DEPARTMENT OF ENERGY

Energy Information Administration

Agency Information Collection Extension

AGENCY: U.S. Energy Information Administration (EIA), U.S. Department of Energy (DOE).

ACTION: Notice and request for comments.

SUMMARY: EIA submitted an information collection request for extension as required by the Paperwork Reduction Act of 1995. The information collection requests a three-year extension of Form OE-417 *Electric Emergency Incident and Disturbance Report*, OMB Control Number 1901-0288. Form OE-417 collects information for DOE to monitor electric emergency incidents and disturbances in the United States (including all 50 States, the District of Columbia, Puerto Rico, U.S. Virgin Islands, and the U.S. Territories). The information collected allows DOE to conduct post-incident reviews examining significant interruptions of

electric power or threats to the national electric system.

DATES: Comments on this information collection must be received no later than December 7, 2020. Written comments and recommendations for the information collection should be sent within 30 days of publication of this notice to <https://www.reginfo.gov/public/do/PRAMain>. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Matthew Tardugno, U.S. Department of Energy, matthew.tardugno@hq.doe.gov, 202-586-2892. The forms and instructions are available online at: <https://www.oe.netl.doe.gov/oe417.aspx>.

SUPPLEMENTARY INFORMATION: This information collection request contains

- (1) OMB No.: 1901-0288;
- (2) *Information Collection Request Title:* Electric Emergency Incident and Disturbance Report;
- (3) *Type of Request:* Three-year extension with changes;
- (4) *Purpose:* DOE uses Form OE-417 *Electric Emergency Incident and Disturbance Report* to monitor electric emergency incidents and disturbances in the United States (including all 50 States, the District of Columbia, Puerto Rico, U.S. Virgin Islands, and the U.S. Territories) and to investigate significant interruptions of electric power or threats to the electric system reliability. Form OE-417 also enables DOE to meet the Department’s national security responsibilities as the coordinating agency for Emergency Support Function (ESF) #12—Energy, under the National Response Framework, and the Sector-Specific Agency for the energy sector, pursuant to Presidential Policy Directive 21—*Critical Infrastructure Security and Resilience*, Presidential Policy Directive 41—*United States Cyber Incident Coordination*, and the Fixing Americas Surface Transportation (FAST) Act, Public Law 114-94. The information may also be shared with other non-regulatory federal agencies assisting in emergency response and recovery operations, or investigating the causes of an incident or disturbance to the national electric system. Public summaries are published on Form OE-417 web page at <https://www.oe.netl.doe.gov/oe417.aspx> on a monthly basis to keep the public informed.

(4a) *Changes to Information Collection:* DOE is changing the form number from Form OE-417 to Form DOE-417. The other changes to Form

OE-417 align the reporting requirements with the recently approved North American Electric Reliability Corporation (NERC) CIP-008-6 Reliability Standard, which established new definitions for a Cyber Security Incident and a Reportable Cyber Security Incident. CIP-008-6 also expanded the reporting requirements; including expanding the applicable systems to report on and adding new reporting requirements for attempted compromises of high and medium impact BES cyber systems and their associated electronic access control or monitoring systems. The continued alignment between Form OE-417 and NERC reporting requirements helps minimize confusion among industry stakeholders about where and how to file reports and enable industry stakeholders to train personnel to report using a single form. By incorporating the requirements established by NERC CIP-008-6 Reliability Standard in Form OE-417, entities may only be required to submit Form OE-417. This change reduces the reporting burden for the electric power industry. Additional changes to Form OE-417 clarify reporting criteria and allow respondents to select potentially applicable exceptions under the Freedom of Information Act. While submitters may mark information as potentially exempt, whether information is or is not exempt as part of a FOIA response will be determined by the Department at the time of processing the FOIA request. See DOE’s FOIA regulations at 10 CFR part 1004 for more information. Three changes were made to the form and one addition was made to the directions based on comments received during the 60-day public comment period. A summary of these and other changes to Form OE-417 is provided below:

- Changed the lettering or name of the form from “Form OE-417” to “Form DOE-417”
- Added new reporting requirements from the North American Electric Reliability Corporation (NERC) CIP-008-6 Standard to reduce the combined burden on respondents reporting to NERC and DOE and streamline responses. It is expected that for NERC reporting entities registered in the United States; NERC will accept use of Form OE-417 to meet the submittal requirements that will be established by CIP-008-6 to the Department of Homeland Security and the Electricity Information Sharing and Analysis Center
- Updated the “Response Due” criteria with new line numbers and added the following:
