I. Background

In FR Doc. 2020–21260 of September 28, 2020 (85 FR 60799–60800), there was a technical error that is identified and corrected in this correcting document. The provision in this correction document is effective as if it had been included in the document published September 28, 2020. Accordingly, the correction is effective September 28, 2020.

II. Summary of Error

On page 60799, in the DATES section of the notice, the phrase “takes effect October 1, 2020 through October 1, 2024” should be replaced with the phrase “September 28, 2020-September 28, 2024.”

III. Correction of Error

In the Federal Register of September 28, 2020, in FR Doc. 2020–21260, on page 60799, in the 2nd column, in the DATES section, the phrase “takes effect October 1, 2020 through October 1, 2024” is corrected to read “September 28, 2020-September 28, 2024.”

Wilma M. Robinson,
Deputy Executive Secretary to the Department, Department of Health and Human Services.

Food and Drug Administration

[Docket No. FDA–2020–D–1517]

The Use of Physiologically Based Pharmacokinetic Analyses—Biopharmaceutics Applications for Oral Drug Product Development, Manufacturing Changes, and Controls; Draft Guidance for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of a draft guidance for industry entitled “The Use of Physiologically Based Pharmacokinetic Analyses—Biopharmaceutics Applications for Oral Drug Product Development, Manufacturing Changes, and Controls.” This guidance provides general recommendations regarding the development, evaluation, and use of physiologically based pharmacokinetic (PBPK) analyses for biopharmaceutics applications employed by sponsors of investigational new drug applications, new drug applications, or abbreviated new drug applications, and supplements to these applications, for oral drug product development, manufacturing changes, and controls. The guidance covers how to develop, evaluate, and apply PBPK models for biopharmaceutics-related uses, such as establishing clinically relevant dissolution specifications and quality risk assessment for postapproval manufacturing changes.
