

with other special use authorization forms.

FS-2700-5a, Term Special Use Permit for Recreation Residences, and Grand Island FS-2700-5a Grand Island, Term Special Use Permit for Recreation Residences in the Grand Island National Recreation Area. The maintenance of improvements clause in both forms would be revised to conform to the wording for that clause in other authorization forms. In particular, the revisions would provide for consistency with other permit terms and for changes to maintenance standards when deemed necessary to meet statutory, regulatory, or policy requirements or to protect national forest resources. The standard bonding clause in special use authorization forms, which gives the authorized officer discretion to require a bond, would be added to both forms.

The nonpayment clause in both forms would be revised to provide for permit termination if the holder fails to pay the cabin user fee, interest, or other charges within 90 calendar days of the due date, consistent with other special use authorization forms.

The standard clause addressing continuation of obligations and liabilities beyond permit expiration or revocation would be added to FS-2700-5a and Grand Island FS-2700-5a. In addition, a standard clause providing for termination of the permit for development of hydroelectric power or reclamation purposes is included in the permit when the authorized NFS lands are withdrawn for hydroelectric power or reclamation purposes. This clause would be added to FS-2700-5a and Grand Island FS-2700-5a for inclusion as applicable.

FS-2700-10c, Communications Use Permit for Federal Agencies. The risk of loss clause in this form would be revised to track the risk of loss clause for federal entities in FS-2700-4 with regard to conducting an analysis to determine whether the authorized facilities can be safely occupied in the future and whether rebuilding should be allowed. In addition, the standard clause providing for termination of the permit for development of hydroelectric power or reclamation purposes would be added to FS-2700-10c for inclusion in the permit when the authorized NFS lands are withdrawn for hydroelectric power or reclamation purposes.
