Abstract: The information collection activities covered by this ICR renewal are those carried out by a chemical manufacturer in requesting a specific chemical risk evaluation under the Toxic Substance Control Act (TSCA) be conducted by EPA. EPA established the process for conducting risk evaluations under TSCA. Chemicals that will undergo this evaluation include chemicals the Agency has prioritized, as well as chemicals for which EPA has granted requests made by manufacturers to have the chemicals evaluated under EPA's risk evaluation process. EPA has established criteria and information chemical manufacturers must provide for EPA to consider a chemical substance for risk evaluation. This information is necessary in order for EPA to review information covered by chemical manufacturers and determine if the chemical substance is suitable for risk evaluation.

Form Numbers: None.

Respondents/affected entities: Persons that manufacture chemical substances and request a chemical be considered for risk evaluation by EPA.

Respondent's obligation to respond: Voluntary (15 U.S.C. 2605(b)(4)).

Estimated number of respondents: 5.

Frequency of response: On occasion.

Total estimated burden: 419 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$283,570 (per year), which includes \$0 annualized capital or operation & maintenance costs.

Changes in the estimates: There is no change in hour or cost burden as compared with what is currently approved by OMB. There is an increase of \$709 in the total estimated labor

costs, which reflects the increase in wage rates since the initial ICR.

Abstract: This ICR covers the paperwork burden hours and costs associated with the information collection activities under the pesticide registration fee programs implemented through the Office of Pesticide Programs (OPP), Environmental Protection Agency (EPA). Pesticide registrants are required by statute to pay an annual registration maintenance fee for all products registered under Section 3 and Section 24(c) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). In addition, the Pesticide Registration Improvement Act (PRIA) amended FIFRA in 2004 to create a registration service fee system for applications for specific pesticide registration, amended registration, and associated tolerance actions (Section 33). This ICR specifically covers the activities related to the collection of the annual registration maintenance fees, the registration service fees and the burden associated with the submission of requests for fees to be waived.

Form Numbers: 8570-30.

Respondents/affected entities: North American Industrial Classification System (NAICS) codes: 3250A1—Pesticide and other agricultural chemical manufacturing; 32518—Other Basic Inorganic Chemical Manufacturing; 32519—Other Basic Organic Chemical Manufacturing and

9641—Regulation of Agricultural Marketing and Commodities.

Respondent's obligation to respond: Mandatory under FIFRA sections 4(i)(5) and 33.

Estimated number of respondents: 1,523 (total).

Frequency of response: Annually and on occasion.

Total estimated burden: 8,540 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$687,301 (per year), which includes \$3,600 annualized capital or operation & maintenance costs.

Changes in the estimates: There is an increase of 229 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This modest addition is associated with an increase in respondents for pesticide registration maintenance fees (from 1,471 to 1,523) and in refinements of the burden calculations. The total estimated annual respondent burden for service fee waivers has not changed.
