

(3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

The Proposed Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA proposes to amend 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive (AD):

Pilatus Aircraft Limited: Docket No. FAA–2020–0813; Product Identifier 2019–CE–040–AD.

(a) Comments Due Date

The FAA must receive comments by November 2, 2020.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Pilatus Aircraft Limited Model PC–12/47E airplanes, all serial numbers, certificated in any category.

(d) Subject

Air Transport Association of America (ATA) Code 27: Flight Controls.

(e) Reason

This AD was prompted by mandatory continuing airworthiness information (MCAI) originated by an aviation authority of another country to identify and correct an unsafe condition on an aviation product. The MCAI describes the unsafe condition as inboard flap fairings aft (IFFAs) having an incorrect shape, which could lead to chafing between the IFFA and the front inboard tension rod, and consequently corrosion of the bare rod aluminum tube and reduced aluminum thickness. This condition, if not corrected, could lead to failure of the inboard flap drive arm, asymmetric flap extension, and reduced control of the airplane.

(f) Actions and Compliance

(1) Unless already done, within 100 hours time-in-service (TIS) after the effective date of this AD or within 6 months after the effective date of this AD, whichever occurs first, inspect the left-hand (LH) and right-hand (RH) IFFAs for correct shape and clearance with the LH and RH tension rods by following step 3.B.(1) and Figures 2 and

3 of the Accomplishment Instructions—Aircraft in Pilatus PC–12 Service Bulletin No: 27–026, dated July 10, 2019 (Pilatus SB 27–026).

(i) If the shape of the LH or RH IFFA is incorrect or if the clearance between the IFFA and the tension rod is less than 5 mm (0.2 inch), before further flight, modify the IFFA and inspect the tension rods for chafing by following section 3.C. of the Accomplishment Instructions—Aircraft in Pilatus SB 27–026.

(ii) If the shape of the LH and RH IFFAs is correct and the clearance between the IFFA and the tension rod is at least 5 mm (0.2 inch), before further flight, inspect the front inboard LH and RH tension rods for chafing by following step 3.C.(12)(a) of the Accomplishment Instructions—Aircraft in Pilatus SB 27–026. If the LH or RH tension rod has any chafing, before further flight, replace the tension rod by following step 3.C.(12)(b) of the Accomplishment Instructions—Aircraft in Pilatus SB 27–026.

(2) As of the effective date of this AD, do not install on any airplane a LH IFFA part number (P/N) 557.52.12.223, RH IFFA P/N 557.52.12.224, or tension rod P/N 527.52.12.135 unless the part has been inspected and all corrective actions have been taken as required by this AD.

(g) Alternative Methods of Compliance (AMOCs):

The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD if requested using the procedures found in 14 CFR 39.19. Send information to ATTN: Doug Rudolph, Aerospace Engineer, FAA, General Aviation & Rotorcraft Section, International Validation Branch, 901 Locust, Room 301, Kansas City, Missouri 64106; telephone: (816) 329–4059; fax: (816) 329–4090; email: doug.rudolph@faa.gov. Before using any approved AMOC on any airplane to which the AMOC applies, notify your appropriate principal inspector (PI) in the FAA Flight Standards District Office (FSDO), or lacking a PI, your local FSDO.

(h) Related Information

(1) Refer to MCAI European Union Aviation Safety Agency AD No. 2019–0231, dated September 13, 2019, for related information. You may examine the MCAI on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA–2020–0813.

(2) For service information related to this AD, contact Pilatus Aircraft, Ltd., Customer Support PC–12, CH–6371 Stans, Switzerland; telephone: +41 41 619 33 33; fax: +41 41 619 73 11; email: supportPC12@pilatus-aircraft.com; internet: <https://www.pilatus-aircraft.com>. You may review this referenced service information at the FAA, Airworthiness Products Section, Operational Safety Branch, 901 Locust, Kansas City, Missouri 64106. For information on the availability of this material at the FAA, call (816) 329–4148.

Issued on September 9, 2020.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket No. FAA–2020–0800; Airspace Docket No. 20–ANM–43]

RIN 2120–AA66

Proposed Revocation of Class D and Amendment of Class E Airspace; Gillette, WY

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This action proposes to remove the Class D airspace and modify the following: Class E surface area, the Class E airspace as an extension to the surface area and the Class E airspace extending upward from 700 feet AGL at Gillette-County Airport, Gillette, WY. In addition, this proposal would remove the VOR/DME from the legal description and replace the outdated term Airport Facility/Directory with the term Chart Supplement.

After being informed that the Airport Traffic Control Tower at Gillette-County Airport is closed permanently, the FAA found it necessary to amend the existing airspace for the safety and management of Instrument Flight Rules (IFR) operations at this airport.

DATES: Comments must be received on or before November 2, 2020.

ADDRESSES: Send comments on this proposal to the U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12–140, Washington, DC 20590; telephone: 1–800–647–5527, or (202) 366–9826. You must identify FAA Docket No. FAA–2020–0800; Airspace Docket No. 20–ANM–43, at the beginning of your comments. You may also submit comments through the internet at <https://www.regulations.gov>.

FAA Order 7400.11E, Airspace Designations and Reporting Points, and subsequent amendments can be viewed online at https://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence

Avenue SW, Washington, DC 20591; telephone: (202) 267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11E at NARA, email fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FOR FURTHER INFORMATION CONTACT:

Richard Roberts, Federal Aviation Administration, Western Service Center, Operations Support Group, 2200 S. 216th Street, Des Moines, WA 98198; telephone (206) 231-2245.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would remove the Class D and modify the Class E airspace at Gillette-County Airport, Gillette, WY to support IFR operations at the airport.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify both docket numbers and be submitted in triplicate to the address listed above. Persons wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. FAA-2020-0800; Airspace Docket No. 20-ANM-43". The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <https://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received, and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for the address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined during normal business hours at the Northwest Mountain Regional Office of the Federal Aviation Administration, Air Traffic Organization, Western Service Center, Operations Support Group, 2200 S. 216th Street, Des Moines, WA 98198.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the **ADDRESSES** section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to 14 CFR part 71 to remove the Class D airspace and modify the following: Class E surface area, the Class E airspace as an extension to the Class E surface area and the Class E airspace extending upward from 700 feet AGL at Gillette-Campbell County Airport, Gillette, WY.

The FAA was informed that the Airport Traffic Control Tower at Gillette-Campbell County Airport is closed, which is a basic qualification for the establishment of Class D airspace. As a result, the FAA is proposing to remove the Class D airspace and modify the Class E Surface Airspace at the airport. The Class E surface airspace

would be expanded from 4.3 miles to 5 miles to ensure departures are contained in the surface area until reaching 700 feet AGL.

The Class E airspace extending upward from the surface as an extension to the Class E surface area would be expanded to 3.4 miles each side of the 170° bearing from 3 miles to 12 miles (formerly 12.2 miles) south of the airport. This adjustment would protect aircraft as they descend through 1,000 feet AGL, while using the RNAV and ILS approaches to runway 34.

The Class E airspace extending upward from 700 feet would be modified to within 4 miles each side of the 170° and 350° bearings (reduced from 6.1 miles east and 8.3 miles west) and extend 14 miles south (reduced from 15.3 miles) and 11 miles north (reduced from 16.1 miles). The additional airspace is no longer needed to protect departing aircraft to 1,200 feet and arrivals as they descend through 1,500 feet AGL. This proposal would remove the Class E airspace extending upward from 1,200 feet as it is redundant with the Denver E6 airspace and no longer needed.

In addition, the legal descriptions for the Class E airspace extending upward from the surface as an extension to the Class E surface area and the Class E airspace extending upward from 700 feet would be rewritten to eliminate the use of the VOR/DME as a reference point. The VOR/DME is no longer needed to adequately describe the airspace.

The use of the term Airport Facility/Directory would be replaced with Chart Supplement and the geographical coordinates updated to match the FAA database.

Class E airspace designations are published in paragraph 5000, 6002, 6004, 6005 of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order. FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current, is non-controversial and unlikely to result in adverse or negative comments. It, therefore: (1) Is not a "significant regulatory action" under

Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, would not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

■ 1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

■ 2. The incorporation by reference in 14 CFR 71.1 of FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

Paragraph 5000 Class D Airspace.

* * * * *

ANM WY D Gillette, WY [Remove]

Gillette-Campbell County Airport, WY
(Lat. 44°20′56″ N, long. 105°32′22″ W)

Paragraph 6002. Class E Airspace Designated as Surface Areas.

* * * * *

ANM WY E2 Gillette, WY [Amended]

Gillette-Campbell County Airport, WY
(Lat. 44°20′56″ N, long. 105°32′22″ W)

That airspace extending upward from the surface to and including 6,900 feet MSL within a 5-mile radius of the Gillette-Campbell County Airport. This Class E airspace is effective during the specific dates

and times established in advance by a Notice to Airmen. The effective date and time will thereafter be continuously published in the Chart Supplement.

Paragraph 6004 Class E Airspace Areas Designated as an Extension to a Class D or Class E Surface Area.

* * * * *

ANM WY E4 Gillette, WY [Amended]

Gillette-Campbell County Airport, WY
(Lat. 44°20′56″ N, long. 105°32′22″ W)

That airspace extending upward from the surface within 3.4 miles each side of the Gillette County Airport 170° bearing extending from the 5-mile radius of Gillette-Campbell County Airport to 12 miles south of the airport.

Paragraph 6005 Class E Airspace Areas Extending Upward from 700 feet or More Above the Surface of the Earth.

* * * * *

ANM WY E5 Gillette, WY [Amended]

Gillette-Campbell County Airport, WY
(Lat. 44°20′56″ N, long. 105°32′22″ W)

That airspace extending upward from 700 feet above the surface of the earth within 4 miles each side of the 170° bearing extending from the 5-mile radius to 14 miles south of the airport, and that airspace 4 miles each side of the 350° bearing extending from the 5-mile radius to 11 miles north of the airport.

Issued in Seattle, Washington, on
September 8, 2020.

Byron Chew,

*Acting Manager, Operations Support Group,
Western Service Center.*

BILLING CODE 4910–13–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2020–0334]

RIN 1625–AA09

Drawbridge Operation Regulation; New Jersey Intracoastal Waterway, Atlantic City, NJ

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard proposes to temporarily modify the operating schedule that governs the Route 30 (Absecon Boulevard) Bridge across the New Jersey Intracoastal Waterway (NJICW), Beach Thorofare, mile 67.2, at Atlantic City, NJ. This proposed temporary modification will allow the drawbridge to remain in the closed-to-navigation position to accommodate critical bridge maintenance.

DATES: Comments and relate material must reach the Coast Guard on or before October 16, 2020.

ADDRESSES: You may submit comments identified by docket number USCG–2020–0334 using Federal e-Rulemaking Portal at <https://www.regulations.gov>. See the “Public Participation and Request for Comments” portion of the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions on this proposed rule, call or email Mr. Mickey Sanders, Bridge Administration Branch, Fifth District, U.S. Coast Guard, telephone (757) 398–6587, email Mickey.D.Sanders2@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations
DHS Department of Homeland Security
FR Federal Register
OMB Office of Management and Budget
NPRM Notice of Proposed Rulemaking
(Advance, Supplemental)
§ Section
U.S.C. United States Code
NJICW New Jersey Intercoastal Waterway

II. Background, Purpose and Legal Basis

The New Jersey Department of Transportation, who owns and operates the Route 30 (Absecon Boulevard) Bridge, across the NJICW, Beach Thorofare, at mile 67.2, in Atlantic City, NJ, has requested this modification to allow the drawbridge to be maintained in the closed-to-navigation position to facilitate bridge maintenance of the drawbridge. The Route 30 (Absecon Boulevard) Bridge, across the NJICW, Beach Thorofare, mile 67.2, at Atlantic City, NJ, has a vertical clearance of 20 feet above mean high water in the closed position and unlimited vertical clearance above mean high water in the open position. The current operating schedule for the drawbridge is published in 33 CFR 117.733 (e).

This proposed temporary final rule is necessary to facilitate maintenance of the drawbridge, while ensuring the safety of those performing bridge maintenance and vessels navigating in the area. A work platform will reduce the horizontal clearance of the navigation channel to approximately 30 feet and temporary shielding will reduce the vertical clearance of the entire bridge to approximately 19 feet above mean high water in the closed position. Vessels that can safely transit through the bridge in the closed position with the reduced clearances may do so, if at least thirty minutes
