³⁰ In general, the change in emissions is measured as the difference between PTE with compliance with the major source NESHAP and 75 percent of the MST (the maximum emissions assumed with a compliance margin for the primary scenario). Where the EPA does not have information on the PTE, we estimated the potential change in emissions as the difference between actual emissions and 75 percent of the MST. However, in some cases it is inappropriate to assume changes from minimal amounts of HAP (*i.e.* less than 1 tpy) up 75 percent of the MST as it represents a 100 times to 1,000 times increase in emissions (and production to the extent that production and emissions correlate). Given the production capacities at existing facilities along with economic constraints on growth, it is highly unlikely a facility would seek to increase emissions (and hence production) by 100-times to 1,000-times. Most mature industries will not experience tremendous economic growth, and some may experience a declining rate of production that impacts growth. Therefore, we assume a conservative measure of increase for facilities operating at very low levels of HAP of 10 times (*e.g.*, a facility operating at 0.5 tpy with not information on PTE would increase to 5 tpy). The measure for emission change in these instances could be higher or lower, but we selected 10 times to demonstrate a conservatively high level of potential emissions increase.

³¹ The EPA also identified some facilities in the primary scenario that have an estimated PTE that is above the MST, yet their actual emissions are well below 75 percent of the MST. If these facilities opt to reclassify by taking a limit on their PTE down to a level below the MST, they will forego allowable

²⁹ See TSM, "*Documentation of the Illustrative Emissions Analysis for the Final Rule Reclassification of Major Sources as Area Sources Under Section 112 of the Clean Air Act*," available in the docket of this rulemaking.

Continued

addition, we also include an alternative set of assumptions in the coatings sector to reflect the findings from the review of reclassification permits that shows one facility could increase emissions. For this alternative coating scenario, we extrapolate those findings to other facilities in the coatings sector using a percentage that represents the portion of the reclassified facilities that might increase emissions (*i.e.*, 2.3 percent of the reclassified coatings facilities are assumed to increase emissions). Using this alternative assumption, we estimate a potential emissions increase of 302 tpy of combined HAP. The total range of potential emissions increases is, therefore, 919 tpy to 1258 tpy. Again, it is important to note that this is likely an overestimate of actual emissions increases, as we explain in more detail in the technical support memorandum. Under the alternative scenario 2, we estimate a potential reduction in HAP emissions of 183 tpy.

In addition to approximating the response to the MM2A rule, we present information regarding the magnitude of potential changes in HAP emissions and discuss changes in health impacts for benefit categories of criteria pollutants. The combination of these evaluations represents our assessment of benefits as defined in Office of Management and Budget (OMB) Circular A-4. Based on the results of the EPA's analysis of the reclassifications of 69 sources and the illustrative emissions analysis of 72 source categories, this final rule may potentially result in both emission reductions and increases from a broad array of affected sources. For the 69 sources that have already reclassified, we conclude there are no potential emissions increases (except for one source as discussed in section VIII above) and, therefore, no health impacts associated with nearly all of the known reclassification actions. For the one facility with a potential for an emissions increase, the change in emissions would be modest and is not likely to result in significant health impacts. Because the sources that the EPA has identified as having a potential for some level of emissions change (given the uncertainties stated throughout this preamble) are located across the United States, we do not observe a

concentration of emissions changes in any particular location. However, to understand the potential impact of this rulemaking on tribal and environmental justice communities, we conducted two analyses on the 69 sources that have reclassified to area source status as described above (from which we found only one facility that could increase emissions).

In the first analysis, we looked at sources that were within 50 miles of an area of Indian country. Of the 69 sources that we analyzed, 30 are within 50 miles of at least one area of Indian country. Eleven of these are within 10 miles of an area of Indian country and three are in Indian country. However, after reviewing the reclassification of these sources, only one of these sources could have an increase in emissions. The potential increase will be minimal because the source has limited its emissions of and PTE HAP below the MST. Therefore, the EPA expects there will be no additional impact from reclassification to most areas of Indian country.

Second, we conducted a demographic analysis of the populations within 5 miles of these same 69 sources. We then compared the average concentrations of low-income and minority populations within that 5-mile radius and compared them to the national average to determine if these populations will be disproportionately impacted. In this analysis, we found that the 5-mile radius around 13 of the 69 sources has a minority population above the national average, and the area surrounding 39 sources has a low-income population above the national average. Although these results would suggest that low-income populations may be more impacted by this rule, as stated above, only one of these sources could have an increase in emissions. Therefore, the EPA expects there will be no additional impact to most of these communities.

Based on the results of the EPA's analysis of the reclassifications of 69 sources and the illustrative emissions impact analysis of 72 source categories, this final rule could result in both emissions reductions and increases from a broad array of sources located in different geographic areas. Uncertainties in estimating the number of sources that will seek reclassification, and the resulting permit conditions that will impact emissions are discussed at length in this section of this preamble. Therefore, we illustrate impacts using certain assumptions to allow readers to better understand the potential impacts of the MM2A rule associated with HAP pollutants. However, changes in HAP

emissions may also impact other pollutants as well.

Benefits/disbenefits. Although the illustrative emissions analysis suggests that there may be both emissions increases and decreases, we are uncertain of the magnitude and geographic distribution of the changes in emissions resulting from this rulemaking across the broad array of sources that could reclassify. As discussed in the docket of this final rule, the emissions from different sources will be impacted in different ways, and small changes in certain non-HAP pollutants, such as fine particulate matter, can lead to significant changes in monetized benefits/disbenefits. Due to the voluntary nature of this action, we are unable to quantify changes in non-HAP emissions across these sources. In place of quantitative estimates of the number and economic value of the non-HAP pollutant changes, we instead discuss potential impacts in qualitative terms. Similar uncertainties related to the potential distribution of changes in HAP emissions resulting from this rulemaking also exist. As such, we also present a qualitative assessment of the potential impacts to human health and the environment from changes in selected HAP emissions. For more information on the qualitative characterization of benefits/disbenefits, please refer to the benefits analysis included in the RIA for this final action.

D. Economic Analysis

The economic impact analysis (EIA), an analysis that is included in the RIA, focuses on impacts at an industry level, and impacts are only calculated for the scenario that includes facilities with actual emissions below 75 percent of the MST. As part of the EIA, the EPA considered the impact of this rulemaking on small entities (small businesses, governments, and nonprofit organizations). Impacts are calculated as compliance costs (savings, in this instance) as a percentage of sales for businesses, and of budgets for other organizations. For informational purposes, the RIA includes the Small Business Administration's definition of small entities by affected industry categories (defined as North American Industry Classification System) and potential burden reductions from title V and other permitting programs. Since this rule significantly lessens the regulatory burden that resulted from the OIAI policy, no compliance costs are directly imposed upon industry categories as a result of this rule. We do, however, consider the potential costs some sources may incur to show

emissions under the major source program (*i.e.*, the reduction in PTE that the facility must take to modify their PTE to down to 18.75 tpy). This reduction in emissions can be viewed as foregone emissions under PTE. For the facilities analyzed where PTE (or allowable emissions) were identified, the foregone allowable emissions totals a reduction of about -227 tpy. Therefore, the potential change in emissions for the seven source categories with potential increases is a net change in emissions of 692-729 tpy.

compliance with applicable area source NESHAP after they reclassify to area source status. These avoided costs accrue because some reclassified sources will not be required to obtain or maintain a title V permit or continue meeting major source administrative requirements under section 112 of the CAA. Some of the facilities benefitting from this action are owned by small entities, and these entities may experience a more beneficial impact than the large entities that will also experience a reduction in costs from the burden reductions that would take place as a result of this rule.

The results of the EIA for the primary scenario show that the annual cost savings per sales for all affected industries is around 0.05 percent, using the median of these annual cost savings per sales estimates calculated by industry, with sales averaging approximately \$9.3 billion per affected industry, to determine average impact. The details of the EIA and impacts on employment, as well as results of the EIA for the other two alternative scenarios, are presented in the RIA of the final rule, which is available in the docket for this action.

IX. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at <https://www.epa.gov/laws-regulations/laws-and-executive-orders>.

A. Executive Order 12866: Regulatory Planning and Review and Executive Order and 13563: Improving Regulation and Regulatory Review

This action is an economically significant regulatory action that was submitted to OMB for review. Any changes made in response to OMB recommendations have been documented in the docket. The EPA prepared an analysis of the potential costs and benefits associated with this action. This analysis, the RIA for the final MM2A rule, is available in the docket and is summarized in section I of this preamble.

B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs

This action is considered an Executive Order 13771 deregulatory action. Details on the estimated potential net cost savings of this final rule can be found in the EPA's analysis of the potential costs and benefits associated with this action (see the RIA for the final rule, which is in the docket for this action).

C. Paperwork Reduction Act (PRA)

This action does not impose any new information-collection burden under the PRA. Specifically, this rule requires the electronic reporting of the one-time notification already required in 40 CFR 63.9(j) in the case where the facility is notifying of a change in major source status. OMB has previously approved the information collection activities contained in the existing regulations. These amendments would neither require additional reports nor require that additional content be added to already required reports. Therefore, this action would not impose any new information-collection burden. Furthermore, approval of an Information Collection Request (ICR) is not required in connection with these final amendments. This is because the General Provisions do not themselves require any reporting and recordkeeping activities, and no ICR was submitted in connection with their original promulgation or their subsequent amendment. Any recordkeeping and reporting requirements are imposed only through the incorporation of specific elements of the General Provisions in the individual NESHAP, which are promulgated for particular source categories that have their own ICRs.

D. Regulatory Flexibility Act (RFA)

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. In making this determination, the impact of concern is any significant adverse economic impact on small entities. An agency may certify that a rule will not have a significant economic impact on a substantial number of small entities if the rule relieves regulatory burden, has no net burden, or otherwise has a positive economic effect on the small entities subject to the rule.

Small entities that are subject to major source NESHAP requirements would not be required to take any action under this final rule; any action a source takes to reclassify as an area source would be voluntary. We expect that sources that reclassify will experience cost savings that will outweigh any additional cost of achieving area source status. The only cost that would be incurred by regulatory authorities would be the cost of reviewing a sources' application for area source status and issuing enforceable PTE limits, as appropriate. No small government jurisdictions operate their own air pollution control permitting agencies, so none would be required to incur costs under the final

rule. In addition, any costs associated with the reclassification of major sources as area sources (*i.e.*, application reviews and PTE issuance) are expected to be offset by reduced reporting and recordkeeping obligations for sources that no longer must meet major source NESHAP requirements.

Based on the considerations above, we have, therefore, concluded that this action will relieve regulatory burden for all regulated small entities that reclassify to area source status. We also note that a small-entity analysis, prepared at the discretion of the EPA and reflecting the relief in regulatory burden, was prepared for this final rule and is included in the RIA, which is available in the public docket for this rulemaking. The results of this small-entity analysis show relatively small reductions in burden estimate annual costs (about 0.10 percent) as a percentage of sales using the median estimate as the average of impacts.

E. Unfunded Mandates Reform Act (UMRA)

This action does not contain an unfunded mandate of \$100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. This action imposes no enforceable duty on any state, local, or tribal governments or the private sector. Since the impacts of this action are merely illustrative of potential outcomes, it precludes identifying additional costs to states as an unfunded mandate.

F. Executive Order 13132: Federalism

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the federal government and the states, or on the distribution of power and responsibilities among the various levels of government.

G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments

This action has tribal implications. However, it will neither impose substantial direct compliance costs on federally recognized tribal governments, nor preempt tribal law. There are two tribes that currently implement title V permit programs and one that implements an approved TIP for minor source permitting, the latter of which also has a major source. As a result, these tribes may have additional permit actions if sources in their jurisdiction seek reclassification to area source status. Any tribal government that owns or operates a source subject to major

source NESHAP requirements would not be required to take action under this final rule; the reclassification provisions in the final rule would be strictly voluntary. In addition, achieving area source status would result in reduced burden on any source that no longer must meet major source NESHAP requirements. Under the final rule, a tribal government with an air pollution control agency to which we have delegated CAA section 112 authority would be required to review permit applications and to modify permits as necessary. However, any burden associated with the review and modification of permits will be offset by reduced Agency oversight obligations for sources no longer required to meet major source requirements.

For sources located within Indian country, where the EPA is the reviewing authority, unless the EPA has approved a non-federal minor source permitting program or a delegation of the Federal Indian Country Minor NSR Rule, the Federal Indian Country Minor NSR Rule at 40 CFR 49.151 through 49.165 provides a mechanism for an otherwise major source to voluntarily accept restrictions on its PTE to become a synthetic source, among other provisions. The Federal Indian Country Minor NSR Rule applies to sources located within the exterior boundaries of an Indian reservation or other lands as specified in 40 CFR part 49, collectively referred to as “Indian country.” See 40 CFR 49.151(c) and 49.152(d). This mechanism may also be used by an otherwise major source of HAP to voluntarily accept restrictions on its PTE to become a synthetic area HAP source. The EPA’s FIP program, which includes the Federal Indian Country Minor NSR Rule, provides additional options for particular situations, such as general permits for specific source categories, to facilitate minor source emissions management in Indian country. Existing sources in Indian country may have PTE limits that preceded the EPA’s FIP for minor sources and, for that reason, were issued in a 40 CFR part 71 permit or FIP permitting provision applicable to the Indian reservation.

At proposal, the EPA specifically solicited comment from tribal officials and, consistent with EPA policy, offered to consult with the potentially impacted tribes and other tribes upon their request. On June 27, 2019, the EPA sent consultation letters to four tribes that may be impacted by this action. The EPA also gave an overview of the proposed action on a call with the National Tribal Air Association on June 27, 2019, and held an informational

webinar for tribes on July 24, 2019. In addition, we sent consultation letters to the 573 federally recognized tribes on September 27, 2019, and held an informational call with one tribe on October 21, 2019. The EPA did not receive any requests for tribal consultation on this action.

H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks

The EPA interprets Executive Order 13045 as applying only to those regulatory actions that concern environmental health or safety risks that the EPA has reason to believe may disproportionately affect children, per the definition of “covered regulatory action” in section 2–202 of the Executive Order. This action is not subject to Executive Order 13045 because it implements the plain reading of the definitions of major source and area source as established by Congress in section 112 of the CAA.

I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

This action is not a “significant energy action” because it is not likely to have a significant adverse effect on the supply, distribution, or use of energy. We have concluded that this final action is not likely to have any adverse energy effects.

J. National Technology Transfer and Advancement Act (NTTAA)

This rulemaking does not involve technical standards.

K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

The EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations, and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994) because it does not establish an environmental health or safety standard. The final amendments to the General Provisions are procedural changes and do not impact the technology performance nor level of control of the NESHAP governed by the General Provisions.

L. Determination Under CAA Section 307(d)

Pursuant to CAA section 307(d)(1)(V), the Administrator determines that this action is subject to the provisions of

CAA section 307(d). Section 307(d)(1)(V) of the CAA provides that the provisions of CAA section 307(d) apply to “such other actions as the Administrator may determine.”

M. Congressional Review Act (CRA)

This action is subject to the CRA, and the EPA will submit a rule report to each House of the Congress and to the Comptroller General of the United States. This action is a “major rule” as defined by 5 U.S.C. 804(2).

List of Subjects in 40 CFR Part 63

Environmental protection, Area sources, General provisions, Hazardous air pollutants, Major sources, Potential to emit.

Andrew Wheeler,
Administrator.

For the reasons set forth in the preamble, the EPA amends 40 CFR part 63 as follows:

PART 63—NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS FOR SOURCE CATEGORIES

■ 1. The authority citation part 63 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart A—General Provisions

■ 2. Amend § 63.1 by adding paragraph (c)(6) to read as follows:

§ 63.1 Applicability.

* * * * *

(c) * * *

(6) A major source may become an area source at any time upon reducing its emissions of and potential to emit hazardous air pollutants, as defined in this subpart, to below the major source thresholds established in § 63.2, subject to the provisions in paragraphs (c)(6)(i) and (ii) of this section.

(i) A major source reclassifying to area source status is subject to the applicability of standards, compliance dates and notification requirements specified in (c)(6)(i)(A) of this section. An area source that previously was a major source and becomes a major source again is subject to the applicability of standards, compliance dates, and notification requirements specified in (c)(6)(i)(B) of this section:

(A) A major source reclassifying to area source status under this part remains subject to any applicable major source requirements established under this part until the reclassification becomes effective. After the reclassification becomes effective, the source is subject to any applicable area

source requirements established under this part immediately, provided the compliance date for the area source requirements has passed. The owner or operator of a major source that becomes an area source subject to newly applicable area source requirements under this part must comply with the initial notification requirements pursuant to § 63.9(b). The owner or operator of a major source that becomes an area source must also provide to the Administrator any change in the information already provided under § 63.9(b) per § 63.9(j).

(B) An area source that previously was a major source under this part and that becomes a major source again is subject to the applicable major source requirements established under this part immediately upon becoming a major source again, provided the compliance date for the major source requirements has passed, notwithstanding any provision within the applicable subparts. The owner or operator of an area source that becomes a major source again must comply with the initial notification pursuant to § 63.9(b). The owner or operator must also provide to the Administrator any change in the information already provided under § 63.9(b) per § 63.9(j).

(ii) Becoming an area source does not absolve a source subject to an enforcement action or investigation for major source violations or infractions from the consequences of any actions occurring when the source was major. Becoming a major source does not absolve a source subject to an enforcement action or investigation for area source violations or infractions from the consequences of any actions occurring when the source was an area source.

* * * * *

■ 3. Amend § 63.2 by revising the definition “Potential to emit” to read as follows:

§ 63.2 Definitions.

* * * * *

Potential to emit means the maximum capacity of a stationary source to emit a pollutant under its physical and operational design. Any physical or operational limitation on the capacity of the stationary source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is enforceable.

* * * * *

■ 4. Amend § 63.6 by revising paragraphs (b)(7) and (c)(1) and (5) to read as follows:

§ 63.6 Compliance with standards and maintenance requirements.

* * * * *

(b) * * *

(7) When an area source increases its emissions of (or its potential to emit) hazardous air pollutants such that the source becomes a major source, the portion of the facility that meets the definition of a new affected source must comply with all requirements of that standard applicable to new sources. The source owner or operator must comply with the relevant standard upon startup.

* * * * *

(c) * * *

(1) After the effective date of a relevant standard established under this part pursuant to section 112(d) or 112(h) of the Act, the owner or operator of an existing source shall comply with such standard by the compliance date established by the Administrator in the applicable subpart(s) of this part, except as provided in § 63.1(c)(6)(i). Except as otherwise provided for in section 112 of the Act, in no case will the compliance date established for an existing source in an applicable subpart of this part exceed 3 years after the effective date of such standard.

* * * * *

(5) Except as provided in paragraph (b)(7) of this section, the owner or operator of an area source that increases its emissions of (or its potential to emit) hazardous air pollutants such that the source becomes a major source and meets the definition of an existing source in the applicable major source standard shall be subject to relevant standards for existing sources. Except as provided in paragraph § 63.1(c)(6)(i)(B), such sources must comply by the date specified in the standards for existing area sources that become major sources. If no such compliance date is specified in the standards, the source shall have a period of time to comply with the relevant emission standard that is equivalent to the compliance period specified in the relevant standard for existing sources in existence at the time the standard becomes effective.

* * * * *

■ 5. Amend § 63.9 by revising paragraphs (b)(1)(ii) and (j) and adding paragraph (k) to read as follows:

§ 63.9 Notification requirements.

* * * * *

(b) * * *

(1) * * *

(ii) If an area source subsequently becomes a major source that is subject

to the emission standard or other requirement, such source shall be subject to the notification requirements of this section. Area sources previously subject to major source requirements that become major sources again are also subject to the notification requirements of this paragraph and must submit the notification according to the requirements of paragraph (k) of this section.

* * * * *

(j) *Change in information already provided.* Any change in the information already provided under this section shall be provided to the Administrator within 15 calendar days after the change. The owner or operator of a major source that reclassifies to area source status is also subject to the notification requirements of this paragraph. The owner or operator may use the application for reclassification with the regulatory authority (e.g., permit application) to fulfill the requirements of this paragraph. A source which reclassified after January 25, 2018, and before January 19, 2021, and has not yet provided the notification of a change in information is required to provide such notification no later than February 2, 2021, according to the requirements of paragraph (k) of this section. Beginning January 19, 2021, the owner or operator of a major source that reclassifies to area source status must submit the notification according to the requirements of paragraph (k) of this section. A notification of reclassification must contain the following information:

(1) The name and address of the owner or operator;

(2) The address (i.e., physical location) of the affected source;

(3) An identification of the standard being reclassified from and to (if applicable); and

(4) Date of effectiveness of the reclassification.

(k) *Electronic submission of notifications or reports.* If you are required to submit notifications or reports following the procedure specified in this paragraph (k), you must submit notifications or reports to the EPA via CEDRI, which can be accessed through the EPA's Central Data Exchange (CDX) (<https://cdx.epa.gov/>). The notification or report must be submitted by the deadline specified. The EPA will make all the information submitted through CEDRI available to the public without further notice to you. Do not use CEDRI to submit information you claim as confidential business information (CBI). Anything submitted using CEDRI cannot later be claimed to

be CBI. Although we do not expect persons to assert a claim of CBI, if persons wish to assert a CBI, submit a complete notification or report, including information claimed to be CBI, to the EPA. Submit the file on a compact disc, flash drive, or other commonly used electronic storage medium and clearly mark the medium as CBI. Mail the electronic medium to U.S. EPA/OAQPS/CORE CBI Office, Attention: Group Leader, Measurement Policy Group, MD C404-02, 4930 Old Page Rd., Durham, NC 27703. The same file with the CBI omitted must be submitted to the EPA via the EPA's CDX as described earlier in this paragraph (k). All CBI claims must be asserted at the time of submission. Furthermore, under section 114(c) of the Act emissions data is not entitled to confidential treatment and requires EPA to make emissions data available to the public. Thus, emissions data will not be protected as CBI and will be made publicly available.

(1) If you are required to electronically submit a notification or report by this paragraph (k) through CEDRI in the EPA's CDX, you may assert a claim of EPA system outage for failure to timely comply with the electronic submittal requirement. To assert a claim of EPA system outage, you must meet the requirements outlined in paragraphs (k)(1)(i) through (vii) of this section.

(i) You must have been or will be precluded from accessing CEDRI and submitting a required notification or report within the time prescribed due to an outage of either the EPA's CEDRI or CDX systems.

(ii) The outage must have occurred within the period of time beginning 5 business days prior to the date that the notification or report is due.

(iii) The outage may be planned or unplanned.

(iv) You must submit notification to the Administrator in writing as soon as possible following the date you first knew, or through due diligence should have known, that the event may cause or has caused a delay in reporting.

(v) You must provide to the Administrator a written description identifying:

(A) The date(s) and time(s) when CDX or CEDRI was accessed and the system was unavailable;

(B) A rationale for attributing the delay in submitting beyond the regulatory deadline to EPA system outage;

(C) Measures taken or to be taken to minimize the delay in submitting; and

(D) The date by which you propose to submit, or if you have already met the

electronic submittal requirement in this paragraph (k) at the time of the notification, the date you submitted the notification or report.

(vi) The decision to accept the claim of EPA system outage and allow an extension to the reporting deadline is solely within the discretion of the Administrator.

(vii) In any circumstance, the notification or report must be submitted electronically as soon as possible after the outage is resolved.

(2) If you are required to electronically submit a notification or report by this paragraph (k) through CEDRI in the EPA's CDX, you may assert a claim of force majeure for failure to timely comply with the electronic submittal requirement. To assert a claim of force majeure, you must meet the requirements outlined in paragraphs (k)(2)(i) through (v) of this section.

(i) You may submit a claim if a force majeure event is about to occur, occurs, or has occurred or there are lingering effects from such an event within the period of time beginning five business days prior to the date the submission is due. For the purposes of this section, a force majeure event is defined as an event that will be or has been caused by circumstances beyond the control of the affected facility, its contractors, or any entity controlled by the affected facility that prevents you from complying with the requirement to submit a notification or report electronically within the time period prescribed. Examples of such events are acts of nature (e.g., hurricanes, earthquakes, or floods), acts of war or terrorism, or equipment failure or safety hazard beyond the control of the affected facility (e.g., large scale power outage).

(ii) You must submit notification to the Administrator in writing as soon as possible following the date you first knew, or through due diligence should have known, that the event may cause or has caused a delay in submitting through CEDRI.

(iii) You must provide to the Administrator:

(A) A written description of the force majeure event;

(B) A rationale for attributing the delay in reporting beyond the regulatory deadline to the force majeure event;

(C) Measures taken or to be taken to minimize the delay in reporting; and

(D) The date by which you propose to submit the notification or report, or if you have already met the electronic submittal requirement in this paragraph (k) at the time of the notification, the date you submitted the notification or report.

(iv) The decision to accept the claim of force majeure and allow an extension to the submittal deadline is solely within the discretion of the Administrator.

(v) In any circumstance, the reporting must occur as soon as possible after the force majeure event occurs.

■ 6. Amend § 63.10 by revising paragraph (b)(3) to read as follows:

§ 63.10 Recordkeeping and reporting requirements.

* * * * *

(b) * * *

(3) If an owner or operator determines that his or her existing or new stationary source is in the source category regulated by a standard established pursuant to section 112 of the Act, but that source is not subject to the relevant standard (or other requirement established under this part) because of enforceable limitations on the source's potential to emit, or the source otherwise qualifies for an exclusion, the owner or operator must keep a record of the applicability determination. The applicability determination must be kept on site at the source for a period of 5 years after the determination, or until the source changes its operations to become an affected source subject to the relevant standard (or other requirement established under this part), whichever comes first if the determination is made prior to January 19, 2021. The applicability determination must be kept until the source changes its operations to become an affected source subject to the relevant standard (or other requirement established under this part) if the determination was made on or after January 19, 2021. The record of the applicability determination must be signed by the person making the determination and include an emissions analysis (or other information) that demonstrates the owner or operator's conclusion that the source is unaffected (e.g., because the source is an area source). The analysis (or other information) must be sufficiently detailed to allow the Administrator to make an applicability finding for the source with regard to the relevant standard or other requirement. If applicable, the analysis must be performed in accordance with requirements established in relevant subparts of this part for this purpose for particular categories of stationary sources. If relevant, the analysis should be performed in accordance with EPA guidance materials published to assist sources in making applicability determinations under section 112 of the Act, if any. The requirements to

determine applicability of a standard under § 63.1(b)(3) and to record the results of that determination under this paragraph (b)(3) of this section shall not by themselves create an obligation for the owner or operator to obtain a title V permit.

* * * * *

■ 7. Amend § 63.12 by revising paragraph (c) to read as follows:

§ 63.12 State authority and delegations.

* * * * *

(c) All information required to be submitted to the EPA under this part also shall be submitted to the appropriate state agency of any state to which authority has been delegated under section 112(l) of the Act, provided that each specific delegation may exempt sources from a certain federal or state reporting requirement. Any information required to be

submitted electronically by this part via the EPA's CEDRI may, at the discretion of the delegated authority, satisfy the requirements of this paragraph. The Administrator may permit all or some of the information to be submitted to the appropriate state agency only, instead of to the EPA and the state agency with the exception of federal electronic reporting requirements under this part. Sources may not be exempted from federal electronic reporting requirements.

■ 8. Amend § 63.13 by revising paragraph (a) introductory text to read as follows:

§ 63.13 Addresses of State air pollution control agencies and EPA Regional Offices.

(a) All requests, reports, applications, submittals, and other communications to the Administrator pursuant to this part shall be submitted to the appropriate Regional Office of the U.S.

Environmental Protection Agency indicated in the following list of EPA Regional offices. If a request, report, application, submittal, or other communication is required by this part to be submitted electronically via the EPA's CEDRI then such submission satisfies the requirements of this paragraph (a).

* * * * *

Subpart F—National Emission Standards for Organic Hazardous Air Pollutants From the Synthetic Organic Chemical Manufacturing Industry

■ 9. Amend table 3 to subpart F of part 63 by adding in numerical order an entry for § 63.1(c)(6), revising the entry for § 63.9(j), and adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 3 TO SUBPART F OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPARTS F, G, AND H^a TO SUBPART F

Reference	Applies to subparts F, G, and H	Comment
* * * * *	* * * * *	* * * * *
63.1(c)(6)	Yes.	
* * * * *	* * * * *	* * * * *
63.9(j)	Yes	Only as related to change to major source status.
63.9(k)	Yes	Only as specified in § 63.9(j).
* * * * *	* * * * *	* * * * *

^a Wherever subpart A specifies "postmark" dates, submittals may be sent by methods other than the U.S. Mail (e.g., by fax or courier). Submittals shall be sent by the specified dates, but a postmark is not necessarily required.

* * * * *

Subpart G—National Emission Standards for Organic Hazardous Air Pollutants From the Synthetic Organic Chemical Manufacturing Industry for Process Vents, Storage Vessels, Transfer Operations, and Wastewater

■ 10. Amend § 63.151 by revising paragraphs (b)(2)(i) through (iii) to read as follows:

§ 63.151 Initial notification.

* * * * *

(b) * * *
(2) * * *

(i) For an existing source, the Initial Notification shall be submitted within 120 calendar days after the date of promulgation, or no later than 120 days

after the source becomes subject to this subpart, whichever is later.

(ii) For a new source that has an initial start-up 90 calendar days after the date of promulgation of this subpart or later, the application for approval of construction or reconstruction required by § 63.5(d) of subpart A shall be submitted in lieu of the Initial Notification. The application shall be submitted as soon as practicable before construction or reconstruction is planned to commence (but it need not be sooner than 90 calendar days after the date of promulgation of this subpart). For a new source that reclassifies to major source status after January 19, 2021 and greater than 90 days after the initial start-up, the source shall submit the initial notification

required by § 63.9(b) no later than 120 days after the source becomes subject to this subpart.

(iii) For a new source that has an initial start-up prior to 90 calendar days after the date of promulgation, the Initial Notification shall be submitted within 90 calendar days after the date of promulgation of this subpart, or no later than 120 days after the source becomes subject to this subpart, whichever is later. The application for approval of construction or reconstruction described in § 63.5(d) of subpart A is not required for these sources.

* * * * *

■ 11. Amend table 1A to subpart G by revising the entry for § 63.9 to read as follows:

TABLE 1A TO SUBPART G OF PART 63—APPLICABLE 40 CFR PART 63 GENERAL PROVISIONS

40 CFR part 63, subpart A, provisions applicable to subpart G

* * * * *

§ 63.9(a)(2), (b)(4)(i),^a (b)(4)(ii), (b)(4)(iii), (b)(5),^a (c), (d), (j), and (k).

TABLE 1A TO SUBPART G OF PART 63—APPLICABLE 40 CFR PART 63 GENERAL PROVISIONS—Continued

40 CFR part 63, subpart A, provisions applicable to subpart G

^a The notifications specified in § 63.9(b)(4)(i) and (b)(5) shall be submitted at the times specified in 40 CFR part 65.

* * * * *

Subpart H—National Emission Standards for Organic Hazardous Air Pollutants for Equipment Leaks

■ 12. Amend § 63.182 by revising paragraphs (b)(2)(i) through (iii) to read as follows:

§ 63.182 Reporting requirements.

* * * * *

(b) * * *

(2) * * *

(i) For an existing source, the Initial Notification shall be submitted within 120 calendar days after the date of promulgation or no later than 120 calendar days after the source becomes

subject to this subpart, whichever is later.

(ii) For a new source that has an initial start-up 90 days after the date of promulgation of this subpart or later, the application for approval of construction or reconstruction required by § 63.5(d) of subpart A of this part shall be submitted in lieu of the Initial Notification. The application shall be submitted as soon as practicable before the construction or reconstruction is planned to commence (but it need not be sooner than 90 days after the date of promulgation of the subpart that references this subpart). For a new source that reclassifies to major source status after January 19, 2021 and greater than 90 days after the initial start-up,

the source shall submit the initial notification required by § 63.9(b) no later than 120 days after the source becomes subject to this subpart.

(iii) For a new source that has an initial start-up prior to 90 days after the date of promulgation of the applicable subpart, the Initial Notification shall be submitted within 90 days after the date of promulgation of the subpart that references this subpart, or no later than 120 calendar days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 13. Amend table 4 to subpart H by revising entry for § 63.9 to read as follows:

TABLE 4 TO SUBPART H OF PART 63—APPLICABLE 40 CFR PART 63 GENERAL PROVISIONS

40 CFR part 63, subpart A, provisions applicable to subpart H

§ 63.9(a)(2), (b)(4)(i),^a (b)(4)(ii), (b)(4)(iii), (b)(5),^a (c), (d), (j) and (k).

* * * * *

^a The notifications specified in § 63.9(b)(4)(i) and (b)(5) shall be submitted at the times specified in 40 CFR part 65.**Subpart J—National Emission Standards for Hazardous Air Pollutants for Polyvinyl Chloride and Copolymers Production**

■ 14. Amend § 63.215 by revising paragraph (b) introductory text and adding paragraph (b)(4) to read as follows:

§ 63.215 What General Provisions apply to me?

* * * * *

(b) The provisions in subpart A of this part also apply to this subpart as specified in paragraphs (b)(1) through (4) of this section.

* * * * *

(4) The specific notification procedure of § 63.9(j) and (k) relating to a change in major source status.

Subpart L—National Emission Standards for Coke Oven Batteries

■ 15. Amend § 63.311 by revising paragraph (a) to read as follows:

§ 63.311 Reporting and recordkeeping requirements.

(a) *General requirements.* After the effective date of an approved permit in a state under part 70 of this chapter, the owner or operator shall submit all notifications and reports required by this subpart to the state permitting authority except a source that reclassifies to an area source must follow the notification procedures of § 63.9(j) and (k). Use of information provided by the certified observer shall be a sufficient basis for notifications required under § 70.5(c)(9) of this chapter and the reasonable inquiry requirement of § 70.5(d) of this chapter.

* * * * *

Subpart M—National Perchloroethylene Air Emission Standards for Dry Cleaning Facilities

■ 16. Amend § 63.324 by adding paragraph (g) to read as follows:

§ 63.324 Reporting and recordkeeping requirements.

* * * * *

(g) Each owner or operator of a dry cleaning facility that reclassifies from a major source to an area source must follow the procedures of § 63.9(j) and (k) to provide notification of the change in status.

Subpart N—National Emission Standards for Chromium Emissions From Hard and Decorative Chromium Electroplating and Chromium Anodizing Tanks

■ 17. Amend § 63.347 by revising paragraph (c)(1) introductory text to read as follows:

§ 63.347 Reporting requirements.

* * * * *

(c) * * *

(1) The owner or operator of an affected source that has an initial startup before January 25, 1995, shall notify the Administrator in writing that the source is subject to this subpart. The notification shall be submitted no later than 180 calendar days after January 25, 1995, or no later than 120 days after the source becomes subject to this subpart,

whichever is later, and shall contain the following information:

■ 18. Amend table 1 to subpart N of part 63 by adding in numerical order entries

for §§ 63.1(c)(6) and 63.9(k) to read as follows:

* * * * *

TABLE 1 TO SUBPART N OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART N

General provisions reference	Applies to subpart N	Comment
63.1(c)(6)	Yes.	
63.9(k)	Yes	Only as specified in § 63.9(j).

Subpart O—Ethylene Oxide Emissions Standards for Sterilization Facilities

entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

■ 19. Amend § 63.360 in table 1 of § 63.360 by adding in numerical order

§ 63.360 Applicability.

* * * * *

TABLE 1 OF § 63.360—GENERAL PROVISIONS APPLICABILITY TO SUBPART O

Reference	Applies to sources using 10 tons in subpart O ^a	Applies to sources using 1 to 10 tons in subpart O ^a	Comment
63.1(c)(6)	Yes		
63.9(k)	Yes		Only as specified in § 63.9(j).

^a See definition.

* * * * *

Subpart Q—National Emission Standards for Hazardous Air Pollutants for Industrial Process Cooling Towers

■ 20. Amend § 63.405 by revising paragraphs (a)(1) introductory text, (a)(2), and (b)(1) to read as follows:

§ 63.405 Notification requirements.

(a) * * *

(1) In accordance with § 63.9(b) of subpart A, owners or operators of all affected IPCT's that have an initial startup before September 8, 1994, shall notify the Administrator in writing. The notification, which shall be submitted not later than 12 months after

September 8, 1994, or no later than 120 days after the source becomes subject to this subpart, whichever is later, shall provide the following information:

(2) In accordance with § 63.9(b) of subpart A, owners or operators of all affected IPCT's that have an initial startup on or after September 8, 1994, shall notify the Administrator in writing that the source is subject to the relevant standard no later than 12 months after initial startup or no later than 120 days after the source becomes subject to this subpart, whichever is later. The notification shall provide all the information required in paragraphs (a)(1)(i) through (iv) of this section.

(b) * * *

(1) In accordance with § 63.9(h) of subpart A, owners or operators of affected IPCT's shall submit to the Administrator a notification of compliance status within 60 days of the date on which the IPCT is brought into compliance with § 63.402 of this subpart and not later than 18 months after September 8, 1994, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 21. Amend table 1 to subpart Q of part 63 by revising the entry for § 63.9 to read as follows:

TABLE 1 TO SUBPART Q OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART Q

Reference	Applies to subpart Q	Comment
63.9(a), (b)(1), (b)(3), (c), (h)(1), (h)(3), (h)(6), (j), and (k).	Yes	§ 63.9(k) only as specified in 63.9(j).

Subpart R—National Emission Standards for Gasoline Distribution Facilities (Bulk Gasoline Terminals and Pipeline Breakout Stations)

for §§ 63.1(c)(6) and 63.9(k) to read as follows:

- 22. Amend table 1 to subpart R of part 63 by adding in numerical order entries

TABLE 1 TO SUBPART R OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART R

Reference	Applies to subpart R	Comment
63.1(c)(6)	Yes.	
63.9(k)	Yes	Only as specified in § 63.9(j).

Subpart S—National Emission Standards for Hazardous Air Pollutants From the Pulp and Paper Industry

§ 63.455 Reporting requirements.

(a) Each owner or operator of a source subject to this subpart shall comply with the reporting requirements of subpart A of this part as specified in Table 1 to subpart S of part 63 and all the following requirements in this section. The initial notification report specified under § 63.9(b)(2) of subpart A

of this part shall be submitted by April 15, 1999, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

- 23. Amend § 63.455 by revising paragraph (a) to read as follows:

- 24. Amend table 1 to subpart S of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 1 TO SUBPART S OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART S^a

Reference	Applies to subpart S	Comment
63.1(c)(6)	Yes.	
63.9(k)	Yes	Only as specified in § 63.9(j).

^a Wherever subpart A specifies “postmark” dates, submittals may be sent by methods other than the U.S. Mail (e.g., by fax or courier). Submittals shall be sent by the specified dates, but a postmark is not required.

Subpart T—National Emission Standards for Halogenated Solvent Cleaning

- 25. Amend § 63.468 by revising the introductory text of paragraphs (a), (b), (c), and (d) to read as follows:

§ 63.468 Reporting requirements.

(a) Each owner or operator of an existing solvent cleaning machine subject to the provisions of this subpart shall submit an initial notification report to the Administrator no later than August 29, 1995, or no later than 120 days after the source becomes subject to this subpart, whichever is later. This report shall include the information specified in paragraphs (a)(1) through (6) of this section.

* * * * *

(b) Each owner or operator of a new solvent cleaning machine subject to the provisions of this subpart shall submit an initial notification report to the Administrator. New sources for which construction or reconstruction had commenced and initial startup had not occurred before December 2, 1994, shall submit this report as soon as practicable before startup but no later than January 31, 1995, or no later than 120 days after the source becomes subject to this subpart, whichever is later. New sources for which the construction or reconstruction commenced after December 2, 1994, shall submit this report as soon as practicable before the construction or reconstruction is planned to commence or for sources which reclassify to major source status, no later than 120 days after the source becomes subject to this subpart. This

report shall include all of the information required in § 63.5(d)(1) of subpart A (General Provisions), with the revisions and additions in paragraphs (b)(1) through (b)(3) of this section.

* * * * *

(c) Each owner or operator of a batch cold solvent cleaning machine subject to the provisions of this subpart shall submit a compliance report to the Administrator. For existing sources, this report shall be submitted to the Administrator no later than 150 days after the compliance date specified in § 63.460(d), or no later than 120 days after the source becomes subject to this subpart, whichever is later. For new sources, this report shall be submitted to the Administrator no later than 150 days after startup or May 1, 1995, or no later than 120 days after the source becomes subject to this subpart, whichever is

later. This report shall include the requirements specified in paragraphs (c)(1) through (4) of this section.

* * * * *

(d) Each owner or operator of a batch vapor or in-line solvent cleaning machine complying with the provisions of § 63.463 shall submit to the Administrator an initial statement of compliance for each solvent cleaning

machine. For existing sources, this report shall be submitted to the Administrator no later than 150 days after the compliance date specified in § 63.460(d), or no later than 120 days after the source becomes subject to this subpart, whichever is later. For new sources, this report shall be submitted to the Administrator no later than 150 days after startup or May 1, 1995, or no later

than 120 days after the source becomes subject to this subpart, whichever is later. This statement shall include the requirements specified in paragraphs (d)(1) through (6) of this section.

* * * * *

■ 26. Amend appendix B to subpart T of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

APPENDIX B TO SUBPART T OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART T

Reference	Applies to subpart T		Comments
	BCC	BVI	
* * * * *			
63.1(c)(6)	Yes	Yes.	*
* * * * *			
63.9(k)	Yes	Yes	Only as specified in § 63.9(j).
* * * * *			

* * * * *

Subpart U—National Emission Standards for Hazardous Air Pollutant Emissions: Group I Polymers and Resins

■ 27. Amend table 1 to subpart U of part 63 by adding in numerical order an entry for § 63.1(c)(6), revising the entry for § 63.9(j), and adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 1 TO SUBPART U OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART U AFFECTED SOURCES

Reference	Applies to subpart U	Explanation
* * * * *		
§ 63.1(c)(6) ...	Yes.	
* * * * *		
§ 63.9(j)	Yes	For change in major source status only.
§ 63.9(k)	Yes	Only as specified in § 63.9(j).

TABLE 1 TO SUBPART U OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART U AFFECTED SOURCES—Continued

Reference	Applies to subpart U	Explanation
* * * * *		
* * * * *		

Subpart W—National Emission Standards for Hazardous Air Pollutants for Epoxy Resins Production and Non-Nylon Polyamides Production

■ 28. Amend table 1 to subpart W of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 1 TO SUBPART W OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART W

Reference	Applies to subpart W			Comment
	BLR	WSR	WSR alternative standard, and BLR equipment leak standard (40 CFR part 63, subpart H)	
* * * * *				
§ 63.1(c)(6)	Yes	Yes	Yes.	*
* * * * *				
§ 63.9(k)	Yes	Yes	Yes	Only as specified in § 63.9(j).
* * * * *				

Subpart X—National Emission Standards for Hazardous Air Pollutants From Secondary Lead Smelting

■ 29. Amend table 1 to subpart X of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 1 TO SUBPART X OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART X

Reference	Applies to subpart X	Comment
* * *	* * *	* * *
63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *
* * *	* * *	* * *

Subpart Y—National Emission Standards for Marine Tank Vessel Loading Operations

■ 30. Amend § 63.567 by revising paragraphs (b)(2) introductory text and (b)(3) to read as follows:

§ 63.567 Recordkeeping and reporting requirements.

* * * * *

(b) * * *

(2) *Initial notification for sources with startup before the effective date.* The owner or operator of a source with initial startup before the effective date

shall notify the Administrator in writing that the source is subject to the relevant standard. The notification shall be submitted not later than 365 days after the effective date of the emissions standards or no later than 120 days after the source becomes subject to this subpart, whichever is later, and shall provide the following information:

(3) *Initial notification for sources with startup after the effective date.* The owner or operator of a new or reconstructed source or a source that has been reconstructed such that it is subject to the emissions standards that has an initial startup after the effective date but before the compliance date, and for which an application for approval of construction or reconstruction is not required under § 63.5(d) of subpart A of this part and § 63.566 of this subpart, or a source which reclassifies to major source status after the effective date, shall notify the Administrator in writing that the source is subject to the standard no later than 365 days, 120 days after initial startup, or no later than 120 days after the source becomes subject to this subpart, whichever occurs before notification of the initial performance test in § 63.9(e) of subpart A of this part. The notification shall provide all the information required in paragraph (b)(2) of this section, delivered or postmarked with the notification required in paragraph (b)(4) of this section.

* * * * *

■ 31. Amend table 1 of § 63.560 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

§ 63.560 Applicability and designation of affected sources.

* * * * *

TABLE 1 TO § 63.560—GENERAL PROVISIONS APPLICABILITY TO SUBPART Y

Reference	Applies to affected sources in subpart Y	Comment
* * *	* * *	* * *
63.1(c)(6)	Yes.	* * *
* * *	* * *	* * *
63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *

Subpart AA—National Emission Standards for Hazardous Air Pollutants From Phosphoric Acid Manufacturing Plants

■ 32. Amend appendix A to subpart AA of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

APPENDIX A TO SUBPART AA OF PART 63—APPLICABILITY OF GENERAL PROVISIONS (40 CFR PART 63, SUBPART A) TO SUBPART AA

40 CFR citation	Requirement	Applies to subpart AA	Comment
* * *	* * *	* * *	* * *
§ 63.1(c)(6)	Yes	None.
* * *	* * *	* * *	* * *
§ 63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *	* * *

Subpart BB—National Emission Standards for Hazardous Air Pollutants From Phosphate Fertilizers Production Plants

■ 33. Amend appendix A to subpart BB of part 63 by adding in numerical order

entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

APPENDIX A TO SUBPART BB OF PART 63—APPLICABILITY OF GENERAL PROVISIONS (40 CFR PART 63, SUBPART A) TO SUBPART BB

40 CFR citation	Requirement	Applies to subpart BB	Comment
* * *	*	*	*
§ 63.1(c)(6)	Yes	None.
* * *	*	*	*
§ 63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	*	*	*

Subpart CC—National Emission Standards for Hazardous Air Pollutants From Petroleum Refineries

numerical order an entry for § 63.1(c)(6) revising the entry for § 63.9(j), and adding in numerical order an entry for § 63.9(k) to read as follows:

Appendix to Subpart CC of Part 63—Tables

* * * * *

■ 34. Amend appendix to subpart CC of part 63 in table 6 by adding in

TABLE 6—GENERAL PROVISIONS APPLICABILITY TO SUBPART CC^a

Reference	Applies to subpart CC	Comment
* * *	*	*
63.1(c)(6)	Yes.	*
* * *	*	*
63.9(j)	Yes	*
63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	*	*

^a Wherever subpart A specifies “postmark” dates, submittals may be sent by methods other than the U.S. Mail (e.g., by fax or courier). Submittals shall be sent by the specified dates, but a postmark is not required.

* * * * *

Subpart DD—National Emission Standards for Hazardous Air Pollutants From Off-Site Waste and Recovery Operations

■ 35. Amend § 63.697 by revising paragraph (a)(1) introductory text to read as follows:

§ 63.697 Reporting requirements.

(a) * * *

(1) The owner or operator of an affected source must submit notices to the Administrator in accordance with the applicable notification requirements in 40 CFR 63.9 as specified in Table 2 of this subpart. For the purpose of this subpart, an owner or operator subject to the initial notification requirements under 40 CFR 63.9(b)(2) must submit

the required notification on or before October 19, 1999, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 36. Amend table 2 to subpart DD of part 63 by adding in numerical order an entry for § 63.1(c)(6) in numerical order, revising the entry for § 63.9(j), and adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 2 TO SUBPART DD OF PART 63—APPLICABILITY OF PARAGRAPHS IN SUBPART A OF THIS PART 63—GENERAL PROVISIONS TO SUBPART DD

Subpart A reference	Applies to subpart DD	Explanation
* * *	*	*
63.1(c)(6)	Yes.	*
* * *	*	*
63.9(j)	Yes	For change in major source status only.
63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	*	*

* * * * *

Subpart EE—National Emission Standards for Magnetic Tape Manufacturing Operations

63.9(b)(2) and adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

- 37. Amend table 1 to subpart EE of part 63 by revising the entry for

TABLE 1 TO SUBPART EE OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART EE

Reference	Applies to subpart EE	Comment
63.1(c)(6)	Yes.	
63.9(b)(2)	Yes	§ 63.753(a)(1) requires submittal of the initial notification at least 1 year prior to the compliance date or as specified in § 63.9(b)(2); § 63.753(a)(2) allows a title V or part 70 permit application to be substituted for the initial notification in certain circumstances.
63.9(k)	Yes	Only as specified in § 63.9(j).

Subpart GG—National Emission Standards for Aerospace Manufacturing and Rework Facilities

entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

- 38. Amend table 1 to subpart GG of part 63 by adding in numerical order

TABLE 1 TO SUBPART GG OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART GG

Reference	Applies to affected sources in subpart GG	Comment
63.1(c)(6)	Yes.	
63.9(k)	Yes	Only as specified in § 63.9(j).

Subpart HH—National Emission Standards for Hazardous Air Pollutants From Oil and Natural Gas Production Facilities

- 39. Amend § 63.760 by revising paragraph (a)(1) introductory text to read as follows:

§ 63.760 Applicability and designation of affected source.

(a) * * *

(1) Facilities that are major or area sources of hazardous air pollutants (HAP) as defined in § 63.761. Emissions for major source determination purposes can be estimated using the maximum natural gas or hydrocarbon liquid throughput, as appropriate, calculated in paragraphs (a)(1)(i) through (iii) of this section. As an alternative to calculating the maximum natural gas or

hydrocarbon liquid throughput, the owner or operator of a new or existing source may use the facility's design maximum natural gas or hydrocarbon liquid throughput to estimate the maximum potential emissions. Other means to determine the facility's major source status are allowed, provided the information is documented and recorded to the Administrator's satisfaction in accordance with § 63.10(b)(3). A facility that is determined to be an area source, but subsequently increases its emissions or its potential to emit above the major source levels, and becomes a major source, must comply with all provisions of this subpart applicable to a major source starting on the applicable compliance date specified in paragraph (f) of this section. Nothing in this paragraph is intended to preclude a

source from limiting its potential to emit through other appropriate mechanisms that may be available through the permitting authority.

* * * * *

- 40. Amend § 63.775 by revising paragraph (c)(1) to read as follows:

§ 63.775 Reporting requirements.

* * * * *

(c) * * *

(1) The initial notifications required under § 63.9(b)(2) not later than January 3, 2008, or no later than 120 days after the source becomes subject to this subpart, whichever is later. In addition to submitting your initial notification to the addressees specified under § 63.9(a), you must also submit a copy of the initial notification to the EPA's Office of Air Quality Planning and Standards. Send your notification via email to *Oil*

and Gas Sector@epa.gov or via U.S. mail or other mail delivery service to U.S. EPA, Sector Policies and Programs Division/Fuels and Incineration Group (E143-01), Attn: Oil and Gas Project Leader, Research Triangle Park, NC 27711.

* * * * *

■ 41. Amend appendix to subpart HH of part 63 in table 2 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

Appendix to Subpart HH of Part 63—Tables

* * * * *

TABLE 2 TO SUBPART HH OF PART 63—APPLICABILITY OF 40 CFR PART 63 GENERAL PROVISIONS TO SUBPART HH

General provisions reference	Applicable to subpart HH	Explanation
* * *	* * *	* * *
§ 63.1(c)(6) ...	Yes.	
* * *	* * *	* * *
§ 63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *

Subpart II—National Emission Standards for Shipbuilding and Ship Repair (Surface Coating)

■ 42. Amend table 1 to subpart II of part 63 by removing the entry for § 63.9(i)–(j) and adding in its place § 63.9(i)–(k).

The addition reads as follows:

TABLE 1 TO SUBPART II OF PART 63—GENERAL PROVISIONS OF APPLICABILITY TO SUBPART II

Reference	Applies to subpart II	Comment
* * *	* * *	* * *
63.9(i)–(k)	Yes	§ 63.9(k) only as specified in § 63.9(j).
* * *	* * *	* * *

Subpart JJ—National Emission Standards for Wood Furniture Manufacturing Operations

adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

■ 43. Amend table 1 to subpart JJ of part 63 by revising the entry for § 63.9(b) and

TABLE 1 TO SUBPART JJ OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART JJ

Reference	Applies to subpart JJ	Comment
* * *	* * *	* * *
63.1(c)(6)	Yes.	
* * *	* * *	* * *
63.9(b)	Yes	Existing sources are required to submit initial notification report within 270 days of the effective date or no later than 120 days after the source becomes subject to this subpart, whichever is later.
* * *	* * *	* * *
63.9(k)	Yes	Only as specified in 63.9(j).
* * *	* * *	* * *

Subpart KK—National Emission Standards for the Printing and Publishing Industry

■ 44. Amend § 63.830 by revising (b)(1)(i) to read as follows:

§ 63.830 Reporting requirements.

* * * * *

(b) * * *

(1) * * *

(i) Initial notifications for existing sources shall be submitted no later than

one year before the compliance date specified in § 63.826(a), or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 45. Amend table 1 to subpart KK of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 1 TO SUBPART KK OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART KK

General provisions reference	Applicable to subpart KK					Comment
* * *	*	*	*	*	*	*
§ 63.1(c)(6)	Yes.					
* * *	*	*	*	*	*	*
§ 63.9(k)	Yes	Only as specified in 63.9(j).				
* * *	*	*	*	*	*	*

Subpart LL—National Emission Standards for Hazardous Air Pollutants for Primary Aluminum Reduction Plants

entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

- 46. Amend appendix A to subpart LL of part 63 adding in numerical order

APPENDIX A TO SUBPART LL OF PART 63—APPLICABILITY OF GENERAL PROVISIONS

Reference sections(s)	Requirement	Applies to subpart LL			Comment
* * *	*	*	*	*	*
63.1(c)(6)	Reclassification	Yes.			
* * *	*	*	*	*	*
63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).		
* * *	*	*	*	*	*

Subpart MM—National Emission Standards for Hazardous Air Pollutants for Chemical Recovery Combustion Sources at Kraft, Soda, Sulfite, and Stand-Alone Semichemical Pulp Mills

entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

- 47. Amend table 1 to subpart MM of part 63 by adding in numerical order

TABLE 1 TO SUBPART MM OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART MM

General provisions reference	Summary of requirements	Applies to subpart MM			Explanation
* * *	*	*	*	*	*
63.1(c)(6)	Reclassification	Yes.			
* * *	*	*	*	*	*
63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).		
* * *	*	*	*	*	*

Subpart YY—National Emission Standards for Hazardous Air Pollutants for Source Categories: Generic Maximum Achievable Control Technology Standards

§ 63.1100 Applicability.

* * * * *

(b) *Subpart A requirements.* The following provisions of subpart A of this part (General Provisions), §§ 63.1 through 63.5, and §§ 63.12 through 63.15, apply to owners or operators of affected sources subject to this subpart. For sources that reclassify from major source to area source status, the

applicable provisions of § 63.9(j) and (k) apply. Beginning no later than the compliance dates specified in § 63.1102(c), for ethylene production affected sources, §§ 63.7(a)(4), (c), (e)(4), and (g)(2) and 63.10(b)(2)(vi) also apply.

* * * * *

- 48. Amend § 63.1100 by revising paragraph (b) to read as follows:

Subpart CCC—National Emission Standards for Hazardous Air Pollutants for Steel Pickling—HCl Process Facilities and Hydrochloric Acid Regeneration Plants

■ 49. Amend § 63.1163 by revising paragraph (a)(3) to read as follows:

§ 63.1163 Notification requirements.

(a) * * *

(3) As required by § 63.9(b)(3) of subpart A of this part, the owner or operator of a new or reconstructed affected source, or a source that has been reconstructed such that it is an affected source, that has an initial startup after the effective date and for which an application for approval of construction or reconstruction is not required under § 63.5(d) of subpart A of this part, shall notify the Administrator in writing that the source is subject to the standards no later than 120 days after initial startup, or no later than 120

days after the source becomes subject to this subpart, whichever is later. The notification shall contain the information specified in §§ 63.9(b)(2)(i) through (v) of subpart A of this part, delivered or postmarked with the notification required in § 63.9(b)(5) of subpart A of this part.

* * * * *

■ 50. Amend table 1 to subpart CCC of part 63 by adding in numerical order entries for §§ 63.9(j) and 63.9(k) to read as follows:

TABLE 1 TO SUBPART CCC OF PART 63—APPLICABILITY OF GENERAL PROVISIONS (40 CFR PART 63, SUBPART A) TO SUBPART CCC

Reference	Applies to subpart CCC	Explanation
-----------	------------------------	-------------

TABLE 1 TO SUBPART CCC OF PART 63—APPLICABILITY OF GENERAL PROVISIONS (40 CFR PART 63, SUBPART A) TO SUBPART CCC—Continued

Reference	Applies to subpart CCC	Explanation
63.9(j)	Yes.	
63.9(k)	Yes	Only as specified in § 63.9(j).
*	*	*

Subpart DDD—National Emission Standards for Hazardous Air Pollutants for Mineral Wool Production

■ 51. Amend table 1 to subpart DDD of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 1 TO SUBPART DDD OF PART 63—APPLICABILITY OF GENERAL PROVISIONS (40 CFR PART 63, SUBPART A) TO SUBPART DDD OF PART 63

General provisions citation	Requirement	Applies to subpart DDD?	Explanation
*	*	*	*
§ 63.1(c)(6)	Reclassification	Yes.	
*	*	*	*
§ 63.9(k)	Yes	Only as specified in § 63.9(j).
*	*	*	*

Subpart EEE—National Emission Standards for Hazardous Air Pollutants from Hazardous Waste Combustors

■ 52. Amend table 1 to subpart EEE of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 1 TO SUBPART EEE OF PART 63—GENERAL PROVISIONS APPLICABLE TO SUBPART EEE

Reference	Applies to subpart EEE	Explanation
*	*	*
63.9(k)	Yes	Only as specified in § 63.9(j).
*	*	*

Subpart GGG—National Emission Standards for Pharmaceuticals Production

■ 53. Amend table 1 to subpart GGG of part 63 is amended by adding in numerical order an entry for § 63.1(c)(6), revising the entry for § 63.9(j), and adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 1 TO SUBPART GGG OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART GGG

General provisions reference	Summary of requirements	Applies to subpart GGG	Comments
*	*	*	*
63.1(c)(6)	Reclassification	Yes.	
*	*	*	*
63.9(j)	Change in information provided	Yes	For change in major source status only.
63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).
*	*	*	*

Subpart HHH—National Emission Standards for Hazardous Air Pollutants From Natural Gas Transmission and Storage Facilities

■ 54. Amend § 63.1270 by revising paragraph (a) introductory text to read as follows:

§ 63.1270 Applicability and designation of affected source.

(a) This subpart applies to owners and operators of natural gas transmission and storage facilities that transport or store natural gas prior to entering the pipeline to a local distribution company or to a final end user (if there is no local distribution company), and that are major sources of hazardous air pollutants (HAP) emissions as defined in § 63.1271. Emissions for major source determination purposes can be estimated using the maximum natural gas throughput calculated in either paragraph (a)(1) or (2) of this section and paragraphs (a)(3) and (4) of this section. As an alternative to calculating the maximum natural gas throughput, the owner or operator of a new or existing source may use the facility design maximum natural gas throughput to estimate the maximum potential emissions. Other means to determine the facility's major source status are allowed, provided the information is documented and recorded to the Administrator's satisfaction in accordance with § 63.10(b)(3). A compressor station that transports natural gas prior to the point of custody transfer or to a natural gas processing plant (if present) is not considered a part of the natural gas transmission and

storage source category. A facility that is determined to be an area source, but subsequently increases its emissions or its potential to emit above the major source levels (without obtaining and complying with other limitations that keep its potential to emit HAP below major source levels), and becomes a major source, must comply with all applicable provisions of this subpart starting on the applicable compliance date specified in paragraph (d) of this section. Nothing in this paragraph is intended to preclude a source from limiting its potential to emit through other appropriate mechanisms that may be available through the permitting authority.

■ 55. Amend table 2 to subpart HHH of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

APPENDIX: TABLE 2 TO SUBPART HHH OF PART 63—APPLICABILITY OF 40 CFR PART 63 GENERAL PROVISIONS TO SUBPART HHH

General provisions Reference	Applicable to subpart HHH	Explanation
* * *	* * *	* * *
§ 63.1(c)(6) ...	Yes.	
* * *	* * *	* * *
§ 63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *

Subpart III—National Emission Standards for Hazardous Air Pollutants for Flexible Polyurethane Foam Production

■ 56. Amend table 1 to subpart III of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 1 TO SUBPART III OF PART 63—APPLICABILITY GENERAL PROVISIONS (40 CFR PART 63, SUBPART A) TO SUBPART III

Subpart A reference	Applies to Subpart III	Comment
* * *	* * *	* * *
§ 63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *

Subpart JJJ—National Emission Standards for Hazardous Air Pollutant Emissions: Group IV Polymers and Resins

■ 57. Amend table 1 to subpart JJJ of part 63 is amended by adding in numerical order an entry for § 63.1(c)(6), revising the entry for § 63.9(j), and adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 1 TO SUBPART JJJ OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART JJJ AFFECTED SOURCES

Reference	Applies to Subpart JJJ	Explanation
* * *	* * *	* * *
§ 63.1(c)(6)	Yes.	
* * *	* * *	* * *
§ 63.9(j)	Yes	For change in major source status only.
§ 63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *

Subpart LLL—National Emission Standards for Hazardous Air Pollutants From the Portland Cement Manufacturing Industry

■ 58. Amend table 1 to subpart LLL of part 63 by adding in numerical order

entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 1 TO SUBPART LLL OF PART 63—APPLICABILITY OF GENERAL PROVISIONS

Citation	Requirement	Applies to subpart LLL	Explanation
63.1(c)(6)	Reclassification	Yes.	
63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).

Subpart MMM—National Emission Standards for Hazardous Air Pollutants for Pesticide Active Ingredient Production

entry for § 63.1(c)(6), revising the entry for § 63.9(j), and adding in numerical order an entry for § 63.9(k) to read as follows:

■ 59. Amend table 1 to subpart MMM of part 63 by adding in numerical order an

TABLE 1 TO SUBPART MMM OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART MMM

Reference to subpart A	Applies to subpart MMM	Explanation
§ 63.1(c)(6)	Yes.	
§ 63.9(j)	Yes	For change in major source status only, § 63.1368(h) specifies procedures for other notification of changes.
§ 63.9(k)	Yes	Only as specified in § 63.9(j).

Subpart NNN—National Emission Standards for Hazardous Air Pollutants for Wool Fiberglass Manufacturing

entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

■ 60. Amend table 1 to subpart NNN of part 63 by adding in numerical order

TABLE 1 TO SUBPART NNN OF PART 63—APPLICABILITY OF GENERAL PROVISIONS (40 CFR PART 63, SUBPART A) TO SUBPART NNN

General provisions citation	Requirement	Applies to subpart NNN?	Explanation
§ 63.1(c)(6)	Yes.	
§ 63.9(k)	Yes	Only as specified in § 63.9(j).	

Subpart OOO—National Emission Standards for Hazardous Air Pollutant Emissions: Manufacture of Amino/Phenolic Resins

entry for § 63.1(c)(6), revising the entry for § 63.9(j), and adding in numerical order an entry for § 63.9(k) to read as follows:

■ 61. Amend table 1 to subpart OOO of part 63 by adding in numerical order an

TABLE 1 TO SUBPART OOO OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART OOO AFFECTED SOURCES

Reference	Applies to subpart OOO	Explanation
63.1(c)(6)	Yes.	
63.9(j)	Yes	For change in major source status only.
63.9(k)	Yes	Only as specified in § 63.9(j).

Subpart PPP—National Emission Standards for Hazardous Air Pollutant Emissions for Polyether Polyols Production

■ 62. Amend § 63.1434 by revising paragraphs (d) and (e) to read as follows:

§ 63.1434 Equipment leak provisions.

(d) When the HON equipment leak Initial Notification requirements contained in §§ 63.182(a)(1) and 63.182(b) are referred to in 40 CFR part 63, subpart H, the owner or operator shall comply with the Initial Notification requirements contained in § 63.1439(e)(3), for the purposes of this subpart. The Initial Notification shall be submitted no later than June 1, 2000, or no later than 120 days after the source becomes subject to this subpart, whichever is later, for existing sources.

(e) The HON equipment leak Notification of Compliance Status required by §§ 63.182(a)(2) and 63.182(c) shall be submitted within 150 days (rather than 90 days) of the

applicable compliance date specified in § 63.1422 for the equipment leak provisions. The Initial Notification shall be submitted no later than June 1, 2000, or no later than 120 days after the source becomes subject to this subpart, whichever is later, for existing sources.

■ 63. Amend § 63.1439 by revising paragraphs (e)(3)(ii)(B) and (C) to read as follows:

§ 63.1439 General recordkeeping and reporting provisions.

(e) * * *

(3) * * *

(ii) * * *

(B) For a new source that has an initial start-up on or after August 30, 1999, the application for approval of construction or reconstruction required by the General Provisions in § 63.5(d) shall be submitted in lieu of the Initial Notification. The application shall be submitted as soon as practical before construction or reconstruction is

planned to commence (but it need not be sooner than August 30, 1999). For a new source that reclassifies to major source status after January 19, 2021, and greater than 90 days after the initial start-up, the source shall submit the initial notification required by 63.9(b) no later than 120 days after the source becomes subject to this subpart.

(C) For a new source that has an initial start-up prior to August 30, 1999, the Initial Notification shall be submitted no later than August 30, 1999, or no later than 120 days after the source becomes subject to this subpart, whichever is later. The application for approval of construction or reconstruction described in the General Provisions' requirements in § 63.5(d) is not required for these sources.

■ 64. Amend table 1 to subpart PPP of part 63 by adding in numerical order an entry for § 63.1(c)(6), revising the entry for § 63.9(j), and adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 1 TO SUBPART PPP OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART PPP AFFECTED SOURCES

Reference	Applies to subpart PPP	Explanation
63.1(c)(6)	Yes.	
63.9(j)	Yes	For change in major source status only.
63.9(k)	Yes	Only as specified in § 63.9(j).

Subpart QQQ—National Emission Standards for Hazardous Air Pollutants for Primary Copper Smelting

■ 65. Revise § 63.1441 to read as follows:

§ 63.1441 Am I subject to this subpart?

You are subject to this subpart if you own or operate a primary copper

smelter that is (or is part of) a major source of hazardous air pollutant (HAP) emissions and your primary copper smelter uses batch copper converters as defined in § 63.1459. Your primary copper smelter is a major source of HAP if it emits or has the potential to emit any single HAP at the rate of 10 tons or more per year or any combination of

HAP at a rate of 25 tons or more per year.

■ 66. Amend § 63.1454 by revising paragraph (b) to read as follows:

§ 63.1454 What notifications must I submit and when?

(b) As specified in § 63.9(b)(2), if you

start your affected source before June 12,

2002, you must submit your initial notification not later than October 10, 2002, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

Subpart RRR—National Emission Standards for Hazardous Air Pollutants for Secondary Aluminum Production

■ 67. Amend appendix A to subpart RRR of part 63 by adding in numerical

order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

APPENDIX A TO SUBPART RRR OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART RRR

Citation	Requirement	Applies to subpart RRR	Comment
* * *	* * *	* * *	* * *
§ 63.1(c)(6)	Reclassification	Yes.	
* * *	* * *	* * *	* * *
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *	* * *

Subpart TTT—National Emission Standards for Hazardous Air Pollutants for Primary Lead Smelting

■ 68. Amend table 1 to subpart TTT of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 1 TO SUBPART TTT OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART TTT

Reference	Applies to subpart TTT	Comment
* * *	* * *	* * *
63.9(k)	Yes	Only as specified in 63.9(j).
* * *	* * *	* * *

Subpart UUU—National Emission Standards for Hazardous Air Pollutants for Petroleum Refineries: Catalytic Cracking Units, Catalytic Reforming Units, and Sulfur Recovery Units

■ 69. Amend § 63.1574 by revising paragraph (b) to read as follows:

§ 63.1574 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you startup your new affected source before April 11, 2002, you must submit the initial notification no later than August 9, 2002, or no later than 120 days after

the source becomes subject to this subpart, whichever is later.

* * * * *

■ 70. Amend table 44 to subpart UUU of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

* * * * *

TABLE 44 TO SUBPART UUU OF PART 63—APPLICABILITY OF NESHAP GENERAL PROVISIONS TO SUBPART UUU

Citation	Subject	Applies to subpart UUU	Explanation
* * *	* * *	* * *	* * *
§ 63.1(c)(6)	Reclassification	Yes.	
* * *	* * *	* * *	* * *
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *	* * *

Subpart VVV—National Emission Standards for Hazardous Air Pollutants: Publicly Owned Treatment Works

■ 71. Amend § 63.1591 by revising paragraphs (a)(1) and (2) to read as follows:

§ 63.1591 What are my notification requirements?

(a) * * *

(1) If you have an existing Group 1 or Group 2 POTW treatment plant, you must submit an initial notification by October 26, 2018, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

(2) If you have a new Group 1 or Group 2 POTW treatment plant, you

must submit an initial notification upon startup, or when the source becomes subject to this subpart, whichever is later.

* * * * *

■ 72. Amend table 1 to subpart VVV of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 1 TO SUBPART VVV OF PART 63—APPLICABILITY OF 40 CFR PART 63 GENERAL PROVISIONS TO SUBPART VVV

General provisions reference	Applicable to subpart VVV	Explanation
* * *	* * *	* * *
§ 63.1(c)(6)	Yes.	
* * *	* * *	* * *
§ 63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *

Subpart XXX—National Emission Standards for Hazardous Air Pollutants for Ferroalloys Production: Ferromanganese and Silicomanganese

■ 73. Amend table 1 to subpart XXX of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 1 TO SUBPART XXX OF PART 63—GENERAL PROVISIONS APPLICABILITY TO SUBPART XXX

Reference	Applies to subpart XXX	Comment
* * *	* * *	* * *
§ 63.9(k)	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *

Subpart DDDD—National Emission Standards for Hazardous Air Pollutants: Plywood and Composite Wood Products

■ 74. Amend § 63.2280 by revising paragraph (b) to read as follows:

§ 63.2280 What notifications must I submit and when?

* * * * *

(b) You must submit an Initial Notification no later than 120 calendar days after September 28, 2004, 120 calendar days after initial startup, or no later than 120 days after the source becomes subject to this subpart, whichever is later, as specified in § 63.9(b)(2). Initial Notifications required to be submitted after August 13, 2020, for affected sources that commence construction or

reconstruction after September 6, 2019, and on and after August 13, 2021, for all other affected sources submitting initial notifications required in § 63.9(b) must be submitted following the procedure specified in § 63.2281(h), (k), and (l).

* * * * *

■ 75. Amend table 10 to subpart DDDD of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 10 TO SUBPART DDDD OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART DDDD

Citation	Subject	Brief description	Applies to this subpart before August 13, 2021, except as noted in footnote “1” to this table	Applies to this subpart on and after August 13, 2021, except as noted in footnote “1” to this table

Subpart EEEE—National Emission Standards for Hazardous Air Pollutants: Organic Liquids Distribution (Non-Gasoline)				
■ 76. Amend § 63.2382 by revising paragraphs (b)(1) and (2) to read as follows:		(b) <i>Initial Notification.</i> (1) If you startup your affected source before February 3, 2004, you must submit the Initial Notification no later than 120 calendar days after February 3, 2004, or no later than 120 days after the source becomes subject to this subpart, whichever is later.	days after initial startup, or no later than 120 days after the source becomes subject to this subpart, whichever is later.	
§ 63.2382 What notifications must I submit and when and what information should be submitted?		(2) If you startup your new or reconstructed affected source on or after February 3, 2004, you must submit the Initial Notification no later than 120		■ 77. Amend table 12 to subpart EEEE of part 63 by revising the entry for § 63.9(j) and adding in numerical order an entry for § 63.9(k) to read as follows:
*	*	*	*	*

TABLE 12 TO SUBPART EEEE OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART EEEE

Citation	Subject	Brief description	Applies to subpart EEEE
*	*	*	*
§ 63.9(j)	Change in Previous Information	Must submit within 15 days after the change.	Yes for change to major source status, other changes are reported in the first and subsequent compliance reports.
§ 63.9(k)	Electronic reporting procedures	Procedure to report electronically for notification in § 63.9(j).	Yes, only as specified in § 63.9(j).
*	*	*	*

Subpart FFFF—National Emission Standards for Hazardous Air Pollutants: Miscellaneous Organic Chemical Manufacturing

■ 78. Amend § 63.2515 by designating the text of paragraph (b) introductory text after the subject heading as paragraph (b)(1) and revising newly

designated paragraph (b)(1) to read as follows:

§ 63.2515 What notifications must I submit and when?

* * * * *

(b) * * *

(1) As specified in § 63.9(b)(2), if you startup your affected source before November 10, 2003, you must submit an

initial notification not later than 120 calendar days after November 10, 2003, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 79. Amend table 12 to subpart FFFF of part 63 by revising the entry for § 63.9(j) and adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 12 TO SUBPART FFFF OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART FFFF

Citation	Subject	Explanation
*	*	*
§ 63.9(j)	Change in previous information	Yes, for change in major source status, otherwise § 63.2520(e) specifies reporting requirements for process changes.
§ 63.9(k)	Electronic reporting procedures	Yes, as specified in § 63.9(j).
*	*	*

Subpart GGGG—National Emission Standards for Hazardous Air Pollutants: Solvent Extraction for Vegetable Oil Production

■ 80. Amend § 63.2860 by revising paragraph (a) introductory text to read as follows:

§ 63.2860 What notifications must I submit and when?

* * * * *

(a) *Initial notification for existing sources.* For an existing source, submit an initial notification to the agency responsible for these NESHAP no later than 120 days after the effective date of this subpart, or no later than 120 days after the source becomes subject to this subpart, whichever is later. In the notification, include the items in

paragraphs (a)(1) through (5) of this section:

* * * * *

■ 81. Amend § 63.2870 in table 1 to § 63.2870 by adding in numerical order entries for § 63.9(j) and (k) to read as follows:

§ 63.2870 What Parts of the General Provisions apply to me?

* * * * *

TABLE 1 TO § 63.2870—APPLICABILITY OF 40 CFR PART 63, SUBPART A, TO 40 CFR PART 63, SUBPART GGGG

General provisions citation	Subject of citation	Brief description of requirement	Applies to subpart	Explanation
* * * * *	* * * * *	* * * * *	* * * * *	* * * * *
§ 63.9(j)	Notification requirements	Change in previous information.	Yes.	
§ 63.9(k)	Notification requirements	Electronic reporting procedures.	Yes	Only as specified in § 63.9(j).
* * * * *	* * * * *	* * * * *	* * * * *	* * * * *

Subpart HHHH—National Emission Standards for Hazardous Air Pollutants for Wet-Formed Fiberglass Mat Production

■ 82. Amend table 2 to subpart HHHH of part 63 by adding in numerical order

entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 2 TO SUBPART HHHH OF PART 63—APPLICABILITY OF GENERAL PROVISIONS (40 CFR PART 63, SUBPART A) TO SUBPART HHHH

* * * * *	* * * * *	* * * * *	* * * * *	* * * * *
Citation	Requirement	Applies to subpart HHHH	Explanation	
§ 63.1(c)(6)	Reclassification	Yes.		
* * * * *	* * * * *	* * * * *	* * * * *	* * * * *
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).	
* * * * *	* * * * *	* * * * *	* * * * *	* * * * *

Subpart IIII—National Emission Standards for Hazardous Air Pollutants: Surface Coating of Automobiles and Light-Duty Trucks

■ 83. Amend § 63.3110 by revising paragraph (b) to read as follows:

§ 63.3110 What notifications must I submit?

* * * * *

(b) You must submit the Initial Notification required by § 63.9(b) for a new or reconstructed affected source no later than 120 days after initial startup, 120 days after the source becomes subject to this subpart, or 120 days after June 25, 2004, whichever is later. For an

existing affected source, you must submit the Initial Notification no later than 1 year after April 26, 2004, or no later than 120 days after the source becomes subject to this subpart, whichever is later. Existing sources that have previously submitted notifications of applicability of this rule pursuant to section 112(j) of the CAA are not required to submit an Initial Notification under § 63.9(b) except to identify and describe all additions to the affected source made pursuant to § 63.3082(c). If you elect to include the surface coating of new other motor vehicle bodies, body parts for new other motor vehicles, parts for new other

motor vehicles, or aftermarket repair or replacement parts for other motor vehicles in your affected source pursuant to § 63.3082(c) and your affected source has an initial startup before February 20, 2007, then you must submit an Initial Notification of this election no later than 120 days after initial startup or February 20, 2007, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 84. Amend table 2 to subpart IIII of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 2 TO SUBPART IIII OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART IIII OF PART 63

Citation	Subject	Applicable to subpart IIII	Explanation
§ 63.1(c)(6)	Reclassification	Yes.	
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).

Subpart JJJJ—National Emission Standards for Hazardous Air Pollutants: Paper and Other Web Coating

■ 85. Amend § 63.3400 by revising paragraph (b)(1) to read as follows:

§ 63.3400 What notifications and reports must I submit?

(b) * * *

(1) Initial notification for existing affected sources must be submitted no later than 1 year before the compliance date specified in § 63.3330(a), or no later

than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 86. Amend table 2 to subpart JJJJ of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 2 TO SUBPART JJJJ OF PART 63—APPLICABILITY OF 40 CFR PART 63 GENERAL PROVISIONS TO SUBPART JJJJ

General provisions reference	Applicable to subpart JJJJ	Explanation
§ 63.1(c)(6)	Yes.	
§ 63.9(k)	Yes	Only as specified in § 63.9(j).

Subpart KKKK—National Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Cans

■ 87. Amend § 63.3510 by revising paragraph (b) to read as follows:

§ 63.3510 What notifications must I submit?

* * * * *

(b) *Initial Notification.* You must submit the Initial Notification required by § 63.9(b) for a new or reconstructed affected source no later than 120 days after initial startup, no later than 120 days after the source becomes subject to this subpart, or 120 days after November 13, 2003, whichever is later. For an existing affected source, you must submit the Initial Notification no later

than November 13, 2004, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 88. Amend table 5 to subpart KKKK of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 5 TO SUBPART KKKK OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART KKKK

Citation	Subject	Applicable to subpart KKKK	Explanation
§ 63.1(c)(6)	Reclassification	Yes.	
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).

Subpart MMMM—National Emission Standards for Hazardous Air Pollutants for Surface Coating of Miscellaneous Metal Parts and Products

■ 89. Amend § 63.3910 by revising paragraph (b) to read as follows:

§ 63.3910 What notifications must I submit?

* * * * *

(b) *Initial notification.* You must submit the initial notification required by § 63.9(b) for a new or reconstructed affected source no later than 120 days after initial startup, 120 days after January 2, 2004, or no later than 120 days after the source becomes subject to this subpart, whichever is later. For an existing affected source, you must

submit the initial notification no later than 1 year after January 2, 2004, or no later than 120 days after the source becomes subject to this subpart, whichever is later. If you are using compliance with the Surface Coating of Automobiles and Light-Duty Trucks NESHAP (subpart IIII of this part) as provided for under § 63.3881(d) to constitute compliance with this subpart for any or all of your metal parts coating operations, then you must include a statement to this effect in your initial notification, and no other notifications are required under this subpart in regard to those metal parts coating operations. If you are complying with another NESHAP that constitutes the predominant activity at your facility

under § 63.3881(e)(2) to constitute compliance with this subpart for your metal parts coating operations, then you must include a statement to this effect in your initial notification, and no other notifications are required under this subpart in regard to those metal parts coating operations. If you own or operate an existing loop splitter or flame lamination affected source, submit an initial notification no later than 120 days after April 14, 2003, or no later than 120 days after the source becomes subject to this subpart.

* * * * *

■ 90. Amend table 2 to subpart MMMM of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 2 TO SUBPART MMMM OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART MMMM OF PART 63

Citation	Subject	Applicable to subpart MMMM	Explanation
§ 63.1(c)(6)	Reclassification	Yes.	
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).

Subpart NNNN—National Emission Standards for Hazardous Air Pollutants: Surface Coating of Large Appliances

■ 91. Amend § 63.4110 by revising paragraph (a)(1) to read as follows:

§ 63.4110 What notifications must I submit.

(a) * * *

(1) You must submit the Initial Notification required by § 63.9(b) for an existing affected source no later than July 23, 2003, or no later than 120 days after the source becomes subject to this subpart. For a new or reconstructed affected source, you must submit the Initial Notification no later than 120 days after initial startup, November 20, 2002, or no later than 120 days after the

source becomes subject to this subpart, whichever is later.

* * * * *

■ 92. Amend table 2 to subpart NNNN of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 2 TO SUBPART NNNN OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART NNNN

Citation	Subject	Applicable to subpart NNNN	Explanation
§ 63.1(c)(6)	Reclassification	Yes.	
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).

Subpart OOOO—National Emission Standards for Hazardous Air Pollutants: Printing, Coating, and Dyeing of Fabrics and Other Textiles

■ 93. Amend § 63.4310 by revising paragraph (b) to read as follows:

§ 63.4310 What notifications must I submit?

* * * * *

(b) *Initial Notification.* You must submit the Initial Notification required by § 63.9(b) for a new or reconstructed affected source no later than 120 days after initial startup, 120 days after May 29, 2003, or no later than 120 days after the source becomes subject to this subpart, whichever is later. For an existing affected source, you must submit the Initial Notification no later

than 1 year after May 29, 2003, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 94. Amend table 3 to subpart OOOO of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 3 TO SUBPART OOOO OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART OOOO

Citation	Subject	Applicable to subpart OOOO	Explanation
* * * * *	* * * * *	* * * * *	* * * * *
§ 63.1(c)(6)	Reclassification	Yes.	
* * * * *	* * * * *	* * * * *	* * * * *
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).
* * * * *	* * * * *	* * * * *	* * * * *

Subpart PPPP—National Emission Standards for Hazardous Air Pollutants for Surface Coating of Plastic Parts and Products

■ 95. Amend § 63.4510 by revising paragraph (b) to read as follows:

§ 63.4510 What notifications must I submit?

* * * * *

(b) *Initial notification.* You must submit the initial notification required by § 63.9(b) for a new or reconstructed affected source no later than 120 days after initial startup, 120 days after April 19, 2004, or no later than 120 days after the source becomes subject to this

subpart, whichever is later. For an existing affected source, you must submit the initial notification no later than 1 year after April 19, 2004, or no later than 120 days after the source becomes subject to this subpart, whichever is later. If you are using compliance with the Surface Coating of Automobiles and Light-Duty Trucks NESHAP (subpart IIII of this part) as provided for under § 63.4481(d) to constitute compliance with this subpart for any or all of your plastic parts coating operations, then you must include a statement to this effect in your initial notification, and no other notifications are required under this

subpart in regard to those plastic parts coating operations. If you are complying with another NESHAP that constitutes the predominant activity at your facility under § 63.4481(e)(2) to constitute compliance with this subpart for your plastic parts coating operations, then you must include a statement to this effect in your initial notification, and no other notifications are required under this subpart in regard to those plastic parts coating operations.

* * * * *

■ 96. Amend table 2 to subpart PPPP of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 2 TO SUBPART PPPP OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART PPPP OF PART 63

Citation	Subject	Applicable to subpart PPPP	Explanation
* * * * *	* * * * *	* * * * *	* * * * *
§ 63.1(c)(6)	Reclassification	Yes.	
* * * * *	* * * * *	* * * * *	* * * * *
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).
* * * * *	* * * * *	* * * * *	* * * * *

Subpart QQQQ—National Emission Standards for Hazardous Air Pollutants: Surface Coating of Wood Building Products

■ 97. Amend § 63.4710 by revising paragraph (b) to read as follows:

§ 63.4710 What notifications must I submit?

* * * * *

(b) *Initial Notification.* You must submit the Initial Notification required by § 63.9(b) for a new or reconstructed affected source no later than 120 days

after initial startup, 120 days after May 28, 2003, or no later than 120 days after the source becomes subject to this subpart, whichever is later. For an existing affected source, you must submit the Initial Notification no later than 120 days after May 28, 2003, or no

later than 120 days after the source

becomes subject to this subpart,
whichever is later.

* * * * *

■ 98. Amend table 4 to subpart QQQQ of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 4 TO SUBPART QQQQ OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART QQQQ OF PART 63

Citation	Subject	Applicable to subpart QQQQ	Explanation
* * *	* * *	* * *	* * *
§ 63.1(c)(6)	Reclassification	Yes.	
* * *	* * *	* * *	* * *
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *	* * *

Subpart RRRR—National Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Furniture

■ 99. Amend § 63.4910 by revising paragraph (b) to read as follows:

§ 63.4910 What notifications must I submit?

* * * * *

(b) *Initial Notification.* You must submit the Initial Notification required by § 63.9(b) for a new or reconstructed affected source no later than 120 days after initial startup, 120 days after May 23, 2003, or no later than 120 days after the source becomes subject to this subpart, whichever is later. For an existing affected source, you must submit the Initial Notification no later

than 1 year after May 23, 2003, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 100. Amend table 2 to subpart RRRR of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 2 TO SUBPART RRRR OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART RRRR

Citation	Subject	Applicable to subpart	Explanation
* * *	* * *	* * *	* * *
§ 63.1(c)(6)	Reclassification	Yes.	
* * *	* * *	* * *	* * *
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *	* * *

Subpart SSSS—National Emission Standards for Hazardous Air Pollutants: Surface Coating of Metal Coil

■ 101. Amend § 63.5180 by revising paragraph (b)(1) to read as follows:

§ 63.5180 What reports must I submit

* * * * *

(b) * * *

(1) Submit an initial notification for an existing source no later than 2 years after June 10, 2002, or no later than 120

days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 102. Amend table 2 to subpart SSSS of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 2 TO SUBPART SSSS OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART SSSS

General provisions reference	Applicable to subpart SSSS	Explanation
* * *	* * *	* * *
§ 63.1(c)(6)	Yes.	
* * *	* * *	* * *
§ 63.9(k)	Yes	Only as specified in § 63.9(j).

TABLE 2 TO SUBPART SSSS OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART SSSS—Continued

General provisions reference	Applicable to subpart SSSS	Explanation
Subpart TTTT—National Emission Standards for Hazardous Air Pollutants for Leather Finishing Operations	§ 63.5415 What notifications must I submit and when?	the source becomes subject to this subpart, whichever is later.
■ 103. Amend § 63.5415 by revising paragraph (b) to read as follows:	(b) As specified in § 63.9(b)(2), if you start up your affected source before February 27, 2002, you must submit an Initial Notification not later than June 27, 2002, or no later than 120 days after	■ 104. Amend table 2 to subpart TTTT of part 63 by adding in numerical order entries for §§ 63.9(j) and (k) to read as follows:

TABLE 2 TO SUBPART TTTT OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART TTTT

General provisions citation	Subject of citation	Brief description of requirement	Applies to subpart	Explanation
§ 63.9(j)	Notification requirements ..	Change in previous information.	Yes.	
§ 63.9(k)	Notification requirements ..	Electronic reporting procedures.	Yes	Only as specified in § 63.9(j).

Subpart UUUU—National Emission Standards for Hazardous Air Pollutants for Cellulose Products Manufacturing

■ 105. Amend table 7 to subpart UUUU of part 63 by revising entry 4 to read as follows:

TABLE 7 TO SUBPART UUUU OF PART 63—NOTIFICATIONS

If you . . .	then you must . . .
4. start up your affected source before June 11, 2002	submit an initial notification no later than 120 days after June 11, 2002, or no later than 120 after the source becomes subject to this subpart, whichever is later, as specified in § 63.9(b)(2).

■ 106. Amend table 8 to subpart UUUU of part 63 by revising entry 7 to read as follows:

TABLE 8 TO SUBPART UUUU OF PART 63—REPORTING REQUIREMENTS

You must submit a compliance report, which must contain the following information . . . and you must submit the report . . .

7. the report must contain any changes in information already provided, as specified in § 63.9(j), except changes in major source status must be reported per § 63.9(j);

■ 107. Table 10 to subpart UUUU of part 63 is amended by revising the entry for § 63.9(j) and adding an entry for § 63.9(k), in numerical order, to read as follows:

TABLE 10 TO SUBPART UUUU OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART UUUU

Citation	Subject	Brief description	Applies to subpart UUUU
§ 63.9(j)	Change in previous information	Must submit within 15 days of the change.	Yes, except the notification for all but change in major source status must be submitted as part of the next semiannual compliance report, as specified in Table 8 to this subpart.
§ 63.9(k)	Electronic reporting procedures	Procedure for electronically reporting the notification required by § 63.9(j).	Yes, as specified in § 63.9(j).

Subpart VVVV—National Emission Standards for Hazardous Air Pollutants for Boat Manufacturing entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

■ 108. Amend table 8 to subpart VVVV of part 63 by adding in numerical order

TABLE 8 TO SUBPART VVVV OF PART 63—APPLICABILITY OF GENERAL PROVISIONS (40 CFR PART 63, SUBPART A) TO SUBPART VVVV

Citation	Requirement	Applies to subpart VVVV	Explanation
§ 63.1(c)(6)	Reclassification	Yes.	
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).

Subpart WWWW—National Emissions Standards for Hazardous Air Pollutants: Reinforced Plastic Composites Production

■ 109. Amend table 2 to subpart WWWW of part 63 by revising entry 1 to read as follows:

TABLE 2 TO SUBPART WWW OF PART 63—COMPLIANCE DATES FOR NEW AND EXISTING REINFORCED PLASTIC COMPOSITES FACILITIES

*	*	*	*	*	*	*
If your facility is . . .			And . . .		Then you must comply by this date . . .	
1. An existing source			a. Is a major source on or before the publication date of this subpart		April 21, 2006.	
*	*	*	*	*	*	*

■ 110. Amend table 15 to subpart WWW of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 15 TO SUBPART WWW OF PART 63—APPLICABILITY OF GENERAL PROVISIONS (SUBPART A) TO SUBPART WWW OF PART 63

* * *			* * *		
The general provisions reference	That addresses	And applies to subpart WWW of part 63	Subject to the following additional information		
* * *	* * *	* * *	* * *		
§ 63.1(c)(6)	Reclassification	Yes	* * *		
* * *	* * *	* * *	* * *		
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).		
* * *			* * *		

Subpart XXXX—National Emissions Standards for Hazardous Air Pollutants: Rubber Tire Manufacturing

■ 111. Amend § 63.6009 by revising paragraph (b) to read as follows:

§ 63.6009 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you startup your affected source before July 9, 2002, you must submit an Initial Notification not later than November 6,

2002, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 112. Amend table 17 to subpart XXXX of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 17 TO SUBPART XXXX OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO THIS SUBPART XXXX

* * *			* * *		
Citation	Subject	Brief description of applicable sections	Applicable to subpart XXXX?		
			Using a control device	Not using a control device	
* * *	* * *	* * *	* * *	* * *	* * *
§ 63.9(k)	Notification	Electronic reporting procedures.	Yes, as specified in § 63.9(j).	Yes, as specified in § 63.9(j).	
* * *			* * *		

Subpart YYYY—National Emission Standards for Hazardous Air Pollutants for Stationary Combustion Turbines

■ 113. Amend § 63.6145 by revising paragraph (b) to read as follows:

§ 63.6145 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you start up your new or reconstructed stationary combustion turbine before March 5, 2004, you must submit an Initial Notification not later than 120

calendar days after March 5, 2004, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 114. Amend table 7 to subpart YYYY of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 7 TO SUBPART YYYY OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART YYYY

Citation	Requirement	Applies to subpart YYYY	Explanation
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).

Subpart ZZZZ—National Emissions Standards for Hazardous Air Pollutants for Stationary Reciprocating Internal Combustion Engines

■ 115. Amend § 63.6645 by revising paragraphs (b) and (d) to read as follows:

§ 63.6645 What notifications must I submit and when?

(b) As specified in § 63.9(b)(2), if you start up your stationary RICE with a site

rating of more than 500 brake HP located at a major source of HAP emissions before the effective date of this subpart, you must submit an Initial Notification not later than December 13, 2004, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

(d) As specified in § 63.9(b)(2), if you start up your stationary RICE with a site rating of equal to or less than 500 brake HP located at a major source of HAP

emissions before the effective date of this subpart and you are required to submit an initial notification, you must submit an Initial Notification not later than July 16, 2008, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

■ 116. Amend table 8 to subpart ZZZZ of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 8 TO SUBPART ZZZZ OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART ZZZZ

General provisions citation	Subject of citation	Applies to subpart	Explanation
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).

Subpart AAAAA—National Emission Standards for Hazardous Air Pollutants for Lime Manufacturing Plants

■ 117. Amend § 63.7130 by revising paragraphs (b) and (c) to read as follows:

§ 63.7130 What notifications must I submit and when?

*

(b) As specified in § 63.9(b)(2), if you start up your affected source before January 5, 2004, you must submit an initial notification not later than 120 calendar days after January 5, 2004, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

(c) If you startup your new or reconstructed affected source on or after January 5, 2004, you must submit an

initial notification not later than 120 calendar days after you start up your affected source, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

■ 118. Amend table 8 to subpart AAAAA of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

TABLE 8 TO SUBPART AAAAA OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART AAAAA

Citation	Summary of requirement	Am I subject to this requirement?	Explanations
§ 63.1(c)(6)	Reclassification	Yes.	
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).

Subpart BBBB—National Emission Standards for Hazardous Air Pollutants for Semiconductor Manufacturing

■ 119. Amend § 63.7189 by revising paragraph (b) to read as follows:

§ 63.7189 What applications and notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you start up your affected source before May 22, 2003, you must submit an Initial Notification not later than 120 calendar days after May 22, 2003, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

Subpart CCCCC—National Emission Standards for Hazardous Air Pollutants for Coke Ovens: Pushing, Quenching, and Battery Stacks

■ 120. Amend § 63.7340 by revising paragraph (b) to read as follows:

§ 63.7340 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you start up your affected source before April 14, 2003, you must submit your initial notification no later than August 12, 2003, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

Subpart DDDDD—National Emission Standards for Hazardous Air Pollutants for Major Sources: Industrial, Commercial, and Institutional Boilers and Process Heaters

■ 121. Amend § 63.7545 by revising paragraphs (b) and (c) to read as follows:

§ 63.7189 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you startup your affected source before January 31, 2013, you must submit an Initial Notification not later than 120 days after January 31, 2013, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

(c) As specified in § 63.9(b)(4) and (5), if you startup your new or reconstructed affected source on or after January 31, 2013, you must submit an Initial Notification not later than 15 days after the actual date of startup of the affected source. For a new or reconstructed affected source that has reclassified to major source status, you must submit an Initial Notification not later than 120 days after the source becomes subject to this subpart.

* * * * *

Subpart EEEEE—National Emission Standards for Hazardous Air Pollutants for Iron and Steel Foundries

■ 122. Amend § 63.7750 by revising paragraph (b) to read as follows:

§ 63.7750 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you start up your iron and steel foundry before April 22, 2004, you must submit your initial notification no later than August 20, 2004, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

Subpart FFFFF—National Emission Standards for Hazardous Air Pollutants for Integrated Iron and Steel Manufacturing Facilities

■ 123. Amend § 63.7840 by revising paragraph (b) to read as follows:

§ 63.7840 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you startup your affected source before May 20, 2003, you must submit your initial notification no later than September 17, 2003, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

Subpart GGGGG—National Emission Standards for Hazardous Air Pollutants: Site Remediation

■ 124. Amend § 63.7950 by revising paragraphs (b) and (c) to read as follows:

§ 63.7950 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you start up your affected source before October 8, 2003, you must submit an Initial Notification not later than 120 calendar days after October 8, 2003, or no later than 120 calendar days after the source becomes subject to this subpart, whichever is later.

(c) As specified in § 63.9(b)(3), if you start up your new or reconstructed affected source on or after the effective date, you must submit an Initial Notification no later than 120 calendar days after initial startup, or no later than 120 calendar days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 125. Amend table 3 to subpart GGGGG of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 3 TO SUBPART GGGGG OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART GGGGG

Citation	Subject	Brief description	Applies to subpart GGGGG
* * * * *	* * * * *	* * * * *	* * * * *
§ 63.9(k)	Electronic reporting procedures	Electronic reporting procedures for notifications per § 63.9(j).	Yes.
* * * * *	* * * * *	* * * * *	* * * * *

Subpart HHHHH—National Emission Standards for Hazardous Air Pollutants: Miscellaneous Coating Manufacturing

■ 126. Amend § 63.8070 by revising paragraph (b)(1) to read as follows:

§ 63.8070 What notifications must I submit and when?

* * * * *

(b) * * *

(1) As specified in § 63.9(b)(2), if you have an existing affected source on December 11, 2003, you must submit an initial notification not later than 120 calendar days after December 11, 2003,

or no later than 120 calendar days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 127. Amend table 10 to subpart HHHHH of part 63 by revising the entry for § 63.9(j) and adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 10 TO SUBPART HHHHH OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART HHHHH

Citation	Subject	Explanation
* * *	* * *	* * *
§ 63.9(j)	Change in previous information	Yes, for change in major source status, otherwise § 63.8075(e)(8) specifies reporting requirements for process changes.
§ 63.9(k)	Electronic reporting procedures	Yes, as specified in § 63.9(j).
* * *	* * *	* * *

Subpart IIIII—National Emission Standards for Hazardous Air Pollutants: Mercury Emissions From Mercury Cell Chlor-Alkali Plants

■ 128. Amend § 63.8252 by revising paragraph (b) to read as follows:

§ 63.825 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you start up your affected source before December 19, 2003, you must submit an Initial Notification no later than 120 calendar days after December 19, 2003,

or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 129. Amend table 10 to subpart IIIII of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 10 TO SUBPART IIIII OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART IIIII

Citation	Subject	Applies to subpart IIIII	Explanation
* * *	* * *	* * *	* * *
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).
* * *	* * *	* * *	* * *

Subpart JJJJJ—National Emission Standards for Hazardous Air Pollutants for Brick and Structural Clay Products Manufacturing

■ 130. Amend table 8 to subpart JJJJJ of part 63 by revising entry 1 to read as follows:

TABLE 8 TO SUBPART JJJJJ OF PART 63—DEADLINES FOR SUBMITTING NOTIFICATIONS

If you . . .	You must . . .	No later than . . .	As specified in . . .
1. Start up your affected source before December 28, 2015.	Submit an Initial Notification.	June 22, 2016, or no later than 120 days after the source becomes subject to this subpart, whichever is later.	§ 63.9(b)(2).

■ 131. Amend table 10 to subpart JJJJJ of part 63 adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 10 TO SUBPART JJJJJ OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART JJJJJ

Citation	Subject	Brief description	Applies to subpart JJJJJ?
§ 63.9(k)	Electronic reporting procedures.	Electronic reporting procedures for notifications per § 63.9(j).	Yes.

Subpart KKKKK—National Emission Standards for Hazardous Air Pollutants for Clay Ceramics Manufacturing

■ 132. Amend table 9 to subpart KKKKK of part 63 by revising entry 1 to read as follows:

TABLE 9 TO SUBPART KKKKK OF PART 63—DEADLINES FOR SUBMITTING NOTIFICATIONS

If you . . .	You must . . .	No later than . . .	As specified in . . .
1. Start up your affected source before December 28, 2015.	Submit an Initial Notification	June 22, 2016, or no later than 120 days after the source becomes subject to this subpart, whichever is later.	§ 63.9(b)(2).

■ 133. Amend table 11 to subpart KKKKK of part 63 adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 11 TO SUBPART KKKKK OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART KKKKK

Citation	Subject	Brief description	Applies to subpart KKKKK?
§ 63.9(k)	Electronic reporting procedures	Electronic reporting procedures for notifications per § 63.9(j).	Yes.

Subpart LLLLL—National Emission Standards for Hazardous Air Pollutants: Asphalt Processing and Asphalt Roofing Manufacturing

■ 134. Amend § 63.8692 by revising paragraph (b) to read as follows:

§ 63.8692 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you start up your affected source before April 29, 2003, you must submit an Initial Notification not later than 120 calendar days after April 29, 2003, or no

later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 135. Amend table 7 to subpart LLLLL of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 7 TO SUBPART LLLLL OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART LLLLL

Citation	Subject	Brief description	Applies to subpart LLLLL
* * * * *	* * * * *	* * * * *	* * * * *
§ 63.9(k)	Electronic reporting procedures.	Electronic reporting procedures for notifications per § 63.9(j).	Yes.
* * * * *	* * * * *	* * * * *	* * * * *

Subpart MMMMM—National Emission Standards for Hazardous Air Pollutants: Flexible Polyurethane Foam Fabrication Operations

■ 136. Amend § 63.8816 by revising paragraph (b) to read as follows:

§ 63.8816 What notifications must I submit and when?

* * * * *

(b) If you own or operate an existing loop splitter or flame lamination affected source, submit an initial notification no later than 120 days after April 14, 2003, or no later than 120 days after the

source becomes subject to this subpart, whichever is later.

* * * * *

■ 137. Amend table 7 to subpart MMMMM of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 7 TO SUBPART MMMMM OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART MMMMM

Citation	Requirement	Applies to subpart MMMMM	Explanation
* * * * *	* * * * *	* * * * *	* * * * *
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).
* * * * *	* * * * *	* * * * *	* * * * *

Subpart NNNNN—National Emission Standards for Hazardous Air Pollutants: Hydrochloric Acid Production

■ 138. Amend § 63.9045 by revising paragraph (b) to read as follows:

§ 63.9045 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you start up your affected source before April 17, 2003, you must submit an Initial Notification not later than 120 calendar days after April 17, 2003, or no

later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 139. Amend table 7 to subpart NNNNN of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 7 TO SUBPART NNNNN OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART NNNNN

Citation	Requirement	Applies to subpart NNNNN	Explanation
* * * * *	* * * * *	* * * * *	* * * * *
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).
* * * * *	* * * * *	* * * * *	* * * * *

Subpart P P P P P—National Emission Standards for Hazardous Air Pollutants for Engine Test Cells/Stands

■ 140. Amend § 63.9345 by revising paragraph (b)(1) to read as follows:

§ 63.9345 What notifications must I submit and when?

* * * * *

(b) * * *

(1) As specified in § 63.9(b)(2), if you start up your new or reconstructed affected source before the effective date of this subpart, you must submit an Initial Notification not later than 120 calendar days after May 27, 2003, or no later than 120 days after the source

becomes subject to this subpart, whichever is later.

* * * * *

■ 141. Amend table 7 to subpart P P P P P of part 63 by adding in numerical order entries for §§ 63.1(c)(6) and 63.9(k) to read as follows:

* * * * *

TABLE 7 TO SUBPART P P P P P OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART P P P P P

Citation	Subject	Brief description	Applies to subpart P P P P P
§ 63.1(c)(6)	Applicability	Reclassification	Yes.
§ 63.9(k)	Notifications	Electronic reporting procedures	Yes, only as specified in § 63.9(j).

Subpart Q Q Q Q Q—National Emission Standards for Hazardous Air Pollutants for Friction Materials Manufacturing Facilities

■ 142. Amend § 63.9485 by revising paragraph (a) to read as follows:

§ 63.9485 Am I subject to this subpart?

(a) You are subject to this subpart if you own or operate a friction materials manufacturing facility (as defined in § 63.9565) that is (or is part of) a major source of hazardous air pollutants (HAP) emissions. Your friction materials

manufacturing facility is a major source of HAP if it emits or has the potential to emit any single HAP at a rate of 9.07 megagrams (10 tons) or more per year or any combination of HAP at a rate of 22.68 megagrams (25 tons) or more per year.

* * * * *

■ 143. Amend § 63.9535 by revising paragraph (c) to read as follows:

§ 63.9535 What notifications must I submit and when?

* * * * *

(c) As specified in § 63.9(b)(2), if you start up your affected source before October 18, 2002, you must submit your initial notification no later than 120 calendar days after October 18, 2002, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 144. Amend table 1 to subpart Q Q Q Q Q of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

* * * * *

TABLE 1 TO SUBPART Q Q Q Q Q OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART Q Q Q Q Q

Citation	Subject	Applies to subpart Q Q Q Q Q?	Explanation
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).

Subpart R R R R R—National Emission Standards for Hazardous Air Pollutants: Taconite Iron Ore Processing

■ 145. Revise § 63.9581 to read as follows:

§ 63.9581 Am I subject to this subpart?

You are subject to this subpart if you own or operate a taconite iron ore processing plant that is (or is part of) a major source of hazardous air pollutant (HAP) emissions. Your taconite iron ore

processing plant is a major source of HAP if it emits or has the potential to emit any single HAP at a rate of 10 tons or more per year or any combination of HAP at a rate of 25 tons or more per year.

■ 146. Amend § 63.9640 by revising paragraph (b) to read as follows:

§ 63.9640 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you start up your affected source before

October 30, 2003, you must submit your initial notification no later than 120 calendar days after October 30, 2003, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

■ 147. Amend table 2 to subpart R R R R R of part 63 by adding in numerical order entries for § 63.1(c)(6) and § 63.9(k) to read as follows:

* * * * *

TABLE 2 TO SUBPART RRRRR OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART RRRRR OF PART 63

Citation	Subject	Applies to subpart RRRRR	Explanation
§ 63.1(c)(6)	Reclassification	Yes.	
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).

Subpart SSSSS—National Emission Standards for Hazardous Air Pollutants for Refractory Products Manufacturing

■ 148. Amend § 63.9812 by revising paragraph (b) to read as follows:

§ 63.9812 What notifications must I submit and when?

(b) As specified in § 63.9(b)(2), if you start up your affected source before April 16, 2003, you must submit an Initial Notification no later than 120 calendar days after April 16, 2003, or no

later than 120 days after the source becomes subject to this subpart, whichever is later.

■ 149. Amend table 11 to subpart SSSSS of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 11 TO SUBPART SSSSS OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART SSSSS

Citation	Subject	Brief description	Applies to subpart SSSSS
§ 63.9(k)	Notifications	Electronic reporting procedures	Yes, only as specified in § 63.9(j).

Subpart TTTTT—National Emissions Standards for Hazardous Air Pollutants for Primary Magnesium Refining

■ 150. Amend § 63.9930 by revising paragraph (b) to read as follows:

§ 63.9930 What notifications must I submit and when?

* * * * *

(b) As specified in § 63.9(b)(2), if you start up your affected source before October 10, 2003, you must submit your initial notification no later than 120 calendar days after October 10, 2003, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

Subpart WWWW—National Emission Standards for Hospital Ethylene Oxide Sterilizers

■ 151. Amend table 1 to subpart WWWW of part 63 by removing the entry for § 63.9(d)–(j) and adding in numerical order entries for §§ 63.9(d)–(i) and 63.9(j)–(k).

The additions read as follows:

* * * * *

TABLE 1 TO SUBPART WWWW OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART WWWW

Citation	Subject	Applies to subpart WWWW	Explanation
§ 63.9(d)–(i)	Other notifications	No.	
§ 63.9(j)–(k)	Change in information already submitted Electronic reporting.	Yes.	

Subpart BBBBBB—National Emission Standards for Hazardous Air Pollutants for Source Category: Gasoline Distribution Bulk Terminals, Bulk Plants, and Pipeline Facilities

■ 152. Amend § 63.11086 by revising paragraph (e) introductory text to read as follows:

§ 63.11086 What requirements must I meet of my facility is a bulk gasoline plant?

(e) You must submit an Initial Notification that you are subject to this subpart by May 9, 2008, or no later than 120 days after the source becomes subject to this subpart, whichever is later unless you meet the requirements in paragraph (g) of this section. The Initial Notification must contain the information specified in paragraphs

(e)(1) through (4) of this section. The notification must be submitted to the applicable EPA Regional Office and the delegated state authority, as specified in § 63.13.

■ 153. Amend table 3 to subpart BBBBBB of part 63 by revising the entry for § 63.9(b) and adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 3 TO SUBPART BBBBBB OF PART 63—APPLICABILITY OF GENERAL PROVISIONS

Citation	Subject	Brief description	Applies to subpart BBBBBB
§ 63.9(b) (1)–(2), (4)–(5)	Initial Notifications	Submit notification within 120 days after effective date, or no later than 120 days after the source becomes subject to this subpart, whichever is later; notification of intent to construct/reconstruct, notification of commencement of construction/reconstruction, notification of startup; contents of each.	Yes.
§ 63.9(k)	Notifications	Electronic reporting procedures	Yes, only as specified by § 63.9(j).

Subpart CCCCCC—National Emission Standards for Hazardous Air Pollutants for Source Category: Gasoline Dispensing Facilities

■ 154. Amend § 63.11124 by revising paragraphs (a)(1) introductory text and (b)(1) introductory text to read as follows:

§ 63.11124 What notifications must I submit and when?

(a) * * *

(1) You must submit an Initial Notification that you are subject to this subpart by May 9, 2008, or no later than 120 days after the source becomes subject to this subpart, whichever is later, or at the time you become subject to the control requirements in § 63.11117, unless you meet the requirements in paragraph (a)(3) of this section. If your affected source is subject to the control requirements in

§ 63.11117 only because it loads gasoline into fuel tanks other than those in motor vehicles, as defined in § 63.11132, you must submit the Initial Notification by May 24, 2011, or no later than 120 days after the source becomes subject to this subpart, whichever is later. The Initial Notification must contain the information specified in paragraphs (a)(1)(i) through (iii) of this section. The notification must be submitted to the applicable EPA Regional office and delegated state authority as specified in § 63.13.

(b) * * *

(1) You must submit an Initial Notification that you are subject to this subpart by May 9, 2008, or no later than 120 days after the source becomes subject to this subpart, whichever is later, or at the time you become subject to the control requirements in

§ 63.11118. If your affected source is subject to the control requirements in § 63.11118 only because it loads gasoline into fuel tanks other than those in motor vehicles, as defined in § 63.11132, you must submit the Initial Notification by May 24, 2011, or no later than 120 days after the source becomes subject to this subpart, whichever is later. The Initial Notification must contain the information specified in paragraphs (b)(1)(i) through (iii) of this section. The notification must be submitted to the applicable EPA Regional office and delegated state authority as specified in § 63.13.

* * * * *

■ 155. Amend table 3 to subpart CCCCCC of part 63 by revising the entry for § 63.9(b) and adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 3 TO SUBPART CCCCCC OF PART 63—APPLICABILITY OF GENERAL PROVISIONS

Citation	Subject	Brief description	Applies to subpart CCCCCC
§ 63.9(b)(1)–(2), (4)–(5)	Initial Notifications	Submit notification within 120 days after effective date, or no later than 120 days after the source becomes subject to this subpart, whichever is later; notification of intent to construct/reconstruct, notification of commencement of construction/reconstruction, notification of startup; contents of each.	Yes.

TABLE 3 TO SUBPART CCCCCC OF PART 63—APPLICABILITY OF GENERAL PROVISIONS—Continued

Citation	Subject	Brief description	Applies to subpart CCCCCC
* * * * *	* * * * *	* * * * *	* * * * *
§ 63.9(k)	Notifications	Electronic reporting procedures	Yes, only as specified in § 63.9(j).
* * * * *	* * * * *	* * * * *	* * * * *

Subpart HHHHHH—National Emission Standards for Hazardous Air Pollutants: Paint Stripping and Miscellaneous Surface Coating Operations at Area Sources

■ 156. Amend § 63.11175 by revising paragraph (a) introductory text to read as follows:

§ 63.11175 What notifications must I submit?

(a) Initial Notification. If you are the owner or operator of a paint stripping

operation using paint strippers containing MeCl and/or a surface coating operation subject to this subpart, you must submit the initial notification required by § 63.9(b). For a new affected source, you must submit the Initial Notification no later than 180 days after initial startup, or no later than 120 days after the source becomes subject to this subpart, or July 7, 2008, whichever is later. For an existing affected source, you must submit the initial notification no later than January 11, 2010, or no

later than 120 days after the source becomes subject to this subpart. The initial notification must provide the information specified in paragraphs (a)(1) through (8) of this section.

* * * * *

■ 157. Amend table 1 to subpart HHHHHH of part 63 by adding in numerical order an entry for § 63.9(k) to read as follows:

TABLE 1 TO SUBPART HHHHHH OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO SUBPART HHHHHH OF PART 63

Citation	Subject	Applicable to subpart HHHHHH	Explanation
* * * * *	* * * * *	* * * * *	* * * * *
§ 63.9(k)	Electronic reporting procedures	Yes	Only as specified in § 63.9(j).
* * * * *	* * * * *	* * * * *	* * * * *

Subpart PPPPPP—National Emission Standards for Hazardous Air Pollutants for Lead Acid Battery Manufacturing Area Sources

■ 158. Amend § 63.11425 by revising paragraphs (b) and (c) to read as follows:

§ 63.11425 What General Provisions apply to this subpart?

* * * * *

(b) For existing sources, the initial notification required by § 63.9(b) must be submitted not later than November 13, 2007, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

(c) For existing sources, the initial notification of compliance required by § 63.9(h) must be submitted not later than March 13, 2009, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

Subpart QQQQQQ—National Emission Standards for Hazardous Air Pollutants for Wood Preserving Area Sources

■ 159. Amend § 63.11432 by revising paragraphs (b) introductory text and (c) to read as follows:

§ 63.11432 What General Provisions apply to this subpart?

* * * * *

(b) If you own or operate a new or existing affected source that uses any wood preservative containing chromium, arsenic, dioxins, or methylene chloride, you must submit an initial notification of applicability required by § 63.9(b)(2) no later than 90 days after the applicable compliance date specified in § 63.11429, or no later than 90 days after the source becomes subject to this subpart, whichever is later. The initial notification may be combined with the notification of compliance status required in paragraph (c) of this section. The notification of applicability must include the following information:

* * * * *

(c) If you own or operate a new or existing affected source that uses any wood preservative containing chromium, arsenic, dioxins, or methylene chloride, you must submit a notification of compliance status required by § 63.9(h) no later than 90 days after the applicable compliance date specified in § 63.11429, or no later

than 90 days after the source becomes subject to this subpart, whichever is later. Your notification of compliance status must include this certification of compliance, signed by a responsible official, for the standards in § 63.11430: “This facility complies with the management practices to minimize air emissions from the preservative treatment of wood in accordance with § 63.11430.”

* * * * *

Subpart RRRRRR—National Emission Standards for Hazardous Air Pollutants for Clay Ceramics Manufacturing Area Sources

■ 160. Amend § 63.11441 by revising paragraph (a) to read as follows:

§ 63.11441 What are the notification requirements?

(a) You must submit an Initial Notification required by § 63.9(b)(2) no later than 120 days after the applicable compliance date specified in § 63.11437, or no later than 120 days after the source becomes subject to this subpart, whichever is later. The Initial Notification must include the

information specified in §§ 63.9(b)(2)(i) through (iv) and may be combined with the Notification of Compliance Status required in paragraph (b) of this section.

* * * * *

Subpart TTTTTT—National Emission Standards for Hazardous Air Pollutants for Secondary Nonferrous Metals Processing Area Sources

■ 161. Amend § 63.11469 by revising paragraph (a) to read as follows:

§ 63.11469 What are the notification requirements?

(a) You must submit the Initial Notification required by § 63.9(b)(2) no later than 120 days after the applicable compliance date specified in § 63.11464, or no later than 120 days after the source becomes subject to this subpart, whichever is later. The Initial Notification must include the information specified in § 63.9(b)(2)(i) through (iv) and may be combined with the Notification of Compliance Status required in § 63.11467 and paragraph (b) of this section if you choose to submit both notifications within 120 days.

* * * * *

Subpart WWWWWW—National Emission Standards for Hazardous Air Pollutants: Area Source Standards for Plating and Polishing Operations

■ 162. Amend § 63.11509 by revising paragraph (a)(3) to read as follows:

§ 63.11509 What are my notification, reporting, and recordkeeping requirements?

(a) * * *

(3) If you start up your affected source on or before July 1, 2008, you must submit an Initial Notification not later than 120 calendar days after July 1, 2008, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

Subpart XXXXXX—National Emission Standards for Hazardous Air Pollutants Area Source Standards for Nine Metal Fabrication and Finishing Source Categories

■ 163. Amend § 63.11519 by revising paragraph (a)(1) introductory text to read as follows:

§ 63.11519 What are my notifications, recordkeeping, and reporting requirements?

(a) * * *

(1) *Initial notification.* If you are the owner or operator of an area source in one of the nine metal fabrication and finishing source categories, as defined

in § 63.11514, you must submit the initial notification required by § 63.9(b), for a new affected source no later than 120 days after initial startup, or no later than 120 days after the source becomes subject to this subpart, or November 20, 2008, whichever is later. For an existing affected source, you must submit the initial notification no later than July 25, 2011, or 120 days after the source becomes subject to this subpart, whichever is later. Your initial notification must provide the information specified in paragraphs (a)(1)(i) through (iv) of this section.

* * * * *

Subpart YYYYYY—National Emission Standards for Hazardous Air Pollutants for Area Sources: Ferroalloys Production Facilities

■ 164. Amend § 63.11529 by revising paragraph (a) to read as follows:

§ 63.11529 What are the notification, reporting, and recordkeeping requirements?

(a) *Initial Notification.* You must submit the Initial Notification required by § 63.9(b)(2) no later than 120 days after December 23, 2008, or no later than 120 days after the source becomes subject to this subpart, whichever is later. The Initial Notification must include the information specified in § 63.9(b)(2)(i) through (iv).

* * * * *

Subpart AAAAAA—National Emission Standards for Hazardous Air Pollutants for Area Sources: Asphalt Processing and Asphalt Roofing Manufacturing

■ 165. Amend § 63.11564 by revising paragraph (a)(2) to read as follows:

§ 63.11564 What are my notification, recordkeeping, and reporting requirements?

(a) * * *

(2) As specified in § 63.9(b)(2), if you have an existing affected source, you must submit an Initial Notification not later than 120 calendar days after December 2, 2009, or no later than 120 days after the source becomes subject to this subpart, whichever is later.

* * * * *

Subpart BBBBBB—National Emission Standards for Hazardous Air Pollutants for Area Sources: Chemical Preparations Industry

■ 166. Amend § 63.11585 by revising paragraph (b)(1) to read as follows:

§ 63.11585 What are my notification, recordkeeping, and reporting requirements?

* * * * *

(b) * * *

(1) *Initial Notification of Applicability.* If you own or operate an existing affected source, you must submit an initial notification of applicability as required by § 63.9(b)(2) no later than April 29, 2010, or no later than 120 days after the source becomes subject to this subpart, whichever is later. If you own or operate a new affected source, you must submit an initial notification of applicability required by § 63.9(b)(2) no later than 120 days after initial start-up of operation, or no later than 120 days after the source becomes subject to this subpart, or April 29, 2010, whichever is later. The initial notification of applicability must include the information specified in §§ 63.9(b)(2)(i) through (iii).

* * * * *

Subpart CCCCCC—National Emission Standards for Hazardous Air Pollutants for Area Sources: Paints and Allied Products Manufacturing

■ 167. Amend § 63.11603 by revising paragraph (a)(1) introductory text to read as follows:

§ 63.11603 What are the notification, recordkeeping, and reporting requirements?

(a) * * *

(1) *Initial Notification of Applicability.* If you own or operate an existing affected source, you must submit an initial notification of applicability required by § 63.9(b)(2) no later than June 1, 2010, or no later than 120 days after the source becomes subject to this subpart, whichever is later. If you own or operate a new affected source, you must submit an initial notification of applicability required by § 63.9(b)(2) no later than 180 days after initial start-up of the operations, or no later than 120 days after the source becomes subject to this subpart, or June 1, 2010, whichever is later. The notification of applicability must include the information specified in paragraphs (a)(1)(i) through (iii) of this section.

* * * * *

Subpart HHHHHH—National Emission Standards for Hazardous Air Pollutant Emissions for Polyvinyl Chloride and Copolymers Production

■ 168. Amend table 4 to subpart HHHHHH of part 63 by revising the entry for § 63.1 and adding in numerical

order an entry for § 63.9(k) to read as follows:

TABLE 4 TO SUBPART HHHHHHH OF PART 63—APPLICABILITY OF GENERAL PROVISIONS TO PART 63

Citation	Subject	Applies to subpart HHHHHHH	Comment
§ 63.1(a)(1)–(a)(4), (a)(6), (a)(10)–(a)(12), (b)(1), (b)(3), (c)(1), (c)(2), (c)(5), (c)(6), (e).	Applicability	Yes.

Part III

Securities and Exchange Commission

17 CFR Parts 270 and 274

Fund of Funds Arrangements; Final Rule

SECURITIES AND EXCHANGE COMMISSION

17 CFR Parts 270 and 274

[Release Nos. 33–10871; IC–34045; File No. S7–27–18]

RIN 3235–AM29

Fund of Funds Arrangements

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Securities and Exchange Commission (the “Commission”) is adopting a new rule under the Investment Company Act of 1940 (“Investment Company Act” or “Act”) to streamline and enhance the regulatory framework applicable to funds that invest in other funds (“fund of funds” arrangements). In connection with the new rule, the Commission is rescinding rule 12d1–2 under the Act and certain exemptive relief that has been granted from sections 12(d)(1)(A), (B), (C), and (G) of the Act permitting certain fund of funds arrangements. Finally, the Commission is adopting related amendments to rule 12d1–1 under the Act and to Form N–CEN.

DATES: *Effective Date:* This rule is effective January 19, 2021.

Compliance Dates: The applicable compliance dates are discussed in sections II.D, II.F and III of this final rule.

FOR FURTHER INFORMATION CONTACT: Bradley Gude, Terri G. Jordan, John Lee, Adam Lovell, Senior Counsels; Jacob D. Krawitz, Branch Chief; Melissa Gainor, Brian Johnson, Assistant Directors, at (202) 551–6792, Investment Company Regulation Office, Division of Investment Management, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

SUPPLEMENTARY INFORMATION: The Commission is adopting 17 CFR 270.12d1–4 (new rule 12d1–4) under the Investment Company Act [15 U.S.C. 80a–1 *et seq.*];¹ amendments to 17 CFR 270.12d1–1 (rule 12d1–1) under the Investment Company Act; amendments to Form N–CEN [referenced in 17 CFR 274.101] under the Investment Company Act; and rescission of 17 CFR 270.12d1–2 (rule 12d1–2) under the Investment Company Act.

¹ Unless otherwise noted, all references to statutory sections are to the Investment Company Act, and all references to rules under the Investment Company Act are to title 17, part 270 of the Code of Federal Regulations [17 CFR part 270].

I. Introduction

We are adopting new rule 12d1–4 under the Investment Company Act and several related amendments to streamline and enhance the regulatory framework applicable to fund of funds arrangements. This framework reflects the Commission’s decades of experience with fund of funds arrangements and will create a consistent and efficient rules-based regime for the formation, operation, and oversight of fund of funds arrangements.² We believe that this framework will provide investors with the benefits of fund of funds arrangements, and will provide funds with investment flexibility to meet their investment objectives efficiently, in a manner consistent with the public interest and the protection of investors.

Funds increasingly invest in other funds as a way to achieve asset allocation, diversification, or other investment objectives. According to staff estimates, approximately 40% of all registered funds hold an investment in

at least one fund,³ and total net assets in mutual funds that invest primarily in other mutual funds have grown from \$469 billion in 2008 to \$2.54 trillion in 2019.⁴ Retail investors similarly use fund of funds arrangements as a convenient way to allocate and diversify their investments through a single, professionally managed portfolio. For example, a fund of funds may provide an investor with the same benefits as separate direct investments in several underlying funds, without the increased monitoring and recordkeeping that could accompany investments in each underlying fund.⁵

In December 2018, we proposed rule 12d1–4, which would permit a fund to acquire shares of another fund in excess of the limits of section 12(d)(1) without obtaining an exemptive order from the Commission, subject to certain conditions.⁶ Because the proposed rule would provide a comprehensive exemption for funds of funds to operate, the Commission also proposed to rescind rule 12d1–2 under the Act and individual exemptive orders permitting certain fund of funds arrangements. In connection with the proposed rescission of rule 12d1–2, we proposed amendments to rule 12d1–1 under the

³ See *infra* Table 2. Of those funds investing in other funds, 48% invest at least 5% of their assets in other funds, and 26% hold more than 90% of their assets in other funds. See *infra* Table 4. For more data on fund of funds arrangements, see *infra* section VI.

⁴ During this period the number of mutual funds utilizing this arrangement grew from 838 to 1,469. See Investment Company Institute, 2020 Fact Book: A Review of Trends and Activities in the Investment Company Industry (“2020 ICI Fact Book”), at 244, available at https://www.ici.org/pdf/2020_factbook.pdf.

⁵ Target-date funds are a common type of fund of funds arrangement and are designed to make it easier for investors to hold a diversified portfolio of assets that is rebalanced over time without the need for investors to rebalance their own portfolio. See Investment Company Advertising: Target Date Retirement Fund Names and Marketing, Investment Company Act Release No. 29301 (June 16, 2010) [75 FR 35920 (June 23, 2010)] (proposing disclosure requirements for target date retirement funds’ marketing materials).

⁶ See Fund of Funds Arrangements, Investment Company Act Release No. 10590 (Dec. 19, 2018) [84 FR 1286 (Feb 1, 2019)] (“2018 FOF Proposing Release”). For purposes of this release and rule 12d1–4, we generally use the term “funds” to refer to registered investment companies and business development companies (“BDCs”) unless the context otherwise requires. A BDC is a closed-end fund that: (i) Is organized under the laws of, and has its principal place of business in, any state or states; (ii) is operated for the purpose of investing in securities described in section 55(a)(1)–(3) of the Act and makes available “significant managerial assistance” to the issuers of those securities, subject to certain conditions; and (iii) has elected under section 54(a) of the Act to be subject to the sections addressing activities of BDCs under the Act. See 15 U.S.C. 80a–2(a)(48). Section 6(f) of the Act exempts BDCs that have made the election under section 54 of the Act from registration provisions of the Act.

² As discussed in more detail below, section 12(d)(1) of the Investment Company Act limits the ability of a fund to invest substantially in securities issued by another fund. See 15 U.S.C. 80a–12(d)(1).

Act to allow funds that rely on section 12(d)(1)(G) of the Act to invest in money market funds that are not part of the same group of investment companies. Finally, the Commission proposed certain disclosure amendments to Form N-CEN to provide the Commission additional census-type information regarding fund of funds arrangements.

We received more than 100 comment letters on the proposal.⁷ Many commenters supported the Commission's goal of simplifying the regulatory framework for fund of funds arrangements.⁸ However, commenters recommended modifications to the proposed rule.⁹ For example, several commenters suggested changing the scope of arrangements permitted by the rule or expanding the scope of certain exemptions.¹⁰ Many commenters also recommended alternatives to the proposed rule's conditions. For instance, commenters strongly opposed the proposed redemption limit and recommended instead codifying certain conditions in existing exemptive orders or applying the limitation only to unaffiliated fund of funds arrangements.¹¹ Several commenters recommended modifications to the proposed rule's control and voting provisions, while some commenters proposed changes to the proposed rule's

disclosure and board reporting requirements.¹² Some commenters expressed concern about the potential impact of the proposed rule's conditions on existing fund of funds arrangements, particularly in light of the proposed rescission of rule 12d1-2 and existing exemptive orders.¹³

After consideration of the comments we received, we are adopting rule 12d1-4 with several modifications designed to increase the workability of the rule's requirements, while enhancing protections for investors in fund of funds arrangements. We are also rescinding rule 12d1-2 and exemptive relief that permitted certain fund of funds arrangements, amending rule 12d1-1 under the Act, and amending Form N-CEN.

A. Regulatory Context

Section 12(d)(1) of the Act limits the ability of a fund to invest substantially in securities issued by another fund. Section 12(d)(1)(A) of the Act prohibits a registered fund (and companies, including funds, it controls) from:

- Acquiring more than 3% of another fund's outstanding voting securities;
- investing more than 5% of its total assets in any one fund; or
- investing more than 10% of its total assets in funds generally.¹⁴

Section 12(d)(1)(B) of the Act addresses the other side of the transaction by prohibiting a registered open-end fund,¹⁵ and any principal

underwriter thereof or broker-dealer registered under the Securities Exchange Act of 1934 (the "Exchange Act"), from knowingly selling securities to any other investment company if, after the sale, the acquiring fund would:

- Together with companies it controls, own more than 3% of the acquired fund's outstanding voting securities; or
- together with other funds (and companies they control), own more than 10% of the acquired fund's outstanding voting securities.¹⁶

These restrictions are designed to prevent fund of funds arrangements that allow the acquiring fund to control the assets of the acquired fund and use those assets to enrich the acquiring fund at the expense of acquired fund shareholders.¹⁷ Congress also was concerned about the potential for duplicative and excessive fees when one fund invested in another and the formation of overly complex structures that could be confusing to investors.¹⁸

As discussed in the 2018 FOF Proposing Release, our views and those of Congress have evolved over the years as fund of funds structures developed that include investor protections and serve purposes that benefit investors.¹⁹ As a result, Congress created three statutory exceptions that permit different types of fund of funds arrangements subject to certain conditions.²⁰ Congress also gave the Commission authority in section

¹⁴ See 15 U.S.C. 80a-12(d)(1)(A). Both registered and unregistered investment companies are subject to these limits with respect to their investments in a registered investment company. Registered investment companies are also subject to these same limits with respect to their investment in an unregistered investment company. Sections 3(c)(1) and 3(c)(7) subject private funds to the 3% limitation on investments in registered funds. 15 U.S.C. 80a-3(c)(1) and 3(c)(7)(D). A "private fund" is an issuer that would be an investment company, as defined in section 3 of the Act, but for section 3(c)(1) or 3(c)(7) of the Act. 15 U.S.C. 80b-2(a)(29). In addition, section 60 of the Act makes section 12(d) applicable to a BDC to the same extent as it if were a registered closed-end fund. 15 U.S.C. 80a-60.

¹⁵ A registered open-end fund is a management company that is offering for sale or has outstanding any redeemable security of which it is the issuer. 15 U.S.C. 80a-5(a)(1) (defining "open-end company"). A registered closed-end fund is any management company other than an open-end fund. 15 U.S.C. 80a-5(a)(2) (defining "closed-end company"). Section 12(d)(1)(C) of the Act also includes specific limitations on investments in registered closed-end funds. See 15 U.S.C. 80a-12(d)(1)(C).

¹⁶ See 15 U.S.C. 80a-12(d)(1)(B).

¹⁷ This practice is described as "pyramiding." See 2018 FOF Proposing Release, *supra* footnote 6, at 1287. Control could be exercised either directly (such as through the voting power of a controlling interest) or indirectly (such as coercion through the threat of large-scale redemptions). See *id.*

¹⁸ Controlling persons profited when acquiring fund shareholders paid excessive fees due to duplicative charges at both the acquiring and acquired fund levels. See Investment Trusts and Investment Companies, Report of the Securities and Exchange Commission, H.R. Doc. No. 136, 77th Cong., 1st Sess., at ch. 7, 2725-39, 2760-75, 2778-93, (1941) ("Investment Trust Study") and Exchange-Traded Funds, Investment Company Act Release No. 28193 (Mar. 11, 2008) [73 FR 14618 (Mar. 18, 2008)] ("2008 ETF Proposing Release"), at n. 195. See also 2018 FOF Proposing Release, *supra* footnote 6, at 9.

¹⁹ See Fund of Funds Investments, Investment Company Act Release No. 27399 (June 20, 2006) [71 FR 36640 (June 27, 2006)] ("2006 FOF Adopting Release") at n.7 and accompanying text; 2008 ETF Proposing Release, *supra* footnote 18. See also 2018 FOF Proposing Release, *supra* footnote 6, at 10-13.

²⁰ See 15 U.S.C. 80a-12(d)(1)(E) (permitting master-feeder arrangements whereby an acquiring fund invests all of its assets in a single fund), 15 U.S.C. 80a-12(d)(1)(F) (permitting a fund to take small positions (up to 3% of another fund's securities) in an unlimited number of other funds), and 15 U.S.C. 80a-12(d)(1)(G) (permitting an open-end fund or unit investment trust ("UIT") to invest in other open-end funds and UITs that are in the "same group of investment companies").

12(d)(1)(J) of the Act to exempt any person, security, or transaction, or any class or classes of transactions, from the restrictions of section 12(d)(1) if the exemption is consistent with the public interest and the protection of investors.²¹

We previously exercised this exemptive authority to adopt three rules of general applicability that were based on relief we provided to specific market participants in exemptive orders.²² We also have used our authority under section 12(d)(1)(J) to issue exemptive orders permitting fund of funds arrangements that the Act or our rules would otherwise prohibit when we found those arrangements to be consistent with the public interest and the protection of investors.²³ These exemptive orders permit fund investments in other funds, subject to specified conditions that are designed to prevent the abuses that led Congress to enact section 12(d)(1).²⁴ Relief from sections 12(d)(1)(A) and (B) was included in exemptive orders permitting exchange-traded funds (“ETFs”) and exchange-traded managed funds (“ETMFs”) to operate.²⁵

²¹ See National Securities Markets Improvement Act of 1996 (“NSMIA”), Public Law 104–290, 110 Stat. 3416 (1996), at § 202(4) (codified at 15 U.S.C. 80a–12(d)(1)(J)); Comm. On Commerce, Securities Amendments of 1996, H.R. Rep. No. 104–622 (1996), 104th Cong., 2nd Sess., at 43–44 (“H.R. Rep. No. 622”). Congress added section 12(d)(1)(J) to resolve questions regarding the scope of the Commission’s authority under section 6(c) of the Act.

²² See 2006 FOF Adopting Release, *supra* footnote 19. Rule 12d1–1 allows funds to invest in shares of money market funds in excess of the limits of section 12(d)(1). Rule 12d1–2 provides funds relying on section 12(d)(1)(G) with greater flexibility to invest in other types of securities. Rule 12d1–3 allows acquiring funds relying on section 12(d)(1)(F) to charge sales loads greater than 1.5%.

²³ As the orders are subject to terms and conditions set forth in the applications requesting exemptive relief, references in this release to “exemptive relief” or “exemptive orders” include the terms and conditions described in the related applications. See, e.g., Schwab Capital Trust, *et al.*, Investment Company Act Release Nos. 24067 (Oct. 1, 1999) [64 FR 54939 (Oct. 8, 1999)] (notice) and 24113 (Oct. 27, 1999) (order) and related application (“Schwab”). In addition to our section 12(d)(1)(J) authority, we have issued these orders pursuant to our exemptive authority under sections 17(a) and 6(c) of the Act.

²⁴ The conditions include: (i) Limits on the control and influence an acquiring fund can exert on the acquired fund; (ii) limits on certain fees charged to the acquiring fund and its shareholders; and (iii) limits on the acquired fund’s ability to invest in other funds. See Schwab, *supra* footnote 23.

²⁵ We recently adopted rule 6c–11, which permits certain ETFs to operate without obtaining an exemptive order. 17 CFR 270.6c–11. In adopting rule 6c–11, we did not rescind the portions of existing ETF exemptive orders that provided relief from sections 12(d)(1)(A) and (B) and stated that ETFs relying on rule 6c–11 that do not have exemptive relief from sections 12(d)(1)(A) and (B)

The combination of statutory exemptions, Commission rules, and exemptive orders has created a regulatory regime where substantially similar fund of funds arrangements are subject to different conditions. For example, an acquiring fund could rely on section 12(d)(1)(G) and rule 12d1–2 when investing in an acquired fund within the same group of investment companies.²⁶ Alternatively, the acquiring fund could rely on relief provided by an exemptive order, which would allow it to invest in substantially the same investments, but could require the fund to comply with different conditions. Over time, industry participants have experimented with new fund of funds structures, relying on combinations of statutory exemptions and Commission exemptive orders, and considering staff no-action letters, to create novel fund of funds arrangements. For example, some commenters described funds that have combined various forms of section 12(d)(1) relief to create fund structures that include three or more layers of funds.²⁷

B. Rule 12d1–4 Overview

In order to create a more consistent and efficient regulatory framework for fund of funds arrangements, rule 12d1–4 will permit a registered investment company or business development company (“BDC”) (collectively, “acquiring funds”) to acquire the securities of any other registered investment company or BDC (collectively, “acquired funds”) in excess of the limits in section 12(d)(1), subject to the following conditions:

- **Control.** Rule 12d1–4 will prohibit an acquiring fund and its “advisory group” from controlling an acquired fund, except in certain limited circumstances.

may enter into fund of funds arrangements as set forth in recent ETF exemptive orders, provided that such ETFs satisfy the terms and conditions for fund of funds relief in those orders. Exchange-Traded Funds, Investment Company Act Release No. 33646 (Sep. 25, 2019) [84 FR 57162 (Oct. 24, 2019)] (“2019 ETF Adopting Release”), at 57199. For purposes of this release, we generally use the term “ETFs” to refer to exchange-traded funds and exchange-traded managed funds unless the context otherwise requires.

²⁶ Such a fund would rely on section 12(d)(1)(G) to invest in acquired funds within the same group of investment companies, government securities, and short term paper. In addition, the fund could rely on rule 12d1–2 to invest in: (i) Securities of funds that are not in the same group of investment companies up to the limits in section 12(d)(1)(A) or (F); (ii) securities of money market funds in reliance on rule 12d1–1; and (iii) stocks, bonds, and other securities.

²⁷ See, e.g., Fidelity Comment Letter; Federated Comment Letter; Comment Letter of Federated Investors, Inc. (June 7, 2019) (“Federated 2 Comment Letter”).

- **Voting.** Rule 12d1–4 will require an acquiring fund and its advisory group to use mirror voting if it holds more than 25% of an acquired open-end fund or UIT due to a decrease in the outstanding securities of the acquired fund and if it holds more than 10% of a closed-end fund, with the ability to use pass-through voting when acquiring funds are the only shareholders of an acquired fund.²⁸

- **Required Findings.** Rule 12d1–4 will require investment advisers to acquiring and acquired funds that are management companies to make certain findings regarding the fund of funds arrangement, after considering specific factors. The final rule also will require certain findings with respect to UITs and separate accounts funding variable insurance contracts, taking into account the unique structural characteristics of such entities.

- **Fund of Funds Investment Agreement.** Rule 12d1–4 will require funds that do not have the same investment adviser to enter into an agreement prior to the purchase of acquired fund shares in excess of section 12(d)(1)’s limits (a “fund of funds investment agreement”).

- **Complex Structures.** Rule 12d1–4 will impose a general three-tier prohibition with certain enumerated exceptions. However, in addition to these exceptions, the rule will allow an acquired fund to invest up to 10% of its total assets in other funds (including private funds), without regard to the purpose of the investment or types of underlying funds.

As proposed, we are rescinding rule 12d1–2 under the Act, and amending rule 12d1–1 to allow funds that rely on section 12(d)(1)(G) to invest in money market funds that are not part of the same group of investment companies in reliance on that rule.²⁹ In addition, certain staff no-action letters relating to section 12(d)(1) will be withdrawn.³⁰ The resulting regulatory framework will reduce confusion and subject similar fund of funds arrangements to tailored conditions that will enhance investor protection, while continuing to provide funds with investment flexibility to meet their investment objectives. In addition, the rule will allow the Commission, as well as funds and

²⁸ See *infra* section II.C.1.b.ii.

²⁹ With the rescission of rule 12d1–2, a fund relying on section 12(d)(1)(G) will no longer have flexibility to: (i) Acquire the securities of other funds that are not part of the same group of investment companies; or (ii) invest directly in stocks, bonds, and other securities, except in compliance with rule 12d1–4.

³⁰ The list of no-action letters to be withdrawn will be available on the Commission’s website.

advisers seeking exemptions, to focus exemptive order review resources on novel products or arrangements.

II. Discussion

A. Scope

1. Registered Funds and BDCs

As proposed, rule 12d1–4 will permit registered investment companies and BDCs to acquire the securities of other registered investment companies or BDCs in excess of the limits in section 12(d)(1). As a result, open-end funds (including ETFs), UITs (including ETFs organized as UITs), and closed-end funds (including BDCs), can operate in accordance with rule 12d1–4, as both acquiring and acquired funds.³¹ The scope of permissible acquiring and acquired funds under rule 12d1–4 is greater than the scope of funds that was permitted by the Commission's exemptive orders. For example, the rule will allow open-end funds, UITs, and ETFs to invest in unlisted closed-end funds and unlisted BDCs beyond the limits in section 12(d)(1).³² The rule similarly will increase permissible investments for closed-end funds beyond ETFs to allow them to invest in open-end funds, UITs, other closed-end funds, and BDCs, in excess of the section 12(d)(1) limits. BDCs, which currently may invest in ETFs in excess of the section 12(d)(1) limits, also will be permitted to invest in open-end funds, UITs, other BDCs, other closed-end funds and ETMFs. Finally, the rule will allow ETMFs to invest in open-end funds, UITs, BDCs and other closed-end funds. Rule 12d1–4, therefore, will create a consistent framework for all

registered funds and BDCs and eliminate unnecessary and potentially confusing distinctions among permissible investments for different types of acquiring funds.

Several commenters supported including all open-end funds, UITs, BDCs and other closed-end funds within the scope of permissible fund of funds arrangements under the rule.³³ The commenters noted that proposed rule 12d1–4 would provide funds covered by the rule with flexibility to meet their investment objectives and level the playing field among registered funds and BDCs operating in accordance with the rule. However, one commenter raised concerns with arrangements that the Commission has not previously permitted in exemptive orders.³⁴ This commenter stated that the Commission lacks experience with funds of funds arrangements that include unlisted closed-end funds and BDCs and suggested that permitting these funds to rely on the rule as acquired funds would increase retail investor exposure to higher cost investments. The commenter also questioned whether one rule should apply to all types of fund of funds arrangements, noting that several of the statutory requirements of section 12(d)(1) apply differently to open-end funds and closed-end funds, and the Commission's historical exemptive relief also treated these types of funds differently. The commenter additionally questioned whether the Commission has appropriately analyzed the risks of fund of funds arrangements involving ETMFs or "non-transparent" ETFs.

After considering these comments, we continue to believe that the universe of permissible fund of funds arrangements generally should not turn on the type of funds in the arrangement. Instead, the rule should address differences in fund structures with tailored conditions that protect investors in all types of covered investment companies against the abuses historically associated with funds of funds. We believe the conditions of rule 12d1–4 provide appropriate flexibility for innovative fund of funds structures while creating a consistent and streamlined regulatory framework that protects investors in all types of funds. For example, for a management company to rely on the rule, the investment advisers to both the acquiring and acquired fund must make certain determinations before entering into the fund of funds arrangement.³⁵

Similarly, the rule will also require principal underwriters or depositors of UITs and insurance companies offering certain separate accounts to make findings tailored to their characteristics.³⁶ The rule also imposes a requirement that certain acquiring funds and acquired funds enter into a fund of funds investment agreement, and imposes voting requirements on acquiring funds' holdings of acquired funds above certain ownership thresholds that differ depending on the type of acquired fund, as described more fully below.³⁷

With respect to BDCs, we believe that the rule's conditions and existing statutory provisions will protect investors from concerns related to undue influence, fees that are excessive due to being duplicative, or complex structures. For example, as we noted in the proposal, an acquiring fund board already has a responsibility to see that the fund is not overcharged for advisory services regardless of any findings we require.³⁸ Additionally, the rule will require fund of funds arrangements involving BDCs to satisfy the other conditions of rule 12d1–4, including the requirement to make certain findings as described in section II.C.2.b. below. One element of these findings is a determination that the fees and expenses associated with an investment in an acquired fund, including an investment in an acquired BDC, do not duplicate the fees and expenses of the acquiring fund. Further, a BDC operating in accordance with the rule as an acquiring fund is subject to other existing limitations on its ability to invest in acquired funds.³⁹

³¹ As proposed, the final rule will not be available to face-amount certificate companies. Face-amount certificate companies are registered investment companies that are engaged or propose to engage in the business of issuing face-amount certificates of the installment type, or which have been engaged in such businesses and have any such certificates outstanding. See section 4(1) of the Investment Company Act. There is only one face-amount certificate company currently operating as an investment company and making current filings pursuant to section 13 [15 U.S.C. 80a–13] or section 15(d) of the Exchange Act [15 U.S.C. 80a–15]. Given the very limited universe of face-amount certificate companies and the nature of their investments, face-amount certificate companies are not within the scope of final rule 12d1–4 as either acquiring funds or acquired funds. No commenters addressed this aspect of the proposal.

³² We use the terms "listed closed-end funds" and "listed BDCs" to refer to closed-end funds and BDCs that are listed and traded on national securities exchanges. Our exemptive orders have included a representation that acquiring funds will not invest in reliance on the order in closed-end funds or BDCs that are not listed and traded on a national securities exchange. See, e.g., Innovator ETFs Trust, et al., Investment Company Act Release Nos. 33214 (Aug. 24, 2018) [83 FR 44374 (Aug. 30, 2018)] (notice) and 33238 (Sept. 19, 2018) (order) and related application ("Innovator ETFs").

³³ See, e.g., ICI Comment Letter; Comment Letter of Morningstar, Inc. (May 2, 2019) ("Morningstar Comment Letter").

³⁴ See CFA Comment Letter.

³⁵ See *infra* section II.C.2.b.i.

³⁶ See *infra* section II.C.2.b.ii. For example, UITs do not have a board of directors and do not engage in active management of a portfolio. The rule therefore will require different determinations for UITs.

³⁷ See *infra* sections II.C.1 and 2.

³⁸ Specifically, section 15(c) of the Act requires the acquiring fund's board of directors to evaluate any information reasonably necessary to evaluate the terms of the acquiring fund's advisory contracts (which information would include fees, or the elimination of fees, for services provided by an acquired fund's adviser). Section 36(b) of the Act imposes on fund advisers a fiduciary duty with respect to their receipt of compensation. We believe that to the extent advisory services are being performed by another person, such as the adviser to an acquired fund, this fiduciary duty would require an acquiring fund's adviser to charge a fee that bears a reasonable relationship only to the services that the acquiring fund's adviser is providing, and not to any services performed by an adviser to an acquired fund. See 2018 FOF Proposing Release, *supra* footnote 6, at 63–64.

³⁹ See 15 U.S.C. 80a–54(a) (prohibiting a BDC from making any investment unless, at the time of the investment, at least 70% of the BDC's total assets are invested in securities of certain specific types of companies, which do not include funds).

Similarly, we do not believe that including ETMFs or non-transparent ETFs within the scope of the rule will present unique investor protection concerns that we have not already extensively considered and addressed with respect to traditional registered open-end funds and fully transparent ETFs. Along with fully transparent ETFs, ETMFs and non-transparent ETFs generally are subject to the protections of the Act applicable to all registered open-end funds, including governance and other requirements. Accordingly, we believe that the conditions of rule 12d1–4, when combined with the protections imposed by the Act on all investment companies, appropriately address concerns of duplicative fees, undue influence, and complex structures with respect to these products.

Finally, one commenter suggested that the concerns underlying section 12(d)(1) of the Act largely do not apply to ETFs as acquired funds in a fund of funds structure.⁴⁰ This commenter stated that passive investments in ETFs do not implicate Congress' concerns regarding duplicative fees and undue influence, particularly when an investor holds an ETF to gain exposure to a particular market or asset class in an efficient manner, to allocate and diversify investments, or efficiently hedge a portion of a portfolio or balance sheet. The commenter stated that ETFs have not been subject to influence from activist investors despite ETF shares trading in the secondary market, perhaps because ETF shares have not historically traded at a significant discount to net asset value. Accordingly, the commenter urged the Commission to exempt the sale of ETFs as acquired funds from the limitations in section 12(d)(1)(B) of the Act.

After considering comments, we continue to believe that investments in ETFs should be subject to the limitations set forth in section 12(d)(1), and that any investments in excess of the 12(d)(1) limits should be subject to protective conditions. As a threshold matter, ETFs issue redeemable securities and are generally classified as open-end funds under the Act.⁴¹ As we discussed in our 2008 ETF Proposing Release, we believe that investments in ETFs,

similar to investments in traditional open-end funds, raise the same concerns of pyramiding and the threat of large-scale redemptions as other types of open-end funds.⁴² For example, an acquiring fund might seek to use its ownership interest in an ETF to exercise a controlling influence over the ETF's management or policies, or to enter into a transaction with an affiliate of the acquiring fund. These concerns are most pronounced when a fund invests in an ETF in a primary market transaction through an authorized participant.⁴³

ETFs, like other open-end funds, also operate pursuant to the prohibition in section 12(d)(1)(B), which provides that it is unlawful knowingly to sell or otherwise dispose of any securities of which the ETF is an issuer to any other investment company in excess of the limits in subsection (i) and (ii). Therefore, ETFs that receive inquiries and other communications from persons identifying themselves as potential purchasers of the ETF's shares as or through an authorized participant may want to consider adopting and implementing policies and procedures to determine whether those persons intend to purchase ETF shares for investment companies.⁴⁴ Further, principal underwriters and broker-dealers that transact in an ETF's shares (including an ETF's authorized participants), are subject to the requirements of section 12(d)(1)(B) of the Act. Accordingly, the final rule will treat ETFs consistently with other open-end funds and will permit investments in ETFs as acquired funds subject to the rule's conditions designed to protect acquired funds and their shareholders.

2. Private Funds and Unregistered Investment Companies

As proposed, the final rule will not permit private funds and unregistered investment companies, such as foreign

funds, to rely on the rule as acquiring funds.⁴⁵ As a result, private funds and unregistered investment companies may acquire no more than 3% of a U.S. registered fund under the Act.⁴⁶

Several commenters suggested that the Commission broaden the scope of rule 12d1–4 to permit investments by private funds or unregistered investment companies in acquired funds beyond the limits in section 12(d)(1).⁴⁷ Some of these commenters highlighted the potential for private and unregistered investment companies to invest in registered funds for efficient allocation, diversification, and hedging purposes and stated that such investments could benefit registered fund shareholders by increasing the scale and liquidity of the registered fund.⁴⁸ Commenters that supported broadening the scope of the rule to include private funds and unregistered investment companies stated that such funds do not operate in a materially different manner from registered funds and therefore the concerns underlying section 12(d)(1) are not any more pronounced for private and unregistered investment companies nor are different conditions warranted.⁴⁹

⁴⁵ We use the term “foreign fund” to refer to an “investment company” as defined in section 3(a)(1)(A) of the Act that is organized outside the United States and that does not offer or sell its securities in the United States in connection with a public offering. See section 7(d) of the Act (prohibiting a foreign fund from using the U.S. mails or any means or instrumentality of interstate commerce to offer or sell its securities in connection with a public offering unless the Commission issues an order permitting the foreign fund to register under the Act). A foreign fund may conduct a private U.S. offering in the United States without violating section 7(d) of the Act if the foreign fund conducts its activities with respect to U.S. investors in compliance with either section 3(c)(1) or 3(c)(7) of the Act (or some other available exemption or exclusion). See 2018 FOF Proposing Release, *supra* footnote 6, at 18–20.

⁴⁶ Sections 3(c)(1) and 3(c)(7) of the Act subject private funds to the 3% limitation on investments in registered funds. 15 U.S.C. 80a–3(c)(1) and 3(c)(7)(D).

⁴⁷ See, e.g., ICI Comment Letter; Comment Letter of American Investment Council (May 2, 2019) (“AIC Comment Letter”); Comment Letter of Dechert LLP (May 2, 2019) (“Dechert Comment Letter”); Comment Letter of Clifford Chance US LLP (May 2, 2019) (“Clifford Chance Comment Letter”); NYC Bar Comment Letter; IAA Comment Letter; ABA Comment Letter.

⁴⁸ See MFA Comment Letter; Comment Letter of BlackRock, Inc. (May 3, 2019) (“BlackRock Comment Letter”) (stating “ETFs are also frequently used as an alternative to futures and other market beta instruments such as forwards and swaps, especially in markets where derivatives may be less liquid or nonexistent, because ETFs offer intraday liquidity”); WisdomTree Comment Letter; NYC Bar Comment Letter.

⁴⁹ Comment Letter of Invesco Ltd. (Apr. 30, 2019) (“Invesco Comment Letter”); MFA Comment Letter; ICI Comment Letter; Dechert Comment Letter; Comment Letter of Parallax Volatility Advisers, L.P. (May 1, 2019) (“Parallax Comment Letter”);

⁴⁰ Comment Letter of WisdomTree Asset Management, Inc. (Dec. 12, 2019) (“WisdomTree Comment Letter”).

⁴¹ While most ETFs are classified as open-end funds, some ETFs are structured as UITs. Regardless of structure, we do not believe that the redemption of ETF shares in creation unit-sized aggregations by authorized participants insulates ETFs from the abuses that section 12(d)(1) was designed to prevent.

⁴² See 2008 ETF Proposing Release, *supra* footnote 18, at 69.

⁴³ See generally 2019 ETF Adopting Release, *supra* footnote 25, at section I.B (explaining that an authorized participant that has a contractual arrangement with the ETF (or its distributor) purchases and redeems ETF shares directly from the ETF in blocks called “creation units” as a principal for its own account or as agent for others, including institutional investors (such as funds)).

⁴⁴ For example, an ETF that explains its obligations pursuant to section 12(d)(1)(B) to potential purchasers who reach out directly to the ETF, and documents that exchange with the potential purchaser, generally would satisfy its obligation not to knowingly sell or otherwise dispose of any of its securities in excess of 12(d)(1)(B) limits. Further, if an ETF intends to rely on rule 12d1–4 to exceed the section 12(d)(1) limits, such ETF would be required to comply with the conditions of the rule, including entering into a fund of funds investment agreement with the acquiring investment company.

While commenters generally suggested subjecting private funds and unregistered investment companies to the same conditions as other acquiring funds, some commenters recommended additional conditions that could apply to private funds and unregistered investment companies under the rule.⁵⁰ For example, commenters suggested that the rule could include recordkeeping and reporting requirements tailored to private funds and unregistered investment companies or limit the availability of the rule to private funds and unregistered investment companies with an adviser that is registered with the Commission.⁵¹ Some commenters suggested that the final rule allow private funds and unregistered investment companies to invest in only certain types of funds, such as ETFs, subject to appropriate conditions.⁵²

Other commenters recommended that the rule exclude unregistered investment companies as acquiring funds because the Commission has not yet extended exemptive relief allowing such funds to acquire other investment companies in excess of the section 12(d)(1) limits.⁵³ These commenters stated that the Commission does not have experience with this type of fund of funds arrangement, and recommended that the Commission first

provide relief to unregistered investment companies through the exemptive application process. These commenters suggested that this process would allow the Commission to weigh the facts and circumstances of each particular applicant, and the type of underlying fund in the proposed fund of funds arrangement. Two commenters recommended that the rule exclude private funds as acquiring funds because of concerns of undue influence over closed-end funds.⁵⁴

After considering comments, we continue to believe that the rule should not include private funds and unregistered investment companies as acquiring funds. We acknowledge that permitting private funds and unregistered investment companies to rely on the rule as acquiring funds would provide these funds greater investment flexibility, and would increase the scale of U.S. registered funds that were acquired by private funds and unregistered investment companies. However, we do not have sufficient experience tailoring conditions for private funds' and unregistered investment companies' investments in registered funds to address in a rule of general applicability the concerns such funds present as acquiring funds, as described below. To date, few applicants have requested relief to permit private funds or unregistered investment companies to invest in registered funds beyond the limits in section 12(d)(1) of the Act.⁵⁵

We believe it would be more appropriate to consider designing protective conditions through the exemptive application process because including private funds and unregistered investment companies as acquiring funds raises different concerns. Private funds and unregistered investment companies are not registered with the Commission, and their investments in registered funds would not be subject to the reporting requirements under the Act. In particular, private funds and unregistered investment companies are not subject to periodic reporting on

Form N–PORT or the new reporting requirements that we are adopting on Form N–CEN regarding reliance on rule 12d1–4.⁵⁶

Additionally, while several commenters noted that many advisers to private funds are required to disclose census-type information about their private funds on Form PF, Form PF does not require advisers to disclose the position-level information that would allow us to monitor compliance with rule 12d1–4 and its impact on the fund industry.⁵⁷ In addition, smaller private fund advisers are not required to file Form PF. Accordingly, under the existing regulatory framework, the Commission does not receive routine reporting on the amount and duration of private fund or unregistered investment company investments in registered funds. As noted in the 2018 FOF Proposing Release, even if private funds and unregistered investment companies provided basic reporting on investments in underlying funds, that reporting alone may not provide an adequate basis to protect against undue influence and monitor compliance with the rule's conditions.⁵⁸

Private funds and unregistered investment companies are not subject to many of the governance and compliance requirements of the Act that are designed to protect investors and reduce conflicts of interest that are inherent in a fund structure. Such requirements are integral to the oversight and monitoring provisions of rule 12d1–4 for registered funds. For example, private funds and unregistered investment companies are not subject to the board governance requirements of sections 10 and 16 of the Act and the chief compliance officer requirements of rule 38a–1.⁵⁹ We are

Comment Letter of Gracie Asset Management (May 2, 2019) (“Gracie Comment Letter”); AIC Comment Letter; IAA Comment Letter; Comment Letter of Ropes & Gray LLP (May 2, 2019) (“Ropes Comment Letter”). One commenter stated that fee layering and complex structure concerns are not as significant in the private fund context as they are in the registered fund context because private fund investors must meet sophistication standards and typically perform due diligence on a private fund's structure and fees. Comment Letter of Massachusetts Mutual Life Insurance Company (May 2, 2019).

⁵⁰ Some commenters stated that certain private funds have sought to control closed-end funds that trade at a discount to their NAV and suggested tailored control and voting conditions if private funds could rely on the rule to invest in closed-end funds and BDCs. See AIC Comment Letter; SIFMA AMG Comment Letter. See also *infra* section II.C.1.a.ii.

⁵¹ Invesco Comment Letter; MFA Comment Letter; ICI Comment Letter; Gracie Comment Letter; AIC Comment Letter; BlackRock Comment Letter; Clifford Chance Comment Letter; NYC Bar Comment Letter; IAA Comment Letter; ABA Comment Letter.

⁵² See, e.g., BlackRock Comment Letter; Parallax Comment Letter; MFA Comment Letter (stating that the Commission has already allowed private funds to invest in money market funds beyond the limits of section 12(d)(1) of the Investment Company Act in rule 12d1–1, and that secondary market transactions in ETFs may be less likely to raise certain abuses that section 12(d)(1) was designed to prevent).

⁵³ See Comment Letter of Kauff Laton Miller LLP (May 13, 2019) (“Kauff Comment Letter”); Comment Letter of Law Office of William Coudert Rand (May 14, 2019) (“Rand Comment Letter”); Comment Letter of Cooper LLC (May 24, 2019) (“Cooper Comment Letter”).

⁵⁴ Comment Letter of Advent Capital Management, LLC (May 1, 2019) (“Advent Comment Letter”); Comment Letter of FS Investments (May 2, 2019) (“FS Comment Letter”).

⁵⁵ The exemptive application process provides an opportunity to consider tailored conditions and limitations for a specific applicant that seeks relief to permit private funds or unregistered investment companies to invest in registered funds beyond the limits in section 12(d)(1) of the Act. If granted, the Commission and its staff could monitor fund of funds arrangements that operate pursuant to such exemptive relief, determine whether the conditions and limitations of the relief operate as intended, and consider whether further rulemaking may be appropriate.

⁵⁶ Form N–PORT requires certain registered funds to report information about their monthly portfolio holdings to the Commission in a structured data format. See Investment Company Reporting Modernization, Investment Company Act Release No. 32314 (Oct. 13, 2016) [81 FR 81870 (Nov. 18, 2016)] (“Reporting Modernization Adopting Release”). Rule 31a–1 under the Act sets forth certain other recordkeeping requirements for registered investment companies.

⁵⁷ See AIC Comment Letter (noting that the Commission could consider amending Form PF to require an adviser to report if any of the private funds they advise relied on the rule during the reporting period); Clifford Chance Comment Letter; NYC Bar Comment Letter; ABA Comment Letter; Invesco Comment Letter; Parallax Comment Letter; Gracie Comment Letter. See also 17 CFR 275.204(b)–1 (requiring certain registered investment advisers to private funds to file Form PF to report information about the private funds they manage).

⁵⁸ 2018 FOF Proposing Release, *supra* footnote 6, at 20.

⁵⁹ To protect shareholders and address conflicts of interest that can arise from the management of investment companies, the Act requires that a

adopting rule 12d1–4 against the background of these existing requirements and the protections they provide for shareholders in a fund of funds arrangement. Without incorporating additional governance and compliance obligations for private funds and unregistered investment companies as acquiring funds, we do not believe rule 12d1–4 would have sufficiently protective conditions to address the undue influence concerns that Congress raised with respect to fund of funds arrangements.

We believe designing such protective conditions through the exemptive application process would allow the Commission to weigh the policy considerations described above in the context of the facts and circumstances of the specific fund of funds arrangement described in the application. The exemptive application process would allow the Commission to consider appropriate investor protection provisions, including governance and reporting requirements, applicable to any such arrangement.⁶⁰ The exemptive application process also would provide the Commission with an opportunity to analyze the operation and effects of these fund of funds arrangements before

registered management investment company be governed by a board of directors that has a general oversight role, with certain exceptions. Rule 12d1–4 requires the adviser to an acquiring fund or acquired fund to submit reports to such fund's board of directors so that the board can review the adviser's analysis of the fund of funds arrangement. While UITs are not subject to these governance and oversight requirements, a UIT does not engage in active management of its investment portfolio. Accordingly, we believe that a UIT's investment in an acquired fund presents different concerns than an investment by a private fund or unregistered fund. Rule 38a–1 requires a fund (including a UIT) to adopt and implement written policies and procedures reasonably designed to prevent a violation of the federal securities laws by the fund and designate one individual responsible for administering the fund's policies and procedures as a chief compliance officer. *See* Compliance Programs of Investment Companies and Investment Advisers, Investment Company Act Release No. 26299 (Dec. 17, 2003) [68 FR 74714 (Dec. 24, 2003)] (“Compliance Rule Adopting Release”). Under rule 38a–1, a fund would adopt policies and procedures reasonably designed to prevent a violation of rule 12d1–4.

⁶⁰ One commenter pointed to rule 12d1–1 as a model for private fund investments in registered funds. Prior to the adoption of that rule, the Commission considered specific proposals for exemptive relief for certain private funds to invest in affiliated money market funds. *See, e.g.*, Scudder Global Fund, Inc., *et al.*, Investment Company Act Release Nos. 24276 (Feb. 3, 2000) [65 FR 6420 (Feb. 9, 2000)] (notice) and 24322 (Feb. 29, 2000) (order) and related application; Pioneer America Income Trust, *et al.*, Investment Company Act Release Nos. 25607 (Jun. 7, 2002) [97 FR 40757 (Jun. 13, 2002)] (notice) and 25647 (Jul. 3, 2002) (order) and related application. However, the Commission has not yet granted relief for private funds to invest in registered funds in excess of the limits of section 12(d)(1) of the Act.

determining whether and how to address such arrangements in a rule of general applicability. We encourage interested parties to share their views on such arrangements by contacting staff in the Division of Investment Management.

In addition to the challenges applicable to unregistered funds generally, foreign fund investments in registered funds present additional concerns.⁶¹ Specifically, the Commission understands that some foreign laws and regulations may limit or prevent disclosure of information to the Commission.⁶² These types of restrictions may include privacy laws and so-called “blocking statutes” (including secrecy laws) that prevent the disclosure of information relating to third parties and/or disclosure to the U.S. government.⁶³ Additionally, abusive practices by unregistered investment companies that were associated with such investments were a concern underlying Congress's amendments to section 12(d)(1) in 1970.⁶⁴ For example, a Commission report stated that unregistered investment companies could seek to redeem large holdings in acquired funds

⁶¹ The Commission has stated that a foreign fund that uses U.S. jurisdictional means in the offering of the securities it issues and that relies on section 3(c)(1) or 3(c)(7) of the Investment Company Act would be a private fund. *See* 2018 FOF Proposing Release, *supra* footnote 6, at n.52 (citing Dechert LLP, Staff No-Action Letter (Aug. 24, 2009) at n.8 (noting that under certain circumstances, a foreign fund may make a private U.S. offer in reliance on the exclusion from the definition of “investment company” in sections 3(c)(1) or 3(c)(7) of the Act, and such a foreign fund is subject to section 12(d)(1) to the same extent as a U.S. 3(c)(1) or 3(c)(7) fund)).

⁶² *See* Recordkeeping and Reporting Requirements for Security-Based Swap Dealers, Major Security-Based Swap Participants, and Broker-Dealers, Exchange Act Release No. 87005 (Sep. 19, 2019) [84 FR 68550 (Dec. 16, 2019)], at 68557.

⁶³ *Id.* Data protection, privacy, confidentiality, bank secrecy, state secrecy, and national security laws frequently create obstacles to cross-border flows of information between regulators and foreign-domiciled registrants. Some of these laws, for example, prohibit foreign-domiciled registrants in certain jurisdictions from responding directly to SEC requests for information and documents or prevent the SEC from being able to conduct any type of examination, either onsite or by correspondence. *See* Statement on the Vital Role of Audit Quality and Regulatory Access to Audit and Other Information Internationally—Discussion of Current Information Access Challenges with Respect to U.S.-listed Companies with Significant Operations in China, SEC Chairman Jay Clayton, SEC Chief Accountant Wes Bricker, and PCAOB Chairman William D. Duhnke III (Dec. 7, 2018) available at <https://www.sec.gov/news/public-statement/statement-vital-role-audit-quality-and-regulatory-access-audit-and-other>.

⁶⁴ *See* 2018 FOF Proposing Release, *supra* footnote 6, at 21, citing *Report of the Securities and Exchange Commission on the Public Policy Implications of Investment Company Growth*, H. Rep. No. 2337, 89th Cong., 2d Sess. (1966) (“PPI Report”) at 318.

due to the instability of certain foreign economies, political upheaval, or currency reform.⁶⁵ The Commission also noted that an unregistered investment company could seek to exert undue influence through the shareholder voting process.⁶⁶ For these reasons, we also do not believe it is appropriate at this time to include foreign funds in the scope of acquiring funds under rule 12d1–4.

B. Exemptions From the Act's Prohibition on Certain Affiliated Transactions

As proposed, rule 12d1–4 will provide an exemption from section 17(a) of the Act.⁶⁷ In addition, the final rule will provide a limited exemption from that section for in-kind transactions for certain affiliated persons of ETFs. Section 17(a) of the Act generally prohibits an affiliated person of a fund, or any affiliated person of such person, from selling any security or other property to, or purchasing any security or other property from, the fund.⁶⁸ It is designed to prevent affiliated persons from managing the fund's assets for their own benefit, rather than for the benefit of the fund's shareholders.⁶⁹

Absent an exemption, section 17(a) would prohibit a fund that holds 5% or more of the acquired fund's securities from making any additional investments in the acquired fund, limiting the

⁶⁵ PPI Report, *supra* footnote 64, at 315.

⁶⁶ *Id.* at 324.

⁶⁷ *See* rule 12d1–4(a); 15 U.S.C. 80a–17(a). With respect to BDCs, the rule provides an exemption from sections 57(a)(1)–(2) and 57(d)(1)–(2) of the Act for arrangements that comply with rule 12d1–4. *See* 15 U.S.C. 80a–56(a)(1)–(2) and 80a–56(d)(1)–(2). The Commission proposed rule 12d1–4(a) to provide an exemption from section 57 for BDCs complying with the rule, but did not specify the relevant subsections in section 57 that are analogous to section 17(a). *See generally* proposed rule 12d1–4(a) (providing an exemption from section 57 of the Act). We did not receive comments on this aspect of the proposal. We are adopting rule 12d1–4(a) with changes to clarify and specify the relevant subsections of section 57.

⁶⁸ An affiliated person of a fund includes: (i) Any person directly or indirectly owning, controlling, or holding with power to vote, 5% or more of the outstanding voting securities of the fund; and (ii) any person 5% or more of whose outstanding voting securities are directly or indirectly owned, controlled, or held with power to vote by the fund. *See* 15 U.S.C. 80a–2(a)(3)(A), (B). Section 17(a) also restricts certain transactions involving funds that are affiliated because both funds have a common investment adviser or other person exercising a controlling influence over the management or policies of the funds. *See* 15 U.S.C. 80a–2(a)(3)(C). The determination of whether a fund is under the control of its advisers, officers, or directors depends on all the relevant facts and circumstances. *See infra* section II.C.1.

⁶⁹ *See* Investment Trusts and Investment Companies: Hearings on S. 3580 Before a Subcomm. of the Senate Comm. On Banking and Currency, 76th Cong., 3rd Sess. 37 (1940) (Statement of Commissioner Healy).

efficacy of rule 12d1–4.⁷⁰ Fund of funds arrangements involving funds that are part of the same group of investment companies or that have the same investment adviser (or affiliated investment advisers) also implicate the Act's protections against affiliated transactions, regardless of whether an acquiring fund exceeds the 5% threshold, though the rule as adopted will not address all of these situations.⁷¹

Section 17(b) of the Act authorizes the Commission to exempt a proposed transaction from the provisions of section 17(a) if the terms of the transaction, including the consideration to be paid or received, are fair and reasonable and do not involve overreaching on the part of any person concerned, and the transaction is consistent with the policy of the investment company as recited in the fund's registration statement and the general purposes of the Act.⁷² We continue to believe, as discussed in the 2018 FOF Proposing Release, that these exemptions from section 17(a) meet the standards set forth in sections 17(b) and 6(c) and the rule's conditions make

unlikely the prospect of overreaching by an affiliated fund. For example, the rule prohibits the acquiring fund and its advisory group from controlling the acquired fund, which is designed to prevent a fund of funds arrangement that involves overreaching.

An acquired fund that is an open-end fund or UIT also is protected from overreaching due to the Act's requirement that all purchasers receive the same price.⁷³ This ensures that the affiliated person pays the same consideration for fund shares as non-affiliated persons, consistent with the standards set out in section 17(b). We believe that this would be true in the context of closed-end funds because the acquired fund's repurchase of its shares would provide little opportunity for the acquiring fund to overreach since all holders would receive the same price.⁷⁴

As a result, we believe that this exemption is necessary and appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.⁷⁵ We also believe that the exemption from section 17(a) is necessary in light of the goals of rule 12d1–4, subject to the conditions set forth in the rule. Existing orders have provided exemptive relief from the affiliated transaction provisions in section 17(a) under similar conditions for many years.⁷⁶

Commenters generally supported the proposed exemptions from section 17(a), agreeing with our view that the utility of the proposed rule would be limited if it did not exempt fund of funds arrangements from the affiliated transaction prohibitions in that section.⁷⁷ These commenters requested, however, that the Commission clarify the availability of the exemption from section 17(a) when an acquired ETF transacts on an in-kind basis with an affiliated acquiring fund. The commenters noted that the 2018 FOF Proposing Release suggests, consistent with fund of funds exemptive orders, that the rule would provide relief for the delivery or deposit of basket assets on an in-kind basis by an affiliated fund (that is, by exchanging certain assets from the ETF's portfolio, rather than in

cash), but the proposed rule text referred only to relief to permit the purchase and sale of fund shares between the acquiring fund and acquired fund.

After considering comments, we are adopting a modified exemption from section 17(a) to clarify the rule provides relief from section 17(a) for in-kind transactions when an acquiring fund is purchasing and redeeming shares of an acquired ETF under certain circumstances. As adopted, the rule will provide exemptions from section 17(a) with regard to the deposit and receipt of baskets by an acquiring fund that is an affiliated person of an ETF (or who is an affiliated person of such a person) solely by reason of holding with the power to vote 5% or more of the ETF's shares or holding with the power to vote 5% or more of any investment company that is an affiliated person of the ETF.⁷⁸ Consistent with exemptive orders regarding ETF applicants, the exemption will not be available where the ETF is in turn an affiliated person of the acquiring fund, or an affiliated person of such person, for a reason other than such power to vote.⁷⁹

We are adopting the rule with this exemption because we agree with commenters that this rule text clarification is appropriate to permit ETFs to engage in in-kind purchase or redemption transactions with certain affiliated acquiring funds on the same basis that they would be permitted to engage in a cash purchase or redemption transactions with such affiliated acquiring fund under the rule.⁸⁰ The provision is similar to rule

⁷⁰ If an acquiring fund holds 5% or more of the outstanding voting shares of an acquired fund, the acquiring fund is an affiliated person of the acquired fund and the acquired fund is an affiliated person of the acquiring fund. In general, to the extent that purchases and sales of acquired fund shares occur on the secondary market and not through principal transactions directly between an acquiring fund and an acquired fund, an exemption from section 17(a) would not be necessary. But, generally, without an exemption from section 17(a), an acquired fund could not sell its shares to, or redeem or repurchase those shares from, an affiliated acquiring fund, and an acquiring fund could not purchase from, redeem, or resell shares from an affiliated acquired fund.

⁷¹ As discussed below, the rule will allow fund of funds arrangements when: (i) The acquiring fund is in the same group of investment companies as the acquired fund; or (ii) the acquiring fund's investment sub-adviser or any person controlling, controlled by, or under common control with such investment sub-adviser acts as the acquired fund's investment adviser. See *infra* section II.C.1. However, as discussed further below, the final rule will not exempt from section 17(a) ETF in-kind creations and redemptions involving certain affiliates.

⁷² Section 6(c) of the Act permits the Commission to exempt any person, security, or transaction or any class or classes of persons, securities or transactions from any provision of the Act if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. See 15 U.S.C. 6(c). The Commission has interpreted its authority under section 17(b) as extending only to a single transaction and not a series of transactions. See *In re Keystone Custodian Funds, Inc.*, 21 SEC. 295 (1945) (exempting, under section 6(c) of the Act, a series of transactions that otherwise would be prohibited by section 17(a)). The Commission's exemptive authority under section 6(c), however, is not constrained to a single transaction. The Commission looks to the standards set forth in section 17(b) when issuing exemptions by rule from section 17(a).

⁷³ See section 22(c) of the Act and 17 CFR 270.22c–1 (rule 22c–1). Primary transactions with an ETF would also be done at a price based on NAV. 2018 FOF Proposing Release, *supra* footnote 6, at n.67.

⁷⁴ See 2018 FOF Proposing Release, *supra* footnote 6, at n.68.

⁷⁵ See *supra* footnote 72.

⁷⁶ See 2018 FOF Proposing Release, *supra* footnote 6, at n.70.

⁷⁷ See, e.g., ICI Comment Letter; Comment Letter of Voya Investment Management LLC (May 2, 2019) (“Voya Comment Letter”).

⁷⁸ Rule 12d1–4(a)(3). “Baskets” for purposes of rule 12d1–4 will have the same meaning as in rule 6c–11(a)(1). See rule 12d1–4(d).

⁷⁹ See, e.g., AQR Trust and AQR Capital Management, LLC, Investment Company Act Release Nos. 33343 (Dec. 21, 2018) [83 FR 67441 (Dec. 28, 2018)] (notice) and 33346 (Jan. 28, 2019) (order) and related application.

⁸⁰ An ETF would be prohibited under section 17(a)(2) from purchasing securities and other property (*i.e.*, securities and other property in the ETF's basket assets) from the affiliated acquiring fund in exchange for ETF shares. An acquiring fund would be prohibited under section 17(a)(1) from selling any securities and other property (*i.e.*, securities and other property in the ETF's basket assets) to an affiliated ETF in exchange for the ETF's shares. The orders we have granted permitting investments in ETFs provide relief from section 17(a) to permit these transactions. See Barclays Global Fund Advisors, *et al.*, Investment Company Act Release Nos. 24394 (Apr. 17, 2000) [65 FR 21215 (Apr. 20, 2000)] (notice) and 24451 (May 12, 2000) (order) and related application. In addition, rule 6c–11 under the Investment Company Act and our ETF exemptive orders provide separate affiliated transaction relief for the acquisition or sale of an ETF's basket assets as part of the creation or redemption of ETF creation units, but that relief would not be sufficient to allow an ETF's in-kind transaction with another fund. See 17

6c–11(b)(3).⁸¹ Purchases and redemptions of ETF creation units are typically effected in kind, and section 17(a) would prohibit these in-kind purchases and redemptions by a fund affiliated with the ETF. We believe that such an exemption is appropriate because all purchases and redemptions of creation units with such an affiliated fund are at an ETF's next-calculated NAV, and an ETF would value the securities deposited or delivered upon redemption in the same manner, using the same standards, as the ETF values those securities for purposes of calculating the ETF's NAV. We do not believe that these transactions will give rise to the policy concerns that section 17(a) is designed to prevent.⁸²

Further, similar to other fund of funds arrangements, without an exemption from section 17(a), the rule would be limited in its utility. In this case, section 17(a) would prohibit the delivery or deposit of basket assets on an in-kind basis by certain affiliated funds (that is, by exchanging certain assets from the ETF's portfolio, rather than in cash). As a result, we also believe that the exemption from section 17(a) regarding this limited exception for ETF in-kind baskets is necessary in light of the goals of rule 12d1–4, subject to the conditions set forth in the rule.

Some commenters also suggested the Commission clarify, or provide exemptive relief from, section 17(a) for other affiliated transactions that are within the statutory limits of section 12(d)(1) or fund of funds arrangements that rely on a statutory exemption.⁸³ A few commenters stated that it would frustrate Congressional intent if the Commission does not extend section 17(a) exemptive relief to these types of fund of funds arrangements.⁸⁴

Section 12 and section 17 address different concerns under the Act. Section 12 addresses concerns regarding “pyramiding,” where investors in the acquiring fund could control the assets of the acquired fund and use those assets to enrich themselves at the expense of acquired fund shareholders

by virtue of their stake in the acquired fund. Section 17(a) addresses self-dealing and other types of overreaching of a fund by its affiliates. Although an arrangement may not raise pyramiding concerns, it may still give rise to self-dealing concerns. As a result, we do not believe it would frustrate congressional intent, as asserted by commenters, for some fund of funds arrangements that are within the limits of, or exempt from section 12(d)(1) to be subject to the prohibitions of section 17(a).

However, we recognize that certain fund of funds arrangements are nearly impossible to utilize absent relief from section 17(a). In the past, we have considered relief to be implied in these circumstances. We believe that it is appropriate to imply relief under sections 12(d)(1)(E) and 12(d)(1)(G) because, without this relief, these statutory provisions would be inoperable.⁸⁵ Transactions permitted by sections 12(d)(1)(E) and 12(d)(1)(G) are typically affiliated transactions prohibited by section 17(a).⁸⁶

We are not issuing an interpretation that there is an implied exemption from section 17(a) for fund of funds arrangements that involve affiliated persons but do not exceed the limits of sections 12(d)(1)(A), (B), or (C), or that meet the statutory exemption in section (F) of the Act. The section 17(a) exemptions provided in this rule are limited in scope to those necessary for a fund of funds structure to operate under the rule and are consistent with

the exemptive relief that we have provided under our exemptive orders. The types of arrangements that are otherwise permissible under section 12(d)(1) could include arrangements where funds are affiliated persons for reasons other than holding 5% or more of the acquired fund's securities. For example, under section 12(d)(1)(A) of the Act, an acquiring fund that acquires only 3% of the total outstanding voting stock of an acquired fund generally would not be an affiliated person by virtue of its holdings.⁸⁷ Expanding section 17(a) relief to all transactions that are permitted by section 12(d)(1), without the transaction being subject to protections addressing the relevant concerns underlying section 17(a), raises issues that would require a careful consideration of whether additional conditions are necessary to sufficiently address any risks posed by these transactions.

Also, unlike transactions permitted by sections 12(d)(1)(E) and 12(d)(1)(G), transactions under these other provisions are possible without an implied exemption from section 17(a). We have historically considered whether an exemption from section 17(a) is appropriate (and subject to appropriately protective conditions) separately. Thus, while we are not providing the requested interpretation, affiliated arrangements within the statutory limits of section 12(d)(1) or that rely on section 12(d)(1)(F) may continue to apply separately for an exemptive order pursuant to section 17(b).⁸⁸ In addition, funds that comply with the conditions in rule 12d1–4 may rely upon the rule's exemption from section 17(a) even if they are not relying upon it for an exemption from section 12(d)(1).

Two commenters requested that we provide an exemption from section 17(d) and rule 17d–1 for affiliated arrangements that rely upon rule 12d1–4, or otherwise comply with section 12(d).⁸⁹ We decline to do so. Section

⁸⁵ See, e.g., 2018 FOF Proposing Release, *supra* footnote 6, at n.70.

⁸⁶ See, e.g., Section 12(d)(1)(E)(ii) (limiting the exception to situations where the acquiring fund only owns the acquired fund) and section 12(d)(1)(G)(i)(I) (limiting the exception to situations where the two funds are part of the same group of investment companies). For fund of funds arrangements relying on section 12(d)(1)(E), Commission staff has taken the position that application of section 17(a) of the Act to a registered feeder fund's cash redemption from a registered master fund would not be consistent with the basic relationship that section 12(d)(1)(E) is intended to permit. See Signature Financial Group, Inc., SEC Staff No-Action Letter (Dec. 28, 1999) (“Signature Financial No-Action Letter”). Section 12(d)(1)(G) of the Act codified certain exemptive orders that the Commission had issued permitting funds to purchase other funds in the same group of funds beyond the limits in section 12(d)(1). The Commission issued those orders generally to funds of funds where the acquiring and acquired funds were related because they shared a common investment adviser or the advisers were affiliated persons within the meaning of section 2(a)(3)(C) of the Act. Those orders provided relief from section 17(a) of the Act. See, e.g., T. Rowe Price Spectrum Fund, Inc., Investment Company Act Release Nos. 21371 (Sept. 22, 1995) [60 FR 50654 (Sept. 22, 1995)] (notice) and 21425 (Oct. 18, 1995) (order) (“T. Rowe Spectrum Order”); Vanguard Star Fund, Investment Company Act Release Nos. 21372 (Sept. 22, 1995) (notice) and 21426 (Oct. 18, 1995) (order); see also MassMutual Institutional Funds, SEC Staff No-Action Letter (Oct. 19, 1998).

⁸⁷ An acquiring fund's percentage of outstanding shares of the acquired fund owned could increase without further acquisition, such as when there is a decrease in the outstanding securities of the acquired fund, resulting in the acquiring fund exceeding the 5% threshold.

⁸⁸ For example, some arrangements investing in both affiliated and unaffiliated underlying funds in amounts not exceeding the limits in section 12(d)(1)(F) have received an exemption from section 17(a) for investments in affiliated funds. See, e.g., Hennen & Walsh, Inc., *et al.*, Investment Company Act Release Nos. 26207 (Oct. 14, 2003) [68 FR 59954 (Oct. 20, 2003)] (notice) and 26251 (Nov. 10, 2003) (order).

⁸⁹ See SIFMA AMG Comment Letter; PIMCO Comment Letter. Section 17(d) of the Act makes it unlawful for first- and second-tier affiliates of a fund, the fund's principal underwriters, and

CFR 270.6c–11; 2019 ETF Adopting Release, *supra* footnote 25.

⁸¹ Rule 6c–11(b)(3). See *supra* footnote 73 and accompanying text. See also 2019 ETF Adopting Release, *supra* footnote 25 at section II.B.3.

⁸² See also 2019 ETF Adopting Release, *supra* footnote 25, at nn.130–134 and accompanying text.

⁸³ See Voya Comment Letter; ICI Comment Letter; PIMCO Comment Letter; SIFMA AMG Comment Letter. Some commenters focused on suggesting relief from sections 12(d)(1)(A) and 12(d)(1)(F). See ICI Comment Letter. Other commenters stated relief should include sections 12(d)(1)(A), (B), (C), (E), (F), and (G). See SIFMA AMG Comment Letter; PIMCO Comment Letter.

⁸⁴ See SIFMA AMG Comment Letter; PIMCO Comment Letter; ICI Comment Letter.

17(d) and rule 17d-1 prohibit first- and second-tier affiliates of a fund, the fund's principal underwriters, and affiliated persons of the fund's principal underwriters, acting as principal, from effecting any transaction in which the fund or a company controlled by the fund is a joint or a joint and several participant.⁹⁰ They are designed to prevent these persons from managing the fund for their own benefit, rather than for the benefit of the fund's shareholders. Unlike section 17(a) relief, our fund of funds orders do not currently include exemptions from section 17(d) and rule 17d-1.⁹¹ Further, given the fact-specific nature of many

rule 17d-1 applications, and the fact that we do not normally provide such relief as part of our fund of funds exemptive orders, we believe it is appropriate to address requests for relief from section 17(d) and rule 17d-1 separately from rule 12d1-4. Fund of funds arrangements within the statutory limits of section 12(d)(1) may apply separately for relief through an application for an order under rule 17d-1 under the Act.

C. Conditions

Consistent with the public interest and the protection of investors, rule 12d1-4 includes conditions designed to

prevent the abuses that historically were associated with fund of funds arrangements and that led Congress to enact section 12(d)(1). These conditions are based on the conditions in prior fund of funds exemptive orders⁹² and commenters' suggestions. The rule establishes a framework that will subject fund of funds arrangements to a tailored set of conditions that address differences in fund structures.⁹³ The following table sets forth a general overview of the differences among the conditions under our current exemptive relief, proposed rule 12d1-4, and the final rule:

Concern addressed	Condition under existing exemptive orders	Proposed rule condition	Final rule condition
Undue Influence	<p>Voting conditions (including the point at which the voting condition is triggered) differ based on the type of acquired fund. Once an acquiring fund (and any other funds within the advisory group) holds more than 3% of the acquired closed-end fund's outstanding voting securities, the acquiring fund must vote shares of acquired closed-end funds in the manner required by section 12(d)(1)(E) (<i>i.e.</i>, either pass-through or mirror voting), while non-fund entities within the advisory group must use mirror voting.</p> <p>For acquired open-end funds or UITs, an acquiring fund (and its advisory group) must vote their shares using mirror voting only if the acquiring fund and its advisory group become holders of more than 25% of the acquired fund's outstanding voting securities due to a decrease in the outstanding securities of the acquired fund.</p> <p>Fund boards must make certain findings and adopt procedures to prevent overreaching and undue influence by the acquiring fund and its affiliates.</p> <p>Requires an agreement between acquiring and acquired funds agreeing to fulfill their responsibilities under the exemptive order (a "participation agreement").</p>	<p>Voting conditions do not differ based on the type of acquired fund and would require an acquiring fund and its advisory group to use pass-through or mirror voting when they hold more than 3% of the acquired fund's outstanding voting securities.</p> <p>An acquiring fund's ability to quickly redeem or tender a large volume of acquired fund shares is restricted (replacing the requirements for participation agreements and board findings/procedures).</p>	<p>Voting conditions (including the point at which the voting condition is triggered) differ based on the type of acquired fund. Voting conditions will require an acquiring fund and its advisory group to use mirror voting when they hold more than: (i) 25% of the outstanding voting securities of an open-end fund or UIT due to a decrease in the outstanding securities of the acquired fund; or (ii) 10% of the outstanding voting securities of a closed-end fund. In circumstances where acquiring funds are the only shareholders of an acquired fund, however, pass-through voting may be used.</p> <p>Requires a fund of funds investment agreement between acquiring and acquired funds unless they have the same investment adviser that includes any material terms necessary for each adviser to make the appropriate finding under the rule, a termination provision, and a requirement that the acquired fund provide fee and expense information to the acquiring fund.</p>
Complex Structures	<p>Limits the ability of an acquired fund to invest in underlying funds (that is, it limits structures with three or more tiers of funds), subject to certain enumerated exceptions.</p>	<p>Limits the ability of funds relying on certain exemptions to invest in an acquiring fund and limits the ability of an acquired fund to invest in other funds, subject to certain enumerated exceptions.</p> <p>Requires an evaluation of the complexity of the fund of funds structure and aggregate fees. Specific considerations vary by acquiring fund structure.</p>	<p>Adviser(s) of acquiring and acquired funds that are management companies must make certain findings regarding the fund of funds structure.</p> <p>The principal underwriter or depositor of a UIT must analyze the fund of funds structure and determine that the arrangement does not result in duplicative fees.</p> <p>Allows an acquired fund to invest up to an additional 10% of its assets in other funds.</p>

affiliated persons of the fund's principal underwriters, acting as principal, to effect any transaction in which the fund or a company controlled by the fund is a joint or a joint and several participant in contravention of such rules and regulations as the Commission may prescribe for the purpose of limiting or preventing participation by such registered or controlled company on a basis different from or less advantageous than that of such other participant. See 15 U.S.C. 80a-17(d). Rule 17d-1(a) prohibits first- and second-tier affiliates of a fund, the fund's

principal underwriter, and affiliated persons of the fund's principal underwriter, acting as principal, from participating in or effecting any transaction in connection with any joint enterprise or other joint arrangement or profit-sharing plan in which any such fund or company controlled by a fund is a participant "unless an application regarding such joint enterprise, arrangement or profit-sharing plan has been filed with the Commission and has been granted."

⁹⁰ First-tier affiliates are investment companies and their affiliated persons. Second-tier affiliates are affiliated persons of their affiliated persons.

⁹¹ In the past, some fund of funds exemptive orders included relief from section 17(d) and rule 17d-1 for certain service arrangements. See, e.g., T. Rowe Spectrum Order, *supra* footnote 86.

⁹² Schwab, *supra* footnote 23; Innovator ETFs, *supra* footnote 32.

⁹³ For example, the conditions regarding layering of fees vary based on the structure of acquiring fund. See *infra* section II.C.2.b.i.

Concern addressed	Condition under existing exemptive orders	Proposed rule condition	Final rule condition
Layering of Fees	Caps sales charges and service fees at limits under current FINRA sales rule (rule 2341) even in circumstances where the rule would not otherwise apply. Requires an acquiring fund's adviser to waive advisory fees in certain circumstances or requires the acquiring fund's board to make certain findings regarding advisory fees.	Requires an evaluation of the complexity of the fund of funds structure and aggregate fees. For management companies, the adviser must determine that it is in the best interest for the acquiring fund to invest.	Generally the same as proposed, but the investment adviser to an acquiring management company must find that the aggregate fees and expenses are not duplicative.

The conditions in rule 12d1–4 as adopted are substantially similar to the conditions that have been included in our exemptive orders since 1999.⁹⁴ We discuss each of the conditions below.

1. Control and Voting

a. Control

In order to address concerns that a fund could exert undue influence over another fund, as proposed, rule 12d1–4 will prohibit an acquiring fund and its advisory group from controlling, individually or in the aggregate, an acquired fund, except in the circumstances discussed below.⁹⁵ This condition generally comports with the conditions of the exemptive relief the Commission has previously issued.⁹⁶

The Act defines control to mean the power to exercise a controlling influence over the management or policies of a company, unless such power is solely the result of an official position with such company.⁹⁷ The Act also creates a rebuttable presumption that any person who, directly or indirectly, beneficially owns more than 25% of the voting securities of a company controls the company and that any person who does not own that amount does not control it.⁹⁸ A determination of control is not based solely on ownership of voting securities of a company and depends on the facts and circumstances of the particular situation.⁹⁹ We have long held that

“controlling influence” includes, in addition to voting power, a dominating persuasiveness of one or more persons, the act or process that is effective in checking or directing action or exercising restraint or preventing free action, and the latent existence of power to exert a controlling influence.¹⁰⁰

We proposed that an acquiring fund and its advisory group could not control (individually or in the aggregate) an acquired fund. Accordingly, an acquiring fund and its advisory group's beneficial ownership of up to 25% of the voting securities of an acquired fund would be presumed not to constitute control over the acquired fund. The acquiring fund, therefore, generally could make a substantial investment in an acquired fund (*i.e.*, up to 25% of the acquired fund's shares). If, however, facts and circumstances gave an acquiring fund and its advisory group the power to exercise a controlling influence over the acquired fund's management or policies (other than as discussed below), the acquiring fund and other funds in its advisory group would not be able to rely on the rule even if the fund and its advisory group owned 25% or less of the acquired fund's voting securities.

Commenters generally supported using the concept of “control” as defined under the Act to guard against potential coercive behavior by an acquiring fund, and agreed that this condition is consistent with the conditions of existing exemptive relief.¹⁰¹ One commenter stated that the proposed control provision protects acquired funds from undue influence concerns without disrupting investment strategies or creating difficult compliance requirements.¹⁰² We also received more particularized comments relating to control of closed-end funds, as discussed below.

Reflecting these comments, rule 12d1–4 will prohibit an acquiring fund and its advisory group from acquiring, and therefore exercising, control over an acquired fund as proposed.¹⁰³ We believe this condition will limit a fund's ability to exert undue influence over another fund.¹⁰⁴ As discussed in more detail below, we addressed commenters' concerns regarding undue influence of acquired closed-end funds by imposing a lower ownership threshold that triggers the rule's voting conditions for such funds, and by requiring mirror voting when an acquiring fund exceeds the threshold.

i. Advisory Group Definition

The rule will require an acquiring fund to aggregate its investment in an acquired fund with the investment of the acquiring fund's advisory group to assess control as proposed.¹⁰⁵ This aggregation requirement is consistent with past exemptive orders and is designed to prevent a fund or adviser from circumventing the control condition by investing in an acquired fund through multiple controlled

¹⁰³ Like the limits under section 12(d)(1) of the Act, rule 12d1–4's control limitation is an acquisition test. In some circumstances, an acquiring fund's holdings may trigger the Act's control presumption through no action of its own. For example, if the acquiring fund and its advisory group become a holder of more than 25% of the outstanding voting securities of an acquired fund as a result of net redemptions and a decrease in the outstanding voting securities of the acquired fund, the rule does not require the acquiring fund to dispose of acquired fund shares. However, the acquiring fund and other entities within its advisory group may not rely on the rule to acquire additional securities of the acquired fund when the acquiring fund and other entities within its advisory group, in the aggregate, hold more than 25% of the acquired fund's voting securities.

¹⁰⁴ If an acquiring fund has a controlling influence over an acquired fund's management or policies, the acquiring fund would not be able to rely on the proposed rule even if the fund and its advisory group owned 25% or less of the acquired fund's voting securities.

¹⁰⁵ See rule 12d1–4(d) defining “advisory group” to mean either: (1) An acquiring fund's investment adviser or depositor, and any person controlling, controlled by, or under common control with such investment adviser or depositor; or (2) an acquiring fund's investment sub-adviser and any person controlling, controlled by, or under common control with such investment sub-adviser. Under the rule, an acquiring fund would not combine the entities listed in clause (1) with those in clause (2).

⁹⁴ See, e.g., Schwab, *supra* footnote 23.

⁹⁵ See rule 12d1–4(b)(1)(i); rule 12d1–4(d) (defining “advisory group”). See also *infra* section II.C.1.b.iii. (discussing exceptions to the control condition).

⁹⁶ See, e.g., Wells Fargo Funds Trust, *et al.*, Investment Company Act Release Nos. 30201 (Sept. 12, 2012) [77 FR 57597 (Sept. 18, 2012)] (notice) and 30231 (Oct. 10, 2012) (order) and related application (prohibiting an acquiring fund (and its advisory group and sub-advisory group) from controlling an acquired fund).

⁹⁷ 15 U.S.C. 80a–2(a)(9).

⁹⁸ *Id.* These presumptions continue until the Commission makes a final determination to the contrary by order either on its own motion or on application by an interested person.

⁹⁹ “[N]o person may rely on the presumption that less than 25% ownership is not control when, in fact, a control relationship exists under all the facts and circumstances.” Exemption of Transactions by Investment Companies with Certain Affiliated Persons, Investment Company Act Release No.

10698 (May 16, 1979) [44 FR 29908 (May 23, 1979)], at n.2.

¹⁰⁰ See 2018 FOF Proposing Release, *supra* footnote 6, at 32–33, nn.81–82 (discussing facts and circumstances that may constitute controlling influence).

¹⁰² Invesco Comment Letter.

entities, *e.g.*, other funds in the fund complex.

Commenters recommended that the Commission alter its definition of “advisory group” or revisit the requirement to aggregate affiliated entities for purposes of determining control.¹⁰⁶ For example, several commenters suggested that we adopt a narrower definition of “advisory group,” stating that an acquiring fund’s investment adviser or depositor may not direct the investments of the affiliates that fall within the proposed definition of “advisory group,” and in fact could be unaware of investments by such affiliates.¹⁰⁷ One of these commenters stated that this definition of advisory group could be particularly problematic for large financial services organizations that have many affiliates under common control, but that operate independently.¹⁰⁸ Some commenters recommended that the aggregation requirement exclude affiliates that are not subject to actual control by the investment adviser or exclude certain control affiliates where there are information barriers or other limits.¹⁰⁹ One commenter stated that section 12(d)(1)(A) of the Act does not require an investment adviser to aggregate holdings across its private funds for purposes of determining control and suggested that rule 12d1–4 follow a similar approach.¹¹⁰ This commenter suggested that the Commission instead prevent an acquiring fund from seeking to exert control over an acquired fund by including a general provision in the rule prohibiting an entity from doing anything indirectly which, if done directly, would violate the rule.

On the other hand, some commenters suggested that the Commission should adopt a broader definition of advisory

group than proposed.¹¹¹ Specifically, these commenters recommended that the Commission expand the aggregation requirement to include all accounts managed by the acquiring fund’s adviser, subadviser or their respective affiliates.

Upon considering the comments received, we continue to believe requiring an acquiring fund to aggregate its holdings with its advisory group will help prevent a fund or adviser from circumventing the control condition. Because the control condition effectively allows an acquiring fund and its advisory group to obtain a significant ownership stake in an acquired fund by investing through multiple related entities, we believe it is appropriate to subject all of the affiliates in an advisory group to this condition. Our exemptive orders include a similar condition, and funds relying on those orders likely already have established policies and procedures to monitor compliance with the aggregation requirement embedded in the definition of the term “advisory group.”¹¹²

We acknowledge that the definition of “advisory group” may capture many affiliates of an acquiring fund and its investment adviser in a complex financial services firm, and will result in monitoring and compliance burdens that are greater than if the definition only looked to the holdings of an acquiring fund and its adviser. To the extent that a particular advisory group has not already established policies and procedures pursuant to an exemptive order, we also acknowledge that the advisory group may need to restructure information barriers to permit entities within the advisory group to share the necessary information to comply with the rule. However, other provisions of the Act and our rules also extend to affiliated persons of an investment adviser.¹¹³ These provisions apply to affiliated persons, regardless of the complexity that may arise because of the way in which a financial services firm has determined to structure itself. Funds (and their advisers) have experience developing compliance policies and

procedures in those circumstances.¹¹⁴ We believe that requiring the entities that fall within this definition to aggregate their holdings in an acquired fund for purposes of the control condition will more effectively address the risk of undue influence over an acquired fund.

The breadth of entities that are included within an advisory group will reduce the risk that an acquiring fund and its advisory group will exert undue influence over an acquired fund by accumulating a controlling ownership position across the advisory group’s accounts. We believe that the condition’s definition of advisory group strikes an appropriate balance between the flexibility for efficient market activity and protection of acquired funds and their shareholders.

Additionally, we continue to believe that the advisory group definition should not encompass funds managed by unaffiliated sub-advisers. Absent common control, there is little risk that an advisory group and sub-advisory group would coordinate to exert undue influence on an acquired fund.¹¹⁵ Consistent with past exemptive orders, therefore, rule 12d1–4 will not require an acquiring fund to aggregate the ownership of an acquiring fund advisory group with an acquiring fund sub-advisory group. Instead, each of these groups will consider its ownership percentage separately and will be subject to the voting provisions as discussed below.¹¹⁶

ii. Closed-End Funds

Rule 12d1–4 will include voting requirements specific to acquired closed-end funds in response to concerns raised by commenters with respect to undue influence over closed-end funds.¹¹⁷ The proposed rule included voting requirements, as described in section II.C.1.b below, and would have required that an acquiring

¹⁰⁶ See, *e.g.*, ICI Comment Letter; BlackRock Comment Letter. Another commenter generally supported a requirement that funds advised by the same adviser cannot in the aggregate hold in excess of 3% of the outstanding voting securities of a given acquired fund. Comment Letter of General American Investors Company, Inc. (May 2, 2019).

¹¹² See, *e.g.*, Symmetry Panoramic Trust and Symmetry Partners, LLC, Investment Company Act Release Nos. 33317 (Dec. 6, 2018) [83 FR 63918 (Dec. 12, 2018)] (notice) and 33364 (Feb. 1, 2019) (order) and related application.

¹¹³ See, *e.g.*, section 17(a) of the Act (prohibiting first- and second-tier affiliates of a fund from borrowing money or other property, or selling or buying securities or other property to or from the fund, or any company that the fund controls). See also *supra* footnote 68 and accompanying text.

¹¹⁴ See 17 CFR 270.38a–1 (rule 38a–1 under the Act) (requiring registered investment companies to adopt, implement and periodically review written policies and procedures reasonably designed to prevent violations of the federal securities laws). See also Compliance Rule Adopting Release, *supra* footnote 59 (noting that funds or their advisers should have policies and procedures in place to identify affiliated persons and to prevent unlawful transactions with them).

¹¹⁵ However, if the sub-adviser or any person controlling, controlled by, or under common control with such investment sub-adviser acts as an acquired fund’s investment adviser or depositor, then the sub-advisory group and advisory group will be required to aggregate their ownership for purposes of determining control pursuant to rule 12d1–4(b)(1)(i).

¹¹⁶ See rule 12d1–4(b)(1)(ii).

¹¹⁷ These voting conditions will also apply to voting of shares of acquired BDCs. See rule 12d1–4(b)(1)(ii).

fund and its advisory group not control (individually or in the aggregate) any acquired fund, whether open-end or closed-end.¹¹⁸ As discussed above, the rule 12d1–4 control prohibition also applies if facts and circumstances exist that give an acquiring fund and its advisory group the power to exercise a controlling influence over an acquired closed-end fund's management or policies, even if the acquiring fund and its advisory group owned 25% or less of the acquired closed-end fund's voting securities.¹¹⁹

In the 2018 FOF Proposing Release, we requested comment on whether the rule's control and voting requirements should vary depending on the type of acquired fund, including whether there should be a lower or higher threshold for closed-end funds, and whether the threshold should differ for listed and unlisted closed-end funds.¹²⁰ As adopted, the rule does not impose a lower investment limit on investments in a closed-end fund by an acquiring fund and its advisory group; however, the rule will impose a mirror-voting requirement at a lower ownership threshold than the voting requirements applicable to open-end funds and UITs. Specifically, the rule will require mirror voting if an acquiring fund and its advisory group hold more than 10% of the voting securities of a closed-end fund. This voting requirement is designed to protect an acquired closed-end fund from undue influence through the shareholder vote mechanism. In addition, the rule will require an acquiring fund to enter into a fund of funds investment agreement with an acquired fund prior to exceeding the investment limits set forth in section 12(d)(1). Together, these provisions are designed to protect acquired closed-end funds from undue influence by acquiring funds and their advisory groups.

Several commenters recommended alternatives to the proposed control condition for fund of funds arrangements with acquired closed-end funds. For example, commenters recommended that, instead of relying on the concept of "control" for acquired closed-end funds, rule 12d1–4 should limit the aggregate ownership by an acquiring fund and its advisory group to

10% of an acquired closed-end fund's voting securities in order to protect these funds from undue influence.¹²¹ One commenter stated that an acquiring fund that holds approximately 15% of an acquired closed-end fund could dictate certain actions of the acquired closed-end fund.¹²² The commenter also recommended expanding the definition of advisory group and requiring an acquiring fund (and the expanded advisory group) to reduce its holdings in an acquired fund to less than 25% within a defined period of time in order to discourage activist investors from increasing their holdings in target funds just prior to effectiveness of the rule.¹²³

Two commenters encouraged the Commission to allow acquired funds and their boards, at their option, to set their own limit for an acquiring fund's investments.¹²⁴ These commenters suggested that an agreement between an acquiring and acquired fund (similar to a participation agreement under current fund of funds exemptive relief) could allow the acquired fund and its board to evaluate the effects of the acquiring fund's investment, including any risks of undue influence, and set an appropriate limit.¹²⁵ Similarly, commenters suggested that the rule should provide acquired funds with the ability to grant consent to potential investments by acquiring funds, effectively permitting acquired funds to screen their investors and refuse investments by acquiring funds based on undue influence concerns.¹²⁶

¹²¹ Advent Comment Letter; Comment Letter of TPG Specialty Lending, Inc. (May 2, 2019) ("TPG Comment Letter.").

¹²² Advent Comment Letter (stating that holdings below the 25% level result in the type of undue influence the Commission is seeking to prevent, such as a large holder being able to dictate various events including the initiation of a proxy contest). See also PIMCO Comment Letter (recommending that, if private funds and foreign funds are permitted to rely on the rule, such funds must act within the limits of section 12(d)(1)(C) as if they were registered funds); Skadden Comment Letter; ICI Comment Letter. Section 12(d)(1)(C) prohibits funds (together with companies or funds they control and funds that have the same adviser) from acquiring more than 10% of the outstanding voting stock of a closed-end fund. 15 U.S.C. 80a–12(d)(1)(C).

¹²³ Advent Comment Letter.

¹²⁴ Dimensional Comment Letter (noting that a higher discretionary investment limit might be beneficial for a newly formed or smaller fund that seeks large investments by acquiring funds in order to achieve economies of scale); Advent Comment Letter (explaining that an acquired fund might use a participation agreement to permit an acquiring fund to purchase more than 10% of its voting securities, and the participation agreement can require passive investment).

¹²⁵ Dimensional Comment Letter, Advent Comment Letter.

¹²⁶ ABA Comment Letter; AIC Comment Letter; Dimensional Comment Letter (explaining that the participation agreement requirement of existing

Other commenters suggested the Commission adopt a passive investor certification and reporting regime similar to that under Section 13 of the Securities Exchange Act of 1934 and Schedules 13D and 13G to protect acquired closed-end funds against undue influence.¹²⁷ Under such a regime, an acquiring fund would certify to the Commission, or would only be able to operate in accordance with rule 12d1–4, if it holds the acquired fund's securities in the ordinary course of business and not for the purpose of or with the effect of changing or influencing the management or policies of the acquired fund. Commenters representing closed-end funds or their investors also recommended that, if rule 12d1–4 were to permit private funds to acquire closed-end funds, it should incorporate additional protections specific to closed-end funds.¹²⁸

Rule 12d1–4, as adopted, will prohibit an acquiring fund and its advisory group from exercising control over an acquired closed-end fund and will impose a mirror-voting requirement if an acquiring fund and its advisory group hold more than 10% of the voting securities of a closed-end fund.¹²⁹ We believe these conditions will more effectively address undue influence concerns regarding acquired closed-end funds than a reporting or certification requirement on acquiring funds, and they will avoid potential duplicative reporting requirements on certain acquiring funds.¹³⁰

As an additional protective condition, discussed below in section II.C.2, the rule will require an acquiring fund and an acquired closed-end fund that do not share an investment adviser to enter into a fund of funds investment agreement prior to the acquiring fund exceeding the investment limits of section 12(d)(1)(A). This agreement will

exemptive relief has been helpful for a potential acquired fund to refuse large investments by an acquiring fund that may present a risk of undue influence, and recommending the preservation of such a control).

¹²⁹ See rule 12d1–4(b)(1). This voting requirement applies at a 10% ownership threshold, while the Act creates a rebuttable presumption that any person who directly or indirectly beneficially owns more than 25% of the voting securities of a company controls the company.

¹³⁰ See, e.g., Part C of Form N–PORT (requiring monthly disclosure of certain registered management investment companies' portfolio holdings, including disclosure of investments in other investment companies).

¹¹⁸ Proposed rule 12d1–4(b)(1).

¹¹⁹ See 2018 FOF Proposing Release, *supra* footnote 6, at 32–33.

¹²⁰ *Id.* at 45. We requested comment on whether the proposed control and voting conditions sufficiently protect acquired funds, and whether there may be other conditions that would address the potential for undue influence by an acquiring fund and its controlling persons, including a lower limit on investments by an acquiring fund and its advisory group in an acquired fund. *Id.* at 43.

enable an acquired closed-end fund to screen potential acquiring fund investors and set conditions on investments in the acquired fund, if desired. The agreement also will allow an acquired closed-end fund to terminate the agreement with an acquiring fund without penalty, which would then prohibit the acquiring fund from making additional purchases of the acquired fund beyond the section 12(d)(1)(A) limits.

Rule 12d1–4 also includes voting requirements specific to closed-end funds that preserve voting discretion for investment advisers below a specified threshold of ownership, while seeking to avoid amplifying the voting power of any particular investor.¹³¹ These voting requirements are described in the section below. Finally, because private funds will not be permitted to rely on the rule as acquiring funds, we are not adopting any specific conditions associated with private fund investments in closed-end funds under rule 12d1–4.

In addition to comments on closed-end fund issues under the rule, several commenters raised general concerns about private fund investments in closed-end funds that are outside the scope of rule 12d1–4.¹³² These commenters stated that there have been instances in which an investment adviser to several private funds (each with less than 3% of the outstanding voting shares of a closed-end fund) acquired a significant aggregate interest in an acquired closed-end fund and sought to unduly influence the fund to the detriment of long-term shareholders through proxy contests or other means.¹³³ The commenters recommended various ways to address these private fund investments in closed-end funds under section 12(d)(1).

For example, these commenters recommended that the Commission: (i) Recommend legislation to deem any private fund an “investment company” for purposes of section 12(d)(1)(C) of the Act;¹³⁴ (ii) extend the 3% limit of section 12(d)(1)(A)(i) to any separate accounts for which an advisory group has sole or shared voting or disposition authority;¹³⁵ (iii) deem ownership of more than 3% of a registered fund by a private fund advisory group to be a violation of section 12(d)(1)(A)(i) pursuant to section 48(a) of the Act;¹³⁶ or (iv) treat affiliated private funds that “are not materially different in investment operations or investment policies” as a single fund for purposes of section 12(d)(1).¹³⁷

On the other hand, some commenters opposed restrictions on private fund investments in closed-end funds under section 12(d)(1).¹³⁸ These commenters stated that private funds invest in closed-end funds in accordance with the relevant provisions of the Act. In addition, one commenter stated that Congress did not impose more restrictive limits on the ability of private funds to acquire equity stakes in regulated funds when it amended the Act to subject private funds to the restrictions of sections 12(d)(1)(A)(i) and 12(d)(1)(B)(i).¹³⁹

After considering comments, we believe commenters’ additional recommendations with respect to investments in closed-end funds that are within the statutory limitations of section 12(d)(1) are beyond the scope of this rulemaking.¹⁴⁰

b. Voting Provisions

The final rule will require an acquiring fund and its advisory group to

vote their shares of an acquired fund: (i) Using mirror voting if the acquiring fund and its advisory group (in the aggregate) hold more than 25% of the outstanding voting securities of an acquired open-end fund or UIT due to a decrease in the outstanding securities of the acquired fund;¹⁴¹ and (ii) using mirror voting if the acquiring fund and its advisory group (in the aggregate) hold more than 10% of the outstanding voting securities of an acquired closed-end fund or BDC.¹⁴² Similar to our exemptive orders, the final rule’s voting conditions will differ based on the type of acquired fund.

Proposed rule 12d1–4 would have required an acquiring fund and its advisory group to vote their securities in the manner prescribed by section 12(d)(1)(E)(iii)(aa) of the Act if the acquiring fund and its advisory group (in the aggregate) hold more than 3% of the outstanding voting securities of an acquired fund.¹⁴³ The proposed rule would have applied a uniform condition across all types of acquired funds to simplify and streamline the requirement. Commenters generally supported the proposed voting conditions, stating that they protect acquired funds without disrupting current investment strategies or creating new or difficult compliance requirements.¹⁴⁴ As discussed in more detail below, however, some commenters suggested modifications to the ownership threshold that would trigger the voting condition or the required manner of voting, based on the type of acquired fund.¹⁴⁵

We believe that the voting conditions of the final rule, which we modified to respond to the concerns expressed in these comments, will help to facilitate compliance monitoring and are better

tailored to address the potential for undue influence through voting power based on the types of acquired fund.

i. Ownership Threshold

The final rule will impose voting conditions if an acquiring fund and its advisory group hold more than 25% of the voting securities of an acquired open-end fund or UIT due to a decrease in the outstanding voting securities of the acquired fund.¹⁴⁶ For acquired BDCs and other closed-end funds, the rule will impose voting conditions at a 10% ownership threshold. The proposed rule included a 3% ownership threshold that would trigger the rule's voting conditions, and we requested comment on whether that ownership threshold should be higher or lower, and whether it should differ depending on the type of acquired fund.¹⁴⁷

A number of commenters recommended raising the 3% ownership threshold that would trigger the voting conditions in the proposed rule, stating that a 3% threshold would substantially increase the administrative burden on an advisory group to monitor and vote shares.¹⁴⁸ For example, some commenters recommended the rule raise the ownership threshold from the proposed 3% to 10% to better reflect an ownership level at which an acquiring fund would be able to influence a shareholder vote.¹⁴⁹ One commenter argued that the rule should allow acquiring funds to hold larger positions in closed-end funds without forfeiting the right to exercise their independent judgment regarding shareholder proposals to ameliorate certain unintended consequences associated with a lower threshold.¹⁵⁰

Several commenters recommended that the rule adopt the voting triggers set forth in exemptive orders.¹⁵¹ These commenters stated that current exemptive orders only impose voting requirements when a fund and its advisory group hold, in aggregate, more than 25% of the outstanding voting securities of an acquired open-end fund or UIT. They also noted that open-end funds and UITs may not be particularly susceptible to influence by shareholder votes because they do not hold routine shareholder meetings. Accordingly, these commenters stated that there was little practical or policy justification to impose voting requirements at a 3% ownership threshold on shares of acquired open-end funds and UITs.¹⁵² In contrast, these commenters stated that closed-end funds may be required to hold annual shareholder meetings and can be the target of proxy contests, which may make such funds more susceptible to influence by shareholder vote. Commenters addressing the closed-end fund market segment generally recommended that the Commission adopt a lower voting threshold for acquiring funds' holdings in closed-end funds than the threshold for acquiring funds' holdings in open-end funds and UITs.¹⁵³

After considering the comments received, we believe that it is appropriate that the final rule include voting requirements for investments in open-end funds and UITs that are consistent with the voting requirements imposed by prior exemptive orders in this area. We are persuaded that the 25% ownership threshold is appropriate for open-end funds and UITs given that these funds hold shareholder meetings infrequently, and because commenters did not raise concerns about undue influence of these funds through shareholder voting. The rule's voting conditions therefore will apply to the same scope of entities in an acquiring fund's advisory group as the voting conditions in our existing fund of funds exemptive orders. A 25% ownership threshold will also minimize the administrative burden associated with the voting requirement for these funds.¹⁵⁴ Accordingly, the final rule

will require mirror voting if an acquiring fund and its advisory group hold more than 25% of the voting securities of an open-end fund or UIT. We expect an acquiring fund would only exceed 25% of the securities of an open-end fund or UIT due to a decrease in the outstanding voting securities of the acquired fund because the rule prohibits an acquiring fund from controlling an acquired fund and because of the rebuttable presumption regarding control under the Act.¹⁵⁵

However, the rule will impose a 10% ownership threshold on acquired closed-end funds. We believe a 10% ownership threshold (an increase from the proposed 3% threshold) will permit an acquiring fund and its advisory group to gain substantial exposure to such funds with full voting discretion, but will reduce undue influence concerns associated with shareholder votes, which are greater for acquired closed-end funds than for other types of acquired funds given the more frequent shareholder meetings.¹⁵⁶ We are concerned that a higher threshold for acquiring fund investments in closed-end funds, such as 15% or 25%, could give an acquiring fund's advisory group the ability to dictate certain fund actions and unduly influence the acquired closed-end fund.

ii. Mirror Voting

The final rule will require mirror voting if an acquiring fund and its advisory group hold more than (i) 25% of the outstanding voting securities of an open-end fund or UIT due to a decrease in the outstanding voting securities of the acquired fund or (ii)

engage in mirror voting when appropriate or required. *See, e.g.,* Invesco Comment Letter; SIFMA AMG Comment Letter. To the extent that an advisory group utilizes information barriers and determines to rely on this rule, the advisory group may need to update its policies and procedures to allow entities across the advisory group to monitor compliance with the aggregate ownership thresholds set forth in rule 12d1-4. *See, e.g.,* Dechert Comment Letter.

¹⁵⁵ The Act creates a rebuttable presumption that any person who directly or indirectly beneficially owns more than 25% of the voting securities of a company controls the company. The presumption of control continues until the Commission makes a final determination to the contrary by order either on its own motion or on application by an interested person. *See* 15 U.S.C. 80a-2(a)(9).

¹⁵⁶ *See, e.g.,* Nuveen Comment Letter (stating that a 10% threshold is a reasonable ownership threshold to limit undue influence concerns while allowing acquiring funds to hold larger positions in closed-end funds without forfeiting the right to exercise their independent judgment regarding shareholder proposals); MFA Comment Letter (stating that a 10% ownership threshold would appropriately balance the need to prevent influence of shareholder votes with allowing acquiring funds that do not have the ability to influence acquired funds to participate in shareholder votes).

¹⁴⁶ Rule 12d1-4(b)(1)(ii).

¹⁴⁹ MFA Comment Letter; Nuveen Comment Letter. *But see* Advent Comment Letter (stating that an acquiring fund that holds approximately 15% of an acquired fund can dictate certain actions of the acquired fund).

¹⁵⁰ SIFMA AMG Comment Letter ("AMG has observed that activist firms are utilizing multiple private funds to acquire significant positions in CEFs, but such private funds would not be subject to the Proposed Rule. In contrast, registered funds investing in CEFs would be subject to this voting condition. Therefore, such registered funds would likely mirror vote shares held in any CEF subject to the voting condition. This would have the effect of increasing the voting power of activist firms . . . We believe the Commission could mitigate this concern by increasing the percentage beyond which an acquiring fund and its advisory group are required to mirror or pass-through vote.").

¹⁵¹ Schwab Comment Letter; SIFMA AMG Comment Letter; ICI Comment Letter; ABA Comment Letter.

¹⁵² ICI Comment Letter; Voya Comment Letter; Schwab Comment Letter.

¹⁵³ *See, e.g.,* Nuveen Comment Letter, SIFMA AMG Comment Letter.

¹⁵⁴ Since our existing fund of funds exemptive orders currently impose voting requirements on an advisory group's holdings in an acquired fund, we understand from commenters that some advisory groups may already have systems in place to monitor holdings at the "advisory group level" and

10% of the outstanding voting securities of an acquired BDC or other closed-end fund. As described above, the proposed rule would have required acquiring funds to use either pass-through or mirror voting if the acquiring fund and its advisory group exceeded a set ownership threshold, regardless of the type of acquired fund. In the 2018 FOF Proposing Release, we requested comment on whether we should adopt the voting requirements of the proposed rule, or whether the final rule should codify the voting provisions set forth in existing exemptive orders.¹⁵⁷

Several commenters suggested modifications to the proposed voting requirement. For example, one commenter generally opposed pass-through voting for closed-end fund voting securities because an activist acquiring fund and its advisory group would likely vote according to the recommendations of its activist investment manager.¹⁵⁸ This commenter suggested that the rule permit pass-through voting of investments in an acquired closed-end fund only if required by the terms of an adviser's investment advisory contract. Another commenter recommended that the rule require an acquiring fund to mirror vote its shares of an acquired open-end fund if it controls the acquired fund.¹⁵⁹ The commenter explained that, at a beneficial ownership of more than 25% of the voting securities of an acquired open-end fund, there is a greater risk that an acquiring fund can exert undue influence on the acquired fund and thus the burden of mirror voting acquired fund shares is a reasonable trade-off.

Some commenters stated that the rule's proposed voting requirements could conflict with an acquiring fund adviser's fiduciary duty to vote underlying fund shares in the best interest of the acquiring fund.¹⁶⁰ These commenters stated that large advisory firms may serve many clients with different investment strategies and shareholder voting interests, and a voting requirement that applies across an advisory group could cause an affiliate of an acquiring fund to be in violation of its fiduciary duties under Sections 404(a)(1)(A) and (B) of the Employee Retirement Income Security

Act of 1974 if forced to adhere to the rule's voting requirements. Further, commenters stated that a mirror-voting requirement may require an adviser to vote fund holdings in a manner that is contrary to its proxy voting policies.¹⁶¹

Some commenters expressed concern regarding the effect of the required voting procedures for acquired closed-end funds. These commenters stated that requiring acquiring funds to use mirror voting if they hold more than 3% of an acquired closed-end fund may increase the relative voting power of private funds or separate account structures that would not rely on rule 12d1-4, and therefore would not be subject to the voting requirements of the rule.¹⁶² These commenters noted that mirror voting by an acquiring fund and its advisory group at a low ownership threshold could effectively amplify the voting position of these types of investors.

After considering comments, we believe it is appropriate to require acquiring funds and their advisory group to use mirror voting. However, in circumstances where rule 12d1-4 or section 12(d)(1) requires all of the security holders of an acquired fund to engage in mirror voting, and it would not be possible for every shareholder to engage in mirror voting, such acquiring funds must use pass-through voting. For example, if an acquired fund is offered solely to acquiring funds that rely on rule 12d1-4, there may be no other investors to vote the acquired fund shares; therefore, under these circumstances, the acquiring fund's shares must be "passed-through" to the acquiring funds' shareholders for voting purposes. We believe requiring an acquiring fund and its advisory group to use mirror voting in most cases, with an ownership threshold set at 25% for open-end funds and UITs and at 10% for closed-end funds, will help address the commenters' concerns regarding undue influence over acquired funds through shareholder voting.¹⁶³ We

further believe that requiring an acquiring fund and its advisory group to use mirror voting in most cases, without generally providing the option for pass-through voting, will simplify operational and compliance burdens for acquiring funds and their advisory groups. For example, this approach will facilitate compliance monitoring for fund groups that have multiple types of acquiring funds. As under our existing exemptive orders, we believe an adviser would need to consider these voting requirements as a component of its fiduciary duty when determining whether and how much an acquiring fund should invest in an acquired fund under the rule.

iii. Exceptions to the Control and Voting Conditions

We are adopting, as proposed, exceptions to the control and voting conditions when: (i) An acquiring fund is within the same group of investment companies as an acquired fund; or (ii) the acquiring fund's investment sub-adviser or any person controlling, controlled by, or under common control with such investment sub-adviser acts as the acquired fund's investment adviser or depositor.¹⁶⁴ The exceptions are designed to include arrangements that are permissible under section 12(d)(1)(G) and our exemptive orders within the regulatory framework of rule 12d1-4.¹⁶⁵ We define the term "group of investment companies" as any two or more registered investment companies or business development companies that hold themselves out to investors as related companies for investment and investor services.¹⁶⁶

Commenters supported these exceptions.¹⁶⁷ Commenters agreed with the Commission that, in circumstances where an affiliated investment manager manages the acquiring fund, it is unlikely that the investors in the acquiring fund would exert undue influence and use their vote to pursue initiatives that are inconsistent with the long-term interests of investors in the

¹⁵⁷ 2018 FOF Proposing Release, *supra* footnote 6 at 45-46.

¹⁵⁸ Advent Comment Letter.

¹⁵⁹ Voya Comment Letter.

¹⁶⁰ ICI Comment Letter (stating that there may be shareholder proposals, such as merger approvals or changes to fundamental investment strategy, for which an adviser believes that neither mirror voting nor pass-through voting is in the acquiring fund's or shareholders' best interest); Voya Comment Letter. The voting conditions are similar to those included in our existing exemptive orders.

¹⁶¹ Schwab Comment Letter.

¹⁶² SIFMA AMG Comment Letter (noting that activist investors have historically accumulated ownership of closed-end funds through separate investments by private funds and separately managed accounts); Nuveen Comment Letter.

¹⁶³ One commenter recommended that the rule prescribe a mirror voting procedure whereby the acquiring fund must provide legal proxy to the proxy agent for the shareholder vote and request that the acquiring fund's shares be voted in the same proportion as the vote of all other shareholders. Bulldog Comment Letter. We do not believe it is necessary to include such a prescription in this rule because we understand that proxy agents are able to tabulate and process shareholder votes that are subject to a mirror-voting requirement and such agents would not require a legal proxy to be set forth in the rule text.

¹⁶⁴ Rule 12d1-4(b)(1)(iii). The exception to the control and voting conditions for sub-advisory arrangements will cover arrangements that may not qualify for the exclusion otherwise available to funds within the same group of investment companies if the acquiring fund and acquired fund do not hold themselves out as related funds for purposes of investment and investor services. See 2018 FOF Proposing Release, *supra* footnote 6, at n.106 and accompanying text.

¹⁶⁵ See 2018 FOF Proposing Release, *supra* footnote 6, at section II.C.1.b.

¹⁶⁶ Rule 12d1-4(d).

¹⁶⁷ See, e.g., Invesco Comment Letter; ABA Comment Letter.

acquired fund.¹⁶⁸ Based on our experience overseeing fund of funds arrangements, we believe these exceptions from the control and voting conditions are appropriately tailored to except only those fund of funds arrangements that do not raise the concerns of undue influence that underlie section 12(d)(1).

The definition of “group of investment companies” is similar to the definition used in many of our exemptive orders permitting investments in listed closed-end funds and listed BDCs. It is intended to clarify that BDCs and other closed-end funds are within the scope of this exception. The determination of whether advisers are control affiliates, however, depends on the relevant facts and circumstances.¹⁶⁹

We believe that whether a group of funds sharing a common adviser or having advisers that are all control affiliates could satisfy the “holding out” prong of the definition would depend on the totality of communications with investors by or on behalf of the funds. For example, the acquiring fund’s prospectus could identify the acquired funds in which the acquiring fund expects to invest, and disclose the control relationship among the advisers to the acquiring and acquired funds. In our view, it is not necessary for acquired funds to include comparable disclosure in their prospectuses or for acquired funds and acquiring funds to market themselves as related companies for all purposes and to all potential investors.¹⁷⁰ Rather, the requirement in

this definition that the funds must hold themselves out to “investors” as related companies for purposes of investment and investor services refers only to potential investors in the acquiring fund because the relevant inquiry is how these funds are holding themselves out to their potential investors. Disclosure in the acquiring fund’s prospectus of the identity of the acquired funds in which the acquiring fund expects to invest, and of the control relationship among the advisers to the acquired and acquiring funds, therefore, is one way to satisfy the “holding out” requirement of the definition. As we stated in the 2018 FOF Proposing Release, we believe that it would be false or misleading for a group of investment companies to hold themselves out as related companies as that term is used in rule 12d1–4 unless they are related investment companies.

As proposed, the rule will subject fund of funds arrangements within these exclusions to a more limited set of conditions than other fund of funds arrangements. In circumstances where the acquiring fund and acquired fund share the same adviser, the adviser would owe a fiduciary duty to both funds, serving to protect the best interests of each fund.¹⁷¹ In addition, where the arrangement involves funds that are advised by advisers that are control affiliates, we do not believe that the acquiring fund adviser generally would seek to benefit the acquiring fund at the expense of the acquired fund. Nor do we believe that the acquiring fund would seek to influence the acquired fund through its ownership interest in the acquired fund.¹⁷² We believe that the rule’s other conditions, such as the fund of funds investment agreement and adviser findings described below, would mitigate the risks of undue influence when the arrangement involves funds that have advisers that are control affiliates.

2. Redemption Limits, Fund Findings, and Fund of Funds Investment Agreements

In lieu of the proposed limitation on redemptions by an acquiring fund, we are adopting a requirement, expanded from the proposal, for an investment adviser to a management company operating in accordance with the rule to evaluate and make certain findings regarding the arrangement.¹⁷³ The rule will also require tailored findings

regarding acquiring UITs and a certification regarding separate accounts funding variable insurance contracts (these findings and certifications, collectively with the management company evaluations and findings, “Fund Findings”). In addition, unless they have the same adviser, the acquiring fund and acquired fund will be required to enter into a fund of funds investment agreement effective for the duration of the funds’ reliance on the rule, which must include certain specific terms. These provisions are, as discussed below, designed to address concerns over the exercise of undue influence through excessive redemptions that the proposed redemption limit provision was designed to address, while also addressing the duplicative fee and complex structure concerns that underlie section 12(d)(1)(A).

a. Proposed Redemption Limit and Disclosure Requirements

The proposed rule would have prohibited an acquiring fund that acquires more than 3% of an acquired fund’s outstanding shares (*i.e.*, the statutory limit) from redeeming or submitting for redemption, or tendering for repurchase, more than 3% of an acquired fund’s total outstanding shares in any 30-day period (the “redemption limit”).¹⁷⁴ The proposed redemption limit was designed to address concerns that an acquiring fund could threaten large-scale redemptions as a means of exercising undue influence over an acquired fund and would have limited an acquiring fund’s ability to quickly redeem or tender a large volume of acquired fund shares.¹⁷⁵ The Commission proposed the redemption limit believing it would (along with the proposed control and voting conditions) address the same concerns regarding undue influence and overreaching that the conditions currently found in the exemptive orders sought to address, without requiring procedures and related board findings covering particular instances where undue influence and overreaching could exist. The Commission stated that replacing these conditions with the proposed redemption, control, and voting conditions could lower compliance

¹⁶⁸ Commenters suggested excluding funds within the same group of investment companies from other conditions of the proposed rule, including the proposed redemption limit. While we are not adopting the proposed redemption limit, we have tailored the rule’s conditions to account for the different undue influence concerns of funds within the same group of investment companies as compared to funds that are not part of the same group of investment companies.

¹⁶⁹ We believe, for example, that funds that are advised by the same investment adviser, or by advisers that are control affiliates of each other, would be “related” companies for purposes of the rule. The definition of “affiliated person” includes any person directly or indirectly controlling, controlled by, or under common control with, such other person. See section 2(a)(3)(C) of the Act. See also Investment Company Mergers, Investment Company Act Release No. 25259 (Nov. 8, 2001) [66 FR 57602 (Nov. 15, 2001)] (proposing rule amendments to permit mergers and other business combinations between certain affiliated investment companies), at n.11.

¹⁷⁰ If the acquired funds’ marketing materials and/or prospectuses include any statements that are inconsistent with the representations made in the prospectuses for the acquiring funds regarding how the acquired fund and acquiring funds are related companies because of the affiliation of their investment advisers, such statements could call into question whether the funds are holding themselves out as related companies and potentially render the

control exception unavailable to the fund of funds arrangement.

¹⁷⁴ Proposed rule 12d1–4(b)(2).

¹⁷⁵ See 2018 FOF Proposing Release, *supra* footnote 6, at section II.C.2 (explaining that we proposed to permit funds to purchase up to 25% of an acquired fund (or more when the funds are part of the same group of investment companies) in reliance on the rule, in part, because of the protections afforded by limiting the acquiring fund’s ability to influence the fund through the threat of large-scale redemptions).

costs and burdens and enhance investor protection for acquired funds.

Many commenters opposed the proposed redemption limit.¹⁷⁶ These commenters raised a number of concerns, including: (1) Operational or administrative challenges; (2) the redemption limit's potential effects on the acquiring fund's investment objectives and its ability to respond timely to changing economic or market conditions; (3) the impact on competition and innovation; (4) whether funds in the same group of investment companies should be subject to the requirements; (5) concerns relating to liquidity; and (6) the cost of the proposed limits.¹⁷⁷ These commenters offered a number of alternatives in lieu of the proposed redemption limit.¹⁷⁸ We also received a number of comments on a proposed disclosure requirement relating to the redemption limit.¹⁷⁹

Operational and administrative challenges. Commenters stated that the proposed redemption limit would present a number of operational or administrative challenges, including disrupting existing fund of funds arrangements.¹⁸⁰ Many commenters provided evidence that the proposed redemption limit would have a large effect on funds.¹⁸¹ For example, one commenter provided survey results showing that, in the past three years, 228 fund of funds arrangements conducted 1,399 redemption transactions in excess of 3%.¹⁸² One commenter stated that, in the case of large-scale redemptions, an acquiring fund may have difficulty meeting

redemption requests from its own shareholders in light of this limit, in part because making in-kind distributions to its shareholders would be difficult on such a large scale.¹⁸³ Other commenters questioned whether this requirement was consistent with the requirements of the Act, including section 22(e) which generally prohibits registered investment companies from suspending the right of redemption of redeemable securities.¹⁸⁴

Some commenters discussed the challenges associated with tracking the outstanding voting securities of numerous third-party funds for investment threshold and redemption limit percentages over rolling 30-day periods, noting that this information is not readily available to the investing public.¹⁸⁵ Another commenter stated that it may be challenging to build compliance system enhancements that can account for multiple redemptions within any rolling 30-day period and apply those calculations to outstanding share balances that change daily.¹⁸⁶ Some commenters stated that these challenges would cause portfolio management teams to reduce exposures to acquired funds as their holdings approach the 3% limit as a means to mitigate these challenges.¹⁸⁷ Other commenters stated that the proposed redemption limit could prevent an acquiring fund from timely participating in certain transactions, such as liquidations or mergers of the acquiring fund, even where the acquiring fund's board and/or its shareholders have approved such transactions.¹⁸⁸

Potential impacts on investment strategies. Several commenters expressed the view that the proposed redemption limit could impede acquiring funds' ability to follow their investment strategy.¹⁸⁹ Commenters stated that portfolio managers routinely change allocations among underlying

funds in response to economic or market conditions, or in keeping with the stated investment strategy of the fund of funds, and that redemption limits could prevent portfolio managers from making such changes in a timely fashion.¹⁹⁰ For example, some commenters noted that the proposed redemption limit would prevent or limit portfolio managers' ability to make investment changes when they identify an underlying fund as underperforming or no longer meeting the needs of the investment strategy of the fund of funds.¹⁹¹ One commenter stated that the proposed redemption limit could force acquiring funds and their shareholders to hold onto underlying funds that underperform, have higher costs than alternatives that become available, or no longer achieve the fund's strategy.¹⁹² Another commenter suggested that to comply with the proposed redemption limit, some funds may alter an acquiring fund's investment strategy to invest in different affiliated or unaffiliated acquired funds to avoid owning more than 3% of any acquired fund, which could frustrate the investment expectations of shareholders, and may increase the costs and complexity of the fund.¹⁹³ Other commenters noted that this restriction would force acquiring fund portfolio managers to liquidate other positions to meet redemption requests.¹⁹⁴ Another raised concerns as to whether the limit would impair rebalancing and restructuring transactions that may involve redemptions beyond the 3% limit.¹⁹⁵

Impact on competition and innovation. Several commenters stated that requiring acquiring funds to redeem large positions slowly over time could place acquiring fund shareholders at a substantial competitive disadvantage to investors that are not subject to the same restrictions.¹⁹⁶ One of these commenters also stated that the redemption limit

¹⁹⁶ See, e.g., JP Morgan Comment Letter; SIFMA AMG Comment Letter (arguing that retail investors may be unfairly disadvantaged because their exposure to acquired funds through a fund of funds would be subject to the proposed redemption limit, while other investors who directly invested in an acquired fund would not be so limited and therefore would be able to access liquidity with priority over acquiring fund investors); Fidelity Comment Letter.

would encourage consolidation, raise barriers to entry for new fund managers, and limit investment options for investors.¹⁹⁷ Many commenters stated that the limitation would have an adverse impact upon smaller funds, in part because the 3% limit would be easier to cross with such funds.¹⁹⁸ Others asserted that it would adversely impact target-date funds.¹⁹⁹

Other commenters focused on the proposed redemption limit's impact on fund innovation. For example, one commenter stated that the redemption limit could inhibit the formation of new investment products, such as funds intended to serve as underlying funds for other funds in the same group of investment companies, because a sufficient number of investors would not hold the new product to avoid triggering the 3% limit.²⁰⁰ Similarly, a commenter raised concerns that the proposed redemption limit could discourage acquiring funds from exposure to non-traditional asset classes, which often have more volatile in- and out-flows and smaller asset bases, resulting in a less desirable mix of assets made available to investors.²⁰¹ This commenter stated that if the proposed redemption limit discourages an acquiring fund from investing in an acquired fund, this could reduce overall economies of scale and operational efficiencies of the acquired fund or even challenge its viability.

Some commenters predicted that the proposed redemption limit would have a chilling effect on acquiring funds using mutual funds in their allocations and would effectively codify the limits set forth in sections 12(d)(1)(A) and (B) of the Act as the maximum investment in unrelated acquired funds.²⁰² Other commenters indicated that acquiring funds would restructure to avoid the proposed redemption limitation, including investing in a larger number of funds in order to hold smaller

proportions of each acquired fund, or relying more on ETFs.²⁰³

Same group of investment companies. Several commenters questioned the need for applying the proposed redemption limit to acquiring funds investing in acquired funds in the same group of investment companies, stating that it would be unnecessary and inappropriate to do so.²⁰⁴ Some of these commenters highlighted that the proposed rule included exceptions from the voting and control provisions for funds in the same group of investment companies and stated that a similar exception should be included from the redemption limit.²⁰⁵ One commenter argued that the proposed redemption limit could pose particular challenges for common fund of funds arrangements involving funds within the same group, such as when an acquired fund is exclusively available to acquiring funds managed by the same adviser. As a result, these commenters asserted there would be no colorable risk that the acquiring fund would threaten redemptions to exert undue influence.²⁰⁶ Another commenter stated that, for affiliated fund of funds arrangements, the common investment adviser's fiduciary duties to both the acquiring and acquired funds would adequately address duplicative and excessive fee concerns.²⁰⁷

Liquidity. Commenters also identified a number of concerns regarding the proposed redemption limit's impact upon the liquidity of the acquiring fund's portfolio. A number of commenters thought that this aspect of the proposal would increase the difficulty of complying with rule 22e-4 by potentially impacting the liquidity categorization of an acquired fund's shares.²⁰⁸ Some commenters stated that the proposed restriction would impose liquidity constraints on funds, which could become more pronounced if a particular acquired fund is under

redemption pressures.²⁰⁹ Other commenters discussed the impact of the proposed restriction on fund liquidations.²¹⁰

Cost. Commenters also raised concerns over increased costs and expenses because of the proposed limit. Several commenters stated that the proposed redemption limit would increase compliance costs because of the burden of monitoring the 3% threshold.²¹¹ One commenter thought portfolio management costs would increase if an adviser could not effect a particular strategy through a fund due to the redemption limit.²¹² Some commenters suggested that acquiring funds with a limited number of acquired funds might restructure to a "sleeved" approach—i.e., funds historically organized as funds of funds, rather than investing in acquired funds, would instead hire various sub-advisers to manage directly specified assets of the fund, thus increasing costs.²¹³ Some commenters also noted that the proposed limit would result in significant transaction costs as the acquiring funds restructure their investment strategies and portfolios.²¹⁴

Alternatives. Some commenters suggested alternatives to the proposed redemption limit.²¹⁵ For example, some commenters suggested that the proposed redemption limit exclude fund of funds arrangements that involve funds in the same group of investment companies or are otherwise affiliated, stating that there is minimal risk of undue influence by an acquiring fund over an acquired fund within the same group of investment companies.²¹⁶ Another

²⁰⁸ See, e.g., MFDF Comment Letter; Wells Fargo Comment Letter; Capital Group Comment Letter (suggesting alternatives on how to consider acquired fund shares under the proposed redemption limit for rule 22e-4 purposes); Dechert Comment Letter.

suggested an exception for fund liquidations,²¹⁷ and another suggested an exception for redemptions that merely facilitate redemption requests from the acquiring fund's shareholders.²¹⁸ Other commenters questioned the need to replace the conditions in the existing exemptive orders.²¹⁹ Some suggested that the rule permit funds to rely either on existing exemptive relief or the rule, or that the Commission codify existing relief in a rule, so that funds with existing relief would not have to comply with the proposed redemption limit.²²⁰

Some commenters suggested making the redemption requirement permissive,²²¹ letting the funds determine the size of permissible redemptions,²²² increasing the percentage of shares that could be redeemed,²²³ or providing a shorter time period to align the applicable time period with rule 22e-4.²²⁴ Others questioned the need for redemption limits at all to protect acquiring funds' investment in unaffiliated acquired funds, particularly given the existence of other protections in rule 12d1-4 and elsewhere (such as other regulations or existing fiduciary obligations).²²⁵ Some commenters suggested that we exempt in-kind redemptions from the requirement.²²⁶

Other commenters stated that participation agreements, either consistent with existing Commission orders or altered in various ways, could be an alternative to the proposed

redemption limit because they would provide opportunities for acquired funds to protect their interests, while preserving the benefits of fund of funds structures for shareholders.²²⁷ As support for this framework, one commenter suggested that the acquiring fund's investment adviser certify to the acquired fund's investment adviser that it will not invest in the acquired fund as a means to exert undue influence over the acquired fund or to influence any services or transactions and notify the acquired fund if its investment exceeds the limits in section 12(d)(1)(A).²²⁸ This commenter also suggested that the rule require periodic reporting to each of the acquiring and acquired funds' board of directors.

Another commenter suggested that the final rule require participation agreements that are approved by each of the acquiring and acquired funds' board of directors,²²⁹ although others stated that the board should not be required to be involved in approving fund of funds arrangements.²³⁰ This commenter suggested requiring board review, at least annually, of all transactions between the acquired fund and affiliates of the acquiring funds to determine whether the acquiring funds have influenced the transactions.²³¹ The commenter also suggested that the rule allow acquired funds and their boards, at their option, to set their own limit for an acquiring fund's investment. Another commenter stated that participation agreements operate efficiently and effectively to prevent undue influence

and are an effective alternative to the proposed redemption limit.²³² Other commenters stated that one of the key elements of a participation agreement is the ability for the acquired fund to refuse to enter into the participation agreement, which prevents the acquiring fund from investment in the acquired fund beyond the limits set forth in section 12(d)(1)(A).²³³

Another commenter stated that the proposed limit was unnecessary because funds frequently negotiate large-scale redemptions to minimize any impacts that would result in undue influence.²³⁴ One commenter stated that funds can manage the threat of undue influence from large-scale redemptions by delaying payment for up to seven days where immediate payment would harm the fund.²³⁵ Others suggested that the Commission require pre-notification of large trades as an alternative to the limit.²³⁶

Commenters suggested a number of other alternatives to the proposed redemption limit. One commenter suggested that we limit the overall percentage of acquired fund shares that an acquiring fund could own to 20%.²³⁷ Another recommended a policies and procedures-based system to ensure that the acquiring fund's adviser acts in the acquiring fund's best interest.²³⁸ Others suggested that, if the Commission retained the proposed redemption limit, we also retain rule 12d1-2.²³⁹ One suggested that the Commission replace the real-time tracking that would have been required to satisfy the proposed redemption limit with an allowance to rely upon the shares listed in the acquired fund's most recently published financial statements.²⁴⁰

Disclosure. In connection with the proposed redemption limit, we also proposed that a fund relying on rule 12d1-4 would be required to disclose in

exempting funds within the same group of investment companies from the fund of funds investment agreement requirement in the rule as adopted because, among other things, these funds can have different advisers and different boards. See *infra* text accompanying footnote 364.

its registration statement that it is (or at times may be) an acquiring fund for purposes of the proposed rule.²⁴¹ This disclosure requirement was intended to put other funds seeking to rely on rule 12d1–4 on notice that a fund they seek to acquire is itself an acquiring fund, and therefore to allow a fund to limit its acquisition of the acquiring fund’s securities accordingly.

Commenters generally opposed the disclosure requirement, predicting that funds would prophylactically disclose that they may rely upon the rule, and that acquired funds would not be able to monitor continuously the disclosure of potential acquired funds.²⁴² Further, commenters suggested that such an approach could reduce the number of funds willing to become acquired funds and create fewer investment opportunities for funds of funds.²⁴³ As an alternative, a commenter recommended that acquiring funds disclose a principal investment strategy of investing in other funds, or allow funds to rely on a representation in a participation agreement.²⁴⁴ One commenter suggested that the Commission provide for alternative disclosures for BDCs and other closed-end funds.²⁴⁵

b. Fund Findings and Fund of Funds Investment Agreement

After considering the comments received, we have determined not to adopt the proposed redemption limit or require funds to disclose whether they are (or at times may be) an acquiring fund for purposes of the rule.²⁴⁶ Instead, we are adopting a combination of conditions that we believe will protect investors in fund of funds arrangements from the concerns the proposed redemption limit sought to address and will provide the notice that the proposed disclosure requirements

would have provided. Specifically, the rule will require: (i) An acquired management company’s adviser to make certain findings focused on addressing undue influence concerns, including through redemptions, by considering specific enumerated factors; (ii) an acquiring fund’s adviser, principal underwriter, or depositor to conduct an evaluation of the complexity of the fund of funds structure and its aggregate fees and expenses and make a finding that the fees and expenses are not duplicative;²⁴⁷ and (iii) both the acquiring and acquired funds to enter into a fund of funds investment agreement to memorialize the terms of the arrangement (including terms that serve as a basis for the required findings) when the acquiring and acquired fund do not share an investment adviser. The rule’s requirements vary based on the structural characteristics of the funds involved in the arrangement, but seek the same goal of avoiding the historical abuses that section 12(d)(1) was intended to prevent.²⁴⁸

The Commission proposed the redemption limit believing that it would be more effective and less burdensome than conditions set forth in our orders.²⁴⁹ Commenters provided additional context and information regarding the impact of the proposed limit, suggesting that the proposed redemption limit would have a larger impact on fund of funds arrangements and would be more burdensome than the Commission contemplated in the proposal. We believe that our adopted approach expanding the proposed finding requirement will address undue influence concerns more effectively and

with less disruption to current market practices than the proposed redemption limit (or the conditions in our existing exemptive orders) and will more effectively put funds on notice that a fund they seek to acquire is itself an acquiring fund.²⁵⁰

i. Evaluations and Findings for Management Companies²⁵¹

Under the final rule, a fund’s investment adviser will be required to make certain evaluations and findings that are tailored to the specific concerns that underlie section 12(d)(1).²⁵² For management companies that are acquired funds, rule 12d1–4 will require the acquired fund’s investment adviser to find that any undue influence concerns associated with the acquiring fund’s investment in the acquired fund are reasonably addressed, after considering certain specific factors.²⁵³ These factors are (1) the scale of contemplated investments by the acquiring fund and any maximum investment limits; (2) the anticipated timing of redemption requests by the acquiring fund; (3) whether, and under what circumstances, the acquiring fund will provide advance notification of investment and redemptions; and (4) the circumstances under which the acquired fund may elect to satisfy redemption requests in kind rather than in cash and the terms of any redemptions in kind. These factors are designed to focus the analysis of an acquired fund’s adviser on potential ways to reduce the threat of undue influence, including through redemptions, when an acquiring fund invests in the acquired fund beyond the section 12(d)(1) limits under the rule. Because concerns regarding undue influence are more salient for acquired funds, only the adviser to an acquired fund will be required to make this determination.

In cases where the acquiring fund is a management company, rule 12d1–4 will require the management company’s adviser to evaluate the complexity of the structure associated with the acquiring

²⁴¹ See proposed rule 12d1–4(b)(4).

²⁴² See, e.g., SIFMA AMG Comment Letter; Fidelity Rutland Comment Letter; Skadden Comment Letter. However, a few commenters did suggest enhanced disclosure, including an expansion of this disclosure requirement, in lieu of other proposed requirements. See Comment Letter of Massachusetts Mutual Life Insurance Company (May 2, 2019) (“MassMutual Comment Letter”) (with regard to private funds); Ropes Comment Letter; Nationwide Comment Letter (with regard to the proposed redemption limit).

²⁴³ Fidelity Comment Letter.

²⁴⁴ Fidelity Comment Letter. One commenter also suggested that investor confusion concerns could be mitigated by an acquired fund’s adviser, including with an assurance regarding its disclosure in its report to the acquired fund’s board. TRP Comment Letter. See *infra* Section II.C.2.c (discussing the board reporting requirements).

²⁴⁵ See BlackRock Comment Letter.

²⁴⁶ We are, as proposed, amending N–CEN to require reporting when an acquired fund has holdings in other funds. See *infra* Section III.

²⁴⁷ The final rule refers to “fees and expenses” in a number of places where the proposed rule only referred to “fees.” Compare rule 12d1–4(b)(2)(i)(A) with proposed rule 12d1–4(b)(3)(i). In the 2018 FOF Proposing Release, when we discussed fees, we mentioned a number of “fees” that may more appropriately be characterized as “expenses.” See 2018 FOF Proposing Release, *supra* footnote 6, at 61 (discussing fees for recordkeeping, sub-transfer agency services, sub-accounting services, or other administrative services). In order to avoid confusion, we have revised the relevant provisions to refer to both fees and expenses, not just fees.

²⁴⁸ The Fund Findings requirement will apply regardless of the form and structure of the other fund acquired by or acquiring the fund in question. Thus, an adviser to an acquiring fund that is a management company would still need to make its finding with respect to the acquiring fund even if the acquired fund is, for example, a UIT (which will not need its own Fund Finding under the rule).

²⁴⁹ The conditions in our orders generally require fund boards to make certain findings and, for investments in unaffiliated funds, adopt procedures to prevent overreaching and undue influence by the acquiring fund and its affiliates once the investment in an unaffiliated acquired fund exceeds the section 12(d)(1) limit. See 2018 FOF Proposing Release, *supra* footnote 6, at n.117 and accompanying text.

²⁵⁰ For example, the fund of funds investment agreement discussed below will allow the acquired fund to screen potential acquiring fund investments, thereby addressing the notice concern enumerated in the proposal. See 2018 FOF Proposing Release, *supra* footnote 6, at 79.

²⁵¹ The term “management companies” includes BDCs. See generally 15 U.S.C. 80a–4 (defining “management company” as an investment company other than a face amount certificate company or UIT) and 15 U.S.C. 80a–58 (providing that, among other things, 15 U.S.C. 80a–4 applies to a BDC to the same extent as if it were a registered closed-end investment company).

²⁵² See *supra* footnotes 17 and 18 and accompanying text.

²⁵³ Rule 12d1–4(b)(2)(i)(B).

fund's investment in the acquired fund. Also, the acquiring fund's adviser must evaluate the relevant fees and expenses and find that the acquiring fund's fees and expenses do not duplicate the fees and expenses of the acquired fund.²⁵⁴ Because concerns regarding duplicative fees and complexity of structure are relevant for an acquiring fund, only the adviser to an acquiring fund will need to evaluate and make findings related to these concerns. For both acquiring and acquired funds, the required analysis, and any findings based thereon, will be subject to the adviser's fiduciary duty to act in the best interest of each fund it advises.²⁵⁵

As discussed in more detail below,²⁵⁶ the rule will also require the acquiring fund and acquired fund to enter into a fund of funds investment agreement for the duration of the funds' reliance upon the rule to memorialize the terms of the agreement, unless the funds share the same investment adviser. The agreement must include any material terms necessary to make the appropriate Fund Finding.²⁵⁷ The final rule will provide funds with flexibility to consider—and where appropriate to negotiate and agree to as part of the fund of funds investment agreement—terms designed to protect investors and address the concerns underlying section 12(d)(1)(A).

The Fund Findings must be made, and the fund of funds investment agreement entered into, before the acquiring fund invests in the acquired fund in reliance on the rule. Consistent with the proposal, the rule also will require the adviser to report its evaluation, finding, and the basis for its evaluation or finding to the acquiring fund's board of directors. This report will not be required until the next regularly scheduled board of directors meeting.²⁵⁸

Changes from the Proposal. The Fund Findings for management companies as adopted differ from the finding requirement that we proposed in a few respects. First, the proposed finding requirement would have required the adviser of an acquiring fund to, after an

evaluation of the complexity of the structure and aggregate fees and expenses associated with the acquiring fund's investment in the acquired fund, determine that the investment is in the best interest of the acquiring fund.²⁵⁹ As adopted, the rule will instead require that the acquiring fund's adviser, after a similar evaluation,²⁶⁰ determine that the acquiring fund's fees and expenses do not duplicate the fees and expenses of the acquired fund.²⁶¹ In the 2018 FOF Proposing Release, we had sought comment on whether we should require a best interest determination and whether we should require the determination be made on a basis of the reasonableness of fees.²⁶² We have made this change in part based upon comments that we received in response to this request that the concept of “best interest” in this context was unclear or overly broad,²⁶³ and that we should instead require advisers to make their determinations based upon specific elements including whether the fees are duplicative.²⁶⁴ While some commenters approved, and even recommended that we expand the use, of the best interest standard,²⁶⁵ we believe that focusing an adviser's analysis under this provision upon an evaluation of the complexity of the fund of funds structure and a determination regarding whether fees and expenses are duplicative will be more effective in mitigating overly complex structures and duplicative fees and expenses.

Second, the proposed finding requirement for management companies would have applied only to acquiring funds, not to acquired funds. As adopted, the rule will additionally require a finding by advisers to acquired funds with a specific set of factors tailored to the concerns of an acquired fund.²⁶⁶ The principal goal of the proposed redemption limit was to protect acquired funds from the threat of undue influence due to large-scale

redemptions.²⁶⁷ A number of commenters suggested that there were more appropriate ways to protect acquired funds from this concern.²⁶⁸ Among these were suggestions that the adviser to an acquired fund make an evaluation similar to that of an acquiring fund.²⁶⁹ We agree that this analysis, coupled with the fund of funds investment agreement as discussed below, is better suited to protect against this risk in that it avoids unduly impeding portfolio management or liquidity risk management while utilizing the acquired fund's adviser to assess the risks of undue influence presented by the investment, taking into account the enumerated factors.²⁷⁰

Third, the proposed rule would have required that the acquiring fund's adviser report its finding and the basis thereof to the acquiring fund's board of directors. Because the initial finding itself would have to be made prior to investing in an acquired fund in reliance on the rule, commenters were confused as to whether the investment could be made before this initial report to the board was made.²⁷¹ One commenter suggested we clarify that the adviser need not report until the next regularly scheduled board meeting.²⁷² We agree with this commenter, and are clarifying in the final rule that, while the adviser must complete the applicable Fund Findings (and fund of funds investment agreement) prior to initial investment, the adviser must report no later than the next regularly scheduled board meeting.²⁷³

Fourth, the proposed rule would have required the acquiring fund's adviser to make a finding both prior to the initial investment and with such frequency as the acquiring fund's board deems to be

²⁶⁷ 2018 FOF Proposing Release, *supra* footnote 6, at section II.C.2 (“To address concerns that an acquiring fund could threaten large-scale redemptions as a means of exercising undue influence over an acquired fund, the proposed rule includes a condition that would limit an acquiring fund from quickly redeeming or tendering a large volume of acquired fund shares”).

²⁶⁸ See *supra* footnotes 215 to 240 and accompanying text.

²⁶⁹ See ICI Comment Letter; Voya Comment Letter; Vanguard Comment Letter. *But see* Dechert Comment Letter (stating that portfolio managers should be given flexibility and not subject to specific factors).

²⁷⁰ See also *infra* footnote 296 and accompanying text.

²⁶³ See ICI Comment Letter; CFA Comment Letter; NYC Bar Comment Letter.

²⁶⁴ See NYC Bar Comment Letter; ICI Comment Letter. See also Fidelity Fixed Income Trustees Comment Letter (noting that, in their experience, the adviser to the acquiring fund only charges fees if the fees are not duplicative). *But see* Dechert Comment Letter (recommending that the finding requirement not include any factors).

²⁶⁵ See SIFMA AMG Comment Letter.

²⁶⁶ Rule 12d1-4(b)(2)(i)(B).

reasonable and appropriate thereafter, but in any case no less frequently than annually. We requested comment on whether we should prescribe the frequency of these determinations, and some commenters suggested that we not mandate a specific frequency.²⁷⁴ However, some commenters suggested the Commission adopt the same or more frequent assessment and reporting frequency that we proposed in recommending their own alternatives to the proposed redemption limit,²⁷⁵ and one recommended that we retain ongoing reporting but on a discretionary basis.²⁷⁶ We agree that mandating ongoing assessments and reporting is unnecessary, particularly in light of other reporting and oversight mechanisms, such as rule 38a–1 under the Investment Company Act, which requires a fund’s chief compliance officer to provide an annual written report to the board. As a result, the final rule will require an adviser to report the applicable Fund Findings to the board once; subsequent reporting regarding these Fund Findings will be conducted at least annually under the fund’s compliance program. In addition, we do not believe it is necessary to prescribe additional requirements given the board’s oversight role over fund operations.²⁷⁷

Additional Comments Received on Findings Requirement. Commenters generally supported a condition that required the investment adviser of the acquiring fund to review and consider the appropriateness of the fund of funds arrangement.²⁷⁸ As noted above however, commenters suggested a number of modifications to the proposed condition, including changes to or elimination of the proposed best interest determination.²⁷⁹ Some commenters suggested that we require

no specific best interest determination.²⁸⁰ One commenter stated that these determinations are implicit in the investment management duties of an investment adviser.²⁸¹ Another commenter stated that the Commission should provide guidance, in lieu of a best interest determination, that sets forth factors that an investment adviser should consider before investing in an acquired fund.²⁸²

Commenters disagreed, however, on whether the proposed best interest determination would be too flexible or not flexible enough. For example, one commenter agreed with the proposed requirements for investment advisers, but stated that the proposed requirements would not prevent fund of funds arrangements from charging duplicative fees.²⁸³ This commenter suggested that the proposed best interest finding and the evaluation standards are too flexible, and that the Commission should interpret “best interest” to mean “the best of the reasonably available options.” The commenter also suggested that the Commission explicitly require advisers to waive duplicative fees. Conversely, another commenter agreed with the proposed best interest requirement, but stated that the proposed factors on which the finding would be based on were not flexible enough.²⁸⁴ This commenter suggested that we permit the investment adviser to consider any factors that it deems relevant in its best interest finding, including subjective factors relating to investment merits.²⁸⁵

One commenter recommended expanding the proposed best interest determination to take into account fees, complexity, investment characteristics, fund size, underlying asset liquidity, asset volatility, legal structure and other characteristics.²⁸⁶ Another commenter suggested that instead of the proposed best interest finding, the final rule should require the acquiring fund’s investment adviser to find that the investment in the acquired fund is “appropriate in light of the complexity

and aggregate fees.”²⁸⁷ This commenter stated that this suggestion would more closely align the requisite finding (on complexity and aggregate fees instead of the proposed best interest finding) because the information on which advisers rely in making these evaluations relates to complexity and fees.

In the 2018 FOF Proposing Release, we noted that many of the conditions relating to fee limitations required in our exemptive orders, such as fee waivers and board findings regarding fees, were redundant in light of a fund adviser’s and board’s fiduciary duties and statutory obligations. As a result, we did not propose to require them as part of the finding requirement.²⁸⁸ A number of commenters agreed with this approach,²⁸⁹ but one commenter would have required fee waivers.²⁹⁰ This commenter argued that fiduciary duties are often not enough to ensure that investors are not subject to duplicative fees.²⁹¹ We are requiring specific evaluations and findings to help address this concern.²⁹²

After considering comments, and in conjunction with our determination to eliminate the proposed redemption limit, we are adopting a modified requirement for management companies regarding Fund Findings that is designed to address the complexity and fees associated with the fund of funds arrangement, as well as undue influence concerns, such as from the threat of large-scale redemption. However, we are also providing advisers with flexibility to tailor their analysis to these specific concerns.

This requirement will apply to all management companies, including when both funds involved are in the same group of investment companies. While we believe it is appropriate to provide an exception from the voting and control conditions under the rule for funds in the same group of investment companies, such an exception is not appropriate for the finding condition. For example, two management companies in the same group of investment companies could

²⁷⁴ See ABA Comment Letter; Dechert Comment Letter. See also NYC Bar Comment Letter (opining that the CCO’s role under rule 38a–1 obviates the need for advisers to report to fund directors on all proposed investments).

²⁷⁵ See ICI Comment Letter; John Hancock Comment Letter.

²⁷⁶ See NYC Bar Comment Letter. See also ABA Comment Letter (stating that fund boards should be able to select their desired reporting frequency and that the rule should not mandate a minimum frequency).

²⁹¹ See also Comment Letter of Anonymous, (Dec. 28, 2018) (suggesting that, if an underlying fund pays a fee, these payments should be made into the assets of the acquiring fund, and that fund of funds arrangements should not be used to avoid fee limitations).

²⁹² See also *infra* footnotes 297 to 299 and accompanying text.

have two different advisers and two different boards satisfying their fiduciary duties to their respective shareholders. Requiring these advisers to evaluate the fund of funds arrangement separately and make the appropriate findings tracks their separate—albeit parallel—fiduciary duties. Further, this requirement also applies if both the acquiring and acquired funds have the same adviser. This approach is similar to the proposed redemption limit, which would have applied to both unaffiliated and affiliated fund of funds arrangements.

We also believe that it is appropriate to require each fund's investment adviser to make the applicable Fund Findings because whether to invest in an acquired fund to achieve a fund's investment objective, or accept any investment from an acquiring fund, is generally a question of portfolio management.²⁹³ That said, given the conflicts of interest at issue, we believe that the rule as adopted should provide a framework for advisers to conduct their analysis. Also, as discussed below, the fund's board of directors will be required to review these arrangements as part of its oversight responsibilities.

Acquired Fund Findings. We are requiring that advisers to acquired management companies make a finding that any undue influence concerns associated with the acquiring fund's investment in the acquired fund are reasonably addressed.²⁹⁴ As part of this finding, the acquired management company's investment adviser will be required to consider a specific list of non-exhaustive factors. We believe these factors will help ensure that acquired fund advisers make appropriate determinations when assessing whether a fund of funds arrangement has terms that reasonably address undue influence by the acquiring fund, including through the threat of large-scale redemptions. Additionally, because this finding requirement (along with the fund of funds investment agreement) is replacing the protections that the proposed redemption limit would have provided, requiring consideration of specific factors is designed to enable the acquired fund to effectively negotiate appropriate terms regarding the acquiring fund's use of redemptions and other ways that the acquiring fund

could exert undue influence over the acquired fund.

The rule does not dictate the particular terms or how acquired fund advisers must evaluate or weigh these factors because we believe that the investment adviser is in the best position to make these decisions.²⁹⁵ We believe that the adviser's familiarity with a fund's investment strategies and operations will inform its ability to identify and discern the most pertinent factors and concerns related to a fund of funds arrangement. This flexibility will allow an acquired fund to establish a fund of funds arrangement that appropriately protects its own interests and those of its investors.

We believe that collectively this list of factors will assist acquired fund advisers in determining whether undue influence has been reasonably addressed. We devised these factors based upon the issues we raised in the 2018 FOF Proposing Release and as informed by comments received with regard to the proposed redemption limit.²⁹⁶ This list of factors is not an exhaustive list, and acquired fund advisers should consider anything else relevant under the circumstances when making their findings.

One commenter objected to a finding that involves an analysis of specific factors, stating that we should afford portfolio managers deference and flexibility when making an investment decision.²⁹⁷ This commenter suggested that the fiduciary duties of the adviser and board are sufficient to protect against the undue influence concerns behind section 12(d)(1). Another commenter made a similar suggestion,

²⁹⁵ As noted above, an investment adviser has a fiduciary duty to act in the best interests of a fund it advises. See *supra* footnote 38.

²⁹⁶ See, e.g., Nationwide Comment Letter (suggesting that redeeming in-kind and advance notification of redemptions are common practices that funds engage in to protect against harms from possible large scale redemptions); ABA Comment Letter (suggesting that acquired funds prefer permissive limitations, such as the redemption limit in section 12(d)(1)(F)(ii), that they can negotiate with an acquiring fund). See also 2018 FOF Proposing Release, *supra* footnote 6, at 54 (requesting comment as to whether there should be an exception to the redemption limit for redemptions in-kind), 55 (requesting comment as to whether the redemption limit should be voluntary at the election of an acquired fund and, if so, what other safeguards could be added to protect against undue influence), and 57 (requesting comment, if the proposed redemption limit does not appropriately limit the threat of using redemptions to exercise undue influence or control, on what other conditions would better do so).

²⁹⁷ See Dechert Comment Letter. But see NYC Bar Comment Letter (stating that, while it believes that a best interest determination is unnecessary, it is appropriate for the Commission to highlight areas that it believes an investment adviser should consider prior to entering into a fund of funds arrangement).

stating that the guidance provided regarding the proposed finding requirement would add complexity, cost, and additional time to the investment process without adding significant value beyond the adviser exercising its fiduciary duty alone.²⁹⁸ While we agree that an adviser acting according to its fiduciary duty helps to protect against these concerns, the factors we are adopting should help the acquired fund adviser to exercise that duty by focusing upon those issues we believe are most important for an acquired fund in assessing this risk.²⁹⁹

We believe each of the following factors is appropriate for an investment adviser to a management company to consider before making its finding:

- **Scale of investment.** The final rule will require the acquired fund's investment adviser to consider the scale of contemplated investments by the acquiring fund and any maximum investment limits.³⁰⁰ For example, the investment adviser may determine that certain levels of investment by an acquiring fund in excess of the section 12(d)(1) limits would be appropriate for the acquired fund's operations. Conversely, the adviser could determine that investments above a certain level would raise undue influence concerns because of the adverse effect a large-scale redemption from one large investor (e.g., 10% of the acquired fund's outstanding voting shares) could have on the fund and its investors. Assuming the funds have different advisers, the acquired fund could set the limit in the fund of funds investment agreement, or for funds with the same adviser, as part of the written record of its Fund Findings.³⁰¹ To the extent an acquiring fund exceeded the acquired fund's specified threshold, the acquired fund could terminate the fund of funds agreement as an additional means of prohibiting additional investments. Alternatively, an acquired fund's adviser may determine that such a limitation on its investment is not necessary to address reasonably undue influence by the acquiring fund through the threat of large-scale redemptions.

- **Anticipated timing of redemption requests.** The final rule will require the acquired fund's investment adviser to consider the anticipated timing of redemption requests by the acquiring fund.³⁰² The acquired fund's adviser could, for example, determine that the

²⁹⁸ See Guggenheim Comment Letter.

²⁹⁹ See also *supra* footnotes 288 to 292 and accompanying text.

³⁰⁰ See rule 12d1-4(b)(2)(i)(B)(1).

³⁰¹ See *infra* footnote 360 and accompanying text.

³⁰² See rule 12d1-4(b)(2)(i)(B)(2).

²⁹³ See 2018 FOF Proposing Release, *supra* footnote 6, at n.140 and accompanying text.

²⁹⁴ By undue influence concerns, we mean circumstances where the acquiring fund will be in a position to control the assets of the acquired fund and use those assets to enrich the acquiring fund at the expense of acquired fund shareholders. See *supra* footnote 17 and accompanying text.

undue influence concerns regarding an acquiring fund's investment would be reasonably addressed only if the acquiring fund commits to submitting redemption requests over multiple days. Depending on the particular investment strategy and liquidity of the acquired fund, such an adviser might consider the impact of immediate, large redemption requests and determine that the undue influence concerns would be reasonably addressed only if such requests are made over multiple days.³⁰³

- *Advance notification of investments or redemptions.* The final rule will require the acquired fund's investment adviser to consider whether and under what circumstances the acquiring fund will provide advance notification of investments and redemptions.³⁰⁴ For example, the adviser may request or require that the acquiring fund provide advance notice of a large redemption before entering into a fund of funds investment agreement. However, any agreement related to this factor would still have to comply with section 22(e) of the Act.

- *In-kind redemptions.* The final rule requires the acquired fund's investment adviser to consider whether redemptions will be made in cash or in kind by the acquired fund.³⁰⁵ For example, to facilitate redemptions or investments, the adviser may consider as part of its arrangement whether redemptions will be in cash or in kind, or whether only redemptions above a certain threshold may be made in-kind.³⁰⁶

In order to make its finding, an acquired fund's adviser also would need to consider any other relevant regulatory requirements. For example, an acquired fund's consideration of the threat of undue influence through redemptions would depend in part on the fund's

liquidity risk and how it manages that risk. Accordingly, the adviser to an acquired fund may need to consider how it would manage any liquidity risk from the acquiring fund's investment under its liquidity risk management program required by rule 22e-4. Terms agreed upon through assessment of the factors described above may be a part of how the acquired fund plans to manage any such liquidity risk. In other cases, the acquired fund's adviser may determine that an acquiring fund's investment does not raise a threat of undue influence through large-scale redemptions—or that any threat is addressed through the terms of the fund of funds investment agreement—but that it must take other steps through its liquidity risk management program to manage liquidity risks under rule 22e-4. In negotiating a fund of funds investment agreement, an acquired fund adviser should address all matters to the extent necessary to allow the fund to comply with legal and regulatory requirements under the Federal securities laws.

Acquiring Fund Evaluations and Findings. As we discussed in the 2018 FOF Proposing Release, the evaluations (and related finding) that we are requiring of advisers to management companies that are acquiring funds are designed to help guard against the construction of a complex structure that could be confusing to the acquiring fund's shareholders and to prevent excessive layering of fund costs.³⁰⁷

In evaluating the complexity of a fund of funds structure, an acquiring fund adviser should consider the complexity of the acquiring fund's investment in an acquired fund versus direct investment in assets similar to the acquired fund's holdings. The adviser should consider whether the resulting structure would make it difficult for shareholders to appreciate the fund's exposures and risks or circumvent the acquiring fund's investment restrictions and limitations. The adviser also should consider whether an acquired fund invests in other funds, which may create additional complexity.³⁰⁸

In evaluating the fees associated with the fund's investment in acquired funds, an adviser should consider the fees of both the acquiring and acquired funds within the fund of funds arrangement with an eye towards duplication. Specifically, an adviser should consider whether the acquired fund's advisory fees are for services that are in addition to, rather than duplicative of, the adviser's own services to the acquiring

fund. The adviser also should consider the other fees and expenses, such as sales charges, recordkeeping fees, sub-transfer agency services, and fees for other administrative services.

We believe the flexibility provided by the rule will allow an acquiring fund to establish a fund of funds investment agreement that appropriately protects its own interests and those of its investors. However, as with acquired fund advisers, in negotiating a fund of funds investment agreement, an acquiring fund adviser should address all matters to the extent necessary to allow the fund to comply with legal and regulatory requirements under the Federal securities laws.

An acquiring fund board already has a responsibility to see that the fund is not being overcharged for advisory services regardless of any findings we require.³⁰⁹ Section 15(c) of the Act requires the board of directors of the acquiring fund to evaluate any information reasonably necessary to evaluate the terms of the acquiring fund's advisory contracts (which information would include fees, or the elimination of fees, for services provided by an acquired fund's adviser).³¹⁰ Section 36(b) of the Act also imposes on fund advisers a fiduciary duty with respect to their receipt of compensation.³¹¹ We believe that to the extent advisory services are being performed by another person, such as the adviser to an acquired fund, this fiduciary duty would require an acquiring fund's adviser to only charge fees or expenses for the services that the acquiring fund's adviser is providing, and not for any services performed by an adviser to an acquired fund.³¹² In addition, when an adviser to an acquiring fund (or an affiliate of an adviser) receives compensation from, or related to, an acquired fund in connection with an investment by the acquiring fund, the adviser has a conflict of interest. The adviser has a fiduciary duty to the acquiring fund under the Advisers Act and must act in the best interest of its clients, including eliminating or making full and fair disclosure of this conflict.³¹³

Nevertheless, we believe that it is appropriate for the rule to require that the acquiring fund's adviser find that the aggregate fees and expenses are not duplicative, given the inherent conflict

³⁰³ Investors in mutual funds can redeem their shares on each business day and, by law, must receive approximately their pro rata share of the fund's net assets (or its cash value) within seven calendar days after receipt of the redemption request. See section 22(e) of the Act (providing, in part, that no registered investment company shall suspend the right of redemption, or postpone the date of payment upon redemption of any redeemable security in accordance with its terms for more than seven days after tender of the security absent unusual circumstances).

³⁰⁴ See rule 12d1-4(b)(2)(i)(B)(3).

³⁰⁵ See rule 12d1-4(b)(2)(i)(B)(5).

³⁰⁶ Many funds reserve the right to redeem their shares in-kind instead of with cash. See, e.g., rule 18f-1; rule 22e-4(b)(v); Election by Open-End Investment Companies to Make Only Cash Redemptions, Investment Company Act Release No. 6561 (June 14, 1971) [36 FR 11919 (June 23, 1971)] (stating that the definition of "redeemable security" in section 2(a)(32) of the Investment Company Act "has traditionally been interpreted as giving the issuer the option of redeeming its securities in cash or in kind").

of interest the adviser faces in this circumstance. This finding, which is reported to the board of directors, gives the fund's board information specific to the fund of funds arrangement to review when exercising its oversight responsibilities over the adviser.

Investment Adviser Reporting and Board Oversight. The final rule will require the adviser to a management company to report its evaluation, finding, and the basis for its evaluation or finding to the fund's board of directors no later than the next regularly scheduled board meeting.³¹⁴ As discussed above,³¹⁵ the final rule differs from the proposed rule in that we will not additionally require the fund's board of directors to set the frequency of determination as reasonable and appropriate after the initial investment, but in any case no less frequently than annually.

Some commenters suggested that the Commission eliminate or modify the requirement that the investment adviser of the acquiring fund report the proposed best interest determination to the acquiring fund's board of directors.³¹⁶ One commenter characterized this requirement as unduly burdensome, as another mandatory report that may be complex and data heavy.³¹⁷ Rather than reporting the finding to the board of directors before investing in an acquired fund, a commenter recommended that the final rule require such reporting and the basis for the adviser's determination to the board of directors at the next regularly scheduled meeting.³¹⁸ On the other hand, one commenter stated that the board of directors appropriately serves an oversight role, supporting the proposal's investment adviser reporting requirements. The commenter recommended that the frequency of reporting should be set forth in a fund's policies and procedures adopted and approved by the board under rule 38a-1 under the Act.³¹⁹

We continue to believe that the board of directors provides an additional layer of protection for acquiring and acquired funds that are management companies and their respective investors against the abuses historically associated with fund of funds arrangements. We are therefore adopting conditions that will

require the investment adviser to each of the acquiring and acquired funds to report its evaluation, finding, and the basis for its evaluation or finding. We are adopting this change to the proposed rule to conform to the final rule's regulatory framework, which now applies to acquiring and acquired fund advisers. As proposed,³²⁰ the final rule will not require a management company's adviser to make the applicable Fund Findings in connection with every investment in an acquired fund.

ii. UIT Findings

Rule 12d1-4 will include an alternative finding condition when the acquiring fund is a UIT. Specifically, on or before the date of initial deposit of portfolio securities into a registered UIT, the UIT's principal underwriter or depositor must find that the fees of the UIT do not duplicate the fees and expenses of the acquired funds that the UIT holds or will hold at the date of deposit.³²¹ The final rule will require the principal underwriter or depositor to base its finding on an evaluation of the complexity of the structure and the aggregate fees and expenses associated with the UIT's investment in acquired funds.³²² This requirement is essentially the same as proposed.³²³

We received limited comments addressing this aspect of the proposal, but the comments received provided support or did not recommend any UIT-specific changes to the proposal.³²⁴ For example, one commenter supported the rule requiring the principal underwriter or depositor of a UIT to make a finding regarding aggregate UIT and acquired fund fees.³²⁵

The condition for acquiring UITs under rule 12d1-4 differs from the condition applicable to acquiring management companies in many respects, and we believe that this is appropriate for several reasons. First, by statute, a UIT is unmanaged and its portfolio fixed.³²⁶ Unlike a management

company, a UIT does not have a board of directors, officers, or an investment adviser to render advice during the life of the trust. Second, acquiring UITs typically raise different fee and expense concerns than management companies. A UIT, for example, does not bear investment advisory fees, and the payments UITs make are limited by section 26 of the Act.³²⁷

Due to the unmanaged nature of UITs and the fixed nature of their portfolios, we continue to believe it would be inconsistent with their structure to require a re-evaluation of their acquired fund finding over time or other reporting requirements. The requirement only applies, therefore, at the time of the UIT's creation. Nevertheless, this determination generally should consider the planned structure of the UIT's holdings. In particular, if the UIT tracks an index, the determination should consider the index design and whether the index design is likely to lead to the UIT holding acquired funds with duplicative fees or overly complex structures. We believe that the UIT-specific finding requirement that its fees and expenses do not duplicate the fees and expenses of the acquired funds that the UIT holds or will hold at the date of deposit, is an appropriately calibrated means to protect investors, given a UIT's unmanaged structure.

Unlike acquired management companies, we are not extending this finding requirement to acquired funds that are UITs.³²⁸ We do not believe it is necessary to require these UITs to make similar findings given their structure. A UIT that is an acquired fund does not have similar section 12(d)(1) undue influence concerns as a management company because the UIT is unmanaged. This is distinguishable from UITs that are acquiring funds where we are only requiring UITs to consider the complexity of the structure and the aggregate fees and expenses associated with the UIT's investment,

redeemable securities, each of which represents an undivided interest in a unit of specified securities).

³²⁷ Section 26(a)(2)(C) of the Act requires that the trust indenture for a UIT prohibit payments to the depositor or to any affiliated person thereof, except payments for performing bookkeeping and other administrative services of a character normally performed by the trustee or custodian itself. 80 U.S.C. 80a-26(a)(2)(C). UIT ETFs have exemptive relief that allow the ETF to pay certain enumerated expenses that would be prohibited under section 26(a)(2)(C). See Exchange-Traded Funds, Investment Company Act Release No. 33140 (July 31, 2018) [83 FR 37332 (July 31, 2018)] ("2018 ETF Proposing Release") at n.52 and accompanying text.

³²⁸ However, if the acquiring fund is a management company, it would need to make its own finding consistent with the rule. See *supra* footnote 248.

³²⁰ See 2018 FOF Proposing Release, *supra* footnote 6, at n.143 and accompanying text.

³²¹ Rule 12d1-4(b)(3)(ii).

³²² Under rule 12d1-4(b)(3)(iv), fund of funds arrangements (including acquiring and acquired funds that are UITs) must enter into a fund of funds investment agreement. See *infra* section II.C.2.4II.C.2.b.iv.

³²³ The only change is that we have revised the final rule to make clear that it requires the principal underwriter or depositor to consider expenses in addition to fees. See *supra* footnote 247.

³²⁴ See ABA Comment Letter; SIFMA AMG Comment Letter.

³²⁵ See ABA Comment Letter.

³²⁶ See 15 U.S.C. 80a-4(2) (defining a UIT, in part, to mean an investment company organized under a trust indenture or similar instrument that issues

³¹⁴ Rule 12d1-4(b)(2)(i)(C).

³¹⁵ See *supra* footnotes 271 through 276 and accompanying text.

³¹⁶ See, e.g., Dechert Comment Letter; NYC Bar Comment Letter; ABA Comment Letter.

³¹⁷ See ABA Comment Letter (suggesting elimination of the best interest determination and board reporting requirements).

³¹⁸ See NYC Bar Comment Letter.

³¹⁹ See MFDF Comment Letter.

which is only relevant when the UIT is acquiring other funds.

This condition will apply only at the time of initial deposit for UITs that are formed after the rule's effective date as proposed. We do not believe it is necessary to exclude UITs that are already in existence from relying on rule 12d1-4 as acquiring funds. UITs that serve as separate account vehicles funding variable annuity and variable life insurance contracts will be subject to additional fee conditions, as discussed below. The majority of UITs fall into this category.³²⁹ In addition, we believe that existing UIT ETFs are unlikely to rely on rule 12d1-4 as acquiring funds because they replicate the components of broad-based securities indexes that do not currently include funds.³³⁰ Even if funds were to become significant components of these indexes in the future, we believe that acquiring funds that invest in broad-based securities indexes are unlikely to raise complex structure concerns because the funds replicate the relevant index.³³¹ If an index were to include funds, the UIT ETF would simply acquire those funds as part of replicating the broader index. Such an arrangement also is unlikely to raise duplicative fee concerns because existing UIT ETFs do not bear advisory fees, sales loads, or other types of service fees at the UIT ETF level. Finally, UITs that do not serve as variable insurance contract separate account vehicles or that are not ETFs typically have a limited term, sometimes of approximately 12–18 months.³³² Given this short term, the number of UITs that have not made the finding required by rule 12d1-4 would decrease quickly over time. Absent this provision, it is unlikely that pre-existing UITs could rely upon the rule given the statutory requirement that UITs be organized under a trust indenture,

³²⁹ According to UIT annual Form N-CEN filings, as of April 2020, insurance UITs made up 674 of the total 716 registered UITs.

³³⁰ There are five existing UIT ETFs that had total assets of approximately \$436.6 billion as of December 31, 2019, representing 85.7% of UIT assets. All existing UIT ETFs seek to track the performance of a broad-based securities index by investing in the component securities of the index in the same approximate portions as the index.

³³¹ The exemptive relief that has been granted to UIT ETFs provides that the trustee will make adjustments to the ETF's portfolio only pursuant to the specifications set forth in the trust formation documents in order to track changes in the ETF's underlying index. The trustee does not have discretion when making these portfolio adjustments. See 2018 ETF Proposing Release, *supra* footnote 81, at nn. 46–47 and accompanying text.

³³² This estimate is based on staff sampling of equity UIT prospectuses.

contract of custodianship or agency, or similar instrument.

iii. Separate Accounts Funding Variable Insurance Contract Certification

With respect to a separate account funding variable insurance contracts that invests in an acquiring fund, the final rule will require an acquiring fund to obtain a certification from the insurance company issuing the separate account that it has determined that the fees and expenses borne by the separate account, acquiring fund, and acquired fund, in the aggregate, are consistent with the standard set forth in section 26(f)(2)(A) of the Act.³³³ The standard set forth in section 26(f)(2)(A) of the Act provides that the fees must be reasonable in relation to the services rendered, the expenses expected to be incurred, and the risks assumed by the insurance company. This requirement generally is the same as proposed.³³⁴

Comments received regarding the insurance company certification generally raised concerns with this requirement.³³⁵ One commenter stated that the certification requirement is inappropriate because the separate account is a separate and distinct legal entity from the fund of funds arrangement.³³⁶ For example, this commenter stated that typical fees associated with separate accounts, such as mortality and expense risk fees or account fees and expenses, are the responsibility of, and paid by, the insurance contract owners. Some commenters also stated that the acquiring fund's investment adviser may have limited ability to obtain or compel this type of certification from an unrelated insurance company to comply with the rule.³³⁷

Some commenters stated that section 26 of the Act already requires that the separate account and sponsoring insurance company fees and charges deducted under a variable insurance contract, in the aggregate, be reasonable in relation to the services rendered, the expenses expected to be incurred, and the risks assumed by the insurance company.³³⁸ Commenters argued that,

³³³ Rule 12d1-4(b)(2)(iii).

³³⁴ The only change is that we have revised the final rule to make clear that it requires the insurance company to consider expenses in addition to fees. See *supra* footnote 247.

³³⁵ See, e.g., Nationwide Comment Letter; ICI Comment Letter; PGIM Comment Letter; ABA Comment Letter.

³³⁶ See Nationwide Comment Letter.

³³⁷ See, e.g., Dechert Comment Letter; ICI Comment Letter; Comment Letter of Insured Retirement Institute (May 2, 2019) ("IRI Comment Letter").

³³⁸ See ICI Comment Letter; PGIM Comment Letter; ABA Comment Letter.

in making this determination, the insurance company sponsoring the separate account is entitled to rely on the obligations already imposed on the investment adviser and board of trustees of any fund in which the separate account invests, to ensure that the fees borne by any funds that are available through variable insurance contracts are appropriate.³³⁹ Other commenters argued that the requirement was superfluous in light of existing requirements for review and approval of acquiring and acquired fund advisory agreements under section 15(c) of the Act and a fund adviser's fiduciary duty under section 36(b) of the Act with respect to the receipt of compensation for services, or of payments of a material nature, from an acquiring or acquired fund.³⁴⁰

We believe the final rule should include a condition that addresses the concerns underlying the limits in section 12(d)(1), particularly duplicative fee concerns, in this three-tier arrangement.³⁴¹ We disagree with commenters that the finding is unnecessary or duplicative of section 15(c) or section 36(b) because we believe it is appropriate to address concerns with duplicative fees at each tier of the arrangement. In addition, section 15(c) and 36(b) generally will not apply in each tier of such an arrangement since the funds involved in this arrangement typically include UITs, which do not have boards of directors or investment advisers.³⁴² In addition, this certification requirement will ensure an analysis of the aggregate fee and expense structure of all the funds involved.

The final rule's conditions for separate accounts funding variable insurance contracts are based on the current fund of funds exemptive orders.³⁴³ Our exemptive orders include a condition similar to the certification requirement.³⁴⁴ Under the orders, the

³³⁹ See, e.g., Nationwide Comment Letter.

³⁴⁰ See, e.g., PGIM Comment Letter; John Hancock Comment Letter; Dechert Comment Letter.

³⁴¹ Rule 12d1-4 restricts fund of funds arrangements to two tiers other than in limited circumstances, such as master-feeder arrangements in reliance on section 12(d)(1)(E) of the Act. See *infra* section II.C.3 (discussing complex structure requirements).

³⁴² Section 15(c) of the Act applies to registered open-end funds that have a board of directors, whereas section 36(b) of the Act applies to certain payments to a registered investment company's investment adviser.

³⁴³ See 2018 FOF Proposing Release, *supra* footnote 6, at section II.C.3.c.

³⁴⁴ Specifically, in the orders, each acquiring fund must represent in its participation agreements with an acquired fund that no insurance company sponsoring a registered separate account funding variable insurance contracts will be permitted to

insurance company must certify to the acquiring fund that the aggregate of all fees and charges associated with each variable insurance contract that invests in the acquiring fund are reasonable in relation to the services rendered, the expenses expected to be incurred, and the risks assumed by the insurance company.

Under the rule, an insurance company sponsoring a separate account must certify that the fees and expenses borne by the separate account, acquiring fund, and acquired fund in the aggregate are reasonable and consistent with the standard set forth in section 26 of the Act. Because the final rule will require most funds to enter into a fund of funds investment agreement, we considered whether to codify the approach of the exemptive orders and require that the fund of funds investment agreement include a representation regarding the insurance company's certification.³⁴⁵ Rule 12d1–4 will not require that the fund of funds investment agreement include this representation, although the agreement may do so. This is consistent with our general approach not to codify in our rule all the particularized terms that an agreement must include to reflect the fund of funds arrangement.

iv. Fund of Funds Investment Agreements

The final rule will require funds to enter into a fund of funds investment agreement before the acquiring fund acquires securities of the acquired fund in excess of the limits of section 12(d)(1) in reliance on rule 12d1–4 unless both funds have the same adviser.³⁴⁶ This requirement works in tandem with the requirement to make certain Fund Findings by providing a method to hold the parties to the arrangement to the terms that led each fund's investment adviser to agree to the arrangement in the first place. In negotiating the fund of funds investment agreement, funds can set the terms of the agreement to support the Fund Findings. For example, an acquired fund could require the acquiring fund to agree to submit redemptions over a certain

invest in the acquiring fund unless the insurance company has made a certification to the acquiring fund. *Id.* at n.173–174 and accompanying text.

³⁴⁵ The Commission proposed the certification requirement, in part, because the proposal did not contemplate participation agreements. See 2018 FOF Proposing Release, *supra* footnote 6, at section II.C.3.c.

³⁴⁶ Rule 12d1–4(b)(2)(iv). Unlike the conditions relating to voting and control, the rule will require funds that are part of the same group of investment companies to enter into a fund of funds investment agreement if they do not have the same investment adviser.

amount for a given period as a condition to the fund of funds investment agreement. This agreement both sets the expectations of the parties at the outset of the arrangement and provides a method of enforceability should one party not live up to these expectations. Thus, the fund of funds investment agreement is designed to address historical abuse concerns under section 12(d)(1), including an acquiring fund threatening large-scale redemptions as a means of exercising undue influence over an acquired fund.³⁴⁷ Further, the requirement to enter into such agreement puts the acquired fund on notice that an acquiring fund is investing in it in reliance on the rule.

In the 2018 Proposing Release, we requested comment on alternatives to the proposed redemption limit, specifically asking whether we should permit acquired funds to set their own redemption limit (and, if so, what parameters we should establish) or whether we should require participation agreements.³⁴⁸ As discussed above, a number of commenters recommended a negotiated agreement similar to the participation agreements required in our exemptive orders as an alternative to the proposed redemption limit.³⁴⁹ We agree with these commenters that a negotiated agreement, combined with the findings requirements discussed above, would be a more effective control against the threat of the use of large redemptions to exercise undue influence than the proposed redemption limit.

The fund of funds investment agreement differs in certain ways from the requirement in our exemptive orders that, prior to investing in another fund, acquiring and acquired funds enter into a participation agreement. Participation agreements under our orders require both funds in a fund of funds arrangement (and their investment advisers) to fulfill their responsibilities

³⁴⁷ We believe that, due to the flexibility that the final rule provides in this regard, no special exceptions for certain funds or situations, such as interval funds or acquired fund liquidations, are necessary. *But see* NYC Bar Comment Letter (suggesting that these instances should be exempted from its proposed alternative approach to the proposed redemption limit). We would expect that the relevant parties would negotiate appropriate terms into their fund of funds investment agreement.

³⁴⁸ See 2018 FOF Proposing Release, *supra* footnote 6, at 57–58. We also requested comment on: (i) Whether participation agreements require the parties to a fund of funds arrangement to provide information necessary for compliance with other provisions of the Act; and (ii) whether we should codify the conditions of existing exemptive orders including the procedural requirements. *See id.*

³⁴⁹ See *supra* footnotes 221 through 236, 266 through 270, and 296 through 299 and accompanying text.

under the order.³⁵⁰ Participation agreements also require that the acquiring fund notify the acquired fund prior to investing in excess of the limits of section 12(d)(1)(A) and provide the acquired fund a list of the names of each of its affiliates to help the acquired fund ensure compliance with the affiliated transaction provisions of the Act.³⁵¹ Because all funds operating in accordance with rule 12d1–4 will be required to comply with the rule's conditions, the rule will not require that a fund of funds investment agreement include these types of contractual provisions.³⁵² In contrast to a participation agreement, the fund of funds investment agreement will be required to memorialize the terms of the arrangement that serve as a basis for the required finding. The agreement will empower funds relying on the rule to negotiate and tailor appropriate terms to protect their interests in a fund of funds arrangement. For example, the fund of funds investment agreement will provide a mechanism for an acquired fund to limit an acquiring fund's investments in reliance on the rule and arm itself with other tools it desires to protect against potential undue influence from an acquiring fund.

Rule 12d1–4 also will require funds operating in accordance with it to enter into a fund of funds investment agreement that includes three specific provisions. While some commenters suggested that we did not need to outline specific provisions in these agreements,³⁵³ we believe that certain minimum requirements are necessary to ensure that the fund of funds agreement is effective at curtailing undue influence. These requirements are based on the Fund Findings, as well as elements of our exemptive orders and

³⁵⁰ Fund of funds exemptive orders require a participation agreement to state, without limitation, that the funds' boards and their investment advisers understand the terms and conditions of the order and agree to fulfill their responsibilities under the order. *See, e.g.,* ETF Managers Trust, et al., Investment Company Act Release Nos. 33799 (Feb. 19, 2020) [85 FR 10794 (Feb. 25, 2020)] (notice) and 33823 (Mar. 24, 2020) (order) and related application ("ETF Managers Trust").

³⁵¹ While not required by exemptive orders, some funds include other provisions in participation agreements to govern the fund of funds arrangement, such as provisions related to mirror voting, waiver of compensation, and notification upon exceeding certain thresholds. We are not requiring that these conditions be included in the written agreement.

³⁵² See ICI Comment Letter.

³⁵³ See ICI Comment Letter (stating that because a fund of funds arrangement would need to comply with the generally applicable provisions of the rule, its proposed alternative to a participation agreement would not require negotiation). *But see* Capital Group Comment Letter (suggesting that the Commission should include practical conditions in a participation agreement-type regime).

commenters' recommendations in response to our requests for comment.³⁵⁴

First, the fund of funds investment agreement must include any material terms necessary for the adviser, underwriter, or depositor to make the Fund Finding where the funds involved include management companies or UITs.³⁵⁵ This ensures that the adviser or other party making the Fund Finding will have memorialized the terms of the investment that underpin the Fund Finding, thereby making these terms fixed and clearly agreed if a dispute arises in the future. Given the importance of the Fund Findings to rule 12d1-4's protections, we believe that it is critical for the agreement to identify such terms to minimize ambiguity.

Second, each fund of funds investment agreement must include a termination provision whereby either party can terminate the agreement with advance written notice within a period no longer than 60 days.³⁵⁶ This provision will give an acquired fund the ability to terminate an acquiring fund's acquisition of additional fund shares and provides the acquired fund with the negotiating leverage to address undue influence concerns. Termination of the agreement does not, unless otherwise agreed to by the parties, require that the acquiring fund reduce its position in the acquired fund, but will prevent the acquiring fund from purchasing additional shares of the acquired fund beyond the limits of section 12(d)(1).³⁵⁷

³⁵⁴ See, e.g., ETF Managers Trust, *supra* footnote 350 (representing, among other things, that the participation agreement permitted an unaffiliated acquired fund to terminate it). See also ICI Comment Letter ("[r]equiring the acquired fund to agree to (and then terminate, if desired) the investment by an acquiring fund from a different group of investment companies would give the acquired fund a critical tool for protecting the interests of its shareholders"); Wells Fargo Comment Letter (stating that the standard representations, compliance policies, and other conditions accompanying participation agreements in the exemptive orders establish an effective framework of checks and balances that has successfully governed unaffiliated fund of funds arrangements); Fidelity Comment Letter (suggesting that in a participation agreement, an acquired fund could always protect itself by refusing to enter into such an agreement); NYC Bar Comment Letter (suggesting, among other things, that a participation agreement-type regime would permit the acquiring fund to negotiate the glide-path of redemptions).

³⁵⁵ Rule 12d1-4(b)(2)(iv)(A). This is not required of separate accounts because the acquiring fund is obtaining a certification from the insurance company offering the separate account rather than making a finding regarding the separate account.

³⁵⁶ Rule 12d1-4(b)(2)(iv)(B). The 60-day period is based upon a similar provision in section 15(a) of the Act. See 15 U.S.C. 80a-15(a)(3). We believe that this period is also consistent with the termination provision in some existing participation agreements.

³⁵⁷ Termination of the agreement would mean that the funds could no longer rely upon the rule

Lastly, the agreement must include a provision requiring an acquired fund to provide the acquiring fund with fee and expense information to the extent reasonably requested.³⁵⁸ We believe that this requirement is appropriate to assist the acquiring fund's adviser with assessing the impact of fees and expenses associated with an investment in an acquired fund. For example, an acquired fund that invests in other funds would more readily have fee and expense information associated with the underlying investment than the acquiring fund, which may inform the acquiring fund's consideration of fees and expenses associated with an investment in the acquired fund. We believe that fund of funds investment agreements are material contracts not made in the ordinary course of business. As a result, they must be filed as an exhibit to each fund's registration statement.³⁵⁹

In sum, we believe that this requirement provides important additional protections beyond those provided by the Fund Findings requirement. First, it ensures both parties agree to the significant terms of the investment, including those terms on which the adviser or other party making the Fund Finding has based its analysis. Second, it ensures that an acquiring fund has the information it needs to assess the impact of the relevant fees and expenses. Lastly, these agreements permit funds to terminate the investment if they so choose, thereby ending the funds' ability to rely upon the rule for any additional investments in the acquired fund.

The rule will not require acquired funds and acquiring funds that are advised by the same adviser to enter into a fund of funds investment agreement. We believe that there are comparatively fewer benefits to formalizing a fund of funds arrangement with an executed agreement if the funds have the same adviser, assuming that the funds' adviser has made the applicable Fund Finding. Given the importance of the fund of funds investment agreement to the structure of the rule, we think it is important to require it of every fund unless the same adviser is the primary adviser to both funds. That is, the exception will not be available when an investment adviser acts as an adviser to one fund and a sub-

to purchase or otherwise acquire, or sell or otherwise dispose of, fund securities in excess of the limits of section 12(d)(1) because they would not have a fund of funds investment agreement effective for the duration of the fund's reliance on the rule. See rule 12d1-4(b)(2)(iv).

³⁵⁸ Rule 12d1-4(b)(2)(iv)(C).

³⁵⁹ See, e.g., Item 28(h) of Form N-1A.

adviser to the other fund in a fund of funds arrangement relying on the rule or as sub-adviser to both funds. We believe that this distinction is appropriate because a sub-adviser may not have the same access to information or be negotiating from the same position as other advisers. Thus, in situations where an adviser is the primary adviser to the acquired fund and serves as the sub-adviser to the acquiring fund, a fund of funds investment agreement would be required. Similarly, funds that do not have an adviser, such as internally managed funds or UITs, always would need to enter into a fund of funds investment agreement. Funds that do have the same adviser must still memorialize the arrangements that led the relevant adviser to make the Fund Finding for each fund under the rule.³⁶⁰

In the 2018 Proposing Release, we noted that an adviser to both an acquiring and acquired fund would owe a fiduciary duty to each of these funds.³⁶¹ As noted above, some commenters suggested that this was a reason to exclude affiliated funds of funds from the proposed redemption limit.³⁶² However, another commenter questioned whether advisers to more than one fund can effectively exercise their fiduciary duty to each fund independently of the other fund.³⁶³ Advisers must act in accordance with their fiduciary duties to each respective fund, which should address the conflicts of interests advisers face when acting as an adviser to both the acquiring and acquired funds. Because of this, and the requirement to make the Fund Findings, we believe that it is unnecessary to apply the fund of funds investment agreement requirement to funds having the same adviser. In cases where an adviser believes that it cannot satisfy its fiduciary duty to both funds in a fund of funds arrangement, the adviser should not enter into the arrangement.

We also are not exempting all funds within the same group of investment companies from the fund of funds investment agreement requirement, as suggested by a number of commenters in relation to the more-restrictive proposed redemption limit.³⁶⁴ While some funds within the same group may

³⁶⁰ Rule 12d1-4(c)(2). See also *supra* section II.C.4.

³⁶² See Wells Fargo Comment Letter; Thrivent Comment Letter; SIFMA AMG Comment Letter; see also John Hancock Comment Letter; MFS Comment Letter; Ropes Comment Letter.

³⁶³ See CFA Comment Letter.

³⁶⁴ See *supra* footnote 216 and accompanying text.

have effective communication and controls such that a fund of funds investment agreement may seem duplicative, not all do. As we noted above, two funds in the same group of investment companies could have two different advisers and two different boards satisfying their fiduciary duties to their respective funds and shareholders. In some cases, the investment advisers to funds in the same group of investment companies are not even affiliated persons.³⁶⁵ Further, these funds are likely subject to different compliance policies and procedures and, as a result, we believe that a fund of funds investment agreement is an effective mechanism to memorialize the arrangement in these circumstances.

In summary, we believe that the requirement to enter into a fund of funds investment agreement, coupled with the expanded Fund Findings, are collectively a more effective approach than the proposed redemption limit to address undue influence concerns from redemptions. As compared to the proposed redemption limit that applied to all fund of funds arrangements, the conditions we are adopting provide funds with the ability to tailor their limits or protections to specific arrangements to better promote protection against potential undue influence and are more similar to requirements in orders providing section 12(d)(1) relief for fund of funds. As a result, we believe the rule, as adopted, will be an effective, less burdensome approach.

3. Complex Structures

A concern underlying section 12(d)(1) is that complex multi-tier fund structures could lead to excessive fees and investor confusion. To address this concern rule 12d1–4 will include conditions designed generally to restrict fund of funds arrangements to two-tiers, largely as proposed. Additionally, as proposed, rule 12d1–4 includes exceptions to the two-tier limitation that are limited in scope and designed to capture circumstances that do not raise the concerns underlying section 12(d)(1) of the Act. In response to concerns raised by commenters, however, we are adding an additional exception that will permit an acquired fund to invest up to 10% of its total assets in other funds without restriction on the purpose of the investment or types of underlying funds, or the size of the investment in a particular underlying fund (the “10% Bucket”). The final rule’s conditions

seek to permit innovation and efficient portfolio management while limiting the potential for confusing structures and duplicative fees.

a. General Prohibition on Three-Tier Structures

Rule 12d1–4 includes conditions designed to restrict fund of funds arrangements to two tiers (other than in limited circumstances), generally as proposed. Commenters were mixed with respect to the proposed rule’s general prohibition on three-tier structures. Some commenters agreed with the Commission that multi-tier structures have the potential to confuse investors and generate duplicative fees.³⁶⁶ One commenter, for example, supported a broad restriction that limits fund of funds arrangements to two levels.³⁶⁷ Some commenters generally supported a prohibition on three-tier structures, but also advocated for broad-based exceptions for certain acquired fund investments in underlying funds that had been permitted under historical exemptive relief and included in the proposed rule.³⁶⁸

Other commenters stated that multi-tier structures may be beneficial and recommended that the Commission allow such structures by relying on other aspects of the rule to enhance investor protection.³⁶⁹ Some commenters recommended that the rule permit certain specific multi-tier structures, stating that such structures are beneficial to fund shareholders and do not raise the concerns section 12(d)(1) was designed to prevent.³⁷⁰

³⁶⁶ See, e.g., CFA Comment Letter; Invesco Comment Letter; Voya Comment Letter.

³⁶⁷ CFA Comment Letter.

³⁶⁸ See, e.g., Invesco Comment Letter (recommending exceptions for securities lending programs and cash sweep arrangements), Voya Comment Letter (recommending exceptions for master-feeder arrangements, short-term cash management, interfund borrowing and lending, and investments in wholly owned subsidiaries).

³⁶⁹ Morningstar Comment Letter (advising against a general prohibition on three-tier structures in favor of fee and expense disclosure in prospectuses and annual reports); TRP Comment Letter (stating that the proposed rule’s requirements that an adviser evaluate the complexity of the structure and engage in a best interest finding are sufficient without a broader prohibition on three-tier structures).

³⁷⁰ See, e.g., ICI Comment Letter (recommending that the rule include an expanded list of permitted multi-tier fund of fund arrangements that could be beneficial to shareholders); Fidelity Rutland Comment Letter (recommending that the rule permit the use of affiliated funds commonly created by an adviser for the purpose of efficiently managing exposure to a specific asset class (commonly referred to as “central funds”)); Ropes Comment Letter (recommending that the rule permit three-tier structures where the underlying fund is an ETF or where all three funds in the structure are in the same group of investment companies); Comment Letter of Davis Polk &

Similarly, one commenter wrote that the proposed three-tier condition was too rigid and would constrain legitimate three-tier arrangements.³⁷¹ Further, some commenters noted that the proposed condition would require restructuring of certain fund of funds arrangements, resulting in additional costs for investors and limiting the variety of investment strategies available in the marketplace.³⁷² Some commenters also recommended that the three tier limitations should not apply to acquired fund investments in private funds, since section 12(d)(1) does not restrict a fund from investing in private funds.³⁷³

As an alternative to the three-tier condition, some commenters suggested that the Commission require the acquiring fund adviser to engage in a best interest determination and enhanced board reporting on the use of complex structures.³⁷⁴ Other commenters recommended that the Commission require enhanced investor disclosure rather than restricting fund structures.³⁷⁵

Although we acknowledge that three-tier structures may provide efficient and cost-effective exposure to certain market segments in certain circumstances, we continue to believe that multi-tier structures can obfuscate the fund’s investments, fees, and related risks.³⁷⁶ For example, if an acquiring fund invests in an acquired fund that in turn invests in other funds, an acquiring

Wardwell LLP (May 2, 2019) (“DPW Comment Letter”) (recommending that the rule permit three-tier structures where the underlying fund is a limited life grantor trust).

³⁷¹ TRP Comment Letter (recommending a principles-based approach that would generally permit multi-tier structures subject to the other conditions of the rule).

³⁷² See, e.g., PIMCO Comment Letter; Nuveen Comment Letter; SIFMA AMG Comment Letter.

³⁷³ ICI Comment Letter. See also IPA Comment Letter (recommending that the rule exempt BDC investments in private funds from the general prohibition on three-tier structures); Guggenheim Comment Letter (recommending an exception for structured finance vehicles if the rule generally prohibits acquired funds from investing in private funds).

³⁷⁴ TRP Comment Letter; SIFMA AMG Comment Letter.

³⁷⁵ See, e.g., Morningstar Comment Letter; TRP Comment Letter (suggesting enhancing the proposed report to the board to include a statement that the adviser believes the fund of funds structure and disclosure documents sufficiently mitigate the risk of the three-tier structure being overly confusing to investors). But See CFA Comment Letter (expressing skepticism about the benefit of enhanced disclosures to retail investors) citing Study Regarding Financial Literacy Among Investors As Required by Section 917 of the Dodd-Frank Wall Street Reform and Consumer Protection Act, Staff of the U.S. Securities and Exchange Commission (August 2012).

³⁷⁶ See 2018 FOF Proposing Release, *supra* footnote 6, at 83.

³⁶⁵ See *supra* footnotes 166 through 170 and accompanying text.

fund shareholder could find it difficult to determine the nature and value of the holdings ultimately underlying his or her investment. Accordingly, we continue to believe that it is appropriate to limit the ability of funds to structure multi-tier arrangements in reliance on rule 12d1-4. We also believe that enhanced disclosure, without additional limitations on multi-tier structures, would be insufficient to address potential investor confusion associated with complex structures.³⁷⁷ As discussed below, we have made certain modifications to the final rule, however, that are designed to provide additional flexibility for acquired funds to gain exposure to underlying funds in order to minimize disruption to existing fund structures and preserve some flexibility for efficient multi-tier arrangements.³⁷⁸ We believe that the final rule's three-tier limitation appropriately provides such flexibility and provides protections against complex structures and excessive fees.

b. Limitations on Other Funds' Acquisitions of Acquiring Funds

Rule 12d1-4 includes a condition designed to prevent an acquiring fund from also being an acquired fund under the rule or under section 12(d)(1)(G) of the Act. Specifically, the rule prohibits a fund that is relying on section 12(d)(1)(G) of the Act (15 U.S.C. 80a-12(d)(1)(G)) or rule 12d1-4 from acquiring, in excess of the limits in section 12(d)(1)(A), the outstanding voting securities of an acquiring fund (a "second-tier fund"), unless the second-tier fund makes investments permitted by rule 12d1-4(b)(3)(ii) as discussed below.³⁷⁹ As a result, this condition will limit a fund's ability to create multi-tier arrangements, subject to certain limited exceptions. This condition is generally more comprehensive and, therefore, limiting, than the conditions in our orders, and addresses certain multi-tier arrangements that have emerged.³⁸⁰

³⁷⁷ See *infra* footnotes 388-390 and accompanying text.

³⁷⁸ See, e.g., Guggenheim Comment Letter (predicting that many debt funds that serve as acquired funds would need to be restructured given that such funds hold substantial investments in entities that rely on section 3(c)(1) and 3(c)(7) of the act, such as structured finance vehicles).

³⁷⁹ Rule 12d1-4(a)(3)(i). See also section 12(d)(1)(G)(v) (granting the Commission authority to prescribe rules or regulations with respect to acquisitions under section 12(d)(1)(G) as necessary and appropriate for the protection of investors).

³⁸⁰ See 2018 FOF Proposing Release, *supra* footnote 6, at 77 (noting that our orders do not expressly prohibit a fund from investing in an acquiring fund (*i.e.*, the top tier in a traditional fund of funds structure) beyond the limits in section 12(d)(1)).

This provision, however, will not prevent a fund from investing all of its assets in an acquiring fund in reliance on section 12(d)(1)(E).³⁸¹ We do not believe three-tier structures involving a master-feeder arrangement present the risk that section 12(d)(1) was designed to address. In addition, this condition will not prevent other funds from acquiring the voting securities of an acquiring fund in amounts of 3% or less, which effectively creates a type of three-tier structure that does not raise the concerns that section 12(d)(1) was designed to prevent.³⁸²

Rule 12d1-4's limitation on investments in acquiring funds is generally consistent with the proposed complex structures provision. However, the final rule will not apply the condition only to investments in an acquiring fund that discloses in its registration statement that it may be an acquiring fund for purposes of rule 12d1-4, as proposed.³⁸³ Because rule 12d1-4 will require most funds to enter into a fund of funds investment agreement, and an adviser that manages both acquiring and acquired funds should have information regarding an acquired fund's investments, the final rule will prohibit a fund from investing in an acquiring fund without tying this limitation to registration statement disclosures.³⁸⁴

While several commenters addressed the proposed limit on multi-tier structures generally, no commenters addressed whether the rule should prohibit a fund from investing in an acquiring fund. We continue to believe that concerns of undue influence, complex structures, and excessive fees apply both to three-tier structures where registered funds invest in acquiring funds and three-tier structures where an

³⁸¹ For example, this type of three-tier structure would permit a target date fund (itself an acquiring fund) to simply act as a conduit through which an insurance product separate account invests.

³⁸² A fund could acquire the securities of an acquiring fund within the limits of section 12(d)(1)(A). Funds relying on section 12(d)(1)(F) could acquire up to 3% of the outstanding voting securities in an unlimited number of funds. See section 12(d)(1)(F).

³⁸³ Proposed rule 12d1-4(b)(4)(ii) (prohibiting a fund relying on the rule or section 12(d)(1)(G) of the Act from acquiring the securities of a fund that discloses in its most recent registration statement that it may be an acquiring fund in reliance on proposed rule 12d1-4).

³⁸⁴ We believe funds investing in reliance on section 12(d)(1)(G) likely would have, or be able to obtain, sufficient information to know which other funds within the same group of investment companies are acquiring funds under rule 12d1-4. See 2018 FOF Proposing Release, *supra* footnote 6, at 79. We do not believe that funds within the same group of investment companies will face challenges in obtaining this information because of the potential for information barriers. See *supra* section II.C.1.a.i.

acquired fund invests a substantial portion of its assets in other registered funds. Accordingly, we continue to believe that it is appropriate to limit funds' ability to invest in acquiring funds, subject to the exception for funds relying on section 12(d)(1)(E). We believe this condition will help limit the construction of complex multi-tier structures, while preserving some flexibility for efficient multi-tier arrangements. In addition, rule 12d1-4 does not prohibit other funds from acquiring the voting securities of an acquiring fund in amounts allowed by the Act (*i.e.*, 3% or less). We do not believe that multiple registered funds holding 3% or less of the acquiring fund implicate the historical abuses, such as undue influence, that section 12(d)(1) is intended to prevent.³⁸⁵

c. Limitations on Acquired Funds' Acquisition of Other Funds and Private Funds; Exceptions to Three-Tier Limitation

As proposed, rule 12d1-4 will include a condition designed to limit fund of funds arrangements where the acquired fund is itself an acquiring fund. The rule generally will prohibit arrangements where an acquired fund invests in other investment companies or private funds in excess of the limits in section 12(d)(1)(A). Specifically, the rule states that no acquired fund may purchase or otherwise acquire the securities of an investment company or private fund if immediately after such purchase or acquisition, the securities of investment companies and private funds owned by the acquired fund have an aggregate value in excess of 10% of the value of the total assets of the acquired fund, subject to certain enumerated exceptions.³⁸⁶ We continue to believe that the general limitation on acquired fund investments in other investment companies or private funds is an appropriate means to protect against the creation of overly complex structures.³⁸⁷ While investments by acquired funds in other investment companies or in private funds may provide efficient exposure to a specific asset class or offer other portfolio management advantages, such investments can be confusing to investors and can result in additional

³⁸⁵ See 2018 FOF Proposing Release, *supra* footnote 6, at 78-79.

³⁸⁶ Rule 12d1-4(b)(3)(ii). This prohibition applies to investments in a company that is controlled by an investment company, because such a controlled company is also subject to section 12(d)(1) when it acquires the securities of other investment companies. See section 12(d)(1)(A).

³⁸⁷ See 2018 FOF Proposing Release, *supra* footnote 6, at 81.

fees and expenses.³⁸⁸ We believe that this potential reduction of investment flexibility for acquired funds is appropriate to prevent potential increases in duplicative fees and expenses, and to avoid the investor confusion, that might occur if the final rule did not impose such limits on multi-tier structures.³⁸⁹ As explained above with respect to complex structures generally, we believe a structural three-tier prohibition will help to limit the potential for complex structures that could be difficult for investors to understand even with comprehensive disclosures.³⁹⁰

Largely as proposed, the rule will allow arrangements where an acquired fund invests in other funds in certain enumerated circumstances. These exceptions are limited in scope and are designed to capture circumstances where an acquired fund may invest in another fund to efficiently manage uninvested cash, to address specific regulatory or tax limitations, or to facilitate certain transactions.

³⁸⁸ See Guggenheim Comment Letter. Although one commenter suggested that the rule should not limit an acquired fund's ability to invest in private funds because section 12(d)(1) of the Act does not limit a fund's ability to invest in private funds, (See ICI Comment Letter), the risks of investor confusion and fee layering apply both with respect to an acquired fund's investments in other investment companies and with respect to an acquired fund's investments in private funds in a multi-tier structure. Accordingly, we believe it is appropriate that the complex structures limitations of rule 12d1-4 apply to an acquired fund's investments in private funds. This approach also is consistent with the complex structures limitations in our exemptive orders.

³⁸⁹ We believe it would be more appropriate for the Commission to consider multi-tier structures that do not fall within the confines of rule 12d1-4 through the exemptive application process. This will allow the Commission to weigh the policy considerations of such structures in the context of the facts and circumstances of the specific fund of funds arrangement described in the application. While the expenses of a third-tier fund may represent only a small proportion of the expenses of a top-tier acquiring fund because a third-tier fund would represent only a small proportion of the top tier acquiring fund's investment portfolio, the exemptive application process would permit the Commission to consider whether additional fee- or expense-related conditions would be appropriate in connection with a specific multi-tier arrangement or in connection with a specific investment strategy undertaken through a multi-tier structure.

³⁹⁰ For example, without a general three-tier prohibition, an acquired fund could shift a substantial portion of its assets among underlying funds with different investment exposures and risks, and disclosure at the acquiring fund level may still leave acquiring fund investors unaware of substantial changes to their investment exposure and risks at the acquired fund and underlying fund levels. See CFA Comment Letter (expressing skepticism about the benefit of enhanced disclosures to retail investors); *but see* Morningstar Comment Letter (supporting an enhanced disclosure requirement) and TRP Comment Letter (suggesting that the adviser report to the fund's board that a fund of funds disclosure documents sufficiently mitigate the risk of investor confusion).

Specifically, these categories include securities of another investment company that is: (i) Acquired in reliance on section 12(d)(1)(E) of the Act (*i.e.*, master-feeder arrangements); (ii) acquired pursuant to rule 12d1-1; (iii) a subsidiary wholly-owned and controlled by the acquired fund; (iv) received as a dividend or as a result of a plan of reorganization of a company; or (v) acquired pursuant to exemptive relief from the Commission to engage in interfund borrowing and lending transactions.³⁹¹ These categories have been permitted under existing exemptive orders and addressed in no-action letters, and do not raise the concerns that section 12(d)(1) was designed to address, as discussed further below.

We made several modifications to the enumerated exceptions of the proposed rule to address many of the concerns identified by commenters. Additionally, in a change from the proposal, rule 12d1-4 will include a separate exception that will permit an acquired fund to invest up to 10% of its assets in other investment companies or private funds. As discussed below, we do not believe that permitting these arrangements will raise concerns identified by Congress when enacting section 12(d)(1).³⁹²

i. Master-Feeder Investments

The proposed exception for master-feeder arrangements in reliance on section 12(d)(1)(E) of the Act did not receive substantial public comment and we are adopting as proposed.³⁹³ Under section 12(d)(1)(E) of the Act, the acquired feeder fund in this example is, in effect, a conduit through which the acquiring fund can access the master fund. We do not believe that permitting these arrangements would create an overly complex structure that could confuse investors, nor do we believe that these arrangements involve concerns regarding undue influence or layering of fees.³⁹⁴ For example, an acquired feeder fund's investment in its master fund would be entirely transparent because the feeder fund would disclose the master fund's

³⁹¹ Rule 12d1-4(b)(3)(ii).

³⁹² See also 2018 FOF Proposing Release, *supra* footnote 6, pp 80–83 and associated footnotes (describing the enumerated circumstances under which our exemptive orders permitted three tier fund of funds structures and the rationale in support of such structures).

³⁹⁴ See 2018 FOF Proposing Release, *supra* footnote 6, at p. 78.

portfolio holdings in its shareholder reports.

ii. Rule 12d1-1 Investments

The final rule will permit an acquired fund to invest more than 10% of its total assets in investment companies and private funds if such investments are made pursuant to rule 12d1-1. The proposed rule included an exception for short-term cash management purposes pursuant to rule 12d1-1 or exemptive relief from the Commission.³⁹⁵

Several commenters requested clarification or expansion of this proposed exception.³⁹⁶ For instance, two commenters recommended that the Commission remove the phrase “short-term cash management purposes” from the exception because rule 12d1-1 does not include the phrase.³⁹⁷ These commenters suggested there could be a variety of reasons other than short-term cash management that an acquired fund would invest in reliance on rule 12d1-1 that do not raise any additional fund of funds concerns.³⁹⁸ Another commenter requested that the Commission clarify the applicable exemptive relief referenced in the exception, since the Commission also proposed to rescind relevant exemptive relief.³⁹⁹

Some commenters recommended that the final rule eliminate the reference to rule 12d1-1 and instead expand the types of investments that would be permitted for short-term cash management purposes to include short-term bond funds.⁴⁰⁰ Another commenter recommended that the Commission expand the relief to permit acquired funds to equitize cash by investing in other funds, such as certain ETFs.⁴⁰¹ One commenter recommended that the Commission also consider exceptions for securities lending and cash sweep arrangements among affiliates.⁴⁰²

In response to concerns raised by commenters, we have modified this exception to permit an acquired fund to

³⁹⁵ Proposed Rule 12d1-4(b)(3)(ii)(B).

³⁹⁶ See, *e.g.*, ICI Comment Letter; NYC Bar Comment Letter; PIMCO Comment Letter; PGIM Comment Letter.

³⁹⁷ NYC Bar Comment Letter; ICI Comment Letter.

³⁹⁸ ICI Comment Letter; Dechert Comment Letter (acquiring funds may make investments pursuant to rule 12d1-1 for the purpose of complying with asset coverage requirements and other legitimate portfolio management purposes).

³⁹⁹ ICI Comment Letter (noting it is unclear whether investments in short-term bond funds would be permitted under the proposed exception given the rescission of exemptive relief, despite numerous exemptive orders providing relief for investments in short-term bond funds).

⁴⁰⁰ ICI Comment Letter; PIMCO Comment Letter; PGIM Comment Letter.

⁴⁰¹ ABA Comment Letter.

⁴⁰² Invesco Comment Letter.

invest in investment companies and private funds in excess of the section 12(d)(1) limits if such investments are made pursuant to rule 12d1-1.⁴⁰³ By removing the phrase “short-term cash management purposes,” the final rule will provide acquired funds with additional flexibility to invest in funds pursuant to rule 12d1-1 for any investment purpose. We also removed the reference to the phrase “or exemptive relief from the Commission” in order to clarify that the exception for acquired fund investments pursuant to rule 12d1-1 does not incorporate prior exemptive relief that an acquired fund may have received for cash management or collateral management purposes. As described below, we are rescinding this exemptive relief and removed the associated reference from the rule text. Although several commenters requested that the Commission not rescind prior exemptive relief that allows an acquired fund’s investment in short-term bond funds for cash management or collateral management purposes, we believe rule 12d1-4 provides appropriate flexibility for funds to invest for these purposes. Specifically, rule 12d1-4 provides the 10% Bucket, which permits an acquired fund to invest up to 10% of its assets in other investment companies for any investment purposes.

In response to concerns raised by commenters relating to investments to equitize cash, the final rule will permit an acquired fund to invest up to 10% of its assets in other funds to equitize cash or for other investment purposes, pursuant to the 10% Bucket described in section II.C.3.d below.⁴⁰⁴ The exception for investments pursuant to rule 12d1-1 is designed to permit acquired funds to invest in money market funds, which we do not believe raise the concerns that section 12(d)(1) was designed to prevent.⁴⁰⁵

Accordingly, we decline to broaden the rule to permit additional investments under this exception, and clarify that investments are only permissible under this exception to the extent they are made pursuant to rule 12d1-1.

iii. Investments in a Wholly-Owned Subsidiary

We are adopting an exception from the three-tier limitation for investments in funds that are wholly-owned and controlled by the acquired fund, as proposed. Wholly-owned subsidiaries are typically organized under the laws

of a non-U.S. jurisdiction in order to invest in commodity-related instruments and certain other instruments for tax and other reasons.⁴⁰⁶ We requested comment as to whether the rule should include additional limits on acquired funds’ use of subsidiaries, and requested suggestions on the contours of any such limitations.⁴⁰⁷ Commenters did not address this aspect of the proposal, and rule 12d1-4 will include an exception to the general three-tier limitation for investments through such wholly-owned and controlled subsidiaries. Because the wholly-owned subsidiary’s financial statements are consolidated with the financial statements of the acquired fund, we do not believe that this arrangement would be so complex that investors could not understand the nature of such exposure.⁴⁰⁸

iv. Investments Received as a Dividend as a Result of a Plan of Reorganization and Investments Acquired To Engage in Interfund Borrowing and Lending

We continue to believe that it is appropriate to provide exceptions from the three-tier limitation to facilitate certain transactions.⁴⁰⁹ The proposed rule included exceptions for arrangements where an acquired fund receives fund shares as a dividend or as a result of a plan of reorganization. Acquired funds do not acquire such investments to create a multi-tier fund structure. Rather, a fund acquires these investments from a business restructuring unrelated to a fund’s status as an acquired fund under the rule.⁴¹⁰ The proposed rule also included an exception for acquired fund investments entered into pursuant to exemptive relief from the Commission to engage in interfund borrowing and lending transactions. This exception would facilitate certain interfund transactions, subject to conditions specifically designed to address the concerns that

such transactions present under the terms of existing interfund lending orders.⁴¹¹ A commenter supported the proposed rule’s exception of these transactions from the three-tier limitation, and we continue to believe it is appropriate that the rule include these exceptions.⁴¹² Therefore, we are adopting these exceptions as proposed.

d. Ten Percent Bucket

In addition to the enumerated exceptions to the limitation on acquired fund investments, the rule will permit an acquired fund to invest up to 10% of its total assets in other funds, regardless of the size of the investment in any one fund, in order to provide funds with additional flexibility, and thereby permit certain structures that could benefit investors through greater efficiency. For purposes of calculating the 10% Bucket, investments by an acquired fund pursuant to the general exceptions in the section above would not be included. While the proposed rule did not include the 10% Bucket for acquired fund investments in other funds, we requested comment on whether the proposed rule’s limitations were appropriately calibrated to mitigate complex structure concerns, and whether we should adopt different investment limits.⁴¹³ We also requested comment on whether the rule should permit acquired funds relying on section 12(d)(1)(G) to invest in a third-tier fund in order to centralize the portfolio management of floating rate or other instruments.⁴¹⁴

Under rule 12d1-4, an acquired fund might utilize the 10% Bucket for cash management purposes outside of investments made in reliance on rule 12d1-1, to equitize cash, or for any other portfolio management purposes.⁴¹⁵ The 10% Bucket provides flexibility for fund of funds arrangements to evolve, while limiting the complex arrangements that section 12(d)(1) was designed to prevent. If an acquired fund wishes to acquire other underlying funds in excess of the 10% Bucket, the acquired fund may seek exemptive relief. In such circumstances, the Commission would have the opportunity to consider the proposed

⁴⁰⁶ See 2018 FOF Proposing Release, *supra* footnote 6, at pp. 82–83.

⁴⁰⁷ See *id.*, at pp. 84.

⁴⁰⁸ In this type of arrangement, the acquired fund controls the wholly-owned subsidiary and the acquired fund consolidates its financial statements with the wholly-owned subsidiary’s financial statements, provided that U.S. GAAP or other applicable accounting standards permit consolidation and acquired fund’s total annual fund operating expenses include the wholly-owned subsidiaries’ expenses. See, e.g., Consulting Group Capital Markets Fund, et al., Investment Company Act Release Nos. 32940 (Dec. 15, 2017) [82 FR 60463 (Dec. 20, 2017)] (notice) and 32966 (Jan. 9, 2018) (order) and related application.

⁴⁰⁹ See 2018 FOF Proposing Release, *supra* footnote 6, at 82.

⁴¹⁰ See section 12(d)(1)(D) (exempting from section 12(d)(1) securities received as a dividend, as a result of an offer of exchange approved under section 11, or as a result of a plan of reorganization).

⁴¹¹ See, e.g., Franklin Alternative Strategies Funds, et al., Investment Company Act Release Nos. 33095 (May 10, 2018) [83 FR 22720 (May 16, 2018)] (notice) and 33117 (June 5, 2018) (order) and related application (permitting funds to participate in an interfund lending facility).

⁴¹³ See 2018 FOF Proposing Release, *supra* footnote 6, at 84.

⁴¹⁴ See *id.*, at 86.

⁴¹⁵ As an example, an acquired fund could utilize the 10% Bucket to invest in short-term bond funds for cash management purposes.

⁴⁰³ Rule 12d1-4(b)(3)(ii)(B).

⁴⁰⁴ See ICI Comment Letter; PIMCO Comment Letter; PGIM Comment Letter; ABA Comment Letter.

⁴⁰⁵ See 2006 FOF Adopting Release, *supra* footnote 19, at 9–10.

structure in the context of rule 12d1–4 and weigh the benefits of the proposed structure against the concerns underlying section 12(d)(1).

As discussed above, section 12(d)(1)(A)(iii) of the Act limits an acquiring fund's total investment in other funds to no more than 10% of the acquiring fund's assets. The 10% Bucket effectively applies this 10% limit to acquired funds' investments in underlying funds.⁴¹⁶ The rule as adopted, however, will not impose the 3% and the 5% limits of section 12(d)(1)(A)(i) and (ii), respectively, on investments by an acquired fund in third-tier funds. Accordingly, the rule will not prohibit an acquired fund from holding more than 3% of the outstanding voting securities of any single third-tier fund and will not prohibit an acquired fund from investing more than 5% of its assets in any single third-tier fund. Rather, the 10% Bucket will allow an acquired fund some flexibility to invest up to 10% of its assets in other funds in order to meet its investment objectives while minimizing shareholder confusion by limiting the extent of those acquired fund investments. This limit is intended to prohibit multiple layers of funds, which raise greater concerns of duplication of fees and expenses as well as investor confusion, and reflects a view that funds that invest in another fund beyond the 3% and the 5% limits of section 12(d)(1)(A)(i) and (ii), but not the 10% limit of section 12(d)(1)(A)(iii), are not primarily designed to invest in other funds and do not implicate the concerns that led to the adoption of the 10% limit in 1970.⁴¹⁷ In such a

structure, by which an acquired fund relies on the 10% Bucket to invest in an underlying fund in excess of the section 12(d)(1) limits, the acquired fund and underlying funds must comply with the conditions of rule 12d1–4 as acquiring and acquired funds, respectively, or operate pursuant to another exemption.⁴¹⁸

We proposed a similar provision in 2008 as part of a proposal to allow funds to invest in ETFs beyond the section 12(d)(1) statutory limits.⁴¹⁹ In order to prevent the formation of overly complex structures, the proposed 2008 rule would have prohibited an acquired ETF from investing more than 10% of its assets in other funds and private funds. One commenter on proposed rule 12d1–4 recommended that rule 12d1–4 include a 10% bucket to provide additional flexibility for acquired fund investments in other funds, and noted that the Commission's 2008 rule proposal included such a provision.⁴²⁰

As discussed in the 2018 FOF Proposing Release, our staff has previously stated that it would not recommend enforcement action if an acquired fund in a fund of funds arrangement invested up to 10% of its assets in other funds, including "central funds," which are affiliated funds commonly created by an adviser for the purpose of efficiently managing exposure to a specific asset class.⁴²¹

House Report"); S. Rep. No. 184, 91st Cong., 1st Sess. 29 (1969) ("1970 Amendments Senate Report"). By imposing the 10% limit in section 12(d)(1)(A)(iii) as part of the 1970 amendments to the Act, Congress distinguished between investment companies that invest less than 10% of their assets in other investment companies, on the one hand, and fund holding companies whose primary purpose is the acquisition of shares of other registered investment companies, on the other.

⁴¹⁸ For example, if an acquired fund invests 10% of its total assets in a third-tier underlying fund, and the investment by the acquired fund accounts for 20% of the voting stock of the underlying fund, the acquired fund and the underlying fund would be required to comply with the conditions of rule 12d1–4 as an acquiring fund and acquired fund, respectively.

⁴¹⁹ 2008 ETF Proposing Release, *supra* footnote 18, at n.225 and accompanying text (requiring an acquired ETF to have a disclosed policy that prohibits it from investing more than 10% of its assets in other investment companies in reliance on section 12(d)(1)(F) and 12(d)(1)(G) of the Act).

⁴²⁰ ICI Comment Letter ("Allowing for this exception generally would permit the structures contemplated by the recent no-action letters and the 2008 Commission proposal, and permit acquired funds to have additional limited ability to invest in other funds when such investments would not exceed the basic 10 percent limit included in Section 12(d)(1)(A)(iii) to protect against overly complex structures.").

⁴²¹ 2018 FOF Proposing Release, *supra* footnote 6, at 86. See Franklin Templeton Investments, Staff No-Action Letter (pub. avail. April 3, 2015) ("Franklin Templeton No-Action Letter"). In the Franklin Templeton No-Action Letter, the staff stated it would not recommend that the

However, the staff stated its position in light of several considerations, including that: (a) An acquired fund would not exceed the 5% limit in section 12(d)(1)(A)(ii) with respect to an investment in shares of a single central fund or the 10% limit in 12(d)(1)(A)(iii) with respect to investments in underlying investment companies generally; (b) management fees and other fees that were subject to limits; (c) acquisitions by the central fund in other investment companies or private funds that were subject to limits; (d) a requirement that shares of the central fund be sold solely to the funds within the same group of investment companies; and (e) the board of directors of each of the funds would consider the reasons for the proposed investments in the central fund and the benefits expected to be realized from such investments.⁴²² In a subsequent letter, the staff stated that it would not recommend enforcement action if an acquired fund invested, solely for short-term cash management purposes, up to 25% of its assets in a central fund that is a fixed-income fund that could have a dollar-weighted average portfolio maturity of up to 3 years.⁴²³

Several commenters advocated that the final rule permit acquired funds to invest in central funds.⁴²⁴ Commenters noted that central funds are frequently used for cash management purposes, but

Commission take any enforcement action under sections 12(d)(1)(A) and (B) (and other sections of the Act) if an acquiring fund relying on section 12(d)(1)(G) purchases or otherwise acquires shares of an underlying fund that, in turn, purchases or otherwise acquires shares of a central fund. The Franklin Templeton No-Action Letter also included a representation that an acquired fund's adviser would waive fees on assets invested in underlying central funds.

⁴²² Franklin Templeton No-Action Letter.

⁴²³ Thrivent Financial for Lutherans and Thrivent Asset Management LLC, Staff No-Action Letter (pub. avail. Sep. 27, 2016) ("Thrivent No-Action Letter"). The circumstances of the Thrivent No-Action Letter did not involve a limitation on acquired funds exceeding the 5% limit in section 12(d)(1)(A)(ii) with respect to an investment in shares of a single central fund, and included a representation that the central funds would not charge advisory fees. See *id.* Rule 12d1–4(b)(3)(ii)(B) provides cash management flexibility by permitting an acquired fund to invest in other investment companies or private funds beyond the 10% limit if the acquired fund makes such investments in reliance on rule 12d1–1.

⁴²⁴ Comment Letter of MFS Investment Management (May 2, 2019); Fidelity Comment Letter; PGIM Comment Letter (cash management); ICI Comment Letter (short-term bond funds); Thrivent Comment Letter (25% of its total assets in one or more short-term bond funds); Guggenheim Comment Letter (short-term bond funds); Dechert Comment Letter (short-term bond funds); NYC Bar Comment Letter (money market funds); Fidelity Rutland Trust Comment Letter; SIFMA AMG Comment Letter; Comment Letter of Capital Research and Management Company (Jan. 8, 2019) ("Capital Group (2) Comment Letter").

⁴¹⁶ Like the limits under section 12(d)(1) of the Act, the 10% Bucket is an acquisition test. Accordingly, if an acquired fund holds more than 10% of its assets in other underlying funds due to market movements it could not invest any additional assets in underlying funds, but the 10% Bucket would not require the acquired fund to dispose of its existing investments in underlying funds to under 10% of its assets. Further, if an existing acquired fund holds more than 10% of its total assets in other funds pursuant to an existing exemptive order, the acquired fund would not be required to dispose of those holdings after the rescission of its exemptive order and the effective date of the rule. However, the acquired fund could invest additional assets in underlying funds only in accordance with the terms of the rule.

⁴¹⁷ See Reporting Modernization Adopting Release, *supra* footnote 56, at 81936. See also PPI Report *supra* footnote 64, at page 322 (describing concerns about the organization and operation of registered fund holding companies whose primary purpose is the acquisition of shares of other registered investment companies). The House and Senate Reports that accompanied the 1970 amendments to the Act describe concerns about "fundholding companies" whose portfolios consist entirely or largely of the securities of other investment companies. See H.R. Rep. No. 1382, 91st Cong., 2d Sess. 28 (1970) ("1970 Amendments

could also be used to gain exposure to any asset class or sector.⁴²⁵ Several commenters recommended that the rule permit acquired funds to invest in private funds, structured finance vehicles, and other entities that rely on sections 3(c)(1) or 3(c)(7) of the Act that are not traditionally considered pooled investment vehicles.⁴²⁶ Other commenters requested an exception for acquired fund investments in ETFs.⁴²⁷ While the final rule does not incorporate prior staff positions regarding acquired fund investments in central funds, the rule provides substantial flexibility for fund groups to continue to utilize central funds within the 10% Bucket. The 10% Bucket allows acquired funds to gain exposure to any asset class or sector through investments in affiliated or unaffiliated underlying investment companies and private funds without imposing many of the limitations that were associated with prior staff positions in this area.

As we discussed in the 2018 FOF Proposing Release, some existing multi-tier structures may be required to modify their investments to ensure compliance with rule 12d1–4.⁴²⁸ For example, as of June 2018, we identified 231 three-tier structures for which both the first- and second-tier funds invested in other funds beyond the limits in section 12(d)(1).⁴²⁹ Such multi-tier arrangements may need to restructure their holdings over time to continue to maintain the same investment, to the extent that the acquired funds in such structures invest more than 10% of their assets in underlying funds, exclusive of investments in underlying funds made pursuant to the enumerated exceptions described above.⁴³⁰

We agree with commenters that additional flexibility to enter into multi-tier arrangements could lead to

efficiencies and cost savings for fund investors. However, unlimited ability to enter into multi-tier arrangements could lead to complex structures in which an acquiring fund shareholder finds it difficult to determine the nature and value of the holdings ultimately underlying his or her investment. We do not believe that a 25% limit would be appropriate for investments in underlying funds in pursuit of any investment purpose because such a limit is based on considerations related to investments in central funds for short-term cash management purposes. In addition, such a limit would be far in excess of the 10% limit that Congress enacted in 1970 in response to its concerns about “fund holding” companies.⁴³¹ Accordingly, rule 12d1–4 provides flexibility for acquired funds to invest in private funds, structured finance vehicles, central funds, ETFs, and other investment funds up to a 10% limit, consistent with the 10% limit set forth in section 12(d)(1). We believe that this 10% Bucket, when combined with the enumerated exceptions discussed above, will provide flexibility for beneficial multi-tier arrangements while limiting the harms that Congress sought to prevent.

4. Recordkeeping

The final rule will require the acquiring and acquired funds that participate in fund of funds arrangements in accordance with the rule to maintain and preserve certain written records for a period of not less than five years, the first two years in an easily accessible place. These records include: (i) A copy of each fund of funds investment agreement that is in effect, or was in effect in the past five years, and any amendments thereto; (ii) a written record of the relevant Fund Finding made under the rule and the basis therefor within the past five years; and (iii) the certification from each insurance company required by the rule.⁴³² These requirements are largely as proposed, with the addition of fund of funds investment agreement records as these agreements were not part of the proposal. Also, to match the expansion of the Fund Findings requirement, both acquiring and acquired funds will need to keep records of the applicable evaluations and findings under the final rule. We also are not adopting the proposed requirement to keep the reports provided to the board of directors regarding management

company findings, as we believe that this would be duplicative with the requirements of rule 31a–1, particularly the requirements to keep minute books of directors’ meetings and advisory material received from the investment adviser.⁴³³ We did not receive comments on the recordkeeping provisions of the proposed rule.⁴³⁴

Funds and UITs currently have compliance program-related recordkeeping procedures in place that incorporate this type of retention period, and consistency with that period minimizes compliance burdens to funds related to the preservation of the records.⁴³⁵ Although the retention period would differ from the required period for UIT findings under rule 22e–4 and the general recordkeeping requirements in rule 31a–2, we believe it is appropriate to have consistent recordkeeping requirements under rule 12d1–4.⁴³⁶ We believe that these recordkeeping requirements allow for external examinations of compliance with this condition without placing an undue burden on the funds. Moreover, because the fund of funds investment agreement sets forth the relevant material terms of the fund of funds arrangement specific to particular acquiring funds and acquired funds, we believe it is appropriate to include it as part of a fund’s recordkeeping requirements.

D. Rescission of Rule 12d1–2 and Amendment to Rule 12d1–1

1. Rescission of Rule 12d1–2

We are rescinding rule 12d1–2, as proposed, to create a more consistent and efficient regulatory framework for the regulation of fund of funds arrangements. As discussed above, section 12(d)(1)(G) allows a registered open-end fund or UIT to acquire an unlimited amount of shares of other open-end funds and UITs that are in the same “group of investment companies.” A fund relying on this exemption is subject to certain conditions, including

⁴³³ Rule 31a–1(b)(4) and (11).

⁴³⁴ We received comments on the substantive elements underlying the proposed recordkeeping requirements. See *supra* section II.C.2.b (discussing proposed findings and determinations requirements and related comments).

⁴³⁵ The retention period is consistent with the period provided in rule 38a–1(d).

⁴³⁶ See rule 22e–4(c) (requiring a UIT to maintain, for the life of the UIT and for five years thereafter, a record of the determination that the portion of the illiquid investments that the UIT holds or will hold at the date of deposit that are assets is consistent with the redeemable nature of the securities it issues). See also Investment Company Liquidity Risk Management Programs, Investment Company Act Release No. 32315 (Oct. 13, 2016) [81 FR 82142 (Nov. 18, 2016)]; 2018 FOF Proposing Release, *supra* footnote 6, at 69.

⁴²⁵ See, e.g., Capital Group (2) Comment Letter (describing central fund investments in investment-grade corporate bonds, mortgage-backed securities and high yield securities).

⁴²⁸ 2018 FOF Proposing Release, *supra* footnote 6, at 150.

⁴²⁹ *Id.*

⁴³⁰ As noted above, because the 10% Bucket is an acquisition test, if an acquired fund holds more than 10% of its assets in other underlying funds pursuant to an existing exemptive order, the acquired fund would not be required to dispose of those holdings after the rescission of its exemptive order and the effective date of the rule. However, the acquired fund could invest additional assets in underlying funds only in accordance with the terms of the rule.

⁴³¹ See 1970 Amendments House Report; 1970 Amendments Senate Report *supra* footnote 417 and accompanying text.

⁴³² Rule 12d1–4(c).

a condition limiting the types of securities an acquiring fund can hold, in addition to the shares of funds in the same group of investment companies, to government securities and short-term paper.⁴³⁷ Congress designed this limit to restrict the use of this exemption to a “bona fide” fund of funds, while providing the fund with a source of liquidity to redeem shares.⁴³⁸

In 2006, the Commission exercised its exemptive authority to adopt rule 12d1–2.⁴³⁹ Rule 12d1–2 codified, and in some cases expanded, three types of relief that the Commission provided for fund of funds arrangements that did not conform to the section 12(d)(1)(G) limits. Specifically, rule 12d1–2 permitted a fund relying on section 12(d)(1)(G) to: (i) Acquire the securities of other funds that are not part of the same group of investment companies, subject to the limits in section 12(d)(1)(A) or 12(d)(1)(F);⁴⁴⁰ (ii) invest directly in stocks, bonds, and other securities;⁴⁴¹ and (iii) acquire the securities of money market funds in reliance on rule 12d1–1.⁴⁴² Rule 12d1–2 was designed to provide a fund relying on section 12(d)(1)(G) with greater flexibility to meet its investment objective when the risks that lead to the restrictions in section 12(d)(1) are minimized.⁴⁴³ The Commission stated that the investments permitted under rule 12d1–2 did not raise additional concerns under section 12(d)(1)(G) because: (i) They were not investments in funds; or (ii) they represented fund investments that are limited in scope (*i.e.*, cash sweep arrangements under rule 12d1–1) or amount (*i.e.*, up to the limit in section 12(d)(1)(A) or 12(d)(1)(F)).⁴⁴⁴

⁴³⁷ See 15 U.S.C. 80a–12(d)(1)(G)(i)(II). The acquired fund also must have a policy against investing in shares of other funds in reliance on section 12(d)(1)(F) or 12(d)(1)(G) to prevent multi-tier structures, and overall distribution expenses are limited to prevent excessive sales loads.

⁴³⁸ See Fund of Funds Investments, Investment Company Act Release No. 26198 (Oct. 1, 2003) [68 FR 58226 (Oct. 8, 2003)].

⁴³⁹ See 2006 FOF Adopting Release, *supra* footnote 19.

⁴⁴⁰ See rule 12d1–2(a)(1).

⁴⁴¹ See rule 12d1–2(a)(2). Rule 12d1–2 limits investments to “securities.” The Commission has issued a series of exemptive orders that allow a fund relying on section 12(d)(1)(G) to invest in financial instruments that may not be “securities.” These orders provide that the funds will comply with rule 12d1–2, but for the ability to invest in a portion of their assets in these other investments. See, *e.g.*, Van Eck Associates Corp., *et al.*, Investment Company Act Release Nos. 31547 (Apr. 6, 2015) [80 FR 19380 (Apr. 10, 2015)] (notice) and 31596 (May 6, 2015) (order) and related application.

⁴⁴² 17 CFR 270.12d1–2(a)(3).

⁴⁴³ 2006 FOF Adopting Release, *supra* footnote 19.

⁴⁴⁴ *Id.*

We have also granted exemptions that permit funds to invest in funds within the same group of investment companies as an alternative to the requirements of section 12(d)(1)(G) and rule 12d1–2.⁴⁴⁵ Funds relying on these orders could invest in the same group of related investment companies and unaffiliated funds without regard to the limitations in sections 12(d)(1)(A) or 12(d)(1)(F). In addition, funds relying on our exemptive orders could invest to a greater extent in funds that were not part of the same group of investment companies and in other investments. Funds relying on exemptive relief also could invest in closed-end funds to a greater extent than funds relying on section 12(d)(1)(G) combined with rule 12d1–2 and could invest in other financial instruments that may not be securities within the meaning of section 2(a)(36) of the Act, such as derivatives.⁴⁴⁶

Our exemptive orders include conditions that differ from the conditions in section 12(d)(1)(G) and the conditions within those orders also differ depending on whether the investment involves an acquired fund that is in the same group of investment companies.⁴⁴⁷ The orders generally subject investments in funds that are not part of the same group of investment companies to a broader set of conditions designed to protect investors from the harms Congress sought to address by

⁴⁴⁵ See Janus Investment Fund, *et al.*, Investment Company Act Release Nos. 31753 (Aug. 13, 2015) (notice) and 31808 (Sept. 9, 2015) (order) and related application (“Janus Investment Fund”).

⁴⁴⁶ A fund relying on section 12(d)(1)(G) and rule 12d1–2 could acquire no more than 3% of a closed-end fund’s outstanding voting securities. A fund relying on an exemptive order could acquire an unlimited amount of the voting securities of a closed-end fund in the same group of investment companies and up to 25% of the outstanding voting securities of other closed-end funds. Further, funds are limited to investments in securities if they rely upon section 12(d)(1)(G) and rule 12d1–2. See *supra* footnote 441.

⁴⁴⁷ See, *e.g.*, Northern Lights Fund Trust, *et al.*, Investment Company Act Release Nos. 32973 (Jan. 23, 2018) [83 FR 4081 (Jan. 29, 2018)] (notice) and 33008 (Feb. 21, 2018) (order) and related application (setting forth conditions applicable to affiliated fund of funds arrangements, including that: (1) any sales charges or service fees charged with respect to shares of acquiring funds would not exceed the limits set forth in FINRA Rule 2341; and (2) no acquired fund will acquire securities of any other investment company in excess of the limitations of section 12(d)(1) except to the extent that such acquired fund (a) acquires such securities in compliance with section 12(d)(1)(E), (b) receives such securities as a dividend or as the result of a plan of reorganization, or (c) acquires such securities pursuant to exemptive relief from the Commission permitting the acquired fund to acquire the securities of investment companies for short-term cash management purposes or to engage in interfund lending).

enacting section 12(d)(1).⁴⁴⁸ Under this existing framework, substantially similar fund of funds arrangements are subject to different limitations and conditions.⁴⁴⁹ This has resulted in an inconsistent and inefficient regulatory framework where the relief on which a fund of funds arrangement is relying is not always clear to other funds, investors, or regulators.

Commenters generally opposed the proposed rescission of rule 12d1–2.⁴⁵⁰ Some commenters stated that rescinding rule 12d1–2 would disrupt investment strategies, opportunities, and operations, and lead to an increase in funds’ compliance or investing costs.⁴⁵¹ Commenters also suggested, as discussed in more detail below, that the rescission of rule 12d1–2, along with the rescission of exemptive orders and withdrawal of staff letters, would impact funds’ ability to utilize certain fund structures, such as three-tier central fund arrangements.⁴⁵² Several commenters suggested a number of changes to proposed rule 12d1–4 in response to the Commission’s proposed rescission of rule 12d1–2.⁴⁵³ For example, these commenters recommended eliminating or substantially restructuring the proposed redemption limit, exempting funds within the same group of investment companies from the proposed redemption limit, or permitting continued reliance on rule 12d1–2 for funds in the same group of investment companies.⁴⁵⁴ In particular, two of these commenters raised specific concerns about the proposed redemption limit’s impact on fund of funds arrangements if the Commission rescinds rule 12d1–2.

Some commenters recommended that the Commission retain rule 12d1–2 and codify existing exemptive orders permitting funds relying on rule 12d1–2 to enter into derivatives and financial

⁴⁴⁸ See *supra* footnote 446 and accompanying text (regarding conditions applicable to unaffiliated acquired funds).

⁴⁴⁹ See *supra* footnote 26.

⁴⁵¹ See, *e.g.*, Allianz Comment Letter; Thrivent Comment Letter; PIMCO Comment Letter; ABA Comment Letter; SIFMA AMG Comment Letter.

⁴⁵² See generally PIMCO Comment Letter.

⁴⁵³ See, *e.g.*, Allianz Comment Letter; Thrivent Comment Letter; NYC Bar Comment Letter; ABA Comment Letter; BlackRock Comment Letter; PIMCO Comment Letter; Fidelity Rutland Comment Letter; PGIM Comment Letter; SIFMA AMG Comment Letter.

⁴⁵⁴ See, *e.g.*, NYC Bar Comment Letter; PIMCO Comment Letter; SIFMA AMG Comment Letter.

instruments.⁴⁵⁵ As an alternative, some commenters suggested that the Commission “grandfather” existing fund of funds arrangements that rely on rule 12d1–2 if the Commission rescinds the rule.⁴⁵⁶ Commenters stated that rescinding rule 12d1–2 would increase costs and operational inefficiencies by requiring existing fund of funds arrangements to either: (i) Comply with section 12(d)(1)(G) of the Act and eliminate any investments other than those permitted under the statute; or (ii) operate in accordance with rule 12d1–4 and restructure to comply with the proposed redemption limit and complex structure limitations.⁴⁵⁷

We continue to believe that it is necessary to rescind rule 12d1–2 in order to harmonize the overall regulatory structure and create a consistent and efficient regulatory framework for the regulation of fund of funds investments. The rescission of rule 12d1–2 will eliminate some of the flexibility of funds relying on section 12(d)(1)(G) to: (i) Acquire the securities of other funds that are not part of the same group of investment companies, subject to the limits in section 12(d)(1)(A) or 12(d)(1)(F); and (ii) invest directly in stocks, bonds, and other securities.⁴⁵⁸ Accordingly, funds that wish to invest in funds within the same group of investment companies beyond the limits in section 12(d)(1)(A), as well as other securities and the securities of the other funds, will no longer be able to rely on section 12(d)(1)(G) and rule 12d1–2.⁴⁵⁹ Instead, acquiring funds will have flexibility to invest in different types of funds and other asset classes under rule 12d1–4 under a single set of conditions that are tailored to address the concerns that underlie section 12(d)(1) of the Act.

We believe that this approach will enhance investor protection by subjecting more funds of funds arrangements to the conditions in rule

12d1–4. As we discussed in the 2018 FOF Proposing Release, the purpose of this rule is to streamline and enhance the regulatory framework applicable to fund of funds arrangements. As we have exercised our statutory authority to exempt fund of funds arrangements, we have created a regulatory regime where substantially similar fund of funds arrangements are subject to different conditions. The rule reflects decades of experience with fund of funds arrangements, and will subject funds that operate in accordance with it to a tailored set of conditions that we believe will help protect investors from the harms Congress sought to address by enacting section 12(d)(1) of the Act. The requirements of the rule are designed to provide investors with the benefits of fund of funds arrangements while protecting them from the historical abuses that section 12(d)(1) is designed to prevent.⁴⁶⁰ We therefore believe that it is crucial that fund of funds arrangements follow the protections of rule 12d1–4 and are rescinding rule 12d1–2. We also are not exempting or providing other relief for existing investments for these funds for similar reasons.

We believe that the tailored conditions in rule 12d1–4 are appropriate to protect investors and create a harmonized fund of funds regulatory regime. We further believe that for fund of funds arrangements currently relying on rule 12d1–2, reliance on rule 12d1–4 will be less disruptive to their arrangements than suggested by commenters because the final rule does not include a redemption limit and permits an acquired fund to invest up to 10% of its total assets in other funds.⁴⁶¹ Additionally, rule 12d1–4 includes tailored conditions for fund of funds arrangements in the same group of investment companies by excepting them from the rule’s control and voting conditions.

As proposed, in order to limit the hardship that the rescission of rule 12d1–2 could have on existing fund of funds arrangements, we are adopting a one-year period after the effective date before rule 12d1–2 is rescinded. We did

not receive comment on this aspect of the proposed rescission of rule 12d1–2. We believe that one year is adequate time for funds relying on current rule 12d1–2 to bring their future operations into conformity with section 12(d)(1)(G) or rule 12d1–4. We also decline to exempt existing funds relying on rule 12d1–2 past this one-year period, as suggested by some commenters,⁴⁶² because it would add unnecessary complexity to the regulatory framework and potentially create an uneven playing field for funds based on differing rule conditions, as discussed above.

2. Amendment to Rule 12d1–1

We are adopting an amendment to rule 12d1–1 under the Act, as proposed, to allow funds relying on section 12(d)(1)(G) to also rely upon the rule. This provides these funds with continued flexibility to invest in money market funds outside of the same group of investment companies despite the rescission of rule 12d1–2.⁴⁶³ Comments received on this aspect of the proposal supported it.⁴⁶⁴

We continue to believe that such investments in money market funds do not raise the concerns that underlie section 12(d)(1).⁴⁶⁵ We also believe that retaining this flexibility will help funds in smaller complexes that do not have a money market fund as part of their fund complex invest in an unaffiliated money market fund, subject to the conditions of rule 12d1–1.⁴⁶⁶ This limited flexibility may be less costly than complying with section 12(d)(1)(G)’s limited conditions.⁴⁶⁷ We are therefore amending rule 12d1–1 as proposed, to provide an exemption from section 12(d)(1)(G) for an investment company to acquire the securities of a money market fund.

⁴⁵⁵ See, e.g., PIMCO Comment Letter; Fidelity Rutland Comment Letter; PGIM Comment Letter; BlackRock Comment Letter; ABA Comment Letter; SIFMA AMG Comment Letter.

⁴⁵⁶ See, e.g., Allianz Comment Letter; Thrivent Comment Letter.

⁴⁵⁷ See, e.g., PIMCO Comment Letter; ABA Comment Letter; NYC Bar Comment Letter; SIFMA AMG Comment Letter.

⁴⁵⁸ Rule 12d1–2(a)(1) and (a)(2). In connection with our proposed amendment to rule 12d1–1 discussed below, funds relying on section 12(d)(1)(G) could continue to invest in money market funds that are not part of the same group of investment companies even with the proposed rescission of rule 12d1–2(a)(3).

⁴⁵⁹ Funds also may continue to rely on section 12(d)(1)(F) to make smaller investments in a number of funds and section 12(d)(1)(E) to invest all of their assets in a master-feeder arrangement. See *supra* footnote 20 and accompanying text.

⁴⁶⁰ See 2018 FOF Proposing Release, *supra* footnote 6.

⁴⁶¹ See NYC Bar Comment Letter (suggesting that eliminating the proposed redemption limit would address commenters’ inflexibility concerns with the proposed rescission of rule 12d1–2); see also SIFMA AMG Comment Letter (suggesting that the Commission should exempt affiliated fund of funds arrangements from the proposed redemption limit). See *supra* section II.C.3 (discussing complex structures including general exceptions to the three-tier limitation and the 10% Bucket provision). See *infra* section V.C.1.a (discussing Form N-PORT data related to the proposed redemption limit).

⁴⁶² See *supra* footnote 456 and accompanying text.

⁴⁶³ Rule 12d1–1(a) provides an exemption from section 12(d)(1)(G) for an investment company to acquire the securities of a money market fund. Rule 12d1–2, which we propose to rescind, provided the same relief.

⁴⁶⁴ See, e.g., BlackRock Comment Letter.

⁴⁶⁵ See 2006 FOF Adopting Release, *supra* footnote 19, at n.23 and accompanying text.

⁴⁶⁶ See *id.*, at section II.A.1(a).

⁴⁶⁷ See, e.g., section 12(d)(1)(G)(i)(III)(bb) (limiting combined sales charges and service fees to limits under current FINRA sales rule); section 12(d)(1)(G)(i)(IV) (requiring the acquired fund to have a policy that prohibits it from acquiring securities of registered open-end investment companies or registered UITs in reliance on section 12(d)(1)(G) or (F)).

E. Disclosures Relating to Fund of Funds Arrangements

1. Amendments to Form N-CEN

Form N-CEN is a structured form that requires registered funds to provide census-type information to the Commission on an annual basis.⁴⁶⁸ Form N-CEN provides both the Commission and the public with enhanced and updated census-type information on a wide-range of compliance, risk assessment, and policy related matters.⁴⁶⁹ We proposed to add a requirement to Form N-CEN that would require reporting if a management company relied on rule 12d1-4 or the statutory exception in section 12(d)(1)(G) during the reporting period. While Form N-CEN already requires a management company to report if it is a fund of funds, we proposed to collect this information in order to better assess reliance on rule 12d1-4 or the statutory exception in section 12(d)(1)(G) by management companies and to assist us with our accounting, auditing and oversight functions. We also proposed to require UITs to report if they relied on proposed rule 12d1-4 or the statutory exception in section 12(d)(1)(G) during the reporting period. In proposing this requirement, we noted that the UIT section of Form N-CEN does not currently require a UIT to identify if it is a fund of funds.⁴⁷⁰

Commenters that addressed the proposed amendments to Form N-CEN supported them,⁴⁷¹ and we are adopting these amendments to the form as proposed.⁴⁷² We believe the amendments we are adopting to the form will help us better assess reliance on rule 12d1-4, or the statutory exception in section 12(d)(1)(G). In turn, this will allow the staff to evaluate whether additional disclosure is needed. These amendments to Form N-CEN will also assist with our accounting, auditing and oversight functions, including compliance with the Paperwork Reduction Act.⁴⁷³

⁴⁶⁸ See, e.g., Reporting Modernization Adopting Release, *supra* footnote 56.

⁴⁷² Items C.7.1. and C.7.m. of Form N-CEN (for management companies) and Items F.18 and F.19 of Form N-CEN (for UITs).

⁴⁷³ We are also making conforming changes to the title of Item C.7. of Form N-CEN to reflect that the item includes a statutory exemption. See amendment to Item C.7. ("Reliance on certain statutory exemption and rules. Did the Fund rely on the following statutory exemption or any of the rules under the Act during the reporting period? (check all that apply)").

2. Acquired Fund Fees and Expenses

An acquiring fund is currently required to disclose the fees and expenses it incurs indirectly from investing in shares of one or more acquired funds. In Form N-1A, for example, an open-end fund investing in another fund is required to include in its prospectus fee table an additional line item titled "Acquired Fund Fees and Expenses".⁴⁷⁴ Since we adopted the AFFE disclosure requirement, some have expressed concerns about the impact of this disclosure on certain acquired funds, including BDCs.⁴⁷⁵ The 2018 FOF Proposing Release requested comment on fees and expenses, including with respect to AFFE disclosure.

Some commenters similarly expressed certain concerns about current AFFE disclosure requirements. For example, several commenters suggested that fee table disclosure should focus on a fund's operating expenses and should not incorporate AFFE.⁴⁷⁶ Some commenters suggested eliminating the inclusion of certain investment-related expenses in fee tables in the prospectus for all types of funds, or moving AFFE disclosure to the risk factors or narrative description of a prospectus.⁴⁷⁷ Several commenters also expressed particular concern about treating BDCs as acquired fund investments and recommended excluding BDC investments from AFFE.⁴⁷⁸

⁴⁷⁴ See Instruction 3(f)(i) to Item 3 of Form N-1A. Other forms, including N-2, N-3, N-4 and N-6 similarly require disclosure relating to AFFE. See, e.g., Instruction 10.a to Item 3.1 of Form N-2. A fund may include AFFE in the line item for "Other Expenses" rather than in a separate line item if the aggregate expenses attributable to acquired funds does not exceed 0.01%.

⁴⁷⁵ See, e.g., ICI Comment Letter to File No. S7-12-18, <https://www.sec.gov/comments/s7-12-18/s71218-4560073-176206.pdf>; House Report to [Omnibus Spending Bill/H.R. 3280] (July 17, 2017), <https://www.congress.gov/congressional-report/115th-congress/house-report/234/1?overview=closed>; Fidelity Management & Research Company, Petition for Rulemaking (Dec. 28, 2006), <https://www.sec.gov/rules/petitions/2006/petn4-528.pdf> ("Fidelity Petition"); see also Comment Letter of the Coalition for Business Development to File No. 812-15065, <https://www.sec.gov/comments/s7-27-18/s72718-6668087-203950.pdf> (Jan. 16, 2020); Comment Letter of Brett Palmer, President, SBIA, et al. to File No. S7-27-18, <https://www.sec.gov/comments/s7-27-18/s72718-6892436-211002.pdf> (Feb. 28, 2020) ("SBIA Comment Letter 2"); Comment Letter of Gwen Moore, Steve Stivers, Brad Sherman and Bill Huizenga, Members of Congress to File No. S7-27-18, <https://www.sec.gov/comments/s7-27-18/s72718-6913308-211215.pdf> (March 5, 2020).

⁴⁷⁷ See, e.g., PIMCO Comment Letter; Invesco Comment Letter; SIFMA AMG Comment Letter.

⁴⁷⁸ See, e.g., SBIA Comment Letter (stating that AFFE disclosure distorts an acquiring fund's

On the other hand, some commenters expressed general support for the current AFFE disclosure requirements in the prospectus fee table.⁴⁷⁹ Two commenters credited AFFE disclosure for providing investors with the necessary information to understand the potential layering of fees in fund of funds arrangements and to compare similar funds and expenses.⁴⁸⁰

We are not addressing AFFE disclosure requirements as part of this rulemaking. Instead, we are considering modifications to AFFE disclosure as part of a broader review of how funds disclose fees in their prospectuses.⁴⁸¹ In this regard, in the Investor Experience Proposal, the Commission requested comment on a proposal to replace the current requirement that AFFE be included in the prospectus fee table of open-end funds regardless of the scope of investments in acquired funds with a more tailored requirement based on the percentage of assets invested in acquired funds.⁴⁸² This amendment, which the Commission proposed in conjunction with other changes to funds' prospectus fee disclosure requirements, would permit open-end funds that invest 10% or less of their total assets in acquired funds to omit AFFE from the fund's bottom line expenses in the fee table and instead disclose the amount of the fund's AFFE in a footnote to the fee table. Open-end funds that invest more than 10% of their total assets in acquired funds would continue to present AFFE as a line item

expense ratio and has disproportionately harmed BDCs because this disclosure requirement has led to funds no longer investing in BDCs and several index providers dropping BDCs from their indexes); Chapman Comment Letter; Nuveen Comment Letter; FS Comment Letter; Chamber of Commerce Comment Letter; Comment Letter of Alternative Credit Council (May 2, 2019) (stating that AFFE disclosure overstates the costs of a fund investing in a BDC because it essentially requires double-counting of a BDC's operating expenses and that because AFFE disclosure has effectively resulted in funds no longer investing in BDCs, it has restricted the market for BDCs, limited institutional ownership of BDCs, and reduced investor choice); ICI Comment Letter; John Hancock Comment Letter.

The Commission, in proposing the AFFE disclosure modifications in the Investor Experience Proposal, considered comments received in connection with the 2018 FOF Proposing Release. *Id.*, at paragraph accompanying n. 608. The comment period for the Investor Experience Proposal closes 60 days after its publication in the **Federal Register**.

⁴⁸² *Id.* at paragraph accompanying n. 615.

in the prospectus fee table, as they do today. The Commission also requested comment on whether to amend AFPE disclosure requirements similarly for other types of registered investment companies.

F. Compliance Dates

The Commission is providing for a transition period for the amendments to Form N-CEN. Specifically, we are adopting compliance dates for our amendment to Form N-CEN of January 19, 2022, one year following the amendment's effective date. All reports on this form filed on or after the compliance date must comply with the amendments. Based on the staff's experience, we believe that this will provide adequate time for affected funds to compile and review the information that must be disclosed.

III. Rescission of Exemptive Relief; Withdrawal of Staff Letters

Pursuant to our authority under the Act to amend or rescind our orders when necessary or appropriate to the exercise of the powers conferred elsewhere in the Act, we are rescinding, as proposed, the exemptive relief permitting fund of funds arrangements that fall within the scope of rule 12d1-4.⁴⁸³ As discussed in more detail below, exemptive relief granted to fund of funds arrangements outside the scope of the rule is not being rescinded.

We proposed to rescind all orders granting relief from sections 12(d)(1)(A), (B), (C), and (G) of the Act with one limited exception. We did not propose to rescind the exemptive orders providing relief from section 12(d)(1)(A) and (B) granted to allow certain interfund lending arrangements.⁴⁸⁴ Interfund lending arrangements allow certain funds within the same complex to lend money to and borrow money from each other for temporary purposes and subject to certain conditions. While such arrangements require exemptive relief from sections 12(d)(1)(A) and (B), among other provisions, we stated that they do not result in the pyramiding of funds or the related potential abuses that the proposed rule was designed to address, and thus they were not included within the scope of the proposed rule.

We also proposed to rescind the exemptive relief from sections 12(d)(1)(A) and (B) that has been included in our ETF and ETMF

orders.⁴⁸⁵ We believed that rescinding this fund of funds relief in the ETF and ETMF orders, as well as more generally, would establish a transparent regulatory framework for these arrangements. As discussed in the 2018 FOF Proposing Release, we expected that the need to comply with the requirements of proposed rule 12d1-4, as opposed to their orders, would not significantly negatively affect the operations of most existing fund of funds arrangements.⁴⁸⁶

Commenters had mixed reactions to our proposal to rescind existing fund of funds exemptive orders. Several commenters supported the proposed rescission of exemptive orders in connection with the adoption of rule 12d1-4, citing the benefits of a standardized rule.⁴⁸⁷ Many other commenters requested that we not rescind existing fund of funds exemptive orders, and instead codify and expand on existing prior exemptive orders.⁴⁸⁸ These commenters stated that our proposal would eliminate a fund's ability to rely on existing fund of funds relief and could result in undue costs and burdens, including potential restructuring of existing arrangements.

Other commenters suggested the Commission take a tailored approach in order to limit disruption to existing fund of funds arrangements.⁴⁸⁹ For example, one commenter requested we rescind only the exemptive orders described in the 2018 FOF Proposing Release.⁴⁹⁰ Many commenters requested additional specificity as to which exemptive orders would be withdrawn, and whether the Commission intended to withdraw relief from provisions of the Act other than section 12(d)(1) in such exemptive orders.⁴⁹¹

⁴⁸⁵ Some of the exemptive orders we have issued to ETFs include relief permitting ETFs to use certain master-feeder arrangements. We rescinded other master-feeder fund relief generally, while continuing to permit ETF master-feeder arrangements to rely on that relief as part of the implementation of rule 6c-11. See 2019 ETF Adopting Release, *supra* footnote 25. In addition, we understand that existing ETMFs currently rely on the master-feeder relief in the orders and did not propose to rescind that relief. See, e.g., Eaton Vance Management, et al., Investment Company Act Release Nos. 31333 (Nov. 6, 2014) (notice) and 31361 (Dec. 2, 2014) (order) ("Eaton Vance Order").

⁴⁸⁶ 2018 FOF Proposing Release, *supra* footnote 6, at 96. See also section II.D.

⁴⁸⁷ See, e.g., MFDF Comment Letter; Morningstar Comment Letter; TRP Comment Letter.

⁴⁹¹ See, e.g., Nationwide Comment Letter; ICI Comment Letter; Voya Comment Letter; TRP Comment Letter; Federated Comment Letter; NYC Bar Comment Letter; Federated Comment Letter;

As discussed in more detail below, several commenters requested that the Commission expand the rule to incorporate individualized relief set forth in certain exemptive orders.⁴⁹² Alternatively, some commenters suggested that the Commission preserve existing orders, and allow current recipients of exemptive relief to follow the conditions of their relief rather than relying on the rule.⁴⁹³ One commenter suggested that the Commission give the holders of exemptive orders at least a one-year period to transition operations or obtain new exemptive relief.⁴⁹⁴

As proposed, and as discussed in more detail below, we are rescinding the fund of funds exemptive orders that fall within the scope of rule 12d1-4. Specifically, we are rescinding exemptive relief that permits investments in funds beyond the limits in 12(d)(1)(A), (B), or (C) of the Act, other than in circumstances that we believe are outside the scope of rule 12d1-4 as discussed below. We are also rescinding exemptive relief under section 12(d)(1)(G) that permits an affiliated fund of funds to invest in assets that are beyond the scope of that statutory provision. We continue to believe that rescinding these orders will help to create a consistent framework for fund of funds arrangements, subject to conditions that appropriately address the concerns underlying section 12(d)(1), including the prevention of overly complex structures for funds of funds. In order to limit the hardship that revocation of these orders could have on existing fund of funds arrangements, however, we are adopting a one-year period after the effective date before rescission to give acquiring and acquired funds relying on these exemptive orders time to conform their operations with the requirements of the rule and rule amendments.

Fund of funds exemptive relief that falls outside the scope of rule 12d1-4, as well as the relevant portions of fund of funds exemptive orders that grant relief for provisions in the Act outside of the scope of this rulemaking, will remain in place. For example, we have issued several exemptive orders that

⁴⁸³ See section 38(a) of the Investment Company Act (15 U.S.C. 80a-37(a)).

⁴⁸⁴ See 2018 FOF Proposing Release, *supra* footnote 6, at 95.

provide relief from sections 17(a) and 17(d) of the Act and rule 17d-1 under the Act that allow a registered fund to invest in private funds.⁴⁹⁵ We are not rescinding the relief from section 17(a) and under section 17(d) and rule 17d-1 granted in these orders. Similarly, we are not rescinding the portions of certain funds of funds exemptive orders that grant relief from section 17(d) of the Act and rule 17d-1 under the Act to enter into fee sharing agreements to avoid duplicative fees.⁴⁹⁶ In addition, to the extent we rescind 12(d)(1) relief, we are also rescinding any related 17(a) relief for the acquisition and redemption of fund shares by another fund. We are not, however, rescinding 17(a) relief permitting sales or redemptions of fund shares in-kind or portfolio transactions between two funds.

The major topical areas of fund of funds exemptive relief that are within the scope of rule 12d1-4 are as follows:

Standard Fund of Funds Relief. Our exemptive relief relating to standard fund of funds arrangements generally grants exemptions from sections 12(d)(1)(A), (B), and (C) of the Act and sections 17(a)(1) and (2) of the Act to permit acquiring funds to invest in acquired funds in excess of the limits of in section 12(d)(1) of the Act.⁴⁹⁷ This relief is rescinded, one year from the effective date of the rule.

Fund of Funds Relief for ETFs and ETMFs. As proposed, the exemptive relief from sections 12(d)(1)(A) and (B) that has been included in our ETF and ETMF orders is rescinded, one year from the effective date of the rule.

ETFs Relying on Rule 6c-11. In 2019, we adopted rule 6c-11 under the

Investment Company Act to permit ETFs that satisfy certain conditions to operate without the expense and delay of obtaining an exemptive order from the Commission under the Act.⁴⁹⁸ In connection with that rulemaking, we rescinded those portions of certain ETF exemptive orders that grant relief related to the formation and operation of an ETF, but we did not rescind the relief provided to ETFs from section 12(d)(1) and sections 17(a)(1) and (a)(2) under the Act related to fund of funds arrangements involving ETFs. The fund of funds exemptive relief for these ETFs is rescinded as well.⁴⁹⁹

Fund of Funds Relief for Non-Transparent ETFs and ETMFs. We also have granted exemptive relief permitting certain actively managed ETFs to operate without being subject to the daily portfolio transparency condition included in other actively managed ETF orders (“non-transparent ETFs”).⁵⁰⁰ These orders include relief from sections 12(d)(1)(A) and (B) of the Act to permit certain fund of funds arrangements. We also have granted relief from sections 12(d)(1)(A) and (B) permitting ETMFs to be an acquired fund in a fund of funds arrangement.⁵⁰¹ We believe that non-transparent ETFs and ETMFs raise the same concerns regarding the pyramiding of funds and the related potential abuses that the rule is designed to address. As a result, relief under section 12(d)(1)(A) and (B) for non-transparent ETFs and ETMFs is rescinded as proposed.⁵⁰²

Fund of Funds Direct Investment Relief. We have granted exemptive relief to permit fund of funds arrangements that rely on section 12(d)(1)(G) of the Act to invest in assets other than funds within the same group of investment

companies, government securities, and short-term paper. Certain exemptive relief granted prior to the adoption of rule 12d1-2 in 2006 permitted funds of funds relying on section 12(d)(1)(G) to invest in securities and other financial instruments.⁵⁰³ Some exemptive orders granted after the adoption of rule 12d1-2 provide relief from rule 12d1-2(a) to the extent necessary to permit an acquiring fund that relies on section 12(d)(1)(G) of the Act to invest in financial instruments that may not be “securities.”⁵⁰⁴ Although some commenters requested we retain the relief for direct investments,⁵⁰⁵ we are rescinding this relief, one year from the effective date of the rule. As discussed above in section II.D, we are rescinding rule 12d1-2 in order to create a more consistent and efficient regulatory framework for the regulation of fund of funds arrangements. We similarly believe that rescinding the direct investment exemptive relief will establish an appropriate, consistent framework for the regulation of these fund of funds arrangements by subjecting them to the conditions of rule 12d1-4 if they continue to invest in assets other than those permitted by section 12(d)(1)(G) of the Act.

Fund of Funds Affiliated Structures. The Commission granted certain exemptive relief to permit an open-end fund or UIT to invest in other open-end funds and UITs that are in the “same group of investment companies” in excess of the limits in section 12(d)(1), subject to certain enumerated conditions.⁵⁰⁶ Some exemptive orders

⁴⁹⁵ See, e.g., Aberdeen Asset Management Inc., et al., Investment Company Act Release Nos. 33058 (March 27, 2018) (notice) and 33080 (April 24, 2018) (order).

⁴⁹⁶ See, e.g., Lord Abbett Investment Trust, et al., Investment Company Act Release Nos. 23088 (March 27, 1998) (notice) and 23122 (April 21, 1998) (order) (granting relief for, among other things, a servicing arrangement under which one or more of the applicant funds may pay a portion of the administrative expenses of another applicant fund).

⁴⁹⁷ The standard fund of funds orders grant an exemption from sections 12(d)(1)(A) and 12(d)(1)(B). See, e.g., Aberdeen Asset Management Inc., et al., Investment Company Act Release Nos. 28429 (Sept. 30, 2008) (notice) and 28475 (Oct. 28, 2008) (order). A subcategory of these standard fund of funds exemptive orders also grant additional relief under section 12(d)(1)(C) to permit investment in closed-end funds beyond the limits imposed by section 12(d)(1)(C). See, e.g., Ares Credit and Income Trust and Ares Capital Management III LLC, Investment Company Act Release Nos. 33243 (Sept. 21, 2018) (notice) and 33275 (Oct. 17, 2018) (order). The rescission of standard fund of funds exemptive orders applies to the orders that grant additional relief under section 12(d)(1)(C), as well, since that relief is within the scope of rule 12d1-4.

⁴⁹⁸ 2019 ETF Adopting Release, *supra* footnote 25, at 8.

⁴⁹⁹ *Id.* We also stated that ETFs relying on rule 6c-11 that do not have exemptive relief from sections 12(d)(1)(A) and (B) may enter into fund of funds arrangements as set forth in recent ETF exemptive orders, provided that such ETFs satisfy the terms and conditions for fund of funds relief in those orders. The 2019 ETF Adopting Release noted that this position would be available only until the effective date of a rule permitting registered funds to acquire the securities of other registered funds in excess of the limits in section 12(d)(1), including rule 12d1-4 if adopted. See *id.* at 130-133. In order to give any ETFs relying on this position sufficient time to come into compliance with rule 12d1-4, however, this position will be available for a one-year period following the effective date of rule 12d1-4.

⁵⁰⁰ Because these non-transparent ETFs do not provide daily portfolio transparency, they do not meet the conditions of rule 6c-11. See 2019 ETF Adopting Release, *supra* footnote 25, at text accompanying n. 192.

⁵⁰¹ See, e.g., Eaton Vance Order, *supra* footnote 485.

⁵⁰² See *supra* footnote 485 noting that master-feeder relief for ETMFs will not be rescinded.

⁵⁰³ See, e.g., Nations Fund Trust, Investment Company Act Release Nos. 24781 (Dec. 1, 2000) (notice) and 24804 (Dec. 27, 2000) (order) (permitting a fund to invest in funds in the same group of investment companies and in other securities (not issued by another fund)).

⁵⁰⁴ See, e.g., Context Capital Advisors, LLC, et al., Investment Company Act Release Nos. 31689 (June 24, 2015) and 31720 (July 21, 2015). As discussed in more detail below, certain staff no-action letters in connection with this rulemaking, including Northern Lights Fund Trust, SEC Staff No-Action Letter (June 29, 2015) (“Northern Lights Letter”) will be withdrawn. The Northern Lights Letter permits an affiliated fund of funds arrangement relying on section 12(d)(1)(G) and rule 12d1-2 to invest a portion of its assets in other financial instruments (e.g., derivatives that are not securities under the Act), consistent with its investment objectives, policies and restrictions.

⁵⁰⁵ See, e.g., Allianz Comment Letter.

⁵⁰⁶ Some of these orders pre-date the implementation of section 12(d)(1)(G), while other orders also included this relief for certain affiliated fund of funds arrangements after the implementation of section 12(d)(1)(G). See, e.g., Franklin Templeton Fund Manager, et al., Investment Company Act Release Nos. 21964 (May 20, 1996) (notice) and 22022 (June 17, 1996) (order); Aberdeen Asset Management Inc., et al., Investment Company Act Release Nos. 28429 (Sept. 30, 2008) (notice) and 28475 (Oct. 28, 2008) (order). See also

also permitted funds of funds to invest in an affiliated closed-end fund.⁵⁰⁷ As with the standard fund of funds relief, we are rescinding the affiliated structure relief. These fund of funds arrangements may rely on section 12(d)(1)(G) or rule 12d1–4 to the extent they intend to purchase other funds in the same group of funds beyond the limits of section 12(d)(1). Additionally, although several commenters requested that the Commission not rescind certain exemptive relief that allows an acquired fund's investment in short-term bond funds for cash management or collateral management purposes,⁵⁰⁸ rule 12d1–4 provides appropriate flexibility for funds to invest for these purposes. Specifically, rule 12d1–4 permits an acquiring fund to invest in any acquired fund in excess of the statutory limits pursuant to the conditions of the rule. Further, rule 12d1–4 provides an exception from the rule's general prohibition against three tiers to permit an acquired fund to invest in an underlying fund pursuant to rule 12d1–1 in excess of the statutory limits, and provides the 10% Bucket, which permits an acquired fund to invest up to 10% of its assets in other investment companies for any investment purposes. Rule 12d1–4 limits the potential for confusing structures and duplicative fees, while providing the flexibility of the 10% Bucket. Accordingly, we believe it is appropriate to rescind this relief, one year from the effective date of the rule. For similar reasons, we believe it is appropriate to rescind the exemptive relief that acquired funds have relied on to invest in “central funds.”⁵⁰⁹ We believe that the 10% Bucket provided in rule 12d1–4, when combined with the enumerated exceptions discussed above, will provide appropriate flexibility for beneficial multi-tier arrangements while limiting the harms that Congress sought to prevent. Accordingly, the central funds exemptive relief falls within the scope of rule 12d1–4 and is rescinded,

supra section II.B for a general discussion of exemptive relief related to affiliated structures.

⁵⁰⁷ See, e.g., Sierra Asset Management Portfolios, *et al.*, Investment Company Act Release Nos. 22842 (Oct. 7, 1997) (notice) and 22869 (Oct. 31, 1997) (order).

⁵⁰⁸ See PGIM Comment Letter (referring to its exemptive order permitting acquired funds (and acquiring funds) to invest in a public or private short-term bond fund for cash management purposes).

⁵⁰⁹ See *supra* footnote 421 and accompanying text describing central funds. See also PIMCO Comment Letter (referring to PIMCO Funds, *et al.*, Investment Company Act Release Nos. 25220 (Oct. 22, 2001) (notice) and 25272 (Nov. 19, 2001) (order)). See also *supra* footnote 424 for commenters addressing central fund arrangements, including related to the Thrivent No-Action Letter.

one year from the effective date of the rule.⁵¹⁰ As discussed above, some existing multi-tier structures, including “central funds” arrangements that currently rely on existing exemptive relief, may be required to modify their investments to ensure compliance with rule 12d1–4.⁵¹¹ However, unlimited ability to enter into multi-tier arrangements could lead to complex structures in which an acquiring fund shareholder finds it difficult to determine the nature and value of the holdings ultimately underlying his or her investment.

Captive Funds. One commenter requested that the Commission retain exemptive orders for fund of funds arrangements that are captive to an affiliated managed account program.⁵¹² This commenter stated these kinds of captive funds of funds are simply conduits that advisers use to deliver a more efficient range of investment strategies and achieve a more consistent allocation of investment strategies across these accounts. We recognize that rescinding such exemptive relief may cause fund of funds arrangements that are captive to an affiliated managed account program to restructure to comply with the conditions of rule 12d1–4.⁵¹³ However, rule 12d1–4 provides appropriate flexibility and conditions for affiliated fund of funds structures, including structures that are captive to an affiliated managed account program. Accordingly, such exemptive relief is rescinded, one year from the effective date of the rule.

We have also given relief from section 12(d)(1) in certain circumstances that we believe are outside the scope of rule

⁵¹⁰ As discussed in more detail below, certain staff no-action letters in connection with this rulemaking, including Franklin Templeton Investments, SEC Staff No-Action Letter (Apr. 3, 2015) (“FTI Letter”) will be withdrawn. The FTI Letter permits underlying funds to rely on 12(d)(1)(G) to invest in a central fund that invests in floating rate securities.

⁵¹¹ See section II.C.3.d, noting that as of June 2018, we identified 231 three-tier structures for which both the first- and second-tier funds invested in other funds beyond the limits in section 12(d)(1) that may need to restructure their holdings over time to continue to maintain the same investment, to the extent that the acquired funds in such structures invest more than 10% of their assets in underlying funds, exclusive of investments in underlying funds that are made pursuant to the enumerated exceptions described above; see also 2018 FOF Proposing Release, *supra* footnote 6, at 150.

⁵¹² Fidelity Comment Letter (referring to Fidelity Rutland Square Trust, *et al.*, Investment Company Act Release Nos. 28259 (Apr. 30, 2008) (notice) and 28287 (May 28, 2008) (order)).

⁵¹³ See section V.C.1.ii for an analysis of the anticipated benefits and costs of rescinding exemptive orders; see also section V.D.1 for the economic analysis of retaining existing exemptive orders.

12d1–4. The major topical areas section 12(d)(1) exemptive relief that we believe are outside the scope of rule 12d1–4 are as follows:

Interfund Lending. As proposed, we are not rescinding the exemptive relief from section 12(d)(1)(A) and (B) granted to allow certain interfund lending arrangements. Commenters generally agreed with this approach.⁵¹⁴ We continue to believe that these arrangements do not result in the pyramiding of funds or the related potential abuses that rule 12d1–4 is designed to address.

Affiliated Insurance Fund Relief. Commenters requested more clarity with respect to certain orders allowing insurance funds to invest in fixed income instruments issued by affiliates. For example, one commenter requested clarification regarding the status of its 2002 exemptive relief, which permits its funds of funds to invest in affiliated and unaffiliated underlying funds, other securities, and a fixed interest contract issued by its affiliate.⁵¹⁵ Another commenter similarly requested clarification whether we are rescinding its exemptive relief, a portion of which allows funds to invest in a guaranteed rate investment contract issued by an affiliate.⁵¹⁶ The orders cited by these commenters grant exemptions from 12(d)(1)(A) and 12(d)(1)(B), as well as from section 17(a) for the purchase of the guaranteed rate investment contract issued by an affiliate. As described above, we are rescinding only the portion of the exemptive orders granting fund of funds relief that falls within the scope of rule 12d1–4. We agree with commenters that the relief granted under sections 6(c) and 17(b) permitting investment in a fixed income instrument issued by an affiliate is distinct from the fund of funds relief granted in these orders. As noted above, we are not rescinding relief under section 17 when the relief does not implicate fund of funds arrangements. Accordingly, we are not rescinding this portion of the exemptive relief, which is unrelated to the fund of funds exemptive relief.

Transaction-Specific Relief. From time to time, we have granted exemptive relief to funds under section 12(d)(1) in order to engage in a transaction that might otherwise violate such provision.

⁵¹⁴ See, e.g., Voya Comment Letter.

⁵¹⁵ Nationwide Comment Letter (referring to Nationwide Life Insurance Co., Investment Company Act Release Nos. 25492 (Mar. 21, 2002) (notice) and 25528 (Apr. 16, 2002) (order)).

⁵¹⁶ Voya Comment Letter (referring to ING Partners Inc., *et al.*, Investment Company Release Nos. 27116 (Oct. 12, 2005) (notice) and 27142 (Nov. 8, 2005) (order)).

In many cases, this relief relates to fund reorganizations.⁵¹⁷ This transaction-specific relief does not involve ongoing fund of funds arrangements where the concerns underlying section 12(d)(1) are most pronounced and where the conditions of rule 12d1–4 will serve to protect investors against those concerns. As a result, we do not believe it is necessary to rescind such relief.

Grantor Trusts. One commenter requested we retain an exemptive order pertaining to current and future automatic common exchange security (“ACES”) trusts.⁵¹⁸ ACES trusts are limited-life, grantor trusts. We have previously granted exemptive relief to funds and private funds to invest in a grantor trust (typically structured as a closed-end fund) in excess of the section 12(d)(1) limits, along with related relief.⁵¹⁹ The grantor trusts in this line of exemptive orders are not marketed to provide investors with either professional investment asset management or the benefits of investment in a diversified pool of assets. As a result, they do not result in the pyramiding of funds or the related potential abuses that the rule is designed to address, and therefore we are not rescinding this relief.

Fund of Funds Arrangements with Managed Risk Provision and other Relief Related to Section 12(d)(1)(E). One commenter requested that we not rescind a fund of funds exemptive order that permits a “managed risk” fund structure.⁵²⁰ This commenter stated that the relief allows an insurance series fund that invests in one underlying fund in excess of the limits in section 12(d)(1)(A) also to invest in cash, cash equivalents, and certain hedging instruments in connection with a risk-management strategy that is specifically designed to reduce the volatility of the acquiring fund. Because of the fund’s investment in certain hedging instruments, the fund cannot rely on section 12(d)(1)(E) of the Act for purposes of an exception from the

general prohibition against three tiers. We are not rescinding exemptive relief from sections 12(d)(1)(A) and (B) of the Act to the extent that the relief effectively allows a feeder fund to rely on section 12(d)(1)(E) without complying with certain aspects of section 12(d)(1)(E) of the Act. Accordingly, we believe this relief is outside the scope of rule 12d1–4 with respect to the treatment of a fund for purposes of the three-tier prohibition.⁵²¹

We continue to believe that the one-year period for the termination of our fund of funds exemptive relief is sufficient to give adequate time for funds relying on impacted exemptive orders to bring their future operations into conformity with section 12(d)(1)(G) or rule 12d1–4.

The Commission does not believe that it is necessary to give individual hearings to the holders of the prior orders or to any other person.⁵²² This rule is prospective in effect and is intended to set forth for the entire industry the Commission’s exemptive standards for these types of fund of funds arrangements. Funds are able to request Commission approval to operate as a fund of funds that does not meet the requirements of the rule.

As discussed in the 2018 FOF Proposing Release, our staff has previously stated that it would not recommend that the Commission take enforcement action in certain situations relating to section 12(d)(1). The 2018 FOF Proposing Release noted that the staff in the Division of Investment Management were reviewing staff letters relating to section 12(d)(1) to determine whether any such letters should be withdrawn in connection with any adoption of this rule. As we noted in the 2018 FOF Proposing Release, some of the letters may be moot, superseded, or otherwise inconsistent with the rule and, therefore, will be withdrawn.

The staff of the Division of Investment Management has issued a line of letters stating that the staff would not recommend enforcement action to the Commission under sections 12(d)(1)(A) or (B) of the Act if a fund acquires the securities of other funds in certain circumstances. We understand that certain industry practices have developed in connection with these letters. In particular, we understand that: (i) Some funds have created three-

tier master-feeder structures for tax management, cash management, or portfolio management purposes; (ii) other funds have invested in assets that may not be securities, but have otherwise complied with the restrictions in rule 12d1–2;⁵²³ (iii) sponsors of UITs have deposited units of existing trusts into portfolios of future UIT series; (iv) foreign pension funds and profit sharing funds, and foreign subsidiaries and feeder funds have invested in other funds beyond the limits of section 12(d)(1); and (v) foreign funds have invested in other funds under section 12(d)(1) to the same extent as private funds.

In the 2018 FOF Proposing Release, we asked that commenters detail their concerns with the withdrawal of any of the letters. Commenters stated preferences for retaining certain no-action letters, including those that relate to three-tier structures, subject to the circumstances described in those letters.⁵²⁴ Some commenters requested that no-action letters relating to a foreign fund that invests in a U.S. fund to comply with section 12(d)(1)(A)(i) but not sections 12(d)(1)(A)(ii) and (iii) not be withdrawn.⁵²⁵ Other commenters suggested that certain no-action letters be retained related to the status of investment vehicles domiciled outside the U.S., where such foreign funds are

⁵²³ The Commission has previously issued exemptive orders to funds that rely on section 12(d)(1)(G) to allow those funds to invest in futures contracts and other financial instruments. *See, e.g.*, KP Funds, *et al.*, Investment Company Act Release Nos. 30545 (June 3, 2013) [78 FR 34413 (June 7, 2013)] (notice) and 30586 (July 1, 2013) (order); Financial Investors Trust and Hanson McClain Strategic Advisors, Inc., Release Nos. 30521 (May 15, 2013) [78 FR 30346 (May 22, 2013)] (notice) and 30554 (order). Following those orders, the staff of the Division of Investment Management issued a no-action letter stating that it would not recommend enforcement action to the Commission under section 12(d)(1)(A) or (B) of the Act against a fund of funds that meets all of the provisions of section 12(d)(1)(G) and rule 12d1–2, except to the extent that it invests in assets that might not be securities under the Act. *See, e.g.*, Northern Lights Letter *supra* footnote 504.

⁵²⁴ *See, e.g.*, Thrivent Comment Letter; ICI Comment Letter.

⁵²⁵ Vanguard Comment Letter. The Commission previously stated that a foreign fund that uses U.S. jurisdictional means in the offering of securities it issues and relies on section 3(c)(1) or 3(c)(7) of the Act will be treated as a private fund for purposes of section 12(d)(1). *See* 2018 FOF Proposing Release, at footnote 52, *citing* “Exemptions for Advisers to Venture Capital Funds, Private Fund Advisers With Less Than \$150 Million in Assets Under Management, and Foreign Private Advisers,” Investment Advisers Act Release No. 3222, at note 294 and accompanying text (June 22, 2011) [76 FR 39646 (July 6, 2011)]. Staff no-action letters stating that the staff would not recommend enforcement action if a foreign fund purchases securities of U.S. funds in excess of the limits of section 12(d)(1) under certain facts and circumstances will not be withdrawn. *See, e.g.*, Dechert LLP, SEC No-Action Letter (pub. avail. Aug. 4, 2009).

⁵¹⁷ *See, e.g.*, Allied Capital Corporation, *et al.*, Investment Company Act Release Nos. 22902 (Nov. 21, 1997) (notice) and 22941 (order) (granting relief under sections 12(d)(1)(A) and 12(d)(1)(C), among other provisions, to allow for the acquisition of investment company subsidiaries in a merger).

⁵¹⁸ DPW Comment Letter (citing Goldman, Sachs & Co., Investment Company Act Release Nos. 32460 (Jan. 31, 2017) (notice) and 32514 (Feb. 28, 2017) (order)) (“Goldman ACES Order”).

⁵¹⁹ *See, e.g.*, Goldman ACES Order; *see also* J.P. Morgan Securities Inc., Investment Company Act Release Nos. 24060 (Sept. 29, 1999) (notice) and 24112 (Oct. 26, 1999) (order).

⁵²⁰ *See* Capital Group Comment Letter (referring to the “managed risk fund provision” in American Funds Insurance Series, *et al.*, Investment Company Act Release Nos. 31677 (June 17, 2015) (notice) and 31715 (July 14, 2015) (order)).

⁵²¹ In addition, we did not proposed to rescind exemptive relief related to section 12(d)(1)(F) and are not doing so. *See* FOF Proposing Release *supra* footnote 6 at 95.

⁵²² *See also id.* at 97 (stating that “The Commission does not believe that it is necessary to give individual hearings to the holders of the prior orders or to any other person.”).

acquired funds in fund of funds arrangements.⁵²⁶ Commenters expressed views in favor of retaining no-action letters related to investments in three tier “central fund” structures.⁵²⁷ Finally, other commenters requested that the staff publicly indicate specifically which no-action letters would be withdrawn.⁵²⁸

As a result of these considerations, the no-action letters stating that the staff would not recommend an enforcement action under specific circumstances related to section 12(d)(1) will be withdrawn one year from the effective date of the final rule. Importantly, as recognized above, the final rule provides a consistent and rules-based mechanism for fund of funds arrangements. As with the rescission of fund of funds exemptive orders, the withdrawal of staff no-action letters will include only those letters that fall within the scope of rule 12d1–4. With respect to comments asking for specificity as to which no-action letters will be withdrawn, we refer commenters to the resource provided on the Division of Investment Management’s website.⁵²⁹

IV. Other Matters

Pursuant to the Congressional Review Act,⁵³⁰ the Office of Information and Regulatory Affairs has designated this rule a “major rule,” as defined by 5 U.S.C. 804(2). If any of the provisions of these rules, or the application thereof to any person or circumstance, is held to be invalid, such invalidity shall not affect other provisions or application of such provisions to other persons or circumstances that can be given effect without the invalid provision or application.

V. Economic Analysis

We are mindful of the costs imposed by, and the benefits obtained from, our rules. Section 2(c) of the Investment Company Act states that when the Commission is engaging in rulemaking under the Investment Company Act and is required to consider or determine whether the action is necessary or consistent with the public interest, the

Commission shall consider whether the action will promote efficiency, competition, and capital formation, in addition to the protection of investors. The following analysis considers, in detail, the potential economic effects that may result from the final rule,⁵³¹ including the benefits and costs to investors and other market participants as well as the broader implications of the final rule for efficiency, competition, and capital formation.

A. Introduction

Rule 12d1–4 will allow funds to acquire the securities of another fund in excess of the limits in section 12(d)(1) of the Act without obtaining an exemptive order from the Commission. We are also rescinding rule 12d1–2 under the Act and certain exemptive relief, and amending rule 12d1–1 and Form N–CEN.⁵³²

The final rule will affect funds’ investment flexibility, increase regulatory consistency and efficiency, and eliminate the need for acquiring and acquired funds to obtain an exemptive order from the Commission and incur the associated costs and delays. At the same time, the final rule will impose one-time costs on funds that will need to assess whether their operations are consistent with the final rule. In addition, the conditions in rule 12d1–4 will impose certain ongoing costs on funds, such as compliance, monitoring, and recordkeeping costs. Finally, certain funds will be required to restructure additional investments in other funds and incur the associated costs, such as transaction costs, to ensure compliance with the final rule.

B. Economic Baseline

The baseline against which the costs, benefits, and the effects on efficiency, competition, and capital formation of the final rule are measured consists of the current state of the fund market and the current regulatory framework for funds of funds.

⁵³¹ For purposes of this section, we use the term “final rule” to refer collectively to rule 12d1–4, the rescission of rule 12d1–2 and the exemptive orders, the amendment to rule 12d1–1, and the amendments to Form N–CEN.

⁵³² We expect that the amendments to Form N–CEN will have immaterial economic effects. In particular, we expect that the amendments to Form N–CEN will increase the annual estimated burden hours associated with preparing and filing Form N–CEN by approximately 0.1 hours for each fund (see *infra* section VI.D). In addition, the amendments to Form N–CEN will facilitate the supervision and regulation of the fund industry, which will ultimately benefit fund investors, but any such effects are likely small. Hence, the economic analysis focuses on the economic effects of rule 12d1–4, the rescission of rule 12d1–2 and the exemptive relief, and the amendment to rule 12d1–1.

1. Current State of the Funds Market

To establish a baseline for the economic analysis of the final rule, we provide descriptive statistics on the current state of the fund of funds market. In particular, we provide descriptive statistics on funds, investment advisers, sponsors, and depositors of funds, and fund investors because these are the persons that likely will be affected by the final rule.

First, we provide descriptive statistics on the number and size of funds and funds of funds.⁵³³ We provide these statistics not only for funds of funds but also for single-tier funds to provide an understanding of the fund market as a whole and because the final rule will affect both current funds of funds and single-tier funds that may consider a fund of funds structure in the future. Master-feeder funds created in reliance on section 12(d)(1)(E) and funds that only acquire securities of money market funds in reliance on rule 12d1–1 are excluded from our analysis because these fund of funds structures are beyond the scope of rule 12d1–4.

Table 1 below shows the number and size of all funds and acquiring funds of funds using data from Form N–CEN filings as of May 2020.⁵³⁴ A fund of

⁵³³ We use Form N–CEN and Form N–PORT filings with the Commission as of May 2020 in our analysis. Form N–CEN provides census-type information on an annual basis and is filed by all registered investment companies, except for face amount certificate companies (rule 12d1–4 will not be available to face amount certificate companies). Form N–PORT provides portfolio holdings information on a monthly basis and is filed by registered management investment companies and ETFs organized as UITs. Hence, Form N–CEN provides information for the universe of potentially affected funds, with the exception of BDCs. Form N–PORT covers a subset of the potentially affected funds covered by Form N–CEN but it provides relevant portfolio holdings information for those funds, which is unavailable in Form N–CEN, and thus data from Form N–PORT yields additional insights on the fund market.

As of the data collection date, all fund groups file Form N–CEN but only large fund groups file Form N–PORT. Large fund groups are funds that, together with other investment companies in the same “group of related investment companies,” have net assets of \$1 billion or more as of the end of the most recent fiscal year of the fund. Filing Form N–PORT began in April 2020 for small fund groups, and this information became available to the Commission in July 2020, which was after the May 2020 cut-off date of our data analysis. However, we do not believe that such data would qualitatively change the results of our analysis. See Amendments to the Timing Requirements for Filing Reports on Form N–PORT, Investment Company Act Release No. 33384 (Feb. 27, 2019) [84 FR 7980 (Mar. 6, 2019)]. Nevertheless, large fund groups represent 84% of all fund groups in terms of total assets. See *infra* sections V.C.1.a.ii and V.C.1.b.v for discussion of differential effects of the rule on smaller relative to larger fund complexes.

⁵³⁴ Form N–CEN data does not allow us to identify and provide statistics on acquired funds. BDCs do not file reports on Forms N–CEN and so are excluded from Table 1. The UIT section of Form

⁵²⁶ Ropes Comment Letter (citing Touche, Remnant & Co., SEC No-Action Letter (pub. avail. Aug. 27, 1984) and Red Rocks Capital, LLC, SEC No-Action Letter (pub. avail. Jun. 3, 2011) (“Red Rocks”)); Blackrock Comment Letter (citing Red Rocks; The France Growth Fund, Inc., SEC Staff No-Action Letter (July 15, 2003); and Templeton Vietnam Opportunities Fund, Inc., SEC Staff No-Action Letter (Sept. 6, 1996)).

⁵²⁷ Capital Group Comment Letter (noting reliance on Northern Lights Letter *supra* footnote 504).

⁵²⁸ See, e.g., Voya Letter.

⁵²⁹ See *supra* footnote 30.

⁵³⁰ 5 U.S.C. 801 *et seq.*

funds in Form N-CEN is a fund that acquires securities issued by any other investment company in excess of the amounts permitted under paragraph (A) of section 12(d)(1) of the Act but does not include a fund that acquires securities issued by money market funds solely in reliance on rule 12d1-1 under the Act.⁵³⁵

A trade association representing regulated investment companies globally provided the Commission with the results of a survey of its U.S. members and found that as of 2018, there were 1,359 funds of funds with \$2.8 trillion in assets under management.⁵³⁶ Of those funds, the survey observed that 31% (*i.e.*, 423 out of 1,359) of the funds of funds, representing \$829 billion in assets, will not be affected by the final rule because

they are structured solely in reliance on sections 12(d)(1)(E), 12(d)(1)(F), or 12(d)(1)(G), and the remaining 69% (*i.e.*, 936 out of 1,359) of the funds of funds, representing \$2.0 trillion in assets, will need to comply with the rule 12d1-4 conditions or restructure their investments.⁵³⁷

Another commenter, representing asset managers, conducted a survey of its members and found that all 15 surveyed sponsors, representing 655 funds of funds and assets of \$1.8 trillion, stated that they rely on a variety of authorities (often in combination), including sections 12(d)(1)(F) (*i.e.*, five sponsors), section 12(d)(1)(G) (*i.e.*, 14 sponsors), rule 12d1-2 (*i.e.*, 14 sponsors), exemptive orders (*i.e.*, 14 sponsors), and/or structure funds of funds consistent with Commission staff

no-action letters (*i.e.*, three sponsors).⁵³⁸ All 15 sponsors indicated that they sponsor funds that invest in affiliated open-end funds and UITs;⁵³⁹ 13 sponsors indicated that they sponsor funds that invest in unaffiliated open-end funds and UITs; four sponsors indicated that they sponsor funds that invest in affiliated central funds; two sponsors indicated that they sponsor funds that invest in affiliated unregistered funds; two sponsors indicated that they sponsor funds that invest in unaffiliated closed-end funds; one sponsor indicated that it sponsors funds that invest in unaffiliated BDCs; and one sponsor indicated that it sponsors funds that invest in unaffiliated unregistered funds.

TABLE 1—DESCRIPTIVE STATISTICS FOR ALL FUNDS AND ACQUIRING FUNDS USING FORM N-CEN FILINGS

	Funds		Acquiring funds	
	Number	Net assets (bn \$)	Number	Net assets (bn \$)
Open-end funds	13,135	26,328	1,687	2,180
ETFs registered as open-end funds ⁵⁴⁰	2,194	5,689	105	16
ETMFs registered as open-end funds	28	14	2	0.04
Closed-end funds	736	320	29	10
UITs	720	2,237
Variable annuity separate accounts registered as UITs	430	1,561
Variable life insurance separate accounts registered as UITs	243	165
ETFs registered as UITs	47	509
Management company separate accounts	14	225	3	0.05

N-CEN currently does not require a UIT to identify whether it is a fund of funds, and so we lack information on acquiring UITs using Form N-CEN data. We use the most recent Form N-CEN filing with the Commission for each fund between September 2018 and May 2020 for this analysis (*i.e.*, the first and last month with Form N-CEN data available as of the data collection date). We use all available Form N-CEN filings to also capture delinquent filers in our analysis. Approximately 5% of the funds in Table 1 were terminated during our sample period. Open-end funds, ETFs organized as open-end funds, and ETMFs are registered on Form N-1A. ETFs and ETMFs are identified using Item C.3.a.i and C.3.a.ii in Form N-CEN filings. Closed-end funds are registered on Form N-2. Variable annuity separate accounts organized as UITs are series, or classes of series, of trusts registered on Form N-4. Variable life insurance separate accounts organized as UITs are series, or classes of series, of trusts registered on Form N-6. ETFs registered as UITs are series, or classes of series, of trusts registered on Form N-8B-2. Non-ETF UITs are trusts registered on Forms N-4 or N-6. Management company separate accounts are trusts registered on Form N-3. The statistics in Table 1 are generally consistent with statistics on funds of funds provided by commenters. *See, e.g.*, ICI Comment Letter. One exception is a commenter that stated that as of March 2019, there were 496 closed-end funds with 236 billion in net assets. *See* Advent Comment Letter. We lack detailed information on commenter's estimation of these statistics but we believe that these statistics are lower than the statistics in Table 1 likely due to the different data sources and sample period used. *See* Table 4 of the Proposing Release for statistics of the number of acquiring funds by investment category.

⁵³⁵ Hence, acquiring funds in Table 1 includes: Funds of funds that were structured in reliance on section 12(d)(1)(F); funds of funds that were structured in reliance on section 12(d)(1)(G); funds of funds that were structured in reliance on section 12(d)(1)(G) and rule 12d1-2; funds of funds that were structured in reliance on exemptive relief on which rule 12d1-4 is based; and funds of funds that were structured considering Commission staff letters.

⁵³⁶ *See* ICI Comment Letter.

⁵³⁷ For the purposes of this survey, a fund of funds is defined as a fund that invests in at least one other fund in excess of the limits of section 12(d)(1)(A) but does not include funds that only invest in money market funds. Hence, our definition of acquiring fund in Table 1 is similar to the definition of acquiring fund in the ICI survey. The ICI survey sample appears to be a subset of the sample of acquiring funds in Table 1. That is, the ICI sample represents approximately 79% of the acquiring funds in Table 1 (79% = 1,359 funds of funds in the ICI survey/1,719 acquiring funds in Table 1). *See* ICI Comment Letter. Our data does not allow us to distinguish whether the acquiring funds in Table 1 have been structured in reliance on section 12(d)(1)(F); in reliance on section 12(d)(1)(G); in reliance on section 12(d)(1)(G) and rule 12d1-2; in reliance on an exemptive order; or considering Commission staff no-action letters.

⁵³⁸ *See* SIFMA AMG Comment Letter. For purposes of this survey, a fund of funds is a fund that invests substantially all of its assets (*i.e.*, > 85% of fund assets) in shares of other investment companies. The survey also requested information regarding funds that make investments in other investment companies beyond the limits of section 12(d)(1)(A) but where those investments, in the

aggregate, represent less than 85% of fund assets. Fifty-nine of those funds hold more than 3% of an acquired fund's shares. Eight out of the 15 respondents sponsor funds that invest less than 85% of their assets in other funds, and those funds rely on a variety of authorities (often in combination), including section 12(d)(1)(F) (*i.e.*, three sponsors), section 12(d)(1)(G) (*i.e.*, seven sponsors), rule 12d1-1 (*i.e.*, three sponsors), exemptive orders (*i.e.*, eight sponsors), and/or rule 12d1-2 (*i.e.*, eight sponsors). All 8 sponsors indicated that they sponsor funds that invest in affiliated open-end funds and UITs; seven sponsors indicated that they sponsor funds that invest in unaffiliated open-end funds and UITs; three sponsors indicated that they sponsor funds that invest in affiliated central funds; two sponsors indicated that they sponsor funds that invest in unaffiliated closed-end funds; two sponsors indicated that they sponsor funds that invest in unaffiliated BDCs; one sponsor indicated that it sponsors funds that invest in unaffiliated unregistered funds; and one sponsor indicated that it sponsors funds that invest in affiliated unregistered funds. The data provided by the commenter is sponsor-level (rather than fund-level) data and so we cannot use this data to estimate how many of the acquiring and acquired funds in our sample will be affected by the final rule.

⁵³⁹ According to the survey, the funds of funds that invest in affiliated open-end funds in reliance on section 12(d)(1)(G) also invest in unaffiliated money market funds, unaffiliated registered investment companies, individual securities such as stocks and bonds, and non-securities such as certain derivatives or real estate.

TABLE 1—DESCRIPTIVE STATISTICS FOR ALL FUNDS AND ACQUIRING FUNDS USING FORM N-CEN FILINGS—Continued

	Funds		Acquiring funds	
	Number	Net assets (bn \$)	Number	Net assets (bn \$)
Total	14,605	29,110	1,719	2,190

This table reports descriptive statistics for all funds and acquiring funds using data from Form N-CEN filings with the Commission as of May 2020. A fund of funds is a fund that acquires securities issued by any other investment company in excess of the amounts permitted under paragraph (A) of section 12(d)(1) of the Act but does not include a fund that acquires securities issued by money market funds solely in reliance on rule 12d1-1 under the Act (*see* Item C.3.e in Form N-CEN filings). Master-feeder funds are excluded from this analysis (*see* Item C.3.f in Form N-CEN). The UIT section of Form N-CEN currently does not require a UIT to identify if it is a fund of funds so information on acquiring UITs is marked as missing in this Table. For open-end funds, closed-end funds, and management company separate accounts, total net assets is the sum of monthly average net assets across all funds in the sample during the reporting period (*see* Item C.19.a in Form N-CEN). For UITs, we use the total assets as of the end of the reporting period (*see* Item F.11 in Form N-CEN), and for UITs with missing total assets information, we use the aggregated contract value for the reporting period instead (*see* Item F.14.c in Form N-CEN).

Table 2 below shows the number and size of funds, acquiring funds, and acquired funds using data from Form N-PORT filings with the Commission as of May 2020.⁵⁴¹ Form N-PORT is only filed by registered management investment companies and ETFs that are organized as UITs. Hence, the sample of

funds in Table 2 (*i.e.*, registered management investment companies and ETFs organized as UITs) is narrower than the sample of funds in Table 1 (*i.e.*, all registered investment companies) because Form N-CEN and Form N-PORT do not apply to the same scope of funds.⁵⁴² Each acquiring fund represented in Table 2 is a registered management investment company or ETF organized as a UIT that invests a non-zero percentage of its assets in registered investment companies or BDCs, while each acquired fund is a registered investment company in which a registered management investment company or ETF organized as a UIT invests.⁵⁴³ Hence, the definition of acquiring funds in Table 1 is broader than the definition of acquiring funds in Table 2.⁵⁴⁴

Untabulated analysis shows that out of the 4,750 acquiring funds in Table 2, 1,435, or 30%, invested in at least one acquired fund beyond the limits of section 12(d)(1).⁵⁴⁵ These 1,435 acquiring funds invested, on average, in nine unique acquired funds beyond the section 12(d)(1) limits.

Also, untabulated analysis shows that 954, or 20%, of all acquiring funds in Table 2 appear to be relying on the statutory exemption in section 12(d)(1)(G) to structure a fund of funds arrangement.⁵⁴⁶ Finally, untabulated

analysis shows that from the 16,797 acquiring-acquired fund pairs in Table 2, for which the acquiring fund invests in the acquired fund beyond the limits of section 12(d)(1)(A), 7,400 acquiring-acquired fund pairs have a different primary investment adviser.⁵⁴⁷

As Table 2 shows, there were 2,151 unique top-tier acquiring funds in multi-tier (*i.e.*, more than two-tier) fund of funds structures and 986 unique second-tier acquired funds in multi-tier fund of funds structures.⁵⁴⁸ Out of the 2,151 unique top-tier acquiring funds in multi-tier structures in Table 2, untabulated analysis shows that 721 are top-tier acquiring funds in structures that are four tiers or more, 149 are top-tier acquiring funds in structures that are five tiers or more, and 78 are top-tier acquiring funds in structures that are six tiers.⁵⁴⁹ In the case of four-tier structures, the average investment of the top-tier acquiring fund in the fourth-tier acquired funds is equal to 0.006% of the top-tier acquiring fund's assets; in the case of five-tier structures, the average investment of the top-tier acquiring fund in the fifth-tier acquired funds is equal to 0.00006% of the top-tier acquiring fund's assets; and in the case of six-tier structures, the average investment of the top-tier acquiring

⁵⁴⁰ The reported net assets of ETFs registered as open-end funds in Table 1 likely are overstated because reporting on whether or not a fund is an ETF on Form N-CEN is at the series level, not the class level. Hence, all share classes within an open-end fund that has ETF share classes are attributed to the ETF category.

⁵⁴¹ BDCs do not file reports on Form N-PORT and are therefore excluded from the definition of acquiring funds in Tables 2 and 3. We use the most recent Form N-PORT filing with the Commission for each fund filed between May 2019 and May 2020 for this analysis (*i.e.*, the first and last month with Form N-PORT data available as of the data collection date). *See supra* footnote 534 for definition of fund categories. Total net assets in Form N-CEN may be different from total net assets in Form N-PORT because Form N-CEN reports average assets estimated over the reporting period while Form N-PORT reports point-in-time assets as of the reporting date.

⁵⁴² *See supra* footnote 534.

⁵⁴³ Hence, acquiring funds in Table 2 includes funds of funds that were structured in reliance on section 12(d)(1)(A), funds of funds that were structured in reliance on section 12(d)(1)(F), funds of funds that were structured in reliance on section 12(d)(1)(G), funds of funds that were structured in reliance on exemptive relief on which rule 12d1-4 is based, and funds of funds that were structured considering Commission staff letters.

⁵⁴⁴ The Form N-PORT data allows us to use a broader definition of acquiring funds in Table 2 compared to Table 1 (i) to provide a more complete picture of the fund of funds market; and (ii) for comparability purposes with the acquiring fund statistics in the 2018 FOF Proposing Release.

⁵⁴⁵ We define acquiring funds that invest in at least one acquired fund beyond the limits of section 12(d)(1) using Form N-CEN data as of May 2020.

⁵⁴⁶ We define 12(d)(1)(G) acquiring funds as open-end funds or UITs that invest at least 10% of their assets in other open-end funds or UITs that are in the same group of investment companies. We identify funds that are in the same group of investment companies using Item B.5 in Form N-CEN filings with the Commission as of May 2020. On one hand, our methodology may overestimate the number of 12(d)(1)(G) acquiring funds to the

extent that certain funds rely on exemptive orders rather than 12(d)(1)(G) to invest in funds within the same group of investment companies beyond the limits of section 12(d)(1)(A). On the other hand, our methodology may underestimate the number of 12(d)(1)(G) acquiring funds because the definition of the group of investment companies in Form N-CEN is narrower than the definition under 12(d)(1)(G). In particular, “[f]amily of investment companies” is defined in Item B.5 of Form N-CEN as any two or more registered funds that (i) share the same investment adviser or principal underwriter; and (ii) hold themselves out to investors as related companies for purposes of investment and investor services. “Group of investment companies” is defined in section 12(d)(1)(G) as any two or more registered funds that hold themselves out to investors as related companies for purposes of investment and investor services. *See* 15 U.S.C. 80a-12(d)(1)(G)(ii).

⁵⁴⁷ Based on investment adviser data in Item C.9 of Form N-CEN as of May 2020.

⁵⁴⁸ The 2,151 top-tier acquiring funds in multi-tier structures include funds of funds that are structured both within and beyond the limits of section 12(d)(1).

⁵⁴⁹ We have not identified any multi-tier structures that are more than 6 tiers.

fund in the sixth-tier acquired funds is practically zero.⁵⁵⁰

When looking at only multi-tier structures in which at least one acquiring fund in each level invests in at least one acquired fund beyond the limits of section 12(d)(1), there are 23 top-tier acquiring funds in structures that are three tiers or more and one top-tier acquiring fund in a structure that is four tiers.⁵⁵¹ In the case of the 23 top-tier acquiring funds in multi-tier structures that are three tiers or more, the average investment of the top-tier acquiring fund in the third-tier acquired funds is equal to 2.93% of the top-tier acquiring fund's assets, and in the case of the one top-tier acquiring fund in a

multi-tier structure that is four tiers, the average investment of the top-tier acquiring fund in the fourth-tier acquired funds is equal to 0.00003% of the top-tier acquiring fund's assets.⁵⁵²

A commenter also observed that as of 2018, out of the 1,359 funds of funds representing \$2.8 trillion in assets under management, 198 funds of funds representing \$287 billion in assets under management utilized a multi-tier structure.⁵⁵³

Another commenter found that out of the 655 funds of funds⁵⁵⁴ that were sponsored by 15 survey respondents, 223, or 34%, hold more than 3% of an acquired fund's shares.⁵⁵⁵ The commenter also found that out of the 15

surveyed sponsors, eight sponsors, or 53%, indicated that they employ multi-tier structures.⁵⁵⁶ Out of the eight sponsors that employ multi-tier structures, seven sponsors employ three-tiered structures, and one sponsor employs a four-tiered structure. Seven sponsors operate these multi-tier structures pursuant to exemptive orders; three sponsors rely on section 12(d)(1)(G); three sponsors rely on rule 12d1-2; two sponsors rely on section 12(d)(1)(A); two sponsors structure funds considering staff no-action letters; one sponsor relies on section 12(d)(1)(F); and one sponsor relies on rule 12d1-1.⁵⁵⁷

TABLE 2—DESCRIPTIVE STATISTICS FOR FUNDS, ACQUIRING FUNDS, AND ACQUIRED FUNDS USING FORM N-PORT FILINGS

	Funds		Acquiring funds		Acquired funds	
	Number	Net assets (bn \$)	Number	Net assets (bn \$)	Number	Net assets (bn \$)
Panel A: Statistics on Funds, Acquiring Funds, and Acquired Funds						
Open-end funds	11,170	24,458	4,514	8,349	2,925	14,743
ETFs	1,898	6,361	649	2,364	729	6,053
ETMFs	21	18	4	3	3	17
Closed-end funds	600	310	231	115	458	242
ETFs registered as UITs	5	436	4	436
UITs registered as separate accounts	5	50
Management company separate accounts	13	208	5	144
Total	11,788	25,412	4,750	8,608	3,392	15,471
					Multi-tier structures	
					Number of acquiring funds	Number of acquired funds
Panel B: Statistics on Multi-Tier Structures						
Open-end funds					2,074	813
ETFs					148	278
ETMFs					2	1
Closed-end funds					74	173
ETFs registered as UITs
UITs registered as separate accounts

⁵⁵⁰ We estimate the top-tier acquiring fund's investment in the bottom-tier acquired funds by accounting for the top-tier acquiring fund's investment in the second-tier acquired funds, the second-tier acquired funds' investments in the third-tier acquired funds, and so on. For example, in the case of three-tier structures, if the top-tier acquiring fund invests 5% of its assets in one second-tier acquired fund, and the second-tier acquired fund invests 5% of its assets in one third-tier acquired fund, then the top-tier acquiring fund's investment in the bottom-tier acquired fund is equal to $0.25\% = 5\% \times 5\%$.

⁵⁵¹ We define acquiring funds that invest in at least one acquired fund beyond the limits of section 12(d)(1) using Form N-CEN data as of May 2020. There are no multi-tier funds of funds beyond four tiers that are structured beyond the limits of section 12(d)(1). Our data does not allow us to distinguish whether the identified multi-tier structures were structured in reliance on one of the exceptions to the complex structures condition in our exemptive orders.

⁵⁵² See *supra* footnote 550.

⁵⁵³ See ICI Comment Letter. The proportion of acquiring funds that are top-tier acquiring funds in multi-tier structures in Table 2 (*i.e.*, $45\% = 2,151/4,750$) is different from the proportion of acquiring funds that are top-tier acquiring funds in multi-tier structures provided by the commenter (*i.e.*, $15\% = 198/1,359$) potentially due to different definitions of acquiring funds and top-tier acquiring funds in multi-tier structures. In particular, the commenter defines acquiring funds as funds that invest in at least one other fund in excess of the limits of section 12(d)(1)(A) while Table 2 defines acquiring funds as funds that invest a non-zero percentage of their assets in other funds. The commenter does not provide information on how it defines top-tier acquiring funds in multi-tier structures.

⁵⁵⁴ See *supra* footnote 537 for the commenter's definition of funds of funds.

⁵⁵⁵ See SIFMA AMG Comment Letter. The 34% ($= 223/655$) of acquiring funds that invest in other funds beyond the limits in section 12(d)(1) provided by the commenter is higher than our 30% ($= 1,435/4,750$) estimate using Form N-PORT and

Form N-CEN data, and the difference may be due to the different samples used for the two analyses.

⁵⁵⁶ See SIFMA AMG Comment Letter. The commenter provided statistics on multi-tier structures in terms of sponsors (rather than funds), and so we are unable to compare with precision the statistics provided by the commenter to our statistics on multi-tier structures in Table 2. Nevertheless, the 53% of surveyed sponsors employing multi-tier structures is largely consistent with the 45% ($= 2,151/4,750$) of acquiring funds that are top-tier acquiring funds in multi-tier structures in Table 2.

⁵⁵⁷ See SIFMA AMG Comment Letter. The data provided by the commenter is sponsor-level (rather than fund-level) data and so we cannot use this data to estimate how many of the multi-tier structures in our sample will be affected by the final rule or the extent to which they will be affected. In addition, our data does not allow us to distinguish whether the multi-tier structures in our sample were created in reliance on sections 12(d)(1)(A), 12(d)(1)(F), 12(d)(1)(G), rule 12d1-2, exemptive orders, or considering staff no-action letters.

	Multi-tier structures	
	Number of acquiring funds	Number of acquired funds
Management company separate accounts	3
Total	2,151	986

This table reports descriptive statistics for all funds, acquiring funds, and acquired funds using data from Form N-PORT filings with the Commission as of May 2020. Panel A presents statistics on all funds, acquiring funds, and acquired funds, and Panel B presents statistics on multi-tier structures. A fund of funds is a fund that invests a non-zero percentage of its assets in securities issued by other registered investment companies but does not include a fund that solely invests in money market funds. Master-feeder funds, defined as structures where the acquiring fund invests more than 98% of its assets in another registered investment company, are excluded from this analysis. Multi-tier structures are funds of funds with more than two tiers. Acquiring funds in multi-tier structures are the unique top-tier acquiring funds in a multi-tier structure, and acquired funds in multi-tier structures are the unique second-tier acquired funds in multi-tier structures. Total net assets is the sum of total net assets across all funds in the sample during the reporting period (see Item B.1.c in Form N-PORT).

Our review of BDC filings show that as of December 2019, there were 83 BDCs with \$123 billion in total gross assets, out of which 45 BDCs with 83 billion in total gross assets were listed on a national securities exchange.⁵⁵⁸ Approximately 44% of the BDCs were acquiring BDCs and 60% were acquired BDCs in fund of funds structures.⁵⁵⁹ We have not granted exemptive relief to BDCs as acquiring funds so we believe

that all acquiring BDCs invest in other funds within the 12(d)(1) limits.

Table 3 below shows the percentage of acquiring funds that invest between 0 and 5%, 5 and 10%, 10 and 25%, 25 and 50%, 50 and 75%, 75 and 90%, 90 and 95%, and above 95% of their total assets in other funds as of May 2020.⁵⁶⁰ The table shows that the majority of acquiring funds invest either less than 10% or more than 95% of their assets

in other funds. The reason for the concentration of acquiring funds below the 10% level is likely that a 10% investment in other funds is within the section 12(d)(1)(A) statutory limits. Funds that invest above the 95% threshold likely rely either on section 12(d)(1)(G) or (F) or on exemptive orders to invest in other funds beyond the section 12(d)(1)(A) statutory limits.

TABLE 3—PERCENTAGE OF ACQUIRING FUNDS THAT INVEST CERTAIN % OF THEIR ASSETS IN OTHER FUNDS

	[0–5%]	(5–10%]	(10–25%]	(25–50%]	(50–75%]	(75–90%]	(90–95%]	above 95%
Open-end funds	47	8	7	8	4	5	3	17
ETFs	70	2	4	6	4	6	2	6
ETMFs	25	25	0	25	25	0	0	0
Closed-end funds	82	6	7	1	2	0	0	0
Management company separate accounts	100	0	0	0	0	0	0	0

This table reports the percentage of acquiring funds by fund type that invest between 0 and 5%, 5 and 10%, 10 and 25%, 25 and 50%, 50 and 75%, 75 and 90%, 90 and 95%, and above 95% of their total assets in other funds using data from Form N-PORT filings with the Commission as of May 2020. UITs, except for ETFs registered as UITs, do not file Form N-PORT filings with the Commission and thus are excluded from this table. We have not identified any ETFs registered as UITs that are acquiring funds. Fund investments in money market funds and master-feeder structures are excluded from this analysis. Percentages may not sum up to 100 due to rounding error.

The total net assets of funds of funds have generally increased over time. According to the 2020 ICI Fact Book, the total net assets of open-end funds of funds increased from \$680 billion to \$2.54 trillion between December 2009 and December 2019, and the total net

assets of exchange-traded funds of funds increased from \$824 million to \$13,444 million between December 2009 and December 2019.⁵⁶¹

Table 4 Panel A shows descriptive statistics for the expense ratio, front-end load, and deferred charges for single-tier

funds (*i.e.*, all funds excluding acquiring funds), and Table 4 Panel B shows descriptive statistics for the expense ratio, front-end load, and deferred charges for acquiring funds as of July 2020.⁵⁶² The expense ratio in Table 4 includes acquired fund fees and

⁵⁵⁸ Estimates of the number of BDCs and their gross assets are based on a staff analysis of Form 10-K and Form 10-Q filings as of December 2019, which are the most recent available filings as of the data collection date. Our estimates exclude BDCs that may be delinquent or have filed extensions for their filings, wholly-owned subsidiaries of other BDCs, and BDCs in master-feeder structures. These statistics are generally consistent with statistics on BDCs provided by commenters. See, e.g., SBIA Comment Letter; IPA Comment Letter.

⁵⁵⁹ We define acquiring BDCs as BDCs that reported non-zero AFFEs in Forms 497, N-2, or N-2A filed with the Commission between January 2019 and May 2020. 44% = 14 BDCs that reported non-zero AFFEs in Forms 497, N-2, or N-2A filed with the Commission between January 2019 and May 2020/32 BDCs that filed Forms 497, N-2, or N-2A with the Commission between January 2019 and May 2020. Only BDCs traded on an exchange file Forms 497, N-2, or N-2A. The remaining BDCs file Forms 10-K but BDCs are not required to report their AFFEs on Form 10-K. For those BDCs that did

not file a Form 497, N-2, or N-2A with the Commission between January 2019 and May 2020, our review of the schedule of investment companies in Forms 10-K filed with the Commission between January 2019 and May 2020 yielded one acquiring BDC additional to the 14 acquiring BDCs identified from our review of Forms 497, N-2, or N-2A. We estimate the number of acquired BDCs using Form N-PORT filings as of May 2020. 60% = 50 BDCs acquired BDCs identified using Form N-PORT data as of May 2020/83 BDCs that filed forms 10-K or 10-Q as of December 2019.

⁵⁶⁰ In addition to other funds, acquiring funds may invest in private funds, cash and cash equivalents, derivatives, individual equity and debt securities, asset-backed securities, etc. We do not aggregate fund holdings across advisory groups for the purposes of this analysis.

⁵⁶¹ Open-end funds of funds are open-end funds that invest primarily in other open-end funds. ETF funds of funds are ETFs that invest primarily in other ETFs. See 2020 ICI Fact Book, *supra* footnote 4, at 206 and 244.

⁵⁶² In Table 4 and Figure 1 of this release (*i.e.*, fee and expense analysis), we identify acquiring funds (excluding BDCs) using Morningstar Holdings data instead of Form N-CEN or Form N-PORT data, similar to Table 3 and Figure 1 of the Proposing Release. The reason is that Form N-CEN and Form N-PORT data only becomes available in 2019 but the analysis in Figure 1 requires identification of acquiring funds starting from 2015. We use the same data to identify acquiring funds in both Table 4 and Figure 1 to allow for data comparability in the fee and expense analysis. We define acquiring BDCs as BDCs that reported non-zero AFFEs in Forms 497, N-2, or N-2A filed with the Commission between January 2019 and May 2020 (see *supra* footnote 559). The number of observations in Table 4 is different than the number of observations in Table 1 because (i) we lack expense data for some of the funds; and (ii) there are differences in the unit of observation in Morningstar and Form N-CEN (see *infra* footnote 564).

expenses. Untabulated analysis based on the expense data in Table 4 shows that the equal-weighted average expense ratio for acquiring open-end funds, UITs, and ETFs is statistically significantly higher than the equal-weighted average expense ratio for single-tier open-end funds, UITs, and ETFs, respectively.⁵⁶³ For BDCs and registered closed-end funds, there is no

statistically significant difference in the operating expenses of acquiring and single-tier funds. There are no acquiring ETMFs with expense data in our sample. Our results are qualitatively similar when we compare the value-weighted (instead of the equal-weighted) average of the expense ratio for single-tier and acquiring funds. Nevertheless, the results of the

statistical comparison of the expense ratio for single-tier and acquiring funds should be interpreted with caution because our analysis does not control for differences in the characteristics of single-tier and acquiring funds, such as differences in their investment strategy, which could potentially affect fund fees and expenses.

TABLE 4—EXPENSE RATIO, FRONT-END LOAD, AND DEFERRED CHARGES FOR SINGLE-TIER AND ACQUIRING FUNDS

	Equal-weighted mean	Value-weighted mean	Median	Standard deviation	N
Panel A: Single-Tier Funds

Deferred Charges:					
Open-end funds	0.08	0.05	0.04	0.09	1,066
UITs	2.09	2.14	2.25	0.46	872
ETFs					
ETMFs					

⁵⁶³ We use a two-tailed t-test and a 95% confidence interval to examine whether the differences in the equal-weighted averages of fees and expenses for acquiring and single-tier funds are statistically significant. A 95% confidence interval is frequently used for hypothesis testing in scientific work (see, e.g., David H. Kaye & David A. Freedman, *Reference Guide on Statistics*, in The

Reference Manual on Scientific Evidence (2nd ed., 2000), at 83).

⁵⁶⁴ The difference in the number of UITs reported in Table 1 compared to Table 4 is likely due to the fact that Form N-CEN data (i.e., Table 1) is aggregated at the trust level while Morningstar (i.e., Table 4) reports unique UIT series, which we are unable to aggregate at the trust level due to data limitations.

⁵⁶⁵ The BDC expense ratio statistics are higher in Table 4 of this release compared to Table 3 of the 2018 FOF Proposing Release. In the 2018 FOF Proposing Release we collected BDC expense data from the most recent available Forms 497, N-2, or N-2A, while in this release we collect BDC expense data only from Forms 497, N-2, or N-2A that were filed between January 2019 and May 2020 to avoid using stale data in our analysis.

TABLE 4—EXPENSE RATIO, FRONT-END LOAD, AND DEFERRED CHARGES FOR SINGLE-TIER AND ACQUIRING FUNDS—Continued

	Equal-weighted mean	Value-weighted mean	Median	Standard deviation	N
Closed-end funds	0.30	0.16	0.32	0.16	3
Management company separate accounts					
BDCs					

This table reports descriptive statistics for the expense ratio, front-end load, and deferred charges in percentage points for single-tier funds (*i.e.*, all funds excluding acquiring funds) in Panel A, and for acquiring funds in Panel B as of July 2020. Expense ratio is the percentage of fund assets, net of reimbursements, used to pay for operating expenses and management fees, including 12b-1 fees, administrative fees, and all other asset-based costs incurred by the fund, except brokerage costs. Sales charges are not included in the expense ratio. The expense ratio for acquiring funds is retrieved from the acquiring fund's prospectus and it includes the acquired funds' expense ratio. The front-end load is a one-time deduction from an investment made into the fund. Deferred charges are imposed when investors redeem shares. The analysis is conducted at the fund level using asset-weighted average values for multiple-class portfolios. We exclude funds with zero expense ratios, front-end loads, and deferred charges for the estimation of the descriptive statistics in each respective panel. There are no acquiring ETMFs with expense ratio data in our sample. There are also no acquiring management company separate accounts in our sample. ETFs, ETMFs, and management company separate accounts do not charge front-end loads or deferred charges. BDCs charge a front-end load, which includes selling commissions and dealer management fees, but they do not charge deferred charges. We identify acquiring open-end funds, UITs, ETFs, ETMFs, and closed-end funds using Morningstar Holdings data and acquiring BDCs as BDCs that reported non-zero AFFEs in Forms 497, N-2, or N-2A filed with the Commission between January 2019 and May 2020. Expense data for open-end funds, UITs, ETFs, ETMFs, and closed-end funds is retrieved from Morningstar Direct, and data for BDCs is retrieved from Forms 497, N-2, or N-2A. Data is winsorized at the 1% and 99% levels, with the exception of the BDC data, which is not winsorized because there are no outliers.

There is some evidence of a decrease in the expense ratio for certain funds of funds over time. In particular, according to an ICI report, the equal-weighted (value-weighted) average of the expense ratio of target date open-end funds has decreased from 1.23% (0.67%) in 2008 to 0.78% (0.37%) in 2019.⁵⁶⁶

Figure 1 Panels A–C below show the equal-weighted average of the expense ratio for acquiring open-end funds, ETFs, and closed-end funds between 2015 and 2019.⁵⁶⁷ Due to data limitations, the expense ratio in Figure

1 does not include acquired fund fees and expenses. As Panel A shows, the expense ratio for open-end acquiring funds has decreased from 0.91 in 2015 to 0.80 in 2019, but this decrease is not statistically significant.⁵⁶⁸ As Panel B shows, the expense ratio for acquiring ETFs has increased from 0.51 in 2015 to 0.53 in 2019, with a peak equal to 0.57 in 2016, but this decrease is not statistically significant. Finally, as Panel C shows, the expense ratio of closed-end acquiring funds has monotonically

increased from 1.39 in 2015 to 2.31 in 2019 and this increase is statistically significant at the 1% level. The time-series trends for the expense ratio of acquiring ETFs and closed-end funds are qualitatively similar when we examine the value-weighted (instead of the equal-weighted) average of the expense ratio whereas the trend for the expense ratio of acquiring open-end funds exhibits a slight increase although this is not statistically significant.

BILLING CODE 8011-01-P

⁵⁶⁶ *Trends in the Expenses and Fees of Funds*, 2019, ICI Res. Persp., Mar. 2020, at 13.

⁵⁶⁷ See *supra* footnote 552 for definition of acquiring funds.

⁵⁶⁸ In this and all subsequent analysis, to examine if there is a statistically significant time trend in the data, we regress the variable of interest to a year trend variable, and we test whether the coefficient

on the trend variable is statistically different from zero. We use a two-tailed t-test and a 95% confidence interval. See *supra* footnote 563.

Figure 1: Equal-weighted average of acquiring funds' expense ratio over time**Panel A: Open-end acquiring funds****Panel B: Exchange-traded acquiring funds**

Panel C: Closed-end acquiring funds

This figure reports the equal-weighted average of the expense ratio for acquiring funds by fund type between 2015 and 2019. Panel A shows the average expense ratio for open-end funds, Panel B for ETFs, and Panel C for closed-end funds. There are no acquiring ETMFs with expense data in our sample and there is no historical structured data for the expense ratio of UITs and BDCs. The analysis is conducted at the fund level using asset-weighted average values for multiple-class portfolios. Expense ratio is the percentage of fund assets, net of reimbursements, used to pay for operating expenses and management fees, including 12b-1 fees, administrative fees, and all other asset-based costs incurred by the fund, except brokerage costs. The expense ratio is retrieved from the acquiring fund's annual report and it does not include the acquired funds' fees and expenses. We identify acquiring funds using Morningstar Holdings data. Expense data is retrieved from Morningstar Direct and is winsorized at the 1 and 99% levels.

BILLING CODE 8011-01-C

As a baseline for understanding the effects of the voting provisions of rule 12d1-4 on acquiring funds, we study how frequently funds held shareholder meetings in 2019. Our review of filings with the Commission showed that 12% of all open-end funds, no UITs, 68% of all closed-end funds, and 86% of BDCs held at least one shareholder meeting in 2019.⁵⁶⁹ Further, 12% of the acquired open-end funds, no acquired UITs, 92% of the acquired closed-end funds, and 94% of the acquired BDCs held at least one shareholder meeting in 2019.⁵⁷⁰

The final rule will also affect investment advisers to funds. As of March 2020, there were 1,720

investment advisers that provide portfolio management services to registered investment companies and BDCs and these investment advisers managed assets equal to \$28,629 billion.⁵⁷¹ Approximately 17% of all investment advisers provided portfolio management services to acquiring funds and 33% to acquired funds.⁵⁷²

The final rule will also affect UIT depositors and sponsors. As of May 2020, there are 150 UIT unique depositors and 14 unique UIT sponsors.⁵⁷³

Lastly, the final rule will impact current and prospective individual investors that invest in funds. As of December 2019, there were 59.7 million

U.S. households and 103.9 million individuals that owned U.S. registered investment companies.⁵⁷⁴

2. Current Regulatory Framework

The existing regulatory framework for funds of funds comprises the current set of statutory provisions and rules governing funds of funds, the exemptive orders we have granted to allow certain funds of funds, and certain industry practices that have developed in connection with staff-level views provided in certain staff no-action letters. Below we discuss in more detail the fund of funds exemptive order process⁵⁷⁵ and we list the current set of statutory provisions and rules governing funds of funds as well as relevant staff no-action letters.⁵⁷⁶

⁵⁶⁹ We identify funds that held a shareholder meeting in 2019 as funds that filed at least one Form DEF14A with the Commission in 2019. Our sample of funds is the same as in Table 1 above. Acquired funds are defined as in Table 2 above.

Separate accounts are excluded from this analysis because rule 12d1-4 will not include specific voting provisions when an insurance product separate account is part of the acquiring fund advisory group or acquiring fund sub-advisory group.

⁵⁷⁰ Our sample of acquired funds is the same as in Table 2 above.

⁵⁷¹ Based on Item 5.D. of Form ADV filed with the Commission as of March 2020.

⁵⁷² Based on Item C.9. of Form N-CEN filed with the Commission as of May 2020. Our sample of acquiring funds is the same as in Table 1 above and the sample of acquired funds is the same as in Table 2 above. BDCs do not file Form N-CEN and thus are excluded from this analysis.

⁵⁷³ Based on Items F.1 and F.4 of Forms N-CEN filed with the Commission as of May 2020. We lack data on acquiring UITs and so we do not provide counts of depositors and sponsors to acquiring UITs (see *supra* Tables 1 and 2).

⁵⁷⁴ See 2020 ICI Fact Book, *supra* footnote 4.

⁵⁷⁵ See *supra* section II.C and *infra* section V.C.1.b for detailed discussion of the exemptive order conditions.

⁵⁷⁶ See *supra* section I.A for detailed discussion of the relevant statutory provisions and rules and *supra* sections II.C.3.d and III for detailed discussion of relevant staff no-action and interpretive letters.

a. Exemptive Order Process

Certain funds rely on individual exemptive orders granted by the Commission to invest in other funds beyond the limits of section 12(d)(1). The process of obtaining an exemptive order imposes direct administrative costs on funds associated with the preparation and revision of an application and consultations with Commission staff. We estimate that the administrative cost associated with obtaining an exemptive order permitting an acquiring fund to invest in an acquired fund beyond the limits of section 12(d)(1) is approximately \$100,000.⁵⁷⁷ Once a fund adviser/sponsor obtains exemptive relief to structure a fund of funds, the adviser/sponsor may apply this relief to multiple funds of funds. The administrative cost associated with the exemptive order process may be shared between the fund adviser/sponsor and the fund, and thus this administrative cost may be passed down to investors in the form of management fees or expenses. Nevertheless, we lack data and the commenters did not provide any data that would allow us to estimate how the administrative cost associated with the exemptive order process is split between the fund adviser/sponsor and the fund.

The exemptive order process also imposes indirect costs on funds and their advisers/sponsors because it introduces delays and uncertainty to fund investments. For non-ETF (ETF) fund of funds applications that received exemptive orders in 2019, the average time from the date a fund filed its initial application for exemptive relief to the date the Commission issued the related exemptive order was 127 (378) days and the average number of total filings (*i.e.*, both initial and amended filings) was 1.5 (3).⁵⁷⁸ On July 6, 2020, the

Commission adopted amendments to establish an expedited review procedure for applications for orders that are substantially identical to recent precedent as well as a rule to establish an internal timeframe for review of applications outside of such expedited procedure. As a result, we expect that future delays associated with the application process, including for any funds of funds applications, will decrease significantly following the effective date of these amendments.⁵⁷⁹

Until the Commission grants exemptive relief, fund advisers/sponsors are not permitted to create certain funds of funds and so acquiring funds must forgo certain investments in other funds. In addition, the exemptive order process may lead to uncertainty regarding whether the fund will be able to obtain exemptive relief and regarding the exact terms of the exemptive relief.

As a result of the direct and indirect costs of the exemptive order process, acquiring funds might forgo certain investments in other funds or funds of funds might not be launched in the first place because the fund may conclude that the costs of seeking an exemptive order exceed the anticipated benefits of the investment in another fund beyond the limits of section 12(d)(1).

Funds relying on exemptive orders to develop funds of funds also must comply with the terms and conditions of the exemptive relief. These terms and conditions are designed to prevent the historical abuses that led Congress to enact section 12(d)(1). Existing orders include conditions designed to mitigate the risks of undue influence, duplicative and excessive fees, and overly complex structures.⁵⁸⁰

average number of filings was 2. There is variation in the duration of the exemptive order process from the date of the initial filing to the date the order is issued. For non-ETF (ETF) fund of funds applications that received exemptive orders in 2019, the duration of the exemptive order process varied from 84 (58) to 155 (2,269) days from the date of the first filing to the date the order was issued, and the number of the filings varied from 1 (1) to 2 (12). Data is retrieved from the Investment Company Act Notices and Orders: Category Listing, available at <https://www.sec.gov/rules/icreleases.shtml> (accessed on July 29, 2020).

⁵⁷⁹ The effective date of this rule will be on June 14, 2021. See Amendments to Procedures With Respect to Applications Under the Investment Company Act of 1940, Investment Company Act Release No. 33921 (July 6, 2020) [85 FR 57089 (Sept. 15, 2020)].

⁵⁸⁰ See *supra* section II.C and *infra* section V.C.1.b for detailed discussion of the conditions of the exemptive orders. In addition to the exemptive order conditions, fund investors in management investment companies are protected from potential abusive practices that section 12(d)(1) was designed to prevent as a result of the fiduciary obligations of acquiring and acquired funds' boards of directors and investment advisers.

b. Summary of Relevant Statutory Provisions, Rules, and Industry Practices Associated With Staff No-Action Letters

As an alternative to obtaining an exemptive order, some funds have relied on statutory provisions and rules, and have considered staff-level views expressed in staff no-action letters to structure fund of funds arrangements beyond the limits of section 12(d)(1)(A) and (B). In particular, funds of funds can rely on section 12(d)(1)(G) and rule 12d1-2, section 12(d)(1)(E), and 12(d)(1)(F).⁵⁸¹ In addition, the staff of the Division of Investment Management has issued a line of letters stating that the staff would not recommend enforcement action to the Commission under sections 12(d)(1)(A) or (B) of the Act if a fund acquires the securities of other funds in certain circumstances. We understand that certain industry practices have developed in connection with the staff-level views provided in these letters.⁵⁸²

C. Benefits and Costs and Effects on Efficiency, Competition, and Capital Formation

Where possible, we have attempted to quantify the costs, benefits, and effects on efficiency, competition, and capital formation expected to result from the final rule. In some cases, however, we are unable to quantify the economic effects because we lack the information necessary and commenters have not made data available to provide a reasonable estimate. For example, we are unable to estimate the number of new funds of funds that potentially will be created as a result of the adoption of the final rule, because we do not have information about the extent to which the exemptive order application process and the conditions associated with exemptive relief limit the creation of funds of funds. Further, we do not have information needed to estimate likely changes in investor demand for funds of funds following the adoption of the final rule. In those circumstances, in which we do not have the requisite data to assess the impact of the final rule quantitatively, we have qualitatively analyzed the economic impact of the final rule.

⁵⁸¹ See *supra* section I.A for detailed discussion of relevant statutory provisions and rules.

⁵⁸² See *supra* sections II.C.3.d and III for detailed discussion of relevant staff no-action and interpretive letters.

⁵⁷⁷ The \$100,000 estimate reflects the current administrative cost associated with obtaining an exemptive order. This cost may decrease following the adoption of amendments to establish an expedited review procedure for applications for orders that are substantially identical to recent precedent. See *infra* note 579 and associated text.

⁵⁷⁸ ETF fund of funds exemptive order applications are typically submitted as part of the applications related to the formation and operation of ETFs, and these unrelated aspects of the applications could bias the cited statistics on the duration and the number of filings of the fund of funds exemptive order process. In addition, the statistics for the processing times and number of filings of ETF fund of funds exemptive order applications are skewed upwards by applications for non-transparent ETFs, which are relatively novel products. When we exclude non-transparent ETF fund of funds applications that received exemptive orders in 2019, the average time from the date a fund filed its initial application for exemptive relief to the date the Commission issued the related exemptive order was 196 days and the

1. Benefits and Costs

a. General Economic Effects⁵⁸³

i. Change in Funds' Investment Flexibility

The final rule will have opposing effects on funds' investment flexibility. On one hand, rule 12d1-4 will expand funds' investment flexibility by expanding the scope of permissible acquiring and acquired funds relative to the current exemptive orders.⁵⁸⁴ In particular, our current exemptive orders permit registered funds to invest only in certain other funds beyond the limits of section 12(d)(1), but rule 12d1-4 will expand the scope of permissible acquired funds by permitting both registered funds and BDCs to invest in all other registered funds and BDCs beyond the limits of section 12(d)(1) subject to certain conditions. Hence, relative to current exemptive orders, rule 12d1-4 will additionally allow (i) open-end funds to invest in unlisted BDCs and registered closed-end funds; (ii) UITs to invest in unlisted closed-end funds and listed and unlisted BDCs; (iii) closed-end funds to invest in open-end funds, UITs, and listed and unlisted BDCs and registered closed-end funds; (iv) BDCs to invest in open-end funds, UITs, ETMFs, and listed and unlisted BDCs and registered closed-end funds; and (v) ETFs to invest in ETMFs and unlisted BDCs and registered closed-end funds. By expanding the scope of permissible acquiring and acquired funds, rule 12d1-4 will enhance acquiring funds' investment flexibility and will increase acquired funds' access to financing.⁵⁸⁵

In addition, rule 12d1-4 will expand funds' investment flexibility and, more specifically, their ability to create multi-tier structures in the following way. Our current exemptive orders provide an exception from the three-tier limitation for investments in funds that are wholly-owned and controlled by the acquired fund as long as the investment adviser to the acquired fund is also the

investment adviser to the wholly-owned subsidiary, while rule 12d1-4 does not include the requirement that the acquired fund and the wholly-owned subsidiary share the same investment adviser.

Finally, an existing staff no-action letter considers acquired fund investments of up to 10% of its assets in other funds, including "central funds," subject to certain conditions, including a condition that the acquired fund would not exceed the 5% limit in section 12(d)(1)(A)(ii) with respect to an investment in shares of a single central fund.⁵⁸⁶ In contrast, rule 12d1-4 will permit an acquired fund to invest up to 10% of its assets in other funds, regardless of the size of the investment in any one fund, the affiliation with the acquired fund, or the purpose of the investment. Hence, rule 12d1-4 will expand funds' investment flexibility relative to the baseline by (i) permitting acquired funds' investments in both affiliated and unaffiliated funds (*i.e.*, compared to the no-action letter, which only regards acquired fund investments in affiliated funds); and (ii) not imposing the 5% limit on investments in any single fund.

On the other hand, the conditions of rule 12d1-4, the rescission of rule 12d1-2, and the withdrawal of certain staff letters⁵⁸⁷ will decrease certain funds' investment flexibility by restricting their ability to create certain multi-tier structures, and thus may require certain acquiring funds to change their investments in acquired funds over time compared to the baseline.⁵⁸⁸ In particular, our current exemptive orders prohibit an acquired fund from investing in other funds beyond the limits in section 12(d)(1), but they do not expressly prohibit a fund from investing in an acquiring fund beyond the limits of section 12(d)(1). In addition, section 12(d)(1)(G) requires an acquired fund to have a policy that prohibits it from acquiring

any securities of a registered open-end fund or UIT in reliance on section 12(d)(1)(G) or (F), but section 12(d)(1)(G) does not require the acquired fund to have a policy that prohibits it from acquiring the securities of a fund in excess of the limits in section 12(d)(1)(A) in reliance on an exemptive order issued by the Commission.⁵⁸⁹

Further, our exemptive orders permit acquired funds to invest in other funds beyond the statutory limits for short-term cash management purposes.⁵⁹⁰ Some of these orders have allowed an acquired fund to invest in short-term bond funds for these purposes.⁵⁹¹ Rule 12d1-4 will permit acquired funds to invest in funds in reliance on rule 12d1-1 beyond the statutory limits, regardless of the purpose of the investment.⁵⁹² This condition of rule 12d1-4 will increase funds' investment flexibility to create multi-tier structures to the extent that acquired funds invest in funds in reliance on rule 12d1-1 above the statutory limits for purposes other than cash management. An acquired fund could also invest up to 10% of its assets in short-term bond funds pursuant to the 10% Bucket.⁵⁹³ However, this condition of rule 12d1-4 will decrease funds' flexibility to create multi-tier structures relative to existing exemptive orders to the extent an acquired fund may no longer rely on a cash management exception to invest in excess of the statutory limits in short-

⁵⁸⁹ Our analysis shows 73 three-tier structures for which the top-tier acquiring fund is a 12(d)(1)(G) fund and the second-tier acquired fund invests in the third tier beyond the 12(d)(1)(A) limits. See *supra* footnote 545 for methodology used to identify 12(d)(1)(G) funds. The results of this analysis should be interpreted with caution because our data does not allow us to distinguish whether the second-tier acquired fund invests in the third tier beyond the 12(d)(1)(A) limits in reliance on exemptive orders.

⁵⁹⁰ See, e.g., Federated Investment Management Company, Investment Company Act Release Nos. 30093 (June 1, 2012) [77 FR 34095 (June 8, 2012)] (notice) and 30123 (Jun. 26, 2012) (order); Diamond Hill Capital Management, Inc., et al., Investment Company Act Release Nos. 31433 (Jan. 28, 2015) [80 FR 5825 (Feb. 3, 2015)] (notice) and 31472 (Feb. 24, 2015) (order).

⁵⁹¹ See *supra* footnote 590. Relatedly, the staff stated in the Thrivent No-Action letter that it would not recommend enforcement action if an acquired fund invested, solely for short-term cash management purposes, up to 25% of its assets in a central fund that is a fixed-income fund that could have a dollar-weighted average portfolio maturity of up to 3 years. See *supra* footnote 423.

⁵⁹² See rule 12d1-4(b)(3)(ii)(B).

⁵⁹³ An acquired fund may wish to invest in money market funds, short-term bond funds, or other cash management funds for various portfolio management purposes, including for cash management, liquidity management, to seek a higher level of return on investments used to collateralize derivatives (or other) positions, and to achieve greater diversification and trading efficiency. See Guggenheim Comment Letter.

⁵⁸³ See *supra* footnote 532 for a discussion of the economic effects of the N-CEN reporting requirements.

⁵⁸⁴ See, e.g., ICI Comment Letter for similar arguments.

⁵⁸⁵ A commenter argued that by expanding the scope of permissible acquiring and acquired funds, rule 12d1-4 will encourage the creation of funds of funds that "expose investors to excessive costs and poor performance and other risks associated with overly complex structures" and "the Commission has proposed this expansion without any serious analysis of what would result from such a sweeping change or explanation of why it would be in investors' best interest." See CFA Comment Letter. See *supra* section II.A.1 for discussion of this comment letter, including a discussion of why we believe the conditions of rule 12d1-4 will address the concerns raised.

⁵⁸⁶ See Franklin Templeton No-Action Letter, *supra* footnote 421. Central funds are affiliated funds commonly created by an adviser for the purpose of efficiently managing exposure to a specific asset class.

⁵⁸⁷ See *supra* section III.

⁵⁸⁸ See, e.g., SBIA Comment Letter; ICI Comment Letter; DPW Comment Letter; PIMCO Comment Letter; Fidelity Comment Letter; Guggenheim Comment Letter; TRP Comment Letter; Dechert Comment Letter; MFS Comment Letter; PGIM Comment Letter; Ropes Comment Letter; SIFMA AMG Comment Letter; ABA Comment Letter; Fidelity Fixed Income Trustees Comment Letter for related discussion that rule 12d1-4, the rescission of rule 12d1-2 and certain exemptive orders, and the withdrawal of certain staff no-action letters as proposed may limit funds' ability to structure certain multi-tier fund of funds arrangements that are currently permissible.

term bond funds.⁵⁹⁴ Accordingly, on balance, the rule preserves substantial flexibility for acquired funds to invest in underlying funds for cash management purposes with an exception for investments in underlying funds pursuant to rule 12d1–1 and a separate 10% Bucket for investments in underlying funds that do not comply with the terms of rule 12d1–1.

Our analysis shows 23 multi-tier structures in which at least one acquiring fund in each level invests in at least one acquired fund beyond the section 12(d)(1) limits, and thus may be affected by the final rule.⁵⁹⁵ Nevertheless, our analysis of multi-tier structures should be interpreted with caution because we lack data that would allow us to identify whether existing multi-tier structures that were created under the complex structures conditions in our exemptive orders or in consideration of the existing no-action letters will comply with the conditions of rule 12d1–4. Further, like the limits under section 12(d)(1) of the Act, the complex structures investment prohibitions of rule 12d1–4 are applicable at acquisition. Accordingly, only funds that seek to increase their investments in other funds beyond the statutory limits will be limited by the rule's complex structures prohibitions.⁵⁹⁶

Several commenters argued that the rescission of rule 12d1–2 will decrease the investment flexibility of funds that currently rely on section 12(d)(1)(G) and rule 12d1–2 to structure affiliated fund of funds arrangements.⁵⁹⁷ Funds that currently rely on section 12(d)(1)(G) and rule 12d1–2 can now rely on rule 12d1–4 to structure the same arrangements instead. In particular, rule 12d1–4, unlike section 12(d)(1)(G), does not

limit acquiring funds' ability to invest in securities other than securities issued by affiliated funds. Thus, a fund that wishes to invest in affiliated funds beyond the limits of section 12(d)(1) can also invest in (i) unaffiliated fund securities up to the limits in section 12(d)(1)(A) or (F); (ii) securities of money market funds in reliance on rule 12d1–1; and (iii) stocks, bonds, and other securities subject to the conditions of rule 12d1–4, rather than section 12(d)(1)(G) and rule 12d1–2. The funds that will choose to operate in accordance with rule 12d1–4, however, will need to comply with the rule's conditions and incur the costs associated with these conditions.⁵⁹⁸ In addition, we believe that many of the commenter concerns related to potential changes in funds' investment flexibility as a result of the rescission of rule 12d1–2 will be alleviated because we are not adopting the proposed redemption limit.

The final rule will require some existing funds of funds to change their portfolios to ensure compliance with the final rule, and these portfolio changes may impose the following costs on acquiring funds: (i) Legal and transaction costs to restructure their portfolios; (ii) sale of the shares of acquired funds at potentially depressed prices; (iii) tax implications, which will depend on whether the acquiring fund will sell shares of acquired funds at a gain or a loss; (iv) disruption in the acquiring funds' investment strategy; and (v) disclosure costs to the extent that funds will change their investment strategy.⁵⁹⁹ The prohibition of certain multi-tier structures may also result in less efficient fund of funds structures (*i.e.*, funds of funds with fewer investment options, higher

administrative costs, higher transaction costs, and/or lower returns) to the detriment of acquiring fund investors.⁶⁰⁰

The final rule will also impose costs on acquired funds that will lose the investments of the acquiring funds in them. As a result, acquired funds may be unable to achieve economies of scale in portfolio management, resulting in decreased efficiencies and increased operating costs for acquired fund shareholders. Acquired funds will also bear costs associated with selling assets in their portfolios to meet any redemptions by acquiring funds, assuming that acquiring fund redemptions are not made in kind. Finally, certain funds may opt for more complex, costly, and unregulated structures to avoid the rule 12d1–4 conditions.⁶⁰¹ For example, some funds may opt to invest directly in multiple securities, rather than investing in other funds that hold such securities, which may increase the funds' complexity and cost of operations. Nevertheless, we believe that any such costs to funds and their investors will be moderated by benefits associated with improved investor protection, and a more efficient regulatory framework for funds of funds, under the final rule.⁶⁰²

ii. Eliminate the Need To Apply for an Exemptive Order

Rule 12d1–4 will permit prospective acquiring funds to acquire the securities of other funds beyond the limits of section 12(d)(1)(A) of the Act and will permit prospective acquired funds to sell their shares to acquiring funds beyond the limits of section 12(d)(1)(B) of the Act without the expense and delay of obtaining an exemptive order, subject to certain conditions.⁶⁰³ Assuming that the number of exemptive orders granted by the Commission

⁵⁹⁴ As a result of this restriction in funds' investment flexibility, acquired funds may (i) invest more in money market funds instead of short-term bond funds, which may reduce fund returns; (ii) invest in funds that charge separate advisory fees or cease to waive their own fees, potentially resulting in higher costs for fund investors; and/or (iii) make direct investments in short-term bonds, which may increase transaction costs and decrease those funds' ability to diversify. The remaining enumerated exceptions to the complex rule condition of rule 12d1–4 (*i.e.*, rule 12d1–4(b)(3)(ii)(A)–(E)) are similar to the conditions in our exemptive orders and thus likely will not materially affect funds' ability to create multi-tier structures.

⁵⁹⁵ See *supra* footnote 551.

⁵⁹⁶ See *supra* footnote 416.

⁵⁹⁷ See, *e.g.*, Allianz Comment Letter; PIMCO Comment Letter; Thrivent Comment Letter; Hancock Comment Letter; Fidelity Comment Letter; NYC Bar Comment Letter; Nuveen Comment Letter; Chapman Comment Letter; Russell Comment Letter; SIFMA AMG Comment Letter; ABA Comment Letter; Fidelity Fixed Income Trustees Comment Letter.

⁵⁹⁸ See *infra* section V.C.1.b for detailed discussion of the costs and benefits associated with the conditions of rule 12d1–4. Funds that currently rely on section 12(d)(1)(G) and rule 12d1–2 will only be required to restructure their portfolio if they choose to continue relying on section 12(d)(1)(G) to avoid compliance with the conditions of rule 12d1–4. See, *e.g.*, Allianz Comment Letter (stating that funds “may be compelled to restructure to avoid the most challenging aspects of the Proposal.”).

⁵⁹⁹ We do not quantify these costs because we lack data that would allow us to provide meaningful estimates of the costs and commenters did not provide any relevant data. Some additional difficulties with quantification are: (i) The magnitude of certain costs depends on market conditions and market conditions are unpredictable (*e.g.*, sale of shares at depressed prices); (ii) certain costs are inherently difficult to quantify because they are not well defined (*e.g.*, disruption in the acquiring funds investment strategy); and (iii) funds have some discretion as to whether and when they will incur the costs associated with the restructuring of their portfolios (*i.e.*, the rule imposes an acquisition test) and so it is difficult to predict the magnitude of the costs associated with restructuring.

⁶⁰⁰ See, *e.g.*, PIMCO Comment Letter; ABA Comment Letter for similar arguments.

⁶⁰¹ See, *e.g.*, Hancock Comment Letter (noting that “[S]ome of these structures may be unregulated or may be more complex or have higher costs. For example, we believe that some investment managers may elect to rely more heavily upon unregistered products or may use multiple portfolio sleeves within a single registered fund, which could potentially introduce additional costs and administrative complexities”).

⁶⁰² For example, rule 12d1–4 will impose the undue influence finding requirement on both affiliated and unaffiliated funds, which may enhance investor protection. See *infra* sections V.C.1.b and V.C.2.i for detailed discussion of the effects of the final rule on regulatory efficiency and investor protection.

⁶⁰³ Existing funds of funds that currently rely on exemptive orders that provide relief similar to rule 12d1–4 have already incurred the cost of the exemptive order process. Hence, these funds will not benefit from eliminating the need to apply for an exemptive order under rule 12d1–4.

would stay the same absent the final rule, we estimate that by removing the need to obtain an exemptive order, the final rule will eliminate annual aggregate administrative costs to prospective acquiring and acquired funds of approximately \$4.2 million relative to the baseline.⁶⁰⁴ Any cost savings to prospective acquiring and acquired funds derived from eliminating the need to apply for an exemptive order likely will be more pronounced for smaller funds or smaller fund complexes because (i) the administrative cost of the exemptive order application process likely does not vary with fund size, and thus may constitute a higher percentage of a smaller fund's assets; and (ii) the same exemptive order can be used by multiple funds within a fund complex, and there may be fewer funds to benefit from an exemptive order within smaller fund complexes.⁶⁰⁵

Rule 12d1-4 also will remove the delay incurred by funds and their sponsors when applying for an exemptive order. As mentioned above, the average time it took a non-ETF (ETF) fund to obtain exemptive relief in 2019 was 127 (378) days.⁶⁰⁶ If funds are not required to apply for an exemptive order, prospective acquiring funds will not be required to forgo investments in other funds while awaiting exemptive relief, which ultimately will permit these funds to achieve an efficient allocation of fund assets sooner and will permit these funds to better time their investments in other funds (*i.e.*, potentially purchase shares at more favorable prices). Further, by removing the delay associated with the exemptive order process, prospective acquiring funds will be able to bring new products to the market faster, which will expand investors' investment opportunities and may therefore foster capital

formation.⁶⁰⁷ Prospective acquired funds also will benefit because the acquiring funds' investments in them will increase their assets more quickly, and as a result the acquired funds may achieve economies of scale more quickly, ultimately benefitting the existing and future shareholders of the acquired funds, which may also foster capital formation.⁶⁰⁸

Rule 12d1-4 also will remove the uncertainty associated with the exemptive order process.⁶⁰⁹ Uncertainty related to the exemptive order process may negatively affect fund investment decisions, thus potentially suppressing fund investment and growth.⁶¹⁰ Nevertheless, the effects of the final rule on uncertainty likely will be limited by the fact that the terms of exemptive relief for funds of funds have become to a large extent standardized and the approval of applications for exemptive relief has become somewhat routine.

Investors may benefit from these direct and indirect cost reductions. For example, prospective fund advisers, sponsors, and other service providers may pass cost savings associated with no longer having to request exemptive relief through to investors by lowering fees and expenses. The degree of potential reduction of fund fees and expenses depends on the level of competition in the fund industry. To the extent that the fund industry is competitive, we believe that fund advisers, sponsors, and other service providers will pass on to investors a higher percentage of cost savings arising from the final rule. Conversely, if the level of competition is low, fund advisers, sponsors, and other service providers will retain a higher percentage of cost savings arising from the final rule rather than passing these cost savings on to investors. Academic literature provides conflicting evidence regarding the level of competition in the fund industry. On one hand, several papers provide some evidence that the U.S. fund industry is competitive and

that greater competition in the fund industry is associated with lower fund fees and expenses.⁶¹¹ On the other hand, several papers suggest that price competition is not prevalent in the fund industry.⁶¹² We believe there are two potential explanations as to why prior literature provides conflicting evidence on the level of competition in the fund industry. First, prior literature uses different sample periods, focuses on different market segments, and uses different units of observation (*i.e.*, individual funds versus fund families). Second, it is possible that funds do not compete solely on fees, but instead compete on performance and services.

Further, the cost savings to prospective funds associated with avoiding the exemptive order process under rule 12d1-4 may potentially increase the rate at which new funds of funds become available to investors.⁶¹³ The Commission granted 4 non-ETF fund of funds orders and 38 ETF fund of funds orders in 2019.⁶¹⁴ We are unable to estimate the number of new funds of funds that will be created following the adoption of the final rule, but we believe that the number of new funds of funds will be higher than the number of funds of funds that were created as a result of the exemptive orders granted in 2019 because the final rule permits the establishment of funds

⁶⁰⁴ In 2019, the Commission granted 4 non-ETF fund of funds orders and 38 ETF fund of funds orders (*see supra* footnote 578 for the source of the exemptive order data). Hence, the final rule could result in annual aggregate administrative cost savings to funds of funds equal to \$4,200,000, *i.e.*, \$4,200,000 = (4 non-ETF fund of funds orders + 38 ETF fund of funds orders) × \$100,000 administrative cost per exemptive order. The cost savings associated with removing the need to apply for exemptive relief for ETF fund of funds arrangements as discussed here are separate from the cost savings associated with removing the need to apply for exemptive relief for ETFs as discussed in the ETF adopting release. *See* 2019 ETF Adopting Release, *supra* footnote 25, at 57207. The direct administrative costs associated with the need to apply for an exemptive order are one-time costs and each exemptive order can be used by multiple funds within the same fund complex.

⁶⁰⁵ *See, e.g.*, MFDF Comment Letter for a similar argument.

⁶⁰⁶ *See supra* footnote 578 for the source of the exemptive order data.

⁶⁰⁷ *See infra* section V.C.2.iii for detailed discussion of the effect of the final rule on capital formation.

⁶⁰⁸ *See supra* footnote 607.

⁶⁰⁹ *See supra* section V.B.2.a for detailed discussion of costs associated with the exemptive order process.

⁶¹⁰ Academic literature provides evidence consistent with the idea that uncertainty has negative effects on investment and growth. *See, e.g.*, Nicholas Bloom, Stephen Bond, & John Van Reenen, *Uncertainty and Investment Dynamics*, 74 *Rev. Econ. Stud.* 391 (2007); Nicholas Bloom, *The Impact of Uncertainty Shocks*, 77 *Econometrica* 623 (2009); Scott R. Baker, Nicholas Bloom, & Steven J. Davis, *Measuring Economic Policy Uncertainty*, 131 *Q. J. Econ.* 1593 (2016). The cited studies examine the effect of uncertainty on the economy in general, rather than the effect of uncertainty on funds.

⁶¹¹ *See, e.g.*, John C. Coates, IV & R. Glenn Hubbard, *Competition in the Mutual Fund Industry: Evidence and Implications for Policy* (Harvard John M. Olin Ctr. for L., Econ., and Bus., Discussion Paper No. 592, Aug. 2007); Sunil Wahal & Albert (Yan) Wang, *Competition among Mutual Funds*, 99 *J. Fin. Econ.* 40 (2011); Ajay Khorana & Henri Servaes, *What Drives Market Share in the Mutual Fund Industry*, 16 *Rev. Fin.* 81 (2012); Burton G. Malkiel, *Asset Management Fees and the Growth of Finance*, *J. Econ. Persp.*, Spring 2013, at 97. Further, an ICI study suggests that the fund of funds industry is competitive: "Mutual fund expense ratios also have fallen because of economies of scale and competition." *See* 2020 ICI Fact Book, *supra* footnote 4, at 121.

⁶¹² *See, e.g.*, John P. Freeman & Steward L. Brown, *Mutual Fund Advisory Fees: The Cost of Conflicts of Interest*, 26 *J. Corp. L.* 609 (2001) (arguing that there is lack of price competition in the fund industry). *See also* Brad M. Barber, Terrance Odean, & Lu Zheng, *Out of Sight, Out of Mind: The Effects of Expenses on Mutual Fund Flows*, 78 *J. Bus.* 2095 (2005) (finding no relation between fund operating expenses and fund flows); Javier Gil-Bazo & Pablo Ruiz-Verdú, *The Relation between Price and Performance in the Mutual Fund Industry*, 64 *J. Fin.* 2153 (2009) (showing that funds with worse before-fee performance charge higher fees).

⁶¹³ We expect that the effect of the final rule on the number of acquiring BDCs will be limited because BDCs are prohibited from making any investment unless, at the time of the investment, at least 70% of the BDC's total assets are invested in securities of certain specific types of companies, which do not include funds (*see supra* footnote 39).

⁶¹⁴ *See supra* footnote 604.

of funds without the cost of the exemptive order process.

Academic research suggests that investment decisions are sensitive to the number of available investment opportunities.⁶¹⁵ Hence, investor demand for funds of funds may increase as a result of the increased number of funds of funds under the final rule. In particular, investors may increase their investments in funds of funds by either decreasing their investments in other asset classes or increasing their investment rate. More specifically, as an alternative to investing in funds of funds, investors may meet their investment objectives by assembling a portfolio of funds through non-discretionary or discretionary separate accounts with a broker/dealer or investment adviser or by investing directly in funds without the intermediation of broker/dealers or investment advisers. Nevertheless, funds of funds may represent an efficient alternative to such a strategy because fund of funds investors can avoid minimum investment requirements, invest in funds that have been closed to new investors, invest in funds that are restricted to a particular investor type, avoid certain transaction costs, and enjoy lower recordkeeping and monitoring costs relative to investors that directly invest in multiple funds.⁶¹⁶ As a result, the entry of new funds of funds that do not replicate existing investment opportunities may increase investor demand for funds of funds because those funds will provide investors the opportunity to obtain diversified exposure to different asset classes through a single, professionally managed portfolio at a potentially lower cost compared to investing in a portfolio of funds through discretionary or non-discretionary separate accounts.

⁶¹⁵ See Shlomo Benartzi & Richard H. Thaler, *Naive Diversification Strategies in Defined Contribution Saving Plans*, Am. Econ. Rev., Mar. 2001, at 79 (presenting survey evidence and plan-level statistics that support the idea that retirement plan investors practice “1/n” diversification across all available investment alternatives). But see Gur Huberman & Wei Jiang, *Offering versus Choice in 401(k) Plans: Equity Exposure and Number of Funds*, 61 J. Fin. 763 (2006) (demonstrating that individual-level analysis of 401(k) plan data yields different results from plan-level analysis, showing that individuals are less sensitive to the overall number of investment alternatives, but may practice “1/n” within a smaller subset of alternative investments).

⁶¹⁶ See, e.g., Edwin J. Elton et al., *Target Date Funds: Characteristics and Performance*, 5 Rev. Asset Pricing Stud. 254 (2015) (showing that “additional expenses charged by TDFs are largely offset by the low-cost share classes they hold, not normally open to their investors.”).

iii. Assess Compliance With the Final Rule

Existing acquired and acquiring funds relying on exemptive orders on which rule 12d1–4 is based will incur a one-time administrative cost to assess whether their operations are consistent with rule 12d1–4 by examining differences between the exemptive order conditions they are currently required to meet and the conditions of rule 12d1–4. Further, existing acquiring funds currently relying on section 12(d)(1)(G) and rule 12d1–2 to structure funds of funds will be required to decide whether to continue relying on section 12(d)(1)(G) and amended rule 12d1–1 or instead operate in accordance with rule 12d1–4 and comply with the rule’s conditions. We believe this assessment will result in a one-time cost equal to \$3,315 per fund and an aggregate one-time cost of \$7.6 million for all affected funds.⁶¹⁷

⁶¹⁷ We estimate that assessing the requirements of rule 12d1–4 will require 5 hours of a compliance manager (\$304 per hour) and 5 hours of a compliance attorney (\$359 per hour), resulting in a cost of \$3,315 (= 5 hours × \$304 + 5 hours × \$359) per fund. The Commission’s estimates of the relevant wage rates in the tables below are based on salary information for the securities industry compiled by the Securities Industry and Financial Markets Association’s Office Salaries in the Securities Industry 2013. The estimated wage figures are modified by Commission staff to account for an 1,800-hour work-year and inflation, and multiplied by 5.35 to account for bonuses, firm size, employee benefits, overhead, and adjusted to account for the effects of inflation. See Securities Industry and Financial Markets Association, *Report on Management & Professional Earnings in the Securities Industry 2013* (“SIFMA Report”) for the source of salary data. The total cost for the 1,211 acquiring and 1,069 acquired funds that will be subject to rule 12d1–4 will thus be \$7.6 million. \$7.6 million = (1,211 acquiring funds that may be required to assess compliance with the rule + 1,069 acquired funds that may be required to assess compliance with the rule) × \$3,315 one-time costs to assess compliance with the final rule per fund. Our estimate is likely an upper bound of the cost associated with assessing compliance with the final rule because we count separately the cost for acquiring and acquired funds but certain acquiring funds may also be acquired funds that will be subject to the final rule, and vice versa, and there may be synergies to assess compliance with the final rule for those funds. 1,211 acquiring funds that will be subject to rule 12d1–4 = [1,719 acquiring registered investment companies that invest in other funds beyond the section 12(d)(1) limits (see Table 1 in *supra* section V.B.1) + 37 acquiring BDCs (see *supra* footnotes 558 and 559 and associated text)] × 69% of acquiring funds that invest in other funds beyond the section 12(d)(1) limits and will be subject to rule 12d1–4 as estimated by a commenter (see *supra* footnote 537 and associated text). Our calculation assumes that the commenter’s sample is representative of the acquiring funds in Table 1. 1,069 acquired funds that will be subject to rule 12d1–4 = [3,392 acquired registered investment companies that have a non-zero investment from other funds (see Table 2 in *supra* section V.B.1) + 50 acquired BDCs (see *supra* footnotes 558 and 559 and associated text)] × 45% of acquired funds for which there is at least one acquiring fund that invests in them beyond the 3% limit of section

b. Effects of New and Omitted Conditions

Rule 12d1–4 will include new conditions relative to the conditions in our current exemptive orders and rule 12d1–2, and will omit certain conditions contained in our exemptive orders that are not necessary in light of the new conditions of rule 12d1–4. The new conditions of rule 12d1–4 are designed to limit the acquiring funds’ undue influence over the acquired funds, limit duplicative fees for acquiring fund investors, limit the creation of complex fund structures, and ultimately encourage effective oversight of fund of funds structures. The rule 12d1–4 conditions augment certain conditions in our exemptive orders, which will likely enhance investor protections. We expect, however, that the implementation and monitoring of these new conditions will impose certain incremental one-time and ongoing costs on funds and their investors.⁶¹⁸ We discuss the benefits and costs of each of the new conditions of rule 12d1–4 and the conditions of existing exemptive orders that rule 12d1–4 omits in detail below.⁶¹⁹

12(d)(1) × 69% of acquired funds that have investments from other funds in them beyond the 3% limit of section 12(d)(1) and will be subject to rule 12d1–4 as estimated by a commenter (see *supra* footnote 537 and associated text). Our calculation assumes that the commenter’s estimate of acquiring funds that will be subject to rule 12d1–4 is also applicable to acquired funds.

⁶¹⁸ See also Guggenheim Comment Letter (noting that the conditions of rule 12d1–4 will “likely result in significant additional compliance, investment and practical costs and burdens that ultimately may result in increased fund expenses. We note that the proposed conditions would necessitate meaningful investments in technology, personnel, training and other compliance-related resources to monitor holdings of acquired funds, particularly when such ‘advisory groups’ involve large diversified financial services institutions.”). Some of the costs discussed by the commenter may be no longer relevant given the changes in the rule’s conditions relative to the 2018 FOF Proposing Release.

⁶¹⁹ See *supra* section II.C for discussion of the rule’s conditions. In this section, we compare the conditions of rule 12d1–4 to the conditions of our current exemptive orders. Hence, the discussion in this section describes the effects of rule 12d1–4 on (i) funds that currently rely on our exemptive orders to invest in other funds beyond the limits of section 12(d)(1) but will be subject to rule 12d1–4 following the rescission of our exemptive orders; and (ii) funds that would otherwise choose to rely on our exemptive orders in the future to invest in other funds beyond the limits of section 12(d)(1) but will be subject to rule 12d1–4 following the final rule adoption. Any effects discussed in this section will be more pronounced for funds that currently rely on section 12(d)(1)(G) and rule 12d1–2 to invest in affiliated funds beyond the limits of section 12(d)(1) but will be subject to rule 12d1–4 following the final rule adoption, because the conditions of section 12(d)(1)(G) and rule 12d1–2 are less costly than the conditions in our current exemptive orders. In particular, in contrast to our exemptive

Continued

i. Undue Influence—Control

Rule 12d1–4 mandates that the acquiring fund and its advisory group will not control (individually or in the aggregate) an acquired fund. Control is presumed when a fund owns more than 25% of the voting securities of another fund. The control condition does not apply to affiliated fund of funds structures. The control condition of rule 12d1–4 is consistent with the conditions of our current exemptive orders and thus will not have an economic effect relative to the baseline.⁶²⁰

ii. Undue Influence—Voting Conditions

Rule 12d1–4 will require an acquiring fund and its advisory group to vote their shares of an acquired fund using mirror voting if the acquiring fund and its advisory group (in the aggregate): (i) Hold more than 25% of the outstanding voting securities of an acquired open-end fund or UIT due to a decrease in the outstanding securities of the acquired fund; or (ii) hold more than 10% of the outstanding voting securities of an acquired closed-end fund or BDC.⁶²¹

Acquired open-end funds and UITs. Our current exemptive orders require an acquiring fund and its advisory group to

orders, funds relying on section 12(d)(1)(G) and rule 12d1–2 to invest in affiliated funds beyond the limits of section 12(d)(1) are not required to enter into a participation agreement or make certain findings and adopt procedures to prevent overreaching and undue influence by the acquiring fund and its affiliates. Further, the conditions aimed at mitigating excessive and duplicative fees under section 12(d)(1)(G) are more limited in scope than the fee conditions in our exemptive orders. See, e.g., Invesco Comment Letter for a discussion of compliance burdens associated with the rescission of rule 12d1–2 and the potential reliance of affiliated funds of funds on rule 12d1–4 instead of section 12(d)(1)(G) and rule 12d1–2.

⁶²⁰ Commenters agreed with the assertion that the control condition of rule 12d1–4 is consistent with the conditions of the existing orders. See, e.g., ICI Comment Letter. A commenter argued that “many advisers already have systems in place to monitor holdings at the ‘advisory group level,’” which would decrease any potential compliance costs associated with this aspect of the final rule. See Invesco Comment Letter.

⁶²¹ The voting condition of rule 12d1–4 is not applicable when an acquiring fund is within the same group of investment companies as an acquired fund or the acquiring fund’s investment sub-adviser or any person controlling, controlled by, or under common control with such investment sub-adviser acts as the acquired fund’s investment adviser or depositor. See rule 12d1–4(b)(1)(iii). In circumstances where all holders of the outstanding voting securities of the acquired fund are required by rule 12d1–4 or otherwise under section 12(d)(1) to mirror vote the securities of the acquired fund, the acquiring fund may use pass-through instead of mirror voting. See rule 12d1–4(b)(1)(ii). Our exemptive orders do not include such a condition. Our analysis shows no existing acquired funds that will be subject to this rule condition (i.e., acquired funds that are only held by acquiring funds that are subject to the voting conditions of rule 12d1–4). Hence, we expect that the economic effects of this aspect of the rule will be immaterial.

vote their shares of an acquired open-end fund or UIT using mirror voting only if the acquiring fund and its advisory group hold more than 25% of the acquired fund’s outstanding voting securities due to a decrease in the outstanding securities of the acquired fund. Hence, for acquiring funds that hold shares of open-end funds or UITs beyond the section 12(d)(1) limits, the voting condition of rule 12d1–4 is the same as the voting condition in our exemptive orders, and so we expect that this aspect of the rule will not impose additional costs on funds relative to the exemptive orders.

Acquired BDCs and registered closed-end funds. Rule 12d1–4 differs from our current exemptive orders for acquiring funds that invest in acquired registered closed-end funds or BDCs beyond the limits of section 12(d)(1) because (i) it imposes a 10% (instead of 3% in the exemptive orders) voting threshold; and (ii) it only allows mirror voting (instead of either mirror or pass-through voting in the exemptive orders) for all funds within the acquiring funds’ advisory group.⁶²² Hence, rule 12d1–4 is less restrictive than our current exemptive orders in terms of the voting threshold but more restrictive than our current exemptive orders in terms of permissible voting methods for acquiring funds that invest in acquired BDCs and registered closed-end funds.

The voting conditions of rule 12d1–4 with respect to acquired BDCs and registered closed-end funds may have the following costs. First, we estimate that all acquiring funds that invest in registered closed-end funds or BDCs in reliance on rule 12d1–4 will incur a one-time cost to update their proxy voting policies to reflect that the fund is potentially subject to the voting provisions of the rule. Our analysis shows that only one of the existing acquiring funds invests in at least one registered closed-end fund beyond the 10% voting threshold.⁶²³ Hence, for funds that invest in registered closed-end funds or BDCs in reliance on rule 12d1–4, we expect that the one-time cost to update their proxy voting

⁶²² Similar to the rule’s voting condition, our current exemptive orders require non-fund entities within the advisory group to use mirror voting.

⁶²³ Results are the same when aggregating fund holdings across funds sharing the same adviser or sub-adviser. We lack structured data on BDCs’ outstanding shares and so BDCs are excluded from this analysis. Our data does not allow us to identify whether acquiring funds hold voting or non-voting securities of the acquired funds, which may result in misestimation of the number of acquiring funds that hold an investment in at least one closed-end fund or BDC beyond the 10% voting threshold. This data limitation applies to all analysis in section V that uses voting share information.

policies will be immaterial. Nevertheless, we estimate that the one-time cost for acquiring funds that invest in BDCs and registered closed-end funds beyond the 10% voting threshold to update their proxy voting policies will be equal to \$1,257 per fund.⁶²⁴

Second, the cost of the more restrictive voting methods (i.e., the rule generally permits only mirror voting) of rule 12d1–4 relative to our current exemptive orders is that the rule may increase economic distortions in the voting process since mirror voting requires the acquiring fund to vote in the same proportion as the vote of all other holders of the acquired fund shares.⁶²⁵ The economic effect of any distortions in the voting process is unclear and will depend on: (i) The percentage of acquired fund shares that are held by non-fund shareholders and funds that are not subject to the voting conditions; (ii) the composition of the acquiring fund shareholders (e.g., retail versus institutional investors);⁶²⁶ and (iii) how frequently votes are close and so the acquiring fund’s voting may determine the outcome of the vote.

Relatedly, the mirror voting requirement applicable to acquiring fund holdings in excess of 10% of an acquired BDC or registered closed-end fund may require advisers to revise existing proxy voting policies and procedures, including those of other members of the advisory group and their respective clients.⁶²⁷ Additionally, a more restrictive voting method may require an acquiring fund and its advisory group to follow a less flexible proxy voting policy, subject to the other legal requirements that are applicable to an investment adviser’s proxy voting responsibilities.⁶²⁸ However, this effect

⁶²⁴ See Table 5 in *infra* section VI.B.1.

⁶²⁵ See, e.g., ICI Comment Letter; Nuveen Comment Letter; Schwab Comment Letter; TPG Comment Letter; SIFMA AMG Comment Letter noting that both pass-through and mirror voting can introduce distortions in the shareholder voting process, but those distortions are more pronounced in the case of mirror voting.

⁶²⁶ There are significant differences in voting involvement by institutional investors compared to retail investors (see, e.g., Broadridge & PwC, 2019 Proxy Season Review, available at https://www.broadridge.com/_assets/pdf/broadridge-proxypulse-2019-review.pdf).

⁶²⁷ See *supra* footnote 161 and associated text for related discussion.

⁶²⁸ See generally Commission Guidance Regarding Proxy Voting Responsibilities of Investment Advisers, Investment Advisers Act Release No. 5325 (Aug. 21, 2019), at 5–6 [84 FR 47420, 42421 (Sept. 10, 2019)]; id. at 12, Question No. 2 [84 FR 47423]; Supplement to Commission Guidance Regarding Voting Responsibilities of Investment Advisers, Investment Advisers Act Release No. 5547 (July 22, 2020) [85 FR 55155 (September 3, 2020)]. See also Exemptions from the Proxy Rules for Proxy Voting Advice, Securities Exchange Act Release No. 89372 (Jul. 22, 2020) [85

would be mitigated by the fact that, as discussed below, we believe that the majority of acquiring funds that invest in registered closed-end funds or BDCs beyond the limits of section 12(d)(1) in reliance on our exemptive orders already use mirror voting.

Third, the more restrictive voting methods will impose more voting restrictions on acquiring funds, and thus may decrease funds' incentives to acquire larger blocks of shares (*i.e.*, blocks of shares in excess of the section 12(d)(1) limits but below the 10% threshold of the rule) and thereby potentially support value-increasing actions through their voting.⁶²⁹

The voting conditions of rule 12d1–4 for acquired BDCs and registered closed-end funds may have the following benefits. First, the less restrictive voting threshold of rule 12d1–4 relative to the exemptive orders (*i.e.*, 10% instead of 3%) may decrease economic distortions in the voting process since the voting provision will not apply until an acquiring fund holds a greater percentage of the voting securities of an acquired fund.

Second, the less restrictive voting threshold of rule 12d1–4 relative to the exemptive orders will impose fewer voting restrictions on acquiring funds, and thus may increase funds' incentives to acquire larger blocks of shares and thereby potentially support value-increasing actions through their voting.⁶³⁰

FR 55082 (September 3, 2020)] (reaffirming an investment adviser's fiduciary duty to vote in the best interest of its client).

⁶²⁹ Academic literature provides some evidence that shareholder activism has a positive effect on target funds (*see, e.g.*, Martin Cherkas, Jacob S. Sagi, & Z. Jay Wang, *Managed Distribution Policies in Closed-End Funds and Shareholder Activism*, 49 J. Fin. & Quantitative Analysis 1311 (2014); Michael Bradley et al., *Activist Arbitrage: A Study of Open-Ending Attempts of Closed-End Funds*, 95 J. Fin. Econ. 1 (2010)). Academic literature provides mixed evidence on whether funds are activist investors, *i.e.*, tend to vote with or against the management of the target companies (*see, e.g.*, Dragana Cvijanovic, Amil Dasgupta, & Konstantinos E. Zachariadis, *Ties that Bind: How Business Connections Affect Mutual Fund Activism*, 71 J. Fin. 2933 (2006); Rasha Ashraf, Narayanan Jayaraman, & Harley E. Ryan, Jr., *Do Pension-Related Business Ties Influence Mutual Fund Proxy Voting? Evidence from Shareholder Proposals on Executive Compensation*, 47 J. Fin. & Quantitative Analysis 567 (2012); Gerald F. Davis & E. Han Kim, *Business Ties and Proxy Voting by Mutual Funds*, 85 J. Fin. Econ. 552 (2007)). There is some evidence, however, of increased activism by funds, other than hedge funds, over time (*see, e.g.*, J.P. Morgan, 2019 Proxy Season Review (Aug. 2019), available at <https://www.jpmorgan.com/jpmpdf/1320747618625.pdf>). The abovementioned studies are not solely focused on acquiring fund activism targeted at acquired funds but also study fund activism targeted at non-funds and non-fund activism targeted at funds.

⁶³⁰ *See supra* footnote 629 and associated text.

Third, assuming no difference between the permissible voting methods under the rule and the exemptive orders, the voting threshold of the rule may decrease ongoing costs associated with voting because it is less restrictive than the voting threshold in existing exemptive orders (*i.e.*, 10% under the rule versus 3% under the exemptive orders). Similarly, holding the voting threshold constant, the more restrictive voting methods of the rule may decrease ongoing costs for funds associated with voting because pass-through voting is more costly to implement than mirror voting.⁶³¹ Nevertheless, we expect any such cost decreases to be small because we believe that the majority of acquiring funds that invest in registered closed-end funds or BDCs beyond the limits of section 12(d)(1) in reliance on our exemptive orders already use mirror voting, and we expect those funds to continue using mirror voting following the final rule adoption.⁶³²

Fourth, the additional restriction on voting methods (*i.e.*, only allow mirror voting) may enhance the protection of the acquired fund investors from the acquiring funds' undue influence. Pass-through voting may not provide the same level of protection from acquiring funds' undue influence as mirror voting because acquiring fund investors may vote in line with the recommendations of the acquiring fund investment adviser and board when the acquiring fund uses pass-through voting.⁶³³

⁶³¹ *See* Table 5 in *infra* section VI.B.1. Under pass-through voting, acquiring funds must seek voting instructions from their security holders and vote such proxies in accordance with their instructions. Under mirror voting, acquiring funds must vote the acquired fund shares in the same proportion as the vote of all other holders of the acquired fund.

⁶³² Two commenters noted that mirror voting is generally preferable to pass-through voting, and other commenters noted that the expense and logistical challenges associated with pass-through voting make pass-through voting impractical. *See* Invesco Comment Letter (noting that mirror voting is “typically preferable to pass-through voting”); SIFMA AMG Comment Letter (noting that “registered funds would likely mirror vote shares held in any [closed-end funds] subject to the voting condition”). *See also* ICI Comment Letter (noting that “[i]n some situations, the expense and logistical challenges of pass through voting also may be undesirable.”); Voya Comment Letter (noting that “the use of pass-through voting would increase the costs and logistical challenges of proxy solicitations. . . . If these acquiring funds determine to implement pass-through voting, the costs of obtaining approvals of shareholder proposals could increase significantly, without corresponding benefit to [the acquiring] fund's shareholders.”); Charles Schwab Comment Letter (noting that “[g]enerally speaking, the expense and logistical challenges make pass-through voting impractical”).

⁶³³ *See, e.g.*, Advent Comment Letter; Comment Letter of Franklin Square Holdings (May 2, 2019) (“Franklin Comment Letter”); Skadden Comment Letter; ABA Comment Letter (arguing that pass-

iii. Undue Influence—Findings⁶³⁴

To prevent overreaching and undue influence, current exemptive orders typically require (i) acquired fund boards to make certain findings and adopt procedures at least annually to prevent overreaching and undue influence by the acquiring fund and its affiliates; (ii) acquiring funds to take measures to prevent the acquiring fund from influencing the terms of any services or transactions between the acquiring fund and an unaffiliated acquired fund or causing an unaffiliated acquired fund to purchase a security in any affiliated underwriting; and (iii) acquiring fund boards to adopt procedures reasonably designed to assure that the acquiring fund's investment adviser does not take into account consideration received from an unaffiliated acquired fund. These requirements in the exemptive orders are only applicable to unaffiliated funds of funds and they are only applicable to acquiring and acquired funds that are management companies.

To mitigate concerns of overreaching and undue influence, if an acquired fund is a management company, rule 12d1–4 will require the acquired fund's investment adviser, prior to the initial acquisition of the acquired fund's shares in excess of the limits in section 12(d)(1)(A)(i) of the Act, to find that any undue influence concerns associated with the acquiring fund's investment in the acquired fund are reasonably addressed. As part of this consideration, the acquired fund's investment adviser must consider, at a minimum, the following factors: (i) The scale of contemplated investments by the acquiring fund and any maximum investment limits; (ii) the anticipated timing of redemption requests by the acquiring fund; (iii) whether and under what circumstances the acquiring fund will provide advance notification of investments and redemptions; and (iv) the circumstances under which the acquired fund may elect to satisfy redemption requests in kind rather than in cash and the terms of any such redemptions in kind. The acquired fund's investment adviser must report its findings and the basis for those findings to the fund's board of directors no later than the next regularly scheduled board of directors meeting

through voting does not provide the same level of protection from undue influence as mirror voting).

⁶³⁴ *See infra* section V.C.1.b.iv for discussion of the condition of rule 12d1–4 related to layering of fees and expenses and complex structures for management companies, UITs, and separate accounts (*i.e.*, rule 12d1–4(b)(2)(i), (ii), and (iii)).

following the acquiring fund's initial investment in the acquired fund.⁶³⁵

Hence, rule 12d1-4 will differ from the undue influence conditions in our exemptive orders in the following main ways. First, the undue influence requirement of rule 12d1-4 will only apply to acquired funds, while the policies and procedures requirement in our exemptive orders is applicable to both acquiring and acquired funds.⁶³⁶ Second, the undue influence requirement of rule 12d1-4 will apply to both affiliated and unaffiliated funds of funds, while the policies and procedures requirement in our exemptive orders only applies to unaffiliated funds of funds. Third, the undue influence requirement of rule 12d1-4 will only apply prior to the initial acquisition of the acquired fund shares, while the policies and procedures requirement for acquired funds in our exemptive orders applies periodically (*i.e.*, at least annually). Fourth, the undue influence requirement of rule 12d1-4 will apply to funds' investment advisers, while the policies and procedures requirement in our exemptive orders applies to funds' boards of directors.

Rule 12d1-4 imposes the undue influence requirement only on acquired funds. The benefit of such an approach is that it will reduce ongoing costs to acquiring funds relative to our exemptive orders because acquiring funds will not be required to adopt policies and procedures to prevent undue influence over the acquired fund. Such an approach, however, may be weaker from an investor protection standpoint to the extent that acquiring funds are no longer required to make findings to prevent undue influence over the acquired fund. We believe that these concerns are mitigated by the rule's additional conditions related to undue influence, including voting requirements, the fund of funds investment agreement requirement, and the fact that the rule will prohibit an acquiring fund and its advisory group from controlling an acquired fund.

⁶³⁵ Under our exemptive orders, in cases when the investment adviser to the fund assists the board with the findings and procedures to prevent overreaching and undue influence by the acquiring fund and its affiliates, the investment adviser periodically reports its findings to the fund's board of directors. Hence, the reporting requirement in rule 12d1-4 likely is no more burdensome than reporting practices under our exemptive orders.

⁶³⁶ See rule 12d1-4(b)(2)(i)(B). Acquiring funds are nevertheless subject to other rule conditions, such as the requirement to enter into a fund of funds investment agreement and the evaluation of the complexity of the structure and findings regarding the aggregate fees and expenses associated with the acquiring fund's investment in the acquired fund.

Rule 12d1-4 will impose the undue influence requirement on both affiliated and unaffiliated funds of funds, which may enhance investor protection.⁶³⁷ At the same time, by imposing the undue influence requirement to both affiliated and unaffiliated funds of funds, the undue influence requirement of rule 12d1-4 will be more costly to implement than the policies and procedures in our exemptive orders because a larger number of acquired funds (*i.e.*, both affiliated and unaffiliated funds) will be required to incur the costs associated with the undue influence requirement.⁶³⁸

In contrast, by requiring an undue influence finding only at initial acquisition, rule 12d1-4 will reduce costs for acquired funds relative to our exemptive orders because acquired funds will no longer be required to periodically make findings and adopt procedures related to undue influence. While this rule condition does not require periodic evaluation of acquiring funds' investments in acquired funds, the board may require more frequent subsequent reporting under the fund's compliance program.

Rule 12d1-4 also allocates the responsibility of making undue influence findings to the acquired fund's investment adviser, subject to the

⁶³⁷ Several commenters stated that affiliated funds of funds do not raise the concerns that section 12(d)(1) was enacted to address. See, *e.g.*, PIMCO Comment Letter; Allianz Comment Letter; Thrivent Comment Letter. Academic literature, however, provides results of empirical analysis consistent with the idea that affiliated funds of funds suffer from conflicts of interest. See, *e.g.*, Utpal Bhattacharya, Jung H. Lee, & Veronika K. Pool, *Conflicting Family Values in Mutual Fund Families*, 68 J. Fin. 173 (2013); Jung Hoon Lee, *Information Flows in Mutual Fund Families* (Working Paper, Sept. 2014), available at https://papers.ssrn.com/sol3/papers.cfm?abstract_id=2148075. See also, *e.g.*, Diane Del Guercio, Egemen Genc, & Hai Tran, *Playing Favorites: Conflicts of Interest in Mutual Fund Management*, 128 J. Fin. Econ. 535 (2018); Jose-Miguel Gaspar, Massimo Massa, & Pedro Matos, *Favoritism in Mutual Fund Families? Evidence on Strategic Cross-Fund Subsidization*, 61 J. Fin. 73 (2006); Luis Goncalves-Pinto, Juan Sotes-Paladino, & Jing Xu, *The Invisible Hand of Internal Markets in Mutual Fund Families*, 89 J. Banking & Fin. 105 (2018) for evidence consistent with the idea of conflicts of interest in affiliated fund complexes in general (*i.e.*, not necessarily affiliated funds of funds). See also CFA Comment Letter for similar arguments. Any such conflicts of interest are, at least partially, mitigated to the extent that the investment adviser owes a fiduciary duty both to the acquiring and acquired funds and the acquiring and acquired funds share the same board of directors that exercise oversight over both funds.

⁶³⁸ See also Guggenheim Comment Letter (noting that the finding requirement of rule 12d1-4 will "give rise to the need to incorporate attorneys and accounting staff to assist in documenting the cost of the fund investment and the complexity of the structure prior to making the investment and in preparing a document for review by the board.").

board's oversight.⁶³⁹ As discussed above, our current exemptive orders require the board to approve certain procedures to prevent overreaching and undue influence by the acquiring fund and its affiliates.⁶⁴⁰ While rule 12d1-4 does not require the adoption of specific procedures, rule 38a-1 requires funds to adopt written compliance policies and procedures reasonably designed to prevent a violation of the federal securities laws by the fund.⁶⁴¹ Accordingly, we believe that the economic effect of this difference between our exemptive orders and rule 12d1-4 will be limited because funds will be required to maintain similar policies and procedures, and compliance with the exemptive orders is generally facilitated by the fund's investment adviser at the direction of the board.⁶⁴² We believe investor protection concerns that had been addressed by the conditions in our exemptive orders will be more effectively addressed by the protective conditions of the final rule, such as the requirement that an acquiring fund investment adviser evaluate the complexity of the structure and find that the acquiring fund's fees and expenses do not duplicate the fees and expenses of the acquired fund and that certain funds enter into a fund of funds investment agreement.⁶⁴³

The undue influence finding requirement of rule 12d1-4 will impose one-time costs on acquired funds to review the rule's requirement and modify, as necessary, their policies and procedures to comply with the rule, and these costs may be borne by investors in acquired funds.⁶⁴⁴ These estimated

⁶³⁹ Rule 12d1-4(b)(2).

⁶⁴⁰ For example, our orders require an unaffiliated acquired fund board to adopt procedures reasonably designed to monitor purchases by the unaffiliated acquired fund in an underwriting in which an affiliate of the acquiring fund is the principal underwriter. In addition, the acquiring fund's board of directors, including a majority of its independent directors, is required by our orders to adopt procedures reasonably designed to assure that the acquiring fund's investment adviser does not take into account consideration received from an unaffiliated acquired fund (or certain of the unaffiliated acquired fund's affiliates).

⁶⁴¹ See *supra* footnote 59 and associated text.

⁶⁴² Some commenters argued that allocating more responsibilities to the fund's investment adviser subject to the board's oversight will be beneficial to fund investors because this approach is consistent with the board's current oversight responsibilities. See IDC Comment Letter; Hancock Comment Letter; MFD Comment Letter; ABA Comment Letter.

⁶⁴³ In addition, the acquired fund's board and adviser are subject to ongoing fiduciary obligations and the acquired fund's board must determine an appropriate level of subsequent reporting under the acquired fund's compliance program.

⁶⁴⁴ Acquired funds will bear the costs associated with rule 12d1-4 only if they permit acquiring fund investments in excess of the section 12(d)(1) limits

costs are attributable to the following activities: (i) Reviewing the rule's finding requirement; (ii) developing new (or modifying existing) policies and procedures to align with the finding requirement of rule 12d1-4; (iii) integrating and implementing those policies and procedures into the rest of the funds' activities; and (iv) preparing new training materials and administering training sessions for staff in affected areas.

The undue influence requirement of rule 12d1-4 also will impose ongoing costs on an acquired fund's investment adviser each time a new acquiring fund invests in the acquired fund. Our current exemptive orders require fund boards to make certain findings and adopt procedures to prevent overreaching and undue influence by the acquiring fund and its affiliates, and some of those processes and procedures may be similar to the rule's requirements. Consequently, to the extent that investment advisers can leverage some of the existing board processes and procedures to comply with the rule's requirements, any ongoing costs will be mitigated. We generally believe that the undue influence finding of rule 12d1-4 is as comprehensive as the policies and procedures in our exemptive orders because both rule 12d1-4 and our exemptive orders allow funds flexibility to determine the undue influence concerns, and to consider factors applicable to those concerns, that may be relevant to each fund of funds structure.⁶⁴⁵

Our staff estimates that the annual costs necessary to comply with the undue influence finding requirement of

in reliance on rule 12d1-4 and therefore must comply with the rule's conditions. Acquired funds may be able to pass through some of the costs associated with the rule's conditions to acquiring funds through higher operating expenses. The ability of acquired funds to pass through some of the costs depends on the market power of acquired funds, which ultimately depends on the availability of investment options for acquiring funds.

⁶⁴⁵ In particular, rule 12d1-4 requires acquired funds to consider (i) the scale of the acquiring fund's investment in the acquired fund; and (ii) the timing and circumstances of the acquiring fund's redemptions of the acquired fund shares. Our exemptive orders require acquiring funds to consider (i) any services or transactions between the acquiring fund and an unaffiliated acquired fund; (ii) any purchases by the acquired fund of securities in affiliated underwritings; and (iii) any compensation that the acquiring fund investment adviser received from an unaffiliated acquired fund. Rule 12d1-4 requires advisers to consider certain factors at a minimum but does not dictate the particular terms or how advisers must evaluate or weigh the various factors. See also Dechert Comment Letter (recommending that the Commission should not set forth specific factors that an adviser should consider when making such a finding).

rule 12d1-4 for acquired management companies will be equal to \$45,193 per acquired management company and will result in an aggregate ongoing burden equal to \$131 million for all affected acquired management companies.⁶⁴⁶

We expect that the costs associated with the finding requirement of rule 12d1-4 will be incurred by the acquired fund's investment adviser and the acquired fund's board of directors but, depending on market competition and other factors, may partially or fully be borne by the acquired fund shareholders in the form of higher management fees and/or operating expenses.

iv. Layering of Fees and Expenses

Our current exemptive orders contain a set of conditions designed to prevent duplicative and excessive fees and expenses in fund of funds structures. In particular, for management companies, our exemptive orders: (i) Limit sales charges and service fees charged by the acquiring fund to those set forth in the FINRA's sales charge rule; (ii) require an acquiring fund's adviser to waive fees otherwise payable to it by the acquiring fund in an amount at least equal to any compensation received from an acquired fund that is not part of the same group of investment companies by the adviser, or an affiliated person of the adviser, other than advisory fees paid to the adviser or its affiliated person by such an acquired fund, in connection with the investment by the acquiring

fund in such acquired fund; and (iii) require the acquiring fund board to find that advisory fees are based on services provided that are in addition to, rather than duplicative of, the services provided by an adviser to an acquired fund. For UITs, our exemptive orders: (i) Limit sales charges and service fees charged by the acquiring fund to those set forth in FINRA's sales charge rule; and (ii) require UIT depositors to deposit only acquired funds that do not assess a sales load or that waive any sales loads. The conditions in our exemptive orders apply to both investments in affiliated and unaffiliated funds of funds.

Rule 12d1-4 will replace the above-mentioned conditions with the following requirements that will also apply to both affiliated and unaffiliated funds of funds. For management companies, rule 12d1-4 will require the acquiring fund's adviser to evaluate the complexity of the structure and the aggregate fees and expenses associated with the acquiring fund's investment in acquired funds and find that the acquiring fund's fees and expenses do not duplicate the fees and expenses of the acquired fund. As part of this evaluation, the acquiring fund's adviser should consider, among others, whether such fees incurred by the acquiring fund are based on services that are in addition to, rather than duplicative of, services provided by the acquiring fund's investment adviser. For UITs, rule 12d1-4 will require the principal underwriter or depositor of a UIT to analyze the complexity of the structure associated with the UIT's investment in acquired funds, and find that the arrangement does not result in duplicative fees and expenses. For all acquiring funds, similar to the finding requirement related to undue influence,⁶⁴⁷ rule 12d1-4 will require the evaluation of aggregate fees and expenses prior to the initial acquisition of an acquired fund in excess of the limits in section 12(d)(1).

Management companies. In the case of management companies, rule 12d1-4 will replace the specific conditions in our exemptive orders with a broader requirement that the investment adviser to the acquiring fund consider both the complexity and the aggregate fees and expenses of the fund of funds arrangement. We believe that the omission of the specific conditions in our exemptive orders will not compromise investor protection for the following reasons.

First, the omission of the FINRA sales charge limitation from rule 12d1-4

⁶⁴⁶ This estimate is based on the following calculation: \$131 million = \$45,193 initial and annual internal and external burden per fund × 2,900 acquired management companies that will be subject to rule 12d1-4. \$45,193 = [\$14,994 initial and annual internal burden per fund + \$35,220 initial external burden per fund (see Table 7 in *infra* section VI.B.3.)] × (1—10% of the total burden that is associated with the recordkeeping requirements of rule 12d1-4). This and all subsequent cost estimates in this section that rely on per fund dollar cost estimates from section VI below are an upper bound of the costs imposed by the final rule because they capture the total rather than the incremental cost of the rule's requirements. 2,900 acquired management companies that will be subject to rule 12d1-4 = 4,203 acquired management companies × 69% of acquired management companies that will be subject to rule 12d1-4 as estimated by a commenter (see *supra* footnote 537 and associated text). Our calculation assumes that the commenter's estimate of acquiring funds that will be subject to rule 12d1-4 is also applicable to acquired funds. 4,203 acquired management companies = 3,392 acquired registered investment companies (see *supra* Table 2) × 14,605 registered investment companies (see Table 1 in *supra* section V.B.1)/11,788 management companies (see Table 2 in *supra* section V.B.1). This estimate assumes that acquired management companies with investments from acquiring funds beyond the limits of section 12(d)(1) will be subject to rule 12d1-4 at the same rate as the acquired management companies with investments from acquiring funds within the limits of section 12(d)(1) following the rule adoption.

⁶⁴⁷ See *supra* section V.C.1.b.iii.

likely will not have an economic effect because the FINRA sales charge rule remains applicable to certain funds (*i.e.*, open-end funds and certain closed-end funds) regardless of the rule's requirements.⁶⁴⁸ Second, rule 12d1-4 will replace the requirements in our exemptive orders that (i) the acquiring fund's adviser should waive advisory fees under certain circumstances; and (ii) the acquiring fund's board should make certain findings regarding advisory fees, with a broader requirement that the investment adviser should consider whether fees and expenses are duplicative. We believe that the fee waiver condition of the existing orders is unnecessary in light of the existing duties and obligations of the fund boards of directors.⁶⁴⁹ In addition, the requirement in the exemptive orders that the acquiring fund board find that advisory fees are based on services provided that are in addition to, rather than duplicative of, the services provided by an adviser to an acquired fund is covered by a fund board's fiduciary duties and statutory obligations.

The benefit of the broader fee and expense conditions of rule 12d1-4 relative to the more specific conditions of the exemptive orders is that the acquiring fund's investment adviser will be able to tailor the evaluation of the complexity and the findings regarding aggregate fees and expenses of the fund of funds structure to the needs of each structure, including the consideration of any additional factors that may be appropriate under the circumstances. As a result, the fee conditions of rule 12d1-4 may better protect acquiring fund shareholders from duplicative fees than the conditions in the exemptive orders.⁶⁵⁰

At the same time, the broader fee and expense conditions of rule 12d1-4 relative to the exemptive orders may be more costly to implement and monitor relative to the conditions in the exemptive orders. In particular, rule 12d1-4 will impose one-time costs on

funds to review the rule's requirement and modify, as necessary, their policies and procedures to comply with this aspect of rule 12d1-4.

The incremental initial and ongoing costs that management companies will incur whenever they invest for the first time in an acquired fund under rule 12d1-4 include: (i) Advisers' initial evaluation of the complexity of the structure and analysis supporting the finding regarding aggregate fees and expenses associated with their investments in acquired funds; (ii) advisers' preparation and reporting of their evaluations, findings, and the basis for their evaluations or findings to the acquiring funds' board of directors; (iii) board time to review the reports prepared by the investment advisers; and (iv) costs of counsel to the independent directors to review the reports prepared by the investment advisers.

The Commission staff estimates that the one-time and ongoing annual costs necessary to comply with the fee and expense conditions of rule 12d1-4 for acquiring management companies will be equal to \$45,193 per acquiring management company and will result in an aggregate ongoing burden equal to \$148.1 million for all affected acquiring management companies.⁶⁵¹

UITs. With respect to acquiring UITs, rule 12d1-4 will replace the specific conditions related to sales charges in the exemptive orders with a broader requirement that on or before the date of initial deposit of portfolio securities, the UIT's principal underwriter or depositor evaluate the complexity of the structure and find that the UIT's fees and expenses do not duplicate the fees and expenses of the acquired funds that the UIT holds or will hold at the date of deposit. Similar to the fee and expense conditions of rule 12d1-4 for management companies, the benefit of the broader requirement of rule 12d1-4

for UITs relative to the more specific conditions of the exemptive orders is that the acquiring UIT's depositor or underwriter will be able to tailor the evaluation of the complexity and finding regarding the aggregate fees and expenses of the fund of funds structure to the needs of each structure and augment, whenever appropriate, the exemptive order conditions with additional appropriate factors. As a result, the UIT fee and expense conditions of rule 12d1-4 may better protect acquiring fund shareholders from duplicative fees than the conditions in the exemptive orders.

At the same time, the broader UIT fee and expense conditions of rule 12d1-4 relative to the exemptive orders may be more costly to implement and monitor relative to the conditions in the exemptive orders. In particular, rule 12d1-4 will impose one-time costs on funds to review the rule's requirement and modify, as necessary, their policies and procedures to comply with the rule. Our staff estimates that the one-time costs necessary to comply with the finding requirement related to fees and expenses of rule 12d1-4 will be equal to \$13,187 per acquiring UIT and will result in an aggregate ongoing burden equal to \$2.6 million for all affected acquiring UITs.⁶⁵² UITs will not bear any ongoing implementation or monitoring costs because they are only required to evaluate the complexity of the structure and make a finding regarding the aggregate fees and expenses associated with the UIT's investment in an acquired fund at the time of initial deposit.

To the extent that the fee and expense conditions of rule 12d1-4 will increase operating costs for management

⁶⁵² This estimate is based on the following calculation: \$2.6 million = \$13,187 initial internal and external burden per fund × 200 acquiring UITs that will be subject to rule 12d1-4. \$13,187 initial internal and external burden per fund = [\$12,253 initial internal burden per fund + \$2,400 initial external burden per fund (see Table 8 in *infra* section VI.B.4.)] × (1–10% of the total burden associated with the recordkeeping requirements of rule 12d1-4). 200 acquiring UITs that will be subject to rule 12d1-4 = 720 UITs (see Table 1 in *supra* section V.B.1) × 40% of funds that are acquiring funds × 69% of acquiring UITs that will be subject to rule 12d1-4 as estimated by a commenter (see *supra* footnote 534 and associated text). 40% of funds that are acquiring funds = 4,750 acquiring funds (see Table 2 in *supra* section V.B.1)/11,788 funds (see Table 2 in *supra* section V.B.1). This estimate assumes that acquiring UITs with current investments in other funds beyond the limits of section 12(d)(1) will be subject to rule 12d1-4 at the same rate as the acquiring UITs with current investments in other funds within the limits of section 12(d)(1) following the rule adoption. This estimate also assumes that the percentage of management companies that are acquiring funds is the same as the percentage of UITs that are acquiring funds.

⁶⁴⁸ See FINRA rule 2341. FINRA rule 2341 does not apply to registered closed-end funds (other than interval funds relying on rule 23c-3 under the Act), BDCs, or UITs (other than "single payment" investment plans that are issued by a UIT). See FINRA rule 2341(d).

⁶⁴⁹ See *supra* footnotes 309–313 and accompanying text; see also 2018 FOF Proposing Release, *supra* footnote 6, at nn.146–147 and accompanying text.

⁶⁵⁰ A commenter argued that an additional benefit of the fee and expense conditions of rule 12d1-4 relative to the baseline is that rule 12d1-4 will "lower administrative burden, and appropriately shift the decision-making to the party (the adviser) in the best position to make the assessment" whether the fees and expenses of the fund of funds are reasonable. See Invesco Comment Letter.

⁶⁵¹ This estimate is based on the following calculation: \$148.1 million = [\$14,994 initial and annual internal burden per fund + \$35,220 initial external burden per fund (see Table 7 in *infra* section VI.B.3.)] × (1–10% of the total burden that is associated with the recordkeeping requirements of rule 12d1-4) × 3,278 acquiring management companies that will be subject to rule 12d1-4. 3,278 acquiring management companies that will be subject to rule 12d1-4 = 4,750 acquiring management companies (see Table 2 in *supra* section V.B.1) × 69% of acquiring management companies that will be subject to rule 12d1-4 as estimated by a commenter (see *supra* footnote 537 and associated text). This estimate assumes that acquiring management companies with current investments in other funds beyond the limits of section 12(d)(1) will be subject to rule 12d1-4 at the same rate as the acquiring management companies with current investments in other funds within the limits of section 12(d)(1) following the rule adoption.

companies and UITs, management companies and UITs could pass through to investors any such cost increases in the form of higher operating expenses.

Variable Annuity Separate Accounts. With respect to separate accounts funding variable insurance contracts,⁶⁵³ the rule's fees and expenses requirement is the same as the requirement in our current exemptive orders, and thus will not have a significant economic effect. However, to the extent that some insurance companies currently do not provide the same certification to acquiring funds (e.g., because the acquiring funds are able to rely upon section 12(d)(1)(G) and rule 12d1-2 or their orders permit certifications with a different scope), acquiring funds will incur costs to request and insurance companies will incur costs to provide this certification.⁶⁵⁴ We lack data that would allow us to estimate how many insurance companies currently do not provide this certification. Relatedly, a commenter stated that its exemptive order requires that the insurance company make a representation to the Commission, rather than the acquiring fund, that the aggregate fees and expenses of the structure are reasonable.⁶⁵⁵ We believe that providing a certification to the acquiring fund rather than the Commission will impose minimal additional costs on insurance companies.⁶⁵⁶

v. Fund of Funds Investment Agreement

Our current exemptive orders require a participation agreement between unaffiliated acquiring and acquired funds under which the funds agree to fulfill their responsibilities under the exemptive order. Unless the acquiring and acquired funds have the same investment adviser, rule 12d1-4 will require the acquiring and acquired funds to enter into a fund of funds investment agreement before the acquiring fund acquires securities of the acquired fund in excess of the limits of section 12(d)(1). The investment agreement must include: (i) Any material terms necessary for the adviser, underwriter, or depositor to have made the finding regarding the acquiring fund's investment in the acquired fund; (ii) a termination provision whereby either party can terminate the agreement with advance written notice within a period no longer than 60 days;⁶⁵⁷ and

(iii) a provision whereby the acquired fund must provide the acquiring fund with fee and expense information to the extent reasonably requested. Hence, the fund of funds investment agreement in rule 12d1-4 is more comprehensive than the participation agreement in our exemptive orders because it (i) applies to both affiliated and unaffiliated fund of funds structures (unless the acquiring and acquired funds share the same primary investment adviser) while the participation agreement in our exemptive orders only applies to unaffiliated funds; and (ii) encompasses a broader set of conditions.⁶⁵⁸

The benefit of a more comprehensive fund of funds investment agreement relative to the participation agreement is that it will enhance investor protection. First, the fund of funds investment agreement will protect investors in both certain affiliated and unaffiliated fund of funds structures from acquiring funds' undue influence, duplicative fees, and complex fund of funds structures. Second, it will allow acquiring and acquired fund boards to monitor better investment advisers' conflicts of interest and the findings of the acquiring and acquired fund investment advisers in the context of the fund of funds arrangement.⁶⁵⁹ Third, the fund of funds investment agreements will provide a mechanism for acquiring and acquired funds to terminate the arrangement if it is no longer in their respective best interest. Finally, the fund of funds investment agreement will require acquired funds to provide fee and expense information to the acquiring fund, which will assist the acquiring fund's adviser with assessing the impact of fees and expenses associated with an investment in an acquired fund.

By requiring fund of funds investment agreements for both affiliated and unaffiliated funds of funds, rule 12d1-4 will level the playing field for small and large fund complexes relative to the exemptive orders. Funds in smaller complexes are less likely to have sufficient investment opportunities within the fund complex than funds in

larger complexes, and thus are more likely to structure unaffiliated funds of funds and bear the costs associated with a participation agreement. Under our current exemptive orders, participation agreements are only required in the case of unaffiliated funds of funds, which may impose a relatively higher burden on funds in smaller complexes. Rule 12d1-4 will require funds to enter into a fund of funds investment agreement both in the case of unaffiliated and affiliated funds of funds (except when the acquiring and acquired funds share the same primary adviser), which will level the playing field for funds that are more likely to structure unaffiliated funds of funds, that is, smaller fund complexes.

The disadvantage of a more comprehensive set of conditions in the fund of funds investment agreements relative to the participation agreements is that fund of funds investment agreements will be more costly to implement and monitor than the participation agreements.⁶⁶⁰ In addition, funds of funds will bear incremental ongoing costs to implement the terms of and monitor compliance with the fund of funds investment agreements. Hence, the one-time and ongoing annual costs borne by acquiring and acquired funds as a result of the requirement to enter into fund of funds investment agreements will be \$12,142 for each fund that enters into a fund of funds investment agreement and will result in an aggregate burden equal to \$112.2 million for all funds that enter into a fund of funds investment agreement.⁶⁶¹

⁶⁶⁰ As noted above, fund of funds investment agreements entered into under the rule will be considered material contracts and thus must be filed as exhibits to each fund's registration statement. See *supra* footnote 359 and accompanying text. While we believe currently that some funds may similarly file participation agreements that are entered into under our exemptive orders as exhibits, this certainty regarding fund of funds investment agreements could result in increased costs to ensure that they are filed. Several commenters argued that the cost of entering into a participation agreement is small, especially because of the standardization of terms and the broad use of participation agreements in the industry. See, e.g., Fidelity Comment Letter; Hancock Comment Letter. We expect that the costs associated with preparing and monitoring the fund of funds investment agreements may decrease over time as the fund of funds investment agreements become more standardized.

⁶⁶¹ This estimate is based on the following calculation: \$112.2 million = [\$9,364 internal burden per fund + \$2,778 external burden per fund (see *infra* Table 6 in section VI.B.2.)] × 9,240 acquiring-acquired fund pairs that do not share the same investment adviser and will be subject to rule 12d1-4. 9,240 acquiring-acquired fund pairs that do not share the same investment adviser and will be subject to rule 12d1-4 = 13,391 acquiring-acquired fund pairs that do not share the same investment adviser × 69% of acquiring-

Continued

⁶⁵³ See rule 12d1-4(b)(2)(iii).

⁶⁵⁴ See PGIM Comment Letter.

⁶⁵⁵ See Nationwide Comment Letter.

⁶⁵⁶ See Table 9, *infra* section VI.B.5, for relevant cost estimates.

⁶⁵⁷ Our exemptive orders do not mandate a specific termination right in the participation agreement. However, the exemptive orders allow

acquired funds to terminate the participation agreement subject solely to the giving of notice to a Fund of Funds and the passage of a reasonable notice period and some of the current participation agreements contain a 60-day termination provision. See *supra* footnote 356.

⁶⁵⁸ Similar to the participation agreement in our exemptive orders, the fund of funds investment agreement in rule 12d1-4 will allow acquired funds to block the acquisition of their shares by certain acquiring funds beyond the limits of section 12(d)(1) by refusing to enter into a fund of funds investment agreement with the acquiring fund.

⁶⁵⁹ See rule 12d1-4(c)(1) recordkeeping requirements.

vi. Complex Structures

The current exemptive orders prohibit an acquired fund from investing in other investment companies beyond the limits in section 12(d)(1), but they do not prohibit a fund from investing in an acquiring fund beyond the limits in section 12(d)(1). In line with our current exemptive orders, rule 12d1–4 will prohibit an acquired fund from investing beyond the statutory limits in both registered funds and private funds subject to limited exceptions.⁶⁶² Nevertheless, the final rule will also expand the complex structures prohibitions included in the exemptive orders in the following ways. First, rule 12d1–4 will prohibit a fund from acquiring in excess of the limits in section 12(d)(1)(A) of the Act (either in reliance on section 12(d)(1)(G) or rule 12d1–4) the outstanding voting securities of an acquiring fund.⁶⁶³ Second, the rescission of the current exemptive orders will result in the prohibition of multi-tier structures formed in reliance on section 12(d)(1)(G) and those exemptive orders.⁶⁶⁴

The additional complex structures prohibitions of the final rule will limit

acquired fund pairs that will be subject to rule 12d1–4 as estimated by a commenter (*see supra* footnote 534 and associated text). 13,391 acquiring-acquired fund pairs that do not share the same investment adviser = 30,548 acquiring-acquired fund pairs \times 44% of the acquiring-acquired fund pairs that do not share the same investment adviser. We use data from Item C.9 of Form N–CEN to identify a fund's investment adviser. 30,548 acquiring-acquired fund pairs = 24,689 acquiring-acquired fund pairs identified using Form N–PORT data \times [14,605 registered investment companies (*see* Table 1 in *supra* section V.B.1) + 83 BDCs (*see supra* footnotes 558 and 559 and associated text)]/[11,788 management companies (*see* Table 2 in *supra* section V.B.1) + 83 BDCs (*see supra* footnotes 558 and 559 and associated text)]. We lack data that would allow us to identify acquiring-acquired fund pairs, for which the acquiring fund is a BDC or a registered investment company that is not a management company. Hence, we assume that acquiring BDCs and acquiring registered investment companies that are not management companies invest in the same number of unique acquired funds as the management companies. Our estimate also assumes that acquiring-acquired fund pairs that are structured beyond the limits of section 12(d)(1) will be subject to rule 12d1–4 at the same rate as acquiring-acquired fund pairs that are structured within the limits of section 12(d)(1) following the rule adoption. Our estimate is likely an upper bound of the cost associated with fund of funds investment agreements because funds of funds that currently have participation agreements in place will only be required to enter into a fund of funds investment agreement if the acquiring fund purchases additional shares of the acquired fund in reliance on the rule.

⁶⁶² *See* rule 12d1–4(b)(3)(ii).

⁶⁶³ *See* rule 12d1–4(b)(3)(i).

⁶⁶⁴ As discussed above, an acquiring fund relying on section 12(d)(1)(G) currently can invest in an acquired fund that invests in another fund beyond the limits of section 12(d)(1) in reliance on an exemptive order.

the creation of multi-tier structures that historically were associated with investor confusion and duplicative and excessive fees before the enactment of section 12(d)(1).⁶⁶⁵ Hence, the complex structures conditions of the final rule will enhance investor protection.

At the same time, the final rule will impose costs on funds that may be required to reallocate their portfolio to ensure compliance with the rule. In particular, multi-tier structures that have been formed in reliance on exemptive orders or a combination of exemptive orders and section 12(d)(1)(G) will need to be restructured to the extent that the acquiring fund chooses to invest additional amounts in the existing acquired funds in reliance on this rule. In particular, the top-tier acquiring funds will be required to reallocate their investments to funds that do not invest in underlying funds beyond the 10% limit of rule 12d1–4. Alternatively, the top-tier acquiring funds can invest in the same acquired funds, but those acquired funds will incur costs to reduce their investments in other funds to comply with the limits of rule 12d1–4. Our analysis shows 23 multi-tier structures that are at least three tiers and one multi-tier structure that is four-tiers, for which there is at least one acquiring fund in each level that invests beyond the limits of section 12(d)(1) in at least one acquired fund.⁶⁶⁶ For those 23 top-tier acquiring funds, 3.56% of their assets are invested in the second-tier acquired funds that invest in a third-tier acquired fund, and 2.93% of their assets are invested in the third-tier acquired funds, on average. Our analysis, however, should be interpreted with caution because our data does not allow us to distinguish how many of these 23 multi-tier structures are consistent with the exceptions to the complex structures prohibitions of rule 12d1–4.

Section VI.C.1.a above provides a detailed discussion of the costs associated with portfolio reallocations. Any costs that funds will incur to restructure their investments will be moderated by the fact that funds will have a period to bring their operations into compliance with the final rule.⁶⁶⁷

In addition, funds that will operate in accordance with rule 12d1–4 to create

⁶⁶⁵ As discussed above in section II.C.3.b, multi-tier structures may be difficult for investors to understand even with comprehensive disclosures. Accordingly, the rule includes a general prohibition on three-tier structures, subject to enumerated exceptions and the 10% Bucket for acquired fund investments in other investment companies. *See* rule 12d1–4(b)(3).

⁶⁶⁶ *See supra* footnote 551 and associated text.

⁶⁶⁷ *See supra* section III.

fund of funds structures will need to implement policies and procedures to monitor their investments in other funds beyond the limits of section 12(d)(1) to ensure compliance with the complex structures conditions of rule 12d1–4. We believe that any such additional costs may be mitigated to the extent that many of the complex structures conditions of rule 12d1–4 are similar to the complex structures conditions in our exemptive orders and funds already have policies and procedures to monitor their investments in other funds for compliance with the terms of the exemptive orders. Those policies and procedures may be leveraged to monitor compliance with the complex structures conditions of rule 12d1–4.

Finally, as discussed in detail in Section V.C.1.i above, the restrictions on multi-tier structures will affect both current and prospective funds by restricting their investment flexibility, thus reducing investment options available to fund investors.

vii. Recordkeeping

Our exemptive orders generally require the unaffiliated acquiring and acquired funds to maintain (i) records of the exemptive order; (ii) records of the participation agreement; and (iii) a list of the names of each fund of funds affiliate and underwriting affiliate. Further, our exemptive orders require the unaffiliated acquired funds to maintain a written copy of the policies and procedures (and any modifications to such policies and procedures) that the acquired funds put in place to monitor any purchases of securities from the acquiring fund or its affiliates. The recordkeeping requirements in our exemptive orders are for a period of not less than six years, and the records must be maintained in an easily accessible place in the first two years.

Rule 12d1–4 will require both affiliated and unaffiliated acquiring and acquired funds to maintain (i) a copy of each fund of funds investment agreement; (ii) for management companies and UITs, a written record of the acquiring and acquired funds' evaluations and findings, and the basis for such evaluations and findings; and (iii) for separate accounts funding variable insurance contracts, the certification provided by the insurance company. Rule 12d1–4 will require 5 years of recordkeeping and, similar to the orders, it will require records to be maintained in an easily accessible place in the first two years.

The recordkeeping requirements of rule 12d1–4 are more extensive than the recordkeeping requirements in our

exemptive orders because (i) they apply to both affiliated and unaffiliated funds of funds while the recordkeeping requirements in our exemptive orders only apply to unaffiliated funds of funds; and (ii) they apply to both acquiring and acquired funds while only certain of the recordkeeping requirements in our exemptive orders apply to both acquiring and acquired funds.⁶⁶⁸ At the same time, the recordkeeping requirements of rule 12d1-4 have a shorter duration than the recordkeeping requirements of our exemptive orders (*i.e.*, five years under the rule instead of six years under the orders). Further, the undue influence findings of rule 12d1-4 are only required prior to the initial acquisition of the acquired fund shares while the determinations in our exemptive orders apply periodically (*i.e.*, at least annually). Consequently, the associated recordkeeping of rule 12d1-4 will be less burdensome than the associated recordkeeping in our exemptive orders.

The benefit of any more extensive recordkeeping requirements is that they will allow for Commission examinations of investment advisers' investing decisions, which may ultimately benefit fund investors. The disadvantage of any more extensive recordkeeping requirements of rule 12d1-4 relative to our exemptive orders is that it will impose higher costs on funds and their investors. We estimate that each acquiring and acquired management company will bear annual recordkeeping costs equal to \$5,021, each acquiring UIT will bear annual recordkeeping costs equal to \$1,465, each separate account will bear annual recordkeeping costs equal to \$65, and each fund that enters into a fund of funds investment agreement will bear annual recordkeeping costs equal to \$954, which will result in aggregate ongoing annual recordkeeping costs equal to \$40.1 million.⁶⁶⁹

⁶⁶⁸ The recordkeeping requirements in our exemptive orders related to purchases in affiliated underwritings only apply to acquired funds.

⁶⁶⁹ This estimate is based on the following calculation: \$40.1 million = \$14.6 million recordkeeping cost associated with the undue influence finding of rule 12d1-4 for acquired management companies + \$16.5 million recordkeeping cost associated with the fee and expense finding of rule 12d1-4 for acquiring management companies + \$0.3 million recordkeeping cost associated with the fee and expense finding for acquiring UITs + \$0.01 million recordkeeping cost associated with the recordkeeping requirement for separate accounts + \$8.8 million recordkeeping cost associated with the fund of funds investment agreement. \$14.6 million recordkeeping cost associated with the undue influence finding of rule 12d1-4 for acquired management companies = [\$14,994 initial and annual internal burden per fund + \$35,220 initial external burden per fund (*see* Table 7 in *infra*

2. Effects on Efficiency, Competition, and Capital Formation

i. Efficiency

Efficiency of current and prospective acquiring funds' asset allocation. The final rule will have opposing effects on the efficiency of current and prospective acquiring funds' asset allocation. More specifically, the final rule may promote the efficiency of funds' asset allocation for the following reasons. First, the final rule will eliminate the need for funds to apply for an exemptive order to structure certain funds of funds.⁶⁷⁰ By eliminating the need for funds of funds to apply for an exemptive order, the final rule will reduce certain frictions in funds' asset allocation that are caused by the expense and delays associated

section VI.B.3.)) $\times 10\%$ of the total burden that is associated with the recordkeeping requirements of rule 12d1-4 $\times 2,900$ acquired management companies that will be subject to rule 12d1-4 (*see supra* footnote 646). \$16.5 million recordkeeping cost associated with the fee and expense finding of rule 12d1-4 for acquiring management companies = [\$14,994 initial and annual internal burden per fund + \$35,220 initial external burden per fund (*see* Table 7 in *infra* section VI.B.3.)) $\times 10\%$ of the total burden that is associated with the recordkeeping requirements of rule 12d1-4 $\times 3,278$ acquiring management companies that will be subject to rule 12d1-4 (*see supra* footnote 651). \$0.3 million recordkeeping cost associated with the fee and expense finding for acquiring UITs = [\$12,253 initial internal burden per fund + \$2,400 initial external burden per fund (*see* Table 8 in *infra* section VI.B.4.)) $\times 10\%$ of the total burden that is associated with the recordkeeping requirements of rule 12d1-4 $\times 200$ acquiring UITs that will be subject to rule 12d1-4 (*see supra* footnote 652). \$0.01 million recordkeeping cost associated with the recordkeeping requirement for separate accounts = \$649 internal burden per fund (*see* Table 9 in *infra* section VI.B.5) $\times 10\%$ of the total burden that is associated with the recordkeeping requirements of rule 12d1-4 $\times 191$ acquiring separate accounts that will be subject to rule 12d1-4. 191 acquiring separate accounts that will be subject to rule 12d1-4 = [430 variable annuity separate accounts registered as UITs (*see* Table 1 in *supra* section V.B.1) + 243 variable life insurance separate accounts registered as UITs (*see* Table 1 in *supra* section V.B.1) + 14 management company separate accounts (*see* Table 1 in *supra* section V.B.1)] $\times 40\%$ of funds that are acquiring funds (*see supra* footnote 652) $\times 69\%$ of acquiring separate accounts that will be subject to rule 12d1-4 as estimated by a commenter (*see supra* footnote 534 and associated text). This estimate assumes that acquiring separate accounts with current investments in other funds beyond the limits of section 12(d)(1) will be subject to rule 12d1-4 at the same rate as the acquiring separate accounts with current investments in other funds within the limits of section 12(d)(1) following the rule adoption. This estimate also assumes that the percentage of management companies that are acquiring funds is the same as the percentage of separate accounts that are acquiring funds. \$8.8 million recordkeeping cost associated with the fund of funds investment agreement = \$954 recordkeeping cost associated with the fund of funds investment agreements (*see* Table 6 in *infra* section VI.B.2.) $\times 9,240$ acquiring-acquired funds pairs that do not share the same investment adviser and will be subject to rule 12d1-4 (*see supra* footnote 661).

⁶⁷⁰ *See supra* section V.B.2.a for discussion of the costs associated with the exemptive orders.

with the exemptive order process, and thus may promote the efficient allocation of funds' assets.⁶⁷¹

Second, rule 12d1-4 may increase the efficiency of certain funds' asset allocation. This is because rule 12d1-4 may increase funds' investment flexibility by expanding the scope of permissible acquiring and acquired funds relative to the current exemptive orders and broadening some of the exemptions to the complex structures prohibitions relative to the current exemptive orders and staff no-action letters, and thus may make it easier for funds to create an investment portfolio that better meets their investors' risk-return preferences.

Third, the final rule will create a more consistent and efficient regulatory framework for funds of funds than the existing regulatory framework for the following reasons.⁶⁷² First, rule 12d1-4 provides the same investment flexibility to all registered funds and BDCs. Second, under the existing regulatory framework, substantially similar funds of funds are subject to different conditions. For example, an acquiring fund currently can rely on section 12(d)(1)(G) and rule 12d1-2 to invest in an acquired fund within the same group of investment companies or, alternatively, can rely on relief provided by the Commission to achieve the same investment objectives. The final rule will eliminate the existing overlapping and potentially inconsistent conditions for funds of funds and harmonize conditions across different fund arrangements.⁶⁷³ This may remove obstacles to funds' investments and operations to the extent that regulatory consistency and efficiency decreases compliance and operating costs. By reducing compliance and operating costs, the final rule will further reduce frictions in asset allocation and may

⁶⁷¹ *See, e.g.*, Morningstar Comment Letter.

See supra section V.B.2.a for discussion of costs associated with the exemptive order process.

⁶⁷² *See, e.g.*, Nationwide Comment Letter; Invesco Comment Letter; ICI Comment Letter; Advent Comment Letter; Hancock Comment Letter; Clifford Chance Comment Letter; Schwab Comment Letter; Blackrock Comment Letter; Morningstar Comment Letter for commenters agreeing with our assessment that rule 12d1-4 will create a more efficient regulatory framework for funds of funds.

⁶⁷³ In particular, affiliated funds of funds currently can be structured either under section 12(d)(1)(G) and rule 12d1-2 or under exemptive orders, and each alternative subjects affiliated funds of funds to different conditions. In addition, funds that are structured under different exemptive orders may be subject to somewhat different conditions. Finally, unlike rule 12d1-4, our exemptive orders provide relief from section 12(d)(1) to a subset of registered investment companies and BDCs, and thus provide different levels of flexibility depending on the fund type.

promote the efficient allocation of funds' assets.

At the same time, the final rule may decrease the efficiency of certain funds' asset allocation by prohibiting certain existing funds of funds and requiring the restructuring of additional investments in other funds to ensure compliance with the rule. The new prohibition on certain fund structures may leave certain funds less able to diversify their investment portfolio or efficiently determine the funds in which they invest or their allocation of assets.

In addition, the new conditions of rule 12d1-4, and the rule's omission of certain conditions contained in our exemptive orders, will also affect the cost of operations of funds of funds.⁶⁷⁴ Nevertheless, the net effect of the new and omitted conditions on the funds' cost of operations is unclear because we are unable to quantify the effect of many of these conditions. To the extent that the net effect of the new and omitted conditions will be to increase the cost of operations for funds of funds,⁶⁷⁵ those conditions may ultimately reduce the efficient allocation of acquiring fund assets.

Efficiency of the asset allocation of current and prospective acquiring fund investors. The final rule may promote the efficiency of investors' asset allocation. First, rule 12d1-4 will reduce the cost of setting up a fund of funds by eliminating the need to apply for an exemptive order. To the extent that the fund industry is competitive,⁶⁷⁶ fund advisers/sponsors might pass through to investors the cost savings associated with eliminating the need to apply for an exemptive order, which might result in lower fees and expenses for acquiring fund investors. Lower fees and expenses, in turn, might result in improved efficiency of investors' asset allocation because investors can achieve the same investment objectives at a potentially lower cost. Similarly, the final rule will create a more consistent and more efficient regulatory framework. Fund advisers/sponsors might also pass through to investors any cost savings associated with a more consistent and efficient regulatory framework, which might result in lower fees and expenses, and more efficient allocation of acquiring fund investors' assets.

⁶⁷⁴ See *supra* section V.C.1.b for a detailed discussion of the costs and benefits of the new and omitted conditions.

⁶⁷⁵ We believe that the new and omitted conditions of rule 12d1-4 may increase certain funds' cost of operations but at the same time will enhance investor protection.

⁶⁷⁶ See *supra* footnotes 611 and 612.

Second, rule 12d1-4 may increase funds' investment flexibility by expanding the scope of permissible acquiring and acquired funds relative to the current exemptive orders and broadening some of the exemptions to the complex structures prohibitions relative to the current exemptive orders and staff no-action letters. The rule will therefore increase the diversity of available funds of funds and may promote the efficient allocation of acquiring fund investors' assets because investors will be better able to achieve their investment objectives.⁶⁷⁷

Third, having one uniform rule that applies to registered investment companies and BDCs may improve acquiring fund investors' ability to efficiently allocate their assets because it will be easier for these investors to understand fund of funds operations and it will simplify across-fund comparisons of various fund characteristics (e.g., liquidity) because investors will no longer be required to adjust for differences in regulatory requirements across funds when making cross-fund comparisons for investment decision-making purposes.⁶⁷⁸

On the other hand, there are ways in which the final rule might reduce the efficiency of investors' asset allocation. In particular, the final rule may increase the costs of operations for acquiring and acquired funds because the cost of implementation and monitoring of the rule's conditions may be higher than the cost of implementation and monitoring of the conditions in our current exemptive orders. To the extent that any increased costs are passed through to investors, the fees and expenses for acquiring and acquired fund investors may increase. Higher fees and expenses, in turn, might negatively affect the efficiency of investors' asset allocation. In addition, rule 12d1-4 might decrease the diversity of funds of funds' investment strategies because it might reduce acquiring funds' investment flexibility by decreasing their ability to create certain multi-tier structures. A decrease in the diversity of available funds of funds may reduce the efficient allocation of investors' assets because investors may be less able to achieve their investment objectives.

Efficiency of prices of acquired funds and their underlying assets. The final rule may have opposing effects on the efficiency of prices of acquired funds and their underlying assets. In

⁶⁷⁷ Rule 12d1-4 may also increase innovation in the fund industry by allowing funds and advisers seeking exemptions to focus resources on novel products or arrangements rather than preparing and reviewing exemptive orders.

⁶⁷⁸ See, e.g., Morningstar Comment Letter.

particular, the final rule may have a positive impact on the efficiency of the prices of acquired funds and their underlying assets. More specifically, rule 12d1-4 may (i) increase the diversity of certain funds of funds by expanding the scope of permissible acquiring and acquired funds;⁶⁷⁹ (ii) increase the number of available funds of funds by eliminating the need to apply for an exemptive order and by creating a more consistent and more efficient regulatory framework; and (iii) enhance investor protection against acquiring funds' undue influence, duplicative fees, and complex structures. The potential increase in the diversity and number of funds of funds and the enhancement of investor protection may increase the attractiveness of funds of funds, and thus might increase investors' demand for funds of funds. The increased investor demand for funds of funds may increase investment rates, increase investments in acquiring funds, and thus increase investments in the acquired funds and the acquired funds' underlying assets (i.e., stocks, bonds, etc.). An increased investment in the acquired funds and the acquired funds' underlying assets may increase trading interest for those assets. Higher trading interest might lead to higher liquidity, lower trading costs, improved information production, and thus more efficient prices for those assets.⁶⁸⁰

In addition, the final rule may increase the price efficiency of listed acquired funds (i.e., ETFs, ETMFs, listed closed-end funds, and listed BDCs) because investors may increase their investments in those funds through investments in funds of funds rather than investing directly in those funds. Consequently, the funds' investor base may shift from individual investors to acquiring funds. A shift of certain funds' investor base to more financially sophisticated investors may in turn result in more efficient prices for listed acquired funds.⁶⁸¹ Financially

⁶⁷⁹ As discussed in section V.C.1.a.i. above, the net effect of the final rule on funds' investment flexibility is unclear. To the extent that the final rule will decrease funds' investment flexibility, it could decrease the diversity of available funds of funds.

⁶⁸⁰ See, e.g., Anat R. Admati & Paul Pfleiderer, *A Theory of Intraday Patterns: Volume and Price Variability*, 1 Rev. Fin. Stud. 3 (1988); Tarun Chordia, Richard Roll, & Avanidhar Subrahmanyam, *Liquidity and Market Efficiency*, 87 J. Fin. Econ. 249 (2008). For ETFs, there is mixed evidence on the effects of ETF ownership on the liquidity and price efficiency of underlying assets. See 2019 ETF Adopting Release, *supra* footnote 25, at 57219 for a more detailed discussion.

⁶⁸¹ See, e.g., Eli Bartov, Suresh Radhakrishnan, & Itzhak Krinsky, *Investor Sophistication and Patterns in Stock Returns after Earnings Announcements*, 75

sophisticated investors may improve price efficiency through both aggressive and passive trading.⁶⁸² For example, financially sophisticated investors may tend more frequently to trade based on information obtained through their research and analysis (*i.e.*, aggressive trading). To the extent they perceive a potentially profitable trading opportunity, they must execute their trades while the security remains potentially mispriced before their information gets impounded into prices. Hence, financially sophisticated investors that trade on information may tend to place aggressive orders that move prices closer to fundamentals. Financially sophisticated investors may also improve price efficiency by providing liquidity to uninformed traders (*i.e.*, passive trading). More specifically, to the extent financially sophisticated investors may be able to distinguish between informed and uninformed investors, financially sophisticated investors may be more willing to provide liquidity to uninformed investors, and thus improve price efficiency by enhancing market liquidity.

On the other hand, any potential increase in acquiring and acquired funds' cost of operations as a result of the more comprehensive conditions of rule 12d1-4 relative to the conditions in the exemptive orders and rule 12d1-2, and any potential decrease in available fund of funds structures due to additional prohibitions on multi-tier structures, will have the opposite effect on the efficiency of prices of acquired funds and their underlying assets.

ii. Competition

Certain aspects of the final rule may have opposing effects on fund competition. On one hand, the final rule might promote competition in the fund industry for the following reasons. First, to the extent that rule 12d1-4 increases

acquiring funds' investment flexibility, the final rule might promote competition in the fund industry because it will increase the diversity of available funds of funds.⁶⁸³ Second, the final rule will level the playing field for funds by expanding the scope of permissible acquiring and acquired funds, mandating the same conditions for similar funds of funds, and imposing more similar conditions on affiliated and unaffiliated fund of funds structures.⁶⁸⁴ A more level playing field might increase competition in the fund industry because it will allow various funds to operate under similar regulatory restrictions and thus funds will bear similar costs associated with regulatory restrictions. To the extent that regulatory inefficiencies and inconsistencies might hamper funds' investment and growth, an increase in regulatory consistency and efficiency might result in the creation of more funds of funds, which might increase competition in the fund industry. Fourth, rule 12d1-4 will remove the need to apply for an exemptive order and thus will decrease the cost of setting up a fund of funds. To the extent that a decrease in the cost of setting up a fund of funds may lower the barriers to entry for new funds of funds, it thus might increase competition in the fund industry.⁶⁸⁵

At the same time, to the extent that the final rule will decrease certain funds' investment flexibility or increase the cost of operations for certain funds that will operate in accordance with rule 12d1-4, it might reduce competition among funds of funds because it will decrease the diversity of available funds of funds.

iii. Capital Formation

The impact of the final rule on capital formation is unclear. On one hand, the

final rule might have a positive effect on capital formation if it causes investors to commit more of their financial resources to investments in securities in aggregate. Specifically, the potential increase in fund investment flexibility, the potential leveling of the playing field as a result of the final rule, the increase in regulatory consistency and efficiency, and the potential decrease in the operating costs of prospective funds of funds as a result of removing the need to apply for an exemptive order may increase the number and diversity of funds of funds. An increase in the number and diversity of funds of funds may attract additional investment in funds of funds, and ultimately increase demand for the funds of funds' underlying securities. Investor demand for funds of funds also may increase as a result of the new conditions of rule 12d1-4, which will enhance investor protection. As a result of the increased demand for the firms' equity and debt securities, companies might be able to issue new debt and equity at higher prices, and therefore decrease the cost of capital of firms, thus facilitating capital formation.⁶⁸⁶

On the other hand, to the extent that single-tier funds and funds of funds are purely substitute investments, an increase in investors' demand for funds of funds may decrease the demand for single-tier fund structures, leaving aggregate demand for the underlying securities unchanged. Consequently, under this scenario, there will be no change in the amount of money that flows to issuers and there will be no impact on capital formation as a result of the final rule. In addition, a potential increase in the operating costs of acquiring and acquired funds as a result of the rule's conditions may reduce capital formation to the extent that there is a decrease in the amount of money available to be employed in value-generating activities.

At the same time, the potential decrease in fund investment flexibility and the potential increase in the funds' cost of operations as a result of the final rule may have the opposite effect on capital formation. In particular, the potential decrease in fund investment flexibility and the potential increase in the funds' cost of operations may decrease the number and diversity of funds of funds. A decrease in the number and diversity of funds of funds may discourage investments in funds of

Acc. Rev. 43 (2000); Joseph D. Piotroski & Darren T. Roulstone, *The Influence of Analysts, Institutional Investors, and Insiders on the Incorporation of Market, Industry, and Firm-Specific Information into Stock Prices*, 79 Acc. Rev. 1119 (2004); Ekkehart Boehmer & Eric K. Kelley, *Institutional Investors and the Informational Efficiency of Prices*, 22 Rev. Fin. Stud. 3563 (2009) ("Boehmer & Kelley (2009)"). See also Franklin Comment Letter (arguing that the final rule will increase institutional ownership for BDCs, which "would support BDC share prices, trading volume and the depth and liquidity of the BDC market . . . promote better corporate governance and management oversight as well as more insightful analysis of the BDC market through increased third-party analyst coverage and research reports . . . [and] support capital formation while decreasing BDCs' cost of capital, meaning that BDCs could invest more, and on better terms, in the portfolio companies that rely on them.").

⁶⁸² Boehmer & Kelley (2009), *supra* footnote 681.

⁶⁸³ Funds can choose to compete through prices or through product differentiation. See, e.g., Avner Shaked & John Sutton, *Relaxing Price Competition Through Product Differentiation*, 49 Rev. Econ. Stud. 3 (1982).

⁶⁸⁴ See, e.g., Morningstar Comment Letter. As discussed in *supra* section I, the combination of statutory exemptions, Commission rules, and the exemptive orders has created a regime where substantially similar funds of funds are subject to different conditions. The final rule will level the playing field for funds because it will create a regime where similar funds of funds are subject to the same conditions. At the same time, any effects of leveling the playing field will be limited by the fact that different funds face different levels of restrictions on their investments that are unrelated to rule 12d1-4 (see, e.g., *supra* footnote 39 for restrictions on BDC investments).

⁶⁸⁵ Any beneficial effects of the rule on competition may be muted to the extent that existing funds of funds may incur costs to comply with the rule conditions (e.g., costs associated with portfolio restructuring).

⁶⁸⁶ Academic literature provides evidence consistent with the idea that higher demand for a firm's securities could lead to lower cost of capital. See, e.g., Douglas W. Diamond & Robert E. Verrecchia, *Disclosure, Liquidity, and the Cost of Capital*, 46 J. Fin. 1325 (1991).

funds, and ultimately decrease demand for the funds of funds' underlying securities. As a result of the decreased demand for the firms' equity and debt securities, companies may be forced to issue new debt and equity at lower prices, and therefore increase the cost of capital of firms, thus impeding capital formation.

Nevertheless, we do not expect that the final rule will have significant effects on investors' investment rates.

D. Reasonable Alternatives

1. Retain Existing Exemptive Relief

As discussed in section III above, we are rescinding, as proposed, the exemptive relief permitting fund of funds arrangements that fall within the scope of rule 12d1-4. Alternatively, we could allow existing funds of funds to choose whether to operate indefinitely under the existing exemptive relief or rule 12d1-4, and require only new funds of funds to comply with rule 12d1-4.⁶⁸⁷ The benefit of such an alternative would be that existing funds of funds would not incur the one-time switching costs from the exemptive order conditions to the conditions of rule 12d1-4 and will not incur costs associated with reduced investment flexibility as a result of the complex structure conditions of the rule relative to the exemptive orders,⁶⁸⁸ which could ultimately benefit those funds' investors. At the same time, however, this alternative would subject existing funds of funds and new funds of funds to different sets of conditions. For example, existing funds of funds would be exempt from the rule's new requirements relating to fund of funds investment agreements, findings, and multi-tier structures. Consequently, unlike the final rule, this alternative would establish a less uniform regulatory framework governing fund of funds arrangements and would not include the benefit of enhanced investor protection that is afforded by the rule's conditions.

2. Retain Rule 12d1-2

We considered not rescinding rule 12d1-2 but instead allowing funds to operate under either rule 12d1-4 or section 12(d)(1)(G) and rule 12d1-2.⁶⁸⁹ The advantage of such an approach would be that funds that choose to

operate in accordance with section 12(d)(1)(G) and rule 12d1-2 will not be required to modify their operations to comply with the conditions of rule 12d1-4 and incur the associated costs or potentially restructure their investments to comply with the amended regulatory framework.⁶⁹⁰ The main disadvantages of such an alternative would be that (i) various funds would not operate under a consistent and efficient regulatory framework because similar funds of funds would operate under different conditions; and (ii) investors in affiliated funds of funds would not enjoy the enhanced investor protection afforded by the conditions of rule 12d1-4.

3. Allow Private and Unregistered Investment Companies To Rely on Rule 12d1-4

As discussed above, rule 12d1-4 will permit certain registered investment companies and BDCs to invest in certain registered investment companies and BDCs beyond the limits in section 12(d)(1). Alternatively, we could expand the scope of rule 12d1-4 to allow private funds and unregistered investment companies to rely on the rule as acquiring funds.⁶⁹¹ Expanding rule 12d1-4 in this manner would (i) increase investment flexibility for private and unregistered acquiring funds and their investors; (ii) level the playing field across registered and private and unregistered acquiring funds because they would enjoy the same investment flexibility and be subject to the same conditions; and (iii) benefit acquired registered investment companies and BDCs by increasing private and unregistered funds' investments in them, thus enhancing their liquidity and increasing their scale, which would result in efficiency gains for those acquired funds.⁶⁹²

Nevertheless, we continue to believe that there are risks associated with

expanding rule 12d1-4 to acquiring private funds and unregistered investment companies. First, private funds and unregistered investment companies are not registered with the Commission and would not be subject to the same reporting requirements (*i.e.*, Forms N-CEN and N-PORT) as registered investment companies.⁶⁹³ Accordingly, the Commission does not receive routine reporting on the amount and duration of private fund or unregistered investment company investments in registered funds. Without imposing reporting requirements on private funds and unregistered investment companies, it would be difficult for the Commission to monitor potential undue influence by such funds, or to monitor their compliance with rule 12d1-4. Second, private funds and unregistered investment companies are not subject to the governance and compliance requirements under the Investment Company Act, which are designed to protect investors and reduce conflicts of interest that are inherent in a fund structure and are integral to the oversight and monitoring provisions of rule 12d1-4 for registered funds. Third, unregistered foreign funds' investments in U.S. registered funds have raised concerns of abuse and undue influence in the past, which gave rise to Congress's amendments to section 12(d)(1) in 1970. Finally, as commenters noted, the Commission does not have experience with this type of fund of funds arrangement because it has not yet extended exemptive relief allowing such funds to acquire other investment companies in excess of the section 12(d)(1) limits.⁶⁹⁴ Without that experience, the Commission is not able to determine at this time that the rule's conditions and protections would apply as appropriately to private funds and unregistered investment companies or be properly tailored to prevent the abuses that led Congress to enact section 12(d)(1).

4. Codify Current Conditions in Existing Exemptive Orders

As discussed above, rule 12d1-4 will not include certain conditions contained in current exemptive orders that we believe are not necessary to prevent the abuses that section 12(d)(1) seeks to curtail in light of the new conditions being adopted. Rule 12d1-4 also will include new conditions to address the potential for undue influence, complex structures, or duplicative fees. Alternatively, we could

⁶⁸⁷ See *supra* footnote 493.

⁶⁸⁸ See *supra* section V.C.1.a.i for a comparison of the complex structure conditions of rule 12d1-4 relative to the exemptive orders.

⁶⁸⁹ See *supra* footnote 450. Our analysis shows that there are 954, or 20%, of all acquiring funds that currently rely on section 12(d)(1)(G) and rule 12d1-2 to structure affiliated funds of funds. See *supra* section V.B.1.

⁶⁹⁰ Many commenters opposed the rescission of rule 12d1-2. See, e.g., Allianz Comment Letter; Invesco Comment Letter; Thrivent Comment Letter; PIMCO Comment Letter; Fidelity Rutland Comment Letter; Schwab Comment Letter; NYC Bar Comment Letter; PGIM Comment Letter, BlackRock Comment Letter; ABA Comment Letter; SIFMA AMG Comment Letter; Capital Group Comment Letter. See *supra* section II.D.1 for detailed discussion of arguments raised by commenters. Some of the commenter concerns may have been addressed given that the rule will not include a redemption limit and the rule will permit acquired funds to invest up to 10% of their assets in other funds.

⁶⁹¹ See *supra* footnote 47 for commenters supporting this alternative.

⁶⁹² See, e.g., MFA Comment Letter; Parallax Comment Letter; NYC Bar Comment Letter; Dechert Comment Letter; Blackrock Comment Letter discussing the benefits of expanding the scope of rule 12d1-4 to private funds and unregistered investment companies.

⁶⁹³ See *supra* section II.A.2.

⁶⁹⁴ See *supra* footnote 53.

codify the conditions contained in existing exemptive orders rather than replacing certain conditions with alternative conditions as contained in rule 12d1–4.⁶⁹⁵

This alternative approach would not impose the costs associated with the new conditions in rule 12d1–4, but it might impose costs to the extent that the conditions in the orders on which some funds of funds rely might not be identical to the conditions in this alternative rule because of cross-sectional variation in the conditions of the exemptive orders. We also believe that this alternative approach would not be as effective at preventing the abuses that section 12(d)(1) seeks to curtail while eliminating conditions that are not necessary in light of the new conditions of rule 12d1–4. In particular, we believe that the conditions in rule 12d1–4 may enhance investor protection relative to the exemptive orders by imposing certain requirements (*i.e.*, findings and fund of funds investment agreement) on both affiliated and unaffiliated funds of funds and by prohibiting certain multi-tier structures.

5. Restrict the Ability of an Acquiring Fund and its Advisory Group To Invest in an Acquired Fund Above a Lower or Higher Limit Than the Adopted Control Limit

As discussed in section II.C.1.a above, to address concerns about one fund exerting undue influence over another fund, rule 12d1–4 is not available when an acquiring fund together with its advisory group controls the acquired fund. Rule 12d1–4 relies on the definition of “control” in the Act, including the rebuttable presumption that any person who directly or indirectly beneficially owns more than 25% of the voting securities of a company controls that company. Rule 12d1–4 includes an exception for funds that are in the same group of investment companies. Rule 12d1–4 also includes an exception when the acquiring fund’s investment sub-adviser or any person controlling, controlled by, or under common control with such investment sub-adviser acts as the acquired fund’s investment adviser or depositor.

As an alternative means of preventing undue influence, we could instead restrict the ability of an acquiring fund and its advisory group to invest in an acquired fund above a lower limit than the 25% limit used to define “control” in the Act.⁶⁹⁶ A lower limit could

provide additional assurance that rule 12d1–4 would protect investors from the abusive practices that section 12(d)(1) was designed to prevent because a lower percentage of ownership would reduce the risk that the acquiring fund could exercise undue influence over the acquired fund’s strategy, management, or governance.⁶⁹⁷ However, a lower limit could hamper the acquiring fund’s ability to achieve its investment strategy in an efficient and cost effective manner.⁶⁹⁸

We also could impose a lower limit while narrowing the scope of entities that would be assessed for the purposes of the ownership threshold.⁶⁹⁹ In particular, the ownership limit could apply only to the acquiring fund and other funds advised by the same adviser or by the adviser’s control affiliates. As a result, acquiring funds would not be required to consider their non-fund affiliates’ holdings when assessing whether they control an acquired fund, which would lessen compliance burdens for the acquiring funds. Nevertheless, our exemptive orders define control in terms of a fund and its advisory group. Consequently, funds likely already have established policies and procedures to monitor compliance with the aggregation requirement embedded in the rule’s definition of an acquiring fund’s “advisory group.” In addition, other provisions of the Act and our rules also extend to affiliated persons of an investment adviser, and so

frequently subject to investor activism. *See, e.g.*, Gabelli Comment Letter; Comment Letter of John Birch (April 22, 2019); Comment Letter of Kuni Nakamura (April 25, 2020); Advent Comment Letter. *See also supra* footnotes 121 and 122. Other commenters, however, argued that the 25% threshold is appropriate because investor activism can be beneficial to fund investors. *See, e.g.*, Saba Comment Letter; City of London Comment Letter. As a response to commenters that argued that investor activism for closed-end funds is harmful, we note that academic literature provides evidence consistent with the idea that investor activism can be beneficial for closed-end fund investors because it has the potential to increase the market value of closed-end funds and mitigate managerial entrenchment. *See, e.g.*, Matthew E. Souther, *The Effects of Takeover Defenses: Evidence from Closed-End Funds*, 119 J. Fin. Econ. 420 (2016); Michael Bradley et al., *Activist Arbitrage: A Study of Open-Ending Attempts of Closed-End Funds*, 95 J. Fin. Econ. 1 (2010).

⁶⁹⁷ As discussed in section II.B above, section 17 of the Act generally restricts a fund’s ability to enter into transactions with affiliated persons and thus provides some protection to acquired funds from acquiring funds’ undue influence. Rule 12d1–4 also contains a number of conditions aimed at protecting acquired funds from acquiring funds’ undue influence.

⁶⁹⁸ The control condition could, for example, limit an acquiring fund from obtaining the optimal level of risk exposure to another fund. Acquiring funds potentially could obtain similar levels of risk exposure at a higher cost by investing in multiple funds.

⁶⁹⁹ *See supra* footnotes 106–110.

funds (or their advisers) have experience developing compliance policies and procedures in those circumstances. Lastly, the risk of undue influence over an acquired fund will be more effectively addressed by requiring all entities within an advisory group to aggregate their holdings for purposes of the control condition because entities in the same advisory group could potentially coordinate to exercise undue influence over the acquired funds.⁷⁰⁰

Similarly, we could impose a limit higher than 25%, which would provide acquiring funds with greater investment flexibility. However, we believe that a limit higher than 25% would be more likely to give rise to the abuses that section 12(d)(1) was designed to prevent because it would make it more likely that the acquiring fund could control the acquired fund and thus potentially influence the acquired fund for the benefit of the acquiring fund’s shareholders, advisers, or sponsors to the detriment of acquired fund investors.

6. Permit Multi-Tier Fund Structures

As discussed above, rule 12d1–4 will limit the creation of certain multi-tier structures. As an alternative, we could allow all multi-tier fund structures that are currently permissible.⁷⁰¹ While this alternative would provide greater flexibility to funds to meet their investment objectives, the organizational complexity of multi-tier fund structures could make it difficult for acquired fund investors to understand who controls the fund and acquiring fund investors may find it difficult to understand the true asset exposure of the acquiring fund.⁷⁰² It could also raise concerns associated with duplicative and excessive fees. Additionally, we believe that the rule’s exceptions to the multi-tier structures prohibition and 10% Bucket provide sufficient investment and funding flexibility to acquiring and acquired funds.

7. Alternative Control Conditions

a. Redemption Limit

We proposed a redemption limit that would prohibit an acquiring fund that acquires more than 3% of an acquired fund’s outstanding shares from

⁷⁰⁰ For example, a family of target date funds tends to invest in different proportional allotments of the same underlying funds.

⁷⁰¹ *See supra* footnotes 369, 370, 371, and 373.

⁷⁰² Alternatively, concerns of investor confusion could be addressed by increasing disclosure requirements regarding multi-tier structures. However, we believe that enhanced disclosure requirements may not be sufficient to mitigate concerns of investor confusion.

⁶⁹⁵ *See supra* footnote 488.

⁶⁹⁶ Some commenters argued that the control condition should be lower than 25% for acquired closed-end funds because closed-end funds are

redeeming, submitting for redemption, or tendering for repurchase more than 3% of an acquired fund's total outstanding shares in any 30-day period. The purpose of this prohibition was to address concerns that an acquiring fund could threaten large-scale redemptions to unduly influence an acquired fund. Using data from Form N-PORT filings that were filed with the Commission between May 2019 and July 2020, we find that 1,304 funds out of a total of 3,654 held more than 3% of any acquired fund's shares at the end of a reporting period, and thus could have been affected by the proposed redemption limit. Our analysis also shows that the average (median) 30-day redemption was 0.32% (0.011%): The

average (median) 30-day redemption for listed acquired funds was 0.13% (0.003%) and for unlisted acquired funds was 0.45% (0.027%). Finally, there were 1,961 instances in which an acquiring fund redeemed more than 3% of an acquired fund's shares in any 30-day period, representing 578 unique funds.⁷⁰³ When looking at fund redemptions in March 2020, a presumed period of market stress, the average (median) 30-day redemption was 0.69% (0.033%).

An acquiring fund that holds 25% of the outstanding shares of an acquired fund (*i.e.*, up to the control limit) and can only redeem 3% of the acquired fund shares in every 30-day period (*i.e.*, up to the redemption limit) would take 10 months to fully unwind its

investment in the acquired fund, assuming no other concurrent changes in the number of acquired fund shares outstanding that are unrelated to the acquiring fund's redemptions. It would take longer than 10 months for an acquiring fund to redeem the acquired fund shares if other investors were concurrently redeeming the shares of the acquired fund due to, for example, changes in market conditions or if the acquiring fund held more than 25% of the shares of an affiliated acquired fund.⁷⁰⁴

Various commenters provided statistics showing that the redemption limit would be frequently binding.⁷⁰⁵ We summarize those statistics in the table below.

Commenter	Sample period for number of funds or instances exceeding redemption limit	Number of acquiring funds holding > 3% of at least one acquired fund's outstanding shares	Number of acquiring funds or instances of redemptions > 3% limit within a 30-day period
Nationwide ⁷⁰⁶	January 1, 2016–December 31, 2018.	32 acquiring funds	all 32 acquiring funds in at least one instance and some on as many as four separate instances.
ICI ⁷⁰⁷	2016–2018	516 acquiring funds with \$1.8 trillion in assets under management.	228 acquiring funds in 1,399 instances ⁷⁰⁸ .
John Hancock ⁷⁰⁹	January 1, 2016–December 31, 2018.		among all funds sponsored by commenter, 350 instances.
JP Morgan ⁷¹⁰	past 3 years		among all commenter funds, more than 100 instances.
TRP ⁷¹¹	2016–2018		for a subset of commenter's funds, 6 acquiring funds in 17 instances ⁷¹² .
MFS ⁷¹³	January 1, 2016–March 31, 2019.		for one surveyed commenter fund, in 25% of the months surveyed.
Voya ⁷¹⁴	2016–2018		among all commenter funds, 13 acquiring funds in 64 instances.
Fidelity ⁷¹⁵	2016–2018		for one of the commenter fund of funds categories consisting 14 acquiring funds, in 149 instances ⁷¹⁶ .
Allianz ⁷¹⁷	since December 2016		at least 7 out of the 13 acquiring funds in the commenter's fund complex at least once, and most on a number of occasions.
SIFMA ⁷¹⁸	January 1, 2018–March 1, 2019.	223 out of 655 surveyed acquiring funds ⁷¹⁹ .	over 500 of the acquiring funds sponsored by the survey respondents ⁷²⁰ .
Morningstar ⁷²¹		1,591 acquiring funds with \$1 billion in assets.	

⁷⁰³ Our analysis is limited by data availability. In particular, we only have monthly data on acquiring funds' holdings and our sample period is primarily a stable period of rising market prices (with the exception of the March to July 2020 period of market stress). Any effects of the redemption limit would be more pronounced during periods of market stress. See also 2018 FOF Proposing Release, *supra* footnote 6, at n.125 and accompanying text for similar statistics using data from Morningstar Holdings. Some commenters argued that the low frequency of large-scale redemptions suggests that the redemption limit is unnecessary because funds do not engage frequently in large-scale redemptions that would raise undue influence concerns. See, e.g., Dechert Comment Letter.

⁷⁰⁴ See, e.g., Vanguard Comment Letter (stating that "by way of example, Vanguard offers an acquiring fund that would be subject to the Proposed Rule, but not subject to the control condition, that holds approximately 60% of an underlying Vanguard fund. We estimate that it would take approximately 2.5 years for this acquiring fund to fully unwind its investment in the underlying fund, assuming there was no other shareholder activity during the period.").

⁷⁰⁵ A commenter stated that "[f]or three of the five [funds of funds in its group], a majority of each such Fund's investments in Underlying Funds represent more than three-percent of the Underlying Fund's outstanding shares." See Russell Comment Letter.

⁷⁰⁶ See Nationwide Comment Letter.

⁷⁰⁷ The survey sample included 1,359 funds of funds with \$2.8 trillion in assets under management, out of which 936 funds of funds with \$2 trillion in assets under management would be subject to rule 12d1–4 and be required to comply with the rule's conditions. The reported survey statistics excluded holdings and redemptions of money market funds. See ICI Comment Letter.

⁷⁰⁸ Out of all survey respondents, 394 funds of funds with \$1.7 trillion in assets under management were able to provide complete or partial information on their fund redemptions for the period 2016–2018. 122 funds of funds with \$147 billion in assets under management were unable to provide any information on their redemptions. Further, some complexes were able to analyze only some of their funds (e.g., larger or affiliated) or were able to analyze a shorter time frame (e.g., a quarter rather than three years).

⁷⁰⁹ See John Hancock Comment Letter.

⁷¹⁰ See JP Morgan Comment Letter.

⁷¹¹ See TRP Comment Letter.

⁷¹² Statistics exclude redemptions from affiliated money market funds.

⁷¹³ See MFS Comment Letter.

⁷¹⁴ See Voya Comment Letter.

⁷¹⁵ See Fidelity Comment Letter.

⁷¹⁶ Approximately one third of the 149 redemptions were out of unaffiliated acquired funds (non-ETFs). During the same period, another of the commenter's fund of funds categories redeemed more than 3% of an affiliated fund's total outstanding shares in a rolling 30-day period a total of 172 times. All redemptions were out of affiliated open-end funds.

⁷¹⁷ See Allianz Comment Letter.

⁷¹⁸ See SIFMA AMG Comment Letter.

⁷¹⁹ For purposes of this survey, a fund of funds is a fund that invests substantially all of its assets (*i.e.*, > 85% of fund assets) in shares of other investment companies. In the same survey, there are 59 funds that invest less than 85% of their assets in other funds, and for these funds of funds there have been "dozens of redemptions of more

Most of the commenters' statistics do not distinguish between fund redemptions in the secondary market, which would not have been subject to the redemption limit, and fund redemptions directly with the acquired fund. We are unable to reconcile our statistics with the statistics provided by commenters because we only have monthly data on fund holdings while commenters' holdings information likely is more granular, and we lack complete information regarding commenters' research design choices (e.g., whether the statistics include money market funds).

Commenters raised a number of issues associated with the proposed redemption limit, some of which we discussed in the 2018 FOF Proposing Release.⁷²² These concerns included (1) operational or administrative challenges; (2) the redemption limit's potential effects on the acquiring fund's investment objectives and its ability to respond timely to changing economic or market conditions; (3) the impact on competition and innovation; (4) whether funds in the same group of investment companies should be subject to the requirements; (5) concerns relating to liquidity; and (6) the cost of the proposed limits.

We have addressed the issues raised by commenters by not adopting the redemption limit and instead imposing alternative conditions to guard against undue influence.

b. Uniform Voting Conditions for all Funds

We proposed to impose the same voting conditions on all funds. In particular, proposed rule 12d1-4 would have required the same ownership threshold that would trigger the voting condition (i.e., 3% of outstanding voting securities of the acquired fund) and the same manner of voting (i.e., pass-through or mirror voting) for all funds that would be subject to rule 12d1-4. One advantage of uniform voting conditions would be a less complex rule, which would facilitate rule compliance. Another advantage would be imposing the same conditions on all

than 3% of an acquired fund's shares during the period from January 1, 2018 through March 1, 2019."

⁷²⁰ The survey included both affiliated and unaffiliated funds of funds arrangements and 90% of the redemptions occurred in affiliated funds of funds.

⁷²¹ See Morningstar Comment Letter.

⁷²² See *supra* section II.C.2.a for detailed discussion of issues raised by commenters regarding the proposed redemption limit. See also 2018 FOF Proposing Release, *supra* footnote 6, at 1325–26 for discussion of costs of the proposed redemption limit.

acquired funds, which would level the playing field across acquired funds because all acquired funds would enjoy the same levels of protection from acquiring funds' undue influence. The disadvantage of such an approach would be that it would not consider the unique characteristics of each fund category.⁷²³ In particular, open end funds and UITs hold shareholder meetings infrequently and are rarely the subject of investor activism, while closed-end funds may be required to hold shareholder meetings annually and historically have been the target of activist investors. Hence, concerns of undue influence may differ across fund categories. For this reason, rule 12d1-4 will impose different voting thresholds with respect to acquired funds that are open-end funds and UITs versus BDCs and registered closed-end funds.⁷²⁴

c. Disclosure Requirement

We proposed to require a fund that operates in accordance with rule 12d1-4 to disclose in its registration statement that it is (or at times may be) an acquiring fund for purposes of the rule. The advantage of such a disclosure would be that it would put other funds seeking to operate in accordance with rule 12d1-4 on notice that a fund they seek to acquire is itself an acquiring fund, and thus prevent the creation of complex fund of funds structures. This requirement would impose some ongoing costs on funds to prepare and provide those disclosures. Commenters generally opposed the proposed disclosure requirement, predicting that (i) funds would prophylactically disclose that they may rely upon rule 12d1-4, which would reduce the number of available potential acquired funds; (ii) it would be costly for acquiring funds to monitor continuously the disclosure of potential acquired funds; and (iii) time lags between when an acquired fund decides to operate in accordance with the rule and become an acquiring fund and when it updates its registration statement could cause violations of the rule.⁷²⁵ Further, commenters suggested that such an approach could reduce the number of funds willing to become acquired funds and create fewer investment opportunities for funds of funds.⁷²⁶

As mentioned above, the proposed disclosure requirement was designed to put funds on notice that a fund would be subject to rule 12d1-4 as an acquiring fund. Under rule 12d1-4, this

function will be filled by the fund of funds investment agreement, which an acquiring fund and acquired fund must execute before the acquiring fund may invest in the acquired fund in excess of the limits imposed by section 12(d)(1). Since rule 12d1-4 imposes the fund of funds investment agreement condition, it does not include such a disclosure requirement.

VI. Paperwork Reduction Act

A. Introduction

Rule 12d1-4 will result in a new "collection of information" within the meaning of the Paperwork Reduction Act of 1995 ("PRA").⁷²⁷ In addition, the adoption of rule 12d1-4 will affect the current collection of information burden of rule 0-2 under the Act.⁷²⁸ The amendments to Form N-CEN also will affect the collection of information burden under that form.⁷²⁹

The title for the new collection of information for rule 12d1-4 will be: "Rule 12d1-4 Under the Investment Company Act of 1940, Fund of Funds Arrangements." The titles for the existing collections of information are: "Rule 0-2 under the Investment Company Act of 1940, General Requirements of Papers and Applications" (OMB Control No. 3235-0636); and "Form N-CEN" (OMB Control No. 3235-0730). The Commission is submitting these collections of information to the Office of Management and Budget ("OMB") for review in accordance with 44 U.S.C. 3507(d) and 5 CFR 1320.11. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

We published notice soliciting comments on the collection of information requirements in the 2018 FOF Proposing Release and submitted the proposed collections of information to OMB for review and approval in accordance with 44 U.S.C. 3507(d) and 5 CFR 1320.11.⁷³⁰ We received one comment on the collection of information requirements.⁷³¹

⁷²⁷ 44 U.S.C. 3501 through 3521.

⁷²⁸ 17 CFR 270.0-2.

⁷²⁹ Form N-CEN [referenced in 17 CFR 274.101] under the Investment Company Act.

⁷³⁰ See 2018 FOF Proposing Release, *supra* footnote 6. We also published a notice soliciting comments on the collection of information requirements in the 2008 ETF Proposing Release. We similarly did not receive comments on the collection of information requirements. See *id.* at n.339 and accompanying text.

⁷³¹ See Guggenheim Comment Letter (stating that lawyers and accounting personnel would need to be involved with the proposed findings requirement).

⁷²³ See *supra* footnote 145.

⁷²⁴ See *supra* section II.C.1.b.

⁷²⁵ See *supra* footnotes 242 and 243.

⁷²⁶ See *supra* footnote 244.

B. Rule 12d1–4

Rule 12d1–4 will permit certain registered funds and BDCs that satisfy certain conditions to acquire shares of another fund in excess of the limits of section 12(d)(1) of the Act without obtaining an exemptive order from the Commission. These conditions include (1) adherence to certain voting provisions, (2) for most funds, entering into a fund of funds investment agreement, (3) for management companies, certain evaluations and findings that are reported to a fund's board, (4) for UITs, an evaluation by the principal underwriter or depositor, and (5) for separate accounts funding variable insurance contracts, the acquiring fund obtaining a certification by the insurance company offering the separate account. These requirements are collections of information for purposes of the PRA. These are the same collections we identified in the 2018 FOF Proposing Release, with two exceptions based upon changes to the rule from the proposal. We have removed the disclosure requirements that were included in the proposed estimate and added the fund of funds investment agreement element of the collection.

The respondents to rule 12d1–4 will be registered funds or BDCs.⁷³² The collection of information will be mandatory only for entities that wish to operate in accordance with the new rule. Information provided to the Commission in connection with staff examinations or investigations will be kept confidential subject to the provisions of applicable law.

⁷³² See *supra* footnote 617 for the source of salary data.

1. Voting Provisions

Under rule 12d1–4, where an acquiring fund and its advisory group (in the aggregate) hold more than 25% of the outstanding voting securities of an acquired fund that is a registered open-end investment company or registered UIT, the acquiring fund will be required to vote those securities using mirror voting, unless certain exceptions apply.⁷³³ If the acquired fund is a closed-end fund, the acquiring fund and its advisory group must vote its securities using mirror voting if they, in the aggregate, hold more than 10% of the outstanding voting securities, unless certain exceptions apply.⁷³⁴ We estimate that 450 acquiring funds will be subject to these requirements, 440 of which will be utilizing mirror voting and 10 of which will be utilizing pass-through voting in limited circumstances.⁷³⁵

⁷³³ See rule 12d1–4(b)(1)(ii) and (iv). As described above, in mirror voting, the acquiring fund votes the shares it holds in the same proportion as the vote of all other holders. In circumstances where acquiring funds are the only shareholders of an acquired fund, however, pass-through voting may be used.

⁷³⁴ See rule 12d1–4(b)(1)(iii) and (iv).

⁷³⁵ 450 acquiring funds that will invest in open-end funds or UITs in reliance on rule 12d1–4 and beyond the 25% voting threshold = 4,086 acquiring funds that will invest in other funds in reliance on rule 12d1–4 \times 11% of acquiring funds that invest in at least one open-end fund or UIT beyond the 25% voting threshold of the rule. 4,086 acquiring funds that will invest in other funds in reliance on rule 12d1–4 = 5,922 acquiring registered investment companies and BDCs \times 69% of acquiring funds that will be subject to rule 12d1–4 as estimated by a commenter (see *supra* footnote 533 and associated text). This estimate assumes that acquiring funds with current investments in other funds beyond the limits of section 12(d)(1) will be subject to rule 12d1–4 at the same rate as the acquiring funds with current investments in other funds within the limits of section 12(d)(1) following the rule adoption.

Table 5 summarizes the final PRA estimates for internal and external burdens associated with this requirement. This estimate is as proposed, except that we (1) lowered the relative amount of funds that are expected to use pass-through voting given the changes to that requirement, (2) lowered the amount of funds estimated to be subject to these provisions due to the raised threshold of when pass-through or mirror voting will be required and (3) also lowered the expected number of votes per year based upon updated analysis.⁷³⁶

5,922 acquiring registered investment companies and BDCs = [4,750 acquiring management companies (see *supra* Table 2 in section V.B.1) + 37 acquiring BDCs (see *supra* footnotes 558 and 559 and accompanying text)] \times [14,605 registered investment companies (see *supra* Table 1 in section V.B.1) + 83 BDCs (see *supra* footnotes 554 and 555 and associated text)]/[11,788 management companies (see *supra* Table 2) + 83 BDCs (see *supra* footnotes 558 and 559 and accompanying text)]. We lack structured data that would allow us to estimate the percentage of acquiring funds that are within the same group of investment companies as the acquired fund or the acquiring fund's investment sub-adviser or any person controlling, controlled by, or under common control with such investment sub-adviser acts as the acquired fund's investment adviser or depositor, and thus will be subject to the rule's voting condition. To avoid underestimating the costs associated with this aspect of rule 12d1–4, we assume that all 450 acquiring funds will be subject to this rule's conditions. Further, the circumstances of an acquiring fund utilizing pass-through voting in the final rule are limited and may be only for certain investments. See *supra* footnote 621 and accompanying text.

⁷³⁶ The 2018 FOF Proposing Release contemplated that 809 funds would be subject to this requirement based upon a 3% threshold, rather than the 25% and 10% threshold we are adopting. See 2018 FOF Proposing Release, *supra* footnote 6, at n.349 and accompanying text. See also *supra* footnotes 735 and 621 and footnotes 569 through 570 and accompanying text (outlining updated voting analysis).

BILLING CODE 8011-01-P

Table 5: Voting Provisions PRA Estimates

	Internal Hour Burden ¹		Wage Rate ²	Internal Time Costs	Annual External Cost Burden
PROPOSED ESTIMATES FOR MIRROR VOTING					
Update proxy voting policies and disclosures	3 hours	×	\$392 (in-house attorney)	\$1,176	–
Evaluate other votes and vote accordingly (per vote x 3.6 votes)	3 hours × 3.6 10.8 hours	×	\$392 (in-house attorney)	\$1,176 × 3.6 \$4,233.60	\$400 × 3.6 \$1,440

Total proposed burden for pass-through voting	1,776 hours			\$696,192	\$230,400
FINAL ESTIMATES FOR MIRROR-VOTING					
Update proxy voting policies and disclosures	3 hours	×	\$419 (in-house attorney)	\$1,257	–
Conduct voting procedure (per vote x 1 vote)	3 hours × 1 3 hours	×	\$419 (in-house attorney)	\$1,257 × 1 \$1,257	\$400 × 1 \$400
Total burden per fund	6 hours			\$2,514	\$400
Total number of affected funds	× 440			× 440	× 440
Total final burden for mirror voting	2,640 hours			\$1,106,160	\$176,000
FINAL ESTIMATES FOR PASS-THROUGH VOTING					
Update proxy voting policies and disclosures	3 hours	×	\$419 (in-house attorney)	\$1,257	–
Communicate with shareholders and vote accordingly (per vote x 1 vote)	30 hours × 1 30 hours	×	\$419 (in-house attorney)	\$12,570 × 1 \$12,570	\$4,000 × 1 \$4,000
Total burden per fund	33 hours			\$12,570	\$4,000
Total number of affected funds	× 10			× 10	× 10
Total final burden for pass-through voting	330 hours			\$125,700	\$40,000
TOTAL ESTIMATED BURDENS FOR VOTING PROVISIONS					

Proposed burden estimates	12,719.4 hours	\$4,986,004.80	\$1,372,320
Proposed total respondents	809		
Revised burden estimates	2,970 hours	\$1,231,860	\$216,000
Proposed total respondents	450		
Notes:			
1. Includes initial burden estimates annualized over a three-year period.			
2. See SIFMA Report, <i>supra</i> footnote 617.			

2. Fund of Funds Investment Agreements

As discussed in section II.C.2.4 above, unless the acquiring fund's adviser acts as the acquired fund's investment adviser, the rule will require that the

acquiring fund enter into an agreement containing certain provisions with the acquired fund effective for the duration of the funds' reliance on the rule. Funds subject to this requirement must maintain a copy of these agreements.⁷³⁷

We estimate that 9,240 fund pairs will be subject to this requirement.⁷³⁸

Table 6 summarizes the final PRA estimates for internal and external burdens associated with this requirement. This element of the rule was not included in the proposal.

Table 6: Fund of Funds Investment Agreements PRA Estimates

	Internal Hour Burden ¹		Wage Rate ²	Internal Time Costs	Annual External Cost Burden
ESTIMATES FOR FUND OF FUNDS INVESTMENT AGREEMENTS					
Negotiating and memorializing agreement	20 hours	×	\$444.33 (blended rate for in-house attorney, deputy general counsel, and compliance manager) ³	\$8,886.6	\$978
Establishing recordkeeping policies and procedures	3 hours	×	\$63 (general clerk)	\$189	\$1,800
	3 hours	×	\$96 (senior computer operator)	\$288	
Recordkeeping	6 hours	×	\$63 (general clerk)	\$378	—
	6 hours	×	\$96 (senior computer operator)	\$576	
Total burden per fund	38 hours			\$10,317.6	\$2,778
Total number of affected funds	×	9,240		×	9,240
Total burden	351,120 hours			\$95,334,624	\$25,668,720

Notes:

1. Includes initial burden estimates annualized over a three-year period.

2. See SIFMA Report, *supra* footnote 617.

3. The \$444.33 wage rate reflects current estimates of the blended hourly rate for an in-house attorney (\$419), deputy general counsel (\$602) and compliance manager (\$312). \$444.33 is based on the following calculation: $(\$419 + \$602 + \$312) / 3 = \444.33 .

3. Management Companies—Fund Findings

In cases where the acquiring fund is a management company, rule 12d1–4 will require, prior to the initial acquisition of an acquired fund in reliance on the rule, the acquiring fund's investment adviser to evaluate the complexity of the structure and fees

and expenses associated with the acquiring fund's investment in the acquired fund, and find that the acquiring fund's fees and expenses do not duplicate the fees and expenses of the acquired fund. In cases where the acquired fund is a management company, rule 12d1–4 will require, prior to the initial acquisition of the

acquired fund in reliance on the rule, the acquired fund's investment adviser to find that any undue influence concerns associated with the acquiring fund's investment in the acquired fund are reasonably addressed and, as part of this finding, the investment adviser must consider at a minimum certain enumerated factors. The rule will

⁷³⁷ Rule 12d1–4(b)(2)(iv) and (c).

⁷³⁸ See *supra* footnote 661 and accompanying text.

further require that each investment adviser report its evaluation, finding, and the basis for its evaluation or finding to the fund's board of directors no later than the next regularly scheduled meeting of the board of directors. The rule also will require the acquiring and acquired funds participating in fund of funds arrangements in accordance with the rule to maintain and preserve a copy of each fund of funds investment agreement that is in effect, or was in effect in the past five years, and a written record of the relevant Fund

Findings (and the basis for the Fund Findings) made under the rule.⁷³⁹ We estimate 6,178 funds will be subject to this requirement.⁷⁴⁰

Table 7 summarizes the final PRA estimates for internal and external burdens associated with this requirement. We have made some changes to the estimate from the proposal based upon changes to the rule as adopted.⁷⁴¹ We increased the number of funds responding to this collection since the final rule will require both the acquiring and acquired funds to make certain findings under the rule. We have

also increased our estimated burdens regarding initial hour and cost burdens due to the increased amount of factors that advisers would need to consider as part of this collection. In response to a commenter,⁷⁴² we adjusted our estimates regarding the hours and wage rates to conduct evaluations and the creation, review, and maintenance of written materials. Lastly, we reduced the estimates regarding annual hour burdens, and eliminated the estimate of external annual costs, due to the elimination of the requirement to conduct on-going evaluations.

Table 7: Management Company Findings PRA Estimates

	Initial Internal Burden Hours		Annual Internal Hour Burden		Wage Rate ¹	Internal Time Costs	Initial External Cost Burden	Annual External Cost Burden
PROPOSED ESTIMATES								
Conduct evaluations and creation, review, and maintenance of written materials	15 hours	+	6 hours	×	\$352 (compliance attorney)	\$7,392	\$17,610	\$5,870
	10 hours			×	\$317 (senior portfolio manager)	\$3,170		
	5 hours			×	\$511 (chief compliance officer)	\$2,555		
			5 hours	×	\$61 (general clerk)	\$305		
			5 hours	×	\$94 (senior computer operator)	\$470		
Total burden per fund	30 hours		10 hours			\$13,892	\$17,610	\$11,740
Total number of affected funds	× 3,373		× 3,373			× 3,373	× 3,373	× 3,373
Total proposed burden	101,190 hours		33,730 hours			\$46,857, 716	\$59,398,530	\$39,599,020
FINAL ESTIMATES								
Conduct evaluations and creation, review, and maintenance of written materials	20 hours	+	8 hours	×	\$293 (blended rate for compliance attorney and senior accountant) ²	\$8,204	\$35,220	\$0
	10 hours			×	\$332 (senior portfolio manager)	\$3,320		
	5 hours			×	\$535 (chief compliance officer)	\$2,675

Proposed total respondents	3,373					
Revised burden estimates	216,230 hours	80,314 hours		\$92,632,932	\$217,589,160	\$0
Revised total respondents	6,178					

Notes:1. See SIFMA Report, *supra* footnote 617.2. The \$293 wage rate reflects current estimates of the blended hourly rate for a compliance attorney (\$368) and senior accountant (\$218). \$293 is based on the following calculation: $(\$368 + \$218) / 2 = \$293$.**4. UITs—Principal Underwriter or Depositor Evaluations**

The rule will require that, in cases where the acquiring fund is a UIT, the UIT's principal underwriter or depositor must evaluate the complexity of the structure associated with the UIT's investment in acquired funds, and find that the UIT's fees and expenses do not

duplicate the fees and expenses of the acquired funds that the UIT holds or will hold at the date of deposit. The UIT is also required to keep records of the finding, and any basis for the finding.⁷⁴³ We estimate 200 funds will be subject to this requirement.⁷⁴⁴

Table 8 summarizes the final PRA estimates for internal and external burdens associated with this

requirement. We decreased the total number of respondents to this item based upon updated analysis as described above. Also, in response to a commenter,⁷⁴⁵ we adjusted our estimates regarding the hours and wage rates to conduct evaluations and the creation, review, and maintenance of written materials.⁷⁴⁶

⁷⁴³ Rule 12d1–4(b)(2)(ii) and (c).⁷⁴⁴ See *supra* footnote 652.⁷⁴⁵ See Guggenheim Comment Letter.⁷⁴⁶ See 2018 FOF Proposing Release, *supra* footnote 6, at nn.373–377 and accompanying text.

Table 8: UIT Evaluation PRA Estimates

Proposed total respondents	306					

Revised burden estimates	7,000 hours	1,000 hours	\$2,450,500	\$480,000	\$
Revised total respondents	200				

Notes:1. See SIFMA Report, *supra* footnote 6172. The \$293 wage rate reflects current estimates of the blended hourly rate for a compliance attorney (\$368) and senior accountant (\$218). \$293 is based on the following calculation: $(\$368 + \$218) / 2 = \$293$.**5. Separate Accounts Funding Variable Insurance Contracts—Certification**

Lastly, the rule will require that, with respect to a separate account funding variable insurance contracts that invests in an acquiring fund, the acquiring fund must obtain a certification from the insurance company offering the separate account. The certification must state that the insurance company has

determined that the fees and expenses borne by the separate account, acquiring fund, and acquired fund, in the aggregate, are consistent with the standard set forth in section 26(f)(2)(A) of the Act. The acquiring fund will be required to keep a record of this certification.⁷⁴⁷ We estimate 191 funds will be subject to this requirement.⁷⁴⁸ Table 9 summarizes the final PRA estimates for internal and external

burdens associated with this requirement. We decreased the total number of respondents to this item based upon updated analysis as described above. Also, we increased the proposed internal hour burden and time costs to account for likely attorney and compliance review of the required certification.⁷⁴⁹

Table 9: Separate Account Certification PRA Estimates

	Internal Hour Burden ¹		Wage Rate ²	Internal Time Costs	Annual External Cost Burden
PROPOSED ESTIMATES					
Obtain certificates and maintain records	1 hour	×	\$61 (general clerk)	\$61	—
	1 hour	×	\$94 (senior computer operator)	\$94	
Total burden per fund	2 hours			\$155	—
Total number of affected funds	× 663			× 663	
Total proposed burden	1,326 hours			\$102,765	—
FINAL ESTIMATES					
Obtain certificates and maintain records	1 hour	×	\$419 (in-house attorney)	\$419	
	1 hour	×	\$71 (compliance clerk)	\$71	
	1 hour	×	\$63 (general clerk)	\$63	—
	1 hour	×	\$96 (senior computer operator)	\$96	
Total burden per fund	4 hours			\$649	—
Total number of affected funds	× 191			× 191	
Total final burden	764 hours			\$123,959	—
TOTAL ESTIMATED BURDENS FOR SEPARATE ACCOUNT CERTIFICATION					
Proposed burden estimates	1,326 hours			\$102,765	—
Proposed total respondents	663				
Revised burden estimates	764 hours			\$123,959	—
Revised total respondents	191				

Notes:

1. Includes initial burden estimates annualized over a three-year period.

2. See SIFMA Report, *supra* footnote 617.⁷⁴⁷ Rule 12d1–4(b)(2)(iii) and (c).⁷⁴⁸ See *supra* footnote 669.⁷⁴⁹ See 2018 FOF Proposing Release, *supra* footnote 6, at nn.373–377 and accompanying text. The rule will not subject an insurance company to

a collection of information as section 26(f)(2)(A) of the Act already requires insurance companies to collect this information.

6. Rule 12d1-4 Total Estimated Burden

As summarized in Table 10 below, we estimate that the total hour burdens and time costs associated with rule 12d1-4, amortized over three years, would result in an average aggregate annual burden

of 578,084 hours and an average aggregate annual monetized time cost of \$191,773,875. We also estimate that, amortized over three years, there would be external costs of \$243,953,880 associated with this collection of information. Therefore, each fund

operating in accordance with the rule will incur an average annual burden of approximately 35.55 hours, at an average annual monetized time cost of approximately \$11,794.94, and an external cost of \$15,004.24 to comply with it.

Table 10: Rule 12d1-4 Total PRA Estimates

	Internal hour burden	Internal burden time cost	External cost burden
Voting Provisions	2,970 hours	\$1,231,860	\$216,000
Fund of Funds Investment Agreements	351,120 hours	\$95,334,624	\$25,668,720
Management Company Findings	216,230 hours	\$92,632,932	\$217,589,160
UIT Evaluations	7,000 hours	\$2,450,500	\$480,000
Separate Account Certificates	764 hours	\$123,959	\$0
Total annual burden	578,084	\$191,773,875	\$243,953,880
Number of funds	÷ 16,259	÷ 16,259	÷ 16,259
Average annual burden per fund	35.55 hours	\$11,794.94	\$15,004.24

C. Rule 0-2

Rule 0-2 under the Act, entitled “General Requirements of Papers and Applications,” prescribes general instructions for filing an application seeking an order from the Commission under any provision of the Act.⁷⁵⁰ Rule

12d1-4 will alleviate some of the burdens associated with rule 0-2 because it will reduce the number of entities that require exemptive relief in order to operate.

Table 11 summarizes the final PRA estimates for internal and external

burdens associated with this requirement. We reduced our estimated burdens from what we proposed because of the intervening adoption of rule 6c-11, which also reduced the number of entities that require exemptive relief in order to operate.⁷⁵¹

Table 11: Rule 0-2 PRA Estimates

	Number of Responses	Annual hours	Annual internal time cost	Annual external cost burden
2016 approved inventory	184	5,340	\$2,029,200.60	\$14,090,000
2018 FOF Proposing Release estimate	122	3,551	\$1,349,418	\$9,369,850
Approved inventory after rule 6c- 11	184	3,738	\$1,420,440.42	\$9,863,000
	- 0.3	- 0.3	- 0.3	- 0.3
Revised estimate	129	2,617 hours	\$994,308.29	\$6,904,100

D. Form N-CEN

Form N-CEN is a structured form that requires registered funds to provide census-type information to the Commission on an annual basis.⁷⁵² We are amending Form N-CEN to require

management companies and UITs to report whether they relied on section 12(d)(1)(G) or rule 12d1-4 during the reporting period.⁷⁵³

Table 12 summarizes the final PRA estimates for internal and external

burdens associated with this requirement. We have adjusted these estimates due to the intervening adoption of rule 6c-11, which also added items to Form N-CEN.⁷⁵⁴

⁷⁵⁰ See Supporting Statement of Rule 0-2 under the Investment Company Act of 1940, General Requirements of Paper Applications (Mar. 3, 2020) (summarizing how applications are filed with the Commission in accordance with the requirements of rule 0-2), available at https://www.reginfo.gov/public/do/PRAViewICR?ref_nbr=201912-3235-002.

⁷⁵¹ We proposed an approximate reduction of one-third from the 2016 approved burdens. See 2018 FOF Proposing Release, *supra* footnote 6, at

nn.381-386 and accompanying text. In the 2019 ETF Adopting Release, we reduced the 2016 approved burdens by 30%. See 2019 ETF Adopting Release, *supra* footnote 25, at nn.691-692 and accompanying text. We are reducing the estimates from the 2019 ETF Adopting Release a further 30% as rule 12d1-4 will reduce a different type of application than those addressed by rule 6c-11.

⁷⁵² See Reporting Modernization Adopting Release, *supra* footnote 56.

⁷⁵³ See *supra* Section III.1.

⁷⁵⁴ We proposed an increase of 0.1 hours per response. See 2018 FOF Proposing Release, *supra* footnote 6, at nn.387-395 and accompanying text. The 2019 ETF Adopting Release also added 0.1 hours, but per ETF, to the estimated burden. See 2019 ETF Adopting Release, *supra* footnote 25, at nn.691-692 and accompanying text.

Table 12: Form N-CEN PRA Estimates

	Number of Responses	Annual hours		Wage Rate ¹	Annual internal time cost	Annual external cost burden
2016 approved inventory	3,113	74,425	×	\$324 (blended rate of senior programmer and compliance attorneys)	\$19,204,128	\$2,088,176
2018 FOF Proposing Release estimate	3,038	74,729	×	\$335.50 (blended rate of senior programmer and compliance attorneys)	\$25,070,000	\$2,088,176
Approved inventory after rule 6c-11	3,113	74,598				\$2,088,176
		+311.3 (+0.1 hours/response)				
Revised estimate	3,113	74,909.3 hours	×	\$335.50 (blended rate of senior programmer and compliance attorneys)	\$25,132,070.20	\$2,088,176

Notes:1. See SIFMA Report, *supra* footnote 617.**BILLING CODE 8011-01-C****VII. Final Regulatory Flexibility Analysis**

This Final Regulatory Flexibility Analysis (“FRFA”) has been prepared in accordance with section 4(a) of the Regulatory Flexibility Act (“RFA”).⁷⁵⁵ It relates to final rule 12d1–4 and the amendments to Form N-CEN under the Investment Company Act. In connection with the new rule, the Commission is rescinding rule 12d1–2 under the Act and certain exemptive relief that has been granted from sections 12(d)(1)(A), (B), (C), and (G) of the Act. Finally, the Commission is adopting related amendments to rule 12d1–1 under the Act. An Initial Regulatory Flexibility Analysis (“IRFA”) was prepared in accordance with the RFA and is included in the 2018 FOF Proposing Release.⁷⁵⁶

A. Need for and Objectives of the Rule and Form Amendments

As described more fully above, rule 12d1–4 will permit registered funds and BDCs that satisfy certain conditions to acquire shares of another fund in excess of the limits of section 12(d)(1) of the Act without obtaining an exemptive order from the Commission. The rule is designed to streamline and enhance the regulatory framework applicable to fund

of funds arrangements. In addition, we are rescinding rule 12d1–2 under the Act and certain exemptive relief that has been granted from sections 12(d)(1)(A), (B), (C), and (G) of the Act to create a more consistent and efficient rules-based regime for the formation and oversight of funds of funds. We also are amending rule 12d1–1 to allow funds that rely on section 12(d)(1)(G) to invest in money market funds that are not part of the same group of investment companies in reliance on that rule. Finally, our amendments to Form N-CEN will allow the Commission to better monitor funds’ reliance on rule 12d1–4 and section 12(d)(1)(G), and will assist the Commission with its accounting, auditing, and oversight functions.

All of these requirements are discussed in detail above. The costs and burdens of these requirements on small entities are discussed below as well as above in our Economic Analysis and Paperwork Reduction Act Analysis, which discusses the costs and burdens on all funds.

B. Significant Issues Raised by Public Comments

In the 2018 FOF Proposing Release, we requested comment on every aspect of the IRFA, including the number of small entities that would be affected by the proposed rule and amendments, the existence or nature of the potential impact of the proposals on small entities discussed in the analysis and how to

quantify the impact of the proposed rule and amendments. We also requested comment on the broader impact of the proposed rule and amendments on all relevant entities, regardless of size.

We proposed adopting a redemption limit that would prohibit an acquiring fund that acquires more than 3% of an acquired fund’s outstanding shares from redeeming, submitting for redemption, or tendering for repurchase more than 3% of an acquired fund’s total outstanding shares in any 30-day period.⁷⁵⁷ Among the comments received on this topic, one commenter stated that the redemption limit could discourage acquiring funds from gaining exposure to non-traditional asset classes with more volatile in- and out-flows and smaller asset bases, resulting in a less desirable mix of assets being made available to investors.⁷⁵⁸ Commenters also stated that this would negatively impact newly launched or small acquired mutual funds.⁷⁵⁹ For example, these commenters noted that novel and emerging fund strategies, which would

⁷⁵⁵ See *supra* Section II.C.2.⁷⁵⁶ Voya Comment Letter.⁷⁵⁹ See, e.g., ICI Comment Letter; Invesco Comment Letter; IDC Comment Letter; Voya Comment Letter; Chamber of Commerce Comment Letter; Guggenheim Comment Letter; Dimensional Comment Letter; Wells Fargo Comment Letter; Capital Group Comment Letter; Schwab Comment Letter; John Hancock Comment Letter; Fidelity Comment Letter; Dechert Comment Letter; MFS Comment Letter; Ropes Comment Letter; IAA Comment Letter; BlackRock Comment Letter; Nationwide Comment Letter.⁷⁵⁵ 5 U.S.C. 603(a).⁷⁵⁶ See 2018 FOF Proposing Release, at section VIII.

likely exist primarily in smaller funds, would not be as attractive to an acquiring fund as they otherwise would be because of liquidity concerns accompanying the redemption condition.⁷⁶⁰ Commenters noted the potential that this provision would affect smaller funds disproportionately since funds of funds would likely migrate out of smaller funds into larger funds in order to dilute their position.⁷⁶¹ Further, commenters noted the possible impact of this provision on smaller funds achieving scalable asset sizes.⁷⁶² Finally, some commenters raised administrative and compliance challenges associated with tracking the outstanding voting securities of numerous acquired funds.⁷⁶³ As discussed in more detail above, we are not adopting the proposed redemption limit.

Commenters also noted that codifying certain categories of existing exemptive relief would benefit smaller and midsize fund complexes by relieving them of the cost burden of obtaining an exemptive order.⁷⁶⁴

In addition to not adopting the proposed redemption limit, after consideration of the comments we received on the proposed rule and amendments, we are adopting the rule and amendments with several modifications that are designed to reduce certain operational challenges that commenters identified, while maintaining protections for investors and providing useful disclosures regarding fund of funds arrangements. Revisions to the estimates below also are based on updated figures regarding the number of small entities impacted by the rule and amendments and updated estimated wage rates.

C. Small Entities Subject to the Rule

An investment company is a small entity if, together with other investment companies in the same group of related investment companies, it has net assets of \$50 million or less as of the end of its most recent fiscal year.⁷⁶⁵ Commission staff estimates that, as of December 2019, there were 46 open-end funds (including 8 ETFs), 30 closed-end funds, 2 UITs, and 14 BDCs that would be considered small entities that may be

subject to rule 12d1-4.⁷⁶⁶ For the purposes of this analysis, we estimate that, of those 92 total entities, 8 entities (1 open-end fund, 5 closed-end funds, and 2 UITs) invest in other funds and thus may be subject to the rule.⁷⁶⁷

D. Projected Board Reporting, Recordkeeping, and Other Compliance Requirements

We are adopting new rule 12d1-4 to streamline and enhance the regulatory framework applicable to fund of funds arrangements, the rescission of rule 12d1-2 and certain exemptive relief, and an amendment to rule 12d1-1 to create a more consistent and efficient rules-based regime for the formation and oversight of fund of funds arrangements. We are also adopting amendments to Form N-CEN to allow the Commission to better monitor funds' reliance on rule 12d1-4 and section 12(d)(1)(G) and assist the Commission with its accounting, auditing, and oversight functions.

Rule 12d1-4 will permit registered funds and BDCs that satisfy certain conditions to acquire shares of another fund in excess of the limits of section 12(d)(1) of the Act without obtaining an exemptive order from the Commission. These conditions include (1) adherence to certain voting provisions, (2) for some funds, entering into a fund of funds investment agreement, (3) for management companies, the adviser making certain evaluations and findings that are reported to the fund's board, (4) for UITs, a finding by the principal underwriter or depositor, and (5) for separate accounts funding variable insurance contracts, the acquiring fund obtaining a certification by the insurance company offering the separate account.⁷⁶⁸

To harmonize the overall regulatory structure in view of rule 12d1-4, we are rescinding rule 12d1-2, which would eliminate the flexibility of funds relying on section 12(d)(1)(G) to: (i) Acquire the securities of other funds that are not

part of the same group of investment companies, subject to the limits in section 12(d)(1)(A) or 12(d)(1)(F); and (ii) invest directly in stocks, bonds and other securities. Similarly we are rescinding certain exemptive relief that has been granted from sections 12(d)(1)(A), (B), (C), and (G) of the Act for the same reasons. In addition, we are amending rule 12d1-1 to allow funds relying on section 12(d)(1)(G) to invest in money market funds that are not part of the same group of investment companies in reliance on that rule. Finally, we are amending Form N-CEN to require management companies and UITs to report whether they relied on section 12(d)(1)(G) or rule 12d1-4 during the reporting period.

New rule 12d1-4, the rescission of rule 12d1-2 and certain exemptive relief that has been granted from sections 12(d)(1)(A), (B), (C), and (G) of the Act, and the amendments to rule 12d1-1 and Form N-CEN would change current reporting requirements for small entities that choose to rely on the rule. Entities eligible to rely on rule 12d1-4 are required to comply with the requirements of the rule only if they wish to rely on the rule's exemptions. Additionally, entities that are management companies or UITs and are relying on rule 12d1-4 are required to report this reliance on Form N-CEN. For purposes of this analysis, Commission staff estimates, based on outreach conducted with a variety of funds, that small fund groups will incur approximately the same initial and ongoing costs as large fund groups. As discussed above, we estimate that each entity that relies on rule 12d1-4 (and is subject to rule 12d1-4's voting provision) would incur the following annual time and cost burdens (with initial burdens amortized over the initial three years): (a) 6 internal burden hours and \$400 in external costs to satisfy the new voting provisions related to mirror voting and 33 internal burden hours and \$4,000 in external costs to satisfy the new voting provisions related to pass-through voting;⁷⁶⁹ (b) 38 internal burden hours and \$2,778 in external costs to satisfy the requirement that acquiring fund enter into an agreement containing certain provisions with the acquired fund effective for the duration of the funds' reliance on the rule, if the acquiring fund and the acquired fund do not share the same

⁷⁶⁰ See, e.g., Invesco Comment Letter; Chamber of Commerce Comment Letter.

⁷⁶¹ *Id.*

⁷⁶² See, e.g., Nationwide Comment Letter.

⁷⁶³ See, e.g., Fidelity Comment Letter; Ropes Comment Letter.

⁷⁶⁴ See, e.g., MFDF Comment Letter.

⁷⁶⁵ See rule 0-10(a) under the Investment Company Act.

⁷⁶⁶ This estimate is derived an analysis of data obtained from Morningstar Direct as well as data reported to the Commission for the period ending December 31, 2019. There are currently no ETMFs or face-amount certificate companies that would be considered small entities. We believe that no BDCs that are small entities invest in other funds outside the limits of 12(d)(1). See *supra* section V.B.1.

⁷⁶⁷ *Id.*

⁷⁶⁸ We estimate that no separate accounts funding variable insurance contracts would be treated as small entities for purposes of this analysis. See also Updated Disclosure Requirements and Summary Prospectus for Variable Annuity and Variable Life Insurance Contracts, Investment Company Act Release No. 33814 (May 1, 2020) [FR 24964 (May 1, 2020)] (noting that the Commission expects that few, if any, separate accounts would be treated as small entities).

⁷⁶⁹ See *supra* Section VI.B.1. For purposes of this analysis, we assume that all small entities will utilize mirror voting. See also *supra* footnote 735 and footnotes 569 through 570 and accompanying text (outlining updated voting analysis).

investment adviser;⁷⁷⁰ (c) for management companies, 35 internal burden hours and \$35,220 in external costs initially;⁷⁷¹ and in cases where the acquired fund is a management company, 13 internal burden hours and \$0 in external costs per year on an on-going basis to satisfy the considerations associated with their Fund Findings;⁷⁷² and (d) for UITs, 35 internal burden

hours and \$2,400 in external costs to satisfy the proposed complex structure and aggregate fees analysis.⁷⁷³ Furthermore, as discussed above, we estimate that each entity that relies on the new rule would incur an additional annual time burden of 0.1 hours to comply with the amendments to Form N-CEN.⁷⁷⁴

Therefore, in the aggregate, we estimate that small entities would incur an annual internal burden of 570 additional hours and an annual external cost burden of \$100,664 to comply with the requirements of rule 12d1-4. This estimate is based on the following calculations:

	Internal hour burden	External cost
Voting Provisions		
Mirror Voting	6 hours	\$400
Small Entities	x 8	x 8
Total Voting Provisions	48 hours	\$3,200
Fund of Funds Investment Agreements		
Small Entities	x 8	x 8
Total Agreements	304 hours	\$22,224
Management Company Findings		
Initially (Annualized over a 3 year-period)	11.67 hours	\$11,740
Annually	13 hours	\$0
Small Entities	x 6	x 6
Total Management Cos.	148	\$70,440
UIT Evaluations		
Small Entities	x 2	x 2
Total UITs	70 hours	\$4,800
Total annual burden	570 hours	\$ 100,664

Furthermore, in the aggregate, we estimate that small entities would incur an annual burden of an additional 0.8 hours to comply with the amendments to Form N-CEN.⁷⁷⁵

We do not otherwise expect the proposal to generate significant economic impacts on smaller entities that are disproportionate to the general economic impacts, including compliance costs and burdens, discussed in sections VI and VII above.

E. Agency Action To Minimize Effect on Small Entities

The RFA directs the Commission to consider significant alternatives that would accomplish our stated objectives, while minimizing any significant economic impact on small entities. We considered the following alternatives for small entities in relation to the disclosure, findings, board reporting,

and recordkeeping requirements: (i) Exempting small entities from some or all of the requirements to rely on rule 12d1-4, or establishing different disclosure or reporting requirements, or different disclosure frequency, for small entities to account for different levels of resources available to small entities; (ii) clarifying, consolidating, or simplifying the compliance requirements under rule 12d1-4 for small entities; and (iii) using performance rather than design standards.

In addition, as discussed above, we proposed a redemption limitation applicable to fund of funds investments in an acquired fund to address concerns that an acquiring fund could threaten large-scale redemptions to unduly influence an acquired fund. In response to concerns raised by comments received on this redemption limit,

including comments regarding the significant impact the proposed requirement would have on small entities, we are not adopting the redemption limit as part of rule 12d1-4.

Further, as discussed above, any cost savings to prospective acquiring and acquired funds derived from eliminating the need to apply for an exemptive order likely will be more pronounced for smaller funds because (i) the administrative cost of the exemptive order application process likely does not vary with fund size, and thus may constitute a higher percentage of a smaller fund's assets; and (ii) the same exemptive order can be used by multiple funds within a fund complex, and there may be fewer funds to benefit

⁷⁷⁰ See *supra* Section VI.B.2.

⁷⁷¹ See *supra* Section VI.B.3.

⁷⁷² *Id.*

⁷⁷³ See *supra* Section VI.B.4.

⁷⁷⁴ See *supra* Section VI.D.

⁷⁷⁵ This estimate is based on the following calculations: 0.1 hours × 8 small entities = 0.8 hours.

from an exemptive order within smaller fund complexes.⁷⁷⁶

We do not believe that exempting or establishing different requirements for any subset of funds, including funds that are small entities, from rule 12d1-4, the amendments to rule 12d1-1 and Form N-CEN, or the rescission of rule 12d1-2 would permit us to achieve our stated objectives. Nor do we believe that clarifying, consolidating or simplifying the various aspects of the final rule for small entities would satisfy those objectives. In particular, we do not believe that the interest of investors would be served by these alternatives. We believe that all investors, including investors in entities that are small entities, will benefit from the rule and form amendments. We believe that this rulemaking strikes the right balance between allowing funds to engage in fund of funds arrangements while protecting such entities from the abuses that Congress sought to curtail in adopting section 12(d)(1). We believe that the new requirements are vital to that balance and important to all investors, irrespective of the size of the entity. Existing fund of funds exemptive orders do not distinguish between small entities and other funds. Finally, we determined to use performance rather than design standards for all funds, regardless of size, because we believe that providing funds with the flexibility to determine how to implement the requirements of the rule allows them the opportunity to tailor these obligations to the facts and circumstances of the entities themselves.

VIII. Statutory Authority

The Commission is adopting new rule 12d1-4 pursuant to the authority set forth in sections 6(c), 12(d)(1)(G) and (J), 17(b) and 38(a) of the Investment Company Act [15 U.S.C. 80a-6(c), 80a-12(d)(1)(G) and (J), 80a-17(b), and 80a-37(a)]. The Commission is adopting amendments to rule 12d1-1 pursuant to the authority set forth in sections 6(c), 12(d)(1)(J), and 38(a) of the Act [15 U.S.C. 80a-6(c), 80a-12(d)(1)(J), 80a-37(a)]. The Commission is adopting an amendment to Form N-CEN under the authority set forth sections 8(b), 30(a), and 38(a) of the Investment Company Act [15 U.S.C. 80a-8(b), 80a-29(a), and 80a-37(a)].

Text of Rules and Form Amendments

For the reasons set out in the preamble, we are amending Title 17, Chapter II of the Code of Federal Regulations as follows:

PART 270—RULES AND REGULATIONS, INVESTMENT COMPANY ACT OF 1940

■ 1. The authority citation for part 270 continues to read, in part, as follows:

Authority: 15 U.S.C. 80a-1 *et seq.*, 80a-34(d), 80a-37, 80a-39, and Pub. L. 111-203, sec. 939A, 124 Stat. 1376 (2010) unless otherwise noted.

* * * * *

■ 2. Amend section 270.12d1-1 by revising paragraph (a) to read as follows:

§ 270.12d1-1 Exemptions for investments in money market funds.

(a) *Exemptions for acquisition of money market fund shares.* If the conditions of paragraph (b) of this section are satisfied, notwithstanding sections 12(d)(1)(A), 12(d)(1)(B), 12(d)(1)(G), 17(a), and 57 of the Act (15 U.S.C. 80a-12(d)(1)(A), 80a-12(d)(1)(B), 80a-12(d)(1)(G), 80a-17(a), and 80a-56)) and § 270.17d-1:

(1) An investment company (*acquiring fund*) may purchase and redeem shares issued by a money market fund; and

(2) A money market fund, any principal underwriter thereof, and a broker or a dealer may sell or otherwise dispose of shares issued by the money market fund to any acquiring fund.

* * * * *

§ 270.12d1-2 [Removed and Reserved]

■ 3. Remove and reserve section 270.12d1-2.

■ 4. Section 270.12d1-4 is added to read as follows:

§ 270.12d1-4 Exemptions for investments in certain investment companies.

(a) *Exemptions for acquisition and sale of acquired fund shares.* If the conditions of paragraph (b) of this section are satisfied, notwithstanding sections 12(d)(1)(A), 12(d)(1)(B), 12(d)(1)(C), 17(a), 57(a)(1)–(2), and 57(d)(1)–(2) of the Act (15 U.S.C. 80a-12(d)(1)(A), 80a-12(d)(1)(C), 80a-17(a), 80a-56(a)(1)–(2), and 80a-56(d)(1)–(2)):

(1) A registered investment company (other than a face-amount certificate company) or business development company (an *acquiring fund*) may purchase or otherwise acquire the securities issued by another registered investment company (other than a face-amount certificate company) or business development company (an *acquired fund*);

(2) An acquired fund, any principal underwriter thereof, and any broker or dealer registered under the Securities Exchange Act of 1934 may sell or otherwise dispose of the securities issued by the acquired fund to any acquiring fund and any acquired fund may redeem or repurchase any securities issued by the acquired fund from any acquiring fund; and

(3) An acquiring fund that is an affiliated person of an exchange-traded fund (or who is an affiliated person of such a fund) solely by reason of the circumstances described in § 270.6c-11(b)(3)(i) and (ii), may deposit and receive the exchange-traded fund's baskets, provided that the acquired exchange-traded fund is not otherwise an affiliated person (or affiliated person of an affiliated person) of the acquiring fund.

(b) *Conditions*—(1) *Control.* (i) The acquiring fund and its advisory group will not control (individually or in the aggregate) an acquired fund;

(ii) If the acquiring fund and its advisory group, in the aggregate,

(A) Hold more than 25% of the outstanding voting securities of an acquired fund that is a registered open-end management investment company or registered unit investment trust as a result of a decrease in the outstanding voting securities of the acquired fund, or

(B) Hold more than 10% of the outstanding voting securities of an acquired fund that is a registered closed-end management investment company or business development company, each of those holders will vote its securities in the same proportion as the vote of all other holders of such securities; provided, however, that in

circumstances where all holders of the outstanding voting securities of the acquired fund are required by this section or otherwise under section 12(d)(1) to vote securities of the acquired fund in the same proportion as the vote of all other holders of such securities, the acquiring fund will seek instructions from its security holders with regard to the voting of all proxies with respect to such acquired fund securities and vote such proxies only in accordance with such instructions; and

(iii) The conditions in paragraphs (b)(1)(i) through (ii) of this section do not apply if:

(A) The acquiring fund is in the same group of investment companies as an acquired fund; or

(B) The acquiring fund's investment sub-adviser or any person controlling, controlled by, or under common control with such investment sub-adviser acts as an acquired fund's investment adviser or depositor.

⁷⁷⁶ See *supra* section V.C.1.ii (citing MFDF Comment Letter for a similar argument).

(2) *Findings and agreements.* (i) Management companies.

(A) If the acquiring fund is a management company, prior to the initial acquisition of an acquired fund in excess of the limits in section 12(d)(1)(A)(i) of the Act (15 U.S.C. 80a–12(d)(1)(A)(i)), the acquiring fund's investment adviser must evaluate the complexity of the structure and fees and expenses associated with the acquiring fund's investment in the acquired fund, and find that the acquiring fund's fees and expenses do not duplicate the fees and expenses of the acquired fund;

(B) If the acquired fund is a management company, prior to the initial acquisition of an acquired fund in excess of the limits in section 12(d)(1)(A)(i) of the Act (15 U.S.C. 80a–12(d)(1)(A)(i)), the acquired fund's investment adviser must find that any undue influence concerns associated with the acquiring fund's investment in the acquired fund are reasonably addressed and, as part of this finding, the investment adviser must consider at a minimum the following items:

(1) The scale of contemplated investments by the acquiring fund and any maximum investment limits;

(2) The anticipated timing of redemption requests by the acquiring fund;

(3) Whether and under what circumstances the acquiring fund will provide advance notification of investments and redemptions; and

(4) The circumstances under which the acquired fund may elect to satisfy redemption requests in kind rather than in cash and the terms of any such redemptions in kind; and

(C) The investment adviser to each acquiring or acquired management company must report its evaluation, finding, and the basis for its evaluations or findings required by paragraphs (b)(2)(i)(A) or (B) of this section, as applicable, to the fund's board of directors, no later than the next regularly scheduled board of directors meeting.

(ii) Unit investment trusts. If the acquiring fund is a unit investment trust (UIT) and the date of initial deposit of portfolio securities into the UIT occurs after the effective date of this section, the UIT's principal underwriter or depositor must evaluate the complexity of the structure associated with the UIT's investment in acquired funds and, on or before such date of initial deposit, find that the UIT's fees and expenses do not duplicate the fees and expenses of the acquired funds that the UIT holds or will hold at the date of deposit.

(iii) Separate accounts funding variable insurance contracts. With

respect to a separate account funding variable insurance contracts that invests in an acquiring fund, the acquiring fund must obtain a certification from the insurance company offering the separate account that the insurance company has determined that the fees and expenses borne by the separate account, acquiring fund, and acquired fund, in the aggregate, are consistent with the standard set forth in section 26(f)(2)(A) of the Act (15 U.S.C. 80a–26(f)(2)(A)).

(iv) Fund of funds investment agreement. Unless the acquiring fund's investment adviser acts as the acquired fund's investment adviser and such adviser is not acting as the sub-adviser to either fund, the acquiring fund must enter into an agreement with the acquired fund effective for the duration of the funds' reliance on this section, which must include the following:

(A) Any material terms regarding the acquiring fund's investment in the acquired fund necessary to make the finding required under paragraph (b)(2)(i) through (ii) of this section;

(B) A termination provision whereby either the acquiring fund or acquired fund may terminate the agreement subject to advance written notice no longer than 60 days; and

(C) A requirement that the acquired fund provide the acquiring fund with information on the fees and expenses of the acquired fund reasonably requested by the acquiring fund.

(3) *Complex fund structures.* (i) No investment company may rely on section 12(d)(1)(G) of the Act (15 U.S.C. 80a–12(d)(1)(G)) or this section to purchase or otherwise acquire, in excess of the limits in section 12(d)(1)(A) of the Act (15 U.S.C. 80a–12(d)(1)(A)), the outstanding voting securities of an investment company (a *second-tier fund*) that relies on this section to acquire the securities of an acquired fund, unless the second-tier fund makes investments permitted by paragraph (b)(3)(ii) of this section; and

(ii) No acquired fund may purchase or otherwise acquire the securities of an investment company or private fund if immediately after such purchase or acquisition, the securities of investment companies and private funds owned by the acquired fund have an aggregate value in excess of 10 percent of the value of the total assets of the acquired fund; provided, however, that the 10 percent limitation of this paragraph shall not apply to investments by the acquired fund in:

(A) Reliance on section 12(d)(1)(E) of the Act (15 U.S.C. 80a–12(d)(1)(E));

(B) Reliance on § 270.12d1–1;

(C) A subsidiary that is wholly-owned and controlled by the acquired fund;

(D) Securities received as a dividend or as a result of a plan of reorganization of a company; or

(E) Securities of another investment company received pursuant to exemptive relief from the Commission to engage in interfund borrowing and lending transactions.

(c) *Recordkeeping.* The acquiring and acquired funds relying upon this section must maintain and preserve for a period of not less than five years, the first two years in an easily accessible place, as applicable:

(1) A copy of each fund of funds investment agreement that is in effect, or at any time within the past five years was in effect, and any amendments thereto;

(2) A written record of the evaluations and findings required by paragraph (b)(2)(i) of this section, and the basis therefor within the past five years;

(3) A written record of the finding required by paragraph (b)(2)(ii) of this section and the basis for such finding; and

(4) The certification from each insurance company required by paragraph (b)(2)(iii) of this section.

(d) *Definitions.* For purposes of this section:

Advisory group means either:

(1) An acquiring fund's investment adviser or depositor, and any person controlling, controlled by, or under common control with such investment adviser or depositor; or

(2) An acquiring fund's investment sub-adviser and any person controlling, controlled by, or under common control with such investment sub-adviser.

Baskets has the same meaning as in 17 CFR 270.6c–11(a)(1).

Exchange-traded fund means a fund or class, the shares of which are listed and traded on a national securities exchange, and that has formed and operates in reliance on § 6c–11 or under an exemptive order granted by the Commission.

Group of investment companies means any two or more registered investment companies or business development companies that hold themselves out to investors as related companies for purposes of investment and investor services.

Private fund means an issuer that would be an investment company under section 3(a) of the Act but for the exclusions from that definition provided for in section 3(c)(1) or section 3(c)(7) of the Act (15 U.S.C. 80a–3(c)(1) or 80a–3(c)(7)).

Guidance Under Section 529A: Qualified ABLE Programs; Final Rule

DEPARTMENT OF THE TREASURY**Internal Revenue Service****26 CFR Parts 1, 25, 26, 301, and 602**

[TD 9923]

RIN 1545-BM68; 1545-BP10

**Guidance Under Section 529A:
Qualified ABLE Programs****AGENCY:** Internal Revenue Service (IRS), Treasury.**ACTION:** Final regulations.

SUMMARY: This document contains final regulations that provide guidance regarding programs under the Stephen Beck, Jr., Achieving a Better Life Experience Act of 2014 (ABLE Act). The ABLE Act provides rules under which States or State agencies or instrumentalities may establish and maintain a Federal tax-favored savings program for eligible individuals with a disability who are the owners and designated beneficiaries of accounts to which contributions may be made to meet qualified disability expenses. These accounts also receive favorable treatment for purposes of certain means-tested Federal programs. In addition, these final regulations provide corresponding amendments to the unrelated business income tax regulations, the gift and generation-skipping transfer tax regulations, and the electronic filing requirements regulations. These regulations affect eligible individuals that are designated beneficiaries of accounts established and maintained under the ABLE Act.

DATES: *Effective date:* These final regulations are effective November 19, 2020.

Applicability dates: For dates of applicability, see §§ 1.511–2(e)(2), 1.513–(g), 1.529A–1(c), 1.529A–2(q), 1.529A–3(h), 1.529A–4(e), 1.529A–5(g), 1.529A–6(f), 1.529A–7(b), 1.529A–8(a), and 301.6011–2(g).

FOR FURTHER INFORMATION CONTACT: Concerning the final regulations under section 529A, Taina Edlund, (202) 317–4541, or Julia Parnell, (202) 317–4086; concerning the estate and gift tax regulations, Lorraine Gardner, (202) 317–4645, or Daniel Gespass, (202) 317–4632; concerning the reporting provisions under section 529A, Isaac Brooks, (202) 317–6844 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:**Background**

This document contains final regulations amending 26 CFR parts 1, 25, 26 and 301, to provide guidance

under section 529A of the Internal Revenue Code (Code). Section 529A provides rules under which States or State agencies or instrumentalities may establish and maintain a Federal tax-favored savings program through which contributions may be made to the account of an eligible individual with a disability to meet qualified disability expenses.

1. The ABLE Act

Section 529A was added to the Code on December 19, 2014, by the ABLE Act, which was enacted as part of the Tax Increase Prevention Act of 2014, Public Law 113–295 (128 Stat. 4010). The statutory requirements of section 529A apply to taxable years beginning after December 31, 2014.

Congress recognized the special financial burdens borne by families raising children with disabilities and the fact that increased financial needs generally continue throughout the lifetime of an individual with a disability. Section 101 of the ABLE Act confirms that one of the ABLE Act's purposes is to “provide secure funding for disability-related expenses on behalf of designated beneficiaries with disabilities that will supplement, but not supplant, benefits” otherwise available to those individuals, whether through private sources, employment, public programs, or otherwise. Before the enactment of the ABLE Act, various types of Federal tax-advantaged savings arrangements existed, but none adequately served the goal of promoting saving for those supplemental financial needs.

Section 529A allows the creation of a qualified ABLE program by a State (or agency or instrumentality thereof) under which a separate ABLE account may be established for an eligible individual with a disability who is the designated beneficiary and owner of that account. Generally, contributions to an ABLE account are subject to both an annual limit and a cumulative limit, and, when made by a person other than the designated beneficiary, are treated as gifts to the designated beneficiary. These gifts may be sheltered from Federal gift tax by the annual per-donee gift tax exclusion. Distributions from an ABLE account for the qualified disability expenses of the designated beneficiary are not included in the designated beneficiary's gross income. However, the earnings portion of distributions from an ABLE account in excess of the qualified disability expenses generally is includible in the gross income of the designated beneficiary. An ABLE account may be used for the long-term benefit or short-

term needs of the designated beneficiary.

Section 103 of the ABLE Act, while not a tax provision, is critical to achieving the goal of the ABLE Act of providing financial resources for the benefit of individuals with disabilities. Because so many of the programs that provide essential financial, occupational, and other resources and services to individuals with disabilities are available only to persons whose resources and income do not exceed relatively low dollar limits, section 103 generally disregards a designated beneficiary's ABLE account (specifically, the account balance, contributions to the account, and distributions from the account) for purposes of determining the designated beneficiary's eligibility for, and the amount of any assistance or benefits provided under, certain means-tested Federal programs. However, in the case of the Supplemental Security Income (SSI) program under title XVI of the Social Security Act, distributions for certain housing expenses are not disregarded, and the balance (including earnings) in an ABLE account is considered a resource of the designated beneficiary to the extent it exceeds \$100,000. Section 103 also addresses the impact of an excess balance in an ABLE account on the designated beneficiary's eligibility for benefits under the SSI program and Medicaid.

Finally, section 104 of the ABLE Act addresses the treatment of ABLE accounts in bankruptcy proceedings.

2. Guidance**A. Notice 2015–18**

Shortly after the ABLE Act was enacted, the Department of the Treasury (Treasury Department) and the IRS were advised that several state legislatures were in the process of enacting enabling legislation, and ABLE programs might be in operation in some states before guidance under section 529A could be issued by the Treasury Department and the IRS. In order to prevent the lack of regulatory guidance from discouraging states to enact enabling legislation and create ABLE programs, the Treasury Department and the IRS issued Notice 2015–18, 2015–12 I.R.B. 765 (March 23, 2015). The Notice provided that future section 529A guidance would confirm that the owner of an ABLE account is the designated beneficiary of the account, and that a person with signature authority over the account (if other than the account's designated beneficiary) may neither have nor acquire any beneficial interest in the ABLE account and must administer the

account for the designated beneficiary of the account. The Notice further provided that, in the event that State legislation creating an ABLE program enacted in accordance with section 529A prior to the issuance of guidance does not fully comport with the guidance when issued, the Treasury Department and the IRS intended to provide transition relief to give the States sufficient time to implement the changes necessary to avoid the disqualification of the program and of the ABLE accounts already established under the program.

B. 2015 Proposed Regulations

On June 22, 2015, the Treasury Department and the IRS published a notice of proposed rulemaking (NPRM) in the **Federal Register** (REG-102837-15; 80 FR 35602) proposing regulations under section 529A regarding programs under the ABLE Act (2015 proposed regulations). The 2015 proposed regulations set forth the requirements a program established and maintained by a State, or agency or instrumentality thereof, must satisfy to be considered a qualified ABLE program under section 529A. They covered the requirements for establishing an ABLE account (including those that an individual must satisfy to be an eligible individual qualified to be the designated beneficiary of an ABLE account) and the requirements concerning contributions to an ABLE account (including the limitations on the amount and investment of such contributions). In addition, the 2015 proposed regulations addressed the gift and generation-skipping transfer (GST) tax consequences of contributions to an ABLE account, as well as the Federal income, gift, and estate tax consequences of distributions from, and changes in the designated beneficiary of, an ABLE account. The 2015 proposed regulations also provided guidance on requirements with respect to rollovers and program-to-program transfers from one ABLE account to another and on the recordkeeping and reporting requirements of a qualified ABLE program. Finally, the 2015 proposed regulations provided corresponding amendments to regulations under sections 511 and 513 (with respect to unrelated business taxable income), sections 2501, 2503, 2511, 2642, and 2652 (with respect to gift and GST taxes), and section 6011 (with respect to electronic filing requirements).

C. Notice 2015-81

More than 200 written comments were received in response to the 2015 proposed regulations and a public

hearing was held on October 14, 2015. Numerous commenters asked the Treasury Department and the IRS to issue interim guidance to address three requirements under the proposed regulations that they said would create significant barriers to the development of qualified ABLE programs by the States: (i) The requirement to establish safeguards to categorize distributions from an ABLE account; (ii) the requirement to request the taxpayer identification number (TIN) of every contributor to an ABLE account; and (iii) the requirement to process disability certifications with signed physicians' diagnoses.

In response to the request for interim guidance, the Treasury Department and the IRS published Notice 2015-81, 2015-49 I.R.B. 784 (Dec. 7, 2015), advising that the final regulations would address these requirements in the following manner: First, the final regulations would eliminate the requirement that a qualified ABLE program distinguish between types of expenses. Second, the final regulations would eliminate the requirement that a qualified ABLE program must request the TIN of each contributor at the time a contribution is made if the program has a system in place to identify and reject excess contributions and excess aggregate contributions before they are deposited into an ABLE account. Third, the final regulations would permit a certification of eligibility to satisfy the requirement for filing a disability certification. A certification of eligibility is a certification, under penalties of perjury, that the individual (or the individual's agent under a power of attorney or a parent or legal guardian of the individual) has a signed physician's diagnosis, and that the signed diagnosis will be retained and provided to the ABLE program or the IRS on request.

3. The PATH Act Amendment

On December 18, 2015, Section 303 of the Protecting Americans from Tax Hikes Act of 2015 (the PATH Act), was enacted as part of the Consolidated Appropriations Act, 2016, Public Law 114-113 (129 Stat. 2242). The PATH Act amended section 529A(b)(1), effective for taxable years beginning after December 31, 2014, by removing the requirement that a State's qualified ABLE program allow the establishment of an ABLE account only for a designated beneficiary who is a resident of that State or of a contracting State.

4. The TCJA

The contribution limits and other provisions of section 529A were modified by the Tax Cuts and Jobs Act,

Public Law 115-97, 131 Stat. 2054, (2017) (TCJA), signed into law on December 22, 2017. The TCJA amended section 529A(b)(2)(B) to allow an employed designated beneficiary described in new section 529A(b)(7) to contribute, prior to January 1, 2026, an additional amount in excess of the limit in section 529A(b)(2)(B)(i) (the annual gift tax exclusion amount in section 2503(b), formerly set forth in section 529A(b)(2)(B)). This additional permissible contribution is subject to its own limit as described in section 529A(b)(2)(B)(ii). Specifically, this additional contributed amount may not exceed the lesser of (i) the designated beneficiary's compensation as defined by section 219(f)(1) for the taxable year, or (ii) an amount equal to the poverty line for a one-person household for the calendar year preceding the calendar year in which the taxable year begins. The TCJA also amended the section 529A(b)(2) flush language to require the designated beneficiary, or a person acting on behalf of the designated beneficiary, to maintain adequate records to ensure, and to be responsible for ensuring, that the requirements of section 529A(b)(2)(B)(ii) are met.

New section 529A(b)(7)(A) identifies a designated beneficiary eligible to make this additional contribution as one who is an employee (including a self-employed individual) with respect to whom there has been no contribution made for the taxable year to: A defined contribution plan meeting the requirements of sections 401(a) or 403(a); an annuity contract described in section 403(b); or an eligible deferred contribution plan under section 457(b). Section 529A(b)(7)(B) defines the term "poverty line" as having the meaning provided in section 673 of the Community Services Block Grant Act (42 U.S.C. 9902).

The TCJA also amended section 529 (regarding qualified tuition programs) to allow, before January 1, 2026, a limited amount to be rolled over to an ABLE account from the designated beneficiary's own section 529 qualified tuition program (QTP) account or from the QTP account of certain family members. The TCJA added section 529(c)(3)(C)(i)(III), which provides that a distribution from a QTP made after December 22, 2017, and before January 1, 2026, is not subject to income tax if, within 60 days of the distribution, it is transferred to an ABLE account of the designated beneficiary or a member of the family of the designated beneficiary. Under section 529(c)(3)(C)(i), the amount of any rollover to an ABLE account is limited to the amount that, when added to all other contributions

made to the ABLE account for the taxable year, does not exceed the contribution limit for the ABLE account under section 529A(b)(2)(B)(i), that is, the annual gift tax exclusion amount under section 2503(b). This limited rollover is described in more detail in Notice 2018–58, 2018–33 I.R.B. 305 (Aug. 13, 2018).

A. Notice 2018–62

To address the TCJA modifications to section 529A, the Treasury Department and the IRS published Notice 2018–62, 2018–34 I.R.B. 316 (Aug. 20, 2018), which announced the intent of the Treasury Department and the IRS to issue proposed regulations to implement these changes and describes the anticipated rules to implement the statutory changes. No comments were received in response to the Notice.

B. 2019 Proposed Regulations

On October 10, 2019, the Treasury Department and the IRS published an NPRM in the **Federal Register** (REG–128246–18; 84 FR 54529) to address the TCJA modifications to section 529A (2019 proposed regulations).

The 2019 proposed regulations confirmed that the employed designated beneficiary, or the person acting on his or her behalf, is solely responsible for ensuring that the requirements in section 529A(b)(2)(B)(ii) are met and for maintaining adequate records for that purpose. In addition, to minimize burdens for the designated beneficiary and the qualified ABLE program, the 2019 proposed regulations provided that ABLE programs may allow a designated beneficiary or the person acting on his or her behalf to certify, under penalties of perjury, that he or she is a designated beneficiary described in section 529A(b)(7) and that his or her contributions of compensation do not exceed the limit set forth in section 529A(b)(2)(B)(ii).

The 2019 proposed regulations also clarified that the poverty line in section 529A(b)(7)(B) is to be determined by using the poverty guidelines updated periodically in the **Federal Register** by the U.S. Department of Health and Human Services under the authority of 42 U.S.C. 9902(2). Those guidelines vary based on locality. Specifically, there are separate guidelines for (1) the contiguous 48 states and the District of Columbia, (2) Alaska, and (3) Hawaii. Because the Treasury Department and the IRS concluded that the poverty guideline that most closely reflects the employed designated beneficiary's cost of living is the most relevant for determining the contribution limit, the 2019 proposed regulations provided that

a designated beneficiary's contribution limit is to be determined using the poverty guideline applicable in the state of the designated beneficiary's residence.

Because section 529A(b)(2) provides that rules similar to those set forth in section 408(d)(4) regarding the return of excess contributions to an individual retirement account or annuity apply to ABLE accounts, the 2019 proposed regulations provided that a qualified ABLE program must return any contributions of the designated beneficiary's compensation in excess of the limit in section 529A(b)(2)(B)(ii) to the designated beneficiary.

The 2019 proposed regulations also provided that it will be the sole responsibility of the designated beneficiary (or the person acting on the designated beneficiary's behalf) to identify and request the return of any excess contribution of such compensation income. Such returns of excess compensation contributions must be received by the employed designated beneficiary on or before the due date (including extensions) of the designated beneficiary's income tax return for the year in which the excess compensation contributions were made. A failure to return excess contributions within this time period will result in the imposition on the designated beneficiary of a 6 percent excise tax under section 4973(a)(6) on the amount of excess compensation contributions.

Finally, in order to minimize administrative burdens for the designated beneficiary and the qualified ABLE program, for purposes of ensuring that the limit on contributions made under section 529A(b)(2)(B)(ii) is not exceeded, the 2019 proposed regulations provided that a qualified ABLE program may rely on self-certifications, made under penalties of perjury, of the designated beneficiary or the person acting on the designated beneficiary's behalf.

Six comments were received in response to the 2019 proposed regulations. No public hearing was requested or held.

Summary of Comments and Explanation of Provisions

Approximately 200 comments were received in response to the 2015 proposed regulations. These comments, along with the six comments received in response to the 2019 proposed regulations, are discussed in this section. The Treasury Department and the IRS, after consideration of all of these comments and the changes made to section 529A of the Code by the PATH Act and the TCJA, adopt the 2015

and 2019 proposed regulations as amended by this Treasury decision. The comments are available for public inspection at www.regulations.gov or on request.

These final regulations provide guidance on the requirements a program established and maintained by a State, or agency or instrumentality thereof, must satisfy to be considered a qualified ABLE program under section 529A. They also address the requirements for establishing an ABLE account, for qualifying as an eligible individual and thus a qualified designated beneficiary of an ABLE account and for contributions to an ABLE account, including the limitations on the amount and investment of such contributions. These final regulations also provide rules regarding changes in the designated beneficiary of an ABLE account, and rollovers and program-to-program transfers from one ABLE account to another. In addition, these final regulations provide guidance on the gift and GST tax consequences of contributions to an ABLE account, as well as on the Federal income, gift, and estate tax consequences of distributions from, and changes in the designated beneficiary of, an ABLE account. Finally, these final regulations provide guidance on the recordkeeping and reporting requirements of a qualified ABLE program.

1. Qualified ABLE Programs

A. Established and Maintained by a State

Consistent with section 529A(b)(1), which defines an ABLE program as a program established and maintained by a State, or agency or instrumentality thereof, the final regulations, like the 2015 proposed regulations, provide that a program is established by a State, or its agency or instrumentality, if the program is initiated by State statute or regulation, or by an act of a State official or agency with the authority to act on behalf of the State. A program is maintained by a State, or its agency or instrumentality, if all the terms and conditions of the program are set by the State, or its agency or instrumentality, and the State, or its agency or instrumentality, is actively involved on an ongoing basis in the administration of the program, including supervising decisions relating to the investment of assets contributed to the program. The final regulations set forth factors that are relevant in determining whether a State, or its agency or instrumentality, is actively involved in the administration of the program. Among those factors is the nature and extent of the State's role

in selecting and overseeing private contractors contracted to provide administrative or other services.

B. Community Development Financial Institutions

The Treasury Department and the IRS understand that many of the States will have the entity that currently administers its section 529 qualified tuition program (on which section 529A was loosely modeled) also administer that State's qualified ABLE program. However, because of greater administrative obligations, each qualified ABLE program is likely to have higher costs and lower revenue to offset those costs than the same State's qualified tuition program. The 2015 proposed regulations suggested that, by contracting with one or more Community Development Financial Institutions (CDFIs)¹ to perform some or all of the duties involved in administering the qualified ABLE program, a State might be able to reduce its costs, and the cost to each owner of an ABLE account, because the CDFI might be able to obtain corporate or other grants to cover those costs. For example, a CDFI could provide services to facilitate distributions, collect and report social data, solicit grants to defray the cost of administering the program, and apply for a financial assistance award from the CDFI Fund, an entity established within the Treasury Department to promote community development in economically distressed communities.

Several commenters expressed concerns that the reference to CDFIs in the 2015 proposed regulations may lead qualified ABLE program administrators to believe that CDFIs are the preferred, or perhaps even the sole, entities with which they may contract for administrative and other services. These commenters asked that the final regulations clarify that organizations other than CDFIs, such as community banks, also may perform such services. One commenter expressed concern that CDFIs will not be located where people with disabilities and their families would have easy access to make deposits or withdrawals. The same commenter also expressed concern that CDFIs would be overwhelmed by screening and verifying people associated with ABLE accounts.

The Treasury Department and the IRS note that the final regulations, like the 2015 proposed regulations, do not prohibit States from contracting with private contractors for various services. However, to increase clarity, the final regulations specifically provide that, while a qualified ABLE program may contract with a CDFI for services, a qualified ABLE program also may contract with other private contractors.

Some commenters requested that the rules applicable to qualified ABLE programs be as consistent as possible with the rules applicable to qualified tuition programs under section 529 in order to reduce administrative burdens and costs. Numerous others requested that the process and reporting should be made as simple and streamlined as possible for the individuals with a disability and their families. Others requested as much uniformity as possible among the qualified ABLE programs, to facilitate the movement of ABLE accounts from one program to another.

The Treasury Department and the IRS are aware of the desirability of reducing administrative burdens and costs. The final regulations therefore are consistent with the rules applicable to qualified tuition programs, where appropriate. However, the final regulations allow certain flexibility in the way each ABLE program may implement the applicable requirements.

C. Consortia

Several commenters asked whether qualified ABLE programs could join together to form a consortium for the purpose of offering broader investment choices, streamlined program administration, and lower fees for account holders. The Treasury Department and the IRS view the States' ability to streamline administration and lower costs as helpful in facilitating the establishment and maintenance of qualified ABLE programs. Therefore, the final regulations provide that a qualified ABLE program may be maintained by two or more States or agencies or instrumentalities of a State. If a State or agency or instrumentality of a State participates in a consortium, the consortium's program is considered to be the program of each member (State or agency or instrumentality of a State) of the consortium.

D. Residency Requirement

As originally enacted, section 529A(b)(1)(C) required a qualified ABLE program to allow for the establishment of an ABLE account only for a designated beneficiary who is a resident of that State or of a contracting State.

Consistent with the statute, the 2015 proposed regulations required that an ABLE account for a designated beneficiary may be established only under the qualified ABLE program of the State in which that designated beneficiary is a resident or with which the State of the designated beneficiary's residence has contracted for the provision of ABLE accounts.

The 2015 proposed regulations provided that, if a State does not establish and maintain a qualified ABLE program, it could contract with another State to provide an ABLE program for its residents. The 2015 proposed regulations defined "contracting State" as a State without a qualified ABLE program of its own, which, in order to make ABLE accounts available to its residents who are eligible individuals, contracts with another State that has a program.

Many commenters asked that the final regulations clarify whether a State without an ABLE program could contract with more than one State having an ABLE program. Another commenter asked whether the Federal government would allow a State without its own qualified ABLE program to decline to contract with another State, and thus deprive its residents of access to ABLE accounts.

A few commenters were in support of the residency requirement, but several commenters expressed hope that Congress would amend the ABLE Act to eliminate the residency requirement. Commenters pointed out that the residency requirement prevents an otherwise eligible US citizen living abroad from having an ABLE account, and that the accounts of non-resident US citizens in a disability savings account program created under foreign law would not receive the same tax-sheltered benefits under US law as are accorded to ABLE accounts. Others argued that allowing an eligible individual a choice of programs would ensure quality, competitive fees, uniformity, and other benefits for the eligible individual.

Several commenters suggested that the final regulations permit a qualified ABLE program to rely on a certification under penalties of perjury by the designated beneficiary regarding his or her state of residence to establish that the residency requirement has been satisfied.

After the Treasury Department and the IRS received these comments, the PATH Act repealed the residency requirement. Therefore, the final regulations eliminate all references to a residency requirement and to a "contracting State." A qualified ABLE

¹ CDFIs (as defined in 12 U.S.C. 4702(5) and 12 CFR 1805.104) are certified by the CDFI Fund established under 12 U.S.C. 4703. The CDFI Program (authorized by 12 U.S.C. 4704–4707) is administered by the Treasury Department. See the CDFI Fund's website (www.cdfifund.gov) for more detailed information and a listing of CDFIs nationwide.

program may allow an ABLÉ account to be established for an eligible individual regardless of his or her residence and, subject to the rules of the particular qualified ABLÉ program, an eligible individual may be the designated beneficiary of an ABLÉ account under the qualified ABLÉ program of any State. However, the Treasury Department and the IRS note that the final regulations do not prohibit a State from limiting its program to State residents nor do they require a State to establish or participate in an ABLÉ program.

2. ABLÉ Accounts

A. Establishment and Signatory of an ABLÉ Account

Section 529A(e)(3) defines the term “designated beneficiary” as the eligible individual who established an ABLÉ account and is the owner of such account. Consistent with section 529A(e)(3), the 2015 proposed regulations provided that the designated beneficiary of an ABLÉ account is the individual who is the owner of the ABLÉ account and who either established the account at a time when he or she was an eligible individual or who has succeeded the original designated beneficiary. Because not every eligible individual may have the capacity or otherwise be able to establish an ABLÉ account on his or her own behalf, the 2015 proposed regulations provided that the ABLÉ account may be established on behalf of the eligible individual by his or her agent under a power of attorney or, if none, by a parent or legal guardian of the eligible individual. Similarly, the 2015 proposed regulations also provided that if the designated beneficiary is unable to, or chooses not to, exercise signature authority over his or her account, then signature authority may be exercised by an agent under power of attorney or, if none, a parent or legal guardian of the designated beneficiary. The final regulations retain these provisions with modifications.

One commenter suggested that the final regulations clarify that “parent” refers to the parent of an adult designated beneficiary, as well as the parent of a minor. The final regulations do not adopt this suggestion because it is not necessary. A person’s status as a parent is not changed by the child’s attainment of the age of majority. Rather, a person’s status as a parent is determined by reference to a familial relationship that is not age dependent.

Numerous commenters asked that the list of persons who may exercise signature authority over the ABLÉ

account on behalf of the designated beneficiary (signatories) be expanded to provide greater flexibility and to avoid the need for the court appointment of a conservator or other legal representative, particularly in cases in which the designated beneficiary has no parent available to serve as signatory. One commenter suggested that there is no reason to restrict the list to those acting under a power of attorney or to legal guardians to the exclusion of custodians and other types of fiduciaries permitted under applicable state law. One commenter pointed out that an individual eligible for an ABLÉ account may not have a parent, guardian, or agent under a power of attorney who can and who is willing to manage an account. Other commenters suggested that the list of authorized signatories be expanded to include grandparents, siblings, non-family members, the trustees of a trust for which the designated beneficiary is the trust beneficiary, the designated beneficiary’s representative payee as recognized by the Social Security Administration (SSA), and custodians or others designated by the designated beneficiary. One commenter explained that concerns about fraud or abuse by SSA representative payees would be alleviated by the Strengthening Protections for Social Security Beneficiaries Act of 2018, Public Law 115–165 (132 Stat. 1257), which increases the funding for the Representative Payee program and strengthens procedures for addressing misuse or misappropriation of funds by SSA representative payees. Another commenter suggested that someone other than the eligible individual be permitted to establish the account if the eligible individual has the legal capacity to do so but chooses to have another person establish the account. One commenter suggested that the law of each individual State should be permitted to govern who can be a signatory.

Some commenters suggested that the designated beneficiary and/or the other person with signature authority be permitted to name a successor, that the designated beneficiary be allowed to delegate to others not only signature authority over his or her account but also the ability to establish the ABLÉ account, that the designated beneficiary be able to choose more than one person to exercise signature authority over his or her ABLÉ account, and that the designated beneficiary be allowed to designate a co-signer to serve concurrently with the designated beneficiary. Commenters also requested

that the final regulations confirm that a parent with signature authority over a minor child’s ABLÉ account remains eligible to serve after the designated beneficiary reaches the age of majority.

Some commenters requested that the ordering rule for determining the order in which a person has the authority to be a signatory be removed. These commenters were concerned that the ordering rule would impose obligations on the qualified ABLÉ programs to verify the absence of any other person with higher priority who was both willing and able to so serve. These commenters suggested that a program be permitted to rely on the certification, under penalties of perjury, of an individual seeking to exercise signature authority over an ABLÉ account regarding that individual’s authority to act on behalf of the designated beneficiary.

On the other hand, one commenter supported the provision in the 2015 proposed regulations regarding permissible signatories. Another commenter questioned whether allowing the designated beneficiary to designate another individual (who may otherwise lack independent authority to act on behalf of the designated beneficiary) to exercise signature authority would be consistent with the designated beneficiary’s ownership of the ABLÉ account. The commenter also noted that allowing greater flexibility in the choice of authorized signatory could increase program costs.

The Treasury Department and the IRS recognize that there may be situations in which an eligible individual with legal capacity may want another person to establish, or to serve as the person with signature authority over, the ABLÉ account for that eligible individual. Therefore, the final regulations clarify that an eligible individual with legal capacity may delegate these responsibilities to any other person. Furthermore, the Treasury Department and the IRS recognize that expanding the categories of individuals who may serve as signatories of an ABLÉ account of a designated beneficiary who lacks legal capacity affords less cumbersome alternatives to a court-appointed guardian in the event the designated beneficiary has no agent under a power of attorney or parent to exercise signature authority. However, the Treasury Department and the IRS also recognize that expanding too widely the universe of individuals who are allowed to establish an ABLÉ account and serve as the signatory of that ABLÉ account could increase the risk of the impermissible establishment of multiple accounts for a single individual or of

having the designated beneficiary's only ABLE account being established and managed by a person who might not be the most appropriate person to serve in that capacity.

In an effort to find an appropriate balance between these possibly competing concerns, the final regulations provide an expanded hierarchy of persons who may establish an ABLE account for an individual or exercise signature authority over that individual's ABLE account. That hierarchy consists of the individual selected by the eligible individual or the eligible individual's agent under a power of attorney, conservator or legal guardian or conservator, the spouse, a parent, a sibling, a grandparent, or a representative payee (whether an individual or organization) appointed by the SSA, in that order. It is noted that the representative payee is subject to all applicable SSA rules.

Because each eligible individual is allowed to have only one ABLE account, the Treasury Department and the IRS concluded that the ordering rule is necessary to provide a clearer process for determining who may establish the designated beneficiary's only permissible ABLE account. For this reason, the limitation and ordering rule prescribing the persons who may establish the account and/or serve as a signatory is retained in the final regulations. To further facilitate the establishment of ABLE accounts without imposing undue burden on the program or the eligible individuals, the final regulations permit a qualified ABLE program to accept a certification by an individual, under penalties of perjury, that he or she is authorized to establish the ABLE account for the benefit of the eligible individual and that there is no other willing and able person with a higher priority to do so.

The final regulations also allow a designated beneficiary with legal capacity to remove and replace from time to time the individual with signature authority over that designated beneficiary's ABLE account, and to name a successor signatory. The final regulations also allow a person with signature authority to name a successor signatory, consistent with the same ordering rule, if the designated beneficiary lacks the legal capacity to do so.

A few commenters suggested that more than one person be allowed to serve as authorized co-signatories. The Treasury Department and the IRS understand that this could provide administrative flexibility, so the final regulations allow a qualified ABLE program to permit co-signatories as long

as each co-signatory would satisfy the ordering rule if the other had refused to so serve.

As in the 2015 proposed regulations, the final regulations provide that, because individuals with signature authority over an ABLE account would be acting on behalf of the designated beneficiary, references to actions of the designated beneficiary, such as establishing or managing the ABLE account, are deemed to include the actions of any individual with signature authority over the ABLE account. Further, the final regulations continue to provide that, except for the designated beneficiary of the ABLE account, any person with signature authority over the account may neither have, nor acquire, a beneficial interest in the account during the lifetime of the designated beneficiary, and must administer the account for the benefit of the designated beneficiary.

One commenter asked that the person with signature authority over an ABLE account be allowed to elect to establish an ABLE account as a custodial account under a Uniform Transfers to Minors Act (UTMA) or the Uniform Gifts to Minors Act (UGMA). The Treasury Department and the IRS decline to adopt this suggestion. The ABLA Act mandates very different rules governing ABLE accounts than those governing UTMA and UGMA accounts under State laws. As a result, the Treasury Department and the IRS concluded it would not be possible to administer an ABLE account as mandated by the ABLA Act if the account instead was structured and administered as a UTMA or UGMA account.

One commenter suggested that the final regulations confirm that the provisions regarding authorized signatories do not limit the ability of either the designated beneficiary or the person with signature authority to name other agents to, for instance, obtain information, make electronic contributions and investment option changes, authorize withdrawals, or have full joint control. With regard to shared full joint control, the final regulations do not adopt the suggestion. The Treasury Department and the IRS have concluded that this responsibility is properly the obligation of the person(s) with signature authority over the account and should not be delegable. However, the final regulations do not prohibit the person(s) with signature authority from having co-signatories or from allowing sub-accounts, each with a different signatory, for specific purposes.

B. Limit on Number of ABLA Accounts of a Designated Beneficiary

Section 529A(b)(1)(B) provides that each eligible person may have only one ABLA account. In addition, section 529A(c)(4) generally provides that, except with respect to rollovers, once an ABLA account has been established for a designated beneficiary, no account subsequently established for the same designated beneficiary may qualify as an ABLA account. Accordingly, the 2015 proposed regulations provided that, except in the case of rollovers or program-to-program transfers, a designated beneficiary would be limited to one ABLA account at a time, regardless of where located. The final regulations confirm that an eligible individual is not prohibited from establishing an ABLA account merely because he or she previously was the designated beneficiary of an ABLA account that has been closed.

Consistent with the statutory provisions, the 2015 proposed regulations provided that, except with respect to rollovers and program-to-program transfers, if an ABLA account is established for a designated beneficiary who already has an ABLA account in existence, the additional account would not be treated as an ABLA account. The 2015 proposed regulations also provided that, if an additional account is established and all contributions made to the additional account are returned in accordance with the rules applicable to excess contributions, the additional account would be treated as never having been established. The final regulations retain these provisions with one substantive modification.

Section 103 of the ABLA Act generally exempts ABLA accounts from being counted as a resource in determining the designated beneficiary's eligibility for, or the amount of, certain public benefits. Thus, an ABLA account has both tax and nontax benefits. Several commenters raised concerns regarding the treatment of additional accounts for purposes of the designated beneficiary's eligibility for public benefits. Although a tax regulation cannot govern provisions administered by other government agencies, the final regulations appropriately provide guidance on circumstances under which accounts are treated as ABLA accounts.

As a result of the PATH Act's amendment to section 529A eliminating the requirement that the account be opened in the State of the designated beneficiary's residence, the Treasury Department and the IRS concluded that there is now an increased risk that an additional account could be opened

under a different qualified ABLE program by a person with authority to establish an account without the knowledge of either the eligible individual or another person with authority to establish an account, thus increasing the risk that the eligible individual thereby could lose his or her eligibility for his or her public benefits. The Treasury Department and the IRS also concluded that it is within the scope of their regulatory authority to attempt to prevent this potential harm to the class of individuals that section 529A was enacted to benefit. Accordingly, the final regulations provide that, if an additional account is established for the eligible individual, the additional account also is an ABLE account if either all contributions made to the additional account are returned to the contributor(s) under the same rules applicable to the return of excess contributions, or the additional account is transferred into the designated beneficiary's preexisting ABLE account with any excess contributions and excess aggregate contributions being returned to the contributor(s). If neither of these conditions is satisfied on or before the due date (including extensions) of the eligible individual's Federal income tax return for the year in which the additional account was established, the additional account will cease to be an ABLE account immediately after that return due date.

Like the 2015 proposed regulations, the final regulations provide that, at the time when an individual seeks to establish an ABLE account, the qualified ABLE program must obtain verification from the individual, signed under penalties of perjury, that the individual neither knows nor has reason to know that the eligible individual for whom the ABLE account is being established has an existing ABLE account, other than an account the assets of which will be rolled over or transferred to the new account in a program-to-program transfer. As noted previously, an eligible individual is not prohibited from establishing an ABLE account merely because he or she was the designated beneficiary of an ABLE account that has been closed.

Some commenters asked whether any penalty would be imposed on a qualified ABLE program that allows an individual to establish an ABLE account on the basis of such certification if the same eligible individual in fact does have a preexisting ABLE account. The Treasury Department and the IRS note that, in such an instance, no penalty would be imposed on the qualified ABLE program as long as the program has complied with all of the

requirements of the regulations, including in obtaining the necessary certifications. As noted earlier in this section, if all of the contributions to the additional account are returned timely, the additional account will be treated as an ABLE account.

C. Definition of One Account

Several commenters asked that the final regulations allow for the establishment of one or more sub-accounts under a master account of a single designated beneficiary, and that the master account (including all of its sub-accounts) would constitute a single ABLE account. Each sub-account would have a different individual with signature authority and discretion to direct the investments in that sub-account, provided that all of the sub-accounts are treated as one account for Federal tax and Federal means-tested benefit purposes. These commenters expressed concern that, if qualified ABLE programs are not given the discretion to allow sub-accounts, fewer individuals would be willing to contribute to a designated beneficiary's account because they would not have control over the manner in which the contributions were invested or used for the designated beneficiary. Another commenter expressed concern that allowing sub-accounts could increase program costs.

The Treasury Department and the IRS view the ability of a program to allow different individuals to establish and have signature authority over separate sub-accounts under one master account as being contrary to the only-one-account rule under section 529A. Therefore, the final regulations do not permit the kind of arrangement described in the preceding paragraph.

However, the final regulations do permit, but do not require, an ABLE program to allow the establishment of sub-accounts within the sole ABLE account of the designated beneficiary. Such a sub-account could be authorized by either the designated beneficiary or the person with signature authority over the ABLE account. The signatory over the ABLE account has sole authority over the investment of the ABLE account, but the final regulations permit a program to allow the creation and maintenance of separate funds within that account, each to be used for one or more types of expenditures and from which distributions may be authorized by a person other than the signatory. For example, a designated beneficiary may authorize a parent to open and administer the ABLE account, but also may authorize the maintenance of a particular sub-account to be used for the

purchase of the designated beneficiary's groceries and entertainment expenses on an ongoing basis, and from which the designated beneficiary (or a named sibling, for example) may make distributions for that purpose. Thus, different persons may be authorized to make distributions from different sub-accounts. All sub-accounts are aggregated as part of the one ABLE account for all other purposes, including, without limitation, the contributions limits, limit on the number of permissible investment direction changes, tax provisions, and reporting requirements.

D. Eligible Individual

At the time an ABLE account is established, the designated beneficiary of the account must provide evidence that he or she is an "eligible individual." Consistent with section 529A(e)(1), the 2015 proposed regulations provided that an individual is an eligible individual for a taxable year if he or she is either (i) entitled during that year to benefits based on blindness or disability under title II or XVI of the Social Security Act, provided that such blindness or disability occurred before the date on which the individual attained age 26, or (ii) the subject of a disability certification filed with the Secretary of the Treasury or his delegate (Secretary) for that year.

The final regulations, like the 2015 proposed regulations, provide that the determination that an individual is an eligible individual is made each taxable year and applies for the entire year. The final regulations, like the 2015 proposed regulations, provide that a qualified ABLE program must specify the documentation that an individual must furnish, both at the time an account is established and thereafter, to ensure that the designated beneficiary of the ABLE account is, and continues to be, an eligible individual.

A few commenters requested clarification as to whether an ABLE account may be established for an individual with a mental illness. The Treasury Department and the IRS note that the statute does not differentiate between a mental or physical condition, and the final regulations retain the language from § 1.529A-2(e)(1)(i)(A) of the 2015 proposed regulations that provides that a mental impairment can meet the requirements for a disability certification.

One commenter asked whether a qualified ABLE program could narrow the types of physical or mental impairments that would satisfy the requirements to be an eligible individual to specific disabilities, such

as developmental disabilities. The Treasury Department and the IRS concluded that the statute does not permit a qualified ABLE program to discriminate on the basis of the nature of the disability, and that Congress intended that all individuals meeting the definition of an eligible individual under section 529A have access to an ABLE account, regardless of the nature of the individual's disability. Therefore, a qualified ABLE program may not narrow the definition of an eligible individual by limiting the types of disabilities that can be considered.

The Treasury Department and the IRS considered whether to retain the term "entitled" for purposes of the definition of an eligible individual under section 529A(e)(1)(A). To clarify the definition of "eligible individual" under section 529A(e)(1)(A) and its use of the word "entitled", the final regulations retain the term "entitled" as provided in the statute, interpret it to include eligibility for SSI benefits, and define the term "eligible individual" to include an individual who either is receiving SSI benefits based on blindness or a disability that occurred before age 26 or is a person whose entitlement to such benefits has been suspended due solely to excess income or resources.

A few commenters suggested that establishing an individual's eligibility should be the obligation of the Treasury Department or the SSA and should not be a burden shifted to the qualified ABLE programs. In addition, one commenter requested that a defined term, "qualified proxy," be added to the regulations to clarify the procedures for establishing eligibility based on the individual's entitlement to SSI or SSDI benefits. Such a certification would be signed under penalties of perjury by the designated beneficiary or a "qualified proxy" who would certify as to the beneficiary's entitlement to these benefits during the applicable tax year and as to the onset of blindness or disability prior to age 26. The commenter also suggested that the certification either be accompanied by a copy of a letter from the SSA confirming eligibility for such benefits or reference the existence of such a letter and specifying the date of that letter. The commenter suggested allowing a qualified ABLE program to rely on an SSA certification for purposes of determining whether an individual is an eligible individual based on blindness or disability under title II or XVI of the Social Security Act. Other commenters recommended that the applicant be asked to certify the date of the most recent SSA benefit entitlement letter or to show some easily available proof,

which the commenters suggested could be verified through electronic data matches between the IRS and the SSA.

The Treasury Department and the IRS agree that a certification-based process regarding eligibility by reason of entitlement to benefits based on blindness or disability under title II or XVI of the Social Security Act is the simplest way to facilitate the establishment of ABLE accounts without unduly burdening individuals, the program, the IRS, or the SSA. Additionally, the Treasury Department and the IRS concluded that it would be in everyone's best interests to permit an eligible individual to establish an ABLE account without experiencing the delay that would result from having to wait for the acceptance or approval of a certification by a government agency. Therefore, consistent with Notice 2015–81, the final regulations provide that a qualified ABLE program may establish entitlement with a certification, under penalties of perjury, by the individual establishing the ABLE account that the designated beneficiary of that account is eligible for benefits under title II or XVI of the Social Security Act and that the blindness or disability that qualifies the designated beneficiary for those benefits occurred before the date on which he or she attained age 26.

The other method of satisfying the definition of an eligible individual is by obtaining a disability certification and filing it with the Secretary. Consistent with section 529A(e)(2)(A), the 2015 proposed regulations provided that a disability certification is a certification deemed sufficient by the Secretary, signed under penalties of perjury, that an individual has a severe physical or mental impairment that can be expected to result in death or that has lasted (or can be expected to last) for a continuous period of not less than 12 months, or that the individual is blind, and that the blindness or impairment occurred before age 26, which certification is accompanied by a copy of a physician's diagnosis relating to the blindness or impairment. One commenter asked that the final regulations clarify that a disability certification that meets the requirements of the final regulations will be "deemed sufficient by the Secretary." The Treasury Department and the IRS agree, and the final regulations affirm that a certification that meets the requirements of a disability certification as set forth in the final regulations is sufficient to establish the requisite level of physical or mental impairment described in § 1.529A–2(e)(2).

The final regulations, like the 2015 proposed regulations, also provide that

a disability certification is deemed to be filed with the Secretary once the qualified ABLE program has received the disability certification or a disability certification is deemed to have been received under the rules of the qualified ABLE program, about which receipt the qualified ABLE program must file information with the IRS.

As was stated in Notice 2015–81, numerous commenters, including States and potential qualified ABLE program administrators, expressed concerns about their responsibilities and potential liabilities for receiving and safeguarding medical information contained in a signed diagnosis, particularly because they do not anticipate having the expertise or ability to evaluate that medical information. The commenters emphasized that qualified ABLE programs would incur unmanageable costs and burdens in trying to comply with applicable laws imposing system and other requirements on those in possession of medical records, as well as in implementing systems to receive and store paper documentation. The commenters also expressed the concern that, if these costs and burdens are not minimized, some States might not proceed with the implementation of qualified ABLE programs for their residents. The commenters recommended that a qualified ABLE program be permitted to establish an ABLE account on the basis of a certification by the person establishing the ABLE account, signed under penalties of perjury, that the individual who is to be the designated beneficiary of the account has a qualifying condition and otherwise satisfies the definition of an eligible individual, and that a diagnosis signed by a physician regarding the relevant impairment or impairments has been obtained. To facilitate the establishment of qualified ABLE programs by the States, commenters requested interim guidance addressing the issue.

After consideration of these comments, the Treasury Department and the IRS issued Notice 2015–81, stating that a certification under penalties of perjury that the individual (or the individual's agent under a power of attorney or legal guardian of the individual) has a signed physician's diagnosis, and that the signed diagnosis will be retained and provided to the qualified ABLE program or the IRS upon request, would be adequate under the final regulations to satisfy the requirements pertaining to the filing of a disability certification to establish eligibility for an ABLE account.

One commenter stated that the degree of flexibility given to each state with respect to the specific documentation that will need to be filed to establish proof of eligibility will place an undue burden on the process and will create confusion within the disability community. This commenter and others asked that the IRS provide standard forms to document eligibility. Another commenter recommended that the final regulations establish a maximum amount of required information and documentation to make it easier for those attempting to establish an ABE account to ensure they have everything required. Other commenters asked that qualified ABE program administrators be required to collect only information concerning the basis of eligibility and a statement that the blindness or disability occurred before age 26. These commenters recommended the use of an application with “check-off” boxes allowing the applicant to indicate whether his or her eligibility for an ABE account is based on SSI eligibility, SSDI eligibility, or the filing of a disability certification. The commenters would require the eligible individual to maintain records and documentation supporting the category of eligibility indicated on the application form, and to sign the application form under penalties of perjury.

The Treasury Department and the IRS understand and appreciate the benefits of a consistent and predictable disability documentation process, while recognizing that a qualified ABE program should be accorded the flexibility to meet its own particular needs. Therefore, consistent with Notice 2015–81, the Treasury Department and the IRS added a safe harbor to the final regulations. The safe harbor provides that a qualified ABE program may establish that an individual is an eligible individual if the individual (or the person with authority to establish that individual’s account) certifies under penalties of perjury: (i) The basis for the individual’s status as an eligible individual under § 1.529A–1(b)(8) (entitlement for benefits based on blindness or disability under title II or XVI of the Social Security Act, or a disability certification); (ii) that the individual is blind or has a medically determinable physical or mental impairment as described in the final regulations; (iii) that such blindness or disability occurred before the date on which the individual attained age 26 (and, for this purpose, an individual is deemed to attain age 26 on his or her 26th birthday); (iv) if the basis of the

individual’s eligibility is a disability certification, that the individual has obtained and will retain a copy of the written diagnosis relating to the disability, accompanied by the name and address of the diagnosing physician and the date of the written diagnosis; (v) that the individual has provided the applicable diagnostic code from those listed on Form 5498–QA that applies with respect to the designated beneficiary’s disability; (vi) that the person establishing the account is the individual who will be the designated beneficiary of the account or is the person authorized under § 1.529A–2(c)(1)(i) to establish the account; and (vi) if required by the qualified ABE program, that the individual has provided the information from a physician as to the categorization of the disability that may be used to determine, under the particular State’s program, the appropriate frequency of required recertifications.

A few commenters, observing that persons with developmental disabilities are often diagnosed by licensed psychologists, clinical therapists, or certified vocational rehabilitation counselors, requested that the final regulations authorize such professionals to sign the individual’s diagnosis. While the Treasury Department and the IRS understand the commenters’ concerns, the final regulations do not incorporate these suggestions. Section 529A(e)(2)(A)(ii) requires the individual’s diagnosis to be signed by a physician meeting the criteria of section 1861(r)(1) of the Social Security Act, which means a doctor of medicine or osteopathy, a doctor of dental surgery or dental medicine, and, for some purposes, a doctor of podiatric medicine, a doctor of optometry, or a chiropractor.

In the case of a program-to-program transfer, several commenters requested that the final regulations allow the recipient qualified ABE program to assume at the time of the transfer (in reliance on the obligations of the transferor program) that the designated beneficiary of the recipient ABE account is an eligible individual. The final regulations do not incorporate this suggestion because the Treasury Department and the IRS concluded that the obligation of a qualified ABE program to establish an account only for an eligible individual is not delegable. Thus, the same requirements for establishing an ABE account apply, regardless of whether the account is funded initially with a program-to-program transfer or otherwise, including permitting a qualified ABE program to allow the designated beneficiary to

certify that he or she is an eligible individual.

E. Disability Standard

As directed in the ABE Act, the Treasury Department and the IRS consulted with the Commissioner of Social Security in developing the medical standards relating to disability certifications and determinations of disability. The final regulations, like the 2015 proposed regulations, provide that a person signing (under penalties of perjury) a disability certification with respect to an individual is certifying that such individual has a medically determinable physical or mental impairment that results in marked and severe functional limitations and that can be expected to result in death or has lasted or can be expected to last for a continuous period of not less than 12 months, or is blind. The disability certification also is a certification that such blindness or disability occurred before the date on which the individual attained age 26.

Consistent with section 529A(e)(2)(A), the 2015 proposed regulations defined the phrase “marked and severe functional limitations” as the standard of disability in the Social Security Act for children claiming benefits under the SSI program based on disability, but without regard to the age of the individual. Citing 20 CFR 416.906, the 2015 proposed regulations clarified that this definition refers to a level of severity of an impairment that meets, medically equals, or functionally equals the listings in the Listing of Impairments in appendix 1 of subpart P of 20 CFR part 404. An impairment is medically equivalent to a listing if it is at least equal in severity and duration to the severity and duration of any listing. An impairment that does not meet or medically equal any listing may result in limitations that functionally equal the listings if it results in marked limitations in two domains of functioning or an extreme limitation in one domain of functioning, as explained in 20 CFR 416.926a. Several commenters commended the proposed regulation’s use of this disability standard, saying that it achieves the intended statutory result.

One commenter questioned whether physicians would accurately interpret and apply the standard, and asked whether training for physicians would be provided. The Treasury Department and the IRS note that, while the physician is to provide the diagnosis, it is the designated beneficiary or other person establishing the ABE account who is responsible for certifying satisfaction of the standard of medical

disability, so no special training of physicians by the SSA, the Treasury Department, or the IRS is contemplated.

A few commenters noted that the definition of “marked and severe functional limitations” under 20 CFR 416.906 includes the statement that “if you file a new application for benefits and you are engaging in substantial gainful activity, we will not consider you disabled.” These commenters questioned whether that statement suggests that a person is disqualified from having an ABLÉ account if he or she is gainfully employed. The Treasury Department and the IRS agree that the citation to the SSI regulation, without any further clarification, may lead to confusion. Therefore, the final regulations adopt the proposed regulation’s definition of “marked and severe functional limitations,” but also provide that the standard of disability under section 529A is applied without regard to either the individual’s age or whether the individual is engaged in substantial gainful activity.

Some commenters requested that the final regulations provide that a person who does not meet the definition of an eligible individual before attaining age 26, but who subsequently will develop blindness or a disability of sufficient severity to satisfy that definition as a result of either a genetic disorder present at birth or a condition that is diagnosed before attaining age 26 may qualify as an eligible individual. One commenter asserted that such an individual should be allowed to prepare for a known future disability by establishing an ABLÉ account. The Treasury Department and the IRS also have considered whether such an individual should be able to qualify as an eligible individual once the disorder or condition causes blindness or a disability of sufficient severity. While sympathetic to this request, the Treasury Department and the IRS concluded that the statutory requirement that the blindness or disability have “occurred” before age 26 is not consistent with the broader interpretations requested or considered. There is no indication in the statute or legislative history of the ABLÉ Act that Congress intended to permit what could be a significant expansion of the definition of an eligible individual by including a person who may never develop the disability or whose condition is cured or significantly alleviated by subsequent medical discoveries. Accordingly, the final regulations do not incorporate this suggested change.

The 2015 proposed regulations provided that a condition listed in the

“List of Compassionate Allowances Conditions” maintained by the SSA (currently at www.socialsecurity.gov/compassionateallowances/conditions.htm) would be deemed to meet the requirements of a condition sufficient for a disability certification without a physician’s diagnosis if the condition was present before the date on which the individual attained age 26. In the preamble to the 2015 proposed regulations, the Treasury Department and the IRS requested comments on other conditions that might also be deemed sufficient for a disability certification without the need of a physician’s diagnosis.

Some commenters proposed that a few additional specific conditions should be treated similarly as qualifying disabilities. One commenter suggested that three additional types of spinal muscular atrophy, a permanent disability that can occur after age 26, should so qualify, in addition to the two types already on the List of Compassionate Allowances Conditions. Another commenter suggested that polymicrogyria qualifies under certain conditions, while yet another commenter pointed out that autism is typically a lifelong condition. One commenter suggested that the regulations incorporate what was described as the “non-exhaustive list of impairments presumed to be disabilities under the updated EEOC Title I regulations of the Americans with Disabilities Act (76 FR 16978).” While sympathetic to the suggestions of these commenters, the Treasury Department and the IRS are not qualified to make the kind of decisions that are made by the SSA when compiling the List of Compassionate Allowances Conditions. For that reason, the final regulations adopt the provision in the 2015 proposed regulations without change. The Treasury Department and the IRS note that the SSA periodically updates the List of Compassionate Allowances Conditions, so these commenters may want to consider approaching the SSA with their requests. The Office of Disability Policy maintains a website and email box for soliciting and evaluating compassionate allowance condition submissions from the public at https://www.ssa.gov/compassionateallowances/submit_potential_cal.html.

F. Recertification

The 2015 proposed regulations provided that a qualified ABLÉ program could choose different methods of ensuring a designated beneficiary’s status as an eligible individual. That might include, for example, imposing

different periodic recertification requirements for different types of impairments, taking into consideration whether an impairment is incurable and the likelihood that a cure may be found. The 2015 proposed regulations explained that, while a qualified ABLÉ program generally must require an annual recertification that the designated beneficiary continues to satisfy the definition of an eligible individual, it may deem an annual recertification to have been provided in appropriate circumstances. For example, a qualified ABLÉ program could deem a one-time certification by an individual that he or she has a permanent disability as meeting the annual recertification requirement in subsequent years. In other cases, a program could require the same evidence that is required of an initial disability certification, or could incorporate some other method of ensuring that the designated beneficiary continuously qualifies as an eligible individual.

While most commenters supported the flexibility accorded qualified ABLÉ programs to impose different periodic recertification requirements for different types of impairments, several commenters recommended that there be as much uniformity among qualified ABLÉ programs as possible. Some of these commenters asked that the final regulations identify those illnesses or disabilities for which there is no known cure and then excuse them from any recertification requirement. Many of these commenters requested that the form used to establish the ABLÉ account contain a box for the diagnosing physician to check if the disability is unlikely to change within five years, and require recertification only every five years thereafter. Other commenters suggested that there be a uniform certification form with which a physician could certify that an individual’s impairment is unlikely to improve, in which case the certification would be effective for a certain number of years (for example, 5 years or longer), after which time a new certification form could be filed for an additional number of years. Some commenters suggested that the certification of a “permanent,” “incurable,” or “severe and sustained” disability should be effective for a longer period of time than the certification of a “moderate” or “curable” disability, or that the disability be classified as “severe”, “moderate”, or “mild” with a different recertification frequency for each, and that those classifications would be certified when the account is

established. Some commenters suggested that there be a presumption of continued eligibility until the designated beneficiary notifies the qualified ABLE program of his or her ineligibility. Other commenters suggested that recertification be waived as long as the designated beneficiary's SSDI or SSI benefits qualify him or her for an ABLE account, while still other commenters requested that the annual recertification requirement be waived for anyone with an incurable illness or disability. One commenter suggested that the IRS partner with the SSA to maintain lists of recertification criteria. Other commenters pointed out that recertification may be too burdensome.

The final regulations retain the rule set forth in the 2015 proposed regulations that a determination of eligibility must be made annually unless the qualified ABLE program adopts a different method of ensuring a designated beneficiary's continuing status as an eligible individual. This gives each qualified ABLE program broad discretion to devise its own recertification methods. This provision is broad enough to permit many of the approaches suggested by commenters, other than the suggestions regarding the elimination of the recertification requirement entirely. The final regulations specify that a permissible method may include a certification by the designated beneficiary under penalties of perjury.

The final regulations, like the 2015 proposed regulations, also provide that even if a qualified ABLE program imposes an enforceable obligation on the designated beneficiary or other person with signature authority over the ABLE account to report promptly any changes in the designated beneficiary's condition that would disqualify the designated beneficiary as an eligible individual, the qualified ABLE program may provide that a certification is valid until the end of the taxable year in which the change in the designated beneficiary's condition occurred. One commenter asked for clarification that a qualified ABLE program that adopts this approach will not be deemed to be noncompliant with the annual recertification requirement for any year in which the designated beneficiary is no longer an eligible individual but fails to report a change in status to the program. The final regulations confirm that a qualified ABLE program that is compliant with the rules regarding recertification will not cease to be a qualified ABLE program if the designated beneficiary fails to report a change in status.

G. Change in Eligible Individual Status

The Treasury Department and the IRS recognize that there will be instances when an individual's impairment abates to the point that the individual no longer qualifies as an eligible individual, either temporarily or permanently. The 2015 proposed regulations provided that an existing ABLE account will remain the ABLE account of the designated beneficiary even during years in which the designated beneficiary does not qualify as an eligible individual. However, the 2015 proposed regulations also provided that, beginning with the year immediately following the year in which that qualification ceases, no additional contributions may be made into that ABLE account. The final regulations preserve these rules. However, the 2015 proposed regulations provided that, beginning with that same year, no amounts incurred would constitute a qualified disability expense, regardless of the nature of that expense. As explained in the following paragraphs, the final regulations continue to provide that, in this event, no expense will constitute a qualified disability expense, but further provide that this rule applies at all times when the designated beneficiary does not qualify as an eligible individual, including during the portion of the year remaining after that eligibility has been lost.

One commenter asked whether the ABLE account could be used to pay for medical treatments that may be necessary to sustain the designated beneficiary's improved condition. Another commenter asked whether distributions from the ABLE account to pay for medically necessary procedures of a designated beneficiary who is not an eligible individual are subject to tax. One commenter suggested that an ABLE account should be closed if the designated beneficiary of the account no longer has the qualifying blindness or disability, and that the designated beneficiary then should be subjected to long term capital gains tax on the income portion of any remaining funds in that ABLE account, possibly payable over more than a single year.

A condition in remission subsequently can become active, so it is possible that the designated beneficiary could again satisfy the definition of an eligible individual in the future. In addition, even though a designated beneficiary may fail to qualify as an eligible individual for purposes of section 529A, that person still may be relying on public benefits that could be lost if the ABLE account were to lose its

special exclusion under section 103 of the ABLE Act. For these reasons, the Treasury Department and the IRS concluded that it is appropriate to preserve the ABLE account for the benefit of the designated beneficiary, even after the designated beneficiary fails to qualify as an eligible individual, in case he or she once again becomes an eligible individual. Therefore, like the 2015 proposed regulations, the final regulations provide that, for any year during which a designated beneficiary no longer satisfies the definition of an eligible individual, his or her ABLE account remains an ABLE account, to which all of the non-tax provisions of the ABLE Act continue to apply, and to which all of the tax provisions continue to apply except as otherwise provided with regard to contributions and the tax treatment of distributions. The ABLE account does not have to terminate, and there is no deemed distribution of the account balance for tax purposes. Beginning on the first day of the designated beneficiary's first taxable year following the year in which the designated beneficiary no longer satisfies the definition of an eligible individual, no contributions to the ABLE account may be accepted by the qualified ABLE program. In addition, expenses will not be qualified disability expenses if they are incurred at a time when a designated beneficiary is neither an individual with a disability nor blind within the meaning of § 1.529A-1(b)(8)(i) or § 1.529A-2(e)(1)(i), even if the individual remains an eligible individual through the end of the year in which the individual ceases to be disabled or blind. Therefore, although distributions still may be made from an ABLE account to pay the expenses of the designated beneficiary incurred during periods when the designated beneficiary is no longer blind or disabled, none of those expenses are qualified disability expenses and thus the earnings included in those distributions are includible in the gross income of the designated beneficiary. If the designated beneficiary subsequently requalifies as an eligible individual, contributions to the designated beneficiary's ABLE account again will be allowed, subject to the annual contribution limit under section 529A(b)(2)(B) and the aggregate contribution limit under section 529A(b)(6), and expenses again may constitute qualified disability expenses.

3. Contributions to an ABLE Account

A. Source and Nature

Like the 2015 proposed regulations, the final regulations provide that any

person may make contributions to an ABLE account, subject to annual and aggregate contribution limits. One commenter suggested that the final regulations explicitly define the word “person” with reference to the definition of “person” under section 7701. Another commenter requested clarification that contributors to an ABLE account may include charitable organizations described in section 501(c)(3) of the Code, as well as special needs trusts as described in 42 U.S.C. 1396p(d)(4) that can be excluded from a person’s assets for purposes of eligibility for certain Medicaid benefits. The Treasury Department and the IRS note that the definition of “person” in section 7701 applies throughout the Code unless explicitly provided otherwise or where manifestly incompatible with the statutory intent and is thus applicable in this context. The Treasury Department and the IRS also note that a “person” under section 7701 includes both trusts and tax-exempt organizations. Accordingly, an express statement in the regulatory text is not necessary to achieve the commenter’s purpose. Therefore, the final regulations do not adopt these comments.

Like the 2015 proposed regulations, the final regulations provide that all contributions to an ABLE account must be made in cash, and that a qualified ABLE program may accept contributions in the form of cash, check, money order, credit card payment, electronic transfer, or other similar method of payment. Many commenters urged that the final regulations continue to allow a qualified ABLE program to accept contributions by credit card, and the final regulations do so. One commenter asked that the final regulations clarify that a qualified ABLE program may accept payroll deductions. The final regulations accordingly clarify that cash contributions may be made as after-tax payroll deductions.

One commenter asked that the final regulations clarify that a qualified ABLE program may accept contributions directly from a corporation, and that employers may contribute to the ABLE accounts of their employees through matching contribution programs. The Treasury Department and the IRS note that the final regulations provide that a qualified ABLE program may accept contributions in the form of after-tax payroll deductions and do not prohibit other forms of contributions from a corporation or employer. However, it is important to remember that contributions made by an employer to the ABLE account of its employee or of a family member of the employee are

subject to the rules governing the taxation of compensation. The final regulations also clarify that the rules concerning the tax treatment of contributions to an ABLE account apply only for purposes of section 529A. No inference is intended with respect to the tax treatment of amounts contributed to ABLE accounts for other purposes of the Code, such as the tax treatment of compensation.

Several commenters requested that certain contributions be allowed without regard to other applicable tax provisions. For example, one commenter suggested that a parent be allowed to withdraw assets from his or her IRA and contribute the assets to his or her child’s ABLE account free of income tax on the IRA withdrawal. Although there is no limit on the permissible sources of contributions to an ABLE account, the regulatory authority of the Treasury Department and the IRS does not extend to negating the tax consequences that otherwise are applicable to amounts used to make contributions.

B. Annual and Aggregate Contribution Limits

Consistent with section 529A(b)(2)(B), the 2015 proposed regulations provided that the total amount of contributions to an ABLE account during the designated beneficiary’s taxable year (excluding rollovers and program-to-program transfers) could not exceed the section 2503(b) gift tax annual exclusion amount (\$14,000 in 2015, 2016, and 2017 and \$15,000 in 2018, 2019, and 2020) (annual contribution limit). Although section 529A was effective for taxable year 2015, no qualified ABLE programs were operational in 2015. Several commenters asked that the final regulations allow a “make-up” contribution for 2015 to be made in 2016, so that, for 2016 only, the total amount that may be contributed to an ABLE account is \$28,000. Setting the 2016 contribution limit at \$28,000, these commenters said, would effectuate Congressional intent to enable eligible individuals to benefit from ABLE accounts beginning in 2015.

The final regulations do not incorporate this suggestion as the statute is explicit with regard to the annual contribution limit and does not permit a carryover. Section 529A(b)(2) states that, except in the case of a rollover, a qualified ABLE program may not accept a contribution to an ABLE account that would result in aggregate contributions from all contributors to the account for the taxable year exceeding the Federal gift tax exclusion amount in effect under section 2503(b) for that year.

One commenter asked that the final regulations expressly state that a change in the designated beneficiary of an ABLE account to a member of the family of the designated beneficiary effectuated without a rollover or program-to-program transfer is not a contribution subject to the annual contribution limit. The final regulations adopt this suggestion. The Treasury Department and the IRS view such a change of the designated beneficiary as the equivalent of a rollover or program-to-program transfer. Therefore, the annual contribution limit does not apply as long as the successor designated beneficiary is both an eligible individual and a sibling, stepsibling, or half-sibling of the designated beneficiary (collectively referred to as siblings).

Section 529A(b)(2) provides that, for purposes of applying the annual contribution limit imposed by that section, rules similar to the rules of section 408(d)(4), determined without regard to subparagraph (B) thereof, apply. Section 408(d)(4) generally provides that a distribution from an IRA is not taxable if it is the return of a contribution made during the taxable year, provided that the return of the contribution is received by the IRA owner on or before the due date (including extensions) of his or her income tax return for that year, and if the amount returned includes the earnings on the amount of the contribution. However, the earnings portion of the distribution is includible in the recipient’s gross income for the year in which the contribution was made.

One commenter suggested that the reference to section 408(d)(4) should be construed to calculate both the annual contribution limit and the aggregate contribution limit by not counting toward either limit the amount of each contribution withdrawn during that same year for qualified disability expenses. Under this view, total permissible contributions during any year would equal the sum of the annual contribution limit (currently \$15,000) and the total withdrawals during that year for qualified disability expenses, thus giving the designated beneficiary the ability to save amounts in the ABLE account in excess of what is needed for current expenses.

The final regulations do not incorporate this suggestion. The Treasury Department and the IRS concluded that the mere reference in section 529A(b)(2) to section 408(d)(4) cannot be read to increase the permissible annual contributions by the amounts distributed out of the ABLE account in the same year. The reference

to section 408(d)(4) provides a mechanism for correcting the receipt of a contribution in excess of the annual contribution limit. Under section 4973(h)(2), an excess annual contribution timely returned in accordance with the reference to section 408(d)(4) in section 529A(b)(2) is treated as an amount not contributed, and therefore avoids the imposition of a six percent excise tax under section 4973 on excess annual contributions that are not timely returned.

One commenter suggested that the final regulations should allow an individual's benefits under the SSI program to be directly deposited or otherwise transferred to the ABLE account of which the individual is the designated beneficiary, without being counted against the annual contribution limit. Another commenter suggested that, in applying the annual contribution limit, the final regulations should disregard the amount of certain other items deposited into an ABLE account, such as the payment of retroactive SSDI benefits, the proceeds from a personal injury lawsuit, or a family inheritance. Noting that large sums of money received as a result of a lawsuit settlement or inheritance are often placed in special needs trusts, the commenter also recommended that the final regulations permit transfers from a special needs trust to an ABLE account. Another commenter asked that the final regulations not treat any earned income of the designated beneficiary that is deposited into his or her ABLE account as a contribution subject to the annual contribution limit because such a transfer is not treated as a completed gift for Federal tax purposes.

The final regulations do not incorporate these suggestions. The statute does not differentiate between contributions based on their nature or source. The Treasury Department and the IRS concluded that the statute is properly interpreted to include all amounts contributed to an ABLE account for the benefit of the designated beneficiary (other than a rollover, program-to-program transfer, or pursuant to a change of designated beneficiary) as a contribution subject to the annual limit, regardless of the source of the funds contributed. The Treasury Department and the IRS note that section 529A does not prevent a transfer from a special needs trust to an ABLE account subject to the annual and aggregate contribution limits of sections 529A(b)(2)(B) and 529A(b)(6).

The 2015 proposed regulations provided that a qualified ABLE program is required to provide adequate safeguards to prevent aggregate

contributions on behalf of a designated beneficiary in excess of the limit established by the State on contributions to its qualified tuition program under section 529(b)(6) (aggregate contribution limit). The 2015 proposed regulations included a safe harbor providing that a qualified ABLE program satisfies the aggregate contribution limit requirement if it refuses to accept any additional contribution to an ABLE account once the balance in the account reaches that limit. Once the account balance falls below the aggregate contribution limit, additional contributions again may be accepted up to the aggregate contribution limit. The Treasury Department and the IRS concluded that this safe harbor and the permissible recommencement of contributions is appropriate based on the nature and purposes of a qualified ABLE program.

Most commenters were supportive of the proposed safe harbor, which is the same safe harbor in the proposed regulations addressing the cumulative limit on qualified tuition accounts under section 529. Some commenters also noted that the safe harbor would be consistent with the way most States administer their 529 programs, which would lower administrative costs. One commenter observed that the safe harbor avoids the disparities inherent in focusing solely on contributions, which penalizes savers experiencing financial market downturns while favoring those experiencing financial gains. Some commenters requested clarification that the safe harbor could be applied each time the account balance reaches the applicable limit, and is not limited to just one application. The final regulations, like the 2015 proposed regulations, provide that, once the account balance falls below the aggregate contribution limit, additional contributions again may be accepted, again subject to the aggregate contribution limit.

One commenter, however, expressed concerns that the proposed safe harbor, by substituting the account balance for the aggregate contribution limit, renders an ABLE account less attractive as a savings vehicle for the designated beneficiary. The commenter noted that earnings on contributions to the account may cause the account balance to reach the aggregate contribution limit long before aggregate contributions to the account rise to that limit. Therefore, the commenter recommended replacing the safe harbor in the 2015 proposed regulations with a six-month grace period during which a qualified ABLE program could identify and disgorge excess aggregate contributions.

The Treasury Department and the IRS are also concerned, however, with the opposite situation in which total contributions have reached the aggregate contribution limit but distributions and/or decreases in market value have reduced the account balance to below the aggregate contribution limit. In that case, without the safe harbor, all further contributions would be prohibited. Accordingly, the Treasury Department and the IRS continue to view the proposed safe harbor as potentially more favorable to the designated beneficiary than an approach focused on cumulative contributions. In addition, some commenters predicted that the safe harbor would reduce the administrative costs of qualified ABLE programs. Therefore, the final regulations retain the safe harbor provision but clarify that the safe harbor may be applied an unlimited number of times and that, once contributions recommence, they are subject to both the annual and aggregate contribution limits. The final regulations also change a cross-reference that caused some confusion among commenters.

The aggregate contribution limit is likely to be different for each qualified ABLE program because that limit is determined by the limit established by each particular State for contributions to its qualified tuition program under section 529(b)(6). One commenter asked that the final regulations permit rollovers and program-to-program transfers of amounts in excess of the transferee ABLE program's aggregate contribution limit if such amount does not exceed the aggregate contribution limit of the transferor ABLE program, or, if it does, that it exceeds that limit solely because of investment growth. The commenter suggested that the transferee ABLE program would reject additional contributions until the account balance falls below the aggregate contribution limit set by the transferee ABLE program. The final regulations adopt this suggestion and exclude rollovers, program-to-program transfers, and changes to a new designated beneficiary who is an eligible individual and a sibling of the former designated beneficiary for purposes of the aggregate contribution limit, provided that subsequent contributions are prohibited either under the general rule or the safe harbor. The Treasury Department and the IRS view this exclusion as consistent with the account balance safe harbor.

C. Additional Contribution Limit and Applicable Poverty Line

Consistent with the TCJA amendment to section 529A(b)(2)(B), the 2019 proposed regulations provided that an employed or self-employed designated beneficiary described in section 529A(b)(7) may contribute to his or her ABLE account the lesser of the designated beneficiary's compensation for the taxable year or an amount equal to the poverty line for a one-person household for the calendar year preceding the calendar year in which the designated beneficiary's taxable year begins.

Section 529A(b)(7)(B) provides that the term poverty line referred to in section 529A(b)(2)(B)(ii) has the same meaning given to that term by section 673 of the Community Services Block Grant Act (42 U.S.C. 9902). Consistent with the 2019 proposed regulations, the final regulations provide that the poverty line in section 529A(b)(7)(B) is to be determined by using the poverty guidelines updated periodically in the **Federal Register** by the U.S. Department of Health and Human Services under the authority of 42 U.S.C. 9902(2). Those guidelines vary based on locality. Specifically, there are three separate guidelines: (1) The contiguous 48 states and the District of Columbia, (2) Alaska, and (3) Hawaii. The 2019 proposed regulations provided that a designated beneficiary's contribution limit is to be determined using the poverty guideline applicable in the state of the designated beneficiary's residence.

One commenter suggested that the final regulations should provide that the poverty line on which the designated beneficiary's contribution limit is based should be uniform throughout the United States to avoid both confusion and an incentive for a move to a state with a higher poverty line. The Treasury Department and the IRS have concluded that the poverty guideline that most closely reflects the employed designated beneficiary's cost of living is the most relevant for determining the contribution limit, and that a move to a state with a higher poverty line generally also would subject the designated beneficiary to a higher cost of living, thus effectively negating any incentive to move. Therefore, consistent with the 2019 proposed regulations, the final regulations provide that a designated beneficiary's contribution limit is determined using the poverty guideline applicable in the state of the designated beneficiary's residence, and that an employed or self-employed designated beneficiary described in section 529A(b)(7) may contribute to his

or her ABLE account the lesser of the designated beneficiary's compensation for the taxable year or an amount equal to the poverty line for a one-person household for the calendar year preceding the calendar year in which the designated beneficiary's taxable year begins.

One commenter suggested that designated beneficiaries generally will not easily be able to determine the annual applicable poverty line and requested that the IRS require ABLE programs to provide notice to designated beneficiaries each year of the poverty line for each of the geographic areas applicable for that year. Two commenters also expressed concern about the statutory provision that makes the designated beneficiary responsible for ensuring that these contributions of compensation income do not exceed the applicable limit, and pointed out that an uncorrected excess contribution would be likely to jeopardize the designated beneficiary's qualification for public benefits on which the designated beneficiary relies. They suggested that supplemental information is needed to assist the designated beneficiaries and their advisors, and recommended that ABLE programs be required not only to provide annual updates on the applicable poverty limits, but also general information about the compensation contribution limit, as well as notice to each designated beneficiary when compensation contributions are approaching and/or have exceeded the applicable level, and when other contributions have reached the annual and cumulative limits. Finally, a commenter suggested that ABLE programs should allow ABLE beneficiaries to opt out of the compensation contribution limit to assist those designated beneficiaries who do not want to incur any risk of exceeding the applicable limit.

The final regulations do not incorporate these suggestions. The Treasury Department and the IRS note that the statute does not require qualified ABLE programs to provide any of the notices suggested by the commenter and, in fact, requires the designated beneficiary to be solely responsible for monitoring the increased limit. Furthermore, the Treasury Department and the IRS are concerned that requiring qualified ABLE programs to provide these notices would be unduly burdensome and would increase costs to the programs. Although the final regulations do not impose such notification requirements on qualified ABLE programs, the Treasury Department and the IRS acknowledge that it may be helpful and a real service

to designated beneficiaries if the ABLE programs would make this information available to designated beneficiaries, whether by information posted online or otherwise, and suggest that ABLE programs are free to provide such a service if they wish. Finally, the Treasury Department and the IRS note that, because making the additional contribution of the designated beneficiary's compensation income is voluntary, there is no need to opt out of the ability to make such a contribution.

Another commenter requested that the final regulations provide that an amount not in excess of the new compensation contribution limit may be contributed by a person other than the designated beneficiary. The commenter pointed out that many employed designated beneficiaries have to use their earned income to pay their living expenses, thus leaving little for saving in the ABLE account, and that, without such a provision, another person's gift to match the designated beneficiary's earned income would have to be made through the designated beneficiary's account, which could adversely impact qualification for public benefits. The Treasury Department and the IRS understand the potential problem but believe that such a provision would be contrary to the explicit language of the statute, requiring that such contributions be made by the designated beneficiary. Further, the legislative history of the TCJA, like the statute, explicitly states that additional amount must be contributed by the designated beneficiary. See H.R. Rep. No. 115-466, at 329 (2017) (Conf. Rep.). Therefore, the final regulations do not incorporate this suggestion.

The commenter also requested confirmation that a direct deposit of the designated beneficiary's compensation income to his or her ABLE account is a contribution "by" the designated beneficiary, as well as confirmation that contributions subject to the new compensation contribution limit do not have to be made from the designated beneficiary's compensation income. The Treasury Department and the IRS agree. Money is fungible. In addition, the statute does not require that the contributions come from the designated beneficiary's earned income; rather, the designated beneficiary's earned income is one measure used to determine the additional contribution limit applicable to an employed designated beneficiary's own contributions. The final regulations clarify these two points.

One commenter asked whether a designated beneficiary's compensation contributions count towards the compensation contribution limit even if

the annual contribution limit has not been reached. If the new limit on compensation contributions has been reached, the designated beneficiary may continue to make additional contributions until the annual or cumulative contribution limits have been reached. The Treasury Department and the IRS believe each qualified ABLE program has the flexibility to determine how to identify contributions from the designated beneficiary that are compensation contributions subject to the new contribution limit.

Finally, one commenter requested clarification that, although contributions to and distributions from an ABLE account generally are not taken into account in determining the designated beneficiary's qualification for certain public benefits, the earned income of a designated beneficiary that is deposited into his or her ABLE account nevertheless is earned income and, as such, may be counted in calculating "substantial gainful activity" of the designated beneficiary which, regardless of its deposit into an ABLE account, may have an impact for purposes of determining the designated beneficiary's qualification for those benefits. This is not a tax issue and thus is beyond the scope of these regulations.

D. Application of Gift Tax and GST to Contributions to an ABLE Account

Contributions to an ABLE account are completed gifts to the designated beneficiary of that ABLE account. Gift tax consequences may arise from a contribution to an ABLE account even though the aggregate amount of contributions to that ABLE account from all contributors must not exceed the annual exclusion amount under section 2503(b) applicable to any single contributor. For example, if a contributor makes gifts to an individual in addition to that contributor's contributions to the same individual's ABLE account, the contributor's total gifts to such individual in that year could give rise to a gift tax liability.

Contributions can be made by any person. The term *person* is defined in section 7701(a)(1) to include an individual, trust, estate, partnership, associations, company, or corporation. Therefore, for purposes of section 529A(b)(1)(A), a person includes an individual as well as each of the entities described in section 7701(a)(1). Although under section 2501(a)(1), the gift tax applies only to gifts by individuals, it applies to gifts made directly or indirectly. As a result, a gift made by a trust, estate, association, company, corporation, or partnership is treated for gift tax purposes as having

been made by the owner(s) of that entity. For example, a gift from a corporation to a designated beneficiary is treated as a gift from the shareholders of the corporation to the designated beneficiary. See § 25.2511-1(h)(1). Accordingly, the final regulations adopt unchanged the provisions of the 2015 proposed regulations and provide that, for purposes of section 529A, a contribution by a corporation is treated as a gift by its shareholders and a contribution by a partnership is treated as a gift by its partners. This rule also applies to trusts, estates, associations, and companies. See section 2511 and § 25.2511-1(c) and (h).

The legislative history of section 529A suggests that a "person" described in section 529A(b)(1)(A) who can make contributions to an ABLE account includes the designated beneficiary of an ABLE account. See 160 Cong. Rec. H7051, H8317, H8318, H8321, H8322 (2014). A person may transfer his or her own funds into an ABLE account of which that person is the designated beneficiary. Because an individual cannot make a gift to himself or herself, the final regulations, like the 2015 proposed regulations, provide that no contribution by a designated beneficiary to his or her own ABLE account is treated as a completed gift. See § 25.2511-2(b) and (c).

However, because the statute contemplates that the funds being deposited into an ABLE account are taxable gifts, and the contributions from the designated beneficiary into his or her own ABLE account were never treated as completed gifts to the designated beneficiary, the 2015 proposed regulations provided that, notwithstanding section 529A(c)(2)(C), which makes gift and GST taxes inapplicable to the change of beneficiary of an ABLE account if the transferee is both an eligible individual and a sibling of the former designated beneficiary, if the designated beneficiary transfers the funds in the account to any other person, including a sibling, the designated beneficiary making the transfer is the donor for gift tax purposes and the transferor for GST tax purposes to the extent of the funding provided by that designated beneficiary and the accumulated earnings thereon. Although the provisions of section 529A(c)(2)(C) would appear to apply to exclude the balance of the account from gift and GST taxes if the transfer was to a sibling, one commenter asked why, in that case, the entire value of the account would not be a taxable gift. That commenter also objected to requiring ABLE programs to track contributions

from the designated beneficiary for this purpose as being too burdensome.²

In light of these comments, the Treasury Department and the IRS have reconsidered the approach of the 2015 proposed regulations, taking into account the comments describing the burden of separately tracking contributions from the designated beneficiary. The final regulations balance the treatment of contributions as a completed gift and the exclusion of gifts to a sibling of the designated beneficiary by taking the least burdensome approach, as requested by these commenters. Specifically, even though the portion of the account attributable to contributions from the designated beneficiary is the only part of the ABLE account that was not previously treated as a gift, the designated beneficiary is the owner of the entire account and the gift and GST tax properly applies to the entire account when there is a change of designated beneficiary, but those taxes are inapplicable if the new designated beneficiary is a sibling of the former designated beneficiary. Making this change makes it unnecessary for a qualified ABLE program to separately track contributions made by the designated beneficiary. The final regulations reflect this change.

E. Return of Excess Contributions and Excess Aggregate Contributions

The 2015 proposed regulations define an "excess contribution" as the amount by which the amount contributed during the taxable year of the designated beneficiary to an ABLE account exceeds the limit in effect under section 2503(b) (the gift tax annual exclusion amount) for the calendar year in which the taxable year of the designated beneficiary begins (annual contribution limit). The 2015 proposed regulations defined an "excess aggregate contribution" as the amount contributed during the taxable year of the designated beneficiary that causes the total amount

² Another commenter stated that requiring a qualified ABLE program to assign "earnings attributable to that contribution" would require the qualified ABLE program to track specific tax lots for each contribution, which would be unduly burdensome. Therefore, the commenter recommended that the phrase "any earnings attributable to that contribution" be deleted. It is not correct that earnings would have to be tracked to meet such a requirement, as the rules for calculating earnings attributable to a contribution would not need to require tracking earnings on a particular investment but could be based on the proportionate increase in value of the account over the relevant period. See § 1.408-11. However, given that the Treasury Department and the IRS agree that the entire account would be a taxable gift, it is not necessary to calculate earnings attributable to a contribution.

contributed since the establishment of the ABLE account to exceed the limit in effect under section 529(b)(6) or, in the context of the safe harbor, a contribution that causes the account balance to exceed the limit in effect under section 529(b)(6) (aggregate contribution limit).

Consistent with section 529A(c)(3)(C), the 2015 proposed regulations provided that, if an excess contribution or an excess aggregate contribution is deposited into or allocated to the ABLE account of a designated beneficiary, a qualified ABLE program would be required to return that excess contribution or excess aggregate contribution, along with all net income attributable to the excess amount, to the person or persons who made the contribution. The 2015 proposed regulations provided rules for determining the net income attributable to a contribution made to an ABLE account, and also provided that excess contributions and excess aggregate contributions must be returned to their contributors on a last-in-first-out (LIFO) basis. The 2015 proposed regulations also required that a returned contribution be received by the contributor on or before the due date (including extensions) for the Federal income tax return of the designated beneficiary for the taxable year in which the excess contribution or excess aggregate contribution was made. Failure to return an excess contribution within that time period will result in the imposition on the designated beneficiary of a 6 percent excise tax under section 4973(a)(6) on the amount of the excess contribution. See section 4973(a)(6) and (h)(2). However, the 2015 proposed regulations impose an affirmative obligation on the qualified ABLE program to ensure that these excess contributions are returned on a timely basis so that the excise tax never will be imposed on the designated beneficiary.

The 2015 proposed regulations also provided that, if an excess contribution or excess aggregate contribution and the net income attributable to such contribution are returned to a contributor other than the designated beneficiary, the qualified ABLE program is to notify the designated beneficiary of such return at the time of the return.

One commenter objected to the requirement that an excess contribution or excess aggregate contribution be returned to the person or persons who made the contribution, which, according to the commenter, places a burden on the qualified ABLE program to track the source, amount, and date of each contribution. The commenter suggested that it would be less

burdensome if excess contributions and excess aggregate contributions were returned instead to the designated beneficiary who, in turn, would then be responsible for returning the contribution to the appropriate contributor. The Treasury Department and the IRS decline to adopt this suggestion. Requiring the designated beneficiary to return contributions would be unduly burdensome to the designated beneficiary, the person for whom many commenters requested as much simplification as possible. More importantly, contributions returned to the designated beneficiary are likely to be counted as a resource of the designated beneficiary for purposes of determining his or her eligibility for benefits under certain means-tested government programs, thus potentially causing the designated beneficiary to lose eligibility for those critical benefits.

Another commenter asked that the final regulations eliminate the requirement to return any earnings on an excess contribution or excess aggregate contribution to the contributor, citing the cost and other burdens of creating an automated process to track individual contributions and calculate the earnings thereon. The Treasury Department and the IRS decline to adopt this suggestion because section 529A(c)(3)(C)(ii) requires the return of the net income attributable to an excess contribution. The statute also requires that the net income attributable to an excess contribution be determined in the same manner as in the case of withdrawn excess contributions to IRAs. In addition, because this determination is based on the change in value of the account, it does not require the tracking of earnings attributable to each contribution. For more information on how to determine the net income attributable to an excess contribution, see Publication 590–A, “Contribution to Individual Retirement Arrangements (IRAs)”, Worksheet 1–4, “Determining the Amount of Net Income Due To an IRA Contribution and Total Amount To Be Withdrawn From the IRA.” See also § 1.408–11.

A few commenters also recommended that the final regulations explicitly state that a qualified ABLE program need not notify the designated beneficiary when it rejects and returns an excess contribution or excess aggregate contribution from another contributor to the designated beneficiary's ABLE account as long as such contribution was not deposited into or allocated to the ABLE account. Because such a contribution could not have generated any earnings in the ABLE account, the

Treasury Department and the IRS concluded that there is no need for such a contribution to generate any reporting requirement. The final regulations clarify that notification is not required if amounts are rejected by the qualified ABLE program before they are deposited into or allocated to the designated beneficiary's ABLE account.

Another commenter criticized the requirement that excess contributions be returned on a LIFO basis, stating that a LIFO approach could result in the return of contributions made by the designated beneficiary before contributions made by another person, thereby making an ABLE account less attractive as a financial planning tool for the designated beneficiary. The commenter recommended that the final regulations require that the qualified ABLE program return contributions made by persons other than the designated beneficiary before returning any contribution made by the designated beneficiary. The Treasury Department and the IRS decline to adopt this recommendation in the final regulations. The Treasury Department and the IRS note that a qualified ABLE program may allow the designated beneficiary or person with signature authority over an ABLE account to place restrictions on the contributors and/or the amounts contributed to the account if the designated beneficiary is concerned about the impact of the unwanted contributions on financial planning. In addition, adopting the suggestion would impose additional burdens on the qualified ABLE programs, that then would be required to separately track contributions from the designated beneficiary (which several commenters opposed). Moreover, many states have designed their programs and administrative systems to stop accepting contributions once the total contributions or value of the account reaches the applicable limit. Such a system is not consistent with a rule other than a LIFO rule.

F. Return of Excess Compensation Contribution

The 2019 proposed regulations defined an excess compensation contribution as the amount by which the amount contributed during the taxable year of an employed designated beneficiary to the designated beneficiary's ABLE account exceeds the limit in effect under section 529A(b)(2)(B)(ii) for the calendar year in which that taxable year of the employed designated beneficiary begins.

Consistent with section 529A(b)(2) and the 2019 proposed regulations, if an excess compensation contribution is

deposited into or allocated to the ABLÉ account of a designated beneficiary, the qualified ABLÉ program must return the excess contribution, along with all net income attributable to the excess contribution, as determined under the rules set forth in § 1.408–11 (treating references to an IRA as references to an ABLÉ account, and references to returned contributions under section 408(d)(4) as references to excess compensation contributions), to the employed designated beneficiary. Also consistent with section 529A(b)(2) and the 2019 proposed regulations, the final regulations provide that it will be the sole responsibility of the designated beneficiary (or the person acting on the designated beneficiary's behalf) to identify and request the return of any excess contribution of such compensation income. Such returns of excess compensation contributions must be received by the employed designated beneficiary on or before the due date (including extensions) of the designated beneficiary's income tax return for the year in which the excess compensation contributions were made. A failure to return excess compensation contributions within this time period will result in the imposition on the designated beneficiary of a 6 percent excise tax under section 4973(a)(6) on the amount of excess compensation contributions.

Additionally, in order to minimize administrative burdens for the designated beneficiary and the qualified ABLÉ program, for purposes of ensuring that the limit on contributions made under section 529A(b)(2)(B)(ii) is not exceeded, the final regulations, like the 2019 proposed regulations, provide that the qualified ABLÉ program may rely on self-certifications, made under penalties of perjury, of the designated beneficiary or the person acting on the designated beneficiary's behalf.

G. Request for the TIN of a Contributor

Because a qualified ABLÉ program is required to return to the contributor any excess contribution or excess aggregate contribution that is deposited into or allocated to an ABLÉ account (along with any net income attributable to the contribution), the 2015 proposed regulations required a qualified ABLÉ program to request the TIN of each contributor to the ABLÉ account at the time a contribution was made if the qualified ABLÉ program did not already have a record of that person's correct TIN.

Numerous commenters expressed concerns about the substantial burdens that they anticipate this provision would place upon qualified ABLÉ

programs. Commenters noted that contributions are likely to come from many sources and be made in various ways (for example, payroll deduction, check, debit, automated clearing house (ACH) transfers, and others), making it difficult as a practical matter to obtain the TIN of the contributor. Commenters also conjectured that some contributors, especially those making small gifts, might be reluctant to make a contribution if they were required to provide their TIN.

As an alternative to the provision in the 2015 proposed regulations, one commenter suggested that the final regulations require the qualified ABLÉ program to pay an excess contribution to the designated beneficiary rather than the contributor, thereby obviating the need to procure the contributor's TIN. As noted previously, the Treasury Department and the IRS do not agree with this suggestion, because the designated beneficiary's receipt of such an excess amount could put the designated beneficiary at risk of being disqualified for his or her Federal benefits that are income or resource based, a result that would be inconsistent with the purposes of section 529A.

Other commenters suggested that a qualified ABLÉ program be required to collect a contributor's TIN only if the program does not have a system in place to prevent an excess contribution or excess aggregate contribution from being deposited into an ABLÉ account. The commenters expect that most qualified ABLÉ programs will adopt the automated systems currently used by section 529 qualified tuition programs either to reject such excess contributions before they are deposited into a particular ABLÉ account, or to escrow and immediately refund the excess contributions, again before being deposited into or allocated to a particular account. With such a system in place, qualified ABLÉ programs should not need to return net earnings on contributions, and thus would not need the contributor's TIN. Other commenters recommended that the obligation to request a contributor's TIN should arise only in the unlikely circumstance in which an excess contribution or excess aggregate contribution has been deposited into an individual's ABLÉ account and has accrued earnings or losses. One commenter suggested eliminating the TIN requirement altogether, while another suggested the collection of TINs should be required only in the case of contributions of more than a specified dollar amount.

Commenters requested interim guidance on this issue to facilitate the establishment of qualified ABLÉ programs by the States. In response, the Treasury Department and the IRS issued Notice 2015–81, advising that it was anticipated that the final regulations would modify the requirement that a qualified ABLÉ program request the TIN of a contributor at the time of the contribution. That modification, which is adopted in the final regulations, requires a qualified ABLÉ program to request the TIN of a contributor at the time a contribution is made (assuming the qualified ABLÉ program does not already have a record of the contributor's correct TIN) only if the qualified ABLÉ program does not have a system in place to identify and reject excess contributions and excess aggregate contributions before they are deposited into or allocated to an ABLÉ account. In the event that a qualified ABLÉ program has such a system in place but an excess contribution or excess aggregate contribution, nevertheless, is deposited into or allocated to an ABLÉ account, the qualified ABLÉ program then must request the TIN of the contributor who made the excess contribution or excess aggregate contribution in order to permit the ABLÉ program to file accurate and complete required reporting of the earnings attributable thereto. A return of contributions and earnings from the ABLÉ account is a distribution, so the IRS and the contributor must receive a Form 1099–QA, "Distributions from ABLÉ Accounts", showing the contributor's TIN.

4. Investment Direction

Consistent with section 529A(b)(4), the 2015 proposed regulations provided that a qualified ABLÉ program may not allow the designated beneficiary of an ABLÉ account to direct, either directly or indirectly, the investment of any contributions to his or her account (or any earnings thereon) more often than twice in any calendar year. The 2015 proposed regulations provided that a program does not violate this requirement merely because it permits a designated beneficiary or a person with signature authority over a designated beneficiary's account to serve as one of the program's board members or employees, or as a board member or employee of a contractor that the program hires to perform administrative services.

One commenter inquired whether the designated beneficiary would be allowed to direct investments of contributions more than twice a year due to a change in the investment

climate. Another commenter suggested that the designated beneficiary be allowed to direct the investment of contributions in his or her ABLE account at least monthly, while yet another commenter recommended up to four permitted changes per year. Because section 529A(b)(4) requires a qualified ABLE program to limit the number of times any designated beneficiary may, directly or indirectly, direct the investment of any contribution to no more than two times in any calendar year, the Treasury Department and the IRS do not adopt these suggestions in the final regulations.

Some commenters asked that the final regulations clarify that an investment direction does not include the transfer of account assets from the investment portion of an ABLE account to a money market account or similar vehicle maintained by the qualified ABLE program to process a requested distribution. The Treasury Department and the IRS agree with these commenters that moving funds from an investment fund into a cash fund within the ABLE account in order to process a distribution is not the kind of change in investment direction addressed by the statutory limit, and have made the requested clarification in the final regulations.

Another commenter suggested that the final regulations clarify that a reallocation of the assets in an ABLE account among different broad-based investment strategies offered on the qualified ABLE program's investment menu (such as a reallocation from a diversified large cap fund to a diversified bond fund, or from a small cap fund to a target date fund) does not constitute investment direction. In the commenter's view, the reallocation of a portion of an ABLE account's assets among a set of broad-based investment options offered by the qualified ABLE program, such as diversified mutual funds, age-based target date funds, or Federally-insured CDs, is not investment direction because the designated beneficiary is not exercising control over the underlying investments, as would be the case if he or she were allowed to invest in specific stocks or funds not offered as part of the qualified ABLE program's menu of broad-based strategies. The commenter asserted that, by offering a limited menu of broad-based investment options, the qualified ABLE program effectively makes the investment decisions and that giving the designated beneficiary the authority to make periodic reallocations among these options is not sufficient

control to be considered an investment direction.

The Treasury Department and the IRS do not agree with this commenter. The Treasury Department and the IRS concluded that a reallocation of an account's assets among different investment vehicles or types of funds constitutes an investment direction within the meaning of section 529A(b)(4), with two exceptions. As addressed earlier in this section 4, the first exception is the transfer of assets within an ABLE account to a cash fund. The second exception is an automatic rebalancing of the assets in an ABLE account merely to maintain a particular asset allocation. The Treasury Department and the IRS concluded that such an adjustment is not a change in investment direction; instead, it is to preserve and effectuate an investment allocation or direction selected at some previous time that is needed because of the frequent fluctuations in market values of investments. Accordingly, the final regulations provide that neither of these adjustments is a change in investment direction for purposes of section 529A(b)(4).

Some commenters asked how the annual limit on investment direction applies to a successor designated beneficiary in the year in which he or she first succeeds to the ABLE account of the former designated beneficiary. The Treasury Department and the IRS understand that the former and successor designated beneficiaries may have different financial situations, and, therefore, different investment needs. These final regulations apply the contribution limits separately to each designated beneficiary, and the Treasury Department and the IRS concluded that it would be most consistent with the purpose of section 529A and its other provisions to provide that the investment change limitation also applies separately to each designated beneficiary. As a result, the final regulations provide that the successor designated beneficiary is allowed to direct the investment of contributions and earnings in the ABLE account up to two times in the calendar year in which he or she becomes the designated beneficiary of the ABLE account, regardless of whether the former designated beneficiary previously had done so in the same calendar year.

5. No Pledging of Interest as Security for a Loan

Consistent with section 529A(b)(5), the 2015 proposed regulations provided that a program will not be treated as a qualified ABLE program unless the terms of the program, or a state statute

or regulation that governs the program, prohibit any interest in the program or any portion thereof from being used as security for a loan. A few commenters observed that many ABLE accounts are likely to be transactional in nature. One commenter asked whether a checking account or a debit or credit card can be issued to a designated beneficiary and linked to his or her ABLE account.

Another commenter asked that the final regulations clarify that advancing funds from an ABLE account to the designated beneficiary—such as through a checking account or debit card privileges connected to the ABLE account—is neither a loan nor security for a loan. Another commenter, observing that checking accounts and debit cards likely will be associated with ABLE accounts, noted that it is unlikely that a qualified ABLE program will be able to convert an account's underlying investments into cash on the same day as the transaction to be funded occurs. In other contexts, these transactional capabilities generally are effected by an issuer's zero interest advance for a short period in order to fund the account or debit card, followed by a reimbursement of the issuer when the cash generated by the liquidation of the investment is received by the issuer. The commenter further observed that these short-term advances are distinguishable from third party loans and requested that the final regulations clarify that these short-term advances are not loans. Similarly, the commenter requested that the final regulations clarify that an advance made to an ABLE account by a qualified ABLE program before settlement of a check or other money transfer by a contributor is not a loan.

The Treasury Department and the IRS agree that it is possible for an ABLE program to permit the use of checking accounts and debit cards to facilitate the qualified ABLE program's ability to make qualified distributions. For purposes of section 529A, the final regulations do not treat these uses—which are necessary to make funds available for qualified disability expenses as intended—as pledging the interest in the ABLE account as security for a loan, provided that these uses do not result in an advance of funds to a designated beneficiary in excess of the amount in his or her ABLE account. Similarly, the program administrator's advance of funds to satisfy a withdrawal request while the proceeds from the sale of an account asset, sufficient to satisfy that withdrawal request, clear or settle will not be treated as a pledge or grant of security or as a loan for purposes of this section. However, whether a

different particular arrangement constitutes the use of an interest in a qualified ABLE program as security for a loan is a factual determination that is beyond the scope of these regulations.

6. Distributions and Transfers

A. Qualified Disability Expenses

In accordance with section 529A(e)(5), the 2015 proposed regulations defined qualified disability expenses as any expenses incurred at a time when the designated beneficiary of an ABLE account is an eligible individual that relate to the blindness or disability of the designated beneficiary, including expenses that are for the benefit of the designated beneficiary in improving his or her health, independence, or quality of life. Such expenses include, but are not limited to, expenses for education, housing, transportation, employment training and support, assistive technology and personal support services, health prevention and wellness, financial management and administrative services, legal fees, expenses for oversight and monitoring, funeral expenses, and other expenses that may be identified from time to time in future guidance published in the Internal Revenue Bulletin. Such expenses include basic living expenses and are not limited to items for which there is a medical necessity or which solely benefit the designated beneficiary. As an example of a qualified disability expense, the 2015 proposed regulations included the expense of buying, using, and maintaining a smartphone used by an individual with a mental impairment to help her navigate and communicate more safely and effectively. In the preamble to the 2015 proposed regulations, the Treasury Department and the IRS requested comments regarding the types of expenses that should be considered qualified disability expenses and under what circumstances.

Many commenters commended the 2015 proposed regulations' expansive definition of qualified disability expenses. Commenters generally found the example helpful. However, one commenter pointed out that the expense of maintaining a smartphone could be considered a basic living expense and need not be tied to any particular disability or impairment to be considered a qualified disability expense.

While acknowledging the difficulty of compiling an exhaustive list of qualified disability expenses, many commenters suggested a wide variety of expenses that they believed should be considered

qualified disability expenses. One commenter requested that the final regulations provide more comprehensive guidance on the scope of, and exclusions from, the definition of qualified disability expenses so that a designated beneficiary may correctly determine his or her tax liability. Believing that most, if not all, expenses of an eligible individual could be considered qualified disability expenses, another commenter suggested defining types of expenses that are not qualified disability expenses. The commenter suggested that expenses that do not directly benefit the designated beneficiary, such as the expense of a gift for someone other than the designated beneficiary, are not qualified disability expenses. One commenter suggested that an online list of examples be maintained and accessible to the public. Another commenter recommended that all disbursements be deemed to be for qualified disability expenses until proven otherwise.

The Treasury Department and the IRS continue to view the definition of qualified disability expenses as expansive. Whether a particular expense is a qualified disability depends on each designated beneficiary's unique circumstances and whether the expense is for maintaining or improving the health, independence, or quality of life of the designated beneficiary. Therefore, the Treasury Department and the IRS cannot provide either a comprehensive list of qualified disability expenses or a short list of expenses that would not satisfy that standard. The Treasury Department and the IRS note that Congress did not define a qualified disability expense as any expenditure for the benefit of an eligible individual, nor did Congress define a qualified disability expense as an expense that benefits only the eligible individual. The ABLE Act mandates different tax treatment for those expenses that are qualified disability expenses and those that are not. Consequently, the final regulations retain the 2015 proposed regulations' broad, but not unlimited, definition of a qualified disability expense.

One commenter requested that the same permissible categories of expenses be used to define a qualified disability expense for purposes of both section 529A and SSA programs to provide consistency for disabled individuals. Because the categories suggested in that comment are identical to those included in the 2015 proposed regulations, no change is required in response to this comment. Further, because the Treasury Department and the IRS have no authority with regard to any program

administered by the SSA, it is up to SSA to decide whether or not to adjust SSA's definitions.

A few commenters asked that the final regulations provide a process for appealing a determination on examination by the IRS that a particular expense is not a qualified disability expense. The Treasury and the IRS note that an appeals process already exists under the IRS' examination procedures. For more information, visit the IRS Office of Appeals' website at <https://www.irs.gov/appeals/considering-an-appeal>, or consult IRS Publication 5: Your Appeal Rights and How to Prepare a Protest If You Don't Agree.

The 2015 proposed regulations provided that a qualified ABLE program is required to establish safeguards to permit the identification of the amounts distributed for housing expenses as that term is defined for purposes of the SSI program of the SSA. One commenter requested a more specific definition of housing expenses, but other commenters noted that, because the identification of housing expenses is relevant only for purposes of determining eligibility for certain Social Security benefits and has no relevance for Federal income tax purposes, any reference to classifying distributions as housing expenses should be eliminated from the regulations. The Treasury Department and the IRS agree, and the final regulations do not require a qualified ABLE program to identify or record whether distributions were made for housing expenses.

Commenters also expressed concerns regarding the requirement that a qualified ABLE program must establish safeguards to distinguish between distributions for qualified disability expenses and other distributions. Commenters emphasized that requiring a qualified ABLE program to determine how a distribution will be used prior to making the distribution would be unduly burdensome for both the program and the designated beneficiary, and they explained that the actual use of a distribution might not be known by the designated beneficiary and thus by the ABLE program when the distribution is made. The commenters recommended that any requirement or suggestion that the qualified ABLE program classify distributions be removed from the regulations. The Treasury Department and the IRS agree that it would be burdensome and unadministrable to require the qualified ABLE programs to categorize and keep track of the actual use of each distribution by the designated beneficiary. Consistent with Notice 2015-81, the final regulations do not

require, for any Federal income tax purpose, a qualified ABLE program to establish safeguards to distinguish between distributions used for the payment of qualified disability expenses and other distributions.

Commenters also expressed concerns that the 2015 proposed regulations require designated beneficiaries to report or to justify the reason for each distribution at the time of the distribution. Another commenter requested clarification that distributions may be made for qualified disability expenses through entities including section 501(c)(3) charitable organizations and special needs trusts as described in 42 U.S.C. 1396p(d)(4). The Treasury Department and the IRS wish to clarify that the statute, the 2015 proposed regulations, and the final regulations do not require the designated beneficiary to report his or her qualified disability expenses to the qualified ABLE program or to the IRS when filing a tax return. However, just as with qualified higher education expenses under section 529, the designated beneficiary will need to categorize distributions from the ABLE account in order to properly determine his or her Federal income tax obligations. Therefore, the designated beneficiary should maintain adequate records for determining and supporting his or her qualified disability expenses for each taxable year. The final regulations clarify that the payment of administrative or investment fees charged by a qualified ABLE program is not a distribution. The Treasury Department and the IRS note that distributions may be made for all qualified disability expenses of the designated beneficiary, regardless of whether the payee is an individual, organization, or trust.

B. Taxation of Distributions

Consistent with section 529A(c)(1), the 2015 proposed regulations provide that, if distributions do not exceed the designated beneficiary's qualified disability expenses for the year, no amount is includible in the designated beneficiary's gross income. Otherwise, the earnings portion of the distributions from the ABLE account as determined under section 72, reduced by the product of such earnings portion and the ratio of the qualified disability expenses for the year to the total distributions in that year, is includible in the gross income of the designated beneficiary to the extent not otherwise excluded from income. For purposes of applying section 72 to amounts distributed from an ABLE account, the 2015 proposed regulations provided

that: (1) All distributions during a taxable year are treated as one distribution; and (2) the value of the contract, income on the contract, and investment in the contract are computed as of the close of the calendar year in which the designated beneficiary's taxable year began.

For purposes of determining whether distributions from an ABLE account exceed qualified disability expenses in any given year, one commenter suggested that the final regulations allow qualified disability expenses incurred before April 15 of any given year to count as qualified disability expenses for the immediately preceding year. The commenter expressed concern that a distribution taken late in one year but not used to pay for qualified disability expenses until the next year could cause a designated beneficiary's distributions to exceed his or her qualified disability expenses in the year of the distribution. Another commenter recommended that the final regulations require a nexus between a distribution from an ABLE account and the payment of qualified disability expenses by prescribing a period of time (for example, 60, 90, or 120 days) after a distribution is made during which the proceeds must be used to pay for a qualified disability expense. Some commenters also raised questions regarding the relevance of incurring versus paying the expenses for purposes of comparing the total qualified disability expenses to the total distributions in the designated beneficiary's taxable year.

The Treasury Department and the IRS understand that a designated beneficiary could take a distribution in anticipation of an expense that does not materialize and thus want to redeposit the distribution into the ABLE account, or that an expense incurred in one year may be billed and paid in the following year. The Treasury Department and the IRS concluded that, for purposes of determining the designated beneficiary's income tax liability, the distributions from an ABLE account should be compared to the qualified disability expenses that are paid, rather than just incurred, during the year because it is payments that appear in a taxpayer's records and that generally determine income tax consequences. However, to relieve the possible disadvantage to a designated beneficiary from a potential timing mismatch of the distribution and the payment of the expense, and to permit the redeposit of an unused distribution, the Treasury Department and the IRS agree that it is appropriate and helpful to allow a grace period. Therefore, the final regulations provide

that a designated beneficiary may treat qualified disability expenses paid by the sixtieth day immediately following the end of the designated beneficiary's taxable year as if they had been paid in the immediately preceding taxable year, but any expense so treated may not be counted again with respect to the year in which it is paid.

Section 529A(c)(1)(A) provides that any distribution under a qualified ABLE program is includible in the gross income of the distributee in the manner provided under section 72 to the extent not otherwise excluded from gross income under any other provision of the Code. Noting the similarities between the taxation of distributions under sections 529 and 529A, a few commenters recommended that the method for determining the earnings ratio of a distribution from an ABLE account be made consistent with the rule applicable to section 529 programs under Notice 2001-81, which provided that the Treasury Department and the IRS expect that final regulations under section 529, when issued, will require section 529 programs to determine the earnings portion of each distribution from a section 529 account separately as of the date of its distribution. The commenters advised that the imposition of a different method with respect to qualified ABLE programs would require service providers to build a separate recordkeeping system specific to ABLE accounts, thereby increasing program costs. Moreover, determining the earnings portion of a distribution as of the date of distribution facilitates the administration of partial rollovers and program-to-program transfers, the earnings of which must be calculated as of the date of distribution rather than at the end of the year. These commenters also explained that using the date of each distribution rather than a year-end total would not change the income tax impact on the designated beneficiary because his or her taxable income is determined by a ratio applied to total earnings.

The Treasury Department and the IRS agree with the commenters. Harmonizing how the earnings ratio is determined under section 529A with how it is determined under section 529 should reduce administrative costs of the qualified ABLE programs, making the programs more cost-effective. Therefore, the final regulations provide that the earnings ratio, as applied to a particular distribution, is determined as of the date of distribution, and is equal to the amount of earnings attributable to the account as of the date of distribution divided by the total account balance on that date.

C. Change of Designated Beneficiary

Section 529A(c)(1)(C) addresses the tax consequences of a change of designated beneficiary of an ABLE account. With respect to such a change, the 2015 proposed regulations described the circumstances in which amounts will be includible in the designated beneficiary's income. The 2015 proposed regulations provided that a change of designated beneficiary is not treated as a distribution, and therefore does not result in gross income, but this rule applies only if the new designated beneficiary is both (1) an eligible individual for his or her taxable year in which the change is made and (2) a sibling of the former designated beneficiary.

The 2015 proposed regulations required a qualified ABLE program to permit a change in the designated beneficiary of an ABLE account, but only during the lifetime of the designated beneficiary, and only if the successor designated beneficiary is an eligible individual. Because the designated beneficiary could be subject to gift tax and/or GST tax if the successor designated beneficiary is not a sibling of the designated beneficiary, the Treasury Department and the IRS requested comments on whether the final regulations should allow States to limit a permissible successor designated beneficiary to a sibling of the designated beneficiary.

Several commenters recommended that the final regulations require any successor designated beneficiary to be a sibling of the designated beneficiary. However, one commenter pointed out that a designated beneficiary might not have a sibling who is an eligible individual, and recommended that qualified ABLE programs not be permitted to limit the successor designated beneficiary to a sibling who is an eligible individual, but recommended that a change to any other eligible individual require notice to the designated beneficiary of the adverse tax implications for that designated beneficiary. Another commenter asked whether a qualified ABLE program could limit the successor designated beneficiary to a sibling of the designated beneficiary if the final regulations do not impose that limitation.

The Treasury Department and the IRS concluded that, although section 529A imposes income and transfer tax consequences on a change of designated beneficiary if the successor designated beneficiary is not an eligible individual who is a sibling of the former designated beneficiary, the statute does not prohibit such changes. Therefore, the final

regulations do not impose such a restriction. However, in order to minimize the potential that the designated beneficiary will have adverse tax consequences, the final regulations permit a qualified ABLE program to limit successor designated beneficiaries to a sibling, provided that the successor designated beneficiary also is an eligible individual. If a successor designated beneficiary is not a sibling of the former designated beneficiary, the former designated beneficiary will have received a deemed distribution of the amount transferred to the successor designated beneficiary that is subject to all of the tax provisions in section 529A(c).

One commenter suggested that the final regulations define "member of the family" broadly, as in the proposed regulations under section 529, to include descendants and ancestors of the designated beneficiary, rather than only a sibling. The Treasury Department and the IRS note that the term "member of the family" is expressly defined by section 529A(e)(4). Therefore, the final regulations do not expand the meaning of that term to also include descendants and ancestors of the designated beneficiary.

Several commenters asked that the final regulations allow the designated beneficiary or the person with signature authority over an ABLE account to designate an individual, who is both an eligible individual and a sibling of the designated beneficiary, to be the successor designated beneficiary of the account, effective upon the death of the designated beneficiary. Commenters suggested that such a designation should be conditioned on the named successor designated beneficiary being an eligible individual at the time of the designated beneficiary's death. One commenter suggested permitting the naming of a secondary successor designated beneficiary. Commenters suggested that, if the successor designated beneficiary already has an ABLE account, the funds of the deceased designated beneficiary's ABLE account should be rolled into the ABLE account of the successor designated beneficiary, and one commenter requested that the final regulations exempt such a rollover from the restriction under section

529A(c)(1)(C)(iii) preventing more than one rollover to the same designated beneficiary within a 12-month period. One commenter asked that the final regulations allow a reasonable bereavement period (for example, one year) after the death of the designated beneficiary, during which the guardian of the deceased designated beneficiary,

the executor of his or her estate, or a court could transfer the ABLE account to a sibling of the deceased designated beneficiary who is then an eligible individual. Finally, one commenter asked that the final regulations allow the distribution of a deceased designated beneficiary's ABLE account to the section 529 account of his or her child or to a health savings account for his or her family.

The Treasury Department and the IRS recognize the difficulties faced by the family, friends, and caregivers of a designated beneficiary at the end of the designated beneficiary's life. In order to alleviate some of these difficulties, the final regulations allow a qualified ABLE program to permit a successor designated beneficiary to be named during the lifetime of the designated beneficiary that will take effect upon the death of the designated beneficiary. The designation must be made before the designated beneficiary's death. If no successor designated beneficiary is named, the assets in the ABLE account are payable to the estate of the deceased designated beneficiary. Before any transfer to the successor designated beneficiary, however, the ABLE account is subject to the Federal estate tax imposed by chapter 11 of the Code upon the estate of the deceased designated beneficiary, as well as to the payment of any outstanding qualified disability expenses of the decedent and any State claim under section 529A(f).

D. Rollovers and Program-to-Program Transfers

Under section 529A(c)(1)(C), a rollover from an ABLE account is not treated as a distribution includible in the gross income of the distributee. The 2015 proposed regulations defined a rollover as an amount withdrawn from the ABLE account of a designated beneficiary and contributed, within 60 days of the date of the withdrawal, to another ABLE account of the designated beneficiary, or to the ABLE account of an eligible individual who is a sibling of the designated beneficiary, provided that, in the case of a contribution to the ABLE account of the same designated beneficiary, no rollover has been made to an ABLE account of the designated beneficiary within the prior 12 months.

The 2015 proposed regulations also provided that a program-to-program transfer is not a distribution and is not includible in income. A "program-to-program transfer" is the direct transfer of the entire balance of an ABLE account that will be closed upon completion of the transfer into an ABLE account of the same designated beneficiary, or the direct transfer of part

or all of the balance to an ABLÉ account of another eligible individual who is a sibling of the former designated beneficiary, without any intervening distribution or deemed distribution to the designated beneficiary or former designated beneficiary. In the preamble to the 2015 proposed regulations, the Treasury Department and the IRS stated that a program-to-program transfer may be preferable to a rollover in protecting the designated beneficiary's eligibility for benefits under Federal and State means-tested programs. A program-to-program transfer also could facilitate the transfer of information concerning contributions and accumulated earnings. In light of these expected benefits, the Treasury Department and the IRS requested comments as to whether and to what extent a qualified ABLÉ program should be permitted to require that funds from another State's ABLÉ program be accepted only through program-to-program transfers.

Many commenters expressed approval of the rules allowing program-to-program transfers, but several of these commenters recommended that the final regulations continue to allow the use of a rollover as a means of transferring funds from one qualified ABLÉ program to another. Consistent with section 529A(c)(1)(C), the final regulations continue to permit rollovers and do not require the use of a program-to-program transfer. However, the Treasury Department and the IRS recognize that qualified ABLÉ programs may differ in determining how best to administer their programs. For example, a qualified ABLÉ program may choose to require that a transfer of funds from one ABLÉ account to another under the program or to or from an ABLÉ account under another qualified ABLÉ program be by a program-to-program transfer.

Like the 2015 proposed regulations, the final regulations provide that, upon a rollover or program-to-program transfer, all the attributes of the former ABLÉ account relevant for purposes of calculating the investment in the account and applying the cumulative limits on contributions are applicable to the recipient account. The portion of the rollover or transfer amount that constituted investment in the account from which the distribution or transfer was made becomes an investment in the recipient ABLÉ account. Similarly, the portion of the rollover or transfer amount that constituted earnings of the account from which the distribution or transfer was made constitutes earnings of the recipient account. For purposes of the annual contribution limit, contributions do not include program-to-program transfers or rollovers.

Several commenters asked that the final regulations permit a tax-free rollover from a qualified tuition account under section 529 to an ABLÉ account for the same designated beneficiary. The commenters believe that such a provision would be particularly important to the designated beneficiary of a qualified tuition account who becomes disabled and is unable to attend college. Since the issuance of the 2015 proposed regulations, the TCJA amended section 529 to permit, before January 1, 2026, a limited rollover from a section 529 account to an ABLÉ account of the same designated beneficiary or a member of his or her family as defined expansively under section 529 to include, among others, a designated beneficiary's ancestors and descendants. The Treasury Department and the IRS issued Notice 2018–58, 2018–33 I.R.B. 305 (Aug. 13, 2018) announcing how they intended to provide clarification regarding the rollover provision. In light of this change, the final regulations define “contribution” to include this limited rollover from such a section 529 account.

Similarly, one commenter asked that final regulations permit the tax-free rollover from the ABLÉ account of an individual to a qualified tuition account under section 529 for the benefit of a child of that individual. The Code does not provide for a tax-free transfer from a qualified ABLÉ account to a qualified tuition account under section 529 because such a distribution would not be for a qualified disability expense. Accordingly, this comment is not adopted in the final regulations.

E. Post-Death Payments

Consistent with section 529A(f), the 2015 proposed regulations required that a portion or all of the balance remaining in the ABLÉ account of a deceased designated beneficiary (after providing for the payment of all outstanding qualified disability expenses of the designated beneficiary) be distributed to a State that files a claim against the designated beneficiary or against the ABLÉ account with respect to benefits provided to the designated beneficiary under that State's Medicaid plan (Medicaid reimbursement claim). The payment of such claim is limited to the amount of the total medical assistance paid for the designated beneficiary after the establishment of the ABLÉ account over the amount of any premiums paid to a Medicaid Buy-In program under any State Medicaid plan.

One commenter asked for confirmation that a State's ABLÉ program will not fail to qualify as a

qualified ABLÉ program merely because State law prohibits the State's Medicaid agency from filing Medicaid reimbursement claims. The Treasury Department and the IRS agree that a State law mandating that the State's Medicaid agency refrain from filing Medicaid reimbursement claims will not jeopardize the status of the State's ABLÉ program as a qualified ABLÉ program. Section 529A(f) does not require a State to file a Medicaid reimbursement claim.

Commenters asked whether a qualified ABLÉ program may make distributions, including payment on an existing contract for funeral expenses, before it receives a State Medicaid reimbursement claim. Commenters also asked whether a qualified ABLÉ program has an obligation to determine the validity or accuracy of a state's Medicaid reimbursement claim or whether multiple States are able to file a claim.

Consistent with section 529A, the final regulations provide that a qualified ABLÉ program may satisfy a State's Medicaid reimbursement claim only after providing for the payment of any outstanding qualified disability expenses of the deceased designated beneficiary, including the designated beneficiary's funeral and burial expenses, whether or not the subject of a pre-death contract for those services. The final regulations do not impose an obligation on the qualified ABLÉ program to verify the validity or accuracy of a State's Medicaid reimbursement claim. However, as noted previously, the payment of any claim is limited to the amount of total medical assistance paid for the designated beneficiary after the establishment of the ABLÉ account, net of any premiums paid (whether from the ABLÉ account or otherwise by or on behalf of the designated beneficiary) to a State Medicaid Buy-In program. In addition, no obligation is imposed on the qualified ABLÉ program to determine whether claims could be filed by multiple States. After the expiration of the applicable statute of limitations for filing Medicaid claims against the designated beneficiary's estate, a qualified ABLÉ program may distribute the balance of the ABLÉ account to the successor designated beneficiary or, if none, to the deceased designated beneficiary's estate.

The 2015 proposed regulations required a qualified ABLÉ program to file an annual information return on Form 1099–QA, or any successor form, with respect to each ABLÉ account from which any distribution is made during the calendar year, on which is reported

the aggregate amount of distributions from the ABLE account during the calendar year. One commenter asked whether a qualified ABLE program should report the payment of a Medicaid reimbursement claim on Form 1099-QA. The final regulations clarify that the term “distribution” does not include a payment in satisfaction of a Medicaid reimbursement claim. Therefore, the payment is not reported on Form 1099-QA.

7. Gift and Generation-Skipping Transfer (GST) Taxes

The final regulations, like the 2015 proposed regulations, provide that contributions to an ABLE account by a person other than the designated beneficiary are treated as completed gifts to the designated beneficiary of the account, and that such gifts are neither gifts of a future interest nor a qualified transfer under section 2503(e). Accordingly, no distribution from an ABLE account to the designated beneficiary of that account is treated as a taxable gift. Finally, consistent with section 529A(c)(2)(C), neither gift nor GST taxes apply to the change of designated beneficiary of an ABLE account if the new designated beneficiary is an eligible individual who is a sibling of the former designated beneficiary.

8. Unrelated Business Income Tax

A qualified ABLE program generally is exempt from Federal income taxation. A qualified ABLE program is subject, however, to the unrelated business income tax imposed under section 511 on its unrelated business taxable income. For purposes of this tax, certain administrative and other fees do not constitute unrelated business taxable income to the ABLE program. One commenter asked for clarification regarding the definition and possible application of the unrelated business income tax.

Further guidance on the unrelated business income tax provisions of the Code already is set forth in the regulations under sections 511 through 514. Those rules generally are applicable to qualified ABLE programs and other tax-exempt entities. If any unrelated business income tax liability exists, the tax is paid by the qualified ABLE program. If it has any unrelated taxable income, a qualified ABLE program is required to file Form 990-T, “Exempt Organization Business Income Tax Return,” as though it were an organization described in §§ 1.6012-2(e) and 1.6012-3(a)(5).

One commenter stated that the reporting requirements in the 2015

proposed regulations are burdensome to ABLE account holders, and recommended that the final regulations eliminate the need for any individual to file a Form 990-T. Form 990-T is for the use of a qualified ABLE program to report and pay tax on its unrelated business taxable income under section 512, if any, and is not for the use of individuals such as the designated beneficiaries of ABLE accounts.

9. Recordkeeping and Reporting Requirements

As in the 2015 proposed regulations, the final regulations set forth recordkeeping and reporting requirements. A qualified ABLE program must maintain records that enable the program to account to the Secretary with respect to all contributions, distributions, returns of excess contributions or additional accounts, income earned, and account balances for any designated beneficiary’s ABLE account. In addition, a qualified ABLE program must report to the Secretary the establishment of each ABLE account, including the name, address, and TIN of the designated beneficiary, information regarding the disability certification or other basis for eligibility of the designated beneficiary, and other relevant information regarding each account. Information regarding contributions is reported on Form 5498-QA, “ABLE Account Contribution Information.” Information regarding distributions from ABLE accounts is reported on Form 1099-QA, “Distributions from ABLE Accounts.” The final regulations and instructions to the Forms 1099-QA and 5498-QA contain more detail on how the information must be reported.

One commenter stated that the reporting requirements in the 2015 proposed regulations would increase the cost to qualified ABLE programs of offering ABLE accounts, and therefore recommended that the final regulations eliminate the requirement to file Form 5498-QA. The Treasury Department and the IRS note that Form 5498-QA is necessary to allow the qualified ABLE program to provide the notice of establishment of an ABLE account required under section 529A(d)(3), to report contributions to an ABLE account required under section 529A(d)(1), and to report other information necessary for the public reports required under section 529A(d)(2). Because the statute requires this reporting, the final regulations do not incorporate this suggestion. Additionally, the filing of Form 5498-QA satisfies certain

statutory requirements regarding the disability certification.

The 2015 proposed regulations provided that the qualified ABLE program is required to furnish a statement to the designated beneficiary of the ABLE account for which it is required to file a Form 5498-QA, which statement is required to include, among other things, the name, address, and TIN of the designated beneficiary. One commenter recommended that final regulations permit the exclusion of the TIN of the designated beneficiary from the statement required to be furnished to the designated beneficiary. The Treasury Department and the IRS confirm that a qualified ABLE program may truncate the TIN of the designated beneficiary (by replacing the first five digits of the 9-digit number with asterisks or Xs) on the copy of the Form 5498-QA (or substitute statement) that is provided to the designated beneficiary, but must include the full, untruncated TIN on the return it files with the IRS. See the General Instructions for Certain Information Returns.

In addition, section 529A(b)(3) requires that a qualified ABLE program provide separate accounting for each designated beneficiary. Separate accounting requires that contributions for the benefit of a designated beneficiary, as well as earnings attributable to those contributions, are allocated to that designated beneficiary’s account. Whether or not a program ordinarily provides each designated beneficiary an annual account statement showing the income and transactions related to the account, the program must give this information to the designated beneficiary upon request.

The preamble to the 2015 proposed regulations stated that section 529A(d)(4) provides that, for purposes of section 4 of the ABLE Act, States are required to submit electronically to the Commissioner of Social Security, on a monthly basis and in the manner specified by the Commissioner of Social Security, statements on relevant distributions and account balances from all ABLE accounts. Commenters remarked that such reporting requirements may be unduly burdensome on qualified ABLE programs, and will require designated beneficiaries of ABLE accounts to justify all expenditures on a nearly continuous basis to the qualified ABLE program. One commenter suggested that the designated beneficiary self-certify, under penalties of perjury, at the time of a distribution, that the distribution will be used for (i) housing expenses,

(ii) other qualified disability expenses, or (iii) non-qualifying expenses, which information the qualified ABLE program could use to report the designated beneficiary's housing expenses to the SSA. The final regulations do not require that housing or other qualified disability expenses be reported to the IRS by either the designated beneficiary or the ABLE program. The Treasury Department and the IRS note that the reporting requirement in section 529A(d)(4) concerns reporting by the qualified ABLE program to the SSA, not to the IRS, and thus is beyond the appropriate scope of these regulations.

10. Transition Relief

Notice 2015–18 and the preamble to the 2015 proposed regulations stated that the Treasury Department and the IRS intend to provide transition relief to enable qualified ABLE programs and ABLE accounts established before the issuance of final regulations to be brought into compliance with the requirements of the final regulations. One commenter asked that State legislatures and qualified ABLE programs be given a period of not less than one full taxable year after the issuance of final regulations to bring their legislation and programs into full compliance with Federal standards. Another commenter asked that the final regulations provide transition relief to qualified ABLE programs that begin operations within the six-month period following the issuance of final regulations, while still another asked that the relief be provided for programs that launch during the transition period.

The final regulations provide transition relief for all qualified ABLE programs, including programs that begin operation after the publication of the final regulations. The final regulations provide that, generally, a program and each account established under that program will be treated as a qualified ABLE program and as an ABLE account, respectively, during the transition period, provided that the program is established and operated in accordance with a reasonable, good faith interpretation of section 529A. Establishment and operation in accordance with the regulations under section 529A as proposed in 80 FR 35602 and as supplemented by Notice 2015–81, 2015–49 I.R.B. 784, and 84 FR 54529 is deemed to be establishment and operation in accordance with a reasonable, good faith interpretation of section 529A. However, such a program and all accounts established under that program must meet the requirements of these final regulations before the later of November 21, 2022, or the first day of

the qualified ABLE program's first taxable year beginning after the close of the first regular session of the State legislature that begins after November 19, 2020. If a State has a two-year legislative session, each calendar year of the session is deemed to be a separate regular session of the State legislature.

One commenter expressed concern for individuals who are eligible to establish an ABLE account under the 2015 proposed regulations but who later fail to meet the eligibility criteria under the final regulations. The commenter suggested that the final regulations allow such individuals to be “grandfathered” into a qualified ABLE program provided the individual continues to meet the eligibility requirements under the 2015 proposed regulations. Because the definition of an eligible individual and the criteria for establishing satisfaction of that definition has not been changed in the final regulations, the Treasury Department and the IRS do not adopt this suggestion.

11. Miscellaneous

Numerous comments were received concerning programs administered by the SSA or the Centers for Medicare & Medicaid Services (CMS). For example, several of these comments requested confirmation that the provisions of section 103 of the ABLE Act, which exclude ABLE accounts from the assets and income of the designated beneficiary in determinations of eligibility for certain public benefits, continue to apply in certain specific situations not addressed in the 2015 proposed regulations. Because these are not tax issues, the final regulations do not address these and other comments regarding matters that are outside of the jurisdiction of the Treasury Department and the IRS. The IRS, however, has shared these comments with the SSA and the CMS.

A few other comments were received regarding non-legal issues that are not within the scope of these final regulations. Several other minor changes were made throughout the final regulations to increase clarity and consistency and to comply with **Federal Register** requirements, none of which substantively change the 2015 or 2019 proposed regulations.

Special Analyses

This regulation is not subject to review under section 6(b) of Executive Order 12866 pursuant to the Memorandum of Agreement (April 11, 2018) between the Department of the Treasury and the Office of Management

and Budget regarding review of tax regulations.

1. Paperwork Reduction Act

The collection of information contained in these final regulations has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) under control numbers 1545–2262 and 1545–2293. The collections of information in this final regulation are in §§ 1.529A–2, 1.529A–5, 1.529A–6, and 1.529A–7. The collection of information flows from sections 529A(d)(1), (d)(2), (d)(3), (e)(1), and (e)(2) of the Code. Section 529A(d)(1) requires qualified ABLE programs to provide reports to the Secretary and to designated beneficiaries with respect to contributions, distributions, the return of excess contributions, and such other matters as the Secretary may require. Section 529A(d)(2) directs the Secretary to make available to the public reports containing aggregate information, by diagnosis and other relevant characteristics, on contributions and distributions from the qualified ABLE program. Section 529A(d)(3) requires qualified ABLE programs to provide notice to the Secretary upon the establishment of an ABLE account, containing the name of the designated beneficiary and such other information as the Secretary may require. Section 529A(e)(1) requires that a disability certification with respect to certain individuals be filed with the Secretary. Section 529A(e)(2) provides that the disability certification include a certification to the satisfaction of the Secretary that the individual has a described medically determinable physical or mental impairment that occurred before the date on which the individual attained age 26, as well as a copy of a physician's diagnosis. The burden under §§ 1.529A–5, 1.529A–6, and 1.529A–7 is reflected in the burden under Form 5498–QA, “ABLE Account Contribution Information,” and Form 1099–QA, “Distributions from ABLE Accounts,” respectively.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and return information are confidential, as required by 26 U.S.C. 6103.

2. Regulatory Flexibility Act

Pursuant to the Regulatory Flexibility Act (5 U.S.C. chapter 6), it is hereby certified that the collection of information in these regulations will not have a significant economic impact on a substantial number of small entities. This certification is based on the fact that these regulations will not impact a substantial number of small entities. These regulations primarily affect states and individuals and therefore will not have a significant economic impact on a substantial number of small entities. Pursuant to section 7805(f) of the Code, the NPRMs preceding these regulations were submitted to the Chief Counsel for the Office of Advocacy of the Small Business Administration for comment on their impact on small business. No comments were received from the Chief Counsel for the Office of Advocacy of the Small Business Administration.

Drafting Information

The principal authors of these regulations are Terri Harris and Julia Parnell of the Office of Associate Chief Counsel (Employee Benefits, Exempt Organizations, and Employment Taxes). However, other personnel from the Treasury Department and the IRS participated in the development of these regulations.

List of Subjects

26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

26 CFR Part 25

Gift taxes, Reporting and recordkeeping requirements.

26 CFR Part 26

Estate taxes, Reporting and recordkeeping requirements.

26 CFR Part 301

Employment taxes, Estate taxes, Excise taxes, Gift taxes, Income taxes, Penalties, Reporting and recordkeeping requirements.

26 CFR Part 602

Reporting and recordkeeping requirements.

Amendments to the Regulations

Accordingly, 26 CFR parts 1, 25, 26, 301, and 602 are amended as follows:

PART 1—INCOME TAXES

■ **Paragraph 1.** The authority citation for part 1 is amended by adding an entry for §§ 1.529A–0 through 1.529A–8 in numerical order to read in part as follows:

Authority: 26 U.S.C. 7805, unless otherwise noted.

* * * * *

Sections 1.529A–0 through 1.529A–8 also issued under 26 U.S.C. 529A(g).

* * * * *

■ **Par. 2.** Section 1.511–2 is amended by adding paragraph (e) to read as follows:

§ 1.511–2 Organizations subject to tax.

* * * * *

(e) *ABLE programs*—(1) *Unrelated business taxable income.* A qualified ABLE program described in section 529A and § 1.529A–1(b)(14) generally is exempt from Federal income taxation, but is subject to taxes imposed by section 511 relating to the imposition of tax on unrelated business income. A qualified ABLE program is required to file Form 990–T, “Exempt Organization Business Income Tax Return,” if such filing would be required under the rules of §§ 1.6012–2(e) and 1.6012–3(a)(5) if the ABLE program were an organization described in those sections.

(2) *Applicability date.* This paragraph (e) applies to taxable years beginning after December 31, 2020.

■ **Par. 3.** Section 1.513–1 is amended as follows:

■ 1. Redesignating the first full sentence following the heading in paragraph (d)(4)(i) as (d)(4)(i)(A);

■ 2. Redesignating the second sentence in paragraph (d)(4)(i) as (d)(4)(i)(B) introductory text;

■ 3. Adding a heading to newly designated paragraph (d)(4)(i)(A);

■ 4. In newly designated paragraph (d)(4)(i)(B), adding a heading and removing from the introductory text “principle” and adding “paragraph (d)(4)(i)” in its place;

■ 5. Redesignating undesignated *Examples 1* through *3* following newly designated paragraph (d)(4)(i)(B) introductory text as paragraphs (d)(4)(i)(B)(1) through (3); and

■ 6. Adding paragraph (d)(4)(i)(B)(4).

The additions read as follows:

§ 1.513–1 Definition of unrelated trade or business.

* * * * *

(d) * * *

(4) * * *

(i) * * *

(A) *In general.* * * *

(B) *Examples.* * * *

(4) *Example 4.* P is a qualified ABLE program described in section 529A and § 1.529A–1(b)(14). P receives amounts in order to establish or maintain ABLE accounts, as administrative or maintenance fees and other similar fees including service charges. Because the payment of these amounts is essential to

the operation of a qualified ABLE program, the income generated from the activity does not constitute gross income from an unrelated trade or business.

* * * * *

■ **Par. 4.** An undesignated center heading and §§ 1.529A–0 through 1.529A–8 are added immediately following § 1.528–10 to read as follows:

Qualified Able Programs

§ 1.529A–0 Table of contents.

§ 1.529A–1 Exempt status of qualified ABLE program and definitions.

§ 1.529A–2 Qualified ABLE program.

§ 1.529A–3 Tax treatment.

§ 1.529A–4 Gift, estate, and generation-skipping transfer taxes.

§ 1.529A–5 Reporting of the establishment of and contributions to an ABLE account.

§ 1.529A–6 Reporting of distributions from and termination of an ABLE account.

§ 1.529A–7 Electronic furnishing of statements to designated beneficiaries and contributors.

§ 1.529A–8 Applicability dates and transition relief.

Qualified Able Programs

§ 1.529A–0 Table of contents.

This section lists the following captions contained in §§ 1.529A–1 through 1.529A–8.

§ 1.529A–1 *Exempt status of qualified ABLE program and definitions.*

(a) In general.

(b) Definitions.

(1) ABLE account.

(2) Contribution.

(3) Designated beneficiary.

(4) Disability certification.

(5) Distribution.

(6) Earnings.

(7) Earnings ratio.

(8) Eligible individual.

(9) Excess contribution.

(10) Excess aggregate contribution.

(11) Investment in the account.

(12) Member of the family.

(13) Program-to-program transfer.

(14) Qualified ABLE program.

(15) Qualified disability expenses.

(16) Rollover.

(c) Applicability date.

§ 1.529A–2 *Qualified ABLE program.*

(a) In general.

(b) Established and maintained by a State or agency or instrumentality of a State.

(1) Established.

(2) Maintained.

(i) In general.

(ii) Multiple States, agencies, or instrumentalities.

(3) Community Development Financial Institutions (CDFIs).

(c) Establishment of an ABLE account and signature authority.

(1) Establishment of the ABLE account.

(2) Signature authority.

(3) Only one ABLE account.

(4) Beneficial interest.

(d) Eligible individual.

- (1) Documentation.
- (2) Frequency of recertification.
- (3) Loss of qualification as an eligible individual.
- (e) Disability certification.
- (1) In general.
- (2) Marked and severe functional limitations.
- (3) Compassionate allowance list.
- (4) Additional guidance.
- (5) Restriction on use of certification.
- (f) Change of designated beneficiary.
- (1) In general.
- (2) Change effective upon death.
- (g) Contributions.
- (1) Permissible property.
- (2) Annual contributions limit.
- (3) Cumulative limit.
- (4) Return of excess contributions, excess compensation contributions, and excess aggregate contributions.
- (5) Restriction of contributors.
- (h) Qualified disability expenses.
- (1) In general.
- (2) Example.
- (i) Separate accounting.
- (j) Program-to-program transfers.
- (k) Carryover of attributes.
- (1) In general.
- (2) Annual contribution limit.
- (3) Investment direction limit.
- (l) Investment direction.
- (m) No pledging of interest as security.
- (n) No sale or exchange.
- (o) Post-death payments.
- (p) Reporting requirements.
- (q) Applicability date.

§ 1.529A-3 Tax treatment.

- (a) Taxation of distributions.
- (1) In general.
- (2) Additional period.
- (b) Additional exclusions from gross income.
- (1) Rollover.
- (2) Program-to-program transfers.
- (3) Change of designated beneficiary.
- (4) Payments to creditors post-death.
- (c) Computation of earnings.
- (d) Additional tax on amounts includible in gross income.
- (1) In general.
- (2) Exceptions.
- (e) Tax on excess contributions.
- (f) Filing requirements.
- (g) No inference outside section 529A.
- (h) Applicability date.

§ 1.529A-4 Gift, estate, and generation-skipping transfer taxes.

- (a) Contributions.
- (1) In general.
- (2) Generation-skipping transfer (GST) tax.
- (3) Designated beneficiary as contributor.
- (b) Distributions.
- (c) Transfer to another designated beneficiary.
- (d) Transfer tax on death of designated beneficiary.
- (e) Applicability date.

§ 1.529A-5 Reporting of the establishment of and contributions to an ABLÉ account.

- (a) In general.
- (b) Additional definitions.
- (1) Filer.
- (2) TIN.

- (c) Requirement to file return.
- (1) Form of return.
- (2) Information included on return.
- (3) Time and manner of filing return.
- (d) Requirement to furnish statement.
- (1) In general.
- (2) Time and manner of furnishing statement.
- (3) Copy of Form 5498-QA.
- (e) Request for TIN of designated beneficiary.
- (f) Penalties.
- (1) Failure to file return.
- (2) Failure to furnish TIN.
- (g) Applicability date.

§ 1.529A-6 Reporting of distributions from and termination of an ABLÉ account.

- (a) In general.
- (b) Requirement to file return.
- (1) Form of return.
- (2) Information included on return.
- (3) Information excluded.
- (4) Time and manner of filing return.
- (c) Requirement to furnish statement.
- (1) In general.
- (2) Time and manner of furnishing statement.
- (3) Copy of Form 1099-QA.
- (d) Request for TIN of contributor(s).
- (1) In general.
- (2) Exception.
- (e) Penalties.
- (1) Failure to file return.
- (2) Failure to furnish TIN.
- (f) Applicability date.

§ 1.529A-7 Electronic furnishing of statements to designated beneficiaries and contributors.

- (a) Electronic furnishing of statements.
- (1) In general.
- (2) Consent.
- (3) Required disclosures.
- (4) Format.
- (5) Notice.
- (6) Access period.
- (b) Applicability date.

§ 1.529A-8 Applicability dates and transition relief.

- (a) Applicability dates.
- (b) Transition relief.
- (1) In general.
- (2) Transition period.
- (3) Compliance after transition period.

§ 1.529A-1 Exempt status of qualified ABLÉ program and definitions.

(a) *In general.* A qualified ABLÉ program described in section 529A is exempt from Federal income tax, except for the tax imposed under section 511 on any unrelated business taxable income of that program. See § 1.511-2(e).

(b) *Definitions.* For purposes of section 529A, this section and §§ 1.529A-2 through 1.529A-8—

(1) *ABLE account* means an account established under a qualified ABLÉ program and owned by the designated beneficiary of that account.

(2) *Contribution* means any payment directly allocated to an ABLÉ account for the benefit of a designated

beneficiary, including amounts transferred to an ABLÉ account between December 22, 2017, and January 1, 2026, from a qualified tuition program described in section 529.

(3) *Designated beneficiary* means the individual for whom the account was established at a time when he or she was an eligible individual or who has succeeded the former designated beneficiary in that capacity (successor designated beneficiary). The designated beneficiary is the owner of the ABLÉ account. If the designated beneficiary is not able to exercise signature authority over his or her ABLÉ account or chooses to have an ABLÉ account established but not to exercise signature authority, references to the designated beneficiary with respect to his or her actions include actions by the person with signature authority over the account. See § 1.529A-2(c)(1) and (2).

(4) *Disability certification* means a certification to establish a certain level of an individual's physical or mental impairment that meets the requirements described in § 1.529A-2(e).

(5) *Distribution* means any payment from an ABLÉ account. However, a program-to-program transfer, a Medicaid reimbursement under § 1.529A-2(o), or a payment of administrative or investment fees charged by a qualified ABLÉ program is not a distribution.

(6) *Earnings* attributable to an ABLÉ account are the excess of the total account balance on a particular date over the investment in the account as of that date.

(7) *Earnings ratio* as applied to a particular distribution means the amount of earnings attributable to the ABLÉ account as of the date of the distribution, divided by the total account balance on that same date.

(8) *Eligible individual* for a taxable year means an individual who either:

(i) Is receiving benefits under title II or XVI of the Social Security Act based on blindness or disability or whose entitlement to such benefits under title XVI has been suspended solely due to excess income or resources, provided that such blindness or disability occurred before the date on which the individual attained age 26 (and, for this purpose, an individual is deemed to attain age 26 on his or her 26th birthday); or

(ii) Is the subject of a disability certification filed with the Secretary of the Treasury or his delegate (Secretary) for that taxable year.

(9) *Excess contribution* means the amount by which the amount contributed during the taxable year of the designated beneficiary to an ABLÉ account exceeds the limit in effect

under section 2503(b) for the calendar year in which the taxable year of the designated beneficiary begins.

(10) *Excess aggregate contribution* means—

(i) The amount contributed during the taxable year of the designated beneficiary that causes the total of amounts contributed since the establishment of the ABLE account (or of an ABLE account for the same designated beneficiary that was rolled into the current ABLE account) to exceed the limit in effect under section 529(b)(6); or

(ii) In the context of the safe harbor in § 1.529A-2(g)(3), the amount contributed that causes the account balance to exceed the limit in effect under section 529(b)(6).

(11) *Investment in the account* means—

(i) The sum of all contributions made to the ABLE account, reduced by the aggregate amount of contributions included in distributions, if any, made from the account; or

(ii) In the case of a rollover contribution into an ABLE account, the amount of the rollover contribution that constituted the amount described in paragraph (b)(11)(i) of this section with respect to the ABLE account from which the rollover contribution was made.

(12) *Member of the family* means a sibling, whether by blood or by adoption, and includes a brother, sister, stepbrother, stepsister, half-brother, and half-sister.

(13) *Program-to-program transfer* means—

(i) The direct transfer of the entire balance of an ABLE account into an ABLE account of the same designated beneficiary after which the transferor ABLE account is closed upon completion of the transfer; or

(ii) The direct transfer of part or all of the balance to an ABLE account of another eligible individual who is a member of the family of the former designated beneficiary.

(14) *Qualified ABLE program* means a program established and maintained by a State, or agency or instrumentality of a State, under which an ABLE account may be established by and for the benefit of the account's designated beneficiary who is an eligible individual, and that meets the requirements described in § 1.529A-2.

(15) *Qualified disability expenses* means any expenses incurred at a time when the designated beneficiary is an eligible individual that relate to the blindness or disability of the designated beneficiary of an ABLE account, including expenses that are for the benefit of the designated beneficiary in

maintaining or improving his or her health, independence, or quality of life. See § 1.529A-2(h). However, any expenses incurred at a time when a designated beneficiary is neither disabled nor blind within the meaning of § 1.529A-1(b)(8)(i) or § 1.529A-2(e)(1)(i), even if the designated beneficiary is an eligible individual for that entire taxable year, do not relate to blindness or disability and therefore are not qualified disability expenses.

(16) *Rollover* means a contribution to an ABLE account of a designated beneficiary (or of an eligible individual who is a member of the family of the designated beneficiary) of all or a portion of an amount distributed from the designated beneficiary's ABLE account, provided the contribution is made within 60 days of the date of the withdrawal and, in the case of a rollover to the designated beneficiary's ABLE account, no rollover has been made to an ABLE account of the designated beneficiary within the 12 month period immediately preceding the rollover to the ABLE account.

(c) *Applicability date*. This section applies to calendar years beginning on or after January 1, 2021. See § 1.529A-8 for the provision of transition relief.

§ 1.529A-2 Qualified ABLE program.

(a) *In general*. A qualified ABLE program is a program established and maintained by a State, or an agency or instrumentality of a State, that satisfies all of the requirements of this section and under which—

(1) An ABLE account may be established for the purpose of meeting the qualified disability expenses of the designated beneficiary of the account;

(2) A designated beneficiary is limited to only one ABLE account at a time except as otherwise provided in paragraph (c)(3) of this section;

(3) Any person may make contributions to such an ABLE account, subject to the limitations described in paragraph (g) of this section; and

(4) Distributions (other than returns of contributions as described in paragraph (g)(4) of this section) may be made only to or for the benefit of the designated beneficiary of the ABLE account.

(b) *Established and maintained by a State or agency or instrumentality of a State*—(1) *Established*. A program is established by a State or its agency or instrumentality if the program is initiated by State statute or regulation or by an act of a State official or agency with the authority to act on behalf of the State.

(2) *Maintained*—(i) *In general*. A program is maintained by a State or an agency or instrumentality of a State if—

(A) The State or its agency or instrumentality sets all of the terms and conditions of the program, including but not limited to who may contribute to the program, who may be a designated beneficiary of the program, and what benefits the program may provide; and

(B) The State or its agency or instrumentality is actively involved on an ongoing basis in the administration of the program, including supervising the implementation of decisions relating to the investment of assets contributed under the program. Factors that are relevant in determining whether a State or its agency or instrumentality is actively involved in the administration of the program include, but are not limited to: Whether the State or its agency or instrumentality provides services to designated beneficiaries that are not provided to persons who are not designated beneficiaries; whether the State or its agency or instrumentality establishes detailed operating rules for administering the program; whether officials of the State or its agency or instrumentality play a substantial role in the operation of the program, including selecting, supervising, monitoring, auditing, and terminating the relationship with any private contractors that provide services under the program; whether the State or its agency or instrumentality holds the private contractors that provide services under the program to the same standards and requirements that apply when private contractors handle funds that belong to the State or its agency or instrumentality or provide services to the State or its agency or instrumentality; whether the State or its agency or instrumentality provides funding for the program; and whether the State or its agency or instrumentality acts as trustee or holds program assets directly or for the benefit of the designated beneficiaries. For example, if the State or its agency or instrumentality exercises the same authority over the funds invested in the program as it does over the investments in or pool of funds of a State employees' defined benefit pension plan, then the State or its agency or instrumentality will be considered actively involved on an ongoing basis in the administration of the program.

(ii) *Multiple States, agencies, or instrumentalities*. A program may be maintained by two or more States or the agencies or instrumentalities of two or more States if the program meets the requirements of paragraph (b)(2)(i) of this section for each of the States represented. If a State or an agency or instrumentality of a State participates in such a consortium of States or agencies

or instrumentalities of States, the consortium's program is considered to be the program of each State represented.

(3) *Community Development Financial Institutions (CDFIs)*. In addition to having the ability to contract with private contractors as provided in paragraph (b)(2)(i)(B) of this section, a State or its agency or instrumentality or qualified ABLE program may contract with one or more Community Development Financial Institutions (CDFIs) (as defined in 12 U.S.C. 4702(5) and 12 CFR 1805.104) to perform some or all of the services described in paragraphs (b)(2)(i)(A) and (B) of this section.

(c) *Establishment of an ABLE account and signature authority*—(1) *Establishment of the ABLE account*—(i) *In general*. A qualified ABLE program must provide that an ABLE account may be established only for an eligible individual.

(A) The ABLE account may be established by the eligible individual;

(B) The ABLE account may be established by a person selected by the eligible individual; or

(C) If an eligible individual (whether a minor or adult) is unable to establish his or her own ABLE account, an ABLE account may be established on behalf of the eligible individual by the eligible individual's agent under a power of attorney or, if none, by a conservator or legal guardian, spouse, parent, sibling, grandparent of the eligible individual, or a representative payee appointed for the eligible individual by the Social Security Administration (SSA), in that order.

(ii) *Authority*. A qualified ABLE program may accept a certification, made under penalties of perjury, from the person seeking to establish an ABLE account as to the basis for the person's authority to establish the ABLE account, and that there is no other person with a higher priority, under paragraphs (c)(1)(i)(A), (B), and (C) of this section, to establish the ABLE account.

(2) *Signature authority*—(i) *Signatory*. In general, the designated beneficiary will have signature authority over his or her ABLE account. However, if an individual other than the designated beneficiary establishes the account in accordance with paragraph (c)(1)(i)(B) or (C) of this section, such individual will have signature authority.

(A) At any time, the designated beneficiary may remove and replace any person with signature authority over the designated beneficiary's ABLE account. The replacement may be the designated beneficiary or any other person selected by the designated beneficiary.

(B) The designated beneficiary may designate a successor to the person with signature authority. In the absence of any designation of a successor by the designated beneficiary, a person with signature authority over the designated beneficiary's ABLE account may designate a successor, consistent with the ordering rules in paragraph (c)(1)(i)(C) of this section.

(ii) *Co-signatories*. A qualified ABLE program may permit an ABLE account to have co-signatories, consistent with paragraph (c)(1)(i)(C) of this section. If co-signatories are permitted, all of the other provisions of this paragraph (c)(2) continue to apply, and references to the *signatory* refer to the co-signatories acting separately or jointly, as determined by that qualified ABLE program.

(iii) *Authority over sub-accounts*. The person with signature authority over the ABLE account may appoint and from time to time may remove, replace, or name a successor for any person with signature authority over a sub-account described in paragraph (c)(3)(iii) of this section.

(3) *Only one ABLE account*—(i) *In general*. Except as provided in paragraph (c)(3)(ii) of this section, a designated beneficiary is limited to one ABLE account at a time, regardless of where located. To ensure that this requirement is met, a qualified ABLE program must obtain a verification, signed under penalties of perjury by the person establishing the ABLE account, that the individual establishing the ABLE account neither knows nor has reason to know that the eligible individual already has an existing ABLE account (other than an ABLE account that will terminate with the rollover or program-to-program transfer of its assets into the new ABLE account) before that program can permit the establishment of an ABLE account for that eligible individual. In the case of a rollover, the ABLE account from which amounts were distributed must be closed as of the 60th day after the date of the distribution in order to allow the account receiving the rollover to be treated as an ABLE account.

(ii) *Treatment of additional accounts*. If an individual is the designated beneficiary of an ABLE account established in accordance with paragraph (c)(1) of this section, no other account subsequently established for that individual under a qualified ABLE program (additional account) will be an ABLE account. The preceding sentence does not apply to an additional account, and that additional account is an ABLE account, if—

(A) The additional account is established for the purpose of receiving a rollover or program-to-program transfer;

(B) All of the contributions to the additional account are returned in accordance with the rules that apply to the return of excess contributions and excess aggregate contributions under paragraph (g)(4) of this section; or

(C) All amounts in the additional account are transferred to the designated beneficiary's preexisting ABLE account and any excess contributions and excess aggregate contributions are returned in accordance with the rules that apply to the return of excess contributions and excess aggregate contributions under paragraph (g)(4) of this section.

(iii) *Sub-accounts*. A qualified ABLE program may establish an ABLE account (primary account) that may include multiple sub-accounts. The person with signature authority over the ABLE account, at any time and from time to time, may create one or more sub-accounts, may transfer funds in the ABLE account to one or more of the sub-accounts, and may close one or more of the sub-accounts, to facilitate the acquisition of certain goods or services for the designated beneficiary. Each sub-account may have a different person with signature authority over that sub-account, appointed in accordance with the rules of paragraph (c)(2)(iii) of this section, and that person's authority is limited to making distributions from that sub-account. The primary account and the sub-accounts collectively constitute a single ABLE account and therefore must be aggregated for all purposes, including without limitation the limit on the number of permissible changes in investment direction under paragraph (l) of this section, the contribution limits under paragraphs (g)(2) and (3) of this section, the computation of gross income and other tax provisions, and the reporting requirements.

(iv) *Investment options*. A qualified ABLE program may offer different investment options within each ABLE account without violating the only-one-ABLE-account rule in this paragraph (c)(3). For example, an ABLE account may include a cash fund as well as one or more stock or bond funds.

(4) *Beneficial interest*. A person other than the designated beneficiary with signature authority over the ABLE account of the designated beneficiary may neither have nor acquire any beneficial interest in the ABLE account during the lifetime of the designated beneficiary and must administer the ABLE account for the benefit of the designated beneficiary of the account.

(d) *Eligible individual*—(1)

Documentation—(i) *In general.* Whether an individual is an eligible individual is determined for each taxable year of that individual, and that determination applies for the entire year. A qualified ABLE program must specify the documentation that an individual must provide, both at the time an ABLE account is established and thereafter, in order to ensure that the designated beneficiary of the ABLE account is, and continues to be, determined an eligible individual. For purposes of determining whether an individual is an eligible individual, a disability certification as described in paragraph (e)(1) of this section will be deemed to be filed with the Secretary once the qualified ABLE program has received the disability certification or a disability certification has been deemed to have been received under the rules of the qualified ABLE program, which information the qualified ABLE program will file in accordance with the filing requirements under § 1.529A–5(c)(2)(iv).

(ii) *Safe harbor.* A qualified ABLE program may establish that an individual is an eligible individual if the person establishing the ABLE account certifies under penalties of perjury—

(A) The basis for the individual's status as an eligible individual (entitlement to benefits based on blindness or disability under title II or XVI of the Social Security Act, or a disability certification described in paragraph (e)(1) of this section);

(B) That the individual is blind or has a medically determinable physical or mental impairment as described in paragraph (e)(1)(i) of this section;

(C) That such blindness or disability occurred before the date on which the individual attained age 26 (and, for this purpose, an individual is deemed to attain age 26 on his or her 26th birthday);

(D) If the basis of the individual's eligibility is a disability certification, that the individual has received and agrees to retain a written diagnosis as described in paragraph (e)(1)(iii) of this section, accompanied by the name and address of the diagnosing physician and the date of the written diagnosis;

(E) The applicable diagnostic code from those listed on Form 5498–QA (or in the instructions to such form) identifying the type of the individual's impairment;

(F) That the person establishing the account is the individual who will be the designated beneficiary of the account or is the person authorized under paragraph (c)(1)(i) of this section to establish the account; and

(G) If required by the qualified ABLE program, the information provided by the diagnosing physician as to the categorization of the disability that may be used to determine, under the particular State's program, the appropriate frequency of required recertifications.

(2) *Frequency of recertification*—(i) *In general.* A determination of eligibility must be made annually unless the qualified ABLE program adopts a different method of ensuring a designated beneficiary's continuing status as an eligible individual. Alternative methods may include, without limitation, the use of certifications by the designated beneficiary under penalties of perjury, and the imposition of different recertification frequencies for different types of impairments.

(ii) *Considerations.* In developing its rules on recertification, a qualified ABLE program may take into consideration whether an impairment is incurable and, if so, the likelihood that a cure may be found in the future. For example, a qualified ABLE program may provide that the initial certification will be deemed to be valid for a stated number of years, which may vary with the type of impairment. Even if the qualified ABLE program imposes an enforceable obligation on the designated beneficiary or other person with signature authority over the ABLE account to promptly report changes in the designated beneficiary's condition that would result in the designated beneficiary's failing to satisfy the definition of an eligible individual, the designated beneficiary will be considered an eligible individual until the end of the taxable year in which the change in the designated beneficiary's condition occurred. A qualified ABLE program that is compliant with the rules regarding recertification will not be considered to be noncompliant solely because a designated beneficiary fails to comply with this enforceable obligation.

(3) *Loss of qualification as an eligible individual.* If the designated beneficiary of an ABLE account ceases to be an eligible individual, then for each taxable year in which the designated beneficiary is not an eligible individual, the account will continue to be an ABLE account, the designated beneficiary will continue to be the designated beneficiary of the ABLE account (and will be referred to as such), and the ABLE account will not be deemed to have been distributed. However, beginning on the first day of the designated beneficiary's first taxable year for which the designated beneficiary does not satisfy the definition of an eligible individual,

additional contributions to the designated beneficiary's ABLE account must not be accepted by the qualified ABLE program. In addition, no expense incurred at a time when a designated beneficiary is neither disabled nor blind within the meaning of § 1.529A–1(b)(8)(i) or § 1.529A–2(e)(1)(i), whichever had applied, is a qualified disability expense even if the individual is an eligible individual for the rest of the year under paragraph (d)(1)(i) of this section. If the designated beneficiary subsequently again satisfies the definition of an eligible individual, contributions to the designated beneficiary's ABLE account again may be accepted, subject to the contribution limits under section 529A, and expenses that are incurred thereafter may meet the definition of a qualified disability expense in § 1.529A–1(b)(15) and paragraph (h) of this section.

(e) *Disability certification*—(1) *In general.* Except as provided in paragraph (e)(3) of this section or in additional guidance described in paragraph (e)(4) of this section, a disability certification with respect to an individual, that will be deemed filed with the Secretary as provided in paragraph (d)(1)(i) of this section, and is deemed satisfactory to the Secretary, is a certification signed under penalties of perjury by the individual, or by another individual establishing the ABLE account for the individual, that—

(i) Certifies that the individual—

(A) Has a medically determinable physical or mental impairment that results in marked and severe functional limitations (as defined in paragraph (e)(2) of this section), and that—

(1) Can be expected to result in death; or

(2) Has lasted or can be expected to last for a continuous period of not less than 12 months; or

(B) Is blind (within the meaning of section 1614(a)(2) of the Social Security Act);

(ii) Certifies that such blindness or disability occurred before the date on which the individual attained age 26 (and, for this purpose, an individual is deemed to attain age 26 on his or her 26th birthday); and

(iii) Includes a certification that the individual has obtained and will continue to retain a copy of the individual's diagnosis relating to the individual's relevant impairment or impairments, signed by a physician meeting the criteria of section 1861(r)(1) of the Social Security Act (42 U.S.C. 1395x(r)) and including the name and address of the diagnosing physician and the date of the diagnosis.

(2) *Marked and severe functional limitations.* For purposes of paragraph (e)(1) of this section, the phrase *marked and severe functional limitations* means the standard of disability in the Social Security Act for children claiming Supplemental Security Income for the Aged, Blind, and Disabled (SSI) benefits based on disability (see 20 CFR 416.906), but without regard to age or to whether the individual engages in substantial gainful activity. Specifically, this is a level of severity that meets, medically equals, or functionally equals the severity of any listing in appendix 1 of subpart P of 20 CFR part 404. See 20 CFR 416.906, 416.924 and 416.926a. Such phrase also includes any impairment or standard of disability identified in future guidance published in the Internal Revenue Bulletin (see § 601.601(d)(2) of this chapter). Consistent with the regulations promulgated by the SSA, the level of severity is determined by taking into account the effect of the individual's prescribed treatment. See 20 CFR 416.930.

(3) *Compassionate allowance list.* Conditions listed in the "List of Compassionate Allowances Conditions" maintained by the SSA are deemed to meet the requirements of section 529A(e)(1)(B) regarding the filing of a disability certification, if the condition was present and produced marked and severe functional limitations before the date on which the individual attained age 26. To establish that an individual with such a condition satisfies the definition of an eligible individual, the individual must identify the condition and certify to the qualified ABLE program both the presence of the condition and its resulting marked and severe functional limitations prior to age 26, in a manner specified by the qualified ABLE program.

(4) *Additional guidance.* Additional guidance on conditions deemed to meet the requirements of section 529A(e)(1)(B) may be identified in future guidance published in the Internal Revenue Bulletin. See § 601.601(d)(2) of this chapter.

(5) *Restriction on use of certification.* No inference may be drawn from a disability certification described in this paragraph (e) for purposes of establishing eligibility for benefits under title II, XVI, or XIX of the Social Security Act.

(f) *Change of designated beneficiary—*(1) *In general.* A qualified ABLE program must permit a change in the designated beneficiary of an ABLE account made during the life of the designated beneficiary. At the time when the change becomes effective, the

successor designated beneficiary must be an eligible individual. However, a qualified ABLE program may limit the change in designated beneficiary to a member of the family as defined in § 1.529A-1(b)(12) of the current designated beneficiary.

(2) *Change effective upon death.* A qualified ABLE program may permit a change in the designated beneficiary of an ABLE account, made during the life of the designated beneficiary, to take effect upon the death of the designated beneficiary. The amount to be transferred pursuant to such a beneficiary designation is first subject to the payment of any qualified disability expenses incurred before the designated beneficiary's death but not yet paid and those described in paragraph (o) of this section, and is subject to the provisions of § 1.529A-4.

(g) *Contributions—*(1) *Permissible property.* Except in the case of a program-to-program transfer or a change in designated beneficiary to a new designated beneficiary who is an eligible individual and a member of the family of the former designated beneficiary, contributions to an ABLE account may be made only in cash. A qualified ABLE program may allow cash contributions to be made in the form of a check, money order, credit card, electronic transfer, after-tax payroll deduction, or similar method.

(2) *Annual contributions limit—*(i) *In general.* Except as provided in paragraph (g)(2)(ii) of this section, a qualified ABLE program must provide that no contribution to an ABLE account will be accepted to the extent such contribution, when added to all other contributions (whether from the designated beneficiary or one or more other persons) to that ABLE account made during the designated beneficiary's taxable year causes the total of such contributions during that year to exceed the amount in effect under section 2503(b) for the calendar year in which the designated beneficiary's taxable year begins. See paragraph (k)(2) of this section for purposes of applying the rules in this paragraph (g)(2) to rollovers, program-to-program transfers, and designated beneficiary changes.

(ii) *Additional contributions by an employed designated beneficiary—*(A) *In general.* An employed designated beneficiary defined in paragraph (g)(2)(iii)(A) of this section may contribute amounts up to the limit specified in paragraph (g)(2)(ii)(B) of this section in addition to the amount specified in paragraph (g)(2)(i) of this section. Although a designated beneficiary's contributions subject to

this compensation income limit do not have to be made from that compensation income, any contribution of the designated beneficiary's compensation income made directly by the designated beneficiary's employer is a contribution made by the designated beneficiary. Once the designated beneficiary has made contributions equal to the limit described in paragraph (g)(2)(ii)(B) of this section, additional contributions by the designated beneficiary may be made if permissible under paragraph (g)(2)(i) of this section.

(B) *Amount of additional permissible contribution.* Any additional contribution made by the designated beneficiary pursuant to paragraph (g)(2)(ii)(A) of this section is limited to the lesser of—

(1) The designated beneficiary's compensation as defined by section 219(f)(1) for the taxable year; or

(2) An amount equal to the applicable poverty line, as defined in paragraph (g)(2)(iii)(B) of this section, for a one-person household for the calendar year preceding the calendar year in which the designated beneficiary's taxable year begins.

(iii) *Additional definitions.* In addition to the definitions in § 1.529A-1(b), the following definitions also apply for the purposes of this section—

(A) *Employed designated beneficiary* means a designated beneficiary who is an employee (including an employee within the meaning of section 401(c)), with respect to whom no contribution is made for the taxable year to—

(1) A defined contribution plan (within the meaning of section 414(i)) with respect to which the requirements of sections 401(a) or 403(a) are met;

(2) An annuity contract described in section 403(b); and

(3) An eligible deferred compensation plan described in section 457(b).

(B) *Applicable poverty line* means the amount provided in the poverty guidelines updated periodically in the **Federal Register** by the U.S. Department of Health and Human Services under the authority of 42 U.S.C. 9902(2) for the State of residence of the employed designated beneficiary. If the designated beneficiary lives in more than one State during the taxable year, the applicable poverty line is the poverty line for the State in which the designated beneficiary resided longer than in any other State during that year.

(C) *Excess compensation contribution* means the amount by which the amount contributed during the taxable year of an employed designated beneficiary to the designated beneficiary's ABLE account exceeds the limit in effect under section 529A(b)(2)(B)(ii) and

paragraph (g)(2)(ii)(B) of this section for the calendar year in which the taxable year of the employed designated beneficiary begins.

(iv) *Example.* The provisions of paragraph (g)(2)(ii) of this section may be illustrated by the following example: In 2020, A, an employed designated beneficiary as defined in paragraph (g)(2)(iii)(A) of this section, lives in Hawaii. A's compensation, as defined by section 219(f)(1), for 2020 is \$20,000. The poverty line for a one-person household in Hawaii was \$14,380 in 2019. Because A's compensation exceeded the applicable poverty line amount, A's additional permissible contribution in 2019 is limited to \$14,380, the amount of the 2019 applicable poverty line.

(v) *Ensuring contribution limit is met—(A) Responsibility.* The employed designated beneficiary, or the person acting on his or her behalf, is solely responsible for ensuring that the requirements in section 529A(b)(2)(B)(ii) and paragraph (g)(2)(ii) of this section are met and for maintaining adequate records for that purpose.

(B) *Certification.* A qualified ABLE program may allow a designated beneficiary (or the person acting on his or her behalf) to certify, under penalties of perjury, and in the manner specified by the qualified ABLE program that—

(1) The designated beneficiary is an employed designated beneficiary; and

(2) The designated beneficiary's contributions of compensation are not excess compensation contributions.

(3) *Cumulative limit—(i) In general.* A qualified ABLE program must provide adequate safeguards to prevent aggregate contributions on behalf of a designated beneficiary in excess of the limit established by that State under section 529(b)(6). For purposes of the preceding sentence, aggregate contributions on behalf of a designated beneficiary include contributions to any prior ABLE account maintained by any State or its agency or instrumentality for the same designated beneficiary, or any former designated beneficiary to the extent his or her ABLE account funds were transferred to the designated beneficiary's ABLE account. The transfer of a designated beneficiary's ABLE account from one qualified ABLE program to another with a lower cumulative limit will not violate this rule, but qualified ABLE programs must prohibit subsequent contributions under this general rule. For purposes of this paragraph (g)(3), contributions do not include rollovers, program-to-program transfers or a designated beneficiary change to a new designated beneficiary who is an eligible individual and

member of the family of the former designated beneficiary as defined in § 1.529A-1(b)(12).

(ii) *Safe harbor.* A qualified ABLE program maintained by a State or its agency or instrumentality satisfies the requirement under section 529A(b)(6) if it refuses to accept any additional contribution to an ABLE account (except as provided to the contrary in paragraph (g)(3)(i) of this section) while the balance in that account equals or exceeds the limit established by that State under section 529(b)(6). Nevertheless, without regard to the categories of transfers that caused the account balance to exceed the State limit, once the account balance falls below that limit, additional contributions, subject to the annual contributions limit under paragraph (g)(2) of this section and the limit established by such State under section 529(b)(6), again may be accepted.

(4) *Return of excess contributions, excess compensation contributions, and excess aggregate contributions.* If an excess contribution as defined in § 1.529A-1(b)(9), an excess compensation contribution as defined in paragraph (g)(2)(iii)(C) of this section, or an excess aggregate contribution as defined in § 1.529A-1(b)(10) is deposited into or allocated to the ABLE account of a designated beneficiary, a qualified ABLE program must return that excess contribution, excess compensation contribution, or excess aggregate contribution, including all net income attributable to that contribution, as determined under the rules set forth in § 1.408-11 (treating references to an IRA as references to an ABLE account and references to returned contributions under section 408(d)(4) as references to excess contributions or excess aggregate contributions), to the person or persons who made that contribution. Each excess contribution, excess compensation contribution, and excess aggregate contribution must be returned to its contributor(s) on a last-in-first-out basis until the entire excess, along with all net income attributable to such excess, has been returned. In the case of an excess compensation contribution, the employed designated beneficiary, or the person acting on the employed designated beneficiary's behalf, is responsible for identifying any excess compensation contribution and for requesting the return of the excess compensation contribution. Returned contributions must be received by the contributor(s) on or before the due date (including extensions) of the Federal income tax return of the designated beneficiary for the taxable year in which the excess contribution or excess

aggregate contribution was made. See § 1.529A-3(a) for Federal income tax considerations for the contributor(s). If an excess contribution or excess aggregate contribution and the net income attributable to the excess contribution or excess aggregate contribution are returned to a contributor other than the designated beneficiary, the qualified ABLE program must notify the designated beneficiary of such return at the time of the return. No notification is required if amounts are rejected by the qualified ABLE program before they are deposited into or allocated to the designated beneficiary's ABLE account.

(5) *Restriction of contributors.* A qualified ABLE program may allow the designated beneficiary, from time to time, to restrict who may make contributions to the designated beneficiary's ABLE account.

(h) *Qualified disability expenses—(1) In general.* Qualified disability expenses are expenses incurred that relate to the blindness or disability of the designated beneficiary of the ABLE account and are for the benefit of that designated beneficiary in maintaining or improving his or her health, independence, or quality of life. See § 1.529A-1(b)(15). Such expenses include, but are not limited to, expenses related to the designated beneficiary's education, housing, transportation, employment training and support, assistive technology and related services, personal support services, health, prevention and wellness, financial management and administrative services, legal fees, expenses for oversight and monitoring, and funeral and burial expenses, as well as other expenses that may be identified from time to time in future guidance published in the Internal Revenue Bulletin. See § 601.601(d)(2) of this chapter. Qualified disability expenses include basic living expenses and are not limited to items for which there is a medical necessity or which solely benefit an individual with a disability.

(2) *Example.* The following example illustrates this paragraph (h): B, an individual, has a medically determined mental impairment that causes marked and severe limitations on B's ability to navigate and communicate. A smart phone would enable B to navigate and communicate more safely and effectively, thereby helping B to maintain B's independence and to improve B's quality of life. Therefore, the expense of buying, using, and maintaining a smart phone that is used by B would be a qualified disability expense.

(i) *Separate accounting.* A program will not be treated as a qualified ABLE program unless it provides separate accounting for each ABLE account. Separate accounting requires that contributions for the benefit of a designated beneficiary and any earnings attributable thereto must be allocated to that designated beneficiary's ABLE account. Whether or not a program provides each designated beneficiary an annual account statement showing the total account balance, the investment in the account, the accrued earnings, and the distributions from the account, the program must give this information to the designated beneficiary upon request.

(j) *Program-to-program transfers.* A qualified ABLE program may permit a change of qualified ABLE program or a change of designated beneficiary by means of a program-to-program transfer as defined in § 1.529A-1(b)(13). In that event, subject to any contrary provisions or limitations adopted by the qualified ABLE program, rules similar to the rules of § 1.401(a)(31)-1, Q&A-3 and 4 (which apply for purposes of a direct rollover from a qualified plan to an eligible retirement plan) apply for purposes of determining whether an amount is paid in the form of a program-to-program transfer.

(k) *Carryover of attributes*—(1) *In general.* Upon a rollover, program-to-program transfer, or change of designated beneficiary, all of the attributes of the former ABLE account relevant for purposes of calculating the investment in the account are applicable to the recipient ABLE account. The portion of the rollover or transfer amount that constituted investment in the account from which the distribution or transfer was made is added to investment in the recipient ABLE account. In addition, the portion of the rollover or transfer amount that constituted earnings of the account from which the distribution or transfer was made is added to the earnings of the recipient ABLE account.

(2) *Annual contribution limit.* Upon a rollover or program-to-program transfer, for purposes of applying the annual contribution limit under paragraph (g)(2) of this section to the transferee account, annual contributions to the designated beneficiary's transferor ABLE account during the taxable year in which the rollover or program-to-program transfer occurs are included. However, upon a change of designated beneficiary, or upon a rollover or program-to-program transfer to the ABLE account of a different designated beneficiary who is both a member of the family as defined in § 1.529A-1(b)(12) and an eligible individual, no amounts

contributed to the prior designated beneficiary's ABLE account are included when applying the annual contribution limit under paragraph (g)(2) of this section.

(3) *Investment direction limit.* Upon a rollover or program-to-program transfer, the number of investment directions by the designated beneficiary include the number of investment directions made prior to the rollover or program-to-program transfer during the same taxable year for purposes of paragraph (l) of this section. However, upon a change of designated beneficiary, or upon a rollover or program-to-program transfer to the ABLE account of a different designated beneficiary who is both a member of the family as defined in § 1.529A-1(b)(12) and an eligible individual, the number of investment directions made for the prior designated beneficiary's ABLE account are not included in determining the number of investment directions made for the new designated beneficiary's ABLE account in that same year.

(l) *Investment direction.* A program will not be treated as a qualified ABLE program unless it provides that the designated beneficiary of an ABLE account established under such program may direct, whether directly or indirectly, the investment of any contributions to the program (or any earnings thereon) no more than two times in any calendar year. Such an investment direction does not include a request to transfer any part of the account balance from an investment option to a cash equivalent option to effectuate a distribution, or the automatic rebalancing of the assets of an ABLE account to maintain the asset allocation level chosen when the account was established or by a subsequent investment direction.

(m) *No pledging of interest as security for a loan.* A program will not be treated as a qualified ABLE program unless the terms of the program, or a State statute or regulation that governs the program, prohibit any interest in the program or any portion thereof from being used as security for a loan. For this purpose, the program administrator's advance of funds to satisfy a withdrawal request during the period between the sale of an asset in the ABLE account (whose value is sufficient to satisfy the withdrawal request) and the clearing or settlement of that sale, does not constitute a loan, pledge, or grant of security for a loan. Similarly, the use of checking accounts or debit cards to facilitate a qualified ABLE program's ability to make distributions will not be treated as a pledge or grant of security for a loan during the period between the use of the

check or debit card and the clearing or settlement of that transaction, provided that the ABLE program does not advance funds to a designated beneficiary in excess of the amount in the designated beneficiary's ABLE account.

(n) *No sale or exchange.* A qualified ABLE program must ensure that no interest in an ABLE account may be sold or exchanged.

(o) *Post-death payments.* A qualified ABLE program must provide that a portion or all of the balance remaining in the ABLE account of a deceased designated beneficiary must be distributed to a State that files a claim against the designated beneficiary or the ABLE account itself with respect to benefits provided to the designated beneficiary under that State's Medicaid plan established under title XIX of the Social Security Act. The payment of such claim (if any) will be made only after providing for the payment from the designated beneficiary's ABLE account of the designated beneficiary's funeral and burial expenses (including the unpaid balance of a pre-death contract for those services) and all outstanding payments due for his or her other qualified disability expenses, and will be limited to the amount of the total medical assistance paid for the designated beneficiary after the establishment of the ABLE account over the amount of any premiums paid, whether from the ABLE account or otherwise by or on behalf of the designated beneficiary, to a Medicaid Buy-In program under any such State Medicaid plan. The establishment of the ABLE account is the date on which the ABLE account was established or, if earlier, the date on which was established any ABLE account for the same designated beneficiary from which amounts were rolled over or transferred to the ABLE account, but in no event earlier than the date on which the designated beneficiary became the designated beneficiary of the account from which amounts were transferred. After the expiration of the applicable statute of limitations for filing Medicaid claims against the designated beneficiary's estate, a qualified ABLE program may distribute the balance of the ABLE account to the successor designated beneficiary or, if none, to the deceased designated beneficiary's estate. A State law prohibiting the filing of such a claim against either the ABLE account or the designated beneficiary's estate will not prevent that State's program from being a qualified ABLE program.

(p) *Reporting requirements.* A qualified ABLE program must comply

with all applicable reporting requirements, including without limitation those described in §§ 1.529A–5 through 1.529A–7.

(q) *Applicability date.* This section applies to calendar years beginning on or after January 1, 2021. See § 1.529A–8 for the provision of transition relief.

§ 1.529A–3 Tax treatment.

(a) *Taxation of distributions*—(1) *In general.* Each distribution from an ABLE account consists of an earnings portion of the account (computed in accordance with paragraph (c) of this section) and investment in the account. If the total amount distributed from an ABLE account to or for the benefit of the designated beneficiary of that ABLE account during his or her taxable year does not exceed the qualified disability expenses of the designated beneficiary paid during that year, no amount distributed is includible in the gross income of the designated beneficiary for that year. If the total amount distributed from an ABLE account to or for the benefit of the designated beneficiary of that ABLE account during his or her taxable year exceeds the qualified disability expenses of the designated beneficiary paid during that year (regardless of when incurred), the distributions from the ABLE account, except to the extent excluded from gross income under this section or any other provision of chapter 1 of the Internal Revenue Code, must be included in the gross income of the designated beneficiary in the manner provided under this section and section 72. The amount to be included in gross income is based on the earnings portion of each distribution, computed in accordance with paragraph (c) of this section. The earnings portion that is includible in gross income is the sum of the earnings portion of all distributions made in that year, reduced by an amount that bears the same ratio to the total earnings portion as the amount of qualified disability expenses paid during the year bears to such total distributions during the year. If an excess contribution or excess aggregate contribution is returned within the time period required in § 1.529A–2(g)(4), any net income distributed is includible in the gross income of the contributor(s) in the taxable year in which the excess contribution or excess aggregate contribution was made.

(2) *Additional period.* The designated beneficiary may treat as having been paid during the preceding taxable year qualified disability expenses paid on or before the 60th day immediately following the end of the designated beneficiary's preceding taxable year.

Qualified disability expenses treated, pursuant to the rule in the preceding sentence, as having been paid during the designated beneficiary's taxable year immediately prior to the year of their actual payment may not be included in the total qualified disability expenses for the year in which they were paid.

(b) *Additional exclusions from gross income*—(1) *Rollover.* A rollover as defined in § 1.529A–1(b)(16) is not included in gross income under paragraph (a) of this section.

(2) *Program-to-program transfers.* A program-to-program transfer as defined in § 1.529A–1(b)(13) is not a distribution and is not included in gross income under paragraph (a) of this section.

(3) *Change of designated beneficiary*—(i) *In general.* A change of designated beneficiary of an ABLE account is not treated as a distribution for purposes of section 529A, and is not included in gross income under paragraph (a) of this section, if the successor designated beneficiary is—

(A) An eligible individual for the taxable year in which the change is made; and

(B) A member of the family (as defined in § 1.529A–1(b)(12)) of the former designated beneficiary.

(ii) *Other designated beneficiary changes.* In the case of any change of designated beneficiary not described in paragraph (b)(3)(i) of this section, the former designated beneficiary of that ABLE account will be treated as having received a distribution of the fair market value of the assets in that ABLE account on the date on which the change is made to the new designated beneficiary.

(4) *Payments to creditors post-death.* Distributions made after the death of the designated beneficiary in payment of outstanding obligations due for qualified disability expenses, as well as the funeral and burial expenses of the designated beneficiary, are not included in gross income of the designated beneficiary or his or her estate. Included among these obligations is the post-death payment of any part of a claim filed against the deceased designated beneficiary or his or her estate or ABLE account by a State with respect to benefits provided to the designated beneficiary under that State's Medicaid plan.

(c) *Computation of earnings.* The earnings portion of a distribution is equal to the product of the amount of the distribution and the earnings ratio, as defined in § 1.529A–1(b)(7). The balance of the distribution (the amount of the distribution minus the earnings portion of that distribution) is the portion of that distribution that

constitutes the return of investment in the account.

(d) *Additional tax on amounts includible in gross income*—(1) *In general.* If any amount of a distribution from an ABLE account is includible in the gross income of a person for any taxable year under paragraph (a) of this section (includible amount), the income tax imposed on that person by chapter 1 of the Internal Revenue Code will be increased by an amount equal to 10 percent of the includible amount.

(2) *Exceptions*—(i) *Distributions on or after the death of the designated beneficiary.* Paragraph (d)(1) of this section does not apply to any distribution made from the ABLE account on or after the death of the designated beneficiary to the estate of the designated beneficiary, to an heir or legatee of the designated beneficiary, or to a creditor described in paragraph (b)(4) of this section.

(ii) *Returned excess contributions and additional accounts.* Paragraph (d)(1) of this section does not apply to any return made in accordance with § 1.529A–2(g)(4) of an excess contribution as defined in § 1.529A–1(b)(9), an excess compensation contribution as defined in § 1.529A–2(g)(2)(iii)(C), excess aggregate contribution as defined in § 1.529A–1(b)(10), or an additional account as referenced in § 1.529A–2(c)(3)(ii)(A), (B), or (C).

(e) *Tax on excess contributions.* Under section 4973(h), a contribution to an ABLE account in excess of the annual contributions limit described in § 1.529A–2(g)(2) is subject to an excise tax in an amount equal to 6 percent of the excess contribution. However, any the excess contribution or excess compensation contribution as defined in § 1.529A–2(g)(2)(iii)(C) returned in accordance with the provisions of § 1.529A–2(g)(4) is not treated as a contribution.

(f) *Filing requirements.* A qualified ABLE program is not required to file Form 990, "Return of Organization Exempt From Income Tax," Form 1041, "U.S. Income Tax Return for Estates and Trusts," or Form 1120, "U.S. Corporation Income Tax Return." However, a qualified ABLE program is required to file Form 990–T, "Exempt Organization Business Income Tax Return," if such filing would be required under the rules of §§ 1.6012–2(e) and 1.6012–3(a)(5) if the ABLE program were an organization described in those sections.

(g) *No inference outside section 529A.* The rules provided in this section concerning the Federal tax treatment of contributions apply only for purposes of the application of section 529A. No

inference is intended with respect to the application of any other Code provisions or Federal tax doctrines. For example, a contribution made by an employer to the ABLE account of an employee or an employee's family member is subject to the rules governing the Federal taxation of compensation.

(h) *Applicability date.* This section applies to calendar years beginning on or after January 1, 2021. See § 1.529A-8 for the provision of transition relief.

§ 1.529A-4 Gift, estate, and generation-skipping transfer taxes.

(a) *Contributions*—(1) *In general.* Each contribution by a person to an ABLE account other than by the designated beneficiary of that account is treated as a completed gift to the designated beneficiary of the account for gift tax purposes. Under the applicable Federal gift tax rules, a contribution from a corporation, partnership, trust, estate, or other entity is treated as a gift by the shareholders, partners, or other beneficial owners in proportion to their respective ownership interests in the entity. See § 25.2511-1(c) and (h) of this chapter. A gift to an ABLE account is not treated as either a gift of a future interest in property, or a qualified transfer under section 2503(e). To the extent a contributor's gifts to the designated beneficiary, including gifts paid into the designated beneficiary's ABLE account, do not exceed the annual limit in section 2503(b), the contribution is not a taxable gift. This provision, however, does not change any other provision applicable to the transfer. For example, a contribution by the employer of the designated beneficiary's parent continues to constitute earned income to the parent and then a gift by the parent to the designated beneficiary. The timely return of an excess contribution or an excess aggregate contribution in accordance with § 1.529A-2(g)(4) is not a taxable gift.

(2) *Generation-skipping transfer (GST) tax.* To the extent the contribution into an ABLE account is a nontaxable gift for Federal gift tax purposes, the inclusion ratio for purposes of the GST tax will be zero pursuant to section 2642(c)(1).

(3) *Designated beneficiary as contributor.* A designated beneficiary may make a contribution to fund his or her own ABLE account. That contribution is not a gift.

(b) *Distributions.* No distribution from an ABLE account to or for the benefit of the designated beneficiary is treated as a taxable gift to that designated beneficiary.

(c) *Transfer to another designated beneficiary.* Neither gift tax nor

generation-skipping transfer tax applies to the transfer (by rollover, program-to-program transfer, or change of beneficiary) of part or all of an ABLE account to the ABLE account of a different designated beneficiary if the successor designated beneficiary is both an eligible individual and a member of the family (as described in § 1.529A-1(b)(12)) of the designated beneficiary. Any other transfer will constitute a gift by the designated beneficiary to the successor designated beneficiary, and the usual gift and GST tax rules will apply.

(d) *Transfer tax on death of designated beneficiary.* Upon the death of the designated beneficiary, the designated beneficiary's ABLE account is includible in his or her gross estate for estate tax purposes under section 2031. The payment of outstanding qualified disability expenses and the payment of certain claims made by a State under its Medicaid plan may be deductible for estate tax purposes if the requirements of section 2053 are satisfied.

(e) *Applicability date.* This section applies to calendar years beginning on or after January 1, 2021. See § 1.529A-8 for the provision of transition relief.

§ 1.529A-5 Reporting of the establishment of and contributions to an ABLE account.

(a) *In general.* A filer defined in paragraph (b)(1) of this section must, with respect to each ABLE account—

(1) File an annual information return, as described in paragraph (c) of this section, with the Internal Revenue Service; and

(2) Furnish an annual statement, as described in paragraph (d) of this section, to the designated beneficiary of the ABLE account.

(b) *Additional definitions.* In addition to the definitions in § 1.529A-1(b), the following definitions also apply for purposes of this section—

(1) *Filer* means the State or its agency or instrumentality that establishes and maintains the qualified ABLE program under which an ABLE account is established. The filing may be done by either an officer or employee of the State or its agency or instrumentality having control of the qualified ABLE program, or the officer's or employee's designee.

(2) *TIN* means taxpayer identification number as defined in section 7701(a)(41).

(c) *Requirement to file return*—(1) *Form of return.* For purposes of reporting the information described in paragraph (c)(2) of this section, the filer must file Form 5498-QA, "ABLE Account Contribution Information," or any successor form, together with Form

1096, "Annual Summary and Transmittal of U.S. Information Returns."

(2) *Information included on return.*

With respect to each ABLE account, the filer must include on the return—

(i) The name, address, and TIN of the designated beneficiary of the ABLE account;

(ii) The name, address, and TIN of the filer;

(iii) Information regarding the establishment of the ABLE account, as required by the form and its instructions;

(iv) Information regarding the disability certification or other basis for eligibility of the designated beneficiary, as required by the form and its instructions. For further information regarding eligibility and disability certification, see § 1.529A-2(d) and (e), respectively;

(v) The total amount of any contributions made with respect to the ABLE account during the calendar year; such contributions do not include any contribution rejected and returned to the contributor before being deposited into or allocated to the ABLE account or any excess contributions, excess compensation contributions, or excess aggregate contributions returned as described in § 1.529A-2(g)(4);

(vi) The fair market value of the ABLE account as of the last day of the calendar year; and

(vii) Any other information required by the form, its instructions, or published guidance. See §§ 601.601(d) and 601.602 of this chapter.

(3) *Time and manner of filing return*—(i) *In general.* Except as provided in paragraph (c)(3)(ii) of this section, the information returns required under this paragraph must be filed on or before May 31 of the year following the calendar year with respect to which the return is being filed, in accordance with the forms and their instructions.

(ii) *Extensions of time.* See §§ 1.6081-1 and 1.6081-8 for rules relating to extensions of time to file information returns required in this section.

(iii) *Electronic filing.* See § 301.6011-2 of this chapter for rules relating to electronic filing. See also Instructions for Forms 1099-QA and 5498-QA, Distributions From ABLE Accounts and ABLE Account Contribution Information.

(iv) *Substitute forms.* The filer may file the returns required under this paragraph (c) on an acceptable substitute form. See Publication 1179, "General Rules and Specifications for Substitute Forms 1096, 1098, 1099,

5498, and Certain Other Information Returns.”

(d) *Requirement to furnish statement*—(1) *In general.* The filer must furnish a statement to the designated beneficiary of the ABLE account for which it is required to file a Form 5498-QA (or any successor form). The statement must include—

(i) The information required under paragraph (c)(2) of this section;

(ii) A legend that identifies the statement as important tax information that is being furnished to the Internal Revenue Service; and

(iii) The name and address of the office or department of the filer that is the information contact for questions regarding the ABLE account to which the Form 5498-QA relates.

(2) *Time and manner of furnishing statement*—(i) *In general.* Except as provided in paragraph (d)(2)(ii) of this section, the filer must furnish the statement described in paragraph (d)(1) of this section to the designated beneficiary on or before March 15 of the year following the calendar year with respect to which the statement is being furnished. If mailed, the statement must be sent to the designated beneficiary's last known address. The statement may be furnished electronically, as provided in § 1.529A-7.

(ii) *Extensions of time.* The Internal Revenue Service may, at its discretion, grant an extension of time to furnish statements required in this section.

(3) *Copy of Form 5498-QA.* The filer may satisfy the requirement of this paragraph (d) by furnishing either a copy of Form 5498-QA (or successor form) or an acceptable substitute form. See Publication 1179, “General Rules and Specifications for Substitute Forms 1096, 1098, 1099, 5498, and Certain Other Information Returns.”

(e) *Request for TIN of designated beneficiary.* The filer must request the TIN of the designated beneficiary at the time the ABLE account is established if the filer does not already have a record of the designated beneficiary's correct TIN. The filer must clearly notify the designated beneficiary that the law requires the designated beneficiary to furnish a TIN so that it may be included on an information return to be filed by the filer. The designated beneficiary may provide his or her TIN in any manner including orally, in writing, or electronically. If the TIN is furnished in writing, no particular form is required. Form W-9, “Request for Taxpayer Identification Number and Certification,” may be used, or the request may be incorporated into the forms related to the establishment of the ABLE account.

(f) *Penalties*—(1) *Failure to file return.* The section 6693 penalty may apply to the filer that fails to file information returns at the time and in the manner required by this section, unless it is shown that such failure is due to reasonable cause. See section 6693 and § 301.6693-1 of this chapter.

(2) *Failure to furnish TIN.* The section 6723 penalty may apply to any designated beneficiary who fails to furnish his or her TIN to the filer. See section 6723, and § 301.6723-1 of this chapter, for rules relating to the penalty for failure to furnish a TIN.

(g) *Applicability date.* The rules of this section apply to information returns required to be filed, and payee statements required to be furnished, after December 31, 2020. See § 1.529A-8 for the provision of transition relief.

§ 1.529A-6 Reporting of distributions from and termination of an ABLE account.

(a) *In general.* The filer as defined in § 1.529A-5(b)(1) must, with respect to each ABLE account from which any distribution is made or which is terminated during the calendar year—

(1) File an annual information return, as described paragraph (b) of this section, with the Internal Revenue Service; and

(2) Furnish an annual statement, as described in paragraph (c) of this section, to the designated beneficiary of the ABLE account and to each contributor who received a returned contribution in accordance with § 1.529A-2(g)(4) attributable to the calendar year.

(b) *Requirement to file return*—(1) *Form of return.* For purposes of reporting the information in paragraph (b)(2) of this section, the filer must file Form 1099-QA, “Distributions From ABLE Accounts,” or any successor form, together with Form 1096, “Annual Summary and Transmittal of U.S. Information Returns.”

(2) *Information included on return.* The filer must include on the return—

(i) The name, address, and TIN of the recipient of the payment, whether the designated beneficiary of the ABLE account or any contributor who received a returned contribution in accordance with § 1.529A-2(g)(4) attributable to the calendar year;

(ii) The name, address, and TIN of the filer;

(iii) Whether the return is being filed with respect to the designated beneficiary or to a contributor;

(iv) The aggregate amount of distributions or returned contributions (including net income attributable to the returned contributions) from the ABLE

account to the recipient during the calendar year;

(v) Information as to basis and earnings with respect to such distributions or returns of contributions;

(vi) Information regarding termination (if any) of the ABLE account if the recipient is the designated beneficiary;

(vii) Information regarding each program-to-program transfer from the ABLE account during the designated beneficiary's taxable year; and

(viii) Any other information required by the form, its instructions, or published guidance. See §§ 601.601(d) and 601.602 of this chapter.

(3) *Information excluded.* A State filing a claim against the estate or ABLE account of a deceased designated beneficiary with respect to benefits provided to the designated beneficiary under that State's Medicaid plan is a creditor, and not a beneficiary, so the payment of the claim is not a distribution from the ABLE account and should not be reported as such on the Form 1099-QA for that year.

(4) *Time and manner of filing return*—(i) *In general.* Except as provided in paragraph (b)(4)(ii) of this section, the Forms 1099-QA and 1096 must be filed on or before February 28 (March 31 if filing electronically) of the year following the calendar year with respect to which the return is being filed, in accordance with the forms and their instructions.

(ii) *Extensions of time.* See §§ 1.6081-1 and 1.6081-8 for rules relating to extensions of time to file information returns required in this section.

(iii) *Electronic filing.* See § 301.6011-2 of this chapter for rules relating to electronic filing. See also Instructions for Forms 1099-QA and 5498-QA, Distributions From ABLE Accounts and ABLE Account Contribution Information.

(iv) *Substitute forms.* The filer may file the return required under this paragraph (b) on an acceptable substitute form. See Publication 1179, “General Rules and Specifications for Substitute Forms 1096, 1098, 1099, 5498, and Certain Other Information Returns.”

(c) *Requirement to furnish statement*—(1) *In general.* The filer must furnish a statement to the designated beneficiary and each contributor (if any) of the ABLE account for which it is required to file a Form 1099-QA (or any successor form). The statement must include—

(i) The information required under paragraph (b)(2) of this section.

(ii) A legend that identifies the statement as important tax information

that is being furnished to the Internal Revenue Service; and

(iii) The name and address of the office or department of the filer that is the information contact for questions regarding the ABLÉ account to which the Form 1099-QA relates.

(2) *Time and manner of furnishing statement*—(i) *In general.* Except as provided in paragraph (c)(2)(ii) of this section, a filer must furnish the statement described in paragraph (c)(1) of this section to the designated beneficiary or contributor on or before January 31 of the year following the calendar year with respect to which the statement is being furnished. If mailed, the statement must be sent to the recipient's last known address. The statement may be furnished electronically, as provided in § 1.529A-7.

(ii) *Extensions of time.* The Internal Revenue Service may, at its discretion, grant an extension of time to furnish statements required in this section.

(3) *Copy of Form 1099-QA.* A filer may satisfy the requirement of this paragraph (c) by furnishing either a copy of Form 1099-QA (or successor form) or an acceptable substitute form. See Publication 1179, "General Rules and Specifications for Substitute Forms 1096, 1098, 1099, 5498, and Certain Other Information Returns."

(d) *Request for TIN of contributor(s)*—(1) *In general.* Except as provided in paragraph (d)(2) of this section, a filer must request the TIN of each contributor to the ABLÉ account at the time a contribution is made, if the filer does not already have a record of that person's correct TIN.

(2) *Exception.* If the filer has a system in place to identify and reject amounts that either would constitute an excess contribution or excess aggregate contribution (as defined in § 1.529A-1(b)(9) or (10), respectively) or were contributed to an additional ABLÉ account as described in § 1.529A-2(c)(3)(ii)(C) (excess amounts) before those excess amounts are deposited into or allocated to an ABLÉ account, the filer need not request the TIN of each contributor at the time of contribution. A filer with such a system must request a contributor's TIN only if and when an excess contribution or excess aggregate contribution nevertheless is deposited into or allocated to an account and the filer must return the excess amounts including net income to the contributor. The filer must clearly notify each such contributor to the account that the law requires that person to furnish a TIN so that it may be included on an information return to be filed by the filer. The contributor may provide his or

her TIN in any manner including orally, in writing, or electronically. If the TIN is furnished in writing, no particular form is required. Form W-9, "Request for Taxpayer Identification Number and Certification," may be used, or the request may be incorporated into the forms related to the establishment of the ABLÉ account.

(e) *Penalties*—(1) *Failure to file return.* The section 6693 penalty may apply to a filer that fails to file information returns at the time and in the manner required by this section, unless it is shown that such failure is due to reasonable cause. See section 6693 and § 301.6693-1 of this chapter.

(2) *Failure to furnish TIN.* The section 6723 penalty may apply to any contributor who fails to furnish his or her TIN to the filer in accordance with paragraph (d) of this section. See section 6723, and § 301.6723-1 of this chapter, for rules relating to the penalty for failure to furnish a TIN.

(f) *Applicability date.* The rules of this section apply to information returns required to be filed, and payee statements required to be furnished, after December 31, 2020. See § 1.529A-8 for the provision of transition relief.

§ 1.529A-7 Electronic furnishing of statements to designated beneficiaries and contributors.

(a) *Electronic furnishing of statements*—(1) *In general.* A filer required under § 1.529A-5 or § 1.529A-6 to furnish a written statement to a designated beneficiary of or contributor to an ABLÉ account may furnish the statement in an electronic format in lieu of a paper format. A filer who meets the requirements of paragraphs (a)(2) through (6) of this section is treated as furnishing the required statement.

(2) *Consent*—(i) *In general.* The recipient of the statement must have affirmatively consented to receive the statement in an electronic format. The consent may be made electronically in any manner that reasonably demonstrates that the recipient can access the statement in the electronic format in which it will be furnished to the recipient. Alternatively, the consent may be made in a paper document if it is confirmed electronically.

(ii) *Withdrawal of consent.* The consent requirement of this paragraph (a)(2) is not satisfied if the recipient withdraws the consent and the withdrawal takes effect before the statement is furnished. The filer may provide that a withdrawal of consent takes effect either on the date it is received by the filer or on another date no more than 60 days later. The filer also may provide that a request for a

paper statement will be treated as a withdrawal of consent.

(iii) *Change in hardware or software requirements.* If a change in the hardware or software required to access the statement creates a material risk that the recipient will not be able to access the statement, the filer must, prior to changing the hardware or software, provide the recipient with a notice. The notice must describe the revised hardware and software required to access the statement and inform the recipient that a new consent to receive the statement in the revised electronic format must be provided to the filer if the recipient does not want to withdraw the consent. After implementing the revised hardware and software, the filer must obtain from the recipient, in the manner described in paragraph (a)(2)(i) of this section, a new consent or confirmation of consent to receive the statement electronically.

(iv) *Examples.* For purposes of the following examples that illustrate the rules of this paragraph (a)(2), assume that the requirements of § 1.529A-7(a)(3) have been met:

(A) *Example 1.* Filer F sends Recipient R a letter stating that R may consent to receive statements required under § 1.529A-5 or § 1.529A-6 electronically on a website instead of in a paper format. The letter contains instructions explaining how to consent to receive the statements electronically by accessing the website, downloading the consent document, completing the consent document, and emailing the completed consent back to F. The consent document posted on the website uses the same electronic format that F will use for the electronically furnished statements. R reads the instructions and submits the consent in the manner provided in the instructions. R has consented to receive the statements electronically in the manner described in paragraph (a)(2)(i) of this section.

(B) *Example 2.* Filer F sends Recipient R an email stating that R may consent to receive statements required under § 1.529A-5 or § 1.529A-6 electronically instead of in a paper format. The email contains an attachment instructing R how to consent to receive the statements electronically. The email attachment uses the same electronic format that F will use for the electronically furnished statements. R opens the attachment, reads the instructions, and submits the consent in the manner provided in the instructions. R has consented to receive the statements electronically in the manner described in paragraph (a)(2)(i) of this section.

(C) *Example 3.* Filer F posts a notice on its website stating that Recipient R may receive statements required under § 1.529A–5 or § 1.529A–6 electronically instead of in a paper format. The website contains instructions on how R may access a secure web page and consent to receive the statements electronically. By accessing the secure web page and giving consent, R has consented to receive the statements electronically in the manner described in paragraph (a)(2)(i) of this section.

(3) *Required disclosures*—(i) *In general.* Prior to, or at the time of, a recipient's consent, the filer must provide to the recipient a clear and conspicuous disclosure statement containing each of the disclosures described in paragraphs (a)(3)(ii) through (viii) of this section.

(ii) *Paper statement.* The recipient must be informed that the statement will be furnished on paper if the recipient does not consent to receive it electronically.

(iii) *Scope and duration of consent.* The recipient must be informed of the scope and duration of the consent. For example, the recipient must be informed whether the consent applies to statements furnished every year after the consent is given until it is withdrawn in the manner described in paragraph (a)(3)(v)(A) of this section, or only to the statement required to be furnished on or before the due date immediately following the date on which the consent is given.

(iv) *Post-consent request for a paper statement.* The recipient must be informed of any procedure for obtaining a paper copy of the recipient's statement after giving the consent and whether a request for a paper statement will be treated as a withdrawal of consent.

(v) *Withdrawal of consent.* The recipient must be informed that—

(A) The recipient may withdraw a consent by writing (electronically or on paper) to the person or department whose name, mailing address, and email address is provided in the disclosure statement;

(B) The filer will confirm, in writing (electronically or on paper), the withdrawal and the date on which it takes effect; and

(C) A withdrawal of consent does not apply to a statement that was furnished electronically in the manner described in this paragraph (a) before the date on which the withdrawal of consent takes effect.

(vi) *Notice of termination.* The recipient must be informed of the conditions under which a filer will cease furnishing statements electronically to the recipient.

(vii) *Updating information.* The recipient must be informed of the procedures for updating the information needed by the filer to contact the recipient. The filer must inform the recipient of any change in the filer's contact information.

(viii) *Hardware and software requirements.* The recipient must be provided with a description of the hardware and software required to access, print, and retain the statement, and the date when the statement will no longer be available on the website.

(4) *Format.* The electronic version of the statement must contain all required information. See Publication 1179, "General Rules and Specifications for Substitute Forms 1096, 1098, 1099, 5498, and Certain Other Information Returns."

(5) *Notice*—(i) *In general.* If the statement is furnished on a website, the filer must notify the recipient that the statement is posted on a website. The notice may be delivered by mail, electronic mail, or in person. The notice must provide instructions on how to access and print the statement. The notice must include the following statement in capital letters, "IMPORTANT TAX RETURN DOCUMENT AVAILABLE." If the notice is provided by electronic mail, the foregoing statement must be in the subject line of the electronic mail.

(ii) *Undeliverable electronic address.* If an electronic notice described in paragraph (a)(5)(i) of this section is returned as undeliverable, and the correct electronic address cannot be obtained from the filer's records or from the recipient, then the filer must furnish the notice by mail or in person within 30 days after the electronic notice is returned.

(iii) *Corrected statements.* If the filer has corrected a recipient's statement that was furnished electronically, the filer must furnish the corrected statement to the recipient electronically. If the recipient's statement was furnished through a website posting and the filer has corrected the statement, the filer must notify the recipient that it has posted the corrected statement on the website within 30 days of such posting in the manner described in paragraph (a)(5)(i) of this section. The corrected statement or the notice must be furnished by mail or in person if—

(A) An electronic notice of the website posting of an original statement or the corrected statement was returned as undeliverable; and

(B) The recipient has not provided a new email address.

(6) *Access period.* Statements furnished on a website must be retained

on the website through October 15 of the year following the calendar year to which the statements relate (or the first business day after such October 15 if October 15 falls on a Saturday, Sunday, or legal holiday). The filer must maintain access to corrected statements that are posted on the website through October 15 of the year following the calendar year to which the statements relate (or the first business day after such October 15 if October 15 falls on a Saturday, Sunday, or legal holiday) or the date 90 days after the corrected statements are posted, whichever is later. The rules in this paragraph (a)(6) do not replace the filer's obligation to keep records under section 6001 and § 1.6001–1(a).

(b) *Applicability date.* This section applies to statements required to be furnished after December 31, 2020. See § 1.529A–8 for the provision of transition relief.

§ 1.529A–8 Applicability dates and transition relief.

(a) *Applicability dates.* Except as otherwise provided in paragraph (b) of this section, §§ 1.529A–1 through 1.529A–4 apply for calendar years beginning on or after January 1, 2021, §§ 1.529A–5 and 1.529A–6 apply to information returns required to be filed, and payee statements required to be furnished, after December 31, 2020, and § 1.529A–7 applies to statements required to be furnished after December 31, 2020.

(b) *Transition relief*—(1) *In general.* Any program purporting to be a qualified ABLE program will not be disqualified during the transition period set forth in paragraph (b)(2) of this section (transition period) solely because of noncompliance with one or more provisions of §§ 1.529A–1 through 1.529A–7, provided that the program is established and operated in accordance with a reasonable, good faith interpretation of section 529A. Similarly, no ABLE account established and maintained under a program that meets the requirements of this paragraph will fail to qualify as an ABLE account during the transition period. However, to be a qualified ABLE program and an ABLE account under such a program after the transition period, the program and each account established and maintained under the program must be in compliance with §§ 1.529A–1 through 1.529A–7 by the end of the transition period. In no event, however, will a complete failure to file and furnish reports, information returns and payee statements required under section 529A(d)(1) for any accounts established and maintained under the

program (including for calendar years beginning prior to January 1, 2021), be deemed to be due to reasonable cause for purposes of avoiding penalties imposed under section 6693.

(2) *Transition period.* For purposes of paragraph (b)(1) of this section, the transition period begins with the establishment of the program purporting to be a qualified ABLE program and continues through the later of—

(i) November 21, 2022; or

(ii) The day immediately preceding the first day of the qualified ABLE program's first taxable year beginning after the close of the first regular session of the State legislature that begins after November 19, 2020. If a State has a two-year legislative session, each calendar year of such session will be deemed to be a separate regular session of the State legislature for purposes of this paragraph.

(3) *Compliance after transition period.* After the transition period, a program and an account established and maintained under that program must be in compliance with §§ 1.529A-1 through 1.529A-7.

PART 25—GIFT TAXES; GIFTS MADE AFTER DECEMBER 31, 1954

■ **Par. 5.** The authority citation for part 25 continues to read in part as follows:

Authority: 26 U.S.C. 7805.

* * * * *

■ **Par. 6.** Section 25.2501-1 is amended by adding a sentence to the end of paragraph (a)(1) to read as follows:

§ 25.2501-1 Imposition of tax.

(a) * * *

(1) * * * For gift tax rules related to an ABLE account established under section 529A, see § 1.529A-4 of this chapter.

* * * * *

■ **Par. 7.** Section 25.2503-3 is amended by adding a sentence to the end of paragraph (a) to read as follows:

§ 25.2503-3 Future interests in property.

(a) * * * A contribution to an ABLE account established under section 529A is not a future interest.

* * * * *

■ **Par. 8.** Section 25.2503-6 is amended by adding a sentence to the end of paragraph (a) to read as follows:

§ 25.2503-6 Exclusion for certain qualified transfer for tuition or medical expenses.

(a) * * * A contribution to an ABLE account established under section 529A is not a qualified transfer.

* * * * *

■ **Par. 9.** Section 25.2511-2 is amended by adding a sentence to the end of paragraph (a) to read as follows:

§ 25.2511-2 Cessation of donor's dominion and control.

(a) * * * For gift tax rules related to an ABLE account established under section 529A, see § 1.529A-4 of this chapter.

RIN 1018-BE87

Endangered and Threatened Wildlife and Plants; Threatened Species Status With Section 4(d) Rule for the Upper Coosa River Distinct Population Segment of Frecklebelly Madtom and Designation of Critical Habitat

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

SUMMARY: We, the U.S. Fish and Wildlife Service (Service), announce a 12-month finding on a petition to list the frecklebelly madtom (*Noturus munitus*), a fish species from Louisiana, Mississippi, Alabama, Georgia, and Tennessee, as an endangered or threatened species and designate critical habitat under the Endangered Species Act of 1973, as amended (Act). After a review of the best available scientific and commercial information, we find that listing the frecklebelly madtom as an endangered or a threatened species throughout all of its range is not warranted. However, we determined that listing is warranted for a distinct population segment (DPS) of the frecklebelly madtom in the Upper Coosa River in Georgia and Tennessee. Accordingly, we propose to list the Upper Coosa River DPS of the frecklebelly madtom as a threatened species with a rule issued under section 4(d) of the Act ("4(d) rule"). If we finalize this rule as proposed, it would add this DPS to the List of Endangered and Threatened Wildlife and extend the Act's protections to the DPS. We also propose to designate critical habitat for the Upper Coosa River DPS under the Act. In total, approximately 134 river miles (216 kilometers) in Georgia and Tennessee fall within the boundaries of the proposed critical habitat designation. We also announce the availability of a draft economic analysis (DEA) of the proposed designation of critical habitat for the Upper Coosa River DPS.

DATES: We will accept comments received or postmarked on or before January 19, 2021. Comments submitted electronically using the Federal eRulemaking Portal (see **ADDRESSES**, below) must be received by 11:59 p.m. Eastern Time on the closing date. We must receive requests for a public

hearing, in writing, at the address shown in **FOR FURTHER INFORMATION CONTACT** by January 4, 2021.

ADDRESSES: *Written comments:* You may submit comments by one of the following methods:

(1) *Electronically:* Go to the Federal eRulemaking Portal: <http://www.regulations.gov>. In the Search box, enter FWS-R4-ES-2020-0058, which is the docket number for this rulemaking. Then, click on the Search button. On the resulting page, in the Search panel on the left side of the screen, under the Document Type heading, check the Proposed Rule box to locate this document. You may submit a comment by clicking on "Comment Now!"

(2) *By hard copy:* Submit by U.S. mail to: Public Comments Processing, Attn: FWS-R4-ES-2020-0058, U.S. Fish and Wildlife Service, MS: JAO/3W, 5275 Leesburg Pike, Falls Church, VA 22041-3803.

We request that you send comments only by the methods described above. We will post all comments on <http://www.regulations.gov>. This generally means that we will post any personal information you provide us (see Information Requested, below, for more information).

Availability of supporting materials: The species status assessment (SSA) report and other materials relating to this proposal can be found on the Southeast Region website at <https://www.fws.gov/southeast/> and at <http://www.regulations.gov> under Docket No. FWS-R4-ES-2020-0058.

For the critical habitat designation, the coordinates or plot points or both from which the maps are generated are included in the administrative record and are available at <https://www.fws.gov/southeast/>, at <http://www.regulations.gov> under Docket No. FWS-R4-ES-2020-0058, and at the Alabama Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**). Any additional tools or supporting information that we may develop for the critical habitat designation will also be available at the Service website and field office set out above and may also be included in the preamble and/or at <http://www.regulations.gov>.

FOR FURTHER INFORMATION CONTACT: William Pearson, Field Supervisor, U.S. Fish and Wildlife Service, Alabama Ecological Services Field Office, 1208-B Main Street, Daphne, AL 36526; telephone 251-441-5870. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service at 800-877-8339.

SUPPLEMENTARY INFORMATION:

Executive Summary

Why we need to publish a rule. Under the Act, if we determine that a species may be an endangered or threatened species throughout all or a significant portion of its range, we are required to promptly publish a proposal in the **Federal Register** and make a determination on our proposal within 1 year. To the maximum extent prudent and determinable, we must designate critical habitat for any species that we determine to be an endangered or threatened species under the Act. Listing a species as an endangered or threatened species and designation of critical habitat can only be completed by issuing a rule.

What this document does. This rule proposes the listing of the Upper Coosa River distinct population segment (DPS) of frecklebelly madtom as a threatened species with a rule under section 4(d) of the Act and proposes the designation of critical habitat for the DPS.

The basis for our action. Under the Act, we may determine that a species is an endangered or threatened species because of any of five factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence. We have determined that the factors driving the status of the Upper Coosa River DPS are habitat destruction and degradation caused by agriculture and developed land uses resulting in poor water quality (Factor A).

Section 4(a)(3) of the Act requires the Secretary of the Interior (Secretary) to designate critical habitat concurrent with listing to the maximum extent prudent and determinable. Section 3(5)(A) of the Act defines critical habitat as (i) the specific areas within the geographical area occupied by the species, at the time it is listed, on which are found those physical or biological features (I) essential to the conservation of the species and (II) which may require special management considerations or protections; and (ii) specific areas outside the geographical area occupied by the species at the time it is listed, upon a determination by the Secretary that such areas are essential for the conservation of the species. Section 4(b)(2) of the Act states that the Secretary must make the designation on the basis of the best scientific data available and after taking into consideration the economic impact, the

impact on national security, and any other relevant impacts of specifying any particular area as critical habitat.

Peer review. In accordance with our joint policy on peer review published in the **Federal Register** on July 1, 1994 (59 FR 34270), and our August 22, 2016, memorandum updating and clarifying the role of peer review of listing actions under the Act, we sought the expert opinions of 10 appropriate specialists regarding the SSA report. We received responses from two specialists, and their input informed this proposed rule. The purpose of peer review is to ensure that our listing determinations, critical habitat designations, and 4(d) rules are based on scientifically sound data, assumptions, and analyses. The peer reviewers have expertise in the biology, habitat, and threats to the species.

Because we will consider all comments and information we receive during the comment period, our final determinations may differ from this proposal. Based on the new information we receive (and any comments on that new information), we may conclude that the Upper Coosa River DPS is endangered instead of threatened, or we may conclude that the DPS does not warrant listing. Such final decisions would be a logical outgrowth of this proposal, as long as we: (1) Base the decisions on the best scientific and commercial data available after considering all of the relevant factors; (2) do not rely on factors Congress has not intended us to consider; and (3) articulate a rational connection between the facts found and the conclusions made, including why we changed our conclusion.

Information Requested

We intend that any final action resulting from this proposed rule will be based on the best scientific and commercial data available and be as accurate and as effective as possible. Therefore, we request comments or information from other concerned governmental agencies, Native American Tribes, the scientific community, industry, or any other interested parties concerning this proposed rule.

We particularly seek comments concerning:

(1) The frecklebelly madtom's biology, range, distribution, and population trends, particularly in the upper Coosa River watershed in Georgia and Tennessee, including:

(a) Biological or ecological requirements of the frecklebelly madtom, including habitat requirements for feeding, breeding, and sheltering;

(b) Genetics and taxonomy;

(c) Historical and current range, including distribution patterns;

(d) Historical and current population levels, and current and projected trends; and

(e) Past and ongoing conservation measures for the frecklebelly madtom, its habitat, or both.

(2) Factors that may affect the continued existence of the frecklebelly madtom, which may include habitat modification or destruction, overutilization, disease, predation, the inadequacy of existing regulatory mechanisms, or other natural or manmade factors.

(3) Biological, commercial trade, or other relevant data concerning any threats (or lack thereof) to the frecklebelly madtom and existing regulations that may be addressing those threats.

(4) Additional information concerning the historical and current status, range, distribution, and population size of the frecklebelly madtom, and specifically the Upper Coosa River DPS, including the locations of any additional populations of the frecklebelly madtom.

(5) Information on regulations that are necessary and advisable to provide for the conservation of the Upper Coosa River DPS of frecklebelly madtom and that the Service can consider in developing a 4(d) rule for the DPS, including information concerning the extent to which we should include any of the section 9 prohibitions in the 4(d) rule or whether any other forms of take should be excepted from the prohibitions in the 4(d) rule. We particularly seek comments concerning:

(a) Whether we should add a provision to except incidental take resulting from silvicultural practices and forest management activities that implement State-approved best management practices and comply with forest practice guidelines related to water quality standards.

(b) Whether there are additional provisions the Service may wish to consider for the section 4(d) rule in order to conserve, recover, and manage the Upper Coosa River DPS.

(6) The reasons why we should or should not designate habitat as "critical habitat" under section 4 of the Act (16 U.S.C. 1531 *et seq.*), including information to inform the following factors that the regulations identify as reasons why designation of critical habitat may be not prudent:

(a) The species is threatened by taking or other human activity and identification of critical habitat can be expected to increase the degree of such threat to the species;

(b) The present or threatened destruction, modification, or curtailment of a species' habitat or range is not a threat to the species, or threats to the species' habitat stem solely from causes that cannot be addressed through management actions resulting from consultations under section 7(a)(2) of the Act; or

(c) No areas meet the definition of critical habitat.

(7) Specific information on:

(a) The amount and distribution of Upper Coosa River DPS habitat;

(b) Information on the physical or biological features essential to the conservation of the DPS;

(c) What areas, that were occupied at the time of listing and that contain the physical or biological features essential to the conservation of the DPS, such as the Coosawattee River in Georgia, should be included in the critical habitat designation and why;

(d) The methods we used, particularly the use of environmental DNA, to identify occupied critical habitat for each of the units;

(e) Special management considerations or protection that may be needed in critical habitat areas we are proposing, including managing for the potential effects of climate change; and

(f) What areas not occupied at the time of listing are essential for the conservation of the DPS and should be included as critical habitat and why. We particularly seek comments:

(i) Regarding whether occupied areas are adequate for the conservation of the DPS; and

(ii) Providing specific information regarding whether or not unoccupied areas would, with reasonable certainty, contribute to the conservation of the DPS and contain at least one physical or biological feature essential to the conservation of the DPS.

(8) Land use designations and current or planned activities in the subject areas and their possible impacts on proposed critical habitat.

(9) Any probable economic, national security, or other relevant impacts of designating any area that may be included in the final designation, and the related benefits of including or excluding specific areas.

(10) Information on the extent to which the description of probable economic impacts in the draft economic analysis is a reasonable estimate of the likely economic impacts.

(11) Whether any specific areas we are proposing for critical habitat designation should be considered for exclusion under section 4(b)(2) of the Act, and whether the benefits of potentially excluding any specific area

outweigh the benefits of including that area under section 4(b)(2) of the Act.

(12) Whether we could improve or modify our approach to designating critical habitat in any way to provide for greater public participation and understanding, or to better accommodate public concerns and comments.

Please include sufficient information with your submission (such as scientific journal articles or other publications) to allow us to verify any scientific or commercial information you include.

Please note that submissions merely stating support for, or opposition to, the action under consideration without providing supporting information, although noted, will not be considered in making a determination, as section 4(b)(1)(A) of the Act directs that determinations as to whether any species is an endangered or a threatened species must be made “solely on the basis of the best scientific and commercial data available.”

You may submit your comments and materials concerning this proposed rule by one of the methods listed in **ADDRESSES**. We request that you send comments only by the methods described in **ADDRESSES**.

If you submit information via <http://www.regulations.gov>, your entire submission—including any personal identifying information—will be posted on the website. If your submission is made via a hardcopy that includes personal identifying information, you may request at the top of your document that we withhold this information from public review. However, we cannot guarantee that we will be able to do so. We will post all hardcopy submissions on <http://www.regulations.gov>.

Comments and materials we receive, as well as supporting documentation we used in preparing this proposed rule, will be available for public inspection on <http://www.regulations.gov>.

Public Hearing

Section 4(b)(5) of the Act provides for a public hearing on this proposal, if requested. Requests must be received by the date specified in **DATES**. Such requests must be sent to the address shown in **FOR FURTHER INFORMATION CONTACT**. We will schedule a public hearing on this proposal, if requested, and announce the date, time, and place of the hearing, as well as how to obtain reasonable accommodations, in the **Federal Register** and local newspapers at least 15 days before the hearing. For the immediate future, we will provide these public hearings using webinars that will be announced on the Service's website, in addition to the **Federal**

Register. The use of these virtual public hearings is consistent with our regulations at 50 CFR 424.16(c)(3).

Previous Federal Actions

On April 20, 2010, we were petitioned by the Center for Biological Diversity and others to list 404 aquatic species in the southeastern United States, including the frecklebelly madtom, under the Act. In response to the petition, we completed a partial 90-day finding on September 27, 2011 (76 FR 59836), in which we announced our finding that the petition contained substantial information indicating that listing may be warranted for numerous species, including the frecklebelly madtom. On April 15, 2015, the Center for Biological Diversity amended a complaint against the Service for failure to complete a 12-month finding for the frecklebelly madtom in accordance with statutory deadlines. On September 9, 2015, the Service and the Center for Biological Diversity filed stipulated settlements in the District of Columbia, agreeing that the Service would submit to the **Federal Register** a 12-month finding for the frecklebelly madtom no later than September 30, 2020 (*Center for Biological Diversity v. Jewell*, case 1:15-CV-00229-EGS). This document constitutes our concurrent 12-month warranted petition finding, proposed listing rule, and proposed critical habitat rule.

Supporting Documents

An SSA team prepared an SSA report for the frecklebelly madtom. The SSA team was composed of Service biologists, in consultation with other species experts. The SSA report represents a compilation of the best scientific and commercial data available concerning the status of the species, including the impacts of past, present, and future factors (both negative and beneficial) affecting the species. The Service sent the SSA report to 10 independent peer reviewers and received 2 responses. The Service also sent the SSA report for review to 13 partners, including scientists with expertise in fish biology, stream and riverine ecology, and factors negatively and positively affecting the species. We received review from two partners, Mississippi Museum of Natural Science and Georgia Department of Natural Resources.

I. Proposed Listing Determination Background

A thorough review of the taxonomy, life history, and ecology of the frecklebelly madtom (*Noturus munitus*) is presented in the SSA report (version

1.2; Service 2020, pp. 5–15; available at <https://www.fws.gov/southeast/> and at <http://www.regulations.gov> under Docket No. FWS-R4-ES-2020-0058).

The frecklebelly madtom is a catfish species that inhabits the main channels and larger tributaries of large river systems in Louisiana, Mississippi, Alabama, Georgia, and Tennessee. The species has a broad but disjunct distribution across the Pearl River watershed and Mobile River Basin, with populations in the Pearl River and Bogue Chitto River in the Pearl River watershed and the Upper Tombigbee, Alabama, Cahaba, Etowah, and Conasauga river systems in the Mobile River Basin (Piller *et al.* 2004, p. 1004; Bennett *et al.* 2010, pp. 507–508). Throughout its range, the frecklebelly madtom primarily occupies streams and rivers within the Gulf Coastal Plain physiographic province; however, it also occurs in the Ridge and Valley physiographic province in the Conasauga River and Piedmont Upland physiographic province in the Etowah River (Mettee *et al.* 1996, pp. 408–409).

The frecklebelly madtom is a small, stout catfish reaching 99 millimeters (mm) (3.9 inches (in)) in length (Etnier and Starnes 1993, p. 324) and distinctively marked with dark saddles (Suttkus and Taylor 1965, p. 171). The color of the frecklebelly madtom is a mixture of light yellows with brownish patches and a combination of many scattered specks or freckles on the underside, which provides camouflage in its preferred habitats and inspired its common name (Suttkus and Taylor 1965, p. 176; Vincent 2019, unpaginated). The fins' colors are typically mottled or blotched (Etnier and Starnes 1993, p. 324). The frecklebelly madtom is armed with venomous pectoral and dorsal spines used to defend against predation and has barbels around the mouth that act as sensory organs.

The species belongs in the family Ictaluridae, and all species in the genus *Noturus*, referred to as madtoms, are diminutive and possess long and low adipose fins (*i.e.*, found on the back behind the dorsal fin) (Page and Burr 2011, p. 207). The currently recognized taxon is *Noturus munitus* (Suttkus and Taylor 1965, entire; Rhode 1978, p. 465). Since the time of description, uncertainty regarding the taxonomic status of some populations of frecklebelly madtom has arisen. In 1998, the name “Coosa madtom” (*Noturus sp. cf. N. munitus*) was coined to describe the madtoms, previously identified as frecklebelly madtom, in the Conasauga and Etowah Rivers that were morphologically distinct from the

frecklebelly madtom found elsewhere (Boschung and Mayden 2004, p. 347; Neely 2018, p. 1). However, a recent analysis of the existing morphological and genetic datasets documented substantial genetic divergence between all populations from distinct watersheds. The Pearl and Mobile basin populations exhibited the strongest genetic divergence, followed by Tombigbee and Alabama River (Cahaba and Coosa) populations (Neely 2018, entire). The Cahaba and Coosa populations exhibited the lowest genetic differentiation and could not be reliably diagnosed based on morphology. Therefore, because the data indicate divergence between populations but do not support the description of distinct subspecies or species, we consider each population of frecklebelly madtom to be a separate evolutionary significant unit (ESU) (Neely 2018, p. 10) for purposes of this determination. ESUs are partially defined as a population that “represents an important component in the evolutionary legacy of a species” (Waples 1991, p. 12). Because evolution is a continual process, elements that represent a species’ evolutionary legacy are also important elements of a species’ adaptive capacity. Therefore, the ESUs recommended by Neely (2018, entire) were used to inform our analysis on the frecklebelly madtom’s representation, an attribute of the species’ viability (Service 2020, pp. 3, 35–37).

For the frecklebelly madtom to survive and reproduce, individuals need suitable habitat that supports essential life functions at all life stages. Three elements appear to be essential to the survival and reproduction of individuals: Flowing water, stable substrate, and aquatic vegetation. The frecklebelly madtom typically occurs over firm gravel substrates, such as shoals and riffles, in small to large swift-flowing streams often associated with large rivers and their tributaries (Suttkus and Taylor 1965, pp. 177–178; Mettee *et al.* 1996, p. 409; Vincent 2019, unpaginated). However, the species will use streams dominated with sand substrates if suitable cover such as large woody debris is present (Wagner 2019, pers. comm.). Cover is an important habitat factor for the species, as it provides for concealment against predators (Vincent 2019, unpaginated), foraging habitat, and nesting habitat. In some rivers where the species is found, the frecklebelly madtom is often associated with aquatic vegetation, such as river weed (*Podostemum*), and under large, flat rocks (Mettee *et al.* 1996, p. 409, Freeman *et al.* 2003, p. iii). In the upper Etowah and Conasauga Rivers,

the frecklebelly madtom has been collected in moderate to swift currents over boulders, rubble, cobble, and coarse gravel and around concentrations of river weed.

The frecklebelly madtom is likely nocturnal and most active at night. The species has a lifespan of approximately 5 years (Mettee *et al.* 1996, pp. 408–409) and is reproductively mature in the second summer after birth, similar to other madtom species (Burr and Stoeckel 1999, p. 65). In the wild, reproduction is thought to occur between June and July (Trauth *et al.* 1981, p. 66). At the Private John Allen National Fish Hatchery in Tupelo, MS, frecklebelly madtoms have been observed spawning between the end of May to mid-August (Schwarz 2020, unpublished report). The female produces 50 to 70 eggs, which are released all at one time (Trauth *et al.* 1981, p. 66). Fecundity in madtoms is among the lowest for North American freshwater fishes due to their small size, relatively large egg size, and high level of parental care given to the fertilized eggs (embryos) and larvae (Dinkins and Shute 1996, pp. 58–60; Burr and Stoeckel 1999, pp. 66–67). However, the frecklebelly madtom is considered highly fecund for a madtom and among the highest fecundity known for its subgenus, *Rabida* (Bennett *et al.* 2010, p. 507).

Nesting sites for madtoms are typically cavities under natural material (rocks, logs, empty mussel shells) or human litter (inside cans or bottles, under boards). Madtoms construct cavities on the bottoms of streams by moving substrate using their heads to push gravel or their mouths to carry and transport gravel and pebbles (Vincent 2019, unpaginated). Both males and females may construct nesting cavities (Burr and Stoeckel 1999, p. 69).

The species is an opportunistic insectivore feeding on a variety of aquatic insects and larvae, including caddisflies, mayflies, blackflies, and midges (Miller 1984, p. 9). There appear to be seasonal shifts in food preference between the sexes, with males typically preferring caddisflies in the fall months, and the females preferring midges during the same time (Miller 1984, p. 10).

Regulatory and Analytical Framework

Regulatory Framework

Section 4 of the Act (16 U.S.C. 1533) and its implementing regulations (50 CFR part 424) set forth the procedures for determining whether a species is an “endangered species” or a “threatened species.” The Act defines an

“endangered species” as a species that is in danger of extinction throughout all or a significant portion of its range, and a “threatened species” as a species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act requires that we determine whether any species is an “endangered species” or a “threatened species” because of any of the following factors:

(A) The present or threatened destruction, modification, or curtailment of its habitat or range;

(B) Overutilization for commercial, recreational, scientific, or educational purposes;

(C) Disease or predation;

(D) The inadequacy of existing regulatory mechanisms; or

(E) Other natural or manmade factors affecting its continued existence.

These factors represent broad categories of natural or human-caused actions or conditions that could have an effect on a species’ continued existence. In evaluating these actions and conditions, we look for those that may have a negative effect on individuals of the species, as well as other actions or conditions that may ameliorate any negative effects or may have positive effects.

We use the term “threat” to refer in general to actions or conditions that are known to or are reasonably likely to negatively affect individuals of a species. The term “threat” includes actions or conditions that have a direct impact on individuals (direct impacts), as well as those that affect individuals through alteration of their habitat or required resources (stressors). The term “threat” may encompass—either together or separately—the source of the action or condition or the action or condition itself.

However, the mere identification of any threat(s) does not necessarily mean that the species meets the statutory definition of an “endangered species” or a “threatened species.” In determining whether a species meets either definition, we must evaluate all identified threats by considering the expected response by the species, and the effects of the threats—in light of those actions and conditions that will ameliorate the threats—on an individual, population, and species level. We evaluate each threat and its expected effects on the species, then analyze the cumulative effect of all of the threats on the species as a whole. We also consider the cumulative effect of the threats in light of those actions and conditions that will have positive effects on the species, such as any

existing regulatory mechanisms or conservation efforts. The Secretary determines whether the species meets the definition of an “endangered species” or a “threatened species” only after conducting this cumulative analysis and describing the expected effect on the species now and in the foreseeable future.

The Act does not define the term “foreseeable future,” which appears in the statutory definition of “threatened species.” Our implementing regulations at 50 CFR 424.11(d) set forth a framework for evaluating the foreseeable future on a case-by-case basis. The term “foreseeable future” extends only so far into the future as the Service can reasonably determine that both the future threats and the species’ responses to those threats are likely. In other words, the foreseeable future is the period of time in which we can make reliable predictions. “Reliable” does not mean “certain”; it means sufficient to provide a reasonable degree of confidence in the prediction. Thus, a prediction is reliable if it is reasonable to depend on it when making decisions.

It is not always possible or necessary to define foreseeable future as a particular number of years. Analysis of the foreseeable future uses the best scientific and commercial data available and should consider the timeframes applicable to the relevant threats and to the species’ likely responses to those threats in view of its life-history characteristics. Data that are typically relevant to assessing the species’ biological response include species-specific factors such as lifespan, reproductive rates or productivity, certain behaviors, and other demographic factors.

Analytical Framework

The SSA report documents the results of our comprehensive biological review of the best scientific and commercial data regarding the status of the species, including an assessment of the potential threats to the species. The SSA report does not represent a decision by the Service on whether the species should be proposed for listing as an endangered or threatened species under the Act. It does, however, provide the scientific basis that informs our regulatory decisions, which involve the further application of standards within the Act and its implementing regulations and policies. The following is a summary of the key results and conclusions from the SSA report; the full SSA report can be found at <https://www.fws.gov/southeast/> and at <http://www.regulations.gov> under Docket No. FWS–R4–ES–2020–0058.

To assess frecklebelly madtom viability, we used the three conservation biology principles of resiliency, redundancy, and representation (Shaffer and Stein 2000, pp. 306–310). Briefly, resiliency supports the ability of the species to withstand environmental and demographic stochasticity (for example, wet or dry, warm or cold years), redundancy supports the ability of the species to withstand catastrophic events (for example, droughts, large pollution events), and representation supports the ability of the species to adapt over time to long-term changes in the environment (for example, climate changes). In general, the more resilient and redundant a species is and the more representation it has, the more likely it is to sustain populations over time, even under changing environmental conditions. Using these principles, we identified the species’ ecological requirements for survival and reproduction at the individual, population, and species levels, and described the beneficial and risk factors influencing the species’ viability.

The SSA process can be categorized into three sequential stages. During the first stage, we evaluated the individual species’ life-history needs. The next stage involved an assessment of the historical and current condition of the species’ demographics and habitat characteristics, including an explanation of how the species arrived at its current condition. The final stage of the SSA involved making predictions about the species’ responses to positive and negative environmental and anthropogenic influences. Throughout all of these stages, we used the best available information to characterize viability as the ability of a species to sustain populations in the wild over time. We use this information to inform our regulatory decision.

Summary of Biological Status and Threats

In this discussion, we review the biological condition of the species and its resources, and the threats that influence the species’ current and future condition, in order to assess the species’ overall viability and the risks to that viability. For frecklebelly madtom populations to be resilient, the needs of individuals (flowing water, substrate, and aquatic vegetation) must be met at a large scale. Stream reaches with suitable habitat must be large enough to support an appropriate number of individuals to avoid issues associated with small population sizes, such as inbreeding depression. At the species level, the frecklebelly madtom needs a sufficient number and distribution of

healthy populations to withstand environmental stochasticity (resiliency) and catastrophes (redundancy) and to adapt to biological and physical changes in its environment (representation). To evaluate the current and future viability of the frecklebelly madtom, we assessed a range of conditions to allow us to consider the current and future effects on resiliency, representation, and redundancy.

Delineating Representation and Resilience Units

We delineated representation and resilience units for the frecklebelly madtom. Representation units were delineated to describe the breadth of known genetic, phenotypic, and ecological diversity within the species. There is evidence of differentiation in habitat use, morphology, and genetics for areas that the frecklebelly madtom occupies, which are disconnected spatially across the landscape. Resilience units were delineated to describe at a local scale how the species withstands stochastic events. These resilience units are not meant to represent individual populations as they may represent multiple or portions of groups of demographically linked interbreeding individuals.

In total, we identified six representation units for the frecklebelly madtom: Pearl River (A), upper Tombigbee River (B), lower Tombigbee/Alabama Rivers (C), Alabama River (D), Cahaba River (E), and upper Coosa River (F) (see table 1, below). Four representation units (Pearl River (A), upper Tombigbee River (B), Cahaba River (E), and upper Coosa River (F)) are the ESUs based on the evaluation of morphometric and genetic datasets (Neely 2018, entire). Morphometric and genetic data from the remaining two representation units (lower Tombigbee/Alabama Rivers (C) and Alabama River (D)) were not available to be analyzed in the 2018 study (Neely 2018, entire) and, therefore, were not identified as ESUs in that study.

The lower Tombigbee/Alabama Rivers (C) and Alabama River (D) representation units reflect occurrences of the species in the Mobile River Basin that are the farthest downstream and within a large river habitat type that is distinct from the remainder of the units in the Mobile River Basin. Furthermore, these reaches are disconnected from the nearest adjacent representation units by dams that act as dispersal barriers for the species. Therefore, these reaches are assessed as two individual representation units. The Alabama River (D) representation unit consists of a single HUC 10 watershed that is isolated

from other representation units by dams. The remaining unit, lower Tombigbee/Alabama Rivers (C), is disconnected from the upper Tombigbee River and Alabama River units by dams.

Resilience units were delineated as aggregations of adjacent U.S. Geological Survey Hydrological Unit Code (HUC) 10 watershed boundaries that contain a frecklebelly madtom observation and

are not disconnected by dams or other major habitat alterations that may present a barrier to movement. While resiliency is typically assessed at the scale of a population, there was little information to delineate populations of the frecklebelly madtom. By using HUC 10 watersheds, we are able to delineate resilience units that can be measured

and evaluated at a local scale similar to that we would expect for a population. We determined this to be the most appropriate scale for measuring resiliency. We identified 16 resilience units consisting of 66 HUC10 watersheds across the range of the frecklebelly madtom (see table 1, below).

TABLE 1—REPRESENTATION UNITS AND RESILIENCE UNITS USED TO ASSESS VIABILITY OF THE FRECKLEBELLY MADTOM

Representation units	Resilience units
Pearl River (A)	Bogue Chitto River (A1). Pearl River (A2).
Upper Tombigbee River (B)	East Fork Tombigbee (B1). Sipsey River (B2). Luxapallila Creek (B3). Buttahatchee River (B4). Bull Mountain Creek (B5). Upper Tombigbee River (mainstem) (B6).
Lower Tombigbee/Alabama Rivers (C)	Lower Tombigbee River (C1). Lower Alabama River (C2).
Alabama River (D)	Alabama River (D1).
Cahaba River (E)	Cahaba River (E1). Alabama River/Big Swamp (E2).
Upper Coosa River (F)	Conasauga River (F1). Coosawattee River (F2). Etowah River (F3).

Methods To Assess Current Condition

We assessed the current resiliency (ability of populations to withstand stochastic events) of frecklebelly madtom resilience units by considering occurrence data throughout the species' range. We used occurrence data to estimate range extent and range geometry (*i.e.*, number of named streams with occurrences). These metrics can be useful for evaluating resiliency, as larger areas of occupied habitat and multiple occupied streams (more complex ranges) are more robust to stochastic events (*i.e.*, a single more localized event would be unlikely to negatively affect the entire population or unit if many and larger reaches of streams were occupied). Occurrence data for the frecklebelly madtom are only available for five of the six representation units: The Pearl River (A), upper Tombigbee River (B), Alabama River (D), Cahaba River (E), and upper Coosa River (F). Therefore, we conducted our assessment of occurrences only on resilience units within those representation units, and we categorized current resiliency into high, moderate, low, or likely extirpated conditions, based on our evaluation of total number of occurrences, the number of occupied stream reaches, the length of discrete stream reaches, and the maximum occupied stream reach

estimate and available literature (Service 2020, pp. 34–53). The Lower Tombigbee/Alabama Rivers (C) representation unit was categorized to have unknown resiliency (see discussion below regarding environmental DNA).

Environmental DNA (eDNA, which is DNA that is shed into the environment by an organism during its life) belonging to the frecklebelly madtom was collected in the Conasauga River (F1), Coosawattee River (F2), Etowah River (F3), and portions of the lower Alabama River (C2) and lower Tombigbee River (C1) (Freeman and Bumpers 2018, entire; Janosik and Whittaker 2018, entire). Within the Coosawattee River (F2), the lower Alabama River (C2), and the lower Tombigbee River (C1), eDNA is the only evidence of the species' presence within the period of record (1950–2019). Collecting and analyzing water samples for eDNA provides a means of rapidly surveying aquatic habitats to help identify potentially occupied sites for a species. However, uncertainty of these data revolves around the origin and fate of the individuals that shed the DNA and the length of time the eDNA persists in the environment. For the purposes of this analysis, we used eDNA data as evidence to support our conclusion that

the probability of the species being present in a particular unit is greater than zero. As described above, we used occurrence data to assess resiliency. If units are known only from eDNA data, an unknown resiliency was determined since we have no occurrence information.

We assessed representation for the frecklebelly madtom as the number of resilient populations within a representation unit. Finally, we assessed frecklebelly madtom redundancy (ability of species to withstand catastrophic events) by evaluating the number and distribution of resilient populations throughout the species' range.

Current Condition of Frecklebelly Madtom

The historical range for the frecklebelly madtom includes two large river basins that enter into the Gulf of Mexico: The Pearl River Basin and the Mobile River Basin. The Pearl River Basin is in eastern Louisiana and southern Mississippi (identified as Pearl River (A) representation unit in the SSA). The Mobile River Basin consists of the Tombigbee River in eastern Mississippi and western Alabama (Upper Tombigbee (B) representation unit); the upper Alabama (Alabama

River (D) representation unit) and Cahaba Rivers (Cahaba River (E) representation unit) in central Alabama; the Etowah River (part of the Upper Coosa River (F) representation unit) in northern Georgia; and the Conasauga River (part of the Upper Coosa River (F) representation unit) in northern Georgia and southeastern Tennessee.

Historically, the species was likely more widespread in the Mobile Bay drainage but was extirpated from large river habitats after the creation of numerous impoundments, and thus, the species' current representation has been reduced from historical levels. Currently, the species is known to be extant in four (Pearl River (A), Upper Tombigbee River (B), Cahaba River (E), and Upper Coosa River (F)) of the six representation units.

Within the Pearl River (A) representation unit, there are two resilience units (Bogue Chitto River (A1) and Pearl River (A2)) assessed to have high resiliency to stochastic events based on stable populations and complex range geometry with 15 occupied streams in the Pearl River. In addition, recent surveys (2009–2019) observed frecklebelly madtom at 83 percent of known historical sites (*i.e.*, any site in which the species was previously observed) (Wagner *et al.* 2018, entire; Service 2020, p. 59).

Within the Upper Tombigbee River (B) representation unit, there is one resilience unit (Buttahatchee River (B4)) assessed to have high resiliency, three (East Fork Tombigbee River (B1), Sipsey River (B2), and Luxapallila Creek (B3)) have moderate resiliency, and two are likely extirpated (Upper Tombigbee River (B6) and Bull Mountain Creek (B5)). The Buttahatchee River (B4) unit has been identified as a stronghold of the species where it has consistently been collected in higher numbers (Shepard *et al.* 1997, p. 23, Bennett *et al.* 2008, p. 470). For the East Fork of the Tombigbee River (B1) unit, the species has recent (2009–2019) collections of more than 100 individuals per survey event (*i.e.*, occurrence) of frecklebelly madtom. However, there has been a loss of habitat, altered water quality, and loss of connectivity in the East Fork with numerous structures installed for the Tennessee-Tombigbee Waterway (Tenn-Tom Waterway) (Millican *et al.* 2006, p. 3–4). Within the Sipsey River (B2) unit, experts have indicated that the habitat is excellent with few threats and the populations appear stable, albeit few records for them exist (Shepard *et al.* 1997, pp. 9, 23). Frecklebelly madtom persists in Luxapallila Creek (B3) with stable populations and recent (2009–2019) collections of almost 100

individuals per survey event (*i.e.*, occurrence).

Historically, the mainstem of the upper Tombigbee River (mainstem, B6) unit was considered to support robust populations of the frecklebelly madtom with some sites producing single collections of over 300 individuals during the assessment period from 1950–1987 (Bennet *et al.* 2008, p. 466; Service 2020, p. 49). However, the construction of the Tenn-Tom Waterway, a canal system that connects the Tombigbee River to the Tennessee River for commercial navigation, eliminated the suitable gravel-cobble habitat for the species (Shepard *et al.* 1997, p. 4). Despite fish assemblage surveys undertaken since the construction of the waterway (*e.g.*, Millican *et al.* 2006, entire), observations of the species cease in the mainstem of the upper Tombigbee River (B6) after 1980 (Bennett *et al.* 2008, p. 466), thus supporting the species' likely extirpation from this formerly occupied habitat. The frecklebelly madtom has not been observed in the Bull Mountain Creek (B5) unit since 1978–1987 assessment period; this unit was also drastically altered by the construction of the Tenn-Tom Waterway and is currently bisected by the canal system (Millican *et al.* 2006, p. 3). The habitat lost from this major construction and engineering activity has likely caused the extirpation of the frecklebelly madtom in the upper Tombigbee River (B6) (Millican *et al.* 2006 p. 84; Shepard 2004, p. 221; Bennett *et al.* 2008, p. 467) and Bull Mountain Creek (B5) (Shepard 2004, p. 221) resilience units.

Within the Lower Tombigbee/Alabama Rivers (C) representation unit, there are two resilience units (Lower Tombigbee River (C1) and Lower Alabama River (C2)) assessed to have unknown resiliency. There are no traditional occurrence data of this species for either resilience unit; however, eDNA of frecklebelly madtom was found in both units (Janosik and Whittaker 2018, p. 7).

Within the Alabama River (D) representation unit, there is one resilience unit (Alabama River (D1)) assessed to be likely extirpated. Following the construction of the Miller's Ferry Lock and Dam and Claiborne Dam in the late 1960s, there have been no occurrences of this species in the Alabama River (D1) unit, despite efforts to locate the species (Shepherd *et al.* 1997, p. 18).

Within the Cahaba River (E) representation unit, one resilience unit (Cahaba River (E1)) was estimated to have moderate resiliency to stochastic events. The Cahaba River system is

believed to be a stronghold for the species (Neely 2018, p. 11) where it appears to be abundant (Bennet *et al.* 2008, p. 467). The Alabama River-Big Swamp Creek (E2) resilience unit is likely extirpated; no observations have been made of this species in the unit since the late 1960s after the construction of Miller's Ferry Lock and Dam and Claiborne Dam despite efforts to locate the species (Shepherd *et al.* 1997, p. 18; Bennet *et al.* 2008, p. 464).

Within the Coosa River (F) representation unit, one resilience unit (Conasauga River (F1)) was estimated to have low resiliency, one with moderate resiliency (Etowah River (F3)), and one with unknown resiliency (Coosawattee River (F2)). In the Conasauga River (F1), fish assemblage and abundance from the 1990s–2000s documented declines in several fish species, including the frecklebelly madtom, and after 2000, the frecklebelly madtom was no longer detected in fish surveys (Freeman *et al.* 2003, pp. 569–570; Bennett *et al.* 2008 p. 466). These surveys indicate a reduced resiliency in the Conasauga River (F1), because the best available occurrence data present a transition from a measurable population of the frecklebelly madtom to an unmeasurable one. Despite a 20-year lapse since the last observation of the frecklebelly madtom, the current presence of the species in the Conasauga River (F1) is supported by eDNA that was collected in 2017 and 2018 (Freeman and Bumper 2018, entire), as described above. Furthermore, the Conasauga River (F1) has not experienced the same type of habitat modifications as other rivers that have caused localized extirpation of the species (dams, impoundments, and channelization), and the species has been observed more recently in river surveys than in river sections where it is considered extirpated. Therefore, we determined that the species remains present in the Conasauga River but with low resiliency to stochastic events, as estimated from the occurrence data. Within the Etowah River (F3), frecklebelly madtom populations appear stable, albeit at lower levels of abundance, as the patterns of occurrence in the most recent time period is similar to time periods prior to 1998. There are no historical occurrence data or direct observations of the species from the Coosawattee River (F2) resilience unit. Environmental DNA for the frecklebelly madtom was found in portions of this unit (Freeman and Bumpers 2018, p. 9); therefore, we assessed this unit as having an unknown resiliency.

Overall, the frecklebelly madtom was assessed to have three units with high resiliency, five units with moderate resiliency, one unit with low resiliency, three units with unknown resiliency (eDNA only), and four units that are likely extirpated.

For species' redundancy, we assessed the number and distribution of resilient populations across the frecklebelly madtom's range, and we considered catastrophic events that could impact frecklebelly madtom. Catastrophic events may include chemical spills, large and rapid changes in upstream land use that alter stream characteristics and water quality downstream, new impoundments or other engineered devices that alter natural hydrological processes, and potential effects of climate change, such as drought and increases in occurrence of flash flooding events. Given the broad distribution of extant resilience units and several units assessed as having moderate to high resiliency, it is unlikely that a catastrophic event would impact the entire species' range. Therefore, the frecklebelly madtom exhibits a moderate to high degree of redundancy and that level of redundancy has remained relatively stable over time.

Risk Factors for Frecklebelly Madtom

We reviewed the potential risk factors (see discussion of section 4(a)(1) of the Act, above) that are affecting the frecklebelly madtom now and are expected to affect it into the future. We have determined that habitat destruction and degradation caused by agriculture and development resulting in poor water quality (Factor A) pose the largest risk to the current and future viability of the frecklebelly madtom. Other potential stressors to the species are habitat degradation resulting from channelization, dams, and impoundments (Factor A) and climate change (Factor E). We find the species does not face significant threats from overutilization (Factor B), disease or predation (Factor C), or invasive species (Factor E). We also reviewed the conservation efforts being undertaken for the habitat in which the frecklebelly madtom occurs. A brief summary of relevant stressors is presented below; for a full description, refer to chapter 4 of the SSA report (Service 2020, entire).

Water Quality

The frecklebelly madtom, like other benthic aquatic species, is sensitive to poor water quality (Warren *et al.* 1997, p. 125) and needs clean, flowing water to survive; thus water quality degradation is considered a threat to the species. Changes in water chemistry and

flow patterns, resulting in a decrease in water quality and quantity have detrimental effects on madtoms, because they can render aquatic habitat unsuitable for occupancy.

Inputs of point (discharge from particular pipes) and nonpoint (diffuse land surface runoff) source pollution across the frecklebelly madtom range are numerous and widespread. Point source pollution can be generated from inadequately treated effluent from industrial plants, sanitary landfills, sewage treatment plants, active surface mining, drain fields from individual private homes, and others (Service 2000, pp. 14–15). Nonpoint pollution originates from agricultural activities, poultry and cattle feedlots, abandoned mine runoff, construction, failing septic tanks, and contaminated runoff from urban areas (Deutsch *et al.* 1990, entire; Service 2000, pp. 14–15). These sources contribute pollution to streams via sediments, heavy metals, fertilizers, herbicides, pesticides, animal wastes, septic tank and gray water leakage, and oils and greases. Water quality and native aquatic fauna decline as a result of this pollution through nitrification, decreases in dissolved oxygen concentration, increases in acidity and conductivity, or direct introduction of toxicants. These alterations likely have direct (*e.g.*, decreased survival and/or reproduction) and indirect (*e.g.*, loss, degradation, and fragmentation of habitat) effects. For some aquatic species, including the frecklebelly madtom, submergent vegetation provides critical spawning habitat for adults, refugia from predators, and habitat for prey of all life stages (Jude and Pappas 1992, pp. 666–667, Freeman *et al.* 2003, p. 54). Degraded water quality and the high algal biomass that result from pollutant inputs cause loss of these critical submergent plant species (Chow–Fraser *et al.* 1998, pp. 38–39) that are vital habitat for the frecklebelly madtom.

The frecklebelly madtom is intolerant to sedimentation (Shepard 2004, p. 221; MMNS 2014, p. 35), and sedimentation is a concern throughout the species' range. Researchers have documented a negative relationship between occurrence of the frecklebelly madtom and human-induced increases of sediment within the upper Tombigbee River (mainstem), Alabama River, Cahaba River, Luxapallila Creek, Etowah River, and Conasauga River (Burkhead *et al.* 1997, pp. 406–413; Shepherd *et al.* 1997, pp. 15–19; Freeman *et al.* 2002, pp. 18–19; Freeman *et al.* 2017, pp. 429–430). Human-induced increases in sediment are likely a factor in local declines of the

species. In addition, the frecklebelly madtom's habitat requirements make it vulnerable to activities that disturb substrate integrity. The species is restricted to habitat with pea-sized gravel, cobble, or slab-rock substrates not embedded in large amounts of silt (Bennett *et al.* 2008, p. 467; Bennett and Kuhajda. 2010, p. 510), although it has also been found to occupy some stable streams with a sandy yet stable substrate. Degradation from sedimentation, physical habitat disturbance, and contaminants threaten the habitat and water quality on which the frecklebelly madtom depends. Sedimentation from an array of land uses (*e.g.*, urbanization, agriculture, channel maintenance activities) could negatively affect the species by reducing growth rates, disease tolerance, and gill function; reducing spawning habitat, reproductive success, and egg (embryo), larva, and juvenile development; reducing food availability through reductions in prey; reducing foraging efficiency; and reducing shelter.

A wide range of current activities and land uses, including agricultural practices, construction, stormwater runoff, unpaved roads, poor forest management, utility crossings, and mining, can lead to excessive sedimentation within streams. Fine sediments not only smother streams during current ongoing activities, historical land use practices may have substantially altered hydrological and geological processes such that sediments continue to be input into streams for several decades after those activities cease (Harding *et al.* 1998, p. 14846).

Water quality for frecklebelly madtom is particularly impacted by three processes: Channel modification (*i.e.*, dredging and channelization), agriculture, and development, which are further discussed below.

Channel Modification

Dredging and channelization have led to loss of aquatic habitat in the Southeast (Neves *et al.* 1997, p. 71). Dredging and channelization projects are extensive throughout the region for flood control, navigation, sand and gravel mining, and conversion of wetlands into croplands (Neves *et al.* 1997, p. 71; Herrig and Shute 2002, pp. 542–543). Dredging and channelization modify and destroy habitat for aquatic species by destabilizing the substrate, increasing erosion and siltation, removing woody debris, decreasing habitat heterogeneity, and stirring up contaminants that settle onto the substrate (Williams *et al.* 1993, pp. 7–8; Buckner *et al.* 2002, entire; Bennett *et*

al. 2008, pp. 467–468). Channelization can also lead to head cutting (an erosional process in a stream channel with a vertical cut or drop that migrates upstream over time), which causes further erosion and sedimentation (Hartfield 1993, pp. 131–141). Dredging can involve snagging (the removal of woody debris from the channel), which not only contributes to destabilization of the channel but also removes the woody debris that provides important cover and nest locations for many fish species, including the frecklebelly madtom (Bennett *et al.* 2008, pp. 467–468).

The frecklebelly madtom was eliminated from much of the mainstem of the Tombigbee River after the construction of the Tenn-Tom Waterway. Tributaries to the upper Tombigbee River have also been affected by channel modification of the Tenn-Tom Waterway due to head cutting and other geomorphic and flow modifications (Raborn and Schramm 2003, pp. 289–301; Roberts *et al.* 2007, pp. 250–256; Tipton *et al.* 2004, pp. 49–61), and fewer tributaries currently maintain the habitat needed by the frecklebelly madtom in this system (Millican *et al.* 2006, p. 84; Shepard 2004, pp. 220–222; Shepard *et al.* 1997, pp. 3–4). Similarly, channel geomorphology and substrate are likely being affected by head cutting due to impoundment of the Alabama River (Bennett *et al.* 2008, p. 468).

Alternatively, frecklebelly madtom abundances have remained stable in the Cahaba River throughout the modification periods that affected surrounding drainages. The Cahaba River, Conasauga River, and some tributaries to the upper Tombigbee River are the only remaining waters within the range of the frecklebelly madtom that have escaped large-scale human modification through damming or channelization (Bennett *et al.* 2008, p. 468).

Agriculture

Agricultural practices such as traditional farming, feedlot operations, and associated land use practices can contribute pollutants to rivers. These practices can also degrade habitat by eroding stream banks, which results in alterations to stream hydrology and geomorphology. Nutrients, bacteria, pesticides, and other organic compounds are generally found in higher concentrations in agricultural areas rather than forested areas. Contaminants associated with agriculture (*e.g.*, fertilizers, pesticides, herbicides, and animal waste) can degrade water quality and negatively impact instream habitats by causing

oxygen deficiencies, excess nitrification, and excessive algal growths, which can have a direct impact on fish community composition (Petersen *et al.* 1999, p. 6).

Areas within the current range of the frecklebelly madtom, which are predominantly agricultural, are impacted by nonpoint source sediment and agrochemical discharges altering the physical and chemical characteristics of its habitat, thus potentially impeding its ability to feed, seek shelter from predators, and successfully reproduce. A negative relationship between the species and nonpoint source stressors attributed to agriculture has been described particularly within the Conasauga River (Freeman *et al.* 2017, pp. 429–430).

Over the past two decades, an increase in the use of agricultural chemicals and practices, such as use of glyphosate-based herbicides for weed control and land dispersion of animal waste for soil amendment, has corresponded with marked declines in populations of fish and mussel species in the Upper Conasauga River watershed in Georgia and Tennessee (Freeman *et al.* 2017, p. 429). Nutrient enrichment of streams was found to be widespread with high levels of nitrate and phosphorus (reported at over 5 milligrams per liter and over 300 micrograms per liter, respectively, within the Conasauga River) likely associated with eutrophication, and hormone concentrations in sediments were often above those shown to cause endocrine disruption in fish, which was possibly related to the widespread application of poultry litter and manure (Lasier *et al.* 2016, entire). Estrogens, a hormone and type of endocrine disruptor that can be found in poultry litter, also have been identified as a threat to aquatic fauna in the Conasauga River system (Jacobs 2015, entire). Increased levels of estrogens can lead to decreases in spawning success and potentially population collapse within short timeframes (Kidd *et al.* 2007, p. 8899). Aquatic species declines observed in the Conasauga watershed may be at least partially due to hormones, as well as excess nutrients, herbicides, and surfactants (Freeman *et al.* 2017, p. 429).

The amount (acreage) of agricultural land is declining across the eastern United States with a net loss of 6.5 percent between 1973 and 2000 (Sayler *et al.* 2016, p. 12). As discussed below under *Future Scenarios*, within the watersheds in which frecklebelly madtom occurs, the declining trend of agricultural land is consistent with broader trends in the eastern United States showing agricultural land

declines with time (Sayler *et al.* 2016, p. 12). These agricultural lands are mostly being converted to developed and forested lands (Sayler *et al.* 2016, p. 12). Despite the declining trend, agricultural practices leading to poor water quality conditions currently influence and will continue to influence the viability of frecklebelly madtom across its range.

Development

Development is a significant source of water quality degradation that can reduce the survival of aquatic organisms, including the frecklebelly madtom. Urban development can stress aquatic systems in a variety of ways, including increasing the frequency and magnitude of high flows in streams; increasing sedimentation and nutrient loads; increasing contaminants and toxicity; decreasing the diversity of fish, aquatic insects, plants, and amphibians; and changing stream morphology and water chemistry (Coles *et al.* 2012, entire; CWP 2003; entire). Sources and risks of an acute or catastrophic contamination event, such as a leak from an underground storage tank or a hazardous materials spill on a highway, increase as urbanization increases.

Urbanization has also been shown to impair stream quality by impacting riparian health (Diamond *et al.* 2002, p. 1150). Riparian impairment resulting from urbanization or agricultural land use can amplify negative effects of nonpoint source pollution within the watershed as well as impact stream quality independent of land use within the watershed. Impacts from impervious cover can be mitigated through riparian forest cover and good riparian health (Roy *et al.* 2005, p. 2318; Walsh *et al.* 2007, entire); however, the benefit of the riparian cover diminishes when impervious cover (*i.e.*, urban cover) exceeds approximately 10 percent within the watershed (Booth and Jackson 1997, p. 1084; Goetz *et al.* 2003, p. 205).

Currently, larger population centers, such as the cities of Atlanta, Georgia, Jackson, Mississippi, and Birmingham, Alabama, contribute substantial runoff to the watersheds occupied by the frecklebelly madtom. In the future, urbanization is predicted to increase in several areas across the range of the frecklebelly madtom (see below under *Future Scenarios*). All watersheds, but especially the Etowah River watershed, upstream of Lake Allatoona in Georgia are expected to experience additional urbanization (Albanese *et al.* 2018, p. 39). Conservation concerns in the Etowah River watershed have focused on potential effects of this predicted urban growth on imperiled fishes

(Burkhead *et al.* 1997, pp. 959–968; Wenger *et al.* 2010, pp. 11–21), and previous analyses show negative correlations between occurrence of native fishes and increases in impervious cover associated with urban development (Wenger *et al.* 2008, p. 1260). In the Etowah Basin in Georgia, models indicated that urbanization lowered fish species richness and density and led to predictable changes in species composition. Darters, sculpin, minnows, and endemic species declined along the urban gradient, whereas sunfishes persisted and became the dominant group (Walters *et al.* 2005, pp. 10–11). In the future, we anticipate increased development to amplify as a population-level factor influencing the viability of frecklebelly madtom.

Impoundments

Impoundment of rivers is a stressor to aquatic species in the southeast (Benz and Collins 1997, pp. 22–23, 63, 91, 205, 273, 291, 397, 399, 401–406, 446; Buckner *et al.* 2002, pp. 10–11). Dams modify habitat conditions and aquatic communities both upstream and downstream of an impoundment (Winston *et al.* 1991, pp. 103–104; Mulholland and Lenat 1992, pp. 193–231; Soballe *et al.* 1992, pp. 421–474). Upstream of dams, habitat is flooded and in-channel conditions change from flowing to still water, with increased depth, decreased levels of dissolved oxygen, and increased sedimentation. Sedimentation alters substrate conditions by filling in interstitial spaces between rocks, which provide habitat for many species (Neves *et al.* 1997, pp. 63–64), including the frecklebelly madtom. Downstream of dams, flow regime fluctuates with resulting fluctuations in water temperature and dissolved oxygen levels, the substrate is scoured, and downstream tributaries are eroded (Neves *et al.* 1997, pp. 63–64; Schuster 1997, p. 273; Buckner *et al.* 2002, p. 11). Negative “tailwater” effects on habitat can extend many kilometers downstream (Neves *et al.* 1997, p. 63). Dams fragment habitat for aquatic species by blocking corridors for migration and dispersal, resulting in population isolation and heightened susceptibility to extinction (Neves *et al.* 1997, p. 63). Dams also preclude the ability of aquatic organisms to escape from polluted waters and accidental spills (Buckner *et al.* 2002, p. 10).

Damming of streams and springs is also extensive throughout the Southeast and occurs within the large river habitats of the frecklebelly madtom (Etnier 1997, pp. 88–89; Morse *et al.* 1997, pp. 22–23; Shute *et al.* 1997, pp.

458–459, Bennett *et al.* 2008, p. 467). Many streams have both small ponds in their headwaters and large reservoirs in their lower reaches (Morse *et al.* 1997, p. 23). Small streams on private lands are regularly dammed to create ponds for cattle, irrigation, recreation, and fishing, with significant ecological effects due to the sheer abundance of these structures (Morse *et al.* 1997, pp. 22–23). In addition, small headwater streams are increasingly being dammed in the Southeast to supply water for municipalities (Buckner *et al.* 2002, p. 11).

Dams are known to have caused the extirpation and extinction of many southeastern species, and existing and proposed dams pose an ongoing threat to many aquatic species (Folkerts 1997, p. 11; Neves *et al.* 1997, p. 63; Ricciardi and Rasmussen 1999, p. 1222; Service 2000, p. 15; Buckner *et al.* 2002, p. 11, Olden 2016, pp. 112–122), including the frecklebelly madtom. The construction of 10 lock and dam structures on the Tenn-Tom Waterway, which artificially connects the Tennessee River to the Gulf of Mexico, led to the extirpation of many species, including the frecklebelly madtom, from the main river channel (Bennett *et al.* 2008, p. 467). The frecklebelly madtom is considered extirpated from the Alabama River, likely due to the construction of three dams in the late 1960s and early 1970s (Bennett *et al.* 2008, p. 467). In addition, the construction of one dam on the Etowah River may have affected the frecklebelly madtom, since the species is dependent on large-river gravel shoal substrate (Bennett *et al.* 2008, p. 470). As discussed above in *Current Condition of Frecklebelly Madtom*, four resilience units are likely extirpated as a result of dam construction and large scale river modifications.

Climate Change

In the southeastern United States, several climate change models have projected more frequent drought, more extreme heat (resulting in increases in air and water temperatures), increased heavy precipitation events (*e.g.*, flooding), more intense storms (*e.g.*, frequency of major hurricanes increases), and rising sea level and accompanying storm surge (IPCC 2013, entire). When taking into account future climate projections for temperature and precipitation where the frecklebelly madtom occurs, warming is expected to be greatest in the summer, which is predicted to increase drought frequency. Nevertheless, annual mean precipitation is expected to increase slightly, leading to a slight increase in flooding events (Alder and Hostetler 2013, unpaginated;

IPCC 2013, entire; USGS 2020, unpaginated). Changes in climate may affect ecosystem processes and communities by altering the abiotic conditions experienced by biotic assemblages, resulting in potential effects on community composition and individual species interactions (DeWan *et al.* 2010, p. 7).

The frequency, duration, and intensity of droughts are likely to increase in the southeastern United States as a result of global climate change (Konrad *et al.* 2013, p. 34), which could negatively affect stream flows in the region. Stream flow is strongly correlated with important physical and chemical parameters that limit the distribution and abundance of riverine species (Power *et al.* 1995, entire; Resh *et al.* 1988, pp. 438–439) and regulates the ecological integrity of flowing water systems (Poff *et al.* 1997, p. 770).

To understand how climate change is projected to affect where frecklebelly madtom occurs, we used the National Climate Change Viewer (NCCV), a climate-visualization tool developed by the U.S. Geological Survey (USGS), to generate future climate projections across the range of the species. The NCCV is a web-based tool for visualizing and assessing projected changes in climate and water balance at watershed, State, and county scales (USGS 2020, unpaginated). To evaluate the effects of climate change in the future, we used projections from Representative Concentration Pathway (RCP) 4.5 and RCP 8.5 to characterize projected future changes in climate and water resources, averaged for the South-Atlantic Gulf Region encompassing the range of the frecklebelly madtom (Service 2020, pp. 27–31). The projections estimate changes in mean annual values for maximum air temperature, minimum air temperature, monthly precipitation, and monthly runoff, among other factors, from historical (1981–2010) to future (2050–2074) time series.

Within the range of the frecklebelly madtom, the NCCV projects that, under the RCP 4.5 scenario, maximum air temperature will increase by 1.9 degrees Celsius (°C) (3.4 degrees Fahrenheit (°F)), minimum air temperature will increase by 1.8 °C (3.2 °F), precipitation will increase by 5.36 millimeters (0.2 inches) per month, and runoff will remain the same in the 2050–2074 time period (USGS 2020, unpaginated). Under the more extreme RCP 8.5 scenario, the NCCV projects that maximum air temperature will increase by 2.8 degrees Celsius (°C) (5 degrees Fahrenheit (°F)), minimum air

temperature will increase by 2.7 °C (4.9 °F), precipitation will increase by 5.36 millimeter (0.2 inches) per month, and runoff will remain the same in the 2050–2074 time period (USGS 2020, unpaginated). These estimates indicate that, despite projected minimal increases in annual precipitation, anticipated increases in maximum and minimum air temperatures will likely offset those gains. Based on these projections, the frecklebelly madtom will on average be exposed to increased air temperatures across its range, despite limited increases in precipitation; however, these projections are not a one-to-one air to stream water temperature comparison.

Despite the recognition of climate effects on ecosystem processes, there is uncertainty within each model and model ensembles about what the exact climate future will be, and there is uncertainty in how the ecosystems and species will respond. Although there are several potential risks associated with long-term climate change as described above, there is uncertainty regarding how the frecklebelly madtom will respond to these risks. The species occupies some tributaries throughout its range, but the frecklebelly madtom has a preference for habitat in larger rivers and this may provide a buffer to changes induced by climate change, particularly from issues associated with drought. Therefore, we do not consider climate change to be a primary risk factor for the species at this time.

Conservation Efforts

The frecklebelly madtom is recognized as a species of concern in all States where it occurs and is protected by State statute in four States where it occurs. This species is listed as endangered by the State of Georgia (GADNR 2015, p. 74), endangered by the State of Mississippi (Mississippi Museum of Natural Science 2015, p. 36), and threatened by the State of Tennessee (TWRA 2015, Appendix C). In Alabama, the frecklebelly madtom is designated as a protected nongame species under Alabama Code 220–2–.92. In general, the protections accorded to the frecklebelly madtom by Mississippi, Alabama, Georgia, and Tennessee prohibit direct exploitation of the species without a permit within those States.

Beginning in 2017, the Private John Allen National Fish Hatchery partnered with the Mississippi Department of Wildlife Fisheries and Parks to collect individuals of the frecklebelly madtom within that State to study marking techniques, establish captive husbandry methods, and conduct life-history

studies. This effort has led to successful propagation of the species, documented important components of the species' life history, and collected data that can be used to develop long-term, captive-propagation efforts, although no individuals have been released.

Throughout the range of the species, portions of occupied rivers and surrounding lands are owned and managed by State and Federal entities that prioritize conservation as a management objective. Generally, these entities help to maintain the natural ecosystem functioning of a river by managing terrestrial areas in a more natural state and limiting disturbance adjacent to rivers. However, properties managed by the Service, U.S. Forest Service, and the Dawson Forest Wildlife Management Area (WMA) managed by the Georgia Department of Natural Resources, are known to specifically consider and manage for the conservation of aquatic species and their habitats. It is expected that the frecklebelly madtom will be positively affected by management on these lands. These conservation lands and the adjacent rivers occupied by the frecklebelly madtom include: Portions of the Bogue Chitto and Pearl Rivers within the Bogue Chitto National Wildlife Refuge (NWR, Service) in Louisiana; portions of the Bogue Chitto River within Bogue Chitto State Park (Louisiana Department of Culture, Recreation, and Tourism) in Louisiana; portions of the Pearl River within the Pearl River WMA (Louisiana Department of Wildlife and Fisheries) in Louisiana; portions of the Cahaba River within the Cahaba NWR (Service) in Alabama; portions of the Conasauga River within the Cherokee National Forest (U.S. Department of Agriculture (USDA) U.S. Forest Service) in Georgia; and portions of the Etowah River within the Dawson Forest WMA (Georgia Department of Natural Resources) in Georgia. In addition, the Etowah River catchment area upstream of habitat occupied by the frecklebelly madtom and managed by the Chattahoochee-Oconee National Forest (USDA U.S. Forest Service) is expected to benefit the species by providing good water quality to lower river reaches.

The Natural Resources Conservation Service (NRCS), USDA, designated the Conasauga River as a Working Lands for Wildlife (WLFW) landscape in 2017 (USDA 2020, unpaginated) and will provide additional funds and human-power to improve water quality and aquatic habitat in the watershed. The project will provide technical and financial assistance to help landowners improve water quality and help

producers plan and implement a variety of conservation activities or practices that benefit aquatic species. The frecklebelly madtom will likely benefit from water quality improvements in portions of the Conasauga River that are affected by agricultural practices implemented through the WLFW project.

Synergistic and Cumulative Effects

We note that, by using the SSA framework to guide our analysis of the scientific information documented in the SSA report, we have not only analyzed individual effects on the species, but we have also analyzed their potential cumulative effects. We incorporate the cumulative effects into our SSA analysis when we characterize the current and future condition of the species. Our assessment of the current and future conditions encompasses and incorporates the threats individually and primary threats cumulatively. Our current and future condition (see below) assessment is iterative, because it accumulates and evaluates the effects of all the factors that may be influencing the species, including threats and conservation efforts. Because the SSA framework considers not just the presence of the factors, but to what degree they collectively influence risk to the entire species, our assessment integrates the cumulative effects of the factors and replaces a standalone cumulative effects analysis.

In addition to impacting frecklebelly madtom individually, it is possible that several of the above summarized risk factors are acting synergistically or cumulatively on the species. The combined impact of multiple stressors is likely more harmful than a single stressor acting alone. The dual stressors of climate change and direct human impact have the potential to affect aquatic ecosystems by altering stream flows and nutrient cycles, eliminating habitats, and changing community structure (Moore *et al.* 1997, p. 942). Increased water temperatures and a reduction in stream flow are the climate change effects that are most likely to affect stream communities (Poff 1997, *entire*), and each of these variables is strongly influenced by land use patterns. For example, in agricultural areas, lower precipitation may trigger increased irrigation resulting in reduced stream flow (Backlund *et al.* 2008, pp. 42–43). In forested areas, trees influence instream temperatures through the direct effects of shading. Reductions in temperature by vegetative cover may be particularly important in low-order streams, where canopy vegetation significantly reduces the magnitude and

variation of the stream temperature compared with that of clear-cut areas (Ringler and Hall, 1975, pp. 111–121).

Future Scenarios

To evaluate the future viability of the frecklebelly madtom and address uncertainty associated with the degree and extent of potential future stressors and their impacts to the madtom, we analyzed three future scenarios and assessed the resiliency, representation, and redundancy of the madtom for each scenario. We devised these scenarios by identifying information on the following primary threats that are anticipated to affect the frecklebelly madtom in the future: Agriculture and developed land use. We considered projected changes in agricultural and developed land uses in assessing future resiliency of each resilience unit for frecklebelly madtom. We assessed these land uses to understand the future impacts to habitat degradation and destruction resulting from poor water quality, a primary threat to frecklebelly madtom. The three scenarios capture the range of variability in the changing human population footprint on the landscape and how frecklebelly madtom populations will respond to these changing conditions. All three scenarios were projected out to the year 2050 (*i.e.*, 30 years), because we were reasonably certain we could forecast patterns in land-use change and understand how these land uses will interact with the frecklebelly madtom and its habitat over this time period given the species' life span.

In our development of future scenarios, we used projected trends in land use change from two models, the National Land Cover Database (NLCD) and the Slope, Land use, Excluded, Urban, Transportation and Hillshade (SLEUTH) model (Jantz *et al.* 2010, entire). Future projections for agricultural land use were developed from NLCD data by calculating a 15-year trend in agricultural land use change between 2001 and 2016 for each resilience unit and converting that to an annual rate of agricultural land use change for each resilience unit. We used the annual rate of agricultural land use change to project changes to 30 years from the present. The annual rate of agricultural land use change was held constant for each resilience unit across all scenarios; however, the rate of change in agricultural area varied among the resilience units we evaluated in our analysis. With the exception of the Alabama River resilience unit, which has an increase in the amount of agricultural land use over time, we found an overall decline in the amount of land used for agriculture. This result is consistent with broader trends that show the amount of agricultural land is declining with time in the eastern United States (Sayler *et al.* 2016, p. 12).

For our future developed land use projections, we used the SLEUTH datasets from the year 2050 (closest to 30 years in the future) and examined development across resilience units. We then developed three scenarios that varied development probabilities: (1) Low development, (2) moderate

development, and (3) high development. For the low development scenario, we considered all areas predicted to be developed at a greater than 90 percent probability (*i.e.*, only including areas that are almost certain to be developed); the moderate development scenario considered all areas to be developed at a greater than 50 percent probability; and the high development scenario considered all areas to be developed at a greater than 10 percent probability (*i.e.*, including the majority of areas with any potential to be developed). The results of the future projections for agriculture and developed land use were used to estimate a composite land use score, and then using a rule set, we categorized future resiliency into high, moderate, low, unknown, or likely extirpated conditions.

In the low development scenario, the frecklebelly madtom was projected to have one unit with high resiliency, seven units with moderate resiliency, one unit with low resiliency, and four units that are likely extirpated (see table 2, below). In terms of projected change from current condition, the Buttahatchee River (B4) and Pearl River (A2) resilience units are projected to decrease in resiliency from high to moderate. The Etowah River (F3) resilience unit is projected to become more developed, although the percent of developed land does not reach a point where a change in resiliency is anticipated. All other units are projected to retain their current resiliency under the low development scenario.

TABLE 2—FUTURE RESILIENCY OF FRECKLEBELLY MADTOM RESILIENCY UNITS UNDER THREE FUTURE SCENARIOS

Representation units	Resilience units	Current	Scenario 1	Scenario 2	Scenario 3
Pearl River (A)	Bogue Chitto River (A1)	High	High	High	High.
	Pearl River (A2)	High	Moderate	Moderate	Moderate.
Upper Tombigbee River (B)	East Fork Tombigbee (B1)	Moderate	Moderate	Moderate	Moderate.
	Sipsey River (B2)	Moderate	Moderate	Moderate	Moderate.
	Luxapallila Creek (B3)	Moderate	Moderate	Moderate	Moderate.
	Buttahatchee River (B4)	High	Moderate	Moderate	Moderate.
	Bull Mountain Creek (B5)	Likely Extirpated	Likely Extirpated	Likely Extirpated	Likely Extirpated.
	Upper Tombigbee River (mainstem) (B6)	Likely Extirpated	Likely Extirpated	Likely Extirpated	Likely Extirpated.
Lower Tombigbee/Alabama Rivers (C)	Lower Tombigbee River (C1)	Unknown*	Unknown*	Unknown*	Unknown.*
	Lower Alabama River (C2)	Unknown*	Unknown*	Unknown*	Unknown.*
Alabama River (D)	Alabama River (D1)	Likely Extirpated	Likely Extirpated	Likely Extirpated	Likely Extirpated.
Cahaba River (E)	Cahaba River (E1)	Moderate	Moderate	Moderate	Moderate.
	Alabama River/Big Swamp (E2)	Likely Extirpated	Likely Extirpated	Likely Extirpated	Likely Extirpated.
Upper Coosa River (F)	Conasauga River (F1)	Low	Low	Low	Likely Extirpated.
	Coosawattee River (F2)	Unknown*	Unknown*	Unknown*	Unknown.*
	Etowah River (F3)	Moderate	Moderate	Low	Low.

* Resiliency determined as unknown since units are known only from eDNA data.

In the moderate development scenario, the frecklebelly madtom was projected to have one unit with high resiliency, six units with moderate resiliency, two units with low resiliency, and four units that are likely extirpated (see table 2, above). In terms

of projected change from current condition, the Buttahatchee River (B4) and Pearl River (A2) resilience units are projected to decrease in resiliency from high to moderate. The Etowah River (F3) resilience unit is projected to become substantially more developed under this

scenario, and, therefore, this unit is projected to decrease in resiliency from moderate to low. All other units are projected to retain their current resiliency.

In the high development scenario, the frecklebelly madtom was projected to

have one unit with high resiliency, six units with moderate resiliency, one unit with low resiliency, and five units that are likely extirpated (see table 2, above). In terms of projected change from current condition, the Buttahatchee River (B4) and Pearl River (A2) resilience units are projected to decrease in resiliency from high to moderate. The Etowah River (F3) resilience unit is projected to become substantially more developed under this scenario; therefore, this unit is projected to decrease in resiliency from moderate to low. The Conasauga River (F1) resilience unit is projected to decrease in resiliency from low to being likely extirpated as a result of high levels of both agriculture and developed land uses. All other units are projected to retain their current resiliency.

In summary, the resiliency of frecklebelly madtom resilience units are projected to remain similar to the current condition with eight units having moderate to high resiliency under the low development scenario (Service 2020, entire). In the moderate and high development scenarios, seven units are projected to have moderate to high resiliency; two units are projected to have low resiliency (one unit is low under current condition) in the moderate development scenario and one additional unit is projected to be likely extirpated (total of five units) in the high development scenario. The Pearl River (A) representation unit continues to be the stronghold for the species, as resiliency is projected to remain high in the Bogue Chitto (A1) resilience unit across all scenarios and the Pearl River (A2) resilience unit is projected to have moderate resiliency across all scenarios. All extant resilience units in the Upper Tombigbee (B) representation unit are projected to have moderate resiliency. The Cahaba River (E1) resilience unit is projected to maintain moderate resiliency into the future.

Within the Upper Coosa River (F) representation unit, the Etowah River (F3) resilience unit is projected to become more developed by 2050 under all scenarios; therefore, in the moderate and high development scenarios, the resiliency is projected to decrease from moderate to low, making the unit more vulnerable to stochastic events. The high level of development projected within riparian areas of the Etowah River (F3) unit will lead to an increase in impervious area, which could lead to further decreases in water quality and impact the persistence of frecklebelly madtom. In addition, although the agricultural trend projects a decrease, the amount of land in agricultural use is still projected to remain relatively

high. High levels of agriculture and developed land use projections in this unit drive the projected low resiliency by the year 2050. In the Conasauga River (F1) resilience unit, developed land use under the high development scenario is projected to increase, and agriculture and developed land use are projected to be at relatively high levels by 2050. However, the Conasauga River (F1) resilience unit currently has low resiliency, and this projected increase in development is anticipated to further impact resiliency, resulting in likely extirpation of the frecklebelly madtom from this unit.

Finally, the presence of frecklebelly madtom in the Lower Tombigbee River (C1), Lower Alabama River (C2), and Coosawattee River (F2) resilience units is based on recent positive eDNA samples, and these units have been assessed as having an unknown resiliency. Based on our assessment of future land use, threat levels from agriculture and developed land use are projected to be relatively low in the Lower Tombigbee (C1) and Lower Alabama (C2) resilience units. Thus, if the species is present, there is no projected increase in threats related to agriculture or developed land use. In the Coosawattee River (F2) resilience unit, there is projected to be relatively high amounts of agricultural and developed land. If the species is present there, this land use pattern could represent a threat to the individuals occupying the unit.

Future species' representation is projected to maintain current levels in the low development scenario, as the only projected changes in resiliency are two units decreasing from high to moderate resiliency. Under the moderate and high development scenarios, the Etowah River (F3) and Conasauga River (F1) units are projected to decrease in resiliency. Therefore, the Upper Coosa River (F) representation unit is projected to be vulnerable to extirpation, resulting in a loss of species' representation. Given this unit occurs in a unique physiographic province and has populations considered as an evolutionary significant unit (Neely 2018, pp. 7–10), the projected loss of this unit would result in a lower level of representation for the species.

Species redundancy is projected to maintain current levels into the future under the low and moderate development scenarios, as no additional resilience units are projected to become extirpated. In the Upper Coosa River (F) representation unit, two resilience units are projected to decrease in resiliency under the moderate and high scenarios. Therefore, frecklebelly madtom in these

units are at an increased risk of extirpation from a catastrophic event. Given the broad distribution of moderate to high resilience units, it is unlikely that a catastrophic event would impact the entire species' range.

Determination of Frecklebelly Madtom's Status

Section 4 of the Act (16 U.S.C. 1533) and its implementing regulations (50 CFR part 424) set forth the procedures for determining whether a species meets the definition of “endangered species” or “threatened species.” The Act defines an “endangered species” as a species that is in danger of extinction throughout all or a significant portion of its range, and a “threatened species” as a species that is likely to become an endangered species within the foreseeable future throughout all or a significant portion of its range. The Act requires that we determine whether a species meets the definition of “endangered species” or “threatened species” because of any of the following factors: (A) The present or threatened destruction, modification, or curtailment of its habitat or range; (B) overutilization for commercial, recreational, scientific, or educational purposes; (C) disease or predation; (D) the inadequacy of existing regulatory mechanisms; or (E) other natural or manmade factors affecting its continued existence.

Status Throughout All of Its Range

We have carefully assessed the best scientific and commercial information available regarding the past, present, and future threats to the frecklebelly madtom. We considered whether the frecklebelly madtom is presently in danger of extinction. Our review of the best available information indicates there are 16 resilience units of frecklebelly madtom within 6 representation units across the known historical range in Louisiana, Mississippi, Alabama, Georgia, and Tennessee. The species was likely more widespread historically in the Mobile Bay drainage but was extirpated from large river habitats after the creation of numerous impoundments. Currently, eight resilience units (62 percent) of frecklebelly madtom have moderate to high resiliency and are contributing to the viability of the species; impacts from habitat destruction and modification do not appear to be affecting the frecklebelly madtom at the population-level for these resilience units. Five units (38 percent) have low resiliency or are likely extirpated due to habitat destruction and degradation resulting from channelization, dams, and

impoundments, and these units are not currently contributing to the frecklebelly madtom's viability. Three units have unknown resiliency as these units have no direct observations of the species and are known only from eDNA presence surveys. The species is currently extant in four of the six representation units with at least one resilience unit having moderate to high resiliency in each of the four representation units. Given the broad distribution of the species and eight units across the range having moderate to high resiliency, a single catastrophic event is not likely to impact the species as a whole. Therefore, the frecklebelly madtom across its range is currently at a low risk of extinction from habitat destruction and other stressors. Thus, we determine that proposing an endangered status for the species is not appropriate.

We forecasted the viability of the frecklebelly madtom under three plausible scenarios 30 years into the future (summarized above in *Future Scenarios*). We assessed relevant risk factors that may be acting on the frecklebelly madtom in the future and whether we could make reliable predictions about these factors and how they may impact the viability of the species. We assessed how agriculture and developed land use is projected to influence the viability of the frecklebelly madtom 30 years in the future (2050). Based on the modeling and scenarios evaluated, we considered our ability to make reliable predictions in the future and the uncertainty in how and to what degree the species could respond to those risk factors in this timeframe. Based on this information, we determine the appropriate timeframe for assessing whether this species is likely to become in danger of extinction in the foreseeable future is 30 years.

Taking into account the impacts of the primary factors influencing the species in the future (habitat destruction and degradation caused by agriculture and developed land uses resulting in poor water quality) and the potential impacts to the species' needs, we project the frecklebelly madtom will continue to remain resilient to stochastic events across much of its range. We project that numerous resilience units will have moderate to high resiliency over the next 30 years across the broad geographic range of the species, including within the four currently extant representation units, depending on scenario. Although two of our scenarios indicated a decline in the number of resilience units contributing to viability of the frecklebelly madtom, eight units in the low development

scenario and seven units in the moderate and high development scenarios are projected to remain viable through 2050. With the projected lower resiliency from habitat destruction and degradation within the Upper Coosa River (F) representation unit, the species' representation and redundancy is lower than current levels. However, the geographically wide distribution of resilience and representation units guards against catastrophic losses rangewide. We find the multiple resilience units across multiple representation units provide resiliency, representation, and redundancy levels that are likely sufficient to sustain the species into the foreseeable future. Therefore, we find that the risk of extinction of the frecklebelly madtom is sufficiently low that it is unlikely to become endangered within the foreseeable future, *i.e.*, within the next 30 years.

After evaluating threats to the species and assessing the cumulative effect of the threats under the section 4(a)(1) factors, we conclude that the risk factors acting on the frecklebelly madtom and its habitat, either singly or in combination, are not of sufficient imminence, scope, or magnitude to rise to the level to indicate that the species is in danger of extinction now (an endangered species), or likely to become endangered within the foreseeable future (a threatened species), throughout all of its range.

Status Throughout a Significant Portion of Its Range

Under the Act and our implementing regulations, a species may warrant listing if it is in danger of extinction or likely to become so within the foreseeable future throughout all or a significant portion of its range. Having determined that the frecklebelly madtom is not in danger of extinction or likely to become so in the foreseeable future throughout all of its range, we now consider whether it may be in danger of extinction or likely to become so in the foreseeable future in a significant portion of its range—that is, whether there is any portion of the species' range for which it is true that both (1) the portion is significant; and (2) the species is in danger of extinction now or likely to become so in the foreseeable future in that portion. Depending on the case, it might be more efficient for us to address the “significance” question or the “status” question first. We can choose to address either question first. Regardless of which question we address first, if we reach a negative answer with respect to the first question that we address, we do

not need to evaluate the other question for that portion of the species' range.

In undertaking this analysis for the frecklebelly madtom, we chose to address the status question first—we consider information pertaining to the geographic distribution of both the species and the threats that the species faces to identify any portions of the range where the species is endangered or threatened. We considered whether any of the threats acting on the frecklebelly madtom are geographically concentrated in any portion of the range at a biologically meaningful scale.

We identified two portions of the species' range that may be experiencing a concentration of threats. First, the Upper Tombigbee River (B) representation unit of the frecklebelly madtom may be experiencing elevated threats resulting from construction of the Tenn-Tom Waterway (Factor A). The construction of the Tenn-Tom Waterway for commercial navigation eliminated suitable habitat for the frecklebelly madtom and has caused the likely extirpation of two of six resilience units in the Upper Tombigbee River (B) representation unit: Upper Tombigbee River (B6) and Bull Mountain Creek (B5). We evaluated current status information and concluded that the species is effectively extirpated from these two resilience units. Because we considered these extirpated units to be lost historical range, they cannot be considered as a significant portion of the range. However, we considered the effects that the loss of these two units have on the current and future viability of the frecklebelly madtom in the Upper Tombigbee River (B) representation unit. We then considered the current status of the remaining four resilience units in the Upper Tombigbee River representation unit (B), which currently have moderate to high resiliency, including the Buttahatchee River (B4)—considered a stronghold for the species. In addition, the East Fork Tombigbee River (B1) resilience unit has moderate resiliency with recent collections of over 100 individuals despite some habitat impacts from the Tenn-Tom Waterway. These four units are projected to have continued moderate resiliency into the foreseeable future. Based on these facts, we conclude that the impacts from the Tenn-Tom Waterway are not having any biologically meaningful effect on the remaining four resilience units in the Upper Tombigbee River representation unit (B), which indicates the species does not have a different status in that portion of its range. Therefore, even if the Upper Tombigbee River (B) representation unit was found to

comprise a significant portion of the frecklebelly madtom's range, we conclude that the species is not in danger of extinction or likely to become so in the foreseeable future in that portion.

We identified another portion, the Upper Coosa River (F) representation unit, of the frecklebelly madtom's range that is experiencing a concentration of the following threat, but at a biologically meaningful scale: Habitat destruction and degradation from agriculture and developed land uses resulting in poor water quality (Factor A). Currently, within the Upper Coosa River (F) representation unit, two resilience units (Conasauga River (F1) and Etowah River (F3)) have low and moderate resiliency, respectively; the Coosawattee (F2) resilience unit was determined to have an unknown resiliency as the species was not historically known to occur in this river, but eDNA for the frecklebelly madtom was found in portions of this unit in 2018. Declines from historical condition in frecklebelly madtom occurrences have been apparent in the Conasauga River (F1) resilience unit, while occurrence records in the Etowah River (F3) resilience unit are fairly widespread and considered similar to historical occurrence records. Given the current resiliency of units within the Upper Coosa River (F) representation unit, it is not likely a single catastrophic event would result in the extirpation of the species from this portion.

In the foreseeable future, we project the Upper Coosa River (F) representation unit will have declines in resiliency for both the Conasauga River (F1) and Etowah River (F3) resilience units due to habitat destruction and degradation from agriculture and developed land use. Although this threat is not unique to the Upper Coosa River (F) representation unit, the threat in this portion is great enough to project a reduction in resiliency for both of these resilience units, and, therefore, the entire representation unit is expected to decline. In the Etowah River (F3) resilience unit, urbanization under the low, moderate, and high development scenarios is projected to increase and comprise 35, 38, and 42 percent of the watershed, respectively, as compared to 14 percent of the watershed currently. Within the Conasauga River (F1) resilience unit, urbanization is projected to increase and comprise 13, 15, and 17 percent of the watershed under the low, moderate, and high development scenarios, as compared to 8 percent of the watershed currently. This projected urbanization coupled with continued agricultural activities will continue to impair, and potentially further decrease,

stream habitat and water quality in the Conasauga River (F1) resilience unit, which already has elevated nitrogen, phosphorus, turbidity, and concentrations of bioavailable estrogen (Freeman *et al.* 2017, pp. 429–430). In addition, the future scenarios project the Etowah River (F3) and Conasauga River (F1) units to have low resiliency (under the moderate development scenario) and to have low resiliency and be likely extirpated, respectively (under the high development scenario), by the year 2050. This would significantly increase the risk of extirpation of the Upper Coosa (F) representation unit from a catastrophic or stochastic event. Our examination leads us to find that there is substantial information that the Upper Coosa River (F) representation unit is likely to become in danger of extinction within the foreseeable future.

We then proceeded to consider whether this portion of the range (*i.e.*, the Upper Coosa River (F) representation unit) is significant. For the purposes of this analysis, the Service is considering significant portions of the range by applying any reasonable definition of “significant.” We asked whether any portions of the range may be biologically meaningful in terms of the resiliency, redundancy, or representation of the entity being evaluated. This approach is consistent with the Act, our implementing regulations, our policies, and case law.

We evaluated the available information about the portion of the species that occupies the Upper Coosa River representation unit, assessing its significance. Throughout most of its range, the frecklebelly madtom occurs in rivers within the Gulf Coastal Plain physiographic province, which is an area comprising the former continental shelf and is currently above sea level (Fennemann 1928, p. 280). The Upper Coosa River (F) representation unit occurs in the Ridge and Valley (Conasauga River (F1) and Coosawattee River (F2) resilience units) and Piedmont Upland (Etowah River (F3) resilience unit) physiographic provinces. Physiographic provinces are regions divided into distinctive geographic areas based on physical geography, such as topography, soil type, and geologic history (Fennemann 1928, pp. 266–272), where areas with similar characteristics are grouped into a province. The Piedmont province contains lowlands (plains) and highlands (plateaus) with isolated mountains, and in Georgia, the elevation reaches up to 480 meters (1,500 feet) (Fennemann 1928, p. 293); the Ridge and Valley province contain a longitudinal series of valleys (lowlands)

and ridges (mountains) through the Appalachians (Fennemann 1928, p. 296). Given the Upper Coosa River (F) representation unit occurs in different physiographic provinces with a distinctive physical geography from the rest of the range, frecklebelly madtoms in this unit may experience environmental conditions, such as soils, water chemistry, hydrological regimes, and nutrient cycling, that are different from the rest of the range. These rivers in the Upper Coosa River (F) representation unit, flowing through unique physiographic provinces, are also removed from the nearest Coastal Plain physiographic province resilience units by approximately 418 river miles (673 river kilometers) and represent the most eastern and northern resilience units of the frecklebelly madtom.

Historically and currently, the Upper Coosa River (F) representation unit represents a small portion (less than 15 percent based on current occurrences and occupied stream reaches; less than 24 percent based on historical occurrences) of the frecklebelly madtom's range. If the Upper Coosa River (F) representation unit was extirpated, the frecklebelly madtom would lose some representation and redundancy, but the loss of this portion of the species' range would still leave sufficient resiliency (populations with moderate to high resiliency), redundancy, and representation in the remainder of the species' range such that it would not notably reduce the viability of the species. Therefore, despite the Upper Coosa River (F) representation unit occurring in different physiographic provinces and being disjunct from the remainder of the range, this unit only represents a small portion of the frecklebelly madtom's historical and current range and does not represent a significant portion of the frecklebelly madtom's range. We conclude that the frecklebelly madtom is not in danger of extinction or likely to become so in the foreseeable future in a significant portion of its range. Our approach is consistent with the courts' holdings in *Desert Survivors v. Department of the Interior*, 321 F. Supp. 3d 1011 (N.D. Cal. 2018), and *Center for Biological Diversity v. Jewell*, 248 F. Supp. 3d, 946, 959 (D. Ariz. 2017).

We have carefully assessed the best scientific and commercial information available regarding the past, present, and future threats to the frecklebelly madtom. Because the species is neither in danger of extinction now nor likely to become so in the foreseeable future throughout all or any significant portion of its range, the frecklebelly madtom does not meet the definition of an

endangered species or threatened species. Therefore, we find that listing the frecklebelly madtom as an endangered or threatened species under the Act is not warranted at this time. This constitutes the conclusion of the Service's 12-month finding on the 2010 petition to list the frecklebelly madtom as an endangered or threatened species. A detailed discussion of the basis for this finding can be found in the SSA report and other supporting documents (available on the internet at <http://www.regulations.gov> under Docket No. FWS-R4-ES-2020-0058).

We ask the public to submit to us any new information that becomes available concerning the taxonomy, biology, ecology, or status of the frecklebelly madtom, or stressors to the frecklebelly madtom, whenever it becomes available. Please submit any new information, materials, comments, or questions concerning this finding to the Alabama Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**).

Distinct Population Segment (DPS) Analysis

Under the Act, we have the authority to consider for listing any species, subspecies, or, for vertebrates, any distinct population segment (DPS) of these taxa if there is sufficient information to indicate that such action may be warranted. To guide the implementation of the DPS provisions of the Act, we and the National Marine Fisheries Service (National Oceanic and Atmospheric Administration—Fisheries), published the Policy Regarding the Recognition of Distinct Vertebrate Population Segments Under the Endangered Species Act (DPS Policy) in the **Federal Register** on February 7, 1996 (61 FR 4722). Under our DPS Policy, we use two elements to assess whether a population segment under consideration for listing may be recognized as a DPS: (1) The population segment's discreteness from the remainder of the species to which it belongs, and (2) the significance of the population segment to the species to which it belongs. If we determine that a population segment being considered

for listing is a DPS, then the population segment's conservation status is evaluated based on the five listing factors established by the Act to determine if listing it as either endangered or threatened is warranted.

The Upper Coosa River (F) representation unit consists of the Conasauga River, Coosawattee River, Etowah River, and their tributaries and watersheds (see figure 1, below). The Coosawattee River joins the Conasauga River to form the Oostanaula River, and the Etowah River joins the Oostanaula River to form the Coosa River. Within this proposed rule, we refer to the Upper Coosa River (F) representation unit as including all rivers and streams in the upper Coosa River basin that join to form the Coosa River; in other words, the entire watershed upstream from the confluence of the Oostanaula and Etowah Rivers. Below, we evaluated the Upper Coosa River representation unit of the frecklebelly madtom's range to determine whether it meets the definition of a DPS under our DPS Policy.

BILLING CODE 4333-15-C

Discreteness

Under our DPS Policy, a population segment of a vertebrate taxon may be considered discrete if it satisfies either one of the following conditions: (1) It is

markedly separated from other populations of the same taxon as a consequence of physical, physiological, ecological, or behavioral factors. Quantitative measures of genetic or morphological discontinuity may provide evidence of this separation; or

(2) it is delimited by international governmental boundaries within which differences in control of exploitation, management of habitat, conservation status, or regulatory mechanisms exist that are significant in light of section 4(a)(1)(D) of the Act.

The Upper Coosa River (F) representation unit of the frecklebelly madtom is markedly separate from other representation and resilience units of the species both genetically and geographically. In terms of morphology and genetics, the frecklebelly madtom has exhibited some morphological and genetic differences across representation units. Preliminary data suggested there was considerable morphological variation across the species' range, and the populations in the Coosa River drainage were the most distinctive population (Neely 2018, p. 1). Given this information, it was thought that frecklebelly madtoms in the Conasauga and Etowah Rivers may be distinct from frecklebelly madtoms found elsewhere. Through a reanalysis of existing morphological and genetic data, frecklebelly madtoms collected from the Coosa River drainage were found to have shorter snout to barbel midpoint distance measurements than madtoms collected from other drainages, but this difference was not diagnostic of this population as there is overlap in the range of measurements among populations (Neely 2018, p. 7). In terms of genetic variation, considerable genetic differentiation was observed among the Pearl, Tombigbee, Cahaba, and Coosa Rivers populations; however, morphological variation was incongruent with genetic variation (Neely 2018, p. 10). These results "do not allow clear diagnosis of distinct species within *Noturus munitus*" (Neely 2018, p. 10). Because the data do not support the description of a distinct subspecies or species, each population of frecklebelly madtom is recommended to be considered as a separate evolutionary significant unit or ESU of the frecklebelly madtom (Neely 2018, p. 10). Therefore, the Upper Coosa River (F) representation unit is considered an ESU of the frecklebelly madtom, which provides key representation for the frecklebelly madtom as a whole.

The Upper Coosa River (F) representation unit also consists of separate and distinct physiographic provinces as compared to the majority of the species' range, as discussed above under *Status Throughout a Significant Portion of Its Range*. In terms of physical or geographic separation, the resilience units in the Upper Coosa River (F) representation unit are disjunct from other units of the frecklebelly madtom across the species' range. The distance of the geographic separation from other frecklebelly madtom representation and resilience units is approximately 418 river miles (673 river kilometers) upstream with seven dams (Weiss, H.

Neely Henry, Logan Martin, Lay, Mitchell, Jordan, and R.F. Henry) and impoundments disrupting the connectivity and creating barriers to movement to the rest of the range. Therefore, frecklebelly madtoms in the Upper Coosa River (F) representation unit currently do not, and will likely never, naturally interact with individuals or populations in the remaining part of the range. In addition, if this portion becomes extirpated, frecklebelly madtoms located within the Coastal Plain physiographic province may be unable to recolonize the Upper Coosa River (F) representation unit, not only due to the lack of connectivity, but also because they may lack the needed adaptive traits to survive in these different physical geographies. Based on our review of the available information, we conclude that the Upper Coosa River representation unit of the frecklebelly madtom is markedly separate from other representation and resilience units of the species due to genetic separation and geographic (physical) isolation from frecklebelly madtoms in the remainder of the range. Therefore, we have determined that the Upper Coosa River representation unit of the frecklebelly madtom meets the condition for discreteness under our DPS Policy.

Significance

Under our DPS Policy, once we have determined that a population segment is discrete, we consider its biological and ecological significance to the larger taxon to which it belongs. This consideration may include, but is not limited to: (1) Evidence of the persistence of the discrete population segment in an ecological setting that is unusual or unique for the taxon, (2) evidence that loss of the population segment would result in a significant gap in the range of the taxon, (3) evidence that the population segment represents the only surviving natural occurrence of a taxon that may be more abundant elsewhere as an introduced population outside its historical range, or (4) evidence that the discrete population segment differs markedly from other populations of the species in its genetic characteristics. Of particular note, as we explained in our draft (76 FR 76987, December 9, 2011, p. 76998) and final (79 FR 37577, July 1, 2014, pp. 79 FR 37579, 37585) Policy on Interpretation of the Phrase "Significant Portion of Its Range" in the Endangered Species Act's Definitions of "Endangered Species" and "Threatened Species" (SPR Policy), the definition of "significant" for the purpose of significant portion of the range analysis differs from the definition of

"significant" found in our DPS Policy and used for DPS analysis. Although there are similarities in the definition of "significant" under the SPR Policy and the definition of "significance" in the DPS Policy, there are important differences between the two. The DPS Policy requires that for a vertebrate population to meet the Act's definition of "species," it must be discrete from other populations and must be significant to the taxon as a whole. The significance criterion under the DPS Policy is necessarily broad and could be met under a wider variety of circumstances even if it could not be met under the SPR Policy. In this case, we determine (see below) that the Upper Coosa River (F) representation unit is "significant" for the purposes of DPS, and we did not, as discussed above, conclude that it constituted a "significant" portion of the frecklebelly madtom's range.

Currently, the Upper Coosa River (F) representation unit is one of four known extant units within the species. We determined that loss of this unit (population segment) would result in a significant gap in the species' range. The Upper Coosa River (F) representation unit in Georgia and Tennessee represents the eastern and northernmost portion of the frecklebelly madtom's range, with the remainder of the range occurring in Louisiana, Mississippi, and Alabama. As discussed previously, this unit also occurs in different physiographic provinces (Ridge and Valley province and Piedmont Upland province) associated with different environmental and physical conditions. Lastly, the Upper Coosa River (F) representation unit is approximately 418 river miles (673 kilometers) from the nearest resilience units in the Coastal Plain province. Therefore, the loss of this unit would result in the species' range shifting south and west approximately 418 miles (673 kilometers).

As with other representation units, the Upper Coosa River (F) representation unit of the frecklebelly madtom differs markedly from other populations of the species in its genetic characteristics. As discussed above, considerable genetic differentiation has been observed among populations of frecklebelly madtom (Neely 2018, p. 10), and these populations are considered evolutionary significant units of frecklebelly madtom. In addition, the Upper Coosa River (F) representation unit of the frecklebelly madtom persists in different physiographic provinces than the remainder of the range. The Upper Coosa River (F) representation unit occurs in the Ridge and Valley

(Conasauga River (F1) and Coosawatee River (F2) resilience units) and Piedmont Upland (Etowah River (F3) resilience unit) physiographic provinces, while the rest of the range occurs in rivers within the Gulf Coastal Plain physiographic province. Having persisted over time in areas with distinctive physical geography, frecklebelly madtoms in the Upper Coosa River (F) representation unit have likely adapted to environmental conditions, such as soils, water chemistry, hydrological regimes, and nutrient cycling, differently, as demonstrated by the divergent genetics described by Neely (2018, entire), and have likely contributed to the adaptive capacity of the species. The adaptations of frecklebelly madtoms are an important and unique component of the species' representation, which is evidence of it differing markedly from other populations of the species in its genetics. Therefore, we have substantial evidence that the Upper Coosa River (F) representation unit of the frecklebelly madtom differs markedly in its genetic characteristics, as it is considered an evolutionary significant unit, and loss of this genetic diversity would likely impact the species' adaptive capacity. However, although the loss of the Upper Coosa River (F) representation unit would likely result in a reduction in species' redundancy, and, therefore, the species' adaptive capacity, it would not notably reduce the viability of the species across the range (see above under *Status Throughout a Significant Portion of Its Range*).

Given the evidence that the Upper Coosa River (F) representation unit of the frecklebelly madtom would result in a significant gap in the range if lost, and that the unit differs markedly from other populations of the species, we consider this unit to be significant to the species as a whole. Thus, the Upper Coosa River (F) representation unit of the frecklebelly madtom meets the criteria for significance under our DPS Policy.

DPS Conclusion for the Upper Coosa River Representation Unit of the Frecklebelly Madtom

Our DPS Policy directs us to evaluate the significance of a discrete population in the context of its biological and ecological significance to the remainder of the species to which it belongs. Based on an analysis of the best available scientific and commercial data, we conclude that the Upper Coosa River (F) representation unit of the frecklebelly madtom is discrete due to genetic separation and geographic (physical) isolation from the remainder of the taxon. Furthermore, we conclude that

the Upper Coosa River representation unit of the frecklebelly madtom is significant, as described above. Therefore, we conclude that the Upper Coosa River (F) representation unit of the frecklebelly madtom is both discrete and significant under our DPS Policy and is, therefore, a listable entity under the Act.

Based on our DPS Policy (61 FR 4722; February 7, 1996), if a population segment of a vertebrate species is both discrete and significant relative to the taxon as a whole (*i.e.*, it is a distinct population segment), its evaluation for endangered or threatened status will be based on the Act's definition of those terms and a review of the factors enumerated in section 4(a) of the Act. Having found that the Upper Coosa River (F) representation unit of the frecklebelly madtom meets the definition of a distinct population segment, we now evaluate the status of this DPS to determine whether it meets the definition of an endangered or threatened species under the Act.

Status Throughout All of the DPS's Range

In the analysis above for the frecklebelly madtom as a whole, we have carefully assessed the best scientific and commercial information available regarding the past, present, and future threats to the Upper Coosa River DPS of the species. We considered whether the Upper Coosa River DPS of the frecklebelly madtom is presently in danger of extinction throughout all of its range. The Upper Coosa River representation unit faces ongoing and future threats from habitat destruction and degradation caused by agriculture and developed land uses resulting in poor water quality. As discussed above under *Status Throughout a Significant Portion of Its Range*, occurrence records in the Etowah River (F3) resilience unit are considered similar to historical occurrence records, whereas there have been declines from historical conditions in frecklebelly madtom occurrences in the Conasauga River (F2) resilience unit. Evidence of the frecklebelly madtom presence was first reported from the Coosawatee River (F2) from eDNA collected in 2018. Until eDNA for the species was recorded from this river, the frecklebelly madtom was not expected occur there, given that the history of physical modification to improve navigation, as well as hydropeaking at Carters Dam, upstream has negatively affected small-bodied, riffle-dwelling fish species (Freeman *et al.* 2011, pp. 10–11). However, given the current resiliency of units within the Upper Coosa River (F) representation unit, it is

not likely that the current threats, or the cumulative effects of those threats, will result in the extirpation of the DPS. Therefore, the DPS is not currently in danger of extinction throughout its range.

In the future, projected urbanization and continued agricultural activities will continue to impact the Upper Coosa River DPS and its habitat by negatively affecting water quality (Factor A). Our future scenarios project the Etowah River (F3) and Conasauga River (F1) units in the Upper Coosa River (F) representation unit to have low resiliency or to become extirpated by the year 2050, and this would significantly increase the risk of extirpation of the Upper Coosa River (F) representation unit from the aforementioned threats, as well as a catastrophic or stochastic event, within the foreseeable future. In our consideration of foreseeable future, we evaluated how far into the future we could reliably predict the threats to this unit, as well as the madtom's response to those threats. Based on the modeling and scenarios (agriculture and developed land use projections to 2050) evaluated, we considered our ability to make reliable predictions in the future and the uncertainty in how and to what degree the unit could respond to those risk factors in this timeframe. We determined a foreseeable future of 30 years for the Upper Coosa River representation unit. Based on this information, we find the Upper Coosa River DPS of the frecklebelly madtom is likely to become endangered within the foreseeable future throughout all of its range. Therefore, we consider the Upper Coosa River DPS to be threatened throughout all of its range.

Status Throughout a Significant Portion of the DPS's Range

Under the Act and our implementing regulations, a species may warrant listing if it is in danger of extinction or likely to become so in the foreseeable future throughout all or a significant portion of its range. The court in *Center for Biological Diversity v. Everson*, 2020 WL 437289 (D.D.C. Jan. 28, 2020) (*Center for Biological Diversity*), vacated the aspect of the SPR Policy (79 FR 37577; July 1, 2014) that provided that the Service does not undertake an analysis of significant portions of a species' range if the species warrants listing as threatened throughout all of its range. Therefore, we proceed to evaluating whether the species (DPS) is endangered in a significant portion of its range—that is, whether there is any portion of the species' range for which both (1) the portion is significant; and

(2) the species is in danger of extinction in that portion. Depending on the case, it might be more efficient for us to address the “significance” question or the “status” question first. We can choose to address either question first. Regardless of which question we address first, if we reach a negative answer with respect to the first question that we address, we do not need to evaluate the other question for that portion of the species’ range.

Following the court’s holding in *Center for Biological Diversity*, we now consider whether there are any significant portions of the species’ range where the species is in danger of extinction now (*i.e.*, endangered). In undertaking this analysis for the Upper Coosa River DPS of the frecklebelly madtom, we chose to address the status question first—we consider information pertaining to the geographic distribution of both the species and the threats that the species faces to identify any portions of the range where the species is endangered. We considered whether the threats acting on the Upper Coosa River DPS are geographically concentrated in any portion of the range at a biologically meaningful scale. We examine the following threats that were considered to be primary factors driving current resiliency of the Upper Coosa River DPS: Habitat destruction and degradation caused by agriculture and developed land uses resulting in poor water quality (Factor A).

Habitat destruction and degradation from agriculture and developed land uses resulting in poor water quality is occurring throughout the range of the Upper Coosa River DPS. In the Conasauga River (F1) resilience unit, current development and agriculture comprises 8.0 percent and 21.3 percent of the watershed, respectively (Service 2020, pp. 66–69). In the Coosawattee River (F2) resilience unit, current development and agriculture comprises 6.6 percent and 27.2 percent of the watershed, respectively (Service 2020, pp. 66–69). Lastly, current development and agriculture comprises 14.8 percent and 10.4 percent of the Etowah River (F3) resilience unit (Service 2020, pp. 66–69). For the three resilience units assessed within the DPS, approximately 25 to 33 percent of each unit is currently impacted by agricultural and developed land uses. Therefore, we found no concentration of threats in any portion of the Upper Coosa River DPS’s range at a biologically meaningful scale. However, we identified one portion, the Conasauga River (F1) resilience unit, which currently has low resiliency and where the frecklebelly madtom has not been observed, despite repeated

surveys, in at least 20 years.

Environmental DNA surveys have detected the frecklebelly madtom in the Conasauga River (F1) resilience unit, leading us to determine the species remains present there. However, the lack of recent occurrence data coupled with projections that this unit will become extirpated within the foreseeable future led us to find there is substantial information that the Conasauga River (F1) resilience unit may be endangered.

We then proceeded to consider whether this portion of the range (*i.e.*, the Conasauga River (F1) resilience unit) is significant. For purposes of this analysis, the Service is examining for significant portions of the range by applying any reasonable definition of “significant.” We asked whether any portions of the range may be biologically meaningful in terms of the resiliency, redundancy, or representation of the entity being evaluated. This approach is consistent with the Act, our implementing regulations, our policies, and case law.

The Upper Coosa River (F) representation unit occurs in the Ridge and Valley (Conasauga River (F1) resilience unit) and Piedmont Upland (Etowah River (F3) resilience unit) physiographic provinces. As discussed above under *Status Throughout a Significant Portion of Its Range* for the frecklebelly madtom as a whole, physiographic provinces are geographic areas divided based on physical geography and grouped by similar characteristics (Fenneman 1928, pp. 266–272). The Conasauga River (F1) resilience unit occurs in the Ridge and Valley province, which contains a series of valleys (lowlands) and ridges (mountains) through the Appalachians (Fennemann 1928, p. 296). The Etowah River (F3) resilience unit occurs in the Piedmont province, which contains lowlands (plains) and highlands (plateaus) with isolated mountains (Fennemann 1928, p. 293). These two resilience units may occur in two physiographic provinces; however, the geography in both represents environmental and physical conditions of lowlands and highlands associated with higher elevations than the remainder of the species’ range in the Coastal Plain province. Frecklebelly madtoms collected in both the Conasauga River (F1) and Etowah River (F3) resilience units are strongly associated with river weed (*Podostemum* spp.) used for cover and shelter. Neither unit acts as a refugia or an important spawning ground for the DPS. In addition, the Conasauga River (1) resilience unit watershed is

experiencing similar impacts from development and agricultural land-use to the Etowah River (F3) resilience unit. Since the Upper Coosa River DPS of the frecklebelly madtom occurs in rivers with similar physical and environmental conditions, and the Conasauga River (F1) resilience unit portion is experiencing similar water quality impacts as the remainder of the DPS’s range, there is no unique observable environmental usage or behavioral characteristics attributable to just this portion that would make it a significant portion of the range of the Upper Coosa River DPS.

Overall, there is little evidence to suggest that the Conasauga River (F1) portion of the range has higher quality or higher value habitat or any other special importance to the species’ life history in the Upper Coosa River DPS. We considered if the Conasauga River (F1) portion contributes to biological significance in any way listed above and did not find this portion to be prominent or noteworthy in a manner that would suggest it is a significant portion of the DPS’s range. Thus, based on the best available information, we find that this portion of the DPS’s range is not biologically significant. Therefore, no portion of the Upper Coosa River DPS’s range provides a basis for determining that it is in danger of extinction in a significant portion of its range. This is consistent with the courts’ holdings in *Desert Survivors v. Department of the Interior*, No. 16–cv–01165–JCS, 2018 WL 4053447 (N.D. Cal. Aug. 24, 2018), and *Center for Biological Diversity v. Jewell*, 248 F. Supp. 3d, 946, 959 (D. Ariz. 2017).

Determination of Status

We evaluated threats to the frecklebelly madtom and assessed the cumulative effect of the threats under the Act’s section 4(a)(1) factors and conclude the species, viewed across its entire range, experiences a low risk of extinction. Based on the best available scientific and commercial information as presented in the SSA report and this finding, we do not find that the frecklebelly madtom is currently in danger of extinction throughout all or a significant portion of its range, nor is it likely to become so in the foreseeable future. However, we did find the Upper Coosa River representation unit is a valid DPS, and this DPS of the frecklebelly madtom is likely to become endangered within the foreseeable future throughout all of its range. Therefore, we propose to list the Upper Coosa River DPS of the frecklebelly madtom as a threatened species throughout all of its range in accordance

with sections 3(20) and 4(a)(1) of the Act.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened species under the Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain practices. Recognition through listing results in public awareness, and conservation by Federal, State, Tribal, and local agencies, private organizations, and individuals. The Act encourages cooperation with the States and other countries and calls for recovery actions to be carried out for listed species. The protection required by Federal agencies and the prohibitions against certain activities are discussed, in part, below.

The primary purpose of the Act is the conservation of endangered and threatened species and the ecosystems upon which they depend. The ultimate goal of such conservation efforts is the recovery of these listed species, so that they no longer need the protective measures of the Act. Section 4(f) of the Act calls for the Service to develop and implement recovery plans for the conservation of endangered and threatened species. The recovery planning process involves the identification of actions that are necessary to halt or reverse the species' decline by addressing the threats to its survival and recovery. The goal of this process is to restore listed species to a point where they are secure, self-sustaining, and functioning components of their ecosystems.

Recovery planning consists of preparing draft and final recovery plans, beginning with the development of a recovery outline and making it available to the public within 30 days of a final listing determination. The recovery outline guides the immediate implementation of urgent recovery actions and describes the process to be used to develop a recovery plan. Revisions of the plan may be done to address continuing or new threats to the species, as new substantive information becomes available. The recovery plan also identifies recovery criteria for review of when a species may be ready for reclassification from endangered to threatened ("downlisting") or removal from protected status ("delisting"), and methods for monitoring recovery progress. Recovery plans also establish a framework for agencies to coordinate their recovery efforts and provide estimates of the cost of implementing recovery tasks. Recovery teams (composed of species experts, Federal and State agencies, nongovernmental

organizations, and stakeholders) are often established to develop recovery plans. When completed, the recovery outline, draft recovery plan, and the final recovery plan will be available on our website (<http://www.fws.gov/endangered>), or from our Alabama Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**).

Implementation of recovery actions generally requires the participation of a broad range of partners, including other Federal agencies, States, Tribes, nongovernmental organizations, businesses, and private landowners. Examples of recovery actions include habitat restoration (e.g., restoration of native vegetation), research, captive propagation and reintroduction, and outreach and education. The recovery of many listed species cannot be accomplished solely on Federal lands because their range may occur primarily or solely on non-Federal lands. To achieve recovery of these species requires cooperative conservation efforts on private, State, and Tribal lands.

If this species is listed, funding for recovery actions will be available from a variety of sources, including Federal budgets, State programs, and cost-share grants for non-Federal landowners, the academic community, and nongovernmental organizations. In addition, pursuant to section 6 of the Act, the States of Georgia and Tennessee would be eligible for Federal funds to implement management actions that promote the protection or recovery of the Upper Coosa River DPS of the frecklebelly madtom. Information on our grant programs that are available to aid species recovery can be found at: <http://www.fws.gov/grants>.

Although the Upper Coosa River DPS of the frecklebelly madtom is only proposed for listing under the Act at this time, please let us know if you are interested in participating in recovery efforts for this species. Additionally, we invite you to submit any new information on this species whenever it becomes available and any information you may have for recovery planning purposes (see **FOR FURTHER INFORMATION CONTACT**).

Section 7(a) of the Act requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as an endangered or threatened species and with respect to its critical habitat, if any is designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR part 402. Section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any action that is likely to jeopardize the continued existence of a

species proposed for listing or result in destruction or adverse modification of proposed critical habitat. If a species is listed subsequently, section 7(a)(2) of the Act requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of the species or destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into consultation with the Service.

Federal agency actions within the species' habitat that may require conference or consultation or both as described in the preceding paragraph include management and any other landscape-altering activities on Federal lands administered, or on private lands seeking funding by Federal agencies, which may include, but are not limited to, the USDA U.S. Forest Service, USDA Farm Service Agency, USDA Natural Resources Conservation Service, and Federal Emergency Disaster Service; issuance of section 404 Clean Water Act (33 U.S.C. 1251 *et seq.*) permits by the U.S. Army Corps of Engineers; and construction and maintenance of roads or highways by the Federal Highway Administration.

It is our policy, as published in the **Federal Register** on July 1, 1994 (59 FR 34272), to identify to the maximum extent practicable at the time a species is listed, those activities that would or would not constitute a violation of section 9 of the Act. The intent of this policy is to increase public awareness of the effect of a proposed listing on proposed and ongoing activities within the range of the species proposed for listing. The discussion below regarding protective regulations under section 4(d) of the Act complies with our policy.

II. Proposed Rule Issued Under Section 4(d) of the Act

Background

Section 4(d) of the Act contains two sentences. The first sentence states that the Secretary shall issue such regulations as he deems necessary and advisable to provide for the conservation of species listed as threatened. The U.S. Supreme Court has noted that statutory language like "necessary and advisable" demonstrates a large degree of deference to the agency (see *Webster v. Doe*, 486 U.S. 592 (1988)). Conservation is defined in the Act to mean the use of all methods and procedures which are necessary to bring any endangered species or threatened species to the point at which the measures provided pursuant to the Act

are no longer necessary. Additionally, the second sentence of section 4(d) of the Act states that the Secretary may by regulation prohibit with respect to any threatened species any act prohibited under section 9(a)(1), in the case of fish or wildlife, or section 9(a)(2), in the case of plants. Thus, the combination of the two sentences of section 4(d) provides the Secretary with wide latitude of discretion to select and promulgate appropriate regulations tailored to the specific conservation needs of the threatened species. The second sentence grants particularly broad discretion to the Service when adopting the prohibitions under section 9.

The courts have recognized the extent of the Secretary's discretion under this standard to develop rules that are appropriate for the conservation of a species. For example, courts have upheld rules developed under section 4(d) as a valid exercise of agency authority where they prohibited take of threatened wildlife or include a limited taking prohibition (see *Alsea Valley Alliance v. Lautenbacher*, 2007 U.S. Dist. Lexis 60203 (D. Or. 2007); *Washington Environmental Council v. National Marine Fisheries Service*, 2002 U.S. Dist. Lexis 5432 (W.D. Wash. 2002)). Courts have also upheld 4(d) rules that do not address all of the threats a species faces (see *State of Louisiana v. Verity*, 853 F.2d 322 (5th Cir. 1988)). As noted in the legislative history when the Act was initially enacted, "once an animal is on the threatened list, the Secretary has an almost infinite number of options available to him with regard to the permitted activities for those species. He may, for example, permit taking, but not importation of such species, or he may choose to forbid both taking and importation but allow the transportation of such species" (H.R. Rep. No. 412, 93rd Cong., 1st Sess. 1973).

Exercising our authority under section 4(d), we have developed a proposed rule that is designed to address the specific threats and conservation needs for the Upper Coosa River DPS of the frecklebelly madtom. Although the statute does not require us to make a "necessary and advisable" finding with respect to the adoption of specific prohibitions under section 9, we find that this rule as a whole satisfies the requirement in section 4(d) of the Act to issue regulations deemed necessary and advisable to provide for the conservation of the Upper Coosa River DPS of frecklebelly madtom. As discussed above under Summary of Biological Status and Threats, we have concluded that the Upper Coosa River DPS is likely to become in danger of

extinction within the foreseeable future primarily due to habitat destruction and degradation from agriculture and developed land uses resulting in poor water quality. The provisions of this proposed 4(d) rule would promote conservation of the Upper Coosa River DPS by encouraging management of the landscape in ways that meet both watershed and riparian management purposes and the conservation needs of the Upper Coosa River DPS. The provisions of this proposed rule are one of many tools that we would use to promote the conservation of the Upper Coosa River DPS. This proposed 4(d) rule would apply only if and when we make final the listing of the Upper Coosa River DPS as a threatened species.

Provisions of the Proposed 4(d) Rule

This proposed 4(d) rule would provide for the conservation of the Upper Coosa River DPS by prohibiting the following activities, except as otherwise authorized or permitted: Import or export (see proposed § 17.44(ee)(1)(i)); take (see proposed § 17.44(ee)(1)(ii)); possession and other acts with unlawfully taken specimens (see proposed § 17.44(ee)(1)(iii)); delivery, receipt, transport, or shipment in interstate or foreign commerce in the course of commercial activity (see proposed § 17.44(ee)(1)(iv)); and sale or offer for sale in interstate or foreign commerce (see proposed § 17.44(ee)(1)(v)). We also include several exceptions to these prohibitions, which along with the prohibitions are set forth under Proposed Regulation Promulgation, below.

Under the Act, "take" means to harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, or collect, or to attempt to engage in any such conduct. Some of these provisions have been further defined in regulation at 50 CFR 17.3. Take can result knowingly or otherwise, by direct and indirect impacts, intentionally, unintentionally, or incidentally. Protecting the Upper Coosa River DPS of the frecklebelly madtom from direct forms of take, such as physical injury or killing, whether incidental or intentional, will help preserve and recover the remaining populations of the DPS. Therefore, we prohibit intentional take of frecklebelly madtom, including, but not limited to, capturing, handling, trapping, collecting, or other activities (see proposed § 17.44(ee)(1)(ii)). Also, as discussed above under Summary of Biological Status and Threats, habitat destruction and degradation from agriculture and developed land uses are affecting the status of the Upper Coosa

River DPS. Across the DPS's range, stream and water quality have been degraded physically by sedimentation, pollution, contaminants, impoundments, channelization, destruction of riparian habitat, and loss of riparian vegetation due to agriculture activities and development within the watershed and riparian areas. Other habitat or hydrological alteration, such as ditching, draining, stream diversion, or diversion or alteration of surface or ground water flow, into or out of the stream will impact the habitat of the DPS. Therefore, we prohibit actions that result in the incidental take of the Upper Coosa River DPS by destroying, altering, or degrading the habitat in the manner described above (see proposed § 17.44(ee)(1)(ii)). Regulating these activities would help preserve the DPS's remaining populations, slow the rate of population decline, and decrease synergistic, negative effects from other stressors.

Exceptions to Prohibitions

In addition to certain statutory exceptions from prohibitions, which are found in sections 9 and 10 of the Act, the proposed 4(d) rule includes the following exceptions to the prohibitions:

Permitted Activities

We may issue permits to carry out otherwise prohibited activities, including those described above, involving threatened wildlife under certain circumstances (see proposed § 17.44(ee)(2)(i)). Regulations governing permits are codified at 50 CFR 17.32. With regard to threatened wildlife, a permit may be issued for the following purposes: For scientific purposes, to enhance propagation or survival, for economic hardship, for zoological exhibition, for educational purposes, for incidental taking, or for special purposes consistent with the Act. There are also certain statutory exemptions from the prohibitions, which are found in sections 9 and 10 of the Act.

Activities Not Requiring a Permit

We recognize the special and unique relationship with our State natural resource agency partners in contributing to conservation of listed species. State agencies often possess scientific data and valuable expertise on the status and distribution of endangered, threatened, and candidate species of wildlife and plants. State agencies, because of their authorities and their close working relationships with local governments and landowners, are in a unique position to assist the Service in implementing all aspects of the Act. In

this regard, section 6 of the Act provides that the Service shall cooperate to the maximum extent practicable with the States in carrying out programs authorized by the Act. Therefore, any qualified employee or agent of a State conservation agency that is a party to a cooperative agreement with the Service in accordance with section 6(c) of the Act, who is designated by his or her agency for such purposes, would be able to conduct activities designed to conserve the Upper Coosa River DPS that may result in otherwise prohibited take without additional authorization (see proposed § 17.44(ee)(2)(iii)).

We may allow take of the individuals of the Upper Coosa River DPS without a permit by any employee or agent of the Service or a State conservation agency designated by his agency for such purposes and when acting in the course of his official duties if such action is necessary to aid a sick, injured or orphaned specimen; dispose of a dead specimen; or salvage a dead specimen which may be useful for scientific study (see proposed § 17.44(ee)(2)(ii)). In addition, Federal and State law enforcement officers may possess, deliver, carry, transport, or ship specimens taken in violation of the Act as necessary (see proposed § 17.44(ee)(2)(v)).

Channel Restoration, Streambank Stabilization, and Other Activities

Channel restoration is used as a technique to restore degraded, physically unstable streams back to natural, physically stable, ecologically functioning streams. When done correctly, these projects reduce, ameliorate, or fix unnatural erosion, head cutting, and/or sedimentation. Thus, channel restoration projects result in geomorphically stable stream channels that maintain the appropriate lateral dimensions, longitudinal profiles, and sinuosity patterns over time without an aggrading or degrading bed elevation and include stable riffle-run-pool complexes that consist of silt-free gravel, coarse sand, cobble, boulders, woody structure, and river weed (*Podostemum* spp.). This provision of the proposed 4(d) rule for channel restoration would promote conservation of the Upper Coosa River DPS by excepting incidental take resulting from activities that would improve channel conditions and restore degraded, physically unstable streams or stream segments (see proposed § 17.44(ee)(2)(iv)(A)). We anticipate these activities will advance ecological conditions within a watershed to a more natural state that will benefit the frecklebelly madtom.

Streambank stabilization is used as a habitat restoration technique to restore degraded and eroded streambanks back to natively vegetated, stable streambanks. When done correctly, these projects reduce bank erosion and instream sedimentation, resulting in improved habitat conditions for aquatic species. Therefore, we would allow streambanks to be stabilized using the following bioengineering methods: Live stakes (live, vegetative cuttings inserted or tamped into the ground in a manner that allows the stake to take root and grow), live fascines (live branch cuttings, usually willows, bound together into long, cigar-shaped bundles), planting of bare-root seedlings or brush layering (cuttings or branches of easily rooted tree species layered between successive lifts of soil fill). All methods should use plant species native to the region where the project is being conducted. These methods would not include the sole use of quarried rock (rip-rap) or the use of rock baskets or gabion structures, but could be used in conjunction with the above bioengineering methods. This provision of the proposed 4(d) rule for streambank stabilization would promote conservation of the Upper Coosa River DPS by excepting from the prohibition incidental take resulting from activities that would improve habitat conditions by reducing bank erosion and instream sedimentation (see proposed § 17.44(ee)(2)(iv)(B)).

Improving watershed, riparian, and habitat conditions within the range of the Upper Coosa River DPS would provide for the conservation of the DPS and would likely increase resiliency in the Etowah River and Conasauga River resilience units. Activities carried out under the Working Lands for Wildlife (WLFW) program of the Natural Resources Conservation Service (NRCS), U.S. Department of Agriculture, or similar projects, which may include projects funded by the Service's Partners for Fish and Wildlife Program or the Environmental Protection Agency's 319 grant program, would benefit the DPS if they do not alter habitats known to be used by the DPS beyond its tolerances and are implemented with a primary objective of improving environmental conditions to support the aquatic biodiversity of flowing water habitats. This provision of the proposed 4(d) rule for other activities would promote conservation of the Upper Coosa River DPS by excepting from the prohibition incidental take resulting from activities as described above (see proposed § 17.44(ee)(2)(iv)(C)).

Relation of 4(d) Rule to Available Conservation Measures

Nothing in this proposed 4(d) rule would change in any way the recovery planning provisions of section 4(f) of the Act, the consultation requirements under section 7 of the Act, or the ability of the Service to enter into partnerships for the management and protection of the Upper Coosa River DPS. However, interagency cooperation may be further streamlined through planned programmatic consultations for the species between Federal agencies and the Service, where appropriate. We ask the public, particularly State agencies and other interested stakeholders that may be affected by the proposed 4(d) rule, to provide comments and suggestions regarding additional guidance and methods that the Service could provide or use, respectively, to streamline the implementation of this proposed 4(d) rule (see Information Requested, above).

Since we are proposing a threatened status for the Upper Coosa River DPS of the frecklebelly madtom and this proposed rule outlines the protections in section 9(a)(1) of the Act for the DPS, we are identifying those activities that would or would not constitute a violation of either section 9(a)(1) or this proposed 4(d) rule. Based on the best available information, at this time, activities identified as discussed above under *Exceptions to Prohibitions* would not be considered to result in a violation of section 9 of the Act. On the other hand, based on the best available information, the following actions may potentially result in a violation of section 9 of the Act if we adopt this proposed rule; this list is not comprehensive:

(1) Unauthorized handling, collecting, possessing, selling, delivering, carrying, or transporting of the frecklebelly madtom, including interstate transportation across State lines and import or export across international boundaries.

(2) Destruction/alteration of the species' habitat by discharge of fill material, draining, ditching, tiling, pond construction, stream channelization or diversion, or diversion or alteration of surface or ground water flow into or out of the stream (*i.e.*, due to roads, impoundments, discharge pipes, stormwater detention basins, etc.).

(3) Introduction of nonnative species that compete with or prey upon the frecklebelly madtom.

(4) Discharge of chemicals or fill material into any waters in which the frecklebelly madtom is known to occur.

Questions regarding whether specific activities would constitute a violation of section 9 of the Act should be directed to the Alabama Ecological Services Field Office (see **FOR FURTHER INFORMATION CONTACT**).

III. Critical Habitat

Background

Critical habitat is defined in section 3 of the Act as:

(1) The specific areas within the geographical area occupied by the species, at the time it is listed in accordance with the Act, on which are found those physical or biological features

(a) Essential to the conservation of the species, and

(b) Which may require special management considerations or protection; and

(2) Specific areas outside the geographical area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species.

Our regulations at 50 CFR 424.02 define the geographical area occupied by the species as an area that may generally be delineated around species' occurrences, as determined by the Secretary (*i.e.*, range). Such areas may include those areas used throughout all or part of the species' life cycle, even if not used on a regular basis (*e.g.*, migratory corridors, seasonal habitats, and habitats used periodically, but not solely by vagrant individuals).

Conservation, as defined under section 3 of the Act, means to use and the use of all methods and procedures that are necessary to bring an endangered or threatened species to the point at which the measures provided pursuant to the Act are no longer necessary. Such methods and procedures include, but are not limited to, all activities associated with scientific resources management such as research, census, law enforcement, habitat acquisition and maintenance, propagation, live trapping, and transplantation, and, in the extraordinary case where population pressures within a given ecosystem cannot be otherwise relieved, may include regulated taking.

Critical habitat receives protection under section 7 of the Act through the requirement that Federal agencies ensure, in consultation with the Service, that any action they authorize, fund, or carry out is not likely to result in the destruction or adverse modification of critical habitat. The designation of critical habitat does not affect land

ownership or establish a refuge, wilderness, reserve, preserve, or other conservation area. Designation also does not allow the government or public to access private lands, nor does designation require implementation of restoration, recovery, or enhancement measures by non-Federal landowners. Where a landowner requests Federal agency funding or authorization for an action that may affect a listed species or critical habitat, the Federal agency would be required to consult with the Service under section 7(a)(2) of the Act. However, even if the Service were to conclude that the proposed activity would result in destruction or adverse modification of the critical habitat, the Federal action agency and the landowner are not required to abandon the proposed activity, or to restore or recover the species; instead, they must implement "reasonable and prudent alternatives" to avoid destruction or adverse modification of critical habitat.

Under the first prong of the Act's definition of critical habitat, areas within the geographical area occupied by the species at the time it was listed are included in a critical habitat designation if they contain physical or biological features (1) which are essential to the conservation of the species and (2) which may require special management considerations or protection. For these areas, critical habitat designations identify, to the extent known using the best scientific and commercial data available, those physical or biological features that are essential to the conservation of the species (such as space, food, cover, and protected habitat). In identifying those physical or biological features that occur in specific occupied areas, we focus on the specific features that are essential to support the life-history needs of the species, including, but not limited to, water characteristics, soil type, geological features, prey, vegetation, symbiotic species, or other features. A feature may be a single habitat characteristic or a more complex combination of habitat characteristics. Features may include habitat characteristics that support ephemeral or dynamic habitat conditions. Features may also be expressed in terms relating to principles of conservation biology, such as patch size, distribution distances, and connectivity.

Under the second prong of the Act's definition of critical habitat, we can designate critical habitat in areas outside the geographical area occupied by the species at the time it is listed, upon a determination that such areas are essential for the conservation of the species. When designating critical

habitat, the Secretary will first evaluate areas occupied by the species. The Secretary will only consider unoccupied areas to be essential where a critical habitat designation limited to geographical areas occupied by the species would be inadequate to ensure the conservation of the species. In addition, for an unoccupied area to be considered essential, the Secretary must determine that there is a reasonable certainty both that the area will contribute to the conservation of the species and that the area contains one or more of those physical or biological features essential to the conservation of the species.

Section 4 of the Act requires that we designate critical habitat on the basis of the best scientific data available. Further, our Policy on Information Standards Under the Endangered Species Act (published in the **Federal Register** on July 1, 1994 (59 FR 34271)), the Information Quality Act (section 515 of the Treasury and General Government Appropriations Act for Fiscal Year 2001 (Pub. L. 106-554; H.R. 5658)), and our associated Information Quality Guidelines provide criteria, establish procedures, and provide guidance to ensure that our decisions are based on the best scientific data available. They require our biologists, to the extent consistent with the Act and with the use of the best scientific data available, to use primary and original sources of information as the basis for recommendations to designate critical habitat.

When we are determining which areas should be designated as critical habitat, our primary source of information is generally the information from the SSA report and information developed during the listing process for the species. Additional information sources may include any generalized conservation strategy, criteria, or outline that may have been developed for the species; the recovery plan for the species; articles in peer-reviewed journals; conservation plans developed by States and counties; scientific status surveys and studies; biological assessments; other unpublished materials; or experts' opinions or personal knowledge.

Habitat is dynamic, and species may move from one area to another over time. We recognize that critical habitat designated at a particular point in time may not include all of the habitat areas that we may later determine are necessary for the recovery of the species. For these reasons, a critical habitat designation does not signal that habitat outside the designated area is unimportant or may not be needed for

recovery of the species. Areas that are important to the conservation of the species, both inside and outside the critical habitat designation, will continue to be subject to: (1) Conservation actions implemented under section 7(a)(1) of the Act; (2) regulatory protections afforded by the requirement in section 7(a)(2) of the Act for Federal agencies to ensure their actions are not likely to jeopardize the continued existence of any endangered or threatened species; and (3) section 9 of the Act's prohibitions on taking any individual of the species, including taking caused by actions that affect habitat. Federally funded or permitted projects affecting listed species outside their designated critical habitat areas may still result in jeopardy findings in some cases. These protections and conservation tools will continue to contribute to recovery of this species. Similarly, critical habitat designations made on the basis of the best available information at the time of designation will not control the direction and substance of future recovery plans, habitat conservation plans (HCPs), or other species conservation planning efforts if new information available at the time of these planning efforts calls for a different outcome.

Prudency Determination

Section 4(a)(3) of the Act, as amended, and implementing regulations (50 CFR 424.12) require that, to the maximum extent prudent and determinable, the Secretary shall designate critical habitat at the time the species is determined to be an endangered or threatened species. Our regulations (50 CFR 424.12(a)(1)) state that the Secretary may, but is not required to, determine that a designation would not be prudent in the following circumstances:

(i) The species is threatened by taking or other human activity and identification of critical habitat can be expected to increase the degree of such threat to the species;

(ii) The present or threatened destruction, modification, or curtailment of a species' habitat or range is not a threat to the species, or threats to the species' habitat stem solely from causes that cannot be addressed through management actions resulting from consultations under section 7(a)(2) of the Act;

(iii) Areas within the jurisdiction of the United States provide no more than negligible conservation value, if any, for a species occurring primarily outside the jurisdiction of the United States;

(iv) No areas meet the definition of critical habitat; or

(v) The Secretary otherwise determines that designation of critical habitat would not be prudent based on the best scientific data available.

As discussed earlier in this document, there is currently no imminent threat of take attributed to collection or vandalism identified under Factor B for this species, and identification and mapping of critical habitat is not expected to initiate any such threat. In our SSA and proposed listing determination for the Upper Coosa River DPS of the frecklebelly madtom, we determined that the present or threatened destruction, modification, or curtailment of habitat or range is a threat to the Upper Coosa River DPS and that those threats in some way can be addressed by section 7(a)(2) consultation measures. The species occurs wholly in the jurisdiction of the United States, and we are able to identify areas that meet the definition of critical habitat. Therefore, because none of the circumstances enumerated in our regulations at 50 CFR 424.12(a)(1) have been met and because there are no other circumstances the Secretary has identified for which this designation of critical habitat would be not prudent, we have determined that the designation of critical habitat is prudent for the Upper Coosa River DPS.

Critical Habitat Determinability

Having determined that designation is prudent, under section 4(a)(3) of the Act we must find whether critical habitat for the Upper Coosa River DPS of the frecklebelly madtom is determinable. Our regulations at 50 CFR 424.12(a)(2) state that critical habitat is not determinable when one or both of the following situations exist:

(i) Data sufficient to perform required analyses are lacking, or

(ii) The biological needs of the species are not sufficiently well known to identify any area that meets the definition of "critical habitat." When critical habitat is not determinable, the Act allows the Service an additional year to publish a critical habitat designation (16 U.S.C. 1533(b)(6)(C)(ii)).

We reviewed the available information pertaining to the biological needs of the Upper Coosa River DPS and habitat characteristics where this DPS is located. This and other information represent the best scientific data available and led us to conclude that the designation of critical habitat is determinable for the Upper Coosa River DPS.

Physical or Biological Features Essential to the Conservation of the Species

In accordance with section 3(5)(A)(i) of the Act and regulations at 50 CFR 424.12(b), in determining which areas we will designate as critical habitat from within the geographical area occupied by the species at the time of listing, we consider the physical or biological features that are essential to the conservation of the species and that may require special management considerations or protection. The regulations at 50 CFR 424.02 define "physical or biological features essential to the conservation of the species" as the features that occur in specific areas and that are essential to support the life-history needs of the species, including, but not limited to, water characteristics, soil type, geological features, sites, prey, vegetation, symbiotic species, or other features. A feature may be a single habitat characteristic or a more complex combination of habitat characteristics. Features may include habitat characteristics that support ephemeral or dynamic habitat conditions. Features may also be expressed in terms relating to principles of conservation biology, such as patch size, distribution distances, and connectivity. For example, physical features essential to the conservation of the species might include gravel of a particular size required for spawning, alkali soil for seed germination, protective cover for migration, or susceptibility to flooding or fire that maintains necessary early-successional habitat characteristics. Biological features might include prey species, forage grasses, specific kinds or ages of trees for roosting or nesting, symbiotic fungi, or a particular level of nonnative species consistent with conservation needs of the listed species. The features may also be combinations of habitat characteristics and may encompass the relationship between characteristics or the necessary amount of a characteristic essential to support the life history of the species.

In considering whether features are essential to the conservation of the species, we may consider an appropriate quality, quantity, and spatial and temporal arrangement of habitat characteristics in the context of the life-history needs, condition, and status of the species. These characteristics include, but are not limited to, space for individual and population growth and for normal behavior; food, water, air, light, minerals, or other nutritional or physiological requirements; cover or shelter; sites for breeding, reproduction, or rearing (or development) of offspring;

and habitats that are protected from disturbance.

The Upper Coosa River DPS is a population segment of the frecklebelly madtom and occurs in the upper Coosa River system in the Piedmont Upland physiographic province in Georgia and the Ridge and Valley physiographic province in Georgia and Tennessee. The primary habitat features that influence the resiliency of the Upper Coosa River DPS include flowing water, suitable water quality, substrate, cover, and habitat connectivity. These features are essential to the survival and reproduction of individuals at all life stages.

As stated above, the frecklebelly madtom occurs in small to large, swift-flowing rivers consisting of stable riffle-run pool complexes and with a substrate that consists of silt-free gravel, coarse sand, cobble, and boulders. The species needs unimpounded flowing water to successfully reproduce and maintain populations. In addition, streams must have an adequate flow to maintain instream habitats and connectivity of streams with the floodplain, which is important to allow nutrient and sediment exchange for habitat maintenance. Stream reaches with suitable habitat must be large enough

and have connectivity to support enough frecklebelly madtoms to ensure individuals can find a mate and reproduce (Service 2020, p. 17). Cover is an important component of suitable habitat for the frecklebelly madtom and provides shelter from predators, space to forage, and space to nest. The species is often found in or near aquatic vegetation, such as river weed (*Podostemum* spp.), woody structures, and under large, flat rocks. In addition, nesting sites for madtoms are typically cavities under natural material (rocks, logs, empty mussel shells). Thus, small to large flowing rivers with appropriate substrate, cover, and connectivity are important for the growth, reproduction, and survival of the frecklebelly madtom.

The frecklebelly madtom, like other benthic species, is sensitive to poor water quality (Warren *et al.* 1997, p. 125) and needs clean, flowing water to survive. Changes in water chemistry and flow patterns, resulting in a decrease in water quality and quantity, have detrimental effects on madtom ecology, because they can render aquatic habitat unsuitable for occupancy. In addition, the frecklebelly madtom is intolerant of excessive sedimentation (Shepard 2004, p. 221). The minimum and maximum standards of water quality and quantity

conditions that are conducive to the presence of frecklebelly madtom is not well known. However, muddy waterways, lentic streams (still water), and poor water quality conditions are not desirable for maintaining suitable habitat for the species. Therefore, appropriate water and sediment quality are necessary to sustain growth, reproduction, and viability of the frecklebelly madtom and are essential to the conservation of the species.

The species is an opportunistic insectivore feeding on a variety of aquatic insects and larvae, including caddisflies, mayflies, blackflies, and midges (Miller 1984, p. 9). Seasonal changes found in diet probably reflect differences in prey availability (Miller 1984, p. 11). Therefore, a diverse and available aquatic macroinvertebrate assemblage is important to the growth and survival of the frecklebelly madtom.

More detail of the habitat and life history needs are summarized above under Background, and a thorough review is available in the SSA report (Service 2020, entire; available on <http://www.regulations.gov> under Docket No. FWS-R4-ES-2020-0058). A summary of the resource needs of the Upper Coosa River DPS is provided below in table 3.

TABLE 3—RESOURCE NEEDS FOR THE UPPER COOSA RIVER DPS OF THE FRECKLEBELLY MADTOM TO COMPLETE EACH LIFE STAGE

Life stage	Resources needed
Fertilized eggs	Flowing water with good water quality; cavities for shelter; parental care.
Larvae	Flowing water with good water quality; low predation, disease, and environmental stress; adequate food availability.
Juveniles	Flowing water with good water quality; low predation, disease, and environmental stress; structure (vegetation, rock, substrate) for shelter and forage; adequate food availability.
Adults	Flowing water with adequate water quality; structure (vegetation, rock, substrate) for shelter, forage, and nesting; cavities for nesting; appropriate male to female demographics; adequate food availability.

Summary of Essential Physical or Biological Features

We derive the specific physical or biological features essential to the conservation of Upper Coosa River DPS of the frecklebelly madtom from studies of the species' habitat, ecology, and life history as described above. Additional information can be found in the SSA report (Service 2020, entire; available on <http://www.regulations.gov> under Docket No. FWS-R4-ES-2020-0058). We have determined that the following physical or biological features are essential to the conservation of Upper Coosa River DPS of the frecklebelly madtom:

(1) Geomorphically stable, medium to large streams with:

(a) Stable stream channels that maintain lateral dimensions, longitudinal profiles, and sinuosity patterns over time without an aggrading or degrading bed elevation; and

(b) Banks with intact riparian cover to maintain stream morphology and reduce erosion and sediment inputs.

(2) Connected instream habitats that:

(a) Include stable riffle-run pool complexes;

(b) Consist of silt-free gravel, coarse sand, cobble, boulders, woody structure, and river weed (*Podostemum* spp.); and

(c) Have abundant cobble, boulders, woody structure, or other suitable cover used for nesting.

(3) Adequate flows, or a hydrologic flow regime (which includes the severity, frequency, duration, and seasonality of discharge over time),

necessary to maintain instream habitats and to maintain connectivity of streams with the floodplain, allowing the exchange of nutrients and sediment for maintenance of the fish's habitat, food availability, and ample oxygenated flow for spawning and nesting habitat.

(4) Appropriate water and sediment quality (including, but not limited to, conductivity; hardness; turbidity; temperature; pH; ammonia; heavy metals; pesticides; animal waste products; and nitrogen, phosphorus, and potassium fertilizers) necessary to sustain natural physiological processes for normal behavior, growth, and viability of all life stages.

(5) Diversity and availability of aquatic macroinvertebrate prey items, which include larval midges, mayflies, caddisflies, dragonflies, and beetles.

Special Management Considerations or Protection

When designating critical habitat, we assess whether the specific areas within the geographical area occupied by the species at the time of listing contain features which are essential to the conservation of the species and which may require special management considerations or protection. The features essential to the conservation of the Upper Coosa River DPS may require special management considerations or protections to reduce the following threats: (1) Urbanization of the landscape, including (but not limited to) land conversion for urban and commercial use, infrastructure (roads, bridges, utilities), and urban water uses (water supply reservoirs, wastewater treatment); (2) nutrient pollution from agricultural activities that impact water quantity and quality; (3) significant alteration of water quality; (4) culvert and pipe installation that creates barriers to movement; (5) other watershed and floodplain disturbances that release sediments or nutrients into the water or fill suitable spawning habitat; and (6) creation of reservoirs that convert permanently flowing streams and/or streams that hold water into lake or pond-like (lentic) environments.

Management activities that could ameliorate these threats include, but are not limited to, use of best management practices (BMPs) designed to reduce sedimentation, erosion, and bank-side destruction; protection of riparian corridors and suitable spawning habitat; retention of sufficient canopy cover along banks; moderation of surface and ground water withdrawals to maintain natural flow regimes; increased use of stormwater management and reduction of stormwater flows into the stream systems; placement of culverts or bridges that accommodate fish passage; and reduction of other watershed and floodplain disturbances that release sediments, pollutants, or nutrients into the water.

Criteria Used To Identify Critical Habitat

As required by section 4(b)(2) of the Act, we use the best scientific data available to designate critical habitat. In accordance with the Act and our implementing regulations at 50 CFR 424.12(b), we review available information pertaining to the habitat requirements of the species and identify specific areas within the geographical area occupied by the species at the time of listing and any specific areas outside the geographical area occupied by the

species to be considered for designation as critical habitat. To determine and select appropriate occupied areas that contain the physical or biological features essential to the conservation of the species or areas otherwise essential for the conservation of the Upper Coosa River DPS of the frecklebelly madtom, we developed a conservation strategy for the DPS. The goal of the conservation strategy for the Upper Coosa River DPS of the frecklebelly madtom is to recover the DPS to the point where the protections of the Act are no longer necessary. The role of critical habitat in achieving this conservation goal is to identify the specific areas within the Upper Coosa River DPS's range that provide essential physical or biological features, without which range-wide resiliency, redundancy, and representation could not be achieved. We anticipate that recovery will require continued protection of existing resilience units and habitats that contribute to the viability of the DPS, as well as ensuring there are adequate numbers of fish in stable units and that at least one viable unit occurs in each of the physiographic provinces (Piedmont Upland and Ridge and Valley). This will help to ensure that catastrophic events, such as floods, cannot simultaneously affect all known resilience units of the DPS. Recovery considerations, such as maintaining existing genetic diversity and striving for representation of both physiographic provinces in the DPS's current range, were considered in formulating this proposal.

In developing our conservation strategy for determining which areas to include as critical habitat for the Upper Coosa River DPS, we focused on the existing resilience units and habitats that are presently contributing to the viability or historical units in which resiliency can be improved such that they contribute to viability of the species. In summary, we identified streams and rivers that are both: (1) Currently occupied streams and rivers within the known historical range of the Upper Coosa River DPS, and (2) those areas that have retained the physical or biological features identified earlier that will allow for the maintenance and expansion of existing populations. For the purposes of the proposed critical habitat designation, and for areas within the geographic area occupied by the species at the time of listing, we determined a unit to be occupied if it contains a recent (*i.e.*, observed in the past 11 years (since 2009)) observation (collection) or eDNA record that supports the presence of the species.

Within those areas, we delineated critical-habitat-unit boundaries using the following process:

We evaluated habitat suitability of stream and river channels within the geographical area occupied at the time of listing, and retained for further consideration those streams that contain one or more of the physical and biological features to support life-history functions essential to conservation of the Upper Coosa River DPS. We determined the end points of river units by evaluating the presence or absence of appropriate physical and biological features. Our upstream cutoff points for each stream are located approximately where the physiographic province that the frecklebelly madtom occupies begins (where the Conasauga River flows out of the Blue Ridge and into the Ridge and Valley physiographic province and where the Etowah River flows out of the Blue Ridge and into the Piedmont Upland physiographic province) and selected downstream cutoff points that omit areas where habitat conditions are less favorable for the species (*i.e.*, do not contain the physical or biological features essential to the conservation of the DPS).

Based on this analysis, the following rivers meet criteria for areas occupied by the species at the time of listing: Conasauga River, Coosawattee River, and Etowah River. These areas include the two rivers, Conasauga River and Etowah River, known to have been occupied by the DPS historically. Environmental DNA of the frecklebelly madtom was detected in the Conasauga River in 2017 and 2018, which meets the criteria for consideration as an area occupied by the species at the time of listing. In the Etowah River, occurrence data and eDNA records from 2018 are available. These two areas meet our conservation strategy for the frecklebelly madtom. Designating critical habitat of streams in these two occupied resilience units of the DPS, which occur in both physiographic provinces and currently contribute to (or are historical units in which resiliency can be improved to contribute to) the species' viability, will sufficiently lead to the protection, and eventual reduction in risk of extirpation, of the DPS. Improving the resiliency of the resilience units in these two currently occupied streams will likely increase viability to the point that the protections of the Act are no longer necessary.

The proposed designation does not include the Coosawattee River, which is not part of the known historical range of the species. Environmental DNA of the frecklebelly madtom was detected in the Coosawattee River in 2018, which meets

the criteria for consideration as an area occupied by the species at the time of listing. However, since the Coosawattee River is not part of the known historical range of the frecklebelly madtom, this area does not meet our conservation strategy for designating critical habitat for the species. The conservation strategy focused on areas within the historical known range of the species. In addition, since the species has never been directly observed in this river despite multiple surveys over time, using the best available information, we determined this area is not a historical unit in which resiliency can be improved to contribute to the species' viability. Lastly, we determined that sufficient areas (Conasauga River and Etowah River) already have been identified within this proposed designation. Should we receive information during the public comment period that supports designating as critical habitat areas not included in the proposed units (see Proposed Critical Habitat Designation, below), we will reevaluate our current proposal.

We are not currently proposing to designate any areas outside the geographical area occupied by the Upper Coosa River DPS, because we have not identified any unoccupied areas that are essential for the conservation of the species. The protection of the Conasauga River and Etowah River would sufficiently reduce the risk of extinction, and improving the resiliency of these currently occupied streams of the DPS would increase viability to the point that the protections of the Act are no longer necessary.

Sources of data for this proposed designation of critical habitat include multiple databases maintained by universities and State agencies in Tennessee and Georgia, as well as numerous survey reports on streams throughout the DPS's range. Other sources of available information on habitat requirements for this species include studies conducted at occupied sites and published in peer-reviewed articles, agency reports, and data

collected during monitoring efforts (Shepard *et al.* 1997, entire; Bennet *et al.* 2008, entire; Bennet and Kuhajda 2010, entire; Albanese *et al.* 2018, entire; Service 2020, entire). Observation and eDNA records were compiled and provided to us by State partners during the SSA analysis.

When determining proposed critical habitat boundaries, we made every effort to avoid including developed areas such as lands covered by buildings, pavement, and other structures because such lands lack physical or biological features necessary for the Upper Coosa River DPS. The scale of the maps we prepared under the parameters for publication within the Code of Federal Regulations may not reflect the exclusion of such developed lands. Any such lands inadvertently left inside critical habitat boundaries shown on the maps of this proposed rule have been excluded by text in the proposed rule and are not proposed for designation as critical habitat. Therefore, if the critical habitat is finalized as proposed, a Federal action involving these lands would not trigger section 7 consultation with respect to critical habitat and the requirement of no adverse modification unless the specific action would affect the physical or biological features in the adjacent critical habitat.

We propose to designate as critical habitat lands that we have determined are occupied at the time of listing (*i.e.*, currently occupied) and that contain one or more of the physical or biological features that are essential to support life-history processes of the species. Units are proposed for designation based on one or more of the physical or biological features being present to support the Upper Coosa River DPS's life-history processes. Some units contain all of the identified physical or biological features and support multiple life-history processes. Unit 1 contains only some of the physical or biological features necessary to support the Upper Coosa River DPS's particular use of that habitat. Unit 2 contains all of the

identified physical or biological features and supports multiple life-history processes.

The critical habitat designation is defined by the map or maps, as modified by any accompanying regulatory text, presented at the end of this document under Proposed Regulation Promulgation. We include more detailed information on the boundaries of the critical habitat designation in the preamble of this document. We will make the coordinates or plot points or both on which each map is based available to the public on <http://www.regulations.gov> at Docket No. FWS-R4-ES-2020-0058 and on our internet site at <https://www.fws.gov/southeast/>.

Proposed Critical Habitat Designation

We are proposing to designate approximately 134 river miles (mi) (216 river kilometers (km)) in two units as critical habitat for the Upper Coosa River DPS of the frecklebelly madtom. The critical habitat areas we describe below constitute our current best assessment of areas that meet the definition of critical habitat for the Upper Coosa River DPS. The two units are: (1) Conasauga River Unit and (2) Etowah River Unit. Table 4, below, shows the proposed critical habitat units, land ownership, and the approximate river miles of each unit. Per State regulations (Tennessee Code Annotated section 69–1–101 and Georgia Code section 52–1–31), navigable waters are considered public rights-of-way. Lands beneath the navigable waters included in this proposed rule are owned by the States of Tennessee or Georgia. Ownership of lands beneath nonnavigable waters included in this rule are determined by riparian land ownership. The riparian land adjacent to the proposed critical habitat is 85 percent private, 6 percent local, 5 percent State, and 4 percent Federal lands.

TABLE 4—PROPOSED CRITICAL HABITAT UNITS FOR THE UPPER COOSA RIVER DPS OF THE FRECKLEBELLY MADTOM

Critical habitat unit	Riparian ownership surrounding units	River miles (kilometers)
1. Conasauga River	Private, State, Federal	51.5 (83)
2. Etowah River	Private, Local, State	82.5 (133)
Total	134 (216)

Note: Lengths may not sum due to rounding.

We present brief descriptions of all units, and reasons why they meet the definition of critical habitat for the Upper Coosa River DPS, below.

Unit 1: Conasauga River

Unit 1 consists of approximately 51.5 river mi (83 km) of the Conasauga River beginning at the mouth of Coahulla Creek in Whitfield and Murray Counties, Georgia, and continuing upstream through Bradley County, Tennessee, to the mouth of Graham Branch in Polk County, Tennessee. Unit 1 includes river habitat up to bank full height. Frecklebelly madtom occupies all river reaches in this unit. Unit 1 contains some of the physical or biological features necessary for the conservation of the DPS. Unit 1 possesses those characteristics, as described above under *Summary of Essential Physical or Biological Features*, of essential physical or biological features (1), (2), (3), and (5). Essential physical or biological feature (4) is degraded in this unit, but with appropriate management and restoration actions, this physical or biological feature can be restored.

Special management considerations or protection may be required within Unit 1 to alleviate impacts from stressors that have led to the degradation of the habitat, including sedimentation, pollutant input, excess nutrient input, development, and unstable stream banks. Surrounding land-use practices, including agricultural runoff, agricultural ditching, and erosion have led to high levels of sedimentation, siltation, contamination, and nutrient-loading, as well as destabilized stream banks. Special management considerations related to agricultural and developed areas that will benefit the habitat in this unit include, but are not limited to, riparian buffer restoration, reduced surface and groundwater withdrawals, increased open space in the watershed, and treating wastewater to the highest level practicable.

Unit 2: Etowah River

Unit 2 consists of approximately 82.5 river mi (133 km) of the Etowah River beginning at its confluence with Shoal Creek in Cherokee County, Georgia, and continuing upstream through Forsyth and Dawson Counties to approximately 0.5 miles upstream of the Jay Bridge Road crossing over the Etowah River in Lumpkin County, Georgia. Unit 2 includes river habitat up to bank full height. Frecklebelly madtom occupies all river reaches in this unit. Unit 2 contains all of the physical or biological

features necessary for the conservation of the DPS.

Special management considerations or protection may be required within Unit 2 to alleviate impacts from stressors that are anticipated to amplify degradation of the habitat, including sedimentation, pollutant input, excess nutrient input, development, and unstable stream banks. Increased development, including urban development and runoff, dam construction and use, and paved and unpaved roads, in the surrounding watershed and riparian area have led to higher levels of sedimentation, siltation, contamination, and nutrient-loading, as well as destabilized stream banks. Special management considerations related to agricultural and developed areas that will benefit the habitat in this unit include, but are not limited to, riparian buffer restoration, reduced surface and groundwater withdrawals, increased open space in the watershed, and implementing highest levels of treatment of wastewater practicable.

Effects of Critical Habitat Designation

Section 7 Consultation

Section 7(a)(2) of the Act requires Federal agencies, including the Service, to ensure that any action they fund, authorize, or carry out is not likely to jeopardize the continued existence of any endangered species or threatened species or result in the destruction or adverse modification of designated critical habitat of such species. In addition, section 7(a)(4) of the Act requires Federal agencies to confer with the Service on any agency action which is likely to jeopardize the continued existence of any species proposed to be listed under the Act or result in the destruction or adverse modification of proposed critical habitat.

We published a final rule revising the definition of destruction or adverse modification on August 27, 2019 (84 FR 44976). Destruction or adverse modification means a direct or indirect alteration that appreciably diminishes the value of critical habitat as a whole for the conservation of a listed species.

If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency (action agency) must enter into consultation with us. Examples of actions that are subject to the section 7 consultation process are actions on State, Tribal, local, or private lands that require a Federal permit (such as a permit from the U.S. Army Corps of Engineers under section 404 of the Clean Water Act (33 U.S.C. 1251 *et seq.*) or a permit from the Service under section 10 of the Act) or

that involve some other Federal action (such as funding from the Federal Highway Administration, Federal Aviation Administration, or the Federal Emergency Management Agency). Federal actions not affecting listed species or critical habitat—and actions on State, Tribal, local, or private lands that are not federally funded, authorized, or carried out by a Federal agency—do not require section 7 consultation.

Compliance with the requirements of section 7(a)(2) is documented through our issuance of:

(1) A concurrence letter for Federal actions that may affect, but are not likely to adversely affect, listed species or critical habitat; or

(2) A biological opinion for Federal actions that may affect, and are likely to adversely affect, listed species or critical habitat.

When we issue a biological opinion concluding that a project is likely to jeopardize the continued existence of a listed species and/or destroy or adversely modify critical habitat, we provide reasonable and prudent alternatives to the project, if any are identifiable, that would avoid the likelihood of jeopardy and/or destruction or adverse modification of critical habitat. We define “reasonable and prudent alternatives” (at 50 CFR 402.02) as alternative actions identified during consultation that:

(1) Can be implemented in a manner consistent with the intended purpose of the action,

(2) Can be implemented consistent with the scope of the Federal agency’s legal authority and jurisdiction,

(3) Are economically and technologically feasible, and

(4) Would, in the Service Director’s opinion, avoid the likelihood of jeopardizing the continued existence of the listed species and/or avoid the likelihood of destroying or adversely modifying critical habitat.

Reasonable and prudent alternatives can vary from slight project modifications to extensive redesign or relocation of the project. Costs associated with implementing a reasonable and prudent alternative are similarly variable.

Regulations at 50 CFR 402.16 set forth requirements for Federal agencies to reinstate formal consultation on previously reviewed actions. These requirements apply when the Federal agency has retained discretionary involvement or control over the action (or the agency’s discretionary involvement or control is authorized by law) and, subsequent to the previous consultation, we have listed a new

species or designated critical habitat that may be affected by the Federal action, or the action has been modified in a manner that affects the species or critical habitat in a way not considered in the previous consultation. In such situations, Federal agencies sometimes may need to request reinitiation of consultation with us, but the regulations also specify some exceptions to the requirement to reinitiate consultation on specific land management plans after subsequently listing a new species or designating new critical habitat. See the regulations for a description of those exceptions.

Application of the “Destruction or Adverse Modification” Standard

The key factor related to the destruction or adverse modification determination is whether implementation of the proposed Federal action directly or indirectly alters the designated critical habitat in a way that appreciably diminishes the value of the critical habitat as a whole for the conservation of the listed species. As discussed above, the role of critical habitat is to support physical or biological features essential to the conservation of a listed species and provide for the conservation of the species.

Section 4(b)(8) of the Act requires us to briefly evaluate and describe, in any proposed or final regulation that designates critical habitat, activities involving a Federal action that may violate section 7(a)(2) of the Act by destroying or adversely modifying such habitat, or that may be affected by such designation.

Activities that the Service may, during a consultation under section 7(a)(2) of the Act, find are likely to destroy or adversely modify critical habitat include, but are not limited to:

(1) Actions that would alter the minimum flow or existing flow regime. Such activities could include, but are not limited to, impoundment, channelization, water diversion, water withdrawal, hydropower generation, and flood control. These activities could eliminate or reduce the habitat necessary for the growth and reproduction of the Upper Coosa River DPS by altering flows to levels that would adversely affect the Upper Coosa River DPS's ability to complete its life cycle.

(2) Actions that would significantly alter water chemistry or quality. Such activities could include, but are not limited to, release of chemicals or biological pollutants into the surface water or connected groundwater at a point source or by dispersed release

(non-point source). These activities could alter water conditions to levels that are beyond the tolerances of the Upper Coosa River DPS and result in direct or cumulative adverse effects to individuals and their life cycles.

(3) Actions that would significantly increase sediment deposition within the stream channel. Such activities could include, but are not limited to, excessive sedimentation from livestock grazing, road construction, channel alteration, and other watershed and floodplain disturbances. These activities could eliminate or reduce the habitat necessary for the growth and reproduction of the Upper Coosa River DPS by increasing the sediment deposition to levels that would adversely affect the DPS's ability to complete its life cycle.

(4) Actions that would significantly increase eutrophication (the addition of excessive nutrients that are typically limited in aquatic environments, such as nitrogen and phosphorus that cause phytoplankton to proliferate). Such activities could include, but are not limited to, release of excessive nutrients into the surface water or connected groundwater at a point source or by dispersed release (non-point source). These activities could result in excessive nutrients and algae filling streams and reducing habitat, degrading water quality from excessive nutrients and algae decay, and decreasing oxygen levels below the tolerances of the DPS.

(5) Actions that would significantly alter channel morphology or geometry, or decrease connectivity. Such activities could include, but are not limited to, channelization, impoundment, road and bridge construction, mining, dredging, and destruction of riparian vegetation. These activities may lead to changes in water flows and levels that would degrade or eliminate the Upper Coosa River DPS and its habitats. These actions could also lead to increased sedimentation and degradation in water quality to levels beyond the tolerances of the DPS.

(6) Actions that result in the introduction, spread, or augmentation of nonnative aquatic species in occupied stream segments, or in stream segments that are hydrologically connected to occupied stream segments, or introduction of other species that compete with or prey on the Upper Coosa River DPS. Possible actions could include, but are not limited to, stocking of nonnative fishes and crayfishes, or other related actions. These activities could introduce parasites or disease; result in direct predation or direct competition; or affect the growth, reproduction, and survival of the DPS.

Exemptions

Application of Section 4(a)(3) of the Act

Section 4(a)(3)(B)(i) of the Act (16 U.S.C. 1533(a)(3)(B)(i)) provides that the Secretary shall not designate as critical habitat any lands or other geographical areas owned or controlled by the Department of Defense, or designated for its use, that are subject to an integrated natural resources management plan (INRMP) prepared under section 101 of the Sikes Act (16 U.S.C. 670a), if the Secretary determines in writing that such plan provides a benefit to the species for which critical habitat is proposed for designation. There are no Department of Defense (DoD) lands within the proposed critical habitat designation.

Consideration of Impacts Under Section 4(b)(2) of the Act

Section 4(b)(2) of the Act states that the Secretary shall designate and make revisions to critical habitat on the basis of the best available scientific data after taking into consideration the economic impact, national security impact, and any other relevant impact of specifying any particular area as critical habitat. The Secretary may exclude an area from critical habitat if he determines that the benefits of such exclusion outweigh the benefits of specifying such area as part of the critical habitat, unless he determines, based on the best scientific data available, that the failure to designate such area as critical habitat will result in the extinction of the species. In making the determination to exclude a particular area, the statute on its face, as well as the legislative history, are clear that the Secretary has broad discretion regarding which factor(s) to use and how much weight to give to any factor.

The first sentence in section 4(b)(2) of the Act requires that we take into consideration the economic, national security, or other relevant impacts of designating any particular area as critical habitat. We describe below the process that we undertook for taking into consideration each category of impacts and our analyses of the relevant impacts.

Consideration of Economic Impacts

Section 4(b)(2) of the Act and its implementing regulations require that we consider the economic impact that may result from a designation of critical habitat. To assess the probable economic impacts of a designation, we must first evaluate specific land uses or activities and projects that may occur in the area of the critical habitat. We then must evaluate the impacts that a specific

critical habitat designation may have on restricting or modifying specific land uses or activities for the benefit of the species and its habitat within the areas proposed. We then identify which conservation efforts may be the result of the species being listed under the Act versus those attributed solely to the designation of critical habitat for this particular species. The probable economic impact of a proposed critical habitat designation is analyzed by comparing scenarios both “with critical habitat” and “without critical habitat.”

The “without critical habitat” scenario represents the baseline for the analysis, which includes the existing regulatory and socio-economic burden imposed on landowners, managers, or other resource users potentially affected by the designation of critical habitat (e.g., under the Federal listing as well as other Federal, State, and local regulations). The baseline, therefore, represents the costs of all efforts attributable to the listing of the species under the Act (*i.e.*, conservation of the species and its habitat incurred regardless of whether critical habitat is designated). The “with critical habitat” scenario describes the incremental impacts associated specifically with the designation of critical habitat for the species. The incremental conservation efforts and associated impacts would not be expected without the designation of critical habitat for the species. In other words, the incremental costs are those attributable solely to the designation of critical habitat, above and beyond the baseline costs. These are the costs we use when evaluating the benefits of inclusion and exclusion of particular areas from the final designation of critical habitat should we choose to conduct a discretionary 4(b)(2) exclusion analysis.

For this designation, we developed an incremental effects memorandum (IEM) considering the probable incremental economic impacts that may result from the proposed designation. The information contained in our IEM was then used to develop a screening analysis of the probable effects of the designation (IEc 2020, entire). The purpose of the screening analysis is to filter out particular geographic areas of critical habitat that are already subject to such protections and are, therefore, unlikely to incur incremental economic impacts. In particular, the screening analysis considers baseline costs (*i.e.*, absent critical habitat designation) and includes probable economic impacts where land and water use may be subject to conservation plans, land management plans, best management practices, or regulations that protect the

habitat area as a result of the Federal listing status of the Upper Coosa River DPS. Ultimately, the screening analysis allows us to focus on evaluating the specific areas or sectors that may incur probable incremental economic impacts as a result of the designation. This screening analysis, combined with the information contained in our IEM, comprises our draft economic analysis (DEA) of the proposed critical habitat designation for the Upper Coosa River DPS of the frecklebelly madtom; our DEA is summarized in the narrative below.

Executive Orders (E.O.s) 12866 and 13563 direct Federal agencies to assess the costs and benefits of available regulatory alternatives in quantitative (to the extent feasible) and qualitative terms. Consistent with the E.O. regulatory analysis requirements, our effects analysis under the Act may take into consideration impacts to both directly and indirectly affected entities, where practicable and reasonable. If sufficient data are available, we assess to the extent practicable the probable impacts to both directly and indirectly affected entities. As part of our screening analysis, we considered the types of economic activities that are likely to occur within the areas likely affected by the critical habitat designation. In our evaluation of the probable incremental economic impacts that may result from the proposed designation of critical habitat for the Upper Coosa River DPS, first we identified, in the IEM dated June 23, 2020, probable incremental economic impacts associated with the following categories of activities: (1) Federal lands management (U.S. Forest Service and U.S. Army Corps of Engineers); (2) agriculture; (3) development; (4) roadway and bridge construction; (5) dredging, dams, and diversions; (6) flood control and hydropower; (7) wastewater and chemical discharge; (8) pesticide use; (9) recreation; (10) conservation and restoration; and (11) transportation and utilities. We considered each industry or category individually. Additionally, we considered whether these activities have any Federal involvement. Critical habitat designation generally will not affect activities that do not have any Federal involvement; under the Act, designation of critical habitat only affects activities conducted, funded, permitted, or authorized by Federal agencies. In areas where individuals from the Upper Coosa River DPS are found, Federal agencies already are required to ensure that their actions are not likely to jeopardize the continued

existence of the DPS under section 7 consultation procedures. If we finalize this proposed critical habitat designation, consultations to avoid the destruction or adverse modification of critical habitat would be incorporated into the existing consultation process.

In our IEM, we attempted to clarify the distinction between the effects that will result from the species being listed and those attributable to the critical habitat designation (*i.e.*, difference between the jeopardy and adverse modification standards) for the Upper Coosa River DPS's critical habitat. Because the designation of critical habitat for the Upper Coosa River DPS was proposed concurrently with the listing, it has been our experience that it is more difficult to discern which conservation efforts are attributable to the species being listed and those which will result solely from the designation of critical habitat. However, the following specific circumstances in this case help to inform our evaluation: (1) The essential physical or biological features identified for critical habitat are the same features essential for the life requisites of the species, and (2) any actions that would result in sufficient harm or harassment to constitute jeopardy to the Upper Coosa River DPS would also likely adversely affect the essential physical or biological features of critical habitat. The IEM outlines our rationale concerning this limited distinction between baseline conservation efforts and incremental impacts of the designation of critical habitat for this species. This evaluation of the incremental effects has been used as the basis to evaluate the probable incremental economic impacts of this proposed designation of critical habitat.

The proposed critical habitat designation for the Upper Coosa River DPS totals approximately 134 river miles (mi) (216 river kilometers (km)) in two occupied units in Georgia and Tennessee. In these areas, any actions that may affect the species would also affect proposed critical habitat because all designated habitat is occupied. Thus, it is unlikely that any additional conservation efforts would be recommended to address the adverse modification standard over and above those recommended as necessary to avoid jeopardizing the continued existence of the Upper Coosa River DPS. Therefore, the only additional costs that are expected in all of the proposed critical habitat designation are administrative costs. These costs are due to additional consultation analysis requiring time and resources by both the Federal action agency and the Service. However, these costs are not expected to

reach the threshold of “significant” under E.O. 12866. We anticipate a maximum of 10 section 7 consultations annually at a total incremental cost of less than \$11,000 per year.

We are soliciting data and comments from the public on the DEA discussed above, as well as all aspects of this proposed rule and our required determinations. During the development of a final designation, we will consider the information presented in the DEA and any additional information on economic impacts received during the public comment period to determine whether any specific areas should be excluded from the final critical habitat designation under authority of section 4(b)(2) and our implementing regulations at 50 CFR 424.19. In particular, we may exclude an area from critical habitat if we determine that the benefits of excluding the area outweigh the benefits of including the area, provided the exclusion will not result in the extinction of this species.

The final decision on whether to exclude any areas will be based on the best scientific data available at the time of the final designation, including information we obtain during the public comment period and information about the economic impact of designation. Accordingly, we have prepared a draft economic analysis concerning the proposed critical habitat designation, which is available for review and comment (see **ADDRESSES**).

Consideration of National Security Impacts

In preparing this proposal, we have determined that the lands within the proposed designation of critical habitat for the Upper Coosa River DPS are not owned, managed, or used by the DoD or DHS where a national security or homeland security impact might exist, and, therefore, we anticipate no impact on national security or homeland security. However, during the development of a final designation, we will consider any additional information received through the public comment period on the impacts of the proposed designation on national security or homeland security to determine whether any specific areas should be excluded from the final critical habitat designation under authority of section 4(b)(2) and our implementing regulations at 50 CFR 424.19.

Consideration of Other Relevant Impacts

We consider a number of factors, including whether there are permitted conservation plans covering the species

in the area such as HCPs, safe harbor agreements (SHAs), or candidate conservation agreements with assurances (CCAAs), or whether there are non-permitted conservation agreements and partnerships that would be encouraged by designation of, or exclusion from, critical habitat. In addition, we look at the existence of Tribal conservation plans and partnerships and consider the government-to-government relationship of the United States with Tribal entities. We also consider any social impacts that might occur because of the designation.

In preparing this proposal, we have determined that there are currently no draft or final HCPs or other management plans for the Upper Coosa River DPS, and the proposed designation does not include any Tribal lands or trust resources.

As discussed above, we anticipate no impacts on national security, economic, or any other relevant impacts as a result of this designation. Accordingly, at this time, we do not propose to exclude any particular areas from the critical habitat designation. However, during the development of a final designation, we will consider any additional information we receive through the public comment period regarding other relevant impacts to determine whether any specific areas should be excluded from the final critical habitat designation under authority of section 4(b)(2) and our implementing regulations at 50 CFR 424.19.

Required Determinations

Clarity of the Rule

We are required by Executive Orders 12866 and 12988 and by the Presidential Memorandum of June 1, 1998, to write all rules in plain language. This means that each rule we publish must:

- (1) Be logically organized;
- (2) Use the active voice to address readers directly;
- (3) Use clear language rather than jargon;
- (4) Be divided into short sections and sentences; and
- (5) Use lists and tables wherever possible.

If you feel that we have not met these requirements, send us comments by one of the methods listed in **ADDRESSES**. To better help us revise the rule, your comments should be as specific as possible. For example, you should tell us the numbers of the sections or paragraphs that are unclearly written, which sections or sentences are too long, the sections where you feel lists or tables would be useful, etc.

Regulatory Planning and Review (Executive Orders 12866 and 13563)

Executive Order 12866 provides that the Office of Information and Regulatory Affairs (OIRA) in the Office of Management and Budget will review all significant rules. OIRA has determined that this rule is not significant.

Executive Order 13563 reaffirms the principles of E.O. 12866 while calling for improvements in the nation's regulatory system to promote predictability, to reduce uncertainty, and to use the best, most innovative, and least burdensome tools for achieving regulatory ends. The executive order directs agencies to consider regulatory approaches that reduce burdens and maintain flexibility and freedom of choice for the public where these approaches are relevant, feasible, and consistent with regulatory objectives. E.O. 13563 emphasizes further that regulations must be based on the best available science and that the rulemaking process must allow for public participation and an open exchange of ideas. We have developed this proposed rule in a manner consistent with these requirements.

Regulatory Flexibility Act (5 U.S.C. 601 et seq.)

Under the Regulatory Flexibility Act (RFA; 5 U.S.C. 601 *et seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996 (SBREFA; 5 U.S.C. 801 *et seq.*), whenever an agency is required to publish a notice of rulemaking for any proposed or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effects of the rule on small entities (*i.e.*, small businesses, small organizations, and small government jurisdictions). However, no regulatory flexibility analysis is required if the head of the agency certifies the rule will not have a significant economic impact on a substantial number of small entities. The SBREFA amended the RFA to require Federal agencies to provide a certification statement of the factual basis for certifying that the rule will not have a significant economic impact on a substantial number of small entities.

According to the Small Business Administration, small entities include small organizations such as independent nonprofit organizations; small governmental jurisdictions, including school boards and city and town governments that serve fewer than 50,000 residents; and small businesses (13 CFR 121.201). Small businesses include manufacturing and mining concerns with fewer than 500

employees, wholesale trade entities with fewer than 100 employees, retail and service businesses with less than \$5 million in annual sales, general and heavy construction businesses with less than \$27.5 million in annual business, special trade contractors doing less than \$11.5 million in annual business, and agricultural businesses with annual sales less than \$750,000. To determine whether potential economic impacts to these small entities are significant, we considered the types of activities that might trigger regulatory impacts under this designation as well as types of project modifications that may result. In general, the term “significant economic impact” is meant to apply to a typical small business firm’s business operations.

Under the RFA, as amended, and as understood in the light of recent court decisions, Federal agencies are required to evaluate the potential incremental impacts of rulemaking only on those entities directly regulated by the rulemaking itself and, therefore, are not required to evaluate the potential impacts to indirectly regulated entities. The regulatory mechanism through which critical habitat protections are realized is section 7 of the Act, which requires Federal agencies, in consultation with the Service, to ensure that any action authorized, funded, or carried out by the agency is not likely to destroy or adversely modify critical habitat. Therefore, under section 7, only Federal action agencies are directly subject to the specific regulatory requirement (avoiding destruction and adverse modification) imposed by critical habitat designation. Consequently, it is our position that only Federal action agencies would be directly regulated if we adopt the proposed critical habitat designation. There is no requirement under the RFA to evaluate the potential impacts to entities not directly regulated. Moreover, Federal agencies are not small entities. Therefore, because no small entities would be directly regulated by this rulemaking, the Service certifies that, if made final as proposed, the proposed critical habitat designation will not have a significant economic impact on a substantial number of small entities.

In summary, we have considered whether the proposed designation would result in a significant economic impact on a substantial number of small entities. For the above reasons and based on currently available information, we certify that, if made final, the proposed critical habitat designation will not have a significant economic impact on a substantial

number of small business entities. Therefore, an initial regulatory flexibility analysis is not required.

Executive Order 13771

This proposed rule is not a regulatory action subject to Executive Order (E.O.) 13771 (“Reducing Regulation and Controlling Regulatory Costs”) (82 FR 9339, February 3, 2017) regulatory action because this rule is not significant under E.O. 12866.

Energy Supply, Distribution, or Use—Executive Order 13211

Executive Order 13211 (Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use) requires agencies to prepare Statements of Energy Effects when undertaking certain actions. The Office of Management and Budget (OMB) provides guidance for implementing this Executive Order, outlining nine outcomes (criteria) that may constitute “a significant adverse effect” when compared with the regulatory action under consideration. The economic analysis finds that none of these criteria are relevant to this analysis, and therefore, we did not find that this proposed critical habitat designation would significantly affect energy supplies, distribution, or use. Therefore, this action is not a significant energy action, and no Statement of Energy Effects is required.

Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.)

In accordance with the Unfunded Mandates Reform Act (2 U.S.C. 1501 et seq.), we make the following finding:

(1) This proposed rule would not produce a Federal mandate. In general, a Federal mandate is a provision in legislation, statute, or regulation that would impose an enforceable duty upon State, local, or Tribal governments, or the private sector, and includes both “Federal intergovernmental mandates” and “Federal private sector mandates.” These terms are defined in 2 U.S.C. 658(5)–(7). “Federal intergovernmental mandate” includes a regulation that “would impose an enforceable duty upon State, local, or tribal governments” with two exceptions. It excludes “a condition of Federal assistance.” It also excludes “a duty arising from participation in a voluntary Federal program,” unless the regulation “relates to a then-existing Federal program under which \$500,000,000 or more is provided annually to State, local, and tribal governments under entitlement authority,” if the provision would “increase the stringency of conditions of assistance” or “place caps upon, or

otherwise decrease, the Federal Government’s responsibility to provide funding,” and the State, local, or Tribal governments “lack authority” to adjust accordingly. At the time of enactment, these entitlement programs were: Medicaid; Aid to Families with Dependent Children work programs; Child Nutrition; Food Stamps; Social Services Block Grants; Vocational Rehabilitation State Grants; Foster Care, Adoption Assistance, and Independent Living; Family Support Welfare Services; and Child Support Enforcement. “Federal private sector mandate” includes a regulation that “would impose an enforceable duty upon the private sector, except (i) a condition of Federal assistance or (ii) a duty arising from participation in a voluntary Federal program.”

The designation of critical habitat does not impose a legally binding duty on non-Federal Government entities or private parties. Under the Act, the only regulatory effect is that Federal agencies must ensure that their actions do not destroy or adversely modify critical habitat under section 7. While non-Federal entities that receive Federal funding, assistance, or permits, or that otherwise require approval or authorization from a Federal agency for an action, may be indirectly impacted by the designation of critical habitat, the legally binding duty to avoid destruction or adverse modification of critical habitat rests squarely on the Federal agency. Furthermore, to the extent that non-Federal entities are indirectly impacted because they receive Federal assistance or participate in a voluntary Federal aid program, the Unfunded Mandates Reform Act would not apply, nor would critical habitat shift the costs of the large entitlement programs listed above onto State governments.

(2) We do not believe that this rule would significantly or uniquely affect small governments, because it will not produce a Federal mandate of \$100 million or greater in any year, that is, it is not a “significant regulatory action” under the Unfunded Mandates Reform Act. The designation of critical habitat imposes no obligations on State or local governments and, as such, a Small Government Agency Plan is not required.

Takings—Executive Order 12630

In accordance with E.O. 12630 (Government Actions and Interference with Constitutionally Protected Private Property Rights), we have analyzed the potential takings implications of designating critical habitat for Upper Coosa River DPS in a takings

implications assessment. The Act does not authorize the Service to regulate private actions on private lands or confiscate private property as a result of critical habitat designation. Designation of critical habitat does not affect land ownership, or establish any closures, or restrictions on use of or access to the designated areas. Furthermore, the designation of critical habitat does not affect landowner actions that do not require Federal funding or permits, nor does it preclude development of habitat conservation programs or issuance of incidental take permits to permit actions that do require Federal funding or permits to go forward. However, Federal agencies are prohibited from carrying out, funding, or authorizing actions that would destroy or adversely modify critical habitat. A takings implications assessment has been completed for the proposed designation of critical habitat for Upper Coosa River DPS, and it concludes that, if adopted, this designation of critical habitat does not pose significant takings implications for lands within or affected by the designation.

Federalism—Executive Order 13132

In accordance with E.O. 13132 (Federalism), this proposed rule does not have significant Federalism effects. A federalism summary impact statement is not required. In keeping with Department of the Interior and Department of Commerce policy, we requested information from, and coordinated development of this proposed critical habitat designation with, appropriate State resource agencies. From a federalism perspective, the designation of critical habitat directly affects only the responsibilities of Federal agencies. The Act imposes no other duties with respect to critical habitat, either for States and local governments, or for anyone else. As a result, the proposed rule does not have substantial direct effects either on the States, or on the relationship between the national government and the States, or on the distribution of powers and responsibilities among the various levels of government. The proposed designation may have some benefit to these governments because the areas that contain the features essential to the conservation of the species are more clearly defined, and the physical or biological features of the habitat necessary for the conservation of the species are specifically identified. This information does not alter where and what federally sponsored activities may occur. However, it may assist State and local governments in long-range planning because they no longer have to

wait for case-by-case section 7 consultations to occur.

Where State and local governments require approval or authorization from a Federal agency for actions that may affect critical habitat, consultation under section 7(a)(2) of the Act would be required. While non-Federal entities that receive Federal funding, assistance, or permits, or that otherwise require approval or authorization from a Federal agency for an action, may be indirectly impacted by the designation of critical habitat, the legally binding duty to avoid destruction or adverse modification of critical habitat rests squarely on the Federal agency.

Civil Justice Reform—Executive Order 12988

In accordance with Executive Order 12988 (Civil Justice Reform), the Office of the Solicitor has determined that the rule would not unduly burden the judicial system and that it meets the requirements of sections 3(a) and 3(b)(2) of the Order. We have proposed designating critical habitat in accordance with the provisions of the Act. To assist the public in understanding the habitat needs of the species, this proposed rule identifies the elements of physical or biological features essential to the conservation of the species. The proposed areas of designated critical habitat are presented on maps, and the proposed rule provides several options for the interested public to obtain more detailed location information, if desired.

Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.)

This rule does not contain information collection requirements, and a submission to the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.) is not required. We may not conduct or sponsor, and you are not required to respond to, a collection of information unless it displays a currently valid OMB control number.

National Environmental Policy Act (42 U.S.C. 4321 et seq.)

We have determined that environmental assessments and environmental impact statements, as defined under the authority of the National Environmental Policy Act (NEPA), need not be prepared in connection with listing a species as an endangered or threatened species under the Act. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244).

It is also our position that, outside the jurisdiction of the U.S. Court of Appeals for the Tenth Circuit, we do not need to prepare environmental analyses pursuant to the NEPA in connection with designating critical habitat under the Act. We published a notice outlining our reasons for this determination in the **Federal Register** on October 25, 1983 (48 FR 49244). This position was upheld by the U.S. Court of Appeals for the Ninth Circuit (*Douglas County v. Babbitt*, 48 F.3d 1495 (9th Cir. 1995), cert. denied 516 U.S. 1042 (1996)).

Government-to-Government Relationship With Tribes

In accordance with the President's memorandum of April 29, 1994 (Government-to-Government Relations with Native American Tribal Governments; 59 FR 22951), Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments), and the Department of the Interior's manual at 512 DM 2, we readily acknowledge our responsibility to communicate meaningfully with recognized Federal Tribes on a government-to-government basis. In accordance with Secretarial Order 3206 of June 5, 1997 (American Indian Tribal Rights, Federal-Tribal Trust Responsibilities, and the Endangered Species Act), we readily acknowledge our responsibilities to work directly with Tribes in developing programs for healthy ecosystems, to acknowledge that Tribal lands are not subject to the same controls as Federal public lands, to remain sensitive to Indian culture, and to make information available to Tribes. We have identified no Tribal interests that would be affected by this proposed listing. We have also determined that no Tribal lands fall within the boundaries of the proposed critical habitat for the Upper Coosa River DPS, so no Tribal lands would be affected by the proposed designation.

Proposed Regulation Promulgation

Accordingly, we propose to amend part 17, subchapter B of chapter I, title 50 of the Code of Federal Regulations, as set forth below:

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

■ 1. The authority citation for part 17 continues to read as follows:

Authority: 16 U.S.C. 1361–1407; 1531–1544; and 4201–4245, unless otherwise noted.

■ 2. Amend § 17.11(h) by adding an entry for “Madtom, frecklebelly [Upper

Coosa River DPS]” to the List of Endangered and Threatened Wildlife in alphabetical order under FISHES to read as set forth below:

§ 17.11 Endangered and threatened wildlife.

* * * * *

(h) * * *

Common name	Scientific name	Where listed	Status	Listing citations and applicable rules
*	*	*	*	*
FISHES				
*	*	*	*	*
Madtom, frecklebelly [Upper Coosa River DPS].	<i>Noturus munitus</i>	Upper Coosa River Basin (GA, TN).	T	[Federal Register citation when published as a final rule]; 50 CFR 17.44(ee); ^{4d} 50 CFR 17.95(e). ^{CH}
*	*	*	*	*

■ 3. Amend § 17.44 by reserving paragraphs (cc) and (dd), and by adding a paragraph (ee) to read as set forth below:

§ 17.44 Special rules—fishes.

- * * * * *
- (cc) [Reserved]
(dd) [Reserved]
(ee) Upper Coosa River DPS of the frecklebelly madtom (*Noturus munitus*).
(1) *Prohibitions.* The following prohibitions that apply to endangered wildlife also apply to the Upper Coosa River DPS. Except as provided under paragraph (ee)(2) of this section and §§ 17.4 and 17.5, it is unlawful for any person subject to the jurisdiction of the United States to commit, to attempt to commit, to solicit another to commit, or cause to be committed, any of the following acts in regard to this DPS:
(i) Import or export, as set forth at § 17.21(b) for endangered wildlife.
(ii) Take, as set forth at § 17.21(c)(1) for endangered wildlife.
(iii) Possession and other acts with unlawfully taken specimens, as set forth at § 17.21(d)(1) for endangered wildlife.
(iv) Interstate or foreign commerce in the course of a commercial activity, as set forth at § 17.21(e) for endangered wildlife.
(v) Sale or offer for sale, as set forth at § 17.21(f) for endangered wildlife.
(2) *Exceptions from prohibitions.* In regard to this DPS, you may:
(i) Conduct activities as authorized by a permit under § 17.32.
(ii) Take, as set forth at § 17.21(c)(2) through (c)(4) for endangered wildlife.
(iii) Take as set forth at § 17.31(b).
(iv) Take incidental to an otherwise lawful activity caused by:

(A) Channel restoration projects that create natural, physically stable, ecologically functioning streams. These projects can be accomplished using a variety of methods, but the desired outcome is a natural channel with geomorphically stable stream channels that maintain the appropriate lateral dimensions, longitudinal profiles, and sinuosity patterns over time without an aggrading or degrading bed elevation and include stable riffle-run-pool complexes that consist of silt-free gravel, coarse sand, cobble, boulders, woody structure, and river weed (*Podostemum* spp.).

(B) Streambank stabilization projects that use bioengineering methods to replace pre-existing, bare, eroding stream banks with natively vegetated, stable stream banks, thereby reducing bank erosion and instream sedimentation and improving habitat conditions for the DPS. Stream banks may be stabilized using live stakes (live, vegetative cuttings inserted or tamped into the ground in a manner that allows the stake to take root and grow), live fascines (live branch cuttings, usually willows, bound together into long, cigar-shaped bundles), or brush layering (cuttings or branches of easily rooted tree species layered between successive lifts of soil fill). Stream banks must not be stabilized solely through the use of quarried rock (rip-rap) or the use of rock baskets or gabion structures.

(C) Projects carried out in the DPS's range under the Working Lands for Wildlife program of the Natural Resources Conservation Service, U.S. Department of Agriculture, or similar projects conducted by the U.S. Fish and

Wildlife Service Partners for Fish and Wildlife Program or the Environmental Protection Agency's 319 Grant Program, that are implemented with a primary objective of improving environmental conditions to support the native, aquatic biodiversity of flowing water habitats.

(v) Possess and engage in other acts with unlawfully taken wildlife, as set forth at § 17.21(d)(2) for endangered wildlife.

* * * * *

■ 4. Amend § 17.95(e) by adding an entry for “Frecklebelly Madtom [Upper Coosa River DPS] (*Noturus munitus*)”, in the same alphabetical order that it appears in the table at § 17.11(h), to read as set forth below:

§ 17.95 Critical habitat—fish and wildlife.

* * * * *

(e) *Fishes.*
* * * * *

Frecklebelly Madtom [Upper Coosa River DPS] (*Noturus munitus*)

(1) Critical habitat units are depicted for Bradley and Polk Counties, Tennessee, and Cherokee, Dawson, Forsyth, Lumpkin, Murray, and Whitfield Counties, Georgia, on the maps in this entry.

(2) Within these areas, the physical or biological features essential to the conservation of the Upper Coosa River distinct population segment (DPS) consist of the following components:

(i) Geomorphically stable, medium to large streams with:

(A) Stable stream channels that maintain lateral dimensions, longitudinal profiles, and sinuosity

patterns over time without an aggrading or degrading bed elevation; and

(B) Banks with intact riparian cover to maintain stream morphology and reduce erosion and sediment inputs.

(ii) Connected instream habitats that:

(A) Include stable riffle-run-pool complexes;

(B) Consist of silt-free gravel, coarse sand, cobble, boulders, woody structure, and river weed (*Podostemum* spp.); and

(C) Have abundant cobble, boulders, woody structure, or other suitable cover used for nesting.

(iii) Adequate flows, or a hydrologic flow regime (which includes the severity, frequency, duration, and seasonality of discharge over time), necessary to maintain instream habitats and to maintain connectivity of streams with the floodplain, allowing the exchange of nutrients and sediment for maintenance of the fish's habitat, food availability, and ample oxygenated flow for spawning and nesting habitat.

(iv) Appropriate water and sediment quality (including, but not limited to, conductivity; hardness; turbidity; temperature; pH; ammonia; heavy metals; pesticides; animal waste products; and nitrogen, phosphorus, and potassium fertilizers) necessary to sustain natural physiological processes for normal behavior, growth, and viability of all life stages.

(v) Diversity and availability of aquatic macroinvertebrate prey items, which include larval midges, mayflies, caddisflies, dragonflies, and beetles.

(3) Critical habitat does not include manmade structures (such as buildings, aqueducts, runways, roads, and other paved areas) and the land on which they are located existing within the legal boundaries on the effective date of the rule.

(4) *Critical habitat map units.* Data layers defining map units were selected from the U.S. Geological Survey National Hydrological Dataset—High Resolution (1:24,000 scale; Geographic

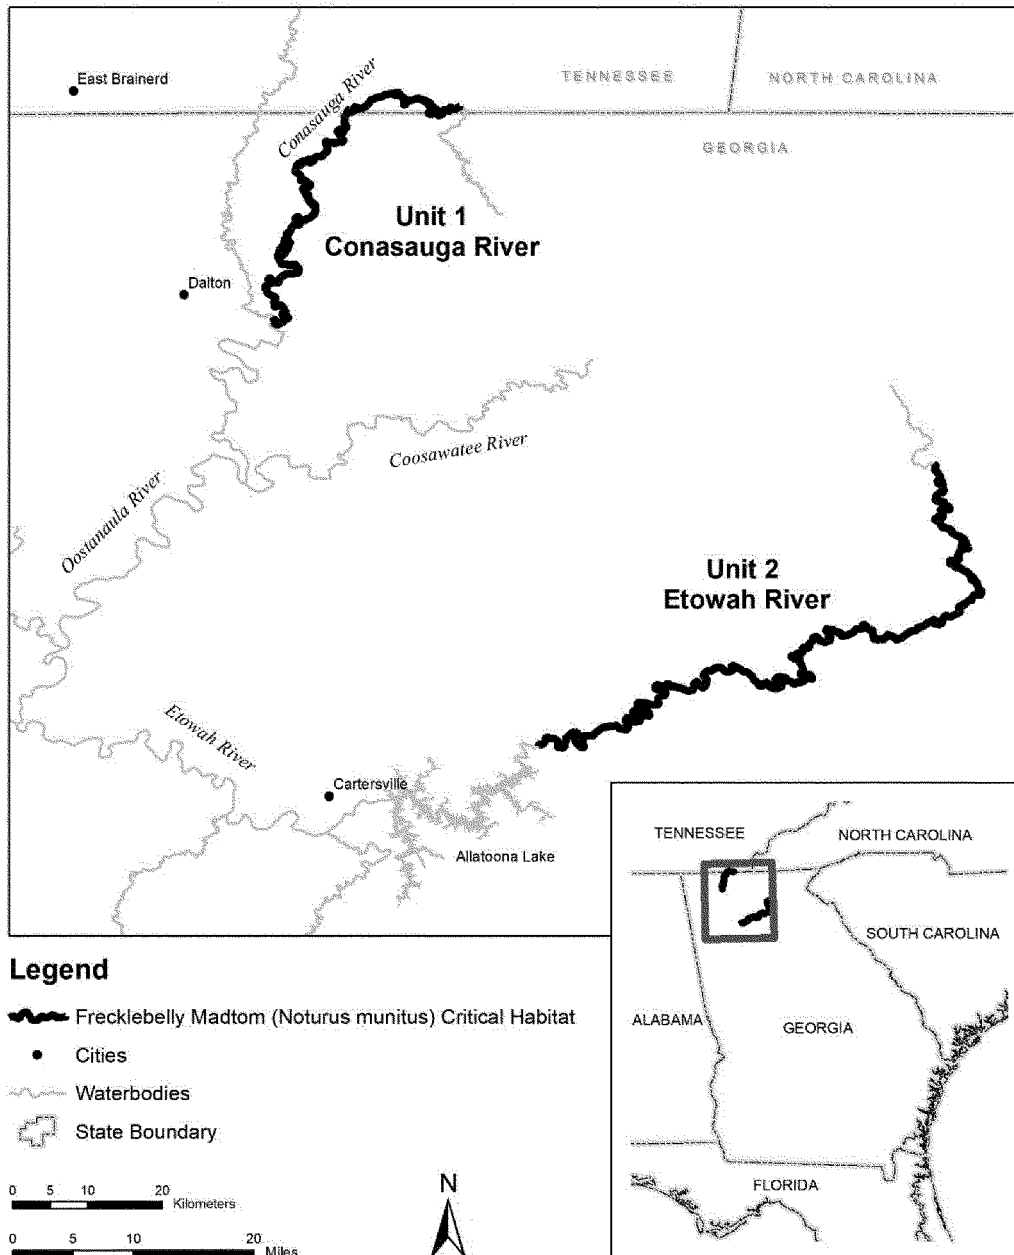

Coordinate System North American 1983 coordinates) using mapping software. The selected river reaches were informed by species occurrence data. All layers use Universal Transverse Mercator (UTM) Zone 16N coordinates. We also used the mapping software to calculate the length of the units. The maps in this entry, as modified by any accompanying regulatory text, establish the boundaries of the critical habitat designation. The coordinates or plot points on which each map is based are available to the public at the Service's internet site at <https://www.fws.gov/southeast/>, at <http://www.regulations.gov> at Docket No. FWS-R4-ES-2020-0058, and at the field office responsible for this designation. You may obtain field office location information by contacting one of the Service regional offices, the addresses of which are listed at 50 CFR 2.2.

(5) *Note:* Index map follows:

BILLING CODE 4333-15-P

Frecklebelly Madtom (*Noturus munitus*) Critical Habitat Index Map

Cherokee, Dawson, Forsyth, Lumpkin, Murray, and Whitfield Counties, Georgia; Bradley and Polk Counties, Tennessee

(6) Unit 1: Conasauga River; Bradley and Polk Counties, Tennessee, and Murray and Whitfield Counties, Georgia.

(i) *General description:* Unit 1 consists of 51.5 river miles (83

kilometers) of the Conasauga River beginning at the mouth of Coahulla Creek in Murray and Whitfield Counties, Georgia, and continuing upstream through Bradley County, Tennessee, to the mouth of Graham

Branch in Polk County, Tennessee. Unit 1 includes river habitat up to bank full height.

(ii) Map of Unit 1 follows:

Frecklebelly Madtom (*Noturus munitus*) Critical Habitat Unit 1: Conasauga River

Murray and Whitfield Counties, Georgia; Bradley and Polk Counties, Tennessee

(7) Unit 2: Etowah River, Cherokee, Dawson, Forsyth, and Lumpkin Counties, Georgia.

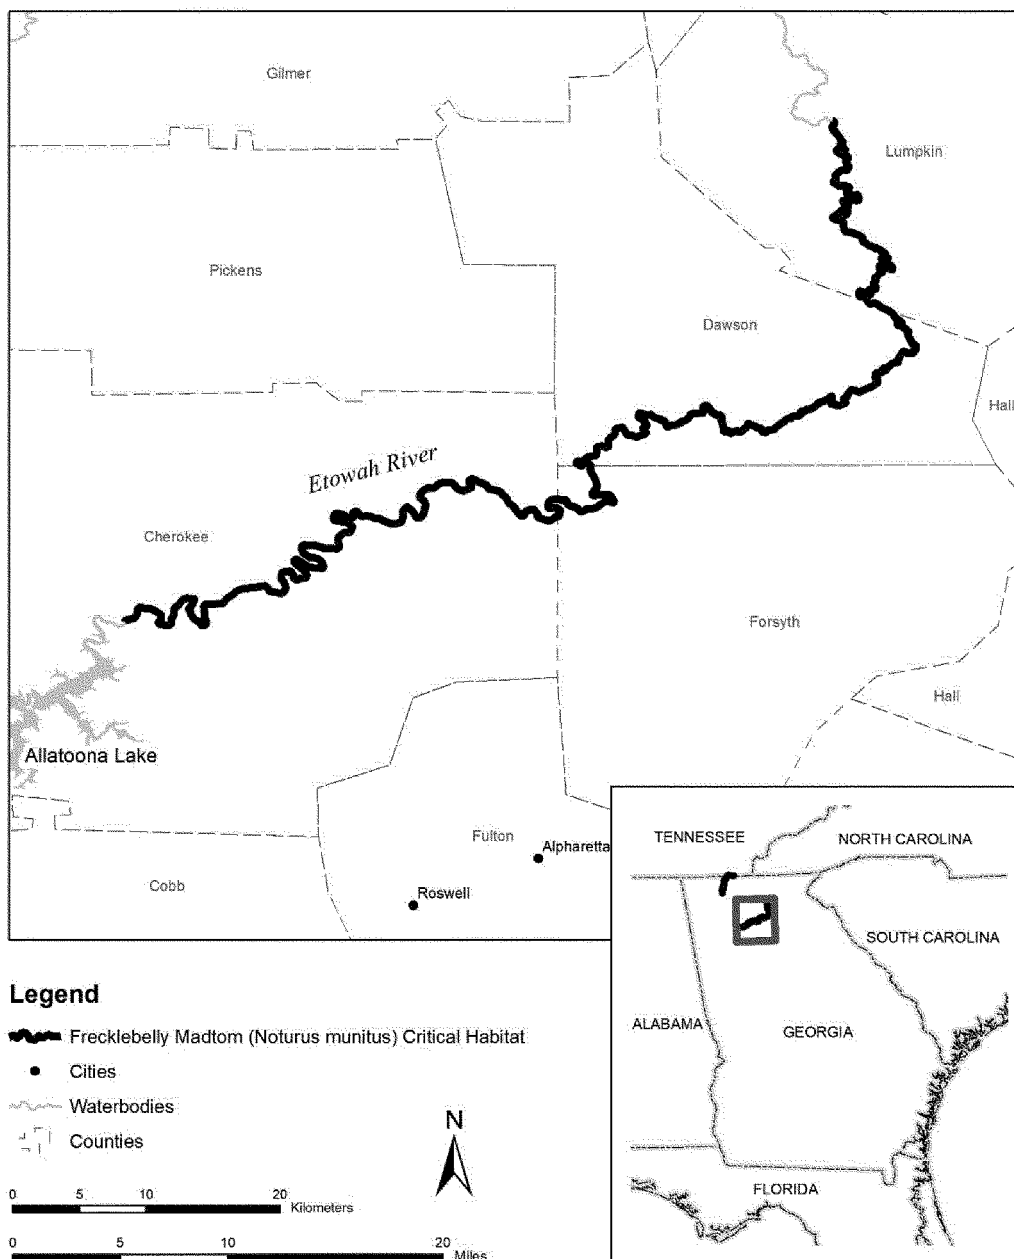

(i) *General description:* Unit 2 consists of 82.5 river miles (133 kilometers) of the Etowah River

beginning at its confluence with Shoal Creek in Cherokee County, Georgia, and continuing upstream through Forsyth and Dawson Counties to approximately 0.5 miles upstream of the Jay Bridge Road crossing over the Etowah River in

Lumpkin County, Georgia. Unit 2 includes river habitat up to bank full height.

(ii) Map of Unit 2 follows:

No. 224

November 19, 2020

Part VI

National Credit Union Administration

The NCUA Staff Draft 2021–2022 Budget Justification; Notice

NATIONAL CREDIT UNION ADMINISTRATION

The NCUA Staff Draft 2021–2022 Budget Justification

AGENCY: National Credit Union
Administration (NCUA).

ACTION: Notice.

SUMMARY: The NCUA's draft, "detailed business-type budget" is being made available for public review as required by federal statute. The proposed resources will finance the agency's annual operations and capital projects, both of which are necessary for the agency to accomplish its mission. The briefing schedule and comment instructions are included in the supplementary information section.

DATES: Requests to deliver a statement at the budget briefing must be received on or before November 20, 2020. Written statements and presentations for those scheduled to appear at the budget briefing must be received on or before 5 p.m. Eastern, November 30, 2020.

Written comments without public presentation at the budget briefing may be submitted by December 11, 2020.

ADDRESSES: You may submit comments by any of the following methods (*Please send comments by one method only*):

- **Presentation at public budget briefing:** Submit requests to deliver a statement at the briefing to BudgetBriefing@ncua.gov by November 20, 2020. Include your name, title, affiliation, mailing address, email address, and telephone number. Copies of your presentation must be submitted to the same email address by 5 p.m. Eastern, November 30, 2020.

- **Written comments:** Submit comments to BudgetComments@ncua.gov by December 11, 2020. Include your name and the following subject line "Comments on the NCUA Draft 2021–2022 Budget Justification."

Copies of the NCUA Draft 2021–2022 Budget Justification and associated materials are also available on the NCUA website at <https://www.ncua.gov/About/Pages/budget-strategic-planning/supplementary-materials.aspx>.

FOR FURTHER INFORMATION CONTACT:

Eugene H. Schied, Chief Financial Officer, National Credit Union Administration, 1775 Duke Street, Alexandria, Virginia 22314–3428 or telephone: (703) 518–6571.

SUPPLEMENTARY INFORMATION: The following itemized list details the documents attached to this notice and made available for public review:

- I. The NCUA Budget in Brief
- II. Introduction and Strategic Context
- III. Forecast and Enterprise Challenges
- IV. Key Themes of the 2021–2022 Budget
- V. Operating Budget
- VI. Capital Budget
- VII. Share Insurance Fund Administrative Budget
- VIII. Financing The NCUA Programs
- IX. Appendix A: Supplemental Budget Information
- X. Appendix B: Capital Projects

Section 212 of the Economic Growth, Regulatory Relief, and Consumer Protection Act amended 12 U.S.C. 1789(b)(1)(A) to require the NCUA Board (Board) to "make publicly available and publish in the **Federal Register** a draft of the detailed business-type budget." Although 12 U.S.C. 1789(b)(1)(A) requires publication of a "business-type budget" only for the agency operations arising under the Federal Credit Union Act's subchapter on insurance activities, in the interest of transparency the Board is providing the agency's entire staff draft 2021–2022 Budget Justification (budget) in this Notice.

The draft budget details the resources required to support NCUA's mission as outlined in its 2018–2022 Strategic Plan. The draft budget includes personnel and dollar estimates for three major budget components: (1) The Operating Budget; (2) the Capital Budget; and (3) the Share Insurance Fund Administrative Budget. The resources proposed in the draft budget will be used to carry out the agency's annual operations.

The NCUA staff will present its draft budget to the Board at a budget briefing open to the public and scheduled for Wednesday, December 2, 2020 from 10:00 a.m. to 12:00 p.m. Eastern. Due to the COVID–19 Pandemic, the budget briefing will be open to the public via

live webcast only. Visit the agency's homepage (www.ncua.gov) and access the provided webcast link.

If you wish to participate in the briefing and deliver a statement, you must email a request to BudgetBriefing@ncua.gov by November 20, 2020. Your request must include your name, title, affiliation, mailing address, email address, and telephone number. The NCUA will work to accommodate as many public statements as possible at the December 2, 2020 budget briefing. The Board Secretary will inform you if you have been approved to make a presentation and how much time you will be allotted. A written copy of your presentation must be delivered to the Board Secretary via email at BudgetBriefing@ncua.gov by 5 p.m. Eastern, November 30, 2020.

Written comments on the draft budget will also be accepted by email at BudgetComments@ncua.gov until December 11, 2020. Include your name and the following subject line with your comments: "Comments on the NCUA Draft 2021–2022 Budget Justification."

All comments should provide specific, actionable recommendations rather than general remarks. The Board will review and consider any comments from the public prior to approving the budget.

By the National Credit Union
Administration Board on November 13, 2020.
Melane Conyers-Ausbrooms,
Secretary of the Board.

I. The NCUA Budget in Brief Staff Draft 2021 and 2022 Budgets

The National Credit Union Administration's (NCUA) 2018–2022 Strategic Plan sets forth the agency's goals and objectives that form the basis for determining resource needs and allocations. The annual budget provides the resources to execute the strategic plan, to implement important initiatives, and to undertake the NCUA's major programs: Examination and supervision, insurance, credit union development, consumer financial protection, and asset management.

2021–2022 NCUA BUDGET RESOURCES										
Budget	2020 Board Approved Budget	2021 Requested Budget	Change (2020–2021)	Change Percent (2020–2021)	2022 Requested Budget	Change (2021–2022)	Change Percent (2021– 2022)	2021 FTE	2022 FTE	FTE Change
Operating Budget	315,883,000	315,567,000	(316,000)	-0.1%	341,766,000	26,199,000	8.3%	1,186	1,186	-
Capital Budget	25,076,000	18,845,000	(6,231,000)	-24.8%	14,572,000	(4,273,000)	-22.7%	-	-	-
Share Insurance Fund Admin. Budget	6,450,000	8,098,000	1,648,000	25.6%	7,880,000	(218,000)	-2.7%	5	5	-
Total	\$347,409,000	\$342,510,000	\$(4,899,000)	-1.4%	\$364,218,000	\$21,708,000	6.3%	1,191	1,191	-

The NCUA's 2021–2022 budget justification consists of three separate budgets: The Operating Budget, the Capital Budget, and the National Credit Union Share Insurance Fund Administrative Budget. Combined, these three budgets total \$342.5 million for 2021, which is 4.9 percent less than the 2021 funding level approved by the NCUA Board in December 2019 as part of the two-year 2020–2021 budget, and 1.4 percent less than the comparable level funded by the Board for 2020.

Three significant factors drive the 2021 budget lower than the 2020 level.

1. The NCUA anticipates the continuation of remote/off-site examinations into the first few months of 2021, as the result of on-going concerns about the COVID–19 pandemic, and that examinations-related and other travel will begin to resume as we continue through 2021. Accordingly, travel spending estimates in the 2021 budget are reduced by approximately 25 percent.

2. The NCUA reduced its 2021 budget for travel by an additional 25 percent because it proposes to use surplus funds that resulted from reduced travel in

2020. Combined with the first factor, these reductions account for approximately \$12 million in travel-related budget that would otherwise have been included in the 2021 Operating Budget. Had the travel budget for 2021 included this \$12 million, the Operating Budget would have increased by approximately 3.7 percent.

3. A final factor driving lower overall spending in 2021 is the reduction in the Capital Budget, largely driven by the completion of the latest phase of the MERIT project.

Staffing levels for 2021 and 2022 reflect the agency's current staffing requirements and proposed staffing enhancements related to high-priority initiatives.

This document is a draft, staff-level budget proposal, made available to the NCUA Board members and the public for their consideration and comment. The contents of this document represent staff-level recommendations for 2021 NCUA funding and have not been endorsed or adopted by the NCUA Board. The NCUA plans to hold a public meeting on December 2, 2020 at 10:00 a.m. to review the budget document and

receive comments from members of the public. Final adoption of the budget by the NCUA Board, including any changes to the staff draft that may result from public comments or Board member recommendations, is anticipated at the December Board meeting.

Operating Budget

The proposed 2021 Operating Budget is \$315.6 million. Staffing levels are requested to increase by five full-time equivalents (FTE) compared to the 2020 Board-approved budget.¹

The 2021 Operating Budget, decreases approximately \$0.3 million, or 0.1 percent, compared to the 2020 Board-approved budget. The Operating Budget estimate for 2022 is \$341.8 million and reflects no change to authorized positions from the 2021 proposed level.

The following chart presents the major categories of spending supported by the 2021 budget, while specific adjustments to the 2020 Board-approved budget are discussed in further detail, below:

BILLING CODE 7535–01–P

¹ The published 2020 FTE level approved by the Board was 1,180 for the Operating Budget. In March

2020, the NCUA Board approved one additional

FTE. The revised 2021 Operating Budget proposes five more FTE, for a total of 1,186.

2021 Operating Budget (in Millions of Dollars)

Note: minor rounding differences may occur in totals

Total Staffing. The budget supports 1,191 FTE in total for 2021, of which five are funded by the Share Insurance Fund Administrative Budget. The Operating Budget funds 1,186 FTE in

2021, a net increase of five FTEs from the 2020 levels approved by the Board. Additional staff have been added to several offices as discussed later in this document. Since 2018 and despite

significant credit union asset growth, total NCUA staffing has remained within a relatively narrow range, as shown in the chart below.

NCUA Staffing (FTEs)**BILLING CODE 7535-01-C**

Pay and Benefits. Pay and benefits increase by \$9.6 million in 2021, or 4.1 percent, for a budget of \$240.9 million. A substantial amount of the growth in pay and benefits—nearly \$2.3 million—is the result of OPM increasing the mandatory employer contribution for the Federal Employee Retirement System (FERS). Required FERS payments to OPM increase from 16

percent of covered employees' salaries to 17.3 percent, a change of 130 basis points. Nearly all NCUA employees are covered by FERS, which includes a defined pension benefit funded by both employee and employer contributions. Because almost every federal agency is required to participate in FERS, the employer share of contributions increases throughout the government in 2021.

The remaining increase in pay and benefits accounts for the merit and locality pay adjustments required by the NCUA's current collective bargaining agreement, the five new positions proposed for 2021, anticipated staff promotions, position changes, and increased costs for other mandatory employer contributions such as health insurance.

Travel. The travel budget decreases by \$13.9 million in 2021, or 50.7 percent, for a budget of \$13.5 million. Included in this total and as discussed above, the NCUA reduced the 2021 travel budget by approximately \$12 million because the agency expects travel in the first quarter of the year will remain at minimal levels due to the COVID-19 pandemic, and because the agency plans to use surplus 2020 travel funds to pay for a portion of 2021 travel costs. In addition, the cost of training the examiner workforce to use the new MERIT system was already funded in 2020; most training was rescheduled for 2021 but do not require additional resources to carry out.

The NCUA continues working to contain travel costs by expanding offsite examination work and using technology-driven training. In future budgets, the NCUA will determine how such adjustments to its examination approach will help mitigate travel costs.

Rent, Communications, and Utilities. The budget for rent, communications, and utilities decreases by \$1,038,000 in 2021, or 12.6 percent, for a budget of \$7.2 million. This funding pays for space-related costs, telecommunications services, data capacity contracts, and information technology network support. The decrease in 2021 is primarily due to the termination of a lease for office space in Alexandria VA and the elimination of payments for the NCUA Central Office Building note from the Share Insurance Fund, which would be retired by paying off all principal balances using surplus 2020 travel funds.

Administrative Expenses. Administrative expenses increase \$0.6 million in 2021, or 9.8 percent, for a total budget of \$6.2 million. The increase to the administrative expenses budget category largely results from including in the 2021 budget the anticipated costs of employee relocations. In 2020, employee relocation costs were paid from surplus salaries and benefits funds available at the end of 2019.

Contracted Services. Contracted services expenses increase by \$4.5 million in 2021, an increase of 10.3 percent compared to 2020, for a total budget of \$47.8 million. The increase in spending for contract services primarily results from the operating and maintenance costs that will result from deployment of the MERIT system.

Contracted services funding pays for products and services acquired in the commercial marketplace, and includes critical mission support services such as information technology hardware and software support, accounting and

auditing services, and specialized subject matter expertise.

Capital Budget

The proposed 2021 Capital Budget is \$18.8 million.

The 2021 Capital Budget is \$6.4 million less than the 2021 funding level approved by the Board in December 2019, and \$6.2 million less than the 2020 Board-approved budget.

The Capital Budget pays for continued investments in critical technology and infrastructure projects. For the past several years, major component of the Capital Budget has been development of the first phases of the Enterprise Solution Modernization (ESM) program, which includes a new technical platform and security infrastructure, a central user interface for stakeholders to transact business with the NCUA, integration of business intelligence tools into the supervision function, and the MERIT examination system, which will replace the agency's antiquated AIRES examination software and will be used by both federal and state examiners in almost all credit union examinations. The MERIT system is scheduled for deployment to all examiners in 2021, and MERIT costs will transition to operating and maintenance budgets. The NCUA's Information Technology Prioritization Council recommended \$12 million for IT software development projects that continue to replace the NCUA's decades-old and functionally obsolete information technology systems, and \$5.6 million in other IT investments for 2021. The NCUA's facilities require \$1.25 million in capital investments.

Share Insurance Fund Administrative Expenses

The proposed 2021 Share Insurance Fund Administrative budget is \$8.1 million.

The 2021 Share Insurance Fund (SIF) Administrative Budget is \$1.2 million more than the 2021 funding level approved by the Board in December 2019, and \$1.6 million more than the 2020 Board-approved budget. The increase in the SIF Administrative Budget is primarily attributed to the costs associated with tools and technology used by the Office of National Examinations and Supervision to oversee credit union-run stress testing for the largest Credit Unions using its own proprietary models. The cost to develop such models was included in past years' capital budgets and the tools and technology were deployed in 2020; the 2021 operating and maintenance costs for ONES tools is now included in the SIF Administrative Budget. Direct

charges within this budget include administration of the NCUA Guaranteed Note (NGN) program, state examiner training and laptop leases for state examiners, as well as financial audit and internal control support for the Share Insurance Fund.

2020 Operating Budget—Use of Budget Surplus Resulting From COVID-19 Operating Adjustments

Various public health restrictions instituted in response to the COVID-19 pandemic resulted in much lower-than-planned spending on NCUA employee travel in 2020, as the NCUA pivoted to remote and offsite examinations and work. The NCUA currently estimates that the agency will end 2020 having under-spent the Board-approved budget by approximately \$18.3 million, mostly due to a reduction in travel as well as other operating expenses.

The NCUA's response to the coronavirus pandemic has also led to a number of unplanned and unbudgeted expenses, particularly for information technology and operational support activities. As of the publication of this draft budget, the NCUA has reallocated \$3.6 million of the projected travel surplus for the liquidation of a portion of NCUA's liabilities associated with disbursements to employees for leave earned in 2020, reducing the anticipated end of year balance for employee leave, as well as increased expenses for items such as remote communications and supply reimbursements due to required off-site work, information technology licensing and equipment costs, cleaning supplies, and facility cleaning and maintenance. These items were discussed as part of the mid-session budget briefing presented at the July 2020 Board meeting. The mid-session estimate was for a \$13 million budget surplus from travel, offset by an estimated \$5.8 million in increases to other spending categories. The revised surplus estimate is now \$18.3 million, and the amount that has been reallocated is \$3.6 million.

Deducting the \$3.6 million that has been reallocated from the \$18.3 million, leaves a balance of \$14.7 million, which—subject to approval by the NCUA Board—is being proposed for use in the following way:

- \$5.8 million of the budget surplus for 2020 would be made available in 2021, to offset 2021's travel budget. For 2021, the NCUA is currently forecasting a need for about 75% of its annual travel budget, due to the anticipated ongoing travel and on-site work restrictions related to COVID. In addition to the \$13.5 million included in this 2021 budget, an additional \$5.8 million

would be made available from the 2020 surplus, to fund travel at about 75% of the typical need.

- \$2.6 million of the budget surplus would be used to pay for COVID-related expenses in 2020 and 2021, which are largely of a one-time nature and are not anticipated to result in a long-term expense to the agency. This includes:

- The increase data capacity for computer networks, revised data reporting, conference calling services, and virtual meeting software, all of which spiked due to the remote/off-site work situation.

- Modifications to facilities operations and maintenance, including improvements to air handling and filtration systems; anticipated increases in facility cleaning and cleaning supplies; and medical consultant support to assess operating status and issues.

- An assessment of virtual exams in light of the shift to remote and off-site examination and supervision in 2020 as a result of COVID-19, to evaluate opportunities and long-term changes to the supervision program.

- \$3.7 million of the surplus would be used to retire the note owed by the Operating Budget to the Share Insurance Fund for the Central Office building at 1775 Duke Street, Alexandria, VA. When the NCUA purchased the building, it was financed by the Share Insurance Fund, and the Operating Fund makes annual principal and interest payments. This action would retire the note three years ahead of schedule, fully repaying the Share Insurance Fund. This will reduce the Operating Budget by about \$1.3 million in annual principal payments scheduled for 2021 through 2023, and also avoid additional interest payments for the remaining three years of the loan.

- \$2.6 million for the final phase of facilities modernization at the Central Office. This project was originally planned in the original 2021 Capital Budget for \$3.0 million. Over the past three years, the NCUA has been modernizing and updating the Central Office, much of which has not been updated in over 20 years. The project also supports security upgrades at the

Central and regional offices.

Accelerating the funding would enable much of the work to be done while a number of staff continue to work remotely, and will allow NCUA to terminate the lease it has at 1900 Duke Street rather than keep it for 2021, avoiding a cost of approximately \$600,000. Therefore, in total, the use of the surplus for this project reduces the overall 2021 budget by \$3.6 million.

Budget Trends

As shown in the chart below, the relative size of the NCUA budget (dotted line) continues to decline when compared to balance sheets at federally insured credit unions (solid line). This trend illustrates the greater operating efficiencies the NCUA has attained in the last several years relative to the size of the credit union system. Additionally, the NCUA has improved its operating efficiencies more aggressively than other financial industry regulators (dotted line compared to dashed line).

BILLING CODE 7535-01-P

NCUA Budget per Million Dollars of FICU Assets

Source: NCUA Annual Budgets, Call Reports, FDIC, OCC, and Federal Reserve financial reports

*Budget per million \$ of FICU assets is calculated as the fiscal year's budget divided by the previous year's end-of-year assets (e.g. - FY2021 budget (\$315.6M) / projected FICU assets as of 2020Q4 (\$1.8T) = \$175 of NCUA budget per \$1M in FICU assets).

BILLING CODE 7535-01-C

It is also notable that the NCUA's operations have become more efficient

relative to the size of the credit union system because consolidation in the

industry has led to growth in the number of large credit unions. This

results in additional complexity in the balance sheets of such credit unions, and a corresponding increase in the supervisory review required to ensure the safety and soundness of such large institutions. The NCUA responded to this increasing complexity through several initiatives: Creation of the specialized Office of National Examination and Supervision, development of in-house capabilities to oversee large credit unions' stress testing, use of specialist examiners with expertise in cybersecurity and capital markets, and improved quality of examination reports through enhanced quality review processes.

Federal Compliance Cost

As a federal agency, the NCUA is required to devote significant resources to numerous compliance activities required by federal law, regulations, or, in some cases, Executive Orders. These requirements dictate how many of the agency's activities are implemented and the associated costs. These compliance activities affect the level of resources needed in areas such as information technology acquisitions and management, human capital processes, financial management processes and reporting, privacy compliance, and physical and cyber security programs. While agency managers are responsible for these activities, required compliance activities can add additional processes and procedures.

Financial Management

Federal law, regulations, and government-wide guidance promulgated by the Office of Management and Budget (OMB), the Government Accountability Office (GAO), and the Department of the Treasury place numerous requirements on federal

agencies including the NCUA regarding the management of public funds. Government-wide financial management compliance requirements include: Financial statement audits, improper payments, prompt payments, internal controls, procurement, audits, enterprise risk management, strategic planning, and public reporting of financial and other information.

Information Technology (IT)

There are numerous laws, regulations and required guidance concerning information technology used by the federal government. Many of the requirements cover IT security such as the Federal Information Security Management Act. Other requirements cover records management, paperwork reduction, information technology acquisition, cybersecurity spending, and accessible technology and continuity.

Human Capital and Equal Opportunity

Like other federal agencies, the NCUA is subject to an array of human capital-related laws, regulations, and other mandatory guidance issued by OPM, the Equal Employment Opportunity Commission, and OMB. Human capital compliance requirements include procedures for engagement related to hiring; management engagement with public unions and collective bargaining; employee discipline and removal procedures; required training for supervisors and employees; employee work-life and benefits programs; equal employment opportunity and required diversity and inclusion programs; and storage and retention of human resource records. The NCUA is also required by law to "maintain comparability with other federal bank regulatory agencies" when setting employee salaries.

Security

The NCUA's security posture is driven by numerous legal and regulatory requirements covering the full range of security functions. The NCUA is required to comply with mandatory requirements for personnel security; physical security; emergency management and continuity; communications and information security; and insider threat activities. In addition to meeting specific legislative mandates, as a federal agency the NCUA is required to follow guidance from, but not limited to, the Office of the Director of National Intelligence, the Department of Defense, OPM, and the Federal Emergency Management Agency.

General Compliance Activities

The NCUA also has other general compliance activities that cut across numerous offices. For example, the NCUA expends resources complying with the Privacy Act; Government in the Sunshine Act; multiple laws and regulations related to government ethics standards; and various reporting and other requirements set forth by the Federal Credit Union Act and other statutes.

Federal retirement costs are an example of mandatory payments to other federal agencies. As discussed earlier in this document, the cost of mandatory contributions to OPM for most NCUA employees' retirement system will increase from 16.0 to 17.3 percent of their salaries, based on the OPM Board of Actuaries of the Civil Service Retirement System recommendations. The budget impact of these additional retirement costs in 2021 is an increase of approximately \$2.3 million over 2020.

BILLING CODE 7535-01-P

2021 Budget in Brief: Summary Table

(dollars in millions)	Budget	Change from 2020 Budget	% Change	Description
2021 Operating Budget	\$315.6	↓ \$0.3	-0.1%	The 2021 budget provides the resources required to execute the priorities outlined in the NCUA's Strategic Plan (2018-2022).
Total Staffing (FTE)	1,191	↑ 5	+ 0.4%	The 2021 FTE level increases by five positions from 1,186 authorized by the Board in 2020.
Budget Category				
Pay & Benefits	\$ 240.9	↑ \$9.6	+ 4.1%	The pay and benefits adjustment covers merit and locality pay changes required by the Collective Bargaining Agreement. The increase also funds \$2.3 million in mandatory employer contributions for retirement, as well as health benefits and the compensation costs for new FTEs.
Travel	\$13.5	↓ \$13.9	-50.7%	The travel budget decreases by slightly more than half in 2021 compared to 2020. The NCUA anticipates minimal travel through the first quarter of 2021 because of the COVID-19 pandemic, and also recommends using approximately \$6 million in surplus 2020 travel funds in 2021.
Rent, Communications & Utilities	\$7.2	↓ \$1.0	-12.6%	Rent, communications, and utilities budgets maintain essential working space, telecommunications, data capacity, and network support. This budget decreases due to the cancellation of an office lease and the payoff of the NCUA's loan that financed construction of the Central Office building.
Administrative	\$6.2	↑ \$0.6	+9.8%	Administrative expenses primarily support operational requirements, FFIEC fees, relocation expenses, and employee supplies. This budget increases because employee relocation budgets funded in 2020 with prior-year surplus funds were added back to the 2021 budget.
Contracted Services	\$47.8	↑ \$4.5	+10.3%	Contracted services reflect costs incurred when products and services are acquired in the commercial marketplace and include critical mission support services such as information technology hardware and software development support, accounting and auditing services, and specialized subject matter expertise.

2022 Budget in Brief: Summary Table

(dollars in millions)	Budget	Change from 2021 Budget	% Change	Description
2022 Operating Budget	\$341.8	↑ \$26.2	+8.3%	The 2022 budget provides the resources required to execute the priorities outlined in the NCUA's Strategic Plan (2018-2022).
Total Staffing (FTE)	1,191	0	0%	The 2022 budget is unchanged from the 2021 FTE levels.
Budget Category				
Pay & Benefits	\$249.4	↑ \$8.5	+ 3.5%	The pay and benefits adjustment covers merit and locality pay changes required by the Collective Bargaining Agreement. The increase also funds mandatory employer contributions for health insurance and retirement. Other 2022 cost drivers include full cost for new FTEs added in 2021.
Travel	\$24.3	↑ \$10.8	+80.4%	Travels costs will increase in 2022 after the COVID-19 pandemic subsidies and because surplus 2020 travel funds will be fully spent. The travel budget pays for carrying out the examination and supervision workload and other agency business.
Rent Communications & Utilities	\$8.4	↑ \$1.2	+17.2%	Rent, communications, and utilities costs will increase in 2022 as the NCUA continues deploying new technology that consumes more data and telecommunications bandwidth. Rent, communications, and utilities expenses include utilities, space rental, software licenses and other recurring costs.
Administrative	\$6.2	\$0	0%	Administrative expenses support operational requirements, FFIEC fees, relocation expenses, and employee supplies.
Contracted Services	\$53.4	↑ \$5.6	+11.8%	Contracted services reflect costs incurred for products and services acquired in the commercial marketplace. The increase for 2022 reflects system operations and maintenance support related to implementation of MERIT and other technology acquisitions.

BILLING CODE 7535-01-C

II. Introduction and Strategic Context*History*

For more than 100 years, credit unions have provided financial services to their members in the United States. Credit unions are unique depository institutions created not for profit, but to serve their members as credit cooperatives.

President Franklin Roosevelt signed the Federal Credit Union Act into law in 1934 during the Great Depression, enabling credit unions to be organized throughout the United States under charters approved by the federal government. The law's goal was to make credit available to Americans and promote thrift through a national system

of nonprofit, cooperative credit unions. In the years since the passage of the Federal Credit Union Act, credit unions have evolved and are larger and more complex today than those first institutions. But, credit unions continue to provide needed financial services to millions of Americans.

The NCUA is the independent federal agency established in 1970 by the U.S. Congress to regulate, charter, and supervise federal credit unions. With the backing of the full faith and credit of the United States, the NCUA operates and manages the National Credit Union Share Insurance Fund, insuring the deposits of the account holders in all federal credit unions and the vast majority of state-chartered credit unions. No credit union member has

ever lost a penny of deposits insured by the Share Insurance Fund.

As of June 2020, the NCUA is responsible for the regulation and supervision of 5,164 federally insured credit unions, which have approximately 122.3 million members and more than \$1.75 trillion in assets across all states and U.S. territories.²

Authority

Pursuant to the Federal Credit Union Act, authority for management of the NCUA is vested in the NCUA Board. It is the Board's responsibility to determine the resources necessary to carry out the NCUA's responsibilities

² Source: The NCUA quarterly call report data, Q2 2020.

under the Act.³ The Board is authorized to expend such funds and perform such other functions or acts as it deems necessary or appropriate in accordance with the rules, regulations, or policies it establishes.⁴

Upon determination of the budgeted annual expenses for the agency's operations, the Board determines a fee schedule to assess federal credit unions. The Board gives consideration to the ability of federal credit unions to pay such a fee, and the necessity of the expenses the NCUA will incur in carrying out its responsibilities in connection with federal credit unions.⁵ In July 2020, the Board approved for publication in the **Federal Register** proposed changes to its regulation and methodology for determining the fees due from federal credit unions, and has invited public comment on the proposals.⁶

Pursuant to the law, fees collected are deposited in the agency's Operating Fund at the Treasury of the United States, and those fees are expended by the Board to defray the cost of carrying out the agency's operations, including the examination and supervision of federal credit unions.⁷ In accordance with its authority⁸ to use the Share Insurance Fund to carry out a portion of its responsibilities, the Board approved an Overhead Transfer Rate methodology, and authorized the Office of the Chief Financial Officer to transfer resources from the Share Insurance Fund to the Operating Fund to account for insurance-related expenses.

Mission, Goals, and Strategy

The NCUA's 2021–2022 Budget Submission supports the agency's fourth year implementing its *2018–2022 Strategic Plan* to achieve its priorities and improve program performance.

Throughout 2021 and 2022, the NCUA will continue fulfilling its mission to “*provide, through regulation and supervision, a safe and sound credit union system which promotes confidence in the national system of cooperative credit,*” and its vision to ensure that the “*NCUA protects credit unions and consumers who own them through effective supervision, regulation and insurance.*” This budget commits the resources necessary to implement the NCUA's plans to identify key challenges facing the credit union

industry and leverage agency strengths to help credit unions address those challenges.

The budget supports the NCUA's programs, which are focused on achieving the agency's three strategic goals:

- Ensure a safe and sound credit union system;
 - Provide a regulatory framework that is transparent, efficient, and improves consumer access; and
 - Maximize organizational performance to enable mission success.
- Additional information about alignment of the budget to the NCUA's strategic goals is in Appendix A.

In support of its first strategic goal—*ensure a safe and sound credit union system*—the NCUA will continue to supervise federally insured credit unions effectively and maintain a strong Share Insurance Fund.

The NCUA's primary function is to identify credit union system risks, determine the magnitude of those risks, and mitigate unacceptable levels through the examination and supervision program. The agency identifies supervision program priorities each year, aligning budgeted resources to these priorities while addressing emerging issues in order to minimize losses to the Share Insurance Fund. Program priorities in 2021 include ongoing efforts to:

- Ensure compliance with Bank Secrecy Act and Anti-Money Laundering laws and regulations;
- examine credit union operations for compliance with applicable consumer financial protection regulations;
- review credit union policies and the use of loan workout strategies, risk management practices, and new strategies implemented to assist borrowers impacted by the COVID–19 pandemic, including new programs authorized through the CARES Act;
- ensure that credit unions have evaluated and effectively manage the economic impact of COVID–19 on their credit risk, capital position, and overall financial stability;
- evaluating critical security controls for credit union information systems in response to emerging cyber-attacks, which are a persistent threat to the financial sector;
- assess credit unions' exposure and planning related to a transition away from LIBOR; and,
- review liquidity risk management and planning in all credit unions.

The NCUA staff of credit union examiners are the agency's most important assets for identifying and addressing risks before they threaten members' deposits. To do their jobs

effectively in this complex and dynamic financial environment, the NCUA staff require the advanced skills, training, and tools supported by the budget. The multi-year Enterprise Solution Modernization (ESM) program will reach a major milestone in 2021 with the deployment of the Modern Examination and Risk Identification Tool (MERIT), the agency's modernized examination tool replacing the Automated Integrated Regulatory Examination System (AIRES), to all credit union examiners and state regulators. As the agency transitions to this new tool, which will result in more efficient and effective supervision, the NCUA must ensure its staff is prepared to use it. Training originally scheduled and paid for in the 2020 budget has been postponed to 2021 because of COVID–19 related travel restrictions.

To fulfill the NCUA's second strategic goal—*provide a regulatory framework that is transparent, efficient, and improves customer access*—the agency continues its efforts to review its regulations in a manner that encourages innovation, provides flexibility, and fulfills its primary mission of protecting safety and soundness. The budget allocates resources to agency programs that keep regulations up to date and consistent with current law, and that assist existing and prospective credit unions with expansion and new chartering activities. The NCUA also seeks to promote financial inclusion through its Advancing Communities through Credit, Education, Stability, and Support (ACCESS) initiative to better serve a changing population and economy while simultaneously ensuring compliance with consumer and financial protections.

Accomplishing the third strategic goal—*maximize organizational performance to enable mission success*—ensures the NCUA employees achieve the agency's mission by supporting them through efficient and effective business processes, modern and secure technology, and suitable tools necessary to perform their duties. The budget makes investments in improved tools and facilities for the NCUA staff, and technological enhancements including new systems that will improve operational effectiveness and efficiency. The budget also allocates resources to developing better human capital planning and processes including a new leadership development strategy and a focus on training for the transition to MERIT.

Organization, Major Agency Programs, and Workforce

The NCUA operates its headquarters in Alexandria, Virginia, to administer and oversee its major programs and support functions; its Asset Management and Assistance Center

(AMAC) in Austin, Texas, to liquidate credit unions and recover assets; and three regional offices, to carry out the agency's supervision and examination program. Reporting to these regional offices, the NCUA has credit union examiners responsible for a portfolio of credit unions covering all 50 states, the

District of Columbia, Guam, Puerto Rico, and the U.S. Virgin Islands.

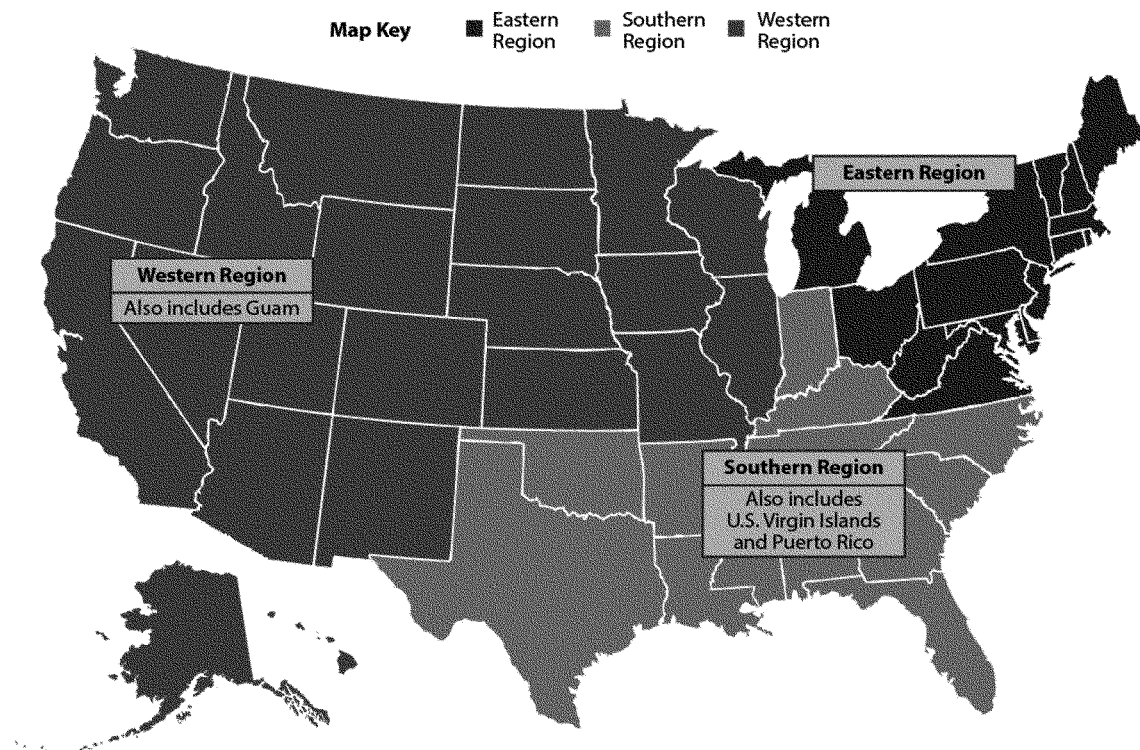

The NCUA organizational chart below reflects the agency's current structure, and the map shows each region's geographical alignment:

BILLING CODE 7535-01-P

National Credit Union Administration Organizational Chart

NCUA Regional Structure as of January 2019

**BILLING CODE 7535-01-C**

The NCUA's regional offices will carry out the agency's 2021 examination program. The NCUA uses an extended examination cycle for well-managed, low-risk federal credit unions with assets of less than \$1 billion. Additionally, the NCUA's examiners perform streamlined examination procedures for financially and operationally sound credit unions with assets less than \$50 million. In addition, the Office of National Examination and Supervision (ONES) will continue to examine corporate credit unions and large consumer credit unions with assets that total over \$10 billion. Consumer credit unions fall within ONES' purview based on assets reported on the first quarter call report for the preceding year. Therefore, based on 2020 first quarter call report statistics, in 2021 ONES will examine and supervise 11 consumer credit unions with 21.5 million members, accounting for \$324.5 billion in credit union assets. For the 2022 examination cycle, an additional seven credit unions are projected to cross the \$10 billion threshold and under existing regulations fall within the supervisory purview of ONES.

In 2021 and 2022, the agency's workforce will undertake tasks in all of the NCUA's major programs:

Supervision: The NCUA supervises federally insured credit unions through

examinations and regulatory enforcement including providing guidance through various publications, taking administrative actions and conserving, liquidating, or merging severely troubled institutions as necessary to manage risk.

Insurance: The NCUA manages the \$17.7 billion⁹ Share Insurance Fund, which provides insurance to at least \$250,000 for shares held at federally insured credit unions. The fund is capitalized by credit unions and through retained earnings.

Credit Union Development: Through training, partnerships and resource assistance, the NCUA fosters credit union development, particularly the expansion of services to eligible members provided by small, minority, newly chartered, and low-income designated credit unions. The NCUA also charters new federal credit unions, as well as approves modifications to existing charters and fields of membership.

Consumer Financial Protection: The NCUA protects consumers' rights through effective enforcement of federal consumer financial protection laws, regulations, and requirements. The NCUA also develops and promotes financial education programs for credit

unions to assist members in making smarter financial decisions.

Asset Management: The NCUA conducts credit union liquidations and performs management and recovery of assets through AMAC. This office effectively and efficiently manages and disposes assets acquired from liquidations.

The NCUA also performs stakeholder outreach and is involved in numerous cross-agency initiatives. The NCUA conducts stakeholder outreach to clearly understand the needs of the credit union system. The NCUA seeks input from all of its stakeholders, including the Administration, Congress, State Supervisory Authorities, credit union members, credit unions, and their associations.

The NCUA collaborates with the other financial regulatory agencies including through participation in several councils. Significant councils include the Financial Stability Oversight Council (FSOC), the Federal Financial Institutions Examination Council (FFIEC), and the Financial and Banking Information Infrastructure Committee (FBIIC). These councils and relationships help ensure consistent policy and standards within the nation's financial system, where appropriate.

⁹ See <https://www.ncua.gov/files/publications/share-insurance-financial-highlights-2020-june.pdf>.

Budget Process—Strategy to Budget

The NCUA's budget process starts with a review of the agency's goals and objectives set forth in the strategic plan. The strategic plan is a framework that sets the agency's direction and guides resource requests, ensuring the agency's resources and workforce are allocated and aligned to agency priorities and initiatives.

Each regional and central office director at the NCUA develops an initial budget request identifying the resources necessary for their office to support the NCUA's mission, strategic goals, and strategic objectives. These budgets are developed to ensure each office's requirements are individually justified and remain consistent with the agency's overall strategic plan.

For regional offices, one of the primary inputs in the development process is a comprehensive workload analysis that estimates the amount of time necessary to conduct examinations and supervise federally insured credit unions in order to carry out the NCUA's dual mission as insurer and regulator. This analysis starts with a field-level review of every federally insured credit union to estimate the number of workload hours needed for the budget year. The workload estimates are then refined by regional managers and submitted to the NCUA central office for the annual budget proposal. The workload analysis accounts for the efforts of nearly seventy percent of the NCUA workforce and is the foundation for budget requests from regional offices and ONES.

In addition to the workload analysis, from which central office budget staff derive related personnel and travel cost estimates, each of the NCUA offices submit estimates for fixed and recurring expenses, such as rental payments for leased property, operations and maintenance for owned facilities or equipment, supplies, telecommunications services, major capital investments, and other administrative and contracted services costs.

Because information technology investments impact all offices within the agency, the NCUA has established an Information Technology Prioritization Council (ITPC). The ITPC meets several times each year to consider, analyze, and prioritize major information technology investments to ensure they are aligned with the NCUA's strategic plan. These focused reviews result in a mutually agreed-upon budget recommendation to support the NCUA's top short-term and

long-term information technology needs and investment priorities.

Once compiled for the entire agency, all office budget submissions undergo thorough reviews by the responsible regional and central office directors, the Chief Financial Officer, and the NCUA's executive leadership. Through a series of presentations and briefings by the relevant office executives, the NCUA Executive Director formulates an agency-wide budget recommendation for consideration by the Board.

In recent years, the Board has emphasized the need for increased transparency of the NCUA's finances and its budgeting processes. In response, the Office of the Chief Financial Officer has made draft budgets available for public comment via the NCUA's website, and solicited public comments before presenting final budget recommendations for the Board's approval. Furthermore, the Economic Growth, Regulatory Relief, and Consumer Protection Act, Public Law 115–174, enacted May 24, 2018, requires in Section 212 that the NCUA “make publicly available and publish in the **Federal Register** a draft of the detailed business-type budget.” To fulfill this requirement, the Board delegated to the Executive Director the authority to publish the draft budget before submitting it for Board review.

This 2021–2022 budget justification document includes comparisons to the Board approved 2020–2021 budget, and includes a summary description of the major spending items in each budget category to provide transparency and understanding of the use of budgeted resources. Estimates are provided by major budget category, office, and cost element.

The NCUA also posts supporting documentation for its budget request on the NCUA website to assist the public in understanding its budget development process. The budget request for 2021 represents the NCUA's projections of operating and capital costs for the year, and is subject to approval by the Board.

Commitment to Financial Stewardship

The NCUA funds its activities through operating fees levied on all federal credit unions and through reimbursements from the Share Insurance Fund, which is funded by both federal credit unions and federally insured state-chartered credit unions. The Overhead Transfer Rate (OTR) calculation determines the annual amount that the Share Insurance Fund reimburses the Operating Fund to pay for the NCUA's insurance-related activities. At the end of each calendar

year, the NCUA's financial transactions are subject to audit in accordance with Generally Accepted Government Auditing Standards.¹⁰

The Board and the agency are committed to providing sound financial stewardship. In recent years, the NCUA Chief Financial Officer, with support and direction from the Executive Director and Board, has worked to improve the NCUA's financial management, financial reporting, and budget processes.

The NCUA revised its financial presentations to conform to federal budgetary concepts and increase transparency of the agency's planned financial activity, starting with the 2018 budget. The 2021–2022 budget continues this presentation. The NCUA is the only Financial Institutions Reform, Recovery, and Enforcement Act (FIRREA) agency that publishes a detailed, draft budget and solicits public comments on it at a meeting with its Board and other agency leadership.

The NCUA continues to work diligently to strengthen its internal controls for financial transactions, in accordance with sound financial management policies and practices. Based on the results of the NCUA's assessments conducted through the course of 2019, the agency provided an unmodified Statement of Assurance (signed February 14, 2020) that its management had established and maintained effective controls to achieve the objectives of the Federal Managers Financial Integrity Act (FMFIA) and Office of Management and Budget (OMB) Circular A–123. Specifically, the NCUA supports the internal control objectives of reporting, operations, and compliance, as well as its integration with overarching risk management activities. Within the Office of the Chief Financial Officer, the Internal Controls Assessment Team (ICAT) continues to mature the agency-wide internal control program and continues to strengthen the overall system of internal control, further promote the importance of identifying risk, and ensure the agency has identified appropriate responses to mitigate identified risks, in accordance with the Government Accountability Office's Standards for Internal Controls in the Federal Government (Green Book) requirements.

Enterprise Risk Management

The NCUA uses an Enterprise Risk Management (ERM) program to evaluate various factors arising from its operations and activities (both internal to the agency and external in the

¹⁰ See 12 U.S.C. 1783(b) and 1789(b).

industry) that can impact the agency's performance relative to its mission, vision, and performance outcomes. Agency priority risks include both internal considerations such as the agency's control framework, information security posture, and external factors such as credit union diversification risk. All of these risks can materially impact the agency's ability to achieve its mission.

The NCUA's ERM Council provides oversight of the agency's enterprise risk management activities. Through the ERM program, established in 2015, the agency is identifying, analyzing, and managing risks that could affect the achievement of its strategic objectives. In 2020, the NCUA utilized ERM principles to respond to the operational challenges and opportunities created by the COVID-19 pandemic. In 2021, the NCUA plans to continue its efforts to mature its ERM program, analyze high-priority enterprise risks using its assessment framework, and refresh its inventory of enterprise risks.

Overall, the NCUA's ERM program promotes effective awareness and management of risks, which, when combined with robust measurement and communication, are central to cost-effective decision-making and risk optimization within the agency. This holistic evaluation of how the agency pursues its goals and objectives is guided by the agency's appetite for risk and considers resource availability or limitations. The NCUA believes that for many strategic decisions about its programs, ERM offers a better framework for evaluating both the quantitative and qualitative aspects of enterprise-level decisions than the types of cost-benefit analyses used for regulatory development. In addition, the agency's risk appetite helps the NCUA's employees align risks with opportunities when making decisions and allocating resources to achieve the agency's strategic goals and objectives.

The NCUA adopted its enterprise risk appetite statement in the *2018–2022 Strategic Plan*, which is:

The NCUA is vigilant and has an overall judicious risk appetite. The NCUA's primary goal is to ensure the safety and soundness of the credit union system and the agency recognizes it is not desirable or practical to avoid all risk. Acceptance of some risk is often necessary to foster innovation and agility. This risk appetite will guide the NCUA's actions to achieve its strategic objectives in support of providing, through regulation and supervision, a safe and sound credit union system, which promotes

confidence in the national system of cooperative credit.

This enterprise risk appetite statement is part of the NCUA's overall management approach and is supported by detailed appetite statements for individual risk areas.

In practice, this means that the NCUA recognizes that risk is unavoidable and sometimes inherent in carrying out the agency's mandate. The NCUA is positioned to accept greater risks in some areas than in others; however, when consolidated, the risk appetite establishes boundaries for the entire agency and all of its programs. Collaboration across programs and functions is a fundamental part of ensuring the agency stays within its risk appetite boundaries, and the NCUA will identify, assess, prioritize, respond to, and monitor risks to an acceptable level. This budget proposal for 2021–2022 incorporates several programmatic investments that resulted from the NCUA's enterprise risk management reviews, such as acquiring data loss prevention and other network security tools, strengthening analytical focus on emerging financial risks within the credit union system, and assessing process and technology improvements that could improve the NCUA's financial management and reporting functions.

III. Forecast and Enterprise Challenges

Economic Outlook

The economic environment is a key determinant of credit union performance. After several years of solid growth, the economy entered a recession at the start of 2020. The significant pull-back in spending that occurred as a result of COVID-19 and government efforts to slow its spread (including business closures and stay-at-home orders) led to an unprecedented drop in real gross domestic product (GDP) and a sharp increase in the unemployment rate from a five-decade low of 3.5 percent in February 2020, to a post-war high of 14.7 percent in April 2020. The Federal Government responded quickly, establishing loan programs for affected businesses and providing financial relief to households as well as enhanced benefit payments to unemployed workers. Federal Reserve policymakers cut short-term interest rates, increased the Federal Reserve's asset holdings, and established a number of lending programs to support financial conditions and the flow of credit to households, businesses, and state and local governments. Interest

rates across the maturity spectrum fell to historically low levels.

Despite the severity of the downturn, credit unions in the aggregate turned in a relatively solid performance in the first half of 2020. Federally-insured credit unions added 4.0 million members over the year, boosting credit union membership to 122.3 million in the second quarter of 2020. Credit union assets rose by 15.1 percent to \$1.75 trillion. Total loans outstanding at federally insured credit unions increased 6.6 percent to \$1.14 trillion, and the system-wide delinquency rate declined 5 basis points to 58 basis points. Credit union shares and deposits increased by 16.5 percent over the year to \$1.49 trillion in the second quarter of 2020, reflecting the boost to income from CARES Act payments to individuals and the sharp, economy-wide increase in personal saving.

The credit union system's net worth increased by 6.8 percent over the year to \$182.9 billion in the second quarter of 2020. The jump in assets led to a drop in the credit union system's composite net worth ratio but, at 10.46 percent, the credit union system remained well-capitalized. The overall liquidity position of credit unions improved. Cash and short-term investments as a percentage of assets rose from 13 percent in the second quarter of 2019 to 18 percent in the second quarter of 2020, reflecting a 55 percent increase in cash and short-term investments.

By late spring, economic conditions had started to improve. Employment began to rise again in May and by September the unemployment rate had fallen to 7.9 percent. A consensus of forecasters¹¹ expects the recovery in labor markets and the broader economy to continue. Real GDP is projected to grow 3.9 percent in 2021, following an anticipated 4.0 percent drop in 2020. However, given the depth of the recession—which is on track to be the most severe downturn since the Great Depression—forecasters do not expect the economy to return to its pre-recession, late 2019 peak before the end of 2021. Forecasters expect the labor market recovery will take longer. Although employment is expected to rise and the unemployment rate will continue to decline, the unemployment rate is not forecast to return to pre-recession levels during the 2021–2022 budget window. The unemployment rate is projected to average 6.3% in the fourth quarter of 2021 and 5.5% at the end of 2022.

¹¹ Estimates and projections in this paragraph are based on forecasts submitted on October 5 and 6,

2020 and published in Blue Chip Economic Indicators, October 10, 2020.

Treasury Rates: 3-Month and 10-Year (constant maturity, percent)

In light of these expectations, Federal Reserve policymakers anticipate that it could be appropriate to hold the federal funds target rate in its current range of 0 to 0.25 percent until at least 2023.¹² Analysts expect other short-term interest rates, which largely determine the interest payments credit unions make, will remain near their current low levels through 2021 and move modestly higher in 2022. Longer-term rates, which largely determine the interest payments credit unions receive, are expected to edge higher later this year and continue to rise as economic conditions improve.

Even if the economy continues to expand as expected, the recent downturn will likely affect credit union performance through the end of the budget period. For example, a sustained, high level of unemployment could reduce loan demand, particularly for non-mortgage consumer loans, and affect credit quality. System-wide delinquency rates, which remained low through the second quarter, could begin to rise as the forbearance programs put in place during the spring come to an end. Credit union shares could remain elevated as consumers eschew riskier investments and opt to keep their funds

in insured credit union deposits. A prolonged period of low interest rates also poses risks, particularly to credit unions that rely primarily on investment income for funding their operations.

While the recovery in economic activity and labor markets is widely expected to continue, there is a high risk of a worse-than-expected outcome. Much will depend on the path of the coronavirus in the months ahead. If COVID-19 cases rise to levels that necessitate another wave of temporary business closures and other measures that hinder economic activity, the recovery could falter, leading to more job losses and higher unemployment. Weaker-than-expected economic conditions or another downturn would keep interest rates low or cause them to decline, particularly at the long end of the yield curve, and pose more significant challenges for the credit union system. The NCUA, like credit unions, needs to plan and prepare for a range of economic outcomes that could affect credit union performance and determine resource needs.

Other Risk Factors and Trends

In addition to risks associated with movements and trends in the general economy, the NCUA and credit unions will need to understand their increasing exposure to, and address risks associated with, the technological and structural changes facing the system.

Over the longer-term, increased concentration of loan portfolios, development of alternative loan and deposit products, technology-driven changes in the financial landscape, continued industry consolidation, and ongoing demographic changes will continue to shape the environment facing credit unions and will determine the resource needs of the NCUA.

Cybersecurity: Credit unions' increasing dependency on technology is making the credit union system vulnerable to emerging cyber-enabled risks and threats. The prevalence of social engineering, malware/ ransomware, distributed denial of service (DDoS) attacks, and other forms of cyber-attacks are creating challenges at credit unions of all sizes, and will require ongoing measures for rapid detection, protection, response and recovery. These trends are likely to continue, and even accelerate, over the foreseeable future.

Lending trends: Increasing concentrations in select loan types and the introduction of new types of lending by credit unions, emphasize the need for long-term risk diversification and effective risk management tools and practices, along with expertise to properly manage increasing concentrations of risk.

Financial Landscape and Technology: New financial products that mimic deposit and loan accounts, such as

¹² Economic projections of Federal Reserve Board members and Federal Reserve Bank presidents, under their individual assumptions of projected appropriate monetary policy, September 16, 2020 available at: <https://www.federalreserve.gov/monetarypolicy/files/fomcproptabl20200916.pdf>.

Apple Pay and peer-to-peer lending, pose a competitive challenge to credit unions and banks alike. Credit unions also face a range of challenges from financial technology (Fintech) companies in the areas of lending and the provision of other services. For example, underwriting and lending may be automated at a cost below levels associated with more traditional financial institutions, but may not be subject to the same regulations and safeguards that credit unions and other traditional financial institutions face. The emergence and increasing importance of digital currencies may pose both risks and opportunities for credit unions. As these institutions and products gain popularity, credit unions may have to be more active in marketing and rethink their business models.

Technological changes outside the financial sector may also lead to changes in consumer behavior that indirectly affect credit unions. For example, the increase in on-demand use of auto services and pay-as-you-go, on-demand vehicle rental could reduce purchases of consumer-owned vehicles. That could lead to a slowdown or reduction in the demand for vehicle loans, now slightly more than a third of the credit union system loan portfolio.

Membership trends: While overall credit union membership continues to grow, roughly half of federally insured credit unions had fewer members at the end of the second quarter of 2020 than a year earlier. Demographic and field of membership changes are likely to continue leading to declining membership at many credit unions. All credit unions need to consider whether their product mix is consistent with their members' needs and demographic profile.

Smaller credit unions' challenges and industry consolidation: Small credit unions face challenges to their long-term viability for a variety of reasons. If current consolidation trends persist, there will be fewer credit unions in operation in future years and those that remain will be considerably larger and more complex. As of June 30, 2020, there were 627 federally insured credit unions with assets of at least \$500 million, 34 percent more than just five years earlier. These 627 credit unions accounted for 76 percent of credit union members and 81 percent of credit union assets. Large credit unions tend to offer more complex products, services and investments. Increasingly complex institutions will pose management challenges for the institutions themselves, as well as the NCUA; consolidation means the risks posed by individual institutions will become

more significant to the Share Insurance Fund.

IV. Key Themes of the 2021–2022 Budget

Overview

The budget supports the priorities and goals outlined in the agency's strategic plan and its annual performance plan. The resources and initiatives proposed in the budget support the NCUA's mission to maintain a safe and sound credit union system.

The COVID–19 pandemic, which onset early in 2020, remains a dominant consideration for the 2021–2022 agency priorities and its budget. The spread of COVID–19 has presented a multitude of challenges to the credit union industry and the NCUA, from the economic downturn and its impacts on individuals, business and institutions, to legislation such as the CARES act, to how the NCUA operates, to new cybersecurity concerns. The impacts of COVID–19 are most readily apparent in the 2021–22 budget due to the shift to remote/off-site supervision and work, which reduces travel expenses but also increases certain other expenses such as information technology.

The 2021–2022 budget includes funding for the NCUA to increase permanent staffing in critical areas necessary to operate as an effective federal financial regulator capable of addressing emerging issues. Importantly, the agency has made efforts through 2020 to fill examination-related positions, so that NCUA is best prepared to address the economic impacts from the ongoing COVID–19 situation. The NCUA employees are the agency's most valuable resource for achieving its mission, and the agency is committed to a workplace and a workforce with integrity, accountability, transparency, inclusivity, and proficiency. We will continue investing in the workforce through training and development, helping employees develop the tools they need to do their work effectively.

The 2021–2022 budget also invests in a number of agency priorities, including: The Advancing Communities through Credit, Education, Stability, and Support, or ACCESS, initiative focused on financial inclusion; increased use of off-site examinations work and data analytics through the Virtual Examination project; deployment of the MERIT system to all examiners; ongoing implementation of examination priorities updated in response to the COVID–19 pandemic; regulatory reform initiatives; and efforts to implement organizational efficiencies. The NCUA

expects these efforts will result in a more effective organization.

The efficiency and effectiveness of the agency's workforce is dependent upon the resiliency of the NCUA's information technology infrastructure and availability of technological applications. The NCUA is committed to implementing new technology responsibly and delivering secure, reliable and innovative technological solutions to support its mission. This necessitates investments funded in the Capital Budget and additional staff to provide the analytical tools and technology the workforce needs to achieve the NCUA mission.

Financial Inclusion

At its heart, financial inclusion means expanding access to safe and affordable financial services for unbanked and underserved people and communities as well as broadening employment and business opportunities. The financial services industry—of which credit unions are an important part—plays a key role in helping families achieve financial freedom by building generational wealth; helping entrepreneurs to get their small businesses off the ground; and helping to create jobs and strengthen communities. The NCUA has a role to play in making sure that credit unions can support overlooked or underserved areas.

The NCUA recently announced its Advancing Communities through Credit, Education, Stability, and Support, or ACCESS, initiative, which will bring together agency leaders to develop policies and programs that support financial inclusion within the NCUA and more broadly throughout the credit union system.¹³ The NCUA has dedicated resources from across the agency offices to ensure an inclusive and open-minded approach to refreshing and modernizing regulations, policies, and processes.

Addressing the various aspects of inclusion, the agency will look at the unique role credit unions can fill by providing access to unbanked and underserved individuals and communities, how credit unions can remain competitive within the financial services industry, and what steps can be taken to modernize the rules and processes for chartering new credit unions to provide consumers with services that meet their needs.

Virtual Examination Project

In 2017, the NCUA Board approved the Virtual Examination project and

¹³ <https://www.ncua.gov/access>.

provided funding to research methods to conduct offsite as many aspects of the examination and supervision processes as possible. The Virtual Examination project team is researching ways to harness new and emerging data, advancements in analytical techniques, innovative technology, and improvements in supervisory approaches. Additionally, the COVID-19 pandemic necessitated a switch to an offsite examination posture, and the project team plans to build upon its work to date by integrating lessons learned during the pandemic in planning for enhanced offsite procedures.

By identifying and adopting alternative methods to remotely analyze the financial and operational condition of a credit union, while maintaining or improving effectiveness relative to current examinations, it may be possible to significantly reduce the frequency and scope of onsite examinations. Onsite examination activities could potentially be limited to periodic data quality and governance reviews, interventions for material problems, and meetings or other examination activities that need to be handled in person. To be successful, examination staff will likely need to analyze more information about the credit union being examined

and to communicate more frequently with management at the credit union. However, by conducting this analytic work offsite, the NCUA expects to have less impact on credit unions' day-to-day operations.

The NCUA believes that effective Virtual Examinations should lead to greater use of standardized interaction protocols, advanced analytical capabilities, and better-informed subject matter experts. This should result in more consistent and accurate supervisory determinations, provide greater clarity and consistency with respect to how the agency conducts supervisory oversight, and reduce coordination challenges between agency and credit union staff.

The virtual examination team will deliver to the NCUA Board by the end of 2020 an initial report discussing alternative methods identified to remotely analyze aspects of the financial and operational condition of a credit union.

Enterprise Solution Modernization

In 2015, the NCUA conducted an assessment of the information technology (IT) needs across the agency and developed a business case for replacing its antiquated legacy systems. This assessment recognized the full

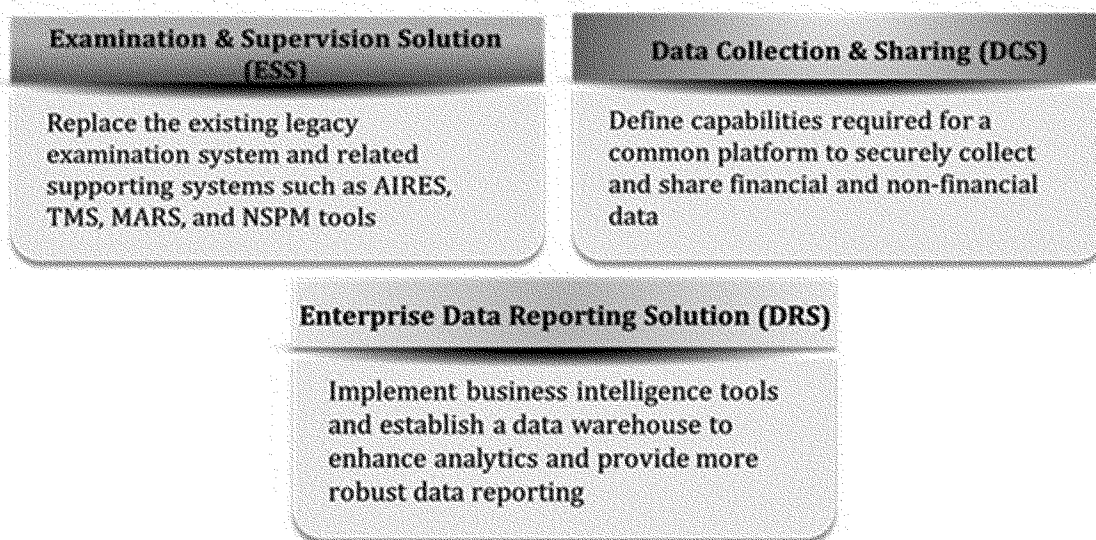

range of industry-leading, cost-effective alternative strategies, services, and products for implementing the agency's next generation of IT information management, examination, supervisory, and data collection solutions.

At that time, the NCUA acknowledged a technology revamp of this magnitude as a high-risk endeavor, both in terms of cost and delivered functionality. The risk stems from the number of systems impacted and the unique nature of the NCUA's applications, many of which require a high degree of customization. However, the agency required a major modernization after many years of under-investment in software and application development. In November 2015, the NCUA Board approved a plan for modernizing the agency's IT systems known as the Enterprise Solution Modernization (ESM) program. The ESM program recognizes the following legacy systems, capabilities and strategies need to be modernized:

To better manage the complexity of the ESM Program, the NCUA established three sub-programs to modernize the NCUA's technology solutions and create an integrated examination and data environment that facilitates a safe and sound credit union system:

BILLING CODE 7535-01-P

Primary Legacy Systems	Capabilities	Strategies
<ul style="list-style-type: none"> • Exam System (AIRES) • Data Gathering System (CU Online) • Field of Membership Systems (FOMIA, GENISIS) 	<ul style="list-style-type: none"> • Workflow management • Resource and time management • Document and records management • Customer relationship management 	<ul style="list-style-type: none"> • Better information security across the organization • Technical platform and foundation • Business intelligence for enhanced analytical capabilities • Data integration

**BILLING CODE 7535-01-C**

The NCUA 2021–2022 budget includes funding to complete the roll-out of the first Examination and Supervision Solution project as well as to initiate the first project under the Data Collection and Sharing Solution sub program.

Examination and Supervision Solution

Given the age of the NCUA's legacy examination systems and their importance to the mission of the agency, priority was given to the following parts of the modernization effort in the first phase of ESM development:

- Better information security across the organization.
- Technical platform and foundation for new applications.
- AIRES replacement (Examination and Supervision Solution), including financial analytics.

- Central user interface for stakeholders to interact with the NCUA.

- Business Intelligence tools for enhanced analytical capabilities (added later to the initial phase as explained below).

To deploy the Examination and Supervision Solution, it was first necessary to stand up new agency infrastructure that supports the full modernization program: The technology architecture, infrastructure, and security posture required to operate modernized systems. The necessary infrastructure was acquired and put in place in 2019.

The new examination solution, which is named the Modern Examination and Risk Identification Tool (MERIT), was released as a pilot to the Office of National Examinations and Supervision (ONES) and the State Supervisory Authorities (SSA) in North Carolina and Washington in September 2019. The ESS program capabilities were further

developed and were on schedule to be released to all users in the summer of 2020. However, the training rollout was delayed because of the coronavirus pandemic. Instead, the agency deployed the second release to current pilot users in July 2020 and began an extended pilot in September 2020 for additional users from the NCUA's three Regional offices, the Wisconsin SSA, select corporate credit unions, and natural person credit unions of various asset sizes. The NCUA now plans to conduct training for its examiner workforce and other users in 2021, with deployment to all remaining system users in the third quarter of 2021.

Enhancing NCUA's analytic capabilities is an important objective of the ESM program. As the MERIT development progressed, the agency identified an opportunity to incorporate a robust business intelligence solution

into the MERIT deployment. Though not originally included as part of the initial MERIT project plan, this addition advances the agency's analytic capabilities and is central to the strategy to shift more exam work offsite.

In addition to better data analytics, MERIT provides numerous improvements over the legacy AIREX examination system, including:

- Better controlled access to examination data across the organization.
- Ability to request and submit items for the examination in an organized manner that is easily accessible to members of an exam team.
- Collaboration and real-time information for examiners, team members, and supervisors, including state supervisory authorities on joint exams.
- Opportunities for credit union users to manage examination findings and view completed examination reports.
- Business process improvements to achieve exam efficiencies, including less data redundancy and relational support between scope tasks, questionnaires, and findings.

From 2015 to 2020, the NCUA has spent approximately \$40.2 million on the ESM program, which includes the costs for ESS and MERIT. This total includes spending on program planning, a modernized and more secure IT infrastructure, the MERIT central user interface, and multiple releases of MERIT and associated examination systems.

Through September 2020, the NCUA accomplished the following:

- Established the ESM technical program infrastructure platform, including enhanced IT security.
- Developed the central user interface known as NCUA Connect, achieving a secure, single entry point into NCUA applications.
- Deployed the new MERIT examination tool to pilot users to support examination and supervision activities.
- Deployed the Admin Portal which provides confirmed, delegated credit union and SSA administrative users the ability to add and manage user access to NCUA Connect for their organization.
- Deployed the Data Exchange Application to ingest credit union member loan and share data requested during the examination and supervision process.
- Developed financial analytics and new loan and share analytics with dashboards and visualizations designed to assist the examiner in identifying risk.

The NCUA's 2021 budget includes \$14.6 million for MERIT, split between the operating, capital and SIF administrative expenses budgets. Of this total, \$14.3 million in the operating and capital budgets will support technical and system platform upgrades, surge support for functionality enhancements prior to the broad user rollout, and ongoing operations and maintenance enhancements, fixes, and technological upgrades for the deployed system. An additional \$0.3 million for MERIT is in the SIF administrative expenses budget, reflecting the cost of making MERIT available for those state supervisory agencies that use it.

The project is on schedule and met its 2019 performance target for deployment to and use by ONES and State regulators in Washington and North Carolina to carry out examinations and supervision contacts for all relevant federal credit unions with assets greater than \$10 billion. Due to the economic, travel, and social disruptions caused by the coronavirus pandemic, the NCUA has delayed the MERIT training rollout for all NCUA examiners originally planned for the third quarter of 2020. The MERIT project's performance goal for 2021 is:

Finalize deployment and training of NCUA and SSA users on MERIT and associated examination systems to begin the transition from AIREX to MERIT by December 31, 2021.

Data Collection and Sharing Solution

With the Examination and Supervision Solution project transitioning to an operations and maintenance state in 2021, the NCUA will next prioritize work on the Data Collection and Sharing (DCS) Solution initiative. The NCUA vision of the DCS project is to replace legacy systems and to streamline workflow processes. Activities to date have included the development and validation of high-level requirements with all NCUA stakeholders.

During the next phase of DCS development, the NCUA will refine the validated requirements for use in an analysis of alternatives (AoA) study. The AoA study will provide a roadmap for acquiring and implementing a solution or set of solutions. The AoA will recommend the best approach for a phased rollout strategy needed to implement DCS capabilities and the replacement of legacy systems. This analysis will also be used to support DCS acquisition planning efforts.

Supervisory Priorities and COVID-19 Response

In July 2020,¹⁴ the NCUA updated its annual supervisory priorities to address economic conditions that had emerged as a result of the COVID-19 pandemic, as well as various statutory and regulatory changes that occurred. Within these revised priorities, the NCUA is focusing its examination activities on areas that pose elevated risk to the credit union industry and the National Credit Union Share Insurance Fund. Additional information about the NCUA's response to the pandemic is available on the agency's COVID-19 web page.¹⁵

Coronavirus Aid, Relief and Economic Security Act

President Trump signed the Coronavirus Aid, Relief and Economic Security Act (CARES Act) into law on March 27, 2020. The NCUA has added the CARES Act as a supervisory priority to reflect the importance of the provisions outlined in the Act. NCUA examiners will review credit unions' good faith efforts to comply with the CARES Act and will take appropriate action, when necessary, to ensure credit unions meet their obligations under the new law.

Multiple CARES Act provisions directly affect credit unions, including those that:

- Provide greater access to liquidity, and improve the general financial stability of member credit unions through changes to the Central Liquidity Facility;
- Suspend the requirement to categorize certain loan modifications related to the COVID-19 pandemic as troubled debt restructurings (TDRs);
- Authorize the Small Business Administration to create the Paycheck Protection Program, a loan guarantee program to assist eligible businesses;
- Change requirements for reporting loan modifications related to the COVID-19 pandemic to the credit reporting agencies;
- Prohibit foreclosures on all single family, federally backed mortgage loans between March 18, 2020 and May 17, 2020. Fannie Mae, Freddie Mac, FHA, VA and USDA subsequently extended the prohibition to June 30, 2020. The foreclosure moratorium expiration for mortgages purchased by Fannie Mae and Freddie Mac currently extends until August 31, 2020;

¹⁴ <https://www.ncua.gov/regulation-supervision/letters-credit-unions-other-guidance/update-ncuas-2020-supervisory-priorities>.

¹⁵ <https://www.ncua.gov/coronavirus>.

- Provide up to a 360-day forbearance for borrowers with a single-family, federally backed mortgage loan that experience a financial hardship related to the COVID-19 pandemic; and

- Provide up to a 90-day forbearance for borrowers with a multifamily, federally backed mortgage loan that experience a financial hardship related to the COVID-19 pandemic.

Bank Secrecy Act Compliance/Anti-Money Laundering

The NCUA continues to budget resources to comply with the statutory mandate from Congress to enforce credit union compliance with Bank Secrecy Act (BSA) and Anti-Money Laundering (AML) laws and regulations. Technological advancements may expose even the smallest credit unions to potential illicit finance activities. The NCUA examines federal credit union compliance with BSA during every examination. Additionally, the NCUA assists state regulators as needed by conducting BSA examinations in federally insured, state-chartered credit unions.

The NCUA will continue communicating with credit unions, engaging with law enforcement, and collaborating with the other banking regulators on several initiatives associated with this supervisory priority, including:

- Publishing additional updates to the FFIEC Bank Secrecy Act/Anti-Money Laundering Examination Manual;
- Establishing interagency work-streams to define AML compliance program effectiveness;
- Updating the interagency statement on enforcement of BSA/AML requirements;
- Publishing guidance regarding politically exposed persons; and
- Offering clarification and suggestions to improve Suspicious Activity Report (SAR) and Currency Transaction Report (CTR) filings.

The NCUA will also continue focusing on proper filing of SARs and CTRs, as well as reviews of bi-weekly 314(a) information requests from FinCEN. Law enforcement, intelligence, and counterterrorism officials depend on prompt reporting of any 314(a) matches and the vital information provided through timely and informative SARs and CTRs. Officials use this information regularly to identify and thwart illicit and terrorist financing activities, and to prosecute and convict guilty parties. Credit union efforts in this area help fight crime and keep America safe.

Consumer Financial Protection

The COVID-19 pandemic continues to affect consumers and could result in increased consumer compliance risk in certain areas; consumer financial protection, therefore, remains an NCUA supervisory priority. The NCUA will continue to examine for compliance with applicable consumer financial protection regulations during every examination as established in agency's 2020 Letters to Credit Unions about 2020 Supervisory Priorities,¹⁶ which included:

- *Electronic Fund Transfer Act (Regulation E)*. Examiners will evaluate electronic fund transfer policies and procedures and review initial account disclosures as well as Regulation E's error resolution procedures for when consumers assert an error.

- *Fair Credit Reporting Act*. Examiners will review credit reporting policies and procedures and the accuracy of reporting to credit bureaus, particularly the date of first delinquency.

- *Gramm-Leach-Bliley (Privacy Act)*. Examiners will continue to evaluate credit union protection of non-public personal information about consumers.

- *Small dollar lending (including payday alternative loans)*. Examiners will test for compliance with the NCUA Payday Alternative Lending rules and interest rate cap. Examiners will determine whether a credit union's short-term, small-dollar loan programs that are not NCUA Payday Alternative Lending comply with regulatory requirements.

- *Truth in Lending Act (Regulation Z)*. Examiners will evaluate credit union practices concerning annual percentage rates and late charges. This includes evaluating whether finance charges and annual percentage rates are accurately disclosed and late fees are levied appropriately.

- *Military Lending Act (MLA) and Servicemembers Civil Relief Act (SCRA)*. The MLA and SCRA have been supervisory priorities for the NCUA since 2017. For credit unions that have not received a recent review, examiners will review credit union compliance with the MLA and SCRA.

The NCUA's consumer compliance reviews will now also emphasize review of the following regulatory changes enacted since the start of the COVID-19 pandemic:

- *Electronic Fund Transfer Act (Regulation E)*. Examiners will evaluate

credit union practices concerning the Regulation E, Remittance Transfer Rule changes to the safe harbor threshold and disclosures of rates and costs associated with remittance transfers.

- *Truth in Lending Act (Regulation Z)*. Examiners will also evaluate credit union practices concerning the changes made in response to the COVID-19 pandemic to the Truth in Lending-Real Estate Settlement Procedures Act (TRID) rule and Regulation Z Rescission rules that permit members to waive the waiting periods under both rules.

Credit Risk Management and Allowance for Loan and Lease Losses

The NCUA's January 2020 Letter to Credit Unions, 20-CU-01, 2020 Supervisory Priorities,¹⁷ prioritized review of a credit union's loan underwriting standards and procedures, and exposure to elevated concentration risks as outlined in NCUA Letter to Credit Unions, 10-CU-03, Concentration Risk.¹⁸ In response to the economic impact of the COVID-19 pandemic and subsequent regulatory and statutory changes, the NCUA is shifting its emphasis to reviewing actions taken by credit unions to assist borrowers facing financial hardship. The NCUA will also review the adequacy of loan and lease losses (ALLL) accounts to address the pro-cyclical effects of economic downturns.

NCUA examiners will review credit union policies and the use of loan workout strategies, risk management practices, and new strategies implemented to assist borrowers impacted by the COVID-19 pandemic, including new programs authorized through the CARES Act. In particular, examiners will evaluate a credit union's controls, reporting, and tracking of these programs. Examiners will also ensure credit unions have evaluated and are effectively managing the impact of COVID-19 on their credit risk, capital position, and overall financial stability.

In addition, credit unions' risk-monitoring practices should be commensurate with the level of complexity and nature of their lending activities, provide for safe and sound lending practices, and ensure compliance with consumer protections and regulatory reporting requirements.

Further, due to the recent developments in economic conditions and the Financial Accounting Standards Board's (FASB) decision to delay its

¹⁶ <https://www.ncua.gov/regulation-supervision/letters-credit-unions-other-guidance/2020-supervisory-priorities> and <https://www.ncua.gov/regulation-supervision/letters-credit-unions-other-guidance/update-ncuas-2020-supervisory-priorities>.

¹⁷ <https://www.ncua.gov/regulation-supervision/letters-credit-unions-other-guidance/2020-supervisory-priorities>.

¹⁸ <https://www.ncua.gov/regulation-supervision/letters-credit-unions-other-guidance/concentration-risk>.

requirement to comply with the current expected credit losses (CECL) standard until January 2023, NCUA examiners will not be assessing credit unions' efforts to transition to the CECL standard until further notice. The NCUA encourages credit unions to continue to assess their needs and evaluate methodologies for the eventual implementation of the CECL standard.

Credit unions must still maintain an ALLL account in accordance with FASB Accounting Standards Codification (ASC) Subtopic 450-20 (loss contingencies) and/or ASC 310-10 (loan impairment). NCUA examiners will be evaluating the adequacy of credit unions' ALLL accounts by reviewing:

- ALLL policies and procedures;
- Documentation of an ALLL reserving methodology, including modeling assumptions;
- Adherence to generally accepted accounting principles; and
- Independent reviews of credit union reserving methodology and documentation practices by the Supervisory Committee or by an internal or external auditor.

Information Systems and Assurance (Cybersecurity)

Emerging cyber-attacks continue to pose a persistent threat to the financial sector, including credit unions, financial regulators, and the broader financial system. Advances in financial technology, an increased remote workforce, and increased use of mobile technology and cyberspace for financial transactions means more opportunities for cybersecurity threats and other technology-related issues. As a result, cybersecurity is one of the top priorities of the NCUA.

The NCUA has transitioned its priority from performing Automated Cybersecurity Examination Tool (ACET) cybersecurity maturity assessments, to evaluating critical security controls. The NCUA is piloting an Information Technology Risk Examination solution for Credit Unions (InTReX-CU). InTReX-CU harmonizes the IT and Cybersecurity examination procedures shared by the Federal Deposit Insurance Corporation, the Federal Reserve System, and some state financial regulators to ensure consistent approaches are applied to community financial institutions. The InTReX-CU will be deployed to identify gaps in security safeguards, allowing examiners and credit unions to identify and remediate potential high-risk areas through the identification of critical information security program deficiencies as represented by an array

of critical security controls and practices.

The NCUA has also published information for credit unions on the increased cybersecurity threats resulting from the COVID-19 pandemic and additional resources for protecting their members. For more information, visit the NCUA's Cybersecurity Resources¹⁹ website and the Cybersecurity, Frauds, and Scams section on the NCUA's Frequently Asked Questions for Federally Insured Credit Unions.²⁰

The NCUA also places strong emphasis on ensuring the security of the agency's systems and the controlled, unclassified information it collects. The NCUA's Office of the Chief Information Officer is continually taking steps to enhance the agency's information security posture and ensure the NCUA's systems and information are protected from compromise, including the work done as part of ESM.

LIBOR Transition Planning

In a March 23, 2020, statement, the United Kingdom's Financial Conduct Authority maintained its central assumption that firms cannot rely on LIBOR being published after the end of 2021. This should remain the target date for all credit unions to meet.

Credit unions offer, own, and are counterparties to LIBOR-based products and contracts, including loans, investments, derivatives, deposits, and borrowings. These may be subject to increased legal, financial, and operational risks once the reference rate is no longer available. On July 1, 2020, the FFIEC issued a Joint Statement on Managing the LIBOR Transition²¹ that highlights the risks that will result from the transition away from LIBOR and encourages supervised institutions to continue their efforts to transition to alternative reference rates.

Planning for the LIBOR transition is an important operational and safety and soundness consideration for credit unions with material exposures. Examiners will continue assessing credit unions' exposure and planning related to a transition away from LIBOR. For credit unions with exposure to LIBOR, examiners will continue to conduct reviews using the NCUA's LIBOR Assessment Workbook.²²

Liquidity Risk

The NCUA's January 2020 Letter to Credit Unions, 20-CU-01, 2020 Supervisory Priorities,²³ included assessments of liquidity risk management as a supervisory priority, noting that on average, credit union balance sheets generally exhibit lower levels of on-balance sheet liquidity due to strong loan growth. At that time, the NCUA was focusing liquidity reviews to address the following, in credit unions with low-levels of on-balance sheet liquidity:

- The potential effects of changing interest rates on the market value of assets and borrowing capacity;
- Scenario analysis for liquidity risk modeling, including possible member share migrations (for example, shifts from core deposits into more rate-sensitive accounts). Also, scenario analysis for changes in cash flow projections for an appropriate range of relevant factors (for example, changing prepayment speeds); and
- The appropriateness of contingency funding plans to address any potential liquidity shortfalls.

The economic impact of the COVID-19 pandemic may result in additional stress on credit union balance sheets, potentially requiring robust liquidity management over the course of 2020 and into 2021. As a result, examiners will continue to review liquidity risk management and planning in all credit unions, and will place emphasis on:

- The effects of loan payment forbearance, loan delinquencies, projected credit losses and loan modifications on liquidity and cash flow forecasting;
- Scenario analysis for changes in cash flow projections for an appropriate range of relevant factors (for example, changing prepayment speeds);
- Scenario analysis for liquidity risk modeling, including changes in share compositions and volumes;
- The potential effects of low interest rates and the decline of credit quality on the market value of assets, funding costs and borrowing capacity; and
- The adequacy of contingency funding plans to address any potential liquidity shortfalls.

Impact of COVID-19 on NCUA Operations

Since March 16, 2020, the NCUA has been operating in a remote work posture in response to the COVID-19 pandemic.

[IRRExamProcedures.htm%3FTocPath%3DInterest%2520Rate%2520Risk%7C__9.](#)

²³ <https://www.ncua.gov/regulation-supervision/letters-credit-unions-other-guidance/2020-supervisory-priorities>.

The NCUA has drafted a resumption plan to enable a safe and orderly return to onsite work.

The draft NCUA resumption plan is currently designed as a three-phased approach to restoring those on-site activities that have been suspended during the pandemic. Since the NCUA has been successful in maintaining all essential functions and activities under its remote posture, any decision to move to a new phase and resume some or all suspended activity will be made with caution, and supported by metrics and advice from public health professionals.

The NCUA anticipates that as specific phases of the resumption plan are activated, these activations will take place on a county or local level, specific to the on-the-ground conditions reported by government authorities. As such, different portions of the NCUA workforce may operate under different resumption phases based upon local health conditions.

The NCUA has also implemented enhanced cleaning procedures at all of the NCUA's facilities to ensure all NCUA owned or leased worksites are operated in a manner consistent with health guidance from the Centers for Disease Control.

Regulatory Reform

The NCUA established a Regulatory Reform Task Force (Task Force) in March 2017 to oversee implementation

of the agency's regulatory reform agenda. This is consistent with the spirit of Executive Order 13777 and the Trump administration's regulatory reform agenda. Although the NCUA, as an independent agency, is not required to comply with Executive Order 13777, the agency chose to review all of the NCUA's regulations, consistent with the spirit of initiative and the public benefit of periodic regulatory review. The NCUA has undertaken a series of regulatory changes as part of this effort, and continues to pursue a regulatory reform agenda.

The NCUA's Regulatory Reform Task Force published its final report in December 2018. Since that time, the NCUA established an annual performance indicator to measure the regulatory reviews it completes on a yearly basis. The NCUA's current performance target for regulatory review is to complete review of one third of the agency's regulations on an annual basis.

V. Operating Budget

Overview

The NCUA Operating Budget is the annual resource plan for the NCUA to conduct activities prescribed by the Federal Credit Union Act of 1934. These activities include: (1) Chartering new federal credit unions; (2) approving field of membership applications of federal credit unions; (3) promulgating regulations and providing guidance; (4)

performing regulatory compliance and safety and soundness examinations; (5) implementing and administering enforcement actions, such as prohibition orders, orders to cease and desist, orders of conservatorship and orders of liquidation; and (6) administering the National Credit Union Share Insurance Fund.

Staffing

The staffing levels proposed for 2021 reflect the resource requirements that support the NCUA's continued efforts to modernize the examination process and enhance the efficiency and effectiveness of the supervisory process.

In March 2020, the NCUA Board approved one position to support the agency's new Office of Ethics Counsel to support agency compliance with relevant ethics laws and regulations, to promote accountability and ethical conduct, and ensure the success of the NCUA's ethics programs. The full cost of this new position is included in the 2021 budget.

The 2021 budget supports a total agency staffing level of 1,191 full-time equivalents (FTE), of which 1,186 are funded in the Operating Budget. This is a net increase of five FTE, or 0.4 percent, compared to the Board-approved level for 2020. The new 2021 FTE are described in greater detail below.²⁴

BILLING CODE 7535-01-P

²⁴ Full-time equivalent (FTE) employment is the total number of regular straight-time hours (*i.e.*, not including comp time or holiday hours) worked by employees divided by the number of compensable hours applicable to the fiscal year, as defined by the Office of Management and Budget, Circular No. A-11. The NCUA uses the number of FTE projected in the budget to build its estimated pay and benefits calculations. The actual number of persons employed will vary at any point in time, based on vacancies, use of part-time employees, etc.

Authorized Regional Examiners and Specialists	2013	2014	2015	2016	2017	2018	2019	2020
Credit Union Examiner	600	566	571	541	517	472	471	470
Regional Capital Market Specialist	12	18	24	24	25	24	25	25
Regional Information System Officer	7	8	13	17	18	18	20	20
Problem Case Officer	41	46	37	31	31	32	32	31
Regional Lending Specialist	21	28	27	31	30	30	30	31
Director of Special Actions	7	10	9	10	10	10	10	10
Supervisory CU Examiner	71	73	68	67	64	50	50	51
Other Regional Staff	117	120	116	117	115	117	118	117
TOTAL	876	869	865	838	810	753	756	755

In addition to the staff assigned to regional offices, most of the staff in ONES are remote field staff who also travel to credit unions as part of their examination responsibilities.

Request for New Staff in 2021—+5 FTE

The staff draft budget includes funding for an increase or adjustment to NCUA staffing that equates to five FTEs. This funding covers the following 3 specific positions:

Consumer Compliance Program Officer—+1 FTE

This new position, within the Office of Consumer Financial Protection will develop tiered examination procedures up to and including FFIEC-approved examination procedures, lead consumer

financial protection compliance reviews conducted at credit unions with higher compliance risk profiles, and assist in developing training materials for examiners and credit unions.

Financial Literacy Specialist—+1 FTE

This new position, within the Office of Consumer Financial Protection, will support and encourage financial inclusion throughout the credit union industry with informative financial literacy outreach activities. The NCUA currently employs one Program Officer in the Office of Consumer Financial Protection to implement the agency's Financial Literacy and Outreach programs. The new position will support this Program Officer and help

collaborate and contribute to the National Strategy on Financial Literacy, and the U.S. Department of the Treasury's Financial Literacy and Education Commission (FLEC).

Senior Credit Specialist—+1 FTE

This new position, within the Office of Examination and Insurance, will provide enhanced risk mitigation and program support for the credit risk area. Credit risk, and credit unions' lending functions in particular, represents the largest portion of the credit union system's business and continues to grow increasingly diverse and complex. The NCUA currently has several specialists who analyze the growing complexity of the commercial, residential mortgage,

and consumer lending markets. This additional position will ensure that the Office of Examination and Insurance identifies the increased risks and program needs of the credit union system by focusing on emergent credit risks, developing guidance and program policies needed to effectively implement risk management, and executing increasingly complex analytic portfolios.

The staff draft budget and the related FTE authorization also includes two additional FTEs to account for the potential need for additional support (additional positions and/or changes to position grades) for the Central Liquidity Facility, the Board Secretary function, and financial innovation.

Options are still being developed by the NCUA staff related to the resource needs and associated priorities of these functions for the Board to consider.

Additionally, within the overall existing 2020 staffing level of 1,186 FTE, the NCUA is adjusting its staffing plan to accomplish the following in 2021:

- *Office of National Examinations and Supervision (ONES)*: To support the additional large consumer credit unions that will come under ONES supervision: One national supervision technician, one national lending specialist, one national supervision analyst, one financial data analyst, and one national information systems officer.

- *Office of the Chief Information Officer*: One data cloud infrastructure

specialist and one network specialist to support the increasing demands and complexity of the agency's information technology systems and networks.

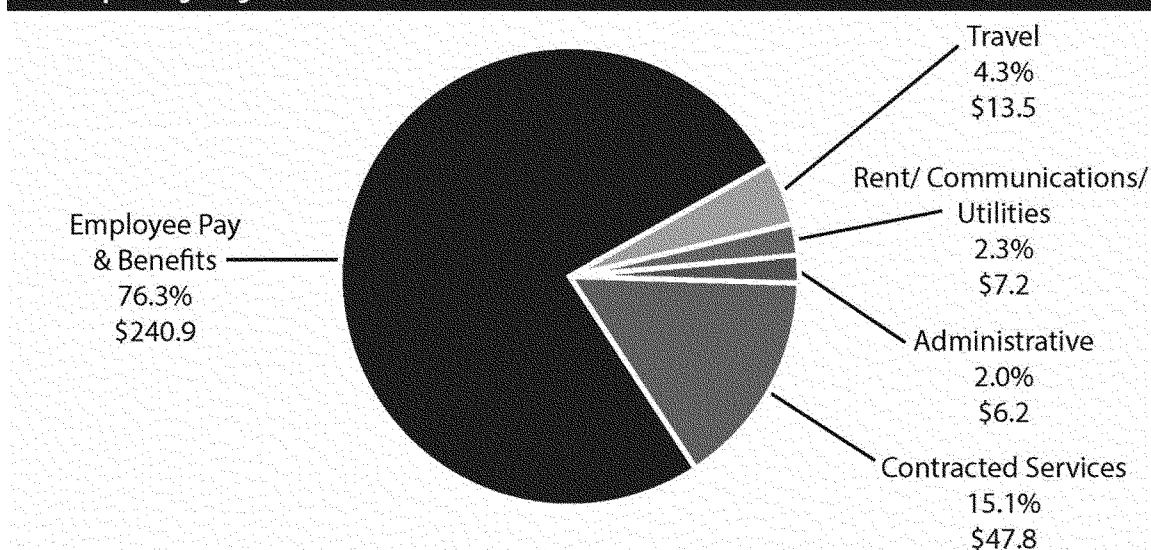

- *Office of Examinations and Insurance*: One additional risk officer to support anticipated increase in risk management actions.

Budget Category Descriptions and Major Changes

There are five major expenditure categories in the NCUA budget. This section explains how these expenditures support the NCUA's operations, and presents a transparent overview of the Operating Budget.

2021–2022 NCUA OPERATING BUDGET SUMMARY							
Budget Cost Category	2020 Board Approved Budget	2021 Requested Budget	2020-2021 Change	Change Percent	2022 Requested Budget	2021-2022 Change	Change Percent
Employee compensation	231,311,000	240,894,000	9,583,000	4.1%	249,387,000	8,493,000	3.5%
Salaries	162,513,000	167,978,000	5,465,000	3.4%	174,568,000	6,590,000	3.9%
Benefits	68,798,000	72,916,000	4,118,000	6.0%	74,819,000	1,903,000	2.6%
Travel	27,379,000	13,490,000	(13,889,000)	-50.7%	24,333,000	10,843,000	80.4%
Rent/Comm/Utilities	8,232,000	7,194,000	(1,038,000)	-12.6%	8,434,000	1,240,000	17.2%
Administrative	5,630,000	6,182,000	552,000	9.8%	6,182,000	–	0.0%
Contracted Services	43,331,000	47,807,000	4,476,000	10.3%	53,430,000	5,623,000	11.8%
Total	\$ 315,883,000	\$ 315,567,000	(316,000)	-0.1%	\$ 341,766,000	26,199,000	8.3%

2021 Operating Budget (in Millions of Dollars)

BILLING CODE 7535–01–C

Actual expenses for the Operating Fund are reported monthly in the

Operating Fund Financial Highlights posted on the NCUA website. Share Insurance Fund Financial Reports and

Statements, which are also posted to the NCUA website, detail reimbursements

made to the Operating Fund for NCUA expenses.

Salaries and Benefits

The budget includes \$240.9 million for employee salaries and benefits in 2021. This change is a \$9.6 million, or 4.1 percent, increase from the 2020 Board-approved budget.

Salaries and benefits costs make up 76.3 percent of the total budget. There are two primary drivers of increased costs in 2021 for the Salaries and Benefits category:

Merit and locality pay increases for the NCUA's employees are paid in accordance with the agency's current Collective Bargaining Agreement (CBA) and its merit-based pay system. Salaries are estimated to increase 3.4 percent in aggregate compared to 2020.

Contributions for employee retirement to the Federal Employee Retirement System (FERS), which are unilaterally set by the Office of Personnel Management, cannot be negotiated or changed by the NCUA. Driven largely by the mandatory FERS rate adjustment, total NCUA benefits costs increase 6.0 percent in 2021 compared to 2020.

These changes are described in more detail below.

In 2021, the NCUA's compensation levels will continue to "maintain comparability with other federal bank regulatory agencies," as required by the Federal Credit Union Act.²⁵ The Salaries and Benefits category of the budget includes all employee pay raises for 2021, such as merit and locality increases, and those for promotions, reassignments, and other changes, as described below.

Consistent with other federal pay systems, the NCUA's compensation includes base pay and locality pay components. The NCUA staff will be eligible to receive an average merit-based increase of 3.0 percent, and an additional locality adjustment ranging from 1.3 percent to 1.7 percent, depending on the geographic location.

The first-year cost of the new positions added in 2021 is estimated to be \$1.0 million. Specific increases to individual offices' salaries and benefits budgets will vary based on current pay levels, position changes, and promotions.

Personnel compensation at the NCUA varies among every office and region depending on work experience, skills, years of service, supervisory or non-

supervisory responsibilities, and geographic locations. In general, more than 85 percent of the NCUA workforce has earned a bachelor's degree or higher, compared to approximately 35 percent of the private-sector workforce. This high level of educational achievement ensures the NCUA workforce is able to fulfill its mission effectively and efficiently, and attracting a well-qualified workforce requires the agency to pay employees competitive salaries.

Individual employee compensation varies, depending on the cost of living in the location where the employee is stationed. The federal government sets locality pay standards, which are managed by the President's Pay Agent—a council established to make recommendations on federal pay. The council uses data from the Occupational Employment Statistics program, collected by the Bureau of Labor Statistics, to compare salaries in over 30 metropolitan areas, and establishes recommendations for equitable adjustments to employee salaries to account for cost-of-living differences between localities.

The OPM economic assumptions for actuarial valuation of the FERS have increased significantly for 2021. All federal agencies are expected to contribute 17.3 percent of FERS employees' salaries to the OPM retirement system, an increase of 130 basis points compared to the 2020 level. This mandatory contribution is prescribed in the OPM Benefits Administration Letter dated May 2020. The estimated impact on the NCUA budget is an increase of approximately \$2.3 million in mandatory payments to OPM, or approximately 0.7 percentage points of overall budgetary growth, compared to 2020 levels.

The average health insurance costs for the Federal Employees Health Benefits (FEHBP) program for 2021 are consistent with historical actual expenses and the OPM estimate that the government share of FEHBP premiums will increase 3.0 percent in 2021. The employee salary and benefits category also includes costs associated with other mandatory employer contributions such as Social Security, Medicare, transportation subsidies, unemployment, and workers' compensation.

In past years, the NCUA adjusted its budget downward by an expected vacancy rate for positions that are not filled during the year because of a time lag between employee separations and hiring new staff. Since 2018, the NCUA has lowered its vacancy rate by more than 50 percent, and continues to closely monitor the hiring and attrition

trends within its workforce. In anticipation of the need for a full complement of staff in 2021, and because of ongoing acceleration in the agency's hiring cycle time, the proposed 2021 budget does not include a vacancy adjustment.

The 2022 budget request for salaries and benefits is estimated at \$249.4 million, a \$8.5 million increase from the 2021 level, which accounts for merit and locality increases consistent with the CBA (approximately \$5.6 million), the full-year cost impact of new positions (approximately \$1.0 million), and associated increases in benefits for all employees (approximately \$1.9 million). The assumptions used for compensation-related adjustments are based on the CBA currently in force.

Travel

The 2021 budget includes \$13.5 million for Travel. This change is a 50.7 percent decrease to the 2020 Board-approved budget.

There are two reasons for the significant reduction in the 2021 travel budget. First, the NCUA expects that pandemic-related travel restrictions will continue through the first quarter of 2021, and adjusted the budget downward as a result. Second, and subject to approval by the NCUA Board, the agency will use approximately \$6 million of unspent 2020 travel funds to offset the 2021 travel budget. Historically, the travel budget comprises approximately nine percent of the overall NCUA budget, however the share of travel in the 2021 budget will be only 4.3 percent.

The travel cost category includes expenses for employees' airfare, lodging, meals, auto rentals, reimbursements for privately owned vehicle usage, and other travel-related expenses. These are necessary expenses for examiners' onsite work in credit unions. Close to two-thirds of the NCUA's workforce is comprised of field staff who spend a significant part of their year traveling to conduct the examination and supervision program.

The NCUA staff also travel for routine and specialized training. In 2020, the NCUA had planned to conduct a series of training events to support the nationwide roll-out of MERIT; however, these training events were postponed to 2021 due to pandemic-related travel restrictions. Amounts budgeted for MERIT training in 2020 will be used to pay for the events' costs in 2021. The NCUA roll-out will be a labor intensive effort requiring travel for many of the NCUA's staff, and will provide hands-on training for this new system, which

²⁵ The Federal Credit Union Act states that, "In setting and adjusting the total amount of compensation and benefits for employees of the Board, the Board shall seek to maintain comparability with other [F]ederal bank regulatory agencies." See 12 U.S.C. 1766(j)(2).

will be officially deployed in the fourth quarter of 2021.

During the COVID–19 pandemic, the agency and its employees successfully transitioned to an offsite examination posture, developing new procedures and processes to continue examination and supervisory work. In 2021, the NCUA will continue evaluating how it can conduct examinations remotely and offsite, which should result in future cost avoidance for travel. In addition, agency personnel will continue to utilize more virtual training options, where appropriate, to help minimize travel expenses.

The 2022 budget request for travel is estimated to be \$24.3 million, or an 80.4 percent increase over the 2021 level. This increase results from returning to a full year of scheduled travel and from using up the unspent 2020 travel balances in 2021.

Rent, Communications, and Utilities

The 2021 budget includes \$7.2 million for Rent, Communications, and Utilities. This is a \$1.0 million, decrease, or 12.6 percent less than the 2020 Board-approved budget. The Rent, Communications, and Utilities budget funds the agency's telecommunications and information technology network expenses, and facility rental costs.

The NCUA used approximately \$3.7 million of unspent 2020 travel funds to pay the balance of a loan taken from the Share Insurance Fund for construction of the NCUA's Central Office building. This reduces the Rent, Communications, and Utilities budget by approximately \$1.3 million per year through 2023.

The telecommunication charges include leased lines, domestic and international voice (including mobile), and other network charges. Telecommunication costs include the circuits and any associated usage fees for providing voice or data telecommunications service between data centers, office locations, the internet and any customer, supplier or partner.

The 2021 budget includes costs to support the NCUA's bandwidth at the NCUA disaster recovery sites, procurement of additional circuits and express routes for Microsoft 365 implementation, and transition to the GSA-managed Enterprise Infrastructure Solutions (EIS). EIS is the federal government's contract for enterprise telecommunications and networking solutions. By transitioning to EIS, the NCUA will benefit from the comprehensive solution EIS provides to address all aspects of federal agency IT telecommunications, and infrastructure requirements.

Office building leases, meeting rentals, office utilities, and postage expenses are also included in this budget category. Facility costs are approximately \$700,000 in 2021 for office space rental for the Western Region, insurance, and ancillary costs for the NCUA Central Office. The annual utility costs for the Central Office and regional offices are estimated at \$383,000.

The 2021 budget also includes \$627,000 for event rental costs for examiner meetings and other training events. This is a decrease of approximately \$500,000 compared to 2020 since the costs of MERIT-related training were already incurred in 2020 but the classes were rescheduled to 2021 because of the COVID–19 pandemic.

The 2022 budget request for the Rent, Communications, and Utilities category is estimated to be \$8.4 million, an increase of \$1.2 million over the 2021 level, which includes an additional \$740,000 for telecommunications transitions and \$500,000 for space rentals for a national conference.

Administrative Expenses

The 2021 budget includes \$6.2 million for Administrative Expenses. This is an increase of \$552,000, or 9.8 percent, compared to the 2020 Board-approved budget. Recurring costs in the Administrative Expenses category include the annual reimbursement to the Federal Financial Institutions Examination Council (FFIEC), employee relocation expenses, recruitment and advertising, shipping, printing, subscriptions, examiner training and meeting supplies, office furniture, and employee supplies and materials.

As part of the FFIEC, the NCUA shares in costs for joint actions and services that affect the financial services industry. The FFIEC costs increased by almost \$200,000 from 2020 to 2021.

The 2020 budget did not include funds for employee relocation but instead used approximately \$1,000,000 of unspent balances from prior years to pay for 2020 employee relocation costs. The 2021 budget includes an increase of \$750,000 for employee relocations compared to the 2020 budget. Relocation costs are paid by the NCUA to employees who are competitively selected for a promotion or new job within the agency in a different geographic area than where they live.

The 2022 budget request for Administrative Services is projected to be the same as the 2021 recommended level.

Contracted Services

The 2021 budget includes \$47.8 million for Contracted Services. This is a \$4.5 million, or 10.3 percent, increase compared to the 2020 Board-approved budget. The Contracted Services budget category includes costs incurred when products and services are acquired in the commercial marketplace. Acquiring specific expertise or services from contract providers is often the most cost-effective approach to fulfill the NCUA's mission. Such services include critical mission support such as information technology equipment and software development, accounting and auditing services, and specialized subject matter expertise that enable staff to focus on core mission execution.

The majority of funding in the Contracted Services category supports the NCUA's robust supervision framework, and includes funding for tools used to identify and resolve traditional risk concerns such as interest rate risk, credit risk, and industry concentration risk, as well as by addressing new and evolving operational risks such as cybersecurity threats. Growth in the contracted services budget category results primarily from new operations and maintenance costs associated with capital investments, such as the Examinations and Supervision Solution, or MERIT system. Other costs include core agency business operation systems such as accounting and payroll processing, and various recurring costs, as described in the seven major categories, below:

- Information Technology Operations and Maintenance (48 percent of contracted services)
 - IT network support services and help desk support
 - Contractor program and web support and network and equipment maintenance services
 - Administration of software products such as Microsoft Office, Share Point and audio visual services
- Administrative Support and Other Services (13 percent of contracted services)
 - Examination and Supervision program support
 - Technical support for examination and cybersecurity training programs
 - Equipment maintenance services
 - Legal services and other expert consulting support
 - Other administrative mission support services for the NCUA central office
- Accounting, Procurement, Payroll and Human Resources Systems (10 percent of contracted services)
 - Accounting and procurement systems and support

- Human resources, payroll, and employee services
- Equal employment opportunity and diversity programs
- Building Operations, Maintenance, and Security (8 percent of contracted services)
- Central office facility operations and maintenance
- Building security and continuity programs
- Personnel security and administrative programs

- Information Technology Security (9 percent of contracted services)
- Enhanced secure data storage and operations
- Information security programs
- Security system assessment services
- Training (7 percent of contracted services)
- Examiner staff, technical and specialized training and development
- Senior executive and mission support staff professional development

- Audit and Financial Management Support (4 percent of contracted services)
- Annual audit support services
- Material loss reviews
- Investigation support services
- Financial management support services

The following pie chart illustrates the breakout of the seven categories for the total 2021 contracted services budget of \$47.8 million.

2021 Contracted Services Budget by Category (in Millions of Dollars)

Note: minor rounding differences may occur in totals

Major programs within the contracted services category include:

- Training requirements for the examiner workforce. The NCUA's most important resource is its highly educated, experienced, and skilled workforce. It is important that staff have the proper knowledge, skills, and abilities to perform assigned duties and meet emerging needs. Each year, Credit Union Examiners complete a variety of training classes to ensure their skills and industry knowledge are kept up to date, including in core areas such as capital markets, consumer compliance, and specialized lending. Major training deliverables for 2021 include the rescheduled MERIT training sessions discussed elsewhere in this document, classes offered by the Federal Financial Institutions Examination Council, updated examiner classes, and subject

matter expert training sessions for the NCUA examiners. Contracted service providers, in partnership with the NCUA subject matter experts, will develop and design training classes for examiners and continue work on the triennial review of the NCUA's Subject Matter Examiner (SME) course curriculum. The NCUA plans to implement a new Talent Management System in 2021, and will simultaneously update some of the current online course content. Additionally, contracted service providers and central office staff will continue conducting organizational development, leadership and teambuilding training.

- The NCUA's information security program supports ongoing efforts to strengthen the agency's cybersecurity and ensure its compliance with the

Federal Information System Management Act.

- Agency financial management services, human resources technology support, and payroll services. The NCUA contracts for these back-office support services with the U.S. Department of Transportation's Enterprise Service Center (DOT/ESC) and the General Services Administration. The NCUA's human resource system, HR Links, also adopted by other federal agencies, is a shared solution that automates routine human resource tasks and improves time and attendance functionality.

- Audit. The NCUA Office of Inspector General contracts with an accounting firm to conduct the annual audit of the agency's four permanent funds. The results of these audits are posted annually on the NCUA website

and also included as part of the agency's Annual Report.

A significant share of the budget for the Contracted Services category finances on-going infrastructure support for the agency. The 2021 budget includes the first year of funding for that annual Operation and Maintenance costs for the MERIT system, which will replace the legacy AIRES examination system. Several other of the NCUA's core information technology systems and processes also require additional contract support in 2021, which result in increased budgets in the Contracted Services category, as described below.

Within the budget for the Office of Chief Information Officer (OCIO), an additional \$3.8 million is required primarily for the operations and maintenance costs of capital projects, including the MERIT system.

Funding for the contract services that support the NCUA's website—approximately \$1.5 million—has been moved from the Office of the Chief Information Officer to the Office of External Affairs and Communications in the 2021 budget. With the rollout of MERIT and new digital training courses for employees, website-related Americans with Disabilities Act compliance requests are expected to increase in 2021.

Within the Office of Examination and Insurance, contract reductions of \$500,000 are associated with technical accounting and security consultant support purchased in 2020 but not required in 2021.

The 2021 contracted serviced budget includes \$250,000 for the NCUA's

ACCESS initiative, which will bring together agency leaders to develop policies and programs that support financial inclusion within the NCUA and more broadly throughout the credit union system. By building on our successes, ACCESS will expand existing efforts to address the financial services and financial literacy needs of underserved and diverse communities, as well as expand opportunities for employment.

The 2022 budget for Contracted Services is estimated to increase by \$5.6 million, or 11.8 percent, compared to 2021, largely due to the operations and maintenance costs resulting from the delivery of capital projects funded in prior years.

VI. Capital Budget

Overview

Annually, the NCUA carries out a rigorous investment review process to identify the agency's needs for information technology (IT), facility improvements and repairs, and other multi-year capital investments. The NCUA staff review the agency's inventory of owned facilities, equipment, IT systems, and IT hardware to determine what requires repair, major renovation, or replacement. The staff then make recommendations for prioritized investments to the NCUA Board.

IT systems and hardware are another significant capital expenditure for modern organizations. The 2021 budget continues the NCUA's multi-year investment in current and replacement

IT systems. The budget fully supports the NCUA's effort to modernize its IT infrastructure and applications, including the full rollout of MERIT, the NCUA's Examination and Supervision Solution (ESS) project, which will replace the legacy Automated Integrated Regulatory Examination System (AIRES) system. Other IT investments include ongoing enhancements and upgrades to enhance decades-old legacy systems, network servers, systems to ensure the agency's cybersecurity posture, and various hardware investments to refresh agency networks and ensure staff have the tools necessary to maintain and increase their productivity.

Routine repairs and lifecycle-driven property renovations are also necessary to properly maintain investments in the NCUA's central office building in Alexandria, Virginia and the agency's owned office building in Austin, Texas. The NCUA facility manager assesses the agency's properties to determine the need for essential repairs, replacement of building systems that have reached the end of their engineered lives, or renovations required to support changes in the agency's organizational structure or to address revisions to building standards and codes.

The NCUA's 2021 capital budget is \$18.8 million. The capital budget funds the NCUA's long-term investments. The Information Technology Prioritization Council recommended \$12.0 million for IT software development projects and \$5.6 million in other IT investments for 2021. The NCUA facilities require \$1.3 million in capital investments.

2021 – 2022 NCUA CAPITAL BUDGET

	2020 Board Approved Budget	2021 Requested Budget	Change (2020–2021)	Change Percent (2020–2021)	2022 Requested Budget	Change (2021–2022)	Change Percent (2021–2022)
IT software development investments	20,902,000	11,968,000	(8,934,000)	-42.7%	11,047,000	(921,000)	-7.7%
Other Information technology investments	2,650,000	5,627,000	2,977,000	112.3%	3,275,000	(2,352,000)	-41.8%
Capital building improvements and repairs	1,524,000	1,250,000	(274,000)	-18.0%	250,000	(1,000,000)	-80.0%
Total	\$ 25,076,000	\$ 18,845,000	\$ (6,231,000)	-24.8%	\$ 14,572,000	\$ (4,273,000)	-22.7%

Detailed descriptions of all 2021 capital projects, including a discussion of how each project helps the agency achieve its strategic goals and objectives, are provided in Appendix B.

Summary of Capital Projects

Examination and Supervision Solution and Infrastructure Hosting (\$7.4 Million)

The purpose of the Examination and Supervision Solution and Infrastructure Hosting (ESS&IH) project is to implement a new, flexible, technical

foundation to enable current and future NCUA business process modernization initiatives, and replace the NCUA's legacy exam system, AIRES, with a new, customized Commercial-Off-The-Shelf (COTS) solution that will allow the NCUA's examiners and supervisors to be more efficient, consistent, and

effective. In 2021, all NCUA examiners will be trained to use the new MERIT system, with full implementation expected by the end of the year. After the MERIT system is fully deployed to the examiner workforce, the NCUA expects to include the system's on-going operating and maintenance costs in the operating budget.

Enterprise Central Data Repository (\$1.6 Million)

The Enterprise Central Data Repository (ECDR) project will implement a central data repository that will serve as the data integration point for ESS, ONES's analytic tools, the NCUA's legacy applications and the Data Collection Solution (DCS). The ECDR will become an enterprise solution for the NCUA allowing the agency to transition in a phased approach from the existing legacy databases to a cloud-based data repository serving the agency's needs.

Enterprise Data Program (\$0.4 Million)

The purpose of this project is the centralization, organization and storage of the NCUA data. The primary goal is to enable the NCUA to manage enterprise data as a strategic asset through its full lifecycle (create/collect, manage/move, consume, dispose). The Enterprise Data Program (EDP) will also facilitate the centralization and organization of the NCUA's data with an authoritative source so analysis is more accurate, simple and easily distributed across the agency.

NCUA Website Development (\$0.1 Million)

The purpose of the website Development project is to serve the web-related needs of the internal NCUA stakeholders and the public. The project provides on-going improvements to the website, such as an improved user experience, and provides support for design, development, and maintenance of the agency's public websites: *NCUA.gov* and *MyCreditUnion.gov*.

Performance Management System Replacement (\$0.2 Million)

A replacement system is needed to enable employees to complete all phases of NCUA's performance management program. The system will standardize the workflows and management of employees' performance plans, facilitating employee performance plan issuance, plan acknowledgement, progress review acknowledgment, and the issuance of a final year-end evaluation for all NCUA employees.

Continuous Diagnostic Mitigation (\$0.9 Million)

The objective of the Continuous Diagnostics and Mitigation (CDM) project is to enhance the overall security posture of NCUA with capabilities to monitor vulnerabilities and threats in near real-time. This is achieved by implementing capabilities and technical controls to identify what is on the network, who is on the network, what is happening on the network, and to protect data in use, transit, and at rest. This increased situational awareness will allow NCUA to prioritize actions to mitigate or accept cybersecurity risks based on the potential impact to the NCUA mission.

Microsoft Office M365 Implementation (\$1.5 Million)

The goal of the M365 Implementation project is to empower the NCUA's employees by delivering the most advanced innovations in management, collaboration, enterprise security, and business analytics through cloud services. Once implemented, M365 will reduce security risks as well as reduce the cost and effort to maintain and manage software nearing the end of its service life.

Enterprise Laptop Lease (\$0.8 Million)

The purpose of the Enterprise Laptop Lease project is to ensure the NCUA workforce has an efficient, mobile friendly, and secure computer that helps employees better perform their jobs at a reasonable cost. Because of the priority deployment of the MERIT system in 2021, the NCUA plans to purchase its current fleet of laptops at the end of the current lease in 2021. The NCUA now plans to replace its laptops in 2022.

Information Technology Infrastructure, Platform and Security Refresh (\$3.9 Million)

The purpose of the Information Technology (IT) Infrastructure, Platform and Security Refresh project is to refresh and/or replace routers, switches, virtual servers, wireless infrastructure, virtual private network, infrastructure appliances, end of life and end of service components in order to ensure that the NCUA data is secure and operations are stable.

Refresh VoIP Phone System (\$1.0 Million)

The purpose of the Refresh Voice over internet Protocol (VoIP) Phone System project is to fully replace NCUA's telephone system (infrastructure, platform, and endpoints) to ensure voice communications capabilities in order to ensure that business continuity and

operations are stable. NCUA VoIP voice components include Session Initiation Protocol (SIP), call control, external and internal call routing, local and long-distance call plans, international calling plans and VoIP desk/soft phone. In addition, NCUA plans to integrate the VoIP infrastructure with the M365 project to optimize the workforce's collaboration experience.

Central Office Heating, Ventilation, and Air Conditioning (HVAC) System Replacement (\$0.5 Million)

The NCUA central office HVAC system replacement project will recapitalize the HVAC system in the agency's central office building, including all cooling towers, air handlers, boilers and HVAC components. The current HVAC system is original to the facility, 27 years old, at the end of its useful life, not working efficiently, and obsolete. The 2021 budget provides funding to complete the multi-year HVAC replacement project.

Austin, Texas Office Building Modernization (\$0.8 Million)

In 2021, the NCUA will continue its multi-year improvement project at the Austin, Texas office building. These capital improvements are required for the facility to continue routine and safe operations, and align with the lifecycle replacement required for critical infrastructure.

VII. Share Insurance Fund Administrative Budget

Overview

The Share Insurance Fund Administrative budget funds direct costs associated with authorized Share Insurance Fund activities. The direct charges to the Share Insurance Fund include costs associated with the NCUA Guaranteed Note (NGN) program and other administrative costs, and represent the total estimated direct costs to the Share Insurance Fund.²⁶ The Share Insurance Fund Administrative budget funds five positions that were formerly part of the Temporary Corporate Credit Union Stabilization Fund (Stabilization Fund) budget.

The cost of the NGN program and the Corporate System Resolution Program, including costs associated with the

²⁶ Note these direct costs are exclusive of any costs that are shared with the Operating Fund through the Overhead Transfer Rate, and with payments available upon requisition by the Board, without fiscal year limitation, for insurance under section 1787 of this title, and for providing assistance and making expenditures under section 1788 of this title in connection with the liquidation or threatened liquidation of insured credit unions as it may determine to be proper.

administration of those programs, are funded from the Share Insurance Fund Administrative budget. These costs have no impact on the NCUA's current and future Operating Fund budgets. The budget for the Share Insurance Fund also includes funding for expenditures previously authorized as direct expenses of the Share Insurance Fund for items such as state examiner computer leases, training and financial audit support.

The 2021 Share Insurance Fund Administrative budget is estimated to be \$8.1 million, \$1.6 million, or 26 percent, more than 2020.

The 2021 budget increase is primarily driven by the addition of operations and maintenance costs for technology systems and data used by the NCUA to validate stress testing at large credit unions, and the addition of the costs of making MERIT, the new examination solution and replacement to AIRES, available to those state supervisory agencies that use it.

The 2022 requested budget supports similar workload and resources, but is projected to decrease by \$218,000 or, or 2.7 percent, compared to the 2021 funding level because the one-time nature of the cost of providing the MERIT system to state supervisory authorities.

Budget Category Descriptions and Major Changes

Salaries and Benefits

The employee pay and benefits expense category for the Share Insurance Fund Administrative budget is estimated to be \$1.5 million, which represents an increase of \$30,000 compared to 2020. This increase is due to aligning the budget to actual payroll costs for staff on board, as well as an increase to mandatory agency contribution rates to the FERS retirement program. Personnel compensation is 18 percent of the total budget. The financial analysts on the NGN team have specialized technical expertise to manage the remaining \$5 billion of legacy assets the NCUA will control in 2021. Personnel costs are estimated in a manner similar to the operating budget.

Travel

The estimated travel cost of \$52,000 is less than one percent of the overall 2021 budget and remains the same as the 2020 budget estimate. These costs cover all of the travel expenses for the five staff that manage and support the NGN

program. Two of the five staff are remote employees and are expected to travel periodically to the NCUA's central office.

Administrative: Training

Training expenses, which represent less than one percent of the overall 2021 budget, are estimated to remain at \$27,000, identical to the 2020 level, based on projections of employee professional development plans and specialized training requirements.

Support for the NGN Program (Contract Support)

Contract costs to support the NGN program, which represent 31 percent of the overall 2021 budget, are estimated to be \$2.5 million, a decrease of \$0.2 million from the 2020 level. Funding is needed to fulfill Corporate System Resolution Program requirements and includes outside professional services such as external valuation experts, financial specialists, and accountants.

These experts assist the NCUA with the following services:

Consulting Services in the amount of \$0.9 million to support two NCUA offices: Examination and Insurance and the Chief Financial Officer. Services include quarterly management reviews of asset valuations, as well as analyses of emerging issues. Contractors also provide support for the annual financial audit process and improvements in internal controls. Tasks include: Supporting complex accounting and financial requirements for settlements, sale of legacy assets, parity payments, changing valuation model assumptions, and other asset disposition activities. Additionally, professional services are used to assist with accounting, tax, financial reporting, and systems support for the corporate Asset Management Estates.

Valuation Services in the amount of \$1.0 million funds valuation support for the NGN legacy assets. As supported by the NGN Oversight Committee, resources are also needed to conduct special analyses, including valuations for determining reasonable market prices for securities to be sold by auction.

Software and Data Subscription Services in the amount of \$0.6 million supports technical tools used to provide waterfall models, calculations, and metrics for the structured investment products underlying the NGN portfolio. The service provides coverage of all relevant asset classes, waterfall models

that are seasoned and tested throughout the industry, and a broad array of calculations and metrics. Financial data analytics play a critical role in the surveillance, modeling, and pricing of the legacy assets that securitize the NGN Trusts, as well as supporting the management reviews that the NCUA performs on the cash flow projections. Now that the NGNs are maturing, the NCUA requires data subscription services to provide additional valuation as well as support for the legacy asset disposition process.

Other annual subscriptions provide important services related to surveillance of the portfolio of corporate bonds and mortgage-related bonds. Independent credit research services include fundamental capital structure research, credit analyses for surveillance of corporate bond portfolio and mono-line insurer exposure, and direct access to various industry experts for discussion on specific credits.

Other Direct Expenses

Other direct expenses of the Share Insurance Fund are estimated to be \$4.0 million in 2021, an increase of \$1.8 million, or 82 percent, compared to the 2020 budget level.

The NCUA is required to validate annual stress testing conducted by certain large credit unions to help ensure these credit unions can remain financially sound through challenging economic cycles. Over a multi-year endeavor, the NCUA has developed and implemented its Assets and Liabilities Management (ALM) system, which in part allows the NCUA to build internal analytical capabilities and run supervisory stress testing analyses. The NCUA also uses the ALM system and associated data to conduct regular quantitative risk assessments. Development of the ALM system was funded from the NCUA capital budget in 2020 and prior years, but now that the system is in use, \$1.4 million for operations and maintenance costs will be funded from the SIF budget in 2021 and future budgets.

The 2021 budget also includes \$0.3 million that will be spent to make the MERIT examination and supervision system available to State Supervisory Authorities that oversee state-chartered credit unions. This is expected to be a one-time cost for specific technology development.

BILLING CODE 7535-01-C

VII. Financing the NCUA Programs*Overview*

When formulating the annual budget, the NCUA is mindful that its operating funding comes directly from federal and state chartered credit unions. The agency strives to ensure that any use or allocation of these funds follows a thorough review that evaluates the necessity of the expenditures and whether programs are operating in an

efficient, effective, transparent, and fully accountable manner.

To achieve its statutory mission, the NCUA incurs various expenses, including those involved in examining and supervising federally insured credit unions. The NCUA Board adopts an Operating Budget, which includes the Capital Budget, in the fall of each year to fund the vast majority of the costs of

operating the agency.²⁷ The Federal Credit Union Act authorizes two primary sources to fund the Operating Budget:

(1) Requisitions from the Share Insurance Fund “for such administrative and other expenses incurred in carrying out the purposes of

²⁷ Some costs are directly charged to the Share Insurance Fund when appropriate to do so. For example, costs for training and equipment provided to State Supervisory Authorities are directly charged to the Share Insurance Fund.

[Title II of the Act] as [the Board] may determine to be proper”;²⁸ and

(2) “fees and assessments (including income earned on insurance deposits) levied on insured credit unions under [the Act].”²⁹

Among the fees levied under the Act are annual Operating Fees, which are required for federal credit unions under 12 U.S.C. 1755 “and may be expended by the Board to defray the expenses incurred in carrying out the provisions of [the Act,] including the examination and supervision of [federal credit unions].”

Taken together, these authorities effectively require the Board to determine which expenses are appropriately paid from each source while giving the Board broad discretion in allocating expenses.

In 1972, the Government Accountability Office recommended the NCUA adopt a method for properly allocating Operating Budget costs—that is, the portion of the NCUA’s budget funded by requisitions from the Share Insurance Fund and the portion covered by Operating Fees paid by federal credit unions.³⁰ The NCUA has since used an allocation methodology, known as the Overhead Transfer Rate (OTR), to determine how much of the Operating Budget to fund with a requisition from the Share Insurance Fund.

The NCUA uses the OTR methodology to allocate agency expenses between these two primary funding sources. Specifically, the OTR is the formula the NCUA uses to allocate insurance-related expenses to the Share Insurance Fund under Title II. Almost all other operating expenses are funded through collecting annual Operating Fees paid by federal credit unions.³¹

Two statutory provisions directly limit the Board’s discretion with respect to Share Insurance Fund requisitions for the NCUA’s Operating Budget and, hence, the OTR. First, expenses funded from the Share Insurance Fund must carry out the purposes of Title II of the Act, which relate to share insurance.³² Second, the NCUA may not fund its entire Operating Budget through charges

to the Share Insurance Fund.³³ The NCUA has not imposed additional policy or regulatory limitations on its discretion for determining the OTR.

Overhead Transfer Rate (OTR)

The NCUA conducts a comprehensive workload analysis annually. This analysis estimates the amount of time necessary to conduct examinations and supervise federally insured credit unions in order to carry out the NCUA’s dual mission as insurer and regulator. This analysis starts with a field-level review of every federally insured credit union to estimate the number of workload hours needed for the current year. These estimates are informed by the overall parameters of the NCUA’s examination program, as most recently updated by the Exam Flexibility Initiative approved by the Board.³⁴ The workload estimates are then refined by regional managers and submitted to the NCUA central office for the annual budget proposal. The OTR methodology accounts for the costs of the NCUA, not the costs of state regulators. Therefore, there are no calculations made for state examiner hours.

There have not been any major changes to the parameters of the examination program since the current OTR methodology went into effect.³⁵ The minor variations in the OTR since 2018 are the result of routine, small fluctuations in the variables that affect the OTR, including normal fluctuations in the workload budget from one calendar year to the next.

The NCUA Board approved the current methodology for calculating the OTR at its November 2017 open meeting.³⁶ In 2020, the Board published³⁷ in the **Federal Register** a request for comment regarding the OTR methodology, but did not propose any changes to the current methodology. The OTR is designed to cover the NCUA’s costs of examining and

supervising the risk to the Share Insurance Fund posed by all federally insured credit unions, as well as the costs of administering the fund. The OTR represents the percentage of the agency’s operating budget paid for by a transfer from the Share Insurance Fund. Federally insured credit unions are not billed for and do not have to remit the OTR amount; instead, it is transferred directly to the Operating Fund from the Share Insurance Fund. This transfer, therefore, represents a cost to all federally insured credit unions.

The OTR formula uses the following underlying principles to allocate agency operating costs:

1. Time spent examining and supervising federal credit unions is allocated as 50 percent insurance related.³⁸
2. All time and costs the NCUA spends supervising or evaluating the risks posed by federally insured, state-chartered credit unions or other entities that the NCUA does not charter or regulate (for example, third-party vendors and CUSOs) are allocated as 100 percent insurance related.³⁹
3. Time and costs related to the NCUA’s role as charterer and enforcer of consumer protection and other non-insurance based laws governing the operation of credit unions (like field of membership requirements) are allocated as 0 percent insurance related.⁴⁰
4. Time and costs related to the NCUA’s role in administering federal share insurance and the Share Insurance

³⁸ The 50 percent allocation mathematically emulates an examination and supervision program design where the NCUA would alternate examinations, and/or conduct joint examinations, between its insurance function and its prudential regulator function if they were separate units within the NCUA. It reflects an equal sharing of supervisory responsibilities between the NCUA’s dual roles as charterer/prudential regulator and insurer given both roles have a vested interest in the safety and soundness of federal credit unions. It is consistent with the alternating examinations the FDIC and state regulators conduct for insured state-chartered banks as mandated by Congress. Further, it reflects that the NCUA is responsible for managing risk to the Share Insurance Fund and therefore should not rely solely on examinations and supervision conducted by the prudential regulator.

³⁹ The NCUA does not charter state-chartered credit unions nor serve as their prudential regulator. The NCUA’s role with respect to federally insured state-chartered credit unions is as insurer. Therefore, all examination and supervision work and other agency costs attributable to insured state-chartered credit unions is allocated as 100 percent insurance related.

⁴⁰ As the federal agency with the responsibility to charter federal credit unions and enforce non-insurance related laws governing how credit unions operate in the marketplace, the NCUA resources allocated to these functions are properly assigned to its role as charterer/prudential regulator.

²⁸ 12 U.S.C. 1783(a).

²⁹ 12 U.S.C. 1766(j)(3). Other sources of income for the Operating Budget have included interest income, funds from publication sales, parking fee income, and rental income.

³⁰ <http://www.gao.gov/assets/210/203181.pdf>.

³¹ Annual Operating Fees must “be determined according to a schedule, or schedules, or other method determined by the NCUA Board to be appropriate, which gives due consideration to the expenses of the [NCUA] in carrying out its responsibilities under the [Act] and to the ability of [FCUs] to pay the fee.” 12 U.S.C. 1755(b).

³² 12 U.S.C. 1783(a).

³³ The Act in 12 U.S.C. 1755(a) states, “[i]n accordance with rules prescribed by the Board, each [federal credit union] shall pay to the [NCUA] an annual operating fee which may be composed of one or more charges identified as to the function or functions for which assessed.” See also 12 U.S.C. 1766(j)(3).

³⁴ The Exam Flexibility Initiative started with the January 1, 2017 examination cycle and it allows for extended examination cycles for eligible credit unions. Letters to Credit Unions 16–CU–12, December 2016.

³⁵ On November 16, 2017, the NCUA Board adopted a new methodology for calculating the OTR starting with the 2018 OTR. 82 FR 55644, November 22, 2017.

³⁶ 82 FR 55644 (Nov. 22, 2017).

³⁷ <https://www.federalregister.gov/documents/2020/08/31/2020-17009/request-for-comment-regarding-national-credit-union-administration-overhead-transfer-rate>.

Fund are allocated as 100 percent insurance related.⁴¹

These four principles are applied to the activities and costs of the agency to determine the portion of the agency's budget that is funded by the Share Insurance Fund. Based on the Board-

approved methodology, the OTR for 2021 is one percentage point higher than 2020, and estimated to be 62.3 percent. Thus, 62.3 percent of the total Operating Budget is estimated to be paid out of the Share Insurance Fund. The remaining 37.7 percent of the Operating

Budget is estimated be paid for by Operating Fees collected from federal credit unions. The explicit and implicit distribution of total Operating Budget costs for federal credit unions and federally insured, state-chartered credit unions is outlined in the table below:

2021 Estimated Distribution: OTR and Operating Fee		
Est. Share of the Operating Budget covered by:	Federal Credit Unions	Federally Insured, State-Chartered Credit Unions
Federal Credit Union Operating Fee	37.7%	0.0%
OTR x Percent of Insured Shares	31.3% (62.3% x 50.3%)	31.0% (62.3% x 49.7%)
Total	69.0%	31.0%

Concurrent with its request for comment regarding the OTR methodology, the Board also published proposed changes to the methodology used to compute the NCUA's Operating Fee⁴². Included as part of the proposed changes, the Board proposed applying the OTR to the NCUA's Capital Budget in the same manner as it applies the OTR to the Operating Budget. The Board is reviewing public comments received about this proposal before making a final decision about the applicability of the OTR to the Capital Budget.

By applying the four principles in a manner that incorporates all Operating and Capital Budget activities, the OTR for 2021 is estimated to be 62.3 percent, the same result as applying the four principles to the Operating Budget alone.

To determine the funds transferred from the Share Insurance Fund to the Operating Fund, the OTR is applied to actual expenses incurred each month. Therefore, the rate calculated by the OTR formula is multiplied by each month's actual operating expenditures and the product of that calculation is transferred from the Share Insurance Fund to the Operating Fund. This monthly reconciliation to actual operating expenditures captures the variance between actual and budgeted amounts, so when the NCUA's expenditures are less than budgeted, the amount charged to the Share Insurance Fund is also less—and those lower expenditures benefit both federally chartered and state chartered credit unions.

The use of insured shares in calculating the OTR was eliminated from the OTR methodology adopted by the Board in 2017. However, insured shares are used for informational purposes to reflect the fundamental economics with respect to how the implicit costs of the OTR are borne by federal and state-chartered credit unions. Use of insured shares is consistent with the mutual nature of the Share Insurance Fund and part of the statutory scheme related to Share Insurance Fund deposits, premiums and dividends.⁴³ The number, size, and health of federal and state credit unions affects the NCUA's workload budget, which in turn is one of the variables in the OTR methodology.

The primary driver of the increase in the estimated 2021 OTR is the increase in examination and supervision time for federally insured state-chartered credit unions. Calendar year 2021 marks the end of the first, five-year cycle associated with the Exam Flexibility Initiative that extended the NCUA exam time for eligible institutions. The increase in budgeted time for FISCO examination and supervision for 2021 is due to program obligations associated with examination scheduling and scope requirements. Normal fluctuations in the workload budget from one calendar year to the next are also variables that tend to influence the change in the calculated OTR compared to previous years. Workload budget variables include, but are not limited to, changes in CAMEL ratings, the number and size of credit unions that meet the annual exam and extended exam eligibility

criteria, credit unions with emerging risk indicators, variations in individual state regulator programs, and fluctuations in the timing of examinations related to a particular calendar year.

CUSOs are at times subject to review during the examination of a federally insured credit union. The OTR methodology captures CUSO-related time within the scope of the examination and supervision of federally insured credit unions under Principle 1 for federal credit unions and Principle 2 for federally insured state-chartered credit unions.

The time designated for separate, stand-alone reviews of CUSOs and third-party vendors is accounted for separately in the NCUA's workload budget and is covered by Principle 2 only. The Board has no direct regulatory authority with respect to CUSOs and there is no support to allocate time specifically designated for CUSO and third-party vendor reviews as anything other than the NCUA's role as insurer. The stand-alone review of CUSOs and third-party vendors is to identify and address risk to federally insured credit unions. These reviews are not intended to identify whether credit unions are complying with the lending and investment limitations with CUSOs. That is determined as part of the examination of the credit union.

The following chart illustrates the share of the Operating Budget paid by federal credit unions (FCUs, 69%) and federally insured, state-chartered credit unions (FISCOs, 31%).

⁴¹ The NCUA conducts liquidations of credit unions, insured share payouts, and other resolution activities in its role as insurer. Also, activities related to share insurance, such as answering

consumer inquiries about insurance coverage, are a function of the NCUA's role as insurer.

[regarding-national-credit-union-administration-overhead-transfer-rate](#)

⁴³ 12 U.S.C. 1782(c)(2) and (3).

2021 Distribution of Operating Budget Costs

Operating Fee

The Board delegated authority to the Chief Financial Officer to administer the methodology approved by the Board for calculating the Operating Fee, and to set the fee schedule as calculated per the approved methodology. In 2020, the Board published ⁴⁴ in the **Federal Register** several proposed changes to the Operating Fee methodology, and requested public comments about those changes. This section illustrates how the Operating Fee is calculated using the current, Board-approved Operating Fee methodology and also shows how the Operating Fee would be calculated if the Board adopts all of the changes it has proposed to the methodology.

Current Board-Approved Methodology

Based on the estimated 2021 OTR and the current methodology for computing the Operating Fee, the share of the 2021 budget funded by the Operating Fee is \$136.8 million. This equates to 0.0149 percent of projected federal credit union assets for December 2020. The overall decrease for the Operating Fee is estimated at 17.7 percent below the 2020 level under the current methodology, as shown on the table on page 64.

The Operating Fee is assessed on federal credit unions based on projected year-end assets under the current methodology. Credit unions with assets less than \$1 million are not assessed an Operating Fee. To set the assessment scale for 2021, federal credit union asset

growth is projected through December 31, 2020. Based on the June 30, 2020 Call Report data, annual growth is projected to be 14.3 percent at year end. The asset level dividing points would be increased by this same projected growth rate. Under the current methodology, assets are indexed annually by the projected annual growth in total federal credit union assets, which preserves the same relative relationship of the scale to the applicable asset base.

Proposed Changes to Operating Fee Methodology

In 2020, the NCUA Board proposed changes to the methodology it uses to determine how it apportions the Operating Fees and requested public comment about the changes. Specifically, the Board proposed: (1) Clarifying the treatment of capital project budgets when calculating the operating fees; (2) clarifying the treatment of miscellaneous revenues when calculating the operating fees; and (3) modifying the approach for calculating the annual inflationary adjustments to the thresholds for the operating fee rate tiers.

In a separate notice,⁴⁵ the Board also proposed amending its rule for determining total assets used as the basis for calculating the Operating Fee by (1) excluding Paycheck Protection Program (PPP) loans from the computation of a credit union's total assets and (2) using the average of the four quarters' call report data available at the time the Board approves the

annual budget to compute total assets instead of using the projected fourth quarter total assets.

Based on the proposed changes to the Operating Fee methodology and the proposed changes for determining credit unions' total assets, the share of the 2021 budget funded by the Operating Fee would be \$125.3 million. This equates to 0.0147 percent of the estimated average of federal credit union assets for the quarters ending on September 30, 2020. The overall decrease for the Operating Fee would be 19.4 percent less than 2020, as shown on the table on page 64. The Board is reviewing comments from the public about the proposals, as well as responses to questions the Board asked of the public about the Operating Fee rate scale, and may revise the Operating Fee rule, methodology, or rate scale based on these comments.

Under the proposed changes to the determination of total assets, the Operating Fee would be assessed on federal credit unions based on the average of total assets reported in the fourth quarter 2019 and the first three quarters of 2020, net of any reported PPP loans. Credit unions with assets less than \$1 million would not be assessed an Operating Fee.

To set the assessment scale for 2021, total growth in federal credit union assets would be calculated as the change between the average of the four most-current quarters (*i.e.*, the fourth quarter of 2019 and the first three quarters of 2020 in the case of the 2021 budget) and the previous four quarters (*i.e.*, the fourth quarter of 2018 and the first three quarters of 2019), which is estimated to

⁴⁴ <https://www.federalregister.gov/documents/2020/08/31/2020-17009/request-for-comment-regarding-national-credit-union-administration-overhead-transfer-rate>.

⁴⁵ <https://www.federalregister.gov/documents/2020/08/31/2020-16981/fees-paid-by-federal-credit-unions>.

be 11.9 percent.⁴⁶ Under the proposed methodology, asset level dividing points would be increased by this same growth

rate in order to preserve the same relative relationship of the scale to the applicable asset base.

Operating Fee Scale

To illustrate the rate for each asset tier for which Operating Fees are charged, the tables below show the effect of the

average 17.7 percent decrease in the Operating Fee for natural person federal credit unions under the current Board-approved methodology and the 19.4 percent decrease in the Operating Fee

for natural person credit unions under the proposed changes to the methodology. The corporate federal credit union rate scale remains unchanged from prior years.

⁴⁶ Total assets are determined using the most-current call report data, however 2020 third-quarter

data were not available at time of publication. The NCUA estimate for 2020 third-quarter assets is

based on projected growth, and will be revised with actual call report data once available.

\$5,416,525,554	AND	Over	\$625,074	+ 0.00002137	X total assets over	\$5,416,525,554

FY2021 Estimated Corporate Federal Credit Union Scale

<u>Asset Level</u>			<u>Operating Fee Assessment</u>			
\$50,000,000	TO	\$100,000,000	\$10,836	+ 0.00019870	X total assets over	\$50,000,000
\$100,000,000	AND	Over	\$20,771	+ 0.00001230	X total assets over	\$100,000,000

Operating Fee Scale explanation:

Projected federal credit union asset growth = change in asset level dividing points. Every year, the asset level scale is adjusted by the same percentage as the estimated growth rate.	Percent growth noted on Page 64, line 14
Operating fee rate change = Change in assessment rate percentage	Same as Page 64, line 16
The Corporate Credit Union scale remains unchanged from year to year. The number of CCUs is small and stable. Collections from CCUs do not vary significantly between years.	

IX. Appendix A: Supplemental Budget Information

2021 Budget by Strategic Goal

Strategic Goal	2021 Proposed Budget	
	Dollars (in Millions)	Full-Time Equivalents*
Goal 1: Ensure a safe and sound credit union system	\$200.80	932.9
Goal 2: Provide a regulatory framework that is transparent, efficient, and improves consumer access	\$30.09	117.6
Goal 3: Maximize organizational performance to enable mission success	\$80.66	130.5
Office of Inspector General	\$4.02	10.0
Total	\$315.57	1,191.0

Expenses for the Offices of the Board, Executive Director, Inspector General, External Affairs and Communications, and Chief Financial Officer are allocated across all strategic goals.

*NCUA's 2021 positions are funded by three different sources: the Central Liquidity Facility funds 3 full-time equivalents, and the Share Insurance Fund funds 5 full-time equivalents. NCUA's Operating Fund funds the remaining 1,183 full-time equivalents.

Note: minor rounding differences may occur in totals.

	*Note: \$276k will be funded from the 2021 Share and Insurance Fund Administrative Expenses Budget to make the system available to State Examiners.					
Link to NCUA strategic goals	<p><u>Goal 1: Ensure a Safe and Sound Credit Union System.</u> ESS will enable credit union examiners to fulfill NCUA strategic objective 1.2, "provide high-quality and efficient supervision," by providing a more effective and secure examination tool.</p> <p><u>Goal 3: Maximize organizational performance to enable mission success.</u> ESS will enable credit union examiners to perform their work more efficiently, helping the NCUA achieve strategic objective 3.2, "deliver an efficient organizational design supported by improved business processes and innovation."</p>					
Project Performance	Performance measure	2020	2021	2022	2023	2024
	Conduct ONES examinations and supervision contacts for all federal credit unions with assets greater than \$10 billion and joint exams with state regulators in federally insured state-chartered credit unions with assets greater than \$10 billion in Washington and North Carolina using the Modern Examination and Risk Identification Tool (MERIT), commencing October 7, 2019.	100% of contacts identified for Release 2**				
	Expand the MERIT Pilot to include additional states, corporate credit unions, regional natural person		Minimum 15 credit unions, 50 examiners, and one			

	credit union examiners, and other contact types to gather additional feedback for enhancing MERIT and the ESS applications while supporting user adoption.		state will be on-boarded			
	Finalize deployment and training of NCUA and SSA users on MERIT and associated examination systems to begin the transition from AIRES to MERIT by December 31, 2021		100% staff and SSA partners trained.			
	All FCU and FISCO contacts created and completed in MERIT.			75% of contacts	95% of contacts	
	Development Sprint completion: Estimate versus Actual	Within +/- 20%				
	Testing Pass Rate: % of User Stories that Pass User Acceptance Testing on First attempt	90% 75% (Actual)				
	Production System Availability	99.9% (Planned) 99.9% (Actual)	99.9%	99.9%	99.9%	99.9%
	<p>* Release 1 includes ESM Iterations 1-3: ONES natural person federal credit union exam Program (Contact Type 10, 11, 22, 23, 26, 27, and 28) and joint exam programs with two SSAs.</p> <p>** Release 2 includes ESM Iteration 4: Core examination and supervision functionality including Consumer Complaints, Corporate CU, Fair Lending, Risk Focused Exam, ONES Quarterly, SCUEP, Bank Purchase, Compliance, Conservatorship Admin, Fraud, NFICU, Loan and Share ingest and analytics capability. Liquidations contact configuration and enhancements to core functionality will continue into operations and maintenance.</p>					
Detailed project description	<p>The ESS&IH projects will put access to the key examination and supervision capabilities into a streamlined toolset allowing the NCUA's Examiners and Supervisors to be more efficient, consistent, and effective.</p> <p>The overarching ESS&IH project scope and key deliverables include a new, flexible, technical foundation to enable current and future NCUA business process modernization initiatives, a central user interface (CUI), which will serve as a common point of access for future ESM applications, secure transfer of data between the NCUA and third parties, and replacement of the NCUA's legacy exam system, AIRES, with new Commercial-Off-The-Shelf (COTS) solutions. This project represents the first deliverable of the NCUA's Enterprise System Modernization program.</p>					

	<p>In 2020, OBI/OCIO enhanced and expanded the Modern Examination and Risk Identification tool (MERIT) and its related suite of examination and supervision solutions (ESS) (e.g., NCUA Connect, DEXA, Admin Portal) and distributed ESS to a pilot group of NCUA, SSA, and credit union users. This release completed the core ESS&IH project scope/IT capability; however, because of the coronavirus pandemic, the NCUA delayed deploying MERIT to all NCUA staff, SSAs, and credit union users on its use until 2021. Through the end of 2020, the NCUA will continue to add staff and states onto the MERIT system for select contacts as part of an expanded pilot.</p> <p>In 2021, the NCUA will continue to enhance MERIT and the ESS suite of applications based on pilot user feedback. Capital funds will be used to upgrade platforms and surge contractor support in conjunction with the Agency's plans to deploy the system to all remaining users and train them, and initiate the transition from AIRES to MERIT.</p> <p>Investment objectives include:</p> <ul style="list-style-type: none"> • Process Efficiency and Scalability – To enable the NCUA staff to effectively oversee all credit unions, from the smallest to the largest, with various types of examinations from a single platform; • Process Flexibility and Adaptability – To adjust to new regulatory processes, demands, and priorities rapidly to an increasingly sophisticated credit union industry; • Improved Analytics – To enhance the ability to identify and evaluate risk in credit unions effectively through deep, detailed, “vertical” and “horizontal” analysis of credit unions using various analytical techniques and tools; • Robust and Flexible Data Collection – To securely collect and share financial and non-financial data with flexible workflows to automate manual processes and efficiently route work assignments; • Risk-based Examination Approach – To focus examiner resources on credit unions and asset portfolios that pose the most risk to the credit union industry; and, • Modern IT Infrastructure – To enable current and future business process modernization including a single point of entry to related IT services. <p>Time Management System (TMS), Management Automated Resource System (MARS), and National Supervision Policy Manual (NSPM) tools are not in scope of this project. Replacement of these legacy systems will be included in future efforts under the ESM program.</p>	
Quarterly project schedule and deliverables	March/2021	Complete the on-boarding and training of expanded pilot users.
	June/2021	Complete priority enhancements informed from the expanded pilot.
	August/2021	Start training and onboarding of NCUA Staff and SSAs.
	December/2021	Complete training and onboarding of NCUA staff and SSAs.
Performance Benchmark for Investment	<p>As a result of implementation of Modern Examination and Risk Identification tool (MERIT) and its related suite of examination and supervision solutions (ESS) (e.g., NCUA Connect, DEXA, Admin Portal) the users will be able to achieve:</p> <ul style="list-style-type: none"> • Better controlled access to examination data across the organization. • Faster and well-organized ability to request and submit items for the examination. • Collaboration and real-time information for examiners, team members, and supervisors, including state supervisory authorities on joint exams. 	

	<ul style="list-style-type: none"> • Opportunities for credit union users to manage examination findings and view completed examination reports. • Business process improvements to achieve exam efficiencies, including less data redundancy and relational support between scope tasks, questionnaires, and findings. 	
Project Risks and Mitigation Strategies	Risk	Mitigation
	If significant policy changes are made to support the Agency response to CARES/COVID-19 and the MERIT O&M team doesn't have the resources to support the changes, then users may be required to utilize workarounds with impacts to user adoption and data collection.	Maintain regular monthly communications with the Office of Examination & Insurance team on planned activities and estimated timelines. Prioritize and reserve contractor capacity for high-priority enhancements.
	If COVID-19 interrupts travel in 2021 or users are unable to attend the planned training, then the MERIT training strategy will be impacted.	Monitor ongoing developments and changes related to the pandemic. Develop alternative training strategies to address potential roadblocks.
	If the response to user reported system bugs and requests for help are slow, then users may become frustrated and user adoption could be impacted.	Define O&M service levels and manage user expectations. Actively manage O&M backlog and pro-actively communicate status and plans to users.

	Acquisition	\$1,096*	\$1,626	\$0	\$0	\$0
	Operations and Maintenance	\$0	\$587	\$1,787	\$1,757	\$1,750
Link to NCUA strategic goals	<p><u>Goal 1: Ensure a Safe and Sound Credit Union System.</u> The Enterprise Central Data Repository (ECDR) project will enable credit union examiners to fulfill strategic objective 1.2, "provide high-quality and efficient supervision," by providing a data platform that will enable NCUA to more accurately and cost-effectively assess risks to the credit union system. In turn, the system will enable the NCUA to better identify and evaluate credit union risk and more efficiently conduct its mission through data analytics.</p> <p><u>Goal 3: Maximize organizational performance to enable mission success.</u> The Enterprise Central Data Repository (ECDR) project will enable credit union examiners to perform their work more effectively and efficiently, helping the NCUA achieve strategic objective 3.2, "deliver an efficient organizational design supported by improved business processes and innovation" by providing the central data repository on which the agency's enterprise data analytics and ESM initiative will rely, and that will improve the integrity, security and business value of NCUA's data.</p>					
Project Performance	Performance measure	2020	2021	2022	2023	2024
(note: <input checked="" type="checkbox"/> indicates achievement of performance measure in year)	Expand infrastructure to support legacy data required for MERIT	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
	Continue to ingest ONES quarterly loan data	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Continue to ingest MERIT data	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Eliminate duplicate data tables	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		
	Accurately categorize data (enterprise, analytics, etc.)	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>		
	Migrate infrastructure to the cloud				<input checked="" type="checkbox"/>	
	Call Report tables consolidated into ECDR	<input checked="" type="checkbox"/>				
	Exam tables consolidated into ECDR	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
	Member Financial tables consolidated into ECDR		<input checked="" type="checkbox"/>			
	Expand BI Reporting & Analytics across the Agency	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>

Detailed project description	<p>The Enterprise Central Data Repository (ECDR) project will implement a data repository that will serve as the enterprise data integration point for MERIT, ONES' analytic tools the NCUA's legacy applications and provide a platform to support future data and analytic initiatives. ECDR is a critical component used for the import/export of data to and from the Modern Examination and Risk Management Tool (MERIT) and is the repository for the Home Mortgage Disclosure Act (HMDA) data as well as other sources. ECDR supports NCUA's goal to leverage and expand existing data capabilities, integrate new data sources, develop dashboards, and supports advanced data modeling/predictive analysis efforts.</p> <p>The ECDR is an enterprise solution for the NCUA that will allow the organization to transition through a phased approach from the existing legacy databases to a cloud-based data repository while meeting the agency's requirements.</p>	
Quarterly project schedule and deliverables	<p>March/2021</p> <p>June/2021</p> <p>September/2021</p> <p>December/2021</p>	<ul style="list-style-type: none"> Enhanced Credit Union Dashboard system Complete Exam data migrated to ECDR for analytical purposes Complete Institutional Financial (Call Report) data migrated to ECDR for analytical purposes Support for MERIT Iteration 4 (Institutional Financial Data for All Credit Unions) Member Financial Data ALM for Production Shared application data in ECDR
Performance Benchmark for Investment	<ul style="list-style-type: none"> Improved data quality by governing enterprise data in one place, better ensuring consistency, accuracy and availability of data across NCUA Provides ability to access and analyze historical data allowing for more ease of in-depth analysis NCUA will build a central data repository to support enterprise data analytics leveraging lessons learned from federal agencies and private industry. The data repository will be scalable to accommodate additional data requirements. ALM integration with ECDR will be automated so that ONES can directly access data from ECDR to use in ALM models for stress testing. MERIT integration with ECDR will be automated so that legacy regional reports can be maintained until modernization. 	
Project Risks and Mitigation Strategies	<p>Risk</p> <p>If resources assigned to this project are needed to support high priority tasks, then there may be impacts to this project.</p> <p>If requirement changes are needed, then there may be impact to the schedule.</p>	<p>Mitigation</p> <p>Continuous communication with OCIO Management on task prioritization and/or resource conflicts.</p> <p>Hold regular status meetings with project teams and OPIs to keep requirements delivery on schedule. Escalate any requirements changes or</p>

		expansion of requirements immediately to determine the impact of such changes.
	If there are schedule delays with the cloud environment, then additional storage may be required on premise.	Continue to communicate with the ESS team. Prepare for possible delays in moving to cloud by increasing storage by the time solution is scheduled to migrate to Test.

Project name	Enterprise Data Program (EDP) <i>formerly Enterprise Data Analytics, Governance and Reporting Services</i>					
Project sponsor	Office of Business Innovation

	Implement data governance for initial data standards for Exam and Institutional Financial Data Domains	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
	Conduct Critical Data Element Inventory for Exam and Institutional Financial Data Domains	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
	Develop initial business requirements for enterprise business intelligence capability for reporting and analytics	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
	Develop and implement a collaborative framework to design and validate an enterprise business intelligence capability for reporting and analytics	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
	Conduct Business Metadata Gap Assessment for Exam and Institutional Financial Data Domains		<input checked="" type="checkbox"/>			

	Conduct market research on tools to meet business meta data catalogue needs		<input checked="" type="checkbox"/>			
	Implement data governance for additional data domains and phases of the data lifecycle		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Detailed project description	<p>The NCUA's Chief Data Officer leads the Enterprise Data Program, which is comprised of a business data lead, a data steward team, a representative central data governing body, and data subject matter experts throughout the agency. The primary goal is to enable the NCUA to manage enterprise data as a strategic asset through its full lifecycle.</p> <p>Early discovery efforts for an Enterprise Data Reporting Solution (DRS) as part of NCUA's Enterprise Solution Modernization program identified the need to first develop an enterprise-level data governance strategy and framework as the foundation to facilitate business intelligence capability for enhanced reporting and analytics. The resulting business construct is NCUA's EDP.</p> <p>The EDP will reduce risks facing the current data environment and improve NCUA's overall reporting and data analysis capabilities. This will be accomplished through governed data and implementation of enterprise business intelligence capability to conduct risk analysis and target exams and supervision where needed to enhance the agency's ability to adapt to institution and industry conditions.</p> <p>The initial collaborative efforts of the EDP concentrate on enhancing clarity of enterprise data used in reporting and analytics for examination and credit union financial data. This work will complement, not replace, other aspects of the agency's existing data management and compliance processes (e.g. collection decisions, security, privacy, records management). The scope will evolve over time based on priorities and capacity.</p>					

Project name	NCUA Website Development					
Project sponsor	Office of External Affairs and Communications					
Customers/ beneficiaries	External: Visitors to NCUA Public Websites					
Budget	\$ in thousands	2020	2021	2022	2023	2024
	Acquisition	\$100	\$100	\$100	\$100	\$100
Link to NCUA strategic goals	<p><u>Goal 2: Provide a regulatory framework that is transparent, efficient and improves consumer access.</u> The website development project will assist the NCUA to share information with the public, credit unions, Congress, and the media about the agency and its functions, Board actions, and other matters. The project helps the NCUA achieve Strategic Objective 2.1, “deliver an effective and transparent regulatory framework,” and Strategic Objective 2.2, “Enforce federal consumer financial protection laws and regulations in federal credit unions.” The web services contract provides on-demand, agile support for the completion and delivery of special web projects and tasks requested by various NCUA offices of primary interest on behalf of the NCUA Chairman, Board members, Executive and Deputy Executive Director.</p> <p><u>Goal 3: Maximize organizational performance to enable mission success.</u> The website development project ensures that the NCUA is utilizing the efficient technology and business processes for managing the content of its public-facing websites.</p>					
Project Performance	Performance measure	2020	2021	2022	2023	2024
	N/A					
Detailed project description	<p>The website development project serves the web-related needs of the NCUA and visitors to its public websites. This funding request supports improvements to the website, such as an improved user experience, and provides support for design, development, and maintenance of the NCUA.gov and MyCreditUnion.gov.</p> <p>The project scope includes: (1) search engine optimization; (2) a digital asset management system; (3) data visualization and other improvements to how data is presented on the public website; (4) migrating legacy systems and utilities over to the agency’s current content management system; and (5) improve the websites’ compliance with Section 508 is a part of the Rehabilitation Act of 1973.</p>					
Quarterly project schedule and deliverables	March/2021	ITSS web services contract implemented				
	June/2021	High-priority projects implemented on a continuous basis on NCUA.gov will improve the presentation of financial performance data, and highlight the ACCESS initiative (Advancing Communities through credit, Education, Stability and Support).				
	September/2021					
	December/2021					

Performance Benchmark for Investment	The completion of updated visual design, content that conforms with Section 508 and usability standards, improved website traffic and engagement rates and design documents that conform with <i>NCUA Web Style Guide</i> .	
Project Risks and Mitigation Strategies	Risk	Mitigation
	Urgent requests for website updates could result in content not compliant with approved style guides and accessibility standards.	OEAC will ensure content complies with requirements of the <i>NCUA Communications Manual</i> , <i>NCUA Web Style Guide</i> , Section 508, and Web Content Accessibility Guides (WCAG). OEAC will follow the change request process by creating OneStop requests for every project or request.
	New high priority project requests may result in unfunded requirements exceeding the contract budget.	OEAC will work with the agency's business units to forecast potential projects and develop project plans that are efficient and that support the agency's strategic objectives.

Project name	Performance Management System (PMS) Replacement					
Project sponsor	Office of Human Resources					
Customers/ beneficiaries	Internal: All NCUA staff					
Budget	\$ in thousands	2020	2021	2022	2023	2024
	Acquisition	\$0	\$154	\$0	\$0	\$0
	Operations and Maintenance			\$36	\$36	\$36
Link to NCUA strategic goals	Goal 3: Maximize organizational performance to enable mission success. The Performance Management System (PMS) Replacement project will assist all NCUA employees to perform their work more effectively and efficiently, helping NCUA achieve strategic objective 3.2, "Deliver an efficient organizational design supported by improved business processes and innovation." The new PMS will be the NCUA's primary system for maintaining performance plans.					
Project Performance	Performance measure	2020	2021	2022	2023	2024
	Initiate and plan the acquisition of a new PMS	<input checked="" type="checkbox"/>				
	Acquire a modern, cost-efficient cloud-based PMS that meets agency requirements		<input checked="" type="checkbox"/>			
	Prepare and provide access to a new PMS to ~1,200 end users		<input checked="" type="checkbox"/>			
Detailed project description	<p>NCUA's current performance management solution, ePerformance, was acquired in 2012 through a sole source acquisition.</p> <ul style="list-style-type: none"> The current ePerformance system contract will end April 27, 2022. As a best practice, OCIO reviews major technological systems every five years for replacement/renewal ePerformance has not been reevaluated since it was acquired eight years ago <p>A replacement system is needed to enable employees to complete all phases of NCUA's performance management program. The system will facilitate employee performance plan issuance, plan acknowledgement, progress review acknowledgment, and the establishment of a final year-end evaluation for 1200 employees. The system will support standardized workflows and management of over 350 performance plan packages. Without the funding requested, NCUA would need to extend the current contract via sole source or maintain records as hard copies.</p>					
	March/2021					
	June/2021					

Quarterly project schedule and deliverables	September/2021	Award contract and configure PMS
	December/2021	Implementation of PMS
Performance Benchmark for Investment	The planned PMS will <ul style="list-style-type: none">Facilitate employee performance plan issuance, plan acknowledgement, progress review acknowledgment, and the establishment of a final year-end evaluation.The planned PMS will provide Single Sign-on (SSO).The planned PMS will be hosted on FedRAMP environment.The planned PMS will provide a COTS product that integrated with the Learning Management system and automate the Individual Development Plan (IDP) workflow.	
Project Risks and Mitigation Strategies	Risk	Mitigation
	If technical issues arise during the data migration process, it could result in the loss of performance records, content or other data.	Maintain additional copy of data prior to migration.

Project name	Continuous Diagnostics and Mitigation					
Project sponsor	Office of the Chief Information Officer					
Customers/ beneficiaries	Internal: All NCUA External: All Credit Unions					
Budget	\$ in thousands	2020	2021	2022	2023	2024
	Acquisition	\$0	\$900	\$0	\$0	\$0
	Operations and Maintenance	\$0	\$0	\$300	\$300	\$300
Link to NCUA strategic goals	Goal 3: Maximize organizational performance to enable mission success. The Continuous Diagnostics and Mitigation project will help NCUA achieve strategic objective 3.2, "deliver an efficient organizational design supported by improved business processes and innovation" by implementing secure, reliable, and innovative technology solutions that will ensure the confidentiality, integrity, and availability of NCUA information and information systems.					
Project Performance	Performance measure	2020	2021	2022	2023	2024
	Optimize existing technology and capabilities.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
	Implement the capabilities required of the Federal Continuous Diagnostics and Mitigation program.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
	Identify data attributes and reporting required of the Federal Continuous Diagnostics and Mitigation program.		<input checked="" type="checkbox"/>			
	Enhance visibility of NCUA assets, users, and activities on the network.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
	Define and track metrics for detection, alerting, and reporting of anomalous asset, users, and network activity.	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
Detailed project description	The objective of the Continuous Diagnostics and Mitigation (CDM) project is to enhance the overall security posture of NCUA with capabilities to monitor vulnerabilities and threats in near real-time. This is achieved by implementing capabilities and technical controls to identify what is on the network, who is on the network, what is happening on the network, and to protect data in use, transit, and at rest. This increased situational awareness will allow NCUA to prioritize actions to					

	<p>mitigate or accept cybersecurity risks based on the potential impact to the NCUA mission.</p> <p>Specific technologies for 2021 include endpoint and data protection capabilities with ongoing evaluation of enterprise cloud provider security stacks (e.g., M365) and prioritized investments based upon protection gap analyses.</p>	
Quarterly project schedule and deliverables	January/2021	Establish Data Protection program with OPI stakeholders.
	April/2021	Create/update policies for data protection. Acquire tools and capabilities for endpoint protection.
	June/2021	Acquire tools and capabilities for data protection. Conduct pilot test of endpoint protection capabilities.
	December/2021	Conduct pilot test of data protection capabilities. Deploy endpoint protection capabilities agency-wide.
Performance Benchmark for Investment	<p>Return on Security/Infrastructure Investment (ROSI) --</p> <p>This project improves system security and infrastructure stability while mitigating the risk of catastrophic system failure. Therefore, to gauge the benefit of the investment, the cost of acquiring the new system can be compared to an estimate of the economic loss that will be prevented by improved system performance. This calculation is shown in the ROSI equation:</p> $ROSI = \frac{\text{reduction in economic loss} - \text{cost of solution}}{\text{cost of the solution}}$ <ul style="list-style-type: none"> The reduction in economic loss is the difference between the annual measured loss prior to the investment and the projected loss after the investment, inclusive of any compliance benefits or potential impact on corporate goodwill. The economic loss is calculated using average contract labor rates and average workforce labor rates representing a potential loss of productivity for a given timeframe. 	
Project Risks and Mitigation Strategies	Risk	Mitigation
	The NCUA Information Security Support Services contract will be recompeted which may result in a new contract team that may impact the schedule of activities for 2021.	Create integrated master schedule with clear process for resource prioritization and scheduling.
	If the acquisition timeframe is extended, then the implementation schedule will be delayed.	Provide all required procurement artifacts well in advance of deadlines and manage all activities closely with clear escalation paths for higher level issue resolution.
	If resources are assigned to other assignments, then the implementation schedule will be delayed.	Create integrated master schedule with clear process for resource prioritization and scheduling.

Project name	Microsoft Office M365 Implementation					
Project sponsor	Office of the Chief Information Officer					
Customers/ beneficiaries	Internal: All NCUA External: All Credit Unions					
Budget	\$ in thousands	2020	2021	2022	2023	2024
	Acquisition	\$0	\$1,450	\$0	\$0	\$0
	Operations and Maintenance	\$0	\$0	\$0	\$0	\$0
Link to NCUA strategic goals	Goal 3: Maximize organizational performance to enable mission success. The Microsoft Office 365 Implementation project will enable credit union examiners and all NCUA staff to perform their work more effectively and efficiently, helping NCUA achieve strategic objective 3.2, "deliver an efficient organizational design supported by improved business processes and innovation" by utilizing Microsoft 365 applications, which includes: Excel, OneNote, Outlook, PowerPoint, Groups, Teams, Planner, and Word. Users will be able to connect with Office M365 services such as SharePoint Online, Exchange Online, OneDrive and Teams for collaboration and business productivity. Investment in these projects helps ensure business continuity and efficient operations by improving system availability and stability.					
Project Performance	Performance measure	2020	2021	2022	2023	2024
Reduce administrative overhead by 75 percent (administrative overhead to monitor and mitigate risk for end of life (EOL) and failing systems is approximately 5% of total contract spend) through: - eliminating ad hoc support for EOL equipment, - reducing maintenance requirements. (note: <input checked="" type="checkbox"/> indicates achievement of performance measure in year)	Complete Readiness Assessment	<input checked="" type="checkbox"/>				
	Acquire M365 Licenses	<input checked="" type="checkbox"/>				
	Prepare/Develop Environments/Networks/Exchanges, and AD.	<input checked="" type="checkbox"/>				
	Acquire Premier Services including O365 DSE	<input checked="" type="checkbox"/>				
	Complete OCIO Business Pilot	<input checked="" type="checkbox"/>				
	Initiate Initial Velocity Migration to Exchange and Teams		<input checked="" type="checkbox"/>			
	Begin SharePoint Migrations		<input checked="" type="checkbox"/>			
	Complete OneDrive Migration		<input checked="" type="checkbox"/>			
	Complete SharePoint Migrations			<input checked="" type="checkbox"/>		

Detailed project description	The purpose of the M365 Implementation is to empower our NCUA employees by delivering the most advanced innovations in management, collaboration, enterprise security, and business analytics, through cloud services. Modernized technology solution to M365 will reduce abundant security risks as well as reduce the footprint to maintain and manage antiquated, i.e. near end-of-life, products specifically Exchange 2010.	
Quarterly project schedule and deliverables	March/2021	Begin SharePoint Migration
	June/2021	Complete OneDrive Migration
	September/2021	
	December/2021	Complete SharePoint Migration – Close to 50 apps over 1TB data
Performance Benchmark for Investment	<ul style="list-style-type: none"> Enhanced capabilities resulting in lower contract support costs, Greater integration from modernized interfaces and software, and Predictable upgrade and vulnerability management paths 	
Project Risks and Mitigation Strategies	Risk	Mitigation
	If Ops and Security teams are not trained to support M365 for the business pilot, the two M365 architects/engineers and Tech Lead will not be able to sustain support for all end-users throughout the business pilot and beyond.	Allow for necessary training and workshops for Tier1-3 Operations as well as Security
	If dedicated resources are assigned to other assignments, then the implementation schedules will be delayed.	Create integrated master schedule with clear process for resource prioritization and scheduling.

Project name	Enterprise Laptop Lease					
Project sponsor	Office of the Chief Information Officer					
Customers/ beneficiaries	Internal: All NCUA External: State Supervisory Authority (SSA)					
Budget	\$ in thousands	2020	2021	2022	2023	2024
	Acquisition	\$650	\$807*	\$2,075	TBD	TBD
	Operations and Maintenance					
	*To lessen the impact on end-users who will be transitioning to M365 and receiving MERIT training in 2021, the NCUA plans to undertake a laptop refresh cycle in 2022.					
Link to NCUA strategic goals	<u>Goal 3: Maximize organizational performance to enable mission success.</u> The Enterprise Laptop Lease project will assist all employees to perform their work more effectively and efficiently, helping NCUA achieve strategic objective 3.2, “deliver an efficient organizational design supported by improved business processes and innovation.” New hardware for NCUA’s employees provides staff with new functionality and NCUA improved security features that enhance user productivity, increased mobile functionality, and lower IT administrative costs due to a decreased need for support services.					
Project Performance	Performance measure	2020	2021	2022	2023	2024
	Purchase NCUA’s existing fleet of laptops near end of Q2 2021	N/A	<input checked="" type="checkbox"/>	N/A	N/A	N/A
Detailed project description	<p>The purpose of the Enterprise Laptop Lease project is to provide the NCUA with a more efficient, mobile friendly, and secure tool to help better perform their jobs at a reasonable cost.</p> <p>The project scope includes: (1) the selection of new, standard laptop configurations; (2) image and compatibility testing; (3) device acquisition; and (4) the managed deployment of the new devices to end users. Out year costs are associated with the required lease payments. All stakeholders who use the NCUA-provided and supported laptops to perform their work will receive the new laptops.</p> <p>By including hardware and OS support into the lease agreement contract, and following a three-to-four year replacement lifecycle, the NCUA will be able to keep pace with changes in workstation and OS technology in a cost-effective manner.</p>					
Quarterly project schedule and deliverables	March/2021					
	June/2021					
	September/2021					
	December/2021	Purchase the entire fleet of laptops				

Performance Benchmark for Investment	The NCUA business requirements will be compared to device performance benchmarks to determine the necessary standard workstation configurations. The NCUA will follow the Office of Management and Budget’s (OMB’s) Category Management Policy guidance pertaining to the acquisition of desktops and laptops as applicable.

Project name	Refresh VOIP Phone System					
Project sponsor	Office of the Chief Information Officer					
Customers/ beneficiaries	Internal: All NCUA External: All Credit Unions					
Budget	\$ in thousands	2020	2021	2022	2023	2024
	Acquisition	\$0	\$950	\$0	\$0	\$0
	Operations and Maintenance	\$0	\$0	\$0	\$0	\$0
Link to NCUA strategic goals	Goal 3: Maximize organizational performance to enable mission success. The Refresh Voice over Internet Protocol (VoIP) Phone System project will enable credit union examiners to perform their work more effectively and efficiently, helping NCUA achieve strategic objective 3.2, "deliver an efficient organizational design supported by improved business processes and innovation" by fully replacing the end of life infrastructure, platform and endpoints to ensure voice communications capabilities which ensure business continuity.					
Project Performance	Performance measure	2020	2021	2022	2023	2024
	Stand up VoIP infrastructure, deploy and configure VoIP platform, and deploy all user and conference room endpoints*		☑			
	*Full project completion is dependent upon the NCUA's return to normal, onsite operation.					
Detailed project description	<p>The purpose of the Refresh Voice over Internet Protocol (VoIP) Phone System project is to fully replace NCUA's telephone system (infrastructure, platform, and endpoints) to ensure voice communications capabilities in order to ensure that business continuity and operations are stable. NCUA VoIP voice components include Session Initiation Protocol (SIP), call control, external and internal call routing, local and long-distance call plans, international calling plans and VoIP desk/soft phone. In addition, NCUA is evaluating how to integrate the VoIP infrastructure with M365, which would give NCUA users a better collaboration experience.</p> <p>Once installed, the new phone system will help ensure business continuity, since the current system is no longer supported by the manufacturer, presenting a high risk of permanent, unanticipated failure.</p>					
Quarterly project schedule and deliverables	March/2021	Acquisition Award				
	June/2021	Begin replacement of VoIP appliances.				
	September/2021					
	December/2021	Complete VoIP replacement of all appliances and close out.				
	Risk		Mitigation			

Project Risks and Mitigation Strategies	If the acquisition timeframe is extended, then the implementation schedule will be delayed.	Provide all required procurement artifacts well in advance of deadlines and manage all activities closely with clear escalation paths for higher level issue resolution.
	If resources are assigned to other assignments, then the implementation schedule will be delayed.	Create integrated master schedule with clear process for resource prioritization and scheduling.
	If onsite access to NCUA offices continues to be restricted due to the COVID-19 pandemic, hardware installation and testing could be delayed.	Utilize local OCIO and NCUA resources to perform physical installation and testing with assistance from Central Office resources.

Project name	Central Office HVAC System Replacement					
Project sponsor	Office of the Chief Financial Officer					
Customers/ beneficiaries	Internal: All NCUA Headquarters Building Occupants External: All NCUA Headquarters Building Visitors					
Budget	\$ in thousands	2020	2021	2022	2023	2024
	Acquisition	\$750	\$500	\$0	\$0	\$0
Link to NCUA strategic goals	<p><u>Goal 3: Maximize organizational performance to enable mission success.</u> The NCUA headquarters Heating, Ventilation, and Air Conditioning (HVAC) system replacement project will improve the operations of the agency's largest building while lowering utility costs by installing more energy-efficient systems, helping achieve strategic objective 3.2, "deliver an efficient organizational design supported by improved business processes and innovation."</p> <p>The current HVAC system is 27 years old, and by replacing it the NCUA will ensure its infrastructure meets all current codes for life safety, accessibility, and security. The new system will result in cost savings, increased energy and operational efficiency, and lower maintenance costs.</p>					
Project Performance	Performance measure	2020	2021	2022	2023	2024
	Energy Consumption (kWh/degree days)	1.8K	1.6K	=<1.55K	=<1.55K	=<1.55K
	System Outages (unscheduled repair visits)	<30	<20	<10	<10	<10
Detailed project description	<p>The project will replace all HVAC systems in the headquarters building to include all cooling towers, air handlers, boilers and HVAC components. The current HVAC system is original to the facility, 27 years old and obsolete; some component parts are no longer available. HVAC systems are the biggest users of electricity in a facility, and the anticipated life span of these system's major components is approximately 20-25 years. The current system is at the end of its usable life and it is not working efficiently. Additionally the maintenance and operating costs have increased considerably and system components are failing more frequently, which are clear signs of decreased reliability.</p> <p>A design and proposal has been completed with the anticipated replacement of the first cooling tower beginning the fall of 2021. Additionally all building HVAC controls are in the process of being replaced. Follow on phases include the replacement of the second cooling tower and boiler system.</p>					
Quarterly project schedule and deliverables	March/2021	Solicit cooling tower vendors.				
	June/2021	Award contract for first cooling tower.				
	September/2021	Begin installation of first cooling tower.				
	December/2021	Complete first cooling tower project.				

Performance Benchmark for Investment	The replacement will improve building efficiency by an estimated 15 percent, which exceeds the 2011 Energy Code that mandates, for existing nonresidential buildings 10,000 square feet and larger: (1) an energy efficiency audit must be performed once every 5 years identifying specific cost-effective measures that would save energy; and (2) the reduction of energy consumption of 5% by the introduction of more efficient systems.	
Project Risks and Mitigation Strategies	Risk	Mitigation
	Schedule. The schedule can be impacted by demand and cooling tower manufacturing lead times.	Cooling tower installation will be planned for the fall or winter months, allowing adequate lead time, to prevent disruption of building operations during spring and summer.
	Ongoing existing system failures. In 2020, the NCUA headquarters building experienced over 20 HVAC isolated system failures due to aging equipment.	HVAC System Replacement plan encompasses replacing parts showing high levels of deterioration first to address the most common failure types

Project name	Austin, TX Office Building Modernization					
Project sponsor	Office of the Chief Financial Officer					
Customers/beneficiaries	Internal: All Austin, TX Building Occupants External: All Austin, TX Building Visitors					
Budget	\$ in thousands	2020	2021	2022	2023	2024
	Acquisition	\$274	\$750	\$250	\$0	\$0
	O&M			\$25	\$25	\$25
Link to NCUA strategic goals	<u>Goal 3: Maximize organizational performance to enable mission success.</u> Repairs to NCUA's Austin, Texas office building will improve operations at the facility and help enable the agency to meet its strategic objective 3.2, "deliver an efficient organizational design supported by improved business processes and innovation." Many of the systems and building elements in the Austin office building have not been adequately maintained or modernized, and this investment will ensure that facility infrastructure meets current building codes for life safety, accessibility, and security. Once the investments have been completed, equipment replaced, and areas modernized, better management of maintenance schedules will result in increased energy and operational efficiency. In addition to addressing deferred maintenance, the NCUA will also use these funds to determine the most effective and cost-efficient approach to meet its current and future space requirements for Southern Region employees.					
Project Performance (note: <input checked="" type="checkbox"/> indicates achievement of performance measure in year)	Performance measure	2020	2021	2022	2023	2024
	Repair Critical items identified in field assessments	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>			
	Repair Potentially Critical items identified in field assessments		<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>	
Detailed project description	The NCUA assessed the condition of its office building in Austin, Texas in 2018 and identified a significant amount of required improvements, such as replacing the fire alarm system, repairing and replacing doors and sensors, and installing fire-proof roofing. In addition, nearly all of the windows in the 30+ year old building required replacement in 2019. The 2020 and 2021 investments will support repairing or replacing all of the items identified as critical and potentially critical, and will modernize the facility generally. These capital improvements are required in order for the facility to continue routine and safe operations, align with the life cycle replacement required for critical infrastructure, and provide a productive workforce environment. Future year budgets will fund additional repair or replacement projects in a priority order.					
Quarterly project schedule and deliverables	March/2021	Repair of critical and potentially critical items, as identified in field assessments.				
	June/2021					
	September/2021					

	December/2021	
Performance Benchmark for Investment	The repairs are expected to improve building efficiency by at least 20%, which will reduce the general cost of ownership for NCUA facilities.	
Project Risks and Mitigation Strategies	Risk	Mitigation
	Facility systems will continue to fail due to lack of maintenance	Depending on priorities, resources may be reprogrammed to repair failing equipment
	Cost. Construction cost increases.	Adjust the scope, schedule, or priority of planned renovation work.
	Schedule. Projects may not be delivered on time.	Contractor support services have been acquired to provide additional construction management and oversight.

Collection of Biometric Data From Aliens Upon Entry to and Departure
From the United States; Proposed Rule

DEPARTMENT OF HOMELAND SECURITY

8 CFR Parts 215 and 235

[Docket No. USCBP–2020–0062]

RIN 1651–AB12

Collection of Biometric Data From Aliens Upon Entry to and Departure From the United States

AGENCY: U.S. Customs and Border Protection, Department of Homeland Security.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Department of Homeland Security (DHS) is required by statute to develop and implement an integrated, automated entry and exit data system to match records, including biographic data and biometrics, of aliens entering and departing the United States. Although the current regulations provide that DHS may require certain aliens to provide biometrics when entering and departing the United States, they only authorize DHS to require certain aliens to provide biometrics upon departure under pilot programs at land ports and at up to 15 airports and seaports. To advance the legal framework for DHS to begin a comprehensive biometric entry-exit system, DHS is proposing to amend the regulations to remove the references to pilot programs and the port limitation to permit collection of biometrics from aliens departing from airports, land ports, seaports, or any other authorized point of departure. In addition, to enable U.S. Customs and Border Protection (CBP) to make the process for verifying the identity of aliens more efficient, accurate, and secure by using facial recognition technology, DHS is proposing to amend the regulations to provide that all aliens may be required to be photographed upon entry and/or departure. U.S. citizens may voluntarily opt out of participating in CBP's biometric verification program. This proposed rule also makes other minor conforming and editorial changes to the regulations.

DATES: Written comments must be received on or before December 21, 2020.

ADDRESSES: Please submit comments, identified by docket number, by the following method:

• *Federal eRulemaking Portal:* <http://www.regulations.gov>. Follow the instructions for submitting comments via docket number USCBP–2020–0062.

Due to COVID–19 related restrictions, CBP has temporarily suspended its

ability to receive public comments by mail.

Instructions: All submissions received must include the agency name and docket number for this rulemaking. All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. For detailed instructions on submitting comments, see the “Public Participation” heading of the **SUPPLEMENTARY INFORMATION** section of this document.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>. Due to COVID–19 related restrictions, CBP has temporarily suspended its on-site public inspection of submitted comments.

FOR FURTHER INFORMATION CONTACT: Michael Hardin, Director, Entry/Exit Policy and Planning, Office of Field Operations, U.S. Customs and Border Protection, by phone at (202) 325–1053 or via email at michael.hardin@cbp.dhs.gov.

I. Public Participation

Interested persons are invited to participate in this rulemaking by submitting written data, views, or arguments on all aspects of the rule. Comments that will provide the most assistance will reference a specific portion of the rule, explain the reason for any recommended change, and include data, information, or authority that supports such recommended change. All submissions received must

include the agency name and docket number for this rulemaking. All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided.

II. Executive Summary

As discussed in Section III (Background), the Department of Homeland Security (DHS) is mandated by statute to develop and implement an integrated, automated entry and exit data system to match records, including biographic data and biometrics,¹ of aliens entering and departing the United States.² In addition, Executive Order 13780, Protecting the Nation from Foreign Terrorist Entry into the United States, published in the **Federal Register** at 82 FR 13209, states that DHS is to expedite the completion and implementation of a biometric entry-exit tracking system. Although DHS, through U.S. Customs and Border Protection (CBP), has been collecting biometric data from certain aliens arriving in the United States since 2004,³ currently there is no comprehensive system in place to collect biometrics from aliens departing the country.

Implementing an integrated biometric entry-exit system that compares

biometric data of aliens collected upon arrival with biometric data collected upon departure is essential for addressing the national security concerns arising from the threat of terrorism, the fraudulent use of legitimate travel documentation, aliens who overstay their authorized period of admission (overstays) or are present in the United States without having been admitted or paroled, and incorrect or incomplete biographic data for travelers.

As recognized by the National Commission on Terrorist Attacks Upon the United States (also known as the 9/11 Commission), combatting terrorism requires a screening system that examines individuals at multiple points within the travel continuum.⁴ An integrated biometric entry-exit system provides an accurate way to verify an individual's identity, and, consequently, can improve security and effectively combat attempts by terrorists who use false travel documents to circumvent border checkpoints. It can also be used to biometrically verify that a person who presents a travel document is the true bearer of that document, which will help prevent visa fraud and the fraudulent use of legitimate travel documentation.

Such a system would also allow DHS to confirm more concretely the identity of aliens seeking entry or admission to the United States and to verify their departure from the United States. By having more accurate border crossing records of aliens, DHS can more effectively identify overstays and aliens who are, or were, present in the United States without having been admitted or paroled and prevent their unlawful reentry into the United States. It will also make it more difficult for imposters to utilize other travelers' credentials. In addition, performing biometric identity verification can help DHS reconcile any errors or incomplete data in a traveler's biographic data.⁵ Ultimately, this provides DHS with more reliable information to verify identity and to strengthen its ability to identify criminals and known or suspected terrorists.

DHS has faced a number of logistical and operational challenges in developing and deploying a biometric exit capability. This is, in part, because U.S. airports generally do not have designated and secure exit areas for conducting outbound inspections, recording travelers' departures, or

comparing biometric information against arrival data. U.S. land ports of entry present even more infrastructure and operational challenges due to geographic limitations (many border crossings involve crossing a bridge or tunnel), and a myriad of transportation alternatives for crossing a land port of entry (e.g., car, bus, rail, foot).

CBP has been testing various options to collect biometrics at entry and departure. These tests are described in detail in Section III.E of this document. The results of these tests and the recent advancement of new technologies, including facial recognition technology, have provided CBP with a model to implement a comprehensive biometric entry-exit solution. CBP has determined that facial recognition technology is currently the best available method for biometric verification, as it is accurate, unobtrusive, and efficient. This technology uses existing advance passenger information along with photographs which have already been provided by travelers to the government for the purpose of facilitating international travel, to create "galleries" of facial image templates to correspond with who is expected to be arriving or departing the United States on a particular flight, voyage, etc. These photographs may be derived from passport applications, visa applications, or interactions with CBP at a prior border inspection. Once the gallery is created based on the advance information, the facial recognition technology compares a template of a live photograph of the traveler to the gallery of facial image templates. Live photographs are taken where there is clear expectation that a person will need to provide documentary evidence of their identity. If there is a facial image match, the traveler's identity has been verified.

In the initial stage of implementation, CBP plans to expand its facial recognition system to commercial air ports of entry. CBP plans to eventually establish a biometric entry-exit system at all air, sea, and land ports of entry.

CBP estimates that a biometric entry-exit system can be fully implemented at all commercial air ports of entry within the next three to five years. For land and sea ports of entry and private aircraft, CBP plans to continue to test and refine biometric exit strategies with the ultimate goal of implementing a comprehensive biometric entry-exit system nationwide.⁶ The proposed

¹ Biographic data includes information specific to an individual traveler such as name, date of birth, and travel document number, which are data elements stored in that traveler's passport, visa, or lawful permanent resident card. A biometric refers to a form of identification based on anatomical, physiological, and behavioral characteristics or other physical attributes unique to a person that can be collected, stored, and used to verify the identity of a person, e.g., fingerprints, photographs, iris, DNA, and voice print.

² Numerous federal statutes require DHS to create an integrated, automated biometric entry and exit system that records the arrival and departure of aliens, compares the biometric data of aliens to verify their identity, and authenticates travel documents presented by such aliens through the comparison of biometrics. These include: Section 2(a) of the Immigration and Naturalization Service Data Management Improvement Act of 2000 (DMIA), Public Law 106-215, 114 Stat. 337; Section 110 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, Public Law 104-828, 110 Stat. 3009-546; Section 205 of the Visa Waiver Permanent Program Act of 2000, Public Law 106-396, 114 Stat. 1637, 1641; Section 414 of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT Act), Public Law 107-56, 115 Stat. 272, 353; Section 302 of the Enhanced Border Security and Visa Entry Reform Act of 2002 (Border Security Act), Public Law 107-173, 116 Stat. 543, 552; Section 7208 of the Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA), Public Law 108-458, 118 Stat. 3638, 3817; Section 711 of the Implementing Recommendations of the 9/11 Commission Act of 2007, Public Law 110-53, 121 Stat. 266, 338; and Section 802 of the Trade Facilitation and Trade Enforcement Act of 2015, Public Law 114-125, 130 Stat. 122, 199 (6 U.S.C. 211(c)(10)).

³ See Section III.B (Current Entry-Exit Process) for further discussion.

⁴ The 9/11 Commission Report at 384-386, available at <http://govinfo.library.unt.edu/911/report/911Report.pdf>. Accessed October 23, 2020. See also Section III.C.

⁵ See Section III.C. for further explanation.

⁶ Private aircraft are non-commercial flights, sometimes referred to as general aviation. See 19 CFR 122.1(h).

regulatory changes are necessary to enable CBP to continue its testing and refinements, and implement permanent programs efficiently once the best solution is identified. As explained below, under the current regulations, CBP can only conduct pilot programs at a limited number of ports of entry at air and sea, and may only collect biometrics from a limited population. If this proposed rule is adopted as a final rule, CBP would continue to expand testing as necessary.

Because CBP is still in the testing phase to determine the best way to implement biometric entry-exit for land and sea ports of entry and private aircraft, CBP has not included, in this proposed rule, an analysis of the costs and benefits of implementing a facial recognition based biometric entry-exit program for land and sea ports of entry and private aircraft. CBP welcomes comments from the public regarding the potential impact of this proposed rule in these environments. Additionally, before CBP moves forward with a large scale implementation at land or sea ports of entry or for private aircraft, the Commissioner of CBP will publish a notice in the **Federal Register** that notifies the public, specifies the details of these plans, and requests public comments.

If CBP determines that the implementation of the specified facial recognition entry-exit program in these environments results in significant delays at ports of entry or exit, CBP will temporarily discontinue these efforts until the average processing time has improved to be under 125 percent of the baseline (manual processing without biometrics).

Although the current regulations authorize DHS to require certain aliens to provide biometrics on entry and departure, those regulations are too limited in scope to advance the legal framework for establishing a comprehensive biometric entry-exit system. The regulations authorize DHS to require biometrics from certain aliens seeking admission to the United States. See section 235.1(f) of title 8 of the Code of Federal Regulations (CFR). They also authorize DHS to require biometrics from certain aliens upon departure from the United States under pilot programs at land ports and up to 15 air and seaports. See 8 CFR 215.8(a). This proposed rule advances a legal framework for DHS collection and use of biometrics from aliens and for CBP's comprehensive biometric entry-exit system by removing the reference to pilot programs and the port limit.

In addition, this proposed rule provides that all aliens may be required

to be photographed upon entry and/or departure. The use of facial recognition technology upon entry and departure will make the process for verifying an alien's identity more efficient and accurate. It will enable CBP to match the traveler's photograph with their vetted biographic information. The ability to biometrically verify the identity and confirm the departure of aliens will improve security and help DHS detect overstays and aliens who are or were present in the United States without having been admitted or paroled, and prevent their illegal reentry. DHS acknowledges that most overstays are of a rather limited duration and that many overstays are accidental in nature. Regardless of the length of time, however, overstaying past the authorized period of admission is unlawful and carries consequences for future visits to the United States. See Section 212 of the Immigration and Nationality Act of 1952, as amended, 8 U.S.C. 1182 (INA 212). Having accurate entry and exit records is a fundamental piece of the U.S. immigration system and detecting overstays supports said system.

Furthermore, DHS data supports the conclusion that some status violators and illegal aliens also have links to terrorism and criminal activity. Ensuring the traveler's photograph matches with their vetted biographic and biometric information, helps CBP prevent visa fraud and the use of fraudulent travel documents, or the use of legitimate travel documents by imposters, and identify criminals and known or suspected terrorists.

Under this proposed rule, CBP will comply with all legal requirements (*e.g.*, the Privacy Act of 1974, Section 208 of the E-Government Act of 2002, and Section 222 of the Homeland Security Act of 2002, as amended) and Departmental and government-wide policies that govern the collection, use, maintenance, and disposition of personally identifiable information, including biometrics. To ensure data minimization of U.S. citizen photographs, once CBP verifies that a traveler is a U.S. citizen, CBP will not retain in its database the photo of that U.S. citizen which is collected as part of CBP's biometric verification program. Rather, photos of U.S. citizens collected as a result of their participation in this program will be discarded within 12 hours of verification of the individual's identity and citizenship.

III. Background

A. Statutory and Executive Authority

Numerous federal statutes require DHS to create an integrated, automated biometric entry and exit system that records the arrival and departure of aliens, compares the biometric data of aliens to verify their identity, and authenticates travel documents presented by such aliens through the comparison of biometrics. The following discussion covers the most relevant statutory and executive authority for the issuance of this rule.

The creation of an automated entry-exit system that integrates electronic alien arrival and departure information was authorized in the Immigration and Naturalization Service Data Management Improvement Act of 2000 (DMIA), Public Law 106–215, 114 Stat. 337, 339 (8 U.S.C. 1365a). The DMIA provides that the entry-exit system should integrate all authorized or required alien arrival and departure data that is maintained in electronic format. The DMIA also provides for DHS to use the entry-exit system to match the available arrival and departure data on aliens. DMIA section 2 (8 U.S.C. 1365a(e)).

In December 2004, Congress enacted the Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA), Public Law 108–458, 118 Stat. 3638, 3817 (8 U.S.C. 1365b). Section 7208 of IRTPA provides for DHS to collect biometric exit data for all categories of aliens who are required to provide biometric entry data. IRTPA requires that the entry and exit data system contain, as an interoperable component, the fully integrated databases and data systems maintained by DHS, the Department of State (DOS), and the Department of Justice (DOJ) that process or contain information on aliens. Section 7208 of IRTPA also requires that the entry and exit data system have current and immediate access to information in the databases of Federal law enforcement agencies and the intelligence community, which is relevant to the determination of whether a visa should be issued and the admissibility or deportability of an alien. Section 7208 of IRTPA provides a complete list of entry-exit system goals, which include, among other things, screening travelers efficiently. Finally, section 7208 of IRTPA requires the Secretary of Homeland Security to develop a plan to accelerate full implementation of an automated biometric entry and exit data system.

In the 2016 Consolidated Appropriations Act, Congress specified that DHS must submit a plan to

implement a biometric entry and exit capability and established a funding mechanism available to the Secretary of Homeland Security, beginning in fiscal year 2017, to develop and implement a biometric entry and exit system. *See* Consolidated Appropriations Act, 2016, Public Law 114–113, 129 Stat. 2242, 2493.

The following statutes also require DHS to take action to create an integrated entry-exit system:

- Section 110 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, Public Law 104–828, 110 Stat. 3009–546;
- Section 205 of the Visa Waiver Permanent Program Act of 2000, Public Law 106–396, 114 Stat. 1637, 1641;
- Section 414 of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT Act), Public Law 107–56, 115 Stat. 272, 353;
- Section 302 of the Enhanced Border Security and Visa Entry Reform Act of 2002 (Border Security Act), Public Law 107–173, 116 Stat. 543, 552;
- Section 711 of the Implementing Recommendations of the 9/11 Commission Act of 2007, Public Law 110–53, 121 Stat. 266, 338;
- Section 802 of the Trade Facilitation and Trade Enforcement Act of 2015, Public Law 114–125, 130 Stat. 122, 199 (6 U.S.C. 211(c)(10)).

On March 6, 2017, the President signed Executive Order 13780, Protecting the Nation from Foreign Terrorist Entry into the United States (82 FR 13209). Section 8 of this Order requires the Secretary of Homeland Security to expedite the completion and implementation of a biometric entry-exit tracking system for “in-scope travelers”⁷ to the United States, as recommended by the National Commission on Terrorist Attacks Upon the United States, and periodically report to the President on DHS’s progress in this regard.

DHS also has broad authority to control alien travel and to inspect aliens under various provisions of the INA. Under this authority, DHS may require aliens to provide biometrics and other relevant identifying information upon entry to, or departure from, the United States. Specifically, DHS may control alien entry and departure and inspect aliens under sections 215(a) and 235 of the INA (8 U.S.C. 1185, 1225). Aliens may be required to provide fingerprints,

photographs, or other biometrics upon arrival in, or departure from, the United States, and select classes of aliens may be required to provide information at any time. *See, e.g.,* INA 214, 215(a), 235(a), 262(a), 263(a), 264(c), (8 U.S.C. 1184, 1185(a), 1225(a), 1302(a), 1303(a), 1304(c)); 8 U.S.C. 1365b. Pursuant to section 215(a) of the INA (8 U.S.C. 1185(a)), and Executive Order No. 13323 of Dec. 30, 2003 (69 FR 241), the Secretary of Homeland Security, with the concurrence of the Secretary of State, has the authority to require aliens to provide biographic, biometric, and other relevant identifying information as they depart the United States. Under section 214 of the INA (8 U.S.C. 1184), DHS may issue regulations, such as those concerning requirements to provide biometrics upon entry or departure, the compliance of which may be a condition of admission and maintenance of status of nonimmigrant aliens while in the United States.

Finally, DHS is authorized to take and consider evidence concerning the privilege of any person to enter, reenter, pass through, or reside in the United States, or concerning any matter which is material or relevant to the enforcement of the INA and the administration of DHS. *See* INA 287(b) (8 U.S.C. 1357(b)).

B. Current Entry-Exit Process

Pursuant to the authorities discussed in the previous section, CBP is responsible for implementing an integrated, automated entry-exit system that matches the biographic data and biometrics of aliens entering and departing the United States. Furthermore, to carry out its mission responsibilities to control the border and to regulate the arrival and departure of both U.S. citizens and aliens, CBP has the authority to confirm the identity of all travelers and verify that they are the authorized bearers of their travel documents.

The entry-exit process as it exists today serves this essential border security mission entrusted to CBP, while also serving the need to facilitate legitimate cross-border travel. The following sections describe the current entry-exit process in more detail and provide background on the relevant laws and obligations that pertain to both individuals who attempt to enter and exit the United States, as well as the commercial air or sea carriers who transport those individuals.

1. APIS Data Collection

The Aviation and Transportation Security Act of 2001, Public Law 107–71, 115 Stat. 597, and the Enhanced

Border Security and Visa Entry Reform Act of 2002, Public Law 107–173, 116 Stat. 543, together mandated the collection of certain biographical manifest information on all passengers and crew members who arrive in or depart from (and, in the case of crew members, overfly) the United States on a commercial aircraft or vessel. The carrier is generally required to transmit the required manifest information electronically to CBP through the Advance Passenger Information System (APIS).⁸ This requirement aligns with global standards developed by the World Customs Organization, International Air Transport Association (IATA), and the International Civil Aviation Organization. According to IATA, over 70 countries now require airlines to send advance passenger information before the flight’s arrival.⁹ In addition, United Nations Security Council Resolution 2178, adopted by the United States, called upon Member States to require airlines provide advance passenger information regarding flights into, out of and through their territories to detect the travel of UN-listed terrorists.¹⁰

APIS information includes, but is not limited to, the following information: Full name, date of birth, citizenship, passport/alien registration card number, travel document type, passport number, expiration date and country of issuance (if passport required), alien registration number, country of residence, passenger name record locator number, and U.S. destination address (when applicable). The carrier also collects and transmits to CBP the traveler’s U.S. destination address (except for U.S. citizens, lawful permanent residents, crew and persons in transit through the United States) and country of residence.

APIS data allows CBP to effectively and efficiently facilitate the entry and departure of legitimate travelers into and from the United States. Using APIS data, CBP officers can access information on individuals with outstanding wants or warrants and information from other government agencies regarding high risk persons; confirm the accuracy of that information by comparison with information obtained from the traveler and from the carriers; and make immediate determinations as to a traveler’s security risk and admissibility and other determinations bearing on CBP’s

⁸ See the APIS regulations at 19 CFR 122.49a, 122.49b, 122.49c, 122.75a, and 122.75b.

⁹ See <https://www.iata.org/whatwedo/passenger/Pages/passenger-data.aspx>. Last Accessed October 23, 2020.

¹⁰ See <https://www.justice.gov/file/344501/download>. Last Accessed October 23, 2020.

⁷ Although the term “in-scope travelers” is not defined, DHS interprets this to mean those travelers who are required to provide biometric information upon entry to the United States.

inspectional and screening responsibilities.

During the entry processing of the traveler, a CBP officer will verify the traveler's documents. *See* Section III.B.2. Through this process, CBP can verify the accuracy of the APIS information the carrier provided to CBP.¹¹ CBP does not receive APIS data for individuals traveling to the United States by foot (pedestrian travelers) or by private vehicle, but it does receive APIS data on a voluntary basis from bus and rail carriers crossing the land border.

2. Current Entry Process

Any traveler who requires a nonimmigrant visa to travel to the United States must apply to the DOS under specific visa categories depending on the purpose of their travel, including those as visitors for business, pleasure, study, and employment-based purposes.¹² DOS also checks every visa applicant's biographic and biometric data (*i.e.*, fingerprints and facial images) against U.S. Government databases for records indicating potential risk factors, including security, criminal, and immigration violations.

Under DHS regulations, upon arrival into the United States, travelers are required to present themselves to CBP for inspection. *See* 8 CFR 235.1. Under the current inspection process, CBP obtains information directly from the traveler via travel documents (*e.g.*, passport) presented and/or verbal communications between a CBP officer and the traveler. As a part of this process, a CBP officer typically takes a physical passport from the traveler and electronically "reads" the passport

using its Machine-Readable Zone (MRZ) to pull up the traveler's biographic data for inspection. In addition, for aliens (except for those exempt from biometric collection under 8 CFR 235.1), CBP collects fingerprints from the traveler to biometrically verify identity by comparing the travelers fingerprints with those previously collected as a part of a visa application, immigration benefits application, or prior inspection by CBP. Once the identity of the traveler is validated in this manner, the CBP officer conducts an interview with the traveler to establish the purpose and intent of travel, and to determine an alien's admissibility.

At some airports or seaports, some of these processes are facilitated for certain travelers through use of Automated Passport Control kiosks, Mobile Passport Control (mobile apps), or Global Entry kiosks. All travelers must still present themselves to a CBP officer to complete the inspection process. In the land environment, biometric collection may be required when an I-94 is issued. CBP does not typically issue an I-94 for Mexican nationals admitted as nonimmigrants for a period of 72 hours to visit within 25 miles of the border or for Canadian citizens traveling to the United States for business or pleasure.¹³

If the travel document is reported as lost or stolen, upon swiping the document to bring up the biographic information of the traveler, CBP systems will alert the CBP officer. In the case of imposters using legitimate documents that have not been reported lost or stolen by their true owners, biometric identifiers (*e.g.*, fingerprints) enable CBP to determine if the traveler is the true bearer of the travel document.

As the regulations currently exempt certain aliens from the collection of biometrics, including those under 14 and over 79, as well as individuals in certain visa classes, CBP does not use fingerprints to confirm the traveler's identity in these cases. For these exempt aliens, as well as those without fingerprints on file (*i.e.*, first time VWP travelers¹⁴), CBP must rely on the interview during the primary inspection process to determine if the traveler is

using a lost or stolen travel document.¹⁵ If the CBP officer has a law enforcement concern, then he or she may conduct law enforcement checks (querying but not retaining biometrics) on those exempt individuals, but not for the purpose of biometrically verifying the traveler's identity.

3. Current Exit Process

APIS requirements also apply to travelers departing the United States. CBP electronically records a traveler's departure by air or sea using the biographic manifest information provided by the commercial air or vessel carrier. Unlike at entry, however, CBP does not routinely inspect travelers departing the United States to confirm that the APIS departure data is accurate or that the traveler is the true bearer of his or her travel document.

Currently, persons departing the United States via a commercial aircraft must present their boarding pass and identification when being screened by the Transportation Security Administration (TSA).¹⁶ Before boarding, travelers must also present their travel documents and boarding passes to the carrier's representative at the gate, who visually reviews the travel documents and validates the boarding pass with the carrier's ticketing system.¹⁷ However, once the traveler has been screened by TSA and is in the secure area of the terminal, travelers generally do not have their photo identification scrutinized again before boarding the aircraft.

CBP uses APIS information along with other law enforcement information and technology to determine whether CBP needs to further inspect outbound travelers. CBP's outbound operations enable it to enforce U.S. laws applicable upon departure from the United States and effectively monitor and control the outbound flow of goods and people.

In the land environment, CBP does not receive APIS data.¹⁸ Persons

¹¹ While APIS data has been shown to be highly accurate, information gaps remain. At entry, CBP Officers can, using biometrics and CBP system information, adjudicate any records with incorrect information. However, due to resource constraints there is generally no CBP officer stationed at departure locations to confirm that the APIS data submitted matches the traveler. Using biometrics upon exit, CBP can close informational gaps caused by inaccurate APIS data without additional personnel.

¹² Under the Visa Waiver Program (VWP), most citizens or nationals of participating countries may travel to the United States for tourism or business for stays of 90 days or less without obtaining a visa. VWP travelers must have a valid Electronic System for Travel Authorization (ESTA) approval prior to travel. Through ESTA, CBP conducts enhanced vetting of VWP applicants in advance of travel to the United States, to assess whether they are eligible to travel under the VWP, or whether they could pose a risk to the United States or the public at large. All ESTA applications are screened against security and law enforcement databases, and CBP automatically refuses authorization to individuals who are found to be ineligible to travel to the United States under the VWP. Similarly, current and valid ESTAs may be revoked if concerns arise through recurrent vetting.

¹³ *See* 8 CFR 235.1(h).

¹⁴ For travelers traveling under the Visa Waiver Program for the first time, CBP will not have fingerprints on file as these individuals are not required to submit biometrics prior to travel. As such, during the primary inspection process, CBP currently collects fingerprints from these travelers. For future travel, CBP will use the fingerprints collected to biometrically verify his or her identity by comparing the fingerprints with those previously collected during the first visit to the United States.

¹⁵ *See* footnote 40 regarding an NPRM published by USCIS proposing to remove the age restrictions on fingerprint collection.

¹⁶ TSA incorporates unpredictable security measures, both seen and unseen, to accomplish its transportation security mission, *see* <https://www.tsa.gov/travel/security-screening>. Last Accessed October 26, 2020.

¹⁷ Pursuant to 19 CFR 122.49a, 122.49b, 122.49c, 122.75a, and 122.75b, the carrier is responsible for comparing the travel document presented by the traveler with the travel document information it is transmitting to CBP in order to ensure that the information is correct, the document appears to be valid for travel purposes, and the traveler is the person to whom the travel document was issued.

¹⁸ While bus and rail carriers are not required to submit APIS data, CBP encourages these carriers to participate in CBP's Voluntary APIS Program, *See* <https://www.cbp.gov/travel/travel-industry-personnel/apis2>. Accessed October 26, 2020.

departing the United States at the land border are also not consistently subject to CBP inspection, as they are upon arrival. As a result, land departures may not be recorded accurately.¹⁹

C. National Security and Immigration Benefits of a Biometric Entry-Exit Program

Currently, CBP has a comprehensive automated biographic information-based system that vets and checks aliens entering and departing the United States. While this information is extremely valuable to CBP in completing its mission, no biographic information-based system, by itself, can definitively verify the identity of persons presenting travel and identity documents. As stated by the 9/11 Commission:

Linking biometric passports to good data systems and decision making is a fundamental goal. No one can hide his or her debt by acquiring a credit card with a slightly different name. Yet today, a terrorist can defeat the link to electronic records by tossing away an old passport and slightly altering the name in the new one.²⁰

Since the 9/11 Commission Report was released, security features in passports have become significantly stronger. Forensic security features in passports have improved, and most countries began to issue electronic passports (e-Passports) around 2005. E-Passports contain an electronic chip embedded in the document that contains the photo of the bearer and the information contained on the passport's data page, such as the name, date of birth, and country of issuance. The International Civil Aviation Organization maintains standards for the issuance of e-Passports and these standards are adopted by most countries around the world.

The increasingly sophisticated features in modern passports have led to the increased use of legitimate documents by imposters posing as the owners of the documents. Twenty years ago, it was far more common to encounter a passport that had been

altered (*i.e.*, changing the name or photo on a document issued legitimately) or manufactured fraudulently. While these cases still occur, the use of e-Passports, combined with sophisticated forensic security features, have made this method of passport fraud prohibitively expensive in most cases. Those seeking to evade detection by DHS or other border or transportation security agencies are turning instead to a relatively cheaper method of fraud—using a non-altered travel document legitimately issued to another person.

This type of fraud is mitigated because carriers are required to ensure that the person presenting the travel document is the person to whom the travel document was issued, pursuant to 19 CFR 122.49a(d), 122.49b(d), 122.75a(d) and 122.75b(d). However, the best tool to combat this fraud is to biometrically verify that a person who presents a travel document is the true bearer of that document. CBP's biometric tests using facial recognition technology support this conclusion. Within three weeks of implementing new facial recognition technology at Washington Dulles International Airport, CBP identified two imposters attempting to enter the United States by using another person's passport.²¹ Since then, CBP has identified five additional imposters, for a total of seven imposters identified in the air environment, including two with genuine U.S. travel documents (passport or passport card), who were using another person's valid travel documents as a basis for seeking entry to the United States.²² In addition, CBP's facial recognition technology has identified at least 138 imposters, including 45 travelers with genuine U.S. travel documents (passport or passport card) attempting to enter the United States using another person's travel documents at the San Luis and Nogales, Arizona land border ports.²³ Several of these imposters identified in the land environment had criminal histories including assault, extortion, kidnapping, and drug smuggling. CBP anticipates that the number of imposters it is able to catch will increase as the program expands. While it is difficult to quantify the number of instances in which such fraud has occurred but not been identified by CBP because facial recognition technology is not broadly

used at present, DHS expects that the implementation of this rule would greatly enhance DHS's ability to identify more of these imposters.

In addition to the benefits this technology can provide on entry, an integrated system, including biometric exit, is also essential for maintaining the integrity of the U.S. immigration system. Under current immigration laws, entering or staying in the United States without official permission from the U.S. government can cause a person to be legally barred from reentry to the United States for a number of years following departure or removal. Pursuant to INA 222(g), a nonimmigrant visa will be void if an alien remains in the United States beyond his or her period of authorized stay. For aliens traveling under the Visa Waiver Program, to remain eligible for the program, aliens must comply with the conditions of admission, including remaining in the U.S. only for the authorized period of stay.²⁴ Depending on the duration of a person's "unlawful presence" in the United States, that alien may be barred from returning to the United States for three or ten years.²⁵ The absence of an effective biometric exit process has enabled aliens who are present in the United States without having been admitted or paroled or who overstayed their authorized period of admission (overstays) to evade immigration laws and avoid the time bars associated with unlawful presence.

Through its limited deployment of biometric exit pilots, CBP has been able to process and document hundreds of aliens who were present in the United States without having been admitted or paroled.²⁶ These cases follow a similar fact pattern. Upon the collection of the traveler's biometrics, the system is unable to generate a match to any photographs of the traveler on record. Further inspection by CBP officers confirms that the traveler was not previously inspected by CBP or DHS, indicating that they entered the United States illegally. In such cases, CBP creates a biometric exit record for this traveler that will be available to other DHS component agencies, such as U.S. Citizenship and Immigration Services (USCIS) and U.S. Immigration and Customs Enforcement (ICE), as well as the Department of State. If the traveler

¹⁹ CBP and the Canada Border Services Agency are exchanging biographic data, travel documents, and other border crossing information collected from individuals traveling between the countries at land border ports of entry. This data exchange allows both governments to expand their situational border awareness so that the record of a traveler's entry into one country can establish a record of exit from the other country. See <https://www.dhs.gov/publication/beyond-border-entryexit-program-phase-ii> and <https://www.dhs.gov/news/2019/07/11/us-and-canada-continue-commitment-securing-our-borders-begin-phase-iii-entryexit>. has no other derogatory information, then CBP allows the traveler to depart, but maintains a record of the encounter which is used to inform future admissibility-related determinations.

As stated in Executive Order 13768, *Enhancing Public Safety in the Interior of the United States*, “interior enforcement of our Nation’s immigration laws is critically important to the national security and public safety of the United States. Many aliens who illegally enter the United States and those who overstay or otherwise violate the terms of their visas present a significant threat to national security and public safety.”²⁷ DHS data supports the conclusion that certain status violators and illegal aliens also have links to terrorism and criminal activity.²⁸

Using biometrics, CBP has apprehended criminal aliens who were present in the United States without having been admitted or paroled. For instance, during a recent outbound operation, CBP’s facial recognition generated a “no-match” result for a passenger resulting in further inspection by a CBP officer which then confirmed that the traveler was an alien who was present in the United States without admission or parole and was wanted for aggravated sexual abuse of a minor. Other examples of aliens identified through DHS’s biometric verification system include previously removed aliens who committed felonies such as armed robbery with a firearm, assault with a deadly weapon, and aggravated assault. Since the inception of its biometric exit pilots, CBP has encountered hundreds of cases with similar fact patterns. Because there is no comprehensive system currently in place to collect biometrics at exit, CBP has no way of knowing precisely how frequently these types of cases occur.

Identifying aliens who overstay their period of authorized admission is best addressed with a biometric exit program. Each year, millions of visitors are admitted to the United States for limited times and purposes. According to DHS’s Entry/Exit Overstay Report for fiscal year 2019,²⁹ 676,422 of nearly 55 million aliens admitted for business or pleasure through air and sea ports of entry that were expected to depart the United States in fiscal year 2019 overstayed their authorized period of

admission. This report likely understates the total number of overstays for fiscal year 2019. This is because, due to data reliability concerns, the Overstay Report only included data for aliens who lawfully entered the United States under nonimmigrant visa categories for temporary visitors for business or pleasure. It did not include aliens who entered the United States under other visa categories.

In addition, biometric exit verification can allow CBP to address errors that sometimes appear in an alien’s biographic data. Although CBP is typically able to successfully vet aliens seeking admission into and departing from the United States based on biographic data, in some cases a biographic check can fail due to errors or incomplete data. Conducting biometric verification at departure can help uncover these issues in an alien’s biographic data and protect the accuracy of recorded border crossings.

During the course of its biometric exit pilots, CBP encountered a number of cases where collecting biometrics from departing travelers revealed errors or incomplete data in a traveler’s biographic record. For instance, on one occasion, CBP’s biometric query of a departing traveler revealed that he was previously convicted for armed robbery with a firearm and had been deported from the United States. The traveler’s biographic data, however, did not reflect this information because of a misspelling on the traveler’s deportation record. On another occasion, CBP’s biometric query revealed that a traveler had been previously removed from the United States under a false identity. Because the traveler had been traveling under the traveler’s true identity, a review of the traveler’s biographic record did not alert the CBP officer to this important factual information.

In each of these cases, the biometric query revealed the missing data from the traveler’s biographic data. By performing a biometric check at departure, CBP can reconcile any errors or incomplete data in the traveler’s biographic data, increasing the level of accuracy of CBP’s border crossing records. Ultimately, this provides CBP with more reliable information to better identify persons of law enforcement or national security concern.

Finally, a comprehensive and integrated biometric entry-exit system serves an important tool in our fight against global terrorism. Since the 9/11 attacks, the United States remains vulnerable to the threat of global terrorism. The 9/11 Commission recognized that combatting terrorism

requires a screening system that examines individuals at multiple points within the travel continuum:

For terrorists, travel documents are as important as weapons. Terrorists must travel clandestinely to meet, train, plan, case targets, and gain access to attack. To them, international targets present great danger, because they must surface to pass through regulated channels, present themselves to border security officials, and attempt to circumvent inspection points . . . each of these checkpoints is a screening, a *chance to establish that these people are who they say they are* and are seeking access for their stated purpose, to intercept identifiable subjects, and to take effective action.

The job of protection is shared among these many defined checkpoints. By taking advantage of them all, we need not depend on any one point in the system to do the whole job. The challenge is to see the common problem across agencies and functions and develop a common framework—an architecture—for an effective screening system.”³⁰

The Under Secretary General for the United Nations Office of Counter-Terrorism said, “Terrorists, including foreign terrorist fighters use a wide variety of techniques to travel to destinations all over the world. With the number of international travelers continuing to increase, it is essential that we develop efficient counter-terrorism measures that facilitate rapid, efficient and secure processing at our borders.”³¹ Manuals prepared by terrorist groups such as the Islamic State, also known as ISIS, explicitly understand the need to forge identity papers, passports, and visas to circumvent border checkpoints and smuggle people across borders. Recognizing terrorism as one of the most serious threats to international peace and security and the need to take immediate action to address the evolving threat environment, the United Nations Security Council adopted a resolution on December 21, 2017, calling on member nations to increase aviation security and to develop and implement systems to collect biometric data to properly identify terrorists.³² The resolution was co-sponsored by 66 countries, including the United States, and passed the Security Council with unanimous support.

Although CBP’s security mission has mainly been focused on identifying

known or suspected terrorists seeking admission to the United States, identifying and intercepting these individuals at departure is critical to effectively combatting terrorism here and abroad. Individuals who seek to inflict harm on the American homeland are not limited to those attempting to enter the United States. Some of these individuals may seek to depart the United States in order to inflict harm to U.S. interests and allies abroad or engage in the terrorist/jihadist movement abroad for training or coordination. For individuals on a terrorist watch list, law enforcement and intelligence agencies may have a need to track that individual's movements and travel. If that individual can depart the country under an alias without detection, then that impacts the ability of these law enforcement and intelligence agencies to operate effectively. Preventing these individuals from leaving the United States, or at minimum, gaining intelligence on their whereabouts, is critical to diminishing a terrorist network's ability to mobilize.

The need for identifying and tracking suspected terrorists departing the United States is further borne out by current research on the movements of such individuals. According to the George Washington University's Program on Extremism, out of the 186 individuals who have been charged in the United States on offenses related to the Islamic State since March 2014, 39% were accused of attempting to travel or successfully traveled abroad.³³

CBP, as the agency entrusted with securing the border, must verify the identity of those entering and departing with as much accuracy as possible, especially individuals linked to terrorism or criminal activity. As discussed in the 2018 National Strategy for Counterterrorism,³⁴ one of the priority actions for the U.S. Government is to enhance detection and disruption of terrorist travel. By collecting and sharing relevant information on terrorist travel and identities, this information can be used for the benefit of the public and private sector to identify and disrupt the movement of terrorists.

CBP's biometric exit program will provide another layer of identity verification and another opportunity to stop these individuals from departing. Despite the agency's resource

constraints at departure, CBP has identified many recent national security cases that resulted from examining foreign nationals departing the United States on international flights. In several of these cases, CBP's outbound examination of the individual revealed his or her connections to terrorist and militia groups abroad. Using a biometric verification system, CBP can update the individual's border crossing record with this information, linking it to his or her biometrics, which provides greater assurance that the government will be able to identify this individual in the event of future encounters.

Identifying overstays and aliens who are present in the United States without admission or parole is essential to maintaining the integrity of the U.S. immigration system and to national security as a whole. Expanding the biometric entry-exit program to create an integrated system will enable CBP to better identify overstays and aliens who are present in the United States without admission or parole. Furthermore, by providing an accurate way to verify an individual's identity, a biometric entry-exit system can effectively combat attempts by foreign national terrorists to circumvent border checkpoints using false identity documents. Establishing such a system is crucial to our efforts to respond to the continuing threat of global terrorism.

D. Biometric Entry-Exit Program History

1. Implementation of US-VISIT

In 2003, DHS established the legacy United States Visitor and Immigrant Status Indicator Technology (US-VISIT) program to develop a system to collect biographic data and biometrics from aliens at U.S. ports of entry.

On January 5, 2004, DHS implemented the first phase of the legacy US-VISIT biometric program by publishing an interim final rule in the **Federal Register** (69 FR 468), which provided that certain aliens seeking admission to the United States through nonimmigrant visas must provide fingerprints, photographs, or other biometrics upon arrival in, or departure from, the United States at air and sea ports of entry. The interim final rule amended 8 CFR 235.1 to authorize DHS to require certain aliens who arrive at designated U.S. air and sea ports of entry to provide biometric data to CBP during the inspection process. DHS designated the air and sea ports of entry where the collection of biometrics from certain aliens upon entry would occur

in a series of notices published in the **Federal Register**.³⁵

The January 5, 2004 interim final rule also added 8 CFR 215.8 to provide that the Secretary, or designee, may establish pilot programs to collect biometric information from certain aliens departing the United States at up to 15 air or sea ports of entry, designated through notice in the **Federal Register**. Pursuant to § 215.8(a)(1), DHS designated the 15 air and sea ports of entry where the collection of biometrics under exit pilot programs would occur in a series of notices published in the **Federal Register**.³⁶

On August 31, 2004, DHS implemented the second phase of the legacy US-VISIT biometric program by publishing an interim final rule in the **Federal Register** (69 FR 53318) expanding the US-VISIT program to include aliens seeking admission under the Visa Waiver Program (VWP)³⁷ and travelers arriving at designated land border ports of entry. DHS designated the land ports of entry at which biometrics would be collected from certain aliens upon entry in two notices published in the **Federal Register**.³⁸ The

³⁵ On January 5, 2004, DHS issued a notice in the **Federal Register** (69 FR 482) designating 15 airports and 14 seaports for the collection of biometrics from aliens upon entry. On August 20, 2004, DHS published a notice in the **Federal Register** (69 FR 51695) identifying six new air and sea ports of entry for inclusion in the legacy US-VISIT program and removing two ports of entry that were inadvertently included in the legacy US-VISIT program in the January 5, 2004 notice.

³⁶ On January 5, 2004, DHS issued a notice in the **Federal Register** (69 FR 482) identifying one airport and one seaport as ports designated for the collection of biometrics from aliens departing the United States under exit pilot programs. On August 3, 2004, DHS published a notice in the **Federal Register** (69 FR 46556) designating 13 additional ports for the collection of biometrics from aliens departing the United States under exit pilot programs. On August 20, 2004, DHS published a notice in the **Federal Register** (69 FR 51695) replacing two ports of entry inadvertently included in the exit pilot programs in the August 3, 2004 notice with two airports to maintain the full number of 15 exit pilot programs.

³⁷ Pursuant to INA 217 (8 U.S.C. 1187), the Secretary of Homeland Security, in consultation with the Secretary of State, may designate certain countries as VWP program countries if certain requirements are met. Citizens and eligible nationals of VWP countries may apply for admission to the United States at a U.S. port of entry as nonimmigrant aliens for a period of 90 days or less for business or pleasure without first obtaining a nonimmigrant visa, provided that they are otherwise eligible for admission under applicable statutory and regulatory requirements. The list of countries which currently are eligible to participate in VWP is set forth in 8 CFR 217.2(a).

³⁸ On November 9, 2004, DHS published a notice in the **Federal Register** (69 FR 64964) identifying the 50 most trafficked land border ports of entry where biometric data would be collected from certain aliens upon entry. On September 14, 2005, DHS published a notice in the **Federal Register** (70

³³ See GW Extremism Tracker, The George Washington University, <https://extremism.gwu.edu/sites/g/files/zaxdzs2191/f/jun19%20Tracker.pdf> (last accessed October 26, 2020).

³⁴ See <https://www.dni.gov/index.php/nctc-newsroom/item/1911-white-house-releases-national-strategy-for-counterterrorism>. Accessed October 26, 2020.

August 31, 2004 interim final rule also amended § 215.8 to authorize DHS to establish pilot programs to collect biometrics from aliens upon departure at designated land border ports of entry, in addition to the 15 designated air or sea ports at which DHS was authorized to conduct biometric exit pilot programs. *See* 8 CFR 215.8(a)(1).

On December 19, 2008, DHS published a final rule in the **Federal Register** (73 FR 77473) expanding the population of aliens subject to legacy US-VISIT to nearly all aliens, including lawful permanent residents.³⁹ The rule also finalized the August 31, 2004 interim final rule without change.

As a result of the above rules and notices, DHS now collects biometrics from aliens upon entry, with certain exemptions provided in the regulations, at all air, sea and land ports of entry. The following categories of aliens currently are exempt from the requirements under 8 CFR 215.8 and 235.1 to provide biometrics upon arrival to, and departure from, the United States at a U.S. port of entry:

- Aliens under the age of 14 and over the age of 79;⁴⁰
- Aliens admitted on an A-1, A-2, C-3 (except for attendants, servants, or personal employees of accredited officials), G-1, G-2, G-3, G-4, NATO-1, NATO-2, NATO-3, NATO-4, NATO-5, or NATO-6 visa;
- Certain Taiwan officials who hold E-1 visas and members of their immediate families who hold E-1 visas unless the Secretary of State and the Secretary of Homeland Security jointly determine that a class of such aliens should be subject to the requirements; and
- Canadian citizens under INA 101(a)(15)(B) (8 U.S.C. 1011(a)(15)(B)) who are not otherwise required to present a visa or be issued Form I-94 or Form I-95 for admission or parole into the United States.⁴¹

See 8 CFR 235.1(f)(1)(ii), (iv); 8 CFR 215.8(a)(1)–(2). In addition, the Secretary of State and the Secretary of Homeland Security may jointly exempt classes of aliens from this requirement. The Secretaries of State and Homeland Security, in consultation with the directors of the relevant intelligence

agencies, also may exempt any individual from this requirement. *See* 8 U.S.C. 1365b; 8 CFR 235.1(f)(1)(iv)(C)–(D); 8 CFR 215.8(a)(2)(iii)–(iv).

2. Exit Pilot Programs and the Transfer of Entry and Exit Operations to CBP

While DHS successfully implemented biometric entry capability at all ports of entry, establishing a biometric exit solution posed greater challenges. From January 2004 through May 2007, DHS conducted a series of exit pilot programs at 12 airports and 2 cruise ports across the United States.⁴² These pilots were conducted pursuant to 8 CFR 215.8.⁴³ Under these exit pilot programs, DHS evaluated various technologies and processes to collect biometric data from aliens at the time of departure. DHS found that biometrics provide a significant enhancement to the existing ability to match arrival and departure records as biometrics provides greater assurance of identity verification. In addition, DHS found that each of the various technologies used to collect biometric exit records worked and that compliance with biometric exit procedures improved when the process was convenient for travelers. In a report dated June 28, 2007, the Government Accountability Office stated that “in particular, on average only about 24 percent of those travelers subject to US-VISIT actually complied with the exit processing steps. The evaluation report attributed this, in part, to the fact that compliance during the pilot was voluntary, and that to achieve the desired compliance rate, the exit solution would need an enforcement mechanism.”⁴⁴

However, DHS also found that the collection process used during those pilots was inadequate and unsuitable for a nationwide deployment because it required significant DHS resources and also depended upon the facility operator, in this case airports, to provide adequate space for the collection of biometric data. The pilots beginning in

2004 used kiosks placed between the security checkpoint and airline gates that would collect a traveler’s fingerprint biometrics. The traveler had the responsibility to find and use the devices, with varying degrees of support from the airports where the pilots were deployed. DHS also hired contract teams to assist travelers in finding and using the kiosks. Although the specific fingerprint technology collection generally worked as intended when it was utilized, the overall compliance rate was low because travelers often departed without providing their biometrics.

DHS concluded from these pilots that it was generally inefficient and impractical to introduce entirely new government processes into an existing and familiar traveler flow, particularly in the air environment. Unlike many airports in Europe and around the world, United States transportation infrastructure was not built with departure control in mind, and does not have existing space within its airports to biometrically process departing travelers. Because DHS was required to secure space within the airports from the private sector, and because space within airports is limited and valuable from a commercial perspective, DHS’s biometric exit pilots tended to operate in relatively inconvenient locations, which contributed to low compliance rates. Overall, DHS concluded that a biometric collection process that fit, to the extent practicable, within the existing traveler flow was necessary for successful implementation. The facial recognition technology required to reliably implement biometric exit processes into existing traveler flows has not been available until recently. Overall, DHS’s conclusion is that the process of collecting biometric exit records should be integrated into the existing departure process.

From May through June 2009, DHS operated two biometric air exit pilots as required by the Consolidated Security, Disaster Assistance, and Continuing Appropriations Act, 2009, Public Law 110–329, 122 Stat. 3574, 3669–70. DHS announced the implementation of these biometric air exit pilots at Atlanta, Georgia (Hartsfield-Jackson Atlanta International Airport), and Detroit, Michigan (Detroit Metropolitan Wayne County Airport), by notice published in the **Federal Register**.⁴⁵ The pilots tested the collection of biometric exit data in two scenarios: First, the collection of biometric information consisting of one or more electronic fingerprints by CBP at the departure gate using a hand-held

FR 54398) identifying additional land ports of entry in which aliens would be enrolled in legacy US-VISIT upon entry into the United States.

³⁹ *See* INA 101(a)(3). The term “alien” means any person not a citizen or national of the United States.

⁴⁰ On September 11, 2020 USCIS published an NPRM proposing to remove the age exemptions in 8 CFR 215.8 and 8 CFR 235.1 regarding biometrics collection at entry and exit. *See*, 85 FR 56338.

⁴¹ This category of exemptions covers Canadian citizens traveling on a B1 or B2 visa.

⁴² The ports of entry included in the pilot were: Baltimore/Washington International Thurgood Marshall Airport; Chicago O’Hare International Airport; Denver International Airport; Dallas Fort Worth International Airport; Miami Cruise Terminal; San Juan Luis Munoz Marin International Airport; Detroit Metropolitan Wayne County Airport (McNamara Terminal); Newark Liberty International Airport; San Francisco International Airport; Los Angeles Cruise Terminal; Hartsfield-Jackson Atlanta International Airport; Philadelphia International Airport; Ft. Lauderdale/Hollywood International Airport; and Seattle-Tacoma International Airport.

⁴³ *See* footnote 36.

⁴⁴ *See* U.S. Government Accountability Office, “Prospects for Biometric US-VISIT Exit Capability Remain Unclear” (June 28, 2007), available at <https://www.gao.gov/assets/120/117187.pdf>.

⁴⁵ 74 FR 26721 (June 3, 2009).

mobile device or other portable device; and second, biometric information consisting of one or more electronic fingerprints collected by TSA at the TSA security checkpoint using a mobile device. Although the technology worked as expected and DHS successfully captured the biometric data, DHS concluded that the use of mobile and portable devices to capture electronic fingerprints would be extremely resource-intensive and costly to implement and maintain on a larger scale.

Beginning in December 2009, CBP conducted the Temporary Worker Visa Exit Program Pilot in San Luis, Arizona and Douglas, Arizona, under which aliens admitted on certain temporary worker visas were required to depart from designated land ports of entry and submit certain biographical and biometric information at one of the outdoor kiosks established for this purpose.⁴⁶ In its evaluation of the pilot, CBP identified several issues, including difficulties participants experienced in understanding the requirements and using the kiosks, resource and staffing burdens, unreliable kiosk operability due to the harsh desert climate, and infrastructure challenges. As a result, CBP discontinued the Temporary Worker Visa Exit Program Pilot in September 2011.⁴⁷

In 2013, pursuant to the Consolidated and Further Continuing Appropriations Act, 2013, Public Law 113–6, 127 Stat. 198, Congress transferred US-VISIT's entry-exit policy and operations, including responsibility for implementing a biometric exit program, to CBP; US-VISIT's biometric identity management functions to the newly created Office of Biometric Identity Management (OBIM) within DHS's National Protection and Programs Directorate (now Cybersecurity and

Infrastructure Security Agency⁴⁸); and US-VISIT's overstay analysis mission to ICE within DHS.

E. Recent Developments in the Biometric Entry-Exit System

In 2015 and 2016, CBP conducted the following four biometric tests, three at airports and one at a land port: (1) Biometric Exit Mobile Air Test (BE-Mobile); (2) 1 to 1 Facial Comparison Project; (3) Southwest Border Pedestrian Exit Field Test; and (4) Departure Information Systems Test. In October 2017, CBP began testing a streamlined entry process using facial recognition technology known as “Simplified Arrival.” Since 2017, CBP has partnered with a number of airlines and airport authorities to test a facial-recognition exit process for international flights at certain locations. In 2018, CBP began conducting biometric pilot programs at the land border in Anzalduas, Texas and Nogales and San Luis, Arizona. Summaries of the tests, lessons learned, and conclusions are set forth below.

1. Biometric Exit Mobile Experiment (BE-Mobile)

In the summer of 2015, CBP began deploying the BE-Mobile pilot at the 10 highest volume international airports in the United States.⁴⁹ Under this pilot, CBP officers stationed at the passenger loading bridges of selected flights used a handheld mobile device to scan fingerprints and passports of certain aliens at the time of their departure from the United States at designated airports. The biometric and biographic data collected by the BE-Mobile device was matched against data such as departures and arrivals in the United States, criminal histories, and lawful immigration status. The goal of the BE-Mobile pilot was to evaluate the viability of using handheld mobile technology to collect exit data from a sample population on randomly selected flights within a specified airport, as well as to evaluate the viability of implementing biometric exit in conjunction with CBP's outbound enforcement operations.⁵⁰

In its evaluation of the pilot, CBP concluded that while the handheld mobile technology can effectively capture biometric data and match that data against DHS databases, the handheld devices required too much

time and manpower to be a biometric exit solution on all flights departing the United States. However, CBP concluded that BE-Mobile does provide some benefits when used to assist with outbound enforcement operations. For instance, BE-Mobile allows officers to identify travelers who have suspicious travel histories or other derogatory information for further investigation by searching databases that detail individuals' travel patterns, visa status, and criminal records. Similarly, BE-Mobile can identify travelers exiting the country who do not have corresponding entry information, indicating that they potentially entered the country without having been admitted or paroled. Finally, BE-Mobile may identify individuals who have overstayed their period of admission, allowing CBP to collect more accurate overstay information.

CBP is currently utilizing the same technology tested in the BE-Mobile pilot at the original 10 airports as an enforcement tool for use by CBP officers. Since 2017, CBP has expanded the use of the BE-Mobile technology as an enforcement tool to additional airports and, more recently, land ports.⁵¹ BE-Mobile technology also serves as an additional identity verification tool for CBP's biometric pilots using facial recognition technology in the air and land environments, and CBP is considering it for use in the sea environment, as well.

2. 1 to 1 Facial Comparison Project

From March to May 2015, CBP tested the 1 to 1 Facial Comparison Project at Dulles International Airport.⁵² This pilot was intended to assist CBP officers in matching travelers to their passport photo. After the conclusion of the pilot program, the technology was deployed for use at both Dulles International Airport and John F. Kennedy International Airport for U.S. citizens and first-time VWP travelers. The technology compares a photograph taken of the traveler by a CBP officer upon entry to the photograph stored on the traveler's electronic passport to assess whether the individual applying for entry into the United States is the

⁴⁶ In December 2008, DHS promulgated a final rule establishing the Temporary Worker Visa Exit Program under 8 CFR 215.9, to be started on a pilot basis. See 73 FR 76891 (Dec. 18, 2008) (final rule establishing the Temporary Worker Visa Exit Program at 8 CFR 215.9 for aliens admitted on an H–2A visa) and 73 FR 78104 (Dec. 19, 2008) (final rule amending 8 CFR 215.9 to include aliens admitted on an H–2B visas). CBP, through notices published in the *Federal Register*, designated aliens admitted under H–2A and H–2B visas who entered the United States at either the port of San Luis, Arizona or the port of Douglas, Arizona as participants in the Temporary Worker Visa Exit Program Pilot. See 73 FR 77049 (Dec. 18, 2008) (notice designating H–2A temporary workers and the ports of entry), and 73 FR 77817 (Dec. 19, 2008) (notice designating H–2B temporary workers); see also 74 FR 42909 (Aug. 25, 2009) (notice announcing the postponement of the pilot until December 8, 2009).

⁴⁷ See 76 FR 60518 (Sept. 21, 2011).

⁴⁸ As a result of the Cybersecurity and Infrastructure Agency Act of 2018, OBIM was transferred to the DHS Management Directorate.

⁴⁹ See 80 FR 44983 (July 28, 2015).

⁵⁰ CBP conducts traveler targeting operations to vet inbound and outbound travelers from commercial airlines to identify potential high-risk individuals, such as terrorists.

⁵² See <https://www.dhs.gov/publication/facial-recognition-air-entry-pilot>; https://www.cbp.gov/sites/default/files/documents/502050_1to1%20Face%20ePassport_Fact%20Sheet%208.5x11_OFO_05222015_FINAL_Online.pdf. Accessed October 26, 2020.

same person to whom the passport was legally issued.⁵³

Although the capability was tested at the time of entry to the United States, the information gathered through the pilot was intended to also inform the acquisition of a biometric exit capability. The results of the pilot showed that biometric facial matching can increase the confidence with which CBP officers verify individuals' identities without a negative impact to port of entry operations and traveler wait times. Further, the results of this pilot aided CBP in determining the appropriate technical specifications needed for the air travel environment, which CBP could then test at exit by air.

3. Southwest Border Pedestrian Exit Field Test

From February to May 2016, CBP conducted a pilot program to test facial and iris scanning technology at the Otay Mesa port of entry south of San Diego, California.⁵⁴ The purpose of the test was to determine if biometric technology could be effectively used in an outdoor land environment without significant impact to operations and wait times, and to determine if collecting biometrics in conjunction with biographic data upon exit would assist CBP in identifying individuals who have overstayed their period of admission.

Under this pilot program, CBP collected biographic data from all travelers departing the United States at the Otay Mesa port of entry, and biometrics (facial images and/or iris scans) from all aliens, except for those exempt pursuant to 8 CFR 215.8(a)(2) and 235.1(f)(1)(iv), entering and departing the Otay Mesa port of entry on foot. Before departing, travelers scanned their passports at a radio frequency identification-enabled kiosk. One collection lane was equipped with facial and iris scanning equipment that required the traveler to pause for biometric data collection. Another lane was equipped with technology that collected facial and iris images while the traveler continued through the lane without pausing.

The pedestrian exit field test allowed CBP to test the capability of biometrics other than fingerprints in an outdoor environment. The pilot also provided information about the physical

challenges to implementing face and iris scanning technology at land ports of entry. The successful implementation of a biometric capture system requires infrastructure tailored to mitigate both environmental factors that degrade image quality and human factors that inhibit travelers from properly interacting with the biometric capture system. Environmental factors included issues such as light, temperature, and items within the biometric camera field of view. Certain human factors, such as traveler attire and attentiveness, did impact technology effectiveness. The test highlighted the need for biometric scanning equipment to be located inside for protection from the elements, while recognizing that some land ports of entry do not have sufficient space for such infrastructure.

4. Departure Information Systems Test

In June 2016, in partnership with an airline, CBP deployed the Departure Information Systems Test pilot at Atlanta's Hartsfield-Jackson International Airport.⁵⁵ The goal of the pilot was to evaluate the effectiveness of biometric facial recognition matching of a real-time photograph of an individual to a gallery of photographs stored in a database. The field trial was designed to use existing CBP systems and to leverage data already provided to CBP by the traveler and airlines for matching purposes. Additionally, the field trial was designed to support existing business practices of airlines and fit within existing infrastructure at U.S. airports.

During the pilot, photographs of travelers taken during boarding were compared to photographs taken previously (as part of a U.S. passport application, a U.S. visa application, or through DHS encounters such as admission processing) that had been stored in the gallery. The names on the outbound flight manifest were used to populate the gallery with potential matches to the travelers boarding the flight. The device used to capture the photographs upon departure consisted of a camera, document reader, and display tablet. The display tablet instructed travelers to present their boarding pass to the reader as they approached the unit. Once the boarding pass was scanned, a camera captured a photograph of the traveler's face. After the system matched the photograph to the photographs in the gallery, an

indicator light appeared and the traveler was instructed to proceed to board the plane. In the event the system did not produce a match, a CBP officer could attempt to verify the traveler's identity through in person manual review and use of other available information.

For the pilot, CBP deployed the capability at one gate and for one daily nonstop flight from Atlanta to Tokyo. Today, this technology, now operating as the Traveler Verification Service (TVS), is recording biometric exit records for a limited number of daily international flights at a number of international airports.⁵⁶

5. Land Border Biometric Tests

In 2018, CBP began testing a number of different processes to develop a biometric entry-exit system to track aliens entering and departing the United States at the land border. For example, in September 2018, CBP began a technical demonstration at the San Luis port of entry in Arizona, testing the collection of photographs from pedestrian travelers entering the United States.⁵⁷ Under this technical demonstration, CBP uses a facial recognition system to collect photographs of in-scope travelers entering the United States. CBP expanded this pilot to Nogales, Arizona in October 2018 and to Brownsville, Texas; Progresso, Texas; and Blaine, Washington in 2020.

CBP has also explored using facial recognition technology in the vehicle environment. From August 2018 to February 2019, CBP conducted the Vehicle Face demonstration at Anzalduas, Texas, which captured facial images of vehicle occupants "at speed" under 20 mph and biometrically matched the new images against a TVS gallery of recent travelers.⁵⁸ For this demonstration, CBP installed several cameras in inbound lanes just prior to the existing vehicle lane infrastructure and in outbound lanes just beyond the license plate reader vehicle footprint. Vehicles proceeded through the respective inbound and outbound lanes as normal, with CBP officers processing vehicle occupants at the primary inbound booths using existing CBP software applications and technology. This process captured the biographic data of the vehicle occupants, associated the travelers with the vehicle, and created an exit crossing record for the

⁵³ The 1 to 1 Facial Comparison Project focused on U.S. citizens and first-time Visa Waiver Program travelers because fingerprint biometrics are already available to verify other travelers upon admission to the United States.

⁵⁴ See 80 FR 70241 (Nov. 31, 2015) and PIA, available at <https://www.dhs.gov/sites/default/files/publications/privacy-pia-cbp-sborderpedestrianexit-november2015.pdf>. Accessed October 26, 2020.

⁵⁸ See 83 FR 56862 (Nov. 14, 2018).

occupants. The identification numbers assigned to the exit crossing records were associated with scene and facial images captured during this demonstration so that analysts could compare the biographic crossing data with the facial images and biometric matching. This demonstration did not impact the current experience of the travelers or officers, except during normal outbound operations in which CBP officers stopped vehicles and processed the occupants using a TECS System application.

After an evaluation of these and any other pilot programs, CBP plans to implement a long-term biometric exit solution at the land border that would address the unique operational and infrastructure challenges that exist in that environment.

6. Simplified Arrival

In October 2017, CBP began testing Simplified Arrival, a streamlined entry process using facial recognition technology at Atlanta's Hartsfield-Jackson International Airport. Under Simplified Arrival, CBP uses facial recognition technology to biometrically verify a traveler's identity. Under this process, CBP uses APIS manifest data to retrieve existing traveler photographs from government databases, including CBP's own data systems, passport and visa databases of the Department of State, and other DHS holdings such as DHS's Automated Biometric Identification System (IDENT), to build a photo gallery of travelers who are expected to arrive in the United States. At the inspection booth, CBP captures a "live image" of the traveler and matches it to a photograph in the pre-assembled gallery. Both the live image and the gallery photograph are displayed to the CBP officer along with the traveler's biographic data. The CBP officer then conducts an interview with the traveler to validate the results and complete the inspection process.⁵⁹

In addition to Atlanta, CBP is now testing Simplified Arrival for arriving travelers on international flights at locations including, Miami International Airport, Orlando International Airport, George Bush Intercontinental Airport, Houston Hobby, San Antonio International Airport, San Francisco International Airport, Dallas—Fort Worth International Airport, Norman Y. Mineta San Jose International Airport, Fort Lauderdale-Hollywood International Airport, Washington

Dulles International Airport, McCarran International Airport, Detroit Metropolitan Airport, San Diego International Airport, John F. Kennedy International Airport, Newark International Airport, and Los Angeles International Airport. CBP is also testing Simplified Arrival for arriving travelers processed through the preclearance facilities at locations including Queen Beatrix International Airport, Aruba; Shannon Airport and Dublin Airports, Ireland; and Abu Dhabi International Airport, United Arab Emirates.⁶⁰

7. Public-Private Partnerships

Since June 2017, certain airlines, such as JetBlue Airways, Delta Air Lines, and British Airways, have volunteered to use their own technology in partnership with CBP to test a facial recognition-based boarding process for international flights that would facilitate identity verification, and also assist CBP in meeting its congressional mandate to implement biometric exit. In compliance with CBP's business requirements, these stakeholders deployed their own camera operators and camera technology meeting CBP's technical specifications to capture photographs of travelers boarding certain international flights via a facial biometric capture device. The photographs are sent to CBP's TVS via a secure, encrypted connection, which will indicate to the airline if each traveler's identity can be verified.

The technology has the potential to speed up the departure for airlines and travelers, as it enables identity verification without manual verification of the boarding pass and scanning of the passport. This new process can assist carriers to more efficiently and accurately comply with their obligation to ensure that the person presenting the travel document is the person to whom the travel document was issued, pursuant to 19 CFR 122.49a(d), 122.49b(d), 122.75a(d) and 122.75b(d). In some of these tests, the biometric verification process has replaced the use of boarding passes. Eventually, participating airlines may choose to eliminate boarding passes entirely or use the technology to speed up other processes.

Participating airlines, in partnership with CBP, are testing this facial recognition-based boarding process on select international flights at locations including: Atlanta Hartsfield-Jackson International Airport, Boston Logan International Airport, Chicago O'Hare

International Airport, Dallas/Fort Worth International Airport, Detroit Metropolitan Wayne County Airport, Fort Lauderdale—Hollywood International Airport, William P. Hobby Airport, George Bush Intercontinental Airport, McCarran International Airport, Miami International Airport, Minneapolis-St. Paul International Airport, Newark Liberty International Airport, John F. Kennedy International Airport (New York), Orlando International Airport, Portland International Airport, Salt Lake City International Airport, San Antonio International Airport, San Francisco International Airport, Washington Dulles International Airport, and Ronald Reagan Washington National Airport.⁶¹

F. Proposed Facial Recognition Based Entry-Exit Process

Based on CBP's extensive biometric tests discussed above, DHS has determined that facial recognition technology can provide a successful foundation for a biometric exit solution, as well as an improved and more streamlined biometric entry process. The following sections will discuss CBP's proposed facial recognition based entry-exit process. This process will be implemented first at commercial air ports of entry. Full implementation at for land and sea ports of entry will follow after CBP has tested and refined its biometric exit strategies in those environments.

Some of the facial recognition based entry and exit processes described below may already be implemented in limited form at entry or under biometric exit pilot programs. For such existing processes, CBP adheres to all applicable laws or regulations that govern its collection of biometrics. If this proposed rule is implemented, CBP will be able to collect facial images under the processes described here from all aliens arriving and departing the United States.

1. Benefits of a Facial Recognition Based Process

Using facial recognition technology, CBP has developed a model for moving forward with implementing a biometric exit solution, starting at airports. As fingerprint scans have proven to be an effective law enforcement tool, CBP will continue to capture fingerprints as the initial identification biometric. CBP may elect not to collect fingerprints for subsequent identity verification where CBP has implemented facial

⁵⁹ Currently, U.S. citizens and aliens exempt under 8 CFR 235.1(f) may voluntarily participate in Simplified Arrival or instead undergo the normal inspection process.

⁶⁰ See <https://www.biometrics.cbp.gov/air> for an up to date list of locations where CBP is testing Simplified Arrival.

⁶¹ See <https://www.biometrics.cbp.gov/air> for an up to date list of locations where CBP is testing facial recognition on international flights departing from the United States.

recognition. Fingerprint scans can be used for most aliens should facial recognition fail to properly identify the traveler.

CBP has determined that facial recognition technology is currently the best available method for biometric verification as it is efficient, accurate, and unobtrusive. The key benefit of a biometric entry-exit system based on facial recognition is its efficiency; it can leverage information that all travelers provide to the U.S. government as a condition for international travel. Photographs of all travelers are readily available to DHS through sources such as previous encounter photos and visa databases, eliminating the need to collect new information and add another layer to travel process. In addition, a system that matches a traveler's facial biometrics against a limited number of stored photographs, rather than an entire government database of photographs, significantly reduces the amount of time necessary to verify a traveler's identity. As a result, CBP is able to verify the identity of arriving or departing travelers with a high degree of efficiency while facilitating travel for the public.

Biometric verification using facial recognition is highly accurate. As of September 2018, CBP's facial recognition technology was able to match travelers at a rate of greater than 97 percent. If the system fails to match a traveler, then a manual review of the traveler's document is performed, just as the process is conducted today. Additionally, CBP has a rigorous process in place to review data and metrics associated with biometric facial recognition matching performance. CBP is working with DHS Science and Technology (S&T) Directorate to continue to develop and refine methods to analyze any differences that are discovered in matching performance (e.g., age,⁶² gender, and citizenship) based on the available data collected through biometric entry-exit operations. CBP is also seeking the expertise of the National Institute of Standards and Technology (NIST) in evaluating the performance and core algorithm capability of face recognition algorithms. CBP's presently available data demonstrates marginal differences in match rate between age, gender, or

citizenship.⁶³ CBP will continue to work with its partners to develop methods to address any performance variations within the system.

As an added benefit, a biometric entry-exit system based on facial recognition is relatively unobtrusive. It relies on current traveler behaviors and expectations; most travelers are familiar with cameras and do not need to learn how to have a photograph taken. Finally, the biometric capture device can be installed at an airline departure gate without any necessary changes to existing airport infrastructure.

To fully implement an effective biometric entry-exit system in a secure and comprehensive manner, and to avoid another layer in the travel process, DHS has concluded that it may be necessary to collect photographs from all aliens upon entry and/or departure from the United States.⁶⁴ In this proposed rule, DHS proposes to amend the regulations to provide that all aliens may be required to be photographed upon entry and/or departure. Failure to comply with a requirement to be photographed upon entry and/or departure may be found to constitute a violation of the terms of the alien's admission, parole, or other immigration status and, where the failure to comply is upon entry, may result in a determination that the alien is inadmissible under section 212(a) of the Immigration and Nationality Act or any other law.⁶⁵

By collecting photographs from all aliens departing the United States, DHS can more effectively verify their identity and confirm their departure. This collection also helps identify visa overstays and aliens who are present in the United States without having been admitted or paroled, and prevent their illegal reentry into the United States, as well as prevent visa fraud and the use of fraudulent travel documents. It also helps DHS identify known or suspected

terrorists or criminals traveling using someone else's documents, before they depart the country. By confirming that the traveler is not the true bearer of a presented travel document, the traveler would then be subject to further inspection, first by the airline and also in some circumstances by CBP officers, which may include fingerprinting and/or an interview. Through this additional inspection, CBP would be better able to identify known criminals and other threats to border security.

The collection of photographs from all aliens avoids the need to have different processes at the point of departure for alien travelers who are currently subject to the collection of biometrics and those who are not. Collecting photographs from all alien travelers aligns with international passport standards, which require a photograph of the traveler on the document regardless of age or classification. Having multiple processes for different alien travelers at the departure gate would add another layer to the travel process and place significant burdens on carriers, airports and other port facilities, and the traveling public. Also, at certain locations, such as at an international departure gate at an airport, there may not be sufficient space for multiple lines of alien travelers.

DHS has also determined that the collection of photographs from all aliens at entry is necessary, without regard to age or visa classification. Based on NIST's research, CBP has found that effectiveness of a biometric entry-exit system based on facial recognition improves when more sources of biometrics are available to match against.⁶⁶ A photograph collected from a traveler upon entry to the United States would provide DHS with another data point to match against a photograph collected upon departure, in addition to the photographs already available to DHS through sources such as previous encounter photos and visa databases. In addition to improving the system's matching performance, establishing a requirement that all aliens may be photographed without exemption enables DHS to biometrically verify the identity of all alien travelers traveling to and from the United States, thereby helping prevent visa fraud and the fraudulent use of legitimate travel documentation.

Collecting photographs from all aliens at entry also enables CBP to implement

⁶³ Based on June 2017–May 2018 CBP Air Exit data from ATL, HOU, IAD, IAH, JFK, LAS, LAX, MIA, ORD, SEA, SFO. Please see Evaluating Bias in the docket for this rulemaking. See also NIST Interagency Report 8271, available at <https://doi.org/10.6028/NIST.IR.8271>.

⁶⁴ Currently, the regulations provide that certain aliens are exempt from the collection of biometrics upon entry and departure from the United States. See 8 CFR 215.8(a) and 235.1(f)(1); see also Section III.D.1 for more discussion.

⁶⁵ See proposed 8 CFR 215.8(b) and 235.1(f)(1)(iv). In the event of technical failures preventing the capture and matching of photographs of travelers at exit, air carriers will be directed to use manual boarding processes until the systems are functional. In this scenario, a biographic exit record will be created for the traveler but a biometric confirmation will not exist. A missing biometric confirmation record based on technology or operational failures is not considered non-compliance with departure requirements.

⁶² Currently, the regulations provide that aliens younger than 14 or older than 79 are exempt from the collection of biometrics upon entry and departure from the United States. See 8 CFR 215.8(a) and 235.1(f)(1); see also Section III.D.1 for more discussion. CBP will collect additional data on these populations and evaluate match rates once the regulations are amended to include these age groups.

⁶⁶ See NIST Interagency Report 8238, available at <https://nvlpubs.nist.gov/nistpubs/ir/2018/NIST.IR.8238.pdf>. See NIST Interagency Report 8271, available at <https://doi.org/10.6028/NIST.IR.8271>. <https://nvlpubs.nist.gov/nistpubs/ir/2018/NIST.IR.8238.pdf>.

a streamlined entry process using facial recognition for all such aliens. For example, under the Simplified Arrival process described above, CBP primarily uses photographs rather than fingerprints to verify the traveler's identity and retrieve the traveler's biographic information for inspection. Facial recognition technology can perform the function of biometrically verifying an alien traveler's identity much more efficiently than collecting and comparing his or her fingerprints. During CBP's current inspection process, most aliens are subject to being photographed upon arrival into the United States at primary inspection. The Simplified Arrival process, which is based on this requirement, utilizes integrated biometric identity verification with the retrieval of a traveler's biographic data from a single capture of a photograph. In doing so, the Simplified Arrival process eliminates the need for CBP to scan a passport or travel document to pull up the traveler's biographic data for inspection because a facial recognition scan performs this same function more quickly. Ultimately, using facial recognition at entry can eliminate several administrative processes that will increase the speed at which CBP can inspect travelers arriving in the United States. By eliminating the administrative tasks involved in scanning a travel document or collecting fingerprints, CBP can devote more resources to interviewing an alien traveler to determine his or her admissibility.

As noted above, DHS proposes in this rule to collect photographs from all aliens regardless of their age. This will enable DHS to associate the immigration records created for children to their adult records later, which will help combat trafficking of children, and confirm the absence of criminal history or associations with terrorist or other organizations seeking to violate applicable law. The current regulations that exempt biometric collection based on the age of the individual (*i.e.*, under 14 and over 79) were based on technological limitations on collecting fingerprints from children and elderly persons, as well as traditional law enforcement policies and other policies, such as not running criminal history background checks on children. These policies are no longer applicable to CBP's facial recognition based biometric entry-exit program, as the use of biometrics has expanded beyond criminal history background checks and now plays a vital role in identity verification and management. The use of facial recognition also obviates the

technological problems previously associated with fingerprints.

Certain privacy advocates have expressed concern over the accuracy of facial matching technology especially as it relates to demographics such as age, race and gender. By expanding the scope of individuals subject to facial image collection, the accuracy of the facial matching system will improve for all segments of the population, including children and the elderly, as it would be matching against more recent photos of the traveler rather than older, outdated visa photos.⁶⁷ Additionally, as discussed above, the proposed change to remove biometric exemptions for aliens would also alleviate the need to have multiple processing procedures for aliens, which would be a resource intensive process. For land and sea ports of entry and private aircraft, CBP plans to continue to test and refine biometric exit strategies with the ultimate goal of implementing a comprehensive biometric entry-exit system nationwide. The proposed regulatory changes would support CBP's efforts to regularly conduct a variety of statistical tests to bolster performance thresholds and minimize any possible bias impact on travelers of certain race, gender or nationality.

In this proposed rule, CBP has not analyzed the costs and benefits for implementing a facial recognition based biometric entry-exit program for land and sea ports of entry and private aircraft because CBP is still in the testing phase to determine the best way to implement biometric entry-exit within each of these unique environments. CBP would welcome comments from the public on the rule's impact on land and sea ports of entry and private aircraft.

CBP is continually evaluating how to best implement a biometric entry-exit system that is efficient, accurate, and secure and incorporates the latest technology. These evaluations will allow CBP to determine if new technology or new methods of employing existing technology might improve the entry-exit system.

2. Facial Recognition Technology Gallery Building

CBP has developed a matching service for all biometric entry and exit operations that use facial recognition, regardless of the method of entry or exit (*i.e.*, air, land, and sea). For all biometric matching deployments, TVS relies on biometric templates generated from pre-existing photographs that CBP already

maintains, known as a "gallery." These images may include photographs captured by CBP during previous entry inspection, photographs from U.S. passports and U.S. visas, and photographs from other DHS encounters. CBP builds "galleries" of photographs based on where and when a traveler will enter or exit. If CBP has access to APIS manifest information, CBP will build galleries of photographs based on upcoming flight or vessel arrivals or departures. If CBP does not have access to APIS manifest information, such as for pedestrians or privately owned vehicles at land ports of entry, CBP will build galleries using photographs of "frequent" crossers for that specific POE, taken at that specific POE, that become part of a localized photographic gallery. CBP's TVS facial matching service then generates a biometric template for each gallery photograph that is stored in the TVS virtual private cloud for matching when the traveler arrives or departs.

3. General Collection Process

Due to the complexities in logistics across the entry and exit environments, CBP will collect photographs of the arriving or departing traveler via several different methods depending on the local port of entry. Generally, when travelers present themselves for entry or exit, they will encounter a camera connected to CBP's cloud-based TVS facial matching service via a secure, encrypted connection. This camera matches live images with existing photo templates from passenger travel documents. The camera may be owned by CBP, the air or vessel carrier, another government agency such as TSA, or an international partner governmental agency. Once the camera captures a quality image and the system successfully finds a match among the historical photo templates of all travelers from the gallery associated with that particular manifest, the traveler proceeds to inspection for an admissibility determination by a CBP Officer, or is permitted to depart the United States. When a "no match" occurs, CBP may use an alternative means to verify the traveler's identity, such as a manual review of the travel document. See Section III.F.6 for more discussion.

4. Facial Recognition Based Entry Process

Historically, prior to admission to the United States, CBP has used a manual process to inspect travel documents, such as passports or visas, to initiate system checks and verify a traveler's identity, travel history, and any law or

⁶⁷ See NIST Interagency Report 8271, available at <https://doi.org/10.6028/NIST.IR.8271>.

border enforcement concerns that may require attention. The new primary entry solution uses biometrics to initiate the transaction and system checks, using facial recognition as the primary biometric verification modality. This shift from a biographic, document-based system to a biometric-initiated transaction requires travelers to provide facial photos for identity verification purposes. This enables CBP to more accurately verify identity and citizenship by matching the traveler's photograph with vetted and validated biographic information. Studies show that humans can benefit in face recognition tasks when assisted by a machine, and vice versa.⁶⁸

Under Simplified Arrival, CBP uses CBP-owned cameras, CBP's primary arrival subsystem of TECS, and the facial matching service to capture facial biometric data from travelers seeking to enter the United States. All travelers proceed to the entry lanes within CBP's Federal Inspection Services (FIS) area, where a camera captures an image of the traveler's face. The TECS primary arrival subsystem transmits the image to TVS. In order to biometrically identify the traveler, TVS automatically creates a template from the image and uses the template to query against a gallery of known identities, based on the manifests for all incoming flights for that day.

Once the traveler is matched, TVS transmits the match results, along with a TECS system-generated unique traveler identifier and a unique photo identifier generated by CBP's Automated Targeting System (ATS)—Unified Passenger (UPAX) module to TECS. In turn, the TECS primary arrival subsystem uses the unique traveler identifier to retrieve the traveler's biographic information from the APIS manifest. Additionally, the TECS subsystem uses the ATS—UPAX-generated identifier to retrieve the historical image (which had matched with the new image) stored in UPAX. The CBP officer has the ability to view and evaluate the traveler's biographic data, along with any derogatory information, in the TECS primary arrival application, along with associated biometric match results from TVS. The CBP officer then conducts the standard inspection interview and establishes the purpose and intent of travel. Upon admission or entry, CBP

updates the traveler crossing history in TECS to reflect a confirmed arrival into the United States. Inbound processing for travelers on commercial sea vessels (e.g., cruise ships) will resemble the air entry process, as this travel method is also based on an APIS traveler manifest.

Even with the use of facial recognition technology upon entry, CBP still leverages APIS information and screens it against TECS records and other law enforcement databases in order for CBP to ascertain if any security or law enforcement risks exist.

At this time, CBP is not actively using galleries of known travelers in the land environment. This is because private rail and bus lines are not required to submit APIS manifests (although, in some cases, private rail and bus lines submit APIS to CBP voluntarily) and CBP does not receive any manifest for pedestrians crossing the land border on foot or for persons traveling in private vehicles. However, CBP is developing processes that would enable the use of TVS at the land border. For example, CBP may briefly retain local galleries of travelers who have recently crossed at a given POE and are expected to cross again within a given period of time. CBP is conducting tests to determine feasibility. Currently, in San Luis and Nogales, Arizona, CBP is using facial recognition technology to compare the traveler against the photo in the travel document presented (1:1 comparison). Expanding the scope of travelers that may be required to present biometrics will allow CBP to continue to examine the possibility of using galleries in the land environment.

5. Facial Recognition Based Exit Process

CBP is using biometric technologies in voluntary partnerships with other federal agencies and commercial stakeholders. These partnerships enable CBP to more effectively verify the identities of individuals entering and exiting the United States, identify aliens who are violating the terms of their admission, and expedite immediate action when such violations are identified.

In some partnership arrangements, an airline or airport authority partner staffs TVS biometric collection and the boarding process, rather than CBP. These stakeholders are assisting CBP in meeting the congressional biometric entry-exit system mandate. Some of these partners are already using traveler photographs in their own business processes. A number of airlines and airport authorities may choose to leverage their own technology in partnership with CBP to facilitate identity verification. Based on

agreements with CBP, these stakeholders deploy their own camera operators and camera technology to operate TVS for identity verification. These stakeholders must adhere to strict business requirements and the cameras must meet CBP's technical specifications to capture facial images of travelers prior to use. Each camera is connected to the TVS via a secure, encrypted connection. While the photo capture process may vary slightly according to the unique requirements of each participating airline and airport authority, the IT infrastructure supporting the backend process is the same.

During the boarding process, CBP's facial recognition matching service allows CBP to biometrically verify the identity of travelers departing the United States with the assistance of airline or airport partnerships. At the departure gate, each traveler stands for a photo in front of a partner-provided camera. Aided by the authorized airline or airport personnel, the partner-owned camera attempts to capture a usable image and submits the image, sometimes through an authorized integration platform or vendor, to CBP's cloud-based TVS facial matching service. TVS then generates a template from the departure photo and uses that template to search the assembly of historical photo templates in the cloud-based gallery. Some airlines continue to accept boarding passes at the gate, while other carriers accept CBP's biometric identity verification in lieu of boarding passes as part of a new paperless, self-boarding process. In the latter process, the carrier may employ technologies (such as automated gates) to further automate the boarding process. For example, a traveler whose photo has generated a positive match with a photo in the gallery, will be directed to board the plane. As CBP verifies the identity of the traveler, either through the automated TVS facial recognition process or manual officer processing, the backend matching service returns the "match" or "no-match" result, along with the associated unique identifier. Carriers, pursuant to the APIS regulations, are responsible for comparing the travel document to validate the information provided and ensure that the person presenting the document "is the person to whom the travel document was issued." 19 CFR 122.49a, 122.49b, 122.49c, 122.75a, and 122.75b. The use of TVS provides a more efficient and accurate way to meet this requirement.

Typically, on air exit, CBP is not permanently stationed at the gate. Therefore, CBP currently must rely on

⁶⁸ See <https://www.pnas.org/content/pnas/115/24/6171.full.pdf>. See also <https://onlinelibrary.wiley.com/doi/abs/10.1002/acp.2968>. Accessed October 26, 2020. See also <https://royalsocietypublishing.org/doi/full/10.1098/rsos.170249#RSOS170249C16>. Accessed October 26, 2020.

the review of biographic data (provided via APIS) to determine whether further inspection on departure is warranted and whether an outbound enforcement team should be sent to the gate. With the use of facial recognition technology, outbound enforcement teams are informed immediately when a no match occurs (via notification on mobile device) and can then determine if additional inspection is warranted.

Outbound processing for travelers on commercial sea vessels (e.g., cruise ships) would resemble the air exit process. It is expected that this process will also be based on an APIS traveler manifest, although further testing is needed to refine and implement this process. At the land border, as part of CBP's outbound enforcement efforts, CBP has begun recording departures of Third Country Nationals (TCN) encountered during outbound operations at land crossings, both biographically and with facial images and fingerprint biometrics. A TCN is defined as a foreign national who is attempting to enter either Canada or Mexico but is not a citizen of either country. TCNs departing the United States by land are those individuals who are currently subject to biometric collection under existing CBP regulations.

6. Alternative Procedures and Public Notices

Currently for air exit, all travelers, including U.S. citizens, may notify the airline-boarding agent if they would like to opt out of the facial-recognition based process at the time of boarding and request that an alternative mean of validation be employed. Airline personnel would then conduct manual identity verification using the travel document, and may notify CBP to collect biometrics, if applicable. Under the proposed rule, alien travelers would no longer be able to opt out. Alternative procedures would only be available to U.S. citizen travelers.

All U.S. citizens are subject to inspection upon arrival into and departure from the United States to confirm their identity and citizenship. Where CBP has implemented a biometric verification program, participation by U.S. citizens in CBP's biometric verification program is voluntary. Such participation provides a more efficient boarding process or admission process and a more accurate and efficient method for verifying the identity and citizenship of U.S. citizens. A U.S. citizen traveler who does not wish to have his or her photograph taken may request an alternative inspection process. For example, in the

event a U.S. citizen elects not to be photographed at airports where CBP is conducting biometric exit verification, an airline gate agent will perform a manual review of the U.S. citizen's passport. If there is some question as to the authenticity of the passport or whether the person presenting the passport is the person to whom the passport was lawfully issued, the airline will contact CBP for additional inspection, and a CBP officer may perform a manual review of the passport. A CBP officer may ask questions to validate identity and citizenship. At other departure locations, such as at a land port where CBP is conducting biometric verification, CBP provides appropriate alternative procedures. As biometric collection progresses, CBP believes that it will save travelers time. If this is the case, the alternative inspection process may be a slower process than the automated process, but every effort will be made to not delay or hinder travel.

As discussed in Section III.E.6, Simplified Arrival enables CBP to use facial recognition to streamline the entry process for all arriving travelers. This process has been implemented at certain locations and will be expanded. For U.S. citizens, participation is voluntary. CBP provides appropriate alternative procedures for U.S. citizens who choose not to participate in the biometric verification process at entry. The alternative procedures proposed in this rule are intended to be similar to the existing process at entry today, in which a CBP officer would physically examine the traveler's documentation to ensure the bearer is the true owner, and scan the document to pull up the traveler's data for inspection. *See* Section III.E.6.

CBP strives to be transparent and provide notice to individuals regarding its collection, use, dissemination, and maintenance of personally identifiable information (PII). When airlines or airports are partnering with CBP on biometric air exit, the public is informed that the partner is collecting the biometric data in coordination with CBP. CBP provides notice to travelers at the designated ports of entry through both physical and either LED message boards or electronic signs, as well as verbal announcements in some cases, to inform the public that CBP will be taking photos for identity verification purposes. CBP also provides notice to the public that a traveler may opt out of having their photo taken and request an alternative procedure. CBP works with carriers, airports, and other port facilities to incorporate appropriate notices and processes into their current business models.

Upon request, CBP officers provide individuals with a tear sheet with Frequently Asked Questions (FAQ), opt-out procedures, and additional information on the particular demonstration, including the legal authority and purpose for inspection, the routine uses, and the consequences for failing to provide information. Additionally, in the FIS, CBP posts signs informing individuals of possible searches, and the purpose for those searches, upon arrival or departure from the United States. Privacy information on the program, such as System of Records Notices and Privacy Impact Assessments (PIAs), are published on www.dhs.gov/privacy. CBP will also continue to make program information, such as Frequently Asked Questions, available for the public on CBP's biometrics website at www.cbp.gov/biometrics.

7. "No Match" Procedures

CBP has designed the entry and exit inspection process such that, in the event of a mismatch, false match, or "no match," CBP may use alternative means to verify the traveler's identity and ensure that the traveler is not unduly delayed. If the system fails to match a traveler, then a manual review of the traveler's document is performed. On entry, the CBP officer may continue to conduct additional screening or request fingerprints (if appropriate) to verify identity. Each inspection booth at entry is equipped with a fingerprint reader.

At departure, after the manual review of the travel document (i.e., scanning a boarding pass and checking a traveler's passport), the airline or cruise line may notify CBP's outbound enforcement teams should additional inspection be required.⁶⁹ In such case, CBP officers may inspect the traveler's passport or other valid travel document. If the traveler is subject to biometric collection (under the current regulations or under the amended regulations once this rule is finalized), the officer may swipe the traveler's document in the MRZ of the BE-Mobile device and collect the traveler's fingerprints. BE-Mobile uses fingerprints, facial images, and the existing connections between ATS-UPAX and DHS IDENT for all

⁶⁹ Communication between CBP's outbound enforcement team and airlines/cruise lines is not unique to locations where facial recognition is implemented. During the outbound inspection, CBP may interview the traveler as well as use BE-Mobile devices. CBP conducts outbound enforcement operations using BE-Mobile devices in all modes of transportation and also at locations where facial recognition technology (i.e., biometric exit boarding) is unavailable. Neither the operations nor the technology is exclusive to locations where facial recognition based biometric exit is implemented.

biometric queries and storage. CBP encrypts data on the wireless handheld device as it is collected and encrypts the biometric and biographic data during transmission to and from internal and external systems. No information is retained on the BE-Mobile device.

The BE-Mobile device transfers prints and passport information to the appropriate DHS and CBP information technology system to identify any law enforcement lookouts related to the traveler. In addition, the device matches the traveler to the APIS manifest and creates a confirmed exit record in such CBP systems as APIS and the Arrival and Departure Information System (ADIS). If the system checks yield no derogatory information, the CBP officer allows the traveler to board/continue travel.

Based on the inspection results and the queries using the newly collected biometric and biographic data, if CBP finds actionable derogatory information on the traveler, the CBP officer may escort the traveler to the FIS area to conduct further questioning and take the appropriate actions under CBP's law enforcement authorities.

In the event that an individual does experience a delay or issue as an outcome of these processes, travelers may contact the CBP Info Center and/or DHS Traveler Redress Inquiry Program (TRIP). Signage and tear sheets at select ports of entry where the TVS is employed provides information on how to contact the CBP Info Center and/or DHS TRIP. In addition, travelers may request information from the on-site CBP officer or gate agent.

8. U.S. Nationals, Dual Nationals and Lawful Permanent Residents

Under the INA, a U.S. national is either a citizen of the United States, or a person who, though not a U.S. citizen, owes permanent allegiance to the United States. *See* INA section 101(a)(22). Non-citizen U.S. national status applies only to individuals who were born either in American Samoa or on Swains Island to parents who are not citizens of the United States.⁷⁰

Dual nationals are individuals who owe allegiance to both the United States and the foreign country. They are required to obey the laws of both countries, and either country has the right to enforce its laws. For purposes of international travel, U.S. nationals, including dual nationals, must use a U.S. passport (or alternative

documentation as required by 22 CFR part 53) to enter and leave the United States. *See* INA 215(b) (8 U.S.C. 1185(b)); *see also* 22 CFR 53.1.

For purposes of this proposed rule, a U.S. national or dual national who presents as a citizen of another country will be processed as a foreign national and their photo will be retained accordingly, unless they are able to present evidence of U.S. citizenship or nationality.⁷¹

Under immigration law, lawful permanent residents (LPRs) are aliens authorized to live permanently within the United States.⁷² As such, for purposes of this proposed rule, LPRs will be processed as aliens.

9. Business Requirements for Public-Private Partnerships

The business requirements implemented by CBP with its partners govern the retention and use of the facial images collected using CBP's facial recognition technology. CBP prohibits its approved partners such as airlines, airport authorities, or cruise lines and participating organizations (e.g., vendors, systems integrators, or other third parties) from retaining the photos they collect under this process for their own business purposes. The partners must immediately purge the images following transmittal to CBP, and the partner must allow CBP to audit compliance with this requirement. As discussed in the November 2018 PIA, CBP has developed Business Requirements to document this commitment. In order to use TVS, private sector partners must agree to these Business Requirements. After this rule is implemented, the Business Requirements document will be updated and available for viewing on *cbp.gov*.

IV. Proposed Regulatory Changes

A. General Biometric Exit Requirement for Aliens

To advance the legal framework for the full implementation of a biometric exit capability as described above, DHS is proposing to amend the regulations in 8 CFR that set forth the requirements for providing biometrics upon entry and departure. Currently, 8 CFR 215.8(a)(1)

authorizes DHS to collect biometric exit information from certain aliens on departure from the United States pursuant to pilot programs at air, land, or sea ports of entry and places a limit of 15 air or sea ports of entry at which such biometric exit pilots may be established. The reference to pilot programs and the 15 air or sea port limitation hinders DHS's ability to expand and fully implement a comprehensive biometric exit solution. Therefore, DHS is proposing to amend § 215.8 by removing the reference to pilot programs and the 15 air or sea port limit.

B. Collection of Photographs From Aliens Upon Entry and Departure

As discussed in Section III.D.1, DHS regulations implementing the legacy US-VISIT program provide that certain categories of aliens are exempt from the collection of biometrics upon arrival to, and departure from, the United States. *See* 8 CFR 235.1(f); 8 CFR 215.8(a)(1)–(2). These exemptions are not statutorily based. As discussed in Section III.A, DHS has broad statutory authority to control alien travel, inspect aliens and require biometrics from aliens upon arrival in, or departure from, the United States.

To implement a biometric entry-exit system based on facial recognition, DHS is proposing to amend the regulations to provide that all aliens may be required to be photographed upon departure from the United States. The exemptions of certain aliens from the collection of biometrics in § 215.8(a)(1)–(2) will no longer pertain to the collection of photographs from aliens upon departure. Specifically, DHS is proposing to amend § 215.8 to add new paragraph (a)(1), which provides that an alien may be required to be photographed when departing the United States to determine identity. The collection of photographs from an alien upon departure will assist DHS in determining the alien's identity and whether immigration status in the United States has been properly maintained.

In addition, DHS is proposing to amend § 235.1(f) to add new paragraph (1)(ii), which provides that an alien seeking admission may be required to be photographed to determine the alien's identity, admissibility, and whether immigration status in the United States has been properly maintained. As for the collection of photographs upon departure, the exemptions in § 235.1(f)(1)(ii) will no longer pertain to the collection of photographs from aliens seeking admission.

⁷⁰ *See Dual Nationality*, U.S. Department of State, <https://travel.state.gov/content/travel/en/legal/travel-legal-considerations/Advice-about-Possible-Loss-of-US-Nationality-Dual-Nationality/Dual-Nationality.html>.

⁷¹ A person claiming U.S. citizenship must establish that fact to the examining officer's satisfaction and must present a U.S. passport or alternative documentation as required by 22 CFR part 53. If such person fails to satisfy the examining immigration officer that they are a U.S. citizen, the person shall thereafter be inspected as an alien applicant for admission. 8 CFR 235.1(b).

⁷² Under the INA, the term alien means any person who is not a citizen or national of the United States. 8 CFR 215.1(a). Therefore, a lawful permanent resident is an alien under the INA.

DHS is not proposing to change the existing exemptions in §§ 215.8 and 235.1(f)⁷³ for the collection of biometrics other than photographs (*e.g.*, fingerprints and other biometrics) from aliens upon entry to and departure from the United States. This is set forth in 8 CFR 215.8(a)(2)–(3) and 235.1(f)(1)(iii) and (vi) as amended in this document; *see also* Section IV.C.1 of this document. Notwithstanding these exemptions, DHS is authorized to collect biometrics from aliens, regardless of age, citizenship, or visa status, for law enforcement purposes or in other contexts not addressed by these regulations, such as from aliens attempting to enter the United States illegally between U.S. ports of entry. *See* Section III.A. As such, CBP may, on a case-by-case basis, collect biometrics other than photographs from aliens outside of the age limits or visa category exceptions.

C. Collection of Biometrics When Departing the United States and Other Minor Conforming and Editorial Changes

DHS is proposing to amend § 215.8(a) to specify that biometrics may be required “when departing the United States.” The current provision refers to “upon departure from a U.S. port of entry.” This amendment is necessary to allow for the collection of biometrics from individuals upon departure at locations other than at a U.S. port of entry.⁷⁴ Although the majority of travelers depart the country from a

designated U.S. port of entry, a few travelers depart the country from locations that are not designated as ports of entry, such as Ronald Reagan Washington National Airport or John Wayne Airport, California.⁷⁵ To ensure the implementation of a biometric entry-exit system that tracks all individuals departing the country, DHS may require aliens to provide biometrics upon departure at U.S. ports of entry or when departing the United States at any other location.

In addition, DHS is proposing to make certain minor conforming and editorial changes in §§ 215.8 and 235.1(f). In § 215.8, DHS is proposing to redesignate paragraph (a)(2) as paragraph (a)(3), revise cross-references and add paragraph headings as necessary. In § 235.1(f), DHS is proposing to redesignate paragraph (f)(1)(ii) as paragraph (f)(1)(iii), paragraphs (f)(1)(iii) and (iv) as paragraphs (f)(1)(v) and (vi), add new paragraphs (f)(1)(ii) and (iv), and revise cross-references and add paragraph headings as necessary. In §§ 215.8 and 235.1(f), DHS is proposing to remove the phrase “[t]he Secretary of Homeland Security or his or her designee” and add in its place “DHS” and remove the phrase “biometric identifiers” and add in its place “biometrics.”

Finally, DHS is proposing to amend §§ 215.8(a) and 235.1(f) to remove the specific references to fingerprints and photographs. Currently, these sections provide that any alien may be required “to provide fingerprints, photograph(s) or other specified biometric identifiers” upon arrival into or departure from the United States. Because this rule adds a separate sub-paragraph relating to the provision of photographs, the word “photograph(s)” in this provision is no longer appropriate. Furthermore, to allow the flexibility for DHS to employ different methods of biometric collection in the future, DHS is proposing to amend §§ 215.8(a) and 235.1(f) to provide instead that any alien, other than those exempt by regulation, may be required “to provide other biometrics” upon arrival into and departure from the United States. CBP has tested iris technology, for example, but biometric technology continues to advance and there may be other biometric options that may have

potential for implementation in the future.

V. Withdrawal of 2008 Air Exit Notice of Proposed Rulemaking

On April 24, 2008, DHS published a notice of proposed rulemaking (NPRM) in the *Federal Register* (73 FR 22065) proposing a biometric exit program at air and sea ports that would require commercial air and vessel carriers to collect biometric data from aliens and submit this information to DHS within a certain timeframe. The proposed rule set out certain technical requirements and a substantive performance standard for the transmission of biometric data, but provided the carriers with some discretion in the manner of collection and submission of biometric data, including latitude in determining the location of the biometric data collection within the port of entry. DHS received 118 comments from the public in response to the NPRM. Most of the comments opposed the adoption of the proposed rule due to issues of cost and feasibility.

In consideration of the regulatory changes being made in this rule, the comments received, the results of the biometric exit pilots conducted in 2009,⁷⁶ and DHS’s new approach to implementing a biometric entry-exit system, DHS has decided that the 2008 NPRM should be withdrawn. The withdrawal notice is being published concurrently with the publication of this proposed rule.

VI. Statutory and Regulatory Requirements

A. Executive Orders 12866 and 13563

Executive Orders 13563 (“Improving Regulation and Regulatory Review”) and 12866 (“Regulatory Planning and Review”) direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

This rule is an “economically significant regulatory action,” under section 3(f) of Executive Order 12866. Accordingly, the Office of Management and Budget (OMB) has reviewed this regulation.

⁷³ The following categories of aliens currently are exempt from the requirements under 8 CFR 215.8 and 235.1 to provide biometrics upon arrival to, and departure from, the United States at a U.S. port of entry: Canadian citizens under Section 101(a)(15)(B) of the Act who are not otherwise required to present a visa or be issued a form I-94 or Form I-95; aliens younger than 14 or older than 79 on the date of admission; aliens admitted A-1, A-2, C-3 (except for attendants, servants, or personal employees of accredited officials), G-1, G-2, G-3, G-4, NATO-1, NATO-2, NATO-3, NATO-4, NATO-5, or NATO-6 visas, and certain Taiwan officials who hold E-1 visas and members of their immediate families who hold E-1 visas unless the Secretary of State and the Secretary of Homeland Security jointly determine that a class of such aliens should be subject to the requirements of paragraph (d)(1)(ii); classes of aliens to whom the Secretary of Homeland Security and the Secretary of State jointly determine it shall not apply; or an individual alien to whom the Secretary of Homeland Security, the Secretary of State, or the Director of Central Intelligence determines it shall not apply.

⁷⁴ A port of entry is any location in the United States or its territories that is designated as a point of entry for aliens and U.S. citizens. *See* 8 CFR 235.1(a) (providing that application to lawfully enter the United States shall be made in person to an immigration officer at a U.S. port of entry); *see also* 8 CFR 100.4(a) (designating ports of entry for aliens arriving by vessel or by land transportation) and 100.4(b) (designating ports of entry for aliens arriving by aircraft).

⁷⁵ These airports are not ports of entry pursuant to 8 CFR 100.4(b) and do not have federal inspection processes or facilities, but still have a few flights that depart to international locations, mostly those that have CBP preclearance facilities (typically in Canada or the Caribbean). This proposed change would account for these departures from the United States.

⁷⁶ *See* Section III.D.2.

1. Need and Purpose of the Rule

DHS is statutorily mandated to develop and implement an integrated, automated entry and exit data system to match records, including biographic data and biometrics, of aliens entering and departing the United States. DHS is also required by Executive Order to expedite the completion and implementation of a biometric entry-exit tracking system. Since 2004, DHS, through CBP, has been collecting biometric data from aliens arriving in the United States, but currently there is no comprehensive biometric system in place to track when the aliens depart the country.

Since taking over entry and exit operations in 2013, CBP has been testing various options to collect biometrics at arrival and departure. The results of these tests and the recent advancement of facial recognition technology have provided CBP with a model for moving forward with implementing a comprehensive biometric exit solution. In the initial stage of implementation, CBP has expanded its biometric exit capability to a limited number of airports. These deployments are allowing CBP to fine-tune the process before implementing it on a nationwide basis. However, CBP is limited by regulation to collecting biometrics from aliens upon departure from air and seaports under pilot programs to 15 locations (no limits apply in the land border context). This rule will remove the reference to pilot programs and the port limit and establish that all aliens may be required to be photographed upon entry and/or exit.

Upon exit, U.S. citizens are currently typically processed similarly to aliens (*i.e.*, without the collection of photographs) and may generally continue to be inspected in the same way under this rule, even in situations where CBP has instituted a biometric exit program. Where CBP has instituted photograph collection at exit, U.S. citizens may be photographed voluntarily or request the existing alternative process. This rule will not change the option U.S. citizens have not to have their pictures taken and instead, to request alternative processing.

Currently, certain aliens are not subject to photograph collection. For example, aliens who are under the age of 14 or over the age of 79 are not required to be photographed at entry or exit. By providing that all aliens may be required to be photographed at entry and/or exit, CBP will be able to further expand the photograph collection program to allow for a more complete

evaluation as it moves toward nationwide expansion.

Collecting photographs will allow CBP to know with better accuracy whether aliens are departing the country when they are required to depart, reduce visa or travel document fraud, and improve CBP's ability to identify criminals and known or suspected terrorists before they depart the United States. It will also allow for a substantial time savings for travelers.

2. Background, Baseline, and Affected Population

Under DHS regulations, upon arrival into the United States, travelers are required to present themselves to CBP for inspection under the immigration laws. *See* 8 CFR 235.1. Under the current air inspection process, CBP obtains information directly from the traveler via his or her travel documents (*e.g.*, passport) and/or verbal communications between a CBP officer and the traveler. As a part of this process, a CBP officer typically takes a physical passport from the traveler and electronically "reads" the passport using its MRZ to pull up the traveler's biographic data for inspection. In addition, for aliens (except for those exempt from biometric collection under 8 CFR 235.1), CBP collects fingerprints from the traveler to biometrically verify his or her identity by comparing the fingerprints with those previously collected as a part of a visa application, immigration benefits application, or earlier inspection process with CBP.⁷⁷ Once the identity of the traveler is validated in this manner, the CBP officer conducts an interview with the traveler to establish the purpose and intent of travel, and to determine admissibility.

The Aviation and Transportation Security Act of 2001 and the Enhanced Border Security and Visa Entry Reform Act of 2002 together mandated the collection of certain biographical manifest information on all passengers and crew members who arrive in or depart from (and, in the case of crew members, overfly) the United States on a commercial air or sea carrier. This collection is done through APIS. As APIS requirements apply equally to travelers departing the United States, CBP electronically records a traveler's departure by commercial air or sea using the biographic manifest information provided by the carrier. Unlike at entry, however, CBP does not routinely inspect travelers departing the United States to confirm that the APIS

departure data is accurate or that the traveler is the true bearer of his or her travel document.

Currently, those departing the United States via the air environment must present their boarding pass and identification when being screened by TSA. Before boarding, travelers must also present their boarding passes to the carrier at the gate, who visually reviews the travel documents and validates the boarding pass with the carrier's ticketing system. However, once in the sterile area of the terminal, although travelers may be subject to random identification checks, travelers generally do not have their photo identification scrutinized again before boarding the aircraft.

CBP uses APIS information along with other law enforcement information and technology to determine whether CBP needs to further inspect outbound travelers. CBP's outbound operations enable it to enforce U.S. laws applicable upon departure from the United States and effectively monitor and control the outbound flow of goods and people.

In the land environment, CBP does not receive advance APIS data. Persons departing the United States at the land border are also not consistently subject to CBP inspection, as they are upon arrival. As a result, land departures may not be recorded accurately. For the purposes of this analysis, the process described above is the baseline.⁷⁸ This analysis assesses the incremental change from the baseline. CBP has operated various pilot programs over the years that deviate from the baseline and have guided CBP in its development of the air exit process under this rule. Tests continue at land and sea and at air entry. The costs and benefits of these pilots are sunk for the purposes of deciding whether to proceed with the regulatory program, but they are important for understanding the full costs and benefits of CBP's facial recognition program as a whole. As such, we analyze the effects of the facial recognition program over two time periods. First, we study the pilot period from 2017 to 2019. Then we study the regulatory period from 2020 to 2024.

CBP collects biometric data from most aliens entering the United States by air and sea at entry but does not generally collect biometric data at departure from aliens in any outbound environment, nor does it generally collect biometric data from U.S. citizens on a systematic basis upon entry or departure from the

⁷⁷ See section III.B.2 for more information on the current process.

⁷⁸ For a more detailed explanation of the baseline, see section III.B, titled "Current Entry Exit Process," earlier in the preamble of this document.

United States.⁷⁹ DHS, through CBP, has been developing and testing additional biometric entry and exit capabilities since 2004.

What follows is a brief summary of the pilot programs and the current biometric entry-exit requirements for those affected by this rule. For a full history, see Section III.D above, titled “Biometric Entry-Exit Program History.”

Since 2004, DHS and CBP have run a variety of pilot programs to test various biometric entry and exit capabilities. Tests have been conducted using a variety of technologies in different environments ranging from handheld devices for capturing fingerprints at airports upon entry to kiosks for pedestrians at land ports. CBP has most recently been testing facial recognition technology and has concluded that this is the preferred method of widespread biometric collection. It allows CBP to collect biometric data quickly and unobtrusively and the data can be easily compared with previously collected data to match the traveler with previous entries and with her/his passport or visa photograph. CBP already takes photographs of most aliens at entry during the routine inspection process and maintains them in a database. For aliens who have traveled to the United States previously, CBP’s database includes a photograph from each entry. For aliens with visas, CBP’s database also includes the photographs taken during the visa application process. Facial recognition technology compares a new photograph of an individual with previously captured photographs to ensure that the individual is who he or she claims to be.

In June 2016, CBP deployed a facial recognition pilot at the Hartsfield-Jackson Atlanta International Airport. This pilot was the first time a process

similar to the one used under this rule was tested at exit. Based on the early success of the pilot in Atlanta, CBP expanded the use of facial recognition technology to additional airports. For the purposes of this analysis, the process at the eight airports shall be referred to as the initial pilot.⁸⁰ The facial recognition technology is now operating as TVS. Using the initial pilot, CBP is capturing photographs from all participating travelers on selected daily outbound flights at a number of international airports. Before boarding, travelers typically line up so an airline employee can scan their boarding passes. CBP has added a station along this line where CBP officers scan travelers’ boarding passes and take their photographs. The photograph is compared with the photograph(s) in CBP’s database to ensure there is a match. Under the initial pilot, an airline employee still scans the boarding pass after the facial recognition process is complete. According to a time in motion study of the biometric identity verification process, this process took 9 seconds of each traveler’s time.⁸¹ Overall boarding time is unaffected because the facial scans are done while the traveler is already in line waiting to board. Note that this is an estimate for the added time for the initial pilot and it does not apply to the end state solution under this rule because in the end state there will not be a boarding pass scan in addition to the facial recognition.

While this initial pilot model has been useful for testing the facial recognition software and process, it is not feasible for nationwide deployment because CBP does not have the staffing for such an expansion. Airlines have recognized the potential for facial recognition to speed up the process for airlines and travelers and have partnered with CBP to test the software in different locations and with alterations to the model. For example, British Airways began testing a new model at Los Angeles International Airport in November 2017, and is

currently testing or planning to expand this at additional airports, including the Orlando International Airport. Under this model, airline employees operate the facial recognition gates rather than CBP. Once the match is made, there is no additional step of scanning the boarding pass or checking the traveler’s identification. If there is not a match, the document is examined by an airline representative, and a CBP officer may also be notified to examine the document. British Airways has found that this process allows for boarding of its largest aircraft in 22 minutes, less than half the time under the usual process.⁸²

Orlando International Airport has announced that it will soon begin building infrastructure to collect photographs of all arriving and exiting aliens.⁸³ The exit model will be similar to the British Airways pilot in that the exit process will be conducted by the airlines. Participating airlines may eventually choose to eliminate boarding passes entirely and may also use facial recognition to speed up other processes. TVS will also be tested at entry and is already being tested in certain other locations. CBP and airlines expect the implementation at entry to save considerable time. The existing version of 19 CFR 235.1 already specifically authorizes CBP to require photographs of most aliens at entry. This rule will expand the requirement to all aliens. This would simplify the testing at entry because no aliens would be eligible to opt out of the facial recognition process. Currently, this process is optional for all exempt travelers.

The rule will advance the legal framework to implement a biometric exit requirement using facial recognition technology on a nationwide basis. CBP lacks the resources to implement this program nationwide and will continue to work with airlines and airports to establish partnerships before doing so. Due to airline and airport interest, CBP expects to implement the program nationwide within five years.

While this analysis is primarily focused on the impacts of this rule once it is in effect, CBP has been using similar facial recognition in its pilot programs for several years, which have both costs and benefits to CBP and the public. To give the reader a full view of the effects of CBP’s facial recognition program through the entire time it has been used, CBP analyzes the impact of

⁷⁹ CBP does collect biometric data from U.S. citizens in certain circumstances on a voluntary basis, such as under entry-exit pilot programs described herein, under CBP’s trusted traveler programs, and may be compelled on a case-by-case basis for law enforcement purposes. For the Automated Passport Control (APC) kiosks, which are free, voluntary, and do not require a membership, the APC kiosks collect facial images from all travelers and fingerprints from VWP, U.S. visa, and non-Canadian LPR travelers. The kiosk captures a photo and then prints out a receipt with the traveler’s face and biographic information. This process allows CBP Officers to make manual one-to-one comparisons of the newly-captured facial images with the travelers themselves. APC kiosk systems may not retain PII, including biographic and biometric data. APC Services retains PII via log records for no longer than 30 days. For Mobile Passport Control, although the traveler profile includes a facial photo, there is no option for the user to submit the profile itself, including the photo, to CBP. The traveler only submits the MPC “trip” which includes the traveler’s biographic information, inspection question responses, and class of admission, if applicable.

⁸⁰ The eight airports include: Washington Dulles International Airport, Atlanta Hartsfield-Jackson International Airport, Houston George Bush Intercontinental Airport, Chicago O’Hare International Airport, Las Vegas McCarran International Airport, Houston William P. Hobby Airport, John F. Kennedy International Airport, and Miami International Airport.

⁸¹ The time in motion study captured the “stop and look” scenario for currently “in-scope” travelers, which encompasses the reading a boarding pass, face capture and matching. If a traveler does not match, or matches erroneously, then a manual review, as occurs today, would be conducted; therefore, manual reviews are not included in the 9 seconds. the biometrics process over two time periods. First, we analyze the impacts in the initial facial recognition pilot period (2017–2019). This includes the systems and hardware development by CBP, the initial testing, and the photographic collection process operated by CBP at the initial pilot locations. Because the pilots have started at different times and new pilot locations are still being set up, we present the unit costs for the pilot time period in addition to the total cost of the initial pilot. The unit costs illustrate the effects of new pilots as they are added. Second, we analyze the impacts of facial recognition in the regulatory period beginning in 2019 when CBP moves to nationwide deployment. CBP expects deployment at all airports within five years, so we use the period of analysis of 2020–2024. For the regulatory time period, CBP estimates, to the extent data is available, the total projected costs, and cost savings, and benefits that result from the

gradual nationwide expansion of the collection of photographs at exit and entry.

To estimate the number of U.S. citizens and aliens that could be affected by this rule, we use historical arrival and departure data from internal CBP databases and the international travel forecast produced by the Department of Commerce's Office of Travel and Tourism Industries (OTTI).⁸⁴ Table 1 shows the OTTI growth forecast from 2017–2024. We note that this is a forecast of inbound travel, not outbound. Quality forecasts of outbound air travel are not available, so we use inbound air travel as a proxy. Because most international travel is done on a round-trip basis, we believe that inbound air travel growth is a good proxy for outbound air travel growth. To the extent that inbound and outbound travel grow at different rates, the effects of this analysis could be overstated or understated.

TABLE 1—OTTI INTERNATIONAL TRAVEL FORECAST GROWTH RATES

Year	Growth rate (%)
2017	0.7
2018	55.7
2019	3.2
2020	22.7
2021	3.3
2022	3.6
2023	3.7
2024	3.7

Tables 2 shows the actual 2017 and projected 2018–2024 outbound air traveler volumes from the United States. Table 3 shows the projected inbound air traveler volumes for the same years.

TABLE 2—2017–2024 PROJECTED OUTBOUND AIR TRAVEL

Year	U.S. citizens	Aliens	Total
2017	50,375,295	64,784,389	115,159,684
2018	53,246,687	68,477,099	121,723,786
2019	54,950,581	70,668,366	125,618,947
2020	56,434,247	72,576,412	129,010,659
2021	58,296,577	74,971,434	133,268,011
2022	60,395,254	77,670,406	138,065,660
2023	62,629,878	80,544,211	143,174,089
2024	64,947,183	83,524,347	148,471,530

TABLE 3—2017–2024 PROJECTED INBOUND AIR TRAVEL

Year	U.S. citizens	Aliens	Total
2017	47,493,852	58,312,091	105,805,943
2018	50,201,002	61,635,880	111,836,882
2019	51,807,434	63,608,228	115,415,662
2020	53,206,235	65,325,650	118,531,885
2021	54,962,041	67,481,396	122,443,437
2022	56,940,674	69,910,726	126,851,400
2023	59,047,479	72,497,423	131,544,902
2024	61,232,236	75,179,828	136,412,064

This rule removes the existing limitation on biometric exit pilot programs at airports and seaports and establishes that all aliens may be required to be photographed upon departure. The practical effect of this change at air exit is that CBP will be able to continue expanding its biometric exit capability to additional locations, aliens will be subject to the collection of photographs at these locations, and

U.S. citizens who voluntarily participate in CBP's biometric verification program will also have their photographs taken. The pace of the expansion will depend on how quickly CBP is able to enter into partnerships with airlines and airports. Given the level of interest in such partnerships so far, CBP expects that the program will expand steadily over the next five years until it has been implemented for most outbound

commercial passenger air traffic. We therefore assume that 20 percent of travelers will be affected in 2020, 40 percent in 2021, 60 percent in 2022, 80 percent in 2023, and 97 percent in 2024 and beyond.⁸⁵ Table 4 shows the estimated number of aliens and U.S. travelers on outbound flights with the biometric process in each year.

⁸⁴ Source: U.S. Department of Commerce, International Trade Administration, Industry & Analysis, National Travel and Tourism Office; Statistics Canada; INEGI, Forecast of International Travelers to the United States by Top Origin

Countries, October 2018. Available as a supporting document in the docket of this rulemaking.

The OTTI October 2018 forecast is only through 2023. For the purposes of this analysis, we use the 2023 growth rate for 2024.

⁸⁵ 97 percent corresponds to the portion of the international traveler volume that takes place at the 20 busiest airports.

TABLE 4—2020–2024 PROJECTED OUTBOUND AIR TRAVELERS ON FLIGHTS WITH BIOMETRICS

Year	U.S. citizens	Aliens	Total
2020	11,286,849	14,515,282	25,802,132
2021	23,318,631	29,988,574	53,307,204
2022	36,237,152	46,602,244	82,839,396
2023	50,103,902	64,435,369	114,539,271
2024	62,998,768	81,018,617	144,017,384

After implementation of this rule, as is currently the case under CBP's biometric exit pilot programs, participation by U.S. citizens will be voluntary. As is the case in the air pilots, U.S. citizens may request an alternative inspection process rather than being photographed. The alternative process is no different than what happens absent this rule—an airline employee verifies the traveler's passport information and will contact CBP if they are concerned with the validity of the passport or the identity of the passport holder. Based on recent experiences under various pilots, and because the biometric process is expected to save time, CBP does not expect many to request the alternative process. Biometrics are captured with minimal inconvenience for the traveler and under the biometric exit pilot programs it has been extremely rare for travelers to decline to be photographed. We estimate the opt-out rate through reference to the Transportation Security Agency (TSA)'s biometrics pilot. TSA has recently begun testing facial recognition at some locations, comparing the photographs of travelers to CBP's gallery. During the test, TSA has made clear through signage that it was optional and the TSA agent asked travelers whether they wanted to opt out. TSA tracked the number of opt outs over two days in the summer of 2019 and found an opt-out rate of 0.18 percent across more than 13,000 travelers. We adopt this rate as our estimate for U.S. citizens who will opt out of biometric collection under this rule. We request comment on this assumption. CBP will continue to gather available data, to the extent possible on the opt-out rates as it continues its pilots until this rule is finalized and will update this assumption for the final rule. Table 5 shows the projected number of U.S. citizens who will be subject to photographs, excluding the 0.18 percent who we assume would request an alternative process.

TABLE 5—2020–2024 PROJECTED OUTBOUND U.S. CITIZENS SUBJECT TO BIOMETRICS

Year	U.S. citizen travelers
2020	11,266,533
2021	23,276,657
2022	36,171,926
2023	50,013,715
2024	62,885,370

3. Costs

We next analyze the costs of the biometrics process both for the pilot period and the nationwide deployment period. Because the various pilots have started at different times and new pilot locations are still being set up we focus on the unit costs for the pilot time period. For the regulatory time period, CBP estimates, to the extent data is available, the total projected costs and cost savings that result from the gradual nationwide expansion of the collection of photographs at exit and entry.

Pilot Period

As discussed above, CBP conducted a time in motion study during the initial biometric exit pilot. This study estimated that the biometric identity verification process added 9 seconds to a traveler's departure time.⁸⁶ We monetize the travelers' time burden using the Department of Transportation's recommended hourly wage rates for all-purpose air travel, \$47.10.⁸⁷ The opportunity cost per traveler is approximately \$0.12.

⁸⁶ During the initial pilots, the biometric verification process was done separately from the airline scan of the travelers' boarding passes. In some pilots, and in the regulatory period, biometric identification will be fully integrated into the boarding process, which will save the travelers time. See the benefits section for a discussion of the time savings in the regulatory period.

⁸⁷ Source: U.S. Department of Transportation, Office of Transportation Policy. *The Value of Travel Time Savings: Departmental Guidance for Conducting Economic Evaluations Revision 2 (2016 Update)*, "Table 4 (Revision 2—2016 Update): Recommended Hourly Values of Travel Time Savings for Intercity, All-Purpose Travel by Air and High-Speed Rail." September 27, 2016. Available at <https://www.transportation.gov/sites/dot.gov/files/docs/2016%20Revised%20Value%20of%20Travel%20Time%20Guidance.pdf>. Accessed October 26, 2020.

Approximately 1,134,000 travelers traveled on flights that were part of the pilot programs in 2017.⁸⁸ Therefore, the approximate opportunity cost for these travelers in 2017 was \$136,080. Similar numbers are expected for 2018 and 2019.⁸⁹

Participation in the biometric exit pilot programs is voluntary for U.S. citizens, who may request an alternative inspection process. As discussed earlier, we estimate 0.18 percent of U.S. citizens request an alternative process. In the event a U.S. citizen elects not to be photographed at airports where CBP is conducting biometric exit verification, an airline gate agent will perform a manual review of the passport. If there is some question as to the authenticity of the passport or whether the person presenting the passport is the owner of the passport, the airline will contact CBP for additional inspection, which would take longer than the biometric process. However, as this is the current procedure without the rule, there is no new opportunity cost associated with this requirement.

CBP has borne the bulk of the costs of the biometric verification pilot programs. CBP's costs include the cost to develop the facial recognition capabilities, the cost of the hardware for the expansion of the biometric exit pilot programs and the annual operation and maintenance costs of that hardware, the cost of the required network upgrades, and the opportunity cost of the CBP officers who collect the biometrics. Table 6 shows the estimated hardware and software costs for the expansion of the biometric exit pilot programs. The expansion hardware is the cost of the hardware that has been placed during the initial pilot. The Biometric Pathway Development Costs are the software development costs required to create a service to operate facial recognition at airport international departure gates used for the biometric exit pilot

⁸⁸ Source: CBP's Borderstat Database.

⁸⁹ The first pilot began at a single airport in 2016. Because we do not have quality data for 2016 and because a relatively small number of flights and travelers were affected by this pilot, we begin our quantification of the pilot period in 2017, acknowledging that there were some small costs and benefits in 2016 as well.

programs and will serve as the foundation for use as the program becomes operational on a nationwide basis. This development includes creating open interfaces to accommodate multiple biometric collection devices, adapting current systems to survey and collect traveler images from existing data, transferring data between the point of collection and the CBP back-end, processing biometric data, and creating reports for awareness and analysis. Facial Recognition Technology Expansion Hardware O&M are the annual operations and maintenance costs for the hardware at the airports participating in CBP's biometric exit pilot programs. Matching Licenses are costs to procure back-end enterprise matching licenses for the airports participating in CBP's biometric exit pilot programs from the developer. It is anticipated that these costs are spread over the first two years of use. After the first two years, we estimate no further costs for CBP as airlines will be

buying their own hardware, which is expected to have a useful life longer than the period of analysis. During the pilot period, CBP installed the facial recognition technology hardware into existing airport gates at CBP's expense. Though the hardware does not use a significant amount of electricity, airports were concerned that their networks did not have sufficient bandwidth to accommodate the matching software. CBP has added additional capacity to allow for the needed bandwidth. This is included in the Cloud Hosting costs listed in Table 6. CBP also bears the opportunity costs of assigning CBP Officers at each of the biometric exit pilot program flights. Two CBP Officers are assigned to each flight, and it takes an hour for each of them to process the travelers on a flight. There were 18 daily flights that were part of the initial biometric exit pilot programs (the initial pilot period), and staffing that number of flights takes

approximately 13,140 hours of officer time (18 flights per day × 365 days per year × 2 officers). According to CBP's position model, the average loaded wage rate for a CBP Officer is \$63.80 per hour.⁹⁰ We therefore estimate that it costs approximately \$838,000 per year in officer time costs. Table 6 shows CBP's estimated pilot costs for 2017–2019. These costs are based on the initial pilot period. The Air Technology Development, Air Technology Operations and Maintenance, and Biometric Pathway Development and Matching Licenses are fixed costs that will not change if the pilot is expanded to other flights. The remaining costs are variable and will increase when the pilot is expanded. The total variable cost over the three-year period is \$44,074,000 or an average of \$1,358,000 per year. The initial pilot period covered 18 scheduled flights per day. Dividing by 18 flights, the annual variable pilot cost to CBP is \$80,657 per flight.

TABLE 6—CBP COSTS (UNDISCOUNTED THOUSANDS OF 2017 DOLLARS)—PILOT

Cost category	2017	2018	2019
Biometric Entry-exit—Air Technology Development	44,447	58,642	44,286
Biometric Entry-exit—Air Technology Operation & Maintenance	10,661	19,693	24,066
Facial Recognition Technology Expansion Hardware	804
Biometric Pathway Development—Facial Recognition Technology Expansion	8,104
Facial Recognition Technology Expansion Hardware O&M	243
Cloud Hosting—Facial Recognition Technology	90	90	90
Matching Licenses	567	567	567
CBPO Time Cost	838	838	838
Total	65,512	80,073	70,090

In summary, the biometric exit pilot programs have resulted in costs to travelers and CBP. Table 7 shows the

total costs during the pilot period. The unit cost per additional traveler would be 12 cents per departure. Annual costs

to CBP per daily-scheduled flight added would be approximately \$81,000 per flight.

TABLE 7—SUMMARY OF PILOT COSTS
[Undiscounted thousands of \$2017]

Year	2017	2018	2019
Traveler Costs	\$136	\$136	\$136
CBP Costs	65,512	80,073	70,090
Total Costs	65,648	80,209	70,226

Regulatory Period
The estimated costs during the regulatory time period (2020–2024) are substantially different than those in the pilot period. During the regulatory period, CBP will enter into partnerships with carriers and airports to streamline the process and eliminate redundancies.

Facial recognition will be integrated into the boarding process and will result in time savings for all parties (see the benefits section below for more information), rather than a cost. As occurs today, CBP will continue to be available to adjudicate any issues.

The hardware cost in the regulatory period will be borne by the carriers and airports who partner with CBP.⁹¹ CBP will give carriers and airports access to its facial recognition system and the carriers and airports will choose (and pay for) the hardware that best fits their needs. While this partnership is

⁹⁰ Source: CBP's Office of Finance Position Model.

⁹¹ Costs to carriers and airports are limited to hardware costs. During the pilot period, carriers and airports have not needed additional staff, nor

has there been a need for additional training as the system is intended to be integrated with the airline or airport departure control system.

voluntary, CBP expects that all commercial carriers and major airports will elect to participate within five years. As discussed above, we assume that the biometric exit process will be expanded by 20 percent each year. In total, there are approximately 2,500 departure gates that will need facial recognition hardware installed, so we assume that carriers and airports will install the hardware at 500 departure gates each year.⁹² The cost of the hardware will vary by carrier and airport and may depend on how they intend to use the hardware. For

example, if they intend to use it only at the exit gate, costs will be lower than if they also choose to use it for their own purposes, such as simplifying the baggage drop and claim process or for access into elite traveler lounge areas. CBP believes costs will range from \$5,000 to \$20,000 per departure gate, based on its experience procuring equipment during the pilot period. We use \$20,000 as the primary estimate for the analysis as carriers and airports have expressed interest in using facial recognition for other purposes and are likely to purchase higher end cameras

that will give them flexibility. It is also possible that costs will go down substantially over time as carriers and airports develop better and cheaper hardware. For example, the Washington Metropolitan Airports Authority has begun using modified iPads for its new facial recognition pilot.⁹³ If this hardware is successful and is adopted more broadly, the cost to carriers and airports would drop substantially. We request comment on these estimates. Carrier and airport hardware estimated costs for the regulatory period are reported in Table 8.

TABLE 8—2020–2024 CARRIER AND AIRPORT HARDWARE COSTS
[Undiscounted thousands of \$2017]

Year	Gates	Cost—low	Cost—high
2020	500	2,500	10,000
2021	500	2,500	10,000
2022	500	2,500	10,000
2023	500	2,500	10,000
2024	500	2,500	10,000

Much of the costs to develop the facial recognition technology was incurred by CBP during the pilot period, but CBP will continue to incur some additional technology costs as facial

recognition is expanded nationwide. In the first two years of the regulatory period, CBP expects to incur costs for final development and deployment of the technology. Throughout the period

of analysis, CBP will also incur operations and maintenance costs. CBP's costs in the regulatory period are summarized in Table 9 below.⁹⁴

TABLE 9—2020–2024 CBP TECHNOLOGY COSTS
[Undiscounted thousands of \$2017]

Year	Development	O&M	Total
2020	43,449	21,802	65,251
2021	0	39,585	39,585
2022	0	31,605	31,605
2023	0	32,383	32,383
2024	0	33,178	33,178

Most aliens are already subject to a biometric requirement at entry, so there will be no change for those already photographed at entry. U.S. citizens are not currently required to be photographed at entry, and this rule does not change that. CBP continues to explore ways to streamline traveler processing upon entry and is developing pilot programs, often in coordination with industry partners, to help inform its decisions. CBP has been testing facial recognition to improve the arrival process. For example, CBP has implemented Simplified Arrival for travelers entering the United States at various airports. Under this new process, CBP uses facial recognition

instead of scanning travelers' travel documents. The photograph is taken as the traveler approaches the CBP Officer for primary inspection. If there is a match, the officer does not need to scan the traveler's documents. If there is no match, the officer proceeds with the current process of scanning the documents. Simplified Arrival is still in its infancy, but early analysis indicates that this could save approximately 15 seconds of processing time per traveler on average, an estimate that could change once it has been tested further. As travelers' wait times are affected by not only their own processing time but also the processing time of everyone else ahead of them in line, this could

have a very significant time savings for travelers. In fact, airlines have indicated that they are hopeful that Simplified Arrival will lead to even more time savings than the new exit procedure. At this time, there is not enough information to adequately evaluate the possible savings that results from Simplified Arrival.

Although CBP plans to eventually revamp the admission process to speed the inspection of arriving travelers and will likely use photographs in this process, this process would only be implemented if it results in a net time savings for travelers. In addition, U.S. citizens would generally have the option not to be photographed (though they would then not get the benefits of

⁹² Source: Subject matter expert estimate. Communication with the Office of Field Operations on June 26, 2018.

⁹⁴ Source: CBP Biometric Entry-Exit Life Cycle Cost Estimate. September 20, 2017.

the shorter inspection process). Therefore, this rule imposes no cost on most aliens or U.S. citizens at entry. To the extent that CBP is able to extend its facial recognition capabilities to improve the entry process, it would result in time savings for all travelers and CBP. CBP will conduct a study of the effect of Simplified Arrival on wait times and will include the results in the analysis for the final rule.

This rule provides that all aliens may be required to be photographed at entry and/or exit. Under the current regulations only certain aliens are subject to such requirements. This expansion of the biometric entry-exit verification program will enable CBP to require all aliens to be photographed at entry and exit. There are no additional hardware costs for carriers or airports who photograph travelers. As discussed later in the Cost Savings section, the regulatory facial recognition exit process will result in opportunity cost savings for travelers. The savings to currently exempted aliens is included in the total cost savings for travelers in that section.⁹⁵ CBP will initially focus primarily on the air environment. In the near term, CBP also plans to gradually scale up efforts in the land and sea environments to determine the best way to fully implement biometric entry-exit in those environments pursuant to this rule. Most aliens are already photographed when entering by air. CBP is testing various biometric collection options, such as the Simplified Arrival process described earlier, that would apply to aliens who are not currently subject to photographs. CBP anticipates that such a process, once implemented on a nationwide basis, will result in a net time savings for travelers. Therefore, that change will impose no new costs on these currently exempted aliens.

This rule would also allow for the implementation of a biometric exit capability at land border ports. CBP already has authority to test biometric collection at land borders through pilot programs that are not subject to the limits that air and sea pilots have. CBP will continue testing biometric collection at land border ports, but a nationwide biometric exit solution at

the land border in all modes of transportation is not feasible at this time and there is no near-term plan for such an expansion. As CBP already has the ability to test biometric collection at land border ports without a limit on the number of locations, this rule has no practical effect in that environment except that it would include currently exempt aliens in those tests. For any potential future process to be workable in the land environment it needs to be done in a way that minimizes the burden on the public and the ability to expand the pilots will help inform CBP on how to accomplish that. Because there is no near-term plan to expand the general requirement for biometrics to land and sea beyond pilots, we focus the analysis on the effects of the pilots. This analysis does not account for the costs, cost savings, or benefits of some future expansion to land and sea beyond pilot programs because it is impossible to predict what that expansion would entail.

The ability to collect photographs from currently exempt aliens will enhance CBP's ability to test various exit concepts at the land border. For example, CBP is considering testing biometrics of pedestrians exiting the United States on a limited basis under various scenarios. CBP has not yet determined this process, but it would likely involve providing notice that U.S. citizens may opt out of the test by approaching a CBP officer and requesting an alternative process. As this pilot is still being developed, we do not have a firm estimate of the time it will take to capture photographs or how many travelers would be affected. We note, however, that their time delay and opportunity cost will be no greater than the 9 seconds and 12 cents estimated above for the biometric exit pilot programs process.⁹⁶ When CBP begins requiring biometrics from all aliens exiting at the land border (*i.e.*, not through a limited pilot program), to the extent that requirement lengthens entry or exit processing, there will be additional opportunity costs for the travelers and CBP. CBP is endeavoring to use biometrics as a way to streamline the entry and exit process, and it believes any additional net time it will

add to travelers will be minimal or non-existent. Depending on the particulars of the biometric collection, there may also be significant hardware and infrastructure costs to CBP.

This rule would add a provision that aliens may be photographed upon exit and entry. While this provision applies at all types of ports of entry, more testing will be conducted before full implementation for land and sea ports of entry and private aircraft. For the near future the photographic requirement will apply primarily at airports. Most aliens arriving by air are already photographed at entry and have their fingerprints captured, and such aliens already have their passport photographs examined visually when entering or exiting the United States. In addition, most aliens are photographed if they are required to apply for a U.S. visa. A facial recognition system would compare the traveler's face to the previously taken photographs to ensure there is a match. CBP acknowledges that the traveler may perceive this process to be a loss of privacy, which is a cost of the rule. Facial comparison has presented CBP with the best biometric approach because it can be performed relatively quickly, with a high degree of accuracy, and in a manner perceived as less invasive to the traveler (*e.g.*, no actual physical contact is required to collect the biometric). This approach, as with all biometric collections, poses privacy risks which, as discussed in the PIA for the TVS,⁹⁷ are mostly mitigated. Nevertheless, CBP's phased deployment has shown the use of facial recognition technology is successful in a variety of scenarios that meet CBP's business requirements while requiring minimal infrastructure investments and space redesign and having minimal impacts on travelers. Moreover, the phased deployment has allowed CBP to ensure that biometrics are collected, maintained, and used consistent with applicable privacy laws and best practices.

Table 10 summarizes the monetized costs of the regulatory period. These estimated costs are only for air exit. Any costs from an unknown future deployment at land or sea are not included in these estimates.

⁹⁵ Our data on the travelers that are affected by the pilot do not separate out the portion of travelers who are out of the scope of the pilot. We do not have separate data, for example, on the number of travelers who are under the age of 14. Because of this, the estimates in our analysis capture the impacts on all travelers, including the currently out of scope travelers.

⁹⁶ The process currently being used for pedestrians is similar to what is being used at airports. For vehicles, CBP is working on various concepts and is committed to a system that would not significantly increase wait times at the land border.

⁹⁷ See DHS/CBP/PIA-056, Privacy Impact Assessment for the Traveler Verification Service, issued Nov. 14, 2018, available at https://www.dhs.gov/sites/default/files/publications/privacy-pia-cbp030-tvs-november2018_2.pdf.

TABLE 10—2020–2024 REGULATORY COSTS
[Undiscounted thousands of \$2017]

Year	CBP	Carriers/ airports—low	Carriers/ airports—high	Total—low	Total—high
2020	65,251	2,500	10,000	67,751	75,251
2021	39,585	2,500	10,000	42,085	49,585
2022	31,605	2,500	10,000	34,105	41,605
2023	32,383	2,500	10,000	34,883	42,383
2024	33,178	2,500	10,000	35,678	43,178

4. Cost Savings

In the regulatory period, CBP and airlines expect that the use of facial recognition will speed the entry and exit processes considerably, resulting in time savings for travelers and shorter plane turnaround times for carriers. Various airlines have been testing facial recognition models similar to what is planned under this rule. In one test, an airline partner has been able to board an Airbus A–380 with 350 travelers in only 20 minutes.⁹⁸ Another airline partner has reported to CBP that their baseline loading time for an A–380 is 45 minutes. In the test of the integrated facial recognition system used at the Orlando Airport, travelers have experienced a 15 minute time savings. According to one news article, this is down from 30 minutes for a 240-passenger plane.⁹⁹ In both tests, boarding times are reduced by approximately 50 percent. These estimates are for some of the largest

planes carrying travelers and much of the time savings is due to a process that allows boarding through several doors. Smaller planes do not have as many doors so the time savings for their travelers is likely to be lower.

Additionally, these initial implementation flights and locations were selected in part based on ease of implementation. Using a 50 percent or 15-minute time savings for all flights based on the savings in these pilots would overstate the time savings due to this rule. Because of the uncertainty surrounding the time savings, we present a range of time savings estimates. For the low end of the range, which serves as our primary estimate, we assume that average time savings due to this rule will be 5 minutes per traveler, or one third of the savings airline partners observed during the pilot. For the high end of the range, we assume that the time savings would be 10 minutes, or two thirds of the savings from the pilot. We request comment on

these assumptions. CBP will be conducting time studies to refine our estimates and will use updated estimates, and will consider any public input on the estimates at the final rule stage.

To estimate the value of time savings of air travelers at exit due to this rule, we apply the assumed range of time savings (5 to 10 minutes) to the traveler projections from Table 4.¹⁰⁰ We then apply the \$47.10 hourly value of time for these travelers to determine the total opportunity cost savings as a result of this rule. Table 11 shows the hours saved at air exit due to this rule during the 5-year regulatory period of analysis. Table 12 shows the value of this time savings. As shown, in the primary estimate the savings range from \$101 million in the first year to \$565 million in 2024, when full nationwide deployment is expected to occur at air exit. These estimated savings are for air exit only.

TABLE 11—2020–2024 PROJECTED TIME SAVINGS FOR AIR TRAVELERS AT EXIT
[Hours]

	2020	2021	2022	2023	2024
U.S. Citizens—Primary	938,878	1,939,721	3,014,327	4,167,810	5,240,447
U.S. Citizens—High	1,877,756	3,879,443	6,028,654	8,335,619	10,480,895

¹⁰⁰ As a reminder, we assume that a small portion of U.S. citizens will request an alternative inspection. These costs include only the U.S. citizens who undergo the facial recognition process.

In addition to the savings to travelers, boarding an aircraft more quickly has a substantial benefit to airlines as they will be able to turn around aircraft more quickly. According to one study, reducing turn time by 10 minutes could lead to an improved aircraft utilization rate of 8.1 percent.¹⁰¹ If there is a sustained decrease in turn times as a result of this rule, carriers could eventually reduce the number of aircraft in their fleets. In addition, to the extent the shorter turn time saves airline staff time, airlines could experience additional savings.

5. Benefits

The primary benefit of this rule is the security benefit of having biometric confirmation of the identification of those leaving the country by air. CBP has very good records of those legally entering the United States by air, land and sea. These records are enhanced for aliens through the collection of biometrics at entry. At departure, CBP has a record of the names of everyone leaving the United States by air or sea. However, these records are not verified with the same accuracy as at entry. Comparing biometrics at departure will enable CBP to know with greater certainty the identity of those leaving the United States, which will help detect and deter visa overstays and visa fraud; help identify persons attempting to fraudulently use travel documents; and alert authorities to criminals or known or suspected terrorists prior to boarding. Studies show that humans are best at identifying imposters when paired with technology.¹⁰² CBP believes that facial recognition is the best available method for biometric identification as it is highly accurate, unobtrusive, and cost effective. This rule would expand CBP's ability to implement this biometric exit capability at additional locations before eventually implementing it nationwide.

An alien admitted to the United States on a visa or through the Visa Waiver Program (VWP) is permitted to remain in the country for the lawful period of admission (in the case of a VWP traveler, 90 days). An overstay occurs when a person enters the United States legally on a visa or through the VWP, but does not leave within the prescribed time period. Some aliens who overstay their lawful period of admission remain in the United States illegally for years. For Fiscal Year 2018, DHS estimates that about 666,500 aliens who entered by air or sea and were expected to depart that year overstayed their lawful period of admission, or 1.22 percent of aliens arriving by air and sea.¹⁰³ These figures are estimates because without biometrics, CBP cannot verify with certainty the identity of those leaving the United States. For example, many aliens sharing a common name may enter the United States in a given year. Biometrics allow CBP to better differentiate those who have identical names and basic biographic information, provide checks against the use of fraudulent identity documents, and better understand whether any particular alien left the United States on time or if the departing alien was a different person with the same name. Without biometrics it is difficult to know whether the alien leaving did so on time or if the departing alien was a different person with the same name.

Similarly, there are ways to exploit the current exit system to avoid the detection of passport and visa fraud. Currently, those departing the United States must present their boarding pass and identification when being screened by TSA. Before boarding, travelers also need to present their travel documents and boarding passes to the carrier at the gate, who visually reviews the travel documents and validates the boarding pass with the carrier's ticketing system. However, once in the sterile area of the terminal, although travelers may be subject to random identification checks, travelers generally do not have their photo identification scrutinized again before boarding the aircraft. This has allowed for passport and visa fraud.¹⁰⁴ During the boarding process, in addition to addressing customer service issues, such as baggage and seat assignments, gate agents are also required to check

¹⁰³ Source: Internal Database, as reported in the FY 2016201820162018 Entry/Exit Overstay Report. Available at https://www.dhs.gov/sites/default/files/publications/19_0417_fy18-entry-and-exit-overstay-report.pdf. Accessed September 10, 2019.

¹⁰⁴ Note: TSA subjects all travelers entering the sterile area of an airport, and their carry-on belongings, to security screening at the checkpoint.

travel documents during what can often be a hectic boarding process. Using facial recognition technology reduces the number of documents that the gate agent needs to review thereby increasing the effectiveness of the limited fraudulent document detection and impostor identification training gate agents receive. Furthermore, people are most effective at identifying fraud when paired with technology. The facial recognition pilots have helped identify 77,000 visa overstays and 240 individuals who previously entered the United States without inspection.¹⁰⁵ CBP has also used facial recognition to identify several imposters attempting to fraudulently enter the United States and expects to have similar success on exit.¹⁰⁶

Having an accurate accounting of visa overstays is important both for reasons of equity and government resources. The United States has set up a system whereby aliens may visit by legal means and the vast majority follow this system conscientiously, though it can sometimes take a significant amount of time to proceed through the immigration process. It is not equitable for these legitimate travelers and immigrants when others circumvent the legitimate process through illegal visa overstays. The success of those who are able to overstay their visas without consequences only encourages others to attempt to do the same. Further, overstays place a strain on government resources as the government must investigate and remove those who are not here legally. Compounding this problem is a lack of true identity verification, as DHS must spend time determining whether an individual actually overstayed his/her lawful period of admission before beginning the actual investigation. Biometric identity verification will give DHS the information it needs about those who have overstayed their visas and will allow it to focus on these individuals.

The public also has an interest in accurate identification at departure for law enforcement and national security reasons. Security agencies maintain an

Available at <https://www.oig.dhs.gov/sites/default/files/assets/2018-09/OIG-18-80-Sept18.pdf>.

¹⁰⁶ Source: CBP press release: *Second Imposter in Three Weeks Caught by CBP Biometric Verification Technology at Washington Dulles Airport*. Available at <https://www.cbp.gov/newsroom/local-media-release/second-impostor-three-weeks-caught-cbp-biometric-verification>. Accessed October 26, 2020.

extensive database of known and suspected terrorists, but sometimes they have incomplete information about them. In some cases, they may have photographs on a person of interest, but no name. In other cases, someone could be traveling under a false name with false documents. Having biometric identification would assist CBP in identifying these individuals during the travel process and taking appropriate action. Similarly, biometric identification would help CBP identify those wanted for a crime or who are the subject of a court order (such as in a child custody dispute) and intercept them before they are able to leave the country.

As discussed in the Costs section above, CBP is exploring various ways to use biometrics to streamline the entry process. This rule allows for the expansion of these tests as it provides the framework for CBP to require all aliens to be photographed at entry. Under the current regulations, certain

aliens are not subject to this requirement, making a full evaluation of the concept impossible. Early analysis of the Simplified Arrival pilot suggests that it could save 15 seconds of processing time for all participating travelers, including U.S. citizens who voluntarily participate. CBP is expected to experience time savings as well, but it is unknown how much time it will save. CBP is expanding Simplified Arrival and will be doing time-in-motion studies to determine the effect on processing and wait times. We will include a discussion of the results in the final rule.

The development of a reliable facial recognition system could also have benefits for other government agencies. CBP is coordinating with TSA to test facial recognition to streamline its processes. Among other things, TSA is considering using facial recognition to improve the TSA PreV™ process. TSA also plans to explore other ways facial recognition can improve security and

traveler processing.¹⁰⁷ TSA's use of CBP's facial recognition system is still in its planning stage, so it is impossible to estimate any savings that could result. To the extent that TSA is able to improve security or reduce processing times for travelers, that would be an additional cost savings or benefit of this rule.

6. Net Benefits

As discussed in the cost section, the biometric exit pilot programs have resulted in costs to travelers and CBP. From 2017–2019, travelers experienced approximately \$136,000 in opportunity costs per year. CBP spent \$228 million to develop, maintain, and operate the initial pilots from 2017 to 2019. The unit costs to expand these pilots would be 12 cents per departure for travelers and \$81,000 annually per daily-scheduled flight for CBP. These costs are summarized in Table 13.

TABLE 13—TOTAL PILOT COSTS 2017–2019

[Thousands of 2017 U.S. dollars]

	3% Discount rate	7% Discount rate
Total Present Value Cost	\$215,222	\$199,887
Annualized Cost	76,088	76,159

During the regulatory time period, the costs will be split by carriers and airports who will install the facial recognition hardware at gates and CBP, which incurs development and operations and maintenance costs. Table 14 shows the discounted costs of the

regulatory time period. As shown, costs over the 5-year period of analysis range from \$211 to \$233 million, depending on the discount rate used. Annualized costs range are \$51 million. Unquantified costs include the costs of expanding photographic collection of

currently exempt aliens at entry. These costs are difficult to quantify as the Simplified Arrival concept has not yet been widely tested and this expansion will only occur if it is determined that the aliens experience net savings as a result.

TABLE 14—TOTAL REGULATORY COSTS 2020–2024

[Thousands of 2017 U.S. Dollars]

	3% Discount rate	7% Discount rate
Total Present Value Cost	\$232,776	\$210,719
Annualized Cost	50,827	51,393

This rule's establishment of a biometric identification system at departure will have benefits, including cost savings, to CBP and the public. Travelers will experience a time savings through a shorter boarding process. Table 15 shows the discounted savings as a result of this rule. As shown, CBP

estimates that this rule will save travelers opportunity costs of between \$1.289 and \$1.480 billion over the 5-year period of analysis. On an annualized basis, this rule will save between \$314 and \$323 million. In addition, carriers may experience turn around cost savings and travelers may

experience additional savings from a new Simplified Arrival process. Further, this rule will allow CBP to identify travelers with greater certainty, which will reduce travel document fraud. It will also give CBP a more accurate record of those who overstayed their visas.

¹⁰⁷ See TSA's Biometric Roadmap, available at https://www.tsa.gov/sites/default/files/tsa_biometrics_roadmap.pdf.

TABLE 15—TOTAL REGULATORY COST SAVINGS 2020–2024 FOR BOTH ALIENS AND U.S. CITIZENS
[Thousands of 2017 U.S. Dollars]

	3% Discount rate	7% Discount rate
Total Present Value Cost Savings	\$1,480,137	\$1,288,814
Annualized Cost Savings	323,195	314,330

Table 16 shows the net monetized cost savings for the rule's primary estimate. As shown, the rule will result in total net savings ranging from \$1.078 million to \$1.247 million, depending on the discount rate used. On an

annualized basis, savings will range from \$262 to \$272 million. Accounting statements 1 and 2 show the costs, cost savings, and benefits of the rule for the pilot period and the regulatory period, respectively. The net cost savings listed

in this table is for air exit only. Any costs, cost savings, and benefits from an unknown future deployment at land or sea are not included in these estimates.

TABLE 16—NET REGULATORY COSTS SAVINGS 2020–2024
[Thousands of 2017 U.S. Dollars]

	3% Discount rate	7% Discount rate
Total Present Value Cost Savings	\$1,247,361	\$1,078,094
Annualized Cost Savings	272,367	262,937

ACCOUNTING STATEMENT 1—PILOT PERIOD (2017–2019)
[Thousands of \$2017]

	3% Discount rate	7% Discount rate

Cost Savings:		
Annualized monetized cost savings	323,195	314,330.
Annualized quantified, but non-monetized cost savings.	None	None.
Qualitative (non-quantified) cost savings	Shorter plane turn times. Potential additional savings at entry.	Shorter plane turn times. Potential additional savings at entry.
Benefits:		
Annualized monetized benefits	None	None.
Annualized quantified, but non-monetized benefits.	None	None.
Qualitative (non-quantified) benefits	Enhanced security and identification of visa overstay.	Enhanced security and identification of visa overstay.

7. Alternatives Analysis

CBP considered many types of biometrics and has concluded that partnering with carriers and airports to capture facial images is the most viable large scale solution as it is highly effective, cost effective, and less disruptive than other possible methods. Two other methods that were considered were fingerprint and/or iris scans and using CBP personnel and equipment to collect the facial scans.

CBP has tested fingerprint and iris scans on a limited basis to determine its effectiveness and scalability. CBP found that while these scans are highly effective in finding matches when data is available, they have numerous problems. First, CBP often lacks data to match against. Although CBP often has fingerprints from entry that it can use to match a departing alien, it does not typically capture iris scans. Nor are these biometrics typically included in passports. To use iris scans, CBP would need to establish a new way to capture a baseline iris scan to compare against at exit, which is not feasible. Fingerprint and iris scans are also more time consuming and the equipment needed is more expensive than facial recognition. Finally, these methods are more intrusive than taking a picture, so they present additional privacy concerns.

CBP also considered purchasing the facial recognition hardware and using CBP personnel to capture the facial images rather than having the carrier or airport purchase and operate it. This alternative would essentially expand the initial pilot nationwide. As discussed above, this would add an opportunity cost of 12 cents per traveler departure and \$81,000 annually in costs for CBP per daily-scheduled flight. More importantly, since this would add a step to the boarding process rather than simplify the process, travelers would forgo the time savings estimated above and valued at \$310 million per year. Further, this alternative approach would eliminate the advantage of giving carriers and airports access to the facial recognition capabilities, which allows them to use it for other purposes.

B. Regulatory Flexibility Act

The Regulatory Flexibility Act (5 U.S.C. 601 *et. seq.*), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, requires an agency to prepare and make available to the public a regulatory flexibility analysis that describes the effect of a proposed rule on small entities (*i.e.*, small businesses, small organizations, and small governmental jurisdictions) when the agency is required to publish a

general notice of proposed rulemaking for a rule.

The Regulatory Flexibility Act requires agencies to consider the impacts of their rules on small entities. This proposed rule would only directly regulate travelers. Travelers are individuals and are not considered to be small entities by the RFA. Carriers are indirectly affected by the rule as the rule does not place any requirements on the carriers, nor does it grant them any new rights. Any participation by carriers is strictly voluntary and CBP expects that carriers will only participate if they believe the benefits of participation outweigh the costs. CBP therefore certifies that this rule will not result in a significant economic impact on a substantial number of small entities.

C. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507), an agency may not conduct, and a person is not required to respond to, a collection of information unless the collection of information displays a valid control number assigned by OMB. The collections of information related to this NPRM, including biometric exit, are approved by OMB under collection 1651–0138.

D. Privacy

CBP will ensure that all legal requirements (*e.g.*, the Privacy Act of 1974, Section 208 of the E-Government Act of 2002, and Section 222 of the Homeland Security Act of 2002, as amended) and applicable policies are adhered to during the implementation of the biometric entry-exit system.

CBP retains biographic records for 15 years for U.S. citizens and lawful permanent residents and 75 years for non-immigrant aliens, consistent with the DHS/CBP–007 Border Crossing Information (BCI) System of Records Notice (SORN).¹⁰⁸ Records associated with a law enforcement action are retained for 75 years in accordance with the DHS/CBP–011 TECS SORN.¹⁰⁹ CBP retains biographic entry and exit records in the ADIS for lawful permanent residents and non-immigrant aliens, consistent with the SORN.¹¹⁰

Since 2004, CBP has collected biometric information in the form of fingerprints and a facial photograph on entry for in-scope travelers (pursuant to

8 CFR 235.1); CBP transmits this information to the DHS OBIM's IDENT, where it is stored.

Under CBP's facial recognition based entry-exit program, CBP's biographic data retention policies remain the same. CBP temporarily retains facial images of non-immigrant aliens and lawful permanent residents for no more than 14 days within ATS–UPAX for confirmation of travelers' identities, evaluation of the technology, assurance of accuracy of the algorithms, and system audits. However, if the TVS matching service determines that a particular traveler is a U.S. citizen, CBP holds the photo in secure CBP systems for no more than 12 hours after identity verification, in case of an extended system outage, and then deletes it.

Photos of all travelers are purged from the TVS cloud matching service within a number of hours, depending on the mode of travel. Photos of in-scope travelers are retained in IDENT for up to 75 years, consistent with existing CBP records that are housed in IDENT in accordance with the BCI SORN.

As discussed in Section III, CBP will begin implementation of the biometric entry-exit system through the TVS. CBP has issued a number of PIAs for the TVS, and earlier traveler verification tests, which outline how CBP will ensure compliance with the DHS Fair Information Practice Principles (FIPPs) as part of the biometric entry-exit system.¹¹¹ In November 2018, CBP published a revised comprehensive TVS PIA, which, along with the previous versions, examines the privacy impact and mitigation strategies of TVS as it relates to the Privacy Act and the FIPPs.¹¹² The FIPPs address how information being collected is maintained, used and protected, particularly to issues such as security, integrity, sharing of data, use limitation and transparency. The comprehensive TVS PIA provides background information on early test deployments. Additionally, it explains how CBP's use of facial recognition technology complies with privacy requirements at both entry and exit operations in all modes of travel where the technology is currently deployed.

¹¹¹ See generally DHS/CBP/PIA–056, Privacy Impact Assessment for the Traveler Verification Service Related PIAs, <https://www.dhs.gov/publication/departure-information-systems-test>, issued Nov. 14, 2018, available at https://www.dhs.gov/sites/default/files/publications/privacy-pia-cbp030-tvs-november2018_2.pdf.

¹¹² See DHS/CBP/PIA–056, Privacy Impact Assessment for the Traveler Verification Service, issued Nov. 14, 2018, available at https://www.dhs.gov/sites/default/files/publications/privacy-pia-cbp030-tvs-november2018_2.pdf.

¹⁰⁹ *Id.*

¹¹⁰ Associated ADIS SORNS are listed at <https://www.dhs.gov/publication/arrival-and-departure-information-system> and available at <https://www.dhs.gov/system-records-notices-sorns>. Last Accessed October 26, 2020.

As discussed in Section III.E, CBP is conducting a number of biometric exit pilot programs at the land border. CBP will issue PIAs for these pilot programs, which will be made publicly available at: www.dhs.gov/privacy.

E. National Environmental Policy Act

DHS Directive (Dir.) 023–01 Rev. 01[1] establishes the procedures that DHS and its components use to comply with the National Environmental Policy Act (NEPA) and the Council on Environmental Quality (CEQ) regulations for implementing NEPA, 40 CFR parts 1500–1508. The CEQ regulations allow Federal agencies to establish, with CEQ review and concurrence, categories of actions (“categorical exclusions”) which experience has shown do not individually or cumulatively have a significant effect on the human environment and, therefore, do not require an Environmental Assessment (EA) or Environmental Impact Statement (EIS). 40 CFR 1507.3(b)(1)(iii), 1508.4. DHS Instruction 023–01–001 Rev. 01 establishes such Categorical Exclusions that DHS has found to have no such effect. Inst. 023–01–001 Rev. 01 Appendix A Table 1. For an action to be categorically excluded, DHS Inst. 023–01–001 Rev. 01 requires the action to satisfy each of the following three conditions: (1) The entire action clearly fits within one or more of the Categorical Exclusions; (2) the action is not a piece of a larger action; and (3) no extraordinary circumstances exist that create the potential for a significant environmental effect. Inst. 023–01–001 Rev. 01 section V.B (1)–(3).

DHS analyzed this action and has concluded that the proposed changes to 8 CFR parts 215 and 235 concerning the collection of biometric data from aliens upon entry and departure falls within DHS’s categorical exclusion A.3, which is set forth in DHS Inst. 023–01–001 Rev. 01, Appendix A, Table 1. Categorical exclusion A.3 covers, among other things, the promulgation of rules that interpret or amend an existing regulation without changing its environmental impacts. Although the changes to 8 CFR parts 215 and 235 will mean that DHS/CBP will be collecting more biometric data, it will not fundamentally alter the manner in which DHS/CBP processes travelers within existing facilities.

F. Signature

The Acting Secretary of Homeland Security, Chad F. Wolf, having reviewed and approved this document, has delegated the authority to electronically

sign this document to Chad R. Mizelle, who is the Senior Official Performing the Duties of the General Counsel for DHS, for purposes of publication in the **Federal Register**.

List of Subjects

8 CFR Part 215

Administrative practice and procedure, Aliens, Travel restrictions.

8 CFR Part 235

Administrative practice and procedure, Aliens, Immigration, Reporting and recordkeeping requirements.

Proposed Amendments to the Regulations

For the reasons discussed in the preamble, DHS proposes to amend 8 CFR chapter I as set forth below:

PART 215—CONTROLS OF ALIENS DEPARTING FROM THE UNITED STATES; ELECTRONIC VISA UPDATE SYSTEM

- 1. The authority section for part 215 is revised to read as follows:

Authority: 6 U.S.C. 202(4), 236; 8 U.S.C. 1101, 1103, 1104, 1184, 1185 (pursuant to Executive Order 13323, 69 FR 241, 3 CFR, 2003 Comp., p. 278), 1357, 1365a, 1365a note, 1365b, 1379, 1731–32; and 8 CFR part 2.

- 2. Amend § 215.8 as follows:

- a. Revise the section heading;
- b. Add a heading for paragraph (a);
- c. Redesignate paragraphs (a)(1) and (2) as paragraphs (a)(2) and (3);
- d. Add new paragraph (a)(1);
- e. Revise newly redesignated paragraph (a)(2) and paragraph (a)(3) introductory text;
- f. In newly redesignated paragraph (a)(3)(ii), remove “(a)(1)” and add in its place “(a)(2) of this section”;
- g. In paragraph (b), add a heading and revise the first sentence; and
- h. In paragraph (c), add a heading.

The revisions and additions read as follows:

§ 215.8 Requirements for biometrics from aliens on departure from the United States.

(a) *Photographs and other biometrics*—(1) *Photographs*. DHS may require an alien to be photographed when departing the United States to determine his or her identity or for other lawful purposes.

(2) *Other biometrics*. DHS may require any alien, other than aliens exempted under paragraph (a)(3) of this section or Canadian citizens under section 101(a)(15)(B) of the Act who were not otherwise required to present a visa or have been issued Form I–94 (see § 1.4 of

this chapter) or Form I–95 upon arrival at the United States, to provide other biometrics, documentation of immigration status in the United States, as well as such other evidence as may be requested to determine the alien’s identity and whether the alien has properly maintained immigration status while in the United States, when departing the United States.

(3) *Exemptions*. The requirements of paragraphs (a)(2) of this section shall not apply to:

* * * * *

(b) *Failure of a non-exempt alien to comply with departure requirements*. An alien who is required to provide biometrics when departing the United States pursuant to paragraph (a)(1) or (2) of this section and who fails to comply with the departure requirements may be found in violation of the terms of his or her admission, parole, or other immigration status. * * *

(c) *Determination of overstay status*. * * *

PART 235—INSPECTIONS OF PERSONS APPLYING FOR ADMISSION

- 3. The authority citation for part 235 is revised to read as follows:

Authority: 6 U.S.C. 218 and note; 8 U.S.C. 1101 and note, 1103, 1158, 1182, 1183, 1185 (pursuant to E.O. 13323, 69 FR 241, 3 CFR, 2003 Comp., p. 278), 1185 note, 1201, 1224, 1225, 1226, 1228, 1357, 1365a, 1365a note, 1365b, 1379, 1731–32; 48 U.S.C. 1806 and note.

- 4. Amend § 235.1 as follows:

- a. In paragraph (f)(1) introductory text, add a heading;
- b. In paragraph (f)(1)(i), add a heading;
- c. Redesignate paragraphs (f)(1)(ii), (iii), and (iv) as paragraphs (f)(1)(iii), (v), and (vi), respectively;
- d. Add new paragraph (f)(1)(ii);
- e. Revise newly redesignated paragraph (f)(1)(iii);
- f. Add new paragraph (f)(1)(iv);
- g. Revise newly redesignated paragraph (f)(1)(v) and paragraph (f)(1)(vi) introductory text; and
- h. In newly redesignated paragraph (f)(1)(vi)(B), remove “(d)(1)(ii)” and add in its place “(f)(1)(iii) of this section”.

The revisions and additions read as follows:

§ 235.1 Scope of examination.

* * * * *

(f) * * *

(1) *Requirements for admission*.

* * *

(i) *Permanent residents*. * * *

(ii) *Photographs*. DHS may require an alien seeking admission to be photographed to determine his or her identity or for other lawful purposes.

(iii) *Other biometrics.* DHS may require any alien, other than aliens exempted under paragraph (f)(1)(vi) of this section or Canadian citizens under section 101(a)(15)(B) of the Act who are not otherwise required to present a visa or be issued Form I–94 (see § 1.4 of this chapter) or Form I–95 for admission or parole into the United States, to provide other biometrics, documentation of immigration status in the United States, as well as such other evidence as may be requested to determine the alien's identity and admissibility and/or whether the alien has properly

maintained immigration status while in the United States.

(iv) *Failure to comply with biometric requirements.* The failure of an alien at the time of inspection to comply with paragraph (f)(1)(ii) or (iii) of this section may result in a determination that the alien is inadmissible under section 212(a) of the Immigration and Nationality Act or any other law.

(v) *Biometric requirements upon departure.* Aliens who are required under paragraph (f)(1)(ii) or (iii) of this section to provide biometrics at inspection may also be subject to the

departure requirements for biometrics contained in § 215.8 of this chapter, unless otherwise exempted.

(vi) *Exemptions.* The requirements of paragraph (f)(1)(iii) of this section shall not apply to:

* * * * *

Chad R. Mizelle,

*Senior Official Performing the Duties of the
General Counsel, U.S. Department of
Homeland Security.*

Employment Authorization for Certain Classes of Aliens With Final Orders of Removal; Proposed Rule

DEPARTMENT OF HOMELAND SECURITY

8 CFR Parts 106, 241 and 274a

[CIS No. 2653–19; DHS Docket No. USCIS–2019–0024]

RIN 1615–AC40

Employment Authorization for Certain Classes of Aliens With Final Orders of Removal

AGENCY: Department of Homeland Security.

ACTION: Notice of proposed rulemaking.

SUMMARY: The U.S. Department of Homeland Security (DHS) is proposing to eliminate employment authorization eligibility for aliens who have final orders of removal but are temporarily released from custody on an order of supervision with one narrow exception. DHS proposes to continue to allow employment authorization for aliens for whom DHS has determined that their removal is impracticable because all countries from whom travel documents have been requested have affirmatively declined to issue a travel document and who establish economic necessity. DHS intends for this rule to reduce the incentive for aliens to remain in the United States after receiving a final order of removal and to strengthen protections for U.S. workers.

DHS is also proposing to clarify that aliens who have been granted a deferral of removal based on the United States' obligations under the United Nations (U.N.) Convention Against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment (CAT) are similarly situated to aliens granted withholding of removal under the Immigration and Nationality Act (INA) and regulations implementing CAT, in that they cannot be removed to the country in question while the order deferring their removal is in place. As such, DHS is proposing to treat aliens granted CAT deferral of removal as employment authorized based upon the grant of deferral of removal.

DATES: Written comments on this proposed rulemaking must be submitted on or before December 21, 2020. Comments on the collection of information (see Paperwork Reduction Act section) must be received on or before January 19, 2021. Comments on both the proposed rulemaking and the collection of information received on or before December 21, 2020 will be considered by DHS and USCIS. Only comments on the collection of information received between December 21, 2020 and January 19, 2021 will be

considered by DHS and USCIS. *Note:* Comments received after December 21, 2020 on the proposed rulemaking rather than those specific to the collection of information will not be considered by DHS and USCIS.

ADDRESSES: You may submit comments on the entirety of this proposed rulemaking package, identified by DHS Docket No. USCIS–2019–0024, through the Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the website instructions for submitting comments.

Comments submitted in a manner other than the one listed above, including emails or letters sent to DHS or USCIS officials, will not be considered comments on the proposed rule and may not receive a response from DHS. Please note that DHS and USCIS cannot accept any comments that are hand-delivered or couriered. In addition, USCIS cannot accept comments contained on any form of digital media storage devices, such as CDs/DVDs and USB drives. Due to COVID–19, USCIS is also not accepting mailed comments at this time. If you cannot submit your comment by using <http://www.regulations.gov>, please contact Samantha Deshommes, Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, by telephone at (240) 721–3000 for alternate instructions.

FOR FURTHER INFORMATION CONTACT: Michael J. McDermott, Chief, Security and Public Safety Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security, 5900 Capital Gateway Drive, MD, Camp Springs 20746; Telephone (240) 721–3000.

SUPPLEMENTARY INFORMATION: This supplementary information section is organized as follows:

Table of Contents

I. Public Participation

All interested parties are invited to participate in this rulemaking by submitting written data, views, comments, and arguments on all aspects of this proposed rule. DHS also invites comments that relate to the economic, legal, environmental, or federalism effects that might result from this proposed rule. Comments must be submitted in English, or an English translation must be provided. Comments that will provide the most assistance to U.S. Citizenship and Immigration Services (USCIS) in implementing these changes will reference a specific portion of the proposed rule, explain the reason for any recommended change, and include data, information, or authority that supports such recommended change.

Instructions: If you submit a comment, you must include the agency name and the DHS Docket No. USCIS-2019-0024 for this rulemaking. Regardless of the method used for submitting comments or material, all submissions will be posted, without change, to the Federal eRulemaking Portal at <http://www.regulations.gov>, and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary public comment submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy and Security

Notice that is available via the link in the footer of <http://www.regulations.gov>.

Docket: For access to the docket and to read background documents or comments received, go to <http://www.regulations.gov>, referencing DHS Docket No. USCIS-2019-0024. You may also sign up for email alerts on the online docket to be notified when comments are posted or a final rule is published.

II. Executive Summary

DHS seeks to align its discretionary authority to grant employment authorization to aliens ordered removed and temporarily released on orders of supervision with its current immigration enforcement priorities, which include the prompt removal of aliens who have received a final order of removal from the United States,¹ and the Administration's efforts to strengthen protections for U.S. workers. DHS is proposing to modify its regulations in the following areas:

- **Employment authorization eligibility for aliens temporarily released on orders of supervision:** DHS proposes to eliminate eligibility for discretionary employment authorization under 8 CFR 274a.12(c)(18) for aliens who have final orders of removal and are temporarily released from custody on orders of supervision pending removal *except* for aliens for whom DHS has determined that their removal is impracticable because all countries from whom DHS requested travel documents have affirmatively declined to issue such documents. DHS intends to require such aliens to establish economic necessity for employment during the period of the order of supervision.² Consistent with 8 CFR 274a.12(e), USCIS would use the Federal Poverty Guidelines under Title 45 of the U.S. Code to determine whether there is an economic necessity for employment authorization. Additionally, DHS proposes to expand the current nonexhaustive list of factors it considers when adjudicating an application for employment authorization for aliens temporarily released on an order of supervision to include: (1) The alien's compliance with the order of supervision conditions and (2) the alien's criminal history, including but not limited to any criminal arrests, charges, or convictions

¹ This proposed rule does not affect DHS's authority to release aliens from detention or to remove aliens from the United States pursuant to sections 235, 236, 238, 240, and 241 of the INA, 8 U.S.C. 1225, 1226, 1228, 1229a, and 1231.

² Currently, economic necessity is only a discretionary factor. See 8 CFR 274a.12(c)(18)(i).

subsequent to the alien's release from custody on an order of supervision.

- **Additional requirements for renewal employment authorization for aliens temporarily released on orders of supervision:** DHS further proposes to allow aliens temporarily released on an order of supervision who apply for a renewal of their employment authorization to have it renewed only if the alien: (1) Continues to meet the exception noted above, (2) demonstrates economic necessity, (3) establishes that he or she warrants a favorable exercise of discretion, and (4) establishes that he or she is employed by a U.S. employer who is a participant in good standing in DHS's employment eligibility verification system (E-Verify) by providing the U.S. employer's name as listed in E-Verify and the employer's E-Verify Company Identification Number. An alien who fails to establish that he or she is employed by an E-Verify employer would not be eligible for a renewal EAD. DHS will consider an E-Verify employer to be a participant in good standing if, at the time of filing of the application for renewal of employment authorization, the employer: (1) Has enrolled in E-Verify with respect to all hiring sites in the United States that employ an alien temporarily released on an order of supervision who has received employment authorization under this rule; (2) is in compliance with all requirements of E-Verify, including but not limited to verifying the employment eligibility of newly hired employees at such hiring sites; and (3) continues to be a participant in good standing in E-Verify at any time during the employment of the alien temporarily released on an order of supervision who has received employment authorization pursuant to this rule.

- **Limit the Employment Authorization Document (EAD) validity period for aliens temporarily released on orders of supervision:** DHS proposes to limit the validity period for an EAD issued under 8 CFR 274a.12(c)(18) ("(c)(18) EADs") to one year, regardless of whether the alien seeks an initial or renewal EAD.

- **Biometrics submission by aliens temporarily released on orders of supervision:** DHS proposes to require that biometrics be submitted and a biometric services fee be paid for by aliens seeking discretionary employment authorization under 8 CFR 274a.12(c)(18) ("(c)(18) EAD applicants"). Currently, all (c)(18) EAD

applicants submit biometrics to USCIS³ to, among other things, assist in identity verification and facilitate (c)(18) EAD card production. This rule proposes to codify that requirement and require that they pay a biometric services fee of \$30. See proposed 8 CFR 106.2(a)(32)(i)(C).⁴ In addition, DHS proposes to use biometrics submitted by (c)(18) EAD applicants to screen for criminal history. See proposed 8 CFR 241.4(j)(3).

• *Provide aliens granted deferral of removal under the regulations implementing the CAT employment authorization based on the grant of deferral:* Finally, DHS proposes to amend its regulations at 8 CFR 274a.12(a)(10) to include aliens who have been granted deferral of removal based on the regulations implementing the United States' obligations under the CAT⁵ in the category of aliens who are not required to apply for employment authorization to work, but will be recognized as employment authorized based on the grant of deferral of removal.⁶ Currently, aliens who are granted withholding of removal under section 241(b)(3) of the INA, 8 U.S.C. 1231(b)(3), or CAT under 8 CFR 208.16 and 1208.16, are employment authorized based solely on the grant of withholding. They are not required to apply for employment authorization but may obtain an EAD if they wish to have a document reflecting that they are employment authorized by virtue of the grant of withholding. However, DHS's regulations do not clearly indicate that aliens who are granted CAT deferral of removal⁷ fall within the category of aliens who should be employment authorized based on the grant of deferral

rather than having to apply for employment authorization like other aliens under 8 CFR 274a.12(c). DHS proposes to amend the regulations to make this clarification.

• *Specify the effective date:* DHS proposes to apply changes made by this rule only to initial and renewal applications filed on or after the effective date of the final rule. DHS proposes to allow aliens temporarily released on an order of supervision who are already employment authorized prior to the final rule's effective date to remain employment authorized until the expiration date on their EAD, unless their employment authorization is terminated or revoked earlier than the expiration date. USCIS would continue processing any pending application for a replacement EAD received prior to the effective date and would continue to receive new applications for replacement EADs because those adjudications are not considered a new grant of employment authorization but a replacement of an EAD based on a previously authorized period of employment prior to the effective date of the final rule.

A. Major Provisions of the Regulatory Action

DHS proposes the following regulatory amendments:

• *8 CFR 106.2, Fees.* DHS proposes to amend 8 CFR 106.2(a)(32)(i) to require that aliens who are subject to a final order of removal and temporarily released on an order of supervision pay a \$30 biometric services fee in addition to the filing fee for an application for employment authorization under 8 CFR 274a.12(c)(18).

• *Several provisions in subpart A of part 241.* DHS is amending 8 CFR 241.4, 241.5, and 241.13 to remove obsolete references to former Immigration and Naturalization Service (INS) agency titles and replace them with the appropriate DHS component names. The amendments also update the section to correctly reflect the DHS components with authority over orders of supervision and issuance of EADs. The amendments to 8 CFR 241.4 would also codify requirements for aliens who are applying for initial and renewal employment authorization under the (c)(18) category to submit biometrics at an ASC and pay the associated biometric services fee.

• *8 CFR 274a.12, Classes of aliens authorized to accept employment.* The amendments to this section clarify that 8 CFR 274a.12(a)(10) covers aliens granted withholding of removal either based on section 241(b)(3) of the INA, 8 U.S.C. 1231(b)(3), or on the regulations

implementing U.S. obligations under the CAT. The amendments to this section also add aliens granted deferral of removal based on the regulations implementing CAT to the current regulation at 8 CFR 274a.12(a)(10) as aliens who are employment authorized based solely on the grant of withholding or deferral and are not required to apply for employment authorization. This section also revises 8 CFR 274a.12(c)(18) to reflect that eligibility for employment authorization based on a final order of removal and temporary release from custody on an order of supervision is limited to aliens whose removal is impracticable because all countries from whom DHS has requested travel documents have affirmatively declined to issue such documents and who establish economic necessity.

• *8 CFR 274a.13, Applications for employment authorization.* This section adds a new paragraph specifically addressing the filing procedures and evidentiary requirements for aliens temporarily released from custody on an order of supervision who are seeking an initial EAD or renewing an EAD, including the new requirements to: (1) Submit the Form I-765WS, Employment Authorization Worksheet (or successor form), (2) establish the alien's economic necessity for employment, (3) provide the E-Verify Company Identification Number for the alien's U.S. employer that participates in E-Verify and the employer's name as listed in E-Verify on the application for employment authorization (renewal applicants only), and (4) submit a copy of their current U.S. Immigration and Customs Enforcement (ICE) Form I-220B, Order of Supervision (or successor form), with a copy of the complete Personal Report Record. The amendments also provide that the validity period for employment authorization under 8 CFR 274a.12(c)(18) will not exceed increments of one year.

B. Summary of Costs, Benefits, and Transfer Payments

This proposed rule is estimated to result in a reduction in the number of aliens on orders of supervision who are eligible for employment authorization, which could result in lost earnings for those no longer eligible. This loss of earnings would result in a transfer of costs from the alien to their support network, including family members, community groups, non-profits or third-party organizations to provide for the alien and any dependents. In addition, DHS estimates increased filing burdens associated with the proposed rule for those who remain eligible for employment authorization. Employers

³ At present, biometrics collection generally refers to the collection of fingerprints, photographs, and signatures. See <https://www.uscis.gov/forms/forms-information/preparing-your-biometric-services-appointment> (describing biometrics as including fingerprints, photographs, and digital signature) (last visited May 15, 2020).

⁴ See *U.S. Citizenship and Immigration Services Fee Schedule and Changes to Certain Other Immigration Benefit Request Requirements*, 85 FR 46788 (Aug. 3, 2020) (Fee Rule). The Fee Rule was scheduled to go into effect on October 2, 2020. On September 29, 2020, the U.S. District Court for the Northern District of California issued a nationwide injunction, which prevents DHS from implementing the Fee Schedule Final Rule. See, *Immigrant Legal Resource Center v. Wolf*, No. 4:20-cv-5883 (N.D. Cal. Sept. 29, 2020). DHS intends to vigorously defend this lawsuit and is not changing the baseline for this proposed rule as a result of the litigation.

⁵ See 8 CFR 208.16–208.18 and 1208.16–1208.18.

⁶ If the alien wants a document to reflect that he or she is employment authorized pursuant to the grant of deferral, the alien will need to apply for an EAD with USCIS.

⁷ CAT deferral of removal is a form of protection from removal similar to withholding under the regulations implementing CAT in that an alien cannot be removed to the country with respect to which a deferral order is in place.

that currently hire workers who would no longer be eligible to renew under this rule could experience new costs due to employee turnover and the need to comply with the proposed E-Verify requirement. Finally, the proposed rule may result in a loss of tax revenue.

Under the proposed rule, DHS anticipates there would be six types of impacts that DHS can estimate and quantify: (1) Potential lost earnings for alien workers temporarily released on orders of supervision who may no longer be eligible for employment authorization; (2) increased time burden for applicants to submit forms; (3) added time and costs for applicants to submit biometrics; (4) labor turnover costs that employers of alien workers with orders of supervision could incur when their employees' EADs expire and are not renewed; (5) costs to employers to enroll in and maintain an E-Verify account as a participant in good standing to retain workers with orders of supervision who are applying for

renewal EADs; and (6) potential employment tax losses to the Federal Government.

DHS estimates that some aliens with final removal orders and temporarily released on orders of supervision would be ineligible for discretionary EADs due to this proposed rule. However, DHS cannot estimate with precision what the future eligible population would be because of data constraints and, therefore, relies on a range with an upper and lower bound. The estimated costs of this proposed rule would range from a minimum of about \$94,868, (annualized 7%) associated with biometrics and added burdens for relevant filing forms to a maximum of \$1,496,016,941 (annualized 7%) should no replacement labor be found for aliens on orders of supervision who would be ineligible for employment authorization under this rule.⁸ The ten-year

⁸ DHS estimates some of the costs and benefits of this rule using the newly published *U.S. Citizenship and Immigration Services Fee Schedule*

undiscounted costs would range from \$940,239 to \$14,722,941,163. DHS estimates \$228,789,887 (annualized 7%) as the maximum decrease in employment tax transfers from companies and employees to the Federal Government.

Table 1 provides a summary of the proposed regulatory changes and the estimated impacts of the proposed rule.

BILLING CODE 9111-97-P

and Changes to Certain Other Immigration Benefit Request Requirements, final rule ("Fee Schedule Final Rule"), and associated form changes, as the baseline. 85 FR 46788 (Aug. 3, 2020). The Fee Schedule Final Rule was scheduled to go into effect on October 2, 2020. On September 29, 2020, the U.S. District Court for the Northern District of California issued a nationwide injunction, which prevents DHS from implementing the Fee Schedule Final Rule. *See, Immigrant Legal Resource Center v. Wolf*, No. 4:20-cv-5883 (N.D. Cal. Sept. 29, 2020). DHS intends to vigorously defend this lawsuit and is not changing the baseline for this rule as a result of the litigation. Should DHS not prevail in the Fee Schedule Final Rule litigation, this rule may reflect understated costs associated with biometrics fees and overstated benefits associated with filing Form I-765.

Table 1: Summary of Impacts and Estimated Cost and Benefits of the Proposed Rule		
Provisions	Regulatory Changes	Estimated Impact of Regulatory Change
Amending 8 CFR 241.5	DHS proposes to update the current language of the regulation to reflect that the Secretary of Homeland Security (Secretary) or the Secretary's designee can issue orders of supervision.	This change would give DHS the flexibility to delegate the authorities under the provision without requiring additional rulemaking in the future.
Amending 8 CFR 241.4(j)(3), 8 CFR 241.5(c) and 8 CFR 241.13(h)(1)	DHS proposes to remove language that authorized designated ICE officers to grant employment authorization for aliens temporarily released on orders of supervision. ICE no longer grants employment authorization and USCIS has primary jurisdiction over EAD issuance.	These changes propose to codify current policy and reduce confusion for aliens temporarily released on orders of supervision who apply for employment authorization.
Amending 8 CFR 241.4(j)(3) and 8 CFR 106.2(a)(32)(i)(C)	DHS proposes to add language to codify biometrics collection for (c)(18) applicants. Aliens on orders of supervision applying for initial and renewal (c)(18) employment authorization must submit biometrics at a scheduled biometrics services appointment and pay a \$30 fee.	This change would require aliens temporarily released on orders of supervision submit their biometrics to USCIS at an ASC. <u>Quantified Impacts</u> Costs for aliens temporarily released on orders of supervision would range from \$83,148 to \$552,741 with a primary estimate of \$317,945 (annualized 7%). <u>Qualitative Benefits</u> Enables DHS to vet an applicant's biometrics against government databases to determine if he or she matched any criminal activity on file, to verify the applicant's identity, and to facilitate secure card production.
Amending 8 CFR 274a.12(a)(10)	DHS proposes to revise the (a)(10) employment authorization category, which currently covers those granted withholding of removal under section 241 of the INA, 8 U.S.C. 1231(b)(3), or the regulations implementing CAT under 8 CFR 208.16 or 1208.16, to include aliens who are granted CAT deferral of removal as employment authorized based solely on the grant of deferral. Aliens granted withholding of removal under INA sec. 241(b)(3) and the regulations implementing CAT currently are employment authorized by virtue of the grant of withholding.	This change proposes to revise current policy to reduce confusion for aliens who are granted CAT deferral and would ensure consistency in adjudication for this population. <u>Quantified Benefits</u> Aliens granted deferral of removal who do not apply for an EAD card would save time and money ranging from \$0 to \$105,690 annually.
Amending 8 CFR 274a.12(c)(18)	DHS proposes to: <ul style="list-style-type: none"> Eliminate eligibility for employment authorization for aliens with final orders of removal who are released from custody on orders of supervision except for those aliens for whom DHS determines their removal is impracticable because all 	<u>Quantified Costs and Transfers</u> <ul style="list-style-type: none"> Lost earnings for aliens temporarily released on orders of supervision would range from \$614,037,170 to \$1,495,358,741 with a primary estimate of \$1,054,697,955 (annualized 7%).

	<p>countries from whom DHS has requested travel documents have affirmatively declined to issue a travel document.</p> <ul style="list-style-type: none"> • Add new discretionary factors USCIS will consider when deciding whether to grant employment authorization including whether: <ol style="list-style-type: none"> 1. the alien complies with the conditions for release specified in the order of supervision, and 2. the alien has any criminal history, including but not limited to criminal activities subsequent to release from detention; • Add a requirement that the alien be employed with an E-Verify employer in good standing, if the alien is seeking renewal of an EAD issued based on an order of supervision; and • Add a requirement that the alien establish economic necessity for employment when filing an initial and renewal EAD application. 	<ul style="list-style-type: none"> • DHS acknowledges that businesses that have hired (c)(18) workers who are no longer eligible for work authorization due to this proposed rule would incur labor turnover costs earlier than without this rule. • If employers are unable to find replacement workers, reduction in federal employment taxes paid would range from \$93,947,687 to \$228,789,887, with a primary estimate of \$161,368,787 (annualized 7%). • Employer costs related to enrolling in E-Verify and maintaining an account would cost \$113.65 for new E-Verify participants in the first year and \$53.71 in subsequent years for training with an additional cost of \$6.14 per query for every company employee – both citizen and non-citizen. Employer costs related to labor turnover for employers who are not enrolled and opt not to enroll in E-Verify would cost between \$7,168 and \$15,621 per worker, depending on the wage of their (c)(18) alien worker. <p>DHS emphasizes that the costs of the rule in terms of lost labor earnings will potentially depend on the extent of surplus labor in the labor market. In the current environment with COVID-19-related layoffs and unemployment, there is the potential that the costs of the rule will be lower than they would otherwise have been.</p> <p><u>Qualitative Costs and Transfers</u></p> <ul style="list-style-type: none"> • Those who are currently employment authorized, but who would no longer qualify for employment authorization under the proposed rule could experience other impacts possibly involving personal and family-related hardships and disruptions to the individual, U.S. citizen, or LPR spouses and/or children dependent on the income currently earned by the affected alien. • Additional unquantified Federal, state, and local income tax revenue also could be lost. <p>A loss of earnings would result in a transfer of costs from the alien to their support network, including family members, community groups, non-profits, or third-party</p>
--	--	---

		<p>organizations to provide for the alien and any dependents.</p> <p><u>Qualitative Benefits</u></p> <ul style="list-style-type: none"> The restriction on income opportunities may increase the incentives for aliens with final orders of removal to depart the United States, which could save government resources expended on monitoring and tracking aliens temporarily released on orders of supervision.
8 CFR 274a.13(a)(3)	<p>DHS proposes to:</p> <ul style="list-style-type: none"> Add requirements for aliens on orders of supervision seeking initial employment authorization and renewals to include: <ol style="list-style-type: none"> A copy of the decision by the Immigration Judge (IJ) or DHS of the final order of removal, Form I-765WS to show economic necessity, and A copy of their current Order of Supervision (Form I-220B) with a copy of the complete Personal Report Record reflecting the alien's compliance with the conditions for release from the date of release. Add a requirement for aliens on orders of supervision seeking renewal of their employment authorization to also submit their U.S. employer's E-Verify Company Identification number and employer's name as listed in E-Verify. 	<p><u>Quantified Costs</u></p> <ul style="list-style-type: none"> Costs to applicants who submit Forms I-765 and I-765WS, would range from \$11,721 to \$105,459 with a primary estimate of \$58,590 (annualized 7%). <p><u>Qualitative Benefits</u></p> <ul style="list-style-type: none"> Enables DHS to determine if there is an economic necessity for employment authorization and ensures that aliens on orders of supervision who renew their EAD are having their employment authorization verified by their employer.

BILLING CODE 9111-97-C

The impacts of reducing the number of aliens temporarily released on orders of supervision that are eligible for EADs include both potential distributional impacts (transfers) and costs. USCIS uses the lost compensation to aliens temporarily released on orders of supervision that are no longer eligible for EADs as a measure of the impact of this change—either as distributional impacts (transfers) from these aliens to others or as a proxy for businesses' cost for lost productivity. If all companies are able to easily find reasonable labor substitutes for the positions the aliens temporarily released on orders of supervision would otherwise have filled, DHS estimates a maximum of \$1,495,358,741 (annualized at 7%) would be transferred from these workers to others in the labor force (or induced back into the labor force). Under this scenario, there would be no federal employment tax losses. Conversely, if

companies are unable to find reasonable labor substitutes for the position the aliens temporarily released on orders of supervision would have filled then a maximum of \$1,495,358,741 (annualized 7%) is the estimated monetized cost of this provision, and \$0 is the estimated monetized transfers from these aliens to other workers. In addition, under this scenario where jobs would go unfilled, there would be a loss of employment taxes to the Federal Government. USCIS estimates \$228,789,887 (annualized 7%) as the maximum decrease in employment tax transfers from companies and employees to the Federal Government.

The two scenarios described above represent the estimated endpoints for the range of monetized impacts resulting from the provisions that affect employment eligibility for aliens temporarily released on orders of supervision. There are other costs of the

rule, including E-Verify, biometrics, labor turnover, and additional form burdens. These costs exist under both scenarios described above, and thus \$94,868 is the minimum cost of the rule (annualized 7%).

DHS is aware that the outbreak of COVID-19 will likely impact these estimates in the short run.⁹ As discussed above, the analysis presents a range of impacts, depending on if companies are able to find replacement labor for the jobs alien workers temporarily released on orders of supervision would have filled. In September 2020, the unemployment rate

⁹On March 13, 2020, the President declared that the COVID-19 outbreak in the United States constitutes a national emergency. See 'Proclamation on Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID-19) Outbreak,' available at <https://www.whitehouse.gov/presidential-actions/proclamation-declaring-national-emergency-concerning-novel-coronavirus-disease-covid-19-outbreak/>.

was 7.9 percent.¹⁰ This is an improvement on April's 14.7 percent which marked the highest unemployment rate and the largest over-the-month increase in the history of the series (seasonally adjusted data are available back to January 1948).¹¹ By comparison, the unemployment rate for September 2019 was 3.5%.¹² DHS assumes that during the COVID–19

¹⁰ Department of Labor, Bureau of Labor Statistics, The Employment Situation—September 2020. Available at: https://www.bls.gov/news.release/archives/empisit_10022020.pdf.

¹¹ In April 2020, the unemployment rate increased by 10.3 percentage points to 14.7 percent. Department of Labor, Bureau of Labor Statistics, The Employment Situation—April 2020. Available at: https://www.bls.gov/news.release/archives/empisit_05082020.pdf.

¹² Department of Labor, Bureau of Labor Statistics, The Employment Situation—September 2019, Employment Situation Summary Table A. Household data, seasonally adjusted. Available at: https://www.bls.gov/news.release/archives/empisit_10042019.pdf.

pandemic, with additional available labor nationally, companies are more likely to find replacement labor for the job the alien on an order of supervision would have filled.¹³ Thus, in the short-run during the pandemic and the ensuing economic recovery, the lost compensation to EAD applicants as a result of this rule is likely to mean that the costs of the rule will be lower than they would otherwise have been. DHS notes that although the pandemic is widespread, the severity of its impacts varies by locality. Consequently, it is not clear to what extent the distribution of alien workers temporarily released on orders of supervision overlaps with areas of the country that will be more

¹³ The Congressional Budget Office estimates the unemployment rate is expected to average close to 14 percent during the second quarter. See: CBO's Current Projections of Output, Employment, and Interest Rates and a Preliminary Look at Federal Deficits for 2020 and 2021 <https://www.cbo.gov/publication/56335> April 24, 2020.

or less impacted by the COVID–19 pandemic. Accordingly, DHS cannot estimate with confidence to what extent the impacts will be transfers instead of costs.

DHS's assumption that all applicants with an EAD are able to obtain employment (discussed in further detail later in the analysis), also does not reflect impacts from the COVID–19 pandemic. It is not clear what level of reductions the pandemic will have on the ability of EAD holders to find jobs (as jobs are less available), or how DHS would estimate such an impact with any precision given available data. Consequently, the ranges projected in this analysis regarding lost compensation are expected to be an overestimate, especially in the short-run. The range of impacts described by the scenarios above, plus the consideration of the other costs, are summarized in Table 2 below.

BILLING CODE 9111-97-P

Table 2: Summary of Range of Monetized Annualized Impacts						
Table 2(A): Annualized Impacts at 7%						
Category	Description	Scenario: No Replacement Labor found for Aliens Temporarily released on Orders of Supervision		Scenario: All Aliens Temporarily released on Orders of Supervision Replaced with Other Workers		Primary
		Min	Max	Min	Max	
Transfers						
Compensation	Compensation transferred from aliens temporarily released on orders of supervision to other workers (provisions: remove EAD eligibility)	\$0	\$0	\$614,037,170	\$1,495,358,741	\$747,679,371
Taxes	Lost employment taxes paid to the Federal Government (provisions: remove EAD eligibility)	\$93,947,687	\$228,789,887	\$0	\$0	\$114,394,944
Costs						
Biometrics	Opportunity cost of time + fee (provision: require biometrics)	\$83,148	\$552,741	\$83,148	\$552,741	\$317,945
Forms	Opportunity cost of time (provisions: additional time for I-765 + Form I-765WS)	\$11,721	\$105,459	\$11,721	\$105,459	\$58,590
Lost Productivity	Lost compensation used as a proxy for lost productivity to companies (provisions: remove EAD eligibility)	\$614,037,170	\$1,495,358,741	\$0	\$0	\$747,679,371
Total Costs		\$614,132,038	\$1,496,016,941	\$94,868	\$658,200	\$748,055,905

Table 2(B): Annualized Impacts at 3%						
Category	Description	Scenario: No Replacement Labor found for Aliens Temporarily released on Orders of Supervision		Scenario: All Aliens Temporarily released on Orders of Supervision Replaced with Other Workers		Primary
		Min	Max	Min	Max	
Transfers						
Compensation	Compensation transferred from aliens temporarily released on orders of supervision to other workers (provisions: remove EAD eligibility)	\$0	\$0	\$608,302,571	\$1,482,047,682	\$741,023,841
Taxes	Lost employment taxes paid to the Federal Government (provisions: remove EAD eligibility)	\$93,070,293	\$226,753,295	\$0	\$0	\$113,376,648
Costs						
Biometrics	Opportunity cost of time + fee (provision: require biometrics)	\$82,732	\$549,871	\$82,732	\$549,871	\$316,302
Forms	Opportunity cost of time (provisions: additional time for I-765 + Form I-765WS)	\$11,662	\$104,912	\$11,662	\$104,912	\$58,287
Lost Productivity	Lost compensation used as a proxy for lost productivity to companies (provisions: remove EAD eligibility)	\$608,302,571	\$1,482,047,682	\$0	\$0	\$741,023,841
Total Costs		\$608,396,966	\$1,482,702,465	\$94,395	\$654,783	\$741,398,430

In addition, Table 3 presents the prepared accounting statement, as required by the Office of Management and Budget (OMB) Circular A-4, showing the costs associated with this

proposed regulation. Note that under costs, the primary estimates provided in the accounting statement are calculated based on the minimum cost from the scenario that all aliens temporarily

released on orders of supervision are replaced with other workers and the maximum cost from the scenario that no aliens temporarily released on orders of supervision are replaced with other

workers (scenario presented in Tables 2(A) and (B)).

Table 3. OMB A-4 Accounting Statement (\$, 2019)					
Period of analysis: 2020 – 2029					
Category	Primary Estimate		Minimum Estimate	Maximum Estimate	Source Citation (RIA, preamble, etc.)
BENEFITS					
Monetized Benefits	This proposed rule would produce some benefits for aliens who are granted CAT deferral of removal, as this population would no longer need to submit Form I-765 in order to become employment authorized. DHS estimates the total benefits for this population would range from \$0 to \$105,690 annually.				RIA
Annualized quantified, but un-monetized, benefits	N/A		N/A	N/A	RIA
Unquantified Benefits	This proposed rule may allow U.S. workers to have a better chance of obtaining jobs that some (c)(18) alien workers currently hold. Additionally, the proposed rule may reduce the incentive for aliens to remain in the United States after receiving a final order of removal, which could save government resources expended on enforcing removal orders for such aliens.				RIA
COSTS					
Annualized monetized costs (discount rate in parenthesis)	(7%)	\$748,055,905	\$94,868	\$1,496,016,941	RIA

Annualized monetized transfers: taxes	(7%)	\$114,394,944	\$0	\$228,789,887	RIA
	(3%)	\$113,376,648	\$0	\$226,753,295	
From whom to whom?	A reduction in federal employment taxes from employers and employees to the Federal Government. Additional unquantified Federal, state, and local income tax revenue also could be lost.				
<i>Category</i>	<i>Effects</i>				<i>Source Citation (RIA, preamble, etc.)</i>
Effects on State, local, and/or tribal governments	DHS cannot determine the number of (c)(18) alien workers who could be removed from the labor force due to the proposed rule. Federal, state, and local income tax revenue also may be reduced. For the (c)(18) alien population that will not be able to renew their EAD or obtain an initial EAD, there would likely be an impact in terms of lost income which could pose economic hardships. Members of this population may need to rely on their support networks for financial and social assistance, which could involve, but which may not be limited to, family members and friends, religious and charitable organizations, private non-profit providers, and non-governmental organizations (NGOs).				RIA
Effects on small businesses	This proposed rule could result in indirect costs on entities, some of which could be small entities. DHS acknowledges that changing eligibility criteria for aliens on orders of supervision to obtain employment authorization could result in entities that have hired such workers incurring labor turnover costs. Entities may also incur costs related to using E-Verify.				RFA
Effects on wages	None.				RIA
Effects on growth	None.				RIA

BILLING CODE 9111-97-C

The benefits potentially realized by the proposed rule are both qualitative and quantitative. Under this proposed rule, a U.S. worker may have a better chance of obtaining jobs that some (c)(18) alien workers currently hold, as the proposal would reduce employment authorization eligibility for this population of aliens who have been ordered removed from the country. Second, the proposed rule may reduce the incentive for aliens to remain in the United States after receiving a final order of removal, which could reduce the amount of government resources expended on enforcing removal orders for such aliens as well as monitoring and tracking aliens temporarily released on orders of supervision. Third, DHS clarifies that aliens granted CAT deferral of removal would no longer need to submit Form I-765 in order to become employment authorized after the effective date of the final rule. DHS estimates the total benefits for this population would range from \$0 to \$105,690 annually. Additional savings could also be accrued in the form of opportunity costs of time if applicants

would have spent time submitting evidence under any of the (c)(18) considerations.

III. Purpose of the Proposed Rule

It is the Administration's policy to ensure the prompt removal of aliens who have been issued a final order of removal. In 2017, President Trump issued Executive Order (E.O.) 13768, "Enhancing Public Safety in the Interior of the United States," 82 FR 8799 (Jan. 25, 2017). This E.O. noted that the enforcement of our immigration laws is critically important to the national security and public safety of the United States. The continued presence in the United States of aliens with final orders of removal, many of whom are criminals who have served time in our Federal, State, and local jails and who have been determined in immigration proceedings to be ineligible to remain in the country, is contrary to the national interest. For this reason, the E.O. directed the Secretary of Homeland Security (the Secretary) to prioritize the removal of aliens from the United States who have final orders of removal and to publish new regulations revising or rescinding

any regulations inconsistent with this E.O.

It is also the policy of the Administration to administer our immigration laws to create higher wages and employment rates for workers in the United States. *See* Exec. Order No. 13788, "Buy American and Hire American" (BAHA), 82 FR 18837 (Apr. 18, 2017). E.O. 13788 directed the Secretary to propose new rules to supersede or revise current rules to protect the interests of U.S. workers in the administration of the immigration system. Given the significant disruptions COVID-19 has caused to the U.S. economy and labor market, the President also issued Proclamation 10052, "Suspending Entry of Immigrants and Nonimmigrants Who Present a Risk to the U.S. Labor Market During the Economic Recovery following the 2019 Novel Coronavirus Outbreak" 85 FR 38263 (June 22, 2020). Proclamation 10052, among other things, requires the Secretary to take appropriate steps "to prevent certain aliens who have final orders of removal; . . . from obtaining eligibility to work in the United States." 85 FR at 38266.

Obtaining employment authorization in the United States has long been, and continues to be, a significant incentive for aliens to migrate to (legally and illegally) and remain in the United States. As such, employment authorization must be carefully regulated to maintain the integrity of the U.S. immigration system. Many aliens ordered removed have been released from DHS custody on OSUP because some countries unreasonably delay issuance of travel documents or due to lack of good faith efforts by the alien. In addition, because of the Supreme Court's decision in *Zadvydas*, DHS must release aliens within a presumptively reasonable 6-month period, which in many instances is not sufficient time for DHS to obtain the travel documents needed to remove the alien from the United States. Further, many of these aliens are criminals whose continued presence in the United States is not in the national interest. DHS has identified that providing an "open market" employment authorization to aliens with final removal orders exacerbates the challenges in effectuating removal by incentivizing such aliens to remain in the United States and possibly compete for jobs against U.S. workers instead of complying with their removal orders, working with the country of removal to obtain travel documents in a timely manner, and departing the United States.

Through this proposed rule, DHS seeks to promote the integrity of the immigration system by eliminating discretionary employment authorization for those who have a final order of removal and encouraging their efforts to obtain travel documents in timely manner and depart the United States. The proposed rule would also help strengthen protections for U.S. workers and minimize the risk of disadvantaging U.S. workers, especially as the U.S.

economy and the labor market recover from the significant disruptions caused by the COVID-19 pandemic.

A. Enforcement Priorities

Enforcement of the nation's immigration laws is essential to the integrity of the immigration system. It ensures that only those who are legally qualified and lawfully in the United States are allowed to avail themselves of any benefits under the INA. In 1996, Congress passed the Anti-Terrorism and Effective Death Penalty Act (AEDPA), Public Law 104-132, title IV; 110 Stat. 1214 (Apr. 24, 1996) and the Illegal Immigration Reform and Immigrant Responsibility Act of 1996 (IIRIRA), Public Law 104-208, div. C; 110 Stat. 3009 (Sept. 28, 1996). AEDPA and IIRIRA made sweeping changes to U.S. immigration laws focusing on immigration enforcement, detention of aliens, and bars to certain types of relief or protection from removal and grants of legal status. IIRIRA expanded the Attorney General's (now Secretary's) authority¹⁴ to detain aliens, including requiring mandatory detention of aliens convicted of aggravated felony offenses and the detention of aliens pending removal from the United States. It also created an expedited removal process for aliens seeking admission into the United States who do not have proper documents or who make material misrepresentations, and, as designated by the Secretary, aliens who have not been inspected and admitted or paroled into the United States and cannot prove they have been in the United States for at least two years.¹⁵ By passing AEDPA and IIRIRA, Congress made clear that enforcement of the immigration laws is a priority and is critical for purposes of national security, public safety, and the integrity of the U.S. immigration system.

Unfortunately, DHS is not always able to promptly remove aliens with final

orders of removal. Sections 241(a)(1) and (2) of the INA, 8 U.S.C. 1231(a)(1), (2), provide for a 90-day removal period in which the Secretary is authorized to detain the alien and within which the Secretary shall remove the alien. However, the removal of aliens from the United States and repatriation¹⁶ to their home countries can be a difficult and time-consuming process that can be further complicated and impeded by a lack of sufficient agency resources or legal constraints. Delays in removal also can occur because some countries unreasonably delay the issuance of travel documents, or unreasonably delay accepting the repatriation of their nationals.¹⁷ Based on data on removals executed by DHS, it may take DHS 6 months or longer to obtain travel documents and remove an alien from the United States. For example, in Fiscal Year (FY) 2017, the average time for DHS to remove an alien who had a final order and was temporarily released on an order of supervision was 321.39 days.¹⁸ However, in FY 2018, the number of days it took DHS to remove an alien who had a final order and was temporarily released on an order of supervision decreased to just over 6 months (average time to remove was 187.19 days).¹⁹

While DHS has authority to detain aliens with final orders of removal during the removal period, if DHS cannot effectuate an alien's removal in a presumptively reasonable 6-month removal period, DHS must generally release such aliens from detention. See generally *Zadvydas v. Davis*, 533 U.S. 678 (2001).²⁰ Due to the U.S. Supreme Court's decision in *Zadvydas*, DHS has had to release thousands of aliens from detention as illustrated in Table 4, including aliens convicted of aggravated felonies and other serious crimes.

TABLE 4—ALIENS RELEASED FROM ICE CUSTODY ON ORDER OF SUPERVISION *

Category	FY 2015	FY 2016	FY 2017	FY 2018	FY 2019
Convicted Criminals ²¹	3,692	3,179	2,815	4,233	5,269

²⁰ See *infra* Section IV, paragraph B for additional discussion of the *Zadvydas* decision.

When aliens with final removal orders are released from DHS custody, they are released on orders of supervision. These orders of supervision contain conditions for release, such as requiring aliens to assist with efforts to procure travel

documents and present themselves for removal in the event removal can be arranged. Once temporarily released on an order of supervision, an alien may apply for employment authorization under 8 CFR 274a.12(c)(18). Each year,

USCIS approves thousands of initial requests for employment authorization and renewals of such authorization for aliens released from DHS custody on orders of supervision as shown in Table 5.

TABLE 5—ALIENS TEMPORARILY RELEASED ON ORDERS OF SUPERVISION GRANTED EMPLOYMENT AUTHORIZATION *

Renewals	21,236	24,464	21,274	20,151	21,350

* Data obtained from the USCIS Office of Performance and Quality (OPQ).

As noted above, E.O. 13768 made the prompt removal of aliens ordered removed a priority for the Administration and directed the Secretary to publish new regulations revising or rescinding any regulations that are inconsistent with the E.O. As a result of its regulatory review, DHS examined the current regulation at 8 CFR 274a.12(c)(18) governing employment eligibility for aliens with a final removal order and temporarily released on orders of supervision. DHS determined that this regulation is inconsistent with the Administration's enforcement priorities because it allows virtually any alien temporarily released on an order of supervision to qualify for employment authorization and, as such, incentivizes such aliens to remain in the United States instead of complying with their removal order and departing the United States.

The current regulation simply restates the language of INA section 241(a)(7), 8 U.S.C. 1231(a)(7) and does not clearly place the burden on the alien to establish that he or she warrants a favorable exercise of discretion to obtain employment authorization. It also does not require an alien who has a final order of removal and has been temporarily released on an order of supervision to clearly establish on what basis he or she is seeking employment authorization, either under INA section 241(a)(7)(A), because every country designated by the alien or under that section has refused to receive the alien, or under INA section 241(a)(7)(B), because removal is impracticable or against the public interest. The burden is on the alien, not the U.S. Government, to establish that he or she

is eligible for a discretionary benefit. Further, the current regulation does not put the public on notice of when DHS will deem the removal of an alien to be impracticable or what DHS has determined to be in the public interest for the purpose of granting employment authorization to aliens with final orders of removal.

As previously stated, the ability to obtain employment authorization provides aliens a significant motivation to remain in the United States. DHS has determined that providing employment authorization to aliens who have final orders of removal, except in very limited circumstances, undermines the removal scheme created by Congress and incentivizes such aliens to remain in the United States instead of complying with their removal orders, working with the country of removal to obtain travel documents in a timely manner, and departing the United States. The revisions under this proposed rule will address these concerns and align the issuance of employment authorization with the Administration's enforcement priorities.

B. Strengthening Protections for U.S. Workers

DHS also wants to ensure that any discretionary grant of employment authorization to aliens is consistent with the Administration's efforts to strengthen protections for U.S. workers and minimize the risk of disadvantaging U.S. workers.

As noted above, E.O. 13788 directed DHS to propose new rules to supersede or revise current rules to protect the interests of U.S. workers²² in the administration of the immigration system. More recently, the President

issued Proclamation 10052, which describes that significant disruptions COVID-19 has caused to the U.S. economy and the detrimental impact of foreign workers on the U.S. labor market during the high domestic unemployment. To address this concern, Proclamation 10052, in addition to suspending the entry of certain immigrants and nonimmigrants into the United States, requires the Secretary to take appropriate steps to prevent certain aliens who have final orders of removal from obtaining eligibility to work in the United States.

This proposed rule aligns with the Administration's goals of protecting U.S. workers in the labor market, particularly as the economy recovers from the extraordinary disruptions resulting from the COVID-19 outbreak. The U.S. unemployment rose to a record high of 14.7 percent in April 2020²³ but declined to 7.9 percent in September.²⁴ However, it remains above 3.5%, which was unemployment rate for the same month last year (*i.e.*, September 2019).²⁵ DHS asserts it is likely that some aliens with final orders of removal and temporarily released on an order of supervision may compete for, and potentially occupy, jobs that U.S. workers might have applied for and been offered, particularly during this period of high unemployment. Aliens temporarily released on an order of supervision who apply for employment authorization under the current regulatory scheme receive an "open market" EAD, meaning they may accept employment in any field and may be hired by any U.S. employer without the U.S. employer having to demonstrate that there were no available U.S.

²¹ "Convicted criminal" means an immigration violator with a criminal conviction entered into ICE's systems of record at the time of the enforcement action.

²² Section 1(e) of E.O. 13788 refers to the definition for U.S. worker as either an employee who is a citizen or national of the United States; or is an alien who is lawfully admitted for permanent residence, is admitted as a refugee under

section 207 of the INA, is granted asylum under section 208 of the INA, or is an immigrant otherwise authorized to be employed by the INA or the Attorney General. INA 212(n)(4)(E), 8 U.S.C. 1182(n)(4)(E).

²⁵ Department of Labor, Bureau of Labor Statistics, The Employment Situation—September 2019. Available at: https://www.bls.gov/news.release/archives/empsit_10042019.pdf.

workers or to guarantee that it will pay the prevailing wage or maintain certain work conditions.

C. Exception to Employment Authorization Bars

DHS recognizes that there are certain times an alien cannot be removed from the United States because DHS is unable to obtain travel documents from a country of removal. Therefore, DHS is proposing to create a narrow exception to the bar to employment authorization. DHS will continue to allow aliens who are subject to a final order of removal to apply for discretionary employment authorization if (1) DHS has determined

that their removal is impracticable because all countries from whom DHS has requested travel documents have affirmatively declined to issue such documents and (2) the aliens establish economic necessity.

DHS anticipates that the number of aliens who are subject to a final order of removal for whom DHS has determined that their removal is impracticable will be relatively small. For example, in FY 2019, only about 4.8 percent (659) of aliens who were temporarily released on an order of supervision (13,766) could not be removed in that fiscal year due to DHS's inability to obtain travel documents

during the fiscal year in which the aliens were counted (Table 6).²⁶ Additionally, the percentage of aliens for whom DHS cannot obtain travel documents has averaged about 5 percent of aliens temporarily released on an order of supervision since FY 2015. DHS believes that the number of aliens who would qualify for this exception will remain small because even after an alien is temporarily released on an order of supervision, DHS continues to work with the foreign governments to obtain travel documents and DHS sometimes receives travel documents for such aliens shortly after their release or within the following fiscal year.

TABLE 6—ALIENS TEMPORARILY RELEASED ON ORDER OF SUPERVISION—UNABLE TO OBTAIN TRAVEL DOCUMENTS

Fiscal year	Total number of aliens temporarily released on an order of supervision	Number of aliens on an order of supervision for whom DHS could not obtain travel docs	Approximate percentage of total (%)
2015	6,772	369	5.4
2016	7,560	411	5.4
2017	6,317	324	5.1
2018	12,412	530	4.3
2019	13,766	659	4.8
Average of During 5-Fiscal Year Period	9,365	459	4.9

* Data from ICE ERO, LESA Statistical Tracking Unit (FY 2015 to FY 2019).

Finally, DHS believes that allowing aliens who fall within the exception to be eligible for employment authorization is consistent with section 241(a)(7) of the INA, 8 U.S.C. 1231(a)(7). Section 241(a)(7) of the INA, 8 U.S.C. 1231(a)(7), bars employment authorization for aliens who have been ordered removed. No alien subject to a final order of removal has a right to apply for or obtain employment authorization from USCIS under U.S. law. Section 241(a)(7) of the INA, however, gives the Secretary the authority to grant employment authorization if the Secretary determines that: (1) An alien cannot be removed from the United States because all countries of removal as designated by the alien or delineated under section 241 of the INA, 8 U.S.C. 1231, have refused to receive the alien, or (2) the alien's removal is impracticable or contrary to the public interest. INA section 241(a)(7)(A) and (B), 8 U.S.C. 1231(a)(7)(A) and (B). The Secretary is not required to make a finding under either subparagraph (A) or (B) of section 241(a)(7) of the INA, 8 U.S.C.

1231(a)(7)(A), (B), nor is the Secretary required to make a specific finding under either clauses of subparagraph (B) (*i.e.* “otherwise impracticable” or “contrary to the public interest”). The Secretary can choose to maintain the permanent bar on employment authorization for *all* aliens subject to a final order of removal without further action.

In this rulemaking, DHS is not making any findings under subparagraph (A). DHS does not believe any findings under subparagraph (A) are necessary or required because, consistent with the Administration's enforcement priorities, all aliens who have a final order of removal will be subject to removal from the United States, either to a country where the alien is a citizen, subject, or national, the alien was born, or the alien has a residence, or to any country that is willing to accept the alien.

DHS also is not making any findings or creating an exception based on the “public interest” clause of subparagraph (B) because other avenues for employment eligibility already exist for aliens whom DHS determines that their

removal is contrary to the public interest. For example, when an alien with a final order of removal is actively assisting law enforcement entities, and the alien's removal is contrary to the public interest because of such assistance, there are avenues for such aliens to qualify for employment authorization, in part, based on their assistance to law enforcement. Such aliens assisting law enforcement may qualify for employment authorization if they are eligible for T non-immigrant status (trafficking victims),²⁷ U non-immigrant status (victims of criminal activity),²⁸ and S non-immigrant status (witnesses in criminal investigations or prosecutions).²⁹ These existing avenues reflect the public interest in strengthening cooperation with law enforcement and provide DHS with the appropriate framework to assess the nature of the alien's assistance to law enforcement.

Therefore, except for aliens for whom the Secretary has made a finding under the impracticability clause of section 241(a)(7)(B) of the INA, 8 U.S.C. 1231(a)(7)(B), no other alien with a final

²⁶ In certain instances, DHS was able to obtain travel documents for aliens in the next fiscal year.

²⁷ See INA sec. 101(a)(15)(T) (Eligibility requirements include compliance with any reasonable request from a law enforcement agency

for assistance in the investigation or prosecution of human trafficking).

²⁸ See INA sec. 101(a)(15)(U) (Eligibility requirements include helpfulness to law enforcement in the investigation or prosecution of a qualifying crime).

²⁹ See INA sec. 101(a)(15)(S) (Eligibility requirements include providing law enforcement critical, reliable information necessary to the successful investigation or prosecution of a criminal organization).

order of removal who has been temporarily released on an order of supervision will be eligible for employment authorization. This includes aliens who may have previously been eligible for employment authorization based on the public interest clause of section 241(a)(7)(B) of the INA, 8 U.S.C. 1231(a)(7)(B), or based on section 241(a)(7)(A) of the INA, 8 U.S.C. 1231(a)(7)(A). Furthermore, for purposes of determining employment eligibility only, DHS further clarifies that an alien's removal is "otherwise impracticable" under section 241(a)(7)(B) of the INA when DHS determines that all countries from whom DHS has requested travel documents have affirmatively declined to issue a travel document.

DHS believes that exercising its discretionary authority as provided in this proposed rule promotes the protection of U.S. workers while ensuring the faithful execution and enforcement of the immigration laws.

IV. Background

A. Legal Authority

DHS's authority to detain and release from custody aliens subject to final orders of removal on orders of supervision and to grant employment authorization is found in several statutory provisions. Section 102 of the Homeland Security Act of 2002 (HSA) (Pub. L. 107–296, 116 Stat. 2135), 6 U.S.C. 112 and section 103 of the INA, 8 U.S.C. 1103, charge the Secretary with the administration and enforcement of the immigration and naturalization laws of the United States.³⁰ In addition to establishing the Secretary's general authority to administer and enforce immigration laws, section 103 of the INA enumerates various related authorities including the Secretary's authority to establish regulations necessary for carrying out his authority. Section 241 of the INA, 8 U.S.C. 1231, governs the detention, release, and removal of aliens after they have received an administratively final order of removal. Section 274A of the INA, 8 U.S.C. 1324a, governs employment of aliens who are authorized to be employed by statute or in the discretion of the Secretary and the requirements U.S. employers must follow to verify the identity and employment authorization of their employees. The authority to establish and operate E-Verify is found in sections 401–405 of IIRIRA, Public Law 104–208, 110 Stat. 3009–546. The

Secretary proposes the changes in this rule under these authorities.

B. Detention and Release of Aliens Ordered Removed

Section 241 of the INA, 8 U.S.C. 1231, governs the detention, release, and removal of aliens who are subject to final orders of removal.³¹ When an alien is issued a final order of removal, DHS generally has 90 days after issuance of the final order of removal to remove the alien from the United States.³² This 90-day removal period can be extended if the alien fails or refuses to make timely application in good faith for travel or other documents necessary for the alien's departure or conspires or acts to prevent removal.³³ Section 241(a)(2) of the INA, 8 U.S.C. 1231(a)(2), requires detention during the removal period and specifically prohibits DHS from releasing an alien who has been found inadmissible under sections 212(a)(2) or 212(a)(3)(B), 8 U.S.C. 1182(a)(2), (a)(3)(B), or deportable under sections 237(a)(2) or 237(a)(4)(B) of the INA, 8 U.S.C. 1227(a)(2), (a)(4)(B).

In certain instances, DHS is not able to remove aliens within the 90-day period after issuance of the final order of removal. In such cases, DHS must comply with the U.S. Supreme Court's decision in *Zadvydas*.³⁴ In *Zadvydas*, the U.S. Supreme Court held that an alien with a final order of removal cannot be kept in detention (unless special circumstances exist)³⁵ once it has been determined that there is not a "significant likelihood of removal in the reasonably foreseeable future."³⁶ The Court established six months as the "presumptively reasonable period of detention." After the six-month period, once the alien provides good reason to believe there is no significant likelihood of removal in the reasonably foreseeable future, the Government must respond with sufficient evidence to rebut that showing.³⁷ In the event DHS determines

that removal is not likely to occur in the reasonably foreseeable future, the alien must generally be temporarily released on an order of supervision. During this period of release, the alien is required to continue to make efforts (or assist in efforts) towards his or her removal, and DHS will continue to pursue the alien's removal.³⁸

If an alien is temporarily released on an order of supervision, the order of supervision will contain conditions for release including requiring the alien to appear periodically before an immigration officer and comply with the conditions prescribed in the order of supervision.³⁹ INA section 241(a)(3), 8 U.S.C. 1231(a)(3); 8 CFR 241.5(a). If an alien fails to comply with the conditions for release as specified in the order of supervision, DHS can take the alien back into custody and detain the alien until he or she is removed. Aliens who willfully fail to comply with an order of supervision can also be criminally prosecuted under section 243(b) of the INA, 8 U.S.C. 1253(b).

C. Repatriation of Aliens Ordered Removed

Once an alien has been issued a final order of removal, ICE is responsible for effectuating the alien's removal from the United States pursuant to section 241 of the INA, 8 U.S.C. 1231, and 8 CFR 241. Generally, a travel document must be obtained from a foreign government that will allow the alien to depart the United States and be repatriated either to the alien's country of birth, citizenship, nationality, or last habitual residence or to an alternate country that has agreed to accept the alien. As indicated earlier, based on data on removals for FY 2018, it takes DHS an average of a little over 6 months to obtain travel documents and remove an alien from the United States.⁴⁰

However, obtaining travel documents is not always easy. Some countries refuse or unreasonably delay the issuance of the necessary travel documents to aliens who have been issued a final order of removal. Countries that unreasonably delay

³¹ Aliens subject to an expedited removal order, however, are not subject to release on an order of supervision. INA sec. 235(b)(1)(B)(iii)(IV), 8 U.S.C. 1225(b)(1)(B)(iii)(IV) (an alien subject to expedited removal under section 235 "shall be detained pending a final determination of credible fear [] and, if found not to have such a fear, until removed)."

³² INA sec. 241(a)(1)(A), (B)(i), 8 U.S.C. 1231(a)(1)(A), (B)(i).

³³ INA sec. 241(a)(1)(C), 8 U.S.C. 1231(a)(1)(C).

³⁴ 533 U.S. 678 (2001).

³⁵ Under 8 CFR 241.14, aliens with "special circumstances" are those: (1) That have a highly contagious disease that threatens public safety; (2) whose release would have serious adverse foreign policy implications; (3) who present a significant threat to national security or significant risk of terrorism; or (4) who are specially dangerous.

³⁶ *Zadvydas*, 533 U.S. at 701.

³⁷ *Id.*; see also 8 CFR 241.13(d).

³⁸ See 8 CFR 241.5(a).

³⁹ DHS may also require that an alien temporarily released on an order of supervision to post a bond of a sufficient amount to ensure that the alien complies with the terms for release, including surrendering him or herself to DHS custody for removal. 8 CFR 241.5(b).

⁴⁰ Furthermore, it should also be noted that even though the average time to obtain travel documents across all countries was a little over six months, the process for negotiating with foreign governments to obtain travel documents is dynamic. While there may be a period of inactivity by a particular foreign government to cooperate with issuing travel documents, a policy shift can also occur quickly and result in prompt repatriation.

³⁰ Public Law 104–208, div. C, at secs. 401–405.

accepting the repatriation of their citizens or nationals impede DHS's ability to remove the alien in a timely manner and interfere with the United States' sovereign interest in enforcing its immigration laws. Under section 243(d) of the INA, 8 U.S.C. 1253(d), the Secretary has the authority to notify the Secretary of State that a specific country is refusing or unreasonably delaying acceptance of its nationals. Upon such notification from the Secretary, the Secretary of State shall order consular officers in that country to discontinue issuing immigrant visas, nonimmigrant visas, or both to citizens and nationals of that country.⁴¹ While DHS and DOS work through various diplomatic channels and avenues to get such countries to comply, and most countries do comply, there are countries that refuse to assist in the repatriation of their citizens and nationals, and as a result, the United States has imposed visa sanctions under section 243(d) of the INA, 8 U.S.C. 1253(d), to get such countries to cooperate.⁴²

D. Withholding of Removal Under the INA and Regulations Implementing CAT and Deferral of Removal Under Regulations Implementing CAT

Even if the alien is inadmissible or deportable and has a final order of removal, DHS's ability to remove an alien in certain cases is further restricted by U.S. treaty obligations. The United States is a party to the 1967 Protocol relating to the Status of Refugees (Protocol), which incorporates, *inter alia*, Article 33 of the 1951 Convention relating to the Status of Refugees, 198 U.N.T.S. 137. Article 33 specifically provides that "[n]o contracting state shall expel or return (*refouler*) a refugee in any manner whatsoever to the frontier of territories where his life or freedom would be threatened on account of his race, religion, nationality, membership of a

particular social group, or political opinion."⁴³ The United States is also a party to the CAT. Article 3 of the CAT requires that "[n]o State Party shall expel, return ('*refouler*') or extradite a person to another state where there are substantial grounds for believing that he would be in danger of being subjected to torture."⁴⁴

Though neither of these treaties is self-executing, the United States has implemented its non-refoulement obligations under them in statute and regulations. With respect to the Protocol, Congress implemented the United States' non-refoulement obligations as part the Refugee Act of 1980, section 241(b)(3) of the INA, 8 U.S.C. 1231(b)(3). With respect to the CAT, Congress directed the appropriate agencies to publish regulations to implement the United States' obligations under Article 3 of the CAT in the Foreign Affairs Reform and Restructuring Act of 1988 (FARRA), Public Law 105-277, Div. G., § 2442(b) (Oct. 21, 1998). DOJ published regulations in 1999 implementing FARRA § 2442. *See* 64 FR 8478-01 (1999). The regulations governing withholding of removal based on section 241(b)(3) of the INA, 8 U.S.C. 1231(b)(3), and CAT are now codified at 8 CFR 208.16 through 208.18 and 8 CFR 1208.16 through 1208.18.

Aliens granted withholding of removal based on section 241(b)(3) of the INA, 8 U.S.C. 1231(b)(3), as well as aliens granted withholding of removal based on the regulations implementing CAT, 8 CFR 208.16(c), are both subject to mandatory bars to withholding if the alien participated in the persecution of others, is a human rights violator, or has been convicted of a particularly serious crime.⁴⁵ However, even if an alien is not eligible for withholding under the provisions noted above because he or she is subject to one of the mandatory bars to withholding, DHS still is not permitted to remove an alien from the United States if an IJ or the Board of Immigration Appeals (BIA) has determined that removal would result in the alien being removed to a country where he or she would more likely than not be tortured. 8 CFR 208.17 and

1208.17. In such instances, the IJ or BIA defers removal to that country.

Withholding of deportation or removal based on section 241(b)(3) of the INA, 8 U.S.C. 1231(b)(3), or the regulations implementing CAT (if the alien is not subject to a mandatory bar) and CAT deferral of removal are mandatory and must be granted if the alien meets the burden of proof. *See* 8 CFR 208.16(c)(4) and 208.17(a). Once an alien has been granted withholding of removal or deferral of removal, DHS cannot remove the alien to the country from which removal has been withheld or deferred unless the alien's case is reopened and withholding is terminated under 8 CFR 208.24 or 1208.24, or deferral is terminated under 8 CFR 208.17 or 1208.17. In most instances an alien granted withholding of removal or deferral of removal under the regulations implementing CAT will be released pursuant to an order of supervision, but such an order does not alter or affect the nondiscretionary nature of the withholding or deferral of removal grant, even if the alien subsequently violates the conditions for release as specified in the order of supervision. Such violations could result in a return of the alien to ICE custody but will not result in the alien's actual removal from the United States unless the alien's case is reopened and withholding is terminated under 8 CFR 208.24 or 1208.24, or deferral is terminated under 8 CFR 208.17 or 1208.17.

E. Employment Authorization

Whether an alien is authorized to work in the United States depends on the alien's status in the United States and whether employment is specifically authorized by statute or only authorized pursuant to the Secretary's discretion. There are very few statutory provisions that require the Secretary to grant employment authorization.⁴⁶ While some statutory provisions specifically allow the Secretary to grant employment authorization as a matter of discretion,⁴⁷ the Secretary's general authority under section 274A(h)(3) of the INA, 8 U.S.C.

⁴¹ In 2017, DHS and DOS entered into a Memorandum of Understanding (MOU) Concerning the Removal of Aliens, which superseded the 2011 ICE and DOS Bureau of Consular Affairs MOU Concerning Repatriation. The new MOU creates a framework for effectuating repatriations, sets forth tools the agencies will use to encourage countries to accept the return of their nationals, and establishes a target travel document issuance time of 30 days.

⁴² Visa sanctions have been previously invoked under INA Section 243(d) against the following countries: Guyana in 2001; The Gambia in 2016; Cambodia, Eritrea, Guinea, and Sierra Leone in 2017; Burma and Laos in 2018; Cuba, Ghana, and Pakistan in 2019; and Burundi and Ethiopia in 2020. Visa sanctions have since been lifted against Guyana, Guinea, and The Gambia. *See* "Visa Sanctions Against Two Countries Pursuant to Section 243(d) of the Immigration and Nationality Act," at <https://www.ice.gov/visasanctions> (Last updated Aug. 13, 2020).

⁴³ Convention relating to the Status of Refugees art. 33, *opened for signature* July 28, 1951, 198 U.N.T.S. 137.

⁴⁴ Convention against Torture and Other Cruel, Inhuman or Degrading Treatment or Punishment art 3, *ratified* Oct. 21, 1994, 1465 U.N.T.S. 85.

⁴⁵ 8 CFR 208.16(d)(2) specifically notes that an application for withholding of removal under CAT shall be denied if the applicant falls within INA section 241(b)(3)(B).

⁴⁶ *See, e.g.*, INA sec. 214(c)(2)(E), 8 U.S.C. 1184(c)(2)(E) (requiring spouses of L nonimmigrants to be employment authorized); INA sec. 214(e)(6), 8 U.S.C. 1184(e)(6) (requiring spouses of E treaty traders/investors to be employment authorized); INA sec. 214(p), 8 U.S.C. 1184(p) (requiring U nonimmigrants to be employment authorized).

⁴⁷ *See, e.g.*, INA sec. 106(a), 8 U.S.C. 1105a (providing that the Secretary may grant employment authorization to spouses and children of certain nonimmigrants who were battered or subjected to extreme cruelty); INA sec. 214(p)(6), 8 U.S.C. 1182(p)(6) (providing that the Secretary may grant employment authorization to aliens who have filed a bona fide application for U nonimmigrant status).

1324a(h)(3), is used to establish most discretionary employment authorization categories. However, in the context of aliens ordered removed, section 241(a)(7) of the INA, 8 U.S.C. 1231(a)(7), specifically prohibits an alien who has been ordered removed from the United States from being eligible to receive employment authorization unless the Secretary determines that the alien cannot be removed because no country, as designated by the alien or delineated under section 241(b) of the INA, 8 U.S.C. 1231(b), will accept the alien or the alien's removal is impracticable or contrary to the public interest.

DHS regulations at 8 CFR 274a.12 set forth the categories of aliens who are authorized to work in the United States, including; those aliens who are authorized to work incident to their status (8 CFR 274a.12(a)); aliens who are authorized to work in the United States but only for a specific employer (8 CFR 274a.12(b)); and aliens who fall within a category that the Secretary has determined may be employment authorized as a matter of discretion (8 CFR 274a.12(c)). Aliens seeking employment authorization generally must file an application with USCIS with the appropriate fee (unless waived) and in accordance with the form instructions. *See* 8 CFR 274a.13.

F. Biometric Submission

Current DHS regulations provide general authorities for USCIS to require the submission of biometrics in connection with immigration benefits. *See* 8 CFR 103.2(b)(9). DHS has the authority to require the submission of biometrics from any applicant, petitioner, sponsor, beneficiary, or requestor, or individual filing a request, on a case-by-case basis, through form instructions, or by a **Federal Register** notice. *See* 8 CFR 103.16. Current regulations allow DHS to use the biometric information to conduct background and security checks,

adjudicate immigration benefits, and perform other functions related to the administration of the INA. *See id.* DHS is also authorized to charge a biometric services fee associated with the submission of biometric information. *See* 8 CFR 103.17.

V. Discussion of the Proposed Rule

A. Eligibility for Employment Authorization for Aliens on Orders of Supervision

Section 241(a)(7) of the INA, 8 U.S.C. 1231(a)(7), specifically prohibits an alien who has been ordered removed from the United States from being eligible to receive employment authorization unless the Secretary, in the Secretary's discretion, determines, under subparagraph (a)(7)(A), that the alien cannot be removed because no country, as designated by the alien or delineated under section 241(b) of the INA, 8 U.S.C. 1231(b), will accept the alien or, under subparagraph (a)(7)(B), 8 U.S.C. 1231(a)(7)(B), the alien's removal is impracticable or contrary to the public interest. Neither the INA nor the regulations mandate issuance of employment authorization for any alien subject to a final order of removal or based on such alien's temporary release from custody on an order of supervision. The statute preserves the Secretary's discretion to decide if employment authorization should be granted and, if yes, to which classes of aliens based upon a finding under subparagraph (A) or (B) of section 241(a)(7) of the Act, 8 U.S.C. 1231(a)(7)(A), (B).

DHS is proposing to amend 8 CFR 274a.12(c)(18) to eliminate eligibility for employment authorization for all aliens who have final orders of removal and are temporarily released from custody on an order of supervision except for aliens for whom DHS has determined that their removal from the United States is impracticable because all countries from whom DHS has

requested travel documents have affirmatively declined to issue such documents. *See* proposed 8 CFR 274a.12(c)(18). Providing EADs to aliens who do not fall within this exception undermines the integrity of the immigration system by incentivizing aliens with a final removal order to remain in the United States instead of complying with their removal orders, obtaining travel documents in a timely manner, and departing the United States.

Encouraging aliens who do not fall within the exception provided in this rule to timely depart the United States also promotes the efficient use of DHS's limited resources. Managing the vast number of aliens on OSUP consumes an inordinate amount of DHS resources. Management of aliens temporarily released on OSUP requires tracking and monitoring the status of such aliens, as well as conducting regular check-ins to ensure compliance with the conditions of release. This time intensive process takes away from other enforcement priorities such identifying, detaining, and removing criminal aliens. The proposed rule also aligns with the Administration's goals of strengthening protections for U.S. workers in the labor market. It helps strengthen protections for U.S. workers and minimize the risk of disadvantaging U.S. workers, especially as the economy and the labor market recovers from the significant disruptions caused by the COVID-19 pandemic.

DHS has determined that continuing to provide employment authorization to those aliens who fall within the exception provided in this rule is consistent with the impracticability clause of INA section 241(a)(7)(B), 8 U.S.C. 1231(a)(7)(B). Table 7 below shows the number of aliens for whom DHS cannot obtain travel documents annually out of the total number of aliens removed from the United States.

TABLE 7—ALIENS REMOVED FROM THE UNITED STATES AND ALIENS FOR WHOM DHS WAS UNABLE TO OBTAIN TRAVEL DOCUMENTS IN THE REPORTED FISCAL YEAR*

Fiscal year	Total number of aliens removed from the United States	Number of aliens on orders of supervision for whom DHS could not obtain travel docs to execute removal from the United States
2015	235,413	369
2016	240,255	411
2017	226,119	324
2018	256,085	530
2019	267,258	659
Average over 5-Fiscal Year Period	245,026	459

* Data from ICE ERO, LESA Statistical Tracking Unit (FY 2015 to FY 2019).

In some instances, even if DHS is not able to obtain travel documents for an alien in one fiscal year, DHS is able to obtain such documents in a subsequent fiscal year. DHS expects the number of aliens whose removal from the United States is impracticable because all countries from whom DHS has requested travel documents have affirmatively declined to issue such documents will remain very low. As such, DHS has determined that it is not contrary to the INA or the Administration's enforcement priorities to allow such aliens to work while they remain in the United States and until they can be removed.

For aliens whose removal from the United States is impracticable, DHS is proposing to make economic necessity, which is currently only a discretionary factor, a mandatory eligibility requirement, consistent with other discretionary employment authorization categories. *See, e.g.*, 8 CFR 274a.12(c)(14). As such, aliens who are eligible to apply for employment authorization based on the exception created in this proposed rule will need to demonstrate economic necessity for employment during the period they are on an order of supervision. Aliens who are financially able to support themselves during the period prior to their removal from the United States will not be eligible for an EAD. Furthermore, to protect U.S. workers against potential displacement or any disadvantages in the labor market, including during the current economic recovery, DHS wants to ensure that U.S. employers who hire aliens who are temporarily released on an order of supervision are complying with our immigration laws and not employing unauthorized workers. For this reason, DHS is proposing to require aliens on an order of supervision who are seeking a renewal of their employment authorization be employed by a U.S. employer who is a participant in good standing in the E-Verify program.

DHS proposes to limit the validity period for employment authorization under 8 CFR 274a.12(c)(18), whether the alien seeks an initial or renewal EAD, to a period not to exceed increments of one year.

B. USCIS Evidentiary Requirements

DHS proposes to require aliens temporarily released on orders of supervision who are eligible to apply for employment authorization under the new criteria and who are seeking initial employment authorization or a renewal to submit an Application for Employment Authorization, (Form I-765) with the appropriate fee, including

the biometric services fee, and in accordance with the form instructions. *See* proposed 8 CFR 274a.13(a)(3). DHS also proposes to require such aliens to submit the following additional documents: (1) A copy of a decision by an IJ or the BIA, or an administrative removal order issued by DHS demonstrating that the alien is subject to a final order of removal or deportation; (2) a completed Employment Authorization Worksheet (Form I-765WS) to show economic necessity;⁴⁸ and (3) a copy of the current and complete Order of Supervision (Form I-220B), including a copy of the complete Personal Report Record which reflects compliance with the conditions for release.

Given that ICE is the primary DHS component with jurisdiction over the detention and removal of aliens with a final removal order, ICE will make the appropriate determination as to whether the alien's removal is impracticable at the time of the alien's initial temporary release on an order of supervision and thereafter when the alien is required to report to ICE consistent with the conditions of release. If ICE determines all countries from whom DHS has requested travel documents have affirmatively declined to issue such documents, ICE officers will annotate the Form I-220B to indicate that the alien's removal is currently impracticable because of the reasons stated above. Aliens with final removal orders who are temporarily released on an order of supervision and who are seeking employment authorization based on this exception would not be eligible to apply for employment unless ICE has made such a determination and annotated the Form I-220B to indicate the alien's removal is impracticable because of the reasons stated above.

In addition to the above, DHS proposes to require aliens on orders of supervision who apply for initial employment authorization after the effective date of the final rule and who subsequently seek renewal of their employment authorization to: (1) Show that they meet the exception, (2) demonstrate economic necessity by submitting a completed Employment Authorization Worksheet (Form I-765WS), and (3) show that they are employed by a U.S. employer who is a participant in good standing in E-Verify (renewals only) by providing their U.S. employer's E-Verify Company Identification Number and the

employer's name as listed in E-Verify on their application for employment authorization. *Id.* An alien who fails to establish that he or she is employed by an E-Verify employer at the time of filing or adjudication of the application to renew his or her employment authorization is ineligible for an EAD. Furthermore, for both initial and renewal EAD applications, DHS will determine if the alien warrants a favorable exercise of discretion to grant employment authorization. To this end, aliens may include supporting documentation of favorable factors as part of the EAD application.

C. Biometric Submission and Criminal History

Currently, all (c)(18) applicants receive an appointment notice from USCIS to submit their biometrics so USCIS can use them for identity verification and EAD production. DHS proposes to codify this biometric submission and associated biometric services fee for aliens seeking discretionary employment authorization under the (c)(18) category. *See* proposed 8 CFR 241.4(j)(3).

In addition, DHS also proposes to use the (c)(18) applicant's biometrics to screen for criminal history. DHS has a strong interest in ensuring public safety and preventing aliens with significant criminal histories from obtaining a discretionary benefit. As such, for aliens who fall within the exception provided in this proposed rule and meet the economic necessity requirement, DHS is proposing to consider a (c)(18) applicant's criminal history in determining whether DHS will favorably exercise its discretion to grant an employment authorization. Where criminal history is a factor in the adjudication of an immigration benefit, DHS typically conducts biometric-based screening to independently identify and verify criminal history in addition to reviewing any evidence submitted by the applicant regarding his or her criminal history.⁴⁹ As such, DHS would also use the (c)(18) applicant's biometrics to screen against government databases (for example, FBI databases) to determine if he or she matched any criminal activity on file. USCIS will continue to notify applicants of the proper date, time, and location to submit their biometrics after the application for employment authorization has been filed.

Furthermore, DHS proposes to require a biometric services fee of \$30 for (c)(18)

⁴⁸ *See also* 8 CFR 274a.12(e) which provides that the Federal Poverty Guidelines under Title 45 of the U.S. Code should be used as the criteria to establish eligibility for employment authorization when economic necessity is a factor.

⁴⁹ *See* "DHS/USCIS-018 Immigration Biometric and Background Check System of Records," 83 FR 36950 (July 31, 2018).

EAD applicants. *See* proposed 8 CFR 106.2(a)(32)(i)(C). DHS requires a biometric services fee of \$30 to be collected where the underlying immigration benefit fee does not capture or incorporate biometric service costs.⁵⁰ *See* 8 CFR 103.17 & 106.2(a)(32)(i)(A), (B). DHS did not require a biometric services fee for (c)(18) EAD applicants in the 2020 USCIS fee rule because this proposed rule and the USCIS fee rule were under development simultaneously, yet independently of one another. *See* 84 FR 62280–62371 (Nov. 14, 2019). Additionally, (c)(18) EAD applicants do not have an underlying immigration benefit application or petition that they must file into which associated biometric submission and processing costs can be incorporated. Therefore, to recover the cost of biometrics services for (c)(18) EAD applications, DHS must require a biometrics fee for a (c)(18) EAD applicant. Thus, DHS proposes to require a \$30 biometric services fee with the Form I–765 for (c)(18) EAD applicants. *See* proposed 8 CFR 106.2(a)(32)(i)(C).

D. Aliens Granted Deferral of Removal Under the Regulations Implementing CAT

Once an alien has been granted withholding or deferral of removal, DHS cannot remove the alien to the country from which removal has been withheld or deferred unless withholding or deferral are terminated under applicable regulatory procedures set out in 8 CFR 208.24, 1208.24, 208.17, 1208.17, or 1208.18(c). The average number of aliens granted CAT deferral of removal over a 5-fiscal-year period was 147, and these numbers have not changed significantly over the last decade.⁵¹ As reflected in Table 8 below, the number of aliens granted CAT deferral from FY 2014 through FY 2018, remains low.

TABLE 8—FY 2014 THROUGH FY 2018 CAT CASES GRANTED *

Fiscal year	CAT deferral of removal
2014	121
2015	121
2016	140
2017	175
2018	177

⁵⁰ 84 FR 62280, 62302–62303 (Nov. 14, 2019). Explaining how USCIS calculated the biometric services fee of \$30 that will be required for certain forms for which it performs biometrics services.

⁵¹ U.S. Department of Justice, Executive Office for Immigration Review, Statistical Yearbooks, FY 2014 through FY 2018 at <https://www.justice.gov/eoir/statistical-year-book>.

TABLE 8—FY 2014 THROUGH FY 2018 CAT CASES GRANTED *—Continued

Fiscal year	CAT deferral of removal
5-Year Average	147

* U.S. Department of Justice, Executive Office for Immigration Review, Statistical Yearbooks for FY 2014–FY 2018.

Currently, aliens who are not going to be removed because they are granted withholding of removal based on section 241(b)(3) of the INA, 8 U.S.C. 1231(b)(3), or the regulations implementing CAT are employment authorized based on the grant of withholding. *See* 8 CFR 274a.12(a)(10). However, DHS's regulations do not clearly indicate the basis for withholding of removal (INA section 241(b)(3) or CAT). DHS has determined that aliens who receive CAT deferral of removal should also be included in the regulatory category governing employment authorization for aliens granted withholding of removal. Aliens granted deferral of removal will be employment authorized based on the grant of deferral, until deferral is terminated under applicable regulations. DHS proposes to amend the regulations to make these clarifications.

E. Effective Date of the Final Rule

With the exception of aliens whose removal DHS has determined is impracticable because all countries from whom DHS has requested travel documents have affirmatively declined to issue such documents, DHS proposes to apply changes made by this rule only to initial and renewal applications under 8 CFR 274a.12(c)(18) filed on or after the effective date of the final rule. DHS proposes to allow aliens temporarily released on orders of supervision who are already employment authorized prior to the final rule's effective date to remain employment authorized until the expiration date on their EAD, unless the card is revoked under 8 CFR 274a.14. USCIS would continue processing any pending application for a replacement EAD received before the effective date and receiving new applications for replacement EADs because those adjudications are not considered a new grant of employment authorization but a replacement of an EAD based on a previously authorized period.

DHS further proposes to allow aliens temporarily released on orders of supervision who are granted discretionary employment authorization after the effective date of the final rule

to have their employment authorization renewed only if: (1) DHS determines the alien's removal is impracticable because all countries from whom DHS has requested travel documents have affirmatively declined to issue such documents, (2) the alien shows economic necessity for employment, (3) the alien is employed by a U.S. employer who is a participant in good standing in E-Verify (renewals only), and (4) the alien establishes that he or she warrants a favorable exercise of discretion to obtain employment authorization. DHS is proposing in this rule that it will consider an E-Verify employer to be a participant in good standing if the employer: (1) Has enrolled in E-Verify with respect to all hiring sites in the United States that employ an alien temporarily released on an order of supervision who has received employment authorization under this rule as of the time of filing of the alien's application for employment authorization, (2) is in compliance with all requirements of the E-Verify program, including but not limited to verifying the employment eligibility of newly hired employees at those hiring sites, and (3) continues to be a participant in good standing in E-Verify at any time during which the employer employs an alien temporarily released on an order of supervision who has received employment authorization under this rule.

F. Additional Amendments

Finally, DHS is updating the regulations at 8 CFR 241.4(j)(3), 241.5(a), 241.5(c), and 241.13(h)(1) to remove references to obsolete titles of officials of the former INS, to refer generally to ICE as the DHS component with authority to issue orders of supervision, to reflect USCIS as the agency that grants employment authorization, and include appropriate references. This proposed change gives the Secretary and the Director of ICE the flexibility to delegate authorities within ICE to appropriate component heads, notwithstanding the particular titles that may be assigned to a particular position in the future.⁵² *See* proposed 8 CFR

⁵² After the functions of the former Immigration and Naturalization Service were transferred to the Secretary pursuant to the Homeland Security Act, Public Law 107–296, 441(c) (6 U.S.C. 251(2)), the functions were further delegated to component heads. ICE now has primary authority over all enforcement actions and USCIS has authority over adjudications of immigration benefits, including issuance of employment authorization documents. *See* DHS Delegation No. 7030.2, “Delegation of Authority to the Assistant Secretary for U.S. Immigration and Customs Enforcement,” (Nov. 13, 2004); DHS Delegation No. 0150.1, “Delegation to

Continued

241.4(j)(3), 241.5(a), 241.5(c), and 241.13(h)(1). Additionally, DHS is updating 8 CFR 241.5(a) to include a cross-reference to 8 CFR 241.13(h). This cross reference will clarify that aliens temporarily released on an order of supervision under 8 CFR 241.13(h) are subject to the conditions of release provided in 8 CFR 241.5 and close the loop with the concomitant reference to 8 CFR 241.5 contained within 8 CFR 241.13(h). *See* proposed 8 CFR 241.5(a). DHS will update all of 8 CFR 241 in a future rulemaking to remove additional references to obsolete INS titles consistent with the proposed change made under section 8 CFR 241.5(a).

VI. Statutory and Regulatory Requirements

A. Executive Orders 12866 (Regulatory Planning and Review) and 13563 (Improving Regulation and Regulatory Review)

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if a regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility. This rule has been designated as a “significant regulatory action” that is economically significant since it is estimated the proposed rule likely would have an annual effect on the economy of \$100 million or more, under section 3(f)(1) of

E.O. 12866. Accordingly, OMB has reviewed this proposed regulation.

1. Summary

This proposed rule is estimated to result in a reduction in the number of aliens on orders of supervision who are eligible for employment authorization, which could result in lost earnings for those no longer eligible. This loss of earnings would result in a transfer of costs from the alien to their support network, including family members, community groups, non-profits or third-party organizations to provide for the alien and any dependents. In addition, DHS estimates increased filing burdens associated with the proposed rule for those who remain eligible for employment authorization. Employers that currently hire alien workers who would no longer be eligible to renew under this rule could experience new costs due to employee turnover or complying with the proposed E-Verify requirement. Finally, the proposed rule may result in a loss of tax revenue.

Under the proposed rule, DHS anticipates there would be six types of economic impacts that DHS can estimate and quantify: (1) Potential lost earnings for alien workers on orders of supervision who may no longer be eligible for employment authorization; (2) increased time burden for applicants to submit forms; (3) added time and costs for applicants to submit biometrics; (4) labor turnover costs that employers of alien workers on orders of supervision could incur when their employees’ EADs expire and are not renewed; (5) costs to employers to enroll in and maintain an E-Verify account as a participant in good standing to retain alien workers on orders of supervision applying for renewal EADs; and (6) potential employment tax losses to the Federal Government.

DHS estimates that some aliens with final removal orders and temporarily released on orders of supervision would be ineligible for discretionary EADs due to this proposed rule. However, DHS cannot estimate with precision what the future eligible population would be because of data constraints and, therefore, relies on a range with an upper and lower bound. The estimated costs of this proposed rule would range from a minimum of about \$94,868, associated with biometrics and added burdens for relevant filing forms to a maximum of \$1,496,016,941 (annualized 7%) should no replacement labor be found for aliens on orders of supervision who would be ineligible for employment authorization under this rule.⁵³ The ten-year undiscounted costs would range from \$940,239 to \$14,722,941,163. DHS estimates \$228,789,887 (annualized 7%) as the maximum decrease in employment tax transfers from companies and employees to the Federal Government.

Table 9 provides a summary of the proposed regulatory changes and the estimated impacts of the proposed rule.

BILLING CODE 9111–97–P

⁵³ DHS estimates some of the costs and benefits of this rule using the newly published *U.S. Citizenship and Immigration Services Fee Schedule and Changes to Certain Other Immigration Benefit Request Requirements*, final rule (“Fee Schedule Final Rule”), and associated form changes, as the baseline. 85 FR 46788 (Aug. 3, 2020). The Fee Schedule Final Rule was scheduled to go into effect on October 2, 2020. On September 29, 2020, the U.S. District Court for the Northern District of California issued a nationwide injunction, which prevents DHS from implementing the Fee Schedule Final Rule. *See, Immigrant Legal Resource Center v. Wolf*, No. 4:20–cv–5883 (N.D. Cal. Sept. 29, 2020). DHS intends to vigorously defend this lawsuit and is not changing the baseline for this rule as a result of the litigation. Should DHS not prevail in the Fee Schedule Final Rule litigation, this rule may reflect understated costs associated with biometrics fees and overstated benefits associated with filing Form I–765.

the Bureau of Citizenship and Immigration Services,” (June 5, 2003).

Table 9: Summary of Impacts and Estimated Cost and Benefits of the Proposed Rule

Provisions	Regulatory Changes	Estimated Impact of Regulatory Change
Amending 8 CFR 241.5	DHS proposes to update the current language of the regulation to reflect that the Secretary of Homeland Security (Secretary) or the Secretary's designee can issue orders of supervision.	This change would give DHS the flexibility to delegate the authorities under the provision without requiring additional rulemaking in the future.
Amending 8 CFR 241.4(j)(3), 8 CFR 241.5(c) and 8 CFR 241.13(h)(1)	DHS proposes to remove language that authorized designated ICE officers to grant employment authorization for aliens temporarily released on orders of supervision. ICE no longer grants employment authorization and USCIS has primary jurisdiction over EAD issuance. DHS proposes to add language regarding the existing requirement for biometrics submission from (c)(18) applicants.	These changes propose to codify current policy and reduce confusion for aliens temporarily released on orders of supervision who apply for employment authorization.
Amending 8 CFR 241.4(j)(3) and 8 CFR 106.2(a)(32)(i)(C)	DHS proposes to add language to codify biometrics submission from (c)(18) applicants. Aliens on orders of supervision applying for initial and renewal (c)(18) employment authorization must submit biometrics at a scheduled biometrics services appointment and pay a \$30 fee.	This change would require aliens temporarily released on orders of supervision to submit their biometrics at an ASC. <u>Quantified Impacts</u> Costs for aliens temporarily released on orders of supervision would range from \$83,148 to \$552,741 with a primary estimate of \$317,945 (annualized 7%). <u>Qualitative Benefits</u> Enables DHS to vet an applicant's biometrics against government databases to determine if he or she matched any criminal activity on file, to verify the applicant's identity, and to facilitate card production.
Amending 8 CFR 274a.12(a)(10)	DHS proposes to revise the (a)(10) employment authorization category, which currently covers those granted withholding of removal under section 241) of the INA, 8 U.S.C. 1231(b)(3), or the regulations implementing CAT under 8 CFR 208.16 or 1208.16, to include aliens who are granted CAT deferral of removal as employment authorized based solely on the grant of deferral. Aliens granted withholding of removal under INA sec. 241(b)(3) and the regulations implementing CAT currently are employment authorized by virtue of the grant of withholding.	This change proposes to revise current policy to reduce confusion for aliens who are granted CAT and would ensure consistency in adjudication for this population. <u>Quantified Benefits</u> Aliens granted CAT deferral of removal who do not apply for an EAD card would save time and money ranging from \$0 to \$105,690 annually.
Amending 8 CFR 274a.12(c)(18)	DHS proposes to: <ul style="list-style-type: none"> Eliminate eligibility for employment authorization for aliens with final orders of removal who are released from custody on orders of supervision except for those aliens for whom DHS determines their removal is impracticable 	<u>Quantified Costs and Transfers</u> <ul style="list-style-type: none"> Lost earnings for aliens temporarily released on orders of supervision would range from \$614,037,170 to \$1,495,358,741 with a primary estimate of \$1,054,697,955 (annualized 7%).

	<p>because all countries from whom DHS has requested travel documents have affirmatively declined to issue such documents.</p> <ul style="list-style-type: none"> • Add new discretionary factors USCIS will consider when deciding whether to grant employment authorization including whether: <ol style="list-style-type: none"> 1. the alien complies with the conditions for release specified in the order of supervision, and 2. the alien has any criminal history, including but not limited to criminal activities subsequent to release from detention; • Add a requirement that alien be employed with an E-Verify employer in good standing, if the alien is seeking renewal of an EAD issued based on an order of supervision; and • Add a requirement that an alien establish economic necessity for employment when filing an initial and renewal EAD application. 	<ul style="list-style-type: none"> • DHS acknowledges that businesses that have hired (c)(18) workers who are no longer eligible for work authorization due to this proposed rule would incur labor turnover costs earlier than without this rule. • If employers are unable to find replacement workers, reduction in federal employment taxes paid would range from \$93,947,687 to \$228,789,887, with a primary estimate of \$161,368,787 (annualized 7%). • Employer costs related to enrolling in E-Verify and maintaining an account would cost \$113.65 for new E-Verify participants in the first year and \$53.71 in subsequent years with an additional cost of \$6.14 per query for every company employee – both citizen and non-citizen. Employer costs related to labor turnover for employers who are not enrolled and opt not to enroll in E-Verify would cost between \$7,168 and \$15,621 per worker, depending on the wage of their (c)(18) alien worker. <p>DHS emphasizes that the costs of the rule in terms of lost or deferred labor earnings will potentially depend on the extent of surplus labor in the labor market. In the current environment with COVID-19-related layoffs and unemployment, there is the potential that the costs of the rule will be lower than they would otherwise have been.</p> <p><u>Qualitative Costs and Transfers</u></p> <ul style="list-style-type: none"> • Those who are currently employment authorized, but who would no longer qualify for employment authorization under the proposed rule could experience other impacts possibly involving personal and family-related hardships and disruptions to the individual, U.S. citizen, or LPR spouses and/or children dependent on the income currently earned by the affected alien. • Additional unquantified Federal, state, and local income tax revenue also could be lost. • A loss of earnings would result in a transfer of costs from the alien to their support network, including family members, community groups, non-profits, or third-party organizations to provide for the alien and any dependents. <p><u>Qualitative Benefits</u></p> <ul style="list-style-type: none"> • The restriction on income opportunities may increase the incentives for aliens with final orders of removal to depart the United States, which could save government resources expended on enforcing removal orders for aliens as well as monitoring and tracking aliens temporarily released on orders of supervision.
--	--	--

8 CFR 274a.13(a)(3)	<p>DHS proposes to:</p> <ul style="list-style-type: none"> • Add requirements for aliens on orders of supervision seeking initial employment authorization and renewals to include: <ol style="list-style-type: none"> 1. A copy of the decision by the IJ or DHS of the final order of removal, 2. Form I-765WS to show economic necessity, 3. A copy of their current Order of Supervision, (Form I-220B) with a copy of the complete the Personal Report Record reflecting the alien's compliance with the conditions for release from the date of release. • Add a requirement for aliens on orders of supervision seeking renewal of their employment authorization to also submit their U.S. employer's E-Verify Company Identification number and employer's name as listed in E-Verify. 	<p><u>Quantified Costs</u></p> <ul style="list-style-type: none"> • Costs to applicants who submit Forms I-765 and I-765WS, would range from \$11,721 to \$105,459 with a primary estimate of \$58,590 (annualized 7%). <p><u>Qualitative Benefits</u></p> <ul style="list-style-type: none"> • Enables DHS to determine if there is an economic necessity for employment authorization and ensures that aliens on orders of supervision who renew their EAD are having their employment authorization verified by their employer.
---------------------	---	--

BILLING CODE 9111-97-C

The impacts of reducing the number of aliens temporarily released on orders of supervision that are eligible for EADs include both potential distributional impacts (transfers) and costs. USCIS uses the lost compensation to aliens temporarily released on orders of supervision that are no longer eligible for EADs as a measure of the impact of this change—either as distributional impacts (transfers) from these aliens to others or as a proxy for businesses' cost for lost productivity. If all companies are able to easily find reasonable labor substitutes for the positions the aliens temporarily released on orders of supervision would have otherwise filled, DHS estimates a maximum of \$1,495,358,741 (annualized at 7%) would be transferred from these workers to others in the labor force (or induced back into the labor force). Under this scenario, there would be no federal employment tax losses. Conversely, if companies are unable to find reasonable labor substitutes for the position the aliens temporarily released on orders of supervision would have filled then a maximum of \$1,495,358,741 (annualized 7%) is the estimated monetized cost of this provision, and \$0 is the estimated monetized transfers from these aliens to other workers. In addition, under this scenario where jobs would go unfilled, there would be a loss of employment taxes to the Federal Government. USCIS estimates \$228,789,887 (annualized 7%) as the maximum decrease in employment tax transfers from companies and employees to the Federal Government.

The two scenarios described above represent the estimated endpoints for the range of monetized impacts resulting from the provisions that affect employment eligibility for aliens temporarily released on orders of supervision. There are other costs of the rule, including E-Verify, biometrics, labor turnover, and additional form burdens. These costs exist under both scenarios described above, and thus \$94,868 is the minimum cost of the rule (annualized 7%).

DHS is aware that the outbreak of COVID-19 will likely impact these estimates in the short run.⁵⁴ As discussed above, the analysis presents a range of impacts, depending on if companies are able to find replacement labor for the jobs alien workers temporarily released on orders of supervision would have filled. In September 2020, the unemployment rate was 7.9 percent.⁵⁵ This is an improvement on April's 14.7 percent which marked the highest rate and the largest over-the-month increase in the history of the series (seasonally adjusted data are available back to January

1948).⁵⁶ By comparison, the unemployment rate for September 2019 was 3.5%.⁵⁷ DHS assumes that during the COVID-19 pandemic, with additional available labor nationally, companies are more likely to find replacement labor for the job the alien on an order of supervision would have filled.⁵⁸ Thus, in the short-run during the pandemic and the ensuing economic recovery, the lost compensation to EAD applicants as a result of this rule is likely to mean that the costs of the rule will be lower than they would otherwise have been. DHS notes that although the pandemic is widespread, the severity of its impacts varies by locality. Consequently, it is not clear to what extent the distribution of alien workers temporarily released on orders of supervision overlaps with areas of the country that will be more or less impacted by the COVID-19 pandemic. Accordingly, DHS cannot estimate with

⁵⁶ In April 2020, the unemployment rate increased by 10.3 percentage points to 14.7 percent. Department of Labor, Bureau of Labor Statistics, The Employment Situation—April 2020. Available at: https://www.bls.gov/news.release/archives/empst_05082020.pdf.

⁵⁷ Department of Labor, Bureau of Labor Statistics, The Employment Situation—September 2019, Employment Situation Summary Table A. Household data, seasonally adjusted. Available at: https://www.bls.gov/news.release/archives/empst_10042019.pdf.

⁵⁸ The Congressional Budget Office estimates the unemployment rate is expected to average close to 14 percent during the second quarter. See: CBO's Current Projections of Output, Employment, and Interest Rates and a Preliminary Look at Federal Deficits for 2020 and 2021 <https://www.cbo.gov/publication/56335> April 24, 2020.

⁵⁴ On March 13, 2020, the President declared that the COVID-19 outbreak in the United States constitutes a national emergency. See "Proclamation on Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID-19) Outbreak," available at <https://www.whitehouse.gov/presidential-actions/proclamation-declaring-national-emergency-concerning-novel-coronavirus-disease-covid-19-outbreak/>.

⁵⁵ Department of Labor, Bureau of Labor Statistics, The Employment Situation—September 2020. Available at: https://www.bls.gov/news.release/archives/empst_10022020.pdf.

<p>confidence to what extent the impacts will be transfers instead of costs.</p> <p>DHS’s assumption that all applicants with an EAD are able to obtain employment (discussed in further detail later in the analysis), also does not reflect impacts from the COVID–19 pandemic. It is not clear what level of</p>	<p>reductions the pandemic will have on the ability of EAD holders to find jobs (as jobs are less available), or how DHS would estimate such an impact with any precision given available data. Consequently, the ranges projected in this analysis regarding lost</p>	<p>compensation are expected to be an overestimate, especially in the short-run. The range of impacts described by the scenarios above, plus the consideration of the other costs, are summarized in Table 10.</p> <p>BILLING CODE 9111–97–P</p>
---	--	---

Table 10: Summary of Range of Monetized Annualized Impacts**Table 10(A): Annualized Impacts at 7%**

Category	Description	Scenario: No Replacement Labor found for Aliens Temporarily Released on Orders of Supervision		Scenario: All Aliens Temporarily Released on Orders of Supervision Replaced with Other Workers		Primary
		Min	Max	Min	Max	
Transfers						
Compensation	Compensation transferred from aliens temporarily released on orders of supervision to other workers (provisions: remove EAD eligibility)	\$0	\$0	\$614,037,170	\$1,495,358,741	\$747,679,371
Taxes	Lost employment taxes paid to the Federal Government (provisions: remove EAD eligibility)	\$93,947,687	\$228,789,887	\$0	\$0	\$114,394,944
Costs

In addition, Table 11 presents the prepared accounting statement, as required by the Office of Management and Budget (OMB) Circular A-4, showing the costs associated with this proposed regulation. Note that under

costs, the primary estimates provided in the accounting statement are calculated based the minimum cost from the scenario that all aliens temporarily released on orders of supervision are replaced with other workers and the

maximum cost from the scenario that no aliens temporarily released on orders of supervision are replaced with other workers (scenario presented in Tables 10(A) and (B)).

Table 11. OMB A-4 Accounting Statement (\$, 2020)					
Period of analysis: 2020 – 2029					
Category	Primary Estimate		Minimum Estimate	Maximum Estimate	Source Citation (RIA, preamble, etc.)
BENEFITS					
Monetized Benefits	This proposed rule would produce some benefits for aliens who are granted CAT deferral of removal, as this population would no longer need to submit Form I-765 in order to become employment authorized. DHS estimates the total benefits for this population would range from \$0 to \$105,690 annually.				RIA
Annualized quantified, but un-monetized, benefits	N/A		N/A	N/A	RIA
Unquantified Benefits	This proposed rule may allow U.S. workers to have a better chance of obtaining jobs that some (c)(18) alien workers currently hold. Additionally, the proposed rule may reduce the incentive for aliens to remain in the United States after receiving a final order of removal, which could save government resources expended on enforcing removal orders for such aliens.				RIA
COSTS					
Annualized monetized costs (discount rate in parenthesis)	(7%)	\$748,055,905	\$94,868	\$1,496,016,941	RIA
	(3%)	\$741,398,430	\$94,395	\$1,482,702,465	RIA
Annualized quantified, but un-monetized, costs	N/A		N/A	N/A	RIA
Qualitative (unquantified) costs	In cases where employers cannot find reasonable substitutes for the labor the aliens on orders of supervision would have provided, affected employers could also lose profits from lost productivity. In all cases, employers would incur opportunity costs by having to choose the next best alternative to immediately filling the job the alien who was temporarily released on an order of supervision would have filled. Employers may incur additional opportunity costs such as search costs and costs to enroll and participate in the E-Verify program should they choose to retain their eligible (c)(18) workers.				RIA
TRANSFERS					
Annualized monetized transfers: compensation	(7%)	\$747,679,371	\$0	\$1,495,358,741	RIA
	(3%)	\$741,023,841	\$0	\$1,482,047,682	
From whom to whom?	From employment authorized workers with orders of supervision to other available workers.				RIA

Annualized monetized transfers: “off-budget”	(7%)	\$114,394,944	\$0	\$228,789,887	RIA
	(3%)	\$113,376,648	\$0	\$226,753,295	
From whom to whom?	A reduction in federal employment taxes from employers and employees to the Federal Government. Additional unquantified Federal, state, and local income tax revenue also could be lost.				
<i>Category</i>	<i>Effects</i>				<i>Source Citation (RIA, preamble, etc.)</i>
Effects on State, local, and/or tribal governments	DHS cannot determine the number of (c)(18) alien workers who could be removed from the labor force due to the proposed rule. Federal, state, and local income tax revenue also may be reduced. For the (c)(18) alien population that will not be able to renew their EAD or obtain an initial EAD, there would likely be an impact in terms of lost income which could pose economic hardships. Members of this population may need to rely on their support networks for financial and social assistance, which could involve, but which may not be limited to, family members and friends, religious and charitable organizations, private non-profit providers, and non-governmental organizations (NGOs).				RIA
Effects on small businesses	This proposed rule could result in indirect costs on entities, some of which could be small entities. DHS acknowledges that changing eligibility criteria for aliens on orders of supervision to obtain employment authorization could result in entities that have hired such workers incurring labor turnover costs. Entities may also incur costs related to using E-Verify.				RFA
Effects on wages	None.				RIA
Effects on growth	None.				RIA

BILLING CODE 9111-97-C

The benefits potentially realized by the proposed rule are both qualitative and quantitative. Under this proposed rule, a U.S. worker may have a better chance of obtaining jobs that some (c)(18) alien workers currently hold, as the proposal would reduce employment authorization eligibility for this population of aliens who have been ordered removed from the country. Second, the proposed rule may reduce the incentive for aliens to remain in the United States after receiving a final order of removal, which could reduce the amount of government resources expended on enforcing removal orders for such aliens as well as monitoring and tracking aliens temporarily released on orders of supervision. Third, DHS clarifies that aliens granted CAT deferral of removal would no longer need to submit Form I-765 in order to become employment authorized after the effective date of the final rule. DHS estimates the total benefits for this population would range from \$0 to \$105,690 annually. Additional savings could also be accrued in the form of opportunity costs of time if applicants would have spent time submitting evidence under any of the (c)(18) considerations.

2. Background and Purpose of the Proposed Rule

ICE works to remove aliens subject to a final order of removal from the United States promptly. Removal operations require integrated coordination, management, and facilitation efforts. The removal of aliens subject to final orders of removal is a national security priority for the United States, highlighted by E.O. 13768, “Enhancing Public Safety in the Interior of the United States” (Jan. 25, 2017).

By law, DHS is required to remove or release a detained alien ordered removed within a period of 90 days (“removal period”) after the issuance of a final order of removal.⁵⁹ Furthermore, the law expressly prohibits DHS from releasing an alien during the removal period if the alien was ordered removed based on criminal grounds and/or terrorist activities.⁶⁰

For aliens detained beyond the removal period, DHS must comply with the U.S. Supreme Court’s decision in

*Zadvydas*⁶¹ which held that an alien with a final order of removal cannot be kept in detention (unless special circumstances exist) once it has been determined that there is not a “significant likelihood of removal in the reasonably foreseeable future.”⁶² The Court established 6 months as the “presumptively reasonable period of detention.” After the 6-month period, “once the alien provides good reason to believe there is no significant likelihood of removal in the reasonably foreseeable future, the Government must have sufficient evidence to rebut that showing.”⁶³

Aliens with final orders of removal who are released from ICE custody under INA section 241(a)(3) are subject to supervision.⁶⁴ The supervision is

⁵⁹ 533 U.S. 678 (2001).

⁶² *Id.*

⁶³ *Id.* at 701; see also 8 CFR 241.13(d).

⁶⁴ INA sec. 241(a)(3). When releasing an alien ordered removed on an order of supervision, ICE is not necessarily making a determination that all applicable foreign countries are refusing to accept the alien. ICE’s efforts to repatriate are always ongoing and even after an alien is temporarily released on an order of supervision the foreign government could very well comply with repatriation efforts which would allow ICE to immediately take the alien back into custody and remove the alien from the United States.

⁵⁹ INA sec. 241(a)(1). The 90-day period is extended if the alien fails or refuses to make timely application in good faith for travel or other documents necessary to the alien’s departure or conspires or acts to prevent removal.

⁶⁰ INA sec. 241(a)(2).

effectuated through ICE Form I–220B, Order of Supervision. Conditions for release typically include regular check-ins with ICE, making good faith efforts to obtain travel documents and travel arrangements, not associating with gangs, criminals, or engaging in criminal activity, and participating in requisite rehabilitative treatment programs.

DHS currently extends eligibility for employment authorization to aliens, also known as the (c)(18) category, who have been ordered removed and have been temporarily released from custody under INA section 241(a)(3), 8 U.S.C. 1231(a)(3), on an order of supervision. See 8 CFR 241.5(c), 274a.12(c)(18). In order for such aliens to obtain employment authorization, they must file a Form I–765 accompanied by required documentation and the proper fee. Required documentation for Form I–765 includes a copy of the order of removal and the order of supervision. USCIS would require aliens temporarily released on an order of supervision to submit biometrics and pay the associated \$85 fee as part of their initial or renewal EAD application. If USCIS approves the alien's Form I–765 under the (c)(18) category, it is valid for 1 year,⁶⁵ and USCIS mails an EAD according to the mailing preferences indicated by the applicant. To renew an alien's employment authorization under the (c)(18) category, an alien must file Form I–765, accompanied by required documentation, biometrics and the proper fees, to demonstrate that they remain on an order of supervision and continue to comply with it. USCIS may, at discretion, deny an application regardless of eligibility. If USCIS denies the Form I–765 application, the agency sends a written notice to the applicant explaining the basis for denial.

As explained in detail in the preamble, DHS has determined that employment authorization should be limited to a subset of aliens ordered removed and temporarily released on orders of supervision to better align with the DHS enforcement mission and the Administration's current immigration enforcement priorities, including those outlined in E.O. 13768, and efforts to strengthen protections of U.S. workers. Therefore, DHS proposes to amend 8 CFR 274a.12(c)(18) to eliminate eligibility for employment authorization for aliens temporarily released on orders of supervision unless DHS has determined that the alien's removal is impracticable because all

countries from whom DHS has requested travel documents have affirmatively declined to issue a travel document.

Further, DHS intends to require aliens who qualify under this exception to establish an economic necessity for employment during the period they are on orders of supervision and expand the current lists of factors it considers as a matter of discretion when adjudicating an application for employment authorization from aliens on orders of supervision to include the alien's compliance with the conditions for release, and the alien's criminal history, including but not limited to any criminal arrests, charges, or convictions subsequent to the alien's release on an order of supervision.

Meanwhile, under proposed 8 CFR 274a.12(a)(10), aliens who have received a grant of CAT deferral of removal, as described in 8 CFR 208.17 and 1208.17, would be eligible for an EAD based solely on the grant of deferral, similar to aliens who are granted withholding of removal based on INA 241(b)(3), 8 U.S.C. 1231(b)(3), or the regulations implementing CAT. Aliens who fall under the 8 CFR 274a.12(a)(10) are not subject to requirements to apply to DHS to obtain employment authorization before they can begin work. However, the alien is required to apply (*i.e.*, submit Form I–765) in order to receive a physical EAD if they want a document evidencing their employment authorization pursuant to their grant of withholding or deferral. Currently, aliens granted CAT deferral of removal are required to apply for an EAD under the (c)(18) category. Upon the effective date of the final rule, these aliens would no longer be required to meet the requirements of the (c)(18) category or pay the initial \$410 application fee for employment authorization since they would be able to apply for an EAD under the (a)(10) category, which is fee exempt for initial applicants. However, if these aliens want a physical EAD card as evidence of their employment authorization they would need to submit Form I–765.

Additionally, USCIS proposes to amend regulations at 8 CFR 274a.12(c)(18) and 274a.13(a) to require renewal applicants be employed by an E-Verify employer, to clarify the application and evidentiary requirements for such aliens seeking initial and renewal employment authorization under the (c)(18) category,

and to codify the validity period of a (c)(18) EAD. See proposed 8 CFR 274a.12(c)(18)(iii) and 274a.13(a)(3)(ii). Under the proposed rule, a renewal EAD would only be granted to those applicants eligible for an EAD under the proposed exception and who establish that they are employed by a U.S. employer that is a participant in good standing in DHS's employment eligibility verification system (E-Verify) by providing their U.S. employer's E-Verify Company Identification Number and employer's name as listed in E-Verify. Renewal applications for aliens who cannot establish that they are employed by an E-Verify employer would be denied and fees would not be returned.

DHS proposes to apply changes made by this rule only to initial and renewal applications under 8 CFR 274a.12(c)(18) filed on or after the effective date of the final rule. DHS proposes to allow aliens temporarily released on orders of supervision who are already employment authorized prior to the final rule's effective date to remain employment authorized until the expiration date on their EAD, unless the card is revoked under 8 CFR 274a.14. USCIS would continue processing any pending application for a replacement EAD received before the effective date and receiving new applications for replacement EADs because such adjudications are not considered a new grant of employment authorization but a replacement of an EAD based on a previously authorized period.

3. Population

The populations that could be affected by this proposed rule consist of work-authorized aliens who have final orders of removal but who are temporarily released from custody on an order of supervision and aliens granted CAT deferral of removal. DHS estimates the affected population based on historical data for FY 2010 to FY 2019.

Eligibility for Employment Authorization for Aliens on Orders of Supervision

Table 12 shows the annual receipts and approvals for initial and renewal applications of employment authorization for aliens temporarily released on an order of supervision using Form I–765 for FY 2010 to FY 2019.⁶⁶

filings and pending counts are not presented because they would not be impacted by the proposed rule and are thus immaterial to the analysis.

⁶⁵ All initial and renewal EADs issued under the (c)(18) category are currently valid for one year upon issuance. Replacement EAD cards are issued for the same dates as the previous card which would have had a validity period of one year.

⁶⁶ This data was provided by the USCIS Office of Performance and Quality (OPQ) and can be found online at https://www.uscis.gov/sites/default/files/document/data/I-765_Application_for_Employment_FY03-19.pdf. Note that replacement

TABLE 12—TOTAL ANNUAL FORM I-765 RECEIPTS AND APPROVALS FOR ALIENS TEMPORARILY RELEASED ON ORDERS OF SUPERVISION, FY 2010 TO FY 2019

Fiscal year	Initial		Renewal	
	Receipts	Approvals	Receipts	Approvals
2010	6,420	5,559	9,328	8,297
2011	6,827	5,906	12,361	11,765
2012	8,446	7,719	14,242	13,730
2013	9,163	7,091	17,316	15,119
2014	10,658	8,681	19,427	17,441
2015	9,628	8,748	22,801	21,236
2016	8,665	7,499	26,102	24,464
2017	6,235	5,273	26,332	21,274
2018	4,408	3,433	20,640	20,151
2019	5,697	4,071	19,306	* 21,350

* The number of approved applications for renewal EADs in FY 2019 exceed the number of receipts since some renewal EAD applications were received in a previous fiscal year.

The number of initial approved employment authorizations increased from 5,559 in FY 2010 to 8,748 in FY 2015, then declined to 3,433 in FY 2018 before increasing to 4,071 in FY 2019. The number of renewal approvals increased from 8,297 in FY 2010 to 24,464 in FY 2016 before decreasing to about 21,000 renewal approvals annually from FY 2017 to FY 2019. Although DHS estimates this proposed rule would reduce the number of aliens

eligible for employment authorization and anticipates a decline in (c)(18) receipts and approvals for both initial and renewals, DHS is unable to determine the magnitude of decline for reasons discussed further in this analysis.

In order to project future growth in the number of initial receipts and approvals, this analysis uses the 10-year annual percentage growth rates of -1.2 percent for initial receipts (Table 13).⁶⁷

DHS recognizes that the 5-year annual percentage growth rate also shows a decline (-10.0 percent).⁶⁸ For this analysis, DHS chooses the more conservative projection of initial receipts by using the 10-year annual percentage growth rate (-1.2 percent). By choosing the 10-year annual percentage growth rate, the projection (or baseline) will be higher for initial receipts which will lead to a greater range of potential cost estimates.

TABLE 13—ANNUAL PERCENTAGE GROWTH RATES OF RECEIPTS

Fiscal years	Initial	Renewal
2015–2019	-10.0	-3.3
2010–2019	-1.2	7.5

Source: USCIS analysis.

To project the number of renewal receipts, DHS also considered the 5- and 10-year annual percentage growth rates. Table 13 shows the 5-year annual percentage growth rate in the number of renewal receipts is -3.3 percent and the 10-year annual percentage growth rate is 7.5 percent.⁶⁹ Similar to the growth rates for the initial receipts, renewal receipts have a negative annual percentage growth rates over the 5-year period.

To project renewal receipts going forward, DHS acknowledges that aliens temporarily released on orders of supervision have removal orders and are continually being deported from the United States on an ongoing basis.

Additionally, the declining growth rates for initial receipts would, at some point, result in either a plateau or a decrease for renewal receipts. Therefore, we do not find it reasonable to use the 10-year annual percentage growth rate of 7.5 percent to project renewal receipts. Therefore, this analysis uses the 5-year annual percentage growth rate of -3.3 percent to project a decline in the number of renewal receipts.

In order to estimate initial and renewal approvals, DHS recognizes that approvals have generally moved in line with receipts.⁷⁰ DHS recognizes that the number of approvals could occasionally differ from or lag receipts, but over time we would expect approvals to mostly

move in line with receipts. Over the 10-year period from FY 2010 to FY 2019, the average initial approval rate was approximately 84 percent of initial receipts and the average renewal approval rate was approximately 93 percent of renewal receipts.⁷¹

To project FY 2020 initial receipts, the 10-year annual percentage growth rate of -1.2 percent (Table 13) is multiplied by the number of initial receipts from FY 2019, 5,697 (Table 12), which equals -68 (rounded). Subtracting 68 from 5,697 equals 5,629 (Table 14). The FY 2020 initial approvals are calculated by multiplying the 10-year average initial approval rate of 84 percent by the estimated number

⁶⁷ Calculation: (((FY 2019 Initial Receipts 5,697 / FY 2010 Initial Receipts 6,420) ^ (1/10)) - 1) * 100 = -1.2 percent.

⁶⁸ Calculation: (((FY 2019 Initial Receipts 5,697 / FY 2015 Initial Receipts 9,628) ^ (1/5)) - 1) * 100 = -10.0 percent.

⁶⁹ Calculations:
(((FY 2019 Renewal Receipts 19,306 / FY 2015 Renewal Receipts 22,801) ^ (1/5)) - 1) * 100 = -3.3 percent.

(((FY 2019 Renewal Receipts 19,306 / FY 2010 Renewal Receipts 9,328) ^ (1/10)) - 1) * 100 = 7.5 percent.

⁷⁰ Exceptions for initials include FY 2013 when initial approvals declined while initial receipts increased; exceptions for renewals include FY 2017 when renewal receipts increased slightly while renewal approvals declined and FY 2019 when the number of renewal approvals exceeded the number of renewal receipts received.

⁷¹ Calculations:

(6,398 (initial approvals 10-year average) / 7,615 (initial receipts 10-year average)) * 100 = 84 percent (rounded).

(17,483 (renewal approvals 10-year average) / 18,786 (renewal receipts 10-year average)) * 100 = 93 percent (rounded).

of initial receipts from FY 2020, 5,629, which equals 4,728 (rounded).⁷² The FY 2019 renewal receipts, 19,306, is multiplied by the 5-year annual percentage growth rate of – 3.3 to get – 637 (rounded).⁷³ Subtracting 637 from the FY 2019 renewal receipts equals

18,669. The 18,669 is then multiplied by the 10-year average renewal approval rate of 93 percent, which equals 17,362 (rounded) to get the FY 2020 renewal approvals.⁷⁴ To project receipts for FY 2021, the same process was repeated using the calculated FY 2020 numbers

in place of those from FY 2019. Approvals were then calculated based on the projected receipts for FY 2021. The process was then repeated for subsequent years. These projections are shown in Table 14 and are used as the baseline for this rule.

TABLE 14—PROJECTED TOTAL ANNUAL FORM I–765 RECEIPTS AND APPROVALS FOR ALIENS TEMPORARILY RELEASED ON ORDERS OF SUPERVISION, FYS 2020 TO 2029

Fiscal year	Initial		Renewal	
	Receipts	Approvals	Receipts	Approvals
2020	5,629	4,728	18,669	17,362
2021	5,561	4,671	18,053	16,789
2022	5,494	4,615	17,457	16,235
2023	5,428	4,560	16,881	15,699

2029	5,049	4,241	13,802	12,836

Source: USCIS analysis.

This proposed rule would eliminate the eligibility for employment authorization for aliens temporarily released on orders of supervision with one exception. The exception is for aliens for whom DHS has determined removal is impracticable because all countries from which DHS has requested travel documents have affirmatively declined to issue such documents. In order to estimate the number of aliens whose removal is impracticable for the reason stated, USCIS obtained data from ICE on the number of aliens released from custody who have been unable to obtain travel documents over the last 5 fiscal years. Table 15 shows the number of aliens temporarily released on orders of supervision denied a travel document in the corresponding fiscal year. DHS estimates this proposed rule would result in fewer aliens temporarily released on orders of supervision who are eligible for employment authorization and would result in a maximum of 459 aliens remaining eligible for an employment authorization under the exception.

TABLE 15—ALIENS RELEASED FROM ICE CUSTODY, UNABLE TO OBTAIN TRAVEL DOCUMENTS, FY 2015 TO FY 2019

Fiscal year	Total
2015	369

2019	659
5-year Average	459

Source: DHS–ICE ERO, LESA Statistical Tracking Unit.

As noted in the preamble, DHS is proposing to consider the alien's criminal history, including but not limited to criminal activities subsequent to his or her release on an order of supervision in determining whether the alien warrants DHS's favorable exercise of discretion to obtain an EAD. While there are aliens with an order of supervision who are known convicted criminals, DHS is unable to precisely estimate the number of aliens that could potentially be denied an EAD as a matter of discretion should this proposed rule be promulgated as a final rule. DHS is proposing to expressly consider the alien's criminal history as a factor in determining whether the alien warrants a favorable exercise of discretion in granting an EAD. The

discretionary analysis is case specific and typically assessed after an officer has determined that the alien meets all applicable threshold eligibility requirements. It involves the review of all relevant, specific facts and circumstances in an individual case and weighing all the positive factors present in a particular case against any negative factors in the totality of the record. Further, DHS does not know the number of excepted aliens that would be denied as a matter of discretion because of subsequent criminal convictions. For these reasons, we cannot estimate how many aliens would be denied as a matter of discretion based on criminal history.

Aliens Granted CAT Deferral of Removal

DHS also proposes to revise the (a)(10) employment authorization category to include aliens who are granted CAT deferral of removal as employment authorized based solely on the grant of deferral. Table 16 shows the number of CAT cases granted deferral of removal for FY 2014 to FY 2018.⁷⁵ Since FY 2015, the number of CAT cases granted deferral of removal has trended upward reaching a high of 177 cases in FY 2018. The 5-year average number of cases is approximately 147.

⁷² Calculation: 5,629 (FY 2020 estimated initial receipts) × 84 percent = 4,728 estimated FY 2020 initial approvals.

⁷³ Calculation: FY 2019 renewal receipts 19,306 × 5-year annual percentage growth rate – 0.033 = – 637.

⁷⁴ Calculation: 18,669 (FY 2020 estimated renewal receipts) × 93 percent = 17,362 estimated FY 2020 renewal approvals.

⁷⁵ The Department of Justice Statistics Yearbook website was last updated on August 30, 2019 with

FY 2018 data. The analysis will be updated with FY 2019 when it becomes available.

TABLE 16—CASES GRANTED CAT DEFERRAL OF REMOVAL, FY 2014–FY 2018

2018	177
5-year average	147

Source: Department of Justice Statistics Yearbook, <https://www.justice.gov/eoir/statistical-year-book>.

The population of aliens who have been granted deferral of removal based on the regulations implementing CAT are currently regulated to apply for employment authorization under the (c)(18) category. Currently, USCIS does not have a breakout for the number of aliens who have been granted CAT deferral of removal who have applied or been approved for an initial or renewal EAD. Under the proposed rule, this population would be employment authorized based solely on such a grant and would only need to apply for the physical EAD card under the (a)(10) category if they want a document evidencing their employment authorization pursuant to the grant of deferral of removal.

Estimated Eligible Employment Authorizations

Based on the exception (459) and the grant of CAT deferral of removal exception (147), DHS estimates an upper bound estimate for initial (c)(18) EAD approvals that would remain eligible for employment authorization under this rule in the future is 606

annually. DHS recognizes this upper bound estimate does not take into account the number of aliens who would no longer be eligible due to subsequent convictions. DHS also does not know how many of these aliens would be eligible or ineligible under the economic necessity requirement or the number that would apply for or be denied for other considerations, such as the alien's compliance with their order of supervision conditions, and the alien's criminal history, including but not limited to any criminal arrests, charges, or convictions subsequent to the alien's release from custody on an order of supervision. DHS recognizes that if any of the 459 potential approvals who may fall under the exception do not apply for work authorization or are denied employment authorization that the upper bound of 606 would be an overestimate. Thus, we use an upper bound estimate of 606 assuming 100 percent of aliens temporarily released on orders of supervision who have been unable to obtain travel documents would remain employment eligible under this rule, because choosing any other upper bound would be speculative (Table 17(B) column A). We use a lower bound estimate of 147 (Table 17(A) column A) since all aliens who are granted CAT deferral of removal would continue to be employment authorized. These upper and lower bound initial receipts estimates are applied, unchanged, into the future. Although initial receipts overall have been declining (Table 12), the upper and lower bounds depend on the average number of aliens released from ICE custody who are unable to obtain travel documents and aliens granted CAT

deferral of removal, both of which have experienced periods of stability and growth over their respective five-year periods of analysis (Tables 15 and 16). For this analysis, DHS relies on the five-year averages for these populations as there are various factors outside of this rulemaking may result in a decline or rise of in the number of aliens identified as unable to obtain travel documents or granted CAT deferral of removal. However, DHS cannot predict with certainty at this time if the trend in the size of these populations would increase, decrease, or remain stable. Therefore, DHS uses the respective 5-year averages for this analysis.

DHS estimates that the lower bound share of initial EADs under the baseline that would continue to be eligible for renewal under this proposed rule ranges from 3.1 percent in FY 2020 to 3.5 percent in FY 2029 (Table 17(A) column C).⁷⁶ Under the assumption that the same share of initial approvals would be eligible as renewals, we multiply the renewal receipt and approval populations by these percentages to obtain the corresponding lower bound renewal EAD estimates for each fiscal year (Table 17(A) columns E and G). Further, the upper bound is also estimated assuming that the same share of initial approvals would be eligible as renewals. Table 17(B) repeats the estimates for the upper bound populations for initials and renewals.

BILLING CODE 9111–97–P

⁷⁶ Calculations: For example, for FY2020—(147 estimated lower bound/4,728 projected number of initial approvals) × 100 = 3.1 percent (rounded). 147 estimated upper bound/4,241 projected number of initial approvals) × 100 = 3.5 percent (rounded).

Source: USCIS Analysis

BILLING CODE 9111-97-C

DHS recognizes that the projected lower bound range of 449 to 538 for renewal approvals may not fully account for the number of aliens who would no longer be eligible for employment authorization due to the proposed E-Verify requirement if their employers are not enrolled and opt not to enroll in E-Verify, and if they are

unable to find alternative employment with an E-Verify employer. Some renewal applicants may also not be currently employed and therefore would not meet the new requirements for renewal. Additionally, DHS does not know how many of these aliens would be eligible under the economic necessity requirement or determined not to

warrant employment authorization as a matter of discretion due to subsequent convictions. DHS recognizes that if any of the estimated range of 449 to 538 renewal receipts do not apply for employment authorization or are denied employment authorization that this lower bound could be even lower.

Renewal Applicants for Employment Authorization—E-Verify

DHS proposes to allow aliens on orders of supervision who are granted employment authorization after the effective date of the final rule to have their employment authorization renewed only if they meet the exception and they establish that they are employed by a U.S. employer who is a participant in good standing in DHS's employment eligibility verification system (E-Verify) by providing their U.S. employer's E-Verify Company Identification Number and the employer's name as listed in E-Verify.

Since this rule proposes to eliminate eligibility for employment authorization for aliens temporarily released on orders of supervision, the impact on the renewal population would depend on which aliens remain eligible and if the alien's employer already participates in E-Verify or would be willing to enroll and participate in E-Verify if the employer is not enrolled. Because of the uncertainty regarding eligibility, DHS is unable to estimate a range for the renewal population that would be impacted by this provision and attempting to do so would be speculative. However, DHS acknowledges there would be renewal applicants who would be impacted by this provision.

Employer Population

DHS recognizes that this proposed rule would impact employers who currently, or will in the future, employ (c)(18) alien workers. However, DHS cannot precisely estimate the number of employers that could incur costs because (c)(18) employment authorization is considered to be "open market," where alien workers are not tied to a specific employer. Such employment also does not require a Labor Condition Application (LCA) or a Temporary Labor Certification (TLC) from the U.S. Department of Labor (DOL), or other employer data at any point in the EAD process (initial, renewal, or replacement stage). DHS recognizes that many factors influence whether an employer participates in the E-Verify program. While E-Verify is a free, voluntary program, some employers are required to enroll in the program as a condition of federal contracting, or as a requirement of state legislation or other applicable laws. However, DHS cannot predict the number of employers who would use E-Verify or how many would experience labor turnover due to this proposed rule. Further, DHS does not know the number of employers that would choose to

enroll in E-Verify to retain their (c)(18) renewal alien employees or the overall number of employees for whom these entities would create an E-Verify case, should they enroll. DHS is also unable to determine the number of employers whose (c)(18) alien employees would remain employment eligible as a result of this proposed rule. DHS welcomes public comment or data on employers who enroll in the E-Verify program to retain (c)(18) alien renewal employees as well as the overall number of employees for whom employers would create E-Verify cases, should they enroll employees. DHS notes that this provision may act as a barrier to a company hiring or continuing to employ a (c)(18) employment authorized alien should the company make the choice to not enroll in E-Verify. Such barriers contribute to the cost calculation of this rule by increasing the potential for turnover costs incurred by U.S. businesses—even in situations where a (c)(18) employee remains employment authorized.

4. Transfers, Costs and Benefits of the Proposed Rule

Transfers and Costs

This section presents the costs and benefits associated with the proposed rule. The impacts of the proposed provisions are estimated in comparison with a baseline that assumes no proposed action will be implemented.

Proposal Regarding EAD Eligibility

DHS anticipates that revising eligibility and introducing new evidentiary requirements for (c)(18) EADs could have several impacts, including potential lost earnings to alien workers temporarily released on an order of supervision after receiving a final order of removal, the cost associated with an increase of a 30 minute time burden to complete Form I-765, as well as the costs of filing an additional form (Form I-765WS) and submitting biometrics.

The proposed rule is estimated to result in a reduction in the number of aliens temporarily released from custody on an order of supervision that are eligible for EADs. The impacts of reducing the number of aliens temporarily released on orders of supervision that are eligible for EADs include both potential distributional impacts (transfers) and costs. USCIS uses lost compensation to aliens temporarily released on an order of supervision that are no longer eligible for EADs as a measure of the impact of this change—either as distributional impacts (transfers) from these aliens to

others or as a proxy for businesses' cost for lost productivity.

Companies may incur opportunity costs by having to choose the next best alternative to filling a job an alien temporarily released on orders of supervision would have filled. DHS is unable to determine what an employer's next best alternative may be for those companies. As a result, DHS does not know the portion of overall impacts of this rule that are transfers or costs. If companies can find replacement labor for the positions the aliens temporarily released on orders of supervision would have filled, removing EAD eligibility for these aliens would result in primarily distributional effects in the form of transfers from aliens temporarily released on orders of supervision to others that are currently in the U.S. labor force (or workers induced to return to the labor market), possibly in the form of additional work hours or overtime pay. DHS acknowledges that there may be additional opportunity costs to employers such as additional costs associated with searching for new employees. If companies cannot find reasonable substitutes for the labor the aliens temporarily released on orders of supervision would have provided, removing EAD eligibility for these aliens would primarily result in costs to those companies through lost productivity and profits.

DHS has no information on wages or occupations of alien workers temporarily released on orders of supervision, at the initial or renewal stage, since these alien workers obtain an open-market EAD that does not include or require any data on their employment.

The federal minimum wage is currently \$7.25.⁷⁷ The use of the federal minimum wage is grounded in the notion that most of the relevant EAD holders would not have been in the labor force long and would thus not be expected to earn relatively high wages. However, in this proposed rulemaking, we rely on the "effective" minimum wage of \$11.80. As is reported by The New York Times "[t]wenty-nine states and the District of Columbia have state-level minimum hourly wages higher than the federal [minimum wage]," as do many city and county governments. This analysis in The New York Times estimates that "the effective minimum

⁷⁷ See 29 U.S.C. 206—Minimum wage, available at <https://www.gpo.gov/fdsys/pkg/USCODE-2011-title29/html/USCODE-2011-title29-chap8-sec206.htm> (accessed May 19, 2020). See also U.S. Department of Labor, Wage and Hour Division. The minimum wage in effect as of May 19, 2020. Available at <https://www.dol.gov/general/topic/wages/minimumwage>.

wage in the United States . . . [was] \$11.80 an hour in 2019.”⁷⁸ DHS accounts for worker benefits by calculating a benefits-to-wage multiplier using the most recent DOL, Bureau of Labor Statistics (BLS) report detailing the average employer costs for employee compensation for all civilian workers in major occupational groups and industries. DHS estimates the benefits-to-wage multiplier is 1.46 and, therefore, is able to estimate the full opportunity cost per applicant, including employee wages and salaries and the full cost of benefits such as paid leave, insurance, and retirement, etc.⁷⁹ Although the federal minimum wage could be considered a lower bound income for the population of interest, DHS calculates the total rate of compensation for the effective minimum hourly wage is \$17.23, which is 62.7 percent higher than the federal minimum wage.⁸⁰

⁷⁸ “Americans Are Seeing Highest Minimum Wage in History (Without Federal Help)” Ernie Tedeschi, The New York Times, April 24, 2019. Accessed at <https://www.nytimes.com/2019/04/24/upshot/why-america-may-already-have-its-highest-minimum-wage.html> (last visited August 21, 2020).

⁷⁹ The benefits-to-wage multiplier is calculated as follows: (Total Employee Compensation per hour) / (Wages and Salaries per hour) = \$37.10/\$25.47 = 1.458 = 1.46 (rounded). See Economic News Release, *Employer Cost for Employee Compensation (March 2020)*, U.S. Dept. of Labor, BLS, Table 1. Employer costs per hour worked for employee compensation and costs as a percent of total compensation: Civilian workers, by major occupational and industry group. March 19, 2020, available at https://www.bls.gov/news.release/archives/ecec_03192020.pdf (last visited March 24, 2020).

⁸⁰ Calculations (1) for effective minimum wage: \$11.80 hourly wage × benefits burden of 1.46 = \$17.23; (2) (((\$17.23 wage – \$10.59 wage)/\$10.59))

DHS does not rule out the possibility that some portion of the population might earn the average wage for all occupations, but without empirical information, DHS believes that including a range with the lower bound relying on the effective minimum wage is justifiable. Therefore, this analysis uses both the effective minimum hourly wage rate of \$11.80 to estimate a lower bound and an average wage rate for all occupations of \$25.72 as an upper bound in consideration of the variance in average wages across states.⁸¹ Therefore, DHS calculates the average total rate of compensation for all occupations as \$37.55 per hour, where the mean hourly wage is \$25.72 per hour worked and average benefits are \$11.83 per hour.⁸² All of the quantified estimates of costs and transfer payments in this analysis incorporate lower and upper bound ranges based on the effective minimum hourly wage and the average hourly wage across all occupations.

Estimated impacts in this analysis include lost potential earnings to applicants. Since the current validity period of a (c)(18) EAD is up to one year, DHS multiplied the total rate of compensation using the average

wage = 0.627, which rounded and multiplied by 100 = 62.7 percent.

⁸¹ The average wage for all occupations is found Department of Labor, Bureau of Labor Statistics, May 2019 National Occupational Employment and Wage Estimates. The data is found at: https://www.bls.gov/oes/2019/may/oes_nat.htm#00-0000 (last visited March 19, 2020).

⁸² The calculation of the weighted mean hourly wage for applicants: \$25.72 per hour × 1.46 = \$37.5512 = \$37.55 (rounded) per hour.

effective minimum hourly wage rate of \$17.23 and the average hourly wage rate across all occupations of \$37.55 by 2,080 hours, the typical annual number of work hours, to estimate the annual earnings of \$35,838 and \$78,106, respectively, for each applicant.⁸³ Table 18 shows the two population ranges for initial and renewal approvals for the two ranges of wage estimates for aliens temporarily released on orders of supervision and the corresponding potential lost earnings. Table 18(A) shows cost estimates for the lower and upper bound range of initial EAD approvals based on the lower bound wage annual earnings of \$35,838. The total earnings for each population under the rule based on the projections developed in the “Population” section are reported in Columns B, D and F. Columns G and H present the potential lost earnings, by subtracting, from the current baseline (column F), the potential earnings from rule populations (columns B and D). Similarly, Table 18(B) repeats the estimates for the lower and upper bound range of initial EAD approvals based on the upper bound (average) wage annual earnings of \$78,106. Tables 18(C) and 18(D) repeat the estimates from Table 18(A) and 18(B) for the lower and upper bound ranges of renewal EAD approvals based on the lower and upper bound wage annual earnings, respectively.

⁸³ Calculations: 2,080 typical annual work hours × \$17.23 the total rate of compensation using the average state minimum wage = \$35,838 (rounded). 2,080 typical annual work hours × \$37.55 the total rate of compensation using the average wage = \$78,106 (rounded).

*As discussed in the analysis, since the number of eligible filers under this proposed rule is unknown, USCIS provides ranges of potentially eligible filers for both the initial and renewal populations.

Source: USCIS Analysis

BILLING CODE 9111-97-C

DHS uses the lost compensation to aliens temporarily released on orders of supervision as a measure of the overall impact of removing eligibility for a (c)(18) EAD—either as distributional impacts (transfers) or as a proxy for businesses' cost for lost productivity. It does not include additional costs to businesses for lost profits and opportunity costs or the distributional impacts for those in an applicant's support network. As shown in Table 18, the potential lost earnings depend on the number of aliens released temporarily on orders of supervision

who remain eligible for an EAD and continue to work, as well as their wage rate. Over the 10-year period from FY 2020 to FY 2029, the total lost earnings would range from \$6,038,201,268 to \$14,716,520,096.⁸⁴ Annualized at 7 percent, lost earnings for initial and renewal EAD holders would range from

⁸⁴ Calculations: \$1,388,614,986 (10-year total initial upper bound costs) + \$4,649,586,282 (10-year total renewal upper bound costs) = \$6,038,201,268 (minimum 10-year total lower bound costs); \$3,384,879,722 (10-year total initial upper bound costs) + \$11,331,540,374 (10-year total renewal upper bound costs) = \$14,716,420,096 (maximum 10-year total upper bound costs).

\$614,037,170 to \$ 1,495,358,741 (Table 22).⁸⁵

⁸⁵ An important assumption relied upon in this analysis is that each holder of an approved EAD has entered the labor force and is working (when the rule becomes effective). DHS relies on this assumption on the grounds that individuals would not have expended the direct filing and time-related opportunity costs of applying for an EAD if they did not intend to recoup an economic benefit from doing so. In reality, some EAD holders may not be employed for any number of reasons—including normal labor market frictions—that have nothing to do with this rule. In addition, DHS has received information that some individuals seek an EAD for purposes of paper documentation and may not intend to work.

EAD holders who would no longer be eligible to renew their employment authorization under the proposed eligibility criteria in this rule would incur lost earnings. Additionally, DHS acknowledges the potential for additional lost compensation to renewal applicants if their employers are not currently enrolled in E-Verify and opt not to enroll in the E-Verify program. In such cases, renewal applicants could lose earnings if they are unable to find employment with an employer who participates in E-Verify.

DHS recognizes that, excluding the effects of inflation, earnings generally rise over time and the earnings of EAD holders could be larger in the future than estimated in this analysis. Moreover, since EAD renewals, by necessity of order, follow in time after an initial EAD approval, wages and, hence, total compensation, earned could be higher for renewals. Accordingly, this effect could bias the estimate of earnings losses downward. However, we see no tractable way at present to incorporate this possibility into the quantified estimates.

DHS welcomes public comments and data concerning the appropriateness of using the effective minimum wage rate as a lower bound and the average wage rate as an upper bound for (c)(18) workers and the resulting impacts presented.

In addition to the above quantified impacts, there could be qualitative impacts for aliens on orders of supervision who would no longer be eligible for employment authorization. For the (c)(18) population that will not be able to renew their EAD or obtain an initial EAD, there would likely be an impact in terms of lost income which could pose economic hardships. Members of this population may need to rely on their support networks for financial and social assistance, which could involve, but may not be limited to, family members and friends, religious and charitable organizations, private non-profit providers, state and local governments, and NGOs. DHS believes that the immediate indirect impact of this rule to an applicant's support network is likely not significantly more than the wages and benefits the applicant would have earned without this rule.

Costs to Applicants To Submit Biometrics

This rule proposes to codify a biometrics requirement for aliens who file for an EAD under the (c)(18) category. Currently, all (c)(18) applicants receive an appointment notice from USCIS to submit their biometrics⁸⁶ at an Application Support Center (ASC) to, among other things, assist in identity verification and facilitate (c)(18) EAD card production. They are also required to pay the \$85 biometric services fee.⁸⁷ This rule would codify the requirement for aliens to submit biometrics and pay the proposed \$30 biometric services fee. The biometrics requirement would apply to (c)(18) Form I-765 filers, for both initial and renewal EAD applications. In addition, DHS proposes to use the biometrics submitted by (c)(18) EAD applicants to screen for criminal history.

The submission of biometrics requires that aliens travel to an ASC for the biometric services appointment. In past rulemakings, DHS estimated that the average round-trip distance to an ASC is 50 miles, and that the average travel time for the trip is 2.5 hours.⁸⁸ The cost of travel also includes a mileage charge based on the estimated 50 mile round trip at the 2020 General Services Administration (GSA) rate of \$0.58 per mile.⁸⁹ Because an individual alien

would spend 1 hour and 10 minutes (1.17 hours) at an ASC to submit biometrics, summing the ASC time and travel time yields 3.67 hours.⁹⁰ At the lower and upper wage bounds, the opportunity costs of time to submit biometrics services are \$63.23 and \$137.81.⁹¹ The travel cost is \$29, which is the per mileage reimbursement rate of \$0.58 multiplied by 50-mile travel distance. Summing the time-related and travel costs generates a per person biometrics submission cost of \$92.23 at the lower bound wage and \$166.81 at the upper bound wage.⁹² Combining these costs with the biometric services fee totals a per person biometrics submission cost of \$122.23 and \$196.81 at the respective lower and upper wage rates.⁹³

Table 19 shows the two population ranges for initial and renewal receipts for the two ranges of wage estimates for aliens on orders of supervision and the corresponding total cost to submit biometrics. Table 19(A) shows cost estimates for the lower and upper bound range of initial EAD receipts at the lower bound submission cost of \$122.23. The total costs for Columns C and E provide the range of undiscounted costs for the lower bound. Similarly, Table 19(B) repeats the estimates for the lower and upper bound range of initial EAD receipts based on the upper bound submission cost of \$196.81. Tables 19(C) and 19(D) repeat these estimates for the lower and upper bound ranges of renewal EAD receipts based on the lower and upper bound submission costs, respectively.

BILLING CODE 9111-97-P

owned-vehicle-pov-mileage-reimbursement-rates (last visited May 7, 2020).

⁹⁰ Source for biometric time burden estimate: Paperwork Reduction Act (PRA) Supporting Statement for Form I-485 (OMB control number 1615-0023). The PRA Supporting Statement can be found at Question 12 on *Reginfo.gov* at https://www.reginfo.gov/public/do/PRAViewDocument?ref_nbr=201706-1615-001.

⁹¹ Calculations: 3.67 (total time in hours to submit biometrics) × \$12.05 (prevailing wage for 1 hour of work) = \$44.22; 3.67 (total time in hours to submit biometrics) × \$37.55 (average wage for 1 hour of work) = \$137.81.

⁹² Calculations: \$29 (cost of travel) + \$63.23 (time-related costs at lower bound wage) = \$92.23; \$29 (cost of travel) + \$137.81 (time-related costs at upper bound wage) = \$166.81.

⁹³ Calculations: \$92.23 (total time-related cost at lower bound wage) + \$30 (biometrics fee) = \$122.23; \$166.81 total (time-related costs at upper bound wage) + \$30 (biometrics fee) = \$196.81.

⁸⁶ At present, biometrics collection generally refers to the collection of fingerprints, photographs, and signatures. See <https://www.uscis.gov/forms/forms-information/preparing-your-biometric-services-appointment> (describing biometrics as including fingerprints, photographs, and digital signature) (last visited May 15, 2020).

⁸⁷ USCIS was previously authorized to collect an \$85 biometric services fee. However, the recently promulgated fee rule incorporated the biometric services costs into the underlying immigration benefit request fees for which biometric services are applicable in the recent fee rule and maintained a separate \$30 biometric services fees for certain benefit requests. See DHS, *U.S. Citizenship and Immigration Services Fee Schedule and Changes to Certain Other Immigration Benefit Request Requirements*, 85 FR 46788 (Aug. 3, 2020) (Fee Rule).

⁸⁸ See “Employment Authorization for Certain H-4 Dependent Spouses; Final rule,” 80 FR 10284 (25 Feb. 2015); and “Provisional and Unlawful Presence Waivers of Inadmissibility for Certain Immediate Relatives; Final Rule,” 78 FR 536, 572 (3 Jan. 2013).

BILLING CODE 9111-97-C

As shown in Table 19, the cost to submit biometrics depends on the number of aliens temporarily released on orders of supervision who apply for an EAD and their wage rate. Over the 10-year period from FY 2020 to FY 2029, the total cost to submit biometrics would range from \$824,075 to

\$5,476,238.⁹⁴ Annualized at 7 percent, the estimated costs to submit biometrics

⁹⁴ Calculations: \$179,678 (10-year total initial lower bound costs) + \$644,397 (10-year total renewal lower bound costs) = \$824,075 (minimum 10-year total lower bound costs); \$1,192,669 (10-year total initial upper bound costs) + \$4,283,570 (10-year total renewal upper bound costs) = \$5,476,238 (maximum 10-year total upper bound costs).

would range from \$83,148 to \$552,741 (Table 22).

Cost of Forms

For those aliens who remain eligible to be employment authorized, the proposed rule would increase the time burden on the population of applicants applying for employment authorization. This rule also proposes to add filing

procedures and evidentiary requirements for aliens on orders of supervision who are seeking an initial EAD or renewing an EAD. The proposed new requirements include submitting a Form I-765WS, to establish the alien's economic necessity for employment and, for renewal applicants only, the name of the alien's U.S. employer as listed in E-Verify and that employer's E-Verify Company Identification Number.

Currently, DHS estimates the time burden for completing Form I-765 is 4 hours and 30 minutes (4.5 hours).⁹⁵ For aliens on orders of supervision who continue to be eligible and apply for employment authorization after this rule is final, this proposed rule would increase the time burden of Form I-765 by 30 minutes (0.5 hours) for a total of 5 hours.⁹⁶ This change would increase the opportunity cost of time for each application by approximately \$8.62 based on the effective minimum hourly

wage and by about \$18.78 based on the average wage for all occupations.⁹⁷

This proposed rule would also make it a requirement to submit Form I-765WS for aliens applying for employment authorization under the (c)(18) category. Currently, proving the existence of economic necessity to be employed is listed as a discretionary factor for consideration, but it is not a requirement. In this proposed rule, DHS now makes this a mandatory requirement. DHS estimates the current time burden for completing Form I-765WS is 30 minutes (0.5 hours).⁹⁸ For aliens temporarily released on orders of supervision who continue to be eligible and apply for employment authorization after the rule is final, the proposed rule would increase the opportunity cost of time for each applicant by \$8.62 based on the effective minimum hourly wage and \$18.78 based on the average wage

for all occupations.⁹⁹ Combining the new costs of the I-765 and I-765WS, the total per person increased time burden would add costs of \$17.23 and \$37.55 at the respective lower and upper bound wage rates.

Table 20 shows the additional filing time burden-costs for Forms I-765 and I-765WS for the two population ranges for initial and renewal receipts. Table 20(A) shows cost estimates for the lower and upper bound range of initial EAD receipts based on the lower bound additional time burden cost of \$12.05. The total costs for Columns C and E provide the range of undiscounted costs for the lower bound wage. Similarly, Table 20(B) repeats the estimates for the lower and upper bound range of initial EAD receipts based on the upper bound additional time burden cost of \$37.55. Tables 20(C) and 20(D) repeat these estimates for the lower and upper bound ranges of renewal EAD receipts based on the lower and upper bound wage time burden costs, respectively.

BILLING CODE 9111-97-C

As indicated in the table, the estimated total opportunity costs of time incurred as a result of increased time burden for completing the forms over the 10-year period from FY 2020 to FY 2029 would range from about \$116,165 to \$1,044,829.¹⁰⁰ There would be no change in the estimated time burden for aliens temporarily released on orders of supervision for ICE Form I-220B. ICE completes Form I-220B and it is currently already submitted during the employment authorization application process.

Costs to Employers

DHS anticipates that revising eligibility for aliens temporarily released on orders of supervision could lead to a loss of employment resulting

in turnover costs for employers. Additionally, the proposed E-Verify requirement for renewal applicants would also result in costs to employers who are not currently enrolled in the E-Verify program and would seek to retain their (c)(18) worker(s). The population that could involve costs to employers involves specifically the renewal population, and the development of such impacts embodies two different provisions: (i) The provisions regarding eligibility in general, and (ii) the E-Verify requirement for aliens seeking to renew an EAD.

I. Unquantified Turnover Costs

Some aliens who have final orders of removal but are temporarily released from custody on orders of supervision would eventually be out of the labor force even in the absence of this proposed rule. Since these aliens have been ordered removed, the federal government makes efforts to remove them from the United States on an ongoing basis regardless of employment

authorization. For aliens who would no longer be eligible for employment authorization under this rule because they do not meet the proposed exception—DHS has not determined that the removal of such aliens is impracticable because ICE has not identified them as unable to obtain travel documents—this rule would affect the timing of when such alien workers would be removed from the labor force, which could vary. This proposed rule would result in employers incurring labor turnover costs earlier in comparison to the state of affairs in the absence of the proposed rule. Since the timing of when alien workers would be removed from the labor force is variable regardless of whether this proposed rule becomes final or not, DHS is unable to establish a baseline estimate of the labor turnover costs employers currently incur. In addition, DHS cannot quantify the labor turnover costs that employers would incur earlier than they would otherwise due to the proposed rule because there

¹⁰⁰ Calculations: \$25,328 (10-year total initial lower bound costs) + \$90,837 (10-year total renewal lower bound costs) = \$116,165 (minimum 10-year total lower bound costs); \$227,553 (10-year total initial upper bound costs) + \$817,276 (10-year total renewal upper bound costs) = \$1,044,829 (maximum 10-year total upper bound costs).

is no way to know the timing for when aliens would be removed.

II. Employer Costs of E-Verify Requirement for Renewal Applicants

For renewal applicants, employment authorization would only be granted to applicants who continue to meet the exception, demonstrate economic necessity, do not have subsequent criminal convictions, are employed by a U.S. employer who is a participant in good standing in the E-Verify program, and establish that they warrant a favorable exercise of discretion. The E-Verify program is a DHS web-based system that allows enrolled employers to confirm the identity and eligibility of their employees to work in the United States by electronically matching information provided by employees on the Employment Eligibility Verification (Form I-9) against records available to DHS and the Social Security Administration (SSA).¹⁰¹ DHS does not charge a fee for employers to participate in the E-Verify Program and create cases to confirm the identity and employment eligibility of newly hired employees. EAD renewal applications would be denied for those aliens who cannot establish that they are employed by an E-Verify employer and their \$410 filing fee would not be refunded. DHS does not know the number of renewal applicants who would incur this cost once the rule is final.

Although there is no fee to use E-Verify, this proposed requirement would result in costs to newly enrolling employers. Employers who would newly enroll in the E-Verify program would incur startup enrollment or program initiation costs as well as additional opportunity costs of time for ongoing annual training for the E-Verify program. DHS assumes that employers who are currently participating in the E-Verify program would not incur these costs since they previously incurred enrollment costs and would continue to participate in ongoing annual training regardless of this proposed rule.¹⁰² Additionally, DHS expects that only newly enrolled employers would incur new costs for verifying the identity and work authorization of all of their newly hired employees, including any new (c)(18) workers as a result of this proposed rule. For employers currently

enrolled in E-Verify who choose to hire a (c)(18) alien worker, the proposed rule would not cause such employers to incur new costs since they already must use E-Verify for all newly hired employees as of the date they signed the E-Verify Memorandum of Understanding (MOU).¹⁰³ Therefore, with or without the proposed rule, an employer already enrolled in the E-Verify program that chooses to hire a (c)(18) alien worker would incur the opportunity cost of time to verify any newly hired employees.

Data show that some employers currently use E-Verify to confirm the identity and employment eligibility of (c)(18) alien workers. Further, the requirement to participate in the E-Verify program is not new as certain employers are required to enroll in the program as a condition of Federal contracting, or as a condition of business licensing under state legislation or other applicable law or regulation.¹⁰⁴

To renew an EAD, the proposed rule would require that (c)(18) alien workers be employed by employers enrolled in E-Verify and in good standing. Therefore, the proposed rule would result in additional costs for employers that hire (c)(18) alien workers only if such employers are not currently enrolled in the E-Verify program and who choose to retain their (c)(18) workers.

For employers that have hired or intend to hire (c)(18) alien workers but are not enrolled in the E-Verify program, such employers would incur opportunity costs of time to enroll. Participating in the E-Verify program and remaining in good standing requires employers to enroll in the program online,¹⁰⁵ electronically sign the associated MOU with DHS that sets the terms and conditions of participation in the program, and create E-Verify cases for all newly hired employees. The MOU requires employers to abide by lawful hiring procedures and to ensure that no employee will be unfairly discriminated against as a result of E-Verify.¹⁰⁶ If an employer violates the

terms of this agreement, it is grounds for immediate termination from the program.¹⁰⁷ Additionally, employers are required to designate and register at least one person that serves as an E-Verify administrator on their behalf.

For this analysis, DHS assumes that each employer participating in the E-Verify program designates one HR specialist to manage the program on its behalf. Based on the most recent Paperwork Reduction Act (PRA) Information Collection Package for E-Verify, DHS estimates the time burden for an HR specialist to undertake the tasks associated with the E-Verify program. DHS estimates the time burden for an HR specialist to complete the enrollment process is 2 hours 16 minutes (2.26 hours), on average, to provide basic company information, review and sign the MOU, take a new user training, and review the user guides.¹⁰⁸ Once enrolled in the E-Verify program, DHS estimates the time burden is 1 hour to complete ongoing annual training on new features and system updates.¹⁰⁹

Once enrolled in the E-Verify program, the employer is responsible for ensuring that the employment verification process adheres to the requirements of the MOU and the employer verifies that all newly hired employees are employment authorized. After completing the Form I-9, the employer must enter the newly hired employee's information in E-Verify where it is checked against records available to SSA and DHS. After checking an employee's information against these records, E-Verify returns the case processing results, which could either automatically confirm the employee as employment authorized or return a tentative non-confirmation (TNC). Receiving a TNC does not mean an employee is not authorized to work in the United States; rather, it indicates there is an initial system mismatch between the information the employer entered in E-Verify from the employee's Form I-9 and the records available to DHS or SSA. Employees receiving a TNC have the option to contest (take action) or not contest (not take action)

¹⁰³ See About E-Verify, Questions and Answers, April 9, 2014 <https://www.e-verify.gov/about-e-verify/questions-and-answers?tid=All&page=0> (last visited April 16, 2020).

¹⁰⁴ Certain states (for example Alabama, Arizona, Mississippi, and South Carolina) and certain Federal contracts subject to the Federal Acquisition Regulation found at 48 CFR, Subpart 22.18 require the use of E-Verify.

¹⁰⁵ See The Enrollment Process at <https://www.e-verify.gov/employers/enrolling-in-e-verify/the-enrollment-process> (last visited February 12, 2019).

¹⁰⁶ An employer that discriminates in its use of E-Verify based on an individual's citizenship status or national origin may also violate the INA's anti-discrimination provision, at 8 U.S.C. 1324b.

¹⁰¹ See E-Verify, available at <https://www.e-verify.gov/> (last visited May 29, 2019).

¹⁰² Employers already participating in E-Verify likely already complete ongoing annual training because they voluntarily chose to enroll or because of rules or regulations beyond the scope of this proposed rule. DHS anticipates that such employers would continue to use E-Verify regardless of their decision to hire (c)(18) workers or not.

¹⁰⁷ See USCIS, The E-Verify Memorandum of Understanding for Employers, available at http://www.uscis.gov/sites/default/files/USCIS/Verification/E-Verify/E-Verify_Native_Documents/MOU_for_E-Verify_Employer.pdf.

¹⁰⁸ The USCIS Office of Policy and Strategy, PRA Compliance Branch estimates the average time burdens. See PRA E-Verify Program (OMB control number 1615-0092), May 24, 2016. The PRA Supporting Statement can be found under Question 12 at <https://www.regulations.gov/document?D=USCIS-2007-0023-0081> (last visited May 29, 2019).

¹⁰⁹ *Id.*

to resolve the DHS and/or SSA TNC case result. E-Verify requires employers to promptly inform the employee about the TNC and provide instructions for contesting it. The E-Verify website also provides detailed information about contesting the TNC.¹¹⁰

In the absence of specific population data on which entities would continue to hire (c)(18) alien workers, it is only possible to calculate an estimated average unit cost for an employer not currently participating in E-Verify to hire one (c)(18) renewal alien worker. In this analysis, DHS uses an hourly compensation rate for estimating the opportunity cost of time for an HR specialist. DHS uses this occupation as a proxy for those who might prepare and complete the verification for an employer. DHS notes that not all employers may have an HR specialist, but rather some equivalent occupation may prepare and complete the verification and create the E-Verify case.

According to BLS data, the average hourly wage rate for HR specialists is \$32.58.¹¹¹ DHS estimates the hourly compensation rates by adjusting the average hourly wage rates by a benefit-to-wage multiplier to account for the full cost of benefits such as paid leave, insurance, and retirement. Based on the most recent report by the BLS on the average employers' costs for employee compensation for all civilian workers in major occupational groups and industries, DHS estimates that the benefits-to-wage multiplier is 1.46.¹¹² Therefore, DHS calculates an average hourly compensation rate of \$47.57 for HR specialists.¹¹³ Applying this average hourly compensation rate to the estimated time burden of 2.26 hours for the enrollment process, DHS estimates an average opportunity cost of time for

a new employer to enroll in E-Verify is \$107.51.¹¹⁴ DHS assumes the estimated opportunity cost of time to enroll in the E-Verify program is a one-time cost to employers. In addition, DHS estimates the opportunity cost of time associated with 1 hour of ongoing annual training for newly-enrolled entities would be \$47.57 annually in the years following enrollment.

Newly-enrolled employers would also incur opportunity costs of time to enter employee information into the E-Verify system to confirm their identity and work authorization. DHS estimates the time burden for an HR specialist to submit a case in E-Verify is 7.74 minutes (or 0.129 hours).¹¹⁵ Therefore, DHS estimates the opportunity cost of time would be approximately \$6.14 per case.¹¹⁶

DHS estimates the total first year cost for a new employer to enroll in E-Verify and create a single E-Verify case in the E-Verify system would be approximately \$113.65.¹¹⁷ In subsequent years, DHS estimates newly-enrolled employers would incur costs of \$53.71, at minimum, to maintain their account and create one new E-Verify case for their (c)(18) worker.¹¹⁸ DHS recognizes that the actual cost to newly-enrolled employers of using E-Verify would be higher since case submissions would also include all newly hired employees, not just (c)(18) workers. However, since DHS cannot predict how many employees each employer would hire in the future, DHS cannot estimate how many additional E-Verify cases an employer may expect to create. Employers already enrolled in the E-Verify program who choose to hire (c)(18) workers in subsequent years

would incur costs even in the absence of this proposed rule.

Employers that are not participating in E-Verify face the binary choice of participating in or not participating in the program. If the employer who had hired a (c)(18) alien worker does not participate, the employer faces the potential for labor turnover costs. If the employer does participate, the employer incurs the cost of enrolling and participating in the program and implementing the program requirements. On one hand, since the EADs last only a year, there might be some disincentive not to participate in E-Verify. However, as discussed in the population section, DHS cannot make reliable estimates of the number of employers that would enroll and participate in E-Verify, and as such, cannot estimate total costs germane to this implementation.

III. Turnover Costs to Employers Who Currently Hire (c)(18) EAD Holders

In order to properly account for costs involving employers who have hired aliens temporarily released on orders of supervision who are EAD holders, DHS introduces the costs applicable to discuss labor turnover and E-Verify in separate segments.

DHS anticipates this proposed rule would impose labor-related turnover costs on U.S. employers who employ (c)(18) alien workers who would remain eligible under this rule but are not enrolled in E-Verify and opt not to enroll. Employers would incur labor turnover costs because these alien workers would remain eligible for an initial EAD under this rule but would not be eligible for a renewal EAD since they would be unable to establish that they are employed by an E-Verify employer. As a result, alien workers would no longer be able to work and presumably employers would need to find a replacement worker. For aliens who would remain eligible for an EAD under this rule, the duration of time to remove aliens on orders of supervision from the U.S. would likely be longer than average as DHS has determined that removal for these aliens is impracticable because all countries from which DHS has requested travel documents have affirmatively declined to issue such documents. Therefore, employers who do not use or are enrolled in E-Verify would incur turnover costs in cases where their (c)(18) alien workers would remain eligible for an EAD under this rule. However, U.S. employers who are not enrolled in E-Verify could avoid turnover costs by choosing to enroll in the program. If an employer chooses to

¹¹⁰ See the following for more detailed information <https://www.e-verify.gov/employees/tentative-nonconfirmation-overview/how-to-correct-a-tentative-nonconfirmation> (last visited May 29, 2019).

¹¹¹ See U.S. Department of Labor, Bureau of Labor Statistics, Occupational Employment and Wages, May 2019, Human Resources Specialist (SOC #13-1071): <https://www.bls.gov/oes/2019/may/oes131071.htm> (last visited May 7, 2020).

¹¹² The benefits-to-wage multiplier is calculated as follows: (Total Employee Compensation per hour)/(Wages and Salaries per hour) = \$37.10/\$25.47 = 1.457 = 1.46 (rounded). See Economic News Release, "Employer Cost for Employee Compensation—December 2019," (March 2020), U.S. Department of Labor, BLS, Table 1. Employer costs per hour worked for employee compensation and costs as a percent of total compensation: Civilian workers, by major occupational and industry group. March 19, 2020, available at https://www.bls.gov/news.release/archives/eecc_03192020.pdf (last visited March 24, 2020).

¹¹³ Hourly compensation of \$47.57 = \$32.58 average hourly wage rate for HR specialists × 1.46 benefits-to-wage multiplier.

¹¹⁴ Calculation: 2.26 hours for the enrollment process × \$47.57 total compensation wage rate for an HR specialist = \$107.51.

¹¹⁵ The USCIS Office of Policy and Strategy, PRA Compliance Branch estimates the average time burdens. See Paperwork Reduction Act (PRA) E-Verify Program (OMB control number 1615-0092), May 24, 2016. The PRA Supporting Statement can be found under Question 12 at <https://www.regulations.gov/document?D=USCIS-2007-0023-0081> (last visited May 29, 2019).

¹¹⁶ Calculation: 0.129 hours to submit a query × \$47.57 total compensation wage rate for an HR specialist = \$6.14.

¹¹⁷ Calculation: \$107.51 opportunity cost for a new entity to enroll in E-Verify + \$6.14 cost to submit a query into E-Verify = \$113.65.

¹¹⁸ Calculation: \$47.57 one hour of annual training + \$6.14 cost to submit a query into E-Verify = \$53.71. E-Verify has a Work Authorization Docs Expiring case alert that notifies employers that an employee's EAD or Arrival-Departure Record (Form I-94) document is expiring. The alert is a reminder for the employer to reverify the employee. See About E-Verify Questions and Answers, Creating and Managing Cases, page 2 (04/30/2018) at <https://www.e-verify.gov/about-e-verify/questions-and-answers> (last viewed Jul. 15, 2020).

enroll in E-Verify, the employer would instead incur the associated costs to enroll in the system, submit cases for all newly hired employees, not just (c)(18) workers), and maintain their account.

Employee turnover may cause employers to incur various direct and indirect turnover costs. Direct turnover cost employers could incur include those that involve separation and replacement costs. Separation costs include exit interviews, severance pay, and assigning other employees to temporarily cover the departing employee's duties and functions, which may require overtime or temporary staffing. Replacement costs typically include those related to advertising positions, search and agency fees, screening applicants, interviewing, background verification, employment testing, hiring bonuses, and possible travel and relocation costs. Once hired, employers may incur additional costs for training, orientation, and assessments. Additionally, other direct costs may include loss of productivity and possible reduced profitability due to operational and production disruptions. Moreover, employers may incur indirect costs, including loss of institutional knowledge, networking, and impacts to morale and interpersonal work relationships. These indirect costs are more difficult to measure.

DHS has reviewed recent research and literature on turnover costs. While peer-reviewed research on turnover costs is not extensive, there are several studies available which are cited repeatedly across various reports focusing on specific locations and occupations, and measure turnover costs in different ways. For example, a 2012 report published by the Center for American Progress ("2012 CAP Survey") reviewed several dozen studies that considered both direct and indirect costs.¹¹⁹ This survey found that turnover costs per employee ranged from 10 to 30 percent of the salary for most salaried workers with an average mid-point of about 20 percent of the worker's salary in total labor turnover costs.

In the absence of specific data on which employers hire (c)(18) alien

workers and use, or would enroll in, E-Verify, it is only possible to calculate an estimated range of average per employee turnover costs an employer not currently participating in E-Verify could incur. In order to estimate labor turnover costs, DHS uses estimated employee annual earnings of \$35,838 based on the effective minimum wage as a lower bound and \$78,106 based on the average wage developed previously in this analysis (see "Proposal Regarding EAD Eligibility" section) and an upper bound. DHS multiplied each of these estimated employee annual earnings by 20 percent in accordance with the 2012 CAP Survey. Using annual earnings based on the effective minimum wage (lower bound), DHS estimates labor turnover costs would be approximately \$7,168 per worker and using the annual earnings based on the average wage (upper bound), DHS estimates labor turnover costs would be approximately \$15,621 per worker.¹²⁰ Turnover costs would be higher if a U.S. employer that does not use or enroll in E-Verify employs more than one (c)(18) alien worker who would remain eligible under this rule. DHS recognizes that turnover costs would occur in the year an EAD expires and, depending on the effective date of this rule should it become finalized, employers who incur turnover costs may incur them in up to two consecutive fiscal years.

DHS is unable to predict how many employers would actually participate in E-Verify in order to retain their (c)(18) alien workers or the total number of employment authorizations they would confirm through E-Verify should they choose to participate. DHS assumes that employers would make a cost-benefit decision between incurring labor turnover costs and incurring the current and future costs to enroll and participate in E-Verify. DHS recognizes that an employer that enrolls and participates in E-Verify would confirm employment authorization for all new hires, not only their (c)(18) alien workers. Unlike the development of the costs germane to forgone earnings, in which DHS could at least deduce a range for the population based on some limited data, doing so here would be completely speculative, and we do not endeavor to rely on a range here.

¹²⁰ Calculations: $\$35,838 \times 20\% = \$7,168$; $\$78,106 \times 20\% = \$15,621$.

I. Government Transfers

This proposed rule could reduce taxes paid to the federal government (a transfer payment) in the short term. During the period of vacancy for a job formerly held by the (c)(18) alien worker, the federal government would not be collecting taxes.

In addition, in instances where an employer cannot hire replacement labor for a position an alien on an order of supervision had or would have filled, this proposed rule may result in a reduction in taxes paid to the federal government. It is difficult to quantify income tax losses because individual tax situations vary widely.¹²¹ However, DHS estimates the potential reduction in tax revenue generated through employment tax programs, namely Medicare and Social Security, which have a combined tax rate of 7.65 percent (6.2 percent and 1.45 percent, respectively).¹²² DHS notes that the total estimated reduction in tax transfer payments from employees and employers to Medicare and Social Security is 15.3 percent since both the employee and employer would not pay their respective portions of Medicare and Social Security taxes when a position remains unfilled by an alien on an order of supervision who held or would have filled the position.¹²³

To estimate the range of employment tax losses, we take the estimated lost earnings for the range of initial and renewal projected filers at the prevailing and average wage rates from Table 18, columns G and H, and multiply each year by 15.3 percent. These calculations are shown in Table 21.

BILLING CODE 9111-97-P

¹²¹ More than 44 percent of workers pay no federal income tax (Sept. 16, 2018) available at <https://www.marketwatch.com/story/81-million-americans-wont-pay-any-federal-income-taxes-this-year-heres-why-2018-04-16>.

¹²² The various employment taxes are discussed in more detail at <https://www.irs.gov/businesses/small-businesses-self-employed/understanding-employment-taxes>. See IRS Publication 15, Circular E, Employer's Tax Guide for specific information on employment tax rates. https://www.irs.gov/pub/irs-pdf/p15_18.pdf. See More than 44 percent of Americans pay no federal income tax (Sep. 16, 2018) available at: <https://www.marketwatch.com/story/81-million-americans-wont-pay-any-federal-income-taxes-this-year-heres-why-2018-04-16>. (last visited Sep. 16, 2018)

¹²³ Calculation: $(6.2 \text{ percent Social Security} + 1.45 \text{ percent Medicare}) \times 2 \text{ employee and employer losses} = 15.3 \text{ percent total estimated tax loss to government}$.

Source: USCIS Analysis				

Lost earnings, which DHS estimates could range between \$6,038,201,268 and \$14,716,520,096¹²⁴ over the 10-year period from FY 2020 to FY 2029, would result in corresponding employment tax

losses ranging between \$923,844,794 and \$2,251,612,274.¹²⁵ Annualized at 7 percent, employment tax losses would range from approximately \$93,947,687 to \$228,789,887 (Table 22). Again, depending on the circumstances of the

employee, there could be additional federal income tax losses not estimated here. There may also be state and local income tax losses that would vary according to the jurisdiction, but which DHS is unable to quantify. It is noted that the potential decrease in tax transfers only applies to the compensation impacts, not to labor turnover costs, costs associated with the forms' burdens, or implementation and usage of E-Verify.

¹²⁴ Calculations (data from Table 18): \$1,388,614,986 (10-year total initial upper bound costs) + \$4,649,586,282 (10-year total renewal upper bound costs) = \$6,038,201,268 (minimum 10-year total lower bound costs); \$3,384,879,722 (10-year total initial upper bound costs) + \$11,331,540,374 (10-year total renewal upper bound costs) = \$14,716,420,096 (maximum 10-year total upper bound costs).

¹²⁵ Calculations: \$212,458,093 (10-year total initial lower bound costs) + \$711,386,701 (10-year total renewal lower bound costs) = \$923,844,794 (minimum 10-year total lower bound costs); \$517,886,597 (10-year total initial upper bound costs) + \$1,733,725,677 (10-year total renewal upper bound costs) = \$2,251,612,274 (maximum 10-year total upper bound costs).

II. Total Costs of the Rule

In the previous sections we presented monetized estimates of the impacts of the proposed rule germane to lost labor earnings, biometrics submission, increased time burdens for completing forms, and labor turnover costs for renewals. We estimated the per employer cost associated with enrolling in and participating in the E-Verify

program, but not the total costs for businesses. In the development of costs associated with lost labor earnings, our inability to refine the population that could be impacted drove reliance on a lower and upper bound.

The total impacts are aggregated by summing the total initial and renewal impacts from Tables 18 through 21 in terms of the maximum and minimum

estimates. Therefore, Table 22 shows the range of estimated monetized costs of the proposed rule, where Table 22(A) presents the maximum estimates, and Table 22(B) presents the minimum estimates. For each sub-table the ten-year totals are provided in undiscounted 10-year total values, as well as the present value costs and annualized costs discounted at 7 percent and 3 percent.

Table 22: Monetized Impacts of the Proposed Rule, FY 2020 to 2029				
Table 22(A): Maximum Estimates

Source: USCIS Analysis				

As table 22 shows, the projected 10-year monetized undiscounted costs of the proposed rule for the period fiscal year 2020 to 2029 could be as high as about \$14.72 billion with a minimum cost estimate of \$6.04 billion under the assumptions relied on.¹²⁶ The majority of the costs of this rule would result from lost labor earnings, if companies are unable to find reasonable labor substitutes for the position the aliens temporarily released on orders of supervision would have filled. DHS notes there are unquantified costs not reflected in the estimates above.

Benefits

The benefits potentially realized by the proposed rule are both qualitative and quantitative. DHS has provided estimates of monetized benefits, where possible. DHS estimates that U.S. workers could have a better chance of obtaining jobs that some (c)(18) alien workers currently hold, as the proposed rule would reduce employment authorization eligibility for the (c)(18) alien worker population.

In addition, the restriction on the ability to obtain work authorization may increase incentives for aliens with final orders of removal to depart the United States, which could decrease the amount of time aliens are in this status and could save government resources expended while aliens are temporarily released on orders of supervision and pending repatriation. ICE oversees the monitoring and tracking of aliens on orders of supervision as well as effectuates their removal from the United States.¹²⁷ Managing aliens temporarily released on orders of supervision consumes DHS resources. Specifically, ICE must devote resources to track and monitor the status of these aliens. This includes conducting regular check-ins to ensure compliance with conditions of release. These cases absorb scarce enforcement resources that could be diverted to, among other things, identifying and detaining criminal aliens. If fewer aliens with final orders of removal on orders of supervision remain in the United States for an extended period of time because this rule increases the incentives for them to depart, then ICE is likely to

spend fewer resources on monitoring and tracking aliens on orders of supervision. Monetizing this benefit is not possible at this time. Although the federal government makes efforts to remove these aliens from the United States on an ongoing basis regardless of employment authorization, there is no way to know the timing of when aliens would be removed, if an alien would be motivated to self-deport or, ultimately, who would execute the removal.

The proposal to revise the (a)(10) employment authorization category could provide aliens who are granted CAT deferral of removal with monetary benefits that can be quantified. Currently, this population is regulated to apply for an EAD under the (c)(18) category. In practice, DHS acknowledges that some aliens who are granted CAT deferral of removal have applied under the (a)(10) Form I-765 category and adjudication of these applications has been inconsistent. This proposed revision would thus reduce confusion for aliens who are granted CAT deferral of removal applying for an EAD and would lead to consistent Form I-765 adjudication for this population.

For those who currently apply under the (c)(18) category, Form I-765 must be accompanied by the filing fee and a copy of the DOJ Executive Office for Immigration Review (EOIR) immigration judge's order of removal. As stated in the Form I-765 instructions, three additional factors may also be considered under the (c)(18) category, including the existence of a dependent spouse and/or children in the United States who rely on the alien for support; existence of economic necessity to be employed; and the anticipated length of time before the alien can be removed from the United States. If supporting evidence is requested, DHS recognizes that there would be associated opportunity costs of time for those aliens.

Aliens under the (a)(10) category are not required to apply to DHS to obtain employment authorization before they can begin work. However, (a)(10) aliens are required to apply (*i.e.*, submit Form I-765) in order to receive a physical EAD card if they want a document evidencing their employment authorization pursuant to their grant of withholding or deferral. Under the (a)(10) category, aliens file Form I-765 with a copy of the EOIR immigration judge's signed order granting withholding of removal. There are no additional factors for consideration. DHS is not able to determine the number of aliens who are granted CAT deferral of removal who apply under the (c)(18) category, submit evidence for the

additional factors, or who may opt to not apply for a physical EAD card. Therefore, since DHS cannot separate out the number of applicants who may benefit from this proposed provision, we consider a "best-case" scenario. In the best-case scenario, none of the 147 (the 5-year average number of cases, Table 16) aliens who are granted CAT deferral of removal would apply for a physical EAD card after the effective date of this rule since they would not need to obtain an EAD in order to begin work. Under this scenario, benefits would accrue from not paying filing fees and not spending time filing Form I-765. The filing fee for aliens applying for employment authorization is \$550.¹²⁸ DHS estimates this population could save a maximum \$80,850 in filing fees in the first year of the rule becoming effective.¹²⁹ The other benefit would be accrued in the form of opportunity costs since these aliens would not spend time preparing and submitting Form I-765 and any other evidence that would have been required under the (c)(18) considerations. DHS is able to quantify the savings that would result from not submitting Form I-765, which has an estimated time burden of 4 hours and 30 minutes.¹³⁰ Using the lower and upper bound wage rates, the opportunity cost of time savings would range from about \$77.54 to \$168.98 per alien in the first year.¹³¹ For the 147 aliens who are granted CAT deferral of removal, the opportunity cost of time savings would range from \$11,398 to \$24,840 under this scenario.¹³² Per alien, benefits for this population would range from approximately \$627.54 to \$718.98 per alien, with a total benefit ranging from \$92,248 to \$105,690 annually.¹³³ Additional savings could

¹²⁸ USCIS was previously authorized to collect a \$410 Form I-765 filing fee. However, the recently promulgated fee rule updated the fee for Form I-765 to \$550. The final fee rule is expected to take effect on October 3, 2020. See *U.S. Citizenship and Immigration Services Fee Schedule and Changes to Certain Other Immigration Benefit Request Requirements*, 85 FR 46788 (Aug. 3, 2020).

¹²⁹ \$550 (filing fee to apply for an initial EAD under the (c)(18) category) × 147 (average number of cases granted CAT deferral of removal) = \$80,850.

¹³⁰ See Instructions for Form I-765 (05/31/2020) at <https://www.uscis.gov/i-765>.

¹³¹ Calculations: 4.5 hours (time burden for Form I-765) × \$17.23 (one hour of work at prevailing wage) = \$77.54; 4.5 hours (time burden for Form I-765) × \$37.55 (one hour of work at average wage for all occupations) = \$168.98.

¹³² Calculations: \$77.54 × 147 (the average number of cases granted CAT deferral of removal) = \$11,398; \$168.98 × 147 (the average number of cases granted CAT deferral of removal) = \$24,840.

¹³³ Calculation: \$77.54 (lower bound opportunity cost of time) + \$550 (filing fee) = \$627.54; \$168.98 (upper bound opportunity cost of time) + \$550

Continued

¹²⁶ Calculations: \$6,038,201,268 (lost labor earnings costs) + \$824,075 (biometrics costs) + \$116,165 (time burden to complete forms costs) = \$6,039,141,507 minimum undiscounted 10-year total; \$14,716,420,096 (lost labor earnings costs) + \$5,476,238 (biometrics costs) + \$1,044,829 (time burden to complete forms costs) = \$14,722,941,163 maximum undiscounted 10-year total.

¹²⁷ See Immigration Enforcement, Removal <https://www.ice.gov/removal> and Enforcement and Removal Operations, ERO Overview <https://www.ice.gov/ero>.

also be accrued in the form of opportunity costs if applicants would have spent time submitting evidence under any of the (c)(18) considerations.

The scenario presented here is an extreme to best estimate the maximum savings of this proposed provision. It is likely that some aliens who are granted CAT deferral of removal would continue to submit Form I-765 and pay the \$550 filing fee in order to obtain a physical EAD card. Therefore, the overall benefit of this proposed provision is presented using a range from \$0 to \$105,690 annually.

DHS welcomes any data or public comments on the benefits of removing the eligibility of employment authorizations to certain (c)(18) workers. DHS is particularly interested in public comments about the benefits to U.S. workers of removing the eligibility of employment authorization for (c)(18) workers. DHS is also interested in receiving comments on the increased employment opportunities for U.S. workers due to this rule. DHS welcomes any overall public feedback or data that could assist DHS in quantifying the benefits of the proposed rule.

Labor Market Overview

As discussed in the population section of this analysis, USCIS anticipates approving somewhere between 17,077 and 22,090 Form I-765 applications annually from aliens with final orders of removal in the absence of this proposed rule.¹³⁴ The U.S. labor force consists of a total of 160,143,000 workers, according to recent data (September 2020).¹³⁵ Therefore, the maximum population affected by this proposed rule (about 22,090) represents 0.01 percent of the U.S. labor force, suggesting that the number of potential workers no longer eligible for an EAD make up a very small percentage of the U.S. labor market.¹³⁶

B. Regulatory Flexibility Act

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended by

(filing fee) = \$718.98; \$627.54 × 147 = \$92,248 (lower bound total benefit); \$718.98 × 147 = \$105,690 (upper bound total benefit).

¹³⁴ Calculations: 4,241 (projected initial approvals FY 2029) + 12,836 (projected renewal approvals FY 2029) = 17,077 minimum projected annual approvals; 4,728 (projected initial approvals FY 2020) + 17,362 (projected renewal approvals FY 2020) = 22,090 maximum projected annual approvals.

¹³⁵ The BLS labor force data are found in Table A-1. Employment status of the civilian population by sex and age, seasonally adjusted, from the Current Population Survey October 2020 News Release: https://www.bls.gov/news.release/archives/empsit_10022020.pdf. (last visited October 8, 2020).

¹³⁶ Calculation: (22,090 maximum projected annual (c)(18) alien worker approvals/160,143,000 workers) * 100 = 0.01 percent (rounded).

the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121 (March 29, 1996), requires Federal agencies to consider the potential impact of regulations on small businesses, small governmental jurisdictions, and small organizations during the development of their rules. The term “small entities” comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, or governmental jurisdictions with populations of less than 50,000.¹³⁷

This proposed rule would eliminate eligibility for employment authorization for aliens who have final orders of removal and are temporarily released on orders of supervision except in cases where the alien meets the exception under this proposed rule (*i.e.* removal is impracticable because all countries from whom DHS requested travel documents have affirmatively declined to issue such documents). DHS has estimated that the rule would cover an upper bound population of about 22,090 aliens. As previously explained, the provision being proposed may result in forgone labor earnings for aliens temporarily released on order of supervision. This rule directly regulates and impacts aliens temporarily released on orders of supervision and individuals are not considered a small entity under the Regulatory Flexibility Act. Some entities (including employers) could be indirectly impacted by labor turnover costs or the costs of implementing and utilizing E-Verify by this proposed rule because they employ an affected alien. DHS has prepared an initial regulatory flexibility analysis (IRFA) to accompany this proposed rule.

i. A Description of the Reasons Why the Action by the Agency is Being Considered

DHS has determined that the current employment authorization regulations governing discretionary employment authorization do not adequately reflect DHS’s enforcement mission and priorities. As discussed more fully in the preamble, DHS’s enforcement goals are not consistent with allowing aliens to work when they have an order of removal from the United States.

DHS is proposing through this rulemaking to align its discretionary authority to grant employment authorization with its immigration enforcement mission and priorities.

¹³⁷ A small business is defined as any independently owned and operated business not dominant in its field that qualifies as a small business per the Small Business Act, 15 U.S.C. 632.

Enforcement is essential to the integrity of the immigration system.

ii. A Succinct Statement of the Objectives of, and Legal Basis for, the Proposed Rule

DHS’s authority to detain and release aliens ordered removed from custody on orders of supervision and to grant employment authorization is found in several statutory provisions. Section 102 of the Homeland Security Act of 2002 (HSA) (Pub. L. 107–296, 116 Stat. 2135), 6 U.S.C. 112 and section 103 of the INA, 8 U.S.C. 1103, charge the Secretary with the administration and enforcement of the immigration and naturalization laws of the United States.¹³⁸ In addition to establishing the Secretary’s general authority to administer and enforce immigration laws, section 103 of the INA, 8 U.S.C. 1103, enumerates various related authorities including the Secretary’s authority to establish regulations as are necessary for carrying out his authority. Section 241 of the INA, 8 U.S.C. 1231, governs the detention, release, and removal of aliens after they have received an administratively final order of removal. Section 274A of the INA, 8 U.S.C. 1324a, governs employment of aliens who are authorized to be employed by statute or in the discretion of the Secretary and the requirements U.S. employers must follow to verify the identity and employment authorization of their employees. The authority to establish and operate E-Verify is found in sections 401–405 of IIRIRA, Public Law 104–208, 110 Stat. 3009–546. The Secretary proposes the changes in this rule under these authorities.

iii. A Description of and, Where Feasible, an Estimate of the Number of Small Entities to Which the Proposed Rule Will Apply

This rule directly regulates and impacts aliens temporarily released on orders of supervision and individuals are not considered a small entity under the Regulatory Flexibility Act. Since some small entities may be indirectly impacted by this proposed rule by employing an affected alien, DHS has developed this IRFA to evaluate the potential impact on small entities. Small entities could incur costs due to the proposed rule if they employ EAD holders who are affected by the new requirements of the proposed rule. However, DHS does not currently require information on the employer or employment status of the EAD holder and thus is unable to determine how many entities could be impacted by the

¹³⁸ Public Law 104–208, div. C, at secs. 401–405.

proposed rule or whether the entities impacted would be considered small entities. This is because these EADs are open market EADs,¹³⁹ and therefore DHS does not currently collect information on the employer or the employment status of the EAD holder. This proposed rule may cause some existing EAD holders to be ineligible to renew their EADs. In such cases, small entities may incur opportunity costs associated with having to choose the next best alternative to immediately filling a job an EAD holder would have filled in situations where eligibility for the EAD is not met. If entities cannot find reasonable substitutes for the labor the aliens temporarily released on orders of supervision would have provided, removing EAD eligibility for these aliens would result primarily in costs to those entities through lost productivity and lost profits. DHS expects that this type of turnover would be incurred in the first two years after the effective date of this rule.¹⁴⁰ Small entities, that do not currently participate in E-Verify would incur costs to implement and use the program in order to retain aliens temporarily released on orders of supervision in order for the alien to be eligible for a renewal EAD under this rule. DHS estimates the total first year cost for a new entity to enroll in the E-Verify program and create a single E-Verify case would be approximately \$113.65. In subsequent years, DHS estimates newly enrolled entities would incur a minimal annual cost of \$53.71 to maintain their account and create one new case for their (c)(18) worker. DHS recognizes that the actual cost to newly-enrolled entities of using E-Verify would be higher since case submissions would also include all newly hired employees, not just (c)(18) workers. However, since DHS cannot predict how many employees each entity would hire in the future, DHS cannot estimate how many additional E-Verify cases an entity may expect to create. Entities already enrolled in the

E-Verify program who choose to hire (c)(18) workers in subsequent years would incur costs even in the absence of this proposed rule.

Small entities that are not participating in E-Verify face the binary choice of participating in or not participating in the program. If an entity who had hired a (c)(18) alien worker does not participate, the entity faces the potential for labor turnover costs. If the entity does participate, the entity incurs the cost of enrolling and participating in the E-Verify program and implementing the program requirements. On one hand, since the EADs last only a year, there might be some disincentive not to participate in E-Verify. However, as discussed in the population section, DHS cannot make reliable estimates of the number of entities that would enroll and participate in E-Verify, and as such, cannot estimate total costs germane to this implementation.

If a small entity who employs (c)(18) alien workers who would remain eligible under this rule is not enrolled in E-Verify and opts not to enroll, the entity would incur labor related turnover costs. Entities would incur labor turnover costs because these alien workers would remain eligible for an initial EAD under this rule, but would not be eligible for a renewal EAD since they would be unable to establish that they are employed by an entity enrolled in E-Verify. As a result, alien workers would no longer be able to work and presumably entities would need to find a replacement worker. For aliens who would remain eligible for an EAD under this rule, the duration of time to remove aliens on orders of supervision from the U.S. would likely be longer than average as DHS has determined that removal for these aliens is impracticable because all countries from which DHS has requested travel documents have affirmatively declined to issue such documents. Therefore, entities who do not use or are enrolled in E-Verify would incur turnover costs in cases where their (c)(18) alien workers would remain eligible for an EAD under this rule.

Using annual earnings based on the effective minimum wage (lower bound), DHS estimates labor turnover costs would be approximately \$7,168 per worker and using the annual earnings based on the average wage (upper bound), DHS estimates labor turnover costs would be approximately \$15,621 per worker.¹⁴¹ Turnover costs would be higher if a U.S. employer that does not use or enroll in E-Verify employ more

than one (c)(18) alien worker who would remain eligible under this rule. DHS recognizes that turnover costs would occur in the year an EAD expires and, depending on the effective date of this rule should it become finalized, employers who incur turnover costs may incur them in up to two consecutive fiscal years.

DHS is unable to predict how many entities would actually participate in E-Verify in order to retain their (c)(18) alien workers or the total number of employment authorizations they would confirm through E-Verify should they choose to participate. DHS assumes that entities would make a cost-benefit decision between incurring labor turnover costs and incurring the current and future costs to enroll and participate in E-Verify. DHS recognizes that an entity that enrolls and participates in E-Verify would confirm employment authorization for all new hires, not only their (c)(18) alien workers.

DHS has no way to predict how many small entities would adopt the E-Verify system and how many workers they would vet. Since this rule proposes to eliminate eligibility for employment authorization for aliens temporarily released on orders of supervision, the impact on the renewal population would depend on which aliens remain eligible and if the alien's employer already participates in E-Verify or would be willing to enroll and participate in E-Verify if the employer is not enrolled. DHS cannot rule out that some employers would incur labor turnover costs as a result of choosing to not enroll and participate in E-Verify. Because of the uncertainty regarding eligibility, DHS is unable to estimate a range for the renewal population that would be impacted by this provision and attempting to do so would be completely speculative. However, DHS acknowledges there could be renewal applicants who would be impacted by this provision, which could, in turn, affect employers, some of which could be small entities. DHS seeks comments from the public on the impacts to small entities from enrolling and participating in the E-Verify program. DHS also seeks public comment on the number of small businesses that may be affected as well as compliance costs to those small businesses as a result of this proposed rule.

¹³⁹ Open market EADs allow aliens to work in any occupation or industry. The alien is not required to work for a specific employer or in any specific industry or occupation, and the U.S. employer is not required to test the labor market to ensure that there are no U.S. workers available and that the hiring of the (c)(18) alien will not adversely affect the wages and working conditions for similarly situated U.S. workers.

¹⁴⁰ We do not attribute turnover costs from ineligibility in other years because we operate under the assumption that if an initial EAD is approved, then the renewal would also be approved under the proposed criteria of this rule. DHS recognizes that in some cases, a renewal filing could be denied even in the wake of an approved initial EAD in future years, but the number of instances this would occur is unknown. Estimation of these cases would be speculative at this time.

¹⁴¹ Calculations: $\$35,838 \times 20\% = \$7,168$; $\$78,106 \times 20\% = \$15,621$.

iv. A Description of the Projected Reporting, Recordkeeping, and Other Compliance Requirements of the Proposed Rule, Including an Estimate of the Classes of Small Entities Which Will Be Subject to the Requirement and the Type of Professional Skills Necessary for Preparation of the Report Record

This rule would not directly impose any reporting, recordkeeping, or other compliance requirements on small entities.

v. Identification, to the Extent Practicable, of All Relevant Federal Rules That May Duplicate, Overlap or Conflict With the Proposed Rule

DHS is unaware of any relevant federal rule that may duplicate, overlap, or conflict with the proposed rule.

vi. Description of Any Significant Alternatives to the Proposed Rule Which Accomplish the Stated Objectives of Applicable Statutes and Which Minimize Any Significant Economic Impact of the Proposed Rule on Small Entities

This rule directly regulates and impacts aliens temporarily released on orders of supervision and individuals are not considered a small entity under the Regulatory Flexibility Act. Accordingly, DHS is not aware of any alternatives to the proposed rule that accomplish the stated objectives and that would minimize the economic impact of the proposed rule on small entities as this rule already imposes no direct costs on small entities. DHS requests comments and seeks alternatives from the public that will accomplish the same objectives.

C. Congressional Review Act

This proposed rule is a major rule as defined by 5 U.S.C. 804, also known as the Congressional Review Act (CRA) as enacted in section 251 of the Small Business Regulatory Enforcement Fairness Act of 1996, Public Law 104–121, 110 Stat. 847, 868 *et seq.* Accordingly, this rule, if enacted as a final rule, would be effective at least 60 days after the date on which Congress receives a report submitted by DHS under the CRA, or 60 days after the final rule's publication, whichever is later.

D. Unfunded Mandates Reform Act of 1995

The Unfunded Mandates Reform Act of 1995 (UMRA) is intended, among other things, to curb the practice of imposing unfunded Federal mandates on State, local, and tribal governments. Title II of UMRA requires each Federal agency to prepare a written statement assessing the effects of any federal

mandate in a proposed or final agency rule that may result in a \$100 million or more expenditure (adjusted annually for inflation) in any one year by State, local, and tribal governments, in the aggregate, or by the private sector. The value equivalent of \$100 million in 1995, adjusted for inflation to 2019 levels by the Consumer Price Index for All Urban Consumers (CPI-U), is \$168 million.¹⁴² While this rule may result in the expenditure of more than \$100 million annually, the rulemaking is not a “Federal mandate” as defined for UMRA purposes. Therefore, no actions were deemed necessary under the provisions of the UMRA.

E. Executive Order 13132 (Federalism)

This rule will not have substantial direct effects on the States, on the relationship between the federal government and the States, or on the distribution of power and responsibilities among the various levels of government. DHS does not expect that this proposed rule would impose substantial direct compliance costs on State and local governments or preempt state law. Therefore, in accordance with section 6 of E.O. 13132, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a federalism summary impact statement.

F. Executive Order 12988 (Civil Justice Reform)

This rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of E.O. 12988.

G. Executive Order 13175 Consultation and Coordination With Indian Tribal Governments

This proposed rule does not have tribal implications under E.O. 13175, Consultation and Coordination with Indian Tribal Governments, because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the federal government and Indian tribes, or on the

distribution of power and responsibilities between the federal government and Indian tribes.

H. Family Assessment

DHS has reviewed this proposed rule in line with the requirements of section 654 of the Treasury General Appropriations Act, 1999, Public Law 105–277. DHS has systematically reviewed the criteria specified in section 654(c)(1). DHS has determined that the proposed rule may adversely cause personal and family-related hardships, including causing disruptions to the alien, U.S. citizen, or LPR spouses and/or children dependent on the income currently earned by the affected alien and may decrease disposable income and increase the poverty of certain family members. However, DHS notes that an alien with a final order of removal will eventually be removed from the country and such families should ultimately expect to experience such hardships. Thus, this proposed rule could result in families experiencing such hardships earlier in comparison to the state of affairs in the absence of the proposed rule. DHS has also determined that the proposed rule neither strengthens or erodes the authority and rights of parents in the education, nurture and supervision of their children; nor affects the ability for a family to perform its functions, or substitutes governmental activity or function; this is not an action that can be carried out by State or local government or by the family, nor does the action establish an implicit or explicit policy concerning the relationship between the behavior and personal responsibility of youth and the norms of society. For the reasons stated elsewhere in this preamble, however, DHS has determined that the benefits of the action justify the financial impact on the family. As described in the Purpose, Background, and Discussion sections of this rule, DHS has compelling legal and policy reasons for the proposed regulatory action, including the enforcement of the general prohibition against providing alien's ordered removed with employment authorization and encouraging those aliens with final orders of removal to depart the United States.

I. National Environmental Policy Act

DHS Directive 023–01 Rev. 01 (Directive) and Instruction Manual 023–01–001–01 Rev. 01 establish the policies and procedures DHS and its components use to comply with the National Environmental Policy Act (NEPA) and the Council on Environmental Quality (CEQ)

¹⁴² U.S. Bureau of Labor Statistics, Historical Consumer Price Index for All Urban Consumers (CPI-U): U.S. City Average, All Items, available at <https://www.bls.gov/cpi/tables/supplemental-files/historical-cpi-u-202001.pdf> (last visited Feb. 19, 2020).

Calculation of inflation: (1) Calculate the average monthly CPI-U for the reference year (1995) and the current year (2019); (2) Subtract reference year CPI-U from current year CPI-U; (3) Divide the difference of the reference year CPI-U and current year CPI-U by the reference year CPI-U; (4) Multiply by 100 = [(Average monthly CPI-U for 2019 – Average monthly CPI-U for 1995)/(Average monthly CPI-U for 1995)] * 100 = [(255.657 – 152.383)/152.383] * 100 = (103.274/152.383) * 100 = 0.6777 * 100 = 67.77 percent = 68 percent (rounded). Calculation of inflation-adjusted value: \$100 million in 1995 dollars * 1.68 = \$168 million in 2019 dollars.

regulations for implementing NEPA, 40 CFR parts 1500 through 1508. The CEQ regulations allow Federal agencies to establish, with CEQ review and concurrence, categories of actions (“categorical exclusions”), which experience has shown do not individually or cumulatively have a significant effect on the human environment and, therefore, do not require an Environmental Assessment or Environmental Impact Statement. 40 CFR 1507.3(b)(2)(ii), 1508.4. For an action to be categorically excluded, the Instruction Manual requires the action to satisfy each of the following three conditions: (1) The entire action clearly fits within one or more of the categorical exclusions; (2) the action is not a piece of a larger action; and (3) no extraordinary circumstances exist that create the potential for a significant

environmental effect. Instruction Manual section V.B(2)(a)–(c).

This proposed rule would amend regulatory criteria for determining eligibility for employment authorization for aliens temporarily released from custody on an order of supervision by amending two existing regulations. First, it would amend 8 CFR 274a.12 to limit employment authorization eligibility to aliens whose removal DHS has determined is impracticable because all countries from whom DHS has requested travel documents have affirmatively declined to issue such documents and who establish economic necessity. Second, this proposed rule would amend the application process in 8 CFR 274a.13 for aliens seeking initial employment authorization by making certain changes to the supporting documentation submitted with the application. The proposed amendments clearly fit within categorical exclusion

A3(a) “Promulgation of rules of a strictly administrative or procedural nature” and A3(d) “Promulgation of rules . . . that interpret or amend an existing regulation without changing its environmental effect.” Instruction Manual, Appendix A, Table 1. Furthermore, the proposed amendments are not part of a larger action and do not present extraordinary circumstances creating the potential for significant environmental impacts. Therefore, the proposed amendments are categorically excluded from further NEPA review.

J. Paperwork Reduction Act

DHS is submitting the information collection requirements in this rule to OMB for review and approval in accordance with requirements of the PRA of 1995, 44 U.S.C. 3501–3512. Table 23 shows a summary of the forms that are part of this rulemaking.

TABLE 23

Form	Form name	New or updated form	General purpose of form	General categories filing	Applicability to employment authorization
I-765	Application for Employment Authorization.	Update—revises and adds instructions and questions for aliens seeking employment authorization who are subject to a final order of removal and have been temporarily released from custody on an order of supervision and for aliens who are recipients of deferral of removal under the regulations implementing the CAT.	Applicants use this form to request employment authorization from USCIS.	<ul style="list-style-type: none"> • Aliens temporarily released on orders of supervision. • Aliens granted deferral of removal under the regulations implementing the CAT. 	USCIS will require aliens seeking employment authorization based on an order of supervision or DCAT to file an application to receive an EAD.
I-765WS	Form I-765 Worksheet.	Update—updates instructions to include aliens temporarily released on orders of supervision in the list of aliens who must complete the Form I-765WS to show economic necessity for employment authorization.	Applicants for employment authorization use this form to provide financial information demonstrating an economic need for employment authorization and an explanation of the circumstances resulting in the need for an EAD.	<ul style="list-style-type: none"> • Aliens temporarily released on orders of supervision. 	USCIS will require aliens seeking employment authorization based on an order of supervision to submit Form I-765WS to establish economic need for an EAD.

USCIS Form I-765 and I-765WS

DHS invites comment on the impact to the proposed collection of information. In accordance with the PRA, the information collection notice is published in the **Federal Register** to obtain comments regarding the proposed edits to the information collection instrument.

Comments are encouraged and will be accepted for 60 days from the publication date of the proposed rule. All submissions received must include the OMB Control Number 1615–0040 in the body of the letter and the agency name. To avoid duplicate submissions, please use only *one* of the methods under the **ADDRESSES** and I. Public Participation section of this rule to submit comments. Comments on this

information collection should address one or more of the following four points:

1. Evaluate whether the collection of the information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected; and
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or

other forms of information technology, e.g., permitting electronic submission of responses.

Overview of Information Collection

(1) *Type of Information Collection:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Application for Employment Authorization.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* Forms I-765; I-765WS; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:* Primary: Individuals and households. USCIS will require an individual seeking employment authorization who has a final order of

removal and was temporarily released on an order of supervision to file the Form I-765. USCIS will use the data collected on this form to determine if an individual temporarily released on an order of supervision and seeking employment authorization is eligible based on DHS's determination that his or her removal is impracticable because all countries from whom DHS has requested travel documents have affirmatively declined to issue such documents. Form I-765WS is used to determine if the individual seeking employment authorization has an economic need to work.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection Form I-765 is 2,286,000 and the estimated hour burden per response is 5 hours; the estimated total number of respondents for the information collection Form I-765WS is 307,697 and the estimated hour burden per response is .50 hours; the estimated total number of respondents for the information collection biometrics is 308,232 and the estimated hour burden per response is 1.17 hours; the estimated total number of respondents for the information collection passport-style photographs is 2,280,303 and the estimated hour burden per response is .50 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 13,084,631 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this information collection is \$400,838,850.

K. Signature

The Acting Secretary of Homeland Security, Chad F. Wolf, having reviewed and approved this document, is delegating the authority to electronically sign this document to Chad R. Mizelle, who is the Senior Official Performing the Duties of the General Counsel for DHS, for purposes of publication in the **Federal Register**.

List of Subjects

8 CFR Part 106

Immigration, user fees.

8 CFR Part 241

Administrative practice and procedure, Aliens, Employment, Immigration, Reporting and recordkeeping requirements.

8 CFR Part 274a

Administrative practice and procedure, Aliens, Employment, Penalties, Reporting and recordkeeping requirements.

Regulatory Amendments

Accordingly, DHS proposes to amend parts 106, 241 and 274a of chapter I, subchapter B, of title 8 of the Code of Federal Regulations as follows:

PART 106—USCIS FEE SCHEDULE

- 1. The authority for Part 106 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1254a, 1254b, 1304, 1356; Pub. L. 107–609; 48 U.S.C. 1806; Pub. L. 115–218.

- 2. Amend § 106.2 by adding paragraph (a)(32)(i)(C) to read as follows:

§ 106.2 Fees

- (a) * * *
(32) * * *
(i) * * *

(C) An alien subject to a final order of removal and temporarily released on an order of supervision who is applying for initial or renewal of employment authorization under 8 CFR 274a.12(c)(18).

PART 241—APPREHENSION AND DETENTION OF ALIENS ORDERED REMOVED

- 3. The authority citation for part 241 continues to read as follows:

Authority: 5 U.S.C. 301, 552, 552a; 8 U.S.C. 1103, 1182, 1223, 1224, 1225, 1226, 1227, 1228, 1231, 1251, 1253, 1255, 1330, 1362; 18 U.S.C. 4002, 4103(c)(4); Pub. L. 107–296, 116 Stat. 2135 (6 U.S.C. 101, *et. seq.*); 8 CFR part 2.

- 4. Amend § 241.4 by revising paragraph (j)(3) to read as follows:

§ 241.4 Continued detention of inadmissible, criminal, and other aliens beyond the removal period.

- * * * * *
(j) * * *

(3) *Employment authorization.* An alien who is subject to a final order of deportation or removal and whom U.S. Immigration and Customs Enforcement has temporarily released on an order of supervision pursuant to section 241(a)(3) of the Act may apply to USCIS for employment authorization pursuant to the procedures prescribed under 8 CFR 274a.12(c)(18) and 274a.13. Any grant of employment authorization by USCIS is completely discretionary and the burden is on the alien to establish that he or she warrants a favorable exercise of discretion to receive employment authorization under this

part. USCIS will only grant employment authorization if USCIS determines that the alien meets the criteria for employment authorization under 8 CFR 274a.12(c)(18) and warrants a favorable exercise of discretion. The alien must request employment authorization on the form and in the manner prescribed by USCIS and according to the form instructions, and must submit biometrics, with any required fee.

* * * * *

- 5. Amend § 241.5 by revising paragraphs (a) and (c) to read as follows:

§ 241.5 Conditions of release after removal period.

(a) *Order of Supervision.* Any alien U.S. Immigration and Customs Enforcement releases pursuant to 8 CFR 241.4 or 241.13(h), must be temporarily released on an order of supervision and must be issued a completed Form I-220B, Order of Supervision, specifying the conditions of release and the consequences for failure to comply with the conditions of release, including DHS authority to take the alien back into custody and the potential for criminal charges and fines under section 243 of the Act if the alien fails to comply with the conditions of release. The Secretary, Director of ICE, or designated delegate must have the authority to issue an order of supervision under this section. The order of supervision must specify the conditions of release including, but not limited to, the following:

* * * * *

(c) *Employment authorization.* An alien who is subject to a final order of deportation or removal and whom U.S. Immigration and Customs Enforcement has temporarily released on an order of supervision pursuant to section 241(a)(3) of the Act may apply to USCIS for employment authorization pursuant to 8 CFR 274a.12(c)(18) and 274a.13. USCIS will only grant employment authorization under this paragraph if USCIS determines, in the sole and unreviewable discretion of USCIS, that the alien meets the criteria to apply for employment authorization under 8 CFR 274a.12(c)(18) and warrants a favorable exercise of discretion.

§ 241.13 [Amended]

- 6. Amend § 241.13(h)(3) by

■ a. Removing the words “The Service” and adding in its place “USCIS”; and

■ b. Removing the reference to paragraph “§ 241.5(c)” and adding in its place “8 CFR 241.5, 274a.12(c)(18), and 274a.13”.

PART 274a—CONTROL OF EMPLOYMENT OF ALIENS

■ 7. The authority citation for part 274a continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1324a; 48 U.S.C. 1806; 8 CFR part 2; Pub. L. 101–410, 104 Stat. 890, as amended by Pub. L. 114–74, 129 Stat. 599.

■ 8. Amend § 274a.12 by revising paragraphs (a)(10) and (c)(18) to read as follows:

§ 274a.12 Classes of aliens authorized to accept employment.

(a) * * *

(10) An alien granted withholding of removal under section 241(b)(3) of the Act or pursuant to 8 CFR 208.16(c), 8 CFR 1208.16(c), and an alien granted CAT deferral of removal pursuant to 8 CFR 208.17, 1208.17, for the period of time in that status, as evidenced by an employment authorization document issued by USCIS.

* * * * *

(c) * * *

(18)(i) USCIS, in its sole and unreviewable discretion, may grant employment authorization to an alien who is subject to a final order of deportation or removal and temporarily released from custody on an order of supervision, pursuant to section 241(a)(3) of the Act, who establishes economic necessity for employment, and for whom DHS has determined that the alien's removal is impracticable because all countries from which DHS has requested travel documents have affirmatively declined to issue such documents.

(ii) USCIS may grant employment authorization under 8 CFR 274a.12(c)(18) for a period that USCIS determines is appropriate at its discretion, not to exceed one year. Factors that USCIS will consider in determining whether an applicant with a final order of removal and temporarily released on an order of supervision warrants a favorable exercise of discretion include but are not limited to:

(A) Whether the alien is the primary provider of economic support for a dependent U.S. citizen or lawful permanent resident spouse, child(ren), and/or parent;

(B) Whether the alien is complying with the order of supervision;

(C) The anticipated length of time before the alien can be removed from the United States; and

(D) The alien's criminal history, including but not limited to whether the alien has been arrested for or convicted of any crimes after having been ordered removed from the United States and released from custody on an order of supervision;

(iii) For renewal applications only, the applicant must also show that he or she is employed by a U.S. employer who is a participant in good standing in E-Verify.

* * * * *

■ 9. Amend § 274a.13 by adding paragraph (a)(3) and revising paragraph (b) to read as follows:

§ 274a.13 Application for employment authorization.

(a) * * *

(3) Aliens with final orders of removal or deportation who have been temporarily released from detention on an order of supervision and whose removal DHS has determined is impracticable because all countries from which DHS has requested travel documents have affirmatively declined to issue such documents, and are applying for initial employment authorization or renewal of employment authorization based on 8 CFR 274a.12(c)(18) must file the appropriate form designated by USCIS, with the prescribed fee, and in accordance with the form instructions.

(i) *Evidence for initial applications.* Aliens who are applying for initial employment authorization under 8 CFR 274a.12(c)(18) must submit the following supporting documentation:

(A) A decision by an immigration judge or the Board of Immigration Appeals or an administrative removal order issued by DHS demonstrating that the alien is subject to a final order of removal or deportation;

(B) A completed Form I–765WS, Form I–765 Worksheet or successor form designated by USCIS and in accordance with the form instructions to show economic necessity; and

(C) A copy of the complete order of supervision issued by U.S. Immigration and Customs Enforcement including a copy of the complete Personal Report Record which reflects that the alien has been in continuous compliance with the order of supervision, from the date the alien was temporarily released on an order of supervision through the time of adjudication of the application for employment authorization.

(ii) *Evidence for Renewal Applications for Employment Authorization.* In addition to the evidence required under paragraph (a)(3)(i) of this section, aliens seeking renewal of employment authorization based on 8 CFR 274a.12(c)(18) must provide their U.S. employer's E-Verify Company Identification Number (or client company identification number if the U.S. employer uses an agent) and the employer's name as listed in E-Verify. An E-Verify employer is a participant in good standing if the employer has enrolled in E-Verify with respect to all hiring sites in the United States that employ an alien temporarily released from custody on an order of supervision who has received employment authorization under this rule, when the alien files their application for employment authorization; is in compliance with all requirements of the E-Verify program, including but not limited to verifying the employment eligibility of newly hired employees at those hiring sites; and continues to be a participant in good standing in E-Verify at any time during which the employer employs an alien temporarily released on an order of supervision who has received employment authorization under this rule.

(b) *Approval of application.* If USCIS approves an application for employment authorization, USCIS will notify the alien. USCIS will issue an Employment Authorization Document (EAD) valid for a specific period and subject to any terms and conditions noted. For aliens granted employment authorization based on DHS's determination that the alien's removal is impracticable because all countries from which DHS has requested travel documents have affirmatively declined to issue a travel document, USCIS may limit the validity period, in its discretion, not to exceed one year.

LIST OF PUBLIC LAWS

Note: No public bills which have become law were received by the Office of the Federal Register for inclusion in today's **List of Public Laws**.

Last List November 3, 2020

Public Laws Electronic Notification Service (PENS)

PENS is a free email notification service of newly enacted public laws. To subscribe, go to <https://>

listserv.gsa.gov/cgi-bin/wa.exe?SUBED1=PUBLAWS-L&A=1

Note: This service is strictly for email notification of new laws. The text of laws is not available through this service.

PENS cannot respond to specific inquiries sent to this address.
