spawning herring on Georges Bank; and (3) the Council will receive an update on discussions related to the coordination of Atlantic herring management between the Council and ASMFC. GARFO then will update the Council on the status of the North Atlantic Right Whale Draft Biological Opinion and upcoming rulemaking. The Council may discuss these issues and offer comments to the agency. After that, the Council will adjourn for the day.

At 6 p.m. or shortly following the close of Council business, the U.S. International Trade Commission (USITC) will host a virtual roundtable to gather input from New England fishermen and other industry stakeholders on two topics: (1) The impacts of illegal, unreported, and unregulated (IUU) fishing on the U.S. fishing industry; and (2) the impacts of seafood imports on U.S. products and markets. All stakeholders, including those from the Mid-Atlantic, are encouraged to join the discussion. No preregistration is needed. A link to the webinar will be forthcoming and posted on the Council website.

Wednesday, September 30, 2020

The Council will begin the day with Part 1 of a three-part Groundfish Committee report. Part 1 will focus on Amendment 23 to the Northeast Multispecies FMP, commonly referred to as the groundfish monitoring amendment. The Council will review all written and oral comments received during the public comment period on this amendment and then take final action on measures to improve the accuracy and accountability of catch reporting in the commercial groundfish fishery, including the level of at-sea monitoring coverage to be required on groundfish sector trips, among other actions.

Following the lunch break, the Council will continue its discussion on Groundfish Monitoring Amendment 23. When business on the amendment is complete, the Council will take up Part 2 of the Groundfish Committee Report regarding a petition for rulemaking for Atlantic cod. The Council will receive input from its Groundfish Committee, Groundfish Advisory Panel, and Recreational Advisory Panel and then discuss the petition and potential next steps. After that, the Council will: (1) Receive a report from the Transboundary Resources Assessment Committee (TRAC) on 2020 assessment results for Eastern Georges Bank cod, Eastern Georges Bank haddock, and Georges Bank yellowtail flounder; and (2) review and approve Transboundary Management Guidance Committee (TMGC) recommendations for 2021 total allowable catches for those three shared U.S./Canada stocks on Georges Bank. Next, the Council will receive SSC recommendations for OFLs and ABCs for Georges Bank yellowtail flounder for fishing years 2021 and 2022, as well as SSC input on possible rebuilding approaches for white hake. Finally, the Council will take up Part 3 of the Groundfish Committee report, which will focus on Framework Adjustment 61 to the Northeast Multispecies FMP. The framework includes: (1) 2021 total allowable catches for U.S./Canada stocks on Georges Bank; (2) 2021–23 specifications for roughly half of the U.S. groundfish stocks; (3) white hake rebuilding provisions; and (4) other measures. The Council also will take action on Georges Bank yellowtail OFLs and ABCs for Framework 61 before it adjourns for the day.

Thursday, October 1, 2020

The Council will begin the day by receiving a short update from the Habitat Committee on offshore wind development activities. Then it will take up the Scallop Committee report. The Council will review recent public hearing comments on Amendment 21 to the Atlantic Sea Scallop FMP, which includes measures that address: (1) Northern Gulf of Maine Management Area issues, (2) the Limited Access General Category (LAGC) possession limit, and (3) individual fishing quota (IFQ) transfers. The Council will take final action on this amendment. The Council also will receive a preliminary overview of 2020 scallop survey work and a progress report on Framework Adjustment 33, which will include 2021 fishing year specifications and 2022 default specifications, along with other measures.

Following the lunch break, the Council will hear from its Ecosystem-Based Fishery Management (EBFM) Committee. First, the Council will review and approve EBFM public outreach materials produced by Green Fin Studio, including stakeholder profiles, brochures, two completed infographics, presentations, an introductory video, and other outreach tools. Second, the Council will hear the committee's recommendations and approve a format for conducting EBFM workshops using the Council's example Fishery Ecosystem Plan (eFEP) for Georges Bank, along with the new public outreach materials. Third, the Council will receive a presentation on tangible worked examples developed by the Plan Development Team to demonstrate the eFEP catch framework for Georges Bank. Next, the Council will hear from the Stellwagen Bank National Marine Sanctuary (SBNMS) staff, which will present two pre-COVID0919 economic reports supporting the SBNMS Management Plan Review: (1) A fisheries report analyzing commercial fishing and recreational for-hire fishing activity within SBNMS and the economic contributions of these activities; and (2) a whale watching report summing up data and economic contribution. After that, the Council will begin its initial discussion on 2021 Council Priorities, including identification of potential actions that respond to the May 7, 2020 Executive Order on Promoting American Seafood Competitiveness and Economic Growth. The Council then will close out the meeting with other business.

Although non-emergency issues not contained on this agenda may come before the Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is being conducted entirely by webinar. Requests for auxiliary aids should be directed to Thomas A. Nies (see **ADDRESSES**) at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 9, 2020.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Alaska Region Arbitration (Crab)

AGENCY: National Oceanic & Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before November 13, 2020.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at *Adrienne.thomas@noaa.gov.* Please reference OMB Control Number 0648–0516 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Gabrielle Aberle, 907–586–7356.

SUPPLEMENTARY INFORMATION:

I. Abstract

The National Marine Fisheries Service (NMFS), Alaska Regional Office, is requesting renewal of a currently approved information collection. This information collection contains the reports for the Crab Rationalization Program Arbitration System.

The Crab Rationalization Program allocates Bering Sea and Aleutian Islands (BSAI) crab resources among harvesters, processors, and coastal communities through a limited access system that balances the interests of these groups who depend on these fisheries. Under the CR Program, eligible License Limitation Program license holders were issued crab quota shares (QS), which are long term shares, based on their qualifying harvest histories. The QS yield annual individual fishing quota (IFQ), which represent a privilege to receive a certain amount of crab harvested with IFQ. Processor quota shares (PQS) are long term shares issued to processors. The PQS yield annual individual processor quota (IPQ), which represent a privilege to receive a certain amount of crab harvested with Class A IFQ.

The Crab Rationalization Program Arbitration System is a series of steps that harvesters and processors can use to negotiate delivery and price contracts. The Arbitration System allows unaffiliated Class A IFQ holders to initiate an arbitration proceeding in the event of a dispute to allow an independent third party to provide a review of harvester and processor negotiation positions and provide an independent and binding resolution to issues under dispute. To use the Arbitration System, a harvester must commit deliveries to a processor and initiate a binding arbitration proceeding in advance of the season opening. The Arbitration System is designed to minimize antitrust risks for crab harvesters and processors and is intended to ensure that a reasonable price is paid for all landings.

The Arbitration System requires several information collections that are submitted annually in accordance with the regulations at 50 CFR 680.20. The Annual Arbitration Organization Report, the Market Report, and the Non-binding Price Formula Report are the primary reports submitted to NMFS each year. Also submitted are the Contract Arbitrator Report and the Cost Allocation Agreement.

An Annual Arbitration Organization Report is compiled by each of the two Arbitration Organizations; one represents the processors, and the second represents the harvesters. This report includes information on the arbitration organization and its management personnel, the crab QS fisheries to which the report applies, the ownership interest and the QS/IFQ or PQS/IPQ held by each member; and the arbitration process.

The Non-binding Price Formula Report is a pre-season report that is designed to serve as a starting point for negotiations between fishermen and processors, or as a starting point for an arbitrator in evaluating offers in an arbitration process. This report documents how each formula was developed.

The Market Report provides an analysis of the market for products of a specific crab fishery and reports on activities occurring within three months prior to its generation. The purpose of this report is to provide background information on each crab fishery, the products generated by each fishery, and position of those products in the marketplace; discuss the historical division of wholesale revenue; and provide the methods for predicting wholesale prices before the fishery occurs.

The Contract Arbitrator Report documents arbitration proceedings if they occur within a fishery. The Cost Allocation Agreement provides combined shared arbitration accounting costs. Federal regulations for the CR Program require that the crab arbitration costs are shared equally between IPQ holders and Class A IFQ holders—processors pay half and fishermen pay half.

II. Method of Collection

The information is submitted by mail, delivery, fax, or email.

III. Data

OMB Control Number: 0648–0516.

Form Number(s): None.

Type of Review: Regular submission (extension of a current information collection).

Affected Public: Individuals or households; Business or other for-profit organizations.

Estimated Number of Respondents: 2.

Estimated Time per Response: Annual Arbitration Organization Report, 6 hours; Market Report, Nonbinding Price Formula Report, Contract Arbitrator Report, and Cost Allocation Agreement, 3 hours each.

Estimated Total Annual Burden Hours: 24.

Estimated Total Annual Cost to Public: $157,701 in recordkeeping/reporting costs.

Respondent's Obligation: Required to Obtain or Retain Benefits.

Legal Authority: Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*)

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648–XA456]

Endangered and Threatened Species; Take of Anadromous Fish

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of availability.

SUMMARY: Notice is hereby given that NMFS has prepared a final environmental assessment (EA) under the National Environmental Policy Act (NEPA) describing the potential effects of Stockton East Water District's (District) proposed Calaveras River Habitat Conservation Plan (HCP). The Calaveras River HCP was prepared and submitted by the District and describes their ongoing operations and monitoring activities in the Calaveras River.

ADDRESSES: The incidental take permit, final environmental assessment, and other related documents are available on the NMFS West Coast Region website at: *https://www.fisheries.noaa.gov/action/calaveras-river-habitat-conservation-plan-and-environmental-assessment.*

FOR FURTHER INFORMATION CONTACT: Monica Gutierrez, Sacramento, CA, at phone number: (916) 930–3657, via fax: (916) 930–3629, or via email: *Monica.Gutierrez@noaa.gov.*

SUPPLEMENTARY INFORMATION:

ESA-Listed Species Covered in This Notice

Chinook salmon (*Oncorhynchus tshawytscha*): winter-run Chinook salmon, spring-run Chinook salmon, and fall/late fall-run Chinook salmon.

California Central Valley (CCV) steelhead (*O. mykiss*).

Background

The District is seeking coverage under section 10(a)(1)(B) of the Endangered Species Act (ESA) for their ongoing operations and monitoring program in the lower Calaveras River in California's Central Valley. The Calaveras River, a tributary to the San Joaquin River, serves as an important source of water for fish, agriculture, and municipal uses in Calaveras and San Joaquin counties. The District manages the water resources within the Calaveras River during non-flood control periods for their respective constituents. The Calaveras River provides valuable habitat for CCV steelhead and Chinook salmon. The District's operations may result in impacts to listed species and their habitat within the Calaveras River. Therefore, the District is required to work collaboratively with NMFS to minimize these impacts through implementation of the HCP upon issuance of the Section 10(a)(1)(B) Permit.

On September 30, 2019, a notice of receipt was published in the **Federal Register** (84 FR 51518) that a request for a permit for the incidental take of winter-run Chinook salmon, spring-run Chinook salmon, fall/late fall-run Chinook salmon, and CCV steelhead associated with the activities as described in the Calaveras River HCP, had been submitted by the District. In addition, the draft EA was available for 45-day public comment period. NMFS received several comments and these comments were addressed as changes to the final EA or as a response in the final EA appendix. The requested permit has been issued under the authority of the Endangered Species Act of 1973. This permit authorizes the incidental take of listed species as set forth in the HCP and the permit for a 50-year period.

Authority

Section 9 of the ESA and Federal regulations prohibit the 'taking' of a species listed as endangered or threatened. The ESA defines ''take'' to mean harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. NMFS may issue permits, under limited circumstances to take listed species incidental to, and not the purpose of, otherwise lawful activities. Section 10(a)(1)(B) of the ESA provides for authorizing incidental take of listed species. NMFS regulations governing permits for threatened and endangered species are promulgated at 50 CFR 222.307.

Dated: September 8, 2020.

Angela Somma,

Chief, Endangered Species Division, Office of Protected Resources, National Marine Fisheries Service.

National Oceanic and Atmospheric Administration

[RTID 0648–XA482]

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Climate and Communities Core Team (CCCT) will hold an online meeting, which is open to the public.

DATES: The online meeting will be held Tuesday, September 29, 2020, from 3 p.m. to 4:30 p.m., Pacific Daylight Time or until business is concluded.

ADDRESSES: This meeting will be held online. Specific meeting information, including directions on how to join the meeting and system requirements will be provided in the meeting announcement on the Pacific Council's website (see *www.pcouncil.org*). You may send an email to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov*) or contact him at (503) 820–2280, extension 412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384.

FOR FURTHER INFORMATION CONTACT: Kit Dahl, Staff Officer, Pacific Council; telephone: 503–820–2422.

SUPPLEMENTARY INFORMATION: The purpose of this CCCT online meeting is to plan a series of ''implications workshops'' as part of the climate change scenario planning process, which is a component of the Fishery Ecosystem Plan Climate and Communities Initiative. A series of four regionally-focused online workshops have been proposed that would occur in fall/winter of 2020/21. A proposal describing the workshops is available on the Council's website (*www.pcouncil.org*) as part of the briefing materials for the Council's September 8–18 meeting, see Agenda Item F.1, Attachment 2.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

Special Accommodations

Requests for sign language interpretation or other auxiliary aids should be directed to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov;* (503) 820–2412) at least 10 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 9, 2020.

Tracey L. Thompson,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

[RTID 0648–XA473]

North Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The North Pacific Fishery Management Council's (Council) Scientific and Statistical Committee (SSC) will meet via webconference.

DATES: The Council's SSC will begin at 8 a.m. on Monday, September 28, 2020 and continue through Friday, October 2, 2020, Alaska Time.

ADDRESSES: The meeting will be a webconference. Join online through the link at *https://meetings.npfmc.org/Meeting/Details/1566.*

Council address: North Pacific Fishery Management Council, 1007 W 3rd Ave., Anchorage, AK 99501–2252; telephone: (907) 271–2809. Instructions for attending the meeting via webconference are given under Connection Information, below.

FOR FURTHER INFORMATION CONTACT: Diana Evans, Council staff; email: *diana.evans@noaa.gov;* telephone: (907) 271–2809. For technical support please contact our administrative staff, email: *npfmc.admin@noaa.gov.*

SUPPLEMENTARY INFORMATION:

Agenda

Monday, September 28, 2020 Through Friday, October 2, 2020

The SSC agenda will include the following issues:

(1) BSAI Crab 4 stocks—Final Specifications, Crab Plan Team Report
(2) BSAI and GOA Groundfish Harvest—Proposed Specifications, PT Reports
(3) Cook Inlet Salmon FMP—Intial Review
(4) BSAI Halibut ABM—Initial Review
(5) Survey Planning—AFSC Report

In addition to providing ongoing scientific advice for fishery management decisions, the SSC functions as the Council's primary peer review panel for scientific information, as described by the Magnuson-Stevens Act section 302(g)(1)(e), and the National Standard 2 guidelines (78 FR 43066). The peer review process is also deemed to satisfy the requirements of the Information Quality Act, including the OMB Peer

Connection Information

You can attend the meeting online using a computer, tablet, or smart phone; or by phone only. Connection information will be posted online at: *https://meetings.npfmc.org/Meeting/Details/1566.* For technical support please contact our administrative staff, email: *npfmc.admin@noaa.gov.*

Public Comment

Public comment letters will be accepted and should be submitted electronically to: *https://meetings.npfmc.org/Meeting/Details/1566.* The Council strongly encourages written public comment for this meeting, to avoid any potential for technical difficulties to compromise oral testimony. The deadline for written comments is September 25, 2020, at 5 p.m. Alaska Time.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: September 9, 2020.

Pacific Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meeting.

SUMMARY: The Pacific Fishery Management Council's (Pacific Council) Ad Hoc Southern Resident Killer Whale (SRKW) Workgroup (Workgroup) will host an online meeting over a two-day period that is open to the public.

DATES: The online meeting will be held Tuesday and Wednesday, September 29–30, 2020, starting at 9 a.m. (Pacific Daylight Time) and ending at 5 p.m. daily, or until business for the day is complete.

ADDRESSES: This meeting will be held online. Specific meeting information, including directions on how to join the meeting and system requirements will be provided in the meeting announcement on the Pacific Council's website (see *www.pcouncil.org*). You may send an email to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov*) or contact him at (503) 820–2412 for technical assistance.

Council address: Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384.

FOR FURTHER INFORMATION CONTACT: Ms. Robin Ehlke, Staff Officer, Pacific Council; telephone: (503) 820–2410.

SUPPLEMENTARY INFORMATION: The purpose of the meeting will be to continue to discuss any associated modeling and analysis needed to develop potential alternatives for salmon management/conservation measures for Pacific Council consideration. The Workgroup may also discuss and prepare for future Workgroup meetings and future meetings with the Pacific Council and its advisory bodies. Members of the Salmon Advisory Subpanel will be invited to attend. This is a public meeting and not a public hearing. Public comments will be taken at the discretion of the Workgroup co-chairs as time allows.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

[RTID 0648–XA447]

Gulf of Mexico Fishery Management Council; Public Meeting

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of a public meeting.

SUMMARY: The Gulf of Mexico Fishery Management Council (Council) will hold a three-day webinar meeting via webinar to consider actions affecting the Gulf of Mexico fisheries in the exclusive economic zone (EEZ).

DATES: The webinar will convene Monday, September 28, 2020 through Wednesday, September 30, 2020; 9 a.m. until 4 p.m. EDT.

ADDRESSES: The meeting will take place via webinar; you may register for the meeting at *www.gulfcouncil.org.*

Council address: Gulf of Mexico Fishery Management Council, 4107 W. Spruce Street, Suite 200, Tampa, FL 33607; telephone: (813) 348–1630.

FOR FURTHER INFORMATION CONTACT: Dr. Carrie Simmons, Executive Director, Gulf of Mexico Fishery Management Council; telephone: (813) 348–1630.

SUPPLEMENTARY INFORMATION:

Agenda

Monday, September 28, 2020; 9 a.m.–9:30 a.m.

The meeting will begin in a CLOSED SESSION of the FULL COUNCIL to make final selection of members to the Coastal Migratory Pelagics and Red Drum Advisory Panels.

Monday, September 28, 2020; 9:45 a.m.–4 p.m.

The meeting will open to the general public mid-morning beginning with the Administrative/Budget Committee review and approval of the Funded 2020 Budget. The Shrimp Committee will review and discuss the Analytical Requirement Program Updates and Reporting Options for Gulf Shrimp Fishery. The Mackerel Committee will receive an update on Coastal Migratory Pelagics Landings; and, review of SEDAR 28 Update: Gulf of Mexico Migratory Group Cobia Stock Assessment. The Sustainable Fisheries Committee will review Aquaculture Aspects of Executive Order 13921, and receive recommendations and public comments on Executive Order 13921; Draft letter on RESTAURANTs Act of 2020 (S. 4012); receive a presentation on Depredation by Marine Mammals; and review Public Hearing Draft Amendment Reef Fish 48/Red Drum 5: Status Determination Criteria and Optimum Yield for Reef Fish and Red Drum.

Tuesday, September 29, 2020; 9 a.m.–4 p.m.

The Reef Fish Committee will review the Reef Fish Landings; discuss the Fishing Industry Impacts Due to COVID–19 and Potential Emergency Rule Requests; and, receive status of Gulf State Recreational Data Collection Programs and 2020 Red Snapper Seasons. The Committee will receive an update from the Marine Recreational Information Program (MRIP) Fishing Effort Survey Calibration Workshop; and, receive a meeting summary from the August 5, 2020 MRIP Red Snapper State Data Calibration Meeting and SSC recommendations.

The Gulf of Mexico Fishery Management Council and National Marine Fisheries Service (NMFS) will hold a Question and Answer session immediately following the Reef Fish Committee.

Wednesday, September 30, 2020; 9 a.m.–4 p.m.

Full Council will convene with a Call to Order, Announcements, and Introductions; Induction of New Council Members; Adoption of Agenda and Approval of Minutes. The Council will hold public comment testimony beginning at approximately 9:30 a.m. until 11 a.m. on Comments on Executive Order 13921; and, open testimony on other fishery issues or concerns. Public comment may begin earlier than 9:30 a.m. EDT but will not conclude before that time. Persons wishing to give public testimony must register on the Council website before the start of the public comment period at 9:30 a.m. EDT.

The Council will continue to receive committee reports from Administrative/Budget, Shrimp, Sustainable Fisheries, Mackerel, and Reef Fish Committees. The Council will announce the Coastal Migratory Pelagics and Red Drum Advisory Panel appointments.

The Council will discuss Other Business item 5th Court Aquaculture Appellate Decision; and, hold an election for Council Chair and Vice-Chair.

—Meeting Adjourns

The meeting will be broadcast via webinar. You may register for the webinar by visiting *www.gulfcouncil.org* and clicking on the Council meeting on the calendar.

The timing and order in which agenda items are addressed may change as required to effectively address the issue, and the latest version along with other meeting materials will be posted on the website as they become available.

Although other non-emergency issues not contained in this agenda may come before this group for discussion, in accordance with the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), those issues may not be the subject of formal action during this meeting. Actions will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under Section 305(c) of the Magnuson-Stevens Act, provided that the public has been notified of the Council's intent to take final action to address the emergency.

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Pacific Islands Region Permit Family of Forms

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of information collection, request for comments.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before November 13, 2020.

ADDRESSES: Interested persons are invited to submit written comments to Adrienne Thomas, NOAA PRA Officer, at *Adrienne.thomas@noaa.gov.* Please reference OMB Control Number 0648–0490 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Walter Ikehara, Fishery Information Specialist, National Marine Fisheries Service, Pacific Islands Region, 1845 Wasp Blvd., Bldg. 176, Honolulu, HI 96818, (808) 725–5175, *walter.ikehara@noaa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension, with a minor technical revision, of a currently approved information collection.

The *Magnuson-Stevens Fishery Conservation and Management Act* established the Western Pacific Fishery Management Council (Council), to develop fishery ecosystem plans (FEP) for fisheries in the United States (U.S.) exclusive economic zone (EEZ) and high seas of the Pacific Islands region. These plans, if approved by the Secretary of Commerce, are implemented in Federal regulations by the National Oceanic and Atmospheric Administration's (NOAA) National Marine Fisheries Service (NMFS) and enforced by NOAA's Office of Law Enforcement (OLE) and the U.S. Coast Guard (USCG), in cooperation with state and territorial agencies. FEPs regulate fishing to prevent overfishing and to ensure the long-term productivity and social and economic benefit of the resources.

Regulations at 50 CFR 665, Subpart F, require that a vessel used to fish with longline gear for western Pacific pelagic management unit species (PMUS), land or transship longline caught PMUS, or receive longline caught PMUS from a longline vessel, within the Exclusive Economic Zone (EEZ) or management subarea around U.S. islands in the central and western Pacific must be registered to a valid Federal fishing permit. The regulations also require that a vessel used to fish with squid jig gear for pelagic squid species listed in the western Pacific PMUS within the EEZ or management subareas around U.S. islands in the central and western Pacific, or fish with troll and handline gear for PMUS in allowed locations within the EEZ around each of the Pacific Remote Island Areas (PRIA), must be registered to a valid Federal fishing permit.

Regulations at 50 CFR parts 665, Subparts D and E, require that the owner of a vessel used to fish for, land, or transship bottomfish management unit species (BMUS) using a large vessel (50 ft or longer) in the Guam management subarea, fish commercially for BMUS in the Commonwealth of the Northern Mariana Islands management subarea, or fish for BMUS in allowed locations within the EEZ around each of the PRIA, must register it to a valid Federal fishing permit.

Regulations at 50 CFR parts 665, Subparts B, C, D, and E, require that the owner of a vessel used to fish for, land, or transship crustacean management unit species (CMUS) in the EEZs or management subareas around American Samoa, Hawaii, Guam, Northern Mariana Islands, or in allowed locations within the EEZ around each of the PRIA, must register it to a valid Federal fishing permit. The regulations also require that a vessel used to fish for precious corals within the EEZ or management subarea around U.S. islands in the central and western Pacific must be registered to a valid Federal fishing permit for a specific precious coral permit area.

This collection of information is needed for permit issuance, to identify actual or potential participants in the fishery, determine qualifications for permits, and to help measure the impacts of management controls on the participants in the fishery. The permit program is also an effective tool in the enforcement of fishery regulations and facilitates communication between NMFS and fishermen.

This collection will be revised to remove the instruction to mail applications to NMFS as the office is currently unable to accept or process mail. Individuals will be able to submit applications electronically either through secure email or by applying directly through the National Permit System for the Hawaii longline limited entry permit.

II. Method of Collection

Respondents may submit applications and required documents via secure email, or via online application systems where implemented.

III. Data

OMB Control Number: 0648–0490.

Form Number(s): None.

Type of Review: Regular submission (Revision and extension of an existing collection).

Affected Public: Business or other for-profit organizations; individuals or households; not-for-profit institutions; state, local, or tribal government; Federal government.

Estimated Number of Respondents: 276

Estimated Time per Response: Hawaii longline limited entry permit: Renew via secure email—30 min; renew online—15 min; transfer—1 hour; apply for closed area exemption or permit appeal—2 hr. American Samoa longline limited entry permit: renew or apply for additional permit via secure email—45 min; transfer—1 hour 15 min; permit appeal—2 hours. All other permits: apply via secure email—30 min; apply online—15 min.

Estimated Total Annual Burden Hours: 131.5

Estimated Total Annual Cost to Public: $12,650

Respondent's Obligation: Mandatory

Legal Authority: 50 CFR 665

IV. Request for Comments

We are soliciting public comments to permit the Department to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this Information Collection Request. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510–22–P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration (NOAA)

Ocean Exploration Advisory Board (OEAB); Ocean Exploration Advisory Board; Meeting

AGENCY: Office of Ocean Exploration and Research (OER), National Oceanic and Atmospheric Administration (NOAA), Department of Commerce (DOC).

ACTION: Notice of public meeting.

SUMMARY: This notice sets forth the schedule and proposed agenda for a meeting of the Ocean Exploration Advisory Board (OEAB). OEAB members will discuss and provide advice on Federal ocean exploration programs, with a particular emphasis on

the topics identified in the section on Matters to Be Considered.

DATES: The announced meeting is scheduled for Thursday, October 1, 2020, from 1:00 p.m. to 5:00 p.m. EDT and Friday, October 2, 2020, from 1:00 p.m. to 5:00 p.m. EDT.

ADDRESSES: This will be a virtual meeting. Information about how to participate will be posted to the OEAB website at *http://oeab.noaa.gov.*

FOR FURTHER INFORMATION CONTACT: Mr. David McKinnie, Designated Federal Officer, Ocean Exploration Advisory Board, National Oceanic and Atmospheric Administration, 7600 Sand Point Way NE, Seattle, WA 98115, (206) 526–6950.

SUPPLEMENTARY INFORMATION: NOAA established the OEAB under the Federal Advisory Committee Act (FACA) and legislation that gives the agency statutory authority to operate an ocean exploration program and to coordinate a national program of ocean exploration. The OEAB advises NOAA leadership on strategic planning, exploration priorities, competitive ocean exploration grant programs, and other matters as the NOAA Administrator requests.

OEAB members represent government agencies, the private sector, academic institutions, and not-for-profit institutions involved in all facets of ocean exploration—from advanced technology to citizen exploration.

In addition to advising NOAA leadership, NOAA expects the OEAB to help to define and develop a national program of ocean exploration—a network of stakeholders and partnerships advancing national priorities for ocean exploration.

Matters to be Considered: The OEAB will discuss the following topics: (1) NOAA Office of Ocean Exploration and Research program review and other updates; (2) the National Strategy for Mapping, Exploring, and Characterizing the United States Exclusive Economic Zone; (3) ocean exploration partnerships; (4) national ocean exploration priorities in the Pacific; and (5) other matters as described in the agenda. The agenda and other meeting materials will be made available on the OEAB website at *http://oeab.noaa.gov.*

Status: The meeting will be open to the public with a 15-minute public comment period on Friday, October 2, 2020, from 3:00 p.m. to 3:15 p.m. EDT (please check the final agenda on the OEAB website to confirm the time). The public may listen to the meeting and provide comments during the public comment period via teleconference. Participation information will be on the meeting agenda on the OEAB website.

The OEAB expects that public statements at its meetings will not be repetitive of previously submitted verbal or written statements. In general, each individual or group making a verbal presentation will be limited to three minutes. The Designated Federal Officer must receive written comments by September 28, 2020, to provide sufficient time for OEAB review. Written comments received after September 28, 2020, will be distributed to the OEAB but may not be reviewed prior to the meeting date.

Special Accomodations: Requests for sign language interpretation or other auxiliary aids should be directed to the Designated Federal Officer by September 28, 2020.

Dated: September 8, 2020.

David Holst,

Director Chief Financial Officer/CAO, Office of Oceanic and Atmospheric Research, National Oceanic and Atmospheric Administration.

BILLING CODE 3510–KA–P

DEPARTMENT OF COMMERCE

National Telecommunications and Information Administration

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; NTIA internet Use Survey

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on July 7, 2020 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Telecommunications and Information Administration.

Title: NTIA internet Use Survey.

OMB Control Number: 0660–0021.

Form Number(s): None.

Type of Request: Regular submission (Extension of a current information collection).

Number of Respondents: 54,000 households.

Estimated Time per Response: 10 minutes.

Burden Hours: 9,000.

Needs and Uses: Data from the NTIA internet Use Survey will be used to help inform federal policies related to digital inclusion and other internet-related issues. NTIA will use the data both in relevant publications and to help inform policymakers. Additionally, a public use dataset that protects respondent confidentiality will be created by the Census Bureau and made available by both agencies for use by researchers and other members of the public.

Affected Public: Individuals and households.

Frequency: Biennial.

Respondent's Obligation: Voluntary.

Legal Authority: 47 U.S.C. 902(b)(2)(M), (P).

This information collection request may be viewed at *www.reginfo.gov.* Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function and entering either the title of the collection or the OMB Control Number 0660–0021.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

BILLING CODE 3510–20–P

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. CPSC–2010–0056]

Agency Information Collection Activities; Proposed Extension of Approval of Information Collection; Comment Request—Safety Standard for Bicycle Helmets

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: As required by the Paperwork Reduction Act of 1995, the Consumer Product Safety Commission (CPSC or Commission) requests comments on a proposed extension of approval for a collection of information relating to the Safety Standard for Bicycle Helmets. The Office of Management and Budget (OMB) previously approved the collection of information under control number 3041–0127. OMB's most recent extension of approval will expire on December 31, 2020. The Commission will consider all comments received in response to this notice before requesting an extension of approval of this collection of information from OMB.

DATES: Submit written or electronic comments on the collection of information by November 13, 2020.

ADDRESSES: You may submit comments, identified by Docket No. CPSC–2010–0056, by any of the following methods:

Electronic Submissions: Submit electronic comments to the Federal eRulemaking Portal at: *https://www.regulations.gov.* Follow the instructions for submitting comments. The CPSC does not accept comments submitted by electronic mail (email), except through *https://www.regulations.gov.* The CPSC encourages you to submit electronic comments by using the Federal eRulemaking Portal, as described above.

Mail/Hand Delivery/Courier Written Submissions: Submit comments by mail/hand delivery/courier to: Division of the Secretariat, Consumer Product Safety Commission, Room 820, 4330 East West Highway, Bethesda, MD 20814; telephone (301) 504–7479.

Instructions: All submissions received must include the agency name and docket number for this notice. All comments received may be posted without change, including any personal identifiers, contact information, or other personal information provided, to: *https://www.regulations.gov.* Do not submit electronically confidential business information, trade secret information, or other sensitive or protected information that you do not want to be available to the public. If you wish to submit such information, please submit it according to the instructions for written submissions.

Docket: For access to the docket to read background documents or comments received, go to: *https://www.regulations.gov,* and insert the docket number, CPSC–2010–0056, into the ''Search'' box, and follow the prompts.

FOR FURTHER INFORMATION CONTACT: Cynthia Gillham, Consumer Product Safety Commission, 4330 East West Highway, Bethesda, MD 20814; (301) 504–7791, or by email to: *cgillham@cpsc.gov.*

SUPPLEMENTARY INFORMATION: CPSC seeks to renew the following collection of information:

Title: Safety Standard for Bicycle Helmets.

OMB Number: 3041–0127.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Manufacturers and importers of bicycle helmets.

Estimated Number of Respondents: 38 manufacturers and importers will maintain test records of an estimated 200 models total annually, including older models and new models. Testing on bicycle helmets must be conducted for each new production lot and the test records must be maintained for 3 years.

Estimated Time per Response: 200 hours/model to test 40 new models (including new prototypes) and an estimated 100 hours/model to test new production lots of 160 older models. Additionally, manufacturers and importers may require 4 hours annually per model for recordkeeping for approximately 200 models.

Total Estimated Annual Burden: 24,800 hours (24,000 hours for testing and 800 hours for recordkeeping).

General Description of Collection: In 1998, the Commission issued a safety standard for bicycle helmets (16 CFR part 1203). The standard includes requirements for labeling and instructions. The standard also requires that manufacturers and importers of bicycle helmets subject to the standard issue certificates of compliance based on a reasonable testing program. Every person issuing certificates of compliance must maintain certain records. Respondents must comply with the requirements in 16 CFR part 1203 for labeling and instructions, testing, certification, and recordkeeping.

Request for Comments

The Commission solicits written comments from all interested persons about the proposed collection of information. The Commission specifically solicits information relevant to the following topics:

- Whether the collection of information described above is necessary for the proper performance of the Commission's functions, including whether the information would have practical utility;
- Whether the estimated burden of the proposed collection of information is accurate;
- Whether the quality, utility, and clarity of the information to be collected could be enhanced; and
- Whether the burden imposed by the collection of information could be

minimized by use of automated, electronic or other technological collection techniques, or other forms of information technology.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

BILLING CODE 6355–01–P

DEPARTMENT OF DEFENSE

Office of the Secretary

[Docket ID DoD–2020–OS–0072]

Proposed Collection; Comment Request

AGENCY: Defense Counterintelligence and Security Agency (DCSA), DoD.

ACTION: Information collection notice.

SUMMARY: In compliance with the *Paperwork Reduction Act of 1995,* the Defense Counterintelligence and Security Agency announces a proposed public information collection and seeks public comment on the provisions thereof. Comments are invited on: whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; the accuracy of the agency's estimate of the burden of the proposed information collection; ways to enhance the quality, utility, and clarity of the information to be collected; and ways to minimize the burden of the information collection on respondents, including through the use of automated collection techniques or other forms of information technology.

DATES: Consideration will be given to all comments received by November 13, 2020.

ADDRESSES: You may submit comments, identified by docket number and title, by any of the following methods:

Federal eRulemaking Portal: http://www.regulations.gov. Follow the instructions for submitting comments.

Mail: DoD cannot receive written comments at this time due to the COVID–19 pandemic. Comments should be sent electronically to the docket listed above.

Instructions: All submissions received must include the agency name, docket number and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

FOR FURTHER INFORMATION CONTACT: To request more information on this proposed information collection or to obtain a copy of the proposal and associated collection instruments, please write to Defense Counterintelligence and Security Agency, ATTN: Ms. Michele DeMarion, 1137 Branchton Road, Boyers, PA 16018, or call 724–794–5612 ext. 5274.

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Standard Form 87 Fingerprint Charts; SF 87; OMB Control Number 0705–0002.

Needs and Uses: The SF 87 is a fingerprint card, which is utilized to conduct a national criminal history check, which is a component of the background investigation. The SF 87 is completed by applicants who are under consideration for Federal employment; by Federal employees, to determine whether they should be retained in such employment; by individuals being considered to perform work for the Federal Government under a Government contract or to continue such work; and by persons seeking long-term access to Federal facilities and systems. The SF 87 fingerprint chart is used in background investigations to help establish facts required to determine, for example, whether the subject of the investigation should be adjudicated to be eligible for logical and physical access to Government facilities and systems; suitable or fit for Federal employment; fit to perform work on behalf of the Federal Government under a Government contract; eligible to hold a position that is sensitive for national security reasons; or eligible for access to classified information. The SF 87 form is utilized only when a hardcopy fingerprint chart must be obtained, as opposed to the electronic collection of fingerprints.

Affected Public: Individuals or Households.

Annual Burden Hours: 4,317.

Number of Respondents: 51,800.

Responses per Respondent: 1.

Annual Responses: 51,800.

Average Burden per Response: 5 minutes.

Frequency: On occasion.

Dated: September 8, 2020.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF DEFENSE

Department of the Army

[Docket ID USA–2020–HQ–0007]

Submission for OMB Review; Comment Request

AGENCY: U.S. Army Corps of Engineers (USACE), Department of Defense (DoD).

ACTION: 30-day information collection notice.

SUMMARY: The DoD has submitted to OMB for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by October 14, 2020.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Angela James, 571–372–7574, or *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

SUPPLEMENTARY INFORMATION:

Title; Associated Form; and OMB Number: Silver Jackets Program Nomination and Awards; Eng Form 6128; OMB Control Number 0710–XXXX.

Type of Request: New.

Number of Respondents: 54.

Responses per Respondent: 2.

Annual Responses: 108.

Average Burden per Response: 15 minutes.

Annual Burden Hours: 27.

Needs and Uses: The information collection request is necessary to obtain input and feedback into the successes of various Silver Jackets State Teams deserving of recognition through annual awards. Because the program is a shared program, state partners need to have a role in selecting the teams deserving of annual recognition. The form provides a means of nominating teams for consideration and can be filled out by State government employees. State government employees are also asked to vote for the nominated team most deserving of recognition after the nomination phase is complete.

Affected Public: State, Local, or Tribal government.

Frequency: Annually.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Mr. Vlad Dorjets.

You may also submit comments and recommendations, identified by Docket ID number and title, by the following method:

• *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name, Docket ID number, and title for this **Federal Register** document. The general policy for comments and other submissions from members of the public is to make these submissions available for public viewing on the internet at *http://www.regulations.gov* as they are received without change, including any personal identifiers or contact information.

DOD Clearance Officer: Ms. Angela James.

Requests for copies of the information collection proposal should be sent to Ms. James at *whs.mc-alex.esd.mbx.dd-dod-information-collections@mail.mil.*

Dated: September 8, 2020.

Aaron T. Siegel,

The Commission strongly encourages electronic filing. Please file comments, motions to intervene, and protests using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket number P–2305–123. Comments emailed to Commission staff are not considered part of the Commission record.

The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. *Description of Request:* As required by Article 411 of the August 29, 2014 license, Sabine River Authority—LA & TX (licensee) filed a revised shoreline management plan (SMP) for the project. The revised SMP is substantially similar to the original SMP approved in the 2014 license but includes a request for expanded permitting authority for certain activities (*e.g.,* fencing, maintenance dredging, energy and utility infrastructure without ground disturbing activities, private or public marinas that accommodate no more than 20 watercraft at one time, etc.) without the need for prior Commission approval.

l. *Locations of the Application:* In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''elibrary'' link. Enter the docket number excluding the last three digits in the document field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3673 or TYY, (202) 502–8659. Agencies may obtain copies of the application directly from the applicant.

m. Individuals desiring to be included on the Commission's mailing list should so indicate by writing to the Secretary of the Commission.

n. *Comments, Protests, or Motions to Intervene:* Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214, respectively. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

o. *Filing and Service of Documents:* Any filing must (1) bear in all capital letters the title ''COMMENTS'', ''PROTEST'', or ''MOTION TO INTERVENE'' as applicable; (2) set forth in the heading the name of the applicant and the project number of the application to which the filing responds; (3) furnish the name, address, and telephone number of the person commenting, protesting or intervening; and (4) otherwise comply with the requirements of 18 CFR 385.2001 through 385.2005. All comments, motions to intervene, or protests must set forth their evidentiary basis. Any filing made by an intervenor must be accompanied by proof of service on all persons listed in the service list prepared by the Commission in this proceeding, in accordance with 18 CFR 385.2010.

Dated: September 8, 2020.

Kimberly D. Bose,

Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 2955–011]

City of Watervliet, NY; Notice Soliciting Scoping Comments

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Subsequent Minor License.

b. *Project No.:* P–2955–011.

c. *Date filed:* February 28, 2020.

d. *Applicant:* City of Watervliet, New York.

e. *Name of Project:* Normanskill Hydropower Project.

f. *Location:* The project is located on the Normans Kill in Guilderland, Albany County, New York. The project does not occupy any federal land.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Michele E. Stottler, Gomez and Sullivan Engineers, DPC, 399 Albany Shaker Road, Suite 203, Loudonville, NY 12211; (518) 407–0050; email—*mstottler@gomezandsullivan.com* or Joseph LaCivita, General Manager, The City of Watervliet, 2 Fifteenth Street, Watervliet, NY 12189; (518) 270–3800; email—*jlacivita@watervliet.com*.

i. *FERC Contact:* Woohee Choi at (202) 502–6336; or email at *woohee.choi@ferc.gov*.

j. *Deadline for filing scoping comments:* October 8, 2020.

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket number P–2955–011.

The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application is not ready for environmental analysis at this time.

l. The Normanskill Project consists of the following existing facilities: (1) A 380-foot-long reinforced concrete Ambursen-type dam with a 306-foot-long overflow section having a crest elevation of 259 feet National Geodetic Vertical Datum of 1929 (NGVD29) surmounted by 3-foot-high flashboards; (2) a 380-acre reservoir with a gross volume of 3,600 acre-feet at the normal maximum pool elevation of 262 feet NGVD29; (3) an intake structure and sluiceway; (4) a 700-foot-long, 6-foot-diameter, concrete-encased steel, buried penstock; (5) a reinforced concrete underground powerhouse containing a single 1,250-kilowatt tube-type generating unit; (6) a 600-foot-long, 2.4-kilovolt (kV) transmission line; (7) a 2.4/13.2-kV transformer bank; and (8) appurtenant facilities.

m. In addition to publishing the full text of this notice in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this notice, as well as other documents in the proceeding (*e.g.,* scoping document) via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document (P–2955). At this time, the Commission has suspended access to the Commission's Public Reference Room due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19) issued by the President on March 13, 2020. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3673 or (202) 502–8659 (TTY).

n. You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

o. Scoping Process

The Commission staff intends to prepare a single Environmental Assessment (EA) for the Normanskill Hydroelectric Project in accordance with the National Environmental Policy Act. The EA will consider both site-specific and cumulative environmental impacts and reasonable alternatives to the proposed action.

Commission staff does not propose to conduct any on-site scoping meetings at this time. Instead, we are soliciting comments, recommendations, and information, on the Scoping Document (SD) issued on September 8, 2020.

Copies of the SD outlining the subject areas to be addressed in the EA were distributed to the parties on the Commission's mailing list and the applicant's distribution list. Copies of the SD may be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, call 1–866–208–3676 or for TTY, (202) 502–8659.

Dated: September 8, 2020.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER20–2830–000]

PPM Roaring Brook, LLC; Supplemental Notice That Initial Market-Based Rate Filing Includes Request For Blanket Section 204 Authorization

This is a supplemental notice in the above-referenced PPM Roaring Brook, LLC's application for market-based rate authority, with an accompanying rate tariff, noting that such application includes a request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability.

Any person desiring to intervene or to protest should file with the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). Anyone filing a motion to intervene or protest must serve a copy of that document on the Applicant.

Notice is hereby given that the deadline for filing protests with regard to the applicant's request for blanket authorization, under 18 CFR part 34, of future issuances of securities and assumptions of liability, is September 28, 2020.

The Commission encourages electronic submission of protests and interventions in lieu of paper, using the FERC Online links at *http://www.ferc.gov.* To facilitate electronic service, persons with internet access who will eFile a document and/or be listed as a contact for an intervenor must create and validate an eRegistration account using the eRegistration link. Select the eFiling link to log on and submit the intervention or protests.

Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://ferc.gov*) using the ''eLibrary'' link. BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP20–518–000]

PennEast Pipeline Company, LLC; Notice of Petition for Declaratory Order

Take notice that on August 31, 2020, pursuant to Rule 207(a)(2) of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, Robert Kaiser (Petitioner) hereby submits a petition for declaratory order (Petition) requesting the Commission issue a declaratory order putting a hold on PennEast Pipeline Company, LLC's (PennEast) eminent domain authority until PennEast has received the necessary permits and authorizations to commence construction and requesting an exemption from the filing fee, as more fully explained in the petition.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Petitioner.

The Commission encourages electronic submission of protests and interventions in lieu of paper using the ''eFiling'' link at *http://www.ferc.gov.* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC20–25–000]

Commission Information Collection Activities (Ferc–717); Comment Request; Extension

AGENCY: Federal Energy Regulatory Commission, Energy.

ACTION: Notice of extension information collection and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (''Commission'' or ''FERC'') is soliciting public comment on the extension to the information collection, FERC–717 (Standards for Business Practices and Communication Protocols for Public Utilities) which will be submitted to the Office of Management and Budget (OMB) for a review of the information collection requirements.

DATES: Comments on the collection of information are due November 13, 2020.

ADDRESSES: Please submit a copy of your comments to the Commission (identified by Docket No. IC20–25–000) by one of the following methods:

• *eFiling at Commission's website: http://www.ferc.gov/docs-filing/efiling.asp.*

• *U.S. Postal Service Mail:* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.

• Effective 7/1/2020, delivery of filings other than by eFiling or the U.S.

Postal Service should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: *http://www.ferc.gov.* For user assistance contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free), or (202) 502–8659 for TTY.

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *http://www.ferc.gov/docs-filing/docs-filing.asp.*

FOR FURTHER INFORMATION: Ellen Brown may be reached by email at *DataClearance@FERC.gov,* telephone at (202) 502–8663.

SUPPLEMENTARY INFORMATION:

Title: FERC–717, Standards for Business Practices and Communication Protocols for Public Utilities.

OMB Control No.: 1902–0173.

Type of Request: Three-year approval of the FERC–717 information collection requirements with no changes to the current reporting requirements.[1]

Abstract: The Commission directs all public utilities that own, control or operate facilities for transmitting energy in interstate commerce to provide certain types of information regarding their transmission operations on an Open Access Same-time Information System (OASIS). The Commission does not believe that open-access nondiscriminatory transmission services can be completely realized until it removes real-world obstacles that prevent transmission customers from competing effectively with the Transmission Provider. One of the obstacles is unequal access to transmission information. The Commission believes that transmission customers must have simultaneous access to the same information available to the Transmission Provider if truly nondiscriminatory transmission services are to be a reality.

The Commission also established Standards of Conduct requiring that personnel engaged in transmission system operations function independently from personnel engaged in marketing functions. The Standards of Conduct were designed to prevent employees of a public utility (or any of its affiliates) engaged in marketing functions from preferential access to OASIS-related information or from engaging in unduly discriminatory business practices. Companies were required to separate their transmission operations/reliability functions from their marketing/merchant functions and prevent system operators from providing merchant employees and employees of affiliates with transmission-related information not available to all customers at the same time through public posting on the OASIS.

Type of Respondents: Transmission Owners and Transmission Operators.

Estimate of Annual Burden[2]: The Commission estimates an adjustment in the annual public reporting burden for the FERC–717. The adjustment is due to Transmission Providers being allowed to file responses jointly or individually. The Transmission Provider may delegate this responsibility to a Responsible Party such as another Transmission Provider, an Independent System Operator, a Regional Transmission Group, or a Regional Reliability Council. The number comprise two separate entities: Transmission Owners and Transmission Operators. The responses submitted are our best estimate of the Transmission Operators and remaining individual Transmission Owners. The rationale is that some Transmission Owners have elected to turn over operational control of their collective transmission systems to Transmission Operators, including RTOs/ISOs (as authorized in 18 CFR 37.5). These Transmission Operators offer OASIS access to the collective systems facilitating a single OASIS transmission request serving multiple transmission systems. As a result of these efficiency gains, the lower respondent count is appropriate.

As a result of the efficiency gains, and an overestimate of the respondents in our past requests, we are submitting a more accurate number of respondents. The estimate below reflects the work associated with the current information collection requirements:

FERC–717, STANDARDS FOR BUSINESS PRACTICES AND COMMUNICATION PROTOCOLS FOR PUBLIC UTILITIES[3]

Information collection requirements	Number of respondents (1)	Annual number of responses per respondent (2)	Total number of responses (1) * (2) = (3)	Average burden hours & cost per response[4] (4)	Total annual burden hours & total annual cost (3) * (4) = (5)
FERC–717	162	1	162	30 hrs.; $2,490	4,860 hrs.; $403,380.
FERC–717 (compliance with standards, one-time)[5]	165	1	165	10 hrs.;[6] $830	1,650 hrs.; $136,950.
Total			327		6,510 hrs.; $540,330.

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use

[1] This collection notice does not address the NOPR for RM05–29 and RM05–30.

[2] Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collection burden, refer to 5 Code of Federal Regulations 1320.3.

[3] This collection includes the one-time burden (over a 3 year period of time) for the Final Rule RM05–25,05–26,05–27 [ICR Reference No: 202002–1902–006]

[4] The Commission staff thinks that the average respondent for this collection is similarly situated to the Commission, in terms of salary plus benefits. Based upon FERC's FY 2020 annual average of $172,329, (for salary plus benefits), the average hourly cost is $83/hour.

[5] FERC–717 corresponds to OMB Control No. 1902–0173 that identifies the information collection associated with Standards for Business Practices and Communication Protocols for Public Utilities.

[6] The 30-hour estimate was developed in Docket No. RM05–5–013, when the Commission prepared its estimate of the scope of work involved in transitioning to the NAESB Version 002.1 Business Practice Standards. See Order No. 676–E, 129 FERC 61,162 at P 134. (FERC–717, 165 * 30 = 4,950 hrs./3 = 1,650 hrs./year)

of automated collection techniques or other forms of information technology.

Dated: September 8, 2020.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. IC20–10–000]

Commission Information Collections Activities (Ferc Form Nos. 2 And 2–A); Comment Request; Extension; Errata Notice

AGENCY: Federal Energy Regulatory Commission.

ACTION: Errata notice for information collections and request for comments.

SUMMARY: In compliance with the requirements of the Paperwork Reduction Act of 1995, the Federal Energy Regulatory Commission (Commission or FERC) is soliciting public comment on currently approved information collections, FERC Form No. 2 (Annual Report for Major Natural Gas Companies) and FERC Form No. 2–A (Annual Report for Non-Major Natural Gas Companies). This notice corrects and replaces the 30-day notice published on July 20, 2020. The 60-day notice was published on April 30, 2020 and the initial 30-day notice published on July 20, 2020. The intial 30-day notice erroneously omitted the burden associated with a Final rule approved September 9, 2019. In order to correct the previously published notices, FERC is providing the opportunity for an additional 30-day comment period.

DATES: Comments on the collections of information are due October 14, 2020.

ADDRESSES: You may submit written comments on FERC Form Nos. 2 and 2–A to the Office of Management and Budget (OMB) through *www.reginfo.gov/public/do/PRAMain,* Attention: Federal Energy Regulatory Commission Desk Officer. Please identify the OMB control numbers (1902–0028 and 1902–0030) in the subject line. Your comments should be sent within 30 days of publication of this notice in the **Federal Register**.

Please submit copies of your comments to the Commission (identified by Docket No. IC20–10–000) by one of the following methods:

- *eFiling at Commission's Website: http://www.ferc.gov*.
- *U.S. Postal Service Mail:* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426.
- Effective 7/1/2020, delivery of filings other than by eFiling or the U.S. Postal Service should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

Instructions: All submissions must be formatted and filed in accordance with submission guidelines at: *https://www.ferc.gov/filing-instructions.* For user assistance, contact FERC Online Support by email at *ferconlinesupport@ferc.gov,* or by phone at: (866) 208–3676 (toll-free).

Docket: Users interested in receiving automatic notification of activity in this docket or in viewing/downloading comments and issuances in this docket may do so at *http://www.ferc.gov/docs-filing/docs-filing.asp.*

FOR FURTHER INFORMATION CONTACT: Ellen Brown may be reached by email at *DataClearance@FERC.gov* and telephone at (202) 502–8663.

SUPPLEMENTARY INFORMATION:

Title: FERC Form No. 2, Annual Report for Major Natural Gas Companies, and FERC Form No. 2–A, Annual Report for Non-Major Natural Gas Companies.

OMB Control Nos.: 1902–0028 (FERC Form No. 2), and 1902–0030 (FERC Form No. 2–A)

Type of Request: Three-year extension of the FERC Form No. 2 and FERC Form No. 2–A information collections requirements without a change to the current reporting and recordkeeping requirements.

Abstract: Pursuant to sections 8, 10 and 14 of the Natural Gas Act (NGA), (15 U.S.C. 717g, 717i, and 717m), the Commission is authorized to conduct investigations and collect and record data, and to prescribe rules and regulations concerning accounts, records and memoranda as necessary or appropriate for purposes of administering the NGA. The Commission may prescribe a system of accounts for jurisdictional companies and, after notice and opportunity for hearing, may determine the accounts in which particular outlays and receipts will be entered, charged or credited.

The Commission collects FERC Form Nos. 2 and 2–A information as prescribed in 18 CFR 260.1 and 18 CFR 260.2. These forms provide information concerning a company's current performance, compiled using the Commission's Uniform System of Accounts (USofA).[1] FERC Form No. 2 is filed by ''Major'' natural gas companies that have combined natural gas transported or stored for a fee that exceeds 50 million Dekatherms in each of the three previous calendar years. FERC Form No. 2–A is filed by ''Non-Major'' natural gas companies that do not meet the filing threshold for the FERC Form No. 2, but have total gas sales or volume transactions that exceeds 200,000 Dekatherms in each of the three previous calendar years.[2]

The forms provide information concerning a company's financial and operational information. The forms contain schedules which include a basic set of financial statements: Comparative Balance Sheet, Statement of Income and Retained Earnings, Statement of Cash Flows, and the Statement of Comprehensive Income and Hedging Activities. Supporting schedules containing supplementary information are filed, including revenues and the related quantities of products sold or transported; account balances for various operating and maintenance expenses; selected plant cost data; and other information.

The information collected assists the Commission in the administration of its jurisdictional responsibilities and is used by Commission staff, state regulatory agencies, customers, financial analysts and others in the review of the financial condition of regulated companies. The information is also used in various rate proceedings, industry analyses and in the Commission's audit programs and as appropriate, for the computation of annual charges. The information is made available to the public, interveners and all interested parties to assist in the proceedings before the Commission. For financial information to be useful to the Commission, it must be understandable, relevant, reliable and timely. The Form Nos. 2 and 2–A financial statements are prepared in accordance with the Commission's USofA and related regulations, and provide data that enables the Commission to develop and monitor cost-based rates, analyze costs of different services and classes of assets, and compare costs across lines of business. The use of the USofA permits natural gas companies to account for

[1] *See* 18 CFR part 201 (Uniform System of Accounts Prescribed for Natural Gas Companies Subject to the Provisions of the Natural Gas Act).

[2] FERC Form Nos. 2 and 2–A are part of the ''Forms Refresh'' effort, which is a separate activity and not addressed here. See Revisions to the Filing Process for Commission Forms, 166 FERC ¶ 61,027 (2019) (started in Docket No. AD15–11–000 and ongoing in Docket No. RM19–12–000). OMB issued its decisions on the Forms Refresh Final Rule in Docket No. RM19–12–000 on June 27, 2019.

similar transactions and events in a consistent manner, and to communicate those results to the Commission on a periodic basis. Comparability of data and financial statement analysis for a particular entity from one period to the next, or between entities, within the same industry, would be difficult to achieve if each company maintained its own accounting records using dissimilar accounting methods and classifications to record similar transactions and events. In summary, without the information collected in the forms, it would be difficult for the Commission to ensure, as required by the NGA, that a pipeline's rates remain just and reasonable, respond to Congressional and outside inquires, and make decisions in a timely manner. On April 30, 2020, the Commission published a Notice in the **Federal Register** in Docket No. IC20–10–000 requesting public comments.[3] The Commission received no public comments.

Note: This notice replaces and corrects the 30-day notice published on July 20, 2020 (85FR43831); no public comments were received. The burden and cost estimates have been corrected to include the industry burden of preparing and submitting in XBRL carried over from RM19–12 (approved by OMB 9/2019). The changes are reflected within the table below.

Type of Respondent: Major and Non-Major Natural Gas Companies.

Estimate of Annual Burden:[4] The Commission estimates the annual public reporting burden and cost[5] for the information collections as shown in the following table:

Information collections (FERC Form No.)	Number of respondents (1)	Annual number of responses per respondent (2)	Total number of responses (1) * (2) = (3)	Average burden & cost ($) per response (4)	Total annual burden hours & cost ($)[6] (3) * (4) = (5)	Annual cost per respondent ($) (5) ÷ (1)
Form No. 2—representing 100 respondents						
Burden to Comply with Filing Requirement	100	1	100	1,671.67 hrs.; $133,734	167,167 hrs.; $13,373,360	133,734
Burden to Prepare and Submit in XBRL (represented using the same number of respondents and responses normally received annually).	100	1	100	42.66 hrs.; $3,413	4,266 hrs.; $341,280	3,413
Form No. 2 Total	100	1	100	1,714.32 hrs.; $137,147	171,433 hrs.; $13,714,700	137,147
Form No. 2–A—representing 81 respondents						
Burden to Comply with Filing Requirement	81	1	81	296 hrs.; $23,680	23,976 hrs.; $1,918,080	23,680
Burden to Prepare and Submit in XBRL (represented using the same number of respondents and responses normally received annually).	81	1	81	42.66 hrs.; $3,413	3,455.46 hrs.; $276,453	3,413
Form No. 2–A Total	81	1	81	338.66 hrs.; $27,093	27,431.46 hrs.; $2,194, 533	27,093

- The number of annual responses related to the FERC Form Nos. 2 and 2–A is 181 responses.
- The industry burden of complying with the filing requirement is 167,167 hours (rounded) for FERC Form No. 2 and 23,976 hours for FERC Form No. 2–A.
- The industry burden of preparing and submitting in XBRL carried over from RM19–12 (approved by OMB 9/2019) 100 hours per form for the first year plus 14 hours per form for the remaining 2 years. The annual estimated total XBRL hours (100 + 14 + 14 = 128; 128 hrs./3 yrs. = 42.66 hrs. per respondent per response) is 4,266 hours for FERC Form No. 2 and 3,455.46 hours for FERC Form No. 2–A.

Comments: Comments are invited on: (1) Whether the collections of information are necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collections of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collections; and (4) ways to minimize the burden of the collections of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Dated: September 8, 2020.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP20–27–000]

North Baja Pipeline, LLC; Notice of Availability of the Environmental Assessment for the Proposed North Baja Xpress Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the North Baja XPress Project, proposed by North Baja Pipeline, LLC (North Baja) in the above-referenced docket. North Baja requests authorization to modify an existing compressor station in La Paz County, Arizona, as well as install additional flow measurement facilities and piping modifications at two existing meter stations in La Paz County, Arizona, and Imperial County, California, respectively. The project would enable the transport of 495,000 dekatherms per day to the United States/Mexico border. North Baja states that the purpose of the project is to create capacity to meet growing market demand and provide transportation of feed gas for the Energia Costa Azul liquefied natural gas terminal in Baja California, Mexico.

The EA assesses the potential environmental effects of the construction and operation of the North Baja XPress Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of the proposed project, with appropriate

[3] 85 FR 23954.

[4] Burden is defined as the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. For further explanation of what is included in the information collections burden, refer to 5 Code of Federal Regulations 1320.3.

[5] The Commission staff believes the FERC FTE (full-time equivalent) average cost for wages plus benefits is representative of the corresponding cost for the industry respondents. Based upon the FERC's 2019 average cost for salary plus benefits, the average hourly cost is $80/hour.

[6] Every cost figure in this column is rounded to the nearest dollar.

mitigating measures, would not constitute a major federal action significantly affecting the quality of the human environment.

The U.S. Department of the Interior Bureau of Land Management (BLM) participated as a cooperating agency in the preparation of the EA. Cooperating agencies have jurisdiction by law or special expertise with respect to resources potentially affected by the proposal and participate in the NEPA analysis. The BLM will adopt and use the EA to consider the issuance of a right-of-way grant for the use of a potential temporary workspace on BLM-administered public lands adjacent to the Ogilby Meter Station. North Baja submitted an application requesting a right-of-way for use of a temporary workspace on BLM-administered public lands.

The proposed North Baja XPress Project includes the following facilities:

- The construction of one new 31,900-horsepower compressor unit and restaging of two existing 7,700-horsepower compressor units at North Baja's existing Ehrenberg Compressor Station in La Paz County, Arizona; and
- the addition of flow measurement facilities and piping modifications at North Baja's existing El Paso and Ogilby Meter Stations in La Paz County, Arizona and Imperial County, California, respectively.

The Commission mailed a copy of the *Notice of Availability* for the project to federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American tribes; potentially affected landowners and other interested individuals and groups; and newspapers and libraries in the project area. The EA is only available in electronic format. It may be viewed and downloaded from the FERC's website (*www.ferc.gov*), on the natural gas environmental documents page (*https://www.ferc.gov/industries-data/naturalgas/environment/environmental-documents*). In addition, the EA may be accessed by using the eLibrary link on the FERC's website. Click on the eLibrary link (*https://www.ferc.gov/ferc-online/elibrary/overview*), select ''General Search'' and enter the docket number in the ''Docket Number'' field, excluding the last three digits (*i.e.* CP20–27). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at *FercOnlineSupport@ferc.gov* or toll free at (866) 208–3676, or for TTY, contact (202) 502–8659.

The EA is not a decision document. It presents Commission staff's independent analysis of the environmental issues for the Commission to consider when addressing the merits of issues raised in this proceeding. Any person wishing to comment on the EA may do so. Your comments should focus on the EA's disclosure and discussion of potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. The more specific your comments, the more useful they will be. To ensure that the Commission has the opportunity to consider your comments prior to making its decision on this project, it is important that we receive your comments in Washington, DC on or before 5:00 p.m. Eastern Time on October 8, 2020.

For your convenience, there are three methods you can use to file your comments to the Commission. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208–3676 or *FercOnlineSupport@ferc.gov.* Please carefully follow these instructions so that your comments are properly recorded.

(1) You can file your comments electronically using the eComment feature on the Commission's website (*www.ferc.gov*) under the link to FERC Online. This is an easy method for submitting brief, text-only comments on a project;

(2) You can also file your comments electronically using the eFiling feature on the Commission's website (*www.ferc.gov*) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on ''eRegister.'' You must select the type of filing you are making. If you are filing a comment on a particular project, please select ''Comment on a Filing''; or

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP20–27–000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, MD 20852.

Filing environmental comments will not give you intervenor status, but you do not need intervenor status to have your comments considered. Only intervenors have the right to seek rehearing or judicial review of the Commission's decision. At this point in this proceeding, the timeframe for filing timely intervention requests has expired. Any person seeking to become a party to the proceeding must file a motion to intervene out-of-time pursuant to Rule 214(b)(3) and (d) of the Commission's Rules of Practice and Procedures (18 CFR 385.214(b)(3) and (d)) and show good cause why the time limitation should be waived. Motions to intervene are more fully described at *https://www.ferc.gov/ferc-online/ferc-online/how-guides.*

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208–FERC, or on the FERC website (*www.ferc.gov*) using the eLibrary link. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

In addition, the Commission offers a free service called eSubscription which allows you to keep track of all formal issuances and submittals in specific dockets. This can reduce the amount of time you spend researching proceedings by automatically providing you with notification of these filings, document summaries, and direct links to the documents. Go to *https://www.ferc.gov/ferc-online/overview* to register for eSubscription.

Dated: September 8, 2020.

Kimberly D. Bose,

Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 14514–003]

Community of Elfin Cove Non Profit Corporation, DBA Elfin Cove Utility Commission; Notice of Application Tendered for Filing With the Commission and Soliciting Additional Study Requests

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Original minor license.

b. *Project No.:* P–14514–003.

c. *Date filed:* August 24, 2020.

d. *Applicant:* Community of Elfin Cove Non Profit Corporation, DBA Elfin Cove Utility Commission.

e. *Name of Project:* Crooked Creek and Jim's Lake Hydroelectric Project.

f. *Location:* On Crooked Creek and Jim's Lake, near the community of Elfin Cove, in the Sitka Recording District, Unorganized Borough, Alaska. The project would occupy 13.98 acres of federal land in the Tongass National Forest, managed by the U.S. Department of Agriculture's Forest Service.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Mr. Joel Groves, Polarconsult Alaska, Inc., 1503 W 33rd Avenue, #310, Anchorage, Alaska 99503; phone: (907) 258–2420 ext. 204.

i. *FERC Contact:* John Matkowski at (202) 502–8576; or email at *john.matkowski@ferc.gov.*

j. *Cooperating agencies:* Federal, state, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests described in item l below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. *See,* 94 FERC ¶ 61,076 (2001).

k. Pursuant to section 4.32(b)(7) of 18 CFR of the Commission's regulations, if any resource agency, Indian Tribe, or person believes that an additional scientific study should be conducted in order to form an adequate factual basis for a complete analysis of the application on its merit, the resource agency, Indian Tribe, or person must file a request for a study with the Commission not later than 60 days from the date of filing of the application, and serve a copy of the request on the applicant.

l. Deadline for filing additional study requests and requests for cooperating agency status: October 23, 2020.

The Commission strongly encourages electronic filing. Please file additional study requests and requests for cooperating agency status using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY).

m. The application is not ready for environmental analysis at this time.

n. The proposed project would consist of two developments, the Upper System and the Lower System.

The Upper System development would consist of the following new facilities: (1) A 16-foot-long, 6-foot-diameter intake structure to divert up to five cubic feet per second (cfs) from Crooked Creek; (2) a 1,050-foot-long, 14-inch-diameter buried penstock extending between the intake structure and the powerhouse; (3) a 16-foot-long, 20-foot-wide, 20-foot-high powerhouse containing a 35-kilowatt (kW) crossflow turbine; (4) a tailrace discharging flows into Jim's Lake; and (5) appurtenant facilities.

The Lower System development would consist of the following facilities: (1) 225-foot-long, 18-foot-high rock-fill dam and intake structure at the outlet of Jim's Lake to divert up to 6.5 cfs from Jim's Lake; (2) a 2,550-foot-long, 16 to 18-inch-diameter buried penstock extending between the intake and the powerhouse; (3) 20-foot-long, 28-foot-wide, 14-foot-high powerhouse containing a 105-kW impulse turbine; (4) a tailrace discharging flows into Port Althorp; and (5) appurtenant facilities.

The project would also include an underground 8,800-foot-long, 7.2/12.47-kilovolt (kV) transmission line extending from the project powerhouses at each of the developments to Elfin Cove's existing 7.2/12.47-kV transmission line. The project would generate an average of 788.3 megawatt-hours annually.

o. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (866) 208–3676 or TYY, (202) 502–8659.

You may also register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

p. *Procedural schedule:* The application will be processed according to the following preliminary schedule. Revisions to the schedule will be made as appropriate.

Issue Deficiency Letter (if necessary)—November 2020
Request Additional Information—November 2020
Issue Acceptance Letter—February 2021
Issue Scoping Document 1 for comments—March 2021
Request Additional Information (if necessary)—May 2021
Issue Scoping Document 2—June 2021
Issue Notice of Ready for Environmental Analysis—June 2021
Commission issues Environmental Assessment—December 2021

Dated: September 8, 2020.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 7274–034]

Town of Wells; Notice of Intent To File License Application, Filing of Pre-Application Document, Approving Use of the Traditional Licensing Process

a. *Type of Filing:* Notice of Intent to File License Application and Request to Use the Traditional Licensing Process.

b. *Project No.:* 7274–034.

c. *Date Filed:* July 28, 2020.

d. *Submitted By:* Town of Wells.

e. *Name of Project:* Lake Algonquin Hydroelectric Project.

f. *Location:* On the Sacandaga River in the Town of Wells, Hamilton County, New York. The project does not occupy any federal land.

g. *Filed Pursuant to:* 18 CFR 5.3 of the Commission's regulations.

h. *Potential Applicant Contact:* Nicholas Mauro, Town of Wells, 1438 State Route 30, Wells, NY 12190; (518) 775–9390; email—*nick-mauro@townofwells.org.*

i. *FERC Contact:* Samantha Pollak at (202) 502–6419; or email at *samantha.pollak@ferc.gov.*

j. The Town of Wells filed its request to use the Traditional Licensing Process on July 28, 2020. The Town of Wells provided public notice of its request on July 20, 2020. In a letter dated September 8, 2020, the Director of the Division of Hydropower Licensing approved the Town of Wells' request to use the Traditional Licensing Process.

k. With this notice, we are initiating informal consultation with the U.S. Fish and Wildlife Service under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR, Part 402. We are also initiating consultation with the New York State Historic Preservation Officer, as required by section 106, National Historic Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

l. With this notice, we are designating the Town of Wells as the Commission's non-federal representative for carrying out informal consultation pursuant to section 7 of the Endangered Species Act and consultation pursuant to section 106 of the National Historic Preservation Act.

m. The Town of Wells filed a Pre-Application Document (PAD; including a proposed process plan and schedule) with the Commission, pursuant to 18 CFR 5.6 of the Commission's regulations.

n. A copy of the PAD may be viewed on the Commission's website (*http://www.ferc.gov*), using the ''eLibrary'' link. Enter the docket number, excluding the last three digits in the docket number field, to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208 3676 (toll free), or (202) 502–8659 (TTY).

o. The licensee states its unequivocal intent to submit an application for a subsequent license for Project No. 7274. Pursuant to 18 CFR 16.20, each application for a subsequent license and any competing license applications must be filed with the Commission at least 24 months prior to the expiration of the existing license. All applications for license for this project must be filed by July 31, 2023.

p. Register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filing and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

Dated: September 8, 2020.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 14635–001]

Village of Gouverneur, New York; Notice Soliciting Scoping Comments

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* Original Minor License.

b. *Project No.:* P–14635–001.

c. *Date filed:* September 20, 2019.

d. *Applicant:* Village of Gouverneur, New York.

e. *Name of Project:* Gouverneur Hydroelectric Project (Gouverneur Project).

f. *Location:* The existing unlicensed project is located on the Oswegatchie River in the Village of Gouverneur in St. Lawrence County, New York.

g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).

h. *Applicant Contact:* Ronald P. McDougall, Mayor, Village of Gouverneur, 33 Clinton Street, Gouverneur, NY 13642; (315) 287–1720; *ronaldpmcdougall@gmail.com.*

i. *FERC Contact:* Jody Callihan at *jody.callihan@ferc.gov* or (202) 502–8278.

j. *Deadline for filing scoping comments:* October 9, 2020.

The Commission strongly encourages electronic filing. Please file scoping comments using the Commission's eFiling system at *https://ferconline.ferc.gov/FERCOnline.aspx.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *https://ferconline.ferc.gov/QuickComment.aspx.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov,* (866) 208–3676 (toll free), or (202) 502–8659 (TTY). In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852. The first page of any filing should include docket number P–14635–001.

The Commission's Rules of Practice require all intervenors filing documents with the Commission to serve a copy of that document on each person on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

k. This application is not ready for environmental analysis at this time.

l. *Project Description:* The Gouverneur Project consists of: (1) A 250-foot-long concrete gravity dam that includes two bridge piers and three separate spillways that range in crest elevation from 403.4 to 403.7 feet North American Vertical Datum of 1988 (NAVD88); (2) an impoundment with a surface area of 109 acres at the normal pool elevation of 403.8 feet NAVD88; (3) a concrete intake structure containing two trash rack bays separated by a 2-foot-wide center pier, each containing a 14-foot-wide trash rack; (4) a 20-foot by 36-foot powerhouse integral to the dam and containing two vertical axial flow propeller type turbines rated at 100 kilowatts each and two 100-kilovolt-ampere Westinghouse generators with a power factor of 0.8; (5) two generator leads from the turbine-generator units to a switchgear at the powerhouse interconnecting with the local grid; and (6) appurtenant facilities. The project generates about 1,195 megawatt-hours annually.

m. In addition to publishing the full text of this notice in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this notice, as well as other documents in the proceeding (*e.g.,* scoping document) via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document (P–14635). At this time, the Commission has suspended access to the Commission's Public Reference Room due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19) issued by the President on March 13, 2020. For assistance, contact FERC at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3673 or (202) 502–8659 (TTY).

n. You may also register online at *https://ferconline.ferc.gov/FERCOnline.aspx* to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

o. *Scoping Process*

The Commission staff intends to prepare an Environmental Assessment (EA) for the project in accordance with the National Environmental Policy Act. The EA will consider both site-specific and cumulative environmental impacts and reasonable alternatives to the proposed action.

At this time, we do not anticipate holding on-site public or agency scoping meetings. Instead, we are soliciting your comments and suggestions on the preliminary list of issues and alternatives to be addressed in the EA, as described in scoping document 1 (SD1), issued September 8, 2020.

Copies of the SD1 outlining the subject areas to be addressed in the EA were distributed to the parties on the Commission's mailing list and the applicant's distribution list. Copies of SD1 may be viewed on the web at *http://www.ferc.gov* using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. For assistance, call 1–866–208–3676 or for TTY, (202) 502–8659.

Dated: September 8, 2020.

Announcing Upcoming Meeting of Mobile Sources Technical Review Subcommittee

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Pursuant to the Federal Advisory Committee Act, EPA announces an upcoming meeting of the Mobile Sources Technical Review Subcommittee (MSTRS), which is a subcommittee under the Clean Air Act Advisory Committee (CAAAC). This is a virtual meeting and open to the public. The meeting will include discussion of current topics and presentations about activities being conducted by EPA's Office of Transportation and Air Quality. MSTRS listserv subscribers will receive notification when the agenda is available on the Subcommittee website. To subscribe to the MSTRS listserv, send an email to *MSTRS@epa.gov.*

DATES: EPA will hold a virtual public meeting on Monday, October 19, 2020 from 9:00 a.m. to 5:00 p.m. Eastern Daylight Time (EDT). Please monitor the website *https://www.epa.gov/caaac/mobile-sources-technical-review-subcommittee-mstrs-caaac* for any changes to meeting logistics. The final meeting agenda will be posted on the website.

ADDRESSES: For information on the public meeting or to register to attend, please contact *MSTRS@epa.gov.*

FOR FURTHER INFORMATION CONTACT: Any member of the public who wishes to attend the meeting or provide comments should express this intent by emailing *MSTRS@epa.gov* no later than Thursday, October 1, 2020. Further information concerning this public meeting and general information concerning the MSTRS can be found at: *https://www.epa.gov/caaac/mobile-sources-technical-review-subcommittee-mstrs-caaac.* Other MSTRS inquiries can be directed to Julia Burch, the Designated Federal Officer for MSTRS, Office of Transportation and Air Quality, at 202–564–0961 or *burch.julia@epa.gov.*

SUPPLEMENTARY INFORMATION: During the meeting, the Subcommittee may also hear progress reports from its workgroups as well as updates and announcements on Office of Transportation and Air Quality activities of general interest to attendees.

Participation in virtual public meetings. Please note that EPA is deviating from its typical approach because the President has declared a national emergency. Because of current CDC recommendations, as well as state and local orders for social distancing to limit the spread of COVID–19, EPA cannot hold in-person public meetings at this time.

The virtual public meeting will provide interested parties the opportunity to participate in this Federal Advisory Committee meeting.

EPA is asking all meeting attendees, even those who do not intend to speak, to register for the meeting by sending an email to the address listed in the **FOR FURTHER INFORMATION CONTACT** section above, by Thursday October 1, 2020. This will help EPA ensure that sufficient participation capacity will be available.

Please note that any updates made to any aspect of the meeting logistics, including potential additional sessions, will be posted online at *https://www.epa.gov/caaac/mobile-sources-technical-review-subcommittee-mstrs-caaac.* While EPA expects the meeting to go forward as set forth above, please monitor the website for any updates.

For individuals with disabilities: For information on access or services for individuals with disabilities, please email *MSTRS@epa.gov.* To request accommodate of a disability, please email *MSTRS@epa.gov,* preferably at least 10 business days prior to the meeting, to give EPA as much time as possible to process your request.

Dated: September 8, 2020.

Julia Burch,

Designated Federal Officer, Mobile Source Technical Review Subcommittee, Office of Transportation and Air Quality.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–10013–89–OP]

National Environmental Justice Advisory Council; Notice of Charter Renewal

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of charter renewal.

SUMMARY: Notice is hereby given that the Environmental Protection Agency (EPA) has determined that, in accordance with the provisions of the Federal Advisory Committee Act (FACA), the National Environmental Justice Advisory Council (NEJAC) is necessary and in the public interest in connection with the performance of duties imposed on the agency by law. Accordingly, NEJAC will be renewed for an additional two-year period. The purpose of the NEJAC is to provide independent advice and recommendations to the Administrator about issues associated with integrating environmental justice concerns into EPA's outreach activities, public policies, science, regulatory, enforcement, and compliance decisions.

FOR FURTHER INFORMATION CONTACT: Inquiries may be directed to Karen L. Martin, NEJAC Designated Federal Officer, U.S. EPA, 1200 Pennsylvania Avenue NW (Mail Code 2202A), Washington, DC 20460; by telephone at 202–564–0203; via email at *nejac@epa.gov*.

Brittany Bolen,

Associate Administrator for the Office of Policy.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0161, 3060–0685, 3060–1070, 3060–1272; FRS 17063]

Information Collections Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it can further reduce the information collection burden for small business concerns with fewer than 25 employees.

DATES: Written comments and recommendations for the proposed information collection should be submitted on or before October 14, 2020.

ADDRESSES: Comments should be sent to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Your comment must be submitted into *www.reginfo.gov* per the above instructions for it to be considered. In addition to submitting in *www.reginfo.gov* also send a copy of your comment on the proposed information collection to Cathy Williams, FCC, via email to *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.* Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the information collection, contact Cathy Williams at (202) 418–2918. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the web page *http://www.reginfo.gov/public/do/PRAMain,* (2) look for the section of the web page called ''Currently Under Review,'' (3) click on the downward-pointing arrow in the ''Select Agency'' box below the ''Currently Under Review'' heading, (4) select ''Federal Communications Commission'' from the list of agencies presented in the ''Select Agency'' box, (5) click the ''Submit'' button to the right of the ''Select Agency'' box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501–3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might ''further reduce the information collection burden for small business concerns with fewer than 25 employees.''

OMB Control Number: 3060–0161.

Title: Section 73.61, AM Directional Antenna Field Strength Measurements.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business and other for-profit entities.

Number of Respondents and Responses: 2,268 respondents and 2,268 responses.

Estimated Time per Response: 4–50 hours.

Frequency of Response: Recordkeeping requirement.

Total Annual Burden: 36,020 hours.

Total Annual Cost: None.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection of information is contained in Sections

154(i) and 303 of the Communications Act of 1934, as amended.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Privacy Impact Assessment: No impact(s).

Needs and Uses: The information collection requirements contained in 47 CFR 73.61 require that each AM station using directional antennas to make field strength measurement as often as necessary to ensure proper directional antenna system operation. Stations not having approved sampling systems make field strength measurements every three months. Stations with approved sampling systems must take field strength measurements as often as necessary. Also, all AM stations using directional signals must take partial proofs of performance as often as necessary. The FCC staff used the data in field inspections/investigations. AM licensees with directional antennas use the data to ensure that adequate interference protection is maintained between stations and to ensure proper operation of antennas.

OMB Control Number: 3060–0685.

Title: Updating Maximum Permitted Rates for Regulated Services and Equipment, FCC Form 1210; Annual Updating of Maximum Permitted Rates for Regulated Cable Services, FCC Form 1240.

Form Number: FCC Form 1210 and FCC Form 1240.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; State, Local or Tribal Government.

Number of Respondents and Responses: 3,400 respondents; 5,350 responses.

Estimated Time per Response: 1 hour to 15 hours.

Frequency of Response: Annual reporting requirement; Quarterly reporting requirement; Third party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. The statutory authority for this collection is contained in 4(i) and 623 of Communications Act of 1934, as amended.

Total Annual Burden: 44,800 hours.

Total Annual Cost: $3,196,875.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Needs and Uses: Cable operators use FCC Form 1210 to file for adjustments in maximum permitted rates for regulated services to reflect external costs. Regulated cable operators submit this form to local franchising authorities.

FCC Form 1240 is filed by cable operators seeking to adjust maximum permitted rates for regulated cable services to reflect changes in external costs.

Cable operators submit Form 1240 to their respective local franchising authorities (''LFAs'') to justify rates for the basic service tier and related equipment or with the Commission (in situations where the Commission has assumed jurisdiction).

OMB Control Number: 3060–1070.

Title: Allocation and Service Rules for the 71–76 GHz, 81–86 GHz, and 92–95 GHz Bands.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; not-for-profit institutions; and State, local, or Tribal Government.

Number of Respondents: 852 respondents; 11,342 responses.

Estimated Time per Response: 0.25 to 1.5 hours.

Frequency of Response: On occasion reporting requirement, recordkeeping requirement, and third-party disclosure requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. 151, 154(i), 303(f) and (r), 309, 316, and 332 of the Communications Act of 1934, as amended.

Total Annual Burden: 12,039 hours.

Total Annual Cost: $200,000.

Privacy Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality. The Commission has not granted assurances of confidentially to those parties submitting the information. In those cases where a respondent believes information requires confidentiality, the respondent can request confidential treatment and the Commission will afford such confidentiality for 20 days, after which the information will be available to the public.

Needs and Uses: The Commission is seeking an extension of this information collection in order to obtain the full three-year approval from OMB. There are no program changes to the reporting, recordkeeping and/or third-party disclosure requirements, but we are revising estimates based on the reduction of database managers, and the increase of renewals of the nationwide licensees. The recordkeeping, reporting, and third-party disclosure requirements will be used by the Commission to verify licensee compliance with the Commission rules and regulations, and to ensure that licensees continue to fulfill their statutory responsibilities in accordance with the Communications Act of 1934. The Commission's rules promote the private sector development and use of 71–76 GHz, 81–86 GHz, and 92–95 GHz bands (70/80/90 GHz bands). Such information has been used in the past and will continue to be used to minimize interference, verify that applicants are legally and technically qualified to hold license, and to determine compliance with Commission rules.

OMB Control Number: 3060–1272.

Title: 3.7 GHz Band Space Station Operator Accelerated Relocation Elections and Transition Plans; 3.7 GHz Band Incumbent Earth Station Lump Sum Payment Elections.

Form Number: N/A.

Type of Review: Extension of a currently approved information collection.

Respondents: Business or other for profit entities.

Number of Respondents: 3,010 respondents; 3,010 responses.

Estimated Time per Response: 16 hours per eligible space station accelerated relocation election; 80–600 hours per eligible space station transition plan; 32 hours per incumbent earth station lump sum payment election.

Frequency of Response: One-time reporting requirement.

Obligation to Respond: Required to obtain or maintain benefits. Statutory authority for this information collection is contained in sections 1, 2, 4(i), 4(j), 5(c), 201, 302, 303, 304, 307(e), and 309 of the Communications Act of 1934, as amended, 47 U.S.C. 151, 152, 154(i), 154(j), 155(c), 201, 302, 303, 304, 307(e), 309.

Total Annual Burden: 109,680 hours.

Total Annual Costs: $900,000.

Nature and Extent of Confidentiality: The information collected under this collection will be made publicly available, however, to the extent information submitted pursuant to this information collection is determined to be confidential, it will be protected by the Commission. If a respondent seeks to have information collected pursuant to this information collection withheld from public inspection, the respondent may request confidential treatment pursuant to section 0.459 of the Commission's rules for such information. See 47 CFR 0.459.

Privacy Act Impact Assessment: No impact(s).

Needs and Uses: A request for extension of this information collection (no change in requirements) will be submitted to the Office of Management and Budget (OMB) after this 60-day comment period in order to obtain the full three-year clearance from OMB. On February 28, 2020, in furtherance of the goal of releasing more mid-band spectrum into the market to support and enable next-generation wireless networks, the Commission adopted a Report and Order, FCC 20–22, (3.7 GHz Report and Order) in which it reformed the use of the 3.7–4.2 GHz band, also known as the C-Band. The 3.7–4.2 GHz band currently is allocated in the United States exclusively for non-Federal use on a primary basis for Fixed Satellite Service (FSS) and Fixed Service. Domestically, space station operators use the 3.7–4.2 GHz band to provide downlink signals of various bandwidths to licensed transmit-receive, registered receive-only, and unregistered receive-only earth stations throughout the United States. The 3.7 GHz Report and Order calls for the relocation of existing FSS operations in the band into the upper 200 megahertz of the band (4.0–4.2 GHz) and making the lower 280 megahertz (3.7–3.98 GHz) available for flexible-use throughout the contiguous United States through a Commission-administered public auction of overlay licenses in the 3.7 GHz Service that is scheduled to occur later this year, with the 20 megahertz from 3.98–4.0 GHz reserved as a guard band.

The Commission adopted a robust transition schedule to achieve an expeditious relocation of FSS operations and ensure that a significant amount of spectrum is made available quickly for next-generation wireless deployments, while also ensuring effective accommodation of relocated incumbent users. The 3.7 GHz Report and Order establishes a deadline of December 5, 2025, for full relocation to ensure that all FSS operations are cleared in a timely manner, but provides an opportunity for accelerated clearing of the band by allowing incumbent space station operators, as defined in the 3.7 GHz Report and Order, to commit to voluntarily relocate on a two-phased accelerated schedule (with additional obligations and incentives for such operators), with a Phase I deadline of December 5, 2021, and a Phase II deadline of December 5, 2023.

The Commission concluded in the 3.7 GHz Report and Order that, before the public auction of overlay licenses commences, it is appropriate for potential bidders to know when they will get access to the spectrum in the 3.7–3.98 GHz band that is currently occupied by incumbent FSS space station operators and earth stations, as defined in the 3.7 GHz Report and Order, and to have an estimate of how much they may be required to pay for incumbent relocation costs and accelerated relocation payments should they become overlay licensees, as overlay licensees are required to pay for the reasonable relocation costs of incumbent space station and incumbent earth station operators that are required to clear the lower portion of the band.

Under this information collection, the Commission will collect information that will be used by the Commission to determine when, how, and at what cost existing operations in the lower portion of the 3.7–4.2 GHz band will be relocated to the upper portion of the band. Specifically, the Commission collect the following information from incumbents as adopted in the 3.7 GHz Report and Order:

Accelerated Relocation Elections

The Commission concluded in the 3.7 GHz Report and Order that overlay licensees would only value accelerated relocation if a significant majority of incumbents are cleared in a timely manner, and therefore determined that at least 80% of accelerated relocation payments must be accepted in order for the Commission to accept accelerated elections and require overlay licensees to pay accelerated relocation payments. The 3.7 GHz Report and Order calls for an eligible space station operator, as defined in the 3.7 GHz Report and Order, that chooses to commit to clear on the accelerated schedule in exchange for accelerated relocation payments to submit a written, public, irrevocable accelerated relocation election with the Commission by May 29, 2020, to permit the Commission to determine whether there are sufficient accelerated relocation elections to trigger early relocation and in turn provide bidders with adequate certainty regarding the clearing date and payment obligations associated with each license well in advance of the auction.

Transition Plans

The 3.7 GHz Report and Order requires each eligible space station operator to submit to the Commission by June 12, 2020, and make available for public review, a detailed transition plan describing the necessary steps and estimated costs for the eligible space station operator to complete the transition of existing operations in the lower portion of the 3.7–4.2 GHz band to the upper 200 megahertz of the band and its individual timeline for doing so consistent with the regular relocation deadline or by the accelerated relocation deadlines. An eligible space station operator that elects to receive accelerated relocation payments is responsible for relocating all of its associated incumbent earth stations and must outline the details of such relocation in the transition plan (unless an incumbent earth station owner elects to receive a lump sum payment and assumes responsibility for transitioning its own earth stations). Similarly, an incumbent space station operator that does not elect to receive accelerated relocation payments but nevertheless plans to assume responsibility for relocating its own associated incumbent earth stations must make that clear in its transition plan.

Incumbent Earth Station Lump Sum Payment Elections

The 3.7 GHz Report and Order provides an incumbent earth station operator with the option of accepting reimbursement payments for its reasonable relocation costs for the transition, or opting out of the formal relocation process and accepting a lump sum reimbursement payment for all of its incumbent earth stations based on the average, estimated costs of relocating all of their incumbent earth stations in lieu of actual relocation costs. The 3.7 GHz Report and Order directs the Wireless Telecommunications Bureau to announce the lump sum that will be available per incumbent earth station as well as the process for electing lump sum payments and requires that no later than 30 days after this announcement, an incumbent earth station operator that wishes to receive a lump sum payment make an irrevocable lump sum payment election that will apply to all of its earth stations in the contiguous United States.

This information collection will serve as the starting point for planning and managing the process of efficiently and expeditiously clearing of the lower portion of the band, so that this spectrum can be auctioned for flexible-use service licenses.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

BILLING CODE 6712–01–P

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0791; FRS 17062]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA) of 1995, the Federal Communications Commission (FCC or the Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees. The FCC may not conduct or sponsor a collection of information unless it displays a currently valid control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid Office of Management and Budget (OMB) control number.

DATES: Written PRA comments should be submitted on or before November 13, 2020. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contact listed below as soon as possible.

ADDRESSES: Direct all PRA comments to Nicole Ongele, FCC, via email *PRA@fcc.gov* and to *Nicole.Ongele@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Nicole Ongele at (202) 418–2991.

SUPPLEMENTARY INFORMATION:

OMB Control Number: 3060–0791.

Title: Section 32.7300, Accounting for Judgments and Other Costs Associated with Litigation.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit.

Number of Respondents and Responses: 2 respondents; 2 responses.

Estimated Time per Response: 4–36 hours.

Frequency of Response: On occasion reporting requirement and recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this collection of information is contained in 47 U.S.C. 151, 152, 154, 161, 201–205 and 218–220 of the Communications Act of 1934, as amended.

Total Annual Burden: 40 hours.

Total Annual Cost: No cost.

Privacy Act Impact Assessment: No impact(s).

Nature and Extent of Confidentiality: There is no need for confidentiality. The Commission is not requesting that respondents submit confidential information to the FCC.

Needs and Uses: The Commission is seeking Office of Management and Budget (OMB) approval for an extension of this information collection (no change in the reporting and/or recordkeeping requirements). The Commission will submit this information collection after this 60-day comment period to the OMB. The Commission adopted accounting rules that require carriers to account for adverse federal antitrust judgments and post-judgment special charges. With regard to settlements of such lawsuits, there will be a presumption that carriers can recover the portion of the settlement that represents the avoidable costs of litigation; provided that the carrier makes a required showing. To receive recognition of its avoided cost of litigation a carrier must demonstrate, in a request for special relief, the avoided costs of litigation by showing the amount corresponding to the additional litigation expenses discounted to present value, that the carrier reasonably estimates it would have paid if it had not settled. Settlement costs in excess of the avoided costs of litigation are presumed not recoverable unless a carrier rebuts that presumption by showing the basic factors that enticed the carrier to settle and demonstrating that ratepayers benefited from the settlement.

Federal Communications Commission.

Marlene Dortch,

Secretary, Office of the Secretary.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060–0297; FRS 17061]

Information Collection Being Reviewed by the Federal Communications Commission Under Delegated Authority

AGENCY: Federal Communications Commission.

ACTION: Notice; request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, and as required by the Paperwork Reduction Act (PRA), the Federal Communications Commission (FCC or Commission) invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

DATES: Written comments should be submitted on or before November 13, 2020. If you anticipate that you will be submitting comments, but find it difficult to do so within the period of time allowed by this notice, you should advise the contacts below as soon as possible.

ADDRESSES: Direct all PRA comments to Cathy Williams, FCC, via email *PRA@fcc.gov* and to *Cathy.Williams@fcc.gov.*

FOR FURTHER INFORMATION CONTACT: For additional information about the information collection, contact Cathy Williams at (202) 418–2918.

SUPPLEMENTARY INFORMATION: The FCC may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

As part of its continuing effort to reduce paperwork burdens, and as required by the PRA of 1995 (44 U.S.C. 3501–3520), the FCC invites the general public and other Federal agencies to take this opportunity to comment on the following information collections. Comments are requested concerning: Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; the accuracy of the Commission's burden estimate; ways to enhance the quality, utility, and clarity of the information collected; ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology; and ways to further reduce the information collection burden on small business concerns with fewer than 25 employees.

OMB Control Number: 3060–0297.

Title: Section 80.503, Cooperative Use of Facilities.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities; Not-for-profit institutions; and State, Local, or Tribal Government.

Number of Respondents: 100 respondents; 100 responses.

Estimated Time per Response: 16 hours.

Frequency of Response: Occasion reporting requirement and Recordkeeping requirement.

Obligation to Respond: Required to obtain or retain benefits. Statutory authority for this information collection is contained in 47 U.S.C. Sections 151–155, 301–609 of the Communications Act of 1934, as amended; and 3 UST 3450, 3 UST 4726, 12 UST 2377.

Total Annual Burden: 1,600 hours.

Total Annual Cost: No cost.

Privacy Impact Assessment: No impact(s).

Needs and Uses: The information collection requirements contained in Section 80.503 require that a licensee of a private coast station or marine utility station on shore may install ship radio stations on board United States commercial transport vessels of other persons. In each case these persons must enter into a written agreement verifying that the ship station licensee has the sole right of control of the ship stations, that the vessel operators must use the ship stations subject to the orders and instructions of the coast station or marine utility station on shore, and that the ship station licensee will have sufficient control of the ship station to enable it to carry out its responsibilities under the ship station license. A copy of the contract/written agreement must be kept with the station records and made available for inspection by Commission representatives.

The information is used by FCC personnel during inspection and investigations to ensure compliance with applicable rules. If this information was not available, enforcement efforts could be hindered; frequency congestion in certain bands could increase; and the financial viability of some public coast radiotelephone stations could be threatened.

Federal Communications Commission.

General Counsel.

[FR Doc. 2020–20174 Filed 9–11–20; 8:45 am]

BILLING CODE 6732–01–P

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Announcement of Board Approval Under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Approval of information collection.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) has adopted a proposal to extend for three years, with revision, the Capital Assessments and Stress Testing Reports (FR Y–14A/Q/M; OMB No. 7100–0341). The revisions are applicable with as of dates ranging from September 30, 2020, to June 30, 2021.

FOR FURTHER INFORMATION CONTACT: Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452–3829.

Office of Management and Budget (OMB) Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395–6974.

A copy of the Paperwork Reduction Act (PRA) OMB submission, including the reporting form and instructions, supporting statement, and other documentation will be placed into OMB's public docket files. These documents also are available on the Federal Reserve Board's public website at *https://www.federalreserve.gov/apps/reportforms/review.aspx* or may be requested from the agency clearance officer, whose name appears above.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the PRA to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. Copies of the PRA Submission, supporting statements, and approved collection of information instrument(s) are placed into OMB's public docket files.

Final Approval Under OMB Delegated Authority of the Extension for Three Years, With Revision, of the Following Information Collection

Report title: Capital Assessments and Stress Testing Reports.

Agency form number: FR Y–14A/Q/M.

OMB control number: 7100–0341.

Frequency: Annually, quarterly, and monthly.

Respondents: These collections of information are applicable to bank holding companies (BHCs), U.S. intermediate holding companies (IHCs), and savings and loan holding companies (SLHCs)[1] with $100 billion or more in total consolidated assets, as based on: (i) The average of the firm's total consolidated assets in the four most recent quarters as reported quarterly on the firm's Consolidated Financial Statements for Holding Companies (FR Y–9C); or (ii) if the firm has not filed an FR Y–9C for each of the most recent four quarters, then the average of the firm's total consolidated assets in the most recent consecutive quarters as reported quarterly on the firm's FR Y–9Cs. Reporting is required as of the first day of the quarter immediately following the quarter in which the respondent meets this asset threshold, unless otherwise directed by the Board.

Estimated number of respondents: FR Y–14A/Q: 36; FR Y–14M: 34.[2]

Estimated average hours per response: FR Y–14A: 926 hours; FR Y–14Q: 2,201 hours; FR Y–14M: 1,072 hours; FR Y–14 On-going Automation Revisions: 480 hours; FR Y–14 Attestation On-going Attestation: 2,560 hours.

Estimated annual burden hours: FR Y–14A: 33,336 hours; FR Y–14Q: 316,944 hours; FR Y–14M: 437,376 hours; FR Y–14 On-going Automation Revisions: 17,280 hours; FR Y–14 Attestation On-going Attestation: 33,280 hours.

General description of report: This family of information collections is composed of the following three reports:

- The FR Y–14A collects quantitative projections of balance sheet, income, losses, and capital across a range of macroeconomic scenarios and qualitative information on methodologies used to develop internal projections of capital across scenarios.[3]
- The quarterly FR Y–14Q collects granular data on various asset classes, including loans, securities, trading assets, and PPNR for the reporting period.
- The monthly FR Y–14M is comprised of three retail portfolio- and loan-level schedules, and one detailed address-matching schedule to supplement two of the portfolio and loan-level schedules.

The data collected through the FR Y–14A/Q/M reports (FR Y–14 reports) provide the Board with the information needed to help ensure that large firms have strong, firm-wide risk measurement and management processes supporting their internal assessments of capital adequacy and that their capital resources are sufficient given their business focus, activities, and resulting risk exposures. The reports are used to support the Board's annual Comprehensive Capital Analysis and Review (CCAR) and Dodd-Frank Act Stress Test (DFAST) exercises, which complement other Board supervisory efforts aimed at enhancing the continued viability of large firms, including continuous monitoring of firms' planning and management of liquidity and funding resources, as well as regular assessments of credit, market and operational risks, and associated risk management practices. Information gathered in this data collection is also used in the supervision and regulation of respondent financial institutions. Respondent firms are currently required to complete and submit up to 17 filings each year: one annual FR Y–14A filing, four quarterly FR Y–14Q filings, and 12 monthly FR Y–14M filings. Compliance with the information collection is mandatory.

Current actions: On March 19, 2020, the Board published a notice in the **Federal Register** (85 FR 15776) requesting public comment for 60 days on the extension, with revision, of the FR Y–14 reports. The proposed revisions consisted of changes necessary to better identify risk as part of the stress tests, such as revisions related to wholesale, trading, and counterparty exposures, as well as capital revisions related to capital simplification, total loss-absorbing capacity (TLAC), and the standardized approach for counterparty credit risk (SA–CCR). The Board also proposed to make several clarifications to the instructions that were, in part, prompted by questions the Board had received from reporting institutions. The comment period for this notice expired on May 18, 2020. The Board

[1] SLHCs with $100 billion or more in total consolidated assets become members of the FR Y–14Q and FR Y–14M panels effective June 30, 2020, and the FR Y–14A panel effective December 31, 2020. *See* 84 FR 59032 (November 1, 2019).

[2] The estimated number of respondents for the FR Y–14M is lower than for the FR Y–14Q and FR Y–14A because, in recent years, certain respondents to the FR Y–14A and FR Y–14Q have not met the materiality thresholds to report the FR Y–14M due to their lack of mortgage and credit activities. The Board expects this situation to continue for the foreseeable future.

[3] On October 10, 2019, the Board issued a final rule that eliminated the requirement for firms subject to Category IV standards to conduct and publicly disclose the results of a company-run stress test. See 84 FR 59032 (Nov. 1, 2019). That final rule maintained the existing FR Y–14 substantive reporting requirements for these firms in order to provide the Board with the data it needs to conduct supervisory stress testing and inform the Board's ongoing monitoring and supervision of its supervised firms. However, as noted in the final rule, the Board intends to provide greater flexibility to banking organizations subject to Category IV standards in developing their annual capital plans and consider further change to the FR Y–14 forms as part of a separate proposal. See 84 FR 59032, 59063.

received two comment letters from banking organizations and one comment letter from a banking industry group. The Board has adopted the proposed revisions, except as discussed below. In addition, although the Board did not receive any comment letters regarding the proposed revisions related to a proposed rule that would modify the Board's TLAC requirements,[4] the Board has not adopted these revisions as proposed. Instead, the Board would address these revisions at such point as the Board adopts a final rule.

Detailed Discussion of Public Comments

Capital Simplifications

The Board proposed to revise the FR Y–14 reports to incorporate the changes finalized by the agencies that amended their regulatory capital rules (simplifications rule).[5] [6] The Board proposed these revisions to be effective for the September 30, 2020, FR Y–14Q submission and for the December 31, 2020, FR Y–14A submission. In the simplifications rule, the agencies adopted a simpler methodology for non-advanced approaches banking organizations [7] to calculate minority interest limitations and simplified the regulatory capital treatment of mortgage service assets (MSAs), temporary difference deferred tax assets (DTAs), and investments in the capital of unconsolidated financial institutions for non-advanced approaches banking organizations. The simplifications rule became effective April 1, 2020.[8]

The Board received two comments on the proposed changes to the FR Y–14 reports related to the simplifications rule. First, a banking organization asked why the timing of the capital simplifications-related proposed revisions to the FR Y–14Q report did not align with the timing of similar revisions made to the FR Y–9C, which were effective for the March 31, 2020, as of date.[9] The same banking organization also asked whether firms could early adopt the capital simplifications revisions for FR Y–14Q reporting before the proposed effective dates.

In order to allow firms to incorporate the effects of the capital simplifications rule into the FR Y–14Q report, the Board would have needed to add items to Schedule D (Regulatory Capital), which it proposed to do. It was not possible to allow eligible firms to incorporate the effects of the capital simplifications rule before the proposed effective date of September 30, 2020, without temporarily revising the FR Y–14Q. Firms will have to wait until the September 30, 2020, FR Y–14Q submission, to be able to incorporate these effects, and firms do not have the option to early adopt for FR Y–14Q reporting purposes. It is important to note that this does not inhibit eligible firms from taking advantage of the capital simplifications rule for purposes of capital adequacy compliance through other reports, such as the FR Y–9C.

Counterparty

Client-Cleared Derivatives

The Board proposed to require all client-cleared derivatives exposures to be reported on the large counterparty default (LCPD) section of FR Y–14Q, Schedule L (Counterparty), effective beginning September 30, 2020. One commenter was not supportive of this revision, as it commented that firms do not have this information readily available. Per the commenter, it would be operationally burdensome for firms to gather information related to client-cleared derivatives, especially given the volume of reported data that this revision would add to Schedule L. The commenter suggested that if the Board were to adopt this revision as proposed, then the Board should delay the effective until June 30, 2021.

The Board acknowledges the operational concerns raised by the industry, especially given the timing of the coronavirus disease 2019 (COVID–19) pandemic. The Board has adopted this revision as proposed, except that it has delayed the effective date until June 30, 2021. In fact, due to the operational concerns raised by the industry and the timing of the COVID–19 pandemic, the Board has delayed the effective date for all FR Y–14Q, Schedule L revisions until June 30, 2021.

The same commenter further stated that this revision would require firms to report exposures of their clients, and not exposures of the banks themselves. Per the comment, this goes against the spirit of the data collection, which is to capture reporting firm exposures.

The Board notes that, per the draft instructions, the requirement for a firm to report its exposures to clients (*i.e.,* member to client leg) applies only when the firm has credit exposures to a client, either directly (*i.e.,* the case in which the firm is acting as a financial intermediary on behalf of the client and enters into an offsetting transaction with a central counterparty (CCP) or an exchange (referred to as a back-to-back derivative)), or indirectly (*i.e.,* the case in which the firm guarantees the client's performance to a CCP or an exchange (referred to as a guaranteed derivative)). Further, a firm's reporting requirement associated with its client-cleared exposures to CCPs (*i.e.,* member to CCP leg) applies only when the firm has a credit exposure to a CCP, that is, either directly (*i.e.,* the case of a back-to-back derivative) or indirectly (*i.e.,* the case in which the firm guarantees the performance of the CCP or exchange to the client). Therefore, firms are only required to report client-clearing derivative exposures in instances where firms are directly or indirectly exposed. For these reasons, the Board has adopted this revision as proposed, except that has delayed the effective date until June 30, 2021.

The commenter also expressed concern that it is not clear on which portions of Schedule L client-cleared derivatives exposures information should be reported. Per the comment, the initial notice used the phrase ''large counterparty default'' section and the draft instructions provided with the initial notice did not specify where these exposures should be reported.

Per the proposal, client-cleared derivatives exposures information would be reported in Schedule L.5 (Derivatives and Securities Financing Transactions (SFT) Profile). The Board has adopted this revision as proposed, except that has delayed the effective date until June 30, 2021.

The Board specified in the initial notice that it was only going to collect information on client-cleared derivative exposures for monitoring purposes, and not for use in the stress test at this time. Per the commenter, the draft instructions provided with the initial notice did not make it clear how client-cleared derivative exposures would be delineated from other exposures to ensure they would not be included in the stress test at this time.

The Board will be able to delineate client-cleared derivative exposures from other exposures using the ''Agreement Role'' item of Schedule L.5.1 (Derivative and SFT information by counterparty legal entity and netting set/agreement). The ''Agreement Role'' item provides

[4] *See* 84 FR 13814 (April 8, 2019).

[5] *See* 12 CFR part 3 (OCC); 12 CFR part 217 (Board); 12 CFR part 324 (FDIC). While the agencies have codified the capital rule in different parts of title 12 of the Code of Federal Regulations, the internal structure of the sections within each agency's rule is substantially similar. All references to sections in the capital rule or the proposal are intended to refer to the corresponding sections in the capital rule of each agency.

[6] *See* 84 FR 35234 (July 22, 2019).

[7] Non-advanced approaches banking organizations are institutions that do not meet the criteria in 12 CFR 3.100(b) (OCC); 12 CFR 217.100(b) (Board); or 12 CFR 324.100(b) (FDIC).

[8] Eligible firms could have chosen to adopt the simplifications rule effective January 1, 2020.

[9] *See* 85 FR 18230 (April 1, 2020).

the firm with a means to report its cleared derivative exposures to a client in a manner that may be distinguished from the firm's other bilateral derivative exposures to the client. The Board has adopted this revision as proposed, except that has delayed the effective date until June 30, 2021.

Netting Agreement Reporting

The Board proposed to revise the FR Y–14Q, Schedule L instructions to provide illustrative examples that clarify netting agreement reporting requirements, including describing when firms should report mark-to-market (MtM) amounts with a counterparty on a gross or net basis. One commenter indicated that under U.S. Generally Accepted Accounting Principles (GAAP), firms are not permitted to offset negative and positive MtM with the same counterparty in the absence of a legally enforceable netting agreement. Per the commenter, the proposed reporting of netting requirements would go against U.S. GAAP. The commenter recommended that the Board permit firms to report positive and negative MtM amounts with a counterparty on a gross basis without offsetting in the absence of a legally enforceable netting agreement between the firm and the counterparty.

While the proposed change to the netting agreement reporting section in Schedule L.5 reiterated the existing language in other parts of the instructions pertaining to Net Current Exposure (CE) and Mark-to-Market (MtM) items, the Board acknowledges the point raised by the commenter concerning the importance of consistency between FR Y–14 reporting and U.S. GAAP, where possible. To that end, the Board has modified the instructions so that firms are required to report MtM amounts with a counterparty on a gross basis without offsetting positive and negative MtM amounts in cases where there is no legally enforceable netting agreement. In essence, the netting rule should apply consistently between MtM and Net CE even when there is no netting agreement in place, or when a netting agreement exists but that is not legally enforceable, so that both data fields are computed after aggregating across positions that have positive MtM amounts, without allowing any offset against negative MtM amounts.

The same commenter also asked the Board to provide additional examples regarding netting agreement reporting provided in the draft instructions to better illustrate how firms should report when both positive and non-positive legal opinions exist for a given netting agreement. Specifically, the commenter recommended that the Board clarify how values should be reported if there are both positive and negative legal opinions on collateral enforceability for a netting agreement.

The Board strives to clarify the instructions to ensure accurate reporting where possible, and has revised the instructions to state that in cases where mixed legal opinions exist for either a netting agreement or a collateral enforceability, firms should apply the methodologies that are consistent with the treatment for the regulatory capital rules, and report applicable data fields accordingly.

A commenter recommended that the Board include instructions on what agreement type value should be reported in cases where there is both SFT and derivatives exposure but not cross product netting. Additionally, the commenter recommended that the Board clarify what value of agreement type should be included if there is no netting agreement for SFT and derivatives between CCP and non-CCP.

In order to remove ambiguity, the Board has revised the instructions so that firms may report ''Other'' under ''Agreement Type'' in cases where the allowable entries currently listed in the instructions do not represent the characteristics of the exposure being reported.

A commenter asked the Board to clarify how to aggregate contractual terms from credit support annexes (CSAs). Per the commenter, firms currently report at the margin level, while the proposed instructions would require firms to report at netting agreement level.

For clarity, the Board has revised the instructions so that firms may report certain margin agreement details (such as agreement type, CSA contractual features, non-cash collateral type, threshold, minimum transfer amount CP, margin frequency, etc.) at a margin agreement level in cases where multiple CSAs with different contractual features per netting agreement exist. When doing so, firms are required to use the ''Netting Set ID'' naming convention in a manner that is a concatenation of a unique identifier assigned to a netting agreement and that to a margin agreement.

A commenter further requested that the Board provide clarification regarding reporting granularity of counterparty and netting, as these concepts differ between Schedules L.1 and L.5.

The Board notes that the level of granularity of counterparty and netting intentionally differs between Schedules L.1 and L.5. Consistent with the proposed instructions, firms should report Schedules L.1–L.3 at the counterparty legal entity level and Schedule L.5 at the netting set level. The Board has adopted the revision as proposed, except that has delayed the effective date until June 30, 2021.

CDS Hedge Notional

The Board proposed several revisions to the instructions surrounding the ''CDS Hedge Notional'' item on FR Y–14Q, Schedule L.5.1, such as clarifying that when firms are calculating the net notional amount, purchased CDS hedge notional amounts must be reflected as negative amounts and sold amounts must be reflected as positive amounts. A commenter stated that the concept of CDS hedges appears also appears on Schedule L.1, and the definitions are not consistent between Schedule L.1 and Schedule L.5.1.

The Board notes that the scope of CDS hedge positions in Schedule L.1 intentionally differs from that of Schedule L.5.1. Consistent with the instructions, the ''Single Name Credit Hedges'' item in Schedule L.1 is limited to single name CDS only, whereas the ''CDS Hedge Notional'' item in Schedule L.5.1 covers a range of positions that are eligible credit derivatives as defined in 12 CFR 252.71. The Board has adopted the revisions as proposed, except that has delayed the effective date until June 30, 2021.

Variation Margins

The Board proposed to align the FR Y–14Q, Schedule L instructions regarding how variation margins can be treated with the guidance provided in SR Letter 17–7 (Regulatory Capital Treatment of Certain Centrally-cleared Derivative Contracts under the Board's Capital Rule).[10] The commenter asked to confirm whether this guidance could be interpreted as requiring firms to report zero in the variation margin column for exposures to CCPs, whose rulebook considers variation margin as a settlement payment. In addition, the commenter asked the Board to confirm whether variation margin should be included in the Gross CE column of Schedule L and whether firms should continue to report all exposures to the CCP, such as default fund contributions and initial margin and any other collateral provided to the CCP that exceeds contract MtM amounts in their specific columns.

The Board confirms that the commenter's interpretation of SR 17–7

[10] *https://www.federalreserve.gov/supervisionreg/srletters/sr1707a1.pdf.*

is appropriate for the Schedule L reporting purposes, and has adopted the revision as proposed, except that has delayed the effective date until June 30, 2021.

Trading

Formalizing Supplemental Collections

The Board proposed to formalize two supplemental collections by incorporating them into FR Y–14Q, Schedule F (Trading). One of these supplemental collections would require firms to report corporate single name exposures at the obligor level in Schedule F.22 ([Incremental Default Risk] IDR—Corporate Credit) along with corporate index exposures at the series level.

A commenter stated that requiring firms to report corporate single name exposures at the obligor level, as well as corporate index exposures at the series level, would result in significant operational challenges, as this level of data is not readily available in firms' internal systems. Per the commenter, the supplemental collection on which this proposal was based was only collected annually, and so the data was aggregated manually by firms. Since the proposal would have required that this information be provided on a quarterly basis, firms would have needed to develop a systemic solution, which would take time to implement. Therefore, the commenter recommended that this revision be delayed until June 30, 2021. The commenter also recommended that the Board clarify the definition of ''average credit spread'' in the instructions for Schedule F.22.

The Board acknowledges the operational concerns raised by the industry, especially given the timing of the COVID–19 pandemic. In light of these concerns, the Board has adopted the requirements to report corporate single name exposures at the obligor level and to report corporate index exposures at the series level as proposed, except that the Board has delayed the effective date of this revision until June 30, 2021. In addition, Board has revised the instructions for Schedule F.22 to specify that the ''average credit spread'' should be calculated using a standardized 5-year tenor.

Hedge Reporting

The Board proposed to require firms to report a version of FR Y–14Q, Schedule F that captures the impact of accrual loan hedges. A commenter indicated that it would be operationally burdensome to submit data on accrual loan hedges on a quarterly basis, as controls and verification for this data need to be set up. The commenter further stated that for some firms, hedges are generally utilized to cover credit risk without regard for how the underlying loan is accounted. Therefore, in order to comply with the proposed revisions related to accrual loan hedges, such firms would need to isolate hedges based on accounting treatment of their underlying loan risk. Per the commenter, separating this data would pose a significant burden for such firms, and would require them to invest additional time and resources in FR Y–14 reporting. Given this, the commenter recommended that this revision be postponed until June 30, 2021.

The Board acknowledges the operational concerns raised by the industry, especially given the timing of the COVID–19 pandemic. In light of these concerns, the Board has adopted the requirement to separately report accrual loan hedges as proposed, except that the Board has delayed the effective date of this revision until June 30, 2021.

The Board proposed to add the following language to the Schedule F instructions: ''Positions that are held outside of the trading book that are hedges of accrual loans or hedges of loans held under fair value accounting (FVO hedges) should not be included in this schedule. Instead, they should each be reported separately in their own FR Y–14Q Trading schedules.'' A commenter asked the Board to specify to which ''positions'' these instructions refer, and to clarify the reporting requirements for such positions.

To minimize ambiguity, the Board has clarified that the phrase ''outside the trading book'' refers to positions reported outside of FR Y–9C, Schedule HC–D (Trading Assets and Liabilities). Reporting locations for such positions include, for example, FR Y–9C, Schedules HC–F (Other Assets) and HC–G (Other Liabilities).

Further, the Board has revised the instructions to make it clear that positions hedging FVO loans should be reported with submission type ''FVO Hedges'' and positions hedging accrual loans should be reported with submission type ''Accrual Loan Hedges.''

The Board proposed revisions related to hedge reporting on FR Y–14Q, Schedule F in order to isolate the impact of specific hedges (*e.g.,* X-valuation adjustment or XVA hedges). Specifically, the Board proposed to revise the instructions to clarify that XVA hedges should not be reported on Schedule F. A commenter stated that not requiring XVA hedges to be reported on Schedule F would be challenging for firms, as these hedges are built into pricing models when re-valuing positions under the global market shock. Further, per the commenter, these hedges are critical for reporting the impact for private equity exposures. The commenter stated that adopting these revisions as proposed would require significant modeling changes, which would create operational burden in terms of testing and validating results. Therefore, the commenter recommended that this revision be delayed until June 30, 2021.

The Board acknowledges the changes required for firms to comply with this proposed revision. Given these challenges and the timing of the COVID–19 pandemic, the Board has adopted the revision as proposed, except that it has delayed the effective date until June 30, 2021.

Wholesale

Undrawn Commitments

The Board proposed to revise the FR Y–14Q, Schedule H (Wholesale) to require firms to report interest rate data for undrawn commitments as if they were fully drawn on the reporting date. A commenter stated that the Board should not adopt this revision, as most firms do not have systems in place to capture interest rate information on undrawn commitments. Per the commenter, gathering and vetting this information would require significant manual review of physical documents.

The Board needs interest rate information for undrawn exposures to more accurately estimate wholesale risk and potential credit availability in a stressed environment, as interest rate information provides a measure of risk that is quantitative and uniformly defined across reporting entities. However, due to the challenges associated with adopting this revision, as well as the timing of the COVID–19 pandemic, the Board has delayed the effective date for this revision until December 31, 2020.

Two commenters stated that in many cases, there are multiple interest rate options available for an undrawn commitment and the borrower is not required to choose an interest rate until a draw has been made. The commenters also requested that the Board clarify how the interest rate should be reported for variable rate loans, credit facilities with loans with varying interest rates, loans with multiple rate reset scenarios, and interest rates based on performance metrics. The Board proposed instructions that would have required firms to report the most conservative interest rate allowed per the terms of the credit agreement if a credit facility allows for multiple interest rates. Per one of the commenters, requiring the most conservative rate would need to be recalculated for each report date, which would require significant resources.

To reduce the unintended burden of recalculating the most conservative interest rate each quarter, the Board has revised the language regarding which interest rate to report for facilities with multiple interest rate options to specify that firms should report the most conservative (highest) rate as of the most recent of origination or renewal date. The Board has revised the instructions to further clarify that in cases when the facility is an acquired facility and acquired more recently than origination or renewal, the reported rate should be the most conservative at time of acquisition. This revised language allows for consistent reporting over time of the combination of options that comprise an interest rate for an undrawn facility. For example, assuming at origination, a London Inter-Bank Offered Rate (LIBOR) index plus spread amounts to a 4.25% interest rate, and a Base index plus spread amounts to a 4.50% interest rate, the interest rate reported would be the Base index plus spread for each subsequent reporting period that the origination or renewal date does not change and the facility remains fully undrawn. The same logic should be applied to other scenarios that allow for multiple interest rates.

A commenter stated that there was the need for further clarification in order to properly calculate interest rates for undrawn commitments, such as in situations where the date used to calculate the interest rate is a different date than the draw date.

To remove ambiguity, the Board has clarified the instructions to state that the funding date should be considered the reporting date.

Legal Entity Identifiers

The Board proposed to require firms to report Legal Entity Identifiers (LEIs) assigned to obligors and if applicable, entities that are identified as the primary source or repayment when the primary source of repayment differs from the reported obligor, for credit facilities reported on Schedule H. A commenter indicated that many firms do not collect LEI information from their clients and there is no automated way to gather or validate LEI data. Per the commenter, firms do not currently have systems in place to maintain LEI information and small naming differences or misspellings can lead to LEI mismatches. Therefore, requiring LEIs would require costly system updates and significant resources to accurately report.

The commenter further added that requiring LEIs at any time would be challenging, but given the outbreak of the COVID–19 pandemic, firms do not have ample resources to dedicate to system changes associated with LEIs. The commenter recommended that if the Board adopts this proposal, then it should delay this requirement until after the COVID–19 pandemic has subsided.

The Board believes there is a significant benefit to using LEI data to identify obligors, as it is globally available and contains information about entity structure. This makes it a beneficial addition to the other identifiers collected in the Schedule H, and the trend is toward using LEI data. However, the Board acknowledges that firms will need time to capture the LEI data for their obligors, especially given the timing of the COVID–19 pandemic. Accordingly, the Board has adopted this revision as proposed, except that it has delayed the effective date of this revision until June 30, 2021.

Property Size

The Board proposed to revise FR Y–14Q, Schedule H.2 (Commercial Real Estate), item 39 (''Property Size'') to clarify that predominance can be used to determine the units even if the loan consists of mixed property types. A commenter stated that this revision inadvertently creates ambiguity as it would no longer be clear when the ''Other'' option for item 39 would be used. The commenter further stated that the proposed revision would not clearly address the reporting of mixed property types, as it would still be unclear if firms are to only report the size of the single predominate property type and exclude the size of the other property types that secure the facility. For these reasons, the commenter suggested not adopting the proposed revisions.

The Board believes the proposed clarifications remain necessary as they address an ambiguity in the instructions concerning how to report property size when there is a single property with multiple property types where one property type predominates. To provide greater clarity, the Board has revised the instructions for item 39 to indicate the reporting of property size when the option reported in Schedule H.2, item 9 (''Property Type'') is ''Other''. The Board has also revised the instructions to state that the reported property size should be based on the size of the entire property.

Capital Call Subscriptions

The Board proposed to add options of ''Revolving Credit (of any type)—Capital Call Subscription'' and ''Term loan (of any type)—Capital Call Subscription'' to FR Y–14Q, Schedule H.1, item 20 (''Credit Facility Type''). The Board also proposed to add the option of ''Capital Call Subscription'' to item 22 (''Credit Facility Purpose''). A commenter indicated that the Board should not adopt the revisions to item 20, as the Board could combine the values reported in items 20 and 22 to identify revolving credit and term loans that are capital call subscriptions.

The Board agrees with the commenter that the revisions as proposed are duplicative. As a result, the Board has not adopted the proposed revisions to the instructions for Schedule H.1, item 20 (''Credit Facility Type''). However, the Board has adopted the revisions as proposed to Schedule H.1 (Corporate Loan), item 22 (''Credit Facility Purpose''), so that the Board can still identify capital call subscriptions.

Retail

Credit Cards

The Board proposed to revise items 11 (''Projected Managed Losses'') and 12 (''Projected Booked Losses'') of FR Y–14M, Schedule D.2 (Portfolio Level Credit Card Information) to require firms to project lifetime losses under current expected credit losses (CECL) projections on a rolling basis each month, as opposed to only losses over the next twelve months on a rolling basis each month. A commenter stated that these proposed revisions do not allow firms to report losses quarterly, which would align with current CECL practices of calculating losses at most firms. A commenter suggested that the Board revise the instructions to provide firms more flexibility for reporting items 11 and 12.

The Board notes that firms should use an appropriate model for calculating projected managed and booked losses that is consistent with current accounting guidelines and firms' own modeling frameworks. Therefore, to allow flexibility in reporting, the Board has removed the language ''rolling basis each reporting month'' from items 11 and 12. Additionally, the Board has not adopted the proposed revisions to the instructions to project through the expected lifetime of the loans for line items 11 and 12. Rather, the Board will continue to require firms to report projected managed and booked losses over the next twelve months for each respective portfolio.

A commenter indicated that the proposed revisions to items 11 and 12 would require firms that have adopted CECL to report duplicative data in these items as they are required to report in Schedule D.2, items 9 (''ALL Managed Balance'') and 10 (''ALL Booked Balance''), respectively. Additionally, the commenter asked the Board to clarify whether the values reported in items 11 and 12 should include projected interest and fees.

Given that the Board has not adopted the revision as proposed to items 11 and 12, the instructions for items 11 and 12 will to continue to differ from those of items 9 and 10. The instructions for items 9 and 10 reflect the lifetime expected credit losses for firms that have adopted CECL, whereas the instructions for items 11 and 12 require institutions that have adopted CECL to report the allowance for credit losses managed or booked balance over the next 12 months, respectively. Also, given the intention to capture total projected losses within items 11 and 12, the Board has clarified the instructions for these items to require firms to include projected losses recognized to on-balance sheet interest and fees.

Legal authorization and confidentiality: The Board has the authority to require BHCs to file the FR Y–14 reports pursuant to section 5(c) of the Bank Holding Company Act (''BHC Act''), 12 U.S.C. 1844(c), and pursuant to section 165(i) of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act), 12 U.S.C. 5365(i), as amended by section 401(a) and (e) of the Economic Growth, Regulatory Relief, and Consumer Protection Act (EGRRCPA).[11] The Board has authority to require SLHCs to file the FR Y–14 reports pursuant to section 10(b) of the Home Owners' Loan Act (12 U.S.C. 1467a(b)), as amended by section 369(8) and 604(h)(2) of the Dodd-Frank Act. Lastly, the Board has authority to require U.S. IHCs of FBOs to file the FR Y–14 reports pursuant to section 5 of the BHC Act, as well as pursuant to sections 102(a)(1) and 165 of the Dodd-Frank Act, 12 U.S.C. 5311(a)(1) and 5365.[12] In addition, section 401(g) of EGRRCPA, 12 U.S.C. 5365 note, provides that the Board has the authority to establish enhanced prudential standards for foreign banking organizations with total consolidated assets of $100 billion or more, and clarifies that nothing in section 401 ''shall be construed to affect the legal effect of the final rule of the Board . . . entitled 'Enhanced Prudential Standard for [BHCs] and Foreign Banking Organizations' (79 FR 17240 (March 27, 2014)), as applied to foreign banking organizations with total consolidated assets equal to or greater than $100 million.'' [13] The FR Y–14 reports are mandatory. The information collected in the FR Y–14 reports is collected as part of the Board's supervisory process, and therefore, such information is afforded confidential treatment pursuant to exemption 8 of the Freedom of Information Act (FOIA), 5 U.S.C. 552(b)(8). In addition, confidential commercial or financial information, which a submitter actually and customarily treats as private, and which has been provided pursuant to an express assurance of confidentiality by the Board, is considered exempt from disclosure under exemption 4 of the FOIA, 5 U.S.C. 552(b)(4).[14]

Board of Governors of the Federal Reserve System, September 9, 2020.

Michele Taylor Fennell,

Assistant Secretary of the Board.

[FR Doc. 2020–20189 Filed 9–11–20; 8:45 am]

BILLING CODE 6210–01–P

[11] Public Law 115–174, Title IV § 401(a) and (e), 132 Stat. 1296, 1356–59 (2018).

[12] Section 165(b)(2) of the Dodd-Frank Act, 12 U.S.C. 5365(b)(2), refers to ''foreign-based bank holding company.'' Section 102(a)(1) of the Dodd-Frank Act, 12 U.S.C. 5311(a)(1), defines ''bank holding company'' for purposes of Title I of the Dodd-Frank Act to include foreign banking organizations that are treated as bank holding companies under section 8(a) of the International Banking Act of 1978, 12 U.S.C. 3106(a). The Board has required, pursuant to section 165(b)(1)(B)(iv) of the Dodd-Frank Act, 12 U.S.C. 5365(b)(1)(B)(iv), certain foreign banking organizations subject to section 165 of the Dodd-Frank Act to form U.S. intermediate holding companies. Accordingly, the parent foreign-based organization of a U.S. IHC is treated as a BHC for purposes of the BHC Act and section 165 of the Dodd-Frank Act. Because Section 5(c) of the BHC Act authorizes the Board to require reports from subsidiaries of BHCs, section 5(c) provides additional authority to require U.S. IHCs to report the information contained in the FR Y–14 reports.

[13] The Board's Final Rule referenced in section 401(g) of EGRRCPA specifically stated that the Board would require IHCs to file the FR Y–14 reports. *See* 79 FR 17240, 17304 (March 27, 2014).

[14] Please note that the Board publishes a summary of the results of the Board's CCAR testing pursuant to 12 CFR 225.8(f)(2)(v), and publishes a summary of the results of the Board's DFAST stress testing pursuant to 12 CFR 252.46(b) and 12 CFR 238.134, which includes aggregate data. In addition, under the Board's regulations, covered companies must also publicly disclose a summary of the results of the Board's DFAST stress testing. *See* 12 CFR 252.58; 12 CFR 238.146. The public disclosure requirement contained in 12 CFR 252.58 for covered BHCs and covered IHCs is separately accounted for by the Board in the Paperwork Reduction Act clearance for FR YY (OMB No. 7100–0350) and the public disclosure requirement for covered SLHCs is separately accounted for in by the Board in the Paperwork Reduction Act clearance for FR LL (OMB No. 7100–0380).

FEDERAL RESERVE SYSTEM

Change in Bank Control Notices; Acquisitions of Shares of a Bank or Bank Holding Company

The notificants listed below have applied under the Change in Bank Control Act (Act) (12 U.S.C. 1817(j)) and § 225.41 of the Board's Regulation Y (12 CFR 225.41) to acquire shares of a bank or bank holding company. The factors that are considered in acting on the applications are set forth in paragraph 7 of the Act (12 U.S.C. 1817(j)(7)).

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in paragraph 7 of the Act.

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551–0001, not later than September 29, 2020.

A. Federal Reserve Bank of Atlanta (Kathryn Haney, Assistant Vice President) 1000 Peachtree Street NE, Atlanta, Georgia 30309. Comments can also be sent electronically to *Applications.Comments@atl.frb.org:*

1. *The SSX3 Trust, The SSX4 Trust, and William G. Smith, III, as trustee of both trusts, all of Tallahassee, Florida;* to join the Smith Family Control Group, a group acting in concert, and retain voting shares of Capital City Bank Group, Inc., and thereby indirectly retain voting shares of Capital City Bank, both of Tallahassee, Florida.

Board of Governors of the Federal Reserve System, September 9, 2020.

Yao-Chin Chao,

Assistant Secretary of the Board.

BILLING CODE 6210–01–P

GENERAL SERVICES ADMINISTRATION

[Notice MA–2020–07; Docket No. 2020–0002, Sequence No. 20]

Request for Public Comment: Methodologies To Identify Excess Personal Property

AGENCY: General Services Administration (GSA).

ACTION: Notice.

SUMMARY: GSA is seeking input on methodologies to identify personal property as excess. See the **SUPPLEMENTARY INFORMATION** section below for additional guidance.

DATES: Comments must be received on or before November 13, 2020.

ADDRESSES: Submit comments identified by ''Notice–MA–2020–07, Methodologies to Identify Excess Personal Property'' by any of the following methods:

- *Regulations.gov: http://www.regulations.gov.* Submit comments via the Federal eRulemaking portal by searching for Notice–MA–2020–07, Methodologies to Identify Excess Personal Property. Select the link ''Comment Now'' that corresponds with ''Notice MA–2020–07, Methodologies to Identify Excess Personal Property.'' Follow the instructions provided on the screen. Please include your name, company name (if applicable), and ''Notice–MA–2020–07, Methodologies to Identify Excess Personal Property'' on your attached document.

FOR FURTHER INFORMATION CONTACT: Mr. William Garrett, Director, Personal Property, Office of Government-wide Policy, 202–368–8163 or via email at *william.garrett@gsa.gov.*

SUPPLEMENTARY INFORMATION: In January 2018, the Federal Personal Property Management Act (FPPMA), Public Law 115–419, was enacted requiring agencies to regularly assess certain types of personal property under their control in accordance with guidance from GSA. Subsequently, on December 20, 2019, GAO published its final report GAO–20–228, ''Federal Property: GSA Guidance Needed to Help Agencies Identify Unneeded Property in Warehouses.'' The report concluded, in part, ''with the recent enactment of FPPMA, an opportunity exists for GSA to develop and communicate guidance to help agencies assess property utilization and identify unneeded property in warehouses more efficiently that includes practices GSA identifies as being useful.'' The report concluded that the Administrator of General Services should ''direct the Office of Government-wide Policy (1) to incorporate into its guidance approaches or practices that agencies could use to assess utilization of and the ongoing need for property—approaches such as recommendations for periodic justifications, data analytics, and utilization reviews—and (2) to develop a plan and timelines for communicating the guidance to agencies government-wide.'' To address these recommendations, in part, GSA established a working group of Federal and industry personal property management experts. GSA is soliciting input from the public to inform GSA and the working group of existing methodologies to effectively identify excess personal property.

Although GSA may not respond to each individual comment, GSA may follow-up with respondents to clarify input. GSA values public feedback and will consider all comments that it receives. GSA will also be conducting targeted outreach on this same topic, including engaging with subject matter experts to improve internal guidance.

Jessica Salmoiraghi,

Associate Administrator, Office of the Administrator.

BILLING CODE 6820–14–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Healthcare Infection Control Practices Advisory Committee

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, the CDC announces the following meeting for the Healthcare Infection Control Practices Advisory Committee (HICPAC). This meeting is open to the public, limited only by audio phone lines available. The public is also welcome to listen to the meeting by dialing 1–877–924–1748, passcode: 6118574. A total of 200 lines will be available. Registration is required. To register for this call, please go to *www.cdc.gov/hicpac.*

DATES: The meeting will be held on November 5, 2020, from 9:00 a.m. to 3:00 p.m., EST.

ADDRESSES: The teleconference access is 1–877–924–1748, and the passcode is 6118574.

FOR FURTHER INFORMATION CONTACT: Koo-Whang Chung, M.P.H., HICPAC, Division of Healthcare Quality Promotion, NCEZID, CDC, l600 Clifton Road, NE, Mailstop H16–3, Atlanta, Georgia 30329–4027, Telephone (404) 498–0730; Email: *HICPAC@cdc.gov.*

SUPPLEMENTARY INFORMATION:

Purpose: The Committee is charged with providing advice and guidance to the Director, Division of Healthcare Quality Promotion (DHQP), the Director, National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), the Director, CDC, the Secretary, Health and Human Services regarding 1) the practice of healthcare infection prevention and control; 2) strategies for surveillance, prevention, and control of infections, antimicrobial resistance, and related events in settings where healthcare is provided; and 3) periodic updating of CDC guidelines and other policy statements regarding prevention of healthcare-associated infections and healthcare-related conditions.

Matters To Be Considered: The agenda will include updates from the following HICPAC workgroups: The Healthcare Personnel Guideline Workgroup; the Long-term Care/Post-acute Care Workgroup; and the Neonatal Intensive Care Unit Workgroup. Agenda items are subject to change as priorities dictate.

Procedure for Public Comment: Time will be available for public comment. Members of the public who wish to provide public comments should plan to attend the public comment session at the start time listed. Please note that the public comment period may end before the time indicated, following the last call for comments.

Procedure for Public Written Comment: The public may submit written comments in advance of the meeting. Comments should be submitted in writing by email to the contact person listed above. The deadline for receipt of written public comment is October 21, 2020. All requests must contain the name, address, and organizational affiliation of the speaker, as well as the topic being addressed. Written comments should not exceed one single-spaced typed page in length. Written comments received in advance of the meeting will be included in the official record of the meeting.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–20–1227; Docket No. CDC–2020–0097]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed revision to an information collection project titled ''Assessment of Ill Worker Policies Study.'' The study will examine whether an educational intervention has an effect on restaurants either developing or expanding their ill worker management policies.

DATES: CDC must receive written comments on or before November 13, 2020.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2020–0097 by any of the following methods:

- *Federal eRulemaking Portal: Regulations.gov*. Follow the instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS–D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to *Regulations.gov.*

Please note: *Submit all comments through the Federal eRulemaking portal (regulations.gov) or by U.S. mail to the address listed above.*

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS–D74, Atlanta, Georgia 30329; phone: 404–639–7118; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.
5. Assess information collection costs.

Proposed Project

Assessment of Ill Worker Policies Study (OMB Control No. 0920–1227, Exp. 05/31/2021)—Revision—National Center for Environmental Health

(NCEH), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The CDC is requesting a three-year Paperwork Reduction Act (PRA) clearance for a Revision to an information collection request (ICR) for a research program focused on identifying the environmental causes of foodborne illness and improving environmental public health practice. This research program is conducted by the Environmental Health Specialists Network (EHS-Net), a collaborative project of the CDC, U.S. Food and Drug Administration (FDA), U.S. Department of Agriculture (USDA), and eight state and local public health programs (California; Tennessee; Minnesota; Rhode Island; New York; New York City, NY; Southern Nevada Health District, NV; and Harris County, TX).

This ICR aims to assess whether an educational intervention will result in either the development or enhancement of restaurant ill worker policies. This will be accomplished by interviewing restaurant managers, surveying workers, and observing restaurant practices in 320 randomly selected and assigned restaurants in the EHS-Net catchment area. Burden hours would be associated with the restaurant staff for the time to answer questions about their restaurant. There would be two to three site visits depending upon which group the restaurants were assigned to, that is, the intervention or the control group. An initial visit will be used to observe baseline conditions and to provide the intervention only to the restaurants selected to receive it. A second visit will be used to determine if the policies had changed and to introduce the intervention to the control restaurants (if it is deemed successful), and a final follow up visit to the control restaurants that received the intervention on the second visit.

Although approved in 2018, NCEH and its program partners needed to prioritize other data collections over this study, and then had to delay the current study due to the COVID–19 pandemic. NCEH partners provided feedback to refine this research protocol, revise the ICR, and plan to begin this study in 2021. NCEH is requesting approval for revisions which fall into three categories: (1) Changes to comply with the 2018 Revised Common Rule and 21st Century Cures Act; (2) changes to strengthen the study, based on recent experience and stakeholder feedback; and (3) changes to respond to the COVID–19 pandemic.

NCEH is requesting a revised PRA clearance for 715 responses per year and for a time burden of 206 hours per year. These changes result in a decrease of 1,412 responses and 146 hours per year relative to the 2018 PRA clearance. There is no cost to the respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hr)	Total burden (in hr)
Restaurant Managers (Intervention Restaurants).	Manager Recruiting Script	119	1	3/60	6

Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS–D74, Atlanta, Georgia 30329; phone: 404–639–7118; Email: *omb@cdc.gov.*

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submissions of responses.

5. Assess information collection costs.

Proposed Project

HIV Outpatient Study (HOPS) (OMB Control No. 0920–1080, Exp. 09/30/2021)—Extension—National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention (NCHHSTP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention requests a three-year approval for the HIV Outpatient Study data collection activity. The HIV Outpatient Study (HOPS) is a prospective longitudinal cohort of HIV-infected outpatients at eight well established private HIV care practices and university-based U.S. clinics, in Tampa, Florida; Washington, DC; Stony Brook, New York; Chicago, Illinois; Denver, Colorado; and Philadelphia, Pennsylvania. Clinical data are abstracted on an ongoing basis from the medical records of adult HIV-infected HOPS study participants, who also complete an optional telephone/Web-based behavioral assessment as part of their annual clinic visit, which on average takes about seven minutes. Before enrolling in this study, all potential study participants will undergo an informed consent process (including signing of a written informed consent) which is estimated to take 15 minutes.

The core areas of HOPS research extending through the present HIV treatment era include; (i) monitoring death rates and causes of death, (ii) characterizing the optimal patient management strategies to reduce HIV related morbidity and mortality (*e.g.,* effectiveness of antiretroviral therapies and other clinical interventions), (iii) monitoring of sexual and drug use behaviors to inform Prevention with Positives, and (iv) investigating disparities in the HIV care continuum by various demographic factors.

In recent years, the HOPS has been instrumental in bringing attention to emerging issues in chronic HIV infection with actionable opportunities for prevention, including cardiovascular disease, fragility fractures, renal and hepatic disease, and cancers. The HOPS remains an important source for multiyear trend data concerning conditions and behaviors for which data are not readily available elsewhere, including: rates of opportunistic illnesses, rates of comorbid conditions (*e.g.,* hypertension, obesity, diabetes) and antiretroviral drug resistance.

Data will be collected through medical record abstraction by trained abstractors and by telephone or internet based, computer-assisted interviews at eight funded study sites in six U.S. cities. Collection of data abstracted from patient medical records provides data in five general categories: Demographics and risk behaviors for HIV infection; symptoms; diagnosed conditions (definitive and presumptive); medications prescribed (including dose, duration, and reasons for stopping); all laboratory values, including CD4+ T-lymphocyte (CD4+) cell counts, plasma HIV–RNA determinations, and genotype, phenotype, and trophile results. Data on visit frequency, AIDS, and death are acquired from the clinic chart. Data collected using a brief Telephone Audio-Computer Assisted Self-Interview (T–ACASI) survey or an identical Web-based Audio-Computer Assisted Self-Interview (ACASI) include: Age, sex at birth, use of alcohol and drugs, cigarette smoking, adherence to antiretroviral medications, types of sexual intercourse, condom use, and disclosure of HIV status to partners.

We anticipate that 450 new HOPS study participants will be recruited annually into the HOPS from a pool of HIV-infected individuals currently in HIV-care at the nine aforementioned clinics (50 patients per site). Patients are approached during one of their routine clinic visits to participate in the HOPS. Patients interested in participating in the HOPS are given detailed information about the nature of the study and provided with written informed consent that must be completed prior to enrollment. The 450 newly enrolled participants each year will be added to the database of existing participants such that approximately 2,500 participants will be seen in the HOPS each year. Medical record abstractions will be completed on all HOPS participants and impose no direct burden on HOPS study participants. Participation of respondents is voluntary. There is no cost to the respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hr)	Total burden (in hr)
HOPS study Patients	Behavioral survey	2,500	1	7/60	292
HOPS Study Patients	Consent form	450	1	15/60	113
Total		405

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Board of Scientific Counselors, Center for Preparedness and Response

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, the CDC announces the following meeting for the Board of Scientific Counselors, Center for Preparedness and Response, (BSC, CPR). This is a virtual meeting that is open to the public, limited only by the number of net conference access available, which is 500. Pre-registration is required by accessing the link at *https://cdc.zoomgov.com/webinar/register/WN_bV_Jrvp4QZGHZFao0moqPg.*

DATES: The meeting will be held on October 26, 2020, from 12:30 p.m. to 3:30 p.m., EDT.

ADDRESSES: Zoom Virtual Meeting. If you wish to attend the virtual meeting, please pre-register by accessing the link at *https://cdc.zoomgov.com/webinar/register/WN_bV_Jrvp4QZGHZFao0moqPg.*

Instructions to access the Zoom virtual meeting will be provided in the link following registration.

FOR FURTHER INFORMATION CONTACT: Dometa Ouisley, Office of Science and Public Health Practice, Centers for Disease Control and Prevention, 1600 Clifton Road NE, Mailstop-H21–6, Atlanta, Georgia 30329–4027, Telephone: (404) 639–7450; Facsimile: (404) 471–8772; Email: *OPHPR.BSC.Questions@cdc.gov.*

SUPPLEMENTARY INFORMATION:

Purpose: This Board is charged with providing advice and guidance to the Secretary, Department of Health and Human Services (HHS), the Assistant Secretary for Health (ASH), the Director, Centers for Disease Control and Prevention (CDC), and the Director, Center for Preparedness and Response (CPR), concerning strategies and goals for the programs and research within CPR, monitoring the overall strategic direction and focus of the CPR Divisions and Offices, and administration and oversight of peer review for CPR scientific programs. For additional information about the Board, please visit: *https://www.cdc.gov/cpr/bsc/index.htm.*

Matters To Be Considered: The agenda will include discussions on updates from the CPR Director and Division Directors, CPR Strategic Planning and Science Agenda, and CPR BSC Polio Containment Workgroup (PCWG) Updates. Agenda items are subject to change as priorities dictate.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

A National Elastomeric Half Mask Respirator (EHMR) Strategy for Use in Healthcare Settings During an Infectious Disease Outbreak/Pandemic

AGENCY: National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Request for information and comment.

SUMMARY: The National Institute for Occupational Safety and Health (NIOSH) of the Centers for Disease Control and Prevention (CDC), within the Department of Health and Human Services (HHS), announces this request for information regarding the deployment and use of elastomeric half-mask respirators in healthcare settings and emergency medical services (EMS) organizations during the COVID–19 crisis.

DATES: Comments must be received October 14, 2020.

ADDRESSES: Responses should be submitted to Dr. Lee Greenawald, NIOSH, 626 Cochrans Mill Road, Building 141, Pittsburgh, PA 15236, or *ppeconcerns@cdc.gov.*

FOR FURTHER INFORMATION CONTACT: Lee Greenawald, NIOSH, 626 Cochrans Mill Road, Building 141, Pittsburgh, PA 15236; phone: (412) 386–6465 (not a toll-free number, email: *ppeconcerns@cdc.gov.*

SUPPLEMENTARY INFORMATION:

Public Participation

Informational submissions in response to this request for information (RFI) are due no later than October 14, 2020. Please limit informational submissions for each of the two sections to five pages or less (for a total of 10 pages or less).

NIOSH will not respond to individual informational submissions or publish publicly a compendium of responses. An informational submission in response to this RFI does not create any commitment on or behalf of CDC or HHS to develop or pursue the program or ideas discussed.

Respondents are requested to provide the following information at the start of their informational submission in response to this RFI:

- Company/institution name;
- Company/institution contact;
- Contact's address, phone number, and email address.

Please provide any additional relevant background information about yourself or your organization but note that submissions will not be redacted.

Introduction

An elastomeric half-mask respirator (EHMR) is a non-powered air-purifying respirator that has a tight-fitting facepiece that covers the nose and mouth. The facepieces are made of synthetic or natural rubber material permitting repeated cleaning, disinfection, storage, and reuse. EHMRs use replaceable filters or cartridges, and they provide at least the same level of protection as single-use N95 filtering facepiece respirators (FFRs). As outlined in the Code of Federal Regulations,[1] all EHMR models used in U.S. workplaces must be evaluated and approved by NIOSH's National Personal Protective Technology Laboratory (NPPTL). In 2018, NIOSH/NPPTL sponsored a National Academies of Sciences, Engineering, and Medicine Consensus Study Report [2] that discussed the feasibility of reusable respirator use (including EHMRs) for routine and surge situations in U.S. healthcare organizations. The National Academies' report also recommended various EHMR-related research activities related to cleaning/disinfection, fit testing, cost/market analyses for EHMRs introduced to healthcare, and healthcare user acceptability considerations.

Although EHMRs have been used routinely in healthcare settings, they are not considered medical devices pursuant to the Federal Food, Drug, and Cosmetic Act (FD&C Act) and thus are not typically authorized for use as U.S. Food and Drug Administration (FDA)-approved medical devices. However, in response to the COVID–19 crisis, FDA has issued an emergency use authorization (EUA) authorizing the ''emergency use of medical devices, including alternative products used as medical devices, pursuant to section 564 of the FD&C Act,'' including EHMRs.[3] The Strategic National Stockpile (SNS) plans to purchase EHMRs to be deployed to and used by healthcare organizations in order to diversify the respiratory protection options available to healthcare workers and emergency responders during the COVID–19 crisis.

NIOSH anticipates that the widespread use of EHMRs will ease the demand for single-use N95 FFRs in healthcare settings experiencing high numbers of COVID–19 patients. In media reports about the COVID–19 crisis, medical professionals have noted that the use of EHMRs has been critical to the response, especially during shortages of N95 FFRs. Wearers note that EHMRs are comfortable to wear, and that given their low cost, ease of use, and ability to be cleaned and decontaminated, hospitals have found these devices to be valuable in keeping workers safe.[4]

In order to gather more information from EHMR users in healthcare and emergency response settings, NIOSH is seeking input on two related endeavors: A deployment of EHMRs across the nation from the SNS, and future NIOSH EHMR demonstration projects. NIOSH's specific information needs are described below.

Defining a National Strategy To Inform the Purchase, Deployment, and Use of Reusable EHMRs in Healthcare Settings During an Infectious Disease Outbreak/Pandemic

NIOSH seeks information and ideas that may be used by the SNS to conduct a program to solicit and obtain a diverse group of healthcare organizations to participate in a deployment of EHMRs across the nation.

The intent is for the SNS to provide participating organizations with a fixed quantity of the EHMR devices it purchases to use in their healthcare activities. Each participating organization will also receive the EHMR Best Practice Guidelines/Hospital Implementation Guide prepared by NIOSH. Each participating organization will provide NIOSH a detailed report of its experiences using the EHMRs, including user acceptability and feasibility of implementation. These reports will inform future updates to the Best Practice Guidelines/Hospital implementation Guide.

The types of potential participant organizations that will be sought include, but are not limited to, hospital systems, hospitals, hospital intensive care units (ICUs), hospital general wards, hospital emergency departments, outpatient care settings, nursing homes, dental organizations, and first responders, including, but not limited to, emergency medical services, police officers, and firefighters.

Please provide responses to one or both of the following:

1. Provide a Statement of Interest (SOI) to participate in the deployment of EHMRs across the nation:

a. Describe the nature of the organization that desires to participate, including type, geographical location (including rural or urban), size (*e.g.,* hospital beds, healthcare staff), and prior experience with the organizational use of EHMRs. Although prior experience with EHMRs is not required, any EHMR experience can be specified, including manufacturers, model numbers, and quantity of devices used;

b. Describe the proposed approach regarding how the received EHMRs would be implemented into the organization (*e.g.,* strategy for distribution to the appropriate staff and care settings); and

c. Describe the interested participant's commitment to developing a report based on the EHMR experiences of staff.

2. Provide information that will assist the SNS and NIOSH in the following:

a. Defining the strategic parameters of this distribution program; for example, considerations about fit testing, training, education, filter change-out schedule, cleaning/disinfection, storage considerations, and appropriate clinical care settings for EHMR use; and

b. The potential criteria to be used to determine how the purchased devices should be distributed; for example, the technical approach of the use of the EHMRs, and technical qualifications of key staff who would lead the initiative.

Interest in Participating and Refining Additional, Future, EHMR Demonstration Projects

In addition to NIOSH's current EHMR research activities, NIOSH is considering conducting additional EHMR demonstration projects. These EHMR demonstration projects would consist of healthcare or EMS organizations using EHMRs in their respiratory protection programs and providing user acceptability feedback, such as on fit testing and disinfection protocols, among other implementation parameters. The full scope of these additional EHMR demonstration projects is still being defined. NIOSH

seeks information on interest in participating as a future demonstration site to gauge interest in the nationwide implementation of using EHMRs in hospital and EMS settings to supplement current respiratory protection program activities, and to collect additional user input parameters not currently being collected in the current activities.

The types of potential participant organizations that will be sought include, but are not limited to, hospital systems, hospitals, hospital intensive care units (ICUs), hospital general wards, hospital emergency departments, outpatient care settings, nursing homes, dental organizations, and first responders, including, but not limited to, EMS, police officers, and firefighters.

Please provide responses to one or both of the following:

1. Provide a Statement of Interest (SOI) describing interest in participating in future EHMR demonstration project activities. The SOI should describe the nature of the organization that desires to participate as a demonstration site, including type, geographical location (including rural or urban), size (*e.g.,* hospital beds, healthcare staff), and prior organizational experience with the use of EHMRs. The SOI should also provide reasons for interest in participating as a demonstration site. Prior experience with the use of EHMRs will NOT be required to participate in the EHMR demonstration project activity. The description of an approach that has the potential to be effective for conducting a demonstration project will be required.

2. Provide information that will assist NIOSH in the refinement of the EHMR demonstration projects, including the following:

a. Defining the strategic parameters of this EHMR demonstration activity; for example, considerations of fit testing, training, education, filter change-out schedule, cleaning/disinfection, storage considerations, and appropriate clinical care settings for EHMR use; and

b. The potential criteria to be used to determine how the EHMR devices should be distributed to the demonstration sites; for example, the technical approach of the use of the EHMRs, and technical qualifications of key staff who would lead the initiative.

No SNS Applications Will Be Accepted Through This RFI

While the strategy for distribution of the purchased EHMRs is being developed, its details will only be finalized after consideration and analysis of the informational submissions in response to this RFI.

Disclaimer and Important Notes

This RFI is for planning purposes; it does not constitute a formal announcement for comprehensive applications. In accordance with Federal Acquisition Regulation 48 CFR 15.201(e), responses to this RFI are not offers and cannot be accepted by the Government to form a binding award. NIOSH will not provide reimbursement for costs incurred in responding to this RFI.

Dated: September 8, 2020.

John J. Howard,

Director, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention, Department of Health and Human Services.

[30Day–20–0106]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled Preventive Health and Health Services Block Grant to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on 05/21/2020 to obtain comments from the public and affected agencies. CDC received one comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Preventive Health and Health Services Block Grant (OMB Control No. 0920–0106, Exp.08/31/2022)—Revision—Center for State, Tribal, Local, and Territorial Support (CSTLTS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

CDC's Center for State, Tribal, Local, and Territorial Support (CSTLTS) plays a vital role in helping health agencies work to enhance their capacity and improve their performance to strengthen the public health system on all levels. CSTLTS is CDC's primary connection to health officials and leaders of state, tribal, local, and territorial public health agencies, as well as to other government leaders who work with health departments.

CSTLTS administers the Preventive Health and Health Services (PHHS) Block Grant funding for health promotion and disease prevention programs. Sixty-one recipients (50 states, the District of Columbia, two American Indian tribes, five U.S. territories, and three freely associated states) receive block grant funds to address locally defined public health needs in innovative ways. The PHHS Block Grant allows recipients to prioritize the use of funds to fill funding gaps in programs that deal with leading causes of death and disability, as well as the ability to respond rapidly to emerging health issues, including outbreaks of food-borne infections and water-borne diseases. CSTLTS ensures that the CDC PHHS Block Grant Program Manager and recipients account for funds in accordance with legislative mandates. Each recipient is required to submit a work plan with its selected health outcome objectives, as well as descriptions of the health problems, identified target populations (including portions of those populations disproportionately affected by the health problems), and activities to be addressed in the planned work. CDC will use the Block Grant Information System to collect recipient data, monitor recipients' progress, identify activities and personnel supported with Block Grant funding, conduct compliance reviews of Block Grant recipients, and promote the use of evidence-based guidelines and interventions.

CDC requests OMB approval for revision of this existing information collection request to accommodate the needed updates to the system and templates used to collect the information. As specified in the authorizing legislation, CDC currently collects information from Block Grant recipients to monitor their objectives and activities. Recipients will submit information on the following:

• *Recipient information:* Unique identifying information about each recipient.
• *Work plan:* Information about objectives, activities, and the populations to be addressed each year.
• *Annual Progress Report:* Information about success and progress toward meeting health objectives.

Since 2008, CDC has collected this information using a web-based electronic system, the Block Grant Management Information System (BGMIS). Beginning with the FY2021 award, CDC will begin using a new information management system, the Block Grant Information System (BGIS) to collect this information. The new system will essentially collect the same information as the old system, but will offer a variety of updates and improvements. Examples of improvements include updated technological infrastructure, updated Healthy People Objectives (from 2020 to 2030) for recipients to use when planning programs, usability improvements, and redesigned instruments to capture data in more useful formats for both the recipients and reporting purposes.

The respondent universe will include PHHS Block Grant Coordinators(n=61). All modules will be accessed electronically through the BGIS system. CDC requests approval for an estimated 1,525 burden hours annually.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
PHHS Block Grant Coordinator	Recipient Information	61	1	2
PHHS Block Grant Coordinator	Work Plan	61	1	12
PHHS Block Grant Coordinator	PHHS Block Annual Progress Report	61	1	11

Jeffrey M. Zirger,
Lead, Information Collection Review Office, Office of Scientific Integrity, Office of Science, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

Clinical Laboratory Improvement Advisory Committee (CLIAC)

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting.

SUMMARY: In accordance with the Federal Advisory Committee Act, the CDC announces the following meeting for the Clinical Laboratory Improvement Advisory Committee (CLIAC). This meeting is open to the public, limited only by the webcast lines available. Check the CLIAC website on the day of the meeting for the web conference link *www.cdc.gov/cliac.*

DATES: The meeting will be held on October 28, 2020, from 11:00 a.m. to 6:30 p.m., EDT and October 29, 2020, from 11:00 a.m. to 3:00 p.m., EDT.

ADDRESSES: This is a virtual meeting. Meeting times are tentative and subject to change. The confirmed meeting times, agenda items, and meeting materials including instructions for accessing the live meeting broadcast will be available on the CLIAC website at *www.cdc.gov/cliac.*

FOR FURTHER INFORMATION CONTACT: Nancy Anderson, MMSc, MT(ASCP), Senior Advisor for Clinical Laboratories, Division of Laboratory Systems, Center for Surveillance, Epidemiology and Laboratory Services, Office of Public Health Scientific Services, Centers for Disease Control and Prevention, 1600 Clifton Road, NE, Mailstop V24–3, Atlanta, Georgia 30329–4018, Telephone: (404) 498–2741; Email: *NAnderson@cdc.gov.*

SUPPLEMENTARY INFORMATION:

Purpose: This Committee is charged with providing scientific and technical advice and guidance to the Secretary, HHS; the Assistant Secretary for Health; the Director, CDC; the Commissioner, Food and Drug Administration (FDA); and the Administrator, Centers for Medicare and Medicaid Services (CMS). The advice and guidance pertain to general issues related to improvement in clinical laboratory quality and laboratory medicine practice and specific questions related to possible revision of the Clinical Laboratory Improvement Amendments of 1988 (CLIA) standards. Examples include providing guidance on studies designed to improve safety, effectiveness, efficiency, timeliness, equity, and patient-centeredness of laboratory services; revisions to the standards under which clinical laboratories are regulated; the impact of proposed revisions to the standards on medical and laboratory practice; and the modification of the standards and provision of non-regulatory guidelines to accommodate technological advances, such as new test methods, the electronic transmission of laboratory information, and mechanisms to improve the integration of public health and clinical laboratory practices.

Matters To Be Considered: The agenda will include agency updates from CDC, CMS, and FDA. The focus of the meeting is Clinical Laboratory Medicine in the Age of COVID–19 and will include presentations and discussions on preparedness and response: the partnership between clinical laboratories and public health; laboratory data exchanges during COVID–19; and the clinical laboratory's role in identifying health inequities during the COVID–19 response. Agenda items are subject to change as priorities dictate.

It is the policy of CLIAC to accept written public comments and provide a brief period for oral public comments pertinent to agenda items.

Procedure for Public Comment: Public comment periods for each agenda item are scheduled immediately prior to the Committee discussion period for that item. In general, each individual or group requesting to present an oral comment will be limited to a total time of five minutes (unless otherwise indicated). Speakers should email *CLIAC@cdc.gov* or notify the contact person at least 5 business days prior to the meeting date.

Procedure for Written Public Comment: For individuals or groups unable to attend the meeting, CLIAC accepts written comments until the date of the meeting (unless otherwise stated). However, it is requested that comments be submitted at least 5 business days prior to the meeting date so that the comments may be made available to the Committee for their consideration and public distribution. All written comments will be included in the meeting Summary Report posted on the CLIAC website.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA–2019–E–1943]

Determination of Regulatory Review Period for Purposes of Patent Extension; TAKHZYRO

AGENCY: Food and Drug Administration, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or the Agency) has determined the regulatory review period for TAKHZYRO and is publishing this notice of that determination as required by law. FDA has made the determination because of the submission of an application to the Director of the U.S. Patent and Trademark Office (USPTO), Department of Commerce, for the extension of a patent which claims that human biological product.

DATES: Anyone with knowledge that any of the dates as published (see **SUPPLEMENTARY INFORMATION**) are incorrect may submit either electronic or written comments and ask for a redetermination by November 13, 2020. Furthermore, any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period by March 15, 2021. See ''Petitions'' in the **SUPPLEMENTARY INFORMATION** section for more information.

ADDRESSES: You may submit comments as follows. Please note that late, untimely filed comments will not be considered. Electronic comments must be submitted on or before November 13, 2020. The *https://www.regulations.gov* electronic filing system will accept comments until 11:59 p.m. Eastern Time at the end of November 13, 2020. Comments received by mail/hand delivery/courier (for written/paper submissions) will be considered timely if they are postmarked or the delivery service acceptance receipt is on or before that date.

Electronic Submissions

Submit electronic comments in the following way:

• *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on *https://www.regulations.gov.*

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the manner detailed (see ''Written/Paper Submissions'' and ''Instructions'').

Written/Paper Submissions

Submit written/paper submissions as follows:

• *Mail/Hand Delivery/Courier (for written/paper submissions):* Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

• For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in ''Instructions.''

Instructions: All submissions received must include the Docket No. FDA–2019–E–1943 for ''Determination of Regulatory Review Period for Purposes of Patent Extension; TAKHZYRO.'' Received comments, those filed in a timely manner (see **ADDRESSES**), will be placed in the docket and, except for those submitted as ''Confidential Submissions,'' publicly viewable at *https://www.regulations.gov* or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240–402–7500.

• Confidential Submissions—To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states ''THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION.'' The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on *https://www.regulations.gov.* Submit both copies to the Dockets Management

Staff. If you do not wish your name and contact information to be made publicly available, you can provide this information on the cover sheet and not in the body of your comments and you must identify this information as ''confidential.'' Any information marked as ''confidential'' will not be disclosed except in accordance with § 10.20 (21 CFR 10.20) and other applicable disclosure law. For more information about FDA's posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: *https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf.*

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to *https://www.regulations.gov* and insert the docket number, found in brackets in the heading of this document, into the ''Search'' box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240–402–7500.

FOR FURTHER INFORMATION CONTACT: Beverly Friedman, Office of Regulatory Policy, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 51, Rm. 6250, Silver Spring, MD 20993, 301–796–3600.

SUPPLEMENTARY INFORMATION:

I. Background

The Drug Price Competition and Patent Term Restoration Act of 1984 (Pub. L. 98–417) and the Generic Animal Drug and Patent Term Restoration Act (Pub. L. 100–670) generally provide that a patent may be extended for a period of up to 5 years so long as the patented item (human drug product, animal drug product, medical device, food additive, or color additive) was subject to regulatory review by FDA before the item was marketed. Under these acts, a product's regulatory review period forms the basis for determining the amount of extension an applicant may receive.

A regulatory review period consists of two periods of time: A testing phase and an approval phase. For human biological products, the testing phase begins when the exemption to permit the clinical investigations of the biological product becomes effective and runs until the approval phase begins. The approval phase starts with the initial submission of an application to market the human biological product and continues until FDA grants permission to market the biological product. Although only a portion of a regulatory review period may count toward the actual amount of extension that the Director of USPTO may award (for example, half the testing phase must be subtracted as well as any time that may have occurred before the patent was issued), FDA's determination of the length of a regulatory review period for a human biological product will include all of the testing phase and approval phase as specified in 35 U.S.C. 156(g)(1)(B).

FDA has approved for marketing the human biologic product TAKHZYRO (lanadelumab-flyo). TAKHZYRO is indicated for prophylaxis to prevent hereditary angioedema in patients 12 years and older. Subsequent to this approval, the USPTO received a patent term restoration application for TAKHZYRO (U.S. Patent No. 8,816,055) from Dyax Corp., and the USPTO requested FDA's assistance in determining this patent's eligibility for patent term restoration. In a letter dated June 21, 2019, FDA advised the USPTO that this human biological product had undergone a regulatory review period and that the approval of TAKHZYRO represented the first permitted commercial marketing or use of the product. Thereafter, the USPTO requested that FDA determine the product's regulatory review period.

II. Determination of Regulatory Review Period

FDA has determined that the applicable regulatory review period for TAKHZYRO is 1,857 days. Of this time, 1,616 days occurred during the testing phase of the regulatory review period, while 241 days occurred during the approval phase. These periods of time were derived from the following dates:

1. *The date an exemption under section 505(i) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 355(i)) became effective:* July 25, 2013. The applicant claims August 2, 2013, as the date the investigational new drug application (IND) became effective. However, FDA records indicate that the IND effective date was July 25, 2013, which was 30 days after FDA receipt of the IND.

2. *The date the application was initially submitted with respect to the human biological product under section 351 of the Public Health Service Act (42 U.S.C. 262):* December 26, 2017. FDA has verified the applicant's claim that the biologics license application (BLA) for TAKHZYRO (BLA 761090) was initially submitted on December 26, 2017.

3. *The date the application was approved:* August 23, 2018. FDA has verified the applicant's claim that BLA 761090 was approved on August 23, 2018.

This determination of the regulatory review period establishes the maximum potential length of a patent extension. However, the USPTO applies several statutory limitations in its calculations of the actual period for patent extension. In its application for patent extension, this applicant seeks 849 days of patent term extension.

III. Petitions

Anyone with knowledge that any of the dates as published are incorrect may submit either electronic or written comments and, under 21 CFR 60.24, ask for a redetermination (see **DATES**). Furthermore, as specified in § 60.30 (21 CFR 60.30), any interested person may petition FDA for a determination regarding whether the applicant for extension acted with due diligence during the regulatory review period. To meet its burden, the petition must comply with all the requirements of § 60.30, including but not limited to: Must be timely (see **DATES**), must be filed in accordance with § 10.20, must contain sufficient facts to merit an FDA investigation, and must certify that a true and complete copy of the petition has been served upon the patent applicant. (See H. Rept. 857, part 1, 98th Cong., 2d sess., pp. 41–42, 1984.) Petitions should be in the format specified in 21 CFR 10.30.

Submit petitions electronically to *https://www.regulations.gov* at Docket No. FDA–2013–S–0610. Submit written petitions (two copies are required) to the Dockets Management Staff (HFA–305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

Dated: September 4, 2020.

Lowell J. Schiller,

Principal Associate Commissioner for Policy.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

[Document Identifier: OS–0990–0421]

Agency Information Collection Request. 30-Day Public Comment Request

AGENCY: Office of the Secretary, HHS.

ACTION: Notice.

SUMMARY: In compliance with the requirement of the Paperwork Reduction Act of 1995, the Office of the Secretary (OS), Department of Health and Human Services, is publishing the

following summary of a proposed collection for public comment.

DATES: Comments on the ICR must be received on or before October 14, 2020.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Sherrette Funn, *Sherrette.Funn@hhs.gov* or (202) 795–7714. When submitting comments or requesting information, please include the document identifier 0990–New–30D and project title for reference.

SUPPLEMENTARY INFORMATION: Interested persons are invited to send comments regarding this burden estimate or any other aspect of this collection of information, including any of the following subjects: (1) The necessity and utility of the proposed information collection for the proper performance of the agency's functions; (2) the accuracy of the estimated burden; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

Title of the Collection: ASPE Generic Clearance for the Collection of Qualitative Research and Assessment.

Type of Collection: Extension.

OMB No. 0990–0421—Office of the Assistant Secretary for Planning and Evaluation (ASPE).

Abstract: The Office of the Assistant Secretary for Planning and Evaluation (ASPE) is requesting a three-year extension for their generic clearance for purposes of conducting qualitative research. The ICR is for an extension of the approved information collection assigned OMB control number 0990–0421, scheduled to expire on October 31, 2020. ASPE conducts qualitative research to gain a better understanding of emerging health and human services policy issues, develop future intramural and extramural research projects, and to ensure HHS leadership, agencies and offices have recent data and information to inform program and policy decision-making. ASPE is requesting approval for at least four types of qualitative research which include, but are not limited to: (a) Interviews, (b) focus groups, (c) questionnaires, and (d) other qualitative methods.

ASPE's mission is to advise the Secretary of the Department of Health and Human Services on policy development in health, disability, human services, data, and science, and provides advice and analysis on economic policy. ASPE leads special initiatives, coordinates many of the Department's evaluation, research and demonstration activities, and manages cross-Department planning activities such as implementation of the Evidence Act, strategic planning, legislative planning, and review of regulations. Integral to this role, ASPE will use this mechanism to conduct qualitative research, evaluation, or assessment, conduct analyses, and understand needs, barriers, or facilitators for HHS-related programs and services.

ASPE is requesting comment on the burden for qualitative research aimed at understanding emerging health and human services policy issues. The goal of developing these activities is to identify emerging issues and research gaps to ensure the successful implementation of HHS programs. The participants may include health and human services experts; national, state, and local health or human services representatives; public health, human services, or healthcare providers; and representatives of other health or human services organizations.

Need and Proposed Use of the Information: ASPE is requesting comment on the burden for qualitative research aimed at understanding emerging health and human services policy issues. The goal of developing these activities is to identify emerging issues and research gaps to ensure the successful implementation of HHS programs. The participants may include health and human services experts; national, state, and local health or human services representatives; public health, human services, or healthcare providers; and representatives of other health or human services organizations. The increase in burden from 747 in 2014 to 1,300 respondents in 2017 reflects an increase in the number of research projects conducted over the estimate in 2014. There is no change in request of burden hours from 2017 to 2020.

The total annual burden hours estimated for this ICR are summarized in the table below.

ESTIMATED ANNUALIZED BURDEN TABLE

Type of respondent	Form	Number of respondents	Number of responses per respondent	Average burden hours per response	Total burden hours
Health or Human Services Policy Stakeholder	Qualitative Research	1,300	1	1	1,300

DEPARTMENT OF HOMELAND SECURITY

Federal Emergency Management Agency

[Docket ID: FEMA–2020–0030; OMB No. 1660–0002]

Agency Information Collection Activities: Proposed Collection; Comment Request; Disaster Assistance Registration

AGENCY: Federal Emergency Management Agency, DHS.

ACTION: 60-Day notice and request for comments.

SUMMARY: The Federal Emergency Management Agency, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public to take this opportunity to comment on a revision of a currently approved information collection. In accordance with the Paperwork Reduction Act of 1995, this notice seeks comments concerning Disaster Assistance Registration.

DATES: Comments must be submitted on or before November 13, 2020.

ADDRESSES: To avoid duplicate submissions to the docket, please use the following means to submit comments:

Online. Submit comments at *www.regulations.gov* under Docket ID FEMA–2020–0030 Follow the instructions for submitting comments.

All submissions received must include the agency name and Docket ID. All submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to read the Privacy and Security Notice that is available via a link on the homepage of *www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Brian Thompson, Supervisory Program Specialist, FEMA, Recovery Directorate, *Brian.Thompson6@fema.dhs.gov,* 540–686–3602. You may contact the Information Management Division for copies of the proposed collection of information at email address: *FEMA-Information-Collections-Management@fema.dhs.gov.*

SUPPLEMENTARY INFORMATION: The Robert T. Stafford Disaster Relief and Emergency Assistance Act (Pub. L. 93–288, 42 U.S.C. 5121, *et seq.*) (the Stafford Act), as amended, is the legal basis for the Federal Emergency Management Agency (FEMA) to provide financial assistance and services to individuals who apply for disaster assistance benefits in the event of a federally-declared disaster. Title 44 CFR, Part 206, Subpart D, ''Federal Assistance to Individuals and Households,'' provides the regulatory framework implementing the policy and procedures set forth in § 408 of the Stafford Act. This program provides financial assistance and, if necessary, direct assistance to eligible individuals and households who, as a direct result of a major disaster, have necessary expenses and serious needs that are unable to be met through other means. Individuals and households may apply for assistance (Registration Intake) under the Individuals and Households program in person, via telephone, or internet.

Collection of Information

Title: Disaster Assistance Registration.

Type of Information Collection: Revision of a currently approved information collection.

OMB Number: 1660–0002.

FEMA Forms: FEMA Form 009–0–1T (English) Tele-Registration, Disaster Assistance Registration; FEMA Form 009–0–1Int (English) internet, Disaster Assistance Registration; FEMA Form 009–0–2Int (Spanish) internet, Registro Para Asistencia De Desastre; FEMA Form 009–0–1 (English) Paper Application, Disaster Assistance Registration; FEMA Form 009–0–2 (Spanish), Solicitud en Papel, Registro Para Asistencia De Desastre; FEMA Form 009–0–3 (English), Declaration and Release; FEMA Form 009–0–4 (Spanish), Declaración Y Autorización; FEMA Form 009–0–5 (English), Manufactured Housing Unit Revocable License and Receipt for Government Property; FEMA Form 009–0–6 (Spanish), Las Casas Manufacturadas Unidad Licencia Revocable y Recibo de la Propiedad del Gobierno; Request for Information.

Abstract: The forms in this collection are used to obtain pertinent information to provide financial assistance, and if necessary, direct assistance to eligible individuals and households who, as a direct result of a disaster or emergency, have uninsured or under-insured, necessary or serious expenses they are unable to meet. To provide meaningful access to individuals with disabilities throughout FEMA programs, the revision to the collection will obtain pertinent disability-related information.

Affected Public: Individuals or Households.

Estimated Number of Respondents: 1,004,488.

Estimated Number of Responses: 1,004,488.

Estimated Total Annual Burden Hours: 356,007.

Estimated Total Annual Respondent Cost: $13,368,063.

Estimated Respondents' Operation and Maintenance Costs: $0.

Estimated Respondents' Capital and Start-Up Costs: $0.

Estimated Total Annual Cost to the Federal Government: $32,192,627.

Comments

Comments may be submitted as indicated in the **ADDRESSES** caption above. Comments are solicited to (a) evaluate whether the proposed data collection is necessary for the proper performance of the agency, including whether the information shall have practical utility; (b) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (c) enhance the quality, utility, and clarity of the information to be collected; and (d) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Maile Arthur,

Deputy Director of Information Management, Mission Support, Federal Emergency Management Agency, Department of Homeland Security.

Advisory Board for Exceptional Children

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of Meeting.

SUMMARY: The Bureau of Indian Education (BIE) is announcing that the Advisory Board for Exceptional Children is holding an upcoming meeting to meet the mandates of the Individuals with Disabilities Education Act of 2004 (IDEA) for Indian children with disabilities. Due to the COVID–19 pandemic and for the safety of all individuals, the meeting will be held online. DATES: The BIE Advisory Board meeting will be held Wednesday, September 30, 2020 from 8 a.m. to 3:30 p.m. Pacific Daylight Time (PDT).

ADDRESSES: All Advisory Board activities and meetings will be conducted online. See the **SUPPLEMENTARY INFORMATION** section of this notice for directions on joining. Public comments can also be emailed to the DFO at *Jennifer.davis@indianaffairs.gov;* or faxed to (602) 265–0293 Attention: Jennifer Davis, DFO; or mailed or hand delivered to the Bureau of Indian Education, Attention: Jennifer Davis, DFO, 2600 N Central Ave. Suite 800, Phoenix, AZ 85004.

FOR FURTHER INFORMATION CONTACT: Jennifer Davis, Designated Federal Officer, Bureau of Indian Education, 2600 N Central Ave. Suite 800, Phoenix, AZ 85004, email at *Jennifer.davis@indianaffairs.gov* or telephone numbers (202) 860–7845 or (602) 240–8597.

SUPPLEMENTARY INFORMATION: In accordance with the Federal Advisory Committee Act, the BIE is announcing that the Advisory Board will hold its next meeting online. The Advisory Board was established under the Individuals with Disabilities Act of 2004 (20 U.S.C. 1400 *et seq.*) to advise the Secretary of the Interior, through the Assistant Secretary-Indian Affairs, on the needs of Indian children with disabilities. The meeting is open to the public.

The following items will be on the agenda:

• Navajo Region Schools—Special Education Update Report.

• Work on 2020 Annual Report.

• Public Comments (via teleconference call, Wednesday, September 30, 2020).

How to Join the Meeting

You can join the meeting in any of the following ways:

• From your computer, tablet or smartphone * using *https://global.gotomeeting.com/join/940105053;* or

• Dial in using your phone, United States: +1 (571) 317–3122 and Access Code: 940–105–053; or

• From a video-conferencing room or system by dialing in or typing: 67.217.95.2 or *inroomlink.goto.com,* Meeting ID: 940 105 053, or dialing directly: 940105053@67.217.95.2 or 67.217.95.2##940105053.

* If you are new to GoToMeeting you can get the app by using this link: *https://global.gotomeeting.com/install/940105053.*

Opportunity for Public To Comment

During the September 30, 2020 meeting, time has been set aside for public comments via webinar or telephone conference call from 9:15 p.m. to 9:45 p.m. Pacific Daylight Time. To join the meeting, follow the directions listed above. You may also submit comments in writing to the individual listed in the **ADDRESSES** section of this notice.

Authority

Annual Meeting Under Indian Employment, Training and Related Services Act, as Amended

AGENCY: Bureau of Indian Affairs, Interior.

ACTION: Notice of Meeting.

SUMMARY: The Department of the Interior, Bureau of Indian Affairs (BIA), is announcing the annual meeting of the Federal agencies and Tribes that participate in the Indian Employment, Training and Related Services Act of 2017, also known as ''Public Law 477.'' Due to the COVID–19 pandemic and for the safety of all individuals, the meeting will be conducted via WebEx and by telephone.

DATES: The annual Federal Partner and Tribal 477 Work Group meeting will be held on Monday, September 28, 2020 from 12:30 p.m. to 3:30 p.m. Eastern Daylight Time (EDT).

ADDRESSES: All Advisory Board activities and meetings will be conducted online and by phone. See the **SUPPLEMENTARY INFORMATION** section of this notice for directions to join WebEx and by telephone.

FOR FURTHER INFORMATION CONTACT: Jeanette Hanna, Deputy Bureau Director, Indian Services, Bureau of Indian Affairs, *Jeanette.Hanna@bia.gov,* (202) 513–7640.

SUPPLEMENTARY INFORMATION: The annual Federal Partner and Tribal 477 Work Group meeting will be on WebEx video conference and by phone. Call-in information follows:

WebEx: https://ocfoia.webex.com/ocfoia/onstage/g.php?MTID=ef573c94c1da637700998e9ffe034741a

Access code: 199 196 6375

Background

In 2017, the Congress enacted the Indian Employment Training and Related Services Consolidation Act of 2017, Public Law 115–93, codified at 25 U.S.C. 3401–3417 (''2017 Act''). The 2017 update amended and expanded the Indian Employment and Related Services Demonstration Act of 1992, Public Law 102–477 (as amended in 2017, ''PL 477'') by, in part, identifying eight additional Federal agencies that are now subject to the amended law, including the Departments of Justice, Agriculture, Commerce, Energy, Homeland Security, Housing and Urban Development, Transportation, and Veterans Affairs. Under PL 477, Tribes may propose to integrate eligible grant programs from these agencies and the Departments of the Interior, Health and Human Services, Labor and Education, consolidate and reprogram grant funds in accordance with a plan approved by the Secretary of the Interior (''477 Plan''). As required by the 2017 updates to PL 477, the Department of the Interior entered into a Memorandum of Agreement (MOA) among the 12 Federal agencies to implement PL 477.

Annual Meeting

As lead agency responsible for implementation of PL 477, BIA announces the annual meeting of participating Tribes and Federal agencies. As directed by statute, the meeting will be co-chaired by Assistant Secretary-Indian Affairs Tara Sweeney and 477 Tribal Work Group Committee Chair Margaret Zientek. 25 U.S.C. 3410(a)(3)(B)(i).

The agenda will include:

I. Status of Participating 477 Tribes
- 477 Programs to be integrated
- Plan Approval Process
- Waiver Approvals
- Funds Transfer
- Annual Reports
- 477 Tribal Recognitions

II. Discussion on Memorandum of Agreement
- Status of Memorandum of Agreement
- Recommendation for Changes/Improvements/Areas to be addressed
- Status of Labor Force Report

III. COVID–19 Pandemic
- Challenges and Success

IV. Miscellaneous
- Financial Assistance for 477 Tribes to develop a database
- Expansion of Tribal programs
- Establish Annual Meeting of Tribes and Federal agencies

To join the meeting, use WebEx video call or call in by phone:

BILLING CODE 4337–15–P

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[LLCON01000.L14400000.EU0000.20X]

Notice of Realty Action: Segregation of Public Land for Proposed Non-Competitive (Direct) Sale in Moffat County, CO

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of realty action.

SUMMARY: The Bureau of Land Management (BLM) is proposing a non-competitive (direct) sale of 2.13 acres of public land in Moffat County to the Moffat County Board of County Commissioners to resolve an inadvertent, unauthorized use of public lands. The sale will be subject to the applicable provisions of the Federal Land Policy and Management Act of 1976 (FLMPA), as amended, and BLM land sale regulations. The sale will be for no less than the appraised fair market value (FMV).

DATES: Interested parties must submit written comments no later than October 29, 2020.

ADDRESSES: Mail written comments to Bruce Sillitoe, Field Manager, BLM Little Snake River Field Office, 455 Emerson Street, Craig, CO 81625.

FOR FURTHER INFORMATION CONTACT: Janell Corey, Realty Specialist, BLM Little Snake Field Office, at the previous address, or by telephone at 970–826–5053, or by email at *jcorey@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact Ms. Corey during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or questions. You will receive a reply during normal business hours.

SUPPLEMENTARY INFORMATION: The Moffat County Board of County Commissioners formally requested to purchase the subject parcel to resolve its inadvertent, unauthorized use.

The following described public lands in Moffat County are segregated from all forms of appropriation under public laws, including the mining laws, upon publication of this notice:

Sixth Principal Meridian, Colorado

T. 9 N., R. 102 W.,
sec. 2, lot 36;
sec. 3, lot 24.
The area described contains 2.13 acres.

The BLM is no longer accepting applications affecting the subject parcel, except those to amend previously filed right-of-way applications or the existing authorization to increase grant terms in accordance with 43 CFR 2807.15 and 2886.15.

During the segregation period, the BLM will conduct a parcel-specific environmental analysis and review in accordance with the Secretarial Order 3373—*Evaluating Public Access in Bureau of Land Management Public Land Disposals and Exchanges,* to determine any adverse effects before offering the subject parcel for sale.

The segregation will terminate upon issuance of a patent, publication in the **Federal Register** for termination of the segregation, or September 14, 2022, unless extended prior to the termination date by the BLM Colorado State Director in accordance with 43 CFR 2711.1–2(d).

The proposed sale is in conformance with the BLM Little Snake Resource Management Plan (RMP), approved in October 2011, on page RMP–52 and Management Action: Allowable Uses and Actions. The Authorized Officer has determined this sale to be in the best interest of the public in accordance with the provisions of the RMP.

Existing historical structures make the subject parcel difficult for the BLM to manage. Under FLPMA Section 203, disposal of the subject parcel is allowed because existing characteristics are difficult and uneconomic to manage and the parcel is not suitable for management by another Federal department or agency.

In accordance with 43 CFR 2710–0–6 and 43 CFR 2711.3–3(a), ''Direct sales (without competition) may be utilized, when in the opinion of the authorized officer, a competitive sale is not appropriate and the public interest would best be served by a direct sale.'' In this case, a direct sale is appropriate because the subject parcel contains previously and inadvertently built, unauthorized historical structures significant to the history of public schools in Moffat County. The county intends to use the property for public education and to enhance tourism in the area.

The BLM considered the minimal acreage to create a manageable boundary to include lands needed to protect existing improvements and to resolve the inadvertent, unauthorized use. The BLM may serve the public's interest through resolution and receiving payment at FMV for the subject parcel.

If issued, the conveyance document will be subject to valid existing rights and encumbrances of record, including, but not limited to, rights-of-way for roads and public utilities, and reservations for ditches and canals and all mineral deposits.

In addition to this Notice of Realty Action, a sale notice will be published once a week for 3 weeks in the *Craig Daily Press.* Only written comments submitted by mail will be considered as properly filed. Electronic mail, facsimile, or verbal comments will not be considered.

Before including your address, phone number, email address, or other personal identifying information (PII) in your comment, you should be aware that your comment, including your PII, may be made publicly available at any time. While you may ask us in your comment to withhold your PII from public review, the BLM cannot guarantee that it will be able to do so.

Any adverse comments will be reviewed by the BLM Colorado State Director or other authorized official of the Department of the Interior, who may sustain, vacate, or modify this realty action in whole or in part. In the absence of timely filed objections, this realty action will become the final determination of the Department of the Interior.

(Authority: 43 CFR 2091.2–1(b))

Jamie E. Connell,

Colorado State Director.

National Park Service

[NPS–WASO–NRNHL–DTS#-30831; PPWOCRADI0, PCU00RP14.R50000]

National Register of Historic Places; Notification of Pending Nominations and Related Actions

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The National Park Service is soliciting electronic comments on the significance of properties nominated before August 29, 2020, for listing or related actions in the National Register of Historic Places.

DATES: Comments should be submitted electronically by September 29, 2020.

ADDRESSES: Comments are encouraged to be submitted electronically to *National_Register_Submissions@nps.gov* with the subject line ''Public Comment on <property or proposed district name, (County) State>.'' If you have no access to email you may send them via U.S. Postal Service and all other carriers to the National Register of Historic Places, National Park Service, 1849 C Street NW, MS 7228, Washington, DC 20240.

SUPPLEMENTARY INFORMATION: The properties listed in this notice are being considered for listing or related actions in the National Register of Historic Places. Nominations for their consideration were received by the National Park Service before August 29, 2020. Pursuant to Section 60.13 of 36 CFR part 60, comments are being accepted concerning the significance of the nominated properties under the National Register criteria for evaluation.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

BILLING CODE 4312–52–P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–1174]

Certain Toner Cartridges, Components Thereof, and Systems Containing Same; Commission Determination Not To Review an Initial Determination Granting Complainants' Motion for Summary Determination of a Violation of Section 337; Schedule for Filing Written Submissions on Remedy, the Public Interest, and Bonding

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that, on July 23, 2020, the presiding administrative law judge (''ALJ'') issued an initial determination (''ID'') (Order No. 40) in the above-captioned investigation, granting summary determination on violation of section 337 and including a recommended determination (''RD'') on remedy and bonding. The Commission has determined not to review the ID. The Commission requests briefing from the parties, interested government agencies, and interested persons on the issues of remedy, the public interest, and bonding.

FOR FURTHER INFORMATION CONTACT: Panyin A. Hughes, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205–3179. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.* For help accessing EDIS, please email *EDIS3Help@usitc.gov.* General information concerning the Commission may also be obtained by accessing its internet server at *https://www.usitc.gov.* Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal, telephone (202) 205–1810.

SUPPLEMENTARY INFORMATION: On September 17, 2019, the Commission instituted this investigation based on a complaint filed by Brother Industries, Ltd. of Nagoya Japan; Brother International Corp. (U.S.A.) of Bridgewater, New Jersey; and Brother Industries (U.S.A.), Inc. of Bartlett, Tennessee (collectively, ''Brother''). 84 FR 49762–63 (Sept. 23, 2019). The complaint alleged violations of section 337 based on the importation into the United States, the sale for importation, or the sale within the United States after importation of certain toner cartridges, components thereof, and systems containing same by reason of infringement of certain claims of U.S. Patent Nos. 9,568,856; 9,575,460; 9,632,456; 9,785,093; and 9,846,387 (collectively, ''the Asserted Patents''). *Id.* The Commission's notice of investigation named the following 32 respondents: AMI Brothers, Inc. of San Bruno, California (''AMI''); An An Beauty Limited of Kowloon, Hong Kong (''An An Beauty''); Aster Graphics, Inc. of Riverside, California (''Aster''); Aztech Enterprises Limited of Kowloon, Hong Kong (''Aztech''); Billiontree Technology USA Inc. of City of Industry, California (''Billiontree''); Carlos Imaging Supplies, Inc. of Hacienda Heights, California (''Carlos''); Cartridge Evolution, Inc. of Brooklyn, New York (''Cartridge Evolution''); Do it Wiser, LLC of Wilmington, Delaware (''Do it Wiser''); Eco Imaging Inc. of Irvine, California (''Eco Imaging''); Ecoolsmart Co. of Rowland Heights, California (''Ecoolsmart''); EPrinter Solution LLC of Pomona, California (''EPS''); E–Z Ink Inc. of Brooklyn, New York (''E–Z Ink''); Globest Trading Inc. of Ontario, California (''Globest''); Greencycle Tech, Inc. of South El Monte, California (''Greencycle''); Hongkong Boze Co., Ltd. of Kowloon, Hong Kong (''Hongkong Boze''); I8 International, Inc. of City of Industry, California (''I8''); IFree E-Commerce Co. of Kowloon, Hong Kong (''IFree''); Ikong E-Commerce of Walnut, California (''Ikong''); Intercon International Corp. of Brea, California (''Intercon''); IPrint Enterprise Limited of Kowloon, Hong Kong (''IPrint''); LD Products, Inc. of Long Beach, California (''LD Products''); Linkyo Corp. of La Puente, California (''Linkyo''); Mangoket LLC of Alhambra, California (''Mangoket''); New Era Image LLC of Corona, California (''New Era''); OW Supplies Corp. of Corona, California (''OW Supplies''); Solong E-Commerce Co., LLC of Wan Chai, Hong Kong (''Solong''); Smartjet E-Commerce Co., LLC of Wan Chai, Hong Kong (''Smartjet''); Super Warehouse Inc. of Blaine, Washington (''Super Warehouse''); Theresa Meng of Brooklyn, New York (''Ms. Meng''); Triple Best LLC of San Diego, California (''Triple Best''); V4ink, Inc. of Diamond Bar, California (''V4ink''); and Zhuhai Xiaohui E-Commerce Co., Ltd. of Zhuhai, China (''Xiaohui''). *Id.* at 49762–63. The notice of investigation also names the Office of Unfair Import Investigations (''OUII'') as a party. *Id.* at 49763.

Of the 32 respondents, only one, Aster, is participating at this stage. Aster, however, decided not to oppose the summary determination motion of violation as to the accused products, even though Aster's products are subject to the motion. *See* Joint Stipulation of Brother and Aster for Resolution as to Aster in the Investigation (Mar. 4, 2020). EPS and IFree were terminated from the investigation based upon withdrawal of the complaint against them. *See* Order No. 32 (Jan. 28, 2020), *unreviewed by* Comm'n Notice (Feb. 25, 2020). Cartridge Evolution, E–Z Ink, Linkyo, New Era, OW Supplies, Ms. Meng, Triple Best, and V4ink were terminated from the investigation based upon entry of consent orders. *See* Order No. 36 (Mar. 12, 2020), *unreviewed by* Comm'n Notice (Mar. 31, 2020); Order No 38 (Mar. 12, 2020), *unreviewed by* Comm'n Notice (Mar. 31, 2020); Order No. 37 (Mar. 12, 2020), *unreviewed by* Comm'n Notice (Mar. 31, 2020); Order No. 10 (Oct. 18, 2019), *unreviewed by* Comm'n Notice (Nov. 6, 2019); Order No. 17 (Nov. 21, 2019), *unreviewed by* Comm'n Notice (Dec. 18, 2019); Order No. 28 (Dec. 30, 2019), *unreviewed by* Comm'n Notice (Jan. 29, 2020); Order No. 18 (Nov. 27, 2019), *unreviewed by* Comm'n Notice (Dec. 18, 2019); Order No. 33 (Fe. 3, 2020), *unreviewed by* Comm'n Notice (Mar. 4, 2020). The following 21 respondents defaulted: AMI, Globest, An An Beauty, Aztech, Xiaohui, Ecoolmart, Greencycle, Intercon, Do it Wiser, I8, Solong, Billiontree, Carlos Imaging, Eco Imaging, Hongkong Boze, Ikong, IPrint, Mangoket, Smartjet, Super Warehouse, and LD Products (collectively, ''Defaulting Respondents''). *See* Order No. 35 (Mar. 5, 2020), *unreviewed by* Comm'n Notice (Mar. 19, 2020); Order No. 31 (Jan. 22, 2020), *unreviewed by* Comm'n Notice (Feb. 21, 2020); Order No. 26 (Dec. 20, 2019), *unreviewed by* Comm'n Notice (Jan 16, 2020); Order No. 25 (Dec. 18, 2019), *unreviewed by* Comm'n Notice (Jan. 16, 2020); Order No. 24 (Dec. 18, 2019), *unreviewed by* Comm'n Notice (Jan. 16, 2020); Order No. 8 (Oct. 15, 2019), *unreviewed by* Comm'n Notice (Nov. 7, 2019).

On March 12, 2020, Brother filed a motion for summary determination of violation of section 337 by Aster and the Defaulting Respondents and for a recommendation that the Commission issue a general exclusion order and cease and desist orders. *See* Complainants' Motion for Summary Determination of Violation and for Recommended Determination on Remedy and Bonding. On March 23, 2020, OUII filled a response in support of Brother's motion. *See* Commission Investigative Staff's Response to Brother's Motion for Summary Determination of Violation. No respondent filed a response to Brother's motion. *Id.*

On July 23, 2020, the ALJ issued the subject ID granting summary determination of violation of section 337 by Aster and Defaulting Respondents. The ID finds that the Commission has subject matter jurisdiction over the investigation. ID at 34. The ID further finds that none of the respondents contest the Commission's personal jurisdiction over them or in rem jurisdiction as to the accused products. ID at 34–35. The ID finds that Brother: (1) Established the importation requirement as to Aster and Defaulting Respondents, ID at 36–79; (2)

demonstrated that the accused products infringe the asserted claims, *id.* at 118–133; and (3) demonstrated that the domestic industry (''DI'') products practice at least one claim of each Asserted Patent and that a DI exists in the United States, *id.* at 84–118. The RD recommends issuance of a general exclusion order (''GEO'') (or, in the alternative, a limited exclusion order directed to Aster and each of the Defaulting Respondents). *Id.* at 134–44. The RD further recommends issuance of cease and desist orders (''CDOs'') directed to Aster and each defaulting respondent that has domestic operations. *Id.* at 144–46. The RD also recommends setting different bond rates for entry of the different products covered by the GEO during the period of Presidential review. *Id.* at 146–48 (recommended bond rate table at 147). No one petitioned for review of the ID.

The Commission has determined not to review the ID.

On August 24, 2020, Aster filed a public interest statement in response to the Commission's notice soliciting public interest comments pursuant to 19 CFR 210.50(a)(4)(i). In its submission, Aster argued that any Commission remedial orders issued in this investigation should not cover its new products pursuant to its stipulation with Brother. *See* Respondent Aster Graphics, Inc.'s Statement of Public Interest. On August 26, 2020, Brother filed a response. *See* Complainants' Motion to Strike Aster Graphics, Inc.'s Statement on the Public Interest for Failure to Comply with Commission Rule 210.15 Or, in the Alternative, for Leave to Respond. The Commission has determined to reject Aster's submission as improper under 19 CFR 210.50(a)(4)(i). 19 CFR 210.50(a)(4)(i) provides that parties may file information with the Commission relating to the public interest. Aster's submission, however, concerns the scope of the remedy and therefore does not fall within the ambit of the public interest submissions provided for under 19 CFR 210.50(a)(4)(i). Brother's response is thereby moot. The Commission notes that Aster will have an opportunity to raise its arguments regarding the scope of any remedial orders in a remedy submission before the Commission in response to the instant notice, which invites parties to file submissions addressing remedy, bonding and the public interest as noted below.

In connection with the final disposition of this investigation, the statute authorizes issuance of: (1) An exclusion order that could result in the exclusion of the subject articles from entry into the United States, and/or (2) one or more cease and desist orders that could result in Aster and the Defaulting Respondents being required to cease and desist from engaging in unfair acts in the importation and sale of such articles. Accordingly, the Commission is interested in receiving written submissions that address the form of remedy, if any, that should be ordered. If a party seeks exclusion of an article from entry into the United States for purposes other than entry for consumption, the party should so indicate and provide information establishing that activities involving other types of entry either are adversely affecting it or likely to do so. For background, *see Certain Devices for Connecting Computers via Telephone Lines,* Inv. No. 337–TA–360, USITC Pub. No. 2843, Comm'n Op. at 7–10 (December 1994).

The statute requires the Commission to consider the effects of any remedy upon the public interest. The public interest factors the Commission will consider include the effect that an exclusion order and/or CDO would have on: (1) The public health and welfare; (2) competitive conditions in the U.S. economy; (3) U.S. production of articles that are like or directly competitive with those that are subject to investigation; and (4) U.S. consumers. The Commission is therefore interested in receiving written submissions that address the aforementioned public interest factors in the context of this investigation.

If the Commission orders some form of remedy, the U.S. Trade Representative, as delegated by the President, has 60 days to approve, disapprove, or take no action on the Commission's determination. *See* Presidential Memorandum of July 21, 2005. 70 FR 43251 (July 26, 2005). During this period, the subject articles would be entitled to enter the United States under bond, in an amount determined by the Commission and prescribed by the Secretary of the Treasury. The Commission is therefore interested in receiving submissions concerning the amount of the bond that should be imposed if a remedy is ordered.

Written Submissions: Parties to this investigation, interested government agencies, and any other interested parties are invited to file written submissions on the issues of remedy, the public interest, and bonding. Such submissions should include views on the recommended determination by the ALJ on remedy and bonding.

In their initial written submissions, Brother is also requested to identify the remedy sought and Brother and OUII are also requested to submit proposed remedial orders for the Commission's consideration. Brother is further requested to identify the dates the Asserted Patents expire, to provide the HTSUS subheadings under which the subject articles are imported, and to supply identification information for all known importers of the subject articles.

Initial written submissions, including proposed remedial orders, must be filed no later than close of business on September 22, 2020. Reply submissions must be filed no later than the close of business on September 29, 2020. No further submissions on any of these issues will be permitted unless otherwise ordered by the Commission.

Persons filing written submissions must file the original document electronically on or before the deadlines stated above. The Commission's paper filing requirements in 19 CFR 210.4(f) are currently waived. 85 FR 15798 (Mar. 19, 2020). Submissions should refer to the investigation number (Inv. No. 337–TA–1174) in a prominent place on the cover page and/or the first page. (*See* Handbook for Electronic Filing Procedures, *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf*). Persons with questions regarding filing should contact the Secretary (202–205–2000).

Any person desiring to submit a document to the Commission in confidence must request confidential treatment. All such requests should be directed to the Secretary to the Commission and must include a full statement of the reasons why the Commission should grant such treatment. *See* 19 CFR 201.6. Documents for which confidential treatment by the Commission is properly sought will be treated accordingly. A redacted non-confidential version of the document must also be filed simultaneously with any confidential filing. All information, including confidential business information and documents for which confidential treatment is properly sought, submitted to the Commission for purposes of this Investigation may be disclosed to and used: (i) By the Commission, its employees and Offices, and contract personnel (a) for developing or maintaining the records of this or a related proceeding, or (b) in internal investigations, audits, reviews, and evaluations relating to the programs, personnel, and operations of the Commission including under 5 U.S.C. Appendix 3; or (ii) by U.S. government employees and contract personnel, solely for cybersecurity purposes. All contract personnel will sign appropriate nondisclosure agreements. All non-confidential written submissions will be available for public inspection at the Office of the Secretary and on EDIS.

The Commission vote for these determinations took place on September 8, 2020.

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: September 8, 2020.

Lisa Barton,

Secretary to the Commission.

BILLING CODE 7020–02–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–713]

Importer of Controlled Substances Application: Cerilliant Corporation

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Cerilliant Corporation has applied to be registered as an importer of basic class(es) of controlled substance(s). Refer to Supplemental Information listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may file written comments on or objections to the issuance of the proposed registration on or before October 14, 2020. Such persons may also file a written request for a hearing on the application on or before October 14, 2020.

ADDRESSES: Written comments should be sent to: Drug Enforcement Administration, Attention: DEA Federal Register Representative/DPW, 8701 Morrissette Drive, Springfield, Virginia 22152. All requests for a hearing must be sent to: Drug Enforcement Administration, Attn: Administrator, 8701 Morrissette Drive, Springfield, Virginia 22152. All request for a hearing should also be sent to: (1) Drug Enforcement Administration, Attn: Hearing Clerk/OALJ, 8701 Morrissette Drive, Springfield, Virginia 22152; and (2) Drug Enforcement Administration, Attn: DEA Federal Register Representative/DPW, 8701 Morrissette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.34(a), this is notice that on July 23, 2020, Cerilliant Corporation, 811 Paloma Drive, Suite A, Round Rock, Texas 78665–2402, applied to be registered as an importer of the following basic classes of controlled substance(s):

Controlled substance	Drug code	Schedule
3-Fluoro-N-methylcathinone (3-FMC)	1233	I
Cathinone	1235	I
Methcathinone	1237	I
4-Fluoro-N-methylcathinone (4-FMC)	1238	I
Pentedrone (α-methylaminovalerophenone)	1246	I
Mephedrone (4-Methyl-N-methylcathinone)	1248	I
4-Methyl-N-ethylcathinone (4-MEC)	1249	I
Naphyrone	1258	I
N-Ethylamphetamine	1475	I
N,N-Dimethylamphetamine	1480	I
Fenethylline	1503	I
Methaqualone	2565	I
JWH-250 (1-Pentyl-3-(2-methoxyphenylacetyl) indole)	6250	I
SR-18 (Also known as RCS-8) (1-Cyclohexylethyl-3-(2-methoxyphenylacetyl) indole)	7008	I
5-Fluoro-UR-144 and XLR11 [1-(5-Fluoro-pentyl)1H-indol-3-yl] (2,2,3,3-tetramethylcyclopropyl)methanone	7011	I
AB-FUBINACA (N-(1-amino-3-methyl-1-oxobutan-2-yl)-1-(4-fluorobenzyl)-1H-indazole-3-carboxamide)	7012	I
JWH-019 (1-Hexyl-3-(1-naphthoyl)indole)	7019	I
AB-PINACA (N-(1-amino-3-methyl-1-oxobutan-2-yl)-1-pentyl-1H-indazole-3-carboxamide)	7023	I
THJ-2201 ([1-(5-fluoropentyl)-1H-indazol-3-yl](naphthalen-1-yl)methanone)	7024	I
AB-CHMINACA (N-(1-amino-3-methyl-1-oxobutan-2-yl)-1-(cyclohexylmethyl)-1H-indazole-3-carboxamide)	7031	I
ADB-PINACA (N-(1-amino-3,3-dimethyl-1-oxobutan-2-yl)-1-pentyl-1H-indazole-3-carboxamide)	7035	I
APINACA and AKB48 (N-(1-Adamantyl)-1-pentyl-1H-indazole-3-carboxamide)	7048	I
JWH-081 (1-Pentyl-3-(1-(4-methoxynaphthoyl) indole)	7081	I
SR-19 (Also known as RCS-4) (1-Pentyl-3-[(4-methoxy)-benzoyl] indole)	7104	I
JWH-018 (also known as AM678) (1-Pentyl-3-(1-naphthoyl)indole)	7118	I
JWH-122 (1-Pentyl-3-(4-methyl-1-naphthoyl) indole)	7122	I
UR-144 (1-Pentyl-1H-indol-3-yl)(2,2,3,3-tetramethylcyclopropyl)methanone	7144	I
JWH-073 (1-Butyl-3-(1-naphthoyl)indole)	7173	I
JWH-200 (1-[2-(4-Morpholinyl)ethyl]-3-(1-naphthoyl)indole)	7200	I
AM2201 (1-(5-Fluoropentyl)-3-(1-naphthoyl) indole)	7201	I
JWH-203 (1-Pentyl-3-(2-chlorophenylacetyl) indole)	7203	I
PB-22 (Quinolin-8-yl 1-pentyl-1H-indole-3-carboxylate)	7222	I
5F-PB-22 (Quinolin-8-yl 1-(5-fluoropentyl)-1H-indole-3-carboxylate)	7225	I
Alpha-ethyltryptamine	7249	I
Ibogaine	7260	I
CP-47,497 (5-(1,1-Dimethylheptyl)-2-[(1R,3S)-3-hydroxycyclohexyl-phenol)	7297	I
CP-47,497 C8 Homologue (5-(1,1-Dimethyloctyl)-2-[(1R,3S)3-hydroxycyclohexyl-phenol)	7298	I

Phencyclidine	7471	II
Phenylacetone	8501	II
1-Piperidinocyclohexanecarbonitrile	8603	II
Alphaprodine	9010	II
Dihydrocodeine	9120	II
Ecgonine	9180	II
Ethylmorphine	9190	II
Levomethorphan	9210	II
Levorphanol	9220	II
Meperidine	9230	II
Dextropropoxyphene, bulk (non-dosage forms)	9273	II
Levo-alphacetylmethadol	9648	II
Noroxymorphone	9668	II
Racemethorphan	9732	II
Alfentanil	9737	II
Remifentanil	9739	II
Sufentanil	9740	II
Carfentanil	9743	II
Tapentadol	9780	II

The company plans to import the listed controlled substances for the manufacturing of analytical reference standards and distribution to their research and forensic customers. Approval of permit application will occur only when the registrant's activity is consistent with what is authorized under 21 U.S.C. 952(a)(2). Authorization will not extend to the import of Food and Drug Administration-approved or non-approved finished dosage forms for commercial sale.

William T. McDermott,

Assistant Administrator.

BILLING CODE P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–712]

Bulk Manufacturer of Controlled Substances Application: Organix Inc.

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Organix Inc. has applied to be registered as a bulk manufacturer of basic class(es) of controlled substance(s). Refer to Supplemental Information listed below for further drug information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may file written comments on or objections to the issuance of the proposed registration on or before November 13, 2020 Such persons may also file a written request for a hearing on the application on or before November 13, 2020.

ADDRESSES: Written comments should be sent to: Drug Enforcement Administration, Attention: DEA Federal Register Representative/DPW, 8701 Morrissette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.33(a), this is notice that on August 5, 2020, Organix Inc., 240 Salem Street, Woburn, Massachusetts 01801–2029, applied to be registered as a bulk manufacturer of the following basic class(es) of a controlled substance(s):

Controlled substance	Drug code	Schedule
5-Methoxy-N-N-dimethyltryptamine.	7431	I

The company plans to synthesize the above-listed controlled substance for distribution to its customers. No other activity for this drug code is authorized for this registration.

William T. McDermott,

Assistant Administrator.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. DEA–711]

Importer of Controlled Substances Application: Novitium Pharma LLC

AGENCY: Drug Enforcement Administration, Justice.

ACTION: Notice of application.

SUMMARY: Novitium Pharma LLC has applied to be registered as an importer of basic class(es) of controlled substance(s). Refer to Supplemental Information listed below for further drug(s) information.

DATES: Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may file written comments on or objections to the issuance of the proposed registration on or before October 14, 2020. Such persons may also file a written request for a hearing on the application on or before October 14, 2020.

ADDRESSES: Written comments should be sent to: Drug Enforcement Administration, Attention: DEA Federal Register Representative/DPW, 8701 Morrissette Drive, Springfield, Virginia 22152. All requests for a hearing must be sent to: Drug Enforcement Administration, Attn: Administrator, 8701 Morrissette Drive, Springfield, Virginia 22152. All requests for a hearing should also be sent to: (1) Drug Enforcement Administration, Attn: Hearing Clerk/OALJ, 8701 Morrissette Drive, Springfield, Virginia 22152; and (2) Drug Enforcement Administration, Attn: DEA Federal Register Representative/DPW, 8701 Morrissette Drive, Springfield, Virginia 22152.

SUPPLEMENTARY INFORMATION: In accordance with 21 CFR 1301.34(a), this is notice that on August 18, 2020, Novitium Pharma LLC, 70 Lake Drive, East Windsor, New Jersey 08520, applied to be registered as an importer of the following basic class(es) of controlled substance(s):

Controlled substance	Drug code	Schedule
Lisdexamfetamine ...	1205	II
Levorphanol	9220	II

The company plans to import the listed controlled substance Lisdexamfetamine as a raw Active Pharmaceutical Ingredients (API) material for drug product development and research purposes only. The company may import Lisdexamfetamine API for research purposes only but not for the manufacturing of Food and Drug Administration (FDA)-approved products.

The company plans to import the listed controlled substance Levorphanol to develop the manufacturing process for a drug product that will in turn be used to produce a tablet equivalent to the current brand product.

Approval of permit applications will occur only when the registrant's business activity is consistent with what is authorized under 21 U.S.C. 952(a)(2). Authorization will not extend to the import of FDA-approved or non-approved finished dosage forms for commercial sale.

BILLING CODE P

DEPARTMENT OF LABOR

Employment and Training Administration

Notice of a Change in Status of the Extended Benefit (EB) Program for Nevada

AGENCY: Employment and Training Administration, Labor.

ACTION: Notice.

This notice announces a retroactive change in benefit period eligibility under the EB program for Nevada.

The following change has occurred since the publication of the last notice regarding the State's EB status:

Based on Nevada's State law, which provides for the temporary adoption of the optional TUR trigger during periods of 100 percent Federal financing, and data released by the Bureau of Labor Statistics on May 22, 2020, the seasonally-adjusted total unemployment rate for Nevada rose to meet the 8.0 percent threshold to trigger ''on'' to a high unemployment period in EB. The payable period for Nevada under the high unemployment period is retroactive to June 7, 2020, and eligibility for claimants has been extended from a potential duration of up to 13 weeks to a potential duration of up to 20 weeks in the EB program.

The trigger notice covering state eligibility for the EB program can be found at: *http://ows.doleta.gov/unemploy/claims_arch.as*

Information for Claimants

The duration of benefits payable in the EB program, and the terms and conditions on which they are payable, are governed by the Federal-State Extended Unemployment Compensation Act of 1970, as amended, and the operating instructions issued to the states by the U.S. Department of Labor. In the case of a state beginning an EB period, the State Workforce Agency will furnish a written notice of potential entitlement to each individual who has exhausted all rights to regular benefits and is potentially eligible for EB (20 CFR 615.13(c)(1)).

Persons who believe they may be entitled to EB, or who wish to inquire about their rights under the program, should contact their State Workforce Agency.

FOR FURTHER INFORMATION CONTACT: U.S. Department of Labor, Employment and Training Administration, Office of Unemployment Insurance Room S–4524, Attn: Thomas Stengle, 200 Constitution Avenue NW, Washington, DC 20210, telephone number (202)–693–2991 (this is not a toll-free number) or by email: *Stengle.Thomas@dol.gov.*

Signed in Washington, DC.

John Pallasch,

Assistant Secretary for Employment and Training.

BILLING CODE 4510–FW–P

DEPARTMENT OF LABOR

Office of Federal Contract Compliance Programs

Affirmative Action Program Verification Interface; New Information Collection Requirements; Comment Request

AGENCY: Office of Federal Contract Compliance Programs, Labor.

ACTION: Notice.

SUMMARY: The Department of Labor (DOL), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act of 1995 (PRA). The program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Office of Federal Contract Compliance Programs (OFCCP) is soliciting comments concerning its proposal to obtain approval from the Office of Management and Budget (OMB) to implement the Affirmative Action Program Verification Interface (AAP–VI). A copy of the proposed information collection request can be obtained by contacting the office listed below in the **FOR FURTHER INFORMATION CONTACT** section of this Notice or by accessing it at *https://www.regulations.gov/.*

DATES: Written comments must be submitted to the office listed in the addresses section below on or before November 13, 2020.

ADDRESSES: You may submit comments by any of the following methods:

Electronic comments: The federal e-Rulemaking portal at *https://www.regulations.gov/.* Follow the instructions found on that website for submitting comments.

Mail, Hand Delivery, Courier: Addressed to Tina Williams, Director, Division of Policy and Program Development, Office of Federal Contract Compliance Programs, 200 Constitution Avenue NW, Room C–3325, Washington, DC 20210.

Instructions: Please submit one copy of your comments by only one method. For faster submission, we encourage commenters to transmit their comment electronically via the *https://www.regulations.gov/* website. Comments that are mailed to the address provided above must be postmarked before the close of the comment period. All submissions must include OFCCP's name for identification. Comments submitted in response to the notice, including any personal information provided, become a matter of public record and will be posted on *https://www.regulations.gov/.* Comments will also be summarized and/or included in the request for OMB approval of the information collection request.

FOR FURTHER INFORMATION CONTACT: Tina Williams, Director, Division of Policy and Program Development, Office of Federal Contract Compliance Programs, Room C–3325, 200 Constitution Avenue NW, Washington, DC 20210. Telephone: (202) 693–0103 (voice) or (202) 693–1337 (TTY) (these are not toll-free numbers). Copies of this notice may be obtained in alternative formats (large print, braille, audio recording) upon request by calling the numbers listed above.

SUPPLEMENTARY INFORMATION:

I. Background: OFCCP administers and enforces the three equal employment opportunity laws listed below.

- Executive Order 11246, as amended (E.O. 11246)
- Section 503 of the Rehabilitation Act of 1973, as amended (Section 503)
- Vietnam Era Veterans' Readjustment Assistance Act of 1974, as amended (VEVRAA)

These authorities prohibit employment discrimination by covered federal contractors and subcontractors and require that they provide equal employment opportunities regardless of race, color, religion, sex, sexual orientation, gender identity, national origin, disability, or status as a protected veteran. Additionally, federal contractors and subcontractors are prohibited from discriminating against applicants and employees for inquiring about, discussing, or disclosing information about their pay or the pay of their co-workers, subject to certain limitations. E.O. 11246's basic coverage applies to federal contractors and subcontractors and to federally assisted construction contractors holding a government contract in excess of $10,000, or government contracts that have, or can reasonably be expected to have, an aggregate total value exceeding $10,000 in a 12-month period. E.O. 11246 also applies to government bills of lading, depositories of federal funds in any amount, and to financial institutions that are issuing and paying agents for U.S. Savings Bonds. E.O. 11246's Affirmative Action Program (AAP) requirements apply to federal contractors and subcontractors with 50 or more employees and a contract of $50,000 or more. Section 503 prohibits employment discrimination against applicants and employees because of physical or mental disability and requires affirmative action to ensure that persons are treated without regard to disability. Section 503 applies to federal contractors and subcontractors with contracts in excess of $15,000, and its AAP coverage applies to federal contractors and subcontractors with 50 or more employees and a contract of $50,000 or more. VEVRAA prohibits employment discrimination against protected veterans and requires affirmative action to ensure that persons are treated without regard to their status as a protected veteran. VEVRAA applies to federal contractors and subcontractors with contracts of $150,000 or more, and its AAP coverage applies to federal contractors and subcontractors with 50 or more employees and a contract of $150,000 or more. This information collection request (ICR) seeks authorization for an annual Affirmative Action Program online certification process for federal contractors and for a secure method for federal contractors to submit AAPs electronically to OFCCP when they are scheduled for a compliance evaluation.

II. Review Focus: OFCCP is particularly interested in comments which:

- Evaluate the proposed frequency and level of information collection;
- Evaluate whether the proposed collection of information is necessary for the enforcement and compliance assistance functions of the agency that support the agency's compliance mission, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

III. Current Actions: OFCCP seeks approval of this new information collection in order to carry out its responsibilities to enforce the nondiscrimination and affirmative action provisions of the three legal authorities it administers.

Type of Review: New Collection.

Agency: Office of Federal Contract Compliance Programs.

Title: Affirmative Action Program Verification Interface.

OMB Control Number: 1250–[NEW].

Agency Number: None.

Affected Public: Business or other for-profit entities.

Total Respondents: 116,898.

Total Annual Respondents: 116,898.

Average Time per Response: 0.3 hours for account creation. 0.2 hours for AAP Submission. 0.1 hours for SAM Cert Question.

Estimated Total Burden Hours: 47,759 in the first year. 13,041 in subsequent years.

Frequency: Annual.

Total Other Burden Costs: $0.

Signed in Washington, DC, this September 8, 2020.

Harvey D. Fort,

Deputy Director, Division of Policy and Program Development, Office of Federal Contract Compliance Programs.

[FR Doc. 2020–20105 Filed 9–11–20; 8:45 am]

BILLING CODE 4510–CM–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

[OMB Control No. 1219–0133]

Proposed Extension of Information Collection; Hazard Communication—30 CFR Part 47

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Request for public comments.

SUMMARY: The Department of Labor, as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and Federal agencies with an opportunity to comment on proposed collections of information in accordance with the Paperwork Reduction Act of 1995. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. Currently, the Mine Safety and Health Administration (MSHA) is soliciting comments on the information collection for Hazard Communication—30 CFR part 47.

DATES: All comments must be received on or before November 13, 2020.

ADDRESSES: You may submit comment as follows. Please note that late, untimely filed comments will not be considered.

Electronic Submissions: Submit electronic comments in the following way:

• *Federal eRulemaking Portal: https://www.regulations.gov.* Follow the instructions for submitting comments for docket number MSHA–2020–0026. Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket, with no changes. Because your comment will be made public, you are responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as your or anyone else's Social Security number or confidential business information.

• If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission.

Written/Paper Submissions: Submit written/paper submissions in the following way:

• *Mail/Hand Delivery:* Mail or visit DOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452.

• MSHA will post your comment as well as any attachments, except for information submitted and marked as confidential, in the docket at *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Roslyn Fontaine, Deputy Director, Office of Standards, Regulations, and Variances, MSHA, at *MSHA.information.collections@dol.gov* (email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811(a), authorizes the Secretary of Labor to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

Section 101(a)(7) of the Mine Act, 30 U.S.C. 811(a)(7), requires, in part, that mandatory standards prescribe the use of labels or other appropriate forms of warning as are necessary to ensure that miners are apprised of all hazards to which they are exposed, relevant symptoms and appropriate emergency treatment, and proper conditions and precautions for safe use or exposure.

MSHA's hazardous communications standards in 30 CFR part 47 require mine operators to evaluate the hazards of chemicals they produce or use and to provide information to miners concerning chemical hazards by means of a written hazard communication program including a list of all hazardous chemicals known at the mine, labeling containers of hazardous chemicals, providing access to Material Safety Data Sheets, and administering initial miner training.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Hazard Communication—30 CFR part 47. MSHA is particularly interested in comments that:

• Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;

• Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

• Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Background documents related to this information collection request are available at *https://regulations.gov* and in DOL–MSHA located at 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION** section of this notice from the previous collection of information.

III. Current Actions

This information collection request concerns provisions for Hazard Communication—30 CFR part 47. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request from the previous information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0133.

Affected Public: Business or other for-profit.

Number of Respondents: 15,584.

Frequency: On occasion.

Number of Responses: 907,409.

Annual Burden Hours: 148,236 hours.

Annual Respondent or Recordkeeper Cost: $9,175.

Comments submitted in response to this notice will be summarized in the request for Office of Management and Budget approval of the proposed information collection request; they will become a matter of public record and will be available at *https://www.reginfo.gov.*

Roslyn B. Fontaine,

Certifying Officer.

Comments submitted electronically, including attachments, to *https://www.regulations.gov* will be posted to the docket, with no changes. Because your comment will be made public, you are responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as your or anyone else's Social Security number or confidential business information.
- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission.

Written/Paper Submissions: Submit written/paper submissions in the following way:

- *Mail/Hand Delivery:* Mail or visit DOL–MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452.
- MSHA will post your comment as well as any attachments, except for information submitted and marked as confidential, in the docket at *https://www.regulations.gov.*

FOR FURTHER INFORMATION CONTACT: Roslyn Fontaine, Deputy Director, Office of Standards, Regulations, and Variances, MSHA, at *MSHA.information.collections@dol.gov* (email); (202) 693–9440 (voice); or (202) 693–9441 (facsimile).

SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary of Labor (Secretary) to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

The reporting and recordkeeping provisions in 30 CFR part 50 (Part 50), Notification, Investigation, Reports and Records of Accidents, Injuries and Illnesses, Employment and Coal Production in Mines, are essential elements in MSHA's statutory mandate to reduce work-related injuries and illnesses among the nation's miners (30 U.S.C. 801).

Section 50.10 requires mine operators and independent contractors to immediately notify MSHA in the event of an accident. This immediate notification is critical to MSHA's timely investigation and assessment of the cause of the accident.

Section 50.11 requires that the mine operator or independent contractor investigate each accident and occupational injury and prepare a report. The mine operator or independent contractor may not use MSHA Form 7000–1 as the investigation report, except if the operator or contractor employs fewer than 20 miners and the injury is not related to an accident.

Section 50.20 requires mine operators and independent contractors to report each accident, injury, and illness to MSHA on Form 7000–1 within 10 working days after an accident or injury has occurred or an occupational illness has been diagnosed. The use of MSHA Form 7000–1 provides for uniform information gathering across the mining industry.

Section 50.30 requires that all mine operators and independent contractors working on mine property report employment to MSHA quarterly on Form 7000–2, and that coal mine operators and independent contractors also report coal production.

Accident, injury, and illness data, when correlated with employment and production data, provide information that MSHA uses to improve its safety and health enforcement programs, focus its education and training efforts, and establish priorities for its technical assistance activities in mine safety and health. Maintaining a current database allows MSHA to identify and direct increased attention to those mines, industry segments, and geographical areas where hazardous trends are developing. This could not be done effectively using historical data. The information collected under Part 50 is the most comprehensive and reliable occupational data available concerning the mining industry.

Section 103(d) of the Mine Act mandates that each accident be investigated by the operator to determine the cause and means of preventing a recurrence. Operators must keep records of such accidents and investigations and make them available to the Secretary or the Secretary's authorized representative and the appropriate State agency.

Section 103(h) requires operators to keep any records and make any reports that are reasonably necessary for MSHA to perform its duties under the Mine Act. Section 103(j) requires operators to notify MSHA of the occurrence of an accident and to take appropriate measures to preserve any evidence that would assist in the investigation into the causes of the accident.

II. Desired Focus of Comments

MSHA is soliciting comments concerning the proposed information collection related to Mine Accident, Injury, and Illness Report and Quarterly Mine Employment and Coal Production Report. MSHA is particularly interested in comments that:

• Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information has practical utility;

• Evaluate the accuracy of MSHA's estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

• Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

Background documents related to this information collection request are available at *https://regulations.gov* and in DOL–MSHA located at 201 12th Street South, Suite 4E401, Arlington, VA 22202–5452. Questions about the information collection requirements may be directed to the person listed in the **FOR FURTHER INFORMATION** section of this notice from the previous collection of information.

III. Current Actions

This information collection request concerns provisions for Mine Accident, Injury, and Illness Report and Quarterly Mine Employment and Coal Production Report. MSHA has updated the data with respect to the number of respondents, responses, burden hours, and burden costs supporting this information collection request from the previous information collection request.

Type of Review: Extension, without change, of a currently approved collection.

Agency: Mine Safety and Health Administration.

OMB Number: 1219–0007.

Affected Public: Business or other for-profit.

Number of Respondents: 25,067.

Frequency: On occasion.

Number of Responses: 112,414.

Annual Burden Hours: 131,632 hours.

Annual Respondent or Recordkeeper Cost: $2,946.

MSHA Forms: MSHA Form 7000–1, Mine Accident, Injury, and Illness Report; MSHA Form 7000–2, Quarterly Mine Employment and Coal Production Report.

Comments submitted in response to this notice will be summarized in the request for Office of Management and Budget approval of the proposed information collection request; they will become a matter of public record and will be available at *https://www.reginfo.gov.*

• *Mail:* R. Travis Kantz, NASA Clearance Officer, NASA Headquarters, 300 E Street SW, Washington, DC 20546, Mail Code: JSC/HQ–IB–20, 281–792–7885 or email *Travis.Kantz@nasa.gov.*

Instructions: Please submit comments only and cite Information Collection, ''Improving Customer Experience (OMB Circular A–11, Section 280 Implementation)'' in all correspondence related to this collection. To confirm receipt of your comment(s), please check *regulations.gov,* approximately two-to-three business days after submission to verify posting (except allow 30 days for posting of comments submitted by mail).

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Roger Kantz, NASA Clearance Officer, NASA Headquarters, 300 E Street SW, JF0000, Washington, DC 20546 or email *Roger.T.Kantz@nasa.gov.*

SUPPLEMENTARY INFORMATION:

I. Abstract:

A modern, streamlined and responsive customer experience means: Raising government-wide customer experience to the average of the private sector service industry; developing indicators for high-impact Federal programs to monitor progress towards excellent customer experience and mature digital services; and providing the structure (including increasing transparency) and resources to ensure customer experience is a focal point for agency leadership.

This proposed information collection activity provides a means to garner customer and stakeholder feedback in an efficient, timely manner in accordance with the Administration's commitment to improving customer service delivery as discussed in Section 280 of OMB Circular A–11 at *https://www.performance.gov/cx/a11-280.pdf.*

As discussed in OMB guidance, agencies should identify their highest-impact customer journeys (using customer volume, annual program cost, and/or knowledge of customer priority as weighting factors) and select touchpoints/transactions within those journeys to collect feedback.

These results will be used to improve the delivery of Federal services and programs. It will also provide government-wide data on customer experience that can be displayed on *www.performance.gov* to help build transparency and accountability of

Federal programs to the customers they serve.

As a general matter, these information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

NASA will only submit collections if they meet the following criteria.

- The collections are voluntary;
- The collections are low-burden for respondents (based on considerations of total burden hours or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;
- The collections are non-controversial and do not raise issues of concern to other Federal agencies;
- Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;
- Personally identifiable information (PII) is collected only to the extent necessary and is not retained;
- Information gathered is intended to be used for general service improvement and program management purposes;
- Upon agreement between OMB and the agency all or a subset of information may be released as part of A–11, Section 280 requirements only on *performance.gov.* Summaries of customer research and user testing activities may be included in public-facing customer journey maps or summaries.
- Additional release of data must be done coordinated with OMB.

These collections will allow for ongoing, collaborative and actionable communications between the Agency, its customers and stakeholders, and OMB as it monitors agency compliance on Section 280. These responses will inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on services will be unavailable.

II. Methods of Collection

Electronic and optionally by paper.

III. Data

Title: Improving Customer Experience (OMB Circular A–11, Section 280 Implementation).

Current Action: New Collection of Information.

Type of Review: New.

Affected Public: Individuals and Households, Businesses and Organizations, State, Local or Tribal Government.

Estimated Number of Respondents: Below is a preliminary estimate of the aggregate burden hours for this new collection. NASA will provide refined estimates of burden in subsequent notices.

Estimated Annual Number of Activities: 5.

Average Number of Respondents per Activity: 1.

Annual Responses: 2,001,550.

Estimated Time per Response: 2 minutes–60 minutes, dependent upon activity.

Burden Hours: 101,125 burden hours.

IV. Request for Comments

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

All written comments will be available for public inspection *Regulations.gov.*

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget control number.

Roger Kantz,

NASA PRA Clearance Officer.

BILLING CODE 7510–13–P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

Institute of Museum and Library Services

Notice of Proposed Information Collection Request: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

AGENCY: Institute of Museum and Library Services, National Foundation on the Arts and the Humanities.

ACTION: Notice, request for comments, collection of information.

SUMMARY: The Institute of Museum and Library Services (IMLS), as part of its continuing effort to reduce paperwork and respondent burden, conducts a pre-clearance consultation program to provide the general public and federal agencies with an opportunity to comment on proposed and/or continuing collections of information in accordance with the Paperwork Reduction Act. This pre-clearance consultation program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The purpose of this Notice is to solicit comments concerning the continuance of the Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery. A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **ADDRESSES** section of this notice.

DATES: Written comments must be submitted to the office listed in the **ADDRESSES** section below on or before November 12, 2020.

ADDRESSES: Send comments to: Connie Bodner, Ph.D., Director of Grants Policy and Management, Office of Grants Policy and Management, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW, Suite 4000, Washington, DC 20024–2135. Dr. Bodner can be reached by Telephone: 202–653–4636, or by email at *cbodner@imls.gov* or by teletype (TTY/TDD) at 202–653–4614. Office hours are from

8:30 a.m. to 5 p.m., E.T., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Matthew Birnbaum, Ph.D., Supervisory Social Science Researcher, Planning, Research and Evaluation, Institute of Museum and Library Services, 955 L'Enfant Plaza North, SW, Suite 4000, Washington, DC 20024–2135. Dr. Birnbaum can be reached by Telephone: 202–653–4760, Fax: 202– 653–4601, or by email at *mbirnbaum@imls.gov,* or by teletype (TTY/TDD) for persons with hearing difficulty at 202–653–4614.

SUPPLEMENTARY INFORMATION: IMLS is particularly interested in comments that help the agency to:

• Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

• Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used;

• Enhance the quality, utility and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.* permitting electronic submissions of responses.

I. Background

The Institute of Museum and Library Services is the primary source of federal support for the nation's libraries and museums. We advance, support, and empower America's museums, libraries, and related organizations through grant making, research, and policy development. Our vision is a nation where museums and libraries work together to transform the lives of individuals and communities. To learn more, visit *www.imls.gov.*

II. Current Actions

This proposed request is to renew IMLS' generic clearance for collection of qualitative feedback on the Agency's service delivery. This data collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient and timely manner in accordance with the Administration's commitment to improving service delivery. By qualitative feedback, IMLS means information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. The Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery has been conducted by the Institute of Museum and Library Services under the clearance number 3137–0081, which expires December 31, 2020.

Agency: Institute of Museum and Library Services.

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

OMB Number: 3137–0081.

Agency Number: 3137.

Affected Public: State and local governments, State library agencies, and public libraries.

Number of Respondents: 9,854.

Frequency of Response: Once per request.

Average minutes per response: 51 minutes.

Total burden hours: 1,578.

Cost Burden (dollars): $44,095.19.

Public Comments Invited: Comments submitted in response to this notice will be summarized and/or included in the request for OMB's clearance of this information collection.

Dated: September 9, 2020.

Kim Miller,

Senior Grants Management Specialist, Institute of Museum and Library Services.

[FR Doc. 2020–20225 Filed 9–11–20; 8:45 am]

BILLING CODE 7036–01–P

NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

National Endowment for the Humanities

Meeting of Humanities Panel

AGENCY: National Endowment for the Humanities; National Foundation on the Arts and the Humanities.

ACTION: Notice of meeting.

SUMMARY: The National Endowment for the Humanities (NEH) will hold fifteen meetings, by videoconference, of the Humanities Panel, a federal advisory committee, during October 2020. The purpose of the meetings is for panel review, discussion, evaluation, and recommendation of applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965.

DATES: See **SUPPLEMENTARY INFORMATION** for meeting dates. The meetings will open at 8:30 a.m. and will adjourn by 5:00 p.m. on the dates specified below.

FOR FURTHER INFORMATION CONTACT: Elizabeth Voyatzis, Committee Management Officer, 400 7th Street SW, Room 4060, Washington, DC 20506; (202) 606–8322; *evoyatzis@neh.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. App.), notice is hereby given of the following meetings:

1. DATE: October 6, 2020

This video meeting will discuss applications on the topic of Literary Studies, for the Humanities Collections and Reference Resources grant program, submitted to the Division of Preservation and Access.

2. DATE: October 8, 2020

This video meeting will discuss applications on the topics of Art and Architectural History, for the Humanities Collections and Reference Resources grant program, submitted to the Division of Preservation and Access.

3. DATE: October 14, 2020

This video meeting will discuss applications on the topics of Film and Media Studies, for the Humanities Collections and Reference Resources grant program, submitted to the Division of Preservation and Access.

4. DATE: October 15, 2020

This video meeting will discuss applications on the topic of World Studies (Pre-Modern Era), for the Humanities Collections and Reference Resources grant program, submitted to the Division of Preservation and Access.

5. DATE: October 19, 2020

This video meeting will discuss applications for the Short Documentaries grant program, submitted to the Division of Public Programs.

6. DATE: October 20, 2020

This video meeting will discuss applications on the topics of World History and Culture, for Media Projects: Production Grants, submitted to the Division of Public Programs.

7. DATE: October 20, 2020

This video meeting will discuss applications on the topic of American Studies, for the Humanities Collections and Reference Resources grant program, submitted to the Division of Preservation and Access.

8. DATE: October 22, 2020

This video meeting will discuss applications on the topic of U.S. History (African American Studies), for the Humanities Collections and Reference Resources grant program, submitted to the Division of Preservation and Access.

9. DATE: October 22, 2020

This video meeting will discuss applications on the topics of Radio and

Podcasts, for Media Projects: Production Grants, submitted to the Division of Public Programs.

10. DATE: October 23, 2020

This video meeting will discuss applications on the topics of Art History and Culture, for Media Projects: Production Grants, submitted to the Division of Public Programs.

11. DATE: October 26, 2020

This video meeting will discuss applications on the topics of Civics and Society, for Media Projects: Production Grants, submitted to the Division of Public Programs.

12. DATE: October 27, 2020

This video meeting will discuss applications on the topics of U.S. History and Culture, for Media Projects: Production Grants, submitted to the Division of Public Programs.

13. DATE: October 27, 2020

This video meeting will discuss applications on the topic of Art History, for the Humanities Collections and Reference Resources grant program, submitted to the Division of Preservation and Access.

14. DATE: October 28, 2020

This video meeting will discuss applications on the topic of U.S. History (West), for the Humanities Collections and Reference Resources grant program, submitted to the Division of Preservation and Access.

15. DATE: October 29, 2020

This video meeting will discuss applications on the topics of Music and Performing Arts, for the Humanities Collections and Reference Resources grant program, submitted to the Division of Preservation and Access.

Because these meetings will include review of personal and/or proprietary financial and commercial information given in confidence to the agency by grant applicants, the meetings will be closed to the public pursuant to sections 552b(c)(4) and 552b(c)(6) of Title 5, U.S.C., as amended. I have made this determination pursuant to the authority granted me by the Chairman's Delegation of Authority to Close Advisory Committee Meetings dated April 15, 2016.

Dated: September 8, 2020.

Caitlin Cater,

Attorney-Advisor, National Endowment for the Humanities.

BILLING CODE 7536–01–P

NATIONAL SCIENCE FOUNDATION

Agency Information Collection Activities: Comment Request;

Medical Clearance Process for Deployment to the Polar Regions

AGENCY: National Science Foundation.

ACTION: Submission for OMB review; comment request.

SUMMARY: The National Science Foundation (NSF) has submitted the following information collection requirement to OMB for review and clearance under the Paperwork Reduction Act of 1995. This is the *second notice* for public comment; the first was published in the **Federal Register**, and no comments were received. NSF is forwarding the proposed submission to the Office of Management and Budget (OMB) for clearance simultaneously with the publication of this second notice.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAmain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Alexandria, VA 22314, or send email to *splimpto@nsf.gov.* Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including federal holidays).

Copies of the submission may be obtained by calling 703–292–7556.

SUPPLEMENTARY INFORMATION: NSF may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Title of Collection: Medical Clearance Process for Deployment to the Polar Regions.

OMB Number: 3145–0177.

Type of Request: Revision to and extension of approval of an information collection.

Proposed Project: Presidential Memorandum No. 6646 (February 5, 1982) (available from the National Science Foundation, Office of Polar Programs, Suite 755, 4201 Wilson Boulevard, Arlington, VA 22230) sets forth the National Science Foundation's overall management responsibilities for the entire United States national program in Antarctica. Section 107(a) of Public law 98–373 [July 31, 1984; amended as Public Law 101–609–November 16, 1990] [available from the National Science Foundation, Office of Polar Programs, Suite 755, 4201 Wilson Boulevard, Arlington, VA 22230] designates the National Science Foundation as the lead agency responsible for implementing Arctic research policy, and the Director of the National Science Foundation shall ensure that the requirements of section 108 are fulfilled.

NSF Form 1700, Medical Clearance Process for Deployment to the Polar Regions furnishes information to the NSF regarding the physical, dental, and mental health status for all individuals (except DoD-uniformed service personnel) who anticipate deploying to Antarctica under the auspices of the United States Antarctic Program or to certain regions of the Arctic sponsored by the NSF/GEO/Office of Polar Programs. The information is used to determine whether an individual is physically and mentally suited to endure the extreme hardships imposed by the Arctic and Antarctic continents, while also performing specific duties as specified by their employers.

Respondents: All non-DoD uniformed personnel planning to deploy to U.S. stations in the Antarctic or to specified regions of the Arctic that are sponsored by the National Science Foundation's Office of Polar Programs.

The number of Annual Respondents: 3,500 to the Antarctic and 150 to the Arctic.

Estimated Total Annual Burden on Respondents: 36,500 hours.

Frequency of Responses: This form is submitted upon an individual's first deployment to Antarctica (below 60° South) or to specified regions of the Arctic and annually thereafter for the duration of the individual's deployments.

Comments: Comments are invited on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information shall have practical utility; (b) the accuracy of the Agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information on respondents, including through the use of automated collection techniques or other forms of information technology; and (d) ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Dated: September 9, 2020.

Suzanne H. Plimpton,

Reports Clearance Officer, National Science Foundation.

BILLING CODE 7555–01–P

NUCLEAR REGULATORY COMMISSION

[NRC–2020–0040]

Information Collection: DOE/NRC Form 740M, Concise Note; DOE/NRC Form 741, Nuclear Material Transaction Report; DOE/NRC Form 742, Material Balance Report; and DOE/NRC Form 742C, Physical Inventory Listing

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collections are entitled, ''DOE/NRC Form 740M, Concise Note; DOE/NRC Form 741, Nuclear Material Transaction Report; DOE/NRC Form 742, Material Balance Report; and DOE/NRC Form 742C, Physical Inventory Listing.''

DATES: Submit comments by October 14, 2020. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *https://www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under Review—Open for Public Comments'' or by using the search function.

FOR FURTHER INFORMATION CONTACT: David Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *INFOCOLLECTS.Resource@nrc.gov.*

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC–2020–0040 when contacting the NRC about the availability of information for this action. You may obtain publicly-available information related to this action by any of the following methods:

- *Federal Rulemaking Website:* Go to *https://www.regulations.gov* and search for Docket ID NRC–2020–0040. A copy of the collection of information and related instructions may be obtained without charge by accessing Docket ID NRC–2020–0040 on this website.
- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly-available documents online in the ADAMS Public Documents collection at *https://www.nrc.gov/reading-rm/adams.html.* To begin the search, select select ''*Begin Web-based ADAMS Search.*'' For problems with ADAMS, please contact the NRC's Public Document Room reference staff at 1–800–397–4209, 301–415–4737, or by email to *pdr.resource@nrc.gov.* For the convenience of the reader, instructions about obtaining materials referenced in this document are provided in the ''Availability of Documents'' section.
- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001; telephone: 301–415–2084; email: *INFOCOLLECTS.Resource@NRC.GOV.*

B. Submitting Comments

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at *https://www.regulations.gov* and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, ''DOE/NRC Form 740M, Concise Note; DOE/NRC Form 741, Nuclear Material Transaction Report; DOE/NRC Form 742, Material Balance Report; and DOE/NRC Form 742C, Physical Inventory Listing.'' The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on April 29, 2020, (85 FR 23870).

1. *The title of the information collection:* DOE/NRC Form 740M, Concise Note; DOE/NRC Form 741, Nuclear Material Transaction Report; DOE/NRC Form 742, Material Balance Report; and DOE/NRC Form 742C, Physical Inventory Listing.
2. *OMB approval number:* DOE/NRC Form 740M: 3150–0057. DOE/NRC Form 741: 3150–0003. DOE/NRC Form 742: 3150–0004. DOE/NRC Form 742C: 3150–0058.
3. *Type of submission:* Extension.
4. *The form number if applicable:* DOE/NRC Forms 740M, 741, 742, and 742C.
5. *How often the collection is required or requested:* DOE/NRC Form 741, Nuclear Material Transaction Reports will be collected whenever nuclear material is shipped or received into the Material Balance Area; DOE/NRC Form 742, Material Balance Report will be collected on an annual basis; DOE/NRC Form 742C, Physical Inventory Listing will be collected on an annual basis; DOE/NRC Form 740M, Concise Note Forms are used when needed.
6. *Who will be required or asked to respond:* Persons licensed to possess specified quantities of nuclear material and entities subject to the U.S.-IAEA Caribbean Territories Safeguards Agreement (INFCIRC/366) are required to respond as follows:

Any licensee who ships, receives, or otherwise undergoes an inventory change of nuclear material is required to submit a DOE/NRC Form 741 to document the change. Additional information regarding these transactions shall be submitted through Form 740M, with Safeguards Information identified and handled in accordance with section 73.21 of title 10 of the *Code of Federal Regulations,* ''Requirements for the Protection of Safeguards Information.''

Any licensee who had possessed in the previous reporting period, at any one time and location, nuclear material in a quantity totaling one gram or more shall complete DOE/NRC Form 742. In addition, each licensee, Federal or State, who is authorized to possess, at any one time or location, one kilogram of foreign obligated source material, is required to file with the NRC an annual statement of source material inventory which is foreign obligated.

Any licensee, who had possessed in the previous reporting period, at any one time and location, special nuclear material in a quantity totaling one gram or more shall complete DOE/NRC Form 742C.

7. *The estimated number of annual responses:*

DOE/NRC Form 740M: 175.
DOE/NRC Form 741: 11,143.
DOE/NRC Form 742: 344.
DOE/NRC Form 742C: 385.

8. *The estimated number of annual respondents:*

DOE/NRC Form 740M: 40.
DOE/NRC Form 741: 344.
DOE/NRC Form 742: 344.
DOE/NRC Form 742C: 385.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:*

DOE/NRC Form 740M: 131.
DOE/NRC Form 741: 13,928.
DOE/NRC Form 742: 1,204.
DOE/NRC Form 742C: 1,490.

10. *Abstract:* Persons licensed to possess specified quantities of nuclear material currently report inventory and transaction of material to the Nuclear Materials Management and Safeguards System via the DOE/NRC Forms: DOE/NRC Form 740M, Concise Note; DOE/NRC Form 741, Nuclear Material Transaction Report; DOE/NRC Form 742, Material Balance Report; and DOE/NRC Form 742C, Physical Inventory Listing. This collection is being revised to include approximately 25 entities subject to the U.S.-IAEA Caribbean Territories Safeguards Agreement (INFCIRC/366). Part 75 requires licensees to provide reports of nuclear material inventory and flow for entities under the U.S.-IAEA Caribbean Territories Safeguards Agreement (INFCIRC/366), permit inspections by Agreement (INFCIRC/366). The IAEA inspectors, give immediate notice to the NRC in specified situations involving the possibility of loss of nuclear material, and give notice for imports and exports of specified amounts of nuclear material. These licensees will also follow written material accounting and control procedures. Reporting of transfer and material balance records to the IAEA will be done through the U.S. State system (Nuclear Materials Management and Safeguards System, collected under OMB clearance numbers 3150–0003, 3150–0004, 3150–0057, and 3150–0058.) The NRC needs this information to implement its international obligations under the U.S.-IAEA Caribbean Territories Safeguards.

III. Availability of Documents

The supplemental documents related to each information collections are identified in the following table and are available to interested persons in ADAMS.

DOCUMENTS	ADAMS Accession No.
Supporting statement and DOE/NRC Form 740M, ''Concise Note'' (3150–0057).	ML20183A141 and ML20021A120.
Supporting statement and DOE/NRC Form 741, ''Nuclear Material Transaction Report'' (3150–0003).	ML20183A140 and ML20021A121.
Supporting statement and DOE/NRC Form 742, ''Material Balance Report'' (3150–0004).	ML20183A186 and ML20024D128.
Supporting statement and DOE/NRC Form 742C, ''Physical Inventory Listing''.	ML20183A187 and ML20024D129.
(3150–0058)	
NUREG/BR–0006, Revision 9 (3150–0003; 3150–0057)	ML20240A155.
NUREG/BR–0007, Revision 7 (3150–0004; 3150–0058)	ML18123A462.
D–24 Personal Computer Data Input for Nuclear Regulatory Commission Licensees.	ML20092K107.

Dated: September 8, 2020.

For the Nuclear Regulatory Commission.

BILLING CODE 7590–01–P

PUBLIC BUILDINGS REFORM BOARD

Notice of Public Meeting: Progress on Selling the High Value Assets and Preparations for the Upcoming First Round of Recommendations, etc.

AGENCY: Public Buildings Reform Board.

ACTION: Notice of public meeting.

SUMMARY: As provided by the Federal Assets Sale and Transfer Act of 2016 (FASTA), the Public Buildings Reform Board (PBRB) is holding a meeting to discuss its progress on the High Value Asset Round and preparations for the upcoming First Round of sales, consolidations, property disposals, and redevelopment recommendations.

DATES: The meeting is scheduled for Thursday, October 1st, 2020, from 2:00 p.m. to 4:00 p.m. (Eastern Daylight Time).

ADDRESSES: Due to public health concerns driven by the COVID–19 pandemic, this meeting will be open to the public virtually via WebEx video conferencing. Interested participants must register to attend for the public meeting via this link: *https://jllmeet.webex.com/jllmeet/onstage/g.php?MTID=e56b82ebae21118cbb2919c9853546c19*.

Those who require special assistance or accommodations in order to attend must contact the PBRB Team at *fastainfo@pbrb.gov* at least 12 days prior to the event.

FOR FURTHER INFORMATION CONTACT: Questions and comments can be forwarded to the PBRB Team by email at *fastainfo@pbrb.gov*. Or you may contact Courtney Johnson at (301) 357–3981 or *courtney.d.johnson@pbrb.gov*.

SUPPLEMENTARY INFORMATION:

Background

FASTA created the PBRB as an independent Board to identify opportunities for the Federal government to significantly reduce its inventory of civilian real property and thereby reduce costs. The Board is directed, within 6 months of its formation, to recommend to the Office of Management and Budget (OMB) the sale of not fewer than five properties not on the list of surplus or excess with a fair market value of not less than $500 million and not more than $750 million. In two subsequent rounds over a five-year period, the Board is responsible for making recommendations for other sales, consolidations, property disposals or redevelopment of up to $7.25 billion in value.

Format and Registration

The format for the meeting will be panel discussions with appropriate time allowed for a Q&A segment. Interested participants must register to attend for the public meeting via this link: *https://jllmeet.webex.com/jllmeet/onstage/g.php?MTID=e56b82ebae21118cbb2919c9853546c19.*

Those who require special assistance or accommodations in order to attend must contact the PBRB Team at *fastainfo@pbrb.gov* at least 12 days prior to the event.

Portions of the meeting may be held in executive session if the Board is considering issues involving classified or proprietary information.

A transcript of the public meeting will be available at pbrb.gov following the session.

If you have any additional questions please email *fastainfo@pbrb.gov.*

Authority: Pub. L. 114–287, 130 Stat 1463.

Courtney Johnson,

Federal Register Liaison, Public Buildings Reform Board.

BILLING CODE P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–89778; File No. SR–CboeBYX–2020–025

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change to Rule 11.26(a), Stating It Will Utilize MIAX PEARL Market Data From the CQSUQDF for Purposes of Order Handling, Routing, Execution, and Related Compliance Processes

September 8, 2020.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on August 25, 2020, Cboe BYX Exchange, Inc. (the ''Exchange'' or ''BYX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange, Inc. (''BYX'' or the ''Exchange'') proposes to update Rule 11.26(a), stating it will utilize MIAX PEARL market data from the CQSUQDF for purposes of order handling, routing, execution, and related compliance processes. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/byx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update Rule 11.26(a) regarding the public disclosure of the sources of data that the Exchange utilizes when performing: (i) Order handling; (ii) order routing; (iii) order execution; and (iv) related compliance processes to reflect the operation of the MIAX PEARL as an equities exchange.

On August 14, 2020, the Commission approved MIAX PEARL's proposed rule change to establish rules governing the trading of equities securities.[4] MIAX PEARL announced that it plans to launch equities trading on September 25, 2020.[5] The Exchange, therefore, proposes to update Rule 11.26(a) regarding the public disclosure of the sources of data that the Exchange utilizes when performing: (i) Order handling; (ii) order routing; (iii) order execution; and (iv) related compliance processes to reflect the operation of MIAX PEARL as an equities exchange beginning on September 25, 2020. Specifically, the Exchange proposes to amend Rule 11.26(a) to include MIAX PEARL by stating it will utilize MIAX PEARL market data from the Consolidated Quotation System (''CQS'')/UTP Quotation Data Feed (''UQDF'') for purposes of order handling, routing, execution, and related compliance processes. At this stage, no secondary source for MIAX PEARL market data will be used.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[6] in general, and furthers the objectives of Section 6(b)(5) of the Act,[7] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes that its proposal to update Exchange Rule 11.26(a) to include MIAX PEARL will ensure that the Rule correctly identifies and publicly states on a market-by-market basis all of the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, routing, and execution of orders, and for performing the regulatory compliance checks related to each of those functions. The proposed rule changes also remove impediments to and perfects the mechanism of a free and open market and protects investors and the public interest because it provides additional specificity, clarity and transparency.

[6] 15 U.S.C. 78f.

[7] 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes its proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes the proposal would enhance competition because including all of the exchanges enhances transparency and enables investors to better assess the quality of the Exchange's execution and routing services.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

(i) Significantly affect the protection of investors or the public interest;

(ii) impose any significant burden on competition; and

(iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [8] and Rule 19b–4(f)(6) thereunder.[9]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–CboeBYX–2020–025 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CboeBYX–2020–025. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CboeBYX–2020–025 and should be submitted on or before October 5, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–89788; File No. 4–678]

Program for Allocation of Regulatory Responsibilities Pursuant to Rule 17d–2; Notice of Filing and Order Approving and Declaring Effective an Amended Proposed Plan for the Allocation of Regulatory Responsibilities Among the Financial Industry Regulatory Authority, Inc., Miami International Securities Exchange, LLC, MIAX PEARL, LLC, and MIAX Emerald, LLC

September 8, 2020.

Notice is hereby given that the Securities and Exchange Commission (''Commission'') has issued an Order, pursuant to Section 17(d) of the Securities Exchange Act of 1934 (''Act''),[1] approving and declaring effective an amendment to the plan for allocating regulatory responsibility (''Plan'') filed on September 2, 2020, pursuant to Rule 17d–2 of the Act,[2] by the Miami International Securities Exchange, LLC (''MIAX''), MIAX PEARL, LLC (''MIAX PEARL''), MIAX Emerald, LLC (''MIAX Emerald'') and the Financial Industry Regulatory Authority, Inc. (''FINRA'') (together, the ''Parties''). The Plan replaces and supersedes the agreement entered into between FINRA, MIAX and MIAX PEARL on December 19, 2018, entitled ''Agreement between Financial Industry Regulatory Authority, Inc., Miami International Securities Exchange, LLC and MIAX PEARL, LLC Pursuant to Rule 17d–2 under the Securities Exchange Act of 1934.'' [3]

I. Introduction

Section 19(g)(1) of the Securities Exchange Act of 1934 (''Act''),[4] among other things, requires every self-regulatory organization (''SRO'') registered as either a national securities exchange or national securities association to examine for, and enforce compliance by, its members and persons associated with its members with the Act, the rules and regulations thereunder, and the SRO's own rules, unless the SRO is relieved of this responsibility pursuant to Section 17(d) or Section 19(g)(2) of the Act.[5] Without this relief, the statutory obligation of each individual SRO could result in a

[5] 15 U.S.C. 78q(d) and 15 U.S.C. 78s(g)(2), respectively.

pattern of multiple examinations of broker-dealers that maintain memberships in more than one SRO (''common members''). Such regulatory duplication would add unnecessary expenses for common members and their SROs.

Section 17(d)(1) of the Act [6] was intended, in part, to eliminate unnecessary multiple examinations and regulatory duplication.[7] With respect to a common member, Section 17(d)(1) authorizes the Commission, by rule or order, to relieve an SRO of the responsibility to receive regulatory reports, to examine for and enforce compliance with applicable statutes, rules, and regulations, or to perform other specified regulatory functions.

To implement Section 17(d)(1), the Commission adopted two rules: Rule 17d–1 and Rule 17d–2 under the Act.[8] Rule 17d–1 authorizes the Commission to name a single SRO as the designated examining authority (''DEA'') to examine common members for compliance with the financial responsibility requirements imposed by the Act, or by Commission or SRO rules.[9] When an SRO has been named as a common member's DEA, all other SROs to which the common member belongs are relieved of the responsibility to examine the firm for compliance with the applicable financial responsibility rules. On its face, Rule 17d–1 deals only with an SRO's obligations to enforce member compliance with financial responsibility requirements. Rule 17d–1 does not relieve an SRO from its obligation to examine a common member for compliance with its own rules and provisions of the federal securities laws governing matters other than financial responsibility, including sales practices and trading activities and practices.

To address regulatory duplication in these and other areas, the Commission adopted Rule 17d–2 under the Act.[10] Rule 17d–2 permits SROs to propose joint plans for the allocation of regulatory responsibilities with respect to their common members. Under paragraph (c) of Rule 17d–2, the Commission may declare such a plan effective if, after providing for appropriate notice and comment, it determines that the plan is necessary or appropriate in the public interest and for the protection of investors; to foster cooperation and coordination among the SROs; to remove impediments to, and foster the development of, a national market system and a national clearance and settlement system; and is in conformity with the factors set forth in Section 17(d) of the Act. Commission approval of a plan filed pursuant to Rule 17d–2 relieves an SRO of those regulatory responsibilities allocated by the plan to another SRO.

II. The Plan

On November 19, 2014, the Commission declared effective the Plan entered into between FINRA and MIAX for allocating regulatory responsibility pursuant to Rule 17d–2.[11] The Plan is intended to reduce regulatory duplication for firms that are common members of both MIAX and FINRA. The plan reduces regulatory duplication for firms that are members of MIAX and FINRA by allocating regulatory responsibility with respect to certain applicable laws, rules, and regulations. Included in the Plan is an exhibit that lists every MIAX rule for which FINRA bears responsibility under the Plan for overseeing and enforcing with respect to MIAX members that are also members of FINRA and the associated persons therewith. On January 12, 2017, the parties submitted a proposed amendment to the Plan to add MIAX PEARL as a Participant to the Plan.[12] On June 28, 2018, the parties submitted a proposed amendment to the Plan to allocate surveillance, investigation, and enforcement responsibilities for Rule 14e–4 under the Act, as well as certain provisions of Regulation SHO.[13] On December 20, 2018, the parties submitted a proposed amendment to the Plan to add MIAX EMERALD as a Participant to the Plan.[14]

III. Proposed Amendment to the Plan

On September 2, 2020, the parties submitted a proposed amendment to the Plan (''Amended Plan''). The primary purpose of the Amended Plan is to add MIAX PEARL equities rules and certain federal securities laws to the Certification. The text of the proposed Amended Plan is as follows (additions are *italicized;* deletions are [bracketed]):

Agreement Among Financial Industry Regulatory Authority, Inc., Miami International Securities Exchange, LLC, MIAX Pearl, LLC and MIAX Emerald, LLC Pursuant to Rule 17d–2 Under the Securities Exchange Act of 1934

This Agreement, by and among the Financial Industry Regulatory Authority, Inc. (''FINRA''), Miami International Securities Exchange, LLC (''MIAX''), MIAX PEARL, LLC (''MIAX PEARL''), and MIAX Emerald, LLC (''MIAX Emerald'') is made this 2nd day of September, 2020 (the ''Agreement''), pursuant to Section 17(d) of the Securities Exchange Act of 1934 (the ''Exchange Act'') and Rule 17d–2 thereunder, which permits agreements between self-regulatory organizations to allocate regulatory responsibility to eliminate regulatory duplication. FINRA, MIAX, MIAX PEARL and MIAX Emerald may be referred to individually as a ''party'' and together as the ''parties.''

This Agreement amends and restates the agreement entered into between FINRA, MIAX and MIAX PEARL on December 19, 2018, entitled ''Agreement between Financial Industry Regulatory Authority, Inc., Miami International Securities Exchange, LLC and MIAX PEARL, LLC Pursuant to Rule 17d–2 under the Securities Exchange Act of 1934,'' and any subsequent amendments thereafter.

Whereas, the parties desire to reduce duplication in the examination and surveillance of their Common Members (as defined herein) and in the filing and processing of certain registration and membership records; and

Whereas, the parties desire to execute an agreement covering such subjects pursuant to the provisions of Rule 17d–2 under the Exchange Act and to file such agreement with the Securities and Exchange Commission (the ''SEC'' or ''Commission'') for its approval.

Now, therefore, in consideration of the mutual covenants contained hereinafter, the parties hereby agree as follows:

1. *Definitions.* Unless otherwise defined in this Agreement or the context otherwise requires, the terms used in this Agreement shall have the same meaning as they have under the Exchange Act and the rules and regulations thereunder. As used in this Agreement, the following terms shall have the following meanings:

(a) ''*MIAX Rules,*'' ''*MIAX PEARL Rules*'', ''*MIAX Emerald Rules*'' or ''*FINRA Rules*'' shall mean: (i) The rules of MIAX, MIAX PEARL or MIAX

Emerald, respectively, or (ii) the rules of FINRA, respectively, as the rules of an exchange or association are defined in Exchange Act Section 3(a)(27).

(b) ''*Common Rules*'' shall mean MIAX Rules, MIAX PEARL Rules and MIAX Emerald Rules that are substantially similar to the applicable FINRA Rules and certain provisions of the Exchange Act and SEC rules set forth on Exhibit 1 in that examination or surveillance for compliance with such provisions and rules would not require FINRA to develop one or more new examination or surveillance standards, modules, procedures, or criteria in order to analyze the application of the provision or rule, or a Common Member's activity, conduct, or output in relation to such provision or rule; provided, however, Common Rules shall not include the application of the SEC, MIAX PEARL or FINRA rules as they pertain to violations of insider trading activities, which is covered by a separate 17d–2 Agreement by and among Cboe BZX Exchange, Inc., Cboe BYX Exchange, Inc., Chicago Stock Exchange, Inc., Cboe EDGA Exchange, Inc., Cboe EDGX Exchange, Inc., Financial Industry Regulatory Authority, Inc., MEMX, LLC, Nasdaq BX, Inc., Nasdaq PHLX LLC, The Nasdaq Stock Market LLC, NYSE National, Inc., New York Stock Exchange LLC, NYSE American LLC, NYSE Arca Inc., Investors' Exchange LLC and Long-Term Stock Exchange, Inc. effective May 26, 2020, as may be amended from time to time. Common Rules shall not include any provisions regarding (i) notice, reporting or any other filings made directly to or from MIAX, MIAX PEARL or MIAX Emerald, (ii) incorporation by reference of other MIAX, MIAX PEARL Rules or MIAX Emerald Rules that are not Common Rules, (iii) exercise of discretion in a manner that differs from FINRA's exercise of discretion including, but not limited to exercise of exemptive authority, by MIAX, MIAX PEARL or MIAX Emerald, (iv) prior written approval of MIAX, MIAX PEARL or MIAX Emerald and (v) payment of fees or fines to MIAX, MIAX PEARL or MIAX Emerald.

(c) ''*Common Members*'' shall mean members of FINRA and at least one of MIAX, MIAX PEARL or MIAX Emerald.

(d) ''*Effective Date*'' shall be the date this Agreement is approved by the Commission.

(e) ''*Enforcement Responsibilities*'' shall mean the conduct of appropriate proceedings, in accordance with FINRA's Code of Procedure (the Rule 9000 Series) and other applicable FINRA procedural rules, to determine whether violations of Common Rules have occurred, and if such violations are deemed to have occurred, the imposition of appropriate sanctions as specified under FINRA's Code of Procedure and sanctions guidelines.

(f) ''*Regulatory Responsibilities*'' shall mean the examination responsibilities, surveillance responsibilities and Enforcement Responsibilities relating to compliance by the Common Members with the Common Rules and the provisions of the Exchange Act and the rules and regulations thereunder, and other applicable laws, rules and regulations, each as set forth on *Exhibit 1* attached hereto.

2. *Regulatory and Enforcement Responsibilities.* FINRA shall assume Regulatory Responsibilities and Enforcement Responsibilities for Common Members. Attached as *Exhibit 1* to this Agreement and made part hereof, MIAX, MIAX PEARL and MIAX Emerald furnished FINRA with a current list of Common Rules and certified to FINRA that such rules that are MIAX Rules, MIAX PEARL Rules and MIAX Emerald Rules are substantially similar to the corresponding FINRA Rules (the ''Certification''). FINRA hereby agrees that the rules listed in the Certification are Common Rules as defined in this Agreement. Each year following the Effective Date of this Agreement, or more frequently if required by changes in the rules of the parties, MIAX, MIAX PEARL and MIAX Emerald shall submit an updated list of Common Rules to FINRA for review which shall add MIAX Rules, MIAX PEARL Rules or MIAX Emerald Rules not included in the current list of Common Rules that qualify as Common Rules as defined in this Agreement; delete MIAX Rules, MIAX PEARL Rules or MIAX Emerald Rules included in the current list of Common Rules that no longer qualify as Common Rules as defined in this Agreement; and confirm that the remaining rules on the current list of Common Rules continue to be MIAX Rules, MIAX PEARL Rules or MIAX Emerald Rules that qualify as Common Rules as defined in this Agreement. Within 30 days of receipt of such updated list, FINRA shall confirm in writing whether the rules listed in any updated list are Common Rules as defined in this Agreement. Notwithstanding anything herein to the contrary, it is explicitly understood that the term ''Regulatory Responsibilities'' does not include, and MIAX, MIAX PEARL and MIAX Emerald shall retain full responsibility for (unless otherwise addressed by separate agreement or rule) (collectively, the ''Retained Responsibilities'') the following:

(a) Surveillance, examination, investigation and enforcement with respect to trading activities or practices involving MIAX's, MIAX PEARL's and MIAX Emerald's own marketplace;

(b) registration pursuant to their applicable rules of associated persons (*i.e.,* registration rules that are not Common Rules);

(c) discharge of their duties and obligations as a Designated Examining Authority pursuant to Rule 17d–1 under the Exchange Act; and

(d) any MIAX Rules, MIAX PEARL Rules or MIAX Emerald Rules that are not Common Rules as provided in paragraph 6.

3. *Common Members.* Prior to the Effective Date, MIAX, MIAX PEARL and MIAX Emerald shall furnish FINRA with a current list of Common Members, which shall be updated no less frequently than once each quarter.

4. *No Charge.* There shall be no charge to MIAX, MIAX PEARL and MIAX Emerald by FINRA for performing the Regulatory Responsibilities and Enforcement Responsibilities under this Agreement except as hereinafter provided. FINRA shall provide MIAX, MIAX PEARL and MIAX Emerald with ninety (90) days advance written notice in the event FINRA decides to impose any charges to MIAX, MIAX PEARL and MIAX Emerald for performing the Regulatory Responsibilities under this Agreement. If FINRA determines to impose a charge, MIAX, MIAX PEARL and MIAX Emerald shall have the right at the time of the imposition of such charge to terminate this Agreement; provided, however, that FINRA's Regulatory Responsibilities under this Agreement shall continue until the Commission approves the termination of this Agreement.

5. *Applicability of Certain Laws, Rules, Regulations or Orders.* Notwithstanding any provision hereof, this Agreement shall be subject to any statute, or any rule or order of the SEC. To the extent such statute, rule or order is inconsistent with one or more provisions of this Agreement, the statute, rule or order shall supersede the provision(s) hereof to the extent necessary to be properly effectuated and the provision(s) hereof in that respect shall be null and void.

6. *Notification of Violations.* In the event that FINRA becomes aware of apparent violations of any MIAX Rules, MIAX PEARL Rules or MIAX Emerald Rules, which are not listed as Common Rules, discovered pursuant to the performance of the Regulatory Responsibilities assumed hereunder,

FINRA shall notify MIAX, MIAX PEARL and MIAX Emerald of those apparent violations for such response as MIAX, MIAX PEARL and MIAX Emerald deem appropriate. In the event that MIAX, MIAX PEARL or MIAX Emerald becomes aware of apparent violations of any Common Rules, discovered pursuant to the performance of the Retained Responsibilities, MIAX, MIAX PEARL and MIAX Emerald shall notify FINRA of those apparent violations and such matters shall be handled by FINRA as provided in this Agreement. Apparent violations of Common Rules shall be processed by, and enforcement proceedings in respect thereto shall be conducted by FINRA as provided hereinbefore; provided, however, that in the event a Common Member is the subject of an investigation relating to a transaction on MIAX, MIAX PEARL or MIAX Emerald, MIAX, MIAX PEARL and MIAX Emerald may in their discretion assume concurrent jurisdiction and responsibility. Each party agrees to make available promptly all files, records and witnesses necessary to assist the other in its investigation or proceedings.

7. *Continued Assistance.*

(a) FINRA shall make available to MIAX, MIAX PEARL and MIAX Emerald all information obtained by FINRA in the performance by it of the Regulatory Responsibilities hereunder with respect to the Common Members subject to this Agreement. In particular, and not in limitation of the foregoing, FINRA shall furnish MIAX, MIAX PEARL and MIAX Emerald any information it obtains about Common Members which reflects adversely on their financial condition. MIAX, MIAX PEARL and MIAX Emerald shall make available to FINRA any information coming to its attention that reflects adversely on the financial condition of Common Members or indicates possible violations of applicable laws, rules or regulations by such firms.

(b) The parties agree that documents or information shared shall be held in confidence, and used only for the purposes of carrying out their respective regulatory obligations. No party shall assert regulatory or other privileges as against any other with respect to documents or information that is required to be shared pursuant to this Agreement.

(c) The sharing of documents or information among the parties pursuant to this Agreement shall not be deemed a waiver as against third parties of regulatory or other privileges relating to the discovery of documents or information.

8. *Statutory Disqualifications.* When FINRA becomes aware of a statutory disqualification as defined in the Exchange Act with respect to a Common Member, FINRA shall determine pursuant to Sections 15A(g) and/or Section 6(c) of the Exchange Act the acceptability or continued applicability of the person to whom such disqualification applies and keep MIAX, MIAX PEARL and MIAX Emerald advised of its actions in this regard for such subsequent proceedings as MIAX, MIAX PEARL and MIAX Emerald may initiate.

9. *Customer Complaints.* MIAX, MIAX PEARL and MIAX Emerald shall forward to FINRA copies of all customer complaints involving Common Members received by MIAX, MIAX PEARL and MIAX Emerald relating to FINRA's Regulatory Responsibilities under this Agreement. It shall be FINRA's responsibility to review and take appropriate action in respect to such complaints.

10. *Advertising.* FINRA shall assume responsibility to review the advertising of Common Members subject to the Agreement, provided that such material is filed with FINRA in accordance with FINRA's filing procedures and is accompanied with any applicable filing fees set forth in FINRA Rules.

11. *No Restrictions on Regulatory Action.* Nothing contained in this Agreement shall restrict or in any way encumber the right of any party to conduct its own independent or concurrent investigation, examination or enforcement proceeding of or against Common Members, as any party, in its sole discretion, shall deem appropriate or necessary.

12. *Termination.* This Agreement may be terminated by any party at any time upon the approval of the Commission after one (1) year's written notice to the other parties (or such shorter time as agreed by the parties), except as provided in paragraph 4.

13. *Arbitration.* In the event of a dispute among the parties as to the operation of this Agreement, the parties hereby agree that any such dispute shall be settled by arbitration in Washington, DC in accordance with the rules of the American Arbitration Association then in effect, or such other procedures as the parties may mutually agree upon. Judgment on the award rendered by the arbitrator(s) may be entered in any court having jurisdiction. Each party acknowledges that the timely and complete performance of its obligations pursuant to this Agreement is critical to the business and operations of the other parties. In the event of a dispute among the parties, the parties shall continue to perform their respective obligations under this Agreement in good faith during the resolution of such dispute unless and until this Agreement is terminated in accordance with its provisions. Nothing in this Section 13 shall interfere with a party's right to terminate this Agreement as set forth herein.

14. *Separate Agreement.* This Agreement is wholly separate from the following agreement: (1) The multiparty Agreement made pursuant to Rule 17d–2 of the Exchange Act among Cboe BZX Exchange, Inc., BOX Options Exchange, LLC, Cboe Exchange, Inc., Cboe C2 Exchange, Inc., Nasdaq ISE, LLC, FINRA, MIAX, NYSE American LLC, NYSE Arca, Inc., The Nasdaq Stock Market LLC, Nasdaq BX, Inc., the Nasdaq PHLX LLC, Nasdaq GEMX, LLC, Cboe EDGX Exchange, Inc., Nasdaq MRX, LLC, MIAX PEARL, LLC and MIAX Emerald, LLC involving the allocation of regulatory responsibilities with respect to common members for compliance with common rules relating to the conduct by broker-dealers of accounts for listed options or index warrants entered as approved by the SEC on February 12, 2019, and as may be amended from time to time; and (2) the multiparty Agreement made pursuant to Rule 17d–2 of the Exchange Act among Cboe BZX Exchange, Inc., BOX Options Exchange, LLC, Cboe Exchange, Inc., Cboe C2 Exchange, Inc., Nasdaq ISE, LLC, FINRA, MIAX, NYSE American LLC, NYSE Arca, Inc., The Nasdaq Stock Market LLC, Nasdaq BX, Inc., the Nasdaq PHLX LLC, Nasdaq GEMX, LLC, Cboe EDGX Exchange, Inc., Nasdaq MRX, LLC, MIAX PEARL, LLC and MIAX Emerald, LLC involving the allocation of regulatory responsibilities with respect to SRO market surveillance of common members activities with regard to certain common rules relating to listed options approved by the SEC on February 11, 2019, and as may be amended from time to time.

15. *Notification of Members.* The parties shall notify Common Members of this Agreement after the Effective Date by means of a uniform joint notice.

16. *Amendment.* This Agreement may be amended in writing provided that the changes are approved by each party. All such amendments must be filed with and approved by the Commission before they become effective.

17. *Limitation of Liability.* None of the parties nor any of their respective directors, governors, officers or employees shall be liable to any other party to this Agreement for any liability, loss or damage resulting from or claimed to have resulted from any delays, inaccuracies, errors or omissions

with respect to the provision of Regulatory Responsibilities as provided hereby or for the failure to provide any such responsibility, except with respect to such liability, loss or damages as shall have been suffered by any party and caused by the willful misconduct of another party or their respective directors, governors, officers or employees. No warranties, express or implied, are made by any party hereto with respect to any of the responsibilities to be performed by them hereunder.

18. *Relief from Responsibility.* Pursuant to Sections 17(d)(1)(A) and 19(g) of the Exchange Act and Rule 17d–2 thereunder, FINRA, MIAX, MIAX PEARL and MIAX Emerald join in requesting the Commission, upon its approval of this Agreement or any part thereof, to relieve MIAX, MIAX PEARL and MIAX Emerald of any and all responsibilities with respect to matters allocated to FINRA pursuant to this Agreement; provided, however, that this Agreement shall not be effective until the Effective Date.

19. *Severability.* Any term or provision of this Agreement that is invalid or unenforceable in any jurisdiction shall, as to such jurisdiction, be ineffective to the extent of such invalidity or unenforceability without rendering invalid or unenforceable the remaining terms and provisions of this Agreement or affecting the validity or enforceability of any of the terms or provisions of this Agreement in any other jurisdiction.

20. *Counterparts.* This Agreement may be executed in one or more counterparts, each of which shall be deemed an original, and such counterparts together shall constitute one and the same instrument.

Exhibit 1

Miami International Securities Exchange, LLC, MIAX PEARL, LLC and MIAX Emerald, LLC Rules Certification for 17d–2 Agreement With FINRA

Miami International Securities Exchange, LLC (''MIAX''), MIAX PEARL, LLC (''MIAX PEARL'') and MIAX Emerald, LLC (''MIAX Emerald'') hereby certify that the requirements contained in the rules listed below are identical to, or substantially similar to, the comparable FINRA (NASD) Rule, Exchange Act provision or SEC rule identified (''Common Rules'').

[1] FINRA shall only have Regulatory Responsibilities regarding the rule and not the interpretations and policies.

Common Rules shall not include any provisions regarding (i) notice, reporting or any other filings made directly to or from MIAX, MIAX PEARL or MIAX Emerald, (ii) incorporation by reference of *other* MIAX, MIAX PEARL or MIAX Emerald Rules that are not Common Rules, (iii) exercise of discretion in a manner that differs from FINRA's exercise of discretion including, but not limited to exercise of exemptive authority by MIAX, MIAX PEARL or MIAX Emerald, (iv) prior written approval of MIAX, MIAX PEARL or MIAX Emerald and (v) payment of fees or fines to MIAX, MIAX PEARL or MIAX Emerald.

* *FINRA shall not have any Regulatory Responsibilities for these rules as they pertain to violations of insider trading activities, which is covered by a separate 17d–2 Agreement by and among Cboe BZX Exchange, Inc., Cboe BYX Exchange, Inc., Chicago Stock Exchange, Inc., Cboe EDGA Exchange Inc., Cboe EDGX Exchange Inc., Financial Industry Regulatory Authority, Inc., MEMX, LLC, Nasdaq BX, Inc., Nasdaq PHLX LLC, The Nasdaq Stock Market LLC, NYSE National, Inc., New York Stock Exchange, LLC, NYSE American LLC, NYSE Arca Inc., and Investors' Exchange LLC and the Long-Term Stock Exchange, Inc. effective May 26, 2020, as may be amended from time to time.*

[2] FINRA shall only have Regulatory Responsibilities regarding MIAX and MIAX Emerald Rules 1901 or MIAX Pearl Rule 3101 to the extent that MIAX, MIAX Pearl or MIAX Emerald recognize the same categories of principal and representative registration.

[3] FINRA shall not have Regulatory Responsibilities regarding requirements to keep records "in conformity with . . . Exchange Rules;" responsibility for such requirement remains with MIAX PEARL.

[4] FINRA shall only have Regulatory Responsibilities regarding the rule and not the interpretations and policies.

** FINRA shall perform the surveillance responsibilities for the double star rules for MIAX PEARL Equities. These rules may be cited by FINRA in both the context of this Agreement and the Regulatory Services Agreement.

In addition, the following provisions shall be part of this 17d–2 Agreement:

- SEA Rule 200 of Regulation SHO—Definition of Short Sales and Marking Requirements **
- SEA Rule 201 of Regulation SHO—Circuit Breaker **

- SEA Rule 203 of Regulation SHO—Borrowing and Delivery Requirements **
- SEA Rule 204 of Regulation SHO—Close-Out Requirement **
- *SEA Rule 101 of Regulation M—Activities by Distribution Participants* **
- *SEA Rule 102 of Regulation M—Activities by Issuers and Selling Security Holders During a Distribution* **
- *SEA Rule 103 of Regulation M—Nasdaq Passive Market Making* **
- *SEA Rule 104 of Regulation M—Stabilizing and Other Activities in Connection with an Offering* **
- *SEA Rule 105 of Regulation M—Short Selling in Connection With a Public Offering* **
- *SEA Rule 604 of Regulation NMS—Display of Customer Limit Orders* **
- *SEA Rule 606 of Regulation NMS—Disclosure of Routing Information* **
- *SEA Rule 610(d) of Regulation NMS—Locking or Crossing Quotations* **
- *SEA Rule 611 of Regulation NMS—Order Protection Rule* **
- *SEA Rule 10b–5 Employment of Manipulative and Deceptive Devices* *
- *SEA Rule 17a–3/17a–4—Records to Be Made by Certain Exchange Members, Brokers, and Dealers/Records to Be Preserved by Certain Exchange Members, Brokers, and Dealers* *
- SEA Rule 14e–4—Prohibited Transactions in Connection with Partial Tender Offers ^

^ FINRA shall perform surveillance[, investigation, and Enforcement Responsibilities] for SEA Rule 14e–4(a)(1)(ii)(D).

** FINRA shall not have any Regulatory Responsibilities for these rules as they pertain to violations of insider trading activities, which is covered by a separate 17d–2 Agreement by and among Cboe BZX Exchange, Inc., Cboe BYX Exchange, Inc., Chicago Stock Exchange, Inc., Cboe EDGA Exchange Inc., Cboe EDGX Exchange Inc., Financial Industry Regulatory Authority, Inc., MEMX, LLC, Nasdaq BX, Inc., Nasdaq PHLX LLC, The Nasdaq Stock Market LLC, NYSE National, Inc., New York Stock Exchange, LLC, NYSE American LLC, NYSE Arca Inc., and Investors' Exchange LLC and the Long-Term Stock Exchange, Inc. effective May 26, 2020, as may be amended from time to time.*

*** FINRA shall perform the surveillance responsibilities for the double star rules for MIAX PEARL Equities. These rules may be cited by FINRA in both the context of this Agreement and the Regulatory Services Agreement.*

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number 4–678 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number 4–678. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml).* Copies of the submission, all subsequent amendments, all written statements with respect to the proposed plan that are filed with the Commission, and all written communications relating to the proposed plan between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the plan also will be available for inspection and copying at the principal offices of FINRA, MIAX, MIAX PEARL, and MIAX Emerald. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number 4–678 and should be submitted on or before October 5, 2020.

V. Discussion

The Commission finds that the proposed Amended Plan is consistent with the factors set forth in Section 17(d) of the Act [15] and Rule 17d–2(c) thereunder [16] in that the proposed Amended Plan is necessary or appropriate in the public interest and for the protection of investors, fosters cooperation and coordination among SROs, and removes impediments to and fosters the development of the national market system. In particular, the Commission believes that the proposed Amended Plan should reduce unnecessary regulatory duplication by allocating to FINRA certain examination and enforcement responsibilities for Common Members that would otherwise be performed by FINRA and at least one of MIAX, MIAX PEARL, or MIAX Emerald. Accordingly, the proposed Amended Plan promotes efficiency by reducing costs to common members. Furthermore, because MIAX, MIAX PEARL, MIAX Emerald and FINRA will coordinate their regulatory functions in accordance with the Amended Plan, the Amended Plan should promote investor protection.

The Commission notes that, under the Amended Plan, MIAX, MIAX PEARL, MIAX Emerald, and FINRA have allocated regulatory responsibility for those MIAX, MIAX PEARL, and MIAX Emerald rules, set forth in the Certification, that are substantially similar to the applicable FINRA rules in that examination for compliance with such provisions and rules would not require FINRA to develop one or more new examination standards, modules, procedures, or criteria in order to analyze the application of the rule, or a common member's activity, conduct, or output in relation to such rule. In addition, under the Amended Plan, FINRA would assume regulatory responsibility for certain provisions of the federal securities laws and the rules and regulations thereunder that are set forth in the Certification. The common rules covered by the Amended Plan are specifically listed in the Certification, as may be amended by the parties from time to time.

According to the Amended Plan, MIAX, MIAX PEARL, and MIAX Emerald will review the Certification at least annually, or more frequently if required by changes in either the rules of MIAX, MIAX PEARL, MIAX Emerald, or FINRA, and, if necessary, submit to FINRA an updated list of common rules to add MIAX, MIAX PEARL, or MIAX Emerald rules not included on the then-current list of common rules that are substantially similar to FINRA rules; delete MIAX, MIAX PEARL, or MIAX Emerald rules included in the then-current list of common rules that no longer qualify as common rules; and confirm that the remaining rules on the list of common rules continue to be MIAX, MIAX PEARL, or MIAX Emerald

[15] 15 U.S.C. 78q(d).

[16] 17 CFR 240.17d–2(c).

rules that qualify as common rules.[17] FINRA will then confirm in writing whether the rules listed in any updated list are common rules as defined in the Amended Plan. Under the Amended Plan, MIAX, MIAX PEARL, and MIAX Emerald also will provide FINRA with a current list of common members and shall update the list no less frequently than once each quarter.[18] The Commission believes that these provisions are designed to provide for continuing communication between the parties to ensure the continued accuracy of the scope of the proposed allocation of regulatory responsibility.

The Commission is hereby declaring effective an Amended Plan that, among other things, allocates regulatory responsibility to FINRA for the oversight and enforcement of all MIAX, MIAX PEARL, and MIAX Emerald rules that are substantially similar to the rules of FINRA for common members of FINRA and MIAX, FINRA and MIAX PEARL, and FINRA and MIAX Emerald. Therefore, modifications to the Certification need not be filed with the Commission as an amendment to the Amended Plan, provided that the parties are only adding to, deleting from, or confirming changes to MIAX, MIAX PEARL, or MIAX Emerald rules in the Certification in conformance with the definition of common rules provided in the Amended Plan. However, should the parties decide to add a MIAX, MIAX PEARL, or MIAX Emerald rule to the Certification that is not substantially similar to a FINRA rule; delete a MIAX, MIAX PEARL, or MIAX Emerald rule from the Certification that is substantially similar to a FINRA rule; or leave on the Certification a MIAX, MIAX PEARL, or MIAX Emerald rule that is no longer substantially similar to a FINRA rule, then such a change would constitute an amendment to the Amended Plan, which must be filed with the Commission pursuant to Rule 17d–2 under the Act.[19]

Under paragraph (c) of Rule 17d–2, the Commission may, after appropriate notice and comment, declare a plan, or any part of a plan, effective. In this instance, the Commission believes that appropriate notice and comment can take place after the proposed amendment is effective. In particular, the purpose of the amendment is to add MIAX PEARL equities rules and certain federal securities laws to the Certification. The Commission notes that the most recent prior amendment to the Plan was published for comment and the Commission did not receive any comments thereon.[20] The Commission believes that the current amendment to the Plan does not raise any new regulatory issues that the Commission has not previously considered, and therefore believes that the amended Plan should become effective without any undue delay.

VI. Conclusion

This order gives effect to the Amended Plan filed with the Commission in File No. 4–678. The parties shall notify all members affected by the Amended Plan of their rights and obligations under the Amended Plan.

It is therefore ordered, pursuant to Section 17(d) of the Act, that the Amended Plan in File No. 4–678, between the FINRA, MIAX, MIAX PEARL, and MIAX Emerald, filed pursuant to Rule 17d–2 under the Act, hereby is approved and declared effective.

It is further ordered that MIAX, MIAX PEARL, and MIAX Emerald are each relieved of those responsibilities allocated to FINRA under the Amended Plan in File No. 4–678.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[21]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–89787; File No. SR–NYSEArca–2020–78]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Modify the NYSE Arca Options Fee Schedule

September 8, 2020.

Pursuant to Section 19(b)(1)[1] of the Securities Exchange Act of 1934 (the ''Act'')[2] and Rule 19b–4 thereunder,[3] notice is hereby given that, on September 1, 2020, NYSE Arca, Inc. (''NYSE Arca'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to modify the NYSE Arca Options Fee Schedule (''Fee Schedule'') regarding pricing incentives for certain posted volume. The Exchange proposes to implement the fee change effective September 1, 2020. The proposed rule change is available on the Exchange's website at *www.nyse.com,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to amend the Fee Schedule regarding pricing incentives for certain posted volume. In particular, the Exchange proposes to adopt a new Customer Posting Tier for non-Penny Issues and to implement a cap on the maximum per contract credit for Professional Customer executions. The Exchange proposes to implement the fee change effective September 1, 2020.

The Exchange has established various pricing incentives—or posting credit tiers—designed to encourage OTP Holders and OTP Firms (collectively, ''OTP Holders'') to direct additional order flow to the Exchange to achieve more favorable pricing and higher credits. Currently, the Fee Schedule provides separate pricing programs for

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

executed Customer posted interest in Penny issues and non-Penny issues—namely Customer Posting Credit Tiers in Penny Issues and Customer Posting Credit Tiers in non-Penny Issues (collectively, the ''Customer Posting Tiers''). As such, OTP Holders receive a base per contract credit for executions of Customer posted interest, which credit increases if certain volume criteria and thresholds are met. OTP Holders may also qualify for the Customer Incentive Program, which offers one of five ways to earn an additional credit (to the Customer Posting Tiers) if certain volume criteria and thresholds are met. The Exchange notes that for purposes of these pricing programs, Professional Customer interest is currently treated the same as Customer interest.[4]

The Exchange proposes two changes to the current pricing incentives: To adopt a new Customer Posting Tier for non-Penny Issues (the ''Non-Penny Posting Tiers'') and to implement a cap on the maximum per contract credit for Professional Customer executions regardless of whether an OTP Holders qualifies for higher credits per the pricing incentive programs, which are described in more detail below.

New Tier E to the Non-Penny Posting Tiers

The Non-Penny Posting Tiers consist of a base tier per contract credit of ($0.75) on executions of Customer posted interest in non-Penny issues as five other tiers—Tiers A–E, which offer increased credits, ranging from ($0.85) to ($1.02), based on meeting increased posted volume requirements. The Exchange proposes to modify the Fee Schedule to add a new Tier E, and to rename current Tier E as Tier F.[5] New Tier E would provide a ($1.01) per contract credit provided an OTP Holder executes at least 1.50% of Total Industry Customer equity and ETF option average daily volume (''TCADV'') from Customer posted interest in all issues.[6]

Proposed Cap on Available Credit for Professional Customer Volume

The Exchange also proposes to modify the Customer Posting Tiers and the Customer Incentive Program, which programs currently treat Professional Customer interest the same as Customer interest, by placing a limit or cap on the maximum available per contract credit on Professional Customer posted interest.[7]

Specifically, as proposed, the maximum per-contract credit for Professional Customer posted interest would be ($0.49) and ($1.00) in Penny and non-Penny issues, respectively.[8] The proposed per-contract credit limits on Professional Customer posted volume would apply regardless of which Customer Posting Credit Tier an OTP Holder achieves or whether an OTP Holder qualified for an additional credit per the Customer Incentive Program. This proposed change would impact OTP Holders with Professional Customer order flow that have achieved the highest Customer Posting Tiers. Specifically, OTP Holders with Professional Customer order flow that would be impacted by the proposed change includes those that achieve Tier 6 of the Customer Posting Tiers in Penny issues, proposed new Tiers E and F of the Customer Posting Tiers in non-Penny issues, and OTP Holders that qualify for an additional credit per the Customer Incentive Program, if those OTP Holders qualified for Tier 5 or 6 of the Customer Posting Tiers in Penny issues or Tiers E–D of the Customer Posting Tiers in non-Penny issues. Despite capping the per-contract credit on Professional Customers, the Exchange believes that the existing Customer Posting Tiers and Customer Incentive Program would continue to attract order flow, including Professional Customer volume.

The Exchange cannot predict with certainty whether any OTP Holders will avail themselves of new Tier E to the Non-Penny Posting Tiers or be impacted by the proposed limit on per-contract credits for Professional Customer volume under the Customer Posting Tiers or Customer Incentive Program.

2.Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[9] in general, and furthers the objectives of Sections 6(b)(4) and (5) of the Act,[10] in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Proposed Rule Change Is Reasonable

The Exchange operates in a highly competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.''[11]

There are currently 16 registered options exchanges competing for order flow. Based on publicly-available information, and excluding index-based options, no single exchange has more than 16% of the market share of executed volume of multiply-listed equity and ETF options trades.[12] Therefore, currently no exchange possesses significant pricing power in the execution of multiply-listed equity & ETF options order flow. More specifically, in June 2020, the Exchange had slightly over 10% market share of executed volume of multiply-listed equity & ETF options trades.[13]

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow, or discontinue or reduce use of certain categories of products, in response to fee changes. Accordingly, competitive forces constrain options exchange transaction fees. Stated otherwise, changes to exchange transaction fees and rebates can have a direct effect on the ability of an exchange to compete for order flow.

The Exchange believes that proposed new Tier E to the Non-Penny Posting Tiers is reasonable as it is designed to incentivize OTP Holders to (continue to) direct order flow, particularly Customer flow, to the Exchange. An increase in Customer volume would create more

[12] The OCC publishes options and futures volume in a variety of formats, including daily and monthly volume by exchange, *available here: https://www.theocc.com/market-data/volume/default.jsp.*

[13] Based on OCC data, *see id.,* the Exchange's market share in equity-based options was 9.59% for the month of June 2019 and 10.69% for the month of June 2020.

trading opportunities, which, in turn attracts Market-Makers. A resulting increase in Market-Maker activity may facilitate tighter spreads, which may lead to an additional increase of order flow from other market participants, further contributing to a deeper, more liquid market to the benefit of all market participants by creating a more robust and well-balanced market ecosystem. In addition, to the extent that proposed new Tier E attracts more Customer posted interest in non-Penny issues to the Exchange, this increased order flow would continue to make the Exchange a more competitive venue for order execution, which, in turn, promotes just and equitable principles of trade and removes impediments to and perfects the mechanism of a free and open market and a national market system.

The Exchange believes the proposed limit on per contract credit for Professional Customer volume is reasonable as it is consistent with pricing on other options exchanges that likewise offer higher credits/rebates for Customer volume other than Professional Customer volume.[14] In addition, the Exchange believes it is reasonable to continue to offer the highest rebates for Customer volume. Customer volume offers unique benefits to the market by providing more trading opportunities, which attracts market makers to the benefit of all market participants. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding increase in order flow from other market participants. Customer volume is the most sought after liquidity among OTP Holders. With respect to Professional Customers, the Exchange believes that its Customer Posting Tiers and Customer Incentive Program would continue to encourage OTP Holders to post Professional Customer volume to the Exchange despite the new cap on per contract credit, which increased liquidity would promote market depth, price discovery and improvement and enhance order execution opportunities for market participants.

The Proposed Rule Change Is an Equitable Allocation of Credits and Fees

The Exchange believes the proposed rule change is an equitable allocation of its fees and credits. The proposal is based on the amount and type of business transacted on the Exchange and OTP Holders are not obligated to try to achieve new Tier E. Moreover, the proposal is designed to incent OTP Holders to aggregate all Customer posting interest at the Exchange as a primary execution venue. To the extent that the proposed change attracts more Customer posting interest to the Exchange, this increased order flow would continue to make the Exchange a more competitive venue for, among other things, order execution. Thus, the Exchange believes the proposed rule change would improve market quality for all market participants on the Exchange and, as a consequence, attract more order flow to the Exchange thereby improving market-wide quality and price discovery.

The Proposed Rule Change Is not Unfairly Discriminatory

The Exchange believes it is not unfairly discriminatory to modify the Customer posting credits because the proposed modification would be available to all similarly-situated market participants on an equal and non-discriminatory basis.

The proposal is based on the amount and type of business transacted on the Exchange and OTP Holders are not obligated to try to achieve new Tier E, nor are they obligated to execute posted interest, particularly Professional Customer interest. Rather, the proposal is designed to encourage OTP Holders to utilize the Exchange as a primary trading venue for Customer posted interest (if they have not done so previously) or increase volume sent to the Exchange. To the extent that the proposed change attracts more Customer interest, including posted interest, to the Exchange, this increased order flow would continue to make the Exchange a more competitive venue for, among other things, order execution. Thus, the Exchange believes the proposed rule change would improve market quality for all market participants on the Exchange and, as a consequence, attract more order flow to the Exchange thereby improving market-wide quality and price discovery. The resulting increased volume and liquidity would provide more trading opportunities and tighter spreads to all market participants and thus would promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

Regarding the proposed limit of the per contract credit on Professional Customer volume, the Exchange notes that is equitable and not unfairly discriminatory to cap incentives for Professional Customers who, unlike Customers, have access to sophisticated trading systems that contain functionality not available to retail Customers, including continuously updated pricing models based on real-time streaming data, access to multiple markets simultaneously, and order and risk management tools. As such, the Exchange believes placing a cap on the credits available to Professional Customers (while imposing no such cap on Customer flow) is not unfairly discriminatory to these sophisticated actors.

Finally, the Exchange believes that it is subject to significant competitive forces, as described below in the Exchange's statement regarding the burden on competition.

B. Self-Regulatory Organization's Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act, the Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the Exchange believes that the proposed changes would encourage the submission of additional liquidity to a public exchange, thereby promoting market depth, price discovery and transparency and enhancing order execution opportunities for all market participants. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering integrated competition among orders, which promotes ''more efficient pricing of individual stocks for all types of orders, large and small.'' [15]

Intramarket Competition. The proposed new Tier E as well as the cap on available credit for Professional Customer volume is designed to (continue to) attract additional order flow (particularly Customer posted interest) to the Exchange. Customer volume offers unique benefits to the market which benefits all market participants. Customer volume benefits all market participants by providing more trading opportunities, which attracts market makers. An increase in the activity of these market participants in turn facilitates tighter spreads, which may cause an additional corresponding

[14] *See e.g.,* NASDAQ Options Market LLC (''NOM'') Pricing Schedule, Options 7, Section 2, Nasdaq Options Market Fees and Rebates (paying Professionals a $0.48 per contract Rebate to Add Liquidity in Penny Symbols whereas Customers are paid $0.50 per contract; paying Professionals a $0.90 per contract Rebate to Add Liquidity in Non-Penny Symbols whereas Customers are paid $1.00 per contract).

[15] *See* Reg NMS Adopting Release, *supra* note 11, at 37499.

increase in order flow from other market participants. The Exchange believes that the credits available via the Customer Posting Tiers and the Customer Incentive Program—despite the proposed credit cap on Professional Customer volume—would continue to encourage OTP Holders to direct their Professional Customer order flow to the Exchange, as the proposed limit is competitive with rates offers on other options exchanges.[16] Moreover, the Exchange notes that Professional Customers, unlike Customers, have access to sophisticated trading systems that contain functionality not available to Customers and therefore the proposed disparate treatment of Professional Customer volume would not pose an undue burden on competition.

Intermarket Competition. The Exchange operates in a highly competitive market in which market participants can readily favor one of the 16 competing option exchanges if they deem fee levels at a particular venue to be excessive. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and to attract order flow to the Exchange. Based on publicly-available information, and excluding index-based options, no single exchange has more than 16% of the market share of executed volume of multiply-listed equity and ETF options trades.[17] Therefore, currently no exchange possesses significant pricing power in the execution of multiply-listed equity & ETF options order flow. More specifically, in January 2020, the Exchange had slightly more than 10% market share of executed volume of multiply-listed equity & ETF options trades.[18]

The Exchange believes that the proposed rule change reflects this competitive environment because it modifies the Exchange's fees in a manner designed to incent OTP Holders to (continue to) direct trading interest (particularly Customer posted interest) to the Exchange, to provide liquidity and to attract order flow. To the extent that this purpose is achieved, all the Exchange's market participants should benefit from the improved market quality and increased opportunities for price improvement.

The Exchange believes that the proposed change could promote competition between the Exchange and other execution venues, including those that currently offer similar Customer posting credits, by encouraging additional orders to be sent to the Exchange for execution. The Exchange also believes that the proposed change is designed to provide the public and investors with a Fee Schedule that is clear and consistent, thereby reducing burdens on the marketplace and facilitating investor protection.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A) [19] of the Act and subparagraph (f)(2) of Rule 19b–4 [20] thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [21] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–NYSEArca–2020–78 on the subject line.

Paper Comments

- Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NYSEArca–2020–78. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NYSEArca–2020–78 and should be submitted on or before October 5, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[22]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–89776; File No. SR–CboeEDGA–2020–025]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Update Rule 13.4(a), Stating It Will Utilize MIAX PEARL Market Data From the CQSUQDF for Purposes of Order Handling, Routing, Execution, and Related Compliance Processes

September 8, 2020.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on August 25, 2020, Cboe EDGA Exchange, Inc. (the ''Exchange'' or ''EDGA'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGA Exchange, Inc. (''EDGA'' or the ''Exchange'') proposes a rule change to Rule 13.4(a), stating it will utilize MIAX PEARL market data from the CQSUQDF for purposes of order handling, routing, execution, and related compliance processes. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/edga/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update Rule 13.4(a) regarding the public disclosure of the sources of data that the Exchange utilizes when performing: (i) Order handling; (ii) order routing; (iii) order execution; and (iv) related compliance processes to reflect the operation of the MIAX PEARL as an equities exchange.

On August 14, 2020, the Commission approved MIAX PEARL's proposed rule change to establish rules governing the trading of equities securities.[4] MIAX PEARL announced that it plans to launch equities trading on September 25, 2020.[5] The Exchange, therefore, proposes to update Rule 13.4(a) regarding the public disclosure of the sources of data that the Exchange utilizes when performing: (i) Order handling; (ii) order routing; (iii) order execution; and (iv) related compliance processes to reflect the operation of MIAX PEARL as an equities exchange beginning on September 25, 2020. Specifically, the Exchange proposes to amend Rule 13.4(a) to include MIAX PEARL by stating it will utilize MIAX PEARL market data from the Consolidated Quotation System (''CQS'')/UTP Quotation Data Feed (''UQDF'') for purposes of order handling, routing, execution, and related compliance processes. At this stage, no secondary source for MIAX PEARL market data will be used.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[6] in general, and furthers the objectives of Section 6(b)(5) of the Act,[7] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes that its proposal to update Exchange Rule 13.4(a) to include MIAX PEARL will ensure that the Rule correctly identifies and publicly states on a market-by-market basis all of the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, routing, and execution of orders, and for performing the regulatory compliance checks related to each of those functions. The proposed rule changes also remove impediments to and perfects the mechanism of a free and open market and protects investors and the public interest because it provides additional specificity, clarity and transparency.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes its proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes the proposal would enhance competition because including all of the exchanges enhances transparency and enables investors to better assess the quality of the Exchange's execution and routing services.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

(i) Significantly affect the protection of investors or the public interest;

(ii) impose any significant burden on competition; and

(iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [8] and Rule 19b–4(f)(6) thereunder.[9]

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

[4] *See* Securities Exchange Act No. 89562 (August 14, 2020).

[8] 15 U.S.C. 78s(b)(3)(A).

[9] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change,

Continued

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–CboeEDGA–2020–025 on the subject line.

Paper Comments

• Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CboeEDGA–2020–025. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CboeEDGA–2020–025 and should be submitted on or before October 5, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meetings

TIME AND DATE: 2:00 p.m. on Wednesday, September 16, 2020.

PLACE: The meeting will be held via remote means and/or at the Commission's headquarters, 100 F Street NE, Washington, DC 20549.

STATUS: This meeting will be closed to the public.

MATTERS TO BE CONSIDERED: Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters also may be present.

In the event that the time, date, or location of this meeting changes, an announcement of the change, along with the new time, date, and/or place of the meeting will be posted on the Commission's website at *https://www.sec.gov.*

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(3), (5), (6), (7), (8), 9(B) and (10) and 17 CFR 200.402(a)(3), (a)(5), (a)(6), (a)(7), (a)(8), (a)(9)(ii) and (a)(10), permit consideration of the scheduled matters at the closed meeting.

The subject matter of the closed meeting will consist of the following topic:

Institution and settlement of injunctive actions;

Institution and settlement of administrative proceedings;

Resolution of litigation claims; and

Other matters relating to enforcement proceedings.

At times, changes in Commission priorities require alterations in the scheduling of meeting agenda items that may consist of adjudicatory, examination, litigation, or regulatory matters.

CONTACT PERSON FOR MORE INFORMATION: For further information; please contact Vanessa A. Countryman from the Office of the Secretary at (202) 551–5400.

Dated: September 9, 2020.

Vanessa A. Countryman,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–89789; File No. SR–CBOE–2020–081]

Self-Regulatory Organizations; Cboe Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Rule 5.24

September 8, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 31, 2020, Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act[3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe Exchange, Inc. (the ''Exchange'' or ''Cboe Options'') proposes to amend Rule 5.24. The text of the proposed rule change is provided below.

(additions are *italicized;* deletions are [bracketed])

* * * * *

Rules of Cboe Exchange, Inc.

* * * * *

Rule 5.24. Disaster Recovery

(a)—(d) No change.

(e) *Loss of Trading Floor.* If the Exchange trading floor becomes

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

inoperable, the Exchange will continue to operate in a screen-based only environment using a floorless configuration of the System that is operational while the trading floor facility is inoperable. The Exchange will operate using this configuration only until the Exchange's trading floor facility is operational. Open outcry trading will not be available in the event the trading floor becomes inoperable, except in accordance with paragraph (2) below and pursuant to Rule 5.26, as applicable.

(1) *Applicable Rules.* In the event that the trading floor becomes inoperable, trading will be conducted pursuant to all applicable System Rules, except that open outcry Rules will not be in force, including but not limited to the Rules (or applicable portions of the Rules) in Chapter 5, Section G, and as follows (subparagraphs (A) through (E) will be effective until [August 31]N *September 30,* 2020):

* * * * *

The text of the proposed rule change is also available on the Exchange's website (*http://www.cboe.com/AboutCBOE/CBOELegalRegulatoryHome.aspx*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend Rule 5.24 regarding the Exchange's business continuity and disaster recovery plans. Rule 5.24 describes which Trading Permit Holders (''TPHs'') are required to connect to the Exchange's backup systems as well as certain actions the Exchange may take as part of its business continuity plans so that it may maintain fair and orderly markets if unusual circumstances occurred that could impact the Exchange's ability to conduct business. This includes what actions the Exchange would take if its trading floor became inoperable. Specifically, Rule 5.24(e) states if the Exchange trading floor becomes inoperable, the Exchange will continue to operate in a screen-based only environment using a floorless configuration of the System that is operational while the trading floor facility is inoperable. The Exchange would operate using that configuration only until the Exchange's trading floor facility became operational. Open outcry trading would not be available in the event the trading floor becomes inoperable.[5]

Rule 5.24(e)(1) currently states in the event that the trading floor becomes inoperable, trading will be conducted pursuant to all applicable System Rules, except that open outcry Rules would not be in force, including but not limited to the Rules (or applicable portions) in Chapter 5, Section G,[6] and that all non-trading rules of the Exchange would continue to apply. The Exchange recently adopted several rule changes that would apply during a time in which the trading floor in inoperable, which are effective until August 31, 2020.[7] The Exchange believes these rules were necessary to implement to maintain a fair and orderly market while the trading floor was not operable in order to create an all-electronic trading environment similar to the otherwise unavailable open outcry trading environment.

As of March 16, 2020, the Exchange suspended open outcry trading to help prevent the spread of COVID–19.[8] The trading floor remained closed until June 15, 2020. During the time when the trading floor was closed, the Exchange operated in an all-electronic trading environment and the temporary rules in Rule 5.24(e)(1) applied to that electronic trading environment. The Exchange believes that, while those temporary rules did not fully replicate open outcry trading, they allowed all-electronic trading to occur more similarly to open outcry trading.[9]

The trading floor is currently open for open outcry trading, and the Exchange is operating pursuant to its normal hybrid trading rules. The Exchange implemented numerous health and safety measures in connection with the reopening of the trading floor on June 15, 2020 to help protect the safety and welfare of the trading floor community and help prevent the continued spread of COVID–19.[10] However, the Exchange recognizes the ongoing nature of the COVID–19 pandemic in the United States, which may cause the Exchange to once again close its trading floor.

In the event the Exchange did close its trading floor again, the Exchange believes it would be necessary to again apply the recently adopted temporary rules in Rule 5.24(e)(1) to maintain a fair and orderly market while the trading floor was not operable in order to create

[5] Pursuant to Rule 5.26, the Exchange may enter into a back-up trading arrangement with another exchange, which could allow the Exchange to use the facilities of a back-up exchange to conduct trading of certain of its products. The Exchange currently has no back-up trading arrangement in place with another exchange.

[6] Chapter 5, Section G of the Exchange's rulebook sets forth the rules and procedures for manual order handling and open outcry trading on the Exchange.

[7] *See* Securities Exchange Act Release Nos. 88386 (March 13, 2020), 85 FR 15823 (March 19, 2020) (SR–CBOE–2020–019); 88447 (March 20, 2020), 85 FR 17129 (March 26, 2020) (SR–CBOE–2020–023); 88490 (March 26, 2020), 85 FR 18318 (April 1, 2020) (SR–CBOE–2020–026); 88530 (March 31, 2020), 85 FR 19182 (April 6, 2020) (SR–CBOE–2020–031); 88886 (May 15, 2020), 85 FR 31008 (May 21, 2020) (SR–CBOE–2020–047); and 89307 (July 14, 2020), 85 FR 43938 (July 20, 2020) (SR–CBOE–2020–066).

[8] On March 11, 2020, the World Health Organization characterized COVID–19 as a pandemic and to slow the spread of the disease, federal and state officials implemented social-distancing measures, placed significant limitations on large gatherings, limited travel, and closed non-essential businesses.

[9] The Exchange continues to consider other enhancements to the all-electronic trading configuration that it believes may permit this configuration to further replicate the open outcry trading environment. The Exchange would submit separate rule filings for any such proposed enhancements. The Exchange notes it recently submitted a separate rule filing to adopt a virtual trading floor, which the Exchange may determine to make available if the trading floor becomes inoperable. *See* Securities Exchange Act Release No. 89131 (June 23, 2020), 85 FR 38951 (June 29, 2020) (SR–CBOE–2020–055). If the Commission approves that filing, and the trading floor subsequently becomes inoperable and the Exchange makes the virtual trading floor available, the temporary rules in Rule 5.24(e)(1) would not be in effect (the Exchange submitted partial Amendment No. 1 to SR–CBOE–2020–055 to make that clear). Separately, the Exchange believes the temporary rules in Rule 5.24(e)(1) should be effective for a period of time while the virtual trading floor is available, the Exchange will submit a separately rule filing to propose that change.

[10] *See* Exchange Notice C2020052601, *Standards of Conduct related to the Reopening of the Cboe Options Trading Floor and COVID–19* (May 26, 2020), *available at https://cdn.cboe.com/resources/release_notes/2020/Standards-of-Conduct-related-to-the-Reopening-of-the-Cboe-Options-Trading-Floor-Notice-Final.pdf.*

an all-electronic trading environment similar to the otherwise unavailable open outcry trading environment. As noted above, Rule 5.24(e)(1) is effective only until August 31, 2020 (and the rules became inapplicable upon the reopening of the trading floor on June 15, 2020). Given the Exchange may believe it is appropriate to close the trading floor with little advanced notice and in a short timeframe to help protect the safety and welfare of the trading floor community, the Exchange proposes to extend the effectiveness of the temporary rules in Rule 5.24(e)(1) to September 30, 2020 (unless further extended). The Exchange believes this will permit the Exchange to as seamlessly as possible transition back to an all-electronic trading environment. The Exchange notes Rule 5.24(e)(1) will not apply to trading during times when the trading floor remains operable.

Previously when the temporary provisions of Rule 5.24(e)(1) were in place, the Exchange's Regulatory Division has continued its standard routine surveillance reviews for electronic trading and implemented a regulatory plan to surveil the rules in place in Rule 5.24(e)(1) when operating in a screen-based only environment. In the event the Exchange closes its trading floor again and the temporary provisions in Rule 5.24(e)(1) become applicable in an all-electronic trading environment, the Exchange's Regulatory Division would reimplement that regulatory plan to surveil those rules.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the Securities Exchange Act of 1934 (the ''Act'') and the rules and regulations thereunder applicable to the Exchange and, in particular, the requirements of Section 6(b) of the Act.[11] Specifically, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [12] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5) [13] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

In particular, the Exchange believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, protect investors and the public interest by permitting the Exchange to as seamlessly as possible transition back to an all-electronic trading environment in the event the Exchange determines it is appropriate to again close its trading floor. The Exchange expects it would take this action if it believes necessary and appropriate to help protect the safety and welfare of the trading community. Such a determination may occur with little advance notice, and closure of the trading floor may need to occur in a short time frame. The Exchange continues to believe the recent amendments to Rule 5.24(e)(1) allowed all-electronic trading to occur more similarly to open outcry trading while the trading floor was closed. The Exchange believes the proposed rule change is necessary and appropriate to provide TPHs with execution opportunities in an all-electronic trading environment for orders that generally execute in open outcry trading. Additionally, the proposed rule change will provide TPHs with an all-electronic trading environment to which they became accustomed when the trading floor was previously closed, and therefore will provide investors with consistent rules that apply when the Exchange operates in an all-electronic environment. The proposed rule change will provide investors with definitive knowledge of what rules will apply when the trading floor is closed.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not intended as a competitive filing, but rather extends the effectiveness of temporary rules as part of the Exchange's business continuity plans, which are intended to allow the Exchange to continue to maintain fair and orderly markets while the Exchange's trading floor continues to be inoperable.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [14] and Rule 19b–4(f)(6) thereunder.[15]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act [16] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii) [17] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay so that the proposed rule change may become operative immediately. The Exchange believes extension of the temporary rules put in place due to the ongoing COVID–19 pandemic will permit the Exchange to minimize disruptions in the market during a transition back to an all-electronic trading environment if the Exchange believes it is necessary and appropriate to help protect the safety and welfare of the trading community. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest as it will allow the temporary rules to continue with minimal interruption, thereby avoiding investor confusion that could result from an interruption in the effectiveness of the rules. Accordingly, the Commission hereby waives the operative delay and designates the

[12] 15 U.S.C. 78f(b)(5).

[13] *Id.*

[14] 15 U.S.C. 78s(b)(3)(A).

[15] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Commission has waived the five business day notification requirement for this proposed rule change.

[16] 17 CFR 240.19b–4(f)(6).

[17] 17 CFR 240.19b–4(f)(6)(iii).

proposed rule change operative upon filing.[18]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–CBOE–2020–081 on the subject line.

Paper Comment:

• Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CBOE–2020–081. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CBOE–2020–081 and should be submitted on or before October 5, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[19]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–89782; File No. SR–Phlx–2020–42]

Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 3304

September 8, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act'')[1], and Rule 19b–4 thereunder,[2] notice is hereby given that on August 27, 2020, Nasdaq PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 3304 (Data Feeds Utilized) to add the Long-Term Stock Exchange, Inc. (''LTSE''), MIAX PEARL, LLC (''MIAX PEARL'') and MEMX LLC (''MEMX'') to the list of market centers under Rule 3304 and provide that the Exchange will utilize CQS/UQDF.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/phlx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In anticipation of their planned launches[3] the Exchange proposes to amend the table in Rule 3304 to include LTSE, MIAX Pearl and MEMX. The Exchange will use securities information processor (''SIP'') data, *i.e.,* CQS SIP data, for securities reported under the Consolidated Quotation System and Consolidated Quotation Plan and UQDF SIP data for securities reported under the Nasdaq Unlisted Trading Privileges Plan to obtain LTSE, MIAX Pearl and MEMX quotation information for the handling, routing and execution of orders, as well as for the regulatory compliance processes related to those functions. At this stage, no secondary source for LTSE, MIAX Pearl or MEMX will be used.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5) of the Act,[5] in particular, in that it is designed to promote just and equitable principles of

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] LTSE plans to begin phase-in production of securities on August, 28, 2020. *See* LTSE Market Announcement available at, *https://assets.ctfassets.net/cchj2z2dcfyd/rnGvgggJUplaIk6N1xNA7/41926d3925a177d6455868090c46aeda/MA-2020-020__Production_Securities_Launching_August_28_-_Google_Docs.pdf.* MIAX Pearl Equities will begin trading in September 2020, pending SEC approval. *See* MIAX Pearl Alerts available at, *https://www.miaxoptions.com/alerts/2020/02/14/miax-pearl-equities-exchange-codes-and-important-dates-regarding-launch-new.* MEMX is expected to launch on September 4, 2020. *See* MEMX Update from Jonathan Kellner, dated June 11, 2020, available at *https://memx.com/memx-update/.*

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market because adding LTSE, MIAX Pearl and MEMX because updating its list of market centers for which the Exchange consumes quotation data will provide clarity to market participants. Moreover, it is necessary and consistent with the public interest and the protection of investors to update the Exchange's table of market centers in order to provide transparency with respect to all the direct proprietary and network processor feeds from which the Exchange obtains market data. Additionally, a similar change has been proposed by other exchanges.[6]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issue; instead, its purpose is to enhance transparency with respect to the operation of the Exchange and its use of market data feeds.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[7] and Rule 19b–4(f)(6) thereunder.[8]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act[9] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii)[10] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay. Waiver of the operative delay would allow the Exchange to disclose the updated list of market centers for which the Exchange consumes quotation data, and the source of the quotation data, at the time that LTSE, MIAX Pearl, and MEMX become operational. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[11]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2020–42 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2020–42. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2020–42 and should be submitted on or before October 5, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

J. Matthew DeLesDernier,

Assistant Secretary.

[12] 17 CFR 200.30–3(a)(12).

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–89781; File No. SR–NASDAQ–2020–059]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Equity 7, Section 114(e) and Equity 7, Section 118 of the Fee Schedule

September 8, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 31, 2020, The Nasdaq Stock Market LLC (''Nasdaq'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to (i) amend the Exchange's transaction fees to adjust the qualification requirements for certain Qualified Market Maker (''QMM'') fees and rebates at Equity 7, Section 114(e); and (ii) establish new credits and fee tiers and amend the qualification requirements for existing credit tiers at Equity 7, Section 118, as described further below.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/nasdaq/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

Over the course of the last few months, the Exchange has experimented with various modifications of its pricing schedule with the aim of increasing activity on the Exchange, improving market quality, and increasing market share.[3] Although these changes have met with success, the Exchange continues to examine and amend its pricing schedule to achieve the results it desires. Accordingly, the Exchange proposes to make modifications to its pricing schedule in a further attempt to improve the attractiveness of the market to new and existing market participants.

Changes to Section 114

The Exchange proposes to amend the QMM fees and credits pursuant to Equity 7, Section 114, in two respects.

First, a QMM currently qualifies for the Tier 3 credit if the QMM (i) executes shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent above 1.25% of Consolidated Volume[4] during the month; (ii) quotes at the NBBO at least 25% of the time during the month during regular market hours in an average of at least 2,700 symbols per day; (iii) quotes at the NBBO at least 25% of the time during the month during regular market hours in an average of at least 1,200 symbols in securities in Tape A per day; and (iv) executes shares of liquidity provided in securities in Tape A through one or more of its Nasdaq Market Center MPIDs that represent an increase of at least 0.50% of Consolidated Volume relative to May 2020. The Exchange proposes to offer the rebate per MPID by amending the requirements to provide a credit when a QMM's MPID meets the qualifying criteria. The proposed amendment would remove the current Tier 3 rebate[5] and instead provide an additional $0.00005 per share executed credit for a QMM's MPID if the MPID (i) executes shares of liquidity provided that represents above 1.25% of Consolidated Volume during the month; (ii) quotes at the NBBO at least 50% of the time during the month during regular market hours in an average of at least 2,700 symbols per day; (iii) quotes at the NBBO at least 50% of the time during the month during regular market hours in an average of at least 1,200 symbols in securities in Tape A per day; and (iv) executes shares of liquidity provided that represents an increase of at least 0.50% of Consolidated Volume relative to May 2020. Additionally, the Exchange is proposing clarifying language to explain that, for purposes of this rebate, an MPID is considered to be quoting at the NBBO if the MPID has a displayed order (other than a Designated Retail Order) at either the national best bid or the national best offer or both the national best bid and offer. On a daily basis, the Exchange will determine the number of securities that satisfy the 50% NBBO requirements for the MPID. The QMM would be eligible for the proposed credit in addition to qualifying for the Tier 2 credit. By amending the credit to allow a QMM to qualify at the MPID level, the Exchange intends to provide a further incentive for members to increase their activity on the Exchange that is attributable to adding liquidity and quoting at the NBBO.

Second, the Exchange currently charges a QMM a fee of $0.00295 per share executed for orders in securities listed on exchanges other than Nasdaq priced at $1 or more per share that access liquidity on the Nasdaq Market Center; provided, however, that the QMM's volume of liquidity added through one or more of its Nasdaq Market Center MPIDs during the month (as a percentage of Consolidated Volume) is not less than 0.85%. The Exchange also charges a $0.0029 per share executed fee to QMMs that meet the criteria of Tier 2 or Tier 3 for orders in securities listed on exchanges other than Nasdaq priced at $1 or more per share that access liquidity on the Nasdaq Market Center if the QMM has a combined Consolidated Volume (adding and removing liquidity) of at least 3.7% and MOC/LOC volume greater than 0.25% of Consolidated Volume. The Exchange proposes to modify the requirements for charging a QMM a fee of $0.00295 per share

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release Nos. 89343 (July 20, 2020), 85 FR 44941 (July 24, 2020) (SR–Nasdaq–2020–041); 89115 (June 22, 2020), 85 FR 38414 (June 26, 2020) (SR–Nasdaq–2020–030); 87882 (January 2, 2020); 85 FR 939 (January 8, 2020) (SR–Nasdaq–2019–101); 87708 (December 10, 2019), 84 FR 68496 (December 16, 2019) (Nasdaq–2019–094); 85861 (May 15, 2019) 84 FR 23105 (May 21, 2019) (Nasdaq–2019–036).

[4] Pursuant to Equity 7, Section 118(a), the term ''Consolidated Volume'' means the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of a member's trading activity the date of the annual reconstitution of the Russell Investments Indexes is excluded from both total Consolidated Volume and the member's trading activity.

[5] The Exchange is also proposing to remove the asterisk accompanying the current Tier 3 rebate.

executed by increasing the volume of liquidity added from 0.85% to 1.00% during the month (as a percentage of Consolidated Volume). Additionally, the Exchange proposes to modify the requirements for charging a fee of $0.0029 per share executed to a QMM that meets the criteria of Tier 2 by increasing the required MOC/LOC volume from 0.25% to 0.35% of Consolidated Volume, and introducing a new requirement of providing 0.15% or more of Consolidated Volume through midpoint orders. The Exchange also proposes to remove the reference to Tier 3 and make a technical modification by changing the 3.7% qualification requirement for the $0.0029 fee to 3.70%. By modifying the requirements for members to qualify for the lower fee, the Exchange will incentivize members to increase their liquidity, which will promote price discovery and transparency.

Changes to Section 118

The Exchange is also proposing to amend the schedule of fees and credits provided to member organizations, pursuant to Equity 7, Section 118(a), in several respects and amend the Tier A closing cross fees, pursuant to Section 118(d).

First, the Exchange proposes to amend Section 118(a) to charge a fee of $0.0020 to a member entering RTFY orders that remove liquidity from Nasdaq Market Center or that execute in a venue other than the Nasdaq Market Center and has less than a 75% ratio of its RTFY liquidity adding activity to its RTFY total volume. The proposed fee would be applicable to Tape A, Tape B and Tape C and would only apply to orders submitted with the RTFY [6] routing option. By proposing a new fee for participants that have less than a 75% ratio [7] of its RTFY liquidity adding activity to its RTFY total volume, the Exchange hopes to incentivize participants to increase their RTFY liquidity adding activity rather than removing liquidity or submitting orders that route outside of the Exchange. The Exchange also proposes to make a non-substantive change to add the word ''other'' to the RTFY fees that remain at $0.0000 per share executed.

Second, the Exchange proposes to lower the $0.0030 per share executed credit in Section 118(a) to $0.0029 per share executed for a member with shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent 0.625% or more of Consolidated Volume during the month, including shares of liquidity provided with respect to securities that are listed on exchanges other than Nasdaq or NYSE that represent 0.15% or more of Consolidated Volume. The proposed change would be applicable to Tape A, Tape B and Tape C. Although the Exchange is lowering the credit, it is providing members with three additional new credit options as discussed below.

Third, the Exchange proposes to add three new credits in Section 118(a). The Exchange proposes to adopt a credit of $0.00295 per share executed across Tapes A, B and C to a member (i) with shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent 0.70% or more of Consolidated Volume during the month; (ii) executes 0.20% or more of Consolidated Volume during the month through providing midpoint orders and through MELO; and (iii) removes at least 1.10% of Consolidated Volume during the month. The Exchange also proposes to adopt a credit of $0.0030 per share executed across Tapes A, B and C to a member with shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent 1.30% or more of Consolidated Volume during the month, which includes shares of liquidity provided with respect to securities that are listed on exchanges other than Nasdaq or NYSE that represent 0.40% or more of Consolidated Volume. The Exchange also proposes to add a $0.00075 per share executed credit for Tape C securities for certain non-displayed orders that provide liquidity if the member, during the month (i) provides 0.90% or more of Consolidated Volume; (ii) increases providing liquidity through non-displayed orders (other than midpoint orders) by 10% or more relative to the member's July 2020 Consolidated Volume provided through non-displayed orders (other than midpoint orders) and; (iii) provides 0.20% or more Consolidated Volume through non-displayed orders (other than midpoint orders). The Exchange believes that the availability of the three new credits will incentivize members to increase their liquidity adding and removing activity on the Exchange in order to attain one of the new credits. An increase in liquidity adding and removing activity on the Exchange would help to improve the quality of the market for all participants.

Fourth, the Exchange currently provides a credit of $0.0030 per share executed in Section 118(a) to a member with shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent more than 0.75% of Consolidated Volume during the month and provides a daily average of at least 5 million shares of non-displayed liquidity. The Exchange proposes to amend the qualifications by increasing the volume threshold from 0.75% to 1.00%. The Exchange also proposes to remove the requirement for providing a daily average of at least 5 million shares of non-displayed liquidity and to add a requirement that a member's non-displayed liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs represents more than 0.25% of Consolidated Volume.

Lastly, the Exchange currently charges a Tier A fee of $0.0008 per executed share in Section 118(d) for Market-on-Close and Limit-on-Close (''MOC/LOC'') orders for members with shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent above 1.80% of Consolidated Volume or MOC/LOC volume above 0.50% of Consolidated Volume. Additionally, the Exchange currently charges a Tier B fee of $0.0011 per executed share in Section 118(d) for MOC and LOC orders for members with shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent above 0.80% to 1.80% of Consolidated Volume or MOC/LOC volume above 0.30% to 0.50% of Consolidated Volume. The Exchange proposes to lower the volume threshold from 1.80% to 1.75% for Tier A and proposes to make a conforming change for Tier B. Similarly to lowering the volume threshold for credits, by lowering the volume threshold from 1.80% to 1.75%for charging the fee, the Exchange hopes to incentivize members who are close to, but currently do not meet the 1.75% threshold to increase their liquidity in order to qualify for the lower fee.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b)

[6] RTFY is a routing option available for an order that qualifies as a Designated Retail Order under which orders check the System for available shares only if so instructed by the entering firm and are thereafter routed to destinations on the System routing table. If shares remain unexecuted after routing, they are posted to the book. Once on the book, should the order subsequently be locked or crossed by another market center, the System will not route the order to the locking or crossing market center. RTFY is designed to allow orders to participate in the opening, reopening and closing process of the primary listing market for a security. *See* Rule 4748(a)(1)(v)(b).

[7] The ratio is calculated by dividing the participant's RTFY liquidity adding activity on Nasdaq by the participant's total RTFY volume executed on all venues.

of the Act,[8] in general, and furthers the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,[9] in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The proposal is also consistent with Section 11A of the Act relating to the establishment of the national market system for securities.

The Proposal Is Reasonable

The Exchange's proposed changes to its schedule of fees and credits are reasonable in several respects. As a threshold matter, the Exchange is subject to significant competitive forces in the market for equity securities transaction services that constrain its pricing determinations in that market. The fact that this market is competitive has long been recognized by the courts. In *NetCoalition* v. *Securities and Exchange Commission,* the D.C. Circuit stated as follows: ''[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . .'' [10]

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system ''has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.'' [11]

Numerous indicia demonstrate the competitive nature of this market. For example, clear substitutes to the Exchange exist in the market for equity security transaction services. The Exchange is only one of several equity venues to which market participants may direct their order flow. Competing equity exchanges offer similar tiered pricing structures to that of the Exchange, including schedules of rebates and fees that apply based upon members achieving certain volume thresholds. [12]

Within this environment, market participants can freely and often do shift their order flow among the Exchange and competing venues in response to changes in their respective pricing schedules. As such, the proposal represents a reasonable attempt by the Exchange to increase its liquidity and market share relative to its competitors.

The Exchange has designed its proposed schedule of credits and charges to provide increased overall incentives to members to increase their liquidity removal and adding activity on the Exchange. An increase in liquidity removal and adding activity on the Exchange will, in turn, improve the quality of the Nasdaq market and increase its attractiveness to existing and prospective participants. Generally, the proposed new credits and charges will be comparable to, if not favorable to, those that its competitors provide.[13]

Moreover, the Exchange believes that it is reasonable to modify certain fees and credits within its fee schedule as a means of incentivizing market participants to increase their contributions to the improvement of the quality of the Exchange.

In particular, the Exchange believes that it is reasonable to create a stricter qualification for the additional rebate of $0.00005 per share executed for a QMM and to apply the qualifications to each MPID because the activity of QMMs that currently qualify for the Tier 3 credit has grown, such that an increase in credit qualifying criteria is needed to ensure that this credit remains relevant to current levels of liquidity providing activity on the Exchange and continues to incentivize QMMs to provide liquidity and quote at the NBBO in more securities. To the extent that this proposal results in an increase in liquidity adding and quoting activity on the Exchange, this will improve the quality of the Nasdaq market and increase its attractiveness to existing and prospective participants.

Additionally, the Exchange believes it is reasonable to increase the volume threshold for the QMM fees. By increasing the volume threshold and adding a new threshold requirement for liquidity adding activity to qualify for the lower fee, the Exchange hopes to incentivize liquidity adding activity on the Exchange.

The Exchange also believes that it is reasonable to charge a fee of $0.0020 per share executed in Section 118(a) to a member entering RTFY orders that remove liquidity from Nasdaq Market Center or that execute on a venue other than the Nasdaq Market Center and has less than a 75% ratio of its RTFY liquidity adding activity to its RTFY total volume. Since the inception of the RTFY routing option, there has been no charge to participants entering RTFY orders even if the order ultimately executes on the Exchange.[14] Retail order flow firms benefit from the RTFY routing option by not incurring liquidity removal fees while obtaining potential price improvements and better execution quality. By proposing a new fee for participants that have less than a 75% ratio of its RTFY liquidity adding activity to its RTFY total volume, the Exchange hopes to incentivize participants to increase their RTFY liquidity adding activity rather than removing liquidity or submitting orders that route outside of the Exchange.

The Exchange believes that it is reasonable to lower the $0.0030 per share executed credit in Section 118(a) to $0.0029 per share executed because the Exchange is proposing three new credit options for members to qualify for.

Moreover, the Exchange believes it is reasonable to add three new credits to Section 118(a). The Exchange believes that the availability of the three new credits will incentivize members to increase their liquidity adding and removing activity on the Exchange in order to attain one of the new credits. An increase in liquidity adding and removing activity on the Exchange would help to improve the quality of the market for all participants.

Additionally, the Exchange believes that it is reasonable to modify the Section 118(a) requirements for the credit of $0.0030 per share executed by increasing the volume threshold from 0.75% to 1.00% and removing the requirement for providing a daily average of at least 5 million shares of non-displayed liquidity and adding a requirement that a member's non-

[12] As an example, CBOE EDGX provides a standard rebate for liquidity adders of $0.00170 per share executed (or between $0.0020 and $0.0029) per share executed if a member qualifies for a volume tier.

[13] *Id.*

[14] *See* Securities Exchange Act Release No. 75987 (September 25, 2015), 80 FR 59210 (October 1, 2015) (SR–Nasdaq–2015–112).

displayed liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs represents more than 0.25% of Consolidated Volume. By increasing the volume threshold for displayed liquidity and changing the requirement for the shares of non-displayed liquidity, the Exchange believes it will incentivize members to increase the extent of their liquidity adding activity on the Exchange to qualify for and to continue to qualify for this credit.

Similarly to lowering the volume threshold for credits, the Exchange believes that it is reasonable to lower the volume threshold in Section 118(d) for MOC and LOC fees from 1.80% to 1.75% for Tiers A and B because the Exchange hopes to incentivize members who are close to, but currently do not meet the 1.75% threshold to increase their liquidity in order to qualify for the lower fee.

To the extent that these proposed changes lead to an increase in overall liquidity activity on the Exchange and more competitive pricing, this will improve the quality of the Exchange's market and increase its attractiveness to existing and prospective participants. The Exchange notes that those market participants that are dissatisfied with the new fees or credits are free to shift their order flow to competing venues that offer them lower charges or higher credits.

The Proposal Is an Equitable Allocation of Credits

The Exchange believes its proposal will allocate its credits and fees fairly among its market participants. The proposal will amend the $0.00005 per share executed credit for QMMs in Section 114 to allow a QMM to qualify at the MPID level. It is equitable to make the qualification requirement in Section 114 stricter for the additional rebate of $0.00005 per share executed for QMMs as a means of ensuring the credit remains relevant to current levels of liquidity providing activity on the Exchange. By amending the credit to allow a QMM to qualify at the MPID level, the Exchange intends to provide a further incentive for members to increase their activity on the Exchange that is attributable to adding liquidity and quoting at the NBBO. An increase in liquidity providing activity on the Exchange will improve the quality of the Nasdaq market and increase its attractiveness to existing and prospective participants.

Furthermore, the Exchange also believes that it is equitable to establish three new credits in Section 118(a). In particular, the Exchange believes that it is equitable to establish a new $0.00295 per share executed credit in Tapes A, B and C and a new $0.0030 per share executed credit in Tapes A, B and C as a means of incentivizing members to provide and remove meaningful amounts of liquidity to the Exchange. To the extent that the Exchange succeeds in increasing liquidity adding and removal activity on the Exchange and in attracting additional order flow, then the Exchange would experience improvements in its market quality, which would benefit all market participants. Further, the Exchange believes it is equitable to lower the $0.0030 per share executed credit to $0.0029 because the Exchange has added two new credits with the Exchange's goal to promote increased liquidity. An increase in overall liquidity adding activity on the Exchange will improve the quality of the Nasdaq market and increase its attractiveness to existing and prospective participants.

Lastly, the Exchange believes it is equitable to provide a $0.00075 per share executed credit for other non-displayed orders in Tape C securities. The Exchange believes it is equitable for the Exchange to propose a credit for members with non-displayed orders in securities in Tapes C due to the Exchange's goal to specifically promote increased liquidity in securities in Tape C. Additionally, the Exchange has not seen the level of volume in Tape C that it has expected. An increase in overall liquidity adding activity on the Exchange will improve the quality of the Nasdaq market and increase its attractiveness to existing and prospective participants.

The Proposal Is an Equitable Allocation of Fees

The Exchange believes its proposal will allocate its fees fairly among its market participants. It is equitable to modify the fees to members who execute MOC and LOC orders in the closing cross in Section 118(d) and the fees to members whose RTFY orders remove liquidity or are routed out of the Exchange.

In particular, the Exchange believes it is equitable for the Exchange to charge a fee of $0.0020 to a member entering RTFY orders that remove liquidity from Nasdaq Market Center or that execute in a venue other than the Nasdaq Market Center and has less than a 75% ratio of its RTFY liquidity adding activity to its RTFY total volume. By adding this fee, the Exchange hopes to incentivize participants to increase their RTFY liquidity adding activity rather than removing liquidity or submitting orders that route outside of the Exchange. Additionally, the Exchange believes that the fee will encourage market participants to increase their liquidity adding activity.

Additionally, it is equitable for the Exchange to lower the volume threshold for obtaining the $0.0008 per executed share fee for MOC and LOC orders by incentivizing members to increase their liquidity in order to qualify for the lowest closing cross fee offered by the exchange.

Furthermore, it is equitable for the Exchange to increase the volume threshold and add a new threshold requirement for QMM liquidity adding activity to qualify for the lower fees because increasing the volume threshold, the Exchange hopes to incentivize liquidity adding activity on the Exchange.

The Proposed Amended Credits Are Not Unfairly Discriminatory

The Exchange believes that the proposal is not unfairly discriminatory. As an initial matter, the Exchange believes that nothing about its volume-based tiered pricing model is inherently unfair; instead, it is a rational pricing model that is well-established and ubiquitous in today's economy among firms in various industries—from co-branded credit cards to grocery stores to cellular telephone data plans—that use it to reward the loyalty of their best customers that provide high levels of business activity and incent other customers to increase the extent of their business activity. It is also a pricing model that the Exchange and its competitors have long employed with the assent of the Commission. It is fair because it incentivizes customer activity that increases liquidity, enhances price discovery, and improves the overall quality of the equity markets.

Although Section 114(e) of the Exchange's proposal to allow a QMM to qualify for an additional $0.00005 per share executed credit will require that a QMM meet the criteria at the MPID level, any resulting increase in liquidity on the Exchange will improve market-wide quality and price discovery, to the benefit of all participants. Moreover, to the extent that the proposal causes members to increase the extent of their liquidity adding and quoting activity on the Exchange, the Exchange market quality will improve, and all market participants will benefit. Moreover, any market participant that does not wish to receive lower a credit is free to shift its order flow to a competing venue.

The Exchange also believes that its three proposed new credits in Section 118(a) are not unfairly discriminatory.

These proposed credits stand to improve the overall market quality of the Exchange, to the benefit of all market participants, by incentivizing members to provide meaningful amounts of liquidity to the Exchange, including in securities in Tape C. Additionally, it is not unfairly discriminatory to target the $0.00075 per share executed credit in Tape C, in part, to increase activity in other non-displayed orders, because attracting additional order flow stands to benefit all market participants. Likewise, it is not unfairly discriminatory to target the $0.00075 per share executed credit, in part, to liquidity adding activity in securities in Tape C, because the Exchange believes that the market for such securities would benefit from additional liquidity. As discussed above the Exchange has not seen the level of volume in Tape C that it has expected. The Exchange notes that it has limited funds to apply in the form of incentives, and thus must deploy those limited funds to incentives that it believes will be the most effective at improving market quality in areas that the Exchange determines are in need of improvement.

The Proposed Amended Fees Are Not Unfairly Discriminatory

The Exchange believes that the proposal is not unfairly discriminatory. Nasdaq currently charges a QMM a fee of $0.0030 per share executed for orders in Nasdaq-listed securities priced at $1 or more per share that access liquidity on the Nasdaq Market Center. The Exchange currently charges a QMM a fee of $0.00295 per share and $0.0029 per share if the QMM meets certain volume thresholds. It is not unfairly discriminatory for the Exchange to increase the volume thresholds for these fees and and to add a new volume thresholds for the $0.0029 per share fee because an increase in overall liquidity adding activity on the Exchange will improve the quality of the Nasdaq market and increase its attractiveness to existing and prospective market participants.

The Exchange does not believe that it is discriminatory to charge a fee of $0.0020 to a member entering RTFY orders that remove liquidity Nasdaq Market Center or that execute in a venue other than the Nasdaq Market Center and has less than a 75% ratio of its RTFY liquidity adding activity to its RTFY total volume. The Exchange is proposing to add the fee to Tapes A, B and C. By adding this fee related to RTFY volume, the Exchange hopes to incentivize participants to increase their RTFY liquidity adding activity rather than removing liquidity or submitting orders that route outside of the Exchange. Similarly, the Exchange does not believe it is discriminatory to lower the volume threshold for obtaining the $0.0008 per executed share fee for MOC and LOC orders because it will incentivize members to increase their liquidity adding activity in order to obtain the lower fee, which enhances price discovery, and improves the overall quality of the equity markets.

Moreover, any market participant that does not wish to pay higher charges is free to shift its order flow to a competing venue.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The Exchange does not believe that its proposals will place any category of Exchange participant at a competitive disadvantage. To the contrary, the proposed changes will provide opportunities for members to receive new and amended credits or lower fees based on their market-improving behavior. Any member may elect to provide the levels of market activity required in order to receive the new or amended credits or lower fees. Furthermore, all members of the Exchange will benefit from any increase in market activity that the proposals effectuates.

Moreover, members are free to trade on other venues to the extent they believe that the credits provided are too low or the qualification criteria are not attractive. As one can observe by looking at any market share chart, price competition between exchanges is fierce, with liquidity and market share moving freely between exchanges in reaction to fee and credit changes. The Exchange notes that the tier structure is consistent with broker-dealer fee practices as well as the other industries, as described above.

Intermarket Competition

The Exchange believes that its proposed modification to its schedule of credits will not impose a burden on competition because the Exchange's execution services are completely voluntary and subject to extensive competition both from the other 12 live exchanges and from off-exchange venues, which include 34 alternative trading systems. The Exchange notes that it operates in a highly competitive market in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees and credits to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee and credit changes in this market may impose any burden on competition is extremely limited.

The proposed amended fees and credits are reflective of this competition because, even as one of the largest U.S. equities exchanges by volume, the Exchange has less than 18% market share, which in most markets could hardly be categorized as having enough market power to burden competition. Moreover, as noted above, price competition between exchanges is fierce, with liquidity and market share moving freely between exchanges in reaction to fee and credit changes. This is in addition to free flow of order flow to and among off-exchange venues which comprised more than 43% of industry volume for the month of July 2020.

The Exchange's proposals are pro-competitive in that the Exchange intends for them to increase liquidity on the Exchange and thereby render the Exchange a more attractive and vibrant venue to market participants.

In sum, if the changes proposed herein are unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that the proposed changes will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Pursuant to Section 19(b)(3)(A)(ii) of the Act,[15] the Exchange has designated this proposal as establishing or changing a due, fee, or other charge imposed by the self-regulatory organization on any person, whether or not the person is a member of the self-regulatory organization, which renders the proposed rule change effective upon filing.

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–NASDAQ–2020–059 on the subject line.

Paper Comments

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–NASDAQ–2020–059. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–NASDAQ–2020–059 and should be submitted on or before October 5, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[16]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–89786; File No. SR–MIAX–2020–30]

Self-Regulatory Organizations; Miami International Securities Exchange, LLC; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Adopt Exchange Rule 1326, Transfer of Positions

September 8, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (the ''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on September 4, 2020, Miami International Securities Exchange, LLC (''MIAX'' or the ''Exchange'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Exchange filed the proposal as a ''non-controversial'' proposed rule change pursuant to Section 19(b)(3)(A)(iii) of the Act [3] and Rule 19b–4(f)(6) thereunder.[4] The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing a proposal to adopt new Exchange Rule 1326, Transfer of Positions.

The text of the proposed rule change is available on the Exchange's website at *http://www.miaxoptions.com/rule-filings/* at MIAX's principal office, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. *Purpose*

The Exchange proposes to adopt new Exchange Rule 1326, Transfer of Positions, to provide a process by which Members [5] may transfer option positions in limited circumstances. This proposed rule specifies the specific limited circumstances under which a Member may effect transfers of positions. This rule would permit market participants to move positions from one account to another without first exposure of the transaction on the Exchange. This rule would permit transfers upon the occurrence of significant, non-recurring events. The proposed rule change is similar to Nasdaq ISE Options 6, Section 5.

Currently, the rules of the Exchange do not specifically address transfers of option positions between accounts, individuals, or entities. The Exchange, however, plans on aligning its Rule with its competitors by allowing transfers in situations similar to those permitted on other exchanges. The proposed rule will

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] 15 U.S.C. 78s(b)(3)(A)(iii).

[4] 17 CFR 240.19b–4(f)(6).

[5] The term ''Member'' means an individual or organization approved to exercise the trading rights associated with a Trading Permit. Members are deemed ''members'' under the Exchange Act. *See* Exchange Rule 100.

establish Exchange policy with respect to transfers of options positions in certain limited circumstances.

Permissible Transfers

The Exchange proposes to adopt new Exchange Rule 1326, titled ''Transfer of Positions'' to provide for the circumstances pursuant to which Members may transfer their options positions without first exposing the order. This rule states that a Member must be on at least one side of the transfer. This rule is similar to Nasdaq ISE Options 6, Section 5.

The Exchange proposes to provide in paragraph (a) that, existing positions in options listed on the Exchange of a Member, or non-Member, that are to be transferred on, from, or to the books of a Clearing Member [6] may be transferred off the Exchange if the transfer involves one or more of the following events:

(1) Pursuant to Rule 301, an adjustment or transfer in connection with the correction of a bona fide error in the recording of a transaction or the transferring of a position to another account, provided that the original trade documentation confirms the error;

(2) the transfer of positions from one account to another account where no change in ownership is involved (*i.e.,* accounts of the same Person (as defined in Rule 100)), provided the accounts are not in separate aggregation units or otherwise subject to information barrier or account segregation requirements;

(3) the consolidation of accounts where no change in ownership is involved;

(4) a merger, acquisition, consolidation, or similar non-recurring transaction for a Person;

(5) the dissolution of a joint account in which the remaining Member assumes the positions of the joint account;

(6) the dissolution of a corporation or partnership in which a former nominee of the corporation or partnership assumes the positions;

(7) positions transferred as part of a Member's capital contribution to a new joint account, partnership, or corporation;

(8) the donation of positions to a not-for-profit corporation;

(9) the transfer of positions to a minor under the Uniform Gifts to Minors Act; or

(10) the transfer of positions through operation of law from death, bankruptcy, or otherwise.

The proposed rule change makes clear that the transferred positions must be on, from, or to the books of a Clearing Member. The proposed rule change states that existing positions of a Member or a non-Member may be subject to a transfer, except under specified circumstances in which a transfer may only be effected for positions of a Member.[7] The Exchange notes transfers of positions in Exchange listed options may also be subject to applicable laws, rules, and regulations, including rules of other self-regulatory organizations.[8] Except as explicitly provided in the proposed rule text, the proposed rule change is not intended to exempt position transfers from any other applicable rules or regulations, and proposed paragraph (h) makes this clear in the rule.

The proposed Exchange Rule 1326(b) codifies Exchange guidance regarding certain restrictions on permissible transfers relating to netting of open positions and to margin and haircut treatment, unless otherwise permitted by paragraph (f). No position may net against another position (''netting''), and no position transfer may result in preferential margin or haircut treatment.[9] Netting occurs when long positions and short positions in the same series ''offset'' against each other, leaving no position, or a reduced position. For example, if a Member wanted to transfer 100 long calls to another account that contained short calls of the same options series as well as other positions, even if the transfer is permitted pursuant to one of the ten permissible events listed in the Proposed Rule, the Member could not transfer the offsetting series, as they would net against each other and close the positions.

However, netting is permitted for transfers on behalf of a Market Maker account for transactions in multiply listed options series on different options exchanges, but only if the Market Maker nominees are trading for the same Member, and the options transactions on the different options exchanges clear into separate exchange-specific accounts because they cannot easily clear into the same Market Maker account at the Clearing Corporation. In such instances, all Market Maker positions in the exchange-specific accounts for the multiply listed class would be automatically transferred on their trade date into one central Market Maker account (commonly referred to as a ''universal account'') at the Clearing Corporation. Positions cleared into a universal account would automatically net against each other. Option exchanges permit different naming conventions with respect to Market Maker account acronyms (for example, lettering versus numbering and number of characters), which are used for accounts at the Clearing Corporation. A Market Maker may have a nominee with an appointment in class XYZ on the Exchange, and have another nominee with an appointment in class XYZ on another exchange, but due to account acronym naming conventions, those nominees may need to clear their transactions into separate accounts (one for Exchange transactions and another for transactions on the other exchange) at the Clearing Corporation rather than into a universal account (in which account the positions may net). The proposed rule change permits transfers from these separate exchange-specific accounts into the Market Maker's universal account in this circumstance to achieve this purpose.

Transfer Price

The Exchange proposes to state that the transfer price, to the extent it is consistent with applicable laws, rules, and regulations, including rules of other self-regulatory organizations, and tax and accounting rules and regulations, at which a transfer is effected may be: (1) The original trade prices of the positions that appear on the books of the trading Clearing Member, in which case the records of the transfer must indicate the original trade dates for the positions; provided, transfers to correct bona fide errors pursuant to proposed subparagraph (a)(1) must be transferred at the correct original trade prices; (2) mark-to-market prices of the positions at the close of trading on the transfer date; (3) mark-to-market prices of the positions at the close of trading on the trade date prior to the transfer date;[10] or (4) the then-current market price of the positions at the time the transfer is effected.[11]

This proposed rule change provides market participants that effect transactions with flexibility to select a transfer price based on the circumstances of the transfer and their business. However, for corrections of bona fide errors, because those transfers

[6] The term ''Clearing Member'' means a Member that has been admitted membership in the Clearing Corporation pursuant to the provisions of the rules of the Clearing Corporation. *See* Exchange Rule 100.

[7] *See* proposed paragraph (a)(5) and (7).

[8] *See* proposed paragraph (h).

[9] For example, positions may not transfer from a customer, joint back office, or firm account to a Market Maker account. However, positions may transfer from a Market Maker account to a customer, joint back office, or firm account (assuming no netting of positions occurs).

[10] For example, for a transfer that occurs on a Tuesday, the transfer price may be based on the closing market price on Monday.

[11] *See* proposed paragraph (c).

are necessary to correct processing errors that occurred at the time of the transaction, those transfers would occur at the original transaction price, as the purpose of the transfer is to create the originally intended result of the transaction.

Prior Written Notice

Proposed Exchange Rule 1326(d) requires a Member and its Clearing Member(s) (to the extent the Member is not self-clearing) to submit to the Exchange, in a manner determined by the Exchange, written notice prior to effecting a transfer from or to the account(s) of a Member.[12] The notice must indicate: The Exchange-listed options positions to be transferred; the nature of the transaction; the enumerated provision(s) under proposed paragraph (a) pursuant to which the positions are being transferred; the name of the counterparty(ies); the anticipated transfer date; the method for determining the transfer price; and any other information requested by the Exchange.[13] The proposed notice will ensure the Exchange is aware of all transfers so that it can monitor and review them (including the records that must be retained pursuant to proposed paragraph (e)) to determine whether they are effected in accordance with the Rules.

Additionally, requiring notice from the Member(s) and its Clearing Member(s) will ensure both parties are in agreement with respect to the terms of the transfer. As noted in proposed subparagraph (d)(2), receipt of notice of a transfer does not constitute a determination by the Exchange that the transfer was effected or reported in conformity with the requirements of proposed Rule 1326. Notwithstanding submission of written notice to the Exchange, Members and Clearing Members that effect transfers that do not conform to the requirements of the proposed Rule will be subject to appropriate disciplinary action in accordance with the Rules.

Records

The proposed Exchange Rule 1326(e) requires that each Member and each Clearing Member that is a party to a transfer must make and retain records of the information provided in the written notice to the Exchange pursuant to proposed subparagraph (e), as well as information on the actual Exchange-listed options that are ultimately transferred, the actual transfer date, and the actual transfer price (and the original trade dates, if applicable), and any other information the Exchange may request the Member or Clearing Member to provide.[14]

Presidential Exemption

Proposed paragraph 1326(f) provides exemptions approved by the Exchange's Chief Executive Officer or President (or senior-level designee). Specifically, this provision is in addition to the exemptions set forth in proposed paragraph (a). The Exchange proposes that the Exchange Chief Executive Officer or President (or senior-level designee) may grant an exemption from the requirement of this proposed Rule, on his or her own motion or upon application of the Member (with respect to the Member's positions) or a Clearing Member (with respect to positions carried and cleared by the Clearing Members). The Chief Executive Officer, the President, or his or her designee, may permit a transfer if necessary or appropriate for the maintenance of a fair and orderly market and the protection of investors and is in the public interest, including due to unusual or extraordinary circumstances. For example, an exemption may be granted if the market value of the Person's positions would be compromised by having to comply with the requirement to trade on the Exchange pursuant to the normal auction process or when, in the judgment of the Chief Executive Officer, President, or his or her designee, market conditions make trading on the Exchange impractical.[15]

Routine, Recurring Transfers

The Exchange proposes to state that the transfer procedure set forth in Rule 1326 is intended to facilitate non-routine, nonrecurring movements of positions.[16] The transfer procedure is not to be used repeatedly or routinely in circumvention of the normal auction market process.

Exchange-Listed Options

Lastly, the Exchange proposes paragraph (h) which notes that the transfer procedure set forth in the proposed Rule is only applicable to positions in options listed on the Exchange. Transfers of positions in Exchange-listed options may also be subject to applicable laws, rules, and regulations, including rules of other self-regulatory organizations. Transfers of non-Exchange listed options and other financial instruments are not governed by this proposed Rule.

2. Statutory Basis

The Exchange believes that its proposed rule change is consistent with Section 6(b) of the Act[17] in general, and furthers the objectives of Section 6(b)(5) of the Act[18] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanisms of a free and open market and a national market system and, in general, to protect investors and the public interest.

Specifically, the Exchange believes the proposed transfer rule is consistent with the Section 6(b)(5)[19] requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest. Additionally, the Exchange believes the proposed rule change is consistent with the Section 6(b)(5)[20] requirement that the rules of an exchange not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers.

The Exchange believes that permitting transfers in very limited circumstances is reasonable to allow a Member to accomplish certain goals efficiently. The proposed rule permits transfers in situations involving dissolutions of entities or accounts, for purposes of donations, mergers or by operation of law. As noted above for example, a Member that is undergoing a structural change and a one-time movement of positions may require a transfer of positions or a Member that is leaving a firm that will no longer be in business

[12] This notice provision applies only to transfers involving a Member's positions and not to positions of non-Members parties, as they are not subject to the Rules. In addition, no notice would be required to effect transfers to correct bona fide errors pursuant to proposed subparagraph (a)(1) or transfers of positions from one account to another where no change in ownership is involved pursuant to proposed paragraph (a)(2).

[13] *See* proposed paragraph (d)(1).

[14] *See* proposed paragraph (e).

[15] *See* proposed paragraph (f).

[16] *See* proposed paragraph (g).

[17] 15 U.S.C. 78f(b).

[18] 15 U.S.C. 78f(b)(5).

[19] 15 U.S.C. 78f(b)(5).

[20] *Id.*

may require a transfer of positions to another firm. Also, a Member may require a transfer of positions to make a capital contribution. The above-referenced circumstances are non-recurring situations where the transferor continues to maintain some ownership interest or manage the positions transferred. By contrast, repeated or routine transfers between entities or accounts—even if there is no change in beneficial ownership as a result of the transfer—is inconsistent with the purposes for which the proposed rule will be adopted. Accordingly, the Exchange believes that such activity should not be permitted under the rules and thus, seeks to adopt language in proposed paragraph (g) that the transfer of positions procedures set forth in the proposed rule are intended to facilitate non-recurring movements of positions.

The proposed rule change will provide market participants that experience these limited, non-recurring events with an efficient and effective means to transfer positions in these situations. The Exchange believes the proposed rule change regarding permissible transfer prices provides market participants with flexibility to determine the price appropriate for their business, which maintain cost bases in accordance with normal accounting practices and removes impediments to a free and open market.

The proposed rule change which requires notice and maintenance of records will ensure the Exchange is able to review transfers for compliance with the Rules, which prevents fraudulent and manipulative acts and practices. The requirement to retain records is consistent with the requirements of Rule 17a–3 and 17a–4 under the Act.

Similar to Nasdaq ISE and Cboe rules,[21] the Exchange would permit a presidential exemption. The Exchange believes that this exemption is consistent with the Act because the Exchange's Chief Executive Officer or President (or senior-level designee) would consider an exemption in very limited circumstances. The transfer process is intended to facilitate non-routine, nonrecurring movements of positions and, therefore, is not to be used repeatedly or routinely in circumvention of the normal auction market process. The proposed Rule specifically provides within the rule text that the Exchange's Chief Executive Officer or President (or senior-level designee) may in his or her judgment allow a transfer if it is necessary or appropriate for the maintenance of a fair and orderly market and the protection of investors and is in the public interest, including due to unusual or extraordinary circumstances such as the market value of the Person's positions will be comprised by having to comply with the requirement to trade on the Exchange pursuant to the normal auction process or, when in the judgment of the President or his or her designee, market conditions make trading on the Exchange impractical. These standards within paragraph (f) of the proposed rule are intended to provide guidance concerning the use of this exemption which is intended to provide the Exchange with the ability to utilize the exemption for the maintenance of a fair and orderly market and the protection of investors and is in the public interest. The Exchange believes that the exemption is consistent with the Act because it would allow the Exchange's Chief Executive Officer or President (or senior-level designee) to act in certain situations which comply with the guidance within paragraph (f) which is intended to protect investors and the general public. Although Cboe's rule grants an exemption to the President (or senior-level designee),[22] the Exchange has elected to parallel the Nasdaq ISE and grant an exemption to the Exchange's Chief Executive Officer or President (or senior-level designee), who are similarly situated within the Exchange's organization as senior-level individuals.[23]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

The Exchange does not believe the proposed rule change will impose an undue burden on intra-market competition as the transfer procedure may be utilized by any Member and the rule will apply uniformly to all Members. Use of the transfer procedure is voluntary, and all Members may use the procedure to transfer positions as long as the criteria in the proposed rule are satisfied. With the establishment of the proposed rule, a Member that experiences limited permissible, non-recurring events would have an efficient and effective means to transfer positions in these situations. The Exchange believes the proposed rule change regarding permissible transfer prices provides market participants with flexibility to determine the price appropriate for their business, which determine prices in accordance with normal accounting practices and removes impediments to a free and open market. The Exchange does not believe the proposed notice and record requirements are unduly burdensome to market participants. The Exchange believes the proposed requirements are reasonable and will ensure the Exchange is aware of transfers and would be able to monitor and review the transfers to ensure the transfer falls within the proposed rule.

Adopting an exemption, similar to Nasdaq ISE Options 6, Section 5(f), to permit the Exchange's Chief Executive Officer or President (or senior-level designees) to grant an exemption, in addition to the limited circumstances of the proposed rule, in his or her judgment, does not impose an undue burden on competition. Such an exemption would only be applied when in the judgement of the Chief Executive Officer, or President or his or her designee, the transfer is necessary or appropriate for the maintenance of a fair and orderly market and the protection of investors and is in the public interest, including due to unusual or extraordinary circumstances, such as the possibility that the market value of a Person's positions would be compromised by having to comply with the requirement to trade on the Exchange pursuant to the normal auction process or when market conditions make trading on the Exchange impractical.

The Exchange does not believe the proposed rule change will impose an undue burden on inter-market competition. The proposed position transfer procedure is not intended to be a competitive trading tool. The proposed rule change permits, in limited circumstances, a transfer to facilitate non-routine, nonrecurring movements of positions. As provided for in proposed paragraph (g), it would not be used repeatedly or routinely in circumvention of the normal auction market process. In addition, proposed paragraph (f) provides within the rule text that the Exchange's Chief Executive Officer or President (or senior-level designee) may in his or her judgment allow a transfer for the maintenance of a fair and orderly market and the protection of investors and is in the public interest. The Exchange believes that the exemption does not impose an undue burden on competition as the Exchange's Chief Executive Officer or President (or senior-level designee) would apply the exemption consistent with the guidance laid out in the

[21] *See* Nasdaq ISE Options 6, Section 5; and Cboe Rule 6.7.

[22] *See* Cboe Rule 6.7(f).

[23] *See* Nasdaq ISE Options 6, Section 5(f).

proposed rule text. Additionally, as discussed above, the proposed rule change is similar to Cboe Rule 6.7 and Nasdaq ISE Options 6, Section 5. The Exchange believes having similar rules related to position transfers to those of other options exchanges will reduce the administrative burden on market participants of determining whether their transfers comply with multiple sets of rules.

As such, the Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [24] and Rule 19b–4(f)(6) thereunder.[25]

A proposed rule change filed under Rule 19b–4(f)(6) [26] normally does not become operative for 30 days after the date of the filing. However, pursuant to Rule 19b–4(f)(6)(iii),[27] the Commission may designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay to so that it may adopt the proposed position transfer rules as soon as possible which, according to the Exchange, would benefit investors and the general public because it will provide Members with the ability to request a transfer, for limited, non-recurring types of transfers, without the requirement for exposing those orders on the Exchange. The Commission believes that waiver of the operative delay is consistent with the protection of investors and the public interest because the proposed rule change does not present any unique or novel regulatory issues and is substantively identical to provisions in Cboe Rule 6.7 and Nasdaq ISE Options 6, Section 5. Accordingly, the Commission hereby waives the operative delay and designates the proposal operative upon filing.[28]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission will institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–MIAX–2020–30 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–MIAX–2020–30. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MIAX–2020–30 and should be submitted on or before October 5, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[29]

J. Matthew DeLesDernier,

Assistant Secretary.

solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange is filing with the Commission a proposed rule change to proposed rule change to adopt Rule 15.3 and entitle it ''Collection of Exchange Fees and Other Claims and Billing Policy'' that (a) requires each member of the Exchange (''Member''), and all applicants for membership, to provide one or more clearing account numbers that correspond to an account(s) at the National Securities Clearing Corporation (''NSCC'') for purposes of permitting the Exchange to debit certain fees, fines, charges and/or other monetary sanctions or other monies due and owing to the Exchange; and (b) require Members to submit billing disputes within a certain time period. The text of the proposed rule change is provided in Exhibit 5.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to adopt Rule 15.3 to (a) require each Member, and all applicants for membership, to provide one or more clearing account numbers that correspond to an account(s) at the NSCC for purposes of permitting the Exchange to debit certain fees, fines, charges, and/or other monetary sanctions or other monies due and owing to the Exchange; and (b) require Members to submit billing disputes within a certain time period.

Direct Debit Process

Paragraph (a) of the proposed Rule 15.3 requires Members, and all applicants for membership, to provide one or more clearing account numbers that correspond to an account(s) at NSCC for purposes of permitting the Exchange to debit any undisputed or final fees, fines, charges, and/or other monetary sanctions or other monies due and owing to the Exchange or other charges pursuant to Rule 15.1, including the Exchange Fee Schedule thereto; Regulatory Transaction Fees pursuant to Rule 15.1(b); dues, assessments and other charges pursuant to Rule 2.9 to the extent the Exchange were to determine to charge such fees; and fines, sanctions and other charges pursuant to Chapter 8 of the Exchange Rules [5] which are due and owing to the Exchange (collectively ''Debit Amount''). The Exchange Fee Schedule specifies charges for transactions, routing and other services provided by the Exchange and certain fees that are collected by the Financial Industry Regulatory Authority (''FINRA''). Only the charges which require payment to the Exchange would be subject to direct debit. The Exchange does not currently charge fees for certain of the services listed on the Exchange Fee Schedule. The Exchange would entitle Rule 15.3 ''Collection of Exchange Fees and Other Claims and Billing Policy.''

As proposed, the Exchange will send a monthly electronic invoice by email to each Member, generally by the 7th business day of each month for the Debit Amount due to the Exchange for the prior month. The Exchange will also send files to NSCC each month by the 17th business day of each month to initiate the debit of the Debit Amount due to the Exchange as stated on the Member's invoice for the prior month.

The Exchange anticipates that NSCC will process the debits on the day it receives the file or the following business day. Because Members will be provided with an invoice approximately two weeks before the debit date, Members will have adequate time to contact Exchange staff with any questions concerning the invoice. If a Member disagrees with the invoice in whole or in part, the Exchange would not commence the debit for the disputed amount until the dispute is resolved. Specifically, the Exchange will not include the disputed amount (or the entire invoice if it is not feasible to identify the disputed amounts) in the NSCC debit amount if the Member has provided written notification of the dispute to the Finance Department of the Exchange by the later of the 16th business day of the month or ten days after the date the electronic invoice was sent to the Member, and the amount in dispute is at least $10,000 or greater.

Once NSCC receives the file from the Exchange, NSCC would proceed to debit the amounts indicated from the account of the Member that clears the applicable transactions (''Clearing Member'', *i.e.,* either a Member that is self-clearing or another Member that provides clearing services on behalf of the Member) and disburse such amounts to the Exchange. In the instance where the Member clears through another Member, the Exchange understands that the estimated transaction fees owed to the Exchange are typically debited by the Clearing Member on a daily basis using daily transaction detail reports provided by the Exchange to the Clearing Member in order to ensure adequate funds have been escrowed. The Exchange notes that it is proposing to permit a Member to designate one or more clearing account numbers that correspond to an account(s) at NSCC to permit Members that clear through multiple different clearing accounts to set up the billing process with the Exchange in a manner that is most efficient for internal reconciliation and billing purposes of the Member.

The Exchange believes that the proposed debiting process for Members would create an efficient method of collecting undisputed or final fees, fines, charges and/or other monetary sanctions or monies due and owing to the Exchange. An alternative process could cause collection matters to divert staff resources away from the Exchange's regulatory and business purposes. Moreover, the Exchange believes that it is reasonable to provide for a $10,000 limitation on pre-debit billing disputes since it would be inefficient to delay a direct debit for a de minimis amount. Members will still be able to dispute billing amounts that are less than $10,000 pursuant to paragraph (b) of Rule 15.3, as described below. The Exchange notes that a comparable debiting process is used by the Investors Exchange (''IEX''), the

[5] This includes, among other things, fines which result from disciplinary proceedings or actions taken pursuant to Chapter 8 of the Exchange Rules, as specified in Rule 8.1(a). In addition, the Exchange notes that it also has the authority under Rules 7.1(b) to report to the Chief Regulatory Officer (''CRO'') any Member who does not pay any dues, fees, assessments, charges or other amounts due to the Exchange within 90 days after the same has become payable and the CRO may, after giving reasonable notice to the Member of such arrearages, suspend the Member until payment is made. While this direct debit process should minimize failures to pay, those rules nevertheless will act as a backstop to the direct debit process. With respect to disciplinary proceedings, the Exchange would not debit any monies until such action is final. The Exchange would not consider an action final until all appeal periods have run and/or all appeal timeframes are exhausted. With respect to non-disciplinary actions, the Exchange would similarly not take action to debit a Member account until all appeal periods have run and/or all appeal timeframes are exhausted. Any uncontested disciplinary or non-disciplinary actions will be debited, and the amount due will appear on the Member's invoice prior to the actual NSCC debit.

Nasdaq Stock Market LLC (''Nasdaq''), Nasdaq BX, Inc. (''Nasdaq BX''), and Nasdaq PHLX LLC (''Nasdaq Phlx'').[6]

Billing Dispute Process

In addition to, and separate from the pre-debit dispute process described above, the Exchange also proposes to adopt a billing policy, pursuant to paragraph (b) of Rule 15.3, to require all pricing disputes, with respect to fees payable to the Exchange,[7] to be submitted to the Exchange in writing[8] and accompanied by supporting documentation within sixty days of receipt of an invoice. The Exchange believes that this policy will conserve Exchange resources, which are expended when untimely billing disputes require staff to research applicable fees and order information beyond two months after the invoice was issued. The sixty-day limitation would be applicable to all fees specified in paragraph (a) of Rule 15.3.

The Exchange expects that the proposed policy will provide a potential cost savings to the Exchange in that it would alleviate administrative burdens related to belated billing disputes, which could divert staff resources away from the Exchange's regulatory and business purposes. A similar policy is in place today at IEX, Nasdaq, Nasdaq BX, and Nasdaq Phlx.[9]

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[10] in general, and furthers the objectives of Section 6(b)(5) of the Act,[11] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest. Specifically, the Exchange believes that the direct debit process will provide Members with an efficient process to pay undisputed or final fees, fines, charges and/or monetary sanctions or monies due and owing to the Exchange. Similarly, the billing policy will create an objective process and will be fair to Members. Further, both aspects of the proposal are expected to result in lower administrative costs for the Exchange.

The Exchange believes that the proposal to debit NSCC accounts is reasonable because it would ease the Member's administrative burden in paying monthly invoices, avoid overdue balances and provide efficient collection from all Members who owe monies to the Exchange. Moreover, the Exchange believes that the 10-day minimum time frame provided to Members to dispute invoices is reasonable and adequate to enable Members to identify potentially erroneous charges. In addition, the Exchange believes that the $10,000 limitation on pre-debit billing disputes is reasonable because it would be inefficient to delay a direct debit for a de minimis amount. Members will still be able to dispute billing amounts that are less than $10,000 pursuant to paragraph (b) of Rule 15.3.

Further, the Exchange believes that the requirement that billing disputes for specified fees be submitted to the Exchange within sixty days from receipt of the invoice will set objective standards, will be fair to Members, and that sixty days is ample time to review an invoice and dispute any pricing related to the transactions for that time period. It is also expected to lower the Exchange's administrative costs. An identical provision is applicable to IEX, Nasdaq, Nasdaq BX, and Nasdaq Phlx.[12]

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes its proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed debit process and billing policy would apply uniformly to all Members and will not disproportionately burden or otherwise impact any single Member.

The Exchange does not believe that the proposal will create an intermarket burden on competition since the Exchange will only debit fees (other than de minimis fees below $10,000) that are undisputed by the Member and Members will have a reasonable opportunity to dispute fees both before and after the direct debit process. The Exchange also does not believe that the proposal will create an intramarket burden on competition, since the proposed direct debit process and billing policy will be applied equally to all Members. Moreover, other exchanges use a comparable process which the Exchange believes is generally familiar to Members. Consequently, the Exchange does not believe that the proposal raises any new or novel issues that have not been previously considered by the Commission in connection with direct debit and billing policies of other exchanges.[13]

Further, this proposal is expected to provide a cost savings to the Exchange in that it would alleviate administrative processes related to the collection of monies owed to the Exchange by Members. Collection matters divert staff resources away from the Exchange's regulatory and business purposes. In addition, the debiting process would mitigate against Member accounts becoming overdue.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange neither solicited nor received comments on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[14] and Rule 19b–4(f)(6) thereunder.[15]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act[16] normally does not become operative for 30 days after the date of its filing. However, Rule 19b–4(f)(6)(iii)[17] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has asked the Commission to waive the 30-day operative delay. The Exchange believes that waiver of the operative delay is

[6] *See* IEX Rule 15.120, Nasdaq Rule Equity 7, Section 70, Nasdaq BX Rule Equity 7, Section 111, and Nasdaq Phlx Rule Equity 7, Section 2.

[7] Fees that are collected by FINRA would not be subject to the billing policy, and any disputes would need to be raised by the Member directly with FINRA.

[8] The Exchange invoice will specify the email address where billing disputes must be submitted.

[9] *See supra* note 6.

[10] 15 U.S.C. 78f(b).

[11] 15 U.S.C. 78f(b)(5).

[12] *See supra* note 6.

[13] *See supra* note 6.

[14] 15 U.S.C. 78s(b)(3)(A).

[15] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[16] 17 CFR 240.19b–4(f)(6).

[17] 17 CFR 240.19b–4(f)(6)(iii).

consistent with the protection of investors and the public interest because it will allow the Exchange to provide a consistent process from the inception of the Exchange's operations for Members to pay undisputed or final fees, fines, charges and/or monetary sanctions or monies due and owing to the Exchange. The Commission believes that waiver of the 30-day operative delay is consistent with the protection of investors and the public interest because the proposed rule change does not raise any novel issues and is based on the rules of several other exchanges discussed above. Further, the proposal does not limit or relieve the Exchange from its responsibility to accurately assess fees and apply its fee schedule at all times. Therefore, the Commission hereby waives the operative delay and designates the proposal as operative upon filing.[18]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B) [19] of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov*. Please include File Number SR–MEMX–2020–06 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–MEMX–2020–06. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–MEMX–2020–06 and should be submitted on or before October 5, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[20]

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–89777; File No. SR–CboeEDGX–2020–043]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Update Rule 13.4(a), Stating It Will Utilize MIAX PEARL Market Data From the CQSUQDF for Purposes of Order Handling, Routing, Execution, and Related Compliance Processes

September 8, 2020.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the "Act") [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on August 25, 2020, Cboe EDGX Exchange, Inc. (the "Exchange" or "EDGX") filed with the Securities and Exchange Commission (the "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. ("EDGX" or the "Exchange") proposes a rule change to Rule 13.4(a), stating it will utilize MIAX PEARL market data from the CQSUQDF for purposes of order handling, routing, execution, and related compliance processes. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/options/regulation/rule_filings/edgx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update Rule 13.4(a) regarding the public disclosure of the sources of data that the Exchange utilizes when performing: (i) Order handling; (ii) order routing; (iii) order execution; and (iv) related compliance processes to reflect the operation of the MIAX PEARL as an equities exchange.

---

[18] For purposes only of waiving the 30-day operative delay, the Commission also has considered the proposed rule's impact on efficiency, competition, and capital formation. *See* 15 U.S.C. 78c(f).

[19] 15 U.S.C. 78s(b)(2)(B).

[20] 17 CFR 200.30–3(a)(12).

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

On August 14, 2020, the Commission approved MIAX PEARL's proposed rule change to establish rules governing the trading of equities securities.[4] MIAX PEARL announced that it plans to launch equities trading on September 25, 2020.[5] The Exchange, therefore, proposes to update Rule 13.4(a) regarding the public disclosure of the sources of data that the Exchange utilizes when performing: (i) Order handling; (ii) order routing; (iii) order execution; and (iv) related compliance processes to reflect the operation of MIAX PEARL as an equities exchange beginning on September 25, 2020. Specifically, the Exchange proposes to amend Rule 13.4(a) to include MIAX PEARL by stating it will utilize MIAX PEARL market data from the Consolidated Quotation System (''CQS'')/UTP Quotation Data Feed (''UQDF'') for purposes of order handling, routing, execution, and related compliance processes. At this stage, no secondary source for MIAX PEARL market data will be used.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[6] in general, and furthers the objectives of Section 6(b)(5) of the Act,[7] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes that its proposal to update Exchange Rule 13.4(a) to include MIAX PEARL will ensure that the Rule correctly identifies and publicly states on a market-by-market basis all of the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, routing, and execution of orders, and for performing the regulatory compliance checks related to each of those functions. The proposed rule changes also remove impediments to and perfects the mechanism of a free and open market and protects investors and the public interest because it provides additional specificity, clarity and transparency.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes its proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes the proposal would enhance competition because including all of the exchanges enhances transparency and enables investors to better assess the quality of the Exchange's execution and routing services.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

(i) Significantly affect the protection of investors or the public interest;

(ii) impose any significant burden on competition; and

(iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(6) thereunder.[9]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

• Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov*. Please include File Number SR–CboeEDGX–2020–043 on the subject line.

Paper Comments

• Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CboeEDGX–2020–043. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CboeEDGX–2020–043 and should be submitted on or before October 5, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–89783; File No. SR–BX–2020–024]

Self-Regulatory Organizations; Nasdaq BX, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend Rule 4759

September 8, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on August 27, 2020, Nasdaq BX, Inc. (''BX'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend Rule 4759 (Data Feeds Utilized) to add the Long-Term Stock Exchange, Inc. (''LTSE''), MIAX PEARL, LLC (''MIAX PEARL'') and MEMX LLC (''MEMX'') to the list of market centers under Rule 4759 and provide that the Exchange will utilize CQS/UQDF.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/bx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

In anticipation of their planned launches [3] the Exchange proposes to amend the table in Rule 4759 to include LTSE, MIAX Pearl and MEMX. The Exchange will use securities information processor (''SIP'') data, *i.e.,* CQS SIP data, for securities reported under the Consolidated Quotation System and Consolidated Quotation Plan and UQDF SIP data for securities reported under the Nasdaq Unlisted Trading Privileges Plan to obtain LTSE, MIAX Pearl and MEMX quotation information for the handling, routing and execution of orders, as well as for the regulatory compliance processes related to those functions. At this stage, no secondary source for LTSE, MIAX Pearl or MEMX will be used.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[4] in general, and furthers the objectives of Section 6(b)(5) of the Act,[5] in particular, in that it is designed to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general to protect investors and the public interest.

The Exchange believes that the proposed rule change removes impediments to and perfects the mechanism of a free and open market because adding LTSE, MIAX Pearl and MEMX because updating its list of market centers for which the Exchange consumes quotation data will provide clarity to market participants. Moreover, it is necessary and consistent with the public interest and the protection of investors to update the Exchange's table of market centers in order to provide transparency with respect to all the direct proprietary and network processor feeds from which the Exchange obtains market data. Additionally, a similar change has been proposed by other exchanges.[6]

[3] LTSE plans to begin phase-in of production securities on August, 28, 2020. *See* LTSE Market Announcement available at, *https://assets.ctfassets.net/cchj2z2dcfyd/rnGvgggJUplaIk6N1xNA7/41926d3925a177d6455868090c46aeda/MA-2020-020__Production_Securities_Launching_August_28__-_Google_Docs.pdf.* MIAX Pearl Equities will begin trading in September 2020, pending SEC approval. *See* MIAX Pearl Alerts available at, *https://www.miaxoptions.com/alerts/2020/02/14/miax-pearl-equities-exchange-codes-and-important-dates-regarding-launch-new.* MEMX is expected to launch on September 4, 2020. *See* MEMX Update from Jonathan Kellner, dated June 11, 2020, available at *https://memx.com/memx-update/.*

[4] 15 U.S.C. 78f(b).

[5] 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is not designed to address any competitive issue; instead, its purpose is to enhance transparency with respect to the operation of the Exchange and its use of market data feeds.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act [7] and Rule 19b–4(f)(6) thereunder.[8]

A proposed rule change filed pursuant to Rule 19b–4(f)(6) under the Act [9] normally does not become operative for 30 days after the date of its

[7] 15 U.S.C. 78s(b)(3)(A).

[8] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has satisfied this requirement.

[9] 17 CFR 240.19b–4(f)(6).

filing. However, Rule 19b–4(f)(6)(iii) [10] permits the Commission to designate a shorter time if such action is consistent with the protection of investors and the public interest. The Exchange has requested that the Commission waive the 30-day operative delay. Waiver of the operative delay would allow the Exchange to disclose the updated list of market centers for which the Exchange consumes quotation data, and the source of the quotation data, at the time that LTSE, MIAX Pearl, and MEMX become operational. The Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Accordingly, the Commission waives the 30-day operative delay and designates the proposed rule change as operative upon filing.[11]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or
- Send an email to *rule-comments@sec.gov.* Please include File Number SR–BX–2020–024 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–BX–2020–024. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–BX–2020–024 and should be submitted on or before October 5, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[12]

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–89779; File No. SR–CboeBZX–2020–068]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Update Rule 11.26(a), Stating It Will Utilize MIAX PEARL Market Data From the CQSUQDF for Purposes of Order Handling, Routing, Execution, and Related Compliance Processes

September 8, 2020.

Pursuant to Section 19(b)(1) [1] of the Securities Exchange Act of 1934 (the ''Act'') [2] and Rule 19b–4 thereunder,[3] notice is hereby given that on August 25, 2020, Cboe BZX Exchange, Inc. (the ''Exchange'' or ''BZX'') filed with the Securities and Exchange Commission (the ''Commission'') the proposed rule change as described in Items I and II below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. (''BZX'' or the ''Exchange'') proposes to update Rule 11.26(a), stating it will utilize MIAX PEARL market data from the CQSUQDF for purposes of order handling, routing, execution, and related compliance processes. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (*http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/*), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to update Rule 11.26(a) regarding the public disclosure of the sources of data that the Exchange utilizes when performing: (i) Order handling; (ii) order routing; (iii) order execution; and (iv) related compliance processes to reflect the operation of the MIAX PEARL as an equities exchange.

On August 14, 2020, the Commission approved MIAX PEARL's proposed rule change to establish rules governing the

[1] 15 U.S.C. 78s(b)(1).

[2] 15 U.S.C. 78a.

[3] 17 CFR 240.19b–4.

trading of equities securities.[4] MIAX PEARL announced that it plans to launch equities trading on September 25, 2020.[5] The Exchange, therefore, proposes to update Rule 11.26(a) regarding the public disclosure of the sources of data that the Exchange utilizes when performing: (i) Order handling; (ii) order routing; (iii) order execution; and (iv) related compliance processes to reflect the operation of MIAX PEARL as an equities exchange beginning on September 25, 2020. Specifically, the Exchange proposes to amend Rule 11.26(a) to include MIAX PEARL by stating it will utilize MIAX PEARL market data from the Consolidated Quotation System (''CQS'')/UTP Quotation Data Feed (''UQDF'') for purposes of order handling, routing, execution, and related compliance processes. At this stage, no secondary source for MIAX PEARL market data will be used.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,[6] in general, and furthers the objectives of Section 6(b)(5) of the Act,[7] in particular, in that it is designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

The Exchange believes that its proposal to update Exchange Rule 11.26(a) to include MIAX PEARL will ensure that the Rule correctly identifies and publicly states on a market-by-market basis all of the specific network processor and proprietary data feeds that the Exchange utilizes for the handling, routing, and execution of orders, and for performing the regulatory compliance checks related to each of those functions. The proposed rule changes also remove impediments to and perfects the mechanism of a free and open market and protects investors and the public interest because it provides additional specificity, clarity and transparency.

[4] *See* Securities Exchange Act No. 89562 (August 14, 2020).

[5] *See supra* note 3 [sic].

[6] 15 U.S.C. 78f.

[7] 15 U.S.C. 78f(b)(5).

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange believes its proposed rule change would not impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. To the contrary, the Exchange believes the proposal would enhance competition because including all of the exchanges enhances transparency and enables investors to better assess the quality of the Exchange's execution and routing services.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

The Exchange has not solicited, and does not intend to solicit, comments on this proposed rule change. The Exchange has not received any unsolicited written comments from Members or other interested parties.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not:

(i) Significantly affect the protection of investors or the public interest;

(ii) impose any significant burden on competition; and

(iii) become operative for 30 days from the date on which it was filed, or such shorter time as the Commission may designate, it has become effective pursuant to Section 19(b)(3)(A) of the Act[8] and Rule 19b–4(f)(6) thereunder.[9]

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[8] 15 U.S.C. 78s(b)(3)(A).

[9] 17 CFR 240.19b–4(f)(6). In addition, Rule 19b–4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. The Exchange has fulfilled this requirement.

Electronic Comments

• Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–CboeBZX–2020–068 on the subject line.

Paper Comments

• Send paper comments in triplicate to: Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–CboeBZX–2020–068. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–CboeBZX–2020–068 and should be submitted on or before October 5, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[10]

DEPARTMENT OF STATE

[Public Notice: 11201]

Cultural Property Advisory Committee; Additional Meeting Agenda Item

AGENCY: Department of State.

ACTION: Notice.

SUMMARY: The Department of State is issuing this Notice to add an agenda item for the next meeting of the Cultural Property Advisory Committee, which will be held on October 27–29, 2020.

DATES: *Meeting:* The Cultural Property Advisory Committee (CPAC) will meet October 27–29, 2020, 10:00 a.m. to 5:00 p.m. (EDT). CPAC will hold an open session on October 27, 2020, at 2:00 p.m. (EDT). It will last approximately one hour.

Comments: The Committee will review your written comment if it is received by October 13, 2020, at 11:59 p.m. (EDT). For further instructions on submission of comments and participation, please see the previous Notice at 85 FR 51542.

FOR FURTHER INFORMATION CONTACT: For general questions concerning the meeting, contact Allison Davis, Bureau of Educational and Cultural Affairs—Cultural Heritage Center, by phone (202–632–6305) or email (*culprop@state.gov*).

SUPPLEMENTARY INFORMATION: The October 27–29, 2020, meeting of the Cultural Property Advisory Committee was announced in 85 FR 51542. This Notice adds an additional agenda item for that meeting.

In accordance with the Convention on Cultural Property Implementation Act (19 U.S.C. 2601 *et seq.*) (''the Act''), the Assistant Secretary of State for Educational and Cultural Affairs calls a meeting of the Cultural Property Advisory Committee (''the Committee'') (19 U.S.C. 2605(e)(2)). The Act describes the Committee's responsibilities. A portion of this meeting will be closed to the public pursuant to 5 U.S.C. 552b(c)(9)(B) and 19 U.S.C. 2605(h).

Addition to Meeting Agenda: The Committee will review the proposed extension of the cultural property agreement with the Government of the Republic of Bolivia. As previously announced (85 FR 51542), the Committee also will review proposed extensions of cultural property agreements with the Government of the Hellenic Republic and the Government of Nigeria.

Open Session Participation: The Committee will hold an open session of the meeting to receive oral public comments on Tuesday, October 27, 2020, from 2:00 p.m. to approximately 3:00 p.m. (EDT). We have provided specific instructions on how to participate or observe the open session at *http://culturalheritage.state.gov*. Further information about this meeting, and how to participate, are included in the previous Notice at 85 FR 51542. Include ''Bolivia'' in the subject line.

Allison R. Davis,

Executive Director, CPAC, Bureau of Educational and Cultural Affairs, Department of State.

September 14, 2020 [Public Notice: 11203]

Notice of Public Meeting of the U.S. President's Emergency Plan for AIDS Relief (PEPFAR) Scientific Advisory Board

SUMMARY: In accordance with the Federal Advisory Committee Act, the U.S. Department of State is hereby giving notice that the PEPFAR Scientific Advisory Board (SAB) will be holding a meeting utilizing virtual technology. The meeting will be open to the public; a public comment session will be held during the meeting. Pre-registration is required for both public participation and comment.

DATES: The meeting will be held on Wednesday, October 7, 2020, from approximately 10:00 a.m. to 3:00 p.m. (ET) and on Thursday, October 8, 2020 from approximately 9:00 a.m. to 2:00 p.m. (ET). This meeting will be conducted utilizing Cisco WebEx virtual technology.

Agenda: SAB members will be discussing the novel coronavirus (COVID–19) and its impact on people living with or at risk of HIV infection; new biomedical preventions products; PEPFAR 2020 plans, programs and performance; adolescents and children with HIV; and advanced HIV disease. The agenda will be posted on the SAB website at *www.state.gov/scientific-advisory-board-pepfar* and also shared with registered participants. Registered members of the public will be permitted to participate in a question and answer period following the meeting in accordance with the Chair's instructions

ADDRESSES: Individuals who wish to participate in the meeting and/or provide public comment should register by sending an email to *SolomonCD@state.gov* or directly at *https://forms.gle/XTrWnPQoQWJhadhJ6.* Individuals will be required to provide their name, organization, and email address to register not later than September 30, 2020. The WebEx site will be forwarded to individuals who register by that time, up to the capacity of the meeting. Individuals requiring reasonable accommodation should also make their request by that date. Requests made after that date will be considered but might not be able to be fulfilled.

FOR FURTHER INFORMATION CONTACT: Dr. Sara Klucking, Designated Federal Officer for the Board, Office of the U.S. Global AIDS Coordinator and Health Diplomacy at *KluckingSR@state.gov* or (202) 704–5598. Additional information can also be obtained by accessing the SAB's page on the PEPFAR site at *www.state.gov/scientific-advisory-board-pepfar.*

SUPPLEMENTARY INFORMATION: The Board is established under the general authority of the Secretary of State and the Department of State (''the Department'') as set forth in 22 U.S.C. 2656, and consistent with the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix). The Board serves the U.S. Global AIDS Coordinator solely in an advisory capacity concerning scientific, implementation, and policy issues related to the global response to HIV/AIDS.

DEPARTMENT OF STATE

[Public Notice 11198]

U.S. Advisory Commission on Public Diplomacy; Notice of Meeting

The U.S. Advisory Commission on Public Diplomacy (ACPD) will hold a virtual public meeting from 12:00 p.m. until 1:30 p.m., Wednesday, September 30, 2020. The meeting will focus on public diplomacy's role in countering state-sponsored disinformation, based on the forthcoming ACPD special report, ''Public Diplomacy and the New ''Old'' War: Countering State-Sponsored Disinformation.'' A panel of experts on the current complex information environment will discuss opportunities and challenges for PD practitioners in responding to state-sponsored malign influence operations—U.S. Ambassador (ret.) Bruce Wharton; James Pamment, Nonresident Scholar at the Carnegie Endowment for International Peace; and Graham Brookie, Director and Managing Editor of the Atlantic Council's Digital Forensic Research Lab.

This meeting is open to the public, including the media and members and staff of governmental and non-governmental organizations. To obtain the web conference link and password and to request reasonable accommodation, please email ACPD Program Assistant Kristy Zamary at *ZamaryKK@state.gov.* Please send any request for reasonable accommodation not later than September 23, 2020. Requests received after that date will be considered, but might not be possible to fulfill. Attendees should plan to enter the web conference waiting room by 11:50 a.m. to allow for a prompt start. Since 1948, the ACPD has been charged with appraising activities intended to understand, inform, and influence foreign publics and to increase the understanding of, and support for, these same activities. The ACPD conducts research that provides honest assessments of public diplomacy efforts, and disseminates findings through reports, white papers, and other publications. It also holds public symposiums that generate informed discussions on public diplomacy issues and events. The Commission reports to the President, Secretary of State, and Congress. The Office of the Under Secretary of State for Public Diplomacy and Public Affairs supports it.

For more information on the U.S. Advisory Commission on Public Diplomacy, please contact the Commission's Executive Director, Vivian S. Walker, at *WalkerVS@state.gov* or Senior Advisor, Shawn Baxter, at *BaxterGS@state.gov,* or please visit *https://www.state.gov/bureaus-offices/under-secretary-for-public-diplomacy-and-public-affairs/united-states-advisory-commission-on-public-diplomacy/.*

BILLING CODE 4710–45–P

DEPARTMENT OF STATE

[Delegation of Authority No. 488]

Delegation of the Functions and Authorities of Part II of the Maritime SAFE Act

By virtue of the authority vested in the Secretary of State, including Section 1 of the State Department Basic Authorities Act, as amended (22 U.S.C. 2651a), and to the extent authorized by law, I hereby delegate to the Assistant Secretary for Oceans and International Environmental and Scientific Affairs the functions and authorities vested in the Secretary of State by Part II of the Maritime SAFE Act, Public Law 116–92, codified at 16 U.S.C. 8031–8034.

The Secretary, Deputy Secretary, and the Under Secretary for Economic Growth, Energy, and the Environment may at any time exercise any authority or function delegated by this delegation of authority.

The authorities delegated herein may be re-delegated, to the extent authorized by law.

This delegation of authority does not revoke or otherwise affect any other delegation of authority currently in effect. Any act, executive order, regulation, or procedure subject to, or affected by, this delegation shall be deemed to be such act, executive order, regulation, or procedure as amended from time to time.

This document shall be published in the **Federal Register**.

Dated: August 17, 2020.

Michael R. Pompeo,

Secretary of State.

BILLING CODE 4710–09–P

DEPARTMENT OF STATE

[Public Notice: 11204]

Certification Related to Foreign Military Financing for Colombia Under Section 7045(b)(2)(b) of the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2020

Pursuant to section 7045(b)(2)(B) of the Department of State, Foreign Operations, and Related Programs Appropriations Act, 2020 (Div. G, Pub. L. 116–94), I hereby certify that:

(i) The Special Jurisdiction for Peace and other judicial authorities are taking effective steps to hold accountable perpetrators of gross violations of human rights in a manner consistent with international law, including for command responsibility, and sentence them to deprivation of liberty;

(ii) the Government of Colombia is taking effective steps to prevent attacks against human-rights defenders and other civil-society activists, trade unionists, and journalists, and judicial authorities are prosecuting those responsible for such attacks; and

(iii) senior military officers responsible for ordering, committing, and covering up cases of false positives are being held accountable, including by removal from active duty, if found guilty through criminal or disciplinary proceedings.

This Certification shall be published in the **Federal Register** and shall be transmitted, along with the accompanying Memorandum of Justification, to Congress.

Dated August 18, 2020.

Stephen E. Biegun,

Deputy Secretary of State.

BILLING CODE 4710–29–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[DOT–OST–2019–XXXX]

Research, Engineering, and Development Advisory Committee (REDAC); Notice of Public Meeting

AGENCY: Federal Aviation Administration, Department of Transportation.

ACTION: Notice of public meeting.

SUMMARY: This notice announces a meeting of the Research, Engineering, and Development Advisory Committee (REDAC).

DATES: The meeting will be held on October 7, 2020, from 9:30am–4:30pm. EST.

Requests for accommodations to a disability must be received by September 13, 2020. Individuals requesting to speak during the meeting must submit a written copy of their remarks to DOT by September 13, 2020. Requests to submit written materials to be reviewed during the meeting must be received no later than September 13, 2020.

ADDRESSES: The meeting will be held virtually. Virtual attendance information will be provided upon registration. A detailed agenda will be available on the REDAC internet website at *http://www.faa.gov/go/redac* at least one week before the meeting, along with copies of the meeting minutes after the meeting.

FOR FURTHER INFORMATION CONTACT: Chinita Roundtree-Coleman, REDAC PM/Lead, FAA/U.S. Department of Transportation, at *chinita.roundtree-coleman@faa.gov* or (609) 485–7149. Any committee related request should be sent to the person listed in this section.

SUPPLEMENTARY INFORMATION:

I. Background

The Research, Engineering, and Development Advisory Committee was created under the Federal Advisory Committee Act (FACA), in accordance with Public Law 100–591 (1988) and Public Law 101–508 (1990) to provide advice and recommendations to the FAA Administrator in support of the Agency's Research and Development (R&D) portfolio.

II. Agenda

At the meeting, the agenda will cover the following topics:

- FAA Research and Development Plan
- Emergence of new entrant vehicles and operations into the National Airspace System

III. Public Participation

The US Department of Transportation is committed to providing equal access to this meeting for all participants. If you need alternative formats or services because of a disability, such as sign language, interpretation, or other ancillary aids, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

There will be 45 minutes allotted for oral comments from members of the public joining the meeting. To accommodate as many speakers as possible, the time for each commenter may be limited. Individuals wishing to reserve speaking time during the meeting must submit a request at the time of registration, as well as the name, address, and organizational affiliation of the proposed speaker. If the number of registrants requesting to make statements is greater than can be reasonably accommodated during the meeting, the FAA may conduct a lottery to determine the speakers. Speakers are requested to submit a written copy of their prepared remarks for inclusion in the meeting records and for circulation to REDAC members before the deadline listed in the **DATES** section. All prepared remarks submitted on time will be accepted and considered as part of the meeting's record. Any member of the public may present a written statement to the committee at any time.

Issued in Washington, DC, this 8th day of September 2020.

Chinita Roundtree-Coleman,

REDAC PM/Lead, Federal Aviation Administration.

BILLING CODE 4910–9X–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Aviation Rulemaking Advisory Committee (ARAC); Renewal

AGENCY: Federal Aviation Administration (FAA), Transportation (DOT).

ACTION: Notice of renewal.

SUMMARY: The FAA announces the charter renewal of the Aviation Rulemaking Advisory Committee (ARAC), a Federal Advisory Committee that works with industry and the public to improve the development of the FAA's regulations. This charter renewal will take effect on September 14, 2020, and will expire after 2 years unless otherwise renewed.

FOR FURTHER INFORMATION CONTACT: Thuy H. Cooper, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591, telephone (202) 267–4715; fax (202) 267–5075; email *9-awa-arac@faa.gov.*

SUPPLEMENTARY INFORMATION: Pursuant to section 14(a)(2)(A) of the Federal Advisory Committee Act (Pub. L. 92–463), the FAA is giving notice of the charter renewal for the ARAC. The ARAC was established to provide advice and recommendations to FAA on regulatory matters. The ARAC is composed of representatives from member organizations and associations that represent the various aviation industry segments. The diversity of the Committee ensures the requisite range of views and expertise necessary to discharge its responsibilities. See the ARAC website for details on pending tasks at *http://www.faa.gov/regulations_policies/rulemaking/committees/documents/*.

Issued in Washington, DC, on September 9, 2020.

Brandon Roberts,

Executive Director, Office of Rulemaking.

Limitation on Deduction for Business Interest Expense

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final regulations.

SUMMARY: This document contains final regulations providing guidance about the limitation on the deduction for business interest expense after amendment of the Internal Revenue Code (Code) by the provisions commonly known as the Tax Cuts and Jobs Act, which was enacted on December 22, 2017, and the Coronavirus Aid, Relief, and Economic Security Act, which was enacted on March 27, 2020. The regulations provide guidance to taxpayers on how to calculate the limitation, what constitutes interest for purposes of the limitation, which taxpayers and trades or businesses are subject to the limitation, and how the limitation applies in consolidated group, partnership, international, and other contexts.

DATES:

Effective date: The regulations are effective on November 13, 2020. Sections 1.163(j)–1 through 1.163(j)–11 are generally applicable to taxable years beginning on or after November 13, 2020.

Applicability dates: For dates of applicability, see §§ 1.163(j)–1(c), 1.163(j)–2(k), 1.163(j)–3(d), 1.163(j)–4(g), 1.163(j)–5(h), 1.163(j)–6(p), 1.163(j)–9(k), 1.163(j)–10(f), 1.163(j)–11(d), 1.263A–15(a), 1.381(c)(20)–1(d), 1.382–2(b)(3), 1.382–5(f), 1.382–6(h), 1.383–1(j), 1.446–3(j)(2), 1.469–11(a)(3) and (4), 1.1502–36(h)(2), 1.1502–99(d), and 1.1504–4(i).

Pursuant to section 7805(b)(7), taxpayers and their related parties, within the meaning of sections 267(b) and 707(b)(1), may apply the rules set forth in §§ 1.163(j)–1 through 1.163(j)–11, in their entirety, to a taxable year beginning after December 31, 2017, and before November 13, 2020, so long as the taxpayers and their related parties consistently apply these rules, and, if applicable, §§ 1.263A–9, 1.263A–15, 1.381(c)(20)–1, 1.382–1, 1.382–2, 1.382–5, 1.382–6, 1.382–7, 1.383–0, 1.383–1, 1.469–9, 1,469–11, 1.704–1, 1.882–5, 1.1362–3, 1.1368–1, 1.1377–1, 1.1502–13, 1.1502–21, 1.1502–36, 1.1502–79, 1.1502–90, 1.1502–91 through 1.1502–99 (to the extent they effectuate the rules of §§ 1.382–2, 1.382–5, 1.382–6, and 1.383–1), and 1.1504–4, to that taxable year. However, see § 1.163(j)–1(c) for the applicability date rules relating to notional principal contracts and the interest anti-avoidance rule; see also part II(E)(2) (relating to notional principal contracts) and part II(E)(4) (relating to the interest anti-avoidance rule) of the Summary of Comments and Revisions section of this preamble.

Alternatively, taxpayers and their related parties, within the meaning of sections 267(b) and 707(b)(1), may rely on proposed §§ 1.163(j)–1 through 1.163(j)–11, which were issued in a notice of proposed rulemaking (REG–106089–18) and published on December 28, 2018, in the **Federal Register** (83 FR 67490), in their entirety, for a taxable year beginning after December 31, 2017, and before November 13, 2020, so long as the taxpayers and their related parties consistently apply proposed §§ 1.163(j)–1 through –11, and, if applicable, proposed §§ 1.263A–9, 1.381(c)(20)–1, 1.382–1, 1.382–2, 1.382–5, 1.382–6, 1.382–7, 1.383–0, 1.383–1, 1.469–9, 1.469–11, 1.882–5, 1.1502–13, 1.1502–21, 1.1502–36, 1.1502–79, 1.1502–91 through 1.1502–99 (to the extent they effectuate the rules of §§ 1.382–2, 1.382–5, 1.382–6, and 1.383–1), and 1.1504–4, to that taxable year. Notwithstanding the preceding sentence, taxpayers applying the provisions in the notice of proposed rulemaking may apply § 1.163(j)–1(b)(1)(iii) in these final regulations for taxable years beginning after December 31, 2017.

With respect to § 1.382–2 and, if applicable, §§ 1.1502–91 through 1.1502–99 (to the extent they effectuate the rules of § 1.382–2), and with respect to § 1.382–5 and, if applicable, §§ 1.1502–91 through 1.1502–99 (to the extent they effectuate the rules of § 1.382–5), the regulations apply to testing dates and ownership changes, respectively, occurring on or after November 13, 2020.

Taxpayers and their related parties, within the meaning of sections 267(b) and 707(b)(1), may choose to apply the rules of § 1.382–2 and, if applicable, §§ 1.1502–91 through 1.1502–99 (to the extent they effectuate the rules of § 1.382–2), and § 1.382–5 and, if applicable, §§ 1.1502–91 through 1.1502–99 (to the extent they effectuate the rules of § 1.382–5), to a testing date or an ownership change, respectively, that occurs in a taxable year beginning after December 31, 2017, and before November 13, 2020, so long as the taxpayers and their related parties consistently apply the rules of §§ 1.163(j)–1 through –11, 1.382–1, 1.382–2, 1.382–5, 1.382–6, 1.382–7, 1.383–0, and 1.383–1, and, if applicable, §§ 1.263A–9, 1.263A–15, 1.381(c)(20)–1, 1.469–9, 1.469–11, 1.704–1, 1.882–5, 1.1362–3, 1.1368–1, 1.1377–1, 1.1502–13, 1.1502–21, 1.1502–36, 1.1502–79, 1.1502–90, 1.1502–91 through 1.1502–99 (to the extent they effectuate the rules of §§ 1.382–2, 1.382–5, 1.382–6, and 1.383–1), and 1.1504–4, to that taxable year.

Alternatively, taxpayers and their related parties, within the meaning of sections 267(b) and 707(b)(1), may rely on the rules of proposed § 1.382–2 and, if applicable, §§ 1.1502–91 through 1.1502–99 (to the extent they effectuate the rules of § 1.382–2), and § 1.382–5 and, if applicable, §§ 1.1502–91 through 1.1502–99 (to the extent they effectuate the rules of § 1.382–5), which were issued in a notice of proposed rulemaking (REG–106089–18) and published on December 28, 2018, in the **Federal Register** (83 FR 67490), with respect to a testing date or an ownership change, respectively, that occurs in a taxable year beginning after December 31, 2017, and before November 13, 2020, so long as the taxpayers and their related parties consistently apply the rules of proposed §§ 1.163(j)–1 through –11, 1.382–1, 1.382–2, 1.382–5, 1.382–6, 1.382–7, 1.383–0, and 1.383–1, and, if applicable, proposed §§ 1.263A–9, 1.381(c)(20)–1, 1.469–9, 1.469–11, 1.882–5, 1.1502–13, 1.1502–21, 1.1502–36, 1.1502–79, 1.1502–90, 1.1502–91 through 1.1502–99 (to the extent they effectuate the rules of §§ 1.382–2, 1.382–5, 1.382–6, and 1.383–1), and 1.1504–4, to that taxable year. As noted previously, taxpayers relying on the provisions in the notice of proposed rulemaking may apply § 1.163(j)–1(b)(1)(iii) in these final regulations for taxable years ending after December 31, 2017.

FOR FURTHER INFORMATION CONTACT: Concerning § 1.163(j)–1, § 1.163(j)–2, § 1.163(j)–3, § 1.163(j)–9, § 1.263A–9, or § 1.263A–15, Sophia Wang, (202) 317–4890 or Justin Grill, (202) 317–4850; concerning § 1.163(j)–4, § 1.163(j)–5, § 1.163(j)–10, § 1.163(j)–11, § 1.381(c)(20)–1, § 1.382–1, § 1.382–2, § 1.382–5, § 1.382–6, § 1.382–7, § 1.383–0, § 1.383–1, § 1.1502–13, § 1.1502–21, § 1.1502–36, § 1.1502–79, § 1.1502–90, § 1.1502–91, § 1.1502–95, § 1.1502–98, § 1.1502–99, or § 1.1504–4, Russell Jones, (202) 317–5357, John Lovelace, (202) 317–5363, Aglaia Ovtchinnikova, (202) 317–6975, or Marie C. Milnes-Vasquez, (202) 317–3181; concerning § 1.163(j)–6, § 1.469–9(b)(2), § 1.469–11, § 1.704–1, § 1.1362–3, § 1.1368–1, or

§ 1.1377–1, William Kostak, (202) 317–6852, Anthony McQuillen, (202) 317–5027, or Adrienne Mikolashek, (202) 317–5050; concerning § 1.163(j)–7, § 1.163(j)–8, or § 1.882–5, Azeka Abramoff, (202) 317–3800, Angela Holland, (202) 317–5474, or Steve Jensen, (202) 317–6938; concerning § 1.446–3, § 1.860C–2, RICs, REITs, REMICs, and the definition of the term ''interest'', Michael Chin, (202) 317–5846 (not toll-free numbers).

ADDRESSES: Submit electronic submissions to the Federal eRulemaking Portal at *http://www.regulations.gov* (indicate IRS and REG–106089–18) by following the online instructions for submitting comments. Once submitted to the Federal eRulemaking Portal, comments cannot be edited or withdrawn. The Department of the Treasury (Treasury Department) and the Internal Revenue Service (IRS) will publish for public availability any comment received to its public docket, whether submitted electronically or in hard copy. Send hard copy submissions to CC:PA:LPD:PR (REG–106089–18), Room 5203, Internal Revenue Service, P.O. Box 7604, Ben Franklin Station, Washington, DC 20044.

SUPPLEMENTARY INFORMATION:

Background

Table of Contents

I. Overview
II. Comments on and Changes to Proposed § 1.163(j)–1: Definitions
A. Definition and Calculation of Adjusted Taxable Income (ATI)—Proposed § 1.163(j)–1(b)(1)
1. Taxable Income and Tentative Taxable Income
2. Adjustments to ATI for Amounts Incurred as Depreciation, Amortization, and Depletion
3. ATI and Floor Plan Financing Interest
4. Adjustments to Taxable Income in Computing ATI Under Section 163(j)(8)(A)
5. Certain Adjustments to Tentative Taxable Income in Computing ATI Under Section 163(j)(8)(B)

XVI. Definition of Real Property Trade or Business

This document contains amendments to the Income Tax Regulations (26 CFR part 1) under section 163(j) of the Code. The final regulations reflect amendments to section 163(j) made by Public Law 115–97, 131 Stat. 2054 (December 22, 2017), commonly referred to as the Tax Cuts and Jobs Act (the TCJA) and the Coronavirus Aid, Relief, and Economic Security Act, Public Law 116–136 (2020) (the CARES Act). Section 13301(a) of the TCJA amended section 163(j) by removing prior section 163(j)(1) through (9) and adding section 163(j)(1) through (10) and significantly changed the limitation for deducting interest on certain indebtedness. The provisions of section 163(j) as amended by section 13301 of the TCJA are effective for tax years beginning after December 31, 2017. The CARES Act further amended section 163(j) by redesignating section 163(j)(10), as amended by the TCJA, as new section 163(j)(11), and adding a new section 163(j)(10) providing special rules for applying section 163(j) to taxable years beginning in 2019 or 2020. All references to ''old section 163(j)'' in this document are references to section 163(j) prior to amendment by the TCJA and the CARES Act, and all references to ''section 163(j)'' are references to section 163(j) as amended by the TCJA and the CARES Act.

Old section 163(j) generally disallowed a deduction for ''disqualified interest'' paid or accrued by a corporation in a taxable year if the payor's debt-to-equity ratio exceeded 1.5 to 1.0, and if the payor's net interest expense exceeded 50 percent of its adjusted taxable income. Disqualified interest included interest paid or accrued to (1) related parties when no Federal income tax was imposed with respect to such interest; (2) unrelated parties in certain instances in which a related party guaranteed the debt; or (3) certain real estate investment trusts (REIT). Interest amounts disallowed for any taxable year under old section 163(j) were treated as interest paid or accrued in the succeeding taxable year and could be carried forward indefinitely. In addition, any excess limitation, the excess of the taxpayer's net interest expense over 50 percent of its adjusted taxable income, could be carried forward three years. The interest limitation under old section 163(j) was designed to prevent a taxpayer from deducting interest from its U.S. taxable income without a corresponding inclusion in U.S. taxable income by the recipient, or to prevent the stripping of earnings from the U.S. tax system.

In contrast, section 163(j) now applies broadly to all business interest expense regardless of whether the related indebtedness is between related parties or incurred by a corporation, and regardless of the taxpayer's debt-to-equity ratio. Section 163(j) provides an entirely new limitation on the deduction for ''business interest expense'' of all taxpayers, including, for example, individuals, corporations, partnerships, S corporations, unless a specific exclusion applies under section 163(j). Although certain terms are used in both old section 163(j) and section 163(j), such as ''adjusted taxable income,'' such terms have been updated in the final regulations to reflect the new limitation under section 163(j).

Section 163(j) generally limits the amount of business interest expense that can be deducted in the current taxable year (also referred to in this preamble as the current year). Under section 163(j)(1), the amount allowed as a deduction for business interest expense is limited to the sum of (1) the taxpayer's business interest income for the taxable year; (2) 30 percent of the taxpayer's adjusted taxable income (ATI) for the taxable year (30 percent

ATI limitation); and (3) the taxpayer's floor plan financing interest expense for the taxable year. As further described later in this Background section, section 163(j)(10), as amended by the CARES Act, provides special rules relating to the 30 percent ATI limitation for taxable years beginning in 2019 or 2020. The section 163(j) limitation applies to all taxpayers, except for certain small businesses that meet the gross receipts test in section 448(c) and certain trades or businesses listed in section 163(j)(7).

Section 163(j)(2) provides that the amount of any business interest not allowed as a deduction for any taxable year as a result of the section 163(j) limitation is carried forward and treated as business interest paid or accrued in the next taxable year. In contrast to old section 163(j), section 163(j) does not allow the carryforward of any excess limitation.

Section 163(j)(3) provides that the section 163(j) limitation does not apply to a taxpayer, other than a tax shelter as described in section 448(a)(3), with average annual gross receipts of $25 million or less, determined under section 448(c) (including any adjustment for inflation under section 448(c)(4)). For taxpayers other than corporations or partnerships, section 163(j)(3) provides that the gross receipts test is determined for purposes of section 163(j) as if the taxpayer were a corporation or partnership.

Section 163(j)(4) provides special rules for applying section 163(j) in the case of partnerships and S corporations. Section 163(j)(4)(A) requires that the limitation on the deduction for business interest expense be applied at the partnership level, and that a partner's ATI be increased by the partner's share of the partnership's excess taxable income, as defined in section 163(j)(4)(C), but not by the partner's distributive share of the partnership's income, gain, deduction, or loss. Section 163(j)(4)(B)(i) provides that the amount of partnership business interest expense limited by section 163(j)(1) is carried forward at the partner level. Section 163(j)(4)(B)(ii) provides that excess business interest expense allocated to a partner and carried forward is available to be deducted in a subsequent year only if, and to the extent, the partnership allocates excess taxable income to the partner. As further described later in this Background section, section 163(j)(10)(A)(ii)(II), as amended by the CARES Act, provides a special rule for excess business interest expense allocated to a partner in a taxable year beginning in 2019. Section 163(j)(4)(B)(iii) provides basis adjustment rules for a partner that is allocated excess business interest expense. Section 163(j)(4)(D) provides that rules similar to the rules of section 163(j)(4)(A) and (C) apply to S corporations and S corporation shareholders.

Section 163(j)(5) and (6) defines ''business interest'' and ''business interest income,'' respectively, for purposes of section 163(j). Generally, these terms include interest expense and interest includible in gross income that is properly allocable to a trade or business (as defined in section 163(j)(7)) and do not include investment income or investment expense within the meaning of section 163(d). The legislative history states that ''a corporation has neither investment interest nor investment income within the meaning of section 163(d). Thus, interest income and interest expense of a corporation is properly allocable to a trade or business, unless such trade or business is otherwise explicitly excluded from the application of the provision.'' H. Rept. 115–466, at 386, fn. 688 (2017).

Under section 163(j)(7), the limitation on the deduction for business interest expense in section 163(j)(1) does not apply to certain trades or businesses (excepted trades or businesses). The excepted trades or businesses are the trade or business of providing services as an employee, electing real property businesses, electing farming businesses, and certain regulated utility businesses.

Section 163(j)(8) defines ATI as the taxable income of the taxpayer without regard to the following: Items not properly allocable to a trade or business; business interest and business interest income; net operating loss (NOL) deductions; and deductions for qualified business income under section 199A. ATI also generally excludes deductions for depreciation, amortization, and depletion with respect to taxable years beginning before January 1, 2022, and it includes other adjustments provided by the Secretary of the Treasury.

Section 163(j)(9) defines ''floor plan financing interest'' as interest paid or accrued on ''floor plan financing indebtedness.'' These provisions allow taxpayers incurring interest expense for the purpose of securing an inventory of motor vehicles held for sale or lease to deduct the full expense without regard to the section 163(j) limitation.

Under section 163(j)(10)(A)(i), the amount of business interest that is deductible under section 163(j)(1) for taxable years beginning in 2019 or 2020 is computed using 50 percent, rather than 30 percent, of the taxpayer's ATI for the taxable year (50 percent ATI limitation). A taxpayer may elect not to apply the 50 percent ATI limitation to any taxable year beginning in 2019 or 2020, and instead apply the 30 percent ATI limitation. The election must be made separately for each taxable year. Once the taxpayer makes the election, the election may not be revoked without the consent of the Secretary of the Treasury or his delegate. See section 163(j)(10)(A)(iii).

Sections 163(j)(10)(A)(ii)(I) and 163(j)(10)(A)(iii) provide that, in the case of a partnership, the 50 percent ATI limitation does not apply to partnerships for taxable years beginning in 2019, and the election to not apply the 50 percent ATI limitation may be made only for taxable years beginning in 2020. This election may be made only by the partnership and may not be revoked without the consent of the Secretary of the Treasury or his delegate. Under section 163(j)(10)(A)(ii)(II), however, a partner treats 50 percent of its allocable share of a partnership's excess business interest expense for 2019 as a business interest expense in the partner's first taxable year beginning in 2020 that is not subject to the section 163(j) limitation (50 percent EBIE rule). The remaining 50 percent of the partner's allocable share of the partnership's excess business interest expense remains subject to the section 163(j) limitation applicable to excess business interest expense carried forward at the partner level. A partner may elect out of the 50 percent EBIE rule.

Section 163(j)(10)(B)(i) allows a taxpayer to elect to use its ATI for the last taxable year beginning in 2019 for the taxpayer's ATI in determining the taxpayer's section 163(j) limitation for any taxable year beginning in 2020.

Section 163(j)(11) provides cross-references to provisions requiring that electing farming businesses and electing real property businesses excepted from the section 163(j) limitation use the alternative depreciation system (ADS), rather than the general depreciation system for certain types of property. The required use of ADS results in the inability of these electing trades or businesses to use the additional first-year depreciation deduction under section 168(k) for those types of property.

On December 28, 2018, the Treasury Department and the IRS (1) published proposed regulations under section 163(j) in a notice of proposed rulemaking (REG–106089–18) (proposed regulations) in the **Federal Register** (83 FR 67490), and (2) withdrew the notice of proposed rulemaking (1991–2 C.B. 1040) published in the **Federal Register** on June 18, 1991 (56 FR 27907) (as corrected by 56 FR 40285 (August 14, 1991)) to implement rules under old section 163(j) (1991 Proposed Regulations). The proposed regulations were issued following guidance announcing and describing regulations intended to be issued under section 163(j). See Notice 2018–28, 2018–16 I.R.B. 492.

A public hearing was held on February 27, 2019. The Treasury Department and the IRS received written comments responding to the notice of proposed rulemaking. Comments received before the final regulations were substantially developed, including all comments received on or before the deadline for comments on February 26, 2019, were carefully considered in developing the final regulations.

Copies of the comments received are available for public inspection at *http://www.regulations.gov* or upon request. After consideration of the comments received and the testimony at the public hearing, this Treasury decision adopts the proposed regulations as revised in response to such comments and testimony as described in the Summary of Comments and Explanation of Revisions section. The revisions are discussed in this preamble. Concurrently with the publication of the final regulations, the Treasury Department and the IRS are publishing in the Proposed Rule section of this edition of the **Federal Register** (RIN 1545–BO76) a notice of proposed rulemaking providing additional proposed regulations under section 163(j) (REG–107911–18) (Concurrent NPRM). The Concurrent NPRM includes proposed regulations relating to changes made to section 163(j) under the CARES Act.

On September 10, 2019, the Treasury Department and the IRS published proposed regulations under section 382(h) (REG–125710–18) in the **Federal Register** (84 FR 47455) (the September 2019 section 382 proposed regulations). The September 2019 section 382 proposed regulations included a rule to clarify that section 382 disallowed business interest carryforwards are not treated as recognized built-in losses (RBILs). No formal comments were received on this rule during the comment period for the September 2019 section 382 proposed regulations.

On April 10, 2020, the Treasury Department and the IRS released Revenue Procedure 2020–22, 2020–18 I.R.B. 745, to provide the time and manner of making a late election, or withdrawing an election under section 163(j)(7)(B) to be an electing real property trade or business, or under section 163(j)(7)(C) to be an electing farming business, for taxable years beginning in 2018, 2019, or 2020. Revenue Procedure 2020–22 also provides the time and manner of making or revoking elections provided by the CARES Act under section 163(j)(10) for taxable years beginning in 2019 or 2020. As described earlier in this Background section, these elections are: (1) To not apply the 50 percent ATI limitation under section 163(j)(10)(A)(iii); (2) to use the taxpayer's ATI for the last taxable year beginning in 2019 to calculate the taxpayer's section 163(j) limitation in 2020 under section 163(j)(10)(B); and (3) for a partner to elect out of the 50 percent EBIE rule under section 163(j)(10)(A)(ii)(II).

Summary of Comments and Explanation of Revisions

I. Overview

The Treasury Department and the IRS received approximately 120 written comments in response to the notice of proposed rulemaking. Most of the comments addressing the proposed regulations are summarized in this Summary of Comments and Explanation of Revisions section. However, comments merely summarizing or interpreting the proposed regulations or recommending statutory revisions generally are not discussed in this preamble. Additionally, comments outside the scope of this rulemaking are generally not addressed in this Summary of Comments and Explanation of Revisions section.

The Treasury Department and the IRS continue to study comments on certain issues related to section 163(j), including issues that are beyond the scope of the final regulations (or the Concurrent NPRM in the Proposed Rules section of this issue of the **Federal Register**), and may discuss those comments if future guidance on those issues is published.

The final regulations retain the same basic structure as the proposed regulations, with certain revisions.

II. Comments on and Changes to Proposed § 1.163(j)–1: Definitions

Section 1.163(j)–1 provides definitions of the terms used in the final regulations. The following discussion addresses comments relating to proposed § 1.163(j)–1.

A. Definition and Calculation of Adjusted Taxable Income (ATI)—Proposed § 1.163(j)–1(b)(1)

1. Taxable Income and Tentative Taxable Income

Consistent with section 163(j)(8), proposed § 1.163(j)–1(b)(1) defines ATI as the ''taxable income'' of the taxpayer for the taxable year, with certain specified adjustments. Thus, in calculating ATI, the proposed regulations begin with taxable income as the amount to which adjustments are made when calculating ATI. Proposed § 1.163(j)–1(b)(37)(i) generally provides that the term ''taxable income'' has the meaning provided in section 63, but for purposes of section 163(j), is computed without regard to the application of section 163(j) and the section 163(j) regulations. However, in some instances in the section 163(j) regulations the term ''taxable income'' is used to indicate the amount calculated under section 63 for purposes other than calculating ATI.

To prevent confusion from using the term ''taxable income'' in different contexts (in determining ATI, and for purposes other than determining ATI), the final regulations use a new term, ''tentative taxable income,'' to refer to the amount to which adjustments are made in calculating ATI. See § 1.163(j)–1(b)(43). Tentative taxable income is generally determined in the same manner as taxable income under section 63, but is computed without regard to the application of the section 163(j) limitation, and without regard to any disallowed business interest expense carryforwards. This definitional change avoids confusion with section 63 taxable income, avoids creating an iterative loop that takes into account the section 163(j) limitation, and ensures that disallowed business interest expense carryforwards are taken into account only once in testing business interest expense against the limitation.

Therefore, ''tentative taxable income'' is used in the final regulations and, where appropriate, in this Summary of Comments and Explanation of Provisions section, to describe the starting point for the calculation of ATI in the final regulations. See part II(G)(1) of this Summary of Comments and Explanation of Revisions section.

2. Adjustments to ATI for Amounts Incurred as Depreciation, Amortization, and Depletion

Section 163(j)(8)(A)(v) defines ATI as the taxable income of the taxpayer computed without regard to certain items, including any deduction allowable for depreciation, amortization, or depletion for taxable years beginning before January 1, 2022. Consistent with section 163(j)(8)(A)(v), proposed § 1.163(j)–1(b)(1)(i) requires an addback to taxable income of deductions for depreciation, amortization, and depletion for taxable years beginning before January 1, 2022. In general, section 263A requires certain taxpayers that manufacture or produce inventory to capitalize all direct costs and certain indirect costs into the basis of the property produced or acquired for resale. Depreciation, amortization or depletion that is capitalized into inventory under section 263A is recovered through cost of goods sold as an offset to gross receipts in computing gross income; cost of goods sold reduces the amount realized upon the sale of goods that is used to calculate gross income and is technically not a deduction that is applied against gross income in determining taxable income. See §§ 1.61–3(a) and 1.263A–1(e)(3)(ii)(I) and (J). Thus, proposed § 1.163(j)–1(b)(1)(iii) provides that depreciation, amortization, or depletion expense capitalized into inventory under section 263A is not a depreciation, amortization, or depletion deduction, that may be added back to taxable income in computing ATI. The preamble to the proposed regulations further noted that an amount that is incurred as depreciation, amortization, or depletion, but that is capitalized to inventory under section 263A and included in costs of goods sold, is not a deduction for depreciation, amortization, or depletion for purposes of section 163(j).

Many commenters raised questions and concerns regarding proposed § 1.163(j)–1(b)(1)(iii) and requested that the addback of deductions for depreciation, amortization, and depletion include any amount that is required to be capitalized into inventory under section 263A. First, commenters stated that the provision does not reflect congressional intent, which was to determine ATI using earnings before interest, tax, depreciation, and amortization (EBITDA) through taxable year 2021 and using earnings before interest and tax (EBIT) thereafter. Commenters noted that the proposed rule would eliminate this distinction for certain manufacturers or producers of property for sale. Commenters pointed out that capital-intensive businesses that manufacture or produce inventory are at a disadvantage in comparison to other types of businesses because the manufacturers or producers would have to compute ATI without an addback for a substantial amount of their depreciation, and that neither section 163(j) nor its legislative history indicates an intent by Congress to treat manufacturers or producers of inventory differently from other trades or businesses. Commenters also contrasted the language in section 163(j)(8)(A)(iv), which allows an addback of ''the amount of any deduction *allowed* under section 199A,'' with section 163(j)(8)(A)(v), which allows an addback of ''any deduction *allowable* for depreciation, amortization, or depletion'' (emphasis added).

The phrase ''allowed or allowable'' is used in other Code provisions. Section 1016(a)(2) provides that, in calculating tax basis, adjustments are required for depreciation to the extent such amounts are allowed as deductions in computing taxable income but not less than the amounts allowable. Some commenters noted that depreciation allowable as a deduction for purposes of section 1016(a)(2) should be read consistently with depreciation allowable as a deduction for purposes of section 163(j), and that section 1016(a)(2) treats depreciation capitalized into inventory under section 263A as deductions allowable. As provided in section 263A(a)(2) and § 1.263A–1(c)(2), an amount is not subject to capitalization under section 263A unless such cost may be taken into account in computing taxable income.

The Treasury Department and the IRS have reconsidered proposed § 1.163(j)–1(b)(1)(iii). Accordingly, under the final regulations, the amount of any depreciation, amortization, or depletion that is capitalized into inventory under section 263A during taxable years beginning before January 1, 2022, is added back to tentative taxable income as a deduction for depreciation, amortization, or depletion when calculating ATI for that taxable year, regardless of the period in which the capitalized amount is recovered through cost of goods sold. For example, if a taxpayer capitalized an amount of depreciation to inventory under section 263A in the 2020 taxable year, but the inventory is not sold until the 2021 taxable year, the entire capitalized amount of depreciation is added back to tentative taxable income in the 2020 taxable year, and such capitalized amount of depreciation is not added back to tentative taxable income when the inventory is sold and recovered through cost of goods sold in the 2021 taxable year. Under such facts, the entire capitalized amount is deemed to be included in the calculation of the taxpayer's tentative taxable income for the 2020 taxable year, regardless of the period in which the capitalized amount is actually recovered. See §§ 1.163(j)–1(b)(1)(iii) and 1.163(j)–2(h)(3).

Further, in order to treat similarly situated taxpayers similarly, the final regulations allow taxpayers, and their related parties within the meaning of sections 267(b) and 707(b)(1), otherwise relying on the proposed regulations in their entirety under § 1.163(j)–1(c) to alternatively choose to follow § 1.163(j)–1(b)(1)(iii) rather than proposed § 1.163(j)–1(b)(1)(iii). See § 1.163(j)–1(c).

The Treasury Department and the IRS note that neither proposed § 1.163(j)–1(b)(1) nor § 1.163(j)–1(b)(1) determines the amount of allowed or allowable depreciation, amortization, or depletion for purposes of any other Code section (for example, sections 167(c), 1016(a)(2), 1245, and 1250). Accordingly, no inference should be drawn regarding the determination of the amount of allowed or allowable depreciation, amortization, or depletion under any other Code section based on proposed § 1.163(j)–1(b)(1) or § 1.163(j)–1(b)(1).

In addition to comments about whether depreciation, amortization, and depletion include amounts recovered through cost of goods sold, a commenter requested clarification that section 179 deductions are depreciation deductions for purposes of section 163(j)(8)(A)(v) and proposed § 1.163(j)–1(b)(1)(i)(D). Section 179 deductions are allowed to be added back as amortization under proposed § 1.163(j)–1(b)(1)(i)(E), which allows an addback of any deduction for the amortization of intangibles (for example, under section 167 or 197) and other amortized expenditures (for example, under section 195(b)(1)(B), 248, or 1245(a)(2)(C)), for taxable years beginning before January 1, 2022. Section 1245(a)(2)(C) provides ''any deduction allowable under sections 179, 179B, 179C, 179D, 179E, 181, 190, 193, or 194 shall be treated as if it were a deduction allowable for amortization.'' Because section 179 deductions are included as amortization under proposed § 1.163(j)–1(b)(1)(i)(E), rather than as depreciation under proposed § 1.163(j)–1(b)(1)(i)(D), no clarification is necessary in the final regulations. See § 1.163(j)–1(b)(1)(i)(E).

3. ATI and Floor Plan Financing Interest

Consistent with section 163(j)(8)(A)(ii), the proposed regulations provide that any business interest expense or business interest income is added back to (in the case of business interest expense) or subtracted from (in the case of business interest income) taxable income in computing ATI. Because business interest expense includes floor plan financing interest expense, ATI is further adjusted by subtracting from it any floor plan financing interest expense under proposed § 1.163(j)–1(b)(1)(ii)(B). Floor plan financing interest expense is also separately included in the section 163(j) limitation as provided in section 163(j)(1)(C).

One commenter suggested that floor plan financing interest expense should not be subtracted from ATI because such adjustment is inconsistent with the statute and the ordering implied by section 168(k)(9)(B). The addition of floor plan financing interest expense as business interest in the calculation of ATI is consistent with section 163(j)(8)(A)(ii). The purpose of subtracting floor plan financing interest expense from tentative taxable income to compute ATI is to avoid the double benefit that would result upon separately including floor plan financing interest expense in the computation of the section 163(j) limitation. If floor plan financing interest expense were included in ATI without a corresponding subtraction, thus resulting in an increased ATI, taxpayers with such expense would be able to increase their section 163(j) limitation not only by the separately stated floor plan financing interest under section 163(j)(1)(C), but also by the inclusion of such amount in ATI, which would permit a deduction of $1.30 (or $1.50, if the 50 percent ATI limitation is applicable) of business interest expense for each $1 of floor plan financing interest expense. Although it is clear that Congress did not intend to limit the deduction for floor plan financing interest expense under section 163(j), there is no indication that Congress also intended to provide the additional benefit of an increased ATI related to floor plan financing interest expense. Therefore, under the authority granted in section 163(j)(8)(B), the final regulations adopt the proposed rule without change to include a subtraction of floor plan financing interest expense from tentative taxable income in computing ATI.

Several commenters also requested clarification and submitted recommendations on the interaction between section 168(k)(9) and section 163(j). Section 168(k)(9)(B) provides that the additional first-year depreciation deduction is not allowed for any property used in a trade or business that has had floor plan financing indebtedness (as defined in section 163(j)(9)), if the floor plan financing interest related to such indebtedness was taken into account under section 163(j)(1)(C).

First, commenters requested that floor plan financing indebtedness not be treated as taken into account if the sum of business interest income and 30 percent of ATI (the sum of section 163(j)(1)(A) and section 163(j)(1)(B)) is greater than the business interest expense paid or accrued in the taxable year. Second, if the sum of business interest income and 30 percent of ATI is less than the business interest expense paid or accrued in the taxable year, commenters requested that taxpayers be given the option to either include floor plan financing interest to increase the section 163(j) limitation, or to forgo the use of floor plan financing interest to increase the section 163(j) limitation (any forgone floor plan financing interest would be included in the disallowed business interest expense carryforward under proposed § 1.163(j)–2(c)) in order to utilize the additional first-year depreciation deduction under section 168(k).

Section 163(j) does not provide any guidance on the availability of section 168(k) for taxpayers that have had floor plan financing interest expense. As these comments relate to the operation of section 168(k)(9), taxpayers should look to Treasury Department or IRS guidance provided under section 168(k) for clarification. On September 24, 2019, the Treasury Department and the IRS published in the **Federal Register** final regulations (TD 9874, 84 FR 50108) and proposed regulations (REG–106808–19, 84 FR 50152) under section 168(k). The rules regarding when floor plan financing interest expense is ''taken into account'' for purposes of 168(k) are in the proposed regulations under § 1.168(k)–2(b)(2)(ii)(G). Accordingly, these final regulations do not address the interaction between section 163(j) and section 168(k)(9) regarding floor plan financing interest expense.

4. Adjustments to Taxable Income in Computing ATI Under Section 163(j)(8)(A)

Section 163(j)(8)(A) provides that ATI means taxable income ''computed without regard to'' the specified adjustments. The purpose of the adjustments listed in section 163(j)(8)(A) is to keep certain items, such as deductions for depreciation, amortization, depletion, or NOL carryforward amounts, from directly increasing or decreasing the amount of the deduction for business interest expense. Therefore, the Treasury Department and the IRS have determined that the adjustments listed in section 163(j)(8)(A) should adjust tentative taxable income for purposes of calculating ATI under § 1.163(j)–1(b)(1) only to the extent that they have been reflected (or deemed reflected, as in the case of certain amounts capitalized into inventory under section 263A as discussed in part II(A)(2) of this Summary of Comments and Explanation of Revisions section) in tentative taxable income under § 1.163(j)–1(b)(43).

A commenter requested that the definition of ATI not include some of the adjustments listed in section 163(j)(8)(A), such as the adjustments for NOL deductions and deductions under section 199A. The Treasury Department and the IRS do not have authority to ignore these clear and unambiguous statutory adjustments. Thus, the final regulations do not incorporate the commenter's suggestion.

5. Certain Adjustments to Tentative Taxable Income in Computing ATI Under Section 163(j)(8)(B)

Under the authority granted in section 163(j)(8)(B), the proposed regulations include several adjustments to taxable income in computing ATI to address certain sales or other dispositions of depreciable property, stock of a consolidated group member, or interests in a partnership. Proposed § 1.163(j)–1(b)(1)(ii)(C) provides that, if property is sold or otherwise disposed of, the lesser of the amount of gain on the disposition or the amount of depreciation, amortization, or depletion deductions (collectively, depreciation deductions) with respect to the property for the taxable years beginning after December 31, 2017 and before January 1, 2022 (such years, the EBITDA period) is subtracted from taxable income to determine ATI. Proposed § 1.163(j)–1(b)(1)(ii)(D) provides that, with respect to the sale or other disposition of stock of a member of a consolidated group that includes the selling member, the investment adjustments (see § 1.1502–32) with respect to such stock that are attributable to deductions described in proposed § 1.163(j)–1(b)(1)(ii)(C) are subtracted from taxable income. In turn, proposed § 1.163(j)–1(b)(1)(ii)(E) provides that, with respect to the sale or other disposition of an interest in a partnership, the taxpayer's distributive share of deductions described in proposed § 1.163(j)–1(b)(1)(ii)(C) with respect to property held by the partnership at the time of such disposition is subtracted from taxable income to the extent such deductions were allowable under section 704(d).

In general, when a taxpayer takes depreciation deductions with respect to an asset, the taxpayer must reduce its adjusted basis in the asset accordingly. As a result, the taxpayer will realize additional gain (or less loss) upon the subsequent disposition of the asset than the taxpayer would have realized absent depreciation deductions. Thus, except with regard to timing (and, in some cases, character), depreciation deductions should have no net effect on a taxpayer's taxable income.

In order to mitigate the effects of the section 163(j) limitation during the EBITDA period, Congress provided an adjustment to taxable income for depreciation deductions. More specifically, as discussed in part II(A)(2) of this Summary of Comments and Explanation of Revisions section, depreciation deductions are added back to taxable income during the EBITDA period, thereby increasing a taxpayer's ATI and its section 163(j) limitation. Congress intended this adjustment to be a timing provision that delays the inclusion of depreciation deductions in calculating a taxpayer's section 163(j) limitation. Stated differently, Congress intended to allow taxpayers to accelerate the recognition of gain attributable to depreciation deductions when computing ATI.

However, if a taxpayer were to sell its depreciable property after making the foregoing adjustment to ATI, the taxpayer would realize additional gain (or less loss) on the disposition as a result of its depreciation deductions, and the taxpayer's ATI would be increased yet again. Similarly, if the depreciable property were held by a member of a consolidated group (S), and if another member of the group were to sell S's stock after making negative adjustments to its basis in S's stock under § 1.1502–32 to reflect S's depreciation deductions, the consolidated group's ATI would be increased yet again. A similar double benefit would arise with respect to interests in a partnership if, after the partner's basis in its partnership interest is reduced by depreciation deductions associated with the depreciable property, ATI were to reflect that reduced basis upon a subsequent sale of the partnership interest.

Proposed § 1.163(j)–1(b)(1)(ii)(C), (D), and (E) were intended to address these situations and ensure that the positive adjustment for depreciation deductions during the EBITDA period merely defers (rather than permanently excludes) depreciation deductions from a taxpayer's calculation of the section 163(j) limitation.

Commenters submitted various questions and comments about these provisions. First, a commenter questioned whether these proposed subtractions from taxable income are an advisable exercise of the authority granted in section 163(j)(8)(B) in light of congressional silence on the issue. However, the 1991 Proposed Regulations contained similar subtractions from taxable income in computing ATI. The 1991 Proposed Regulations had been outstanding for more than 25 years when Congress enacted the TCJA. Thus, Congress likely was well aware of these adjustments when it granted the Secretary of the Treasury the authority to make adjustments in new section 163(j)(8)(B). Moreover, there is no indication that Congress intended to preclude the Secretary from making adjustments similar to those in the 1991 Proposed Regulations.

Second, commenters asked why the subtraction from taxable income in proposed § 1.163(j)–1(b)(1)(ii)(D) does not include a ''lesser of'' calculation similar to proposed § 1.163(j)–1(b)(1)(ii)(C), and they questioned whether the ''lesser of'' calculation in proposed § 1.163(j)–1(b)(1)(ii)(C) captures the correct amount. For example, if a taxpayer purchased property for $100x, fully depreciated the property, and then sold the property for $60x, should the amount that is backed out under proposed § 1.163(j)–1(b)(1)(ii)(C) be $60x or $100x? Commenters also stated that the presence of a ''lesser of'' limitation in proposed § 1.163(j)–1(b)(1)(ii)(C) and the absence of such a limitation in proposed § 1.163(j)–1(b)(1)(ii)(D) can yield discontinuities. For example, if S (a member of P's consolidated group) uses $50x to purchase an asset that it fully depreciates under section 168(k) (resulting in a $50x reduction in P's basis in its S stock under § 1.1502–32), and if S sells the depreciated asset for $25x the following year, the P group would have to subtract $25x from taxable income under proposed § 1.163(j)–1(b)(1)(ii)(C), whereas the group would have had to reduce its taxable income by $50x under proposed § 1.163(j)–1(b)(1)(ii)(D) if P had sold its S stock instead. Commenters recommended several solutions to address this discontinuity, including eliminating the ''lesser of'' test.

Proposed § 1.163(j)–1(b)(1)(ii)(D) does not include a ''lesser of'' calculation because such a calculation would require consolidated groups to value their assets each time there is a sale of member stock. However, the Treasury Department and the IRS recognize the discrepancy in taxable income adjustments between asset dispositions and member stock dispositions under the proposed regulations. To eliminate this discrepancy, the final regulations revise proposed § 1.163(j)–1(b)(1)(ii)(C) by eliminating the ''lesser of'' standard and requiring taxpayers to back out depreciation deductions that were allowed or allowable during the EBITDA period with respect to sales or dispositions of property. This revised approach is consistent with the adjustment for asset sales in the 1991 Proposed Regulations, is simpler for taxpayers to administer than the ''lesser of'' approach in the proposed regulations, and renders moot questions as to whether that ''lesser of'' calculation captures the correct amount. However, the Treasury Department and the IRS also recognize that, in certain cases, a ''lesser of'' computation would not be difficult to administer. Thus, the Concurrent NPRM provides taxpayers the option to apply the ''lesser of'' standard, so long as they do so consistently. See proposed § 1.163(j)–1(b)(1)(iv)(E) of the Concurrent NPRM.

Third, commenters asked whether the application of proposed § 1.163(j)–1(b)(1)(ii)(C) and (D) to the same consolidated group member would result in an inappropriate double inclusion if the asset sale precedes the stock sale, and whether proposed § 1.163(j)–1(b)(1)(ii)(C) should continue to apply to a group member if the sale of member stock precedes the asset sale. For example, S (a member of P's consolidated group) takes a $50x depreciation deduction in 2020 with respect to asset X, P's basis in its S stock is reduced accordingly under § 1.1502–32, and $50x is added back to the P group's tentative taxable income in computing its 2020 ATI. In 2021, S realizes a $50x gain upon the sale of asset X, P's basis in its S stock is increased accordingly by $50x under § 1.1502–32, and the P group subtracts $50x from its tentative taxable income under proposed § 1.163(j)–1(b)(1)(ii)(C) in computing its 2021 ATI. Then, in 2022, P sells the S stock to an unrelated buyer. Must P subtract another $50x from its tentative taxable income under proposed § 1.163(j)–1(b)(1)(ii)(D)? What if the order of sales were reversed (with P selling its S stock to a member of another consolidated group in 2021 and S selling asset X in 2022)—would both consolidated groups be required to subtract $50x from tentative taxable income in computing ATI? To prevent duplicative adjustments under proposed § 1.163(j)–1(b)(1)(ii)(C) and (D), commenters recommended that these rules ''turn off'' further subtractions once a subtraction already has been made under either provision, and that the application of proposed § 1.163(j)–1(b)(1)(ii)(C) be limited to the group in which the depreciation deductions accrued.

The Treasury Department and the IRS agree that the application of § 1.163(j)–1(b)(1)(ii)(C) and (D) to the same consolidated group member would result in an inappropriate double inclusion, and that proposed § 1.163(j)–1(b)(1)(ii)(C) should not apply to a former group member with respect to depreciation deductions claimed by the member in a former group. Thus, § 1.163(j)–1(b)(1)(iv)(D) provides anti-duplication rules to ensure that neither § 1.163(j)–1(b)(1)(ii)(C) nor § 1.163(j)–1(b)(1)(ii)(D) applies if a subtraction for the same economic amount already has been required under either provision.

For example, assume that P wholly owns S1, which wholly owns S2, which owns depreciable asset Q, and that S1 and S2 are members of P's consolidated group. Further assume that S2's depreciation deductions with respect to asset Q have resulted in investment adjustments in S1's stock in S2 and in P's stock in S1. If S1 were to sell its S2 stock to a third party, adjustments to the P group's tentative taxable income would be required under proposed § 1.163(j)–1(b)(1)(ii)(D). If P later were to sell its S1 stock to a third party, an additional adjustment under proposed § 1.163(j)–1(b)(1)(ii)(D) would not be required with respect to investment adjustments attributable to asset Q.

Fourth, commenters observed that these proposed subtractions from taxable income in computing ATI are required even if the disposition of the depreciable property, member stock, or partnership interest occurs many years after the EBITDA period. Commenters expressed concern that tracking depreciation deductions for purposes of these adjustments could become burdensome, and a commenter questioned the appropriateness in proposed § 1.163(j)–1(b)(1)(ii)(C) of treating all gain upon the disposition of property after the EBITDA period as attributable to depreciation deductions during the EBITDA period.

Commenters are correct in observing that these proposed adjustments to taxable income in computing ATI must be made even if the relevant depreciable asset, member stock, or partnership interest is disposed of after the EBITDA period. However, the Treasury Department and the IRS note that members of consolidated groups already must track depreciation deductions to calculate separate taxable income (see § 1.1502–12) and to preserve the location of tax items (see § 1.1502–13). Additionally, all taxpayers must track depreciation deductions on an asset-by-asset basis for purposes of section 1245. Thus, the Treasury Department and the IRS have determined that the adjustments proposed in § 1.163(j)–1(b)(1)(ii)(C), (D), and (E) should not impose a significant administrative burden in many situations. The Treasury Department and the IRS further note that eliminating the ''lesser of'' standard in proposed § 1.163(j)–1(b)(1)(ii)(C) (see the response to the second comment in this part of the Summary of Comments and Explanation of Revisions section) will render moot the commenter's concern about the calculation of gain.

Fifth, a commenter asked whether the term ''sale or other disposition'' in proposed § 1.163(j)–1(b)(1)(ii)(C), (D), and (E) is intended to apply to the transfer of stock of a consolidated group member in an intercompany transaction (within the meaning of § 1.1502–13(b)(1)(i)) or to the transfer of assets in a nonrecognition transaction to which section 381 applies (a section 381 transaction).

As provided in proposed § 1.163(j)–4(d)(2), a consolidated group has a single section 163(j) limitation, and intercompany items and corresponding items are disregarded for purposes of calculating the group's ATI to the extent they offset in amount. The Treasury Department and the IRS have determined that regarding intercompany items and corresponding items for purposes of § 1.163(j)–1(b)(1)(ii)(C) and (D) would be inconsistent with this general approach. Thus, § 1.163(j)–1(b)(1)(iv)(A)(*2*) provides that an intercompany transaction should not be treated as a ''sale or other disposition'' for purposes of § 1.163(j)–1(b)(1)(ii)(C) and (D).

In turn, the transfer of depreciable assets in a section 381 transaction generally should not be treated as a ''sale or other disposition'' because the transfer does not affect ATI and because the transferee corporation is the successor to the transferor corporation. Thus, the final regulations generally provide that a transfer of an asset to an acquiring corporation in a transaction to which section 381(a) applies is not treated as a ''sale or other disposition'' for purposes of § 1.163(j)–1(b)(1)(ii)(C), (D), and (E). However, if a member leaves a consolidated group, that transaction generally is treated as a sale or other disposition under the final regulations for purposes of § 1.163(j)–1(b)(1)(ii)(C) and (D), regardless of whether the transaction is a section 381 transaction, because the adjustment to ATI under these provisions should be reflected on the tax return of the group that received the benefit of the earlier increase in ATI.

Sixth, a commenter asked for clarification as to when the adjustment in proposed § 1.163(j)–1(b)(1)(ii)(D) is required and which investment adjustments under § 1.1502–32 are treated as ''attributable to'' depreciation deductions for purposes of this provision. For example, P wholly and directly owns both S and S1 (members of P's consolidated group). In 2021, S purchases asset X for \$100x and fully depreciates asset X under section 168(k), and P reduces its basis in its S stock by \$100x under § 1.1502–32. In 2022, P contributes the stock of S to S1 in an intercompany transaction (which, as noted previously, is not treated as a ''sale or other disposition'' for purposes of proposed § 1.163(j)–1(b)(1)(ii)(C) and (D)). If P later sells the S1 stock, is the adjustment in proposed § 1.163(j)–1(b)(1)(ii)(D) required even though no adjustment to P's basis in the S1 stock under § 1.1502–32 is ''attributable to'' the \$100x of depreciation deductions taken with respect to asset X?

The Treasury Department and the IRS have determined that the adjustment to tentative taxable income in proposed § 1.163(j)–1(b)(1)(ii)(D) should apply in the foregoing situation. The final regulations have been revised to provide that, for these purposes, P's stock in S1 would be treated as a successor asset (within the meaning of § 1.1502–13(j)(1)) to P's stock in S.

Seventh, commenters stated that there should be no adjustments to taxable income under proposed § 1.163(j)–1(b)(1)(ii)(C), (D), and (E) if and to the extent that adding back depreciation deductions pursuant to section 163(j)(8)(A)(v) and proposed § 1.163(j)–1(b)(1)(i) did not increase the amount of business interest expense the taxpayer could have deducted in the year the deductions were incurred. For example, in 2021, corporation C has \$500x of ATI (computed by adding back \$50x of depreciation deductions with respect to asset X) and \$100x of business interest expense. Without adding back the depreciation deductions, C's ATI would have been \$450x, C's section 163(j) limitation would have been \$135x (\$450x × 30 percent), and C still could have deducted all \$100x of its business interest expense in that year. In 2022, C has \$90x of business interest expense and \$300x of ATI. C sells asset X for a \$50x gain in that year. If C were required to reduce its ATI by \$50x (from \$300x to \$250x) in 2022 under proposed § 1.163(j)–1(b)(1)(ii)(C), its section 163(j) limitation would be reduced to \$75x (\$250x × 30 percent), and C would not be able to deduct all \$90x of its business interest expense in 2022 even though C derived no benefit from adding back its depreciation deductions to taxable income in 2021.

The Treasury Department and the IRS have determined that predicating the application of proposed § 1.163(j)–1(b)(1)(ii)(C), (D), and (E) upon whether a taxpayer derived a benefit under section 163(j) from adding back its depreciation deductions to taxable income would involve significant additional complexity. In addition, this approach would have an effect similar to allowing a carryforward of these amounts to the taxable year in which gain on the related items is recognized on a sale or other disposition. Such a carryforward is inconsistent with the general approach of section 163(j), which does not permit a carryforward of excess ATI to later taxable years. As noted earlier in this part II(A)(5) of this Summary of Comments and Explanation of Revisions section, depreciation deductions should have no net effect on the amount of a taxpayer's taxable income (except with respect to timing and, perhaps, character). Thus, if a taxpayer sells an asset with respect to which the taxpayer has taken depreciation deductions, the increase in gain (or decrease in loss) upon the sale should be reversed under proposed § 1.163(j)–1(b)(1)(ii)(C).

6. Adjustments to Adjusted Taxable Income in Respect of United States Shareholders of CFCs

Some commenters argued that United States shareholders, as defined in section 951(b) (U.S. shareholders), of controlled foreign corporations, as defined in section 957(a) (CFCs), should be allowed to include in their ATI the amounts included in gross income under section 951(a) (subpart F inclusions), section 951A(a) global intangible low-taxed income (GILTI) inclusions, and section 78 ''gross-up'' inclusions (collectively, CFC income inclusions) attributable to non-excepted trades or businesses. Because section 163(j) applies to CFCs, the Treasury Department and the IRS have determined that allowing a U.S. shareholder to include its CFC income inclusions in its ATI would not be appropriate. The income of the CFC that gives rise to such income is taken into account in computing the ATI of the CFC for purposes of determining its section 163(j) limitation, and allowing the same income to also be taken into account in computing the ATI of a U.S. shareholder would result in an inappropriate double-counting of income.

Furthermore, the Treasury Department and the IRS question the premise of several comments that, if the business interest expense of a CFC were excluded from the application of section 163(j), including the income of a CFC in a U.S. shareholder's ATI would be appropriate. Even if section 163(j) did not apply to CFCs, CFCs are entities that also may be leveraged. Thus, permitting the income of the CFC that gives rise to CFC income inclusions attributable to non-excepted trades or businesses of CFCs to be included in the ATI of U.S. shareholders would be inconsistent with the principles of section 163(j).

In particular, consider a case in which a CFC has interest expense of $100x, trade or business gross income of $300x treated as subpart F income, and no foreign tax liability. In such a case, a U.S. shareholder that wholly owns the CFC would have a subpart F inclusion of $200x (if section 163(j) did not apply to CFCs). If the $200x subpart F inclusion were included in the ATI of the U.S. shareholder, the U.S. shareholder could deduct an additional $60x of business interest expense ($200x × 30 percent). As a result, $300x of gross income could support $160x of interest expense deductions rather than the $90x permitted under section 163(j)(1).

Finally, under the final regulations (and consistent with proposed § 1.163(j)–7(d)(1)(ii)), if a domestic partnership includes amounts in gross income under sections 951(a) and 951A(a) with respect to an applicable CFC and such amounts are investment income to the partnership, then, a domestic C corporation partner's distributive share of such amounts that are properly allocable to a non-excepted trade or business of the domestic C corporation by reason of §§ 1.163(j)–4(b)(3) and 1.163(j)–10(c) are excluded from the domestic C corporation partner's ATI.

B. Definition of Business Interest Expense—Proposed § 1.163(j)–1(b)(2)

The proposed regulations provide that business interest expense includes interest expense allocable to a non-excepted trade or business, floor plan financing interest expense, and disallowed business interest expense carryforwards. The Treasury Department and the IRS received informal questions about the interaction between section 163(j) and sections 465 and 469, which may operate to disallow a deduction for business interest expense even if such expense was allowable after the application of section 163(j). More specifically, questions have arisen regarding how to treat amounts of business interest expense that are disallowed under section 465 or 469, including which amounts carry forward to subsequent taxable years but keep their character as interest expense, and which amounts, if any, are business interest expense in such subsequent taxable years.

If amounts of business interest expense that are disallowed under section 465 or 469 are treated as business interest expense in subsequent taxable years, the section 163(j) limitation could operate to disallow a deduction even though such amounts were allowable in the prior taxable year after application of the section 163(j) limitation. The Treasury Department and the IRS do not intend such a result. Therefore, the final regulations clarify that amounts allowable as a deduction after application of the section 163(j) limitation but disallowed by section 465 or 469 are not business interest expense subject to the section 163(j) limitation in subsequent taxable years.

C. Definition of Excepted Regulated Utility Trade or Business—Proposed § 1.163(j)–1(b)(13)

Numerous comments were submitted concerning the definition of an ''excepted regulated utility trade or business'' under proposed § 1.163(j)–1(b)(13). Proposed § 1.163(j)–1(b)(13), which implements the exception in section 163(j)(7)(A)(iv) to the definition of a ''trade or business,'' generally provides that an excepted regulated utility trade or business is a trade or business that sells or furnishes the items listed in section 163(j)(7)(A)(iv) at rates that are established or approved by certain regulatory bodies described in proposed § 1.163(j)–1(b)(13)(i)(B)(*1*) and (*2*).

The proposed regulations provide that utilities that sell or furnish the regulated items at rates that are established or approved by a regulatory body described in proposed § 1.163(j)–1(b)(13)(i)(B)(*1*), other than an electric cooperative, are considered to be excepted only to the extent that such rates are determined on a ''cost of service and rate of return'' basis. The ''cost of service and rate of return'' requirement was intended to provide certainty to taxpayers because many utilities are familiar with the definition of ''cost of service and rate of return,'' which is used to determine whether a public utility company must use a normalization method of accounting under section 168 for certain properties.

However, several commenters questioned whether a ''cost of service and rate of return'' requirement would be satisfied in specific fact patterns. Commenters questioned whether certain negotiated rates are established or approved on a ''cost of service and rate of return'' basis if (1) the applicable regulatory body has the authority to impose a cost-based rate instead of the negotiated rate, (2) the rates are computed with reference to cost but discounted from the recourse (or maximum) rate allowed by the regulatory body, or (3) the rates are computed with reference to cost and a set rate of return but are subject to a market-based cap. Commenters also asked whether the inclusion of certain amounts in determining ''cost of service,'' specifically the costs of affiliates and some revenues attributable to market-rate sales, would affect the determination of whether rates are established or approved on a ''cost of service and rate of return'' basis.

One commenter noted that the normalization rules operate logically only in the ''cost of service and rate of return'' context. The commenter stated that, because section 163(j)(7)(A)(iv) does not reference the normalization rules, there is no need to include the ''cost of service and rate of return'' requirement in the section 163(j) regulations.

The Treasury Department and the IRS note that, in private letter rulings and informal guidance related to section 168(i)(9) and (10), the IRS has stated that, for purposes of applying the normalization rules, the definition of ''public utility property'' must contain the requirement that the regulated rates be established or approved on a ''rate of return'' basis. In this guidance, the IRS explained that the normalization method, which must be used for public utility property to be eligible for the depreciation allowance available under section 168, is defined in terms of the method the taxpayer uses in computing its tax expense in establishing its ''cost of service'' for ratemaking purposes and reflecting operating results in its regulated books of account. Furthermore, the IRS has issued numerous private letter rulings regarding whether under the specific facts of the taxpayer, the cost of service and rate of return requirement has been met for purposes of section 168(i). Thus, it is clear that, in the context of section 168, the ''cost of service and rate of return'' requirement is necessary.

Neither the text of section 163(j) nor the legislative history specifically references the normalization rules or the ''cost of service and rate of return'' requirement under section 168(i)(10). With the omission of such references, the exception in section 163(j) for regulated utility trade or business could be applied broadly without reference to specific requirements applicable in the normalization rules. However, the Treasury Department and the IRS note that under section 168(k)(9), the additional first-year depreciation deduction is not available to any property that is primarily used in an excepted regulated utility trade or business. Therefore, to ease the administrative burden of determining whether businesses qualify as excepted regulated utility trades or businesses, and to allow taxpayers the option of claiming the additional first-year depreciation deduction under section 168(k) in lieu of being treated as an excepted regulated utility trade or business, the final regulations retain the ''cost of service and rate of return'' requirement from the proposed regulations, and also allow taxpayers to make an election to be an excepted regulated utility trade or business to the extent that the rates for the furnishing or sale of the items described in § 1.163(j)–1(b)(15)(i)(A)(*1*) have been established or approved by a regulatory body described in § 1.163(j)–1(b)(15)(i)(A)(*2*), if the rates are not determined on a ''cost of service and rate of return'' basis. See § 1.163(j)–1(b)(15)(i) and (iii).

For purposes of the election, the focus of section 163(j)(7)(A)(iv) is the phrase ''established or approved'' in section 163(j)(7)(A)(iv), which describes the authority of the regulatory body described in § 1.163(j)–1(b)(15)(i)(A)(*2*). Ratemaking programs similar to those described by commenters and discussed previously in this part II(C) of this Summary of Comments and Explanation of Revisions section, including discounted rates, negotiated rates, and regulatory rate caps, are established or approved by a regulatory body if the taxpayer files a schedule of such rates with a regulatory body that has the power to approve, disapprove, alter the rates, or substitute a rate determined in an alternate manner.

Similar to elections for electing real property trades or businesses and electing farming businesses, the election to be an excepted regulated utility trade or business is irrevocable. Taxpayers making the election to be an excepted regulated utility trade or business are not required to allocate items between regulated utility trades or businesses that are described in § 1.163(j)–1(b)(15)(i) and trades or businesses that are described in § 1.163(j)–1(b)(15)(iii)(A) as to which the taxpayer makes an election because they are treated as operating an entirely excepted regulated utility trade or business. Electing taxpayers cannot claim the additional first-year depreciation deduction under section 168(k).

The rules set forth in the final regulations are limited solely to the determination of an ''excepted regulated utility trade or business'' for purposes of section 163(j)(7)(A)(iv). As a result of this limited application, the rules in the final regulations are not applicable to the determination of ''public utility property'' or the application of the normalization rules within the meaning of section 46(f), as in effect on the day before the date of the enactment of the Revenue Reconciliation Act of 1990, section 168(i)(9) and (10) and the regulations thereunder, or to the determination of any depreciation allowance available under sections 167 and 168.

Comments also were received on the application of the rules for excepted regulated utility trades or businesses to electric cooperatives. The definition of an ''excepted regulated utility trade or business'' under proposed § 1.163(j)–1(b)(13) includes trades or businesses that sell or furnish the items listed in section 163(j)(7)(A)(iv) at rates established or approved by an electric cooperative. Unlike utility businesses regulated by public authorities, utilities that sell items at rates regulated by a cooperative are not described in section 168(i)(10). However, there is a long-standing body of law regulating the taxation of electric cooperatives. Electric cooperatives described in section 501(c)(12) are generally exempt from income tax but are subject to taxation under section 511. The application of section 163(j) and the section 163(j) regulations with respect to exempt electric cooperatives is governed by proposed § 1.163(j)–4(b)(5). Other electric cooperatives are subject to taxation under sections 1381 through 1388 in subchapter T of chapter 1 of subtitle A of the Code (subchapter T), except for certain rural electric cooperatives specifically excluded from subchapter T by section 1381(a)(2)(C).

Generally, the exception in section 163(j)(7)(A)(iv) for the trade or business of selling or furnishing items at rates established or approved by the governing or ratemaking body of an electric cooperative applies both to sales and furnishing by an electric cooperative and to sales and furnishing to an electric cooperative by another utility provider, as long as the rates for the sale or furnishing have been established or approved in the manner required by section 163(j). Thus, an electric cooperative exempt from Federal income tax under section 501(c)(12) may not be subject to section 163(j) for the sale or furnishing of electricity due to the operation of proposed § 1.163(j)–4(b)(5), and another utility provider may be in an excepted regulated utility trade or business to the extent that it sells electricity to the section 501(c)(12) cooperative at rates established or approved by the governing or ratemaking body of the cooperative.

A commenter asked whether proposed § 1.163(j)–1(b)(13) requires that, for sales involving electric cooperatives to qualify as an excepted regulated utility trade or business, the rates for the sales be established or approved by the governing or ratemaking body of an electric cooperative on a ''cost of service and rate of return'' basis, or if all sales made subject to a contract or tariff approved by an electric cooperative's governing or ratemaking body would qualify. Under the proposed regulations, the specific requirement that rates for the sale or furnishing of items listed in proposed § 1.163(j)–1(b)(13)(i)(A) be established or approved on a ''cost of service and rate of return'' basis did not extend to rates established or approved by the governing or ratemaking body of an electric cooperative. These regulations adopt the proposed rule, and do not impose a requirement that rates for the sale or furnishing of items listed in § 1.163(j)–1(b)(15)(i)(A) by an electric cooperative be established or approved on a ''cost of service and rate of return'' basis.

Comments also were submitted regarding the allocation of tax items between excepted regulated utility trades or businesses and non-excepted trades or businesses. These comments are discussed with other comments on proposed § 1.163(j)–10 in part XI of this Summary of Comments and Explanation of Revisions section.

D. Definition of Floor Plan Financing Interest Expense—Proposed § 1.163(j)–1(b)(17)

Commenters recommended that interest paid on commercial financing liabilities or trade financing (in which a taxpayer borrows to fund the purchase or transport of commodities and then sells the inventory to pay off the debt) should not be subject to section 163(j). Commenters noted that trade financing is different from normal financing because it is short-term and backed by inventory that is monetizable (rather than plant and equipment). Thus, commenters suggested that section 163(j) should not apply to trade financing because there is no depreciation trade-off for inventory purchased with trade financing. Commenters compared trade financing to floor plan financing (because both are used to finance the purchase of inventory), and they noted that the 1991 Proposed Regulations under old section 163(j) excluded commercial financing liabilities from debt taken into account for purposes of applying the debt-equity ratio under old section 163(j). See 1991 Proposed Regulations § 1.163(j)–3(b)(2)(ii).

The Treasury Department and the IRS decline to exclude commercial financing liabilities from the section 163(j) limitation. Section 163(j) does not contain a provision analogous to the debt-equity ratio safe harbor that was present in old section 163(j) and for which rules were proposed in the 1991 Proposed Regulations. In addition, because Congress specifically excluded interest paid on floor plan financing from the section 163(j) limitation, but not all commercial financing liabilities and trade financing, Congress does not appear to have intended to exclude all commercial financing liabilities from the section 163(j) limitation.

E. Definition of Interest—Proposed § 1.163(j)–1(b)(20)

1. In General

Commenters submitted numerous comments on the definition of ''interest'' in the proposed regulations. Proposed § 1.163(j)–1(b)(20) contains a relatively broad definition of the term ''interest'' for purposes of section 163(j). This definition was proposed to provide a complete definition of interest that addresses all transactions that are commonly understood to produce interest income and expense, including transactions that otherwise may have been entered into to avoid the application of section 163(j).

Under the proposed regulations, the term ''interest'' means any amount described in one of four categories. First, proposed § 1.163(j)–1(b)(20)(i) generally provides that interest is an amount paid, received, or accrued as compensation for the use or forbearance of money under the terms of an instrument or contractual arrangement, including a series of transactions, that is treated as a debt instrument, or an amount that is treated as interest under other provisions of the Code or the Income Tax Regulations. For example, this category includes qualified stated interest, original issue discount (OID), and accrued market discount. Commenters agree that this definition of interest has long been accepted, is consistent with longstanding precedent, and reduces the risk of inconsistency within the Code and regulations. No commenters requested any changes to this category, and the final regulations adopt this category in the definition of the term ''interest'' without any substantive changes.

Second, proposed § 1.163(j)–1(b)(20)(ii) treats a swap (other than a cleared swap) with significant nonperiodic payments as two separate transactions consisting of an on-market, level payment swap and a loan. Under the proposed regulations, the time value component of the loan is recognized as interest expense to the payor and as interest income to the recipient. Several comments were received on this category in the definition and are described in part II(E)(2) of this Summary of Comments and Explanation of Revisions section.

Third, proposed § 1.163(j)–1(b)(20)(iii) treats as interest certain amounts that are closely related to interest and that affect the economic yield or cost of funds of a transaction involving interest, but that may not be compensation for the use or forbearance of money on a stand-alone basis. For example, this category includes substitute interest payments, debt issuance costs, commitment fees, and hedging gains and losses that affect the yield of a debt instrument. Numerous comments were received on this category and are described in part II(E)(3) of this Summary of Comments and Explanation of Revisions section.

Fourth, proposed § 1.163(j)–1(b)(20)(iv) provides an anti-avoidance rule. Under this rule, an expense or loss predominantly incurred in consideration of the time value of money in a transaction or series of integrated or related transactions in which a taxpayer secures the use of funds for a period of time is treated as interest expense for purposes of section 163(j). Numerous comments were received on this category and are described in part II(E)(4) of this Summary of Comments and Explanation of Revisions section.

2. Swaps With Significant Nonperiodic Payments

The proposed regulations treat a non-cleared swap with significant nonperiodic payments as two separate transactions consisting of an on-market, level payment swap and a loan (the embedded loan rule). The embedded loan rule did not apply to a collateralized swap that was cleared by a derivatives clearing organization or by a clearing agency (a cleared swap) because the treatment of cleared swaps was reserved. In the preamble to the proposed regulations, the Treasury Department and the IRS requested comments on the proper treatment of collateralized swaps under the embedded loan rule.

One commenter recommended that the final regulations provide an exception to the embedded loan rule for cleared swaps and for non-cleared swaps that are substantially collateralized. This commenter further suggested that the final regulations not include any specific rules regarding the type of collateral that is required to be posted to qualify for the exception. The commenter also recommended that the final regulations provide objective rules for determining if a nonperiodic payment is ''significant'' and if a financial instrument is treated as a ''swap'' for purposes of these rules.

Another commenter agreed with the embedded loan rule, including use of the ''significant'' standard, and also recommended exceptions to the embedded loan rule for both cleared swaps and non-cleared swaps that are required to be fully collateralized by the terms of the swap contract or by a federal regulator. However, this commenter interpreted the embedded loan rule in the proposed regulations to apply solely for purposes of section 163(j) and recommended that the embedded loan rule, as well as timing and character rules for nonperiodic payments on swaps, be issued under section 446. Until that guidance is issued, the commenter requested that the application of the embedded loan rule for purposes of section 163(j) be delayed. The proposed regulations provide that the time value component of the embedded loan is determined in accordance with § 1.446–3(f)(2)(iii)(A). This commenter questioned the reference to § 1.446–3(f)(2)(iii)(A) because, under that rule, the time value component is not treated as interest; rather, the time value component is only used to compute the amortization of the nonperiodic payment.

As a result of the cross-reference in proposed § 1.446–3(g)(4) to proposed § 1.163(j)–1(b)(20)(ii), the embedded loan rule set forth in the proposed regulations applies for purposes of both sections 163(j) and 446. In addition, and as noted in the preamble to the proposed regulations, the embedded loan rule set forth in the proposed regulations applies in the same manner that former § 1.446–3(g)(4) applied before it was amended by the now expired temporary regulations in T.D. 9719 (80 FR 26437) (May 8, 2015) (as corrected by 80 FR 61308 (October 13, 2015)). The Treasury Department and the IRS do not adopt commenters' suggestions to delay finalizing the embedded loan rule or to provide guidance on determining if a nonperiodic payment is ''significant'' because the same embedded loan rule applied in the context of section 446 for over 20 years from 1993 to 2015. See T.D. 8491 (58 FR 53125) (October 14, 1993). Instead, subject to the exceptions discussed in this part II(E)(2) of this Summary of Comments and Explanation of Revisions section, the final regulations adopt the embedded loan rule without change. The final regulations retain the reference to § 1.446–3(f)(2)(iii)(A), which provides a known method for computing the time value component associated with the loan component that is treated as interest under §§ 1.163(j)–1(b)(22)(ii) and 1.446–3(g)(4).

Further, to eliminate the possibility of confusion regarding the application of the embedded loan rule for purposes of sections 163(j) and 446, the final regulations add the substantive text of the embedded loan rule and the exceptions to that rule to both §§ 1.446–3(g)(4) and 1.163(j)–1(b)(22)(ii) instead of merely including a cross-reference in § 1.446–3(g)(4) to § 1.163(j)–1(b)(22)(ii).

In response to comments, the final regulations add two exceptions to the embedded loan rule. Specifically, the final regulations add exceptions for cleared swaps and for non-cleared swaps that require the parties to meet the margin or collateral requirements of a federal regulator or that provide for margin or collateral requirements that are substantially similar to a cleared swap or a non-cleared swap subject to the margin or collateral requirements of a federal regulator. For purposes of this exception, the term ''federal regulator'' means the Securities and Exchange Commission (SEC), the Commodity Futures Trading Commission (CFTC), or a prudential regulator, as defined in section 1a(39) of the Commodity Exchange Act (7 U.S.C. 1a), as amended by section 721 of the Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010, Public Law 111–203, 124 Stat. 1376, Title VII (the Dodd-Frank Act). Because federal regulators have adopted final requirements for non-cleared swaps that permit netting of swap exposures and specify the types of collateral required to be posted, the final regulations do not address netting or require that the margin or collateral be paid or received in cash.

In addition, § 1.163(j)–1(c)(3)(i) delays the applicability date of the embedded loan rule for purposes of section 163(j) to allow taxpayers additional time to develop systems to implement these rules (the delayed applicability date), though taxpayers may choose to apply the rules to swaps entered into before the delayed applicability date. See also § 1.446–3(j)(2), which provides applicability date rules similar to those in § 1.163(j)–1(c)(3)(i). However, the delayed applicability date does not apply for purposes of the anti-avoidance rules in § 1.163(j)–1(b)(22)(iv) (described in part II(E)(4) of this Summary of Comments and Explanation of Revisions section). Instead, the applicability date in § 1.163(j)–1(c)(3)(ii) applies. As a result, the anti-avoidance rules in § 1.163(j)–1(b)(22)(iv) apply to a notional principal contract entered into on or after September 14, 2020. However, for a notional principal contract entered into before September 14, 2021, the anti-avoidance rules in § 1.163(j)–1(b)(22)(iv) apply without regard to the references in those rules to § 1.163(j)–1(b)(22)(ii). For example, if a taxpayer enters into a swap with a significant nonperiodic payment that does not meet the exceptions in § 1.163(j)–1(b)(22)(ii)(B) or (C) before the delayed applicability date, and a principal purpose of the taxpayer is to reduce the amount that otherwise would be interest expense, the anti-avoidance rules apply and the taxpayer must treat the time value component associated with the loan component of the swap as interest expense.

3. Other Amounts Treated as Interest

i. Items Relating to Premium, Ordinary Income or Loss on Certain Debt Instruments, Section 1258 Gain, and Factoring Income

Proposed § 1.163(j)–1(b)(20)(iii)(A) treats any bond issuance premium treated as ordinary income under § 1.163–13(d)(4) as interest income of the issuer and any amount deductible as a bond premium deduction under § 1.171–2(a)(4)(i)(A) or (C) as interest expense of the holder. Proposed § 1.163(j)–1(b)(20)(iii)(B) treats any ordinary income recognized by an issuer of a debt instrument, and any ordinary loss recognized by a holder of a debt instrument, under the rules for a contingent payment debt instrument, a nonfunctional currency contingent payment debt instrument, or an inflation-indexed debt instrument, as interest income of the issuer and as interest expense of the holder, respectively. Proposed § 1.163(j)–1(b)(20)(iii)(D) treats any ordinary gain under section 1258 as interest income. Commenters supported treating the amounts in proposed § 1.163(j)–1(b)(20)(iii)(A), (B), and (D) as interest income or interest expense for purposes of section 163(j). Accordingly, the final regulations adopt the rules in the proposed regulations for these three items without any substantive changes.

Proposed § 1.163(j)–1(b)(20)(iii)(J) treats factoring income as interest income. Several commenters supported treating factoring income as interest income. However, one commenter questioned the differences between the provisions related to the inclusion of factoring income and § 1.954–2(h)(4). The inclusion of factoring income in the definition of interest is generally supported by the commenters, is a taxpayer-favorable rule, is generally consistent with the rules in § 1.954–2(h)(4), and is consistent with the treatment of other types of discount, such as acquisition discount and market discount. Accordingly, the final regulations adopt the rules in the proposed regulations for factoring income without any substantive changes. In the case of a factoring transaction with a principal purpose of artificially increasing a taxpayer's business interest income, the anti-avoidance rules in § 1.163(j)–1(b)(22)(iv) (described in part II(E)(4) of this Summary of Comments and Explanation of Revisions section) would not permit the taxpayer to treat factoring income as interest income for purposes of section 163(j).

ii. Substitute Interest Payments

Proposed § 1.163(j)–1(b)(20)(iii)(C) generally provides that a substitute interest payment described in § 1.861–2(a)(7) and made in connection with a sale-repurchase or securities lending transaction is treated as interest expense to the payor and interest income to the recipient. In general, substitute interest payments are economically equivalent to interest. A few commenters questioned the inclusion of substitute interest payments in the definition of interest in the proposed regulations. Commenters stated that treating these amounts as interest would be contrary to longstanding tax law, including the holding in *Deputy* v. *Du Pont,* 308 U.S. 488, 498 (1940). However, commenters recommended that, if the Treasury Department and the IRS decide to include substitute interest payments in the definition of interest in the final regulations, the inclusion be limited to the extent the substitute interest payments relate to transactions that are economically similar to a borrowing. Commenters recommended that the following factors be taken into consideration in making this determination: (a) Whether the taxpayer posted (or has received) collateral consisting of cash or liquid assets; (b) whether the borrowed security is due to mature shortly after the scheduled termination date of the securities borrowing; (c) the type of security being lent (for example, Treasury bonds as compared to riskier corporate bonds); and (d) whether the securities borrowing was entered into in the ordinary course of the taxpayer's trade or business.

The final regulations retain substitute interest payments in the definition of interest because the payments generally are economically equivalent to interest and should be treated as such for purposes of section 163(j). However, in response to comments, the final regulations provide that a substitute interest payment is treated as interest expense to the payor only if the payment relates to a sale-repurchase or securities lending transaction that is not entered into by the payor in the payor's ordinary course of business, and that a substitute interest payment is treated as interest income to the recipient only if the payment relates to a sale-repurchase or securities lending transaction that is not entered into by the recipient in the recipient's ordinary course of business. The final regulations do not adopt the other suggested factors because the Treasury Department and the IRS have determined that the ordinary course rule in the final regulations provides an appropriate and effective limit on the scope of the definition. Specifically, the Treasury Department and the IRS have determined that these transactions are rarely entered into outside the payor's ordinary course of business, and that any such non-ordinary course transactions likely would involve an intention to avoid section 163(j).

iii. Commitment Fees

Proposed § 1.163(j)–1(b)(20)(iii)(G)(*1*) treats any fees in respect of a lender commitment to provide financing as interest if any portion of such financing is actually provided. Commenters recommended that commitment fees and other debt-related fees not be included in the definition of interest until general substantive guidance is provided on the treatment of the fees in the separate fee-related project on the Office of Tax Policy and IRS 2019–2020 Priority Guidance Plan (REG–132517–17). According to the commenters, uncertainty exists as to whether to characterize these fees for Federal income tax purposes as fees for services or property or for compensation for the use or forbearance of money. In addition, under existing guidance, commitment fees are treated differently by the borrower (similar to an option premium) and the lender (service income). See Rev. Rul. 81–160, 1981–1 C.B. 312, and Rev. Rul. 70–540, 1970–2 C.B. 101, Situation (3). Some taxpayers, however, argue that a commitment fee should be treated as creating or increasing discount on a debt instrument and that the fee should be treated consistently by both the borrower and the lender. If commitment fees are included in the definition of interest in the final regulations, commenters recommended that only the portion of the commitment fee that is proportionate to the amount drawn be treated as interest.

In response to comments, the final regulations do not include commitment fees in the definition of interest. The treatment of commitment fees and other fees paid in connection with lending transactions will be addressed in future guidance that applies for all purposes of the Code.

iv. Debt Issuance Costs

Proposed § 1.163(j)–1(b)(20)(iii)(H) treats debt issuance costs as interest expense of the issuer. Commenters argued that debt issuance costs should not be treated as interest expense because these costs are paid to third parties in connection with the issuance of debt and are not paid or incurred for the use or forbearance of money under a debt instrument. For tax purposes, these costs are capitalized by the issuer and are treated as deductible under section 162 over the term of the debt instrument as if the costs adjust the instrument's yield by reducing the instrument's issue price by the amount of the costs. See § 1.446–5.

In response to comments, the final regulations exclude debt issuance costs from the definition of interest.

v. Guaranteed Payments

Proposed § 1.163(j)–1(b)(20)(iii)(I) provides that any guaranteed payments for the use of capital under section 707(c) are treated as interest. Some commenters stated that a guaranteed payment for the use of capital should not be treated as interest for purposes of section 163(j) unless the guaranteed payment was structured with a principal purpose of circumventing section 163(j). Other commenters stated that section 163(j) never should apply to guaranteed payments for the use of capital.

In response to comments, the final regulations do not explicitly include guaranteed payments for the use of capital under section 707(c) in the definition of interest. However, consistent with the recommendations of some commenters, the anti-avoidance rules in § 1.163(j)–1(b)(22)(iv) (described in part II(E)(4) of this Summary of Comments and Explanation of Revisions section) include an example of a situation in which a guaranteed payment for the use of capital is treated as interest expense and interest income for purposes of section 163(j). See § 1.163(j)–1(b)(22)(v)(E), *Example 5.*

vi. Hedging Transactions

Proposed § 1.163(j)–1(b)(20)(iii)(E) generally treats income, deduction, gain, or loss from a derivative that alters a taxpayer's effective cost of borrowing with respect to a liability of the taxpayer as an adjustment to the taxpayer's interest expense. Proposed § 1.163(j)–1(b)(20)(iii)(F) generally treats income, deduction, gain, or loss from a derivative that alters a taxpayer's effective yield with respect to a debt instrument held by the taxpayer as an adjustment to the taxpayer's interest income. The rules in the two provisions are referred to as the ''hedging rules'' in this preamble.

Numerous comments were received on the hedging rules. The commenters questioned the administrability of the broad hedging rules, especially if the taxpayer hedges on a macro (that is, on an aggregate) basis. Also, the commenters noted that it is not clear how to apply the rules in certain situations, including a situation in which the hedge relates to non-debt items (for example, if the taxpayer hedges the mismatch or ''gap'' between its assets and liabilities), the debt instrument is not subject to section 163(j), or the debt instrument is subject to other interest deferral provisions for Federal tax purposes. In addition, the commenters noted that the proposed regulations effectively would require integration, even if the hedge otherwise would not be integrated with the debt instrument for Federal tax purposes and the income, deduction, gain, and loss from the hedge ordinarily would be accounted for separately, which the commenters suggested would require taxpayers to maintain two sets of books. Moreover, the commenters stated that, under the proposed regulations, any gain or loss on the underlying debt instrument (for example, due to changes in interest rates) would not be treated as an adjustment to interest income or expense, whereas the corresponding loss or gain on the hedge would be treated as an adjustment to interest expense or income. Some commenters stated that the yield on third-party borrowings reflects the true cost of the borrowing, and that hedges are not relevant to the cost of the borrowing.

Commenters recommended that, if the hedging rules are retained in the final regulations as a separate item, the final regulations precisely define (a) what standard is used to include a derivative in section 163(j) (for example, a primary purpose or principal motivation standard), and (b) the standard for determining whether the effect of a derivative on the cost of borrowing or effective yield is sufficiently significant for the income, deduction, gain, or loss from the derivative to be included in the computation. Commenters noted that one approach would be to apply the hedging rules only to derivatives that qualify for integration under § 1.988–5 or § 1.1275–6. Another approach would be to apply the hedging rules to derivatives that have a sufficiently close connection with the liability to qualify as hedging transactions under §§ 1.446–4 and 1.1221–2. Some commenters indicated that the hedging rules could apply if the derivative is treated as a hedge of a borrowing or liability for financial reporting purposes, and that the hedging rules should not apply to broker-dealers, active traders in derivatives, and financial institutions acting in the ordinary course of business.

One commenter recommended that section 163(j) not alter the timing of taxable items from hedging transactions that are subject to § 1.446–4, regardless of whether interest expense on the hedged item is deferred under section 163(j). Other commenters noted that the proposed regulations do not provide guidance on the interaction between the hedging rules and the straddle rules.

With respect to foreign currency hedging transactions, a commenter noted that foreign currency gain or loss is due to the time value of money only to a limited extent; thus, the commenter recommended that section 163(j) not apply to a taxpayer's foreign currency hedging transactions (other than an integrable transaction under § 1.988–5).

In response to comments, the final regulations do not include the hedging rules in the definition of interest. However, in certain circumstances, the anti-avoidance rules in § 1.163(j)–1(b)(22)(iv) (described in part II(E)(4) of this Summary of Comments and Explanation of Revisions section) may apply to require income, deduction, gain, or loss from a hedging transaction to be taken into account for purposes of section 163(j).

vii. Other Items

Commenters recommended other items to be included in, or excluded from, the definition of interest as follows:

a. Dividends From Regulated Investment Company (RIC) Shares

Some commenters recommended that dividend income from a RIC be treated as interest income for a shareholder in a RIC, to the extent that the dividend is attributable to interest income earned by the RIC. To address this comment, in the Concurrent NPRM, the Treasury Department and the IRS have proposed rules under which a RIC that earns business interest income may pay section 163(j) interest dividends that certain shareholders may treat as interest income for purposes of section 163(j). See paragraphs (b)(22)(iii)(F) and (b)(35) in proposed § 1.163(j)–1 in the Concurrent NPRM.

b. MMF Income

A few commenters recommended that the final regulations allow look-through treatment for earnings from certain foreign entities, such as foreign money market funds (MMFs), so that dividends from foreign MMFs would be treated as interest income to the extent the underlying income derived by a foreign MMF was interest income. According to the commenters, this treatment would alleviate issues for a CFC that borrows money from related parties and invests in foreign MMFs. In general, the commenters stated that any interest limitation under section 163(j) could lead to unexpected results in this situation, such as section 952(c) recapture accounts solely generated by the section 163(j) interest expense limitation.

The final regulations do not adopt this recommendation because it is beyond the scope of the final regulations and because there are significant differences between the rules governing income inclusions in respect of passive foreign investment companies (PFICs), such as foreign MMFs, and RICs. These differences make it difficult to adopt a rule that would provide for look-through treatment in the context of dividends or inclusions from a PFIC. In particular, the regime for taxing income from a PFIC that shareholders have elected to treat as a qualified electing fund (QEF) under section 1295 generally focuses only on inclusions related to ordinary income or net capital gain income and does not separately report amounts of interest income for Federal income tax purposes. In the case of a PFIC for which a QEF election has not been made, there would be no information about the underlying taxable income of the PFIC and no reason or ability to treat an interest in the PFIC differently from the treatment of stock held in other C corporations.

c. Negative Interest

One commenter requested clarification on the treatment of negative interest (an amount that a depositor may owe a bank in a negative interest rate environment) and inquired whether such payments are more similar to payments for custodial or service fees rather than for interest. The final regulations do not address this issue because it is beyond the scope of the final regulations. However, in certain cases (for example, a Treasury bill acquired with a negative yield), a payment may be treated as bond premium subject to the rules in section 171, including the rules in § 1.171–2(a)(4)(i)(C).

d. Leases

A commenter recommended that the Treasury Department and the IRS adopt rules that clearly describe the circumstances in which fleet leases are treated as generating interest for purposes of section 163(j). The commenter noted that there is a time-value-of-money portion of a fleet lease payment similar to the time-value-of-money portion of other items treated as interest under the proposed regulations, such as guaranteed payments, commitment fees, debt issuance costs, and items of income or loss from a derivative instrument that alters a taxpayer's effective yield or effective cost of borrowing. In addition, to the extent that the anti-avoidance rule in the proposed regulations is retained, the commenter asked that the final regulations clearly define the circumstances (if any) in which the anti-avoidance rule would operate to recharacterize any portion of a fleet lease payment as interest expense, and modify the anti-avoidance rule to apply to both interest expense of the fleet lessee and interest income of the fleet lessor.

The Treasury Department and the IRS do not adopt the commenter's suggestions in the final regulations because the suggestions generally are no longer relevant after the revisions made to the definition of interest in the final regulations. For example, as explained in this part II(E)(3) of this Summary of Comments and Explanation of Revisions section, no portion of the items generally cited by the commenter is explicitly treated as interest in the final regulations. Moreover, there are explicit provisions in the Code that determine whether a portion of a lease payment is treated as interest for Federal income tax purposes depending on the terms of a lease, such as sections 467 and 483. In addition, as explained in part II(E)(4) of this Summary of Comments and Explanation of Revisions section, the anti-avoidance rule in the final regulations is revised to include a principal purpose test and to generally align the treatment of income and expense, which should address the commenter's concerns.

4. Anti-Avoidance Rule for Amounts Predominantly Associated With the Time Value of Money

Proposed § 1.163(j)–1(b)(20)(iv) provides that any expense or loss, to the extent deductible, incurred by a taxpayer in a transaction or series of integrated or related transactions in which the taxpayer secures the use of funds for a period of time is treated as interest expense of the taxpayer if such expense or loss is predominantly incurred in consideration of the time value of money. Numerous comments were received on this anti-avoidance rule in the proposed regulations. Most commenters recommended that any anti-avoidance rule in the final regulations contain a requirement that the taxpayer have a principal purpose to avoid section 163(j). Several commenters asserted that the anti-avoidance rule should cover only transactions that are economically equivalent to interest and should set forth examples of transactions that are and are not covered. Most commenters recommended that the anti-avoidance rule be symmetrical and apply to income or gain, as well as to expense or loss. One commenter suggested that, based on section 1258 concepts, the anti-avoidance rule should apply only if, at the time of the relevant transaction or series of transactions that secure the use of funds for a period of time for the taxpayer, substantially all of the expense or loss was expected to be attributable to the time value of money. In addition, commenters noted that it should be clear when a taxpayer should test whether a transaction falls within the anti-avoidance rule. Other commenters requested specific rules coordinating this anti-avoidance rule with the general anti-avoidance rule in proposed § 1.163(j)–2(h).

Some commenters stated that an interest anti-avoidance rule should not be included in the final regulations because, for example, the rule would impose substantial compliance costs, the Treasury Department and the IRS have other tools to combat any abuse, and there already is a general anti-avoidance rule in proposed § 1.163(j)–2(h). Commenters also noted that the interest anti-avoidance rule in the proposed regulations has the potential to capture ordinary market transactions that possess a time value component but that are not generally treated as financings with disguised interest for tax purposes.

In response to comments, the Treasury Department and the IRS have modified the anti-avoidance rule in the final regulations. Under § 1.163(j)–1(b)(22)(iv)(A)(*1*), any expense or loss economically equivalent to interest is treated as interest expense for purposes of section 163(j) if a principal purpose of structuring the transaction(s) is to reduce an amount incurred by the taxpayer that otherwise would have been interest expense or treated as interest expense under § 1.163(j)–1(b)(22)(i) through (iii). For this purpose, the fact that the taxpayer has a business purpose for obtaining the use of funds does not affect the determination of whether the manner in which the taxpayer structures the transaction(s) is with a principal purpose of reducing the taxpayer's interest expense. In addition, the fact that the taxpayer has obtained funds at a lower pre-tax cost based on the structure of the transaction(s) does not affect the determination of whether the manner in which the taxpayer structures the transaction(s) is with a principal purpose of reducing the taxpayer's interest expense.

For purposes of § 1.163(j)–1(b)(22)(iv)(A)(*1*), any expense or loss is economically equivalent to interest to the extent that the expense or loss is (1) deductible by the taxpayer; (2) incurred by the taxpayer in a transaction or series of integrated or related transactions in which the taxpayer secures the use of funds for a period of time; (3) substantially incurred in consideration of the time value of money; and (4) not described in § 1.163(j)–1(b)(22)(i), (ii), or (iii).

Under § 1.163(j)–1(b)(22)(iv)(A)(*2*), if a taxpayer knows that an expense or loss is treated by the payor as interest expense under § 1.163(j)–1(b)(22)(iv)(A)(*1*), the taxpayer provides the use of funds for a period of time in the transaction(s) subject to § 1.163(j)–1(b)(22)(iv)(A)(*1*), the taxpayer earns income or gain with respect to the transaction(s), and such income or gain is substantially earned in consideration of the time value of money provided by the taxpayer, such income or gain is treated as interest income for purposes of section 163(j) to the extent of the expense or loss treated by the payor as interest expense under § 1.163(j)–1(b)(22)(iv)(A)(*1*).

Under § 1.163(j)–1(b)(22)(iv)(B), notwithstanding § 1.163(j)–1(b)(22)(i) through (iii), any income realized by a taxpayer in a transaction or series of integrated or related transactions is not treated as interest income of the taxpayer for purposes of section 163(j) if and to the extent that a principal purpose for structuring the transaction(s) is to artificially increase the taxpayer's business interest income. For this purpose, the fact that the taxpayer has a business purpose for holding interest-generating assets does not affect the determination of whether the manner in which the taxpayer structures the transaction(s) is with a principal purpose of artificially increasing the taxpayer's business interest income.

For purposes of the foregoing anti-avoidance rules, § 1.163(j)–1(b)(22)(iv)(C) provides that whether a transaction or a series of integrated or related transactions is entered into with a principal purpose depends on all the facts and circumstances related to the transaction(s), except that the fact that the taxpayer has obtained funds at a lower pre-tax cost based on the structure of the transaction(s) or the fact that the taxpayer has a business purpose related to the item is ignored for this purpose. A purpose may be a principal purpose even though it is outweighed by other purposes taken together or separately. Factors to be taken into account in determining whether one of the taxpayer's principal purposes for entering into the transaction(s) include the taxpayer's normal borrowing rate in the taxpayer's functional currency, whether the taxpayer would enter into the transaction(s) in the ordinary course of the taxpayer's trade or business, whether the parties to the transaction(s) are related persons (within the meaning of section 267(b) or section 707(b)), whether there is a significant and bona fide business purpose for the structure of the transaction(s), whether the transactions are transitory, for example, due to a circular flow of cash or other property, and the substance of the transaction(s).

In response to comments, § 1.163(j)–1(b)(22)(iv)(D) provides that the anti-avoidance rules in § 1.163(j)–1(b)(22)(iv), rather than the general anti-avoidance rules in § 1.163(j)–2(j), apply to determine whether an item is treated as interest expense or interest income.

Section 1.163(j)–1(b)(22)(v) contains examples illustrating the application of the interest anti-avoidance rules in a number of situations, including examples relating to a hedging transaction involving a foreign currency swap transaction, a forward contract involving gold, a loan guaranteed by a related party in which the related party receives guarantee fees, and guaranteed payments for the use of capital. However, these examples are not intended to represent the only situations in which the anti-avoidance rules might apply.

The anti-avoidance rules in § 1.163(j)–1(b)(22)(iv) apply to transactions entered into on or after September 14, 2020. See § 1.163(j)–1(c)(2).

5. Authority Comments

Most of the commenters on the definition of interest in the proposed regulations questioned whether the Treasury Department and the IRS have the authority to expand the definition of interest for purposes of section 163(j) to include ''interest equivalents'' (the items listed in proposed § 1.163(j)–1(b)(20)(iii) and the expenses or losses subject to the anti-avoidance rule in proposed § 1.163(j)–1(b)(20)(iv)). The commenters asserted that the term ''business interest'' in section 163(j)(5) means any interest paid or accrued on indebtedness properly allocable to a trade or business, and that expanding the definition to include interest equivalents would capture amounts that do not fall within the scope of the general rule in section 163(a) that ''[t]here shall be allowed as a deduction all interest paid or accrued within the taxable year on indebtedness.'' Even though section 163(j)(1) refers to an ''amount allowed as a deduction under this chapter for business interest'' when describing the amounts limited by section 163(j), the commenters argued that the deduction otherwise allowed must be with respect to ''business interest'' (which is defined in section 163(j)(5)) and that the phrase ''deduction under this chapter'' does not and should not modify the definition of ''business interest'' in section 163(j)(5).

The commenters noted that section 163(j), as amended by the TCJA, does not contain a specific delegation of regulatory authority to expand the definition of interest. The commenters further asserted that the Treasury Department and the IRS may issue only ''interpretive regulations'' under section 7805, and that any such regulations may not go beyond the stated meaning of the statutory language. The commenters noted that old section 163(j)(9) provided broad regulatory authority to prescribe regulations, including regulations appropriate to prevent the avoidance of old section 163(j). In addition, the commenters noted that the legislative history for old section 163(j) indicated that the Treasury Department could issue guidance treating ''items not denominated as interest but appropriately characterized as equivalent to interest'' as interest income or interest expense. The commenters stated that there is no similar regulatory authority or legislative history relating to section 163(j) as amended by the TCJA.

Commenters also noted that, when Congress has chosen to expand the definition of interest in other parts of the Code, Congress has done so explicitly. For example, section 263(g) provides that, ''[for purposes of section 263(g)(2)(A)], the term 'interest' includes any amount paid or incurred in connection with personal property used in a short sale.'' As noted in the preamble to the proposed regulations, most of the rules treating interest equivalent items as interest income or expense in proposed § 1.163(j)–1(b)(20)(iii) were developed in §§ 1.861–9T and 1.954–2. However, commenters argued that the use of the interest equivalent provisions in §§ 1.861–9T and 1.954–2 by analogy to define interest for purposes of section 163(j) is inappropriate because different policy considerations underlie those sections, there is statutory or regulatory authority to address interest equivalents under those sections (unlike section 163(j)), and those sections apply only for limited purposes (for example, for sourcing purposes).

In addition, because the broad definition of interest in the proposed regulations applies only for purposes of section 163(j), commenters asserted that there will be additional compliance burdens and costs for taxpayers to separately track amounts treated as interest for purposes of section 163(j) and for other purposes. Commenters asserted that the broad definition of interest for purposes of section 163(j) in the proposed regulations may create uncertainty and confusion for taxpayers with respect to other sections of the Code.

Contrary to the assertions made by many of the commenters, the Treasury Department and the IRS have the authority to prescribe rules relating to interest equivalents and an anti-avoidance rule. As noted in the preamble to the proposed regulations, there are no generally applicable regulations or statutory provisions addressing when financial instruments are treated as indebtedness for Federal income tax purposes or when a payment is ''interest.'' Therefore, a regulatory definition of interest is needed in order to implement the statutory language of section 163(j).

In addition, it would be inconsistent with the purpose of section 163(j) to allow transactions that are essentially financing transactions to avoid the application of section 163(j). Thus, an anti-avoidance rule is needed to address situations in which a taxpayer's principal purpose in structuring a transaction or series of transactions is to artificially reduce the taxpayer's business interest expense or to increase the taxpayer's business interest income. Moreover, at least one commenter suggested the inclusion of the type of anti-avoidance rule that is included in the final regulations and that the Treasury Department and the IRS have the authority to include such a rule.

Section 7805(a) provides the Treasury Department and the IRS with the authority to prescribe all rules and regulations needed for enforcement of the Code, including all rules and regulations as may be necessary by reason of any alteration of law in relation to internal revenue. Providing a regulatory definition of interest for purposes of section 163(j) and the anti-avoidance rule falls within this authority. The statutory language of section 163(j)(1) (''The amount allowed as a deduction *under this chapter* for any taxable year for business interest . . .'') (emphasis added) also supports the application of section 163(j) to more items than merely items traditionally deducted under section 163(a).

Although the Treasury Department and the IRS have the authority to prescribe regulations addressing interest equivalents and anti-avoidance transactions, as noted earlier in parts II(E)(3) and (4) of this Summary of Comments and Explanation of Revisions section, in response to comments, the final regulations nevertheless limit the interest equivalent items to those items commenters agreed should be treated as interest expense or interest income, substitute interest payments made in connection with a sale-repurchase agreement or securities lending transaction that is not entered into by the taxpayer in the taxpayer's ordinary course of business, and certain amounts relating to transaction(s) entered into by a taxpayer with a principal purpose of artificially reducing interest expense or increasing interest income.

F. Definition of Motor Vehicle—Proposed § 1.163(j)–1(b)(25)

Proposed § 1.163(j)–1(b)(25) provides that the term ''motor vehicle'' means a motor vehicle as defined in section 163(j)(9)(C). Under section 163(j)(9)(C), a motor vehicle means any self-propelled vehicle designed for transporting persons or property on a public street, highway, or road; a boat; and farm machinery or equipment. A few commenters questioned whether towed recreational vehicles and trailers are included in the definition of ''motor vehicle.'' One commenter requested that the final regulations define motor vehicle to include any trailer or camper that is designed to provide temporary living quarters for recreational, camping, travel, or seasonal use and is designed to be towed by, or affixed to, a motor vehicle. Another commenter recommended allowing motor vehicle dealers to deduct floor plan financing interest on both motor vehicles and trailers that are offered for sale in integrated or related businesses.

Because section 163(j)(9)(C) specifically defines motor vehicles as self-propelled vehicles, the Treasury Department and the IRS do not have the authority to expand the definition of motor vehicles in the final regulations to include vehicles that are not self-propelled, such as towed recreational vehicles and trailers. For this reason, the Treasury Department and the IRS decline to adopt these comments in the final regulations. Therefore, the definition of motor vehicles in the final regulations continues to incorporate the definition in section 163(j)(9)(C) by cross-reference.

G. Definition of Taxable Income—Proposed § 1.163(j)–1(b)(37)

1. Calculation of Taxable Income

Proposed § 1.163(j)–1(b)(1)(i)(A) provides that business interest expense is added to taxable income to determine ATI. Some commenters noted that this provision could be construed as distorting ATI if a taxpayer has a disallowed business interest expense carryforward from a prior taxable year. Under such facts, the proposed regulations would not have reduced taxable income by the amount of the carryforward, because proposed § 1.163(j)–1(b)(37) disregards the carryforward as part of section 163(j) and the section 163(j) regulations. However, in calculating ATI, taxpayers might argue that taxable income should be increased by the amount of the disallowed business interest expense carryforward because the term ''business interest expense'' in the proposed regulations includes disallowed business interest expense carryforwards.

The Treasury Department and the IRS did not intend to create a net positive adjustment to ATI for disallowed business interest expense carryforwards. To address this potential distortion, the final regulations clarify that tentative taxable income is computed without regard to the section 163(j) limitation, and that disallowed business interest expense carryforwards are not added to tentative taxable income in computing ATI under § 1.163(j)–1(b)(1).

2. Interaction With Section 250

Proposed § 1.163(j)–1(b)(37)(ii) provides a rule to coordinate the application of sections 163(j) and 250. Section 250(a)(1) generally provides a deduction based on the amount of a domestic corporation's foreign-derived intangible income and GILTI. Section 250(a)(2) limits the amount of this deduction based on the taxpayer's taxable income—the greater the amount of a taxpayer's taxable income for purposes of section 250(a)(2), the greater the amount of the taxpayer's allowable deduction under section 250(a)(1).

In particular, proposed § 1.163(j)–1(b)(37)(ii) provides that, if a taxpayer is allowed a deduction for a taxable year under section 250(a)(1) that is properly allocable to a non-excepted trade or business, then the taxpayer's taxable income for that year is determined without regard to the limitation in section 250(a)(2). Some commenters observed that this proposed rule results in a lower ATI and section 163(j) limitation for the taxpayer than if the limitation in section 250(a)(2) were taken into account. Commenters also stated that the rationale for this approach (which does not reflect the taxpayer's actual taxable income) is unclear, and they recommended that this provision be withdrawn or made elective for taxpayers.

The Treasury Department and the IRS have determined that further study is required to determine the appropriate rule for coordinating sections 250(a)(2), 163(j), and other Code provisions (such as sections 170(b)(2) and 172(a)(2)) that limit the availability of deductions based, directly or indirectly, upon a taxpayer's taxable income (taxable income-based provisions). Therefore, the final regulations do not contain the rule in proposed § 1.163(j)–1(b)(37)(ii). Until such additional guidance is effective, taxpayers may choose any reasonable approach (which could include an ordering rule or the use of simultaneous equations) for coordinating taxable income-based provisions as long as such approach is applied consistently for all relevant taxable years. For this purpose, the ordering rule contained in proposed §§ 1.163(j)–1(b)(37)(ii) (83 FR 67490 (Dec. 28, 2018)) and 1.250(a)–1(c)(4) (contained in 84 FR 8188 (March 6, 2019)) is treated as a reasonable approach for coordinating sections 163(j) and 250. Comments are welcome on what rules should be provided, and whether an option to use simultaneous equations in lieu of an ordering rule would be appropriate in order to coordinate taxable income-based provisions.

3. When Disallowed Business Interest Expense Is ''Paid or Accrued''

As noted in the Background section of this preamble, section 163(j)(2) provides that the amount of any business interest not allowed as a deduction for any taxable year under section 163(j)(1) is treated as business interest ''paid or accrued'' in the succeeding taxable year. Commenters asked for clarification as to whether disallowed business interest expense should be treated as ''paid or accrued'' in the taxable year in which such expense is taken into account for Federal income tax purposes (without regard to section 163(j)), or whether such expense instead should be treated as paid or accrued in the succeeding taxable year in which the expense can be deducted by the taxpayer under section 163(j).

For purposes of section 163(j) and the section 163(j) regulations, the term ''paid or accrued'' in section 163(j)(2) must be construed in such a way as to further congressional intent. Although the use of this term in section 163(j)(2) provides a mechanism for disallowed business interest expense to be carried forward to and deducted in a subsequent taxable year, it does not mean that a disallowed business interest expense carryforward is treated as paid or accrued in a subsequent year for all purposes. In certain contexts, a disallowed business interest expense must be treated as paid or accrued in the year the expense was paid or accrued without regard to section 163(j) to give effect to congressional intent. For example, if a disallowed business interest expense were treated as paid or accrued only in a future taxable year in which such expense could be deducted after the application of section 163(j), then section 382 never would apply to such expense (because disallowed business interest expense carryforwards never would be pre-change losses). This outcome is clearly contrary to congressional intent (see section 382(d)(3)). Similarly, if a disallowed business interest expense were treated as paid or accrued in a future taxable year for purposes of section 163(j)(8)(A)(ii), then such expense would be added back to tentative taxable income in determining ATI for that taxable year (and for all future taxable years to which such expense is carried forward under section 163(j)(2)), thereby artificially increasing the taxpayer's section 163(j) limitation. (See part II(A) of this Summary of Comments and Explanation of Revisions section.) This outcome also is inconsistent with congressional intent. However, in other contexts, a disallowed business interest expense must be treated as paid or accrued in a succeeding taxable year to allow for the deduction of the carryforward in that year.

The definition of ''disallowed business interest expense'' has been revised in the final regulations to reflect that, solely for purposes of section 163(j) and the section 163(j) regulations, disallowed business interest expense is treated as ''paid or accrued'' in the taxable year in which the expense is taken into account for Federal income tax purposes (without regard to section 163(j)), or in a succeeding taxable year in which the expense can be deducted by the taxpayer under section 163(j), as the context may require.

4. Interaction With Sections 461(l), 465, and 469—Proposed § 1.163(j)–1(b)(37)

The Treasury Department and the IRS received questions asking for clarification of the interaction between proposed § 1.163(j)–1(b)(37) and the limitations in sections 461(l), 465, and 469. The final regulations clarify that sections 461(l), 465, and 469 are taken into account when determining tentative taxable income. Then, as provided in proposed § 1.163(j)–3(b)(4), sections 461(l), 465, and 469 are applied after the application of the section 163(j) limitation. See part II(B) of this Summary of Comments and Explanation of Revisions section.

H. Definition of Trade or Business—Proposed § 1.163(j)–1(b)(38)

1. In General

The section 163(j) limitation applies to taxpayers with ''business interest,'' which is defined in section 163(j)(5) as any interest properly allocable to a trade or business. Neither section 163(j) nor the legislative history defines the term ''trade or business.'' However, section 163(j)(7) provides that the term ''trade or business'' does not include the trade or business of performing services as an employee, as well as electing real property, electing farming, and certain utility trades or businesses.

As described in the preamble to the proposed regulations, the proposed regulations define the term ''trade or business'' by reference to section 162. Section 162(a) permits a deduction for all the ordinary and necessary expenses paid or incurred in carrying on a trade or business. Commenters requested additional guidance in determining whether an activity constitutes a section 162 trade or business.

The rules under section 162 for determining the existence of a trade or business are well-established and illustrated through a large body of case law and administrative guidance. Additionally, whether an activity is a section 162 trade or business is inherently a factual question. *Higgins* v. *Commissioner,* 312 U.S. 212, 217 (1941) (determining ''whether the activities of a taxpayer are 'carrying on a business' requires an examination of the facts in each case'').

The courts have developed two definitional requirements. One, in relation to profit motive, requires the taxpayer to enter into and carry on the activity with a good-faith intention to make a profit or with the belief that a profit can be made from the activity. The second, in relation to the scope of the activities, requires considerable, regular, and continuous activity. See generally *Commissioner* v. *Groetzinger,* 480 U.S. 23 (1987). In the seminal case of *Groetzinger,* the Supreme Court stated that, ''[w]e do not overrule or cut back on the Court's holding in *Higgins* when we conclude that if one's gambling activity is pursued full time, in good faith, and with regularity, to the production of income for a livelihood, and is not a mere hobby, it is a trade or business within the meaning of the statutes with which we are here concerned.'' Id. at 35.

2. Multiple Trades or Businesses Within an Entity

Commenters also suggested there should be factors to determine how to delineate separate section 162 trades or businesses within an entity and when an entity's combined activities should be considered a single section 162 trade or business for purposes of section 163(j). One commenter suggested adopting the rules for separate trades or businesses provided in section 446 and the regulations thereunder.

The Treasury Department and the IRS decline to adopt these recommendations because specific guidance under section 162 is beyond the scope of the final regulations. Further, § 1.446–1(d) does not provide guidance on when trades or businesses will be considered separate and distinct. Instead, it provides that a taxpayer may use different methods of accounting for separate and distinct trades or businesses, and it specifies two circumstances in which trades or businesses will not be considered separate and distinct. For example, § 1.446–1(d)(2) provides that no trade or business will be considered separate and distinct unless a complete and separable set of books and records is kept for such trade or business.

The Treasury Department and the IRS recognize that an entity can conduct more than one trade or business under section 162. This position is inherent in the allocation rules detailed in proposed § 1.163(j)–10(c)(3), which require a taxpayer with an asset used in more than one trade or business to allocate its adjusted basis in the asset to each trade or business using the permissible methodology described therein. In this context, the final regulations provide, consistent with the proposed regulations, that maintaining separate books and records for all excepted and non-excepted trades or businesses is one indication that a particular asset is used in a particular trade or business.

Whether an entity has multiple trades or businesses is a factual determination, and numerous court decisions that define the meaning of ''trade or business'' also provide taxpayers guidance in determining whether more than one trade or business exists. See *Groetzinger,* 480 U.S. at 35. For example, some court decisions discuss whether the activities have separate books and records, facilities, locations, employees, management, and capital structures, and whether the activities are housed in separate legal entities.

Accordingly, the final regulations define ''trade or business'' as a trade or business within the meaning of section 162, which should aid taxpayers in the proper allocation of interest expense, interest income, and other tax items to a trade or business and to an excepted or non-excepted trade or business.

3. Rental Real Estate Activities as a Trade or Business

See the discussion of elections for real property trades or businesses that may not qualify as section 162 trades or businesses in part X of this Summary of Comments and Explanation of Revisions section.

4. Separate Entities

One commenter requested clarification that the determination of whether an entity generates interest attributable to a trade or business within the meaning of section 162 is made at the entity level without regard to the classification of the entity's owners. Except in the context of a consolidated group, or if § 1.163(j)–10 provides otherwise, the determination of whether an entity generates interest and whether such interest is properly allocable to a trade or business is determined at the entity level, without regard to the classification of the entity's owners. See also the discussion of trading partnerships and CFC groups in the Concurrent NPRM.

I. Applicability Dates

The proposed regulations provide generally that the final regulations would apply to taxable years ending after the date that this Treasury Decision is published in the **Federal Register**. The proposed applicability date has been changed in the final regulations to avoid the application of the changes reflected in the final regulations to a taxpayer at the end of the taxable year, which may result in unexpected effects on the taxpayer under section 163(j). Accordingly, the final regulations generally apply to taxable years beginning on or after the date that is 60 days after the date that this Treasury Decision is published in the **Federal Register**.

III. Comments on and Changes to Proposed § 1.163(j)–2: Deduction for Business Interest Expense Limited

Proposed § 1.163(j)–2 provides general rules regarding the section 163(j) limitation, including rules on how to calculate the limitation, how to treat disallowed business interest expense carryforwards, and how the small business exemption and the aggregation rules apply with the limitation. The following discussion addresses comments relating to proposed § 1.163(j)–2.

A. Whether the Section 163(j) Limitation Is a Method of Accounting

A few commenters requested clarification that the section 163(j) limitation is not a method of accounting under section 446 and the regulations thereunder. The commenters requested clarification on whether the application of the section 163(j) limitation is a method of accounting because the rules under section 163(j) appear to defer, rather than permanently disallow, a deduction for disallowed business interest expense and disallowed disqualified interest (as defined in proposed § 1.163(j)–1(b)(10)). Specifically, section 163(j)(2) and proposed § 1.163(j)–2(c) allow the carryforward of disallowed business interest expense, and proposed § 1.163(j)–2(c) allows the carryforward of disallowed disqualified interest, to succeeding taxable years.

Section 1.446–1(a)(1) defines the term ''method of accounting'' to include not only the overall method of accounting of a taxpayer, but also the accounting treatment of any item of gross income or deduction. Under § 1.446–1(e)(2)(ii)(*a*), an accounting method change includes a change in the overall plan of accounting for gross income or deductions or a change in the treatment of any material item used in such overall plan of accounting. Moreover, § 1.446–1(e)(2)(ii)(*a*) provides that a ''material item'' is any item that involves the proper time for the inclusion of the item in income or the taking of a deduction. The key characteristic of a material item ''is that it determines the timing of income or deductions.'' *Knight-Ridder Newspapers, Inc.* v. *United States,* 743 F.2d 781, 798 (11th Cir. 1984). Once a taxpayer has established a method of accounting for an item of income or expense, the taxpayer must obtain the consent of the Commissioner under section 446(e) before changing to a different method of accounting for that item.

For purposes of § 1.446–1(e)(2)(ii)(*a*), if there is a change in the application of the section 163(j) limitation, the item involved is the taxpayer's deduction for business interest expense. The taxpayer is not changing its treatment of this item; instead, the taxpayer is changing the limitation placed upon that specific item. The effect of removing the section 163(j) limitation is that the taxpayer would be able to recognize the full amount of the interest expense that is otherwise deductible under its accounting method in a given taxable year before it was limited by section 163(j).

The Treasury Department and the IRS do not view the section 163(j) limitation as a method of accounting under section 446(e) and the regulations thereunder. The determination of whether a taxpayer is subject to the section 163(j) limitation is determined for each taxable year. The carryover rules in section 163(j)(2) and proposed § 1.163(j)–2(c) provide that disallowed business interest expense and disallowed disqualified interest may be carried forward to a future taxable year. However, section 163(j) does not provide a mechanism to ensure that, in every situation, a taxpayer will be able to deduct the business interest expense that the taxpayer was not permitted to deduct in one taxable year and was required to carry forward to succeeding taxable years. Thus, the section 163(j) limitation is not a method of accounting under § 1.446–1(e)(2)(ii)(*a*) because the change in practice may result in a permanent change in the taxpayer's lifetime taxable income. Further, the section 163(j) limitation does not involve an ''item'' as it is not a recurring element of income or expense.

B. General Gross Receipts Test and Aggregation

As noted in the preamble to the proposed regulations, section 163(j)(3) exempts certain small businesses from the section 163(j) limitation. See proposed § 1.163(j)–2(d). Under section 163(j), a small business taxpayer is one that meets the gross receipts test in section 448(c) and is not a tax shelter under section 448(a)(3). The gross receipts test is met if a taxpayer has average annual gross receipts for the three taxable years prior to the current taxable year of $25 million or less. For taxable years beginning after December 31, 2018, the gross receipts threshold reflects an annual adjustment for inflation as provided for in section 448(c)(4); thus, the gross receipts threshold for taxable years beginning in 2020 is $26 million. See section 3.31 of Rev. Proc. 2019–44, 2019–47 I.R.B.1093. Section 448(c)(2) aggregates the gross receipts of multiple taxpayers that are treated as a single employer under sections 52(a) and (b) and 414(m) and (o). The gross receipts test under section 448(c) normally applies only to corporations and to partnerships with C corporation partners. However, section 163(j)(3) and proposed § 1.163(j)–2(d)(2)(i) provide that, for a taxpayer that is not a corporation or a partnership, the gross receipts test of section 448(c) applies as if the taxpayer were a corporation or a partnership.

Some commenters noted that the aggregation rules in sections 52(a) and (b) and sections 414(m) and (o) could be difficult to apply in certain instances due to their complexity. Other commenters asked that the final regulations clarify the application of the aggregation rules to the gross receipts test under section 448(c). Addressing the application of the aggregation rules to the gross receipts test is beyond the scope of the final regulations. The section 52(a) and (b) aggregation rules were enacted as part of the work opportunity tax credit, but have also been applied to numerous Code provisions, including sections 45A, 45S, 264, 280C and 448. The affiliated service group rules under section 414(m) were enacted to address certain abuses related to qualified retirement plans, but also have been applied to several other Code provisions, including sections 45R, 162(m), 414(t), 4980H, and 4980I.

However, the Treasury Department and the IRS are aware that the aggregation rules set forth in sections 52(a) and (b) and sections 414(m) and (o) are complex. Therefore, Frequently Asked Questions that explain the basic operation of these rules are provided on *http://irs.gov/newsroom.* See FAQs Regarding the Aggregation Rules Under Section 448(c)(2) that Apply to the Section 163(j) Small Business Exemption. The Treasury Department and the IRS continue to study the application of the aggregation rules to the gross receipts test, and request comments on issues relating to such application, taking into account the application of the aggregation rules beyond the gross receipts test.

The Treasury Department and the IRS continue to review and consider issues relating to the affiliated service group rules under section 414(m), and a guidance project regarding the aggregation rules under section 414(m) is listed on the 2019–2020 Priority Guidance Plan (RIN 1545–BO34). As guidance is published relating to the affiliated service group rules, the FAQs will be updated, taking into account the various Code provisions to which these aggregation rules apply.

In addition, the Treasury Department and the IRS recognize that proposed § 1.163(j)–2(d)(2)(i) may generate confusion with respect to the aggregation rules. Although section 448(c) applies only to corporations and to partnerships with a C corporation partner, sections 52(a), 52(b), 414(m), and 414(o) apply to a broader array of entities. These statutes contain different ownership thresholds for different types of entities that apply in determining whether multiple entities are treated as a single employer. To resolve potential confusion, the final regulations remove the reference to the aggregation rules from proposed § 1.163(j)–2(d)(2)(i). Taxpayers that are not a corporation or a partnership with a C corporation partner must apply section 448(c) as if they were a corporation or a partnership in accordance with section 163(j)(3) and proposed § 1.163(j)–2(d)(2)(i). However, taxpayers should treat themselves as the type of entity that they actually are in applying sections 52(a), 52(b), 414(m), and 414(o).

C. Small Business Exemption and Single Employer Aggregation Rules—Proposed §§ 1.163(j)–2(d) and 1.52–1(d)(1)(i)

Section 52(b) treats trades or businesses under common control as a single employer. Section 1.52–1(b) through (d) defines ''trades or businesses under common control'' to include parent-subsidiary groups and brother-sister groups. Commenters noted that the version of § 1.52–1(d)(1)(i) in effect at the time of the proposed regulations defined ''brother-sister groups'' to include entities a controlling interest in which is owned by the same 5 or fewer people who are individuals, estates, or trusts (directly and with the application of § 1.414(c)–4(b)(1)).

Section 1.414(c)–4(b)(1) provides that, if a person has an option to purchase an interest in an organization, the person is deemed to own an interest in that organization. Other provisions under § 1.414(c)–4 apply attribution on a broader scale, such as through familial relationships and for closely held partnerships and S corporations.

Commenters questioned whether the cross-reference in § 1.52–1(d)(1)(i) was correct, and whether the cross-reference should have been to § 1.414(c)–4 instead of § 1.414(c)–4(b)(1). The Treasury Department and the IRS agree that there is no discernible reason why § 1.52–1(d)(1)(i) aggregation should be limited solely to options holders. Taxpayers need to know how to aggregate gross receipts properly in order to know if they are subject to section 163(j).

On July 11, 2019, a correcting amendment to T.D. 8179 was published in the **Federal Register** to clarify that the cross-reference in § 1.52–1(d)(1)(i) should be to § 1.414(c)–4. See 84 FR 33002. This correcting amendment should eliminate uncertainty for taxpayers that need to determine how to aggregate gross receipts in the context of a brother-sister group under common control.

D. Small Business Exemption and Tax Shelters—Proposed § 1.163(j)–2(d)(1)

Consistent with section 163(j)(3), proposed § 1.163(j)–2(d)(1) provides that the exemption for certain small businesses that meet the gross receipts test of section 448(c) does not apply to a tax shelter as defined in section 448(d)(3). Several commenters requested clarification on the application of the small business exemption under section 163(j)(3) to a tax shelter.

Section 448(d)(3) defines a tax shelter by cross-reference to section 461(i)(3), which defines a tax shelter, in relevant part, as a syndicate within the meaning of section 1256(e)(3)(B). Section 1.448–1T(b)(3) provides, in part, that a syndicate is a partnership or other entity (other than a C corporation) if more than 35 percent of its losses during the taxable year are *allocated* to limited partners or limited entrepreneurs, whereas section 1256(e)(3)(B) refers to losses that are *allocable* to limited partners or limited entrepreneurs. As a result, the scope of the small business exemption in section 163(j)(3) is unclear. Commenters requested that an entity be a syndicate in a taxable year only if it has net losses in that year and more than 35 percent of those net losses are actually *allocated* to limited partners or limited entrepreneurs. To provide a consistent definition of the term ''syndicate'' for purposes of sections 163(j), 448, and 1256, the Treasury Department and the IRS propose to define the term ''syndicate'' using the actual allocation rule from the definition in § 1.448–1T(b)(3). This definition is also consistent with the definition used in a number of private letter rulings under section 1256. See proposed § 1.1256(e)–2(a) in the Concurrent NPRM.

Commenters also requested specific relief for small business taxpayers from the definition of a syndicate based on the ''active management'' exception under section 1256(e)(3)(C). Section 1256(e)(3)(C) lists several examples of interests in an entity that ''shall not be treated as held by a limited partner or a limited entrepreneur,'' thus excluding the entity from the definition of a syndicate. In particular, section 1256(e)(3)(C)(v) allows the Secretary to determine (by regulations or otherwise) ''that such interest should be treated as held by an individual who actively participates in the management of such entity, and that such entity and such interest are not used (or to be used) for tax-avoidance purposes.''

The commenters requested that the Treasury Department use its authority under section 1256(e)(3)(C)(v) to provide relief from the definition of a syndicate to small business entities that (1) qualify under the gross receipts test of section 448(c), (2) meet the definition of a syndicate, and (3) do not qualify to make an election as an electing real property business or electing farming business. If a small business satisfies these three conditions, the commenters requested that the Treasury Department and the IRS provide a rule that all interests in the entity are treated as held by partners or owners who actively participate in the management of such entity.

The Treasury Department and the IRS have determined that the request deeming limited partners in small partnerships to be active participants even if those owners would not be treated as active participants under section 1256(e)(3)(C) is contrary to the statutory language and legislative history in section 163(j)(3). Therefore, the Treasury Department and the IRS decline to adopt the comments.

Another commenter asked for clarification on how to compute the amount of loss to be tested under § 1.448–1T(b)(3) and section 1256(e)(3)(B). The commenter provided a particular fact pattern in which a small business would be caught in an iterative loop of (a) of having net losses due to a business interest deduction, (b) which would trigger disallowance of the exemption for small businesses in section 163(j)(3) if more than 35 percent of the losses were allocated to a limited partner, (c) which would trigger the application of the section 163(j)(1) limitation to reduce the amount of the interest deduction, (d) which would then lead to the taxpayer having no net losses and therefore being eligible for the application of the exemption for small businesses under section 163(j)(3). To address this fact pattern, in the Concurrent NPRM, the Treasury Department and the IRS have added an ordering rule providing that, for purposes of section 1256(e)(3)(B) and § 1.448–1T(b)(3), losses are determined without regard to section 163(j). See proposed § 1.1256(e)–2(b) and the example provided in proposed § 1.1256(e)–2(c) in the Concurrent NPRM.

E. Gross Receipts for Partners in Partnerships and Shareholders of S Corporation Stock—Proposed § 1.163(j)–2(d)(2)(iii)

Proposed § 1.163(j)–2(d)(iii) provides that, in determining whether a taxpayer meets the gross receipts test of section 448(c), each partner in a partnership includes a share of partnership gross receipts in proportion to such partner's distributive share of items of gross income that were taken into account by the partnership under section 703. Similarly, shareholders of S corporations include a pro rata share of the S corporation's gross receipts. See Rev. Rul. 71–455, 1971–2 C.B. 318 (holding that a partner's distributive share of the partnership's gross receipts is used in applying the passive investment income test under section 1372(e)(5)).

This approach would be applicable only in situations in which the partner and the partnership (or a shareholder and the S corporation) are not treated as one person under the aggregation rules of sections 52(a) and (b) and 414(m) and (o). The Treasury Department and the IRS requested comments in the preamble to the proposed regulations on this approach and on whether other approaches to determining the gross receipts of partners and S corporation shareholders for purposes of section 163(j) would measure the gross receipts of such partners and shareholders more accurately.

In response, several commenters suggested different approaches for determining the gross receipts of partners and S corporation shareholders. One commenter recommended that a taxpayer should include gross receipts only from entities eligible for the small business exemption (exempt entities). In other words, the commenter recommended that a taxpayer's gross receipts should not include gross receipts from (1) any electing real property trade or business or electing farming business; (2) any entities utilizing the floor plan financing interest exception under section 163(j)(1)(C); and (3) any other entities subject to section 163(j). The commenter noted that this modification would simplify the computation of gross receipts and prevent the same gross receipts from being double-counted both at the entity level and the partner or S corporation shareholder level. However, the determination of gross receipts generally is not affected by whether any other entity is subject to section 163(j).

One commenter noted that passthrough entities generally do not provide information regarding gross receipts to their partners. As it is difficult for partners to determine the partnership's gross receipts, the commenter suggested various approaches, such as a de minimis rule whereby a less-than-10 percent owner of a passthrough entity may use the taxable income from such entity rather than gross receipts; use the current-year gross receipts as a reasonable estimate of the past three years; or not exclude the gross receipts of the exempt entity in certain situations.

Another commenter recommended that, in situations in which a partner and a partnership are not subject to the aggregation rules of section 448(c), a partner should not be required to include any share of partnership gross receipts when determining its partner-level eligibility for the small business exemption. The commenter noted that section 163(j) is applied at the partnership level. The commenter stated it is inconsistent to take an aggregate view of partnerships for purposes of the small business exemption without a specific rule under section 163(j) requiring such attribution or aggregation. The commenter also stated that requiring a partner to include a share of partnership gross receipts would discourage taxpayers who operate small businesses from investing in partnerships.

The Treasury Department and the IRS understand that passthrough entities might not have reported gross receipts to their partners or shareholders in the past. However, the statute is clear that a taxpayer must meet the gross receipts test of section 448(c), and that, if the taxpayer is not subject to section 448(c), the section 448(c) rules must be applied in the same manner as if such taxpayer were a corporation or partnership. The alternatives presented either do not have universal application or do not adequately reflect a passthrough entity's gross receipts.

Additionally, there is no authority under section 448 and the regulations thereunder to substitute taxable income for gross receipts or to estimate gross receipts. Accordingly, the Treasury Department and the IRS do not adopt the suggested approaches, and the proposed rules are finalized without any change.

IV. Comments on and Changes to Section Proposed § 1.163(j)–3: Relationship of Section 163(j) Limitation to Other Provisions Affecting Interest

Proposed § 1.163(j)–3 provides ordering and operating rules that control the interaction of the section 163(j) limitation with other provisions of the Code that defer, capitalize or disallow interest expense. The ordering and operating rules provide that section 163(j) applies before the operation of the loss limitation rules in section 465 and 469, and before the application of section 461(l), and after other provisions of the Code that defer, capitalize, or disallow interest expense. The ordering and operating rules in proposed § 1.163(j)–3 apply only in determining the amount of interest expense that could be deducted without regard to the section 163(j) limitation, and not for other purposes, such as the calculation of ATI. The following discussion addresses comments relating to proposed § 1.163(j)–3.

A. Capitalized Interest

Proposed § 1.163(j)–3(b)(5) provides that provisions that require interest to be capitalized, such as sections 263A and 263(g), apply before section 163(j). Commenters suggested that this section is too restrictive by referring solely to sections 263(A) and 263(g), and that other provisions could require interest to be capitalized. The Treasury Department and the IRS agree with this comment, and an appropriate revision has been made in the final regulations to account for any possible additional provisions that could require interest to be capitalized.

B. Provisions That Characterize Interest Expense as Something Other Than Business Interest Expense

Proposed § 1.163(j)–3(b)(9) generally provides that provisions requiring interest expense to be treated as something other than business interest expense, such as section 163(d) governing investment interest expense, govern the treatment of the interest expense. Commenters expressed confusion with the provision, suggesting that, by virtue of the statute and the proposed regulations, if interest expense is treated as something other than business interest expense, there is no need to consult proposed § 1.163(j)–3. The Treasury Department and the IRS generally agree with the comment and have removed this section from the final regulations.

C. Section 108

In the preamble to the proposed regulations, the Treasury Department and the IRS requested comments on the interaction between section 163(j) and the rules addressing income from the discharge of indebtedness under section 108. In response, commenters noted, for example, that it is unclear whether cancellation of indebtedness income under section 61(a)(11) arises when the taxpayer only receives a benefit in the form of a disallowed business interest expense carryforward, or whether any exclusions, such as sections 108(e)(2) or 111, or any tax benefit principles, should apply. In light of the complex and novel issues raised in these comments, the Treasury Department and the IRS have determined that the interaction between section 163(j) and section 108 requires further consideration and may be the subject of future guidance.

D. Sections 461(l), 465, and 469

The proposed regulations provide that sections 461(l), 465, and 469 apply after the application of section 163(j). The Treasury Department and the IRS received informal questions about the effect of these sections on the calculation of ATI. Therefore, the final regulations clarify whether and how sections 461(l), 465, and 469 are applied when determining tentative taxable income. The final regulations also include examples to demonstrate the calculation of ATI if a loss tentatively is suspended in the calculation of tentative taxable income, and if a loss is carried forward from a prior taxable year under section 469.

V. Comments on and Changes to Proposed § 1.163(j)–4: General Rules Applicable to C Corporations (Including Real Estate Investment Trusts (REITs), RICs, and Members of Consolidated Groups) and Tax-Exempt Corporations

Section 1.163(j)–4 provides rules regarding the computation of items of income and expense under section 163(j) for taxpayers that are C corporations (including members of a consolidated group, REITs, and RICs) and tax-exempt corporations. The following discussion addresses comments relating to proposed § 1.163(j)–4.

A. Aggregating Affiliated but Non-Consolidated Entities

Under the proposed regulations, members of a consolidated group are aggregated for purposes of section 163(j), and the consolidated group has a single section 163(j) limitation. In contrast, partnerships that are wholly owned by members of a consolidated group are not aggregated with the group for purposes of section 163(j), and members of an affiliated group that do not file a consolidated return are not aggregated with each other for purposes of section 163(j).

Several commenters recommended that aggregation rules be applied to related taxpayers other than consolidated group members. For example, one commenter recommended that aggregation rules similar to those provided under section 199A be applied for purposes of the section 163(j) limitation to obviate the need for related entities to shift debt or business assets around to avoid this limitation. Several other commenters noted that the 1991 Proposed Regulations applied section 163(j) to an affiliated group of corporations (including all domestic corporations controlled by the same parent, whether consolidated or not) and recommended that this ‘‘super-affiliation rule’’ be retained so that affiliated but non-consolidated groups are not disadvantaged under the section 163(j) regulations. In contrast, another commenter agreed with the approach taken in the proposed regulations with respect to affiliated but non-consolidated groups, in part because the allocation of the section 163(j) limitation among non-consolidated affiliates can become quite complex.

Commenters also recommended that a partnership owned by members of an affiliated group (controlled partnership) be treated as an aggregate rather than an entity so that the section 163(j) limitation would not apply separately at the partnership level. Instead, each partner would include its allocable share of the controlled partnership's tax items in determining its own section 163(j) limitation, and transactions between the controlled partnership and its controlling partners would be disregarded. Some commenters would apply this approach to partnerships wholly owned by members of a controlled group of corporations (as defined in section 1563). Others would apply this approach to partnerships wholly owned (or at least 80 percent-owned) by members of a consolidated group in order to reduce compliance complexity, to ensure that similarly situated taxpayers (namely, consolidated groups that conduct business activities directly and those that conduct such activities through a controlled partnership) are treated similarly, and to discourage consolidated groups from creating a controlled partnership to obtain a better result under section 163(j). Commenters observed that the proposed regulations apply an aggregate approach to certain controlled partnerships that own CFCs (see proposed § 1.163(j)–7(f)(6)(ii)(B)), and they recommended applying this principle more broadly.

As explained in the preamble to the proposed regulations, the Treasury Department and the IRS have determined that non-consolidated entities generally should not be aggregated for purposes of applying the section 163(j) limitation. Whereas old section 163(j)(6)(C) expressly provided that ''[a]ll members of the same affiliated group (within the meaning of section 1504(a)) shall be treated as 1 taxpayer,'' section 163(j) no longer contains such language, and nothing in the legislative history of section 163(j) suggests that Congress intended non-consolidated entities to be treated as a single taxpayer for purposes of section 163(j). See the Concurrent NPRM for a discussion of a proposed exception to this general rule for CFCs. Moreover, the Treasury Department and the IRS have determined that controlled partnerships generally should not be treated as aggregates because section 163(j) clearly applies at the partnership level. See section 163(j)(4). In other words, Congress decided that partnerships should be treated as entities rather than aggregates for purposes of section 163(j). Additionally, revising the regulations to treat controlled partnerships as aggregates would not necessarily achieve the objectives sought by commenters because the controlling partners effectively could ''elect'' entity or aggregate treatment for the partnership simply by selling or acquiring interests therein (thereby causing the partnership to satisfy or fail the ownership requirement for aggregate treatment).

However, the Treasury Department and the IRS are concerned that the application of section 163(j) on an entity-by-entity basis outside the consolidated group context could create the potential for abuse in certain situations by facilitating the separation of excepted and non-excepted trades or businesses. For example, a consolidated group that is engaged in both excepted and non-excepted trades or businesses could transfer its excepted trades or businesses to a controlled partnership, which in turn could borrow funds from a third party and distribute those funds to the consolidated group tax-free under section 731 (unless the debt is recharacterized as debt of the consolidated group in substance; see *Plantation Patterns, Inc.* v. *Commissioner,* 462 F.2d 712 (5th Cir. 1972)). Similarly, an individual taxpayer that is engaged in both excepted and non-excepted trades or businesses could transfer its excepted trades or businesses to a controlled corporation, which in turn could borrow funds from a third party and distribute those funds to the individual tax-free under section 301(c)(2) (assuming the corporation has no earnings and profits). Additionally, a partnership with two trades or businesses—one that generates ATI, and another that generates losses—could separate the two trades or businesses into a tiered partnership structure solely for the purpose of borrowing through the partnership that generates ATI and avoiding a section 163(j) limitation.

The anti-avoidance rule in proposed § 1.163(j)–2(h) and the anti-abuse rule in proposed § 1.163(j)–10(c)(8) would preclude taxpayers from undertaking the foregoing transfers in certain circumstances. The final regulations add an example illustrating the application of the anti-avoidance rule in proposed § 1.163(j)–2(h) to the use of a controlled corporation to avoid the section 163(j) limitation, as well as an example illustrating the application of this anti-avoidance rule to the use of a lower-tier partnership to avoid the section 163(j) limitation in a similar manner.

Commenters further requested that the Treasury Department and the IRS simplify the rules applicable to controlled partnerships if the final regulations do not treat such partnerships as aggregates rather than entities. For example, commenters recommended (i) eliminating steps 3 through 10 in proposed § 1.163(j)–6(f)(2) for such partnerships, (ii) applying the principles of the § 1.469–7 self-charged interest rules to partnership interest expense and income owed to or from consolidated group members by treating all members of the group as a single taxpayer, or (iii) allowing excess taxable income (ETI) that is allocated by a partnership to one consolidated group member to offset excess business interest expense allocated by that partnership to another group member.

The final regulations do not adopt these recommendations. For a discussion of steps 3 through 10 in proposed § 1.163(j)–6(f)(2), see part VII(A)(3) of this Summary of Comments and Explanation of Revisions section. For a discussion of the self-charged interest rules, see the Concurrent NPRM. For a discussion of the proposal to allow ETI allocated by a partnership to one member of a consolidated group to offset excess business interest expense allocated by that partnership to another group member, see part V(D)(4) of this Summary of Comments and Explanation of Revisions section.

B. Intercompany Transactions and Intercompany Obligations

Proposed § 1.163(j)–4(d)(2) contains rules governing the calculation of the section 163(j) limitation for members of a consolidated group. These rules provide, in part, that: (i) A consolidated group has a single section 163(j) limitation; (ii) for purposes of calculating the group's ATI, the relevant taxable income is the consolidated group's consolidated taxable income, and intercompany items and corresponding items are disregarded to the extent they offset in amount; and (iii) for purposes of calculating the group's ATI and determining the business interest expense and business interest income of each member, all intercompany obligations (as defined in § 1.1502–13(g)(2)(ii)) are disregarded (thus, interest expense and interest income from intercompany obligations are not treated as business interest expense and business interest income for purposes of section 163(j)).

In turn, proposed § 1.163(j)–5(b)(3) contains rules governing the treatment of disallowed business interest expense carryforwards for consolidated groups. These rules provide, in part, that if the aggregate amount of members' business interest expense (including disallowed business interest expense carryforwards) exceeds the group's section 163(j) limitation, then: (i) Each member with current-year business interest expense and either current-year business interest income or floor plan financing interest expense deducts current-year business interest expense to the extent of its current-year business interest income and floor plan financing interest expense; (ii) if the group has any remaining section 163(j) limitation, each member with remaining current-year business interest expense deducts a pro rata portion of its expense; (iii) if the group has any remaining section 163(j) limitation, disallowed business interest expense carryforwards are deducted on a pro rata basis in the order of the taxable years in which they arose; and (iv) each member whose business interest expense is not fully absorbed by the group in the current taxable year carries the expense forward to the succeeding taxable year as a disallowed business interest expense carryforward.

Commenters posed several questions and comments with regard to these proposed rules. One commenter expressed concern that these provisions would create noneconomic and distortive allocations of disallowed business interest expense within consolidated groups. For example, assume P (the parent of a consolidated group) acts as a group's sole external borrower, and P on-lends the loan proceeds to S (a member of P's consolidated group) for use in S's business operations. Under the proposed regulations, any disallowed business interest expense would be allocated to P even though S is the economic user of the borrowed funds and may generate the income that supports the external debt. The commenter also expressed concern that, under the proposed regulations, consolidated groups effectively may decide which member will carry forward disallowed business interest expense by having that member borrow funds from third parties, regardless of whether that member actually uses the funds. The commenter raised similar concerns about business interest income, noting that a group may choose which member will loan funds outside the group and thereby affect which member's business interest expense is absorbed within the group.

To address the foregoing concerns, the commenter suggested that the final regulations (i) take intercompany interest income and expense into account for purposes of section 163(j), (ii) allocate current-year disallowed business interest expense to members without regard to whether the interest expense results from intercompany obligations or external borrowings, and (iii) de-link disallowed business interest expenses from intercompany interest income for purposes of the rules under § 1.1502–13. However, the commenter acknowledged that this approach could introduce unwarranted complexity. Alternatively, the commenter suggested that taxpayers be permitted to apply any reasonable approach (apart from tracing) consistent with the economics, subject to a narrowly tailored anti-avoidance rule.

In the proposed regulations, the Treasury Department and the IRS determined that intercompany obligations should be disregarded for purposes of section 163(j) for several reasons. First, section 163(j) is concerned with interest expense paid to external lenders, not internal borrowing between divisions of a single corporation (or between members of a consolidated group). In this regard, the Treasury Department and the IRS note that treating a member with intercompany debt but no external debt as having business interest expense could lead to strange results.

Second, the approach taken in the proposed regulations results in application of the section 163(j) limitation at the consolidated group level, consistent with the expressed intent of Congress (see H. Rept. 115–466, at 386 (2017)).

Third, such an approach is simpler for taxpayers to administer than an approach that would require consolidated groups to track disallowed business interest expense with regard to intercompany obligations across taxable years, as further discussed in the following paragraph. Allowing taxpayers to apply any reasonable approach (and to ignore or take into account interest expense on intercompany obligations as they determine to be appropriate) also would further complicate rather than simplify tax administration, particularly with regard to the application of section 163(j) to consolidated groups.

Fourth, as the commenter acknowledged, taking intercompany obligations into account for purposes of section 163(j) would complicate the application of § 1.1502–13. Section 1.1502–13 achieves single-entity treatment for a consolidated group by preventing intercompany transactions from creating, accelerating, avoiding, or deferring consolidated taxable income or liability. To this end, § 1.1502–13(c) ''matches'' the tax items of the members that are parties to an intercompany transaction. In the case of intercompany interest, income and deductions do not affect consolidated taxable income or liability because each side of the transaction ''nets out'' the other in each taxable year. If section 163(j) applied to intercompany payments of business interest expense, and if a consolidated group's section 163(j) limitation did not permit the deduction of all of the group's intercompany business interest expense, the interest income and expense would not net out each other. Thus, the group would need to separately track both the intercompany borrower's non-deductible expense and the intercompany lender's non-includible income through future taxable years.

The Treasury Department and the IRS acknowledge that disregarding intercompany obligations may lead to results in some circumstances that are less economically accurate than a regime that takes such obligations into account, but the Treasury Department and the IRS considered administrability as well as economic accuracy when promulgating the proposed regulations. Moreover, although disregarding intercompany obligations may grant consolidated groups the latitude to decide which member will incur business interest expense, consolidated groups also would have significant flexibility to allocate business interest expense within a group using intercompany obligations if such obligations were regarded for purposes of section 163(j).

Although the proposed rules in the Concurrent NPRM concerning CFC group elections do regard inter-CFC group net interest expense in allocating CFC group disallowed business interest expense, the CFC group setting is materially different from that of a consolidated group. First, in the context of a CFC group, neither § 1.1502–13 nor similar rules apply. Second, the location of disallowed business interest expense may have more effect on tax liability. In particular, disallowed business interest expense may affect the calculation of foreign tax credits and the amount of qualified business asset investment within the meaning of section 951A(d)(1) (QBAI) taken into account in determining a U.S. shareholder's tax liability under section 951A. This effect depends entirely on the particular CFC group member affected by disallowed business interest expense. Although the location of disallowed business interest expense has an effect on consolidated groups, this effect often will be less than in the CFC group context.

For the foregoing reasons, the final regulations do not apply section 163(j) to business interest expense or business interest income incurred on intercompany obligations, with one limited exception related to repurchase premium on obligations that are deemed satisfied and reissued, which is described in part V(C) of this Summary of Comments and Explanation of Revisions section.

Commenters also expressed concern that consolidated groups may have difficulty determining which member is the borrower on external debt if other group members are co-obligors or guarantors on the debt, and that, as a result, each member may have difficulty calculating its business interest expense for each taxable year. Commenters voiced similar concerns about the lack of parameters for determining the appropriate location of business interest income and floor plan financing interest expense within the group.

The Treasury Department and the IRS do not find this comment persuasive. Consolidated groups (and other related parties) are required to determine which member is entitled to a deduction for interest expense. Specifically, a consolidated group must use this information for purposes of computing consolidated taxable income under §§ 1.1502–11 and 1.1502–12 and making stock basis adjustments in members under § 1.1502–32. Moreover, consolidated groups must determine which member has incurred business interest expense for purposes of applying section 382 and the separate return limitation year (SRLY) rules. Consolidated groups must look to existing law to determine which member should be treated as incurring business interest expense or business interest income for purposes of section 163(j).

C. Repurchase Premium on Obligations That Are Deemed Satisfied and Reissued

As discussed in part V(B) of this Summary of Comments and Explanation of Revisions section, interest expense on intercompany obligations generally is disregarded for purposes of section 163(j). Thus, commenters asked whether repurchase premium that is treated as interest with respect to intercompany obligations should be subject to the section 163(j) limitation. In general, if debt that is not an intercompany obligation becomes an intercompany obligation (for example, if a member of a consolidated group acquires another member's debt from a non-member), the debt is treated for all Federal income tax purposes, immediately after it becomes an intercompany obligation, as having been satisfied by the issuer for cash in an amount equal to the holder's basis in the note and as having been reissued as a new intercompany obligation for the same amount of cash. See § 1.1502–13(g)(5)(ii)(A). Additionally, if a debt instrument is repurchased by the issuer for a price in excess of its adjusted issue price (as defined in § 1.1275–1(b)), the excess (repurchase premium) generally is deductible as interest for the taxable year in which the repurchase occurs. See § 1.163–7(c).

For example, S is a member of P's consolidated group, and S has borrowed $100x from unrelated X. At a time when S's note has increased in value to $130x due to a decline in prevailing interest rates, P purchases the note from X for $130x. Under § 1.1502–13(g)(5)(ii), S's note is treated as satisfied for $130x immediately after it becomes an intercompany obligation. As a result of the deemed satisfaction of the note, P has no gain or loss, and S has $30x of repurchase premium that is deductible as interest. See § 1.1502–13(g)(7)(ii), *Example 10.* Similarly, if S were to repurchase its note from X for $130x, S would have $30x of repurchase premium that is deductible as interest.

If S were to repurchase its note from X at a premium, the interest (in the form of repurchase premium) paid on that note would be subject to the section 163(j) limitation. See § 1.163(j)–1(b)(22)(i)(H) (treating repurchase premium that is deductible under § 1.163–7(c) as interest for purposes of section 163(j)). If section 163(j) does not apply to repurchase premium paid by S to P after P purchases S's note from X, the P group would obtain a different (and better) result than if S were to repurchase its own note. The Treasury Department and the IRS have determined that achieving different results under section 163(j) depending on which member repurchases external debt would be inconsistent with treating a consolidated group as a single entity for purposes of section 163(j) and would undermine the purpose of § 1.1502–13. Thus, the final regulations provide that, for purposes of section 163(j), if any member of a consolidated group purchases a member's note from a third party at a premium, the repurchase premium that is deductible under § 1.163–7(c) is treated as interest expense for purposes of section 163(j), regardless of whether the repurchase premium is treated as paid on intercompany indebtedness.

D. Intercompany Transfers of Partnership Interests

1. Overview of Proposed § 1.163(j)–4(d)(4)

Proposed § 1.163(j)–4(d)(4) provides that the transfer of a partnership interest in an intercompany transaction that does not result in the termination of the partnership is treated as a disposition for purposes of section 163(j)(4)(B)(iii)(II), regardless of whether the transfer is one in which gain or loss is recognized. Thus, the transferor member's excess business interest expense is eliminated rather than transferred to the transferee member. Proposed § 1.163(j)–4(d)(4) further provides that neither the allocation of excess business interest expense to a member from a partnership (and the resulting decrease in basis in the partnership interest) nor the elimination of excess business interest expense of a member upon a disposition of the partnership interest (and the resulting increase in basis in the partnership interest) affects basis in the member's stock for purposes of § 1.1502–32(b)(3)(ii). Instead, investment adjustments are made under § 1.1502–32(b)(3)(i) when the excess business interest expense from the partnership is absorbed by the consolidated group. See § 1.1502–32(b).

2. Intercompany Transfers of Partnership Interests Treated as Dispositions; Single-Entity Treatment; Application of § 1.1502–13

Commenters posed various questions and comments about the treatment of intercompany transfers of partnership interests as dispositions for purposes of section 163(j). For example, commenters asked why, in applying section 163(j) to consolidated groups, the proposed regulations treat such transfers as dispositions, rather than simply disregard the transfers, given that the proposed regulations generally treat consolidated groups as a single entity and disregard intercompany transactions for purposes of section 163(j).

The proposed regulations provide that intercompany transfers of partnership interests are treated as dispositions for purposes of section 163(j) because each member's separate ownership of interests in a partnership generally is respected (otherwise, a partnership whose interests are wholly owned by members of a consolidated group would be treated as a disregarded entity), and because the term ''disposition'' in section 163(j)(4)(B)(iii)(II) has broad application (for example, it applies to nonrecognition transactions). Moreover, if an intercompany transfer of partnership interests were not treated as a disposition (and if, as a result, basis were not restored to the transferor member), the amount of the transferor member's gain or loss on the intercompany transfer would be incorrect. Special rules also would be needed to account for the transfer of excess business interest expense from one member to another in a manner consistent with the purposes of § 1.1502–13 and to comply with the directive of section 1502 to clearly reflect the income of each member of the group.

Several commenters also noted problems with the approach in proposed §§ 1.163(j)–4(d)(4) and 1.1502–13(c)(7)(ii)(R), *Example 18.* These commenters pointed out that the approach in the proposed regulations does not achieve single-entity treatment because one member's transfer of its partnership interest to another member causes the transferor's excess business interest expense to be eliminated; thus, an intercompany transaction may alter the amount of business interest expense that is absorbed by the group. One commenter suggested a different approach under which the transferee could claim deductions for excess business interest expense to the extent the transferee is allocated excess taxable income from the same partnership. However, the commenter acknowledged that this approach would require additional rules under § 1.1502–13.

Another commenter suggested that intercompany transfers in which the transferee is the successor to the transferor (for example, in transactions to which section 381(a) applies, or in which the transferee's basis in the partnership interest is determined by reference to the transferor's basis) should not be treated as dispositions for purposes of section 163(j)(4)(B)(iii)(II). However, this approach would not result in an increase in the transferor member's (S's) basis in its partnership interest immediately before the transfer; thus, this approach would be inconsistent with § 1.1502–13, which requires the clear reflection of income at the level of the consolidated group member. This approach also would be inconsistent with section 163(j)(4)(B)(iii)(II), which clearly treats ''a transaction in which gain is not recognized in whole or in part'' as a disposition for purposes of that section.

Still another commenter observed that the analysis in proposed § 1.1502–13(c)(7)(ii)(R), *Example 18,* does not work in certain other fact patterns. In proposed § 1.1502–13(c)(7)(ii)(R), *Example 18,* P wholly owns S and B, both of which are members of P's consolidated group. S and A (an unrelated third party) are equal partners in PS1, which allocates $50x of excess business interest expense to each partner in Year 2. At the end of Year 2, S sells its PS1 interest to B at a $50x loss (S's excess business interest expense is eliminated, and S's basis in its PS1 interest is increased by $50x immediately before the sale). In Year 3, PS1 allocates $25x of excess taxable income to B. At the end of Year 4, B sells its PS1 interest to Z (an unrelated third party) for a $10x gain. The example concludes that S takes into account $25x of its loss in Year 3 as an ordinary loss, which matches B's inclusion of $25x of ordinary income in Year 3. The remaining $25x of S's $50x capital loss is taken into account in Year 4. The commenter noted that, although the analysis in proposed § 1.1502–13(c)(7)(ii)(R), *Example 18,* works under the facts presented, it would not work if, for example, S were to sell the PS1 interest to B at a gain (because S's gain and B's income could not be offset).

The Treasury Department and the IRS acknowledge the concerns raised by these commenters. The Treasury Department and the IRS are continuing to study the proper treatment of intercompany transfers of partnership interests that do not result in the termination of the partnership (intercompany partnership interest transfers), including whether such transfers should be treated as dispositions for purposes of section 163(j)(4)(B)(iii)(II). The final regulations reserve on issues relating to intercompany partnership interest transfers, and the Treasury Department and the IRS welcome further comments on such issues.

3. Possible Approach to Intercompany Partnership Interest Transfers

The Treasury Department and the IRS are considering various possible approaches to intercompany partnership interest transfers. Under one possible approach, such a transfer would be treated as a disposition by S; thus, S's excess business interest expense would be eliminated (and its basis in its partnership interest would be increased accordingly immediately before the transfer), as would S's negative section 163(j) expense (within the meaning of § 1.163(j)–6(h)(1)). However, unlike the approach in proposed § 1.163(j)–4(d)(4), B would be treated as if B had been allocated excess business interest expense or negative section 163(j) interest expense from the partnership in an amount equal to the amount of S's excess business interest expense or negative section 163(j) expense, respectively, immediately before the transfer. B's basis in its partnership interest would be adjusted under section 163(j)(4)(B)(iii)(I) and § 1.163(j)–6(h) to reflect the deemed allocation of excess business interest expense from the partnership. Similar rules would apply to intercompany transfers of partnership interests in nonrecognition transactions.

The foregoing approach would attempt to approximate single-entity treatment while treating the intercompany transfer of a partnership interest as a disposition for purposes of section 163(j)(4)(B)(iii)(II). To ensure that B has the same amount of excess business interest expense, negative section 163(j) expense, and disallowed business interest expense carryforwards as if S and B were divisions of a single corporation, this approach also would include special basis rules. For example, if S transfers its partnership interest to B at a gain, the excess of B's basis in the partnership interest at any time after the transfer over S's basis in the partnership interest immediately before the transfer would not be available to convert negative section 163(j) expense into excess business interest expense in the hands of B or to prevent excess business interest expense from converting into negative section 163(j) expense in the hands of B. Additionally, if adjustments to B's basis in its partnership interest under section 163(j)(4)(B)(iii)(I) and § 1.163(j)–6(h) (upon the deemed allocation of excess business interest expense from the partnership) would exceed B's basis, B would be treated as having a suspended negative basis adjustment in the partnership interest (similar to an excess loss account within the meaning of § 1.1502–19(a)(2)(i)).

The Treasury Department and the IRS request comments on possible approaches to intercompany partnership interest transfers, including the approach outlined in this part V(D)(3) of this Summary of Comments and Explanation of Revisions section.

4. Offsetting Excess Business Interest Expense and Adjusted Taxable Income Within the Consolidated Group

A commenter also recommended that, if the section 163(j) regulations do not treat partnerships wholly owned by members of the same consolidated group as aggregates rather than as entities (see part V(A) of this Summary of Comments and Explanation of Revisions section), the rules applicable to such partnerships should be simplified. For example, the excess taxable income allocated to one member partner could be made available to offset excess business interest expense allocated to another member partner.

The commenter's recommendation presents several issues. For example, the commenter's recommendation would entail disregarding the location of excess business interest expense and excess taxable income within a consolidated group. Such an approach would not fully respect each member's separate interest in a partnership and would not clearly reflect the taxable income of the members of the group. See section 1502; see also part V(D)(2) of this Summary of Comments and Explanation of Revisions section. Further, to the extent the ownership structure of the group is altered by an intercompany transfer of the partnership interest, substantial additional rules under § 1.1502–13 would be required.

5. Intercompany Nonrecognition Transactions

In proposed §§ 1.163(j)–4(d)(4) and 1.1502–13(c)(7)(ii)(S), *Example 19,* the intercompany transfer of a partnership interest in a nonrecognition transaction is treated as a disposition for purposes of section 163(j)(4)(B)(iii)(II). In the preamble to the proposed regulations, the Treasury Department and the IRS requested comments as to whether such transfers should constitute dispositions for purposes of section 163(j)(4)(B)(iii)(II) and, if so, how § 1.1502–13(c) should apply if there is excess taxable income in a succeeding taxable year. In such a case, S would have no intercompany item from the intercompany transfer, and B would take a carryover basis in the partnership interest (this amount would include any basis increase to reflect S's unused excess business interest expense under section 163(j)(4)(B)(iii)(II)).

One commenter agreed that, based on the plain language of section 163(j)(4)(B)(iii)(II), intercompany transfers that are nonrecognition transactions should be treated as dispositions. Another commenter stated that such transfers generally should not be treated as dispositions (if the transferee is the successor to the transferor, as previously discussed), but that, if such transfers are treated as dispositions, no redeterminations should be made under § 1.1502–13(c) with respect to S unless S recognizes gain in the intercompany transfer.

The Treasury Department and the IRS continue to study the proper treatment of intercompany partnership interest transfers and welcome further comments on this issue.

6. Basis Adjustments Under § 1.1502–32

A commenter stated that the approach to basis adjustments under § 1.1502–32 in the proposed regulations may lead to temporary inside/outside basis disparities. Although the commenter generally described this approach as reasonable and consistent with the application of both section 163(j) and § 1.1502–32, the commenter suggested that it may lead to anomalous results in certain cases. The commenter requested an example to illustrate the application of the matching and acceleration rules in the case of an intercompany transfer of an interest in a partnership with disallowed business interest expense.

When S (a member of a consolidated group that is not the common parent) is allocated excess business interest expense from a partnership, S's basis in the partnership is reduced under section 163(j)(4)(B)(iii)(I). Although S's basis in the partnership is reduced, S has excess business interest expense in the same amount, and S's overall inside attribute amount is unchanged. Because there is no net change to S's inside attribute amount, § 1.1502–32 does not apply to reduce other members' basis in S's stock, and there is no inside/outside disparity. Moreover, nothing in the final regulations affects the operation of § 1.1502–32(a), which generally requires adjustments to a member's basis in its S stock to reflect S's distributions and S's items of income, gain, deduction, and loss that are taken into account by the group while S is a member. Thus, the final regulations make no changes in response to this comment.

7. Partnership Terminations

In the preamble to the proposed regulations, the Treasury Department and the IRS requested comments on the treatment of the transfer of a partnership interest in an intercompany transaction that results in the termination of the partnership. Some commenters recommended that the transfer be treated as a disposition for purposes of section 163(j)(4)(B)(iii)(II) and proposed § 1.163(j)–6(h)(3). Other commenters recommended that, under Revenue Ruling 99–6, 1999–1 C.B. 432, if the transferee member (B) also were a partner in the partnership before the intercompany transfer, B should be viewed as (i) receiving a distribution of assets from the terminating partnership with respect to its partnership interest, and (ii) purchasing the partnership's assets deemed distributed to the transferor member (S).

The Treasury Department and the IRS are continuing to study the proper treatment of intercompany transfers of partnership interests that result in the termination of the partnership. But see § 1.163(j)–6(h)(3) with respect to partnership terminations generally.

E. Application of § 1.1502–36 to Excess Business Interest Expense

Under proposed § 1.163(j)–4(d)(4), a partner's change in status as a member of a consolidated group is not treated as a disposition for purposes of section 163(j)(4)(B)(iii)(II) and proposed § 1.163(j)–6(h)(3). In other words, if a corporation becomes or ceases to be a member of a consolidated group, and if that corporation is a partner in a partnership, that corporation's entry into or departure from a consolidated group does not trigger basis adjustments under section 163(j)(4)(B)(iii)(II). However, in the preamble to the proposed regulations, the Treasury Department and the IRS requested comments as to whether additional rules are needed to prevent loss duplication upon the disposition of stock of a subsidiary member (S) holding partnership interests.

Section 1.1502–36 contains the unified loss rule, which limits the ability of a consolidated group to recognize non-economic or duplicated losses on the transfer of S stock. The rule applies when a group member transfers a loss share of S stock. If § 1.1502–36(d) applies to the transfer of a loss share, the attributes of S and its lower-tier subsidiaries generally are reduced as needed to prevent the duplication of any loss recognized on the transferred stock. Such attributes include capital loss carryovers, NOL carryovers, deferred deductions, and basis in assets other than cash and general deposit accounts. See § 1.1502–36(d)(4).

As noted in the preamble to the proposed regulations, the Treasury Department and the IRS have determined that disallowed business interest expenses should be treated as deferred deductions for purposes of § 1.1502–36 (see proposed § 1.1502–36(f)(2)). A commenter recommended that excess business interest expense also be treated as a deferred deduction in determining the net inside attribute amount for purposes of § 1.1502–36(c) and (d). Additionally, the commenter recommended that a consolidated group be permitted to elect to reattribute excess business interest expense from S to the common parent under § 1.1502–36(d)(6) if the common parent also is a partner in the partnership that allocated excess business interest expense to S.

The Treasury Department and the IRS agree that excess business interest expense should be treated as an attribute that is taken into account in determining the net inside attribute amount for purposes of § 1.1502–36(c) and (d). However, the Treasury Department and the IRS have determined that excess business interest expense is more akin to basis (a Category D attribute) than to deferred deductions (a Category C attribute) (see § 1.1502–36(d)(4)(i)). Section 1.163(j)–4(e)(4) reflects this conclusion.

The Treasury Department and the IRS also have determined that excess business interest expense should not be eligible for reattribution under § 1.1502–36(d)(6) because the election is not available with respect to Category D attributes. Thus, the final regulations do not adopt this recommendation.

F. Calculating ATI for Cooperatives

Proposed § 1.163(j)–1(b)(1) defines ATI as the taxable income of the taxpayer for the taxable year, with certain adjustments. Proposed § 1.163(j)–4(b)(4) provides a special rule for calculating the ATI of a RIC or REIT, allowing the RIC or REIT not to reduce its taxable income by the amount of any deduction for dividends paid. The preamble to the proposed regulations also requested comments on whether additional special rules are needed for specific types of taxpayers, including cooperatives.

A commenter asked that the final regulations include a special rule for calculating the ATI of cooperatives subject to taxation under subchapter T of the Code. Under this special rule, taxable income would not be reduced by amounts deducted under section

1382(b)(1) (patronage dividends), section 1382(b)(2) (amounts paid in redemption of nonqualified written notices of allocation distributed as patronage dividends), or section 1382(c) (certain amounts incurred by farm cooperatives described in sections 521 and 1381(a)(1)). The commenter reasoned that such amounts are earnings passed on to members and are therefore analogous to dividends paid by a RIC or REIT to its investor.

The Treasury Department and the IRS agree that, for purposes of section 163(j), amounts deducted by cooperatives under sections 1382(b)(1), (b)(2), and (c) are similar to amounts deducted by RICs and REITs for dividends paid to their investors. The final regulations adopt a rule providing that, for purposes of calculating ATI, the tentative taxable income of a cooperative subject to taxation under sections 1381 through 1388 is not reduced by such amounts. In order to provide similar treatment to similarly situated taxpayers, the final regulations also provide that, for purposes of calculating ATI, the tentative taxable income of cooperatives not subject to taxation under subchapter T of the Code is not reduced by the amount of deductions equivalent to the amounts deducted by cooperatives under sections 1382(b)(1), (b)(2), and (c).

G. Calculating ATI for a Consolidated Group

Proposed § 1.163(j)–1(b)(1) defines ATI as the taxable income of the taxpayer for the taxable year, with certain adjustments. For example, ATI is computed without regard to the amount of any NOL deduction under section 172. See proposed § 1.163(j)–1(b)(1)(i)(B).

As noted in part V(B) of this Summary of Comments and Explanation of Revisions section, for purposes of calculating the ATI of a consolidated group, the relevant taxable income is the group's consolidated taxable income, determined under § 1.1502–11 without regard to any carryforwards or disallowances under section 163(j). See proposed § 1.163(j)–4(d)(2)(iv). Commenters asked for clarification that a consolidated group's ATI does not take into account any NOL deductions available under section 172 and § 1.1502–11(a)(2) that result from either the carryback or carryforward of NOLs.

Proposed § 1.163(j)–4(d)(2)(iv) does not expressly mention the adjustments made to ATI in proposed § 1.163(j)–1(b)(1) because those adjustments are generally applicable (for example, the adjustment for NOLs applies to all taxpayers to whom section 172 applies, regardless of whether such taxpayers file a consolidated return). Moreover, there is no exception in proposed § 1.163(j)–4(d)(2)(iv) to the adjustment for NOLs in proposed § 1.163(j)–1(b)(1)(i)(B). Thus, under these provisions, a consolidated group's ATI would not take into account any NOL deductions resulting from the carryback or carryforward of NOLs. The Treasury Department and the IRS have determined that no change to proposed § 1.163(j)–4(d)(2)(iv) is needed to effectuate this result.

H. Application of Section 163(j) to Life-Nonlife Groups

Proposed § 1.163(j)–4(d)(2) provides that a consolidated group has a single section 163(j) limitation and that, for purposes of calculating the group's ATI, the relevant taxable income is the group's consolidated taxable income. However, § 1.1502–47 requires consolidated groups whose members include life insurance companies and other companies (life-nonlife groups) to adopt a subgroup method to determine consolidated taxable income. (One subgroup is the group's nonlife companies; the other subgroup is the group's life insurance companies.) Under the subgroup method, each subgroup initially computes its own consolidated taxable income, and there are limitations on a life-nonlife group's ability to offset one subgroup's income with the other subgroup's loss.

In light of the apparent tension between proposed § 1.163(j)–4(d)(2) and the subgroup method in § 1.1502–47, one commenter asked for clarification that there are not separate section 163(j) limitations for each subgroup in a life-nonlife group.

The subject matter of this comment is beyond the scope of the final regulations. The Treasury Department and the IRS expect to issue future guidance regarding the interaction of section 163(j) and § 1.1502–47 and welcome further comments on this topic.

I. Application of Section 163(j) to Tax-Exempt Entities

Proposed § 1.163(j)–1(b)(36) defines a tax-exempt corporation but does not define other types of tax-exempt organizations. Thus, a commenter asked for clarification as to whether section 163(j) applies solely to tax-exempt corporations or whether it also applies to other entities subject to tax under section 511. The final regulations clarify that section 163(j) applies to all entities that are subject to tax under section 511.

The commenter also suggested that section 163(j) should not apply to state colleges and universities described in section 511(a)(2)(B). The Treasury Department and the IRS have found nothing in the statute or legislative history to suggest that Congress intended special treatment for state colleges and universities to the extent such organizations are subject to tax under section 511. Therefore, the final regulations do not adopt this recommendation.

J. Partnership Investment Income and Corporate Partners

Under the proposed regulations, a partnership's investment interest income and investment expense are allocated to each partner in accordance with section 704(b), and the effect of the allocation is determined at the partner level. In general, any investment interest, investment income, and investment expense allocated by a partnership to a C corporation partner is treated by the partner as allocable to a non-excepted trade or business of the partner for purposes of section 163(j). See proposed §§ 1.163(j)–4(b)(3)(i) and 1.163(j)–10(b)(6).

In light of the statutory restriction against including investment income in a partner's ATI (see section 163(j)(8)(A)(i)), a commenter requested confirmation that a partnership's investment income is treated as properly allocable to a trade or business of (and thus is included in the ATI of) a corporate partner, perhaps by adding an example to illustrate the application of this rule.

Proposed § 1.163(j)–10(b)(6) provides that any investment income or investment expenses that a partnership receives, pays, or accrues and that is treated as properly allocable to a trade or business of a C corporation partner under proposed § 1.163(j)–4(b)(3)(i) is treated as properly allocable to a non-excepted trade or business of the C corporation partner. Thus, if a partnership incurs investment interest expense, any portion of that expense that is allocable to a C corporation partner is treated as a business interest expense of that partner that is subject to the section 163(j) limitation. However, if the partnership also has investment interest income, any portion thereof that is allocable to a C corporation partner is treated as business interest income of the partner, and any other investment income of the partnership that is allocable to the C corporation partner increases the partner's ATI. See § 1.163(j)–4(b)(7)(ii), *Example 2.*

To the extent that an investment item or other item of a partnership is with respect to property for which an election has been made by the partnership to treat as an electing real property trade or business or electing farming business, such item is treated as properly allocable to an excepted trade or business. This rule is necessary because the final regulations permit elections for some assets and activities to be an excepted trade or business even when such assets and activities are not trades or businesses for section 162 purposes. See part X(A) of this Summary of Comments and Explanation of Revisions section.

The final regulations also expand proposed § 1.163(j)–4(b)(3)(i) to cover not only a partnership's items of investment interest, investment income, and investment expense, but also a partnership's other separately stated tax items that are subject to neither section 163(j) nor section 163(d). Such items might include tax items allocable to rental activities that do not rise to the level of a section 162 trade or business that otherwise give rise to allowable deductions (such as under section 212 as it existed under prior law) that are subject to section 469. Thus, such items are treated as properly allocable to a trade or business of a C corporation partner as well.

K. Earnings and Profits of a Corporate Partner

Proposed § 1.163(j)–4(c)(1) generally provides that the disallowance and carryforward of a deduction for a C corporation's business interest expense under proposed § 1.163(j)–2 does not affect whether or when the business interest expense reduces the corporation's earnings and profits. Some commenters suggested that, if the business interest expense in question is incurred by a partnership rather than by the C corporation partner, the partner should reduce its earnings and profits twice with respect to that expense—once when the expense is allocated from the partnership to the partner, and again when the partner claims a deduction with respect to that expense (after the excess business interest expense allocated to that partner is treated as business interest expense and deducted by that partner).

The Treasury Department and the IRS have determined that the proposed regulations do not permit a C corporation partner to reduce its earnings and profits twice with respect to business interest expense incurred by a partnership. The final regulations are modified to clarify this point.

Proposed § 1.163(j)–4(c)(3) also provides a special earnings and profits rule for C corporations (other than REITs or RICs) with respect to excess business interest expense allocated from a partnership. Under this rule, the C corporation partner must increase its earnings and profits upon the disposition of the partnership interest to reflect the amount of excess business interest expense that the partner did not take into account while it held the partnership interest. The Treasury Department and the IRS have determined that the same rule should apply with respect to negative section 163(j) expense, and the final regulations have been modified accordingly.

VI. Comments on and Changes to Proposed § 1.163(j)–5: General Rules Governing Disallowed Business Interest Expense Carryforwards for C Corporations

Section 1.163(j)–5 provides rules regarding disallowed business interest expense carryforwards for taxpayers that are C corporations, including members of a consolidated group. The following discussion addresses comments relating to proposed § 1.163(j)–5.

A. Absorption of Disallowed Business Interest Expense Carryforwards Before Use of NOLs in Life-Nonlife Groups

Proposed § 1.163(j)–5(b)(3) provides rules regarding the treatment of disallowed business interest expense carryforwards of a consolidated group. Commenters asked for confirmation that, in the context of a life-nonlife group, such carryforwards are factored into taxable income at the subgroup level before NOLs are carried forward and limited under section 1503(c)(1).

In general, a consolidated group must determine the amount of business interest expense (whether current-year or carryforwards) that can be absorbed in a particular taxable year before determining whether NOLs can be carried forward or back to that taxable year. However, the specific subject matter of this comment is beyond the scope of the final regulations. The Treasury Department and the IRS expect to issue future guidance regarding the interaction of section 163(j) and § 1.1502–47 and welcome further comments in this regard.

B. Carryforwards From Separate Return Limitation Years

Proposed § 1.163(j)–5(d) contains rules for consolidated groups regarding disallowed business interest expense carryforwards from a separate return limitation year (a SRLY; see § 1.1502–1(f)). Under these rules, the disallowed business interest expense carryforwards of a member arising in a SRLY that are included in a group's business interest expense deduction for any taxable year may not exceed the group's section 163(j) limitation for that year, determined by reference only to the member's tax items for that year (the section 163(j) SRLY limitation). See proposed § 1.163(j)–5(d)(1). Additionally, disallowed business interest expense carryforwards of a member arising in a SRLY would be available for deduction by the consolidated group in the current year only to the extent the group had remaining section 163(j) limitation after deducting current-year business interest expense and disallowed business interest expense carryforwards from earlier taxable years, and only to the extent the section 163(j) SRLY limitation for the current year exceeded the amount of the member's business interest expense already deducted by the group in that year. In addition, SRLY-limited disallowed business interest expense carryforwards must be deducted on a pro rata basis with non-SRLY limited disallowed business interest expense carryforwards from taxable years ending on the same date. See proposed § 1.163(j)–5(d)(2).

Commenters asked several questions about the SRLY rules in proposed § 1.163(j)–5(d). In particular, commenters asked why the section 163(j) SRLY limitation is calculated annually rather than on an aggregate or cumulative basis, as is the case for NOLs. (Section 1.1502–21(c)(1)(i) generally limits the amount of a member's NOL carryforwards and carrybacks from a SRLY that may be included in the group's consolidated net operating loss deduction to the member's aggregate contribution to the group's consolidated taxable income for the entire period the member has been a group member, not just for the taxable year in question). More specifically, a commenter noted that the SRLY rules in § 1.1502–21(c) were designed to produce a result that roughly approximates the absorption that would have occurred if the SRLY member had not joined a consolidated group. In contrast, the annual section 163(j) limitation in proposed § 1.163(j)–5(d) could put the SRLY member in a worse position than if such member had not joined a consolidated group.

For example, if S were a standalone corporation with $100x of disallowed business interest expense carryforwards at the start of Year 2, and if S's section 163(j) limitation were $30 in Year 2, S could deduct $30x of its carryforwards. In comparison, if S joined a consolidated group at the start of Year 2, and if the group's section 163(j) limitation were $0 in Year 2, S could not deduct any of its $100x of carryforwards in Year 2 even if S's standalone section 163(j) limitation were $30x in that year. This result is correct for the P group for Year 2 given Congress's intent that the section 163(j) limitation apply at the consolidated group level. However, under the annual measurement approach in the proposed regulations, S also could not deduct any of its carryforwards in Year 3 if S had a standalone section 163(j) limitation of $0 in that year, even if the group's section 163(j) limitation were positive in that year. Thus, S would be in a worse position (with respect to the deduction of its disallowed business interest expense carryforwards) than if S had not joined a consolidated group.

To put S in roughly the same position as if S were a standalone corporation, commenters recommended the creation of a cumulative section 163(j) register under which the amount of a member's SRLY carryforwards that may be absorbed by the consolidated group in a taxable year may not exceed (i) the member's contributions (positive and negative) to the group's section 163(j) limitation in all consolidated return years, less (ii) the member's business interest expense (including carryforwards) absorbed by the group in all consolidated return years. For these purposes, and unlike the general rule in section 163(j)(1) and proposed § 1.163(j)–2(b)(2), the adjustment to a member's cumulative section 163(j) SRLY register for any taxable year or its total register for any taxable year could be less than zero.

In the preamble to the proposed regulations, the Treasury Department and the IRS stated that applying an aggregate or cumulative approach to the section 163(j) SRLY limitation would be inconsistent with congressional intent because Congress did not retain the excess limitation carryforward provisions from old section 163(j). One commenter expressed agreement with this conclusion. However, other commenters noted that applying a cumulative section 163(j) SRLY register would not effectuate the carryforward of excess limitation at the level of the consolidated group. In other words, although the SRLY member would be able to deduct its SRLY disallowed business interest expense carryforwards in a taxable year to the extent of that member's cumulative (rather than annual) contribution to the group's section 163(j) limitation, the SRLY member's ability to deduct such carryforwards still would be subject to the group's annual section 163(j) limitation.

After considering the comments received, the Treasury Department and the IRS have determined that a cumulative section 163(j) SRLY register would better approximate the results under section 163(j) if the SRLY member had not joined a consolidated group, and that this approach is not inconsistent with congressional intent. Therefore, the final regulations adopt a cumulative section 163(j) SRLY register.

The cumulative section 163(j) SRLY register operates in a manner similar to, but is separate and distinct from, the cumulative register for NOLs described in § 1.1502–21(c). In computing a member's section 163(j) SRLY register, the intercompany transaction rules of § 1.1502–13 generally continue to apply; thus, for example, intercompany income items and intercompany deductions and losses (to the extent absorbed by the group) generally are taken into account in computing the section 163(j) SRLY register. However, interest income and expense from intercompany obligations are not taken into account in computing the section 163(j) SRLY register. This approach approximates the SRLY member's capacity to utilize carryforwards on a standalone basis while harmonizing with the single-entity application of section 163(j) to consolidated groups. Under this approach, intercompany interest income and expense items will neither increase nor decrease the SRLY register.

In the preamble to the proposed regulations, the Treasury Department and the IRS requested comments on another alternative to both an annual register and a cumulative register—removing the SRLY limitation from a member's SRLY-limited disallowed business interest expense carryforwards, to the extent of the member's standalone section 163(j) limitation, in taxable years in which the member's standalone section 163(j) limitation exceeds the consolidated group's section 163(j) limitation. A commenter endorsed this approach. However, other commenters expressed concern that this approach would be more distortive than a cumulative register approach. The Treasury Department and the IRS agree that a cumulative register more closely approximates the results on a standalone basis than this alternative approach. Thus, the final regulations adopt a cumulative register approach rather than this alternative approach.

Commenters also expressed concern that proposed § 1.163(j)–5(d)(2) would treat SRLY carryforwards as available for deduction only to the extent the amount of the SRLY member's business interest expense already deducted by the group in the current year does not exceed the member's annual section 163(j) SRLY limitation. The adoption of the cumulative section 163(j) SRLY limitation mechanism, with the associated reduction to reflect all business interest expense of that member that is absorbed by the group, obviates the issues highlighted in the comment. The final regulations retain the other SRLY limitations in proposed § 1.163(j)–5(d)(2).

C. Offsetting Business Interest Expense With Business Interest Income and Floor Plan Financing Interest Expense at the Member Level

As described in part V(B) of this Summary of Comments and Explanation of Revisions section, proposed § 1.163(j)–5(b)(3) provides, in part, that if the aggregate amount of members' business interest expense (including carryforwards) exceeds the consolidated group's section 163(j) limitation for the current year, then each member with current-year business interest expense and current-year business interest income or floor plan financing interest expense deducts current-year business interest expense to the extent of its current-year business interest income and floor plan financing interest expense. Thereafter, if the group has any remaining section 163(j) limitation, each member with remaining current-year business interest expense deducts a pro rata portion thereof.

A commenter stated that offsetting business interest expense with business interest income or floor plan financing interest expense at the member level seems inconsistent with the single-entity principles adopted by the proposed regulations. Moreover, the commenter expressed concern that a consolidated group could choose where to incur business interest income within a group and thereby affect which member has disallowed business interest expense carryforwards. In addition, the commenter asserted that a group may have difficulty determining which member has incurred business interest income and floor plan financing interest expense (see the discussion in part V(B) of this Summary of Comments and Explanation of Revisions section). Thus, the commenter recommended an alternative approach that does not require such offsetting at the member level.

The Treasury Department and the IRS acknowledge that netting business interest income and floor plan financing interest expense against business interest expense at the member level deviates from a ''pure'' single-entity approach. This approach was adopted in the proposed regulations to give effect to section 163(j)(1) (which allows taxpayers to deduct business interest expense to the full extent of business interest income and floor plan financing interest expense) and to ensure that income tax liability is clearly reflected at the member level in accordance with section 1502 and § 1.1502–13. Further, because consolidated groups are under common control by definition (see section 1504), a consolidated group largely has control over the location of interest expense, even before the application of section 163(j). With regard to the comment regarding the difficulty of determining which member actually has incurred an interest expense, section 61 provides that interest income is includible in gross income, and section 163 provides rules by which interest expense is deductible in computing the taxable income. Section 1.1502–12 also requires consolidated group members to report interest income and expense at the member level for purposes of computing separate taxable income. Thus, the final regulations do not adopt the commenter's recommendation.

VII. Comments on and Changes to Section 1.163(j)–6: Application of the Business Interest Expense Deduction Limitations to Partnerships and Subchapter S Corporations

As discussed in the preamble to the proposed regulations, § 1.163(j)–6 provides general rules regarding the application of section 163(j)(4) to partnerships, S corporations, and their owners, including rules on how to calculate the limitation and how to treat disallowed business interest expense carryforwards. The following discussion addresses comments relating to proposed § 1.163(j)–6.

A. Partnership-Level Calculation and Allocation of Section 163(j) Excess Items

1. Nonseparately Stated Taxable Income or Loss of the Partnership

Section 163(j)(4)(A)(ii)(II) states that a partner's excess taxable income is determined in the same manner as the nonseparately stated taxable income or loss of the partnership. Section 163(j)(4)(B)(i)(II) states that excess business interest expense is allocated to each partner in the same manner as the non-separately stated taxable income or loss of the partnership. Similarly, excess business interest income is allocated to each partner in the same manner as the nonseparately stated taxable income or loss of the partnership.

As highlighted in the proposed regulations, the phrase ''nonseparately stated taxable income or loss of the partnership'' is not defined in section 163(j), and it has not previously been defined by statute or regulations.[1] The phrase ''in the same manner as'' is also undefined. The proposed regulations interpreted the phrase ''nonseparately stated taxable income or loss,'' as it is used in sections 163(j)(4)(A)(ii)(II) and 163(j)(4)(B)(i)(II), as meaning the items comprising adjusted taxable income, business interest income, and business interest expense of the partnership. The legislative history and structure of the statute suggest the purpose of the phrase ''nonseparately stated taxable income or loss of the partnership'' is to help coordinate the section 163(j) limit imposed at the partnership and partner levels.

Section 163(j)(4)(A)(i) uses this phrase when describing business interest expense that already has been tested at the partnership level. In general, an item included in nonseparately stated taxable income or loss of a partnership under section 702(a)(8) loses its tax character in the hands of the partner to whom it is allocated. By providing that such business interest expense is treated as a nonseparately stated item, section 163(j)(4)(A)(i) causes such business interest expense to lose its character as business interest expense, thus preventing it from being subject to retesting at the partner level under section 163(j). Although it does not use the same phrase, section 163(j)(4)(A)(ii)(I), in conjunction with section 163(j)(4)(C), similarly provides that, to the extent the partnership's adjusted taxable income was used in its section 163(j) calculation, such adjusted taxable income is not included in a partner's section 163(j) calculation. Consistent with this principle, proposed § 1.163(j)–6(e)(4) provided similar rules to prevent the double counting of business interest income. Therefore, interpreting the phrase ''nonseparately stated taxable income or loss of the partnership,'' as it is used in section 163(j)(4) as meaning the items comprising adjusted taxable income, business interest income, and business interest expense of the partnership (hereinafter, ''section 163(j) items'') is supported by the statute, which requires each of these items to be taken into account at the partnership level and prohibits the double counting of such items in the partner's section 163(j) calculation.

To allocate excess taxable income, excess business interest income, and excess business interest expense (hereinafter, ''section 163(j) excess items'') ''in the same manner'' as the ''nonseparately stated taxable income or loss of the partnership'' (that is, the section 163(j) items), proposed § 1.163(j)–6(f)(2) provided an 11-step calculation that, when completed by the partnership, provides the partnership with an allocation of each of its section 163(j) excess items to each of its partners. This resulting array of allocations is consistent with the Treasury Department and the IRS's resolution of the three descriptive (1 through 3) and two normative (4 through 5) issues outlined in part 6(D)(1) of the Explanation of Provisions section in the proposed regulations: (1) Section 163(j) is applied at the partnership level; (2) a partnership cannot have both excess taxable income (or excess business interest income) and excess business interest expense in the same taxable year; (3) parity must be preserved between a partnership's deductible business interest expense and section 163(j) excess items and the aggregate of each partner's share of deductible business interest expense and section 163(j) excess items from such partnership; (4) if, in a given year, a partnership has both deductible business interest expense and excess business interest expense, a partnership should not allocate excess business interest expense to a partner to the extent such partner was allocated the items comprising ATI (or business interest income) that supported the partnership's deductible business interest expense; and (5) if, in a given year, a partnership has excess taxable income (or excess business interest income), only partners allocated more items comprising ATI (or business interest income) than necessary to support their allocation of business interest expense should be allocated a share of excess taxable income (or excess business interest income).

In general, the 11-step calculation preserves the entity-level calculation required in section 163(j)(4) while also preserving the economics of the partnership, including respecting any special allocations made in accordance with section 704 and the regulations under section 704 of the Code. Stated otherwise, the allocations of section 163(j) excess items prescribed by the 11-step calculation attempt to reflect the aggregate nature of partnerships under subchapter K of the Code while remaining consistent with the application of section 163(j) at the partnership level.

The Treasury Department and the IRS requested comments on the 11-step calculation in the preamble to the

[1] Sections 163(j)(4)(A)(i) and (B)(i)(II) use the word ''nonseparately'' (no hyphen), but section 163(j)(4)(A)(ii)(II) uses the word ''non-separately'' (hyphen). For purposes of consistency, these final regulations use ''nonseparately'' when discussing the phrase at issue.

proposed regulations. Specifically, the Treasury Department and the IRS requested comments regarding alternative methods for allocating deductible business interest expense and section 163(j) excess items in a manner that permits partners that bear the taxable income supporting the deductible business interest expense to be allocated a disproportionate share of deductible business interest expense and excess taxable income.

2. Requested Clarifications and Modifications

Commenters requested several clarifications of and modifications to the 11-step calculation. First, commenters requested confirmation that a partnership's allocations of section 163(j) excess items pursuant to the 11-step calculation will be considered to meet the requirements of section 704(b). The final regulations confirm that allocations pursuant to the 11-step calculation meet the requirements of section 704(b). Nothing in the 11-step calculation prohibits a partnership from making an allocation to a partner of any section 163(j) item that is otherwise permitted under section 704 and the regulations thereunder. Accordingly, any calculations in the 11-step calculation are solely for the purpose of determining each partner's section 163(j) excess items, and do not otherwise affect any other provision under the Code, such as section 704(b). Further, the statement in the proposed regulations that the 11-step calculation is solely for section 163(j) purposes and does not apply for any other purposes of the Code does not mean that section 163(j) excess items have no effect on either outside basis or capital accounts. To illustrate this point, § 1.163(j)–6(o)(17), *Example 17* has been revised to show the beginning and ending outside basis and capital accounts after applying the 11-step calculation.

To further clarify that the allocation of section 163(j) excess items pursuant to the 11-step calculation will be sustained under section 704, a special rule has been added to § 1.704–1(b)(4). The allocation of deductible and nondeductible business interest expense does not have economic effect because classifying a portion of the interest expense as nondeductible merely changes the tax character of the item. Accordingly, § 1.704–1(b)(4)(xi) is added to clarify that, if § 1.163(j)–6(f) is satisfied, the allocation of section 163(j) excess items will be deemed to be in accordance with the partners' interests in the partnership.

Second, commenters recommended the 11-step calculation take remedial allocations into account. Commenters noted that the exclusion of remedial allocations from the partnership-level computation could frustrate the ability of the 11-step calculation to reach the most equitable result given its purpose. The Treasury Department and the IRS acknowledge that taking remedial allocations into account in the 11-step calculation after 2021 might produce an equitable result. However, because remedial income would not always be offset by remedial losses prior to 2022 for purposes of computing ATI, the Treasury Department and that IRS have determined that taking remedial allocations into account in the 11-step calculation would not achieve appropriate results in all circumstances. Therefore, the Treasury Department and the IRS decline to accept the recommendation.

Third, a commenter recommended that the final regulations allow partnerships to make remedial allocations of excess taxable income. Under this recommended modification to the 11-step calculation, if a partner receives an allocation of taxable income in excess of such partner's allocation of excess taxable income, the partnership could elect to create positive remedial excess taxable income in the amount of the excess and allocate such positive remedial excess taxable income to the affected partner. The partnership also would create an offsetting negative remedial excess taxable income item in an equal amount that would be allocated to the other partners. The Treasury Department and the IRS do not adopt this recommendation in the final regulations in light of the fact that the definition of ''excess taxable income'' is statutory and the statute does not appear to contemplate negative excess taxable income.

3. Recommended Alternative Methods

Commenters recommended the final regulations retain the 11-step calculation. Additionally, commenters recommended that the final regulations provide alternative methods for allocating section 163(j) excess items in addition to the 11-step calculation. The commenters seeking an alternative method expressed concern about the complexity of the 11-step calculation—specifically, that the required computations and recordkeeping are excessive for many taxpayers. Commenters argued that the attempted precision of the 11-step calculation should be weighed against its complexity and compared to the reduced precision that could be achieved through simpler methods.

As an alternative to the 11-step calculation, commenters recommended the final regulations allow taxpayers to adopt any reasonable method for allocating section 163(j) excess items, provided the method does not produce results inconsistent with the Treasury Department and the IRS's resolution of the five issues articulated in the preamble to the proposed regulations. See part VII(A)(1) of this Summary of Comments and Explanation of Revisions section. Commenters provided multiple examples of reasonable methods, and they recommended that the final regulations treat section 163(j) excess item allocations as reasonable if the allocations are: (1) Reasonably consistent with the allocations of the corresponding items under section 704(b); (2) in proportion to the allocation of the underlying section 163(j) item; (3) in proportion to the manner in which the partners bear liability for the debt or, in the case of non-recourse debt, in proportion to the manner in which profits will be allocated in order to repay the debt; or (4) the result of arms-length bargaining among partners with adverse tax interests.

The Treasury Department and the IRS do not adopt any of these alternatives in the final regulations. Each of the alternatives recommended by commenters requires an application of section 163(j) at the partnership level, a determination of each partner's share of the partnership's section 163(j) items, and a final determination of each partner's section 163(j) excess items that takes into account each partner's share of the partnership's section 163(j) items. These three determinations mirror steps 1, 2, and 11 (respectively) of the 11-step calculation. The Treasury Department and the IRS recognize the complexity of the computations and recordkeeping imposed by the statute on partnerships, but the Treasury Department and the IRS have concluded that the computations and recordkeeping associated with steps 1, 2, and 11 of the 11-step calculation are unavoidable under any approach. As such, the commenters' recommendation is, in effect, that the final regulations allow alternatives to steps 3 through 10 of the 11-step calculation.

With respect to steps 3 through 10, the Treasury Department and the IRS agree that these computations add to the complexity already required by the statute; thus, a worksheet and multiple examples have been provided to aid in the completion of these computations. However, the Treasury Department and the IRS have concluded that these computations are not overly burdensome given that the partnerships required to perform these calculations already are experienced with handling the complexities associated with special allocations or section 704(c) allocations. In terms of recordkeeping, taxpayers are not required to keep records of steps 3 through 10 because compliance with the 11-step calculation can be determined solely based on the records associated with steps 1, 2, and 11. Moreover, in terms of accuracy, the alternatives fall short of achieving the purpose of steps 3 through 10, which is to align deductible business interest expense with the ATI and business interest income that supported such deduction at the partnership level.

For example, consider the recommended alternative of allocating section 163(j) excess items in proportion to the allocation of the underlying section 163(j) item. If partnership AB's sole items of income, gain, loss, and deduction were $30 of business interest income, which it allocated solely to A, and $40 of business interest expense, which it allocated $20 to each of A and B, then A and B each would have $15 of deductible business interest expense and $5 of excess business interest expense. In situations where, as in this case, the partnership does not allocate all of its section 163(j) items pro rata this method could require a partnership to allocate its section 163(j) excess items in a manner inconsistent with the Treasury Department and the IRS's resolution of issues four and five. See part VII(A)(1) of this Summary of Comments and Explanation of Revisions section.

Applying the 11-step calculation to the previous example, A would have $20 of deductible business interest expense, and B would have $10 of deductible business interest expense and $10 of excess business interest expense. This result is consistent with the Treasury Department and the IRS's resolution of the five issues described in part VII(A)(1) of this Summary of Comments and Explanation of Revisions section. Because the alternative of allocating section 163(j) excess items in proportion to the allocation of the underlying section 163(j) item could require a partnership to allocate section 163(j) excess items to its partners in a manner that does not attempt to align deductible business interest expense with the ATI and business interest income that supported it at the partnership level (which is inconsistent with the resolution of the five issues described in part VII(A)(1) of this Summary of Comments and Explanation of Revisions section), this alternative is not adopted in the final regulations. Other commenters' similar alternatives were considered and were rejected on the same grounds based on the foregoing analysis.

One commenter recommended another alternative method that, in a more general way than the 11-step calculation, attempts to align deductible business interest expense with the ATI and business interest income that supported such deduction at the partnership level. The commenter stated that this objective could be accomplished as follows. For each partner that is allocated business interest expense, determine the portion of the business interest expense allocated to such partner that would be considered deductible business interest expense, taking into account only the business interest income and ATI allocated to such partner. If the aggregate amount determined for all partners is equal to, or less than, the amount of the partnership's deductible business interest expense, then each partner would be allocated deductible business interest expense in the amount determined in the first step. If the first step produced deductible business interest expense in excess of the limitation determined at the partnership level, each partner's allocation of deductible business interest expense would equal the proportion of the partnership's total deductible business interest expense that the deductible amount determined in the first step for such partner constitutes of the deductible amount determined for all partners. Also, any deductible business interest expense as determined at the partnership level that is not allocated through the first step then would be allocated among the partners that have been allocated business interest deductions in proportion to the amount of business interest expense of each partner remaining after the first step.

The Treasury Department and the IRS do not adopt this alternative method in the final regulations. The commenter's approach provides a method for allocating excess business interest expense, but it does not provide any guidance on allocating excess taxable income or excess business interest income. Further, it is not possible to infer a manner for allocating excess taxable income and excess business interest income from this approach because it fails to distinguish each partner's ATI from its business interest income. By comingling ATI and business interest income in its first step, this method fails to account for the ordering of ATI and business interest income in the partnership context as required by the statute. Section 163(j)(4)(C) provides that partnership ATI does not begin offsetting partnership business interest expense until partnership business interest income has been fully utilized. Because this method is only capable of addressing fact patterns in which there is excess business interest expense, it is not adopted in the final regulations.

Moreover, the Treasury Department and the IRS have concluded that this method for allocating excess business interest expense does not sufficiently reduce taxpayer burden given the trade-off in precision and administrability. To illustrate, the commenter applied its recommended method to the facts of *Example 14* of § 1.163(j)–6(o) of the proposed regulations. In that example, partnership PRS has $140 of business interest expense, $200 of ATI, and no business interest income. Accordingly, PRS has $60 of deductible business interest expense. PRS allocates its items of ATI such that A, B, and C have income of $100, $100, and $400 respectively, while D has a loss of $400. PRS allocates its business interest expense $40 to B, $60 to C, and $40 to D.

Under the suggested method, PRS first would determine for each of B, C, and D the amount of the business interest expense allocated to each partner that would be deductible under section 163(j) taking into account solely the ATI and business interest income allocated to such partner. In this case, the entire $60 of business interest expense allocated to C would have been deductible, $30 of the business interest expense allocated to B would have been deductible, and no amount of business interest expense allocable to D would have been deductible. The total amount of business interest expense determined in the first step (or $90) exceeds the total amount deductible under section 163(j) applied at the partnership level (or $60). PRS then would determine the proportion of the business interest expense allocated to each partner that is determined to be deductible in the first step and allocate the total deduction in those proportions. Thus, C would be entitled to two-thirds ($60/$90) of the $60 deduction ($40 of deductible business interest expense) and B would be entitled to one-third ($30/$90) of the $60 deduction ($20 of deductible business interest expense). D would not be entitled to any business interest expense deduction. Accordingly, B would have $20 of excess business interest expense, C would have $20 of excess business interest expense, and D would have $40 of excess business interest expense.

In contrast, applying the 11-step calculation to the same example results in an allocation of more deductible business interest expense to C ($48) than to B ($12) because C was allocated more ATI ($400) from PRS than B ($100). Unlike the commenter's method, the 11-step calculation increases a partner's amount of deductible business interest expense in response to an increased allocation of ATI and business interest income. The commenter's method allocates deductible business interest expense based on a ratio that does not take into account the fact that C was allocated significantly more ATI from PRS than B. To illustrate this point, consider what would happen in the previous example if the facts were changed so that C was allocated $1,100 of ATI and D was allocated ($1,100) of ATI. Applying the 11-step calculation, C would have $55 of deductible business interest expense. Applying the commenter's method, C's increased allocation of ATI from PRS would have no effect on C's deductible business interest expense—C still would have $40 of deductible business interest expense and $20 of excess business interest expense.

The Treasury Department and the IRS have determined that the 11-step calculation produces the result that is most consistent with the normative principle in the statute that the amount of business interest expense a taxpayer is capable of deducting should increase as its ATI and business interest income increase. Further, the Treasury Department and the IRS view methods that do not increase a partner's amount of deductible business interest expense in response to an increased allocation of ATI from the partnership as less intuitive, and therefore more burdensome in application. Therefore, the final regulations do not adopt commenters' suggested alternative methods.

4. Publicly Traded Partnerships

The Treasury Department and the IRS received comments raising concerns about the continued fungibility of publicly traded partnership (PTP) units if PTPs are required to allocate section 163(j) excess items pursuant to the 11-step calculation. The effect of section 163(j) on the fungibility of PTP units is being addressed in the Concurrent NPRM. Therefore, these issues are not addressed in the final regulations.

5. Pro Rata Exception

Multiple commenters recommended that partnerships that allocate all items of income and expense on a pro rata basis (similar to S corporations) be exempt from the 11-step calculation. Commenters stated that these partnerships by nature do not make the kinds of allocations the 11-step calculation is designed to address. Commenters asserted that simplifying the 11-step calculation for these pro-rata partnerships would reduce complexity and reduce their administrative burden.

The Treasury Department and the IRS agree with these comments. Accordingly, the final regulations provide an exception (pro rata exception) from steps 3 through 11 of the 11-step calculation for partnerships that allocate all section 163(j) items in step 2 proportionately. This pro rata exception will not result in allocations of section 163(j) excess items that vary from the array of allocations of section 163(j) excess items that would have resulted had steps 3 through 11 been performed. See § 1.163(j)–6(f)(2)(ii) and *Example 1* through *Example 16* of § 1.163(j)–6(o).

B. Basis Adjustments

1. Basis and Capital Account Adjustments for Excess Business Interest Expense Allocations

Pursuant to proposed § 1.163(j)–6(f)(2), the adjusted basis of a partner's interest in a partnership is reduced, but not below zero, by the amount of excess business interest expense allocated to the partner. If a partner is subject to a loss limitation under section 704(d) and the partner is allocated losses from a partnership in a taxable year, the limited losses are grouped based on the character of each loss (each grouping of losses based on character, a ''section 704(d) loss class''). If there are multiple section 704(d) loss classes in a given year, the partner apportions the limitation to each section 704(d) loss class proportionately. For purposes of applying this proportionate rule, any deductible business interest expense and business interest expense of an exempt entity (whether allocated to the partner in the current taxable year or suspended under section 704(d) in a prior taxable year), any excess business interest expense allocated to the partner in the current taxable year, and any excess business interest expense from a prior taxable year that was suspended under section 704(d) (negative section 163(j) expense) makes up the same section 704(d) loss class (section 163(j) loss class). Moreover, once the partner determines the amount of limitation on losses apportioned to the section 163(j) loss class, any deductible business interest expense is taken into account before any excess business interest expense or negative section 163(j) expense.

Proposed § 1.163(j)–6(h)(2) provides that negative section 163(j) expense is not treated as excess business interest expense in any subsequent year until such negative section 163(j) expense is no longer suspended under section 704(d). Consequently, an allocation of excess taxable income or excess business interest income does not result in the negative section 163(j) expense being treated as business interest expense paid or accrued by the partner. Further, unlike excess business interest expense, which prevents a partner from including excess taxable income in its ATI as described in section 163(j)(4)(B)(ii) (flush language), negative section 163(j) expense does not affect, and is not affected by, any allocation of excess taxable income to the partner. Accordingly, any excess taxable income allocated to a partner from a partnership while the partner still has a negative section 163(j) expense will be included in the partner's ATI. However, once the negative section 163(j) expense is no longer suspended under section 704(d), it becomes excess business interest expense, which is subject to the general rules in proposed § 1.163(j)–6(g).

Commenters noted that the rule in proposed § 1.163(j)–6(h)(2) is helpful and should be retained in the final regulations. However, commenters further noted that partners with no business interest expense from other sources generally would prefer to treat their negative section 163(j) expense as deductible business interest expense suspended under section 704(d) and utilize excess taxable income in the current year for that purpose, even though the resulting deductible business interest expense would continue to be non-deductible because of a section 704(d) limit. Thus, commenters recommended allowing a partner to use excess taxable income to treat negative section 163(j) expense as deductible business interest expense suspended under section 704(d) instead of using it to increase partner ATI.

The final regulations do not adopt this recommendation. No precedent exists for allowing items suspended under section 704(d) to preemptively clear limitations that apply after section 704(d) while remaining suspended under section 704(d). For example, in the section 469 context, a non-materially participating partner allocated passive income cannot use such passive income to recharacterize passive losses allocated in a previous year as non-passive while those losses remain suspended under section 704(d).

One commenter also recommended adopting a silo approach under section 704(d). Under this approach, if a partner had a section 704(d) limitation, it could bifurcate its items between non-excepted and excepted partnership business items. If the non-excepted portion was net positive, none of the excess business interest expense allocated from the partnership would be negative section 163(j) expense.

However, this approach would be a significant departure from the current rule under section 704(d), which generally requires the limitation on losses under section 704(d) to be allocated to a partner's distributive share of each loss proportionately, regardless of whether such loss is from an excepted or non-excepted trade or business under section 163(j). Moreover, nothing in section 163(j) indicates Congress intended to give excess business interest expense suspended under section 704(d) a better result than any other partnership losses suspended under section 704(d). For that reason, the final regulations do not adopt this recommendation.

2. Basis Adjustments Upon Disposition of Partnership Interests Pursuant to Section 163(j)(4)(B)(iii)(II)

Under the proposed regulations, if a partner disposes of all or substantially all of its partnership interest, the adjusted basis of the partnership interest is increased immediately before the disposition by the entire amount of the remaining excess business interest expense. Following such a disposition, no deduction is permitted to either the transferor or the transferee with respect to the excess business interest expense resulting in the basis increase. If a partner disposes of less than substantially all of its interest in a partnership, the partner cannot increase its basis by any portion of the remaining excess business interest expense. The Treasury Department and the IRS requested comments on this approach in the preamble to the proposed regulations.

Commenters cited multiple concerns with the approach adopted in the proposed regulations. First, commenters claimed that the absence of an excess business interest expense basis addback for a partial disposition of a partnership interest could result in tax gain in excess of economic gain in connection with the sale of a partial interest, while the addition of the entire adjustment to outside basis in connection with a complete disposition could result in economic gain in excess of tax gain. Commenters suggested this timing difference between economic gain and tax gain inappropriately disconnects taxable income from economic income. Second, commenters expressed concern that, because a partial disposition would result in a partner holding a smaller interest in a partnership than it held prior to the partial disposition, the partner would receive smaller allocations of excess taxable income (and excess business interest income) in subsequent years. If none of the excess business interest expense of the partner is affected by the partial disposition, this could extend the amount of time needed for a partner to convert its excess business interest expense to business interest expense treated as paid or accrued. Third, commenters noted that, in the event of a partial disposition of a partnership interest, the proposed regulations may cause a discrepancy between the capital accounts of the transferor and the transferee and the excess business interest expense associated with each partner's interest.

Commenters stated that neither the statute nor its policy of limiting business interest expense deductions calls for the potentially harsh results that could be imposed by the approach provided in the proposed regulations. The main purpose of the excess business interest expense carryover rule is to limit the partner's ability to claim a business interest expense deduction that exceeds the statutory threshold under section 163(j)(1). Commenters stated that this statutory purpose can be accomplished by denying the business interest expense deduction and eliminating the carryforward upon a partial disposition of the partnership interest. In other words, to the extent that a partner foregoes its business interest expense deduction, the purpose of the statute is fulfilled. Thus, a proportionate approach would fulfill the purpose of the statute while not subjecting taxpayers to outcomes that are not plainly contemplated by the statue.

As a solution, commenters recommended that a partial disposition of a partnership interest trigger a proportionate excess business interest expense basis addback and corresponding decrease in such partner's excess business interest expense carryover (proportionate approach). Under the proportionate approach, the partner would be required to track its basis in its partnership interest in a manner similar to that set forth in Revenue Ruling 84–53, 1984–1 C.B. 159 (April 9, 1984). Commenters advocating for a proportionate addback rule varied in their recommendations regarding where the addback should occur. In general, commenters suggested three options: (1) Increase the basis of the partnership interest retained; (2) apportion the basis increase proportionally between the partnership interest retained and the partnership interest being disposed of; and (3) increase the basis of the partnership interest being disposed of.

As described in the preamble to the proposed regulations, the Treasury Department and the IRS originally considered and rejected the proportionate approach. One reason the Treasury Department and the IRS adopted the all or substantially all approach in the proposed regulations over the proportionate approach was because the former appeared more taxpayer-favorable in certain circumstances. Under the all or substantially all approach in the proposed regulations, the excess business interest expense basis addback is delayed for the maximum amount of time (until a partner disposes of all or substantially all of its interest), giving taxpayers more time to receive excess taxable income (and excess business interest income) and thus potentially take an ordinary deduction. However, as commenters pointed out, a smaller partnership interest likely will result in a correspondingly smaller allocation of excess taxable income (and excess business interest income) from the partnership. For this reason, commenters did not perceive the proposed approach as taxpayer-favorable for preserving the possibility of a future ordinary deduction, but rather as taxpayer-unfavorable for delaying what likely will be a capital loss.

Accordingly, the Treasury Department and the IRS adopt the recommended proportionate approach in the final regulations. In the preamble to the proposed regulations, the Treasury Department and the IRS indicated that, if final regulations were to adopt a proportionate approach, such approach would increase the basis of the partnership interest being retained by the amount of the excess business interest expense basis addback. However, upon further consideration, the Treasury Department and the IRS agree with commenters that the basis addback should instead increase the basis of the partnership interest being disposed of. Thus, the final regulations adopt a proportionate approach that increases the basis of the partnership interest being disposed of.

For purposes of § 1.163(j)–6(h)(3), a disposition includes a distribution of money or other property by the partnership to a partner in complete liquidation of its interest in the partnership. The Treasury Department and the IRS request comments on whether a current distribution of money or other property by the partnership to a continuing partner as consideration for an interest in the partnership should also trigger an addback and, if so, how to determine the appropriate amount of the addback. Additionally, the final regulations clarify that each partner is considered to have disposed of its partnership interest within the meaning of § 1.163(j)–6(h)(3) if the partnership terminates under section 708(b)(1).

The proportionate rule adopted in the final regulations applies the equitable apportionment principles of § 1.61–6 (referenced in Revenue Ruling 84–53) to determine the amount of excess business interest expense attributable to the partner's interest sold. In *Example 1* of § 1.61–6, basis is apportioned among properties based on the fair market value of the property and is treated as equitably apportioned. Similarly, in Situations 1 and 3 of Revenue Ruling 84–53, the IRS ruled that a selling partner's basis in the transferred portion of the interest generally equals an amount that bears the same relation to the partner's basis in the partner's entire interest as the fair market value of the transferred portion of the interest bears to the fair market value of the entire interest (the pro rata approach to equitable apportionment). However, if a partnership has liabilities, special adjustments must be made to take into account the effect of the liabilities on the basis of the partner's interest. Accordingly, the final regulations adopt the pro rata approach to equitable apportionment and generally provide that the adjusted basis of the partnership interest being disposed of is increased immediately before the disposition by the amount of the excess business interest expense that is proportionate to the interest disposed of in the transaction.

The Treasury Department and the IRS also received comments recommending the final regulations treat a sale of all or substantially all of a partnership's assets as a deemed disposition of each partner's interest in the partnership within the meaning of section 163(j)(4)(B)(iii)(II). Because the statute requires a disposition of a partnership interest to trigger the basis adjustment described in section 163(j)(4)(B)(iii)(II), the final regulations do not adopt this recommendation.

3. Intercompany Transfer of a Partnership Interest

For a discussion of comments received on intercompany transfers of partnership interests, see part V(D) of this Summary of Comments and Explanation of Revisions section.

C. Debt-Financed Distributions

The treatment of interest expense associated with debt incurred by a partnership or S corporation to finance distributions to owners (debt-financed distributions) is being addressed in the Concurrent NPRM. Therefore, these issues are not addressed in the final regulations.

D. Trading Partnerships

The preamble to the proposed regulations stated that the business interest expense of certain passthrough entities, including S corporations, that are engaged in trades or businesses that are per se non-passive activities and in which one or more owners of the entities do not materially participate within the meaning of section 469, as described in section 163(d)(5)(A)(ii) and as illustrated in Revenue Ruling 2008–12, 2008–1 C.B. 520 (March 10, 2008), will be subject to section 163(j) at the entity level (even if the interest expense is also subject to limitation under section 163(d) at the individual partner level). With respect to partnerships, to the extent that such business interest expense is limited under section 163(j)(4) and becomes a carryover item of partners who do not materially participate with respect to such trades or businesses, those items will be treated as items of investment interest expense in the hands of those owners for purposes of section 163(d) once those carryover items are treated as paid or accrued in a succeeding taxable year. This rule does not apply to corporate partners.

The Treasury Department and the IRS received multiple comments questioning this interpretation of section 163(j)(5) and its interaction with section 163(d)(5)(A)(ii). The interaction of section 163(j)(5) with section 163(d)(5)(A)(ii) is being addressed in the Concurrent NPRM. Therefore, this issue is not addressed in the final regulations.

E. Treatment of Excess Business Interest Expense in Tiered Partnerships

The preamble to the proposed regulations requested comments regarding the application of section 163(j) to tiered partnership structures, and the proposed regulations reserved on this topic. Specifically, the preamble requested comments on whether excess business interest expense should be allocated through upper-tier partnerships and how or when an upper-tier partner's basis should be adjusted when a lower-tier partnership is subject to a section 163(j) limitation. This issue is being addressed in the Concurrent NPRM. Therefore, this issue is not addressed in the final regulations.

F. Partnership Mergers and Divisions

The proposed regulations reserve on guidance regarding the application of section 163(j) to partnership mergers and divisions, and the Treasury Department and the IRS requested comments in the preamble to the proposed regulations on the effect of partnership mergers and divisions on excess business interest expense, excess taxable income, and excepted trade or business elections in the context of section 163(j).

In response to this request, one commenter recommended that: (i) The carryforward rule in proposed § 1.163(j)–6(g) apply to partners of a partnership treated as a continuing partnership in a partnership merger or division; (ii) the disposition rule of proposed § 1.163(j)–6(h)(3)(i) apply to partnership interests that are treated as liquidated in a partnership merger or division; and (iii) the final regulations confirm, perhaps through examples, the application of the excepted trade or business election and termination rules in proposed § 1.163(j)–9 in the context of a partnership merger or division.

The partnership merger and division rules under section 708 may treat a partnership as terminating or continuing, and the regulations under § 1.708–1(c) and (d) provide a construct for analyzing the tax effects of a partnership merger or division. The Treasury Department and the IRS have determined that, in most situations, a partnership merger or division can be analyzed appropriately under the rules of § 1.708–1(c) and (d). As a result, the Treasury Department and the IRS are not providing special rules in the final regulations to analyze the consequences of a partnership merger or division in the context of section 163(j) at this time. However, the Treasury Department and the IRS continue to study these issues.

G. Applicability of Section 382 to S Corporations Regarding Disallowed Business Interest Expense Carryforwards

The proposed regulations provide that sections 381(c)(20) and 382(d)(3) and (k)(1) apply to S corporations with respect to disallowed business expense carryforwards. Proposed § 1.163(j)–6(l)(5) provides that the amount of any business interest expense not allowed as a deduction for any taxable year by reason of the section 163(j) limitation is carried forward in the succeeding taxable year as a disallowed business interest expense carryforward. Proposed

§ 1.163(j)–6(l)(1) provides that any disallowed business interest expense is not allocated to the S corporation's shareholders until such business interest expense is allowed as a deduction under section 163(j). Similarly, under proposed § 1.163(j)–6(l)(6) and (7), an S corporation shareholder's stock basis is reduced, but not below zero, and an S corporation's accumulated adjustments account (AAA) balance is adjusted, when a disallowed business interest expense becomes deductible under section 163(j).

The preamble to the proposed regulations requested comments regarding the proper integration of section 163(j) and section 382 and subchapter S of the Code (subchapter S). In addition, the preamble to the proposed regulations requested comments regarding the treatment of disallowed business interest expense carryforwards as an attribute of the S corporation subject to the section 382 limitation, as opposed to an attribute of the shareholders, and regarding the timing for any adjustments to shareholder basis and the corporation's AAA.

In response, one commenter recommended that the final regulations retain the approach as set forth in the proposed regulations. In particular, the commenter recommended that section 382 (and the comparable provisions of section 383) be applied only to those attributes that are carried forward and taken into account at the corporate level. The commenter contended that it would be appropriate to treat disallowed business interest expense of an S corporation as a ''pre-change loss'' such that the corporation would be a loss corporation pursuant to section 382(k)(1).

The Treasury Department and the IRS agree with the commenter. Because disallowed business interest expense is treated as an attribute of the S corporation, the S corporation's disallowed business interest expense carryforwards will be treated as pre-change losses subject to a section 382 limitation under section 382(d)(3) following an S corporation's ownership change (within the meaning of section 382(g)).

Accordingly, consistent with the treatment of C corporations under section 382, the final regulations provide that a disallowed business interest expense carryforward of an S corporation is treated as pre-change loss and will be subject to a section 382 limitation only if an S corporation undergoes an ownership change within the meaning of section 382(g). For example, under the final regulations, a ''qualifying disposition'' by a shareholder that results in a 20-percent ownership change of the S corporation, on its own, will not cause section 382 to apply to an S corporation upon such qualifying disposition. See § 1.1368–1(g)(2)(i)(A). See also § 1.1368–1(g)(2) (defining the term ''qualifying disposition'').

A commenter also recommended that section 382 not be applied to any item of deduction, loss, or credit that is allocated to shareholders on a current basis and taken into account at the shareholder level. As expressed in the preamble to the proposed regulations, the Treasury Department and the IRS continue to consider the extent to which section 382 should apply to S corporations for purposes other than section 163(j). The application of section 382 to S corporations for purposes of section 163(j) should not be construed as creating any inference regarding the application of section 382 to S corporations for other purposes. The Treasury Department and the IRS continue to seek comments regarding the proper integration of these two Code sections and subchapter S.

H. Separate Application of Section 163(j) Limitation to Short Taxable Years of S Corporation

An S corporation's items of income and loss generally are allocated on a pro rata, per-day basis to all shareholders that hold the corporation's stock during the corporation's taxable year. See section 1377(a)(1). However, subchapter S provides limited exceptions to that general allocation rule. For example, in the event that a shareholder completely terminates its interest, the S corporation and affected shareholders can elect to treat its taxable year ''as if the taxable year consisted of 2 taxable years the first of which ends on the date of the termination'' (each, a hypothetical short taxable year). Section 1377(a)(2)(A). In addition, an S corporation may make such an election if a shareholder has made a qualifying disposition. See § 1.1368–1(g)(2). With regard to each of these instances, the S corporation may elect to ''close the books'' even though the corporation will file one Federal income tax return for the taxable year covering both separate taxable periods.

Subchapter S also specifies instances in which an S corporation may elect, or is required, to file a Federal income tax return for a short taxable year (actual short taxable year). For example, an S corporation may elect to determine taxable income or loss based on a closing-of-the-books method with respect to an S termination year. See section 1362(e)(3) (providing an election to have items assigned to each short taxable year under normal Federal income tax accounting rules). However, if a sale or exchange of at least 50 percent of the S corporation's stock occurs during that S termination year, the S corporation must utilize the closing-of-the-books method. See section 1362(e)(6)(D). See also section 1362(e)(6)(C) (requiring the use of the closing-of-the-books method with respect to any item resulting from the application of section 338).

Based on a request from a commenter, the Treasury Department and the IRS have considered whether the section 163(j) limitation should apply separately with respect to each hypothetical or actual short taxable year. Specifically, the commenter recommended that, if an S corporation (1) has an actual short taxable year, or (2) determines its taxable income or loss as if its taxable year consisted of separate taxable years (that is, hypothetical short taxable years), the final regulations should clarify that a separate section 163(j) limitation should be calculated for, and applied to, each actual or hypothetical short taxable year. To support that recommendation, the commenter emphasized ''sound policy reasons'' for ensuring that owners of the corporation during the first short taxable period are not affected by the fortunes of the corporation during the second short period, and vice versa.

The Treasury Department and the IRS agree that a separate section 163(j) limitation should be calculated for, and applied to, each actual or hypothetical short taxable year. Section 163(j)(1) limits the amount of business interest expense allowed as a deduction ''for any taxable year.'' Accordingly, the Treasury Department and the IRS have determined that a separate section 163(j) limitation should apply to each actual short taxable year. See § 1.1362–3(c)(3) (setting forth the general rule that ''the S and C short years are treated as two separate years for purposes of all provisions of the Internal Revenue Code''). In addition, subchapter S and the regulations in this part under subchapter S explicitly treat hypothetical short taxable years as separate taxable years. See section 1377(a)(2)(A) (providing that an S corporation can treat its taxable year ''as if the taxable year consisted of 2 taxable years'') and § 1.1368–1(g)(1) (providing that the ''section applies as if the taxable year consisted of separate taxable years''). As a result, the Treasury Department and the IRS also have determined that a separate section 163(j) limitation should apply to each hypothetical short taxable year and sections 1.1362–3(c), 1.1368–1(g)(2), and 1.1377–1(b)(3) have been amended accordingly.

I. Partnership or S Corporation Not Subject to Section 163(j)

Under proposed § 1.163(j)–6(m)(1), if a partner or S corporation shareholder is allocated business interest expense from an exempt entity, that allocated business interest expense will be subject to the partner's or S corporation shareholder's section 163(j) limitations. Commenters recommended that proposed § 1.163(j)–6(m)(1) be modified so that business interest expense incurred by a partnership that is an exempt entity is not subject to section 163(j) at the partner level. Commenters argued that proposed § 1.163(j)–6(m)(1) was inconsistent with section 163(j)(4)(A), which requires the testing of partnership-level business interest expense at the partnership level, not the partner level. The Treasury Department and the IRS agree, and have determined that the same argument naturally should apply to S corporations and their shareholders. See section 163(j)(4)(D) (in relevant part, providing that rules similar to section 163(j)(4)(A) shall apply with respect to any S corporation and its shareholders). Accordingly, the final regulations provide that business interest expense of an exempt partnership, or exempt S corporation, pursuant to section 163(j)(3) does not retain its character as business interest expense and, as a result, is not subject to the section 163(j) limitation at the partner or S corporation shareholder level.

One commenter requested clarification as to whether proposed § 1.163(j)–6(m)(3) applies only to exempt entities or also could apply to trades or businesses that become not subject to the requirements of section 163(j) by reason of engaging in excepted trades or businesses. The final regulations clarify that § 1.163(j)–6(m)(3) does not apply when a partnership engages in excepted trades or businesses. Accordingly, if a partner is allocated excess business interest expense from a partnership and, in a succeeding taxable year, such partnership engages in excepted trades or businesses, then the partner shall not treat any of its excess business interest expense that was previously allocated from such partnership as business interest expense paid or accrued by the partner in such succeeding taxable year by reason of the partnership engaging in excepted trades or businesses. Rather, such excess business interest expense shall remain as excess business interest expense until such time as it is treated as business interest expense paid or accrued by the partner pursuant to § 1.163(j)–6(g)(2) or by reason of the partnership becoming an exempt entity. The final regulations provide a similar clarification for S corporations in § 1.163(j)–6(m)(4).

J. Trusts

For purposes of determining ATI for trusts, one commenter noted that the definition of ATI does not contain an addback for deductible trust distributions. Trusts and decedents' estates taxable under section 641 are permitted to deduct under sections 651 and 661 certain distributions made to beneficiaries. The commenter suggested that section 163(j) should apply before a trust takes a deduction for distributions to beneficiaries, and that, if a deductible trust or estate distribution is added back to the trust's ATI and thus is taken into account in determining the amount of interest expense allowable to the trust under section 163(j), such trust or estate distribution should be excluded from the recipient beneficiaries' calculation of ATI. Thus, under the commenter's approach, a beneficiary of a trust or a decedent's estate would not be able to utilize a trust distribution to deduct additional business interest expense at the beneficiary level.

The Treasury Department and the IRS agree with this comment. Proposed Regulation § 1.163(j)–2(f) is consistent with this result. However, in order to clarify that trusts and decedents' estates taxable under section 641 compute ATI without regard to deductions under sections 651 and 661, the final regulations explicitly provide for this positive ATI adjustment. Additionally, the Treasury Department and the IRS have determined that a similar rule should apply for charitable deductions of a trust or a decedent's estate under section 642(c).

K. Qualified Expenditures

The ATI of a partnership is generally determined in accordance with proposed § 1.163(j)–1(b)(1). Partnership ATI is therefore reduced by deductions claimed under sections 173 (relating to circulation expenditures), 174(a) (relating to research and experimental expenditures), 263(c) (relating to intangible drilling and development expenditures), 616(a) (relating to mine development expenditures), and 617(a) (relating to mining exploration expenditures) (collectively, ''qualified expenditures''). As a result, deductions for qualified expenditures will reduce a partnership's section 163(j) limitation pursuant to proposed § 1.163(j)–2(b). Deductions for those items also will reduce the amount of excess taxable income that may be allocated to the partners and thus reduce the amount by which partner-level ATI may be increased under proposed § 1.163(j)–6(e)(1).

A partner may elect to capitalize its distributive share of any qualified expenditures of a partnership under section 59(e)(4)(C) or may be required to capitalize a portion of its distributive share of certain qualified expenditures of a partnership under section 291(b). As a result, the taxable income reported by a partner in a taxable year attributable to the ownership of a partnership interest may exceed the amount of taxable income reported to the partner on a Schedule K–1.

Commenters recommended that a distributive share of partnership deductions capitalized by a partner under section 59(e) or section 291(b) increase the ATI of the partner because qualified expenditures reduce both partnership ATI and excess taxable income but may not reduce the taxable income of a partner. Commenters suggested two different approaches for achieving this result: (1) Adjust the excess taxable income of the partnership, resulting in an increase to partner ATI; and (2) increase the ATI of the partner directly, without making any adjustments to partnership excess taxable income. The interaction of qualified expenditures with section 163(j)(4) is being addressed in the Concurrent NPRM. Therefore, this issue is not addressed in the final regulations.

L. CARES Act Partnership Rules

As discussed in the Background section to this preamble, section 163(j)(10), as amended by the CARES Act, provides a special rule for excess business interest expense allocated to a partner in a taxable year beginning in 2019 (50 percent EBIE Rule). See section 163(j)(10)(a)(ii). The 50 percent EBIE rule is addressed in proposed § 1.163(j)–6(g)(4) of the Concurrent NPRM. The application of the 2019 ATI rule, as provided in section 163(j)(10)(B), in the partnership context is also addressed in proposed § 1.163(j)–6(g)(4) of the Concurrent NPRM. Therefore, the 50 percent EBIE rule and the application of the 2019 ATI rule to partnerships are not addressed in the final regulations.

VIII. Comments on and Changes to Proposed § 1.163(j)–7: Application of the Section 163(j) Limitation to Foreign Corporations and United States Shareholders

Section 1.163(j)–7 provides general rules regarding the application of the section 163(j) limitation to foreign corporations and U.S. shareholders. The following discussion addresses comments relating to proposed § 1.163(j)–7.

The proposed regulations generally apply section 163(j) and the section 163(j) regulations to determine the deductibility of an applicable CFC's business interest expense in the same manner as these provisions apply to determine the deductibility of a domestic C corporation's business interest expense. See proposed § 1.163(j)–7(b)(2). The proposed regulations define an applicable CFC as a CFC in which at least one U.S. shareholder owns stock, within the meaning of section 958(a). However, in certain cases, the proposed regulations limit the amount of an applicable CFC's business interest expense subject to the section 163(j) limitation and modify the computation of an applicable CFC's ATI, respectively. Thus, under the proposed regulations, an applicable CFC with business interest expense applies section 163(j) to determine the extent to which that expense is deductible for purposes of computing subpart F income as defined under section 952, tested income as defined under section 951A(c)(2)(A), and income that is effectively connected with the conduct of a U.S. trade or business (ECI), as applicable. The proposed regulations provide additional guidance for an applicable CFC (and other foreign persons) with ECI in proposed § 1.163(j)-8, as discussed in part IX of this Summary of Comments and Explanation of Revisions section.

The Treasury Department and the IRS requested comments in the preamble to the proposed regulations regarding whether it would be appropriate to provide additional modifications to the application of section 163(j) to applicable CFCs and whether there are particular circumstances in which it may be appropriate to exempt an applicable CFC from the application of section 163(j).

Some commenters recommended that section 163(j) generally should not apply to applicable CFCs. Other commenters suggested that section 163(j) should apply to applicable CFCs only to the extent that they have ECI or, if an income tax treaty applies, business profits attributable to a United States permanent establishment, or to the extent that debt was introduced to an applicable CFC with a principal purpose of avoiding U.S. income taxes. Some commenters argued that the Treasury Department and the IRS lack the authority to apply section 163(j) to applicable CFCs because section 163(j) applies to taxpayers and, they argue, applicable CFCs are not taxpayers. Furthermore, some commenters argued that old section 163(j) did not apply to applicable CFCs and that Congress expressed no intent to change that. Some commenters also argued that applying section 163(j) to applicable CFCs creates significant complexity and an administrative burden. Furthermore, some commenters suggested that applying section 163(j) to applicable CFCs may have a limited effect on tax revenue or that applying section 163(j) to applicable CFCs could, in some cases, result in a net tax benefit to U.S. shareholders.

The Treasury Department and the IRS have determined that, under current law, section 163(j) applies to applicable CFCs and other foreign corporations whose income is relevant for U.S. tax purposes. As a general matter, application of U.S. tax principles to a foreign corporation for purposes of determining its income for U.S. tax purposes is within the authority of the Treasury Department and the IRS. For example, a U.S. shareholder of an applicable CFC takes into account its pro rata share of the subpart F income and net tested income of an applicable CFC. Accordingly, in order to determine the U.S. shareholder's pro rata share, the income of the applicable CFC must be determined. Section 1.952–2(a)(1) provides that, ''[e]xcept as provided in subparagraph (2) of this paragraph [relating to insurance gross income], the gross income of a foreign corporation for any taxable year shall, subject to the special rules of paragraph (c) of this section, be determined by treating such foreign corporation as a domestic corporation taxable under section 11 and by applying the principles of section 61 and the regulations thereunder.'' Neither § 1.952–2(a)(2) nor (c) implicates section 163(j). Accordingly, pursuant to § 1.952–2, a foreign corporation is treated as a domestic corporation for U.S. tax purposes when calculating its taxable income, including by application of section 163(j).

The exclusion of CFCs from the application of old section 163(j) under the 1991 Proposed Regulations is not determinative as to whether applicable CFCs and other foreign corporations should be excluded from the application of section 163(j). Although both old section 163(j) and section 163(j) limit deductions for business interest expense, the policies of each provision are significantly different. Old section 163(j) was a narrower provision that limited a corporation's ability to use interest expense deductions to move earnings out of the United States tax base. Section 163(j) focuses on limiting the potential tax benefit of overleveraged businesses. Because Congress wholly repealed and replaced old section 163(j), the provisions of old section 163(j) and the 1991 Proposed Regulations are not determinative as to the application of section 163(j).

Furthermore, nothing in the Code or legislative history indicates that Congress intended to exclude applicable CFCs or other foreign corporations from the application of section 163(j). Congress expressly provided that section 163(j) should not apply to certain small businesses or to certain excepted trades or businesses. Congress did not exempt applicable CFCs or other foreign corporations from the application of section 163(j).

Accordingly, the final regulations clarify that section 163(j) applies to foreign corporations whose income is relevant for U.S. tax purposes, other than by reason of section 881 or 882 (relevant foreign corporations). Section 1.163(j)–7(b). Furthermore, no comments were received on the application of § 1.952–2 or section 882 for purposes of determining the income, including ECI, of an applicable CFC or on the reduction of an applicable CFC's taxable income by the amount of any dividend received from a related person for purposes of determining ATI. In addition to clarifying that these rules apply to all relevant foreign corporations, the final regulations otherwise adopt these rules unchanged. § 1.163(j)–7(g)(1).

The Treasury Department and the IRS acknowledge that the application of section 163(j) to applicable CFCs and other relevant foreign corporations, like many other tax provisions, will increase the complexity of determining the taxable income of a relevant foreign corporation. Similarly, section 163(j) may have a significant effect on the amount of taxable income of some relevant foreign corporations and have limited or no effect on the amount of taxable income of others. The Treasury Department and the IRS do not view the complexity of a provision of the Code or its net effect on tax revenue as determinative as to whether the provision applies to CFCs. Nonetheless, the Treasury Department and the IRS have determined that it is appropriate to reduce the compliance and administrative burdens of applying section 163(j) to certain applicable CFCs.

Accordingly, the Treasury Department and the IRS have developed new rules, taking into account comments received, that substantially modify the rules contained in proposed § 1.163(j)–7. The Treasury Department and the IRS anticipate that, in many cases, these modifications will significantly reduce the compliance and administrative burdens of applying section 163(j) to applicable CFCs. However, because the operation of these new rules is sufficiently different from the operation of the rules in proposed § 1.163(j)–7, the Treasury Department and the IRS have determined that these rules should be proposed in order to provide taxpayers the opportunity to comment before their finalization. These rules and a discussion of their operation are contained in the Concurrent NPRM.

IX. Comments on and Changes to Section 1.163(j)–8: Application of the Section 163(j) Limitation to Foreign Persons With Effectively Connected Taxable Income.

Proposed § 1.163(j)–8 provides rules for applying section 163(j) to a nonresident alien individual or foreign corporation with ECI. Although no comments were received on proposed § 1.163(j)–8, the Treasury Department and the IRS continue to study methods of determining the amount of deductible business interest expense and disallowed business interest expense carryforwards that are allocable to ECI. Accordingly, the final regulations reserve on the application of the business interest expense deduction limitation to foreign persons with ECI.

In the Concurrent NPRM, the Treasury Department and the IRS are proposing rules for determining the amount of deductible business interest expense and disallowed business interest expense carryforward of a nonresident alien, foreign corporation, or partnership that is properly allocable to ECI. The Treasury Department and the IRS request comments on appropriate methods of making this determination. These comments should consider the appropriate method for determining the extent to which business interest expense determined under § 1.882–5 should be treated as attributable to a partnership and subject to the section 163(j) limitation at the partnership level.

X. Comments on and Changes to Proposed § 1.163(j)–9: Elections for Excepted Trades or Businesses; Safe Harbor for Certain REITs

Section 1.163(j)–9 provides general rules and procedures for making an election for a trade or business to be an electing real property trade or business under section 163(j)(7)(B) and an election for a trade or business to be an electing farming business under section 163(j)(7)(C). The following discussion addresses some of the provisions in § 1.163(j)–9 and the comments received.

A. Protective Elections

Section 163(j)(3) provides that the section 163(j) limitation does not apply to taxpayers that meet the gross receipts test of section 448(c). The small business exemption applies automatically if the requirements are met; thus, no election is necessary to ensure that the section 163(j) limitation does not apply. However, for real property trades or businesses under section 163(j)(7)(B), and for farming businesses under section 163(j)(7)(C), the section 163(j) limitation does not apply only if the taxpayer is eligible for and makes an election.

The preamble to the proposed regulations provides that a taxpayer that qualifies for the small business exemption is not eligible to make an election for a trade or business to be an electing real property trade or business or an electing farming business, in part because the taxpayer is already not subject to the section 163(j) limitation, and in part because an electing real property trade or business or an electing farming business is required to use ADS for certain types of property under section 163(j)(10) and cannot claim the additional first-year depreciation deduction under section 168(k) for those types of property. The Treasury Department and the IRS were concerned that certain small business taxpayers might make the election without realizing that the election could have adverse effects on their deduction for depreciation expense and their method of accounting for depreciation.

Commenters suggested that, in some situations, making an annual gross receipts determination, to determine whether a taxpayer should make an election or is already exempt from the limitation, could be burdensome. For example, a taxpayer that has to request the average annual gross receipts of numerous unrelated entities under section 448 aggregation principles in order to make the gross receipts determination may choose to forgo making that determination if the taxpayer knows that its trade or business qualifies to be an electing real property trade or business or an electing farming business. These commenters requested that taxpayers be allowed to make such an election without regard to whether the gross receipts test of section 448(c) has been tested or is met, notwithstanding the potentially adverse depreciation expense implications.

The Treasury Department and the IRS agree with the commenters. Accordingly, the final regulations provide that taxpayers may make an election for a trade or business to be an electing real property trade or business or an electing farming business, provided that they qualify to make such elections, even if the gross receipts test under section 448(c) may be satisfied by the electing trades or businesses in the taxable year in which the election is made. As is the case for all other electing real property trades or businesses and electing farming businesses, the elections are irrevocable and affect depreciation as provided in section 163(j)(11). However, this rule also benefits taxpayers subject to section 163(j) that are owners of small businesses because treating these small businesses as engaged in an excepted trade or business may result in the allocation of more owner interest expense to excepted trades or businesses under § 1.163(j)–10(c).

Commenters also requested a protective election for taxpayers engaged in rental real estate activities if it is unclear whether the activities rise to the level of a trade or business under section 162. The protective election is necessary, according to some commenters, because the definition of an ''electing real property trade or business'' in section 163(j)(7)(B) and proposed § 1.163(j)–1(b)(14) allows a trade or business described in section 469(c)(7)(C) to make the election, and a real property trade or business as defined in section 469(c)(7)(C) can include rental real estate that does not rise to the level of a section 162 trade or business.

Generally, interest expense associated with an activity that does not rise to the level of a section 162 trade or business is not subject to the section 163(j) limitation. The section 163(j) limitation applies to taxpayers with business interest, which is defined under section 163(j)(5) as any interest properly allocable to a trade or business. Proposed § 1.163(j)–1(b)(38) defines a ''trade or business'' as a trade or business under section 162. In contrast, an electing real property trade or business must be described in section 469(c)(7)(C). Section 1.469–9(b)(1) provides that, for purposes of section 469(c)(7), the term ''trade or business'' is defined as ''any trade or business determined by treating the types of activities in § 1.469–4(b)(1) as if they involved the conduct of a trade or business; and any interest in rental real estate, including any interest in rental real estate that gives rise to deductions under section 212.''

Thus, section 469(c)(7)(C) includes all rental real estate (as defined in § 1.469–9(b)(3)) and adopts a broader definition of a ''trade or business'' than section 162. Under this broader definition, taxpayers with rental real estate may be able to qualify as ''real estate professionals'' through work performed in their rental real estate, even if the rental real estate activities otherwise do not rise to the level of a section 162 trade or business.

For example, for purposes of section 469(c)(7)(C), a taxpayer who owns real property and rents to tenants under a triple net lease arrangement will be treated as engaged in a real property trade or business even though the renting under the terms of a triple net lease arrangement may not rise to the level of a section 162 trade or business. The triple net lease arrangement is included in the broader definition of a trade or business under § 1.469–9(b)(1) because the arrangement represents an interest in rental real estate. Accordingly, renting real property under a triple net lease arrangement generally will fall within the definition of a ''rental real property trade or business'' in section 469(c)(7)(C) and proposed § 1.469–9(b)(2). As a result, the taxpayer with such a rental arrangement should be able to make an election to treat this activity as an electing real property trade or business, if the taxpayer so chooses, even though the renting of real property under a triple net lease arrangement might not be a section 162 trade or business. This result is simply a consequence of Congress cross-referencing the broader section 469 definition of a ''real property trade or business'' for purposes of section 163(j).

Thus, the commenters stated that, although taxpayers who are certain they are not engaged in a section 162 trade or business do not need to make an election out of the section 163(j) limitation because they are not subject to this limitation, taxpayers engaged in rental real estate activities who are not certain whether their rental real estate activities rise to the level of a section 162 trade or business should be given the ability to obtain certainty by making a protective election to treat their rental real estate activities as an electing real property trade or business.

The Treasury Department and the IRS agree with the recommendation for a protective election under these circumstances. Thus, the final regulations provide that an election to treat rental real estate activities as an electing real property trade or business is available regardless of whether the taxpayer making the election is engaged in a trade or business within the meaning of section 162. Under the protective election, a taxpayer engaged in activities described in section 469(c)(7)(C) and § 1.469–9(b)(2), as required in proposed § 1.163(j)–1(b)(14)(i), but unsure whether its activities rise to the level of a section 162 trade or business, may make an election for a trade or business to be an electing real property trade or business.

As with all other electing real property trades or businesses, once the election is made, all other consequences of the election outlined in § 1.163(j)–9 apply, such as the irrevocability of the election and the required use of the alternative depreciation system for certain assets.

B. One-Time Late Election or Withdrawal of Election Procedures

Commenters requested a one-time automatic extension of time for certain taxpayers to file an election under section 163(j)(7)(B) or section 163(j)(7)(C) due to uncertainty about the effect of a decision to make or not make such an election and about which taxpayers are eligible to make such an election prior to the publication of the final regulations. Additionally, commenters requested a one-time opportunity to withdraw an election made under section 163(j)(7)(B) or section 163(j)(7)(C) prior to the publication of the final regulations. The Treasury Department and the IRS agree with the commenters' concerns. Thus, in order to address the commenters' concerns, and to provide immediate transition guidance under section 163(j) for taxpayers affected by the various amendments to the Code made by the CARES Act (including, for example, the technical corrections to section 168(e) of the Code relating to the classification of qualified improvement property), Revenue Procedure 2020–22 was issued to provide an automatic extension of time to make, or an opportunity to withdraw, an election for taxable years beginning in 2018, 2019, or 2020. The revenue procedure also provides the time and manner of making or revoking the three elections provided by the CARES Act under section 163(j)(10) for taxable years beginning in 2019 or 2020.

C. The Anti-Abuse Rule Under Proposed § 1.163(j)–9(h)

Numerous comments were received concerning the anti-abuse rule in proposed § 1.163(j)–9(h)(1) (proposed –9(h) anti-abuse rule). The proposed –9(h) anti-abuse rule prohibits an otherwise qualifying real property trade or business from making an election under section 163(j)(7)(B) if at least 80 percent of the business's real property, determined by fair market value, is leased to a trade or business under common control (that is, 50 percent of the direct and indirect ownership of both businesses is held by related parties within the meaning of sections 267(b) and 707(b)) with the real property trade or business. Proposed § 1.163(j)–9(h)(2) provides an exception to the proposed –9(h) anti-abuse rule for REITs that lease qualified lodging facilities (defined in section 856(d)(9)(D)) and qualified health care properties (defined in section 856(e)(6)(D)) (REIT exception).

The preamble to the proposed regulations explains that it would be inappropriate to allow an election under section 163(j)(7)(B) to be an excepted real property trade or business for a trade or business that leases substantially all of its real property to the owner of the real property trade or business, or to a related party of the owner: ''To permit such an election would encourage a taxpayer to enter into non-economic structures where the real estate components of non-real estate businesses are separated from the rest of such businesses in order to artificially reduce the application of section 163(j) by leasing the real property to the taxpayer or a related party of the taxpayer and electing for this ''business'' to be an excepted real property trade or business. As a result, these proposed regulations would also contain an anti-abuse rule.'' The preamble further explains the reasoning for the REIT exception by stating that, because REITs that lease qualified lodging facilities and qualified healthcare properties are generally permitted (pursuant to section 856(d)(8)(B)) to lease these properties to a taxable REIT subsidiary (TRS), this anti-abuse rule does not apply to these types of REITs. The Treasury Department and the IRS requested comments in the preamble to the proposed regulations on whether other exceptions to the anti-abuse rule (such as, for example, an exception for certain fact patterns where real property that is leased from a related party is ultimately sub-leased to a third party) would be appropriate.

Commenters suggested eliminating or modifying the proposed –9(h) anti-abuse rule because of the concern that, as currently written, this rule applies to non-abusive lease arrangements between commonly controlled trades or businesses. Specifically, commenters raised concerns about the applicability of the proposed –9(h) anti-abuse rule to specific types of business structures where the real property is owned by one legal entity (referred to as property company, or PropCo) and leased to a separate but commonly controlled legal entity that operates and manages a business (referred to as operating company, or OpCo). According to commenters, this PropCo/OpCo structure has valid business protection, lending, and regulatory purposes in certain industries. Commenters also claimed that this structure was in existence for many years prior to the enactment of the section 163(j) limitation and was not created in an attempt to circumvent application of the section 163(j) limitation.

For example, the PropCo/OpCo structure is used by some hotels in the following manner: PropCo generally owns the real property subject to significant debt, services such debt, and leases the real property to OpCo, which operates a real property trade or business by licensing the property to unrelated third parties (guests). This structure is used to limit legal liability, manage state and local tax burdens, plan for family wealth transfers, and for other business objectives. One commenter recommended a ''look-through'' exception to the proposed –9(h) anti-abuse rule where the real property is ultimately leased (or licensed) to unrelated third parties in a PropCo/OpCo structure. This exception would allow a real property trade or business owning real property, or PropCo, to make an election to be an electing real property trade or business if it leases real property to a commonly controlled real property trade or business, or OpCo, if OpCo subleases (or licenses) the real property to unrelated third parties.

Similarly, commenters noted that the property ownership, mortgage, and resulting interest expense for trades or businesses described as nursing homes, continuing care retirement communities, independent living facilities, assisted living facilities, memory care facilities, and skilled nursing facilities (collectively, ''residential living facilities'') is often contained in one legal entity, or PropCo, and the operation and management of the residential living facility is contained in another, commonly controlled legal entity, or OpCo. Commenters explained that the Department of Housing and Urban Development, which is a major lender in the residential living industry, and many other lenders often require the use of single-asset or separate legal entities for lending purposes.

To prevent the application of the proposed –9(h) anti-abuse rule to a PropCo that leases real property to a residential living facility, some commenters suggested that the anti-abuse rule should not apply to a trade or business that leases real property to a residential living facility (1) regardless of whether the lessor and lessee are under common control, or (2) if both the lessor trade or business and the commonly controlled lessee independently qualify as electing real property trades or businesses. Commenters noted that the proposed –9(h) anti-abuse rule should not apply to situations where the entities, if combined or aggregated and without taking the lease into account, would each qualify as real property trades or businesses. Without modification to the proposed –9(h) anti-abuse rule, the PropCo in a PropCo/OpCo structure would be prohibited from making a real property trade or business election even though all of its lease income is derived from a real property trade or business. Commenters suggested that proposed § 1.163(j)–9(h)(2), which provides an exception for REITs, should apply to similarly situated taxpayers that are privately owned but use a commonly controlled entity in a PropCo/OpCo structure rather than a REIT.

Other suggestions made by commenters include (1) eliminating the proposed –9(h) anti-abuse rule and instead relying on the more general proposed § 1.163(j)–2(h) anti-avoidance rule to disregard or recharacterize the types of non-economic structures targeted by the proposed –9(h) anti-abuse rule, (2) clarifying that the proposed –9(h) anti-abuse rule would apply only if there is a ''principal purpose of tax avoidance,'' (3) providing exceptions to the proposed –9(h) anti-abuse rule if the taxpayer demonstrates a substantial economic purpose for the PropCo/OpCo structures unrelated to avoiding section 163(j), or if the PropCo/OpCo structure was in place prior to enactment of the TCJA, and (4) expanding the REIT exception to include all real property trades or businesses that lease to residential living facilities.

The operation of two separate, but commonly controlled, legal entities is also common in the cattle and beef industry—one entity owns all of the land and the buildings used by the operating entity, whereas the operating entity owns inventory (cattle or crops) and equipment and operates the farm, ranch, or feed yard. Commenters recommended providing an exception from the proposed –9(h) anti-abuse rule for farming businesses or, alternatively, clarifying that the allocation rules under proposed § 1.163(j)–10 do not apply to separate out the real property to real property businesses included under the proposed –9(h) anti-abuse rule.

The Treasury Department and the IRS agree with commenters that certain exceptions should be added to the proposed –9(h) anti-abuse rule. The final regulations provide two additional exceptions to the anti-abuse rule. Under the first exception, if at least 90 percent of a lessor's real property, determined by fair market rental value, is leased to a related party that operates an excepted trade or business and/or to unrelated parties, the lessor is eligible to make an election to be an electing real property trade or business for its entire trade or business (de minimis exception). The de minimis exception accommodates taxpayers that, by law or for valid business reasons, divide their real property holding and leasing activities from their operating trade or business that qualifies as an excepted trade or business, while still maintaining an anti-abuse rule to prevent non-economic business structures designed to circumvent the section 163(j) limitation. See § 1.163(j)–9(j).

The second exception is a look-through rule that modifies the proposed –9(h) anti-abuse rule by allowing taxpayers to make an election for a certain portion of their real property trade or business (look-through exception). Under the look-through exception, if a lessor trade or business leases to a trade or business under common control (lessee), the lessor is eligible to make an election to be an electing real property trade or business to the extent that the lessor leases to an unrelated party or to an electing trade or business under common control with the lessor or lessee, and to the extent that the lessee trade or business under common control subleases (or licenses) to unrelated third parties and/or related parties that operate an excepted trade or business. Accordingly, the lessor can make an election for the portion of its trade or business that is equivalent to the portion of the real property that is ultimately leased to unrelated parties and/or related parties that operate an excepted trade or business. A lessor that makes an election under the look-through exception must allocate the basis of assets used in its trades or businesses under the rules provided in § 1.163(j)–10(c)(3)(iii)(D).

D. Residential Living Facilities and Notice With Proposed Revenue Procedure

The PropCo/OpCo structure, discussed previously in part X(C) of this Summary of Comments and Explanation of Revisions section, is used extensively by certain residential living facilities that provide residential housing along with supplemental assistive, nursing, and other routine medical services. The commonly controlled lessees in the PropCo/OpCo structure expressed concern about whether the residential living facility trades or businesses qualify as real property trades or businesses under section 469 and § 1.469–9(b)(2), and are thus eligible to make an election under section 163(j)(7)(B), because of the supplemental services that they provide. Accordingly, Notice 2020—[INSERT NOTICE #], 2020—[INSERT CB/IRB GUIDANCE NUMBERS], released concurrently with these final regulations, provides notice of a proposed revenue procedure detailing a proposed safe harbor under which a taxpayer engaged in a trade or business that manages or operates a residential living facility and that also provides supplemental assistive, nursing, and other routine medical services may elect to treat such trade or business as a real property trade or business within the meaning of section 469(c)(7)(C), solely for purposes of qualifying as an electing real property trade or business under section 163(j)(7)(B). Thus, if a lessor leases real property to a commonly controlled lessee that operates a residential living facility, which qualifies as and makes an election to be an excepted trade or business under the proposed safe harbor in Notice 2020—[INSERT NOTICE #], the lessor may qualify to use the de minimis exception or the look-through exception.

The Treasury Department and the IRS request comments in Notice 2020—[INSERT NOTICE #] on the proposed revenue procedure. Interested parties are invited to submit comments on the proposed revenue procedure by [INSERT DATE 90 DAYS AFTER PUBLICATION of Notice 2020—[INSERT NOTICE #] IN the IRB].

The proposed revenue procedure is proposed to apply to taxpayers with taxable years ending after December 31, 2017. Until such time that the proposed revenue procedure is published in final form, taxpayers may use the safe harbor described in the proposed revenue procedure for purposes of determining whether a residential living facility, as defined in the proposed revenue procedure, may be treated as a real property trade or business solely for purposes of section 163(j).

Future guidance might be needed to determine whether a particular trade or business can make an election. Accordingly, the definitions of electing real property trade or business in § 1.163(j)–1(b)(14) and electing farming business in § 1.163(j)–1(b)(13) include a new provision noting that the Secretary may issue guidance on whether a trade or business can be an electing real property trade or business or electing farming business.

E. Safe Harbor for Certain REITs

Proposed § 1.163(j)–9(g) provides a special safe harbor for REITs. The safe harbor provides that, if a REIT holds real property, interests in partnerships holding real property, or shares in other REITs holding real property, the REIT is eligible to make an election to be an electing real property trade or business for all or part of its assets. If a REIT makes an election to be an electing real property trade or business, and if the value of the REIT's real property financing assets (as defined in proposed § 1.163(j)–9(g)(5) and (6)) at the close of the taxable year is 10 percent or less of the value of the REIT's total assets at the close of the taxable year, then, under the safe harbor in the proposed regulations, all of the REIT's assets are treated as assets of an excepted trade or business. If a REIT makes an election to be an electing real property trade or business, and if the value of the REIT's real property financing assets at the close of the taxable year is more than 10 percent of the value of the REIT's total assets, then, under the safe harbor in the proposed regulations, the REIT's business interest income, business interest expense, and other items of expense and gross income are allocated between excepted and non-excepted trades or businesses under the rules set forth in proposed § 1.163(j)–10, as modified by proposed § 1.163(j)–9(g)(4). The safe harbor also allows REITs to use § 1.856–10 for the definition of ''real property'' in determining which assets are assets of an excepted trade or business. The final regulations generally adopt the safe harbor for REITs in the proposed regulations, with modifications in response to comments discussed in this part X(E) of the Summary of Comments and Explanation of Revisions section.

One commenter recommended that the Treasury Department and the IRS revise proposed § 1.163(j)–9(g)(1) to clarify that a REIT may make the safe harbor election if the REIT owns an interest in one or more partnerships holding real property or stock in one or more REITs holding real property. The commenter indicated that the use of the plural ''interests in partnerships'' and ''shares in other REITs'' could imply that a REIT cannot make the safe harbor election if the REIT owns an interest in a single partnership or shares in a single REIT. The Treasury Department and the IRS agree that the regulations should not preclude a REIT that owns an interest in a single partnership or shares in a single REIT from applying the safe harbor.

This commenter also recommended that the final regulations clarify that the safe harbor election may be made if the electing REIT owns a direct interest in a partnership or lower-tier REIT that does not directly hold real property, but that holds an interest in another partnership or lower-tier REIT that directly holds real property.

The determination of whether a REIT is eligible to make the safe harbor election under the proposed regulations was intended to mirror the determination of whether the REIT holds real property (as defined under § 1.856–10) when testing the value of the REIT's real estate assets under section 856(c)(4)(A). If a REIT is a partner in a partnership that holds real property (as defined under § 1.856–10), the REIT is deemed to own its proportionate share of the partnership's real property for purposes of section 856(c)(4). The Treasury Department and the IRS also recognize that, for purposes of section 856(c)(4), a REIT is deemed to own a share of real property from any partnership interest held through an upper-tier partnership.

Moreover, under section 856(c)(5)(B), shares in other REITs qualify as real estate assets. Although a REIT (shareholder REIT) that holds shares in another REIT would not need to determine whether the other REIT holds real property for purposes of testing the value of the shareholder REIT's real estate assets under section 856(c)(4), the proposed regulations allowed the shareholder REIT to make the safe harbor election as long as it determines that the other REIT holds real property. The Treasury Department and the IRS recognize that the other REIT in this situation may not necessarily hold real property but instead may hold shares in a lower-tier REIT (which is a real estate asset in the hands of the other REIT).

Because the shareholder REIT can hold shares in another REIT that holds shares in a lower-tier REIT that holds real property, the Treasury Department and the IRS have concluded that a shareholder REIT may make the safe harbor election if it determines that it holds an indirect interest in a REIT that holds real property. Accordingly, the final regulations clarify that a REIT may elect to be an electing real property trade or business if the REIT holds real property, interests in one or more partnerships holding real property either directly or indirectly through interests in other partnerships or shares in other REITs, or shares in one or more other REITs holding real property either directly or indirectly through interests in partnerships or shares in other REITs.

Several commenters also requested that certain partnerships with a REIT as a partner be allowed to apply the REIT safe harbor election at the partnership level. Commenters noted that many REITs own interests in partnerships that directly or indirectly hold real property, and these partnerships incur the debt that is secured by the real property and claim the interest expense deductions. Commenters recommended that the REIT safe harbor election be made available to partnerships if: (1) At least one partner is a REIT that owns, directly or indirectly, at least 50 percent of the partnership's capital or profits; (2) the partnership meets the requirements of section 856(c)(2), (3), and (4) as if the partnership were a REIT; and (3) the partnership satisfies the requirements of proposed § 1.163(j)–9(g)(1) as if the partnership were a REIT.

The Treasury Department and the IRS agree that a partnership that is controlled by a REIT or REITs and that would meet the REIT gross income and asset tests in section 856(c)(2), (3), and (4) (as if the partnership were a REIT) is sufficiently similar to a REIT for this purpose. Accordingly, the final regulations provide that a partnership may apply the REIT safe harbor election at the partnership level if one or more REITs own, directly or indirectly, at least 50 percent of the partnership's capital and profits, the partnership meets the requirements of section 856(c)(2), (3), and (4) as if the partnership were a REIT, and the partnership satisfies the requirements described in § 1.163(j)–9(h)(1) as if the partnership were a REIT.

A commenter also recommended that the REIT exception to the proposed § 1.163(j)–9(h) anti-abuse rule be clarified to apply to any partnership in which a REIT owns a 50 percent or greater direct or indirect capital or profits interest, if the partnership leases a qualified lodging facility or qualified health care property to a TRS or a partnership in which a TRS is a 50 percent or greater direct or indirect partner. The REIT exception was intended to allow REITs that lease qualified lodging facilities and qualified healthcare properties pursuant to the related party rental exception in section 856(d)(8)(B) to make a real property trade or business election because these leases are explicitly authorized by the Code. In response to comments, the final regulations clarify that the REIT exception also applies to partnerships making the REIT safe harbor election that lease qualified lodging facilities and qualified healthcare properties. However, the final regulations do not specify the related party to which the REIT must lease the qualified lodging facility or qualified healthcare property in order to qualify for the REIT exception and, therefore, Treasury and the IRS did not include a provision for partnerships in which a TRS is a partner.

A commenter requested clarification regarding the application of the real property trade or business election to a rental real estate partnership and its REIT partners if the partnership holds real property and is not engaged in a trade or business within the meaning of section 162. Part XVI of this Summary of Comments and Explanation of Revision section clarifies that taxpayers engaged in rental real estate activities that do not necessarily rise to the level of a section 162 trade or business nevertheless are treated as engaged in real property trades or businesses within the meaning of section 469(c)(7)(C) (and for purposes of section 163(j) by reference). As such, a partnership engaged in a rental real estate activity (regardless of whether that activity rises to the level of a section 162 trade or business) will be permitted to make the election under section 163(j)(7)(B) with respect to the rental real estate activity to be an electing real property trade or business for purposes of section 163(j), and any interest expense that is allocable to that rental real estate activity and that is allocable to a REIT partner will not be investment interest (within the meaning of section 163(d)) that is treated as interest expense allocable to a trade or business of a C corporation partner under § 1.163(j)–4(b)(3).

For purposes of valuing a REIT's assets, the proposed regulations provide that REIT real property financing assets also include the portion of a shareholder REIT's interest in another REIT attributable to that other REIT's real property financing assets. The final regulations clarify that this rule also applies in the context of tiered-REIT structures.

The proposed regulations provide that no portion of the value of a shareholder REIT's shares in another REIT is included in the value of the shareholder REIT's real property financing assets if all of the other REIT's assets are treated as assets of an excepted trade or business under proposed § 1.163–9(g)(2). The proposed regulations provide that if a shareholder REIT does not receive from the other REIT the information necessary to determine whether and the extent that the assets of the other REIT are investments in real property financing assets, then the shareholder REIT's shares in the other REIT are treated as real property financing assets.

A commenter requested that the final regulations clarify how a shareholder REIT determines whether the value of the other REIT's real property financing assets is 10 percent or less of the other REIT's total asset value for purposes of determining whether the electing shareholder REIT must allocate interest expense between excepted and non-excepted businesses. The commenter recommended that the final regulations provide an example to clarify this point or specify that the shareholder REIT may make this determination based on all of the facts available to the shareholder REIT. The commenter proposed that a shareholder REIT that makes an incorrect determination in good faith that the other REIT qualifies under proposed § 1.163–9(g)(2) nevertheless be permitted to treat all of the value of the lower REIT's shares as assets other than real property financing assets.

In response to this comment, the final regulations allow a shareholder REIT to use an applicable financial statement (within the meaning of section 451(b)) of the other REIT to determine whether and the extent that the assets of the other REIT are investments in real property financing assets (rather than having to receive the information directly from the other REIT). However, the final regulations do not permit a shareholder REIT to treat the shares in the other REIT as assets other than real property financing assets when the shareholder REIT's determination is based on information other than an applicable financial statement or information received directly from the other REIT.

In the event that a REIT is required to allocate its interest expense between excepted and non-excepted trades or businesses under § 1.163(j)–10, a commenter requested clarification regarding the application of the look-through rules to tiered entities. Under the proposed regulations, if a REIT holds an interest in a partnership, in applying the partnership look-through rule in proposed § 1.163(j)–10(c)(5)(ii)(A)(*2*), the REIT also applies the definition of real property under § 1.856–10 to determine whether the partnership's assets are allocable to an excepted trade or business. In addition, under the proposed regulations, if a shareholder REIT holds shares in another REIT and all of the other REIT's assets are not treated as assets of an excepted trade or business, the proposed regulations provide that the shareholder REIT applies the same partnership look-through rule (as if the other REIT were a partnership) in determining the extent to which the shareholder REIT's adjusted basis in the shares of the other REIT is properly allocable to an excepted trade or business of the shareholder REIT.

In response to comments, the final regulations provide that, when applying the partnership look-through rule in the case of tiered entities, a REIT applies the definition of real property in § 1.856–10 to each partnership in the chain to determine whether the partnership's assets are allocable to an excepted trade or business. Furthermore, because shares in other REITs qualify as real estate assets under section 856(c)(5)(B), the final regulations provide that, when applying the look-through rule to REITs within a tiered-entity structure, a shareholder REIT may apply the partnership look-through rule in § 1.163(j)–10(c)(5)(ii)(A)(*2*) to all REITs in the chain.

In response to an informal inquiry, the final regulations also clarify that a REIT or a partnership that is eligible but chooses not to apply the REIT safe harbor election may still elect, under § 1.163(j)–9(b)(1), for one or more of its trades or businesses to be an electing real property trade or business, provided that such trade or business is otherwise eligible to elect under § 1.163(j)–9(b)(1). A REIT or partnership that makes the election under § 1.163(j)–9(b)(1) without utilizing the REIT safe harbor provisions may not rely on any portion of § 1.163(j)–9(h)(1) through (7).

F. Real Property Trade or Business

Proposed § 1.163(j)–10(a)(1)(i) provides that the amount of a taxpayer's interest expense that is properly allocable to excepted trades or businesses is not subject to the section 163(j) limitation, and the amount of a taxpayer's other items of income, gain, deduction, or loss, including interest income, that is properly allocable to excepted trades or businesses is excluded from the calculation of the taxpayer's section 163(j) limitation. Commenters suggested that, for purposes of allocating interest between a non-excepted trade or business and an excepted trade or business, a corporate partner in a partnership that conducts a real property trade or business should be allowed to treat its share of the partnership's real property trade or business as an electing real property trade or business even if the partnership does not make the election.

The Treasury Department and the IRS have rejected this comment because an election under section 163(j)(7)(B) has certain consequences—for example, the use of ADS rather than the general depreciation system for certain types of property, which results in the inability of electing real property trades or businesses to claim the additional first-year depreciation deduction under section 168(k) for those types of property. Therefore, the Treasury Department and the IRS have determined that a corporate partner in a partnership that conducts a real property trade or business should be allowed to treat its share of the partnership's real property trade or business as an electing real property trade or business only if the partnership makes the election. However, see part X(A) of this Summary of Comments and Explanation of Revisions section regarding taxpayers that are eligible to make an election to be an electing real property trade or business but are not certain whether they are engaged in a trade or business under section 162.

XI. Comments on and Changes To Proposed § 1.163(j)–10: Allocation of Interest Expense, Interest Income, and Other Items of Expense and Gross Income to an Excepted Trade or Business.

Section 1.163(j)–10 provides rules for allocating tax items that are properly allocable to a trade or business between excepted trades or businesses and non-excepted trades or businesses for purposes of section 163(j). The following discussion addresses comments relating to proposed § 1.163(j)–10.

A. General Method of Allocation: Asset Basis

Proposed § 1.163(j)–10(c) sets forth the general rule for allocating interest expense and interest income between excepted and non-excepted trades or businesses. Under this general rule, interest expense and interest income is allocated between excepted and non-excepted trades or businesses based upon the relative amounts of the taxpayer's adjusted basis in the assets used in its trades or businesses. As noted in the preamble to the proposed regulations, this general method of allocation reflects the fact that money is fungible and the view that interest expense is attributable to all activities and property, regardless of any specific purpose for incurring an obligation on which interest is paid. Many commenters expressed support for this proposed allocation method.

However, some commenters argued that taxpayers should be permitted to allocate interest expense and income between excepted and non-excepted trades or businesses based on the earnings or gross income of each business, for various reasons. For example, some commenters posited that asset basis may bear little connection to a corporation's borrowing capacity, whereas earnings or revenue are useful indicators of a taxpayer's ability to meet its debt obligations, and earnings are a key factor in determining the amount of debt the taxpayer may borrow and the interest rate the taxpayer will be charged. These commenters also noted that an asset-basis allocation method could yield inconsistent results across industries (for example, industries whose asset mix is heavily skewed towards self-created intangibles will have low asset basis) or within similarly situated industries (if assets are purchased at different times). One commenter also suggested that an earnings-based approach would be easier for the IRS and taxpayers to administer because ATI already must be calculated by each taxpayer that is subject to a section 163(j) limitation.

Although the foregoing arguments have merit, adopting an earnings-based approach would raise many additional considerations, such as taxpayers' ability to time income recognition to affect allocation and create other distortions (as in the case of a trade or business that requires capital investment for a period of years before earning significant gross income). Thus, after further consideration, the Treasury Department and the IRS have decided to retain the asset-basis allocation approach contained in proposed § 1.163(j)–10(c). However, the Treasury Department and the IRS continue to study these comments and may provide future guidance on this issue.

B. Allocation Between Trades or Businesses and Non-Trades or Businesses

Proposed § 1.163(j)–10(a)(2)(i) coordinates the rules under proposed § 1.163(j)–10 with other Federal income tax rules. For example, proposed § 1.163(j)–10(a)(2)(i) provides that, before a taxpayer may determine the amount of interest expense, interest income, or other tax items that is properly allocable to excepted or non-excepted trades or businesses, the taxpayer first must apply § 1.163–8T to determine which tax items are allocable to non-trades or businesses rather than to trades or businesses. Some commenters recommended that non-corporate partners be permitted to allocate tax items between a trade or business and a non-trade or business based on an approach that looks to the earnings of the trade or business and non-trade or business. The commenters argued that an earnings-based approach to determining when debt is properly allocable between a trade or business and a non-trade or business is consistent with determining whether the earnings of a taxpayer can support the level of debt incurred.

After further consideration, the Treasury Department and the IRS have decided to retain the § 1.163–8T tracing approach contained in proposed § 1.163(j)–10(a)(2)(i). However, the Treasury Department and the IRS continue to study these comments and may provide future guidance on this issue. Additionally, the Treasury Department and the IRS are considering issuing additional guidance related to the allocation of interest expense by partnerships or S corporations. See proposed § 1.163–14 in the Concurrent NPRM.

Commenters also recommended that no allocation between business and nonbusiness interest expense be required when a partnership is wholly owned by corporate partners because a corporation can have only business interest income and expense and cannot have investment interest income and expense (see proposed § 1.163(j)–4(b)(3)(i)). The Treasury Department and the IRS have rejected this comment because the recommended approach is inconsistent with the entity approach taken with respect to partnerships in section 163(j)(4). Moreover, a separate rule for partnerships that are wholly owned by corporate partners is subject to manipulation because the partnership could alter the rules to which it is subject simply by admitting a non-corporate partner with a small economic interest in the partnership.

C. Consolidated Groups

1. Overview

As provided in proposed § 1.163(j)–10(a)(4)(i), the computations required by section 163(j) and the section 163(j) regulations generally are made for a consolidated group on a consolidated basis. Thus, for purposes of applying the allocation rules of proposed § 1.163(j)–10, all members of a consolidated group are treated as a single corporation. For example, the group (rather than a particular member) is treated as engaged in excepted or non-excepted trades or businesses. Moreover, intercompany transactions (as defined in § 1.1502–13(b)(1)(i)) are disregarded for purposes of these allocation rules, and property is not treated as used in a trade or business to the extent the use of such property in that trade or business derives from an intercompany transaction. Additionally, stock of a member that is owned by another member of the same consolidated group is not treated as an asset for purposes of § 1.163(j)–10, and the transfer of any amount of member stock to a non-member is treated by the group as a transfer of the member's assets proportionate to the amount of member stock transferred.

After a consolidated group has determined the percentage of the group's interest expense allocable to excepted trades or businesses for the taxable year, this exempt percentage is applied to the interest paid or accrued by each member during the taxable year to any lender that is not a group member. Thus, except to the extent proposed § 1.163(j)–10(d) (providing rules for direct allocation in certain limited circumstances) applies, the same percentage of interest paid or accrued by each member to a lender that is not a member is treated as allocable to excepted trades or businesses, regardless of whether any particular member actually engaged in an excepted trade or business.

2. Intercompany Transactions

Commenters observed that ignoring all intercompany transactions and intercompany obligations for purposes of proposed § 1.163(j)–10 is theoretically simple and generally furthers the single-entity approach adopted elsewhere in the proposed regulations. However, a commenter recommended that taxpayers be permitted to take into account basis from certain intercompany transactions, so long as adequate safeguards are put in place against abuse (for example, to prevent taxpayers from using intercompany transactions to increase the consolidated group's ATI or to shift asset basis to excepted trades or businesses), in order to reduce the administrative burden of tracking asset basis separately for purposes of section 163(j). The commenter also recommended that the Treasury Department and the IRS reconsider whether, in certain circumstances, items from intercompany transactions (other than business interest expense and business interest income) should affect the amount of the consolidated group's ATI.

The Treasury Department and the IRS acknowledge that the approach in proposed § 1.163(j)–10(a)(4)(i) creates an administrative burden for members of consolidated groups. However, this approach is consistent with § 1.1502–13, the stated purpose of which is to prevent intercompany transactions from creating, accelerating, avoiding, or deferring consolidated taxable income or consolidated tax liability (see § 1.1502–13(a)(1)). Allowing tax items from intercompany transactions to affect the calculation of a consolidated group's tentative taxable income and ATI would be inconsistent with the single-entity principles of § 1.1502–13(a). Moreover, taxpayers already must track asset basis information for purposes of § 1.1502–13. Additionally, giving effect to intercompany transactions for purposes of section 163(j) would create other administrative burdens for consolidated group members. See the discussion in part V(B) of this Summary of Comments and Explanation of Revisions section. Thus, the final regulations continue to disregard intercompany transactions for purposes of the allocation rules in proposed § 1.163(j)–10.

3. Use of Property Derives From an Intercompany Transaction

A commenter observed that the meaning of the phrase ''property is not treated as used in a trade or business to the extent the use of such property derives from an intercompany transaction'' is unclear. For example, one member of a consolidated group (S) leases property to another member of the group (B), which uses the property in its trade or business. B's lease with S entitles B to use the property. Should B's use of the property in its trade or business be disregarded for purposes of proposed § 1.163(j)–10 because such use ''derives from an intercompany transaction''?

The Treasury Department and the IRS did not intend for B's use of the property in the foregoing scenario to be disregarded for purposes of the allocation rules in proposed § 1.163(j)–10. If S and B were treated as disregarded entities owned by the same corporation, the lease would be ignored, and the leased property would be treated as an asset used in B's trade or business. The final regulations clarify proposed § 1.163(j)–10(a)(4)(i) to better reflect this intended result.

The commenter also requested confirmation that the same allocation principle applies to third-party costs incurred by members of the group (in other words, that such costs are allocated based on the use of assets in excepted or non-excepted trades or businesses). However, proposed § 1.163(j)–10(b)(5) already provides special rules for the allocation of expenses other than interest expenses. Thus, the final regulations do not adopt this recommendation.

4. Purchase of Member Stock From a Nonmember

A commenter recommended that a purchase by one consolidated group member (S) of stock of another member (or of an entity that becomes a member as a result of the purchase) (in either case, T) from a non-member (X) be treated as a purchase of a proportionate amount of T's assets for purposes of proposed § 1.163(j)–10. Although the proposed regulations treat the transfer of the stock of a member to a non-member as a transfer of a proportionate amount of the member's assets, the proposed regulations do not expressly address the acquisition of the stock of a member (or of a corporation that becomes a member as a result of the acquisition). The commenter noted that, if such acquisitions are not treated as asset purchases, the amount of adjusted basis allocated to an excepted or non-excepted trade or business may differ significantly depending on whether S and T file a consolidated return.

For example, T (which is engaged solely in an excepted trade or business) has assets with a fair market value of $100x and $0 adjusted basis, and $0 liabilities. S (which is engaged solely in a non-excepted trade or business) has $100x adjusted basis in its assets. S purchases 100 percent of T's stock from X for $100x, and S and T do not file a consolidated tax return. As a result, S's stock in T is treated as an asset (under proposed § 1.163(j)–10(c)(5)(ii)(B)) with a basis of $100x. In contrast, if S and T were to file a consolidated return, S's stock in T would not be treated as an asset under proposed § 1.163(j)–10(a)(4). Moreover, it is unclear how much adjusted basis the group could take into account for purposes of the allocation rules. Would the group's adjusted basis in T's assets equal T's basis in its assets immediately before the acquisition (here, $0)? Or would all or some portion of the amount paid by S to acquire T's stock be taken into account? The commenter argued that S should have the same amount of adjusted basis in T's assets regardless of whether S and T file a consolidated return, and that there is no legislative history revealing congressional intent to treat members of a consolidated group and non-consolidated corporations differently in this regard. Thus, according to the commenter, S should be able to take into account the amount paid for its T stock for purposes of the allocation rules in proposed § 1.163(j)–10.

Although Congress did not expressly address this issue, Congress did make clear that the section 163(j) limitation applies at the consolidated group level (see H. Rept. 115–466, at 386 (2017)). Moreover, section 1502 provides broad authority for the Secretary of the Treasury to prescribe regulations to determine the tax liability of a consolidated group in a manner that clearly reflects the income tax liability of the group and that prevents the avoidance of tax liability. Consistent with legislative intent regarding section 163(j) and with the broad grant of authority under section 1502, the proposed regulations treat a consolidated group as a single corporation for purposes of the allocation rules of § 1.163(j)–10, and they disregard the stock of members for purposes of this section.

Additionally, the Treasury Department and the IRS have questions and concerns about treating the acquisition of stock of a member (or of an entity that becomes a member) as an asset sale. How would the purchase price be added to the group's basis in the member's assets, and how would the additional basis added to these assets be depreciated? Would this approach deem the transaction to be an asset acquisition for all Federal income tax purposes or just for purposes of section 163(j), and what complications would arise from treating the transaction as an asset purchase for purposes of section 163(j) but as a stock purchase for other purposes?

Due to concerns about these and other issues, the final regulations do not adopt the commenter's recommendation. However, the Treasury Department and the IRS continue to study the issue raised by the commenter and may address the issue in future guidance.

5. Inclusion of Income From Excepted Trades or Businesses in Consolidated ATI

A commenter noted that, because every member of a consolidated group is treated as engaged in every trade or business of the group for purposes of proposed § 1.163(j)–10, a member engaged solely in an excepted regulated utility trade or business that incurs interest expense related to its business activities will be subject to the section 163(j) limitation if other group members are engaged in non-excepted trades or businesses. The commenter suggested that this outcome is contrary to the policy rationale for the exception for regulated utility trades or businesses. The commenter further noted that the gross income of the excepted trade or business is not included in the group's ATI calculation, and that this outcome could produce anomalous results. The commenter thus recommended that a proportionate share of the gross income of the excepted trade or business be included as an adjustment to consolidated ATI.

The Treasury Department and the IRS do not agree that the results under proposed § 1.163(j)–10(a)(4) are inconsistent with congressional intent or lead to anomalous results. As noted in part XI(C)(4) of this Summary of Comments and Explanation of Revisions section, Congress expressly stated that the section 163(j) limitation applies at the consolidated group level. Thus, the treatment of a consolidated group as a single corporation, and the treatment of every member as engaged in every trade or business of the group, is consistent with congressional intent. Moreover, if the section 163(j) limitation were inapplicable to group members engaged in excepted trades or businesses, consolidated groups could readily avoid the section 163(j) limitation by concentrating their external borrowing in such members. Furthermore, although a portion of the interest expense of a member engaged solely in an excepted trade or business will be subject to the section 163(j) limitation if the group is otherwise engaged in non-excepted trades or businesses, a portion of the interest expense of a member engaged solely in a non-excepted trade or business will not be subject to the section 163(j) limitation if the group is otherwise engaged in excepted trades or businesses—and all of that member's income will factor into the group's ATI calculation. Finally, as the commenter acknowledged, section 163(j)(8)(A)(i) specifically excludes from the determination of ATI any item of income, gain, deduction, or loss that is allocable to an excepted trade or business.

For the foregoing reasons, the Treasury Department and the IRS have determined that no changes to the final regulations are needed with respect to this comment.

6. Engaging in Excepted or Non-Excepted Trades or Businesses as a ''Special Status''

One commenter suggested that the Treasury Department and the IRS consider whether engaging in an excepted trade or business should be treated as a ''special status'' under § 1.1502–13(c)(5) for purposes of applying the intercompany transaction rules of § 1.1502–13.

The intercompany transaction rules apply for purposes of redetermining and allocating attributes under § 1.1502–13(c)(1)(i) in order to reach a ''single entity'' answer under the matching rule of § 1.1502–13(c). For example, one member of a consolidated group is a dealer in securities under section 475 (dealer) and sells a security to a second member that is not a dealer; that second member then sells the security to a nonmember in a later year. The matching rule can apply to ensure that the taxable items of the two members harmonize with regard to timing and character in order to reach the same overall tax treatment that would be given to a single corporation whose two operating divisions engaged in those transactions. See § 1.1502–13(c)(7)(i), *Example 11.*

However, if one member has ''special status'' under § 1.1502–13(c)(5) but the other does not, then attributes of the item would not be redetermined under the matching rule. For example, if S (a bank to which section 582(c) applies) and B (a nonbank) are members of a consolidated group, and if S sells debt securities at a gain to B, the character of S's intercompany gain is ordinary (as required under section 582(c)), but the character of B's corresponding item is determined under § 1.1502–13(c)(1)(i) without the application of section 582(c). See § 1.1502–13(c)(5).

The ''special status'' rules of § 1.1502–13(c)(5) are applicable to entities, such as banks or insurance companies, that are subject to a separate set of Federal income tax rules. Although there are special tax rules for farming, real estate, and utilities, an entity engaged in such trades or businesses also may be engaged in other trades or businesses to which such special tax rules would not apply. Further, the entity's farming, real estate, or utility trade or business need not be its primary trade or business. Moreover, the treatment of excepted trades or businesses as a special status effectively would result in additional tracing of specific items for purposes of § 1.1502–13. As noted in the preamble to the proposed regulations, the Treasury Department and the IRS have decided not to apply a tracing regime to allocate interest expense and income between excepted and non-excepted trades or businesses. Thus, the final regulations do not treat engaging in an excepted trade or business as a special status.

D. Quarterly Asset Testing

Under proposed § 1.163(j)–10(c)(6), a taxpayer must determine the adjusted basis in its assets on a quarterly basis and average those amounts to determine the relative amounts of asset basis for its excepted and non-excepted trades or businesses for a taxable year. In the preamble to the proposed regulations, the Treasury Department and the IRS requested comments on the frequency of asset basis determinations required under proposed § 1.163(j)–10(c).

In response, commenters stated that this quarterly determination requirement is administratively burdensome, and that such a burden is unwarranted because, in many circumstances, measuring asset basis less frequently would produce similar results. Thus, commenters recommended that taxpayers be permitted to allocate asset basis for a taxable year based on the average of adjusted asset basis at the beginning and end of the year. As a result, the ''determination date'' would be the last day of the taxpayer's taxable year, and the ''determination period'' would begin on the first day of the taxpayer's taxable year and end on the last day of the year.

Several commenters recommended that this approach be modeled on the interest valuation provisions in § 1.861–9T(g)(2)(i). Under these rules, taxpayers generally must compute the value of assets based on an average of asset values at the beginning and end of the year. However, if a ''substantial distortion'' of asset values would result from this approach (for example, if there is a major acquisition or disposition), the taxpayer must use a different method of asset valuation that more clearly reflects the average value of assets.

Other commenters suggested that their proposed approach could be limited to cases in which there is no more than a de minimis change in asset basis between the beginning and end of the taxable year. For example, this approach could be available for a taxable year only if the taxpayer demonstrates that its total adjusted basis (as measured in accordance with the rules in proposed § 1.163(j)–10(c)(5)) at the end of the year in its assets used in its excepted trades or businesses, as a percentage of the taxpayer's total adjusted basis at the end of such year in all of its assets used in a trade or business, does not differ by more than 10 percent from such percentage at the beginning of the year.

The Treasury Department and the IRS acknowledge that determining asset basis on a quarterly basis would impose an administrative burden. The Treasury Department and the IRS also agree with commenters that a safeguard is needed to account for episodic events, such as acquisitions, dispositions, or changes in business, that could affect average values. Thus, the final regulations permit a taxpayer to compute asset basis in its excepted and non-excepted trades or businesses by averaging asset basis at the beginning and end of the year, so long as the taxpayer falls under a 20 percent de minimis threshold.

E. De Minimis Rules

1. Overview

The proposed regulations provide a number of de minimis rules to simplify the application of § 1.163(j)–10. For example, proposed § 1.163(j)–10(c)(3)(iii)(C)(*3*) provides that a utility trade or business is treated entirely as an excepted regulated utility trade or business if more than 90 percent of the items described in proposed § 1.163(j)–1(b)(15) are furnished or sold at rates qualifying for the excepted regulated utility trade or business exception. Proposed § 1.163(j)–10(c)(3)(iii)(B)(*2*) provides that, if 90 percent or more of the basis in an asset would be allocated under proposed § 1.163(j)–10(c)(3) to either excepted or non-excepted trades or businesses, then the entire basis in the asset is allocated to either excepted or non-excepted trades or businesses, respectively. In turn, proposed § 1.163(j)–10(c)(1)(ii) provides that, if 90 percent or more of a taxpayer's basis in its assets is allocated under proposed § 1.163(j)–10(c) to either excepted or non-excepted trades or businesses, then all of the taxpayer's interest expense and interest income are allocated to either excepted or non-excepted trades or businesses, respectively.

2. Order in Which the De Minimis Rules Apply

A commenter recommended that these de minimis rules be applied in the order in which they are listed in the foregoing paragraph. In other words, a taxpayer first should determine the extent to which its utility businesses are excepted regulated utility trades or businesses. The taxpayer then should determine the extent to which the basis of any assets used in both excepted and non-excepted trades or businesses should be wholly allocated to either excepted or non-excepted trades or businesses. Only then should the taxpayer determine whether all of its interest expense and interest income should be wholly allocated to either excepted or non-excepted trades or businesses. The Treasury Department and the IRS agree that the order recommended by the commenter is the most reasonable application of these de minimis rules, and the final regulations adopt language confirming this ordering.

3. Mandatory Application of De Minimis Rules

Commenters also requested that the final regulations continue to mandate the application of the foregoing de minimis rules rather than make such de minimis rules elective. The commenters expressed concern that creating an election to use the de minimis rules in § 1.163(j)–10(c)(1) and (3) would create uncertainty for taxpayers, and they argued that mandatory application of the de minimis rules would simplify the rules for taxpayers. The Treasury Department and the IRS agree that mandatory application of the de minimis rules simplifies the application of § 1.163(j)–10 and eases the burdens of compliance and administration. Therefore, the final regulations continue to mandate the application of the de minimis rules in § 1.163(j)–10(c)(1) and (3).

4. De Minimis Threshold for Electric Cooperatives

A commenter requested that the de minimis threshold for utilities in proposed § 1.163(j)–10(c)(3)(iii)(C)(*3*) be lowered from 90 percent to 85 percent for electric cooperatives. The commenter argued that a different threshold is appropriate for electric cooperatives because, under section 501(c)(12), 85 percent or more of an electric cooperative's income (with adjustments) must consist of amounts collected from members for the sole purpose of meeting losses and expenses in order for the cooperative to be exempt from Federal income tax.

The Treasury Department and the IRS have determined that the final regulations should provide the same de minimis threshold for electric cooperatives as for other utility trades or businesses. The 85 percent threshold under section 501(c)(12) measures a cooperative's income, with adjustments that are specific to section 501. Moreover, an electric cooperative is not required to qualify for tax exemption under section 501(c)(12) to be engaged in an excepted regulated utility trade or business. Therefore, the Treasury Department and the IRS have determined that the nexus between section 501(c)(12) and proposed § 1.163(j)–10 is insufficient to justify lowering the utility de minimis threshold to 85 percent for electric cooperatives, and the final regulations do not incorporate the commenter's suggestion.

5. Standardization of 90 Percent De Minimis Tests

The terminology used in the 90 percent de minimis tests in proposed § 1.163(j)–10 is not consistent. For example, proposed § 1.163(j)–10(c)(3)(iii)(C)(*3*) uses a ''more than 90 percent'' standard, whereas proposed § 1.163(j)–10(c)(3)(iii)(B)(*2*) uses a ''90 percent or more'' standard. For the sake of consistency, and in order to minimize confusion, the final regulations standardize the language used in these tests.

6. Overlapping De Minimis Tests

In addition to the de minimis tests previously described in this part XI(E) of the Summary of Comments and Explanation of Revisions section, proposed § 1.163(j)–10(c)(3)(iii)(B)(*1*) also contains another de minimis rule. Under this rule, if at least 90 percent of gross income generated by an asset during a determination period is with respect to either excepted or non-excepted trades or businesses, then the entire basis in the asset is allocated to either excepted or non-excepted trades or businesses, respectively.

The Treasury Department and the IRS have determined that this rule not only overlaps with, but also may yield results inconsistent with, the de minimis rule in § 1.163(j)–10(c)(3)(iii)(B)(*2*). Thus, the final regulations eliminate the de minimis rule in proposed § 1.163(j)–10(c)(3)(iii)(B)(*1*).

F. Assets Used in More Than One Trade or Business

1. Overview

Proposed § 1.163(j)–10(c)(3) contains special rules for allocating basis in assets used in more than one trade or business. In general, if an asset is used in more than one trade or business during a determination period, the taxpayer's adjusted basis in the asset must be allocated to each trade or business using one of three permissible methodologies, depending on which methodology most reasonably reflects the use of the asset in each trade or business during that determination period. These three methodologies are: (i) The relative amounts of gross income that an asset generates, has generated, or may reasonably be expected to generate, within the meaning of § 1.861–9T(g)(3), with respect to the trades or businesses; (ii) if the asset is land or an inherently permanent structure, the relative amounts of physical space used by the trades or businesses; and (iii) if the trades or businesses generate the same unit of output, the relative amounts of output of those trades or businesses. However, taxpayers must use the relative output methodology to allocate the basis of assets used in both excepted and non-excepted utility trades or businesses.

As described in part XI(E)(1) of this Summary of Comments and Explanation of Revisions section, a taxpayer's allocation of basis in assets used in more than one trade or business is subject to several de minimis rules (see proposed § 1.163(j)–10(c)(3)(iii)).

2. Consistency Requirement

A commenter requested clarification that the consistency requirement in proposed § 1.163(j)–10(c)(3)(iii)(A) does not require a taxpayer to use a single methodology for different categories of assets, because a methodology that is reasonable for one type of asset (for example, office buildings) may not be reasonable for another (for example, intangibles). The Treasury Department and the IRS agree with this comment, and the final regulations have been clarified accordingly.

3. Changing a Taxpayer's Allocation Methodology

The Treasury Department and the IRS have determined that requiring taxpayers to obtain consent from the Commissioner to change their allocation methodology would impose an undue burden. Thus, the final regulations permit a taxpayer to change its allocation methodology after a period of five taxable years without obtaining consent from the Commissioner. A taxpayer that seeks to change its allocation methodology more frequently must obtain consent from the Commissioner.

The Treasury Department and the IRS also have determined that an allocation methodology is not a method of accounting because there is no guarantee that a taxpayer will be able to deduct a disallowed business interest expense carryforward in future taxable years (as a result, there could be a permanent disallowance). See the discussion in part III(A) of this Summary of Comments and Explanation of Revisions section.

4. Mandatory Use of Relative Output for Utility Trades or Businesses

A commenter requested that the final regulations allow electric cooperatives to use methodologies other than relative output to allocate the basis of assets used in both excepted and non-excepted utility trades or businesses. The commenter noted that alternative methods, such as allocations based on dollars of sales (or sales less the cost of sales), have been allowed by the IRS in the context of allocating expenses between patronage and non-patronage sales. The commenter also stated that economic realities facing electric cooperatives operating on a not-for-profit basis would not be accurately reflected by a relative output methodology.

The Treasury Department and the IRS have concluded that relative output most reasonably reflects the use of assets in excepted and non-excepted utility trades or businesses because § 1.163(j)–1(b)(15)(i)(A) divides utility businesses into excepted regulated utility trades or businesses and non-excepted utility businesses on the same basis. To the extent that items described in § 1.163(j)–1(b)(15)(i)(A) are sold at rates described in § 1.163(j)–1(b)(15)(i)(B), and to the extent that the trade or business is an electing regulated utility trade or business under § 1.163(j)–1(b)(15)(iii), a utility trade or business is an excepted trade or business. The Treasury Department and the IRS do not agree that the final regulations should apply one methodology for differentiating excepted and non-excepted utility trades or businesses under § 1.163(j)–1 and a different methodology to determine the allocation of an asset's basis between such businesses. Therefore, the final regulations do not incorporate the commenter's suggestion.

Another commenter recommended that the rule mandating the use of relative output for the allocation of asset basis under proposed § 1.163(j)–10(c)(3)(iii)(C)(*2*) not be used either to allocate assets used exclusively in excepted or non-excepted utility trades or businesses or to apply the de minimis test of proposed § 1.163(j)–10(c)(1)(ii).

The special rule in proposed § 1.163(j)–10(c)(3)(iii)(C)(*2*) mandates the use of relative output only for the purpose of allocating the basis of assets used in both excepted and non-excepted utility trades or businesses. Therefore, the rule does not mandate the use of relative output to allocate the basis of an asset that is used solely in either an excepted regulated utility trade or business or a non-excepted utility trade or business, except to the extent the de minimis rule in proposed § 1.163(j)–10(c)(3)(iii)(C)(*3*) treats a taxpayer's entire trade or business as either an excepted trade or business or a non-excepted trade or business. The language proposed by the commenter still subjects assets to the de minimis rule in proposed § 1.163(j)–10(c)(3)(iii)(C)(*3*). Because the proposed regulations achieve the result requested by the commenter, the final regulations do not adopt the recommended change.

The de minimis rule in proposed § 1.163(j)–10(c)(1)(ii) applies only after the basis of assets has been allocated between excepted and non-excepted trades or businesses. This de minimis rule treats all of a taxpayer's trades or businesses as either excepted or non-excepted trades or businesses based on such allocation. Because the rule of proposed § 1.163(j)–10(c)(1)(ii) does not apply the methodologies listed in proposed § 1.163(j)–10(c)(3), including the relative output methodology, no change to the proposed regulations is necessary to achieve the result requested by the commenter with respect to proposed § 1.163(j)–10(c)(1)(ii).

G. Exclusions From Basis Calculations

For purposes of allocating interest expense and interest income under the asset-basis allocation method in proposed § 1.163(j)–10(c), a taxpayer's basis in certain types of assets generally is not taken into account. These assets include cash and cash equivalents (see proposed § 1.163(j)–10(c)(5)(iii)). As noted in the preamble to the proposed regulations, this rule is intended to discourage taxpayers from moving cash to excepted trades or businesses to increase the amount of asset basis therein. In the preamble to the proposed regulations, the Treasury Department and the IRS requested comments on this special rule, including whether any exceptions should apply (such as for working capital).

In response, commenters recommended that working capital be included in the basis allocation determination, along with collateral that secures derivatives that hedge business assets and liabilities within the meaning of § 1.1221–2.

The Treasury Department and the IRS have concluded that the inclusion of working capital in the basis allocation determination could lead to frequent disputes between taxpayers and the IRS over the amount of cash that comprises ''working capital'' and the allocation of such amount between and among a taxpayer's excepted and non-excepted trades or businesses. Thus, the final regulations do not adopt this recommendation.

The Treasury Department and the IRS also have concluded that the inclusion of collateral that secures derivatives that hedge business assets and liabilities within the meaning of § 1.1221–2 could lead to frequent disputes between taxpayers and the IRS for reasons similar to those for working capital. For example, it is not always clear which business asset or liability is being hedged, especially in the case of an aggregate hedging transaction. In addition, taxpayers could use this rule as a planning opportunity for purposes of allocating the collateral to excepted trades or businesses. Thus, the final regulations also do not adopt this recommendation.

H. Look-Through Rules

1. Ownership Thresholds; Direct and Indirect Ownership Interests

Proposed § 1.163(j)–10(c)(5)(ii) provides, in part, that if a taxpayer owns an interest in a partnership or stock in a corporation that is not a member of the taxpayer's consolidated group, the partnership interest or stock is treated as an asset of the taxpayer for purposes of the allocation rules of proposed § 1.163(j)–10.

For purposes of allocating a partner's basis in its partnership interest between excepted and non-excepted trades or businesses under proposed § 1.163(j)–10, the partner generally may look through to its share of the partnership's basis in the partnership's assets (with certain modifications and limitations) regardless of the extent of the partner's ownership interest in the partnership. However, the partner must apply this look-through rule if its direct and indirect interest in the partnership is greater than or equal to 80 percent. Similar rules apply to shareholders of S corporations. See proposed § 1.163(j)–10(c)(5)(ii)(A)(*2*)(*i*) and (c)(5)(ii)(B)(*3*)(*ii*).

For purposes of allocating a shareholder's stock basis between excepted and non-excepted trades or businesses, a shareholder of a domestic non-consolidated C corporation or a CFC also must look through to the assets of the corporation if the shareholder's direct and indirect interest therein satisfies the ownership requirements of section 1504(a)(2). Shareholders of domestic non-consolidated C corporations and CFCs may not look through their stock in such corporations if they do not satisfy this ownership threshold. See proposed § 1.163(j)–10(c)(5)(ii)(B)(*2*)(*i*) and (c)(7)(i)(A).

If a shareholder receives a dividend that is not investment income, and if the shareholder looks through to the assets of the payor corporation under proposed § 1.163(j)–10(c)(5)(ii) for the taxable year, the shareholder also must look through to the activities of the payor corporation to allocate the dividend between the shareholder's excepted and non-excepted trades or businesses. See proposed § 1.163(j)–10(b)(3) and (c)(7)(i)(B).

Commenters recommended that taxpayers be afforded greater flexibility to look through their stock in domestic non-consolidated C corporations and CFCs. For example, one commenter suggested that the look-through threshold for CFCs be lowered to 50 percent (analogous to the look-through threshold for related CFCs in section 954(c)(6)). Another commenter recommended that a taxpayer be allowed to look through its stock in a domestic non-consolidated C corporation if the taxpayer owns at least 80 percent of such stock by value, regardless of whether the taxpayer also owns 80 percent of such stock by vote. Yet another commenter recommended that a taxpayer be allowed to look through its stock in a domestic non-consolidated C corporation (or be allowed to allocate its entire basis in such stock to an excepted trade or business) if (i) the taxpayer and the C corporation are engaged in the same excepted trade or business, and (ii) the taxpayer either (A) owns at least 50 percent of the stock of the C corporation, or (B) owns at least 20 percent of the stock of the C corporation and exercises a significant degree of control over the corporation's trade or business. Another commenter recommended that the ownership threshold for looking through domestic non-consolidated C corporations and CFCs be eliminated entirely so that interest expense paid or accrued on debt incurred to finance the acquisition of a real estate business is exempt from the section 163(j) limitation (if the business qualifies for and makes an election under proposed § 1.163(j)–9), regardless of whether that business is held directly or through a subsidiary.

The Treasury Department and the IRS have determined that a de minimis ownership threshold is appropriate for domestic non-consolidated C corporations and CFCs because, unlike a partnership, a corporation generally is respected as an entity separate from its owner(s) for tax purposes. See, for example, *Moline Properties* v. *Commissioner,* 319 U.S. 436 (1943). The look-through rule for non-consolidated C corporations provides a limited exception to this general rule. Moreover, unlike S corporations, domestic C corporations are not taxed as flow-through entities. Thus, the final regulations retain an 80 percent ownership threshold for looking through a domestic non-consolidated C corporation or a CFC.

However, the final regulations permit a taxpayer to look through its stock in a domestic non-consolidated C corporation or a CFC if the taxpayer owns at least 80 percent of such stock by value, regardless of whether the taxpayer also owns at least 80 percent of such stock by vote. Corresponding changes have been made to the look-through rule for dividends.

Additionally, the final regulations permit a shareholder that meets the ownership requirements for looking through the stock of a domestic non-consolidated C corporation (determined without applying the constructive ownership rules of section 318(a)) to look through to such shareholder's pro rata share of the C corporation's basis in its assets for purposes of § 1.163(j)–10(c) (asset basis look-through approach). If a shareholder applies the asset basis look-through approach, it must do so for all domestic non-consolidated C corporations for which the shareholder is eligible to use this approach, and it must continue to use the asset basis look-through approach in all future taxable years in which the shareholder is eligible to use this approach.

Commenters also asked for clarification as to the meaning of an ''indirect'' interest for purposes of these look-through rules. For example, commenters asked what the term ''indirect'' means in the context of the look-through rule for dividends. Commenters further noted that, because section 1504(a)(2) does not contain constructive ownership rules, there is uncertainty as to when a shareholder's indirect ownership in a corporation is counted for purposes of the ownership requirement in the look-through rule. Commenters also requested specific constructive ownership rules, as well as examples to illustrate the application of the ''direct or indirect'' ownership threshold.

The Treasury Department and the IRS have determined that, for purposes of applying the ownership thresholds in § 1.163(j)–10(c)(5)(ii)(B)(*2*)(*i*), (c)(5)(ii)(B)(*3*)(*ii*), and (c)(7)(i)(A) to shareholders of domestic non-consolidated C corporations, CFCs, and S corporations, as applicable, the constructive ownership rules of section 318(a) should apply. For example, assume A, B, and C are all non-consolidated C corporations; A wholly and directly owns B; A and B each directly own 50 percent of C; A and B both conduct a non-excepted trade or business; and C conducts an excepted trade or business. Under section 318(a)(2)(C), A is considered to own the stock owned by B. As a result, A is considered to own 100 percent of the stock of C, and the look-through rule of proposed § 1.163(j)–10(c)(5)(ii)(B)(*2*)(*i*) and (c)(7)(i)(A) applies to A's stock in C. Thus, although the Treasury Department and the IRS have determined that the ownership threshold for non-consolidated C corporations should remain at 80 percent, the constructive ownership rules of section 318 will broaden the availability of the look-through rules to shareholders of such corporations.

In contrast, the Treasury Department and the IRS have determined that the constructive ownership rules of section 318(a) should not apply for purposes of applying the ownership threshold in proposed § 1.163(j)–10(b)(3) and (c)(7)(i)(B) to the receipt of dividends from domestic C corporations and CFCs because dividends are not paid to indirect shareholders. To avoid confusion in this regard, the final regulations remove the word ''indirect'' from the ownership threshold for the dividend look-through rule.

2. Application of Look-Through Rules to Partnerships

i. In General

For purposes of proposed § 1.163(j)–10(c), a partnership interest is treated as an asset of the partner. Pursuant to proposed § 1.163(j)–10(c)(5)(ii)(A)(*1*), the partner's adjusted basis in its partnership interest is reduced, but not below zero, by the partner's share of partnership liabilities as determined under section 752 (section 752 basis reduction rule). Pursuant to proposed § 1.163(j)–10(c)(5)(ii)(A)(*2*)(*iii*), a partner other than a C corporation or tax-exempt corporation must further reduce its adjusted basis in its partnership interest by its share of the tax basis of partnership assets that is not properly allocable to a trade or business (investment asset basis reduction rule).

As noted in part XI(H)(1) of this Summary of Comments and Explanation of Revisions section, a partner may determine what portion of its adjusted tax basis in a partnership interest is attributable to an excepted or non-excepted trade or business by reference to its share of the partnership's basis in the partnership's assets (look-through rule). Under proposed § 1.163(j)–10(c)(5)(ii)(A)(*2*)(*i*), a partner generally may choose whether to apply the look-through rule without regard to its ownership percentage, with two exceptions. First, if a partner's direct or indirect interest in a partnership is greater than or equal to 80 percent of the partnership's capital or profits, the partner must apply the look-through rule. Second, if the partnership is eligible for the small business exemption under section 163(j)(3) and proposed § 1.163(j)–2(d)(1), a partner may not apply the look-through rule.

Proposed § 1.163(j)–10(c)(5)(ii)(A)(*2*)(*ii*) provides that if, after applying the investment asset basis reduction rule, at least 90 percent of a partner's share of a partnership's basis in its assets (including adjustments under sections 734(b) and 743(b)) is allocable to either excepted or non-excepted trades or businesses, the partner's entire basis in its partnership interest is treated as allocable to such excepted or non-excepted trades or businesses.

Pursuant to proposed § 1.163(j)–10(c)(5)(ii)(A)(*2*)(*iv*), if a partner, other than a C corporation or a tax-exempt corporation, does not apply the look-through rule, the partner generally will treat its basis in the partnership interest as either an asset held for investment or a non-excepted trade or business asset as determined under section 163(d).

ii. Coordination of Look-Through Rule and Basis Determination Rules

Outside of the partnership context, proposed § 1.163(j)–10(c)(5)(i) provides rules regarding the computation of adjusted basis for purposes of allocating business interest expense between excepted and non-excepted trades or businesses (collectively, the ''basis determination rules''). For example, proposed § 1.163(j)–10(c)(5)(i)(A) generally provides that the adjusted basis of non-depreciable property other than land is the adjusted basis of the asset used for determining gain or loss from the sale or other disposition of that asset as provided in § 1.1011–1, and proposed § 1.163(j)–10(c)(5)(i)(C) generally provides that the adjusted basis of land and inherently permanent structures is its unadjusted basis. For purposes of applying the look-through rule, the Treasury Department and the IRS intended the basis determination rules to require adjustments to the partnership's basis in its assets and the partner's basis in its partnership interest to the extent of the partner's share of any adjustments to the basis of the partnership's assets. Accordingly, the final regulations explicitly provide that such is the case.

Multiple commenters noted that the proposed regulations do not specify whether a partner that does not apply the look-through rule should use the adjusted tax basis in its partnership interest or should adjust its tax basis to reflect what its basis would be if the partnership applied the basis determination rules to its assets. Because all partnerships are not subject to section 163(j) and cannot provide all partners with the information necessary to adjust the tax basis of their partnership interests consistent with the basis determination rules, the Treasury Department and the IRS have determined that the basis determination rules should not apply to the basis of a partnership interest if a partner does not apply the look-through rule.

iii. Applying the Look-Through Rule and Determining Share of Partnership Basis

Proposed § 1.163(j)–10(c)(5)(ii)(A)(*2*)(*i*) provides that, for purposes of the look-through rule, a partner's share of a partnership's assets is determined using a reasonable method, taking into account special allocations under section 704(b), adjustments under sections 734(b) and 743(b), and direct adjustments relating to assets subject to qualified nonrecourse indebtedness under proposed § 1.163(j)–10(d)(4). Commenters argued that this language does not provide adequate guidance regarding how a partner should determine its share of the tax basis of a specific partnership asset when applying the look-through rule. The commenters stated that, by indicating that sections 743(b) and 704(b) should be taken into account, the proposed regulations imply that a partner's share of the partnership's basis in an asset is determined by reference to the future depreciation deductions that a partner would be allocated with regard to such asset or the amount of basis to be taken into account by that partner in determining its allocable share of gain or loss on the partnership's disposition of the asset. The commenters also requested that final regulations address whether and how allocations under section 704(c) affect a partner's share of the partnership's basis in its assets. After further consideration, the Treasury Department and the IRS have decided to retain the rule in proposed § 1.163(j)–10(c)(5)(ii)(A)(*2*)(*i*).

iv. Investment Asset Basis Reduction Rule

Under proposed § 1.163(j)–10(c)(5)(ii)(A)(*2*)(*iii*), for purposes of applying the investment asset basis reduction rule, a partner's share of a partnership's assets is determined under a reasonable method, taking into account special allocations under section 704(b). A commenter recommended clarifying whether the investment asset basis reduction should be made in accordance with a partner's share of the partnership's actual adjusted basis in an asset or in accordance with the partner's share of the partnership's basis in an asset as determined pursuant to the basis determination rules. The commenter further recommended that the approach adopted on this issue should be consistent with the approach adopted for purposes of determining a partner's adjusted basis in its partnership interest.

The Treasury Department and the IRS agree that these two rules should be applied consistently. After further consideration, the Treasury Department and the IRS have decided to retain the rule that allows a partner's share of a partnership's investment assets to be determined using a reasonable method, taking into account special allocations under section 704(b). However, if a partner elects to apply the look-through rule, then the partner also must apply the basis determination rules. If a partner elects not to apply, or is precluded from applying, the look-through rule, then the approach the partner uses for purposes of the investment asset basis reduction rule must be consistent with the approach the partner uses to determine the partner's adjusted basis in its partnership interest.

v. Coordination of Section 752 Basis Reduction Rule and Investment Asset Basis Reduction Rule

Multiple commenters noted that the combined effect of the section 752 basis reduction rule and the investment asset basis reduction rule could require a partner, other than a C corporation or a tax-exempt corporation, in a partnership that holds investment assets funded by partnership liabilities to reduce the adjusted tax basis of its partnership interest twice—once for the partnership's basis in its investment assets, and a second time for the liabilities that funded their purchase. The Treasury Department and the IRS have determined that this result would be inappropriate. Accordingly, the final regulations amend the investment asset basis reduction rule by providing that, with respect to a partner other than a C corporation or tax-exempt corporation, the partner's adjusted basis in its partnership interest is decreased by the partner's share of the excess of (a) the partnership's asset basis with respect to those assets over (b) the partnership's debt that is traced to such assets in accordance with § 1.163–8T. In order to neutralize the effect of any cost recovery deductions associated with a partnership's investment assets funded by partnership liabilities (for example, non-trade or business property held for the production of income), the final regulations also amend the investment asset basis reduction rule by providing that, with respect to a partner other than a C corporation or tax-exempt corporation, the partner's adjusted basis in its partnership interest is increased by the partner's share of the excess of (a) the partnership's debt that is traced to such assets in accordance with § 1.163–8T over (b) the partnership's asset basis with respect to those assets.

vi. Allocating Basis in a Partnership Interest Between Excepted and Non-Excepted Trades or Businesses

A commenter requested explicit confirmation that, under the look-through rule, a partner allocates the basis of its partnership interest between excepted and non-excepted trades or businesses in the same proportion as the partner's share of the partnership's adjusted tax basis in its trade or business assets is allocated between excepted and non-excepted trades or businesses. The final regulations explicitly state that this is the rule.

Commenters also stated that the proposed regulations do not address how a partner should allocate business interest expense and business interest income under proposed § 1.163(j)–10(c) to the extent the partner (i) has zero basis in all partnership interests for purposes of section 163(j), and (ii) owns no other trade or business assets. The Treasury Department and the IRS have determined that these facts would be rare, particularly given the adjustments to partnership basis provided for in § 1.163(j)–10. Therefore, the final regulations do not include a rule addressing this fact pattern. However, the Treasury Department and the IRS request comments on how frequently this fact pattern would occur and how best to address such a situation.

3. Additional Limitation on Application of Look-Through Rules to C Corporations

A commenter noted that the look-through rules may be distortive if an individual (A) that is directly engaged in a trade or business also owns stock in a C corporation (with its own trade or business) that satisfies the section 1504(a)(2) ownership requirements. A's interest expense that is attributable to A's investment in the C corporation under § 1.163–8T retains its character as investment interest expense. Moreover, if A also has business interest expense, the allocation of that expense between excepted and non-excepted trades or businesses would appear to take into account A's investment in the C corporation on a look-through basis as well. Thus, A's shares in the C corporation may be double-counted insofar as they affect the character of both the directly attributable investment interest expense and the unrelated business interest expense.

To address the possible distortive effects of the look-through rules when applied to stock of a non-consolidated C corporation that is held as an investment, the final regulations provide that the look-through rule in § 1.163(j)–10(c)(5)(ii)(B)(*2*)(*i*) is available only if dividends paid on the stock would not be included in the taxpayer's investment income under section 163(d)(4)(B). Because corporations cannot have investment income under section 163(d)(4)(B), this additional requirement does not otherwise affect their ability to look-through the stock of a non-consolidated C corporation.

4. Dispositions of Stock in Non-Consolidated C Corporations

Under proposed § 1.163(j)–10(b)(4)(i), if a shareholder recognizes gain or loss upon the disposition of its stock in a non-consolidated C corporation, if such stock is not property held for investment, and if the taxpayer looks through to the assets of the C corporation under proposed § 1.163(j)–10(c)(5)(ii)(B), then the taxpayer must allocate gain or loss from the stock disposition to excepted or non-excepted trades or businesses based upon the relative amounts of the corporation's adjusted basis in the assets used in its trades or businesses. This rule is analogous to the look-through rule for dividends in proposed § 1.163(j)–10(b)(3).

However, the dividend look-through rule also provides that, if at least 90 percent of the payor corporation's adjusted basis in its assets during the taxable year is allocable to either excepted or non-excepted trades or businesses, then all of the taxpayer's dividend income from the payor corporation for the taxable year is treated as allocable to excepted or non-excepted trades or businesses, respectively. Commenters asked why the rule regarding the disposition of non-consolidated C corporation stock is not subject to a 90 percent de minimis rule analogous to the rule for dividends.

The Treasury Department and the IRS have determined that the rule regarding the disposition of stock in a non-consolidated C corporation (including a CFC) should be subject to a 90 percent de minimis rule. The final regulations have modified proposed § 1.163(j)–10(b)(4)(i) accordingly.

5. Application of Look-Through Rules to Small Businesses

Under proposed § 1.163(j)–10(c)(5)(ii)(D), a taxpayer may not apply the look-through rules in proposed § 1.163(j)–10(b)(3) and (c)(5)(ii)(A), (B), and (C) to an entity that is eligible for the small business exemption. As described in the preamble to the proposed regulations, the Treasury Department and the IRS determined that these look-through rules should not be available in these cases because of the administrative burden that would be imposed on small businesses from collecting and providing information to their shareholders or partners regarding inside asset basis when those small businesses are themselves exempt from the application of section 163(j). The preamble to the proposed regulations also provides that a taxpayer that is eligible for the small business exemption may not make an election under proposed § 1.163(j)–9.

Commenters requested that entities that qualify for the small business exemption be allowed to make an election under proposed § 1.163(j)–9, and that such an electing entity's shareholders or partners be permitted to apply the look-through rules. Absent such a rule, shareholders and partners of a small business entity that conducts an excepted trade or business could be worse off than shareholders and partners of a larger entity (ineligible for the small business exemption) that conducts an excepted trade or business.

As noted in part X(A) of this Summary of Comments and Explanation of Revisions section, the Treasury Department and the IRS have determined that entities eligible for the small business exemption should be permitted to make a protective election under proposed § 1.163(j)–9. Accordingly, the final regulations also allow taxpayers to apply the look-through rules to entities that qualify for the small business exemption and that make a protective election under proposed § 1.163(j)–9.

6. Application of the Look-Through Rules to Foreign Utilities

Section 163(j)(7)(A)(iv) does not treat utilities that are exclusively regulated by foreign regulators (and not by a State government, a political subdivision of a State government, an agency or instrumentality of the United States, or the governing or ratemaking body of a domestic electric cooperative) (foreign-regulated utility) as excepted trades or businesses. As a result, under the interest allocation rules of proposed § 1.163(j)–10(c), a U.S. corporation that looks through to the assets of a CFC that operates a foreign-regulated utility must allocate its entire basis in its CFC stock to a non-excepted trade or business, even if all of the CFC's operating assets are used in a foreign-regulated utility business. Moreover, if the U.S. corporation has significant basis in its CFC stock, a significant portion of the U.S. corporation's business interest expense will be subject to the section

163(j) limitation, even if the U.S. corporation is solely or primarily engaged in an excepted utility trade or business.

A commenter noted that, if the U.S. corporation does not have sufficient income from non-excepted trades or businesses, the corporation might never be able to deduct its disallowed business interest expense. The commenter thus recommended that stock in a CFC engaged in a foreign-regulated utility trade or business be treated as having zero basis for purposes of the interest allocation rules in proposed § 1.163(j)–10(c).

The final regulations do not adopt the commenter's recommendation. However, the Treasury Department and the IRS have determined that, if a taxpayer applies the look-through rule to a CFC, the taxpayer may allocate its basis in its CFC stock to an excepted trade or business to the extent the CFC is engaged in either (i) an excepted trade or business, or (ii) a foreign-regulated utility trade or business that would be treated as an excepted trade or business if the utility meets certain requirements related to regulation by a foreign government. The final regulations have been modified accordingly. See § 1.163(j)–10(c)(5)(ii)(C)(*2*).

I. Deemed Asset Sale

Proposed § 1.163(j)–10(c)(5)(iv) provides that, solely for purposes of determining the amount of basis allocable to excepted and non-excepted trades or businesses under proposed § 1.163(j)–10(c), an election under section 336, 338, or 754, as applicable, is deemed to have been made for any acquisition of corporate stock or partnership interests with respect to which the taxpayer demonstrates to the satisfaction of the Commissioner that the taxpayer was eligible to make an election but was actually or effectively precluded from doing so by a regulatory agency with respect to an excepted regulated utility trade or business. As explained in the preamble to the proposed regulations, this deemed asset sale rule is intended to place taxpayers that are actually or effectively precluded from making an election under section 336, section 338, or section 754 on the same footing for purposes of the basis allocation rules in proposed § 1.163(j)–10(c) as taxpayers that are not subject to such limitations.

Commenters pointed out that, as a practical matter, a basis step-up election generally cannot be made if the acquired entity has a regulatory liability for deferred taxes on its books because, in that case, the election may cause customer bills to increase. In other words, deferred tax liabilities typically lower a utility's rate base (which is used to compute the rates charged to customers). An election under section 336, section 338, or section 754 would eliminate this deferred tax liability, thereby increasing the rate base and potentially increasing the rates charged to customers. As a result, regulatory agencies frequently do not approve a basis step-up election made in connection with the sale or purchase of a regulated utility. Commenters argued that even broaching the possibility of such a basis step-up could create concerns for the regulatory agency regarding a proposed acquisition. Commenters also queried how taxpayers that do not raise this issue with the regulatory agency can ''demonstrate'' that they were ''effectively precluded'' by the agency from making the election. In short, commenters claimed that the ''demonstration'' requirement in proposed § 1.163(j)–10(c)(5)(iv) would be impractical, result in unnecessary requests to regulatory agencies, lead to controversy, create uncertainty, and limit the effectiveness of this provision.

To address the foregoing concerns, the final regulations provide that a taxpayer that acquired or acquires an interest in a regulated entity should be deemed to have made an election to step up the tax basis of the assets of the acquired entity if the taxpayer can demonstrate that (a) the acquisition qualified for an election under section 336, 338, or 754, and (b) immediately before the acquisition, the acquired entity had a regulatory liability for deferred taxes on its books with respect to property predominantly used in an excepted regulated utility trade or business.

J. Carryforwards of Disallowed Disqualified Interest

Proposed § 1.163(j)–1(b)(10) defines the term ''disallowed disqualified interest'' to mean interest expense, including carryforwards, for which a deduction was disallowed under old section 163(j) in the taxpayer's last taxable year beginning before January 1, 2018, and that was carried forward under old section 163(j). Under the proposed regulations, disallowed disqualified interest that is properly allocable to a non-excepted trade or business is subject to the section 163(j) limitation as a disallowed business interest expense carryforward. See proposed §§ 1.163(j)–2(c)(1) and 1.163(j)–11(b)(1). In the preamble to the proposed regulations, the Treasury Department and the IRS requested comments as to how the allocation rules in proposed § 1.163(j)–10 should apply to disallowed disqualified interest.

Commenters recommended several possible approaches to allocating disallowed disqualified interest between excepted and non-excepted trades or businesses. Under one approach (historical approach), a taxpayer would apply the allocation rules of proposed § 1.163(j)–10 to disallowed disqualified interest in the taxable year in which such interest expense was incurred. Although this approach would be consistent with the allocation rules for other business interest expense, it likely would be administratively burdensome for many taxpayers because such interest expense may have been incurred years (if not decades) ago.

Under another approach (effective date approach), a taxpayer would apply the allocation rules of proposed § 1.163(j)–10 to disallowed disqualified interest in the taxpayer's first taxable year beginning after December 31, 2017, as if the disallowed disqualified interest expense were incurred in that year. Although this approach would be less administratively burdensome than the historical approach, it might not accurately represent the taxpayer's circumstances in the year(s) in which the disallowed disqualified interest actually was incurred.

Under a third approach, taxpayers would be permitted to use any reasonable method to allocate disallowed disqualified interest between excepted and non-excepted trades or businesses, provided the method is applied consistently to disallowed disqualified interest that arose in the same taxable year. This approach also might include the effective date approach as a safe harbor. However, this approach could prove to be administratively burdensome for the IRS.

To reduce the administrative burden for both taxpayers and the IRS, the final regulations permit taxpayers to use either the historical approach or the effective date approach.

A commenter also pointed out that proposed § 1.163(j)–11(b)(1) could be construed as permitting only disallowed disqualified interest that is properly allocable to a non-excepted trade or business to be carried forward to the taxpayer's first taxable year beginning after December 31, 2017. The commenter requested confirmation that disallowed disqualified interest that is properly allocable to an excepted trade or business also is carried forward. The final regulations confirm this point. See § 1.163(j)–11(c)(1).

K. Anti-Abuse Rule

Proposed § 1.163(j)–10(c)(8) provides an anti-abuse rule to discourage taxpayers from manipulating the allocation of business interest expense and business interest income between non-excepted and excepted trades or businesses. Pursuant to this provision, if a principal purpose for the acquisition, disposition, or change in use of an asset was to artificially shift the amount of basis allocable to excepted or non-excepted trades or businesses on a determination date, the additional basis or change in use is not taken into account for purposes of § 1.163(j)–10.

A commenter expressed support for this rule but suggested that the final regulations eliminate the ''principal purpose'' standard and rely instead on a rule based on asset acquisitions, dispositions, or changes in use that do not have ''a substantial business purpose.''

The Treasury Department and the IRS have determined that using ''a substantial business purpose'' as the threshold for applying the anti-abuse rule would limit the effectiveness of this rule because taxpayers generally would be able to provide an ostensible business purpose for the acquisition, disposition, or transfer of an asset. Thus, the anti-abuse rule in the final regulations retains the ''principal purpose'' standard.

L. Direct Allocation

1. Overview

As previously noted, proposed § 1.163(j)–10(c) generally requires interest expense and interest income to be allocated between excepted and non-excepted trades or businesses according to the relative amounts of basis in the assets used in such trades or businesses. However, proposed § 1.163(j)–10(d) contains several exceptions to this general rule.

First, a taxpayer with qualified nonrecourse indebtedness is required to directly allocate interest expense from such indebtedness to the taxpayer's assets in the manner and to the extent provided in § 1.861–10T(b) (see proposed § 1.163(j)–10(d)(1)). Section 1.861–10T(b) defines the term ''qualified nonrecourse indebtedness'' to mean any borrowing (other than borrowings excluded by § 1.861–10T(b)(4)) that satisfies certain requirements, including the requirements that (i) the creditor can look only to the identified property (or any lease or other interest therein) as security for payment of the principal and interest on the loan, and (ii) the cash flow from the property is reasonably expected to be sufficient to fulfill the terms and conditions of the loan agreement. For these purposes, the term ''cash flow from the property'' does not include revenue if a significant portion thereof is derived from activities such as sales or the use of other property. Thus, revenue derived from the sale or lease of inventory or similar property, including plant or equipment used in the manufacture and sale or lease, or purchase and sale or lease, of such inventory or similar property, does not constitute cash flow from the property. See § 1.861–10T(b)(3)(i).

Second, a taxpayer that is engaged in the trade or business of banking, insurance, financing, or a similar business is required to directly allocate interest expense and interest income from such business to the taxpayer's assets used in that business (see proposed § 1.163(j)–10(d)(2)).

Additionally, for purposes of the general allocation rule in proposed § 1.163(j)–10(c), taxpayers are required to reduce their asset basis by the entire amount of the basis in the assets to which interest expense is directly allocated pursuant to proposed § 1.163(j)–10(d)(1) or (2). See proposed § 1.163(j)–10(d)(4).

2. Expansion of the Direct Allocation Rule

Some commenters recommended that the direct allocation rule in proposed § 1.163(j)–10(d) be applied in circumstances other than those set forth in proposed § 1.163(j)–10(d)(1) and (2). For example, a commenter queried whether a borrowing could be considered qualified nonrecourse indebtedness for purposes of proposed § 1.163(j)–10(d) even if the loan document doesn't require the creditor to look exclusively to an asset as security for payment of principal and interest on a loan (as required by § 1.861–10T(b)(2)(iii)). Other commenters asked that direct allocation be applied to debt directly incurred by an excepted regulated utility trade or business. These commenters argued that, because such debt must be approved by a regulatory agency and relates directly to the underlying needs of that trade or business, such debt should be viewed as ''properly allocable'' to that trade or business. Moreover, they claimed that the definition of ''qualified nonrecourse indebtedness'' in § 1.861–10T(b) is too narrow to include either debt directly incurred by an excepted regulated utility trade or business or debt incurred to purchase stock of a corporation or interests in a partnership primarily engaged in an excepted regulated utility trade or business.

In contrast, other commenters supported the decision to limit the availability of tracing to the limited circumstances in proposed § 1.163(j)–10(d).

As noted in part XI(L)(1) of this Summary of Comments and Explanation of Revisions section, a borrowing is not considered qualified nonrecourse indebtedness under § 1.861–10T(b) unless the creditor can look only to the identified property (or any interest therein) as security for the loan. By definition, the creditor on a non-recourse loan may not seek to recover the borrower's other assets; in other words, the creditor has no further recourse. The Treasury Department and the IRS decline to expand the exception in proposed § 1.163(j)–10(d)(1) to include unsecured debt because, by definition, such debt is supported by all of the assets of the borrower.

The Treasury Department and the IRS also have determined that the definition of qualified nonrecourse indebtedness should not be expanded to encompass indebtedness incurred to acquire stock or partnership interests in an entity primarily engaged in an excepted trade or business because such an approach is akin to tracing. As noted in the preamble to the proposed regulations, money is fungible, and the Treasury Department and the IRS have determined that a tracing regime would be inappropriate, with limited exceptions. The Treasury Department and the IRS have determined that the definition of qualified nonrecourse indebtedness should not be expanded to encompass all indebtedness directly incurred by regulated utility trades or businesses, for similar reasons.

However, the Treasury Department and the IRS appreciate that it is difficult for utility trades or businesses to avail themselves of the direct allocation rule in proposed § 1.163(j)–10(d)(1) given the definition of qualified nonrecourse debt in § 1.861–10T(b). In particular, the Treasury Department and the IRS understand that the exclusion of inventory revenue from the calculation of ''cash flow from the property'' effectively precludes many utilities from using direct allocation under proposed § 1.163(j)–10(d)(1). Thus, solely for purposes of the allocation rules in proposed § 1.163(j)–10, the final regulations create an exception to the definition of qualified nonrecourse indebtedness in § 1.861–10T(b) to allow for the inclusion of revenue from the sale or lease of inventory for utility trades or businesses.

Another commenter recommended that, for taxpayers engaged in excepted regulated utility trades or businesses, the basis in certain grants and contributions in aid of construction should be directly allocated to non-excepted trades or businesses if the costs have not been taken into account by a regulatory body in determining the cost of the utility's service for ratemaking purposes. As discussed in part II of this Summary of Comments and Explanation of Revisions section, the final regulations do not require the rates for the sale or furnishing of utility items to be established or approved on a cost of service and rate of return basis in order for a utility trade or business to qualify as an excepted regulated utility trade or business. Without such a requirement, the Treasury Department and the IRS do not find a significant nexus between a regulatory body's determination of a utility trade or business's cost of service and the allocation of the basis in grants and contributions in aid of construction. Therefore, the final regulations do not adopt the commenter's recommendation.

3. Basis Reduction Requirement for Qualified Nonrecourse Indebtedness

Commenters noted that, as drafted, the basis reduction requirement in proposed § 1.163(j)–10(d)(4) would lead to inappropriate results for assets that are acquired using both equity financing and qualified nonrecourse indebtedness (or using both recourse and nonrecourse indebtedness) because this requirement would remove asset basis that was not financed by qualified nonrecourse indebtedness.

Commenters also observed that this requirement could lead to significant distortions because a small amount of qualified nonrecourse indebtedness would cause an entire property to be removed from a taxpayer's basis allocation computation. For example, assume a taxpayer has (i) $500,000 of unsecured debt, (ii) property used in an excepted trade or business with a basis of $10 million and $100,000 of qualified nonrecourse indebtedness (Asset A), and (iii) a non-excepted trade or business whose assets have a basis of $1 million. Under proposed § 1.163(j)–10(d)(4), Asset A would be entirely excluded from the basis allocation computation in proposed § 1.163(j)–10(c). As a result, all interest expense on the $500,000 of unsecured debt would be subject to the section 163(j) limitation.

Commenters further noted that taxpayers could take advantage of this basis adjustment rule to minimize the application of section 163(j). In other words, taxpayers could incur a relatively small amount of nonrecourse debt to acquire assets used in non-excepted trades or businesses, thereby reducing the amount of asset basis allocated to such trades or businesses for purposes of the general allocation rule in proposed § 1.163(j)–10(c).

To eliminate these distortions and inappropriate results, commenters recommended that basis in the assets securing qualified nonrecourse indebtedness be reduced (but not below zero) for purposes of the general allocation rule solely by the amount of such qualified nonrecourse indebtedness. The Treasury Department and the IRS agree with this recommendation, and the final regulations have been modified accordingly.

4. Direct Allocation Rule for Financial Services Businesses

Commenters asked for clarification of the direct allocation rule for financial services entities in proposed § 1.163(j)–10(d)(2). For example, commenters noted that, because the definition in § 1.904–4(e)(2) includes income from certain services (including investment advisory services), this rule may apply to taxpayers that are not doing much actual financing, and commenters queried whether the direct allocation rule should apply to such taxpayers. Commenters also asked whether proposed § 1.163(j)–10(d)(2) is intended to cover all of a bank's activities or only part of them and, if the answer is the latter, whether a bank must bifurcate its activities for purposes of proposed § 1.163(j)–10.

Commenters also questioned the basis reduction rule in proposed § 1.163(j)–10(d)(4) for financial services businesses. Commenters noted that, unlike the case of qualified nonrecourse indebtedness, it may not be possible to trace all interest expense related to a financial services business to specific assets. Moreover, requiring a taxpayer to fully eliminate its basis in the assets of a financial services business under proposed § 1.163(j)–10(d)(4) could be distortive because the taxpayer's general debt obligations likely support at least some portion of the taxpayer's financial services business assets.

Given the uncertainty surrounding the proper scope of the direct allocation rule for financial services businesses in proposed § 1.163(j)–10(d)(2) and the proper application of the basis reduction rule to such businesses in proposed § 1.163(j)–10(d)(4), the Treasury Department and the IRS have decided to remove proposed § 1.163(j)–10(d)(2). To ensure that financial services entities are not unduly affected by the rule (in proposed § 1.163(j)–10(c)(5)(iii)) that excludes cash and cash equivalents from the general asset basis allocation rule in proposed § 1.163(j)–10(c), the final regulations have retained the exception in proposed § 1.163(j)–10(c)(5)(iii) for financial services entities.

XII. Comments on Proposed Changes to § 1.382–2: General Rules for Ownership Change

As described in the preamble to the proposed regulations, section 382(k)(1) provides that, for purposes of section 382, the term ''loss corporation'' includes a corporation entitled to use a carryforward of disallowed interest described in section 381(c)(20), which refers to carryovers of disallowed business interest described in section 163(j)(2). Section 163(j)(2) permits business interest expense for which a deduction is disallowed under section 163(j)(1) to be carried forward to the succeeding taxable year.

In turn, section 382(d)(3) provides that the term ''pre-change loss'' includes disallowed business interest expense carryforwards ''under rules similar to the rules'' in section 382(d)(1). Section 382(d)(1) treats as a ''pre-change loss'' both (i) net operating loss carryforwards to the taxable year in which the change date occurs (change year), and (ii) the net operating loss carryforward for the change year to the extent such loss is allocable to the pre-change period.

Proposed changes to § 1.382–2 clarified that a ''pre-change loss'' includes the portion of any disallowed business interest expense of the old loss corporation paid or accrued in the taxable year of the testing date that is attributable to the pre-change period, and that a ''loss corporation'' includes a corporation that is entitled to use a carryforward of such a disallowed business interest expense.

Commenters noted that, viewed in isolation, section 382(k)(1) would not appear to apply to a corporation that has only a current-year disallowed business interest expense. Some commenters also claimed that the inclusion of current-year disallowed business interest expense in the definition of a ''loss corporation'' is inconsistent with the statutory language of section 382(k)(1).

The Treasury Department and the IRS have determined that section 382 should apply to current-year disallowed business interest expense (to the extent such expense is allocable to the pre-change period) because this approach is consistent with the statutory treatment of NOLs. See section 382(k)(1) (providing, in part, that the term ''loss corporation'' means a corporation ''having a net operating loss for the taxable year in which the ownership change occurs''). Moreover, as a policy matter, current-year attributes that relate to the period before an ownership change should be subject to section 382. The exclusion of these items would permit trafficking in losses, which is contrary to the stated policy underlying section 382 of preventing ''exploit[ation] by persons other than those who incurred the loss.'' H. Rept. 83–1337, at 42 (1954). Thus, no changes to the final regulations have been made in response to these comments. However, the final regulations revise the definition of a ''section 382 disallowed business interest carryforward'' (which includes both disallowed business interest expense carryforwards and current-year disallowed business interest expense allocable to the pre-change period) in § 1.382–2(a)(7) to reflect changes to the allocation rules discussed in part XIII of this Summary of Comments and Explanation of Revisions section.

XIII. Comments on Proposed Changes to § 1.382–6: Allocation of Income and Loss to Periods Before and After the Change Date for Purposes of Section 382

Section 1.382–6 provides rules for the allocation of income and loss to periods before and after the change date for purposes of section 382. Section 1.382–6(a) generally provides that a loss corporation must allocate its net operating loss or taxable income, and its net capital loss or modified capital gain net income, for the change year between the pre-change and post-change periods by ratably allocating an equal portion to each day in the year. Section 1.382–6(b), which contains an exception to this general rule, permits a loss corporation to elect to allocate the foregoing items for the change year between the pre-change and post-change periods as if the loss corporation's books were closed on the change date. Such an election does not terminate the loss corporation's taxable year as of the change date (in other words, the change year is still treated as a single tax year for Federal income tax purposes).

The proposed regulations revise § 1.382–6 to address the treatment of business interest expense. More specifically, the proposed regulations provide that, regardless of whether a loss corporation has made a closing-of-the-books election under § 1.382–6(b), the amount of the corporation's deduction for current-year business interest expense is calculated based on ratable allocation for purposes of calculating the corporation's taxable income attributable to the pre-change period.

Commenters objected to the mandatory use of ratable allocation for business interest expense in § 1.382–6. For example, commenters argued that this approach is distortive (and taxpayer-unfavorable) in situations in which the loss corporation incurs minimal interest expense in the pre-change period but makes highly leveraged acquisitions in the post-change period. Another commenter noted that this approach is distortive (and taxpayer-favorable) in situations in which the loss corporation incurs significant business interest expense in the pre-change period and allocates a portion of that expense to the post-change period. To avoid these distortions and complications, commenters recommended that a closing-of-the-books election also be allowed for business interest expense.

The Treasury Department and the IRS acknowledge that a ratable allocation approach may lead to distortions and administrative burdens in certain situations. Thus, the final regulations permit a loss corporation to allocate current-year business interest expense between the pre-change and post-change periods using the closing-of-the-books method set forth in § 1.382–6(b)(4) if the loss corporation makes a closing-of-the-books election under § 1.382–6(b). Section 1.382–6(b)(4) also provides correlative rules for the allocation of disallowed business interest expense carryforwards to the pre-change and post-change periods when a closing-of-the-books election is made. In turn, section 1.382–6(a)(2) clarifies the amount of business interest expense, disallowed business interest expense, and disallowed business interest expense carryforwards that are allocable to the pre-change and post-change periods if no closing-of-the-books election is made.

XIV. Comments on and Changes to Proposed § 1.383–1: Special Limitations on Certain Capital Losses and Excess Credits

Section 1.383–1(d) provides ordering rules for the utilization of pre-change losses and pre-change credits and for the absorption of the section 382 limitation and the section 383 credit limitation. Under proposed changes to § 1.383–1(d), a taxpayer's section 382 limitation would be absorbed by disallowed business interest expense carryforwards before being absorbed by NOLs. As described in the preamble to the proposed regulations, the Treasury Department and the IRS prioritized the use of disallowed business interest expense carryforwards over NOLs because ''taxpayers must calculate their current-year income or loss in order to determine whether and to what extent they can use an NOL in that year, and deductions for business interest expense, including carryforwards from prior taxable years, factor into the calculation of current-year income or loss.''

Although commenters described the foregoing ordering rule as understandable and fairly simple to administer, they noted that pre-2018 NOLs (unlike disallowed business interest expense carryforwards) have a limited carryforward period, and that such NOLs may expire without use as a result of this ordering rule. Commenters thus recommended allowing taxpayers to elect an alternative ordering rule with respect to pre-2018 NOLs.

The Treasury Department and the IRS have decided not to adopt this recommended approach, for several reasons. First, as commenters also noted, such an approach would add complexity. Second, as stated in the preamble to the proposed regulations, deductions for business interest expense (including disallowed business interest expense carryforwards) factor into the determination whether and to what extent a taxpayer can use an NOL in a taxable year. Thus, no changes have been made to proposed § 1.383–1(d) in the final regulations.

XV. Other Comments About Section 382

A. Application of Section 382(l)(5)

Section 382(l)(5) provides an exception to the general loss limitation rule under section 382(a) for an old loss corporation in Title 11 proceedings or in similar cases if the historic shareholders and creditors of such corporation own at least 50 percent of the stock of the new loss corporation as a result of being shareholders or creditors immediately before the ownership change. If this exception applies, the corporation's pre-change losses and excess credits that may be carried over to a post-change year must be ''computed as if no deduction was allowable under this chapter for the interest paid or accrued'' on debt converted into stock under Title 11 (or in a similar case) during the 3-year period preceding the year of the ownership change (change year) or during the pre-change period in the change year. Section 382(l)(5)(B). In other words, because the old loss corporation gets the benefit of treating certain creditors as shareholders for purposes of determining whether the corporation has undergone an ownership change within the meaning of section 382(g), the corporation must treat the debt held by such creditors as equity for Federal income tax purposes. As a result, the corporation must treat the interest payments as non-deductible distributions on equity.

As provided in proposed § 1.382–2, section 382 disallowed business interest carryforwards are pre-change losses. Because a deduction for such carryforwards is ''allowable'' in a future year, commenters asked whether such carryforwards must be recomputed under section 382(l)(5)(B).

The Treasury Department and the IRS have determined that no clarification of the rule is necessary. Because section 382 disallowed business interest carryforwards are pre-change losses, if a corporation has such a carryforward from any taxable year ending during the 3-year period preceding the change year (or during the pre-change period in the change year), and if section 382(l)(5) applies to an ownership change, the corporation must recompute the amount of such carryforwards as if the business interest expense that generated such carryforwards were not interest.

B. Application of Section 382(e)(3)

A commenter also recommended that the final regulations address the application of section 382(e)(3) to foreign corporations with section 382 disallowed business interest carryforwards. Section 382(e)(3) provides that, except as otherwise provided in regulations, only items treated as connected with the conduct of a U.S. trade or business are taken into account in determining the value of an old loss corporation that is a foreign corporation if an ownership change occurs. Thus, if a foreign corporation is not engaged in a U.S. trade or business, that corporation's section 382 limitation is zero. As a result, if a foreign corporation with no U.S. trade or business undergoes a section 382 ownership change, section 382(e)(3) appears to limit the corporation's section 382 disallowed business interest carryforwards to $0. The commenter described this result as onerous and unintended and recommended that, for purposes of applying section 382 to such carryforwards, a foreign corporation's value be treated as the total value of its stock.

The Treasury Department and the IRS are aware of this issue and other issues relating to the application of section 382 to CFCs. The Treasury Department and the IRS continue to study the application of section 382 to CFCs and may address this issue in future guidance. The Treasury Department and the IRS welcome further comments on the application of section 382 to CFCs.

C. Application of Section 382(h)(6)

As noted in the Background section, the September 2019 section 382 proposed regulations included a rule expressly providing that section 382 disallowed business interest carryforwards are not treated as RBILs, thus precluding a double detriment under section 382 with respect to such carryforwards. This conclusion might have been reached by application of the general anti-duplication principles reflected in the current regulations under section 382. See, for example, § 1.382–8(d) (regarding duplicative reductions in value of loss corporations). However, because of the complexity of this area, the Treasury Department and the IRS included the clarification to prevent possible confusion and to provide certainty to taxpayers that there is no double detriment with respect to section 382 disallowed business interest carryforwards. Although no formal comments were received on this rule during the comment period for the September 2019 section 382 proposed regulations, informal comments from practitioners active in the field have been uniformly positive and have confirmed that this rule is a welcome, taxpayer-beneficial addition to the regulations under section 382.

Due to the uncontroversial nature of this rule, the Treasury Department and the IRS have determined that finalization of this portion of the September 2019 section 382 proposed regulations is warranted at this time. The Treasury Department and the IRS continue to actively study the remainder of the rules in the September 2019 section 382 proposed regulations.

XVI. Definition of Real Property Trade or Business

Commenters suggested that the definition of a ''real property trade or business'' should be clarified to include all rental real estate, even if the rental real estate does not rise to the level of a section 162 trade or business. The Treasury Department and the IRS have determined that modifications to the rules in the proposed regulations are not necessary to make this point clear. Section 1.469–9(b)(1) provides that the definition of a ''trade or business'' (for purposes of section 469(c)(7)(C)) includes interests in rental real estate even if the rental real estate gives rise to deductions under section 212. The definition of real property trade or business in § 1.469–9(b)(2) (for purposes of section 469(c)(7)(C)) necessarily would encompass or include the definition of a trade or business as provided in § 1.469–9(b)(1). Accordingly, taxpayers engaged in rental real estate activities that do not necessarily rise to the level of a section 162 trade or business nevertheless will be treated as engaged in real property trades or businesses for purposes of section 469(c)(7)(C) (and section 163(j) by reference), and such taxpayers will be permitted to make the election for a trade or business to be an electing real property trade or business for purposes of section 163(j).

Commenters also requested clarification that a trade or business should not be required to have a direct nexus or relationship to rental real estate in order to qualify as a real property trade or business under section 469(c)(7)(C). The Treasury Department and the IRS agree that businesses involving real property construction, reconstruction, development, redevelopment, conversion, acquisition, or brokerage should not necessarily be required to have a direct nexus or relationship to rental real estate to be treated as a real property trade or business under section 469(c)(7)(C). The proposed regulations provide definitions for the terms ''real property management'' and ''real property operations'' while reserving the remaining nine terms in section 469(c)(7)(C) as undefined. The statement in the preamble to the proposed regulations regarding a nexus or relationship to rental real estate was intended as the rationale for the decision to limit the definition of the two terms to the management and operation of rental real estate. Without these limiting definitions, the Treasury Department and the IRS were concerned that these two terms could be read so broadly as to allow virtually any type of business to qualify as a real property trade or business. The other nine terms in section 469(c)(7)(C) currently remain undefined, although the Treasury Department and the IRS intend to issue additional guidance in the future to provide definitions for these terms.

The Treasury Department and the IRS generally agree with the observation that real property construction, reconstruction, development, redevelopment, conversion, acquisition, or brokerage businesses should not necessarily be required to have a direct nexus or relationship to rental real estate in order to be treated as real property trades or businesses. However, the expectation nevertheless remains that the end products or final objectives of such businesses should at least have the potential to be used as rental real estate or as integral components in rental real estate activities.

Several commenters requested clarification regarding whether timberlands will qualify as real property trades or businesses. The Treasury Department and the IRS have concluded that unharvested or unsevered timber clearly fall within the definition of ''real property'' as provided in the proposed regulations. The question is whether the activity of holding of timberlands falls within the definition of a ''real property trade or business.'' The Treasury Department and the IRS have concluded that the maintenance and management of timberlands generally does not meet the intended meaning of any of the eleven terms in section 469(c)(7)(C), and that the owners of timberlands were not intended recipients for relief from the per se passive rule for rental real estate when section 469(c)(7) originally was enacted. However, as set forth in the Concurrent NPRM, such activities might constitute the development of real estate within the meaning of section 469(c)(7)(C). See proposed § 1.469–9(b)(2)(ii)(A) and (B) contained in the Concurrent NPRM.

One commenter requested an example illustrating that the management or operation of a pipeline or transmission line will meet the definition of a real property trade or business. In addition, another commenter requested an example illustrating that the operation of a bridge, tunnel, toll road, or airport qualifies as a real property trade or business.

Although the Treasury Department and the IRS generally agree that the operation of a pipeline, bridge, tunnel, toll road, or airport may meet the definition of a real property trade or business under certain and specific facts and circumstances, the answers to these questions will remain dependent on the facts and circumstances of each case. The Treasury Department and the IRS expect that such examples generally will provide very limited guidance to most taxpayers because any such examples likely will be viewed as inapplicable for taxpayers with any differing facts and circumstances.

Additionally, one commenter recommended removing the reference to the term ''customers'' from the definitions of the terms ''real property management'' and ''real property operation'' because, in certain situations, the party paying for the use of the property or for other services may be a governmental agency providing services to the general public or for the public good. The Treasury Department and the IRS have determined that this modification is unnecessary because the term ''customer'' for this purpose is broad enough to include governmental entities.

One commenter also requested that the definition of a real property trade or business be revised to include broadband, street lighting, telephone poles, parking meters, and rolling stock. The Treasury Department and the IRS decline to revise the definition of real property trade or business in section 469(c)(7)(C) in this manner because the maintenance and management of these types of assets generally do not meet the intended meaning of any of the eleven terms in section 469(c)(7)(C), and the owners of such assets were not intended recipients for relief from the per se passive rule for rental real estate when section 469(c)(7) originally was enacted.

One commenter requested that the final regulations remove the last sentence in the definition of each of the terms ''real property management'' and ''real property operation.'' The commenter stated that these sentences create confusion regarding whether incidental services provided along with rental real estate will cause the business to fail to qualify as a real property trade or business. In response to this comment, the Treasury Department and the IRS have revised these sentences to clarify that incidental services, even if significant, do not disqualify a business as a real property trade or business.

Statement of Availability of IRS Documents

The IRS Notices, Revenue Rulings, and Revenue Procedures cited in this document are published in the Internal Revenue Bulletin (or Cumulative Bulletin) and are available from the Superintendent of Documents, U.S. Government Publishing Office, Washington, DC 20402, or by visiting the IRS website at *http://www.irs.gov.*

Special Analyses

I. Regulatory Planning and Review—Economic Analysis

Executive Orders 13771, 13563 and 12866 direct agencies to assess costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

The final regulations have been designated as subject to review under Executive Order 12866 pursuant to the Memorandum of Agreement (April 11, 2018) between the Treasury Department and the Office of Management and Budget (OMB) regarding review of tax regulations. OMB has designated this final regulation as economically significant under section 1(c) of the Memorandum of Agreement. Accordingly, the final regulations have been reviewed by OMB's Office of Information and Regulatory Affairs. For purposes of E.O. 13771 this rule is regulatory.

A. Need for the Final Regulations

The Tax Cuts and Jobs Act (TCJA) substantially modified the statutory rules of section 163(j) to limit the amount of net business interest expense that can be deducted in the current taxable year. As a result of those changes, a number of the relevant terms and necessary calculations that taxpayers are required to apply under the statute can benefit from greater specificity. The Treasury Department and the IRS issued proposed regulations related to section 163(j) on December 28, 2018 (proposed regulations). The comments to the proposed regulations demonstrate a variety of opinions on how to define terms and on how section 163(j) interacts with other sections of the Code and corresponding regulations.

Based on these considerations, the final regulations are needed to bring clarity to instances where the meaning of the statute was unclear and to respond to comments received on the proposed regulations. Among other benefits, the clarity provided by the final regulations generally helps ensure that all taxpayers calculate the business interest expense limitation in a similar manner.

B. Background and Overview

The TCJA substantially modified the statutory rules of section 163(j) to limit the amount of net business interest expense that can be deducted in the current taxable year of any taxpayer, with limited exceptions. As described in the preamble to the proposed regulations (83 FR 67490), section 163(j) prior to TCJA generally applied to domestic corporations with interest paid or accrued to related persons that were not subject to Federal income tax. With the enactment of TCJA, the amount allowed under section 163(j)(1) as a deduction for business interest expense is limited to the sum of (1) the taxpayer's business interest income for the taxable year; (2) 30 percent of the taxpayer's adjusted taxable income (ATI) for the taxable year; and (3) the taxpayer's floor plan financing interest expense for the taxable year. As described in the Background section earlier, the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) amended section 163(j) to provide special rules relating to the ATI limitation for taxable years beginning in 2019 or 2020. The section 163(j) limitation applies to all taxpayers, except for certain small businesses with average annual gross receipts of $25 million or less (adjusted for inflation) and certain trades or businesses. The excepted trades or businesses are the trade or business of providing services as an employee, electing real property businesses, electing farming businesses, and certain regulated utility businesses. Any amount of business interest not allowed as a deduction for any taxable year as a result of the limitation under section 163(j)(1) is carried forward and treated as business interest paid or accrued in the next taxable year under section 163(j)(2).

Congress modified section 163(j) under the TCJA, in part, out of concern that prior law treated debt-financed investment more favorably than equity-financed investment. According to Congress, this debt bias generally encouraged taxpayers to utilize more leverage than they would in the absence of the Code. Limiting the deduction of business interest is meant to reduce the relative favorability of debt and hence encourage a more efficient capital structure for firms. Congress also believed it necessary to apply the limit broadly across different types of taxpayers so as not to distort the choice of entity (see H.R. Rep. No. 115–409, at 247 (2017)).

C. Economic Analysis

1. Baseline

The Treasury Department and the IRS have assessed the economic effects of the final regulations relative to a no-action baseline reflecting anticipated Federal income tax-related behavior in the absence of these final regulations.

2. Summary of Economic Effects

The final regulations provide certainty and clarity to taxpayers regarding terms and calculations that are contained in section 163(j), which was substantially modified by TCJA. In the absence of this clarity, the likelihood that different taxpayers would interpret the rules regarding the deductibility of business interest expense differently would be exacerbated. In general, overall economic performance is enhanced when businesses face more uniform signals about tax treatment. Certainty and clarity over tax treatment also reduce compliance costs for taxpayers. For those situations where taxpayers would generally adopt similar interpretations of the statute even in the absence of guidance, the final regulations provide value by helping to ensure that those interpretations are consistent with the intent and purpose of the statute. For example, the final regulations may specify a tax treatment that few or no taxpayers would adopt in the absence of specific guidance but that nonetheless advances Congressional intent.

The Treasury Department and the IRS project that the final regulations will have an annual economic effect greater than $100 million ($2020). This determination is based on the substantial volume of business interest payments in the economy [2] and the general responsiveness of business investment to effective tax rates,[3] one component of which is the deductibility of interest expense. Based on these two magnitudes, even modest changes in the deductibility of interest payments (and in the certainty of that deductibility) provided by the final regulations, relative to the no-action baseline, can be expected to have annual effects greater than $100 million. This claim is particularly likely to hold for the first set of general 163(j) guidance that is promulgated following major legislation, such as TCJA.

The Treasury Department and the IRS have not undertaken more precise estimates of the economic effects of changes in business activity stemming from these final regulations. The Treasury Department and the IRS do not have readily available data or models that predict with reasonable precision the decisions that taxpayers would make under the final regulations versus alternative regulatory approaches, including the no-action baseline. Nor do they have readily available data or models that would measure with reasonable precision the loss or gain in economic surplus resulting from those business decisions relative to the decisions that would be made under an alternative regulatory approach. Such estimates would be necessary to quantify the economic effects of the final regulations versus alternative approaches.

In the absence of such quantitative estimates, the Treasury Department and the IRS have undertaken a qualitative analysis of the economic effects of the final regulations relative to the no-action baseline and relative to alternative regulatory approaches. This analysis is presented in the next two sections of this Special Analyses.

3. Economic Effects of Provisions Substantially Revised From the Proposed Regulations

a. Calculation of ATI

Similar to the proposed regulations, the final regulations prescribe various adjustments to the calculation of ATI to prevent double counting of deductions and to provide relief for particular types of taxpayers or taxpayers in particular circumstances to ensure that all taxpayers are treated equitably when calculating ATI. One of these adjustments prevents the double counting of depreciation deductions when a depreciable asset is sold (only relevant for depreciation deductions in taxable years beginning after December 31, 2017, and before January 1, 2022). Other adjustments apply to particular types of taxpayers, such as regulated investment companies (RICs), real estate investment trusts (REITs), or consolidated groups.

As an alternative, the Treasury Department and the IRS considered not providing such adjustments. Without such adjustments, however, certain taxpayers may be disadvantaged relative to otherwise similar taxpayers. For example, if RICs and REITs included the dividends paid deduction when calculating ATI, then these entities would almost always have ATI of zero or close to zero. This outcome would limit the ability of such taxpayers to ever deduct business interest expense for Federal income tax purposes even when their financing profile was similar to other entities that could deduct similar net business interest expense.

Based on calculations using the IRS's Statistics of Income (SOI) sample of corporate taxpayers for 2017, the Treasury Department and the IRS estimate that approximately $13.5 billion of net business interest expense is potentially affected by the dividends paid deduction adjustment to ATI provided to RICs and REITs in the final regulations. This net business interest expense is the amount of interest expense that is greater than interest income for RICs and REITs with gross receipts greater than $25 million.

The final regulations make one notable change compared to the proposed regulations regarding the ATI calculation for taxpayers that manufacture or produce inventory. Under the proposed regulations, the

[2] Interest deductions in tax year 2013 for corporations, partnerships, and sole proprietorships were approximately $800 billion.

[3] See E. Zwick and J. Mahon, ''Tax Policy and Heterogeneous Investment Behavior,'' at *American Economic Review* 2017, 107(1): 217–48 and articles cited therein.

amount of any depreciation, amortization, or depletion that is capitalized into inventory under section 263A during a taxable year beginning before January 1, 2022 was not added back to taxable income when calculating ATI for that taxable year. Under the final regulations, such amounts are added back to tentative taxable income, regardless of the period in which the capitalized amount is recovered through cost of goods sold.

Without the final regulations, a taxpayer with depreciation, amortization, or depletion expense that is subject to capitalization would have lower ATI (and potentially a higher tax liability due to smaller net interest deductions) than a similarly situated taxpayer with depreciation, amortization, or depletion expense that is not subject to capitalization. Thus, the effect of the final regulations for the calculation of ATI is to prevent economic distortions by having the net interest limitation apply more stringently for certain types of taxpayers than others. The final regulations achieve this outcome more effectively that alternative regulatory approaches, including the proposed regulations and the no-action baseline.

Number of Affected Taxpayers. The Treasury Department and the IRS estimate that roughly 61,000 entities are both (i) subject to calculating their section 163(j) net interest limitation and (ii) required by the Code to capitalize any expenses, including depreciation, amortization, or depletion expenses. This estimate is an upper bound estimate of the number of taxpayers potentially affected by the definition of ATI prescribed under the regulations because capitalized depreciation, amortization, or depletion expenses are not separately reported and this tax return item includes other types of capitalized expenses.

b. Definition of Interest

The statute limits the amount of deductible interest expense for a taxpayer but, as described in the Explanation of Provisions section of the proposed regulations, there are no generally applicable statutory provisions or regulations addressing when financial instruments are treated as debt for Federal income tax purposes or when a payment is counted as interest. While there are several places in the Code and regulations where interest expense or interest income is defined, such as in the regulations that allocate and apportion interest expense (§ 1.861–9T) and in the Subpart F regulations (§ 1.954–2), these rules only apply to particular taxpayers in particular situations.

The proposed regulations defined interest for the purpose of the section 163(j) limitation as (1) amounts associated with conventional debt instruments and amounts already treated as interest for all purposes under existing statutory provisions or regulations; (2) additional amounts that are functionally similar to interest but not currently labeled as interest under the Code, or amounts treated as interest for certain purposes, such as amounts described in §§ 1.861–9T and 1.954–2; and (3) any deductible expense or loss predominantly incurred in consideration of the time value of money as part of an anti-avoidance rule. Thus, the proposed regulations applied to interest associated with conventional debt instruments as well as generally to transactions that are indebtedness in substance even if not in form.

The Treasury Department and the IRS proposed this definition of interest, rather than leaving the term interest undefined for purposes of section 163(j). In the absence of this clarity, the likelihood that different taxpayers would reach different conclusions over whether a particular business expense was deductible business interest expense would be exacerbated. In general, overall economic performance is enhanced when businesses face more uniform signals about tax treatment. Another concern about not defining the term at all is that taxpayer uncertainty over whether certain transactions are considered interest could increase burdens to the IRS and taxpayers including with respect to disputes and litigation about whether particular payments are interest for section 163(j) purposes.

A further concern, over providing a narrower definition of interest, is that it could encourage taxpayers to engage in transactions that provide financing while generating deductions economically similar to interest but that were not defined as interest for the purposes of section 163(j). There are several reasons why curbing such taxpayer behavior would be beneficial. First, the ability of taxpayers to engage in such transactions is correlated with the size of the trade or business, with large businesses more likely to benefit from such avoidance strategies than small businesses. Second, when the deciding factor for using such transactions is the tax benefit of avoiding a section 163(j) limitation, then such transactions would impose more cost or risk on the taxpayer than using a traditional debt instrument. Engaging in such transactions is an inefficient use of resources. Third, such avoidance strategies may discourage taxpayers from shifting to a less leveraged capital structure, and thus would counteract the intention of the statute to reduce the prevalence of highly-leveraged firms and the probability of systemic financial distress. Fourth, greater use of financing outside of conventional debt instruments may make it more difficult for financial institutions to determine the overall level of leverage and credit risk of firms seeking financing, which may distort the allocation of capital across businesses away from firms and investments with less credit risk.

The final regulations prescribe a definition of interest that is similar to the definition of interest in the proposed regulations although with changes made in response to comments.[4] There are three general types of changes: (1) Changes are made to the proposed regulations that modify, and generally limit, to what extent certain amounts are included under the definition of interest for the purposes of section 163(j). (2) Several items deemed to be interest for the purpose of section 163(j) under proposed § 1.163(j)–1(b)(20)(iii) are not included in the final regulations. (3) The anti-avoidance rule in proposed § 1.163–1(b)(20)(iv) is modified to include a principal purpose test and now also applies to situations where a taxpayer seeks to artificially increase the amount of interest income.

To the extent that these changes narrow the definition of interest that is subject to the section 163(j) limitation relative to the proposed regulations, they are expected to (i) reduce the cost of financing for taxpayers, an effect that is expected to increase investment by these taxpayers, and (ii) increase the proportion of that financing that might generally be considered debt-financed. The first effect occurs because taxpayers can deduct without limitation costs from a larger set of financial instruments under the final regulations, relative to the proposed regulations. They will choose these instruments only if the cost of obtaining funds through those instruments is lower than what would have been available under the proposed regulations. By extension, this change lowers the overall cost of financing for taxpayers. A lower cost of financing is associated with greater investment by taxpayers, all other things equal. The second effect occurs because the larger set of financial instruments for which taxpayers can deduct expense without limitation (under the final regulations,

[4] The proposed regulations represent the regulatory alternative to which the final regulations are compared in the following analysis.

relative to the proposed regulations) generally consists of instruments that have a greater share of debt characteristics, rather than equity characteristics. To the extent that taxpayers use these instruments to a greater degree under the final regulations relative to the proposed regulations, the share of debt-financing will increase. Congress has generally expressed the view that excessive debt-financing may be a less efficient capital structure for firms. See Senate Budget Explanation of the Bill at 165.

Because the final regulations define interest based on the intent and purpose of the statute and generally treat similar taxpayers similarly and similar economic activity similarly, the Treasury Department and the IRS have determined that the net result under these final regulations is a more efficient allocation of capital across taxpayers relative to regulatory alternatives, within the context of the intent and purpose of the statute.

The Treasury Department and the IRS have not undertaken quantitative estimates of the change in the level or nature of economic activity arising from the final regulations relative to the proposed regulations due to limitations on available data, but to the extent possible has provided further below an estimate of the quantity of potentially affected taxpayers and volume of transactions. Consider, for example, the treatment of guaranteed payments for the use of capital provided by a partner to a partnership, a financial arrangement that has both equity and debt characteristics. The proposed regulations included guaranteed payments to capital in the definition of interest while the final regulations do not, except to the extent that they are covered by other provisions of the final regulations. The Treasury Department and the IRS have not undertaken quantitative estimates of this regulatory decision because we do not have readily available data or models to measure with sufficient precision: (i) The volume and nature of guaranteed payments to capital and other financial instruments that taxpayers might use if the final regulations were in effect; (ii) the volume and nature of guaranteed payments and other financial instruments that taxpayers might have used if the proposed regulations were in effect; and (iii) the types of economic activities that partnerships might undertake under these two financial portfolios. Regarding item (iii), the Treasury Department and the IRS do not have readily available data or models to predict how economic activity might differ under debt-financed versus equity-financed investment for the sets of instruments affected by these final regulations.

Compliance costs are also expected to be lower for those transactions that are not subject to the section 163(j) limitation under the final regulations and that would be subject to the limitation under the proposed regulations. Generally, this is because taxpayers would be less likely to need to calculate the section 163(j) limitation and less likely to need to track unused interest deductions that are carried forward to future tax years. For most taxpayers, this impact on compliance costs is expected to be relatively small. However, for certain taxpayers using hedging transactions, calculating the amount of interest associated with the transactions would be burdensome and not including such transactions in the definition of interest lowers compliance costs to a greater degree. The Treasury Department and the IRS have not estimated the reduction in compliance costs for these taxpayers (under the final regulations, relative to the proposed regulations) because we do not have data or models that are suitable for this estimation.

The specific changes made with regard to items (1), (2), and (3) are discussed in further detail here.

(1) The final regulations change (relative to the proposed regulations) how amounts from certain transactions will be considered interest for the purposes of section 163(j). There are two main forms of transactions that are affected:

Treatment of swaps. The proposed regulations treated a non-cleared swap with significant non-periodic payments as two separate transactions consisting of an on-market, level payment swap and a loan (the embedded loan rule).[5] The time value component associated with the embedded loan is recognized as interest expense to the payor and interest income to the recipient. The treatment of cleared swaps was not specified in the proposed regulations. The final regulations add two exceptions to the embedded loan rule. Specifically, the final regulations add exceptions for cleared swaps and for those non-cleared swaps that require the parties to meet the margin or collateral requirements of a federal regulator (or requirements that are substantially similar to a federal regulator). Relative to the proposed regulations this treatment will discourage taxpayers from using swaps that are unregulated and dissimilar to regulated swaps, because under the final regulations only such swaps will require the time value component associated with the embedded loan to be treated as interest. One reason for excepting both regulated and non-regulated collateralized swaps from the definition of interest is that the repayment risk of using such transactions is small, while the non-collateralized swaps are more risky as individual transactions and would be likely to contribute to the overall riskiness of the financial system.

Substitute interest payments. The proposed regulations provided that certain substitute interest payments will be treated as interest for the purposes of section 163(j).[6] The final regulations modify the treatment of substitute interest payments by only including such transactions as interest when the transaction is not part of the ordinary course of business of the taxpayer. The Treasury Department and the IRS have determined that the ordinary course rule in the final regulations provides an appropriate and effective limit on the treatment of substitute interest as interest for section 163(j) purposes. This change has the effect of reducing the amount of substitute interest payments that will be deemed interest for the purpose of section 163(j) relative to the proposed regulations.

For taxpayers that use substitute interest payments in the ordinary course of business, the final regulations may lower the after-tax cost of such transactions and such taxpayers are more likely to use transactions with substitute interest payments relative to the proposed regulations. The Treasury Department and the IRS do not have readily available data or models to estimate either (i) the change in financing arrangements, including both substitute interest payments and other financial instruments, that will be used by taxpayers under this provision of the final regulations relative to the proposed regulations, or (ii) the change in the volume or nature of economic activity by these taxpayers given these financing arrangements.

(2) The items removed by the final regulations from the definition of interest in the proposed regulations include debt issuance costs, guaranteed payments for the use of capital provided

[5] A cleared swap is a collateralized swap that was cleared by a derivatives clearing organization or by a clearing agency. A non-cleared swap is a swap that has not been so cleared.

[6] A substitute interest payment is a payment, made to the transferor of a security in a securities lending transaction or a sale-repurchase transaction, of an amount equivalent to an interest payment which the owner of the transferred security is entitled to receive during the term of the transaction. This provision applies to substitute interest payments as described in § 1.861–2(a)(7).

by a partner to a partnership, and hedging transactions.[7] Under the final regulations, these items can still be considered interest under the anti-avoidance rule. These items share some characteristics with interest, but comments received on the proposed regulations indicate there is not a consensus that such items should always be defined as interest. Removing these items from the definition of interest lowers compliance costs for taxpayers in some cases relative to the proposed regulations. However, not including these items in the definition of interest increases uncertainty regarding whether amounts from certain transactions will be treated as interest under the anti-avoidance rule, and more disputes are likely to arise between taxpayers and the IRS.

The final regulations do not include debt issuance costs, such as legal fees for document preparation, in the definition of interest. Debt issuance costs are usually small relative to total interest payments in a lending transaction and often the payments are made to a third-party who is not the lender. Hence, there is limited ability for taxpayers to be able to disguise interest payments as debt issuance costs. The primary effect of not including debt issuance costs in the definition of interest is to decrease the after-tax cost of debt financing.

The final regulations do not include hedging transactions in the definition of interest. Taxpayers could have multiple reasons for engaging in hedging transactions other than just to lower the amount of interest expense, such as a reduction in risk. Not including hedging transactions in the definition of interest should decrease administration and compliance costs compared to the treatment in the proposed regulations since it can be difficult to separate the time value component from the insurance aspects of a hedging transaction. Under the final regulations, taxpayers are more likely to use hedging relative to the proposed regulations due to the decline in compliance costs and due to the reduced after-tax cost of using hedges.

The final regulations do not include guaranteed payments in the definition of interest. Guaranteed payments for the use of capital provided by a partner to a partnership have both equity and debt characteristics. The partner who provided the capital is an owner of the business, but also receives payments that are similar to interest. Removing guaranteed payments from the definition of interest lowers the after-tax cost of such financing for some taxpayers and may lead these taxpayers to increase the fraction of financing through capital with guaranteed payments relative to other financial instruments. The Treasury Department and the IRS do not have readily available data or models to project the change in the volume or nature of businesses' economic activities that would arise as a consequence of this change in the tax treatment of guaranteed payments to capital, relative to the proposed regulations.

(3) The final regulations also modify the anti-avoidance rule found in proposed § 1.163–1(b)(20)(iv) relative to the proposed rule. One change is that the anti-avoidance rule not only applies to financing transactions used to avoid the classification of financing expense as interest expense, but also excludes transactions that artificially increase the taxpayer's interest income from being included as interest income. The final regulations also add a principal purpose condition to the anti-avoidance rule. That is, the anti-avoidance rule in the final regulations only applies to amounts where a principal purpose of the taxpayer for engaging in a transaction is to artificially reduce the amount of net business interest expense, whether this stems from a decrease in the amounts reported as interest expense or an increase in the amounts reported as interest income. This symmetric anti-avoidance rule adopted under the final regulations, applying to both interest income and interest expense, increases the number of transactions to which the rule could potentially apply compared to the proposed regulations. However, including a principal purpose test in the anti-avoidance rule will decrease how often the rule would potentially apply to transactions relative to the proposed rule.

The anti-avoidance rule is an important component of the definition of interest because it is difficult for the Treasury Department and the IRS to specifically categorize every type of transaction already in practice or to anticipate future innovations in financial transactions. Relative to regulatory alternatives, the anti-avoidance rule will help limit the ability of taxpayers to structure transactions in such a way that would allow deductible expenses that are economically similar to interest and frustrate the application of the statute. In summary, the definition of interest in the final regulations provides clarity to taxpayers and the IRS regarding which specific transactions and types of transactions generate interest subject to the section 163(j) limitation, which should lower compliance and administrative costs relative to providing no definition or a narrower definition of interest. The Treasury Department and the IRS further have determined that the definition of interest specified under the final regulations will encourage a more efficient allocation of capital and use of financing across taxpayers relative to the no-action baseline, within the context of the intent and purpose of the statute.

Number of Affected Taxpayers. The Treasury Department and the IRS estimate that the number of partnerships potentially affected by the change in treatment to guaranteed payments for the use of capital provided by a partner to a partnership is 6,000. This is the number of partnerships in tax year 2017 with more than $25 million in gross receipts that also report paying deductible guaranteed payments. The amount of total guaranteed payments reported by these partnerships is approximately $30 billion. However, it is not known to what extent these guaranteed payments are made to capital or labor, as the tax form for that tax year did not distinguish between the two types of guaranteed payments. Beginning in 2019, Form 1065 will separately report those two types of guaranteed payments.

It is not possible to provide a meaningful estimate of the number of taxpayers potentially affected by the final regulations that have deductible debt issuance costs, substitute interest payments, or amounts from swaps or hedging transactions, because those amounts are not reported separately on a tax return.

4. Economic Effects of Provisions Not Substantially Revised From the Proposed Regulations

a. Calculation of Excess Business Interest Expense, Excess Business Interest Income, and Excess Taxable Income for Partnerships and S Corporations

The statute applies broadly to different types of entities, including passthrough entities, such as partnerships and S corporations. The statute specifies that the section 163(j) limitation applies at the entity level for a partnership but that items such as excess business interest expense and excess taxable income must be allocated to partners for a variety of reasons including to compute their own 163(j) limitation. The statute further specifies

[7] Commitment fees are also not included in the definition of interest in the final regulations, but may be addressed as part of another guidance project on the treatment of fees relating to debt instruments and other securities in the future.

that the items should be allocated in the same manner as ''nonseparately stated taxable income or loss of the partnership''; however, this concept had not previously been defined by statute or regulations prior to the proposed regulations. In the absence of guidance, partnerships would have significant uncertainty in determining which partners receive excess items. This uncertainty could lead one partnership to undertake an activity that another partnership might decline to take based solely on different expectations about tax treatment of interest income rather than underlying productivity differences or economic signals.

The final regulations provide guidance on how to allocate partnership excess business interest expense, excess business interest income, and excess taxable income to partners. The allocation method detailed in the final regulations follows a number of principles. First, it ensures that the sum of the excess items at the partner level is equal to the total at the partnership level. Second, it ensures that the partnership does not allocate excess business interest expense to a partner that was allocated items that include ATI and business interest income that supported the partnership's deductible business interest expense (unless the partner was allocated more interest expense than its share of deductible business interest expense). Finally, it ensures that the partnership allocates any excess taxable income or excess business interest income to partners that are allocated more items comprising ATI or business interest income than necessary to support their allocation of business interest expense.

The final regulations thus provide a method to ensure that all partnerships allocate these items consistently and in a way that matches income and interest expense, thus promoting economically efficient investment decisions across taxpayers and across financing options, relative to the no-action baseline.

b. Interest Income Inclusion for Owners of Partnerships and S Corporations

The final regulations ensure that, for owners of partnerships and S corporations, business interest income is used only once, at the entity level, in offsetting business interest expenses. It thereby avoids exacerbating the incentive to seek out interest income relative to other forms of less economically productive income in order to avoid the section 163(j) limitation, relative to the no-action baseline.

c. Rules Related to Excepted Businesses

For purposes of section 163(j), the statute states in section 163(j)(7) that the term ''trade or business'' does not include certain regulated utilities, or an electing real property trade or business or an electing farming business. The final regulations clarify whether a trade or business could elect as a farming business or a real property trade or business and thus be excepted from section 163(j). Specifically, § 1.163(j)–9 provides guidance in applying the rules for farming and real property trade or business elections. For an electing real property trade or business and electing farming business, the statue specifies that ''any such election shall be made at such time and in such manner as the Secretary shall prescribe, and once made, shall be irrevocable.'' Therefore § 1.163(j)–9 provides taxpayers with the time and manner for electing real property trades or businesses and electing farming businesses. In addition, the final regulations define the conditions under which an election terminates.

In the absence of specific guidance, taxpayers may engage in behavior that counteracts the intent and purpose of the statute and would not otherwise be taken except to avoid the irrevocable nature of the election the statute specified. The final regulations increase the likelihood that taxpayers interpret the 'irrevocable' designation similarly and do not engage in tax-motivated behavior by appearing to cease operations in an effort to change an irrevocable designation.

In addition, § 1.163(j)–9(h) provides a safe harbor for certain REITs to elect to be electing real property trades or businesses. A special rule applies to REITs for which 10 percent or less of the value of the REIT's assets are real property financing assets. Under this rule, all of the assets of the REIT are treated as real property trade or business assets. The benefit of the safe harbor is to provide REITs the same tax treatment and apply the same general rules as apply to other taxpayers, an economically efficient approach. The special rule threshold of 10 percent for real property financing assets has the benefit of maintaining consistency with section 856(c)(4), which uses the same values for the REIT asset test at the close of the REIT's taxable year. Taxpayers will benefit in reduced compliance time and cost in applying new rules if the rules are consistent with other rules that they must comply with under the Code. An estimate of the compliance cost savings that would be due to this cross-code consistency, relative to regulatory alternatives, is beyond the capabilities of the IRS's compliance model.

In addition, the final regulations provide a rule that stipulates that if at least 80 percent of a trade or business's real property (by fair market value) is leased to a trade or business under common control with the real property trade or business, the trade or business cannot make an election to be an electing real trade or business. In the absence of such a rule, taxpayers could restructure their business such that real estate components of non-real estate businesses are separated from the rest of their business to artificially reduce the application of section 163(j) by leasing the real property to the taxpayer and electing this ''business'' to be an excepted real property trade or business. Therefore, the prime benefit of this rule is to preserve the intent of the statute of allowing elections in the real property sector without incentivizing other sectors of the economy to restructure their business for the sole intent of avoiding the section 163(j) limitation.

The Treasury Department and the IRS received no comments requesting that the percentage amounts be changed.

Number of Affected Taxpayers. The Treasury Department and the IRS project that nearly 3,500 REITs are potentially affected by the provision in the final regulations that allows REITs for which 10 percent or less of the value of the REIT's assets are real property financing assets to elect to treat all of its assets as allocable to an excepted real property trade or business. This estimate is based the number of REITs in the SOI sample of corporate taxpayers for 2017 that identify as an Equity REIT. An Equity REIT is identified by a check-box on form 1120–REIT where the choice is Equity REIT or Mortgage REIT. The Mortgage REIT category should be chosen by the taxpayer if the primary source of gross receipts is derived from mortgage interest and fees. These Equity REITs reported $1.7 trillion in total assets.

The Treasury Department and the IRS project that roughly 2.8 million filers are potentially affected by provisions of the final regulations that affect electing real property trades or businesses or electing farm businesses. This estimate is based on a count of all filers with NAICS codes starting with 111 or 112 (farming), and 531 (real property) with at least $10 million in gross receipts in taxable year 2017.

d. Allocation Rules Between Excepted and Non-Excepted Trades or Businesses

The statute is silent over how ATI, interest income, and expense should be allocated between excepted and non-excepted trades or businesses. Thus, the Treasury Department and the IRS decided to provide taxpayers with an allocation method. Because allocation, by whatever method, is costly for taxpayers, the final regulations further provide that allocation is only required when the share of the asset tax basis in both the excepted and the non-excepted trades or businesses exceeds 10 percent. In other words, if the share for either excepted or non-excepted trades or businesses is 10 percent or less, allocation is not required. The Treasury Department and the IRS received no comments that addressed the 10 percent threshold provided in this provision.

In terms of the allocation method, the Treasury Department and the IRS decided in the final regulations to require taxpayers to allocate interest expense and interest income between related excepted and non-excepted trades or businesses based on the relative amounts of the taxpayer's adjusted tax basis in the assets used in its excepted and non-excepted trades or businesses. As discussed in the Explanation of Provisions section of the proposed regulations, this general method of allocation reflects the fact that money is fungible and the view that interest expense is attributable to all activities and property, regardless of any specific purpose for incurring an obligation on which interest is paid. This asset basis approach is consistent with the regulations under section 861. Because this approach is familiar to taxpayers and consistent with other parts of the Code, taxpayers benefit in reduced time and cost spent learning and applying the rules, relative to alternative regulatory approaches. An estimate of the compliance cost savings that would be due to this familiarity and cross-code consistency, relative to regulatory alternatives, is beyond the capabilities of the IRS's compliance model.

The Treasury Department and the IRS considered several alternatives to this asset basis approach for allocating interest income and expense. First, a tracing approach was considered whereby taxpayers would be required to trace disbursements of debt proceeds to specific expenditures. However, tracing would impose a significant compliance burden on taxpayers due to the complexity of matching interest income and expense among related companies. Further, it is not clear how taxpayers would retroactively apply a tracing regime to existing debt. In particular, because C corporations would have had no reason to trace the proceeds of any existing indebtedness, imposing a tracing regime on existing indebtedness would require corporations to reconstruct the use of funds within their treasury operations at the time such indebtedness was issued, even if the issuance occurred many years ago, and even if the funds were used for a myriad of purposes across a large number of entities. Such an approach would impose substantial compliance costs and may be impractical or even impossible for indebtedness issued years ago.

Moreover, because money is fungible, a tracing regime would be distortive and subject to manipulation. Although taxpayers are impacted from both a commercial and tax perspective by the amount of capital raised through the issuance of equity and indebtedness, any trade or business conducted by a taxpayer is generally indifferent to the source of funds. As a result, if taxpayers were allowed to use a tracing regime to allocate indebtedness to excepted trades or businesses, there would be an incentive to treat excepted trades or businesses as funded largely from indebtedness, and to treat non-excepted trades or businesses as funded largely from other types of funding, such as equity funding, despite the fact that, as an economic matter, all of a taxpayer's trades or businesses are funded based on the taxpayer's overall capital structure.

The Treasury Department and the IRS rejected a tracing approach because the complexity of such an approach could be more difficult for taxpayers and the IRS to administer and would create too great an incentive to structure financing with the sole purpose of avoiding the application of the statute, relative to the final regulations. The assumption that a trade or business is indifferent to its source of funds may not be appropriate in cases in which certain indebtedness is secured by the assets of the trade or business and cash flow from those assets is expected to support the payments required on the indebtedness. The final regulations provide for a limited tracing rule in those cases.

The Treasury Department and the IRS also considered allocating interest expense based on the relative fair market value of the assets used in excepted and non-excepted trades or businesses. However, determinations of fair market value frequently are burdensome for taxpayers, which may have numerous assets without a readily established market price. For this reason, disputes between taxpayers and the IRS over the fair market value of an asset are a common and costly occurrence. In the TCJA, Congress repealed the use of fair market value in the apportionment of interest expense under section 864 of the Code (see section 14502(a) of the TCJA) and claimed that the ability to elect to allocate interest expense under section 864 on the basis of fair market value of assets has led to inappropriate results and needless complexity. See Senate Budget Explanation of the Bill at 400. Thus, the Treasury Department and the IRS have determined that allocating interest expense based on relative amounts of asset basis is more appropriate than a regime based on the relative fair market value of assets.

The Treasury Department and the IRS also considered allocating interest expense to excepted and non-excepted trades or businesses based on the relative amounts of gross income generated by such trades or businesses. However, gross income is more variable and volatile than asset basis, in part because it is based on an annual measurement. Methods could be developed to look at multiple years of gross income through an averaging or other smoothing methodology, but any such approach would necessarily create a number of difficult technical questions because the income of different trades or businesses may be subject to differing business cycles and the taxpayers may exert control over the timing of income items, which may lead taxpayers to make tax-driven business decisions with no accompanying general economic benefit. In the TCJA, Congress also repealed the use of gross income in the apportionment of interest expense under section 864 of the Code (see section 14502(a) of the TCJA). Thus, the Treasury Department and the IRS have determined that allocating interest expense based on relative amounts of asset basis is more appropriate than a regime based on the relative amounts of gross income.

Number of Affected Taxpayers. The Treasury Department and the IRS estimate that roughly 83,000 firms had allocated interest income and expenses among multiple trades or businesses in tax year 2015 and thus are potentially affected by provisions of the final regulations that affect the annual allocation statement. This estimate is based on a count of all Forms 1120, 1120S, and 1065 in tax year 2015 in real estate, farming, and public utilities industries that had over $25 million in gross receipts.

II. Paperwork Reduction Act

The collections of information contained in the final regulations have been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C.

3507(d)). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and return information are confidential, as required by section 6103.

A. Collections of Information Imposed by the Regulations

The collections of information imposed directly by these regulations are contained in §§ 1.163(j)–1(b)(15)(iii), 1.163(j)–2(b)(2)(ii), 1.163(j)–2(b)(3), 1.163(j)–9 and 1.163(j)–10.

The collection of information in §§ 1.163(j)–1(b)(15)(iii) and 1.163(j)–9, the election statement, is required for taxpayers to make a one-time election to treat their regulated utility trade or business, real property trade or business or farming trade or business as an electing excepted regulated utility trade or business, electing real property trade or business under section 163(j)(7)(B) or an electing farming business under section 163(j)(7)(C). The election to be an excepted regulated utility trade or business was not in the proposed regulations. The scope of taxpayers eligible to make an election to be an excepted real property or farming trade or business has changed from the proposed regulations. As discussed in part X of the Summary of Comments and Explanation of Revisions section, under the proposed regulations, taxpayers that met the small business exemption test under section 448(c) were not able to make an election for their trade or business to be an electing real property trade or business or an electing farming business because they were already not subject to the limitation. Under the final regulations, those taxpayers are eligible to make a protective election. Additionally, under the proposed regulations, it was unclear whether taxpayers that were unsure of whether their activity constitutes a trade or business under section 162 could make an election. The final regulations clarify that a taxpayer that is unsure whether its activity constitutes a trade or business under section 162 is eligible to make an election.

The collections of information in §§ 1.163(j)–2(b)(2)(ii) and 1.163(j)–2(b)(3) are required to make two elections relating to changes made to section 163(j)(10) by the CARES Act. The election under § 1.163(j)–2(b)(2)(ii) is for a taxpayer to use the 30 percent ATI limitation instead of the 50 percent ATI limitation when calculating the taxpayer's section 163(j) limitation for a 2019 or 2020 taxable year, as provided in section 163(j)(10)(A)(i) and (iii). The election under § 1.163(j)–2(b)(2) is for a taxpayer to use the taxpayer's ATI for the last taxable beginning in 2019 as its ATI for any taxable year beginning in 2020, as provided in section 163(j)(10)(B). Revenue Procedure 2020–22 describes the time and manner for making these elections. See also § 1.163(j)–2(b)(4).

Taxpayers make the elections by timely filing a Federal income tax return or Form 1065, including extensions, an amended Federal income tax return, amended Form 1065, or administrative adjustment request, as applicable. More specifically, taxpayers complete the Form 8990, Limitation on Business Interest Expense under Section 163(j), using the 30 percent ATI limitation and/or using the taxpayer's 2019 ATI, as applicable. No formal statements are required to make these elections. Accordingly, for Paperwork Reduction Act purposes, the reporting burden associated with the collections of information in §§ 1.163(j)–2(b)(2)(ii) and 1.163(j)–2(b)(3) will be reflected in the IRS Form 8990 Paperwork Reduction Act Submissions (OMB control number 1545–0123).

The collection of information in § 1.163(j)–10, the allocation statement, is required for taxpayers to demonstrate how they allocated their interest expense, interest income, and other items of income and deduction between excepted and non-excepted trades or businesses. The mechanics of the allocation statement, and the scope of taxpayers required to file the allocation statement, have not changed from the proposed regulations.

Section 1.163(j)–10 in the final regulations contains another collection of information, an allocation methodology change request, requiring taxpayers to request the Commissioner's permission to change a methodology for allocating the basis in an asset that is used in multiple trades or businesses if the request is being made within five years of any prior change. This requirement does not create a new burden because the allocation methodology change request is made by following the procedures for requesting a letter ruling in section 7.01 of Revenue Procedure 2020–1, 2020–1 IRB 1. Revenue Procedure 2020–1 was approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act (44 U.S.C. 3507) under control number 1545–0123.

In 2018, the Treasury Department and the IRS considered developing a form election and allocation statement under §§ 1.163(j)–9 and 1.163(j)–10 for taxpayers to make the one-time election and to demonstrate their interest allocation. To minimize taxpayer burden, the Treasury Department and the IRS decided that, for now, taxpayers should be allowed to use their own election form and allocation statement. In the future, if the Treasury Department and the IRS develop election or allocation form, the draft versions of the forms will be posted for comment at *https://apps.irs.gov/app/picklist/list/draftTaxForms.html.*

Certain forms have been modified with simple questions to signal whether the taxpayer is subject to section 163(j). The Treasury Department and the IRS are considering modifying certain forms with a checkbox to note that a taxpayer has made an election for a trade or business to be an electing real property trade or business or electing farming business.

For the allocation methodology change request in § 1.163(j)–10, the Treasury Department and the IRS initially determined that taxpayers should file a change request any time there is a change in methodology. However, a change in allocation methodology presents a burden for taxpayers. The disadvantages of changing an allocation methodology regularly, including the administrative and accounting costs associated with any such change, outweigh the advantages of changing an allocation methodology regularly. Accordingly, the Treasury Department and the IRS do not anticipate taxpayers using the allocation methodology change request regularly. The final regulations require the request to be made only if a change has not been made in the past 5 years. To minimize any compliance burden, the procedures in Revenue Procedure 2020–1, which are familiar to taxpayers, apply for the allocation methodology change request.

B. Burden Estimates

The following burden estimates are based on the information that is available to the IRS, and have been updated from the proposed regulations to take into account the new election for certain regulated utility trades or businesses, the increased scope of potential filers for the election statement and to use 2017 Statistics of Income (SOI) tax data where available.

The most recently available 2017 SOI tax data indicates that approximately 8,208 filers are possible for the one-time election to opt out of the section 163(j) limitation as an electing excepted regulated utility trade or business. This estimate was based on a count of Form 1065, 1065B, 1120 and 1120–S filers with NAICS codes starting with 2211 (electric power generation, transmission and distribution), 2212 (natural gas distribution), and 2213 (water, sewage and other systems).

The 2017 SOI tax data indicates that approximately 2,838,981 filers are possible for the one-time election to opt out of the section 163(j) limitation as an electing real property trade or business or as an electing farming business were the statute then in effect. This estimate is based on a count of all filers with NAICS codes starting with 111 or 112 (farming), and 531 (real property) with at least $10 million in gross receipts in taxable year 2017. The increase in potential filers from the number provided in the proposed regulations is due exclusively to the fact that the final regulations provide that taxpayers that satisfy the small business exemption are eligible to file an election.

For the election to use the 30 percent ATI limitation for a 2019 or 2020 taxable year under § 1.163(j)–2(b)(ii), while any taxpayer subject to the section 163(j) limitation is eligible to make the election, the Treasury Department and the IRS estimate that only taxpayers that actively want to reduce their deductions will make this election. The application of the base erosion minimum tax under section 59A depends, in part, on the amount of a taxpayer's deductions. Accordingly, the Treasury Department and the IRS estimate that taxpayers that are subject to both the base erosion minimum tax under section 59A and section 163(j) are the potential filers of this election. Using the 2017 SOI tax data, the Treasury Department estimate that 3,376 firms will make the election. This estimate was determined by examining the number of C corporations with at least $500,000,000 in gross receipts, that do not have an NAICS code associated with a trade or business that is generally not subject to the section 163(j) limitation (2211 (electric power generation, transmission and distribution), 2212 (natural gas distribution), 2213 (water, sewage and other systems), 111 or 112 (farming), 531 (real property)).

For the election to use the taxpayer's 2019 ATI in 2020 under § 1.163(j)–2(b)(3), the Treasury Department and the IRS estimate that 72,608 firms will make the election. This figure was determined, using 2017 SOI tax data, by examining Form 1040, Form 1120, Form 1120S, and Form 1065 filers with more than $26M in gross receipts, that have reported interest expense, and do not have an NAICS code associated with any trade or business that is generally not subject to the section 163(j) limitation.

The Treasury Department and the IRS continue to estimate the same number of filers, 82,755, for the annual allocation statement as was projected in the proposed regulations. Using the 2015 SOI tax data, the Treasury Department and the IRS estimate that 82,755 firms will have allocated interest income and expenses among multiple trades or businesses, some of which are excepted from the section 163(j) limitation and some that are not. This estimate is a count of all tax Forms 1120, 1120S, and 1065 in real estate, farming, and public utilities industries that had over $25 million in gross receipts. While the number of affected taxpayers will increase with growth in the economy, the Treasury Department and the IRS expect that the portion of affected taxpayers will remain approximately the same over the foreseeable future.

The time and dollar compliance burden are derived from the Business Taxpayers Burden model provided by the IRS's Office of Research, Applied Analytics, and Statistics (RAAS). This model relates the time and out-of-pocket costs of business tax preparation, derived from survey data, to assets and receipts of affected taxpayers along with other relevant variables. See ''Tax Compliance Burden'' (John Guyton et al, July 2018) at *https://www.irs.gov/pub/irs-soi/d13315.pdf.* A respondent may require more or less time than the estimated burden, depending on the circumstances.

The burden estimates listed in the below table attempt to capture only those discretionary changes made in these proposed regulations, and may not include burden estimates for forms associated with the statute. Changes made by the Act or through new information collections are captured separately in forthcoming published ''Supporting Statements'' for each of these forms and will be aggregated with the estimates provided below to summarize the total burden estimates for each information collection listed below. Those total burden estimates will be available for review and public comment at *https://www.reginfo.gov/public/Forward?SearchTarget=PRA&textfield.* The Treasury Department and the IRS request comment on these estimates.

	Likely respondents	Estimated number of respondents	Estimated average annual burden hours per respondent	Estimated total annual reporting burden (hours)	Estimated monetized burden @ $95/hour ($millions)	Estimated frequency of responses
Section 1.163(j)–1(b)(15)(iii) (one-time election statement (2017 Levels).	Corporations and partnerships with regulated utility trades or businesses.	8,028 business respondents (including Forms 1120, 1120–S, and 1065 filers).	0 to 30 minutes (estimated average: 15 minutes).	2,007	$190,665 ...	One-time.
Section 1.163(j)–2(b)(ii) (election to apply the 30 percent ATI percentage).	C corporations with more than $500 M in gross receipts.	3,376 business respondents (Form 1120 filers).	See Form 8990 ..	See Form 8990.	See Form 8990.	See Form 8990.
Section 1.163(j)–2(b)(3) (election to use 2019 ATI as 2020 ATI).	Individuals, corporations, and partnerships with more than $26 M in gross receipts and not part of an excepted trade or business.	72,608 business respondents (including Form 1120, Form 1120–S, and Form 1065 filers).	See Form 8990 ..	See Form 8990.	See Form 8990.	See Form 8990.

	Likely respondents	Estimated number of respondents	Estimated average annual burden hours per respondent	Estimated total annual reporting burden (hours)	Estimated monetized burden @ $95/hour ($millions)	Estimated frequency of re-sponses
Section 1.163(j)–9 (one-time election statement) (2017 Levels).	Individuals, corporations, and partnerships with real property or farming trades or businesses with gross receipts exceeding $10 million.	2,838,981 business respondents (all filers).	0 to 30 minutes (estimated average:15 minutes).	70,746	67.4	One-time.
Section 1.163(j)–10 (annual allocation statement) (2015 Levels).	Individuals, corporations, and partnerships (1) with more than one trade or business (at least one of which is a real property or farming trade or business), and (2) public utilities, with gross receipts exceeding the statutory threshold of $25 million.	82,755 business respondents (including Forms 1120, 1120–S, and 1065 filers).	15 minutes to 2 hours (estimated average: 1 hour).	82,755	7.9	Annually.
Section 1.163(j)–10 (change in allocation methodology request).	Individuals, corporations, and partnerships that want to change their methodology for allocating basis among two or more trades or businesses, and (1) with more than one trade or business (at least one of which is a real property or farming trade or business), and (2) public utilities, with gross receipts exceeding the statutory threshold of $25 million.	See Rev. Proc. 2020–1.	See Rev. Proc. 2020–1.	See Rev. Proc. 2020–1.	See Rev. Proc. 2020–1.	On occasion.
Section 1.163(j)–10 (one-time start-up cost to develop procedures for filing an annual allocation statement) (2017 Levels).	Same as above	82,755	4 hours (start-up burden).	331,020	31.4	One-time.
Three year monetized burden estimate.					40.8	Three year annual average.

The three-year annual average of the monetized burden for the information collection and resulting from discretionary requirements contained in this rulemaking is estimated to be 40.9 million ($2017) ([($190, 665) + ($67.4 million + $31.4 million) + ($7.9 million × 3)]/3). To ensure more accuracy and consistency across its information collections, the IRS is currently in the process of revising the methodology it uses to estimate burden and costs. Once this methodology is complete, the IRS will provide this information to reflect a more precise estimate of burdens and costs.

C. Forms

The IRS has developed Form 8990, ''Limitation on Business Interest Expense Under Section 163(j),'' to facilitate reporting of the limitation. The form is posted at *https://www.irs.gov/pub/irs-access/f8990_accessible.pdf.* The Form 8990 instructions are posted at *https://www.irs.gov/pub/irs-pdf/i8990.pdf.* The Form 1120 series and the Form 1065 have been revised to include a question to alert taxpayers of the need to file a Form 8990. The instructions to those and other forms have been revised to include information about the Form 8990.

As described previously, the reporting burdens associated with the information collections in the proposed regulations are included in the aggregated burden estimates for OMB control number 1545–0123 (in the case of filers of Form 1120, Form 1065 and Form 8990), 1545–0074 (in the case of individual filers), and 1545–0123 (in the case of filers under Revenue Procedure 2020–1).

The Treasury Department and the IRS request comment on all aspects of information collection burdens related to these regulations, including estimates for how much time it would take to comply with the paperwork burdens described previously for each relevant form and ways for the IRS to minimize the paperwork burden. In addition, when available, drafts of IRS forms are posted for comment at *https://apps.irs.gov/app/picklist/list/draftTaxForms.htm.*

III. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6), it is hereby certified that the final regulations will not have a significant economic impact on a substantial number of small entities within the meaning of section 601(6) of the Regulatory Flexibility Act (small entities). This certification can be made because the Treasury Department and the IRS have determined that the regulations may affect a substantial number of small entities but have also concluded that the economic effect on small entities as a result of these regulations is not expected to be significant.

When enacted, the section 163(j) limitation generally applied to taxpayers with average annual gross receipts exceeding $25 million. The gross receipts threshold for general applicability of the section 163(j) limitation increased to $26 million in 2020. The threshold will be adjusted annually for inflation. However, under the final regulations, small taxpayers operating regulated utility trades or businesses, real property trades or businesses and farming trades or businesses are now eligible to protectively elect out of the election. Accordingly, the regulations in §§ 1.163(j)–1 and –9 may apply to small business filers that operate regulated utility trades or businesses, real property trades or businesses or farming trades or businesses. Those taxpayers may choose to make a protective election, such that they are not subject to the limitation if their average annual gross receipts for the three prior tax years eventually exceeds $26 million (for 2020). Although the exact number of small entities that will make an election is unknown, an upper bound on the number of potentially affected entities is 10.5 million. This number was determined by looking at, for the 2017 taxable year, the number of Form 1120, 1120–S, 1120–REIT, 1065, and individual business filers with more than $10M in gross receipts that have NAICS codes commonly associated with real property trades or businesses or farming businesses.

If a taxpayer chooses to make the election for its trades or businesses, the taxpayer must attach to its tax return a statement identifying and describing the trade or business for which the election is being made, and must provide other information as the Commissioner may require in forms, instructions, or other published guidance. The election is not required. The election is potentially beneficial to businesses with business interest, but is detrimental to businesses that have assets for which bonus depreciation is desired.

The reporting burden is estimated at 0–30 minutes, depending on individual circumstances, with an estimated average of 0.25 hours for all affected entities, regardless of size. The burden on small entities is expected to be the same as other entities because the requirements to make the election apply equally to all taxpayers. Using the IRS's taxpayer compliance cost estimates, the monetization rate is $95 per hour. Thus, the average annual burden is $23.75 per business.

For the section 163(j)(10) elections under §§ 1.163(j)–2(b)(ii) or 1.163(j)–2(b)(3), most small business taxpayers do not need the elections because, as discussed earlier, they are not subject to the section 163(j) limitation. For small taxpayers that are subject to the limitation, the cost to implement the elections is low. Pursuant to Revenue Procedure 2020–22, these taxpayers simply complete the Form 8990 as if the election has been made. Accordingly, the burden of complying with the elections, if needed, is no different than for taxpayers that do not make the elections.

Pursuant to section 7805(f) of the Code, the notice of proposed rulemaking preceding this regulation was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its effect on small business, and no comments were received.

IV. Unfunded Mandates Reform Act

Section 202 of the Unfunded Mandates Reform Act of 1995 (UMRA) requires that agencies assess anticipated costs and benefits and take certain actions before issuing a final rule that includes any Federal mandate that may result in expenditures in any one year by a state, local, or tribal government, in the aggregate, or by the private section, of $100 million in 1995 dollars, update annually for inflation. This rule does not include any Federal mandate that may result in expenditures by state, local, or tribal governments, or by the private section in excess of that threshold.

V. Executive Order 13132: Federalism

Executive Order 13132 (entitled ''Federalism'') prohibits an agency from publishing any rule that has federalism implications if the rule either imposes substantial, direct compliance costs on state and local governments, and is not required by statute, or preempts state law, unless the agency meets the consultation and funding requirements of section 6 of the Executive Order. This final rule does not have federalism implications and does not impose substantial direct compliance costs on state and local governments or preempt state law within the meaning of the Executive Order.

VI. Congressional Review Act

The Administrator of the Office of Information and Regulatory Affairs of the Office of Management and Budget has determined that this is a major rule for purposes of the Congressional Review Act (5 U.S.C. 801 *et seq.*) (CRA). Under section 801(3) of the CRA, a major rule takes effect 60 days after the rule is published in the **Federal Register**. Notwithstanding this requirement, section 808(2) of the CRA allows agencies to dispense with the requirements of 801 when the agency for good cause finds that such procedure would be impracticable, unnecessary, or contrary to the public interest and the rule shall take effect at such time as the agency promulgating the rule determines.

The Treasury Department and the IRS have determined that the rules in this Treasury decision shall take effect for taxable years beginning on or after November 13, 2020. Pursuant to section 808(2) of the CRA, however, the Treasury Department and the IRS find, for good cause, that a 60-day delay in the effective and the applicability date for the anti-avoidance rules in § 1.163(j)–1(b)(22)(iv) is unnecessary and contrary to the public interest. Section 1.163(j)–1(b)(22)(iv) serves an anti-abuse function and, because § 1.163(j)–1(b)(22)(iv) provides a clear scope of abusive transactions that could otherwise be executed prior to the effective date of the section, immediate application of § 1.163(j)–1(b)(22)(iv) is necessary as of the publication of this final regulation.

Drafting Information

The principal authors of these regulations are Susie Bird, Charles Gorham, Justin Grill, Zachary King, Jaime Park, Kathy Reed, Joanna Trebat and Sophia Wang, Office of the Associate Chief Counsel (Income Tax and Accounting); Kevin M. Jacobs, Russell Jones, John Lovelace, Marie Milnes-Vasquez, Aglaia Ovtchinnikova, and Julie Wang, Office of the Associate Chief Counsel (Corporate); William Kostak, Anthony McQuillen, and Adrienne Mikolashek, Office of the Associate Chief Counsel (Passthroughs and Special Industries); Azeka Abramoff, Angela Holland, and Steve Jensen, Office of the Associate Chief Counsel (International); William E. Blanchard, Michael Chin, Steven Harrison, Andrea Hoffenson, and Diana Imholtz, Office of the Associate Chief Counsel (Financial Institutions and Products). Other personnel from the Treasury Department and the IRS participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by:

■ 1. Adding entries in numerical order for §§ 1.163(j)–1 through 1.163(j)–11;

■ 2. Revising the entries for §§ 1.263A–8 through 1.263A–15;

■ 3. Adding entries in numerical order for §§ 1.382–1 and 1.383–0;

■ 4. Revising the entry for § 1.383–1; and

■ 5. Adding entries in numerical order for §§ 1.860C–2 and 1.1502–90.

The additions and revisions read as follows:

Authority: 26 U.S.C. 7805, unless otherwise noted.

■ **Par. 2.** Section 1.163(j)–0 is added to read as follows:

§ 1.163(j)–0 Table of contents.

This section lists the table of contents for §§ 1.163(j)–1 through 1.163(j)–11.

§ 1.163(j)–1 Definitions.

(a) In general.
(b) Definitions.
(1) Adjusted taxable income.
(i) Additions.
(ii) Subtractions.
(iii) Depreciation, amortization, or depletion capitalized under section 263A.
(iv) Application of § 1.163(j)–1(b)(1)(ii)(C), (D), and (E).
(A) Sale or other disposition.
(*1*) In general.
(*2*) Intercompany transactions.
(*3*) Deconsolidations.
(B) Deductions by members of a consolidated group.
(C) Successor assets.
(D) Anti-duplication rule.
(*1*) In general.
(*2*) Adjustments following deconsolidation.
(v) Other adjustments.
(vi) Additional rules relating to adjusted taxable income in other sections.
(vii) ATI cannot be less than zero.
(viii) Examples.
(2) Applicable CFC.
(3) Business interest expense.
(i) In general.
(ii) Special rules.
(4) Business interest income.
(i) In general.
(ii) Special rules.
(5) C corporation.
(6) Cleared swap.
(7) Consolidated group.
(8) Consolidated return year.
(9) Current-year business interest expense.
(10) Disallowed business interest expense.
(11) Disallowed business interest expense carryforward.
(12) Disallowed disqualified interest.
(13) Electing farming business.
(14) Electing real property trade or business.
(15) Excepted regulated utility trade or business.
(i) In general.
(A) Automatically excepted regulated utility trades or businesses.
(B) Electing regulated utility trades or businesses.
(C) Designated excepted regulated utility trades or businesses.
(ii) Depreciation and excepted and non-excepted utility trades or businesses.
(A) Depreciation.
(B) Allocation of items.
(iii) Election to be an excepted regulated utility trade or business.
(A) In general.
(B) Scope and effect of election.
(*1*) In general.
(*2*) Irrevocability.
(C) Time and manner of making election.
(*1*) In general.
(*2*) Election statement contents.
(*3*) Consolidated group's or partnership's trade or business.
(*4*) Termination of election.
(*5*) Additional guidance.
(16) Excess business interest expense.
(17) Excess taxable income.
(18) Floor plan financing indebtedness.
(19) Floor plan financing interest expense.
(20) Group.
(21) Intercompany transaction.
(22) Interest.
(i) In general.
(ii) Swaps with significant nonperiodic payments.
(A) In general.
(B) Exception for cleared swaps.

(C) Exception for non-cleared swaps subject to margin or collateral requirements.
(iii) Other amounts treated as interest.
(A) Treatment of premium.
(*1*) Issuer.
(*2*) Holder.
(B) Treatment of ordinary income or loss on certain debt instruments.
(C) Substitute interest payments.
(D) Section 1258 gain.
(E) Factoring income.
(F) [Reserved]
(iv) Anti-avoidance rules.
(A) Principal purpose to reduce interest expense.
(*1*) Treatment as interest expense.
(*2*) Corresponding treatment of amounts as interest income.
(B) Interest income artificially increased.
(C) Principal purpose.
(D) Coordination with anti-avoidance rule in § 1.163(j)–2(j).
(v) Examples.
(23) Interest expense.
(24) Interest income.
(25) Member.
(26) Motor vehicle.
(27) Old section 163(j).
(28) Ownership change.
(29) Ownership date.
(30) Real estate investment trust.
(31) Real property.
(32) Regulated investment company.
(33) Relevant foreign corporation.
(34) S corporation.
(35) [Reserved]
(36) Section 163(j) limitation.
(37) Section 163(j) regulations.
(38) Separate return limitation year.
(39) Separate return year.
(40) Separate tentative taxable income.
(41) Tax-exempt corporation.
(42) Tax-exempt organization.
(43) Tentative taxable income.
(i) In general.
(ii) [Reserved]
(iii) Special rules for defining tentative taxable income.
(44) Trade or business.
(i) In general.
(ii) Excepted trade or business.
(iii) Non-excepted trade or business.
(45) Unadjusted basis.
(46) United States shareholder.
(c) Applicability date.
(1) In general.
(2) Anti-avoidance rules.
(3) Swaps with significant nonperiodic payments.
(i) In general.
(ii) Anti-avoidance rule.
§ 1.163(j)–2 Deduction for business interest expense limited.
(a) Overview.
(b) General rule.
(1) In general.
(2) 50 percent ATI limitation for taxable years beginning in 2019 or 2020.
(3) Election to use 2019 ATI in 2020.
(4) Time and manner of making or revoking the elections.
(c) Disallowed business interest expense carryforward.
(1) In general.
(2) Coordination with small business exemption.
(3) Cross-references.
(d) Small business exemption.
(1) Exemption.
(2) Application of the gross receipts test.
(i) In general.
(ii) Gross receipts of individuals.
(iii) Partners and S corporation shareholders.
(iv) Tax-exempt organizations.
(e) REMICs.
(f) Trusts.
(i) Calculation of ATI with respect to certain trusts and estates.
(ii) Calculation of ATI with respect to certain beneficiaries.
(g) Tax-exempt organizations.
(h) Examples.
(i) [Reserved]
(j) Anti-avoidance rule.
(1) In general.
(2) Examples.
(k) Applicability date.
§ 1.163(j)–3 Relationship of the section 163(j) limitation to other provisions affecting interest.
(a) Overview.
(b) Coordination of section 163(j) with certain other provisions.
(1) In general.
(2) Disallowed interest provisions.
(3) Deferred interest provisions.
(4) At risk rules, passive activity loss provisions, and limitation on excess business losses of noncorporate taxpayers.
(5) Capitalized interest expenses.
(6) Reductions under section 246A.
(7) Section 381.
(8) Section 382.
(c) Examples.
(d) Applicability date.
§ 1.163(j)–4 General rules applicable to C corporations (including REITs, RICs, and members of consolidated groups) and tax-exempt corporations.
(a) Scope.
(b) Characterization of items of income, gain, deduction, or loss.
(1) Interest expense and interest income.
(2) Adjusted taxable income.
(3) Investment interest, investment income, investment expenses, and certain other tax items of a partnership with a C corporation partner.
(i) Characterization as expense or income properly allocable to a trade or business.
(ii) Effect of characterization on partnership.
(iii) Separately stated interest expense and interest income of a partnership not treated as excess business interest expense or excess taxable income of a C corporation partner.
(iv) Treatment of deemed inclusions of a domestic partnership that are not allocable to any trade or business.
(4) Application to RICs and REITs.
(i) In general.
(ii) Tentative taxable income of RICs and REITs.
(iii) Other adjustments to adjusted taxable income for RICs and REITs.
(5) Application to tax-exempt corporations.
(6) Adjusted taxable income of cooperatives.
(7) Examples.
(c) Effect on earnings and profits.
(1) In general.
(2) Special rule for RICs and REITs.
(3) Special rule for partners that are C corporations.
(4) Examples.
(d) Special rules for consolidated groups.
(1) Scope.
(2) Calculation of the section 163(j) limitation for members of a consolidated group.
(i) In general.
(ii) Interest.
(iii) Calculation of business interest expense and business interest income for a consolidated group.
(iv) Calculation of adjusted taxable income.
(v) Treatment of intercompany obligations.
(A) In general.
(B) Repurchase premium.
(3) Investment adjustments.
(4) Examples.
(e) Ownership of partnership interests by members of a consolidated group.
(1) [Reserved]
(2) Change in status of a member.
(3) Basis adjustments under § 1.1502–32.
(4) Excess business interest expense and § 1.1502–36.
(f) Cross-references.
(g) Applicability date.
(1) In general.
(2) [Reserved]
§ 1.163(j)–5 General rules governing disallowed business interest expense carryforwards for C corporations.
(a) Scope and definitions.
(1) Scope.
(2) Definitions.
(i) Allocable share of the consolidated group's remaining section 163(j) limitation.
(ii) Consolidated group's remaining section 163(j) limitation.

(iii) Remaining current-year interest ratio.
(b) Treatment of disallowed business interest expense carryforwards.
(1) In general.
(2) Deduction of business interest expense.
(3) Consolidated groups.
(i) In general.
(ii) Deduction of business interest expense.
(A) General rule.
(B) Section 163(j) limitation equals or exceeds the current-year business interest expense and disallowed business interest expense carryforwards from prior taxable years.
(C) Current-year business interest expense and disallowed business interest expense carryforwards exceed section 163(j) limitation.
(iii) Departure from group.
(iv) Example: Deduction of interest expense.
(c) Disallowed business interest expense carryforwards in transactions to which section 381(a) applies.
(d) Limitations on disallowed business interest expense carryforwards from separate return limitation years.
(1) General rule.
(A) Cumulative section 163(j) SRLY limitation.
(B) Subgrouping.
(2) Deduction of disallowed business interest expense carryforwards arising in a SRLY.
(3) Examples.
(e) Application of section 382.
(1) Pre-change loss.
(2) Loss corporation.
(3) Ordering rules for utilization of pre-change losses and for absorption of the section 382 limitation.
(4) Disallowed business interest expense from the pre-change period in the year of a testing date.
(5) Recognized built-in loss.
(f) Overlap of SRLY limitation with section 382.
(g) Additional limitations.
(h) Applicability date.
§ 1.163(j)–6 Application of the section 163(j) limitation to partnerships and subchapter S corporations.
(a) Overview.
(b) Definitions.
(1) Section 163(j) items.
(2) Partner basis items.
(3) Remedial items.
(4) Excess business interest income.
(5) Deductible business interest expense.
(6) Section 163(j) excess items.
(7) Non-excepted assets.
(8) Excepted assets.
(c) Business interest income and business interest expense of the partnership.
(1)–(2) [Reserved]
(3) Character of business interest expense.
(d) Adjusted taxable income of a partnership.
(1) Tentative taxable income of a partnership.
(2) Section 734(b), partner basis items, and remedial items.
(e) Adjusted taxable income and business interest income of partners.
(1) Modification of adjusted taxable income for partners.
(2) Partner basis items and remedial items.
(3) Disposition of partnership interests.
(4) Double counting of business interest income and floor plan financing interest expense prohibited.
(f) Allocation and determination of section 163(j) excess items made in the same manner as nonseparately stated taxable income or loss of the partnership.
(1) Overview.
(i) In general.
(ii) Relevance solely for purposes of section 163(j).
(2) Steps for allocating deductible business interest expense and section 163(j) excess items.
(i) Partnership-level calculation required by section 163(j)(4)(A).
(ii) Determination of each partner's relevant section 163(j) items.
(iii) Partner-level comparison of business interest income and business interest expense.
(iv) Matching partnership and aggregate partner excess business interest income.
(v) Remaining business interest expense determination.
(vi) Determination of final allocable ATI.
(A) Positive allocable ATI.
(B) Negative allocable ATI.
(C) Final allocable ATI.
(vii) Partner-level comparison of 30 percent of adjusted taxable income and remaining business interest expense.
(viii) Partner priority right to ATI capacity excess determination.
(ix) Matching partnership and aggregate partner excess taxable income.
(x) Matching partnership and aggregate partner excess business interest expense.
(xi) Final section 163(j) excess item and deductible business interest expense allocation.
(g) Carryforwards.
(1) In general.
(2) Treatment of excess business interest expense allocated to partners.
(3) Excess taxable income and excess business interest income ordering rule.
(h) Basis adjustments.
(1) Section 704(d) ordering.
(2) Excess business interest expense basis adjustments.
(3) Partner basis adjustment upon disposition of partnership interest.
(4)–(5) [Reserved]
(i)–(j) [Reserved]
(k) Investment items and certain other items.
(l) S corporations.
(1) In general.
(i) Corporate level limitation.
(ii) Short taxable periods.
(2) Character of deductible business interest expense.
(3) Adjusted taxable income of an S corporation.
(4) Adjusted taxable income and business interest income of S corporation shareholders.
(i) Adjusted taxable income of S corporation shareholders.
(ii) Disposition of S corporation stock.
(iii) Double counting of business interest income and floor plan financing interest expense prohibited.
(5) Carryforwards.
(6) Basis adjustments and disallowed business interest expense carryforwards.
(7) Accumulated adjustment accounts.
(8) Termination of qualified subchapter S subsidiary election.
(9) Investment items.
(10) Application of section 382.
(m) Partnerships and S corporations not subject to section 163(j).
(1) Exempt partnerships and S corporations.
(2) Partnerships and S corporations engaged in excepted trades or businesses.
(3) Treatment of excess business interest expense from partnerships that are exempt entities in a succeeding taxable year.
(4) S corporations with disallowed business interest expense carryforwards prior to becoming exempt entities.
(n) [Reserved]
(o) Examples.
(p) Applicability date.
§ 1.163(j)–7 Application of the section 163(j) limitation to foreign corporations and United States shareholders.
(a) Overview.
(b) General rule regarding the application of section 163(j) to relevant foreign corporations.
(c)–(f) [Reserved]
(g) Rules concerning the computation of adjusted taxable income of a relevant foreign corporation.
(1) Tentative taxable income.
(2) Treatment of certain dividends.
(h)–(l) [Reserved]
(m) Applicability date.
§ 1.163(j)–8 [Reserved]
§ 1.163(j)–9 Elections for excepted trades or businesses; safe harbor for certain REITs.

(a) Overview.
(b) Availability of election.
(1) In general.
(2) Special rules.
(i) Exempt small businesses.
(ii) Section 162 trade or business not required for electing real property trade or business.
(c) Scope and effect of election.
(1) In general.
(2) Irrevocability.
(3) Depreciation.
(d) Time and manner of making election.
(1) In general.
(2) Election statement contents.
(3) Consolidated group's trade or business.
(4) Partnership's trade or business.
(e) Termination of election.
(1) In general.
(2) Taxable asset transfer defined.
(3) Related party defined.
(4) Anti-abuse rule.
(f) Additional guidance.
(g) Examples.
(h) Safe harbor for REITs.
(1) In general.
(2) REITs that do not significantly invest in real property financing assets.
(3) REITs that significantly invest in real property financing assets.
(4) REIT real property assets, interests in partnerships, and shares in other REITs.
(i) Real property assets.
(ii) Partnership interests.
(iii) Shares in other REITs.
(A) In general.
(B) Information necessary.
(iv) Tiered entities.
(5) Value of shares in other REITs.
(i) In general.
(ii) Information necessary.
(iii) Tiered REITs.
(6) Real property financing assets.
(7) Application of safe harbor for partnerships controlled by REITS.
(8) REITs or partnerships controlled by REITs that do not apply the safe harbor.
(i) [Reserved]
(j) Special anti-abuse rule for certain real property trades or businesses.
(1) In general.
(2) Exceptions.
(i) De minimis exception.
(ii) Look-through exception.
(iii) Inapplicability of exceptions to consolidated groups.
(iv) Exception for certain REITs.
(3) Allocations.
(4) Examples.
(k) Applicability date.

§ 1.163(j)–10 Allocation of interest expense, interest income, and other items of expense and gross income to an excepted trade or business.

(a) Overview.
(1) In general.
(i) Purposes.
(ii) Application of section.
(2) Coordination with other rules.
(i) In general.
(ii) Treatment of investment interest, investment income, investment expenses, and certain other tax items of a partnership with a C corporation or tax-exempt corporation as a partner.
(3) Application of allocation rules to foreign corporations and foreign partnerships.
(4) Application of allocation rules to members of a consolidated group.
(i) In general.
(ii) Application of excepted business percentage to members of a consolidated group.
(iii) Basis in assets transferred in an intercompany transaction.
(5) Tax-exempt organizations.
(6) Application of allocation rules to disallowed disqualified interest.
(7) Examples.
(b) Allocation of tax items other than interest expense and interest income.
(1) In general.
(2) Gross income other than dividends and interest income.
(3) Dividends.
(i) Look-through rule.
(ii) Inapplicability of the look-through rule.
(4) Gain or loss from the disposition of non-consolidated C corporation stock, partnership interests, or S corporation stock.
(i) Non-consolidated C corporations.
(ii) Partnerships and S corporations.
(5) Expenses, losses, and other deductions.
(i) Expenses, losses, and other deductions that are definitely related to a trade or business.
(ii) Other deductions.
(6) Treatment of investment items and certain other items of a partnership with a C corporation partner.
(7) Examples: Allocation of income and expense.
(c) Allocating interest expense and interest income that is properly allocable to a trade or business.
(1) General rule.
(i) In general.
(ii) De minimis exception.
(2) Example.
(3) Asset used in more than one trade or business.
(i) General rule.
(ii) Permissible methodologies for allocating asset basis between or among two or more trades or businesses.
(iii) Special rules.
(A) Consistent allocation methodologies.
(*1*) In general.
(*2*) Consent to change allocation methodology.
(B) De minimis exception.
(C) Allocations of excepted regulated utility trades or businesses.
(*1*) In general.
(*2*) Permissible method for allocating asset basis for utility trades or businesses.
(*3*) De minimis rule for excepted utility trades or businesses.
(*4*) Example.
(D) Special allocation rule for real property trades or business subject to special anti-abuse rule.
(*1*) In general.
(*2*) Allocation methodology for real property.
(*3*) Example.
(4) Disallowed business interest expense carryforwards; floor plan financing interest expense.
(5) Additional rules relating to basis.
(i) Calculation of adjusted basis.
(A) Non-depreciable property other than land.
(B) Depreciable property other than inherently permanent structures.
(C) Special rule for land and inherently permanent structures.
(D) Depreciable or amortizable intangible property and depreciable income forecast method property.
(E) Assets not yet used in a trade or business.
(F) Trusts established to fund specific liabilities.
(G) Inherently permanent structure.
(ii) Partnership interests; stock in non-consolidated C corporations.
(A) Partnership interests.
(*1*) Calculation of asset basis.
(*2*) Allocation of asset basis.
(*i*) In general.
(*ii*) De minimis rule.
(*iii*) Partnership assets not properly allocable to a trade or business.
(*iv*) Inapplicability of partnership look-through rule.
(B) Stock in domestic non-consolidated corporations.
(*1*) In general.
(*2*) Domestic non-consolidated C corporations.
(*i*) Allocation of asset basis.
(*ii*) De minimis rule.
(*iii*) Inapplicability of corporate look-through rule.
(*iv*) Use of inside basis for purposes of C corporation look-through rule.
(*3*) S corporations.
(*i*) Calculation of asset basis.
(*ii*) Allocation of asset basis.
(*iii*) De minimis rule.
(*iv*) Inapplicability of S corporation look-through rule.
(C) Stock in relevant foreign corporations.
(*1*) In general.
(*2*) Special rule for CFC utilities.
(D) Inapplicability of look-through rule to partnerships or non-consolidated

C corporations to which the small business exemption applies.
(E) Tiered entities.
(iii) Cash and cash equivalents and customer receivables.
(iv) Deemed asset sale.
(v) Other adjustments.
(6) Determination dates; determination periods; reporting requirements.
(i) Determination dates and determination periods.
(A) Quarterly determination periods.
(B) Annual determination periods.
(ii) Application of look-through rules.
(iii) Reporting requirements.
(A) Books and records.
(B) Information statement.
(iv) Failure to file statement.
(7) Ownership threshold for look-through rules.
(i) Corporations.
(A) Asset basis.
(B) Dividends.
(ii) Partnerships.
(iii) Inapplicability of look-through rule.
(8) Anti-abuse rule.
(d) Direct allocations.
(1) In general.
(2) Qualified nonrecourse indebtedness.
(3) Assets used in more than one trade or business.
(4) Adjustments to basis of assets to account for direct allocations.
(5) Example: Direct allocation of interest expense.
(e) Examples.
(f) Applicability date.
§ 1.163(j)–11 Transition rules.
(a) Overview.
(b) Application of section 163(j) limitation if a corporation joins a consolidated group during a taxable year of the group beginning before January 1, 2018.
(1) In general.
(2) Example
(c) Treatment of disallowed disqualified interest.
(1) In general.
(2) Earnings and profits.
(3) Disallowed disqualified interest of members of an affiliated group.
(i) Scope.
(ii) Allocation of disallowed disqualified interest to members of the affiliated group.
(A) In general.
(B) Definitions.
(*1*) Allocable share of the affiliated group's disallowed disqualified interest.
(*2*) Disallowed disqualified interest ratio.
(*3*) Exempt related person interest expense.
(iii) Treatment of carryforwards.
(4) Application of section 382.
(i) Ownership change occurring before November 13, 2020.
(A) Pre-change loss.
(B) Loss corporation.
(ii) Ownership change occurring on or after November 13, 2020.
(A) Pre-change loss.
(B) Loss corporation.
(5) Treatment of excess limitation from taxable years beginning before January 1, 2018.
(6) Example: Members of an affiliated group.
(d) Applicability date.

■ **Par. 3.** Sections 1.163(j)–1 through 1.163(j)–11 are added to read as follows:

Sec.
* * * * *
1.163(j)–1 Definitions.
1.163(j)–2 Deduction for business interest expense limited.
1.163(j)–3 Relationship of the section 163(j) limitation to other provisions affecting interest.
1.163(j)–4 General rules applicable to C corporations (including REITs, RICs, and members of consolidated groups) and tax-exempt corporations.
1.163(j)–5 General rules governing disallowed business interest expense carryforwards for C corporations.
1.163(j)–6 Application of the section 163(j) limitation to partnerships and subchapter S corporations.
1.163(j)–7 Application of the section 163(j) limitation to foreign corporations and United States shareholders.
1.163(j)–8 [Reserved]
1.163(j)–9 Elections for excepted trades or businesses; safe harbor for certain REITs.
1.163(j)–10 Allocation of interest expense, interest income, and other items of expense and gross income to an excepted trade or business.
1.163(j)–11 Transition rules.
* * * * *

§ 1.163(j)–1 Definitions.

(a) *In general.* The definitions provided in this section apply for purposes of the section 163(j) regulations. For purposes of the rules set forth in §§ 1.163(j)–2 through 1.163(j)–11, additional definitions for certain terms are provided in those sections.

(b) *Definitions*—(1) *Adjusted taxable income.* The term *adjusted taxable income* (ATI) means the tentative taxable income of the taxpayer for the taxable year, with the adjustments in this paragraph (b)(1).

(i) *Additions.* The amounts of the following items that were included in the computation of the taxpayer's tentative taxable income (if any) are added to tentative taxable income to determine ATI—

(A) Any business interest expense, other than disallowed business interest expense carryforwards;

(B) Any net operating loss deduction under section 172;

(C) Any deduction under section 199A;

(D) Subject to paragraph (b)(1)(iii) of this section, for taxable years beginning before January 1, 2022, any depreciation under section 167, section 168, or section 168 of the Internal Revenue Code (Code) of 1954 (former section 168);

(E) Subject to paragraph (b)(1)(iii) of this section, for taxable years beginning before January 1, 2022, any amortization of intangibles (for example, under section 167 or 197) and other amortized expenditures (for example, under section 174(b), 195(b)(1)(B), 248, or 1245(a)(2)(C));

(F) Subject to paragraph (b)(1)(iii) of this section, for taxable years beginning before January 1, 2022, any depletion under section 611;

(G) Any deduction for a capital loss carryback or carryover; and

(H) Any deduction or loss that is not properly allocable to a non-excepted trade or business (for rules governing the allocation of items to an excepted trade or business, see §§ 1.163(j)–1(b)(44) and 1.163(j)–10).

(ii) *Subtractions.* The amounts of the following items (if any) are subtracted from the taxpayer's tentative taxable income to determine ATI —

(A) Any business interest income that was included in the computation of the taxpayer's tentative taxable income;

(B) Any floor plan financing interest expense for the taxable year that was included in the computation of the taxpayer's tentative taxable income;

(C) With respect to the sale or other disposition of property, the greater of the allowed or allowable depreciation, amortization, or depletion of the property, as provided under section 1016(a)(2), for the taxpayer (or, if the taxpayer is a member of a consolidated group, the consolidated group) for the taxable years beginning after December 31, 2017, and before January 1, 2022, with respect to such property;

(D) With respect to the sale or other disposition of stock of a member of a consolidated group by another member, the investment adjustments under § 1.1502–32 with respect to such stock that are attributable to deductions described in paragraph (b)(1)(ii)(C) of this section;

(E) With respect to the sale or other disposition of an interest in a partnership, the taxpayer's distributive share of deductions described in paragraph (b)(1)(ii)(C) of this section with respect to property held by the partnership at the time of such sale or other disposition to the extent such deductions were allowable under section 704(d);

(F) Any income or gain that is not properly allocable to a non-excepted trade or business (for rules governing the allocation of items to an excepted trade or business, see §§ 1.163(j)–1(b)(44) and 1.163(j)–10)) and that was included in the computation of the taxpayer's tentative taxable income; and

(G) An amount equal to the sum of any specified deemed inclusions that were included in the computation of the taxpayer's tentative taxable income, reduced by the portion of the deduction allowed under section 250(a) by reason of the specified deemed inclusions. For this purpose, a *specified deemed inclusion* is the inclusion of an amount by a United States shareholder (as defined in section 951(b)) in gross income under section 78, 951(a), or 951A(a) with respect to an applicable CFC (as defined in § 1.163(j)–1(b)(2)) that is properly allocable to a non-excepted trade or business. Furthermore, a specified deemed inclusion includes any amounts included in a domestic partnership's gross income under section 951(a) or 951A(a) with respect to an applicable CFC to the extent such amounts are attributable to investment income of the partnership and are allocated to a domestic C corporation that is a direct (or indirect partner) and treated as properly allocable to a non-excepted trade or business of the domestic C corporation under §§ 1.163(j)–4(b)(3) and 1.163(j)–10. To determine the amount of a specified deemed inclusion described in this paragraph (b)(1)(ii)(G), the portion of a United States shareholder's inclusion under section 951A(a) treated as being with respect to an applicable CFC is determined under section 951A(f)(2) and § 1.951A–6(b)(2).

(iii) *Depreciation, amortization, or depletion capitalized under section 263A.* For purposes of paragraph (b)(1)(i) of this section, amounts of depreciation, amortization, or depletion that are capitalized under section 263A during the taxable year are deemed to be included in the computation of the taxpayer's tentative taxable income for such taxable year, regardless of the period in which the capitalized amount is recovered. See *Example 3* in § 1.163(j)–2(h)(3).

(iv) *Application of § 1.163(j)–1(b)(1)(ii)(C), (D), and (E)*—(A) *Sale or other disposition*—(*1*) *In general.* For purposes of paragraphs (b)(1)(ii)(C), (D), and (E) of this section, except as otherwise provided in this paragraph (b)(1)(iv)(A), the term *sale or other disposition* does not include a transfer of an asset to an acquiring corporation in a transaction to which section 381(a) applies.

(*2*) *Intercompany transactions.* For purposes of paragraphs (b)(1)(ii)(C) and (D) of this section, the term *sale or other disposition* excludes all intercompany transactions, within the meaning of § 1.1502–13(b)(1)(i).

(*3*) *Deconsolidations.* Notwithstanding any other rule in this paragraph (b)(1)(iv)(A), any transaction in which a member leaves a consolidated group is treated as a sale or other disposition for purposes of paragraphs (b)(1)(ii)(C) and (D) of this section unless the transaction is described in § 1.1502–13(j)(5)(i)(A).

(B) *Deductions by members of a consolidated group.* If paragraph (b)(1)(ii)(C), (D), or (E) of this section applies to adjust the tentative taxable income of a taxpayer, the amount of the adjustment under paragraph (b)(1)(ii)(C) of this section equals the greater of the allowed or allowable depreciation, amortization, or depletion of the property, as provided under section 1016(a)(2), for any member of the consolidated group for the taxable years beginning after December 31, 2017, and before January 1, 2022, with respect to such property.

(C) *Successor assets.* This paragraph (b)(1)(iv)(C) applies if deductions described in paragraph (b)(1)(ii)(C) of this section are allowed or allowable to a consolidated group member (S) and either the depreciable property or S's stock is subsequently transferred to another member (S1) in an intercompany transaction in which the transferor receives S1 stock. If this paragraph (b)(1)(iv)(C) applies, and if the transferor's basis in the S1 stock received in the intercompany transaction is determined, in whole or in part, by reference to its basis in the S stock, the S1 stock received in the intercompany transaction is treated as a successor asset to S's stock for purposes of paragraph (b)(1)(ii)(D) of this section. Thus, except as otherwise provided in paragraph (b)(1)(iv)(D) of this section, the subsequent disposition of either the S1 stock or the S stock gives rise to an adjustment under paragraph (b)(1)(ii)(D) of this section.

(D) *Anti-duplication rule*—(*1*) *In general.* The aggregate of the subtractions from tentative taxable income of a consolidated group under paragraphs (b)(1)(ii)(C) and (D) of this section with respect to an item of property (including with regard to dispositions of successor assets described in paragraph (b)(1)(iv)(C) of this section) cannot exceed the aggregate amount of the consolidated group members' deductions described in paragraph (b)(1)(ii)(C) of this section with respect to such item of property. For example, if an adjustment to the tentative taxable income of a consolidated group is made under paragraph (b)(1)(ii)(C) of this section with respect to the sale or other disposition of property by a consolidated group member (S) to an unrelated person, and if a member of the group subsequently sells or otherwise disposes of S's stock, no further adjustment to the group's tentative taxable income is made under paragraph (b)(1)(ii)(D) of this section in relation to the same property with respect to that stock disposition.

(*2*) *Adjustments following deconsolidation.* Depreciation, amortization, or depletion deductions allowed or allowable for a corporation for a consolidated return year of a group are disregarded in applying this paragraph (b)(1)(iv)(D) to any year that constitutes a separate return year (as defined in § 1.1502–1(e)) of that corporation. For example, assume that S deconsolidates from a group (Group 1) after holding property for which depreciation, amortization, or depletion deductions were allowed or allowable in Group 1. On the deconsolidation, S and Group 1 would adjust tentative taxable income with regard to that property under paragraphs (b)(1)(ii)(D) and (b)(1)(iv)(A)(*3*) of this section. If, following the deconsolidation, S sells the property referred to in the previous sentence, no subtraction from tentative taxable income is made under paragraph (b)(1)(ii)(C) of this section during S's separate return year with regard to the amounts included in Group 1 under paragraphs (b)(1)(ii)(C) and (b)(1)(iv)(A)(*3*) of this section.

(v) *Other adjustments.* ATI is computed with the other adjustments provided in §§ 1.163(j)–2 through 1.163(j)–11.

(vi) *Additional rules relating to adjusted taxable income in other sections.* (A) For rules governing the ATI of C corporations, see §§ 1.163(j)–4(b)(2) and (3) and 1.163(j)–10(a)(2)(ii).

(B) For rules governing the ATI of RICs and REITs, see § 1.163(j)–4(b)(4).

(C) For rules governing the ATI of tax-exempt corporations, see § 1.163(j)–4(b)(5).

(D) For rules governing the ATI of consolidated groups, see § 1.163(j)–4(d)(2)(iv) and (v).

(E) For rules governing the ATI of partnerships, see § 1.163(j)–6(d).

(F) For rules governing the ATI of partners, see §§ 1.163(j)–6(e) and 1.163(j)–6(m)(1) and (2).

(G) For rules governing partnership basis adjustments affecting ATI, see § 1.163(j)–6(h)(2).

(H) For rules governing the ATI of S corporations, see § 1.163(j)–6(l)(3).

(I) For rules governing the ATI of S corporation shareholders, see § 1.163(j)–6(l)(4).

(J) For rules governing the ATI of certain beneficiaries of trusts and estates, see § 1.163(j)–2(f).

(vii) *ATI cannot be less than zero.* If the ATI of a taxpayer would be less than zero, the ATI of the taxpayer is zero.

(viii) *Examples.* The examples in this paragraph (b)(1)(viii) illustrate the application of paragraphs (b)(1)(ii), (iii), and (iv) of this section. Unless otherwise indicated, A, B, P, S, and T are calendar-year domestic C corporations; P is the parent of a consolidated group of which S and T are members; the exemption for certain small businesses in § 1.163(j)–2(d) does not apply; no entity is engaged in an excepted trade or business; no entity has business interest income or floor plan financing interest expense; and all amounts of interest expense are deductible except for the potential application of section 163(j).

(A) *Example 1*—(*1*) *Facts.* In 2021, A purchases a depreciable asset (Asset X) for $100x and fully depreciates Asset X under section 168(k). For the 2021 taxable year, A's ATI (after adding back A's depreciation deductions with respect to Asset X under paragraph (b)(1)(i)(D) of this section) is $150x. A incurs $45x of business interest expense in 2021. In 2024, A sells Asset X to an unrelated third party.

(*2*) *Analysis.* A's section 163(j) limitation for 2021 is $45x ($150x × 30 percent). Thus, all $45x of A's business interest expense incurred in 2021 is deductible in that year. However, under paragraph (b)(1)(ii)(C) of this section, A must subtract $100x from its tentative taxable income in computing its ATI for its 2024 taxable year. A would be required to subtract $100x from its tentative taxable income in computing its ATI for its 2024 taxable year even if A's ATI in 2021 was $150x before adding back A's depreciation deductions with respect to Asset X.

(*3*) *Transfer of assets in a nonrecognition transaction to which section 381 applies.* The facts are the same as in paragraph (b)(1)(viii)(A)(*1*) of this section, except that, rather than sell Asset X to an unrelated third party in 2024, A merges with and into an unrelated third party in 2024 in a transaction described in section 368(a)(1)(A) in which no gain is recognized. As provided in paragraph (b)(1)(iv)(A) of this section, the merger transaction is not treated as a ''sale or other disposition'' for purposes of paragraph (b)(1)(ii)(C) of this section. Thus, no adjustment to tentative taxable income is required in 2024 under paragraph (b)(1)(ii)(C) of this section.

(*4*) *Transfer of assets in a nonrecognition transaction to which section 351 applies.* The facts are the same as in paragraph (b)(1)(viii)(A)(*1*) of this section, except that, rather than sell Asset X to an unrelated third party in 2024, A transfers Asset X to B (A's wholly owned subsidiary) in 2024 in a transaction to which section 351 applies. The section 351 transaction is treated as a ''sale or other disposition'' for purposes of paragraph (b)(1)(ii)(C) of this section. Thus, A must subtract $100x from its tentative taxable income in computing its ATI for its 2024 taxable year.

(B) *Example 2*—(*1*) *Facts.* In 2021, S purchases a depreciable asset (Asset Y) for $100x and fully depreciates Asset Y under section 168(k). P reduces its basis in its S stock by $100x under § 1.1502–32 to reflect S's depreciation deductions. For the 2021 taxable year, the P group's ATI (after adding back S's depreciation deductions with respect to Asset Y under paragraph (b)(1)(i)(D) of this section) is $150x. The P group incurs $45x of business interest expense in 2021. In 2024, P sells all of its S stock to an unrelated third party.

(*2*) *Analysis.* The P group's section 163(j) limitation for 2021 is $45x ($150x × 30 percent). Thus, all $45x of the P group's business interest expense incurred in 2021 is deductible in that year. However, under paragraph (b)(1)(ii)(D) of this section, the P group must subtract $100x from its tentative taxable income in computing its ATI for its 2024 taxable year. The answer would be the same if the P group's ATI in 2021 were $150x before adding back S's depreciation deductions with respect to Asset Y.

(*3*) *Disposition of less than all member stock.* The facts are the same as in paragraph (b)(1)(viii)(B)(*1*) of this section, except that, in 2024, P sells half of its S stock to an unrelated third party. Pursuant to paragraph (b)(1)(ii)(D) of this section, the P group must subtract $100x from its tentative taxable income in computing its ATI for its 2024 taxable year.

(*4*) *Transfer in an intercompany transaction.* The facts are the same as in paragraph (b)(1)(viii)(B)(*1*) of this section, except that, rather than sell S's stock to an unrelated third party in 2024, P transfers S's stock to another member of the P group in an intercompany transaction (as defined in § 1.1502–13(b)(1)(i)) in 2024. As provided in paragraph (b)(1)(iv)(A) of this section, the intercompany transaction is not treated as a ''sale or other disposition'' for purposes of paragraph (b)(1)(ii)(D) of this section. Thus, no adjustment to tentative taxable income is required in 2024 under paragraph (b)(1)(ii)(D) of this section.

(*5*) *Disposition of successor assets.* The facts are the same as in paragraph (b)(1)(viii)(B)(*1*) of this section, except that, rather than sell S's stock to an unrelated third party in 2024, P transfers S's stock to T in 2024 in a transaction to which section 351 applies and, in 2025, P sells all of its T stock to an unrelated third party. Pursuant to paragraph (b)(1)(iv)(A) of this section, P's intercompany transfer of S's stock to T is not a ''sale or other disposition'' for purposes of paragraph (b)(1)(ii)(D) of this section. However, pursuant to paragraph (b)(1)(iv)(C) of this section, P's stock in T is treated as a successor asset for purposes of paragraph (b)(1)(ii)(D) of this section. Thus, the P group must subtract $100x from its tentative taxable income in computing its ATI for its 2025 taxable year.

(C) *Example 3*—(*1*) *Facts.* In 2021, S purchases a depreciable asset (Asset Z) for $100x and fully depreciates Asset Z under section 168(k). P reduces its basis in its S stock by $100x under § 1.1502–32 to reflect S's depreciation deductions. For the 2021 taxable year, the P group's ATI (after adding back S's depreciation deductions with respect to Asset Z under paragraph (b)(1)(i)(D) of this section) is $150x. The P group incurs $45x of business interest expense in 2021. In 2024, S sells Asset Z to an unrelated third party. In 2025, P sells all of its S stock to a member of another consolidated group.

(*2*) *Analysis.* Under paragraph (b)(1)(ii)(C) of this section, the P group must subtract $100x from its tentative taxable income in computing its ATI for its 2024 taxable year. The answer would be the same if the P group's ATI in 2021 were $150x before adding back S's depreciation deductions with respect to Asset Z. P's sale of all of its S stock in 2025 is a ''sale or other disposition'' for purposes of paragraph (b)(1)(ii)(D) of this section. However, pursuant to paragraph (b)(1)(iv)(D)(*1*) of this section, no further adjustment to the P group's tentative taxable income is required in 2025 under paragraph (b)(1)(ii)(D) of this section.

(*3*) *Disposition of S stock prior to S's asset disposition.* The facts are the same as in paragraph (b)(1)(viii)(C)(*1*) of this section, except that, in 2024, P sells all of its S stock to a member of another consolidated group and, in 2025, S sells Asset Z to an unrelated third party. Pursuant to paragraph (b)(1)(ii)(D) of this section, the P group must subtract $100x from its tentative taxable income in computing its ATI for its 2024 taxable year. Pursuant to paragraph (b)(1)(iv)(D)(*2*) of this section, no adjustment to the acquiring group's tentative taxable income is required in 2025 under paragraph (b)(1)(ii)(C) of this section.

(*4*) *Transfer of S stock in nonrecognition transaction.* The facts are the same as in paragraph (b)(1)(vii)(C)(*3*) of this section, except that, rather than sell all of S's stock to a member of another consolidated group, P causes S to merge with and into a member of another consolidated group in a transaction described in section 368(a)(1)(A). As provided in paragraph (b)(1)(iv)(A) of this section, the merger transaction is treated as a ''sale or other disposition'' for purposes of paragraph (b)(1)(ii)(D) of this section because S leaves the P group. Thus, the results are the same as in paragraph (b)(1)(vii)(C)(*3*) of this section.

(D) *Example 4*—(*1*) *Facts.* P wholly owns T, which wholly owns S. In 2021, S purchases a depreciable asset (Asset AA) for $100x and fully depreciates Asset AA under section 168(k). T reduces its basis in its S stock, and P reduces its basis in its T stock, by $100x under § 1.1502–32 to reflect S's depreciation deductions. For the 2021 taxable year, the P group's ATI (after adding back S's depreciation deductions with respect to Asset AA under paragraph (b)(1)(i)(D) of this section) is $150x. The P group incurs $45x of business interest expense in 2021. In 2024, T sells all of its S stock to a member of another consolidated group. In 2025, P sells all of its T stock to a member of another consolidated group.

(*2*) *Analysis.* Pursuant to paragraph (b)(1)(ii)(D) of this section, the P group must subtract $100x from its tentative taxable income in computing its ATI for its 2024 taxable year. Pursuant to paragraph (b)(1)(iv)(D)(*1*) of this section, no adjustment to the P group's tentative taxable income is required in 2025 under paragraph (b)(1)(ii)(D) of this section.

(2) *Applicable CFC.* The term *applicable CFC* means a foreign corporation described in section 957, but only if the foreign corporation has at least one United States shareholder that owns, within the meaning of section 958(a), stock of the foreign corporation.

(3) *Business interest expense*—(i) *In general.* The term *business interest expense* means interest expense that is properly allocable to a non-excepted trade or business or that is floor plan financing interest expense. Business interest expense also includes disallowed business interest expense carryforwards (as defined in paragraph (b)(11) of this section). However, business interest expense does not include amounts of interest expense carried forward to the taxable year from a prior taxable year due to the application of section 465 or section 469, which apply after the application of section 163(j). For the treatment of investment interest, see section 163(d); and for the treatment of personal interest, see section 163(h).

(ii) *Special rules.* For special rules for defining business interest expense in certain circumstances, see §§ 1.163(j)–3(b)(2) (regarding disallowed interest expense), 1.163(j)–4(b) (regarding C corporations) and 1.163(j)–4(d)(2)(iii) (regarding consolidated groups), 1.163(j)–1(b)(9) (regarding current-year business interest expense), and 1.163(j)–6(c) (regarding partnerships and S corporations).

(4) *Business interest income*—(i) *In general.* The term *business interest income* means interest income includible in the gross income of a taxpayer for the taxable year which is properly allocable to a non-excepted trade or business. For the treatment of investment income, see section 163(d).

(ii) *Special rules.* For special rules defining business interest income in certain circumstances, see §§ 1.163(j)–4(b) (regarding C corporations), 1.163(j)–4(d)(2)(iii) (regarding consolidated groups), and 1.163(j)–6(c) (regarding partnerships and S corporations).

(5) *C corporation.* The term *C corporation* has the meaning provided in section 1361(a)(2).

(6) *Cleared swap.* The term *cleared swap* means a swap that is cleared by a derivatives clearing organization, as such term is defined in section 1a of the Commodity Exchange Act (7 U.S.C. 1a), or by a clearing agency, as such term is defined in section 3 of the Securities Exchange Act of 1934 (15 U.S.C. 78c), that is registered as a derivatives clearing organization under the Commodity Exchange Act or as a clearing agency under the Securities Exchange Act of 1934, respectively, if the derivatives clearing organization or clearing agency requires the parties to the swap to post and collect margin or collateral.

(7) *Consolidated group.* The term *consolidated group* has the meaning provided in § 1.1502–1(h).

(8) *Consolidated return year.* The term *consolidated return year* has the meaning provided in § 1.1502–1(d).

(9) *Current-year business interest expense.* The term *current-year business interest expense* means business interest expense that would be deductible in the current taxable year without regard to section 163(j) and that is not a disallowed business interest expense carryforward from a prior taxable year.

(10) *Disallowed business interest expense.* The term *disallowed business interest expense* means the amount of business interest expense for a taxable year in excess of the amount allowed as a deduction for the taxable year under section 163(j)(1) and § 1.163(j)–2(b). For purposes of section 163(j) and the regulations in this part under section 163(j) of the Internal Revenue Code (Code) disallowed business interest expense is treated as ''paid or accrued'' in the taxable year in which the expense is deductible for Federal income tax purposes (without regard to section 163(j)) or in the taxable year in which a deduction for the business interest expense is permitted under section 163(j), as the context may require.

(11) *Disallowed business interest expense carryforward.* The term *disallowed business interest expense carryforward* means any business interest expense described in § 1.163(j)–2(c).

(12) *Disallowed disqualified interest.* The term *disallowed disqualified interest* means interest expense, including carryforwards, for which a deduction was disallowed under old section 163(j) (as defined in paragraph (b)(27) of this section) in the taxpayer's last taxable year beginning before January 1, 2018, and that was carried forward pursuant to old section 163(j).

(13) *Electing farming business.* The term *electing farming business* means a trade or business that makes an election as provided in § 1.163(j)–9 or other published guidance and that is—

(i) A farming business, as defined in section 263A(e)(4) or § 1.263A–4(a)(4);

(ii) Any trade or business of a specified agricultural or horticultural cooperative, as defined in section 199A(g)(4); or

(iii) Specifically designated by the Secretary in guidance published in the **Federal Register** or the Internal Revenue Bulletin (see § 601.601(d) of this chapter) as a farming business for purposes of section 163(j).

(14) *Electing real property trade or business.* The term *electing real property trade or business* means a trade or business that makes an election as provided in § 1.163(j)–9 or other published guidance and that is—

(i) A real property trade or business described in section 469(c)(7)(C) and § 1.469–9(b)(2); or

(ii) A REIT that qualifies for the safe harbor described in § 1.163(j)–9(h); or

(iii) A trade or business specifically designated by the Secretary in guidance published in the **Federal Register** or the

Internal Revenue Bulletin (see § 601.601(d) of this chapter) as a real property trade or business for purposes of section 163(j).

(15) *Excepted regulated utility trade or business*—(i) *In general.* The term *excepted regulated utility trade or business* means:

(A) *Automatically excepted regulated utility trades or businesses.* A trade or business—

(*1*) That furnishes or sells—

(*i*) Electrical energy, water, or sewage disposal services;

(*ii*) Gas or steam through a local distribution system; or

(*iii*) Transportation of gas or steam by pipeline; but only

(*2*) To the extent that the rates for the furnishing or sale of the items in paragraph (b)(15)(i)(A)(*1*) of this section—

(*i*) Have been established or approved by a State or political subdivision thereof, by any agency or instrumentality of the United States, or by a public service or public utility commission or other similar body of any State or political subdivision thereof and are determined on a cost of service and rate of return basis; or

(*ii*) Have been established or approved by the governing or ratemaking body of an electric cooperative; or

(B) *Electing regulated utility trades or businesses.* A trade or business that makes a valid election under paragraph (b)(15)(iii) of this section; or

(C) *Designated excepted regulated utility trades or businesses.* A trade or business that is specifically designated by the Secretary in guidance published in the **Federal Register** or the Internal Revenue Bulletin as an excepted regulated utility trade or business (see § 601.601(d) of this chapter) for section 163(j) purposes.

(ii) *Depreciation and excepted and non-excepted utility trades or businesses.*

(A) *Depreciation.* Taxpayers engaged in an excepted trade or business described in paragraph (b)(15)(i) of this section cannot claim the additional first-year depreciation deduction under section 168(k) for any property that is primarily used in the excepted regulated utility trade or business.

(B) *Allocation of items.* If a taxpayer is engaged in one or more excepted trades or businesses, as described in paragraph (b)(15)(i) of this section, and one or more non-excepted trades or businesses, the taxpayer must allocate items between the excepted and non-excepted utility trades or businesses. See §§ 1.163(j)–1(b)(44) and 1.163(j)–10(c)(3)(iii)(C). Some trades or businesses with de minimis furnishing or sales of items described in paragraph (b)(15)(i)(A)(*1*) of this section that are not sold pursuant to rates that are determined on a cost of service and rate of return basis or established or approved by the governing or ratemaking body of an electric cooperative, and are not subject to an election in paragraph (b)(15)(iii), are treated as excepted trades or businesses. See § 1.163(j)–10(c)(3)(iii)(C)(*3*). For look-through rules applicable to certain CFCs that furnish or sell items described in paragraph (b)(15)(i)(A)(*1*) of this section that are not sold pursuant to rates that are determined on a cost of service and rate of return basis or established or approved by the governing or ratemaking body of an electric cooperative as described in paragraph (b)(15)(i)(A)(*2*) of this section, see § 1.163(j)–10(c)(5)(ii)(C).

(iii) *Election to be an excepted regulated utility trade or business.* (A) *In general.* A trade or business that is not an excepted regulated utility trade or business described in paragraph (b)(15)(i)(A) or (C) of this section and that furnishes or sells items described in paragraph (b)(15)(i)(A)(*1*) of this section is eligible to make an election to be an excepted regulated utility trade or business to the extent that the rates for furnishing or selling the items described in paragraph (b)(15)(i)(A)(*1*) of this section have been established or approved by a regulatory body described in paragraph (b)(15)(i)(A)(*2*)(i) of this section.

(B) *Scope and effect of election*—(*1*) *In general.* An election under paragraph (b)(15)(iii) of this section is made with respect to each eligible trade or business of the taxpayer and applies only to the trade or business for which the election is made. An election under paragraph (b)(15)(iii) of this section applies to the taxable year in which the election is made and to all subsequent taxable years.

(*2*) *Irrevocability.* An election under paragraph (b)(15)(iii) of this section is irrevocable.

(C) *Time and manner of making election*—(*1*) *In general.* Subject to paragraph (b)(15)(iii)(C)(*5*) of this section, a taxpayer makes an election under paragraph (b)(15)(iii) by attaching an election statement to the taxpayer's timely filed original Federal income tax return, including extensions. A taxpayer may make elections for multiple trades or businesses on a single election statement.

(*2*) *Election statement contents.* The election statement should be titled ''Section 1.163(j)–1(b)(15)(iii) Election'' and must contain the following information for each trade or business:

(*i*) The taxpayer's name;

(*ii*) The taxpayer's address;

(*iii*) The taxpayer's social security number (SSN) or employer identification number (EIN);

(*iv*) A description of the taxpayer's electing trade or business sufficient to demonstrate qualification for an election under this section, including the principal business activity code; and

(*v*) A statement that the taxpayer is making an election under section 1.163(j)–1(b)(15)(iii).

(*3*) *Consolidated group's or partnership's trade or business.* The rules in § 1.163(j)–9(d)(3) and (4) apply with respect to an election under paragraph (b)(15)(iii) of this section for a consolidated group's or partnership's trade or business.

(*4*) *Termination of election.* The rules in § 1.163(j)–9(e) apply to determine when an election under paragraph (b)(15)(iii) of this section terminates.

(*5*) *Additional guidance.* The rules and procedures regarding the time and manner of making an election under paragraph (b)(15)(iii) of this section and the election statement contents in paragraph (b)(15)(iii)(C)(*2*) of this section may be modified through other guidance (see §§ 601.601(d) and 601.602 of this chapter). Additional situations in which an election may terminate under paragraph (b)(15)(iii)(C)(*4*) of this section may be provided through guidance published in the **Federal Register** or in the Internal Revenue Bulletin (see § 601.601(d) of this chapter).

(16) *Excess business interest expense.* For any partnership, the term *excess business interest expense* means the amount of disallowed business interest expense of the partnership for a taxable year under section § 1.163(j)–2(b). With respect to a partner, see § 1.163(j)–6(g) and (h).

(17) *Excess taxable income.* With respect to any partnership or S corporation, the term *excess taxable income* means the amount which bears the same ratio to the partnership's ATI as—

(i) The excess (if any) of—

(A) The amount determined for the partnership or S corporation under section 163(j)(1)(B); over

(B) The amount (if any) by which the business interest expense of the partnership, reduced by the floor plan financing interest expense, exceeds the business interest income of the partnership or S corporation; bears to

(ii) The amount determined for the partnership or S corporation under section 163(j)(1)(B).

(18) *Floor plan financing indebtedness.* The term floor plan

financing indebtedness means indebtedness—

(i) Used to finance the acquisition of motor vehicles held for sale or lease; and

(ii) Secured by the motor vehicles so acquired.

(19) *Floor plan financing interest expense.* The term *floor plan financing interest expense* means interest paid or accrued on floor plan financing indebtedness. For purposes of the section 163(j) regulations, all floor plan financing interest expense is treated as business interest expense. See paragraph (b)(3) of this section.

(20) *Group.* The term *group* has the meaning provided in § 1.1502–1(a).

(21) *Intercompany transaction.* The term *intercompany transaction* has the meaning provided in § 1.1502–13(b)(1)(i).

(22) *Interest.* The term *interest* means any amount described in paragraph (b)(22)(i), (ii), (iii), or (iv) of this section.
