In addition, Rover requests that the Commission expeditiously initiate paper hearing procedures to assist the Commission in its public interest determination and remove any uncertainty in any potential bankruptcy proceeding, all as more fully explained in the petition.

DEPARTMENT OF ENERGY**Federal Energy Regulatory Commission**

[Project No. 2114–303]

Public Utility District No. 2 of Grant County, Washington; Notice of Availability of Draft Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 (NEPA) and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed an application submitted by Public Utility District No. 2 of Grant County, Washington (licensee) to construct a separate embankment immediately downstream of the existing dam and structurally connected to the existing embankment to improve seismic stability. The project is located on the mid-Columbia River in Grant, Yakima, Kittitas, Douglas, Benton, and Chelan Counties, Washington. The project occupies lands managed by Bureau of Reclamation (Reclamation), Bureau of Land Management, U.S. Department of Army (Army), U.S. Fish and Wildlife Service (FWS), and the U.S. Department of Energy (DOE).

A draft environmental assessment (DEA) has been prepared as part of

staff's review of the proposal.¹ Grant PUD proposes to construct a roller-compacted concrete dam approximately 2,200-foot-long and 25-foot-high; a secant pile cutoff wall; a new 150-foot-long and 25-foot-high embankment; and a realigned section of an existing private roadway. The existing embankment would remain in place.

The DEA contains Commission staff's analysis of the probable environmental effects of the proposed action and concludes that approval of the proposal would not constitute a major federal action significantly affecting the quality of the human environment.

The DEA may also be viewed on the Commission's website at <http://www.ferc.gov> using the elibrary link. Enter the docket number (P-2114) in the docket number field to access the document. ¹ On July 16, 2020, the Council on Environmental Quality (CEQ) issued a final rule, *Update to the Regulations Implementing the Procedural Provisions of the National Environmental Policy Act* (Final Rule, 85 FR 43,304), which was effective as of September 14, 2020; however, the NEPA review of this project was in process at that time and was prepared pursuant to CEQ's 1978 NEPA regulations.

Abstract: This ICR addresses the information collection activities associated with the export notification requirements under section 12(b) of the Toxic Substances Control Act (TSCA), which requires any person who exports or intends to export a chemical substance or mixture that is regulated under TSCA sections 4, 5, 6 and/or 7 to notify EPA of such export or intent to export. This requirement is described in more detail in 40 CFR part 707, subpart D. Upon receipt of notification, EPA advises the government of the importing country of the U.S. regulatory action that required the notification with respect to that substance. EPA uses the information obtained from the submitter via this collection to advise the government of the importing country. This information collection addresses the burden associated with industry reporting of export notifications. Respondents may claim all or part of a notice confidential, and EPA will disclose that information only to the extent permitted by, and in accordance with, the procedures in TSCA and 40 CFR part 2. As discussed in more detail in this ICR's supporting statement, this ICR renewal also incorporates burden estimates associated with an electronic reporting option for the information collection under TSCA section 12(b), for which EPA is requesting approval from OMB in this ICR renewal request.
