47 CFR Part 73

[MB Docket No. 20-334; RM-11864; DA 20-1193; FRS 17155]

Television Broadcasting Services Portland, Oregon

AGENCY: Federal Communications Commission.

ACTION: Proposed rule.

SUMMARY: The Commission has before it a petition for rulemaking filed by Sander Operating Co. III LLC (Sander), licensee of KGW, requesting the substitution of channel 26 for channel 8 at Portland in the DTV Table of Allotments. The Commission instituted a freeze on the acceptance of rulemaking petitions by full power television stations requesting channel substitutions in May 2011, and Sander asks that the Commission waive the freeze to permit KGW to change from a VHF to a UHF channel to better serve its over-the-air viewers. Sander states that the Commission has recognized that VHF channels have certain propagation characteristics which may cause reception issues for some viewers. While Sander acknowledges that VHF reception issues are not universal, it states that since the 2009 digital transition, when it began operating exclusively on digital channel 8, KGW has received a steady stream of complaints from viewers unable to receive the station's over-the-air signal, despite being able to receive signals from other local stations. Sander believes that waiver of the channel substitution freeze would serve the public interest.

Federal Motor Vehicle Safety Standards; Occupant Crash Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: NHTSA is proposing to amend Federal Motor Vehicle Safety Standard (FMVSS) No. 208, "Occupant crash protection," to update the child restraint systems (CRSs) listed in Appendix A-1 of the standard. NHTSA uses the CRSs in Appendix A-1 to test the performance of advanced air bag suppression and low risk deployment systems in either suppressing or deploying the air bag in a low-risk manner in the presence of a CRS. The proposed amendments would ensure that the CRSs used by NHTSA to test advanced air bags are representative of the current CRS fleet, and would make it easier for vehicle manufacturers and test laboratories to acquire CRSs for testing purposes.

DATES: You should submit your comments early enough to be received not later than December 28, 2020. Under a proposed phase-in of final rule requirements, 50 percent of vehicles manufactured on or after the first September 1st after the publication date of the final rule would have to be certified as meeting FMVSS No. 208 when tested with the CRSs on the revised Appendix A-1, and all vehicles manufactured on or after the second September 1st after the publication date of the final rule would have to be so certified.
