SUPPLEMENTAL INFORMATION: Under the PRA (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the OMB for each collection of information that they conduct or sponsor. “Collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 3506(c)(2)(A) requires Federal agencies to provide a 60-day notice in the Federal Register concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, the OCC is publishing notice of the proposed collection of information set forth in this document. The OCC is proposing to extend the approval for the following information collection:
Title: Examination Survey.
OMB Control No.: 1557–0199.
Affected Public: Businesses or other for-profit.
Type of Review: Regular.
Abstract: The OCC provides each national bank, Federal savings association, and Federal branch or agency (bank) with an Examination Survey at the end of its supervisory cycle (12- or 18-month period). This information collection permits banks to assess the OCC’s bank supervisory activities, including the:
• Effectiveness of OCC communications with the bank;
• Reasonableness of OCC requests for data and information;
• Quality of OCC decision making during the exam process;
• Professionalism of OCC examining staff; and
• Responsiveness of OCC examiners. The OCC developed the survey in 1994, at the suggestion of banking industry members who expressed a desire to provide examination-related feedback to the OCC. The Comptroller of the Currency and OCC supervisory staff considered that expressed desire and concurred. The information collection continues to be an important tool for the OCC to measure OCC examination performance, design more efficient and effective examinations, and target examiner training.
This information collection continues to formalize and promote a long-standing OCC program. The OCC always has given the institutions it supervises the opportunity to provide input regarding the examination process.
Burden Estimates:
Estimated Number of Respondents: 1,714.
Estimated Annual Burden: 286 hours.
