SUPPLEMENTARY INFORMATION: *Title:* Federal-Aid Highway Construction Equal Employment Opportunity.

Background: Title 23, Part 140(a), requires the FHWA to ensure equal opportunity regarding contractors' employment practices on Federal-aid highway projects. To carry out this requirement, the contractors must submit employment workforce data to the State Transportation Agencies (STAs) on all work being performed on Federal-aid contracts during all or any part of the last payroll period preceding the end of July. This report provides the employment workforce data on these contracts and includes the number of minorities, women, and non-minorities in specific highway construction job categories. This information is reported on Form PR-1391, Federal-Aid Highway Construction Contractors Summary of Employment Data. The statute also requires the STAs to submit a report to the FHWA summarizing the data entered on the PR-1391 forms. This summary data is provided on Form PR-1392, Federal-Aid Highway Construction Contractors Summary of Employment Data. The STAs and FHWA use this data to identify patterns and trends of employment in the highway construction industry, and to determine the adequacy and impact of the STA's and FHWA's contract compliance and on-the-job (OJT) training programs. The STAs use this information to monitor the contractors' employment and training of minorities and women in the traditional highway construction crafts. Additionally, the data is used by FHWA to provide summarization, trend analyses to Congress, DOT, and FHWA officials as well as others who request information relating to the Federal-aid highway construction EEO program. The information is also used in making decisions regarding resource allocation; program emphasis; marketing and promotion activities; training; and compliance efforts.

Respondents: 11,077 annual respondents for form PR-1391, and 53 STAs and Territory annual respondents for Form PR-1392 that, total of 11,130.

Frequency: Annually.

Estimated Average Burden per Response: FHWA estimates it takes 30 minutes for Federal-aid contractors to complete and submit Form PR-1391 and 8 hours for STAs to complete and submit Form PR-1392.

Estimated Total Amount Burden Hours: Form PR-1391- 5,539 hours per year; *Form PR-1392-* 416 hours per year, total of 5,955 hours annually.

Public Comments Invited: You are asked to comment on any aspect of this information collection, including: (1) Whether the proposed collection is necessary for the FHWA's performance; (2) the accuracy of the estimated burdens; (3) ways for the FHWA to enhance the quality, usefulness, and clarity of the collected information; and (4) ways that the burden could be minimized, including the use of electronic technology, without reducing the quality of the collected information. The agency will summarize and/or include your comments in the request for OMB's clearance of this information collection.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. Chapter 35, as amended; and 49 CFR 1.48.

Issued On: September 15, 2020.

BILLING CODE 4910-22-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2020-0073]

Petition for Waiver of Compliance

Under part 211 of title 49 Code of Federal Regulations (CFR), this document provides the public notice that on September 2, 2020, the Virginia Museum of Transportation (VMTX) petitioned the Federal Railroad Administration (FRA) for a waiver of compliance from certain provisions of the Federal railroad safety regulations contained at 49 CFR part 230, Steam Locomotive Inspection and Maintenance Standards. FRA assigned the petition Docket Number FRA-2020-0073.

VMTX is a non-profit organization based in Roanoke, Virginia. It maintains and operates steam locomotive No. 611, which was built in 1944 by the Norfolk & Western Roanoke Shops and is used for educational displays at various railroad museums and special trains operating mostly in the Mid-Atlantic region. VMTX seeks relief from 49 CFR 230.41(a), *General*, with respect to the 5-year inspection interval for flexible staybolts with caps. Specifically, VMTX requests permission to perform the 5-year flexible staybolt inspection at the 7-year, 6-month interval. VMTX contends that due to few service days, extending

the 5-year inspection for removing the caps will not increase safety risk or otherwise compromise public safety.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- *Hand Delivery:* 1200 New Jersey Ave. SE, Room W12-140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Communications received by November 2, 2020 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable.
