Schedule and Agenda for the Mariana Archipelago FEP-CNMI AP Meeting

Saturday, November 21, 2020, 9 a.m.–11 a.m.

1. Welcome and Introductions
2. Review of the Last AP Meeting and Recommendations
3. Council Issues
   A. Development of a Bottomfish Stock Rebuilding Plan for Guam
4. CNMI Reports
5. Report on Mariana Archipelago FEP AP Plan Activities
6. Fishery Issues and Activities
7. Public Comment
8. Discussion and Recommendations
9. Other Business

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Kitty M. Simonds, (808) 522–8220 (voice) or (808) 522–8226 (fax), at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 et seq.

Tracey L. Thompson,
Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

FOR FURTHER INFORMATION CONTACT:
Regina Spallone, (301) 427–8568.

SUPPLEMENTARY INFORMATION: Pursuant to section 304(e)(2) of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act), 16 U.S.C. 1854(e)(2), NMFS, on behalf of the Secretary, must notify Councils, and publish in the Federal Register, whenever it determines that a stock or stock complex is subject to overfishing, overfished, or approaching an overfished condition.

NMFS has determined that Atlantic herring is now overfished and Gulf of Maine thorny skate is still overfished. The Atlantic herring determination is based on the most recent assessment, completed in 2020, using data through 2019, which indicates that this stock is overfished because the spawning stock biomass is below the threshold. The thorny skate determination is based on the most recent stock status update, completed in 2020, using data through 2019, which indicates that this stock is still overfished because the 3-year average biomass index remains below the threshold. NMFS has notified the New England Fishery Management Council of the requirement to rebuild these stocks.

NMFS has determined that Pacific sardine is still overfished. This determination is based on the most recent assessment, completed in 2020, using data through 2019, which indicates that this stock is still overfished because the biomass remains below the threshold. NMFS has notified the Pacific Fishery Management Council of the requirement to rebuild this stock.

Jennifer M. Wallace,
Acting Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. CP20–68–000; CP20–70–000]

Enable Gas Transmission, LLC; Enable Gulf Run Transmission, LLC; Notice of Availability of the Environmental Assessment for the Proposed Gulf Run Pipeline and Line CP Modifications Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) has prepared an environmental assessment (EA) for the Gulf Run Pipeline and Line CP Modifications Project (Project), proposed by Enable Gas Transmission, LLC and Enable Gulf Run Transmission, LLC (collectively, Enable) in the above-referenced docket. Enable requests authorization to construct, operate, and maintain natural gas pipeline facilities in Texas and Louisiana. The project would include modifications to existing facilities to allow bi-directional flow, a new natural gas pipeline, and ancillary facilities which would allow transport up to 1,650,000 dekatherms of natural gas per day.

The EA assesses the potential environmental effects of the construction and operation of the Project in accordance with the requirements of the National Environmental Policy Act (NEPA). The FERC staff concludes that approval of
