

II. Method of Collection

The collection of data occurs in accordance with the rules established by interagency agreements with the participating state partners or data sharing agreements that have been established within the Census Bureau. For state partners, their data is submitted directly to the Census secure servers where Personally Identifiable Information (PII) goes through a process to replace it with Protected Identification Keys (PIK). This PVS (Person Identification Validation System) process also applies to all other administrative data that are used in the LEHD infrastructure. For all other required administration data, they are transferred or referenced by the LEHD production system. Data collection and processing also includes activities such as validation of data quality.

LEHD's data products are not generated by a traditional survey. Rather, all input data required is collected electronically as follows:

- State Unemployment Insurance (UI) and Quarterly Census of Employment and Wages (QCEW) are provided via encrypted File Transfer Protocol (FTP) through which each state LMI agency sends these data directly to the Census Bureau. This transfer of data is governed by Memorandum of Understandings (MOUs) with each state partner.
- Federal and Census Administrative data are acquired from other directorates or divisions within the Census Bureau with which an internal agreement has been established for the use of the data.
- Public Use data sets are acquired from publicly available websites or public File Transfer Protocol (FTP) servers.

I. Abstract

The SBIR program was originally established in 1982 by the Small Business Innovation Development Act (Pub. L. 97–219), codified at 15 U.S.C. 638. It was then expanded and extended by the Small Business Research and Development (R&D) Enhancement Act of 1992 (Pub. L. 102–564) and received subsequent reauthorization and extensions that include Public Law 112–81, extending SBIR through September 30, 2022. The US Small Business Administration (SBA) serves as the coordinating agency for the SBIR program. It directs the agency implementation of SBIR, reviews progress, and reports annually to Congress on its operation.

The NIST SBIR Cover Sheet is the first page of each application that responds to the annual NIST SBIR Federal Funding Opportunity (FFO). The information collected in the Cover Sheet provides identifying information and demographic data for use in NIST's annual report to the SBA on the program.
