**Petition for Exemption**

**Petitioner**: Daniel Bauer.

Section(s) of 14 CFR Affected: § 61.39(a)(1)(i).

**Description of Relief Sought**: The petitioner is seeking a three month extension of the relief provided by the COVID–19 Special Federal Aviation Regulations (SFAR) as it relates to the Pilot Knowledge Test qualification requirement. This grant of exemption would permit the petitioner to use his knowledge test results for up to six calendar months after the date of expiration to otherwise qualify for a practical test as specified in § 61.39. The current SFAR only provides relief for up to three calendar months. The petitioner contends there are continuing difficulties obtaining aircraft maintenance, instruction and examinations due to COVID–19 related health and social distancing concerns.

**FOR FURTHER INFORMATION CONTACT**: Graciela S. Robino by email at: Graciela.s.robino@faa.gov; phone: (336) 369–3915.

**SUPPLEMENTARY INFORMATION**: 

Public Comments Invited: You are asked to comment on any aspect of this information collection, including (a) Whether the proposed collection of information is necessary for FAA’s performance; (b) the accuracy of the estimated burden; (c) ways for FAA to enhance the quality, utility and clarity of the information collection; and (d) ways that the burden could be minimized without reducing the quality of the collected information.

OMB Control Number: 2120–0663.

Title: Service Difficulty Report.

Form Numbers: FAA Form 8070–1; FAA Form 8010–4.

**Type of Review**: Renewal of an information collection.

**Background**: The Federal Register Notice with a 60-day comment period soliciting comments on the following collection of information was published on August 7, 2020, (85 FR 48057). This collection affects certificate holders operating under 14 CFR part 121, 125, 135, and 145 who are required to report service difficulties and malfunction or defect reports. The data collected identifies mechanical failures, malfunctions, and defects that may be a hazard to the operation of an aircraft. The FAA uses this data to identify trends that may facilitate the early detection of airworthiness problems. When defects are reported which are likely to exist on other products of the same or similar design, the FAA may disseminate safety information to a particular section of the aviation community.

**Respondents**: Approximately 60,000 respondents.

**Frequency**: Information is collected on occasion.

**Estimated Average Burden per Response**: 15 minutes.

**Estimated Total Annual Burden**: 15,000.

Issued in Oklahoma City, OK, on October 7, 2020.

Graciela S. Robino,
