10 CFR part 50

Correct Reference. This final rule amends § 50.55a(b)(2)(ix) to correct the references to paragraph (b)(2)(ix)(A)(2) by italicizing the second “2”.

Correct Typographical Errors. This final rule amends § 50.55a(b)(2)(ix) to correct the typographical error “Table IWE–2411–1” to read “Table IWE–2411–1” and “IWE 2430” to read “IWE–2430”, and § 50.55a(b)(2)[xxviii] to correct “IAEA 4421(c)(1)” to read “IWE–4421(c)(1)”.

Finally, this final rule amends § 50.55a(b)(3)(iv) to correct an inadvertent error that resulted from the removal of text.

This final rule revises paragraph III.L.1 of appendix R to 10 CFR part 50 to correct a typographical error.

10 CFR Parts 50, 72, 73, and 76

Redesignate footnotes. This final rule redesignates footnotes 4 and 5 as footnotes 3 and 4 in § 50.72a(a)(2); footnotes 10 and 11 as footnotes 1 and 2 in § 72.32; footnote 4 as footnote 1 in § 73.72; footnote 2 as footnote 1 in § 76.111; and footnote 4 as footnote 1 in § 76.120(b).

III. Rulemaking Procedure

Under section 553(b) of the Administrative Procedure Act (5 U.S.C. 553(b)), an agency may waive publication in the Federal Register of a notice of proposed rulemaking and opportunity for comment requirements if it finds, for good cause, that it is impracticable, unnecessary, or contrary to the public interest. As authorized by 5 U.S.C. 553(b)(3)(B), the NRC finds good cause to waive notice and opportunity for comment on these amendments, because notice and opportunity for comment is unnecessary. The amendments will have no substantive impact and are of a minor and administrative nature dealing with corrections to certain CFR sections or are related only to management, organization, procedure, and practice. Specifically, the revisions correct references, typographical errors, nomenclature, titles, email addresses, footnote designation, and contact information. The Commission is exercising its authority under 5 U.S.C. 553(b) to publish these amendments as a final rule. The amendments are effective November 16, 2020. These amendments do not require action by any person or entity regulated by the NRC, and do not change the substantive responsibilities of any person or entity regulated by the NRC.

IV. Environmental Impact: Categorical Exclusion

The NRC has determined that this final rule is the type of action described in 10 CFR 51.22(c)(2), which categorically excludes from environmental review rules that are corrective or of a minor, nonpolicy nature and do not substantially modify existing regulations. Therefore, neither an environmental impact statement nor an environmental assessment has been prepared for this rule.

V. Paperwork Reduction Act

This final rule does not contain a collection of information as defined in the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.) and, therefore, is not subject to the requirements of the Paperwork Reduction Act of 1995.

Public Protection Notification

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the document requesting or requiring the collection displays a currently valid OMB control number.

VI. Plain Writing

The Plain Writing Act of 2010 (Pub. L. 111–274) requires Federal agencies to write documents in a clear, concise, and well-organized manner. The NRC has written this document to be consistent with the Plain Writing Act as well as the Presidential Memorandum, “Plain Language in Government Writing,” published June 10, 1998 (63 FR 31883).

VII. Backfitting and Issue Finality

The NRC has determined that the corrections in this final rule do not constitute backfitting and are not inconsistent with any of the issue finality provisions in 10 CFR part 52. The amendments are non-substantive in nature, including correcting references, changing an address, and correcting a misspelling. They impose no new requirements and make no substantive changes to the regulations. The corrections do not involve any provisions that would impose backfits as defined in 10 CFR chapter I, or that would be inconsistent with the issue finality provisions in 10 CFR part 52. For these reasons, the issuance of the rule in final form would not constitute backfitting or represent a violation of any of the issue finality provisions in 10 CFR part 52. Therefore, the NRC has not prepared any additional documentation for this correction rulemaking addressing backfitting or issue finality.

VIII. Congressional Review Act

This final rule is not a rule as defined in the Congressional Review Act (5 U.S.C. 801–808).

IX. Agreement State Compatibility

Under the “Agreement State Program Policy Statement” approved by the Commission on October 2, 2017, and published in the Federal Register on October 18, 2017 (82 FR 48535), NRC program elements (including regulations) are placed into compatibility categories A, B, C, D, NRC, or adequacy category Health and Safety (H&S). Compatibility Category A program elements are those program elements that are basic radiation protection standards and scientific terms and definitions that are necessary to understand radiation protection concepts. An Agreement State should adopt Category A program elements in an essentially identical manner in order to provide uniformity in the regulation of agreement material on a nationwide basis. Compatibility Category B program elements are those program elements that apply to activities that have direct and significant effects in multiple jurisdictions. An Agreement State should adopt Category B program elements in an essentially identical manner. Compatibility Category C program elements are those program elements that do not meet the criteria of Category A or B, but contain the essential objectives that an Agreement State should adopt to avoid conflict, duplication, gaps, or other conditions that would jeopardize an orderly pattern in the regulation of agreement material on a national basis. An Agreement State should adopt the essential objectives of the Category C program elements. Compatibility Category D program elements are those program elements that do not meet any of the criteria of Category A, B, or C and, therefore, do not need to be adopted by Agreement States for purposes of compatibility. Compatibility Category NRC program elements are those program elements that address areas of regulation that cannot be relinquished to the Agreement States under the Atomic Energy Act of 1954, as amended, or provisions of 10 CFR. These program elements should not be adopted by the Agreement States. Adequacy category H&S program elements are program elements that are required because of a particular health and safety role in the regulation of agreement material within the State and should be adopted in a manner that embodies the essential objectives of the NRC program.

The portions of this final rule that amend 10 CFR parts 19, 20, 30, 34, 35, 40, 61, 70, and 71 are a matter of compatibility between the NRC and the Agreement States, thereby providing consistency among Agreement State and NRC requirements. The compatibility categories are designated in the following table.

AGENCY: The Office of the Comptroller of the Currency, Treasury (OCC); the Board of Governors of the Federal Reserve System (Board); and the Federal Deposit Insurance Corporation (FDIC).

ACTION: Final rule.

SUMMARY: The OCC, Board, and FDIC (collectively, the agencies) are adopting as final the interim final rule published by the agencies on April 17, 2020, making temporary amendments to the agencies’ regulations requiring appraisals for certain real estate-related transactions. The final rule adopts the deferral of the requirement to obtain an appraisal or evaluation for up to 120 days following the closing of certain residential and commercial real estate transactions, excluding transactions for acquisition, development, and construction of real estate. Regulated institutions should make best efforts to obtain a credible estimate of the value of real property collateral before closing the loan and otherwise underwrite loans consistent with the principles in the agencies’ Standards for Safety and Soundness and Real Estate Lending Standards. The agencies’ final rule allows regulated institutions to expeditiously extend liquidity to creditworthy households and businesses in light of recent strains on the U.S. economy as a result of the coronavirus disease 2019 (COVID event). The final rule adopts the interim final rule with one revision in response to comments received by the agencies on the interim final rule.

DATES: The final rule is effective October 16, 2020 through December 31, 2020.

I. Introduction

Impact of the COVID event on appraisals and evaluations. Due to the impact of the COVID event and the need for businesses and individuals to quickly access additional liquidity, the agencies published an interim final rule in the *Federal Register* on April 17, 2020 (interim final rule) that deferred the requirement to obtain an appraisal or evaluation for up to 120 days following the closing of a transaction for certain residential and commercial real estate transactions, excluding transactions for acquisition, development, and construction of real estate. The interim final rule allows businesses and individuals to quickly access liquidity from real estate equity during the COVID event.

The agencies are adopting the interim final rule as final, with one revision in response to comments. The amendments to the agencies’ appraisal regulations allow for the deferral of appraisals and evaluations for qualifying transactions through December 31, 2020, as detailed further below.
