

pharmacokinetic information (*e.g.*, C_{max} , T_{max} , area under the curve) from the proposed drug product

- An example of how systemic toxicity could be addressed by a nonclinical toxicity study conducted with a noninhalation route of exposure
- Clarification that local effects in oral or respiratory tract tissues are best addressed with a nonclinical inhalation study

This guidance is being issued consistent with FDA's good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on "Nonclinical Testing of Orally Inhaled Nicotine-Containing Drug Products." It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

II. Paperwork Reduction Act of 1995

While this guidance contains no collection of information, it does refer to previously approved FDA collections of information. Therefore, clearance by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3521) is not required for this guidance. The previously approved collections of information are subject to review by OMB under the PRA. The collections of information in 21 CFR part 312 have been approved under OMB control number 0910–0014. The collections of information resulting from special protocol assessments have been approved under OMB control number 0910–0470.
