

Estimated Time Per Response: One hour.

Frequency: On occasion.

Total Burden Hours (annually including all respondents): One.

Total "Non-hour Burden" Cost: None identified. Filings are submitted electronically to the Board.

Needs and Uses: As an alternative to filing a written complaint, parties may submit a joint notice to the Board, indicating the consent of both parties to submit an issue in dispute to the Board's arbitration program. In the joint notice, parties state the issue(s) that they are willing to submit to arbitration. The notice must contain a statement that would indicate that all relevant parties are participants in the Board's arbitration program pursuant to § 1108.3(a), or that the relevant parties are willing to arbitrate voluntarily a matter pursuant to the Board's arbitration procedures, and the relief requested. The notice must also indicate whether parties have agreed to a three-member arbitration panel or a single arbitrator and must indicate whether the parties have mutually agreed to a lower amount of potential liability in lieu of the monetary award cap that would otherwise be applicable. The joint notice encourages greater use of arbitration to resolve disputes at the Board.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[Docket Number FRA-2020-0084]

Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System

Under part 235 of title 49 of the Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that by a document dated September 11, 2020, CSX Transportation (CSXT) petitioned the Federal Railroad Administration (FRA) seeking approval to discontinue or modify a signal system. FRA assigned the petition Docket Number FRA-2020-0084.

Applicant: CSX Transportation, Mr. Carl A. Walker, Chief Engineer Communications & Signals, 500 Water Street, Speed Code J-350, Jacksonville, Florida 32202.

Specifically, CSXT requests permission to discontinue the use of the automatic train control (ATC) segment of the cab signal systems (CSS) onboard equipped CSXT locomotives that operate on the RF&P subdivision, located between Richmond, Virginia, and Washington, DC.

CSXT states that discontinuing the use of ATC when operating on the RF&P will provide a standardized operation across all CSS-equipped CSXT locomotives, enhancing reliability and safety. This standardization will enhance safety by reducing maintenance due to failures, train crew cutouts, and line of road equipment failure.

CSS with the ATC segment removed will still stop the train if the locomotive operator does not acknowledge any signal downgrade, even if the positive train control (PTC) system is cutout. CSXT implemented the I-ETMS PTC system on the RF&P in October 2018. Wayside signal cab generators, locomotive cab signal equipment, and automatic train stop will remain.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at www.regulations.gov.

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:
