Abstract: The EPA's Office of Emergency Management is conducting a survey of the State Emergency Response Commissions (SERCs) of each State and territories of the U.S. The SERCs were created under the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986. The purpose of this survey is to gather information on how EPCRA is being implemented, best practices, challenges, and gaps in meeting the requirements. After the survey is completed, EPA is planning to publish the results of the survey, including success stories and lessons learned to share with all states and territories.

EPCRA established State Emergency Response Commissions (SERCs) and Local Emergency Planning Committees (LEPCs) and assigned implementation responsibilities to these state and local agencies. EPCRA required SERCs to appoint LEPCs¹ within a few months after the enactment of EPCRA and to supervise their activities. Importantly, SERCs should ensure that LEPCs develop local emergency response plans for their community, review the plans, and make suggestions to coordinate the plans with neighboring LEPCs. In addition, SERCs are required to collect and manage hazardous chemical information from facilities and to provide access to the public on the presence of hazardous chemicals in the community.

In response to the deadly explosion at a fertilizer distribution facility in West Texas, Executive Order (E.O.) 13650 was signed, which directed the federal government to improve the safety and security of chemical facilities and reduce the risks of hazardous chemicals to workers and communities. One of the key components of the E.O. was to strengthen the state and local infrastructure created by EPCRA for emergency planning and preparedness. EPA published additional guidance documents, and developed on-line training for states, tribes and local agencies to implement EPCRA to protect their community and first responders.

¹ Approximately, 3,000 LEPCs were established within few months after the enactment of EPCRA.

As part of the America's Water Infrastructure Act (AWIA),² promulgated in October 2018, additional coordination and provision of information responsibilities were established for SERCs and LEPCs under EPCRA. Specifically, these EPCRA amendments establish notification and information coordination with State Drinking Water Agency and Community Water Systems to ensure that these agencies prepare and protect the community from contamination of their water.

The data collected in this survey will inform the Agency about how SERCs are fulfilling the requirements of the law, specifically in sharing key information among all appropriate State organizations and managing LEPCs and their activities. Additionally, the results of the survey will help to identify areas where SERCs are having difficulty meeting their requirements, the specific challenges they are facing, and will identify areas where EPA can better assist SERCs and LEPCs in implementing EPCRA and its amendments under AWIA.
