

IV. Request for Public Comment

EPA requests public comment on the proposed 2020 FCA. Specifically, EPA is requesting comments on the following:

Requests for Comment on Overarching Matters

1. Should EPA's previous FCA documents be consolidated into the 2020 FCA, as proposed, or should EPA continue to use the 1997 FCA Guidance as the controlling guidance with the 2020 revisions serving as a supplement?

2. In addition to the data sets that are discussed in this document, what other data sets are you aware of that meet NAPA's criteria as identified in the October 2017 report, "Developing a New Framework for Community Affordability of Clean Water Services"?

3. What additional resources are publicly available that can be used to assess financial capability (e.g., the ALICE Essentials Index¹²)?

4. What additional examples, calculations, or templates would you like EPA to develop to assist with assessing financial capability?

Requests for Comment on the Proposed FY2020 FCA Supplement

5. EPA invites comment on the appropriateness of using the four recommended critical metrics to assess financial capability and what their relative importance in considering financial capability should be.

6. What supplemental information is relevant to support implementation schedules that go beyond the proposed benchmarks in Exhibit 6?

7. Is EPA distinguishing appropriately between critical and other metrics?

8. EPA is seeking comment on the proposed methodology for calculating the ratio for lowest quintile household size to median household size.

9. EPA invites public comment on whether adjusting the LQRI based on household size is appropriate or if there are other ways to calculate a residential indicator for LQI households.

10. EPA is seeking comment on whether the same benchmarks for assessing the MHI Residential Indicator should be used for assessing the Lowest Quintile Residential Indicator (LQRI), as proposed, or if different benchmarks should be used.

11. EPA is seeking comment on the list of proposed poverty indicators and on whether the bracketing of the middle

50% is an appropriate method to benchmark the proposed poverty indicators.

12. EPA is seeking public comment on the proposed schedule benchmarks in Exhibit 6.

13. What other resources, in addition to those listed in Section IV of the proposed 2020 FCA (Resources), are available to assist communities related to water infrastructure financing?

14. EPA is seeking comment on whether additional detail can be provided to better understand implementation of Alternative 2.

15. Should drinking water costs be considered as part of scheduling considerations and are there appropriate benchmarks for considering the contribution of drinking water costs to household burdens, such as a specific percentage of income?

Requests for Comment Related to Water Quality Standard Decisions

16. EPA is also considering how the LQRI, PI, and other metrics and thresholds discussed in this **Federal Register** document could be used to support WQS decisions. EPA seeks comment on the use of these same metrics and thresholds under Alternative 1 for use in WQS decisions using the proposed expanded matrix in Appendix D. This proposed matrix provides guidance on how to apply the options and flexibilities of Alternative 1 in the proposed 2020 FCA to the consideration of economic impacts to support WQS decisions related to public entities. EPA intends that the proposed expanded matrix for WQS decisions, along with the electronic spreadsheet tools for the public sector at <https://www.epa.gov/wqs-tech/spreadsheet-tools-evaluate-economic-impacts-public-sector>, would replace the worksheets and calculations for the public sector sections of the 1995 WQS Guidance. This replacement would be used for determining the degree of economic impact for use in WQS decisions for the public sector. The proposed 2020 FCA does not revise the recommended methodology in the private sector sections of the 1995 WQS Guidance. EPA is separately exploring whether there are practical methodologies available to increase the objectivity of the analyses recommended to determine the degree of economic impact on private sector entities when evaluating these same WQS decisions.
