

available to replace TTY technology that may no longer be available to the consumer through their provider or on their device.

(b) Each wireless provider that requested or will request and receive a waiver of the requirement to support TTY technology over wireless IP-based networks and services must apprise its customers, through effective and accessible channels of communication, that (1) until TTY is sunset, TTY technology will not be supported for calls to 911 services over IP-based wireless services, and (2) there are alternative PSTN-based and IP-based accessibility solutions for people with disabilities to reach 911 services. These notices must be developed in coordination with public safety answering points (PSAPs) and national consumer organizations, and include a listing of text-based alternatives to 911, including, but not limited to, TTY capability over the PSTN, various forms of PSTN-based and IP-based TRS, and text-to-911 (where available). The notices will inform consumers on the loss of the use of TTY for completing 911 calls over the provider's network and alert them to alternatives service for which TTY may be used.

(c) Once every six months, each wireless provider that requests and receives a waiver of the requirement to support TTY technology must file a report with the Commission and inform its customers regarding its progress toward and the status of the availability of new IP-based accessibility solutions. Such reports must include (1) information on the interoperability of the provider's selected accessibility solution with the technologies deployed or to be deployed by other carriers and service providers, (2) the backward compatibility of such solution with TTYs, (3) a showing of the provider's efforts to ensure delivery of 911 calls to the appropriate PSAP, (4) a description of any obstacles incurred towards achieving interoperability and steps taken to overcome such obstacles, and (5) an estimated timetable for the deployment of accessibility solutions. The information will inform consumers of the progress towards the availability of alternative accessible means to replace TTY, and the Commission will be able to evaluate the reports to determine if any changes to the waivers are warranted or of any impediments to progress that it may be in a position to resolve.
