Survey, or the Census Household Pulse survey. The content covers household composition, current employment for the respondent and spouse/partner, changes in employment/earnings during the past 12 months due to the coronavirus pandemic, time spent teaching children under age 18, health, health insurance, having contracted the coronavirus, medical care deferred due to the coronavirus pandemic, mental health, income, and earnings. During the fielding period for the interim supplemental interviews, no more than 2 percent of respondents will be asked to participate in a brief validation interview a few weeks after the initial interview. The purpose of the validation interview is to verify that the initial interview took place as the interviewer reported and to assess the data quality of selected questionnaire items. For additional substantive information about this ICR, see the related notice published in the Federal Register on July 31, 2020 (85 FR 46187).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for the remainder of the current clearance period (expiring on August 31, 2022).

Agency: DOL—BLS.

OMB Control Number: 1220–0157.

Affected Public: Individuals and households.

Total Estimated Number of Respondents: 5,275.

Total Estimated Number of Responses: 5,380.

Total Estimated Annual Time Burden: 1,658 hours.

Total Estimated Annual Other Costs Burden: $0.

Authority: 44 U.S.C. 3507(a)(1)(D)

DATE: November 6, 2020.

Anthony May,
Management and Program Analyst.

BILLING CODE 4510–24–P

DEPARTMENT OF LABOR
Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Report on Current Employment Statistics

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Bureau of Labor Statistics (BLS)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before December 14, 2020.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function.

Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency’s estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT:
Anthony May by telephone at 202–693–4129 (this is not a toll-free number) or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: The Current Employment Statistics (CES) program provides current monthly statistics on employment, hours, and earnings, by industry and geography. CES estimates are among the most visible and widely-used Principal Federal Economic Indicators (PFEIs). CES data are also among the timeliest of the PFEIs, with their release each month by the BLS in the Employment Situation, typically on the first Friday of each month. The statistics are fundamental inputs in economic decision processes at all levels of government, private enterprise, and organized labor.

The CES monthly estimates of employment, hours, and earnings are based on a sample of U.S. nonagricultural establishments. Information is derived from approximately 295,000 reports (from a sample of 150,000 employers with State Unemployment Insurance (UI) accounts comprised of 697,000 individual worksites), as of April 2020. Each month, firms report their employment, payroll, and hours on forms identified as the BLS–790. The sample is collected under a probability-based design. Puerto Rico and the Virgin Islands collect an additional 8,500 reports.

A list of all form types currently used appears in the table below. Respondents receive variations of the basic collection forms, depending on their industry. The CES program is a voluntary program under Federal statute. Reporting to the State agencies is voluntary in all but three States (New Mexico, Oregon, and South Carolina), Puerto Rico, and the Virgin Islands. To our knowledge, the States that do have mandatory reporting rarely exercise their authority. The collection form’s confidentiality statement cites the Confidential Information Protection and Statistical Efficiency Act and mentions the State mandatory reporting authority. For additional substantive information about this ICR, see the related notice published in the Federal Register on July 20, 2020 (85 FR 43878).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL—BLS.

OMB Control Number: 1220–0011.
DEPARTMENT OF LABOR
Mine Safety and Health Administration
Petitions for Modification of Application of Existing Mandatory Safety Standards

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Notice.

SUMMARY: This notice is a summary of four petitions for modification submitted to the Mine Safety and Health Administration (MSHA) by the parties listed below.

DATES: All comments on the petitions must be received by MSHA’s Office of Standards, Regulations, and Variances on or before December 14, 2020.

ADDRESSES: You may submit your comments, identified by “docket number” on the subject line, by any of the following methods:

1. Electronic Mail: zzMSHA-comments@dol.gov. Include the docket number of the petition in the subject line of the message.

3. Regular Mail or Hand Delivery: MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452, Attention: Roslyn B. Fontaine, Deputy Director, Office of Standards, Regulations, and Variances. Persons delivering documents are required to check in at the receptionist’s desk in Suite 4E401. Individuals may inspect copies of the petition and comments during normal business hours at the address listed above.

MSHA will consider only comments postmarked by the U.S. Postal Service or proof delivery from another delivery service such as UPS or Federal Express on or before the deadline for comments.

FOR FURTHER INFORMATION CONTACT:
Aromnie Noe, Office of Standards, Regulations, and Variances at 202–693–9557 (voice), Noe.Sang-Ae.A@dol.gov (email), or 202–693–9441 (facsimile). [These are not toll-free numbers.]

SUPPLEMENTARY INFORMATION: Section 101(c) of the Federal Mine Safety and Health Act of 1977 and Title 30 of the Code of Federal Regulations Part 44 govern the application, processing, and disposition of petitions for modification.

I. Background

Section 101(c) of the Federal Mine Safety and Health Act of 1977 (Mine Act) allows the mine operator or representative of miners to file a petition to modify the application of any mandatory safety standard to a coal or other mine if the Secretary of Labor determines that:

1. An alternative method of achieving the result of such standard exists which will at all times guarantee no less than the same measure of protection afforded the miners of such mine by such standard; or

2. The application of such standard to such mine will result in a diminution of safety to the miners in such mine.

In addition, the regulations at 30 CFR 44.10 and 44.11 establish the requirements for filing petitions for modification.

II. Petitions for Modification

Docket Number: M–2020–021–C.

Petitioner: Marion County Coal Resources, Inc., 151 Johnny Cake Rd., Metz, West Virginia 26556.

Mine: Marion County Mine, MSHA I.D. No. 46–01433, located in Marion County, West Virginia.

Regulation Affected: 30 CFR 75.1700 (Oil and gas wells).

Modification Request: The petitioner requests a modification of the existing standard, 30 CFR 75.1700, as it relates to vertical oil and gas wells at the mine. The operator is petitioning in order to plug and mine through wells in the Marcellus and Utica shales as well as other unconventional shale oil and gas wells.

The petitioner states that:

(a) The Marion County Mine produces 25,000 tons of coal each day during production and approximately 9,000,000 cubic feet of methane is liberated at the mine each day.

(b) The petitioner is petitioning to mine through wells in the Marcellus and Utica shale and other unconventional shales oil and gas wells within the mine’s projected operations.

(c) Two Marcellus wells are within the projected mine, which are known as 83263, Esther Clark 1H and 833083, Esther Clark 3H. It is expected that these two wells will have to be mined through.

The petitioner proposes the following alternative method:

(a) District Manager Approval:

(1) The petition applies to unconventional wells including the Marcellus and Utica shale and other unconventional shales oil and gas wells. These unconventional wells include wells that have been depleted of oil or gas production, wells that have not produced oil/gas and may have been plugged, or active wells not producing oil/gas. Potential oil and gas producing formations that have not produced in commercial quantities (e.g., exploratory wells, wildcat wells, and dry holes) are also included in this petition.

(2) A 300 foot safety barrier will be built and maintained around the oil and gas wells, until the MSHA District Manager has approved mining in that area. The petitioner defines oil and gas wells as active, inactive, abandoned, shut-in, previously plugged wells, water injection wells, and carbon dioxide sequestration wells.

(3) Before mining inside the safety barrier around any well that the mine will intersect, the petitioner will give the MSHA District Manager a sworn affidavit or declaration by a company official, stating the required procedures for cleaning out, preparing, and plugging each gas or oil well have been completed.

(4) The affidavit or declaration will include the logs described below in (b), as well as any other records that the District Manager requires. If the well intersection is not planned, the petitioner will request a permit reducing the 300 foot barrier to remove the part not included in the well intersection.

(5) Where the total depth of the well is unknown, the petitioner must contact MSHA to create a communications protocol notifying the District Manager outside normal working hours.

(6) This petition applies to all underground coal mining at the mine.

The petitioner proposes to use the following procedures when cleaning out and preparing oil and gas wells prior to plugging and replugging:

(1) For cleaning out and preparing vertical oil and gas wells prior to plugging and replugging, the petitioner will test for gas emissions before cleaning out, preparing, plugging, and replugging oil and gas wells. If gas is detected, the MSHA District Manager will be contacted. The following procedures will be conducted:

(i) The petitioner will remove casings and clean the borehole to 200 feet below the coal seam being mined, or the
