**SUPPLEMENTARY INFORMATION:** Notice and request for public comment on this collection was published in the **Federal Register** on September 8, 2020 at 85 FR 174. The Agency did not receive any comments in response to the 60-day notice published in the **Federal Register**.

**Title:** Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

**Abstract:** Under the PRA (44 U.S.C. 3501-3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they collect or sponsor. Section 3506(c)(2)(A) of the PRA (944 U.S.C. 3506(c)(2)(A) requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection of information to OMB for approval. To comply with this requirement, CSOSA is publishing notice of the proposed collection of information set forth in this document. The proposed information collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration’s commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of

products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The Agency has traditionally used paper form surveys as its primary public information collection method. However, to further comply with the goals of the PRA, the Agency recently implemented the use of online electronic survey tools to obtain customer and client feedback regarding Agency programs and supervision support services. *During the COVID-19 pandemic*, the approval from OMB to utilize an electronic option to complete the Agency’s standard surveys online was extremely helpful in sustaining our engagement with the community. The contents in the online version and in paper versions of the Agency’s surveys will remain identical. Once in person meetings are resumed, CSOSA will continue to offer paper option for respondents who prefer that option.

Similar to the process used for gaining public feedback via the Agency’s traditional paper form surveys, the online surveys are forwarded to the meeting participants at the conclusion of an event or program via the participants previously registered email address or at the end of a virtual meeting in the chat box or via a slide with a link that leads to the online survey. The results of the electronic surveys are tallied by the online software and then forwarded to a centralized user account for further evaluation and review or to be merged with any results from completed hard copy paper surveys.

The solicitation of feedback will target areas such as: timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency’s services will be unavailable.

The Agency will only submit a collection for approval under this generic clearance if it meets the following conditions:

1. The collections are voluntary;
2. The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both
