surveillance system enabling states and CDC to track changes over time and obtain data to guide the planning, implementation, and evaluation of national and state obesity prevention efforts.

A sample of approximately 1,200 ECE centers across four states will be recruited to participate in this one-time data collection effort. Each center will receive a recruitment letter introducing the survey, explaining its objectives and the importance of their participation, and instructions for completing the survey. It is anticipated that most responses will be submitted online via the internet. However, paper surveys will be available upon request. Approximately two weeks after the initial recruitment letter is mailed, all sampled centers will receive a reminder postcard. Approximately four weeks after the initial recruitment letter is mailed, non-respondents will be sent another letter along with a hardcopy of the questionnaire.

Participation in this study is completely voluntary and there are no costs to the respondent other than their time. The estimated annualized burden hours is 409. The approval request is for two years.
