

FEDERAL REGISTER

Vol. 85

Thursday,

No. 224

November 19, 2020

Pages 73599–74254

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097-6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see www.federalregister.gov.

The seal of the National Archives and Records Administration authenticates the **Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at www.govinfo.gov, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, gpocusthelp.com.

The annual subscription price for the **Federal Register** paper edition is \$860 plus postage, or \$929, for a combined **Federal Register**, **Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is \$330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register**, including postage, is based on the number of pages: \$11 for an issue containing less than 200 pages; \$22 for an issue containing 200 to 400 pages; and \$33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for \$3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see bookstore.gpo.gov.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 85 FR 12345.

Postmaster: Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

Rules and Regulations

Federal Register

Vol. 85, No. 224

Thursday, November 19, 2020

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 930

[Doc. No. AMS–SC–20–0036; SC20–930–3 FR]

Tart Cherries Grown in the States of Michigan, New York, Pennsylvania, Oregon, Utah, Washington and Wisconsin; Changes to Subcommittee Size and Addition of Term Limits

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This rule implements a recommendation from the Cherry Industry Administrative Board (Board) to change subcommittee size and add term limits under the marketing order for tart cherries grown in the States of Michigan, New York, Pennsylvania, Oregon, Utah, Washington and Wisconsin.

DATES: Effective December 21, 2020.

FOR FURTHER INFORMATION CONTACT: Jennie M. Varela, Senior Marketing Specialist, or Christian D. Nissen, Regional Director, Southeast Marketing Field Office, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA; Telephone: (863) 324–3375, Fax: (863) 291–8614, or Email: Jennie.Varela@usda.gov or Christian.Nissen@usda.gov.

Small businesses may request information on complying with this regulation by contacting Richard Lower, Marketing Order and Agreement Division, Specialty Crops Program, AMS, USDA, 1400 Independence Avenue SW, STOP 0237, Washington, DC 20250–0237; Telephone: (202) 720–2491, Fax: (202) 720–8938, or Email: Richard.Lower@usda.gov.

SUPPLEMENTARY INFORMATION: This action, pursuant to 5 U.S.C. 553, amends regulations issued to carry out a marketing order as defined in 7 CFR

900.2(j). This rule is issued under Marketing Agreement and Order No. 930, as amended (7 CFR part 930), regulating the handling of tart cherries grown in the states of Michigan, New York, Pennsylvania, Oregon, Utah, Washington and Wisconsin. Part 930 (referred to as the “Order”) is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), hereinafter referred to as the “Act.” The Board locally administers the Order and is comprised of producers and handlers of tart cherries operating within the production area, and a public member.

The Department of Agriculture (USDA) is issuing this rule in conformance with Executive Orders 13563 and 13175. This action falls within a category of regulatory actions that the Office of Management and Budget (OMB) exempted from Executive Order 12866 review. Additionally, because this rule does not meet the definition of a significant regulatory action, it does not trigger the requirements contained in the Executive Order 13771. See OMB’s Memorandum titled “Interim Guidance Implementing Section 2 of the Executive Order of January 30, 2017, titled ‘Reducing Regulation and Controlling Regulatory Costs’” (February 2, 2017).

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule is not intended to have retroactive effect.

The Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 608c(15)(A) of the Act, any handler subject to a marketing order may file with USDA a petition stating that the marketing order, any provision of the marketing order, or any obligation imposed in connection with the marketing order is not in accordance with law and request a modification of the marketing order or to be exempted therefrom. A handler is afforded the opportunity for a hearing on the petition. After the hearing, USDA would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has his or her principal place of business, has jurisdiction to review USDA’s ruling on the petition, provided an action is filed not later than 20 days after the date of the entry of the ruling.

This rule changes subcommittee size and adds term limits to subcommittee appointments under the Order. This action modifies the composition of the subcommittee which reviews exemption requests by increasing the subcommittee from three members and an alternate to a maximum of five members with no alternate. This rule also adds a five-year term limit to these appointments. This should provide more opportunities for participation and additional flexibility in staffing the subcommittee. The Board unanimously recommended this change at its March 19, 2020, meeting.

Section 930.31 of the Order authorizes the Board to have committees and subcommittees as may be necessary. Section 930.59 authorizes handler diversion of tart cherries from the reserve for specific uses including, but not limited to, new product and new market development. Section 930.62 authorizes the Board, with approval of the Secretary, to exempt cherries from the assessment, volume regulation, and reserve provisions of the Order for specified uses. Both sections authorize the Board, with the approval of the Secretary, to establish requirements necessary and incidental to the administration of the Order.

Section 930.159 of the Order’s administrative requirements specifies methods of handler diversion, including using cherries or cherry products for exempt purposes prescribed under § 930.162. Section 930.162, in part, establishes a Board appointed subcommittee, as authorized under § 930.31 stated above, to assist the Board staff in reviewing the applications for exemptions. The changes will impact this subcommittee.

In seasons with volume regulation, handlers can sell cherries for exempt uses, including new products and new markets, and receive diversion credit rather than keeping that tonnage in reserve. The Board established the review subcommittee to review and grant exemption requests that have the potential to expand new markets. The subcommittee works with Board staff to carry out these tasks. Prior to this action, this subcommittee consisted of three members and one alternate, each having no handler affiliation but knowledge of the tart cherry industry. Section 930.162 further specifies that one of the members or the alternate should be the Board’s public member or

the Board's public member alternate, if either are available to serve. This rule increases the size of the subcommittee and includes term limits for all subcommittee appointments. The current requirement regarding the service of the Board's public member or their alternate continues to remain in effect.

The Board formed a New Product New Market Committee (Committee) to examine the current regulations regarding the subcommittee responsible for reviewing applications for exemption or the renewal of exemption. The formation and tasking of this Committee was largely the result of growing Board member perceptions that the exemption process was not fully understood or utilized by industry. The Committee reviewed the process for selecting subcommittee members, assessed subcommittee operations, and identified improvement opportunities.

During Board meetings in January and March 2020, the Committee outlined some of the challenges associated with the subcommittee, including subcommittee participation. The Committee stated the requirements, which stipulate the subcommittee shall consist of three members and one alternate, were limiting. The Committee did not recommend any changes to existing qualification requirements to serve on the subcommittee. Any subcommittee meeting and quorum requirements would be addressed in the Board's bylaws.

The Committee recommended expanding the size of the subcommittee to five members without mandating a set number of members required to conduct business. The Committee noted this adjustment would provide some flexibility in staffing the subcommittee while allowing the subcommittee to fulfill its responsibility to review and grant exemptions.

The Committee also recommended the inclusion of five-year term limits for all subcommittee appointments as this would help balance preserving subcommittee institutional knowledge with the need to include new participants and perspectives in the exemption review process. One Committee member also noted a fixed term may encourage more qualified people to pursue subcommittee participation because they would know their commitment to the Board would not be open-ended. The Committee also believed establishing a regular schedule of appointments through term limits should lead to increased awareness of when participation opportunities would be coming available.

In discussing the Committee's suggested changes, the Board was supportive of the recommendations to increase the number of seats on the subcommittee and to establish term limits for subcommittee participants. In reviewing the increase in the size of the subcommittee, the Board did not recommend a specific quorum requirement for the subcommittee to meet. However, the Board believes the additional subcommittee members would provide more candidates to draw from when scheduling subcommittee meetings and would help ensure some members were in attendance for each scheduled subcommittee meeting. The Board also agreed increasing the number of seats on the subcommittee would provide the opportunity for more participation. The Board concluded no changes should be made to the existing requirement that the public member or alternate public member, when available, serve on the subcommittee, but did decide removing the requirement for an alternate subcommittee member would simplify the structure of the subcommittee.

The Board was also supportive of establishing term limits for subcommittee members. Members agreed having term limits would increase opportunities for others to serve on the subcommittee, and qualified candidates may be more willing to participate if there is a fixed term.

Accordingly, the Board unanimously voted to increase the size of the subcommittee to a maximum of five total members with a five-year term limit for all appointments to the subcommittee. The Board believes the changes will not only improve operational flexibility and administration of the subcommittee but encourage greater industry and small business participation on the subcommittee and in new product and new market projects.

Final Regulatory Flexibility Analysis

Pursuant to requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601–612), the Agricultural Marketing Service (AMS) has considered the economic impact of this rule on small entities. Accordingly, AMS has prepared this final regulatory flexibility analysis.

The purpose of the RFA is to fit regulatory actions to the scale of businesses subject to such actions in order that small businesses will not be unduly or disproportionately burdened. Marketing orders issued pursuant to the Act are unique in that they are brought about through group action of

essentially small entities acting on their own behalf.

There are approximately 400 producers of tart cherries in the production area and 40 handlers subject to regulation under the Order. Small agricultural producers are defined by the Small Business Administration (SBA) as those having annual receipts less than \$1,000,000, and small agricultural service firms are defined as those whose annual receipts are less than \$30,000,000 (13 CFR 121.201).

According to the National Agricultural Statistics Service and Board data, the average annual price for tart cherries during the 2018–19 season was approximately \$0.196 per pound. With total utilization at 288.8 million pounds for the 2018–2019 season, the total 2018–2019 value of the crop utilized for processing is estimated at \$56.6 million. Dividing the crop value by the estimated number of producers (400) yields an estimated average receipt per producer of \$141,500. This is well below the SBA threshold for small producers. A free on board (FOB) price of \$0.80 per pound for frozen tart cherries was reported by the Food Institute during the 2018–2019 season. Based on utilization, this price represents a good estimate of the price for processed cherries. Multiplying the FOB price by total utilization of 288.8 million pounds results in an estimated handler-level tart cherry value of \$231 million. Dividing this figure by the number of handlers (40) yields estimated annual handler receipts of \$5.8 million, which is below the SBA threshold for small agricultural service firms. Assuming a normal distribution, the majority of producers and handlers of tart cherries may be classified as small entities.

This rule will increase the size of the subcommittee and add term limits to subcommittee appointments under § 930.162. This action modifies the composition of the subcommittee which reviews exemption requests from three members and an alternate to a maximum of five members with no alternate. This rule also adds a five-year term limit to these appointments. This will provide more opportunities for participation and additional flexibility in staffing the subcommittee. The authority for these actions is provided in §§ 930.31, 930.59 and 930.62. These changes were unanimously recommended by the Board at its meeting on March 19, 2020.

It is not anticipated that this action will impose any additional costs on growers or handlers. This change is administrative in nature, does not increase reporting requirements, and

will provide the Board with improved flexibility in staffing the subcommittee.

This action will have a beneficial impact as it will encourage greater industry and small business participation in applying for diversion credit for new product and new market projects under § 930.162, and expanding the market for tart cherries. The subcommittee performs the function of reviewing and granting exemption requests that have the potential to expand these markets. Increasing the maximum size of the subcommittee without mandating that all seats be filled allows for more flexibility in conducting subcommittee business. The Board also believes the additional members will provide more candidates to draw from when scheduling subcommittee meetings and help ensure some members are in attendance for each scheduled meeting. Adding a five-year term limit to subcommittee membership helps maintain subcommittee institutional knowledge while ensuring the inclusion of the perspective and insight from new participants.

This rule is expected to benefit the industry. The effects of this rule are not expected to be disproportionately greater or lesser for small handlers or producers than for larger entities.

The Board considered one alternative to this change. The Board considered making no changes either to the structure of the subcommittee or the lack of term limits for serving thereon. However, when discussing the alternative, Board members assessed that increasing the subcommittee size and the inclusion of term limits would not only increase the likelihood of subcommittee participation, but also promote increased industry confidence and trust in the subcommittee's composition and function. Therefore, the alternative was rejected.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Order's information collection requirements have been previously approved by OMB and assigned OMB No. 0581-0177, Tart Cherries Grown in the States of Michigan, New York, Pennsylvania, Oregon, Utah, Washington, and Wisconsin. No changes in those requirements are necessary as a result of this action. Should any changes become necessary, they would be submitted to OMB for approval.

This final rule will not impose any additional reporting or recordkeeping requirements on either small or large tart cherry handlers. As with all Federal marketing order programs, reports and forms are periodically reviewed to

reduce information requirements and duplication by industry and public sector agencies. USDA has not identified any relevant Federal rules that duplicate, overlap or conflict with this final rule. Further, the public comment received concerning the proposal did not address the initial regulatory flexibility analysis.

AMS is committed to complying with the E-Government Act, to promote the use of the internet and other information technologies to provide increased opportunities for citizen access to Government information and services, and for other purposes.

The Board's meeting was widely publicized throughout the tart cherry industry. All interested persons were invited to attend the meeting and participate in Board deliberations on all issues. Like all Board meetings, the March 19, 2020, meeting was a public meeting, and all entities, both large and small, were able to express views on this issue.

A proposed rule concerning this action was published in the **Federal Register** on July 24, 2020 (85 FR 44792). Copies of the proposed rule were also mailed or sent via email to all tart cherry handlers. The proposal was made available through the internet by USDA and the Office of the Federal Register. A 30-day comment period ending August 24, 2020, was provided for interested persons to respond to the proposal.

One comment was received in response to the proposal. However, this comment did not address the merits of the proposal. Accordingly, no changes will be made to the rule as proposed, based on the comments received.

A small business guide on complying with fruit, vegetable, and specialty crop marketing agreements and orders may be viewed at: <https://www.ams.usda.gov/rules-regulations/moa/small-businesses>. Any questions about the compliance guide should be sent to Richard Lower at the previously mentioned address in the **FOR FURTHER INFORMATION CONTACT** section.

After consideration of all relevant material presented, including the information and recommendation submitted by the Board and other available information, it is hereby found that this rule will tend to effectuate the declared policy of the Act.

List of Subjects in 7 CFR Part 930

Marketing agreements, Reporting and recordkeeping requirements, Tart Cherries.

For the reasons set forth in the preamble, 7 CFR part 930 is amended as follows:

PART 930—TART CHERRIES GROWN IN THE STATES OF MICHIGAN, NEW YORK, PENNSYLVANIA, OREGON, UTAH, WASHINGTON, AND WISCONSIN

■ 1. The authority citation for 7 CFR part 930 continues to read as follows:

Authority: 7 U.S.C. 601–674.

■ 2. Amend § 930.162 by revising paragraph (d) to read as follows:

§ 930.162 Exemptions.

* * * * *

(d) *Review of applications.* A Board appointed subcommittee shall review applications for exemption or renewal of exemption and either approve or deny the exemption. The subcommittee shall consist of up to five total members, each having no handler affiliation but knowledge of the tart cherry industry, one of whom shall be the public member or the alternate public member if available to serve. Each subcommittee appointment shall be limited to a five-year term. Any denial of an application for exemption or renewal of an existing exemption shall be served on the applicant by certified mail and shall state the reasons for the denial. Within 10 days after the receipt of a denial, the applicant may file an appeal, in writing, with the Deputy Administrator, Specialty Crops Program, supported by any arguments and evidence the applicant may wish to offer as to why the application for exemption or renewal of exemption should have been approved. The Deputy Administrator, upon consideration of such appeal, will take such action as deemed appropriate with respect to the application for exemption or renewal of exemption.

BILLING CODE 3410-02-P

DEPARTMENT OF AGRICULTURE

Commodity Credit Corporation

7 CFR Part 1400

[Docket ID CCC-2019-0007]

RIN 0560-AI49

Payment Limitation and Payment Eligibility

AGENCY: Commodity Credit Corporation and Farm Service Agency, USDA.

ACTION: Correcting amendments.

SUMMARY: The Farm Service Agency (FSA) on behalf of the Commodity Credit Corporation (CCC) amended its regulations concerning payment limitation and eligibility through a final rule published in the **Federal Register** on August 21, 2020. This correction restores the previous definitions of “active personal management,” “significant contribution,” “significant contribution of active personal management,” and “significant contribution of the combination of active personal labor and active personal management.”

DATES: *Effective:* November 19, 2020.

FOR FURTHER INFORMATION CONTACT: Paul Hanson; telephone: (202) 720-4189; email: Paul.Hanson@usda.gov. Persons with disabilities who require alternative means for communication should contact the USDA Target Center at (202) 720-2600 (voice).

SUPPLEMENTARY INFORMATION: This document corrects certain sections of the regulations in 7 CFR part 1400, which were implemented in the final rule that was published in the **Federal Register** on August 24, 2020 (85 FR 52033-52041).

The final rule amended the definitions in 7 CFR 1400.3 for “active personal management” and “significant contribution,” which apply throughout part 1400. It also removed and reserved § 1400.601, which contained definitions of “active personal management,” “significant contribution of active personal management,” and “significant contribution of the combination of active personal labor and active personal management” that applied only to Subpart G, which provides additional payment eligibility provisions for joint operations and legal entities comprised of non-family members or partners, stockholders, or persons with an ownership interest in the farming operation. The changes were intended to provide consistency in the definitions of the terms used throughout part 1400.

After publication of the rule, stakeholders notified FSA of concerns regarding potential non-intended, adverse effects to farming operations comprised solely of family members. In streamlining the definitions for consistency, these revised definitions were inadvertently made applicable to farming operations solely owned by family members. This was not the intent of this rule change, and as revised, the definitions were more restrictive than they needed to be in order to provide intended consistency in the rule. Those more restrictive definitions were not intended to apply to farm operations

comprised or owned solely of family members. Therefore, this document restores § 400.601 and the previous the definitions of “active personal management” and “significant contribution” in § 1400.3 that were applicable prior to publication of the final rule on August 24, 2020. The more restrictive definitions described in § 1400.601 apply only to farming operations comprised of non-family members that are subject to a limit in the number of farm managers seeking to qualify for actively engaged in farming based on a contribution of active personal management alone.

List of Subjects in 7 CFR Part 1400

Agriculture, Grant programs-agriculture, Loan programs-agriculture, Natural resources, Price support programs.

Accordingly, 7 CFR part 1400 is corrected by making the following correcting amendments:

PART 1400—PAYMENT LIMITATION AND PAYMENT ELIGIBILITY

■ 1. The authority citation for part 1400 continues to read as follows:

Authority: 7 U.S.C. 1308, 1308-1, 1308-2, 1308-3, 1308-3a, 1308-4, and 1308-5; and Title I, Pub. L. 115-123.

Subpart A—General Provisions

■ 2. Amend § 1400.3 in paragraph (b) as follows:

- a. Remove the first occurrence of the definition of “Active personal management”; and
- b. Revise the definition of “Significant contribution”.

The revision reads as follows.

§ 1400.3 Definitions.

* * * * *

(b) * * *

Significant contribution means the provision of the following to a farming operation:

(i)(A) For land, capital, or equipment contributed independently by a person or legal entity, a contribution that has a value at least equal to 50 percent of the person’s or legal entity’s commensurate share of the total:

- (1) Value of the capital necessary to conduct the farming operation;
- (2) Rental value of the land necessary to conduct the farming operation; or
- (3) Rental value of the equipment necessary to conduct the farming operation; or

(B) If the contribution by a person or legal entity consists of any combination of land, capital, and equipment, such combined contribution must have a

value at least equal to 30 percent of the person’s or legal entity’s commensurate share of the total value of the farming operation;

(ii) For active personal labor, an amount contributed by a person to the farming operation that is described by the smaller of the following:

(A) 1,000 hours per calendar year; or

(B) 50 percent of the total hours that would be necessary to conduct a farming operation that is comparable in size to such person’s or legal entity’s commensurate share in the farming operation;

(iii) With respect to active personal management, activities that are critical to the profitability of the farming operation, taking into consideration the person’s or legal entity’s commensurate share in the farming operation; and

(iv) With respect to a combination of active personal labor and active personal management, when neither contribution by itself meets the requirement of paragraphs (ii) and (iii) of this definition, a combination of active personal labor and active personal management that, when made together, results in a critical impact on the profitability of the farming operation in an amount at least equal to either the significant contribution of active personal labor or active personal management as defined in paragraphs (ii) and (iii) of this definition.

* * * * *

Subpart G—Additional Payment Eligibility Provisions for Joint Operations and Legal Entities Comprised of Non-Family Members or Partners, Stockholders, or Persons With an Ownership Interest in the Farming Operation

■ 3. Add § 1400.601 to read as follows.

§ 1400.601 Definitions.

(a) The terms defined in § 1400.3 are applicable to this subpart and all documents issued in accordance with this part, except as otherwise provided in this section.

(b) The following definitions are also applicable to this subpart:

Active personal management means personally providing and participating in management activities considered critical to the profitability of the farming operation and performed under one or more of the following categories:

- (i) Capital, which includes:
 - (A) Arranging financing and managing capital;
 - (B) Acquiring equipment;
 - (C) Acquiring land and negotiating leases;
 - (D) Managing insurance; and

(E) Managing participation in USDA programs;
 (ii) Labor, which includes hiring and managing of hired labor; and
 (iii) Agronomics and marketing, which includes:
 (A) Selecting crops and making planting decisions;
 (B) Acquiring and purchasing crop inputs;
 (C) Managing crops (that is, whatever managerial decisions are needed with respect to keeping the growing crops living and healthy—soil fertility and fertilization, weed control, insect control, irrigation if applicable) and making harvest decisions; and

(D) Pricing and marketing of crop production.

Significant contribution of active personal management means active personal management activities performed by a person, with a direct or indirect ownership interest in the farming operation, on a regular, continuous, and substantial basis to the farming operation, and meets at least one of the following to be considered significant:

(i) Performs at least 25 percent of the total management hours required for the farming operation on an annual basis; or

(ii) Performs at least 500 hours of management annually for the farming operation.

Significant contribution of the combination of active personal labor and active personal management means a contribution of a combination of active personal labor and active personal management that:

(i) Is critical to the profitability of the farming operation;

(ii) Is performed on a regular, continuous, and substantial basis; and

(iii) Meets the following required number of hours:

TABLE 1 TO PARAGRAPH (iii) OF THE DEFINITION OF SIGNIFICANT CONTRIBUTION OF THE COMBINATION OF ACTIVE PERSONAL LABOR AND ACTIVE PERSONAL MANAGEMENT

Combination of active personal labor and active personal management minimum requirement for a significant contribution

BILLING CODE 3410-05-P

FEDERAL RESERVE SYSTEM

12 CFR Part 261a

[Docket No. R-1704]

RIN 7100-AF78

Privacy Act of 1974; Privacy Act Regulation

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is issuing a final rule revising its regulation implementing the Privacy Act of 1974 (Privacy Act Rule) to add BGFRS-43, “FRB—Security Sharing Platform,” to the list of systems of records identified as “exempt” systems of records.

DATES: Effective November 19, 2020.

FOR FURTHER INFORMATION CONTACT: David B. Husband, Counsel, (202) 530-6270, or david.b.husband@frb.gov; Legal Division, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

SUPPLEMENTARY INFORMATION: On April 1, 2020, the Board published a notice of proposed rulemaking to amend the Board’s Privacy Act Rule, with a 30-day

public comment period ending on May 1, 2020 and concurrently, in a separate notice, established BGFRS-43 as a new system of records.¹ The rulemaking proposed to add BGFRS-43 to the Board’s list of exempt systems of records pursuant to 5 U.S.C. 552a(k)(2), which exempts the listed system of record from certain provisions of the Privacy Act to the extent the system contains investigatory material compiled for law enforcement purposes. The Board did not receive any comments on the proposed amendment to the Privacy Act Rule and therefore,

¹ See, 85 FR 18156 (April 1, 2020) (Notice of Proposed Rulemaking) and 85 FR 18240 (April 1, 2020) (System of Records Notice). BGFRS-43, “FRB—Security Sharing Platform,” became effective on May 1, 2020.

the Board is adopting the proposed rule as final, without modification.

Accordingly, the Board is amending 12 CFR 261a.12(b) to redesignate paragraph (b)(11) referencing BGFRS/OIG–1 Investigative Records as paragraph (b)(12) and adding “BGFRS–43, Security Sharing Platform” as new paragraph (b)(11).

Regulatory Flexibility Act

In accordance with 5 U.S.C. 605, the Board certifies that this rule will not have a significant economic impact on a substantial number of small entities because it applies only to internal personnel matters of the agency.

Administrative Procedure Act

This rule is exempt from the rulemaking provisions of the Administrative Procedure Act, 5 U.S.C. 553, and the Congressional Review Act, pursuant to 5 U.S.C. 804(3)(B) and (C), because it is a rule relating to agency management or personnel and a rule of agency procedure that does not substantially affect the rights or obligations of non-agency parties.

List of Subjects in 12 CFR Part 261a

Privacy.

Authority and Issuance

For the reasons stated in the preamble, the Board amends 12 CFR part 261a as follows:

PART 12 CFR 261a—RULES REGARDING ACCESS TO PERSONAL INFORMATION UNDER THE PRIVACY ACT 1974

- 1. The authority citation of part 261a continues to read as follows:

Authority: 5 U.S.C. 552a.

- 2. Amend § 261a.12(b) by redesignating paragraph (b)(11) as (b)(12) and adding new paragraph (b)(11) to read as follows:

§ 261a.12 Exempt records.

* * * * *

(b) * * *

(11) BGFRS–43 Security Sharing Platform

* * * * *

By order of the Board of Governors of Federal Reserve System.

Ann Misback,

Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA–2020–0513; Product Identifier 2019–SW–037–AD; Amendment 39–21321; AD 2020–23–05]

RIN 2120–AA64

Airworthiness Directives; Airbus Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is superseding Airworthiness Directive (AD) 2018–08–01 for Airbus Helicopters Model EC225LP helicopters. AD 2018–08–01 required inspecting the control rod attachment yokes (yoke) of certain main rotor rotating swashplates (swashplate). This new AD retains the inspection requirements of AD 2018–08–01, expands the applicability, establishes a life limit, and adds a one-time inspection of stripped yokes. This AD was prompted by the identification of additional swashplate serial numbers affected by the unsafe condition and the establishment of a life limit for the swashplates. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 24, 2020.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 24, 2020.

ADDRESSES: For service information identified in this final rule, contact Airbus Helicopters, 2701 N Forum Drive, Grand Prairie, TX 75052; telephone 972–641–0000 or 800–232–0323; fax 972–641–3775; or at <https://www.airbus.com/helicopters/services/technical-support.html>. You may view the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. It is also available on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA–2020–0513.

Examining the AD Docket

You may examine the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA–2020–0513; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the

European Union Aviation Safety Agency (EASA) AD, any service information that is incorporated by reference, any comments received, and other information. The address for Docket Operations is Document Operations, U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT:

Matthew Fuller, AD Program Manager, Operational Safety Branch, Airworthiness Products Section, General Aviation & Rotorcraft Unit, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817–222–5110; email Matthew.Fuller@faa.gov.

SUPPLEMENTARY INFORMATION:

Discussion

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 to supersede AD 2018–08–01, Amendment 39–19254 (83 FR 17617, April 23, 2018) (AD 2018–08–01) and add a new AD. AD 2018–08–01 applied to Airbus Helicopters Model EC225LP helicopters with certain serial-numbered swashplates part number (P/N) 332A31–3074–00 or P/N 332A31–3074–01 installed. The NPRM published in the **Federal Register** on June 3, 2020 (85 FR 34118). The NPRM proposed to require determining the date of manufacture of the swashplate and establishing a life limit of 12 years since the date of manufacture. The NPRM proposed to retain the repetitive visual inspections of AD 2018–08–01 to inspect each yoke for a crack at intervals not to exceed 15 hours time-in-service (TIS) for swashplates that have accumulated less than 7 years since the date of manufacture. For a swashplate that has accumulated 7 or more years, but less than 12 years since the date of manufacture, the NPRM proposed to require removing the grease and stripping certain areas of the yokes and inspecting these areas for corrosion, pitting, loss of material, and a crack. If there are no cracks, the NPRM proposed to require performing a dye penetrant inspection of the yoke for a crack. Depending on the results of this inspection, the NPRM proposed to require either repairing the surface of the swashplate or removing it from service.

The NPRM was prompted by EASA AD No. 2019–0074, dated March 28, 2019 (EASA AD 2019–0074) issued by EASA, which is the Technical Agent for the Member States of the European Union, to supersede EASA AD No. 2017–0191R2, dated December 15, 2017

(EASA AD 2017–0191R2). EASA AD 2019–0074 followed Airbus Helicopters revising Emergency Alert Service Bulletin (EASB) No. 05A051, Revision 1, dated November 16, 2017, to Revision 2, dated February 26, 2019, to establish a life limit (also called a service life limit) of 12 years for the swashplate and add a reporting requirement if there is a crack or corrosion in a yoke. EASA advises that additional analysis determined that it is necessary to introduce the new life limit for the affected swashplates. Accordingly, EASA AD 2019–0074 retains the requirements of EASA AD 2017–0191R2 and adds a life limit and a reporting requirement.

Additionally, when the FAA issued AD 2018–08–01 to address the unsafe condition of a crack in a swashplate yoke, the FAA did not require stripping certain yokes and performing a one-time inspection within 100 hours TIS for corrosion and a crack as specified in EASA AD 2017–0191R2, as there was sufficient time to allow for notice and comment prior to this long-term AD requirement going into effect. The FAA has determined that this inspection is needed to address this unsafe condition. Accordingly, the NPRM also proposed to require, within 100 hours TIS and for certain yokes, removing the grease and stripping certain areas of the yokes and inspecting these areas for corrosion, pitting, loss of material, and a crack.

Comments

The FAA gave the public the opportunity to participate in developing this AD. The FAA received no comments on the NPRM or on the determination of the cost to the public.

FAA's Determination

These helicopters have been approved by EASA and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the European Union, EASA has notified the FAA about the unsafe condition described in its AD. The FAA is issuing this AD after evaluating all of the known relevant information and determining that an unsafe condition is likely to exist or develop on other helicopters of the same type design and that air safety and the public interest require adopting the AD requirements as proposed.

Differences Between This AD and the EASA AD

The EASA AD requires performing a non-destructive inspection only if there is doubt whether there is a crack. Instead, this AD requires a visual inspection and if there are no cracks, requires a non-destructive inspection.

The EASA AD specifies instructions for reporting inspection reports; this AD does not.

Related Service Information Under 1 CFR Part 51

The FAA reviewed one document that co-publishes two Airbus Helicopters EASB identification numbers: EASB No. 05A051 for Model EC225LP helicopters and EASB No. 05A046 for non-FAA type-certificated Model EC725AP helicopters, each Revision 2 and dated February 26, 2019 (EASB 05A051 and EASB 05A046). EASB 05A051 is incorporated by reference in this AD. EASB 05A046 is not incorporated by reference in this AD.

This service information specifies inspections for swashplate P/N 332A31–3074–00 and P/N 332A31–3074–01. This service information specifies procedures for a repetitive inspection of the yokes for a crack and a one-time inspection of the stripped yokes for corrosion and a crack. If in doubt about whether there is a crack, this service information specifies performing a non-destructive inspection. This service information also specifies touching up the swashplate with varnish if there is corrosion, removing any damage within allowable limits, and refinishing the yokes. If there is a crack in a yoke, this service information specifies replacing the swashplate. This service information also specifies a life limit of 12 years since the date of manufacture for the swashplates and reporting requirements if a crack or corrosion is discovered.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the ADDRESSES section.

Other Related Service Information

The FAA reviewed one document that co-publishes two Airbus Helicopters EASB identification numbers: EASB No. 05A051 for Model EC225LP helicopters and EASB No. 05A046 for non-FAA type-certificated Model EC725AP helicopters, each Revision 1 and dated November 16, 2017. Revision 1 of this service information specifies the same inspections as Revision 2 of this service information. However, Revision 2 of this service information clarifies some of the inspection instructions and adds a life limit and a reporting requirement.

Costs of Compliance

The FAA estimates that this AD affects 26 helicopters of U.S. registry. The FAA estimates that operators may incur the following costs in order to comply with this AD. Labor rates are estimated at \$85 per work-hour.

Determining the date of manufacture of the swashplate takes about 0.5 work-hour for an estimated cost of \$43 per helicopter and \$1,118 for the U.S. fleet.

Inspecting the yokes takes about 0.25 work-hour for an estimated cost of \$21 per helicopter and \$546 for the U.S. fleet per inspection cycle.

Removing grease, stripping the yokes, and inspecting the stripped yokes takes about 8 work-hours, for a total estimated cost of \$680 per helicopter.

Dye-penetrant inspecting a yoke for a crack takes about 6 work-hours and parts cost about \$50, for an estimated cost of \$560 per yoke.

Removing any corrosion or repairing damage within the allowable limit takes about 3 work-hours, for an estimated cost of \$255 per yoke.

Replacing the swashplate takes about 6 work-hours, and parts cost about \$85,661 for an estimated cost of \$86,171 per instance.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, Section 106, describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701, General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities

under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by removing Airworthiness Directive (AD) 2018–08–01, Amendment 39–19254 (83 FR 17617, April 23, 2018), and adding the following new AD:2020–23–05

Airbus Helicopters: Amendment 39–21321; Docket No. FAA–2020–0513; Product Identifier 2019–SW–037–AD.

(a) Applicability

This airworthiness directive (AD) applies to Airbus Helicopters Model EC225LP helicopters, certificated in any category, with a main rotor (M/R) rotating swashplate (swashplate) part number (P/N) 332A31–3074–00 or P/N 332A31–3074–01 installed.

(b) Unsafe Condition

This AD defines the unsafe condition as a crack in a swashplate control rod attachment yoke (yoke). This condition could result in failure of the yoke, loss of M/R control, and subsequent loss of control of the helicopter.

(c) Affected ADs

This AD replaces AD 2018–08–01, Amendment 39–19254 (83 FR 17617, April 23, 2018).

(d) Effective Date

This AD is effective December 24, 2020.

(e) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(f) Required Actions

Before further flight, review Appendix 4.A. of Airbus Helicopters Emergency Alert Service Bulletin No. 05A051, Revision 2, dated February 26, 2019 (EASB 05A051) to determine the date of manufacture of the swashplate.

(1) If the swashplate has accumulated 12 or more years since the date of manufacture, remove from service the swashplate.

(2) If the swashplate has accumulated less than 12 years since the date of manufacture, create a component history card or

equivalent record indicating a life limit of 12 years since the date of manufacture. Thereafter, continue to record the life limit of the swashplate on its component history card or equivalent record and remove from service any swashplate before accumulating 12 years since the date of manufacture.

(3) For each swashplate that has accumulated less than 7 years since the date of manufacture, within 15 hours time-in-service (TIS) and thereafter at intervals not to exceed 15 hours TIS, until the swashplate accumulates 7 years since the date of manufacture, visually inspect each yoke for a crack, paying particular attention to the areas shown in Details B, C, and D of Figure 1 of EASB 05A051.

(i) If there are no cracks, perform a dye penetrant inspection of the yoke for a crack.

(ii) If there is a crack on a yoke, before further flight, remove from service the swashplate.

(4) For each swashplate that has accumulated 7 or more years, but less than 12 years, since the date of manufacture, within 100 hours TIS:

(i) Remove the grease from areas (E), (F), (G), (H), (J), and (K) of each yoke as shown in Details B, C, and D of Figure 1 of EASB 05A051. Using a plastic spatula, strip areas (E), (F), (G), (H), (J), and (K) of each yoke as shown in Details B, C, and D of Figure 1 of EASB 05A051. Do not use a metal tool to strip any area of a yoke.

(ii) Inspect areas (E), (F), (G), (H), (J) and (K) of each yoke as shown in Details B, C, and D of Figure 1 of EASB 05A051 for corrosion, pitting, and loss of material.

(A) If there is any corrosion less than 0.0078 in. (0.2 mm), before further flight, remove the corrosion and apply varnish (Vernelec 43022 or equivalent) to the surface of areas (E), (F), (G), (H), (J) and (K).

(B) If there is any pitting or loss of material of less than 0.0078 in. (0.2 mm), before further flight, remove the damage by sanding with sandpaper 200/400 or 330.

(C) If there is any corrosion, pitting, or loss of material of 0.0078 in. (0.2 mm) or greater, before further flight, remove from service the swashplate.

(iii) Visually inspect each yoke for a crack, paying particular attention to the areas shown in Details B, C, and D of Figure 1 of EASB 05A051.

(A) If there are no cracks, perform a dye penetrant inspection of the yoke for a crack.

(B) If there is a crack on a yoke, before further flight, remove from service the swashplate.

(g) Credit for Previous Actions

If you performed the actions in paragraph (f)(4) of this AD before the effective date of this AD using Airbus Helicopters Emergency Alert Service Bulletin No. 05A051, Revision 1, dated November 16, 2017, you met the requirements of paragraph (f)(4) of this AD.

(h) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Rotorcraft Standards Branch, FAA, may approve AMOCs for this AD. Send your proposal to: Matthew Fuller, AD Program Manager, Operational Safety Branch, Airworthiness Products Section,

General Aviation & Rotorcraft Unit, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817–222–5110; email 9-ASW-FTW-AMOC-Requests@faa.gov.

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, the FAA suggests that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office before operating any aircraft complying with this AD through an AMOC.

(i) Additional Information

(1) Airbus Helicopters Emergency Alert Service Bulletin No. 05A051, Revision 1, dated November 16, 2017, which is not incorporated by reference, contains additional information about the subject of this AD. For service information identified in this AD, contact Airbus Helicopters, 2701 N Forum Drive, Grand Prairie, TX 75052; telephone 972–641–0000 or 800–232–0323; fax 972–641–3775; or at <https://www.airbus.com/helicopters/services/technical-support.html>. You may view a copy of the service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177.

(2) The subject of this AD is addressed in European Union Aviation Safety Agency (EASA) AD No. 2019–0074, dated March 28, 2019. You may view the EASA AD on the internet at <https://www.regulations.gov> in Docket No. FAA–2020–0513.

(j) Subject

Joint Aircraft Service Component (JASC) Code: 6230, Main Rotor Mast/Swashplate.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Airbus Helicopters Emergency Alert Service Bulletin (EASB) No. 05A051, Revision 2, dated February 26, 2019.

(ii) [Reserved]

Note 1 to paragraph (k)(2): Airbus Helicopters EASB No. 05A051, Revision 2, dated February 26, 2019, is co-published as one document along with Airbus Helicopters EASB No. 05A046, Revision 2, dated February 26, 2019, which is not incorporated by reference in this AD.

(3) For service information identified in this AD, contact Airbus Helicopters, 2701 N Forum Drive, Grand Prairie, TX 75052; telephone 972–641–0000 or 800–232–0323; fax 972–641–3775; or at <https://www.airbus.com/helicopters/services/technical-support.html>.

(4) You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call 817–222–5110.

(5) You may view this service information that is incorporated by reference at the

National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email: fedreg.legal@nara.gov, or go to: <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued on October 29, 2020.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2020-0978; Project Identifier MCAI-2020-00459-R; Amendment 39-21318; AD 2020-23-02]

RIN 2120-AA64

Airworthiness Directives; Airbus Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Airbus Helicopters Model EC225LP helicopters. This AD was prompted by a report of a manufacturing and control issue regarding the ceramic balls in the bearing installed in the swashplate assembly of the main rotor mast assembly. This AD requires repetitive inspections of the bearing in the swashplate assembly of the main rotor mast assembly for discrepancies (ceramic balls that have a hard point or sensitive axial play or both) and, depending on the findings, replacement of an affected main rotor mast assembly with a serviceable main rotor mast assembly, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products. **DATES:** This AD becomes effective December 4, 2020.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 4, 2020.

The FAA must receive comments on this AD by January 4, 2021.

ADDRESSES: You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to <https://www.regulations.gov>. Follow the instructions for submitting comments.

- *Fax:* 202-493-2251.

- *Mail:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

- *Hand Delivery:* U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For material incorporated by reference (IBR) in this AD, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 1000; email ADs@easa.europa.eu; internet www.easa.europa.eu. You may find this IBR material on the EASA website at <https://ad.easa.europa.eu>. You may view this IBR material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N-321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call 817-222-5110. It is also available in the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2020-0978.

Examining the AD Docket

You may examine the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2020-0978; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, any comments received, and other information. The street address for Docket Operations is listed above. Comments will be available in the AD docket shortly after receipt.

FOR FURTHER INFORMATION CONTACT:

Kathleen Arrigotti, Aviation Safety Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206-231-3218; email: kathleen.arrigotti@faa.gov.

SUPPLEMENTARY INFORMATION:

Discussion

The EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2020-0079, dated April 1, 2020 (EASA AD 2020-0079) (also referred to as the Mandatory Continuing Airworthiness Information, or “the MCAI”), to correct an unsafe condition for all Airbus Helicopters Model EC225LP helicopters. This AD was prompted by a report of a manufacturing and control issue

regarding the ceramic balls of the bearing installed in the swashplate assembly of the main rotor mast assembly.

The FAA is issuing this AD to address defective ceramic balls in the bearing installed in the swashplate assembly of the main rotor mast assembly, which could lead to premature spalling of the ball itself and of the bearing, loss of function of the bearing, and overload of the main rotor mast scissor, resulting in reduced control of the helicopter. See the MCAI for additional background information.

Related Service Information Under 1 CFR Part 51

EASA AD 2020-0079 describes procedures for repetitive inspections of the main rotor mast swashplate assembly for discrepancies (ceramic balls that have a hard point or sensitive axial play or both), and replacement of an affected main rotor mast assembly with a serviceable main rotor mast assembly. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

FAA's Determination

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the State of Design Authority, the FAA has been notified of the unsafe condition described in the MCAI referenced above. The FAA is issuing this AD because the FAA evaluated all pertinent information and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

Requirements of This AD

This AD requires accomplishing the actions specified in EASA AD 2020-0079 described previously, as incorporated by reference, except for any differences identified as exceptions in the regulatory text of this AD and except as discussed under “Difference Between this AD and the MCAI.”

Explanation of Required Compliance Information

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA initially worked with Airbus and EASA to develop a process to use certain EASA ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has since coordinated with other manufacturers

and civil aviation authorities (CAAs) to use this process. As a result, EASA AD 2020-0079 is incorporated by reference in this final rule. This AD, therefore, requires compliance with EASA AD 2020-0079 in its entirety, through that incorporation, except for any differences identified as exceptions in the regulatory text of this AD. Using common terms that are the same as the heading of a particular section in the EASA AD does not mean that operators need comply only with that section. For example, where the AD requirement refers to “all required actions and compliance times,” compliance with this AD requirement is not limited to the section titled “Required Action(s) and Compliance Time(s)” in the EASA AD. Service information specified in EASA AD 2020-0079 that is required for compliance with EASA AD 2020-0079 is available on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2020-0978.

Difference Between This AD and the MCAI

Although the service information referenced in EASA AD 2020-0079 specifies to return affected parts to the manufacturer, this AD does not include that requirement.

Interim Action

The FAA considers this AD interim action. If final action is later identified, the FAA might consider further rulemaking then.

FAA’s Justification and Determination of the Effective Date

Section 553(b)(3)(B) of the Administrative Procedure Act (5 U.S.C.) authorizes agencies to dispense with notice and comment procedures for rules when the agency, for “good cause” finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under this section, an agency, upon finding good cause, may issue a final rule without seeking comment prior to the rulemaking.

An unsafe condition exists that requires the immediate adoption of this AD without providing an opportunity for public comments prior to adoption. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because defective ceramic balls in the bearing installed in the swashplate assembly of the main rotor mast assembly could lead to premature spalling of the ball itself and of the bearing, loss of function of the bearing, and overload of the main rotor mast scissor, resulting in reduced control of the helicopter. In addition, the compliance time for the required action is shorter than the time necessary for the public to comment and for publication of the final rule. Therefore, the FAA finds good cause that notice and opportunity for prior public comment are impracticable. In addition, for the reasons stated above, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days.

Comments Invited

This AD is a final rule that involves requirements affecting flight safety and was not preceded by notice and an opportunity for public comment. However, the FAA invites you to send any written comments, data, or views about this AD. The most helpful comments reference a specific portion of the proposal, explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should submit only one copy of the comments. Send your comments to an address listed under the **ADDRESSES** section. Include “Docket No. FAA-2020-0978; Project Identifier MCAI-2020-00459-R” at the beginning of your comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, as well as a

report summarizing each substantive public contact with FAA personnel concerning this AD. The FAA will consider all comments received by the closing date for comments. The FAA may amend this AD because of those comments.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to Kathleen Arrigotti, Aviation Safety Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206-231-3218; email: kathleen.arrigotti@faa.gov. Any commentary that the FAA receives that is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Regulatory Flexibility Act (RFA)

The requirements of the RFA do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because the FAA has determined that it has good cause to adopt this rule without notice and comment, RFA analysis is not required.

Costs of Compliance

The FAA estimates that this AD affects 30 helicopters of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
4 work-hours × \$85 per hour = \$340, per inspection ..	\$0	\$340	\$10,200, per inspection.

The FAA estimates the following costs to do any necessary on-condition action that would be required based on

the results of any required action. The FAA has no way of determining the

number of helicopters that might need this on-condition action:

ESTIMATED COSTS OF ON-CONDITION ACTION *

Labor cost	Parts cost	Cost per product
4 work-hours × \$85 per hour = \$340	(*)	*\$340

* The FAA has not received any definitive data regarding the parts cost, therefore this table does not include estimated costs for parts.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866, and
- (2) Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2020–23–02 Airbus Helicopters:

Amendment 39–21318; Docket No. FAA–2020–0978; Project Identifier MCAI–2020–00459–R.

(a) Effective Date

This airworthiness directive (AD) becomes effective December 4, 2020.

(b) Affected ADs

None.

(c) Applicability

This AD applies to Airbus Helicopters Model EC225LP helicopters, certificated in any category, all manufacturer serial numbers.

(d) Subject

Joint Aircraft System Component (JASC) Code 6230, Main Rotor Mast/Swashplate.

(e) Reason

This AD was prompted by a report of a manufacturing and control issue regarding the ceramic balls in the bearing installed in the swashplate assembly of the main rotor mast assembly. The FAA is issuing this AD to address defective ceramic balls in the bearing installed in the swashplate assembly of the main rotor mast assembly, which could lead to premature spalling of the ball itself and of the bearing, loss of function of the bearing, and overload of the main rotor mast scissor, resulting in reduced control of the helicopter.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2020–0079, dated April 1, 2020 (EASA AD 2020–0079).

(h) Exceptions to EASA AD 2020–0079

(1) Where EASA AD 2020–0079 refers to its effective date, this AD requires using the effective date of this AD.

(2) The "Remarks" section of EASA AD 2020–0079 does not apply to this AD.

(3) Although the service information referenced in EASA AD 2020–0079 specifies to return affected parts to the manufacturer, this AD does not include that requirement.

(4) Where the service information referenced in EASA AD 2020–0079 specifies

"compliance with the works steps concerned with the check is described in a video" this AD requires a complete rotation of the swashplate in both directions using a rate of one revolution per minute.

Note 1 to paragraph (h)(4): Refer to the video specified in the service information referenced in EASA AD 2020–0079 for guidance.

(5) Where EASA AD 2020–0079 refers to flight hours, this AD requires using hours time-in-service. The guidance provided by Note 1 to Table 1 in EASA AD 2020–0079 is still applicable.

(i) No Reporting Requirement

Although the service information referenced in EASA AD 2020–0079 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

(j) Alternative Methods of Compliance (AMOCs)

The Manager, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or local Flight Standards District Office, as appropriate. If sending information directly to the International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: 9-AVS-AIR-730-AMOC@faa.gov. Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the local flight standards district office/certificate holding district office.

(k) Related Information

For more information about this AD, Kathleen Arrigotti, Aviation Safety Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; phone and fax: 206–231–3218; email: kathleen.arrigotti@faa.gov.

(l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2020–0079, dated April 1, 2020.

(ii) [Reserved]

(3) For EASA AD 2020–0079, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; internet

www.easa.europa.eu. You may find this EASA AD on the EASA website at <https://ad.easa.europa.eu>.

(4) You may view this IBR material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N-321, Fort Worth, TX 76177.

(5) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email fedreg.legal@nara.gov, or go to: <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued on October 27, 2020.

Gaetano A. Sciortino,

Deputy Director for Strategic Initiatives, Compliance & Airworthiness Division, Aircraft Certification Service.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2020-0987; Project Identifier MCAI-2020-01205-R; Amendment 39-21323; AD 2020-23-07]

RIN 2120-AA64

Airworthiness Directives; Leonardo S.p.a. Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule; request for comments.

SUMMARY: The FAA is adopting a new airworthiness directive for all Leonardo S.p.a. Model AB139 and AW139 helicopters. This AD requires removing certain emergency life raft (raft) reservoirs (reservoirs) from service, inspecting the reservoirs and raft actuator cables (actuator cables), and depending on the inspection results, replacing the reservoir or adjusting the actuator cable. This AD was prompted by the inadvertent activation and deployment of a raft while the helicopter was in flight. The actions of this AD are intended to address an unsafe condition on these products.

DATES: This AD becomes effective December 4, 2020.

The Director of the Federal Register approved the incorporation by reference of a certain document listed in this AD as of December 4, 2020.

The FAA must receive comments on this AD by January 4, 2021.

ADDRESSES: You may send comments by any of the following methods:

- **Federal eRulemaking Docket:** Go to <https://www.regulations.gov>. Follow the

online instructions for sending your comments electronically.

- **Fax:** 202-493-2251.

- **Mail:** Send comments to the U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590-0001.

- **Hand Delivery:** Deliver to the "Mail" address between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

Examining the AD Docket

You may examine the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2020-0987; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the European Union Aviation Safety Agency (EASA) AD, any service information that is incorporated by reference, any comments received, and other information. The street address for Docket Operations is listed above. Comments will be available in the AD docket shortly after receipt.

For service information identified in this final rule, contact Leonardo S.p.A. Helicopters, Emanuele Bufano, Head of Airworthiness, Viale G. Agusta 520, 21017 C.Costa di Samarate (Va) Italy; telephone +39-0331-225074; fax +39-0331-229046; or at <https://www.leonardocompany.com/en/home>. You may view the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N-321, Fort Worth, TX 76177. It is also available on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2020-0987.

FOR FURTHER INFORMATION CONTACT:

Daniel E. Moore, Aviation Safety Engineer, Regulations & Policy Section, Rotorcraft Standards Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817-222-5110; email daniel.e.moore@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

This AD is a final rule that involves requirements affecting flight safety, and the FAA did not provide you with notice and an opportunity to provide your comments prior to it becoming effective. However, the FAA invites you to participate in this rulemaking by submitting written comments, data, or views. The most helpful comments reference a specific portion of the AD,

explain the reason for any recommended change, and include supporting data. To ensure the docket does not contain duplicate comments, commenters should send only one copy of written comments, or if comments are filed electronically, commenters should submit them only one time.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will file in the docket all comments received, as well as a report summarizing each substantive public contact with FAA personnel concerning this rulemaking during the comment period. The FAA will consider all the comments received and may conduct additional rulemaking based on those comments.

Confidential Business Information

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this final rule contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this final rule, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as "PROPIN." The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this final rule. Submissions containing CBI should be sent to Daniel E. Moore, Aviation Safety Engineer, Regulations & Policy Section, Rotorcraft Standards Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817-222-5110; email daniel.e.moore@faa.gov. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Discussion

EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD No. 2020-0185, dated August 19, 2020, to correct an unsafe condition for Leonardo S.p.A. Helicopters, formerly Finmeccanica S.p.A., AgustaWestland S.p.A., Agusta S.p.A.; and AgustaWestland Philadelphia Corporation, formerly Agusta Aerospace Corporation Model AB139 and AW139 helicopters, all serial numbers, if equipped with emergency flotation kit part number (P/

N) 4G9560F00111 (15 passengers) or P/N 4G9560F00211 (18 passengers). An inadvertent raft activation and deployment event occurred on a Model AW139 helicopter during flight. EASA advises that following the deployment, the raft separated from the helicopter and was lost at sea. EASA states that investigation is on-going into the cause of this event. Model AB139 helicopters are subject to the same unsafe condition due to design similarity to the AW139 helicopters. EASA advises that this condition, if not detected and corrected, may lead to further unintended activation and deployment of the raft in flight and separation with possible impact on the rotors, resulting in reduced control of the helicopter.

To address this unsafe condition, Leonardo Helicopters has issued Alert Service Bulletin No. 139–648, dated August 10, 2020 (ASB 139–648) to provide replacement instructions for certain reservoirs and a one-time inspection for all other reservoirs to verify that the actuator cable and the valve pull rod are correctly installed.

Accordingly, the EASA AD requires, for some helicopters, replacement of affected reservoirs and, for other helicopters, inspections of the valve pull rod and the actuator cable of the raft and, depending on findings, accomplishment of the applicable corrective action(s). The EASA AD also prohibits (re)installation of an affected reservoir on any helicopter.

FAA's Determination

These helicopters have been approved by EASA and are approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the European Union, EASA has notified the FAA of the unsafe condition described in its AD. The FAA is issuing this AD after evaluating all of the information provided by EASA and determining the unsafe condition exists and is likely to exist or develop on other helicopters of the same type designs.

Related Service Information Under 1 CFR Part 51

The FAA reviewed ASB 139–648, which specifies procedures to replace certain reservoirs and return them to the supplier, inspect the measurement of the actuator cable between the face of the pull rod and the back of the valve cap, inspect the actuator cable by inspecting the clearance between the sphere at the end of the actuator cable and the activation system, and adjust the actuator cable.

This service information is reasonably available because the interested parties have access to it through their normal

course of business or by the means identified in the **ADDRESSES** section.

AD Requirements

This AD requires the following:

- For helicopters with certain serial-numbered right-hand (RH) or left-hand (LH) reservoirs P/N 3G2560V01951 or P/N 3G2560V01251 installed, within 25 hours time-in-service (TIS), removing each affected reservoir from service.
- For helicopters with certain other serial-numbered RH or LH reservoirs P/N 3G2560V01951 or P/N 3G2560V01251 installed, within 25 hours TIS or before the reservoir accumulates 55 total hours TIS since first installation on a helicopter, whichever occurs later, inspecting the valve pull rod of each reservoir. If the measurement of the actuator cable between the face of the pull rod and the back of the valve cap exceeds 68.5 mm, this AD requires replacing the reservoir before further flight.
- For helicopters with certain other serial-numbered RH or LH reservoirs P/N 3G2560V01951 or P/N 3G2560V01251 installed, this AD requires, within 25 hours TIS, inspecting the actuator cable of each reservoir. If the clearance between the sphere at the end of the actuator cable and the activation system exceeds $5.0 + 0.00 / - 2.0$ mm, this AD requires adjusting the actuator cable before further flight.

This AD also prohibits installing certain serial-numbered reservoirs P/N 3G2560V01951 or P/N 3G2560V01251 on any helicopter and prohibits installing any other serial-numbered reservoir P/N 3G2560V01951 or P/N 3G2560V01251 on any helicopter unless the actuator cable of the reservoir has been inspected, and if required, the actuator cable adjusted.

Differences Between This AD and the EASA AD

The EASA AD states one of the compliance times to inspect the valve pull rod is since installation of a serviceable reservoir due removal of an affected reservoir, whereas this AD does not. The EASA AD requires returning removed reservoirs to the supplier, whereas this AD requires removing certain reservoirs from service and replacing other certain reservoirs instead.

Regulatory Flexibility Act

The requirements of the Regulatory Flexibility Act (RFA) do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because FAA has determined that it has good cause to

adopt this rule without notice and comment, RFA analysis is not required.

Costs of Compliance

The FAA estimates that this AD affects 130 helicopters of U.S. Registry. Labor rates are estimated at \$85 per work-hour. Based on these numbers, the FAA estimates that operators may incur the following costs in order to comply with this AD.

Replacing a reservoir takes about 1 work-hour and parts cost about \$400 for an estimated cost of \$485 per reservoir.

Inspecting the valve pull rod of the reservoirs takes about 1 work-hour for an estimated cost of \$85 per helicopter and \$11,050 for the U.S. fleet.

Inspecting the actuator cables takes about 0.25 work-hour for an estimated cost of \$21 per helicopter and \$2,730 for the U.S. fleet. If required, adjusting an actuator cable takes about 0.75 work-hour for an estimated cost of \$64 per cable.

FAA's Justification and Determination of the Effective Date

Section 553(b)(3)(B) of the Administrative Procedure Act (5 U.S.C.) authorizes agencies to dispense with notice and comment procedures for rules when the agency, for “good cause” finds that those procedures are “impracticable, unnecessary, or contrary to the public interest.” Under this section, an agency, upon finding good cause, may issue a final rule without seeking comment prior to the rulemaking.

An unsafe condition exists that requires the immediate adoption of this AD without providing an opportunity for public comments prior to adoption. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because the required corrective actions must be completed within 25 hours TIS or before a component accumulates 55 total hours TIS since first installation on a helicopter, a short time period of about two months based on the average flight-hour utilization rate of these helicopters. Therefore, notice and opportunity for prior public comment are impracticable and contrary to public interest pursuant to 5 U.S.C. 553(b)(3)(B). In addition, for the reasons stated above, the FAA finds that good cause exists pursuant to 5 U.S.C. 553(d) for making this amendment effective in less than 30 days.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of

the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

The FAA determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national Government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed, I certify that this AD:

1. Is not a "significant regulatory action" under Executive Order 12866, and
2. Will not affect intrastate aviation in Alaska.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2020-23-07 Leonardo S.p.a.: Amendment 39-21323; Docket No. FAA-2020-0987; Project Identifier MCAI-2020-01205-R.

(a) Applicability

This airworthiness directive (AD) applies to Leonardo S.p.a. Model AB139 and AW139 helicopters, certificated in any category, with emergency flotation kit part number (P/N)

4G9560F00111 (15 passengers) or 4G9560F00211 (18 passengers).

(b) Unsafe Condition

This AD defines the unsafe condition as inadvertent activation and deployment of the emergency life raft (raft). This condition could result in the deployment of the raft during flight, separation of the raft with possible impact on the rotors, and subsequent reduced control of the helicopter.

(c) Effective Date

This AD becomes effective December 4, 2020.

(d) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(e) Required Actions

(1) For helicopters with a right-hand (RH) or left-hand (LH) life raft reservoir (reservoir) P/N 3G2560V01951 or P/N 3G2560V01251 and with a serial number (S/N) listed in Table 1 of the Leonardo Helicopters Alert Service Bulletin No. 139-648, dated August 10, 2020 (ASB 139-648), within 25 hours time-in-service (TIS), remove each affected reservoir from service.

(2) For helicopters with a RH or LH reservoir P/N 3G2560V01951 or P/N 3G2560V01251 and with an S/N not listed in Table 1 of ASB 139-648 installed, within 25 hours TIS or before the reservoir accumulates 55 total hours TIS since first installation on a helicopter, whichever occurs later, inspect the valve pull rod of each reservoir by following paragraphs 3. through 5.1, of the Accomplishment Instructions, part II, of ASB 139-648. If the measurement of the raft actuator cable (actuator cable) between the face of the pull rod and the back of the valve cap exceeds 68.5 mm, before further flight, replace the reservoir.

(3) For helicopters with a RH or LH reservoir P/N 3G2560V01951 or P/N 3G2560V01251 and with an S/N not listed in Table 1 of ASB 139-648 installed, within 25 hours TIS, inspect the actuator cable of each reservoir by following paragraphs 3. through 5.1, of the Accomplishment Instructions, part III, of ASB 139-648. If the clearance between the sphere at the end of the actuator cable and the activation system exceeds 5.0 +0.00/-2.0 mm, before further flight, adjust the life raft actuator cable by following Annex A of ASB 139-648.

(4) As of the effective date of this AD, do not install reservoir P/N 3G2560V01951 or P/N 3G2560V01251 with an S/N listed in Table 1 of ASB 139-648 on any helicopter.

(5) As of the effective date of this AD, do not install a reservoir P/N 3G2560V01951 or P/N 3G2560V01251 with an S/N other than an S/N listed in Table 1 of ASB 139-648 on any helicopter unless you have complied with the requirements in paragraph (e)(3) of this AD.

(f) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Rotorcraft Standards Branch, FAA, may approve AMOCs for this AD. Send your proposal to: Daniel E. Moore,

Aviation Safety Engineer, Regulations & Policy Section, Rotorcraft Standards Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817-222-5110; email 9-ASW-FTW-AMOC-Requests@faa.gov.

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, the FAA suggest that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office, before operating any aircraft complying with this AD through an AMOC.

(g) Additional Information

The subject of this AD is addressed in European Union Aviation Safety Agency (EASA) AD No. 2020-0185, dated August 19, 2020. You may view the EASA AD on the internet at <https://www.regulations.gov> by searching for and locating it in Docket No. FAA-2020-0987.

(h) Subject

Joint Aircraft Service Component (JASC) Code: 2560, Emergency Equipment, and 2564, Life Raft.

(i) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Leonardo Helicopters Alert Service Bulletin No. 139-648, dated August 10, 2020.

(ii) [Reserved]

(3) For service information identified in this AD, contact Leonardo S.p.A. Helicopters, Emanuele Bufano, Head of Airworthiness, Viale G. Agusta 520, 21017 C. Costa di Samarate (Va) Italy; telephone +39-0331-225074; fax +39-0331-229046; or at <https://www.leonardocompany.com/en/home>.

(4) You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N-321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call 817-222-5110.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email fedreg.legal@nara.gov, or go to: <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued on November 10, 2020.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[Docket No. FAA-2020-0652; Product Identifier 2019-SW-066-AD; Amendment 39-21322; AD 2020-23-06]

RIN 2120-AA64

Airworthiness Directives; Airbus Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for Airbus Helicopters Model AS332C, AS332C1, AS332L, and AS332L1 helicopters. This AD requires inspecting the main rotor (M/R) hub assembly (hub) phonic wheel lock washer (lock washer) for correct installation and depending on the outcome, repairing or replacing the M/R hub. This AD was prompted by reported occurrences of M/R revolutions per minute (“NR”) sensor fluctuations. The actions of this AD are intended to address an unsafe condition on these products.

DATES: This AD is effective December 24, 2020.

The Director of the Federal Register approved the incorporation by reference of a certain document listed in this AD as of December 24, 2020.

ADDRESSES: For service information identified in this final rule contact Airbus Helicopters, 2701 N Forum Drive, Grand Prairie, TX 75052; telephone 972-641-0000 or 800-232-0323; fax 972-641-3775; or at <https://www.airbus.com/helicopters/services/technical-support.html>. You may view the referenced service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N-321, Fort Worth, TX 76177.

It is also available on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2020-0652.

Examining the AD Docket

You may examine the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2020-0652; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, the European Union Aviation Safety Agency (EASA) AD, any service information that is incorporated by reference, any

comments received, and other information. The street address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: Matt Fuller, AD Program Manager, Operational Safety Branch, Airworthiness Products Section, General Aviation & Rotorcraft Unit, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817-222-5110; email matthew.fuller@faa.gov.

SUPPLEMENTARY INFORMATION:**Discussion**

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to Airbus Helicopters Model AS332C, AS332C1, AS332L, and AS332L1 helicopters with an M/R hub part number (P/N) 332A31-0001-00, 332A31-0001-01, 332A31-0001-02, 332A31-0001-03, 332A31-0001-04, 332A31-0001-05, or 332A31-0001-06 installed. The NPRM published in the **Federal Register** on July 16, 2020 (85 FR 43160). The NPRM proposed to require removing at least one M/R “NR” sensor and borescope inspecting the phonic wheel lock washer for correct height of the lock washer. The NPRM also proposed to prohibit the installation of an affected M/R hub unless it has successfully passed the required inspection for correct lock washer installation. The proposed requirements were intended to prohibit the incorrect assembly of the M/R hub, which, if not corrected, could result in failure of the M/R hub components and subsequent loss of control of the helicopter.

The NPRM was prompted by EASA AD No. 2019-0172, dated July 18, 2019, issued by EASA, which is the Technical Agent for the Member States of the European Union. This EASA AD was issued to correct an unsafe condition for Airbus Helicopters Model AS 332 C, AS 332 C1, AS 332 L, and AS 332 L1 helicopters with an M/R hub P/N 332A31-0001-00, 332A31-0001-01, 332A31-0001-02, 332A31-0001-03, 332A31-0001-04, 332A31-0001-05, or 332A31-0001-06 installed. EASA advises of reported occurrences of “NR” sensor fluctuation and subsequent investigation identifying incorrect positioning of the M/R hub phonic wheel due to incorrect installation of the M/R mast nut press screws during maintenance of the M/R hubs. EASA advises that this condition, if not detected and corrected, could lead to failure of M/R hub components,

possibly resulting in loss of helicopter control. Accordingly, the EASA AD requires a one-time inspection of the lock washer position and depending on findings, replacing the M/R hub.

Comments

The FAA gave the public the opportunity to participate in developing this final rule, but the FAA did not receive any comments on the NPRM or on the determination of the cost to the public.

FAA’s Determination

These helicopters have been approved by EASA and are approved for operation in the United States. Pursuant to the FAA’s bilateral agreement with the European Union, EASA has notified the FAA of the unsafe condition described in its AD. The FAA is issuing this AD after evaluating all of the information provided by EASA and determining the unsafe condition exists and is likely to exist or develop on other helicopters of the same type designs and that air safety and the public interest require adopting these AD requirements as proposed.

Differences Between This AD and the EASA AD

The EASA AD requires using a flashlight and visually inspecting the position of the lock washer, and further specifies that using an endoscope can facilitate that inspection. This AD requires borescope inspecting for the correct height of the lock washer instead. After inspecting, the EASA AD requires reinstalling the removed “NR” sensor(s), while this AD requires installing airworthy “NR” sensor(s) instead. If the lock washer is in an incorrect position, the EASA AD requires replacing the M/R hub, whereas this AD requires repairing or replacing the M/R hub with an airworthy M/R hub instead.

Related Service Information Under 14 CFR Part 51

Airbus Helicopters has issued Alert Service Bulletin No. AS332-62.00.76, Revision 0, dated May 27, 2019, which specifies inspecting the position of the M/R hub lock washer for civilian Model AS332C, C1, L, and L1 and military Model AS332B, B1, F1, M, and M1 helicopters.

This service information is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 11 helicopters of U.S. Registry.

Labor rates are estimated at \$85 per work-hour. Based on these numbers, the FAA estimates that operators may incur the following costs in order to comply with this AD.

Removing an “NR” sensor and borescope inspecting takes about 0.5 work-hour for an estimated cost of \$43 per helicopter and \$473 for the U.S. fleet.

Repairing the M/R hub takes about 10 work-hours and parts cost up to about \$3,000 for an estimated cost of up to \$3,850 and replacing the M/R hub takes about 8 work-hours and parts cost about \$50,000 for an estimated cost of \$50,680.

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA’s authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency’s authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on helicopters identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a “significant regulatory action” under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2020–23–06 Airbus Helicopters:

Amendment 39–21322; Docket No. FAA–2020–0652; Product Identifier 2019–SW–066–AD.

(a) Applicability

This airworthiness directive (AD) applies to Airbus Helicopters Model AS332C, AS332C1, AS332L, and AS332L1 helicopters, certificated in any category, with a main rotor (M/R) hub assembly (hub) part number (P/N) 332A31–0001–00, 332A31–0001–01, 332A31–0001–02, 332A31–0001–03, 332A31–0001–04, 332A31–0001–05, or 332A31–0001–06 installed.

(b) Unsafe Condition

This AD defines the unsafe condition as incorrect assembly of the M/R hub. This condition could result in failure of the M/R hub components and subsequent loss of control of the helicopter.

(c) Effective Date

This AD becomes effective December 24, 2020.

(d) Compliance

You are responsible for performing each action required by this AD within the specified compliance time unless it has already been accomplished prior to that time.

(e) Required Actions

(1) Within 55 hours time-in-service, remove at least one M/R revolutions per minute (“NR”) sensor and borescope inspect the phonic wheel lock washer (lock washer) for correct height of the lock washer (if the installation is correct, you can see the edge of the splines) through the hole of the removed “NR” sensor(s) as shown in Figure 1 to Airbus Helicopters Alert Service Bulletin No. AS332–62.00.76, Revision 0, dated May 27, 2019.

(i) If the height of the lock washer is correct, before further flight, install the “NR” sensor(s).

(ii) If the height of the lock washer is not correct, before further flight, install the “NR” sensor(s) and repair or replace the M/R hub in accordance with FAA-approved procedures.

(2) As of the effective date of this AD, do not install M/R hub P/N 332A31–0001–00, 332A31–0001–01, 332A31–0001–02, 332A31–0001–03, 332A31–0001–04,

332A31–0001–05, or 332A31–0001–06 on any helicopter unless the actions of paragraph (e)(1) of this AD have been accomplished.

(f) Alternative Methods of Compliance (AMOCs)

(1) The Manager, Rotorcraft Standards Branch, FAA, may approve AMOCs for this AD. Send your proposal to: Matt Fuller, AD Program Manager, Operational Safety Branch, Airworthiness Products Section, General Aviation & Rotorcraft Unit, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817–222–5110; email matthew.fuller@faa.gov.

(2) For operations conducted under a 14 CFR part 119 operating certificate or under 14 CFR part 91, subpart K, the FAA suggests that you notify your principal inspector, or lacking a principal inspector, the manager of the local flight standards district office or certificate holding district office, before operating any aircraft complying with this AD through an AMOC.

(g) Additional Information

The subject of this AD is addressed in European Union Aviation Safety Agency (EASA) No. 2019–0172, dated July 18, 2019. You may view the EASA AD on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA–2020–0652.

(h) Subject

Joint Aircraft Service Component (JASC) Code: 6230, Main Rotor Mast/Swashplate.

(i) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless the AD specifies otherwise.

(i) Airbus Helicopters Alert Service Bulletin No. AS332–62.00.76, Revision 0, dated May 27, 2019.

(ii) [Reserved]

(3) For service information identified in this AD, contact Airbus Helicopters, 2701 N Forum Drive, Grand Prairie, TX 75052; telephone 972–641–0000 or 800–232–0323; fax 972–641–3775; or at <https://www.airbus.com/helicopters/services/technical-support.html>.

(4) You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call 817–222–5110.

(5) You may view this service information that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email fedreg.legal@nara.gov, or go to: <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued on October 30, 2020.

Lance T. Gant,

*Director, Compliance & Airworthiness
Division, Aircraft Certification Service.*

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. FAA-2020-0685; Project Identifier MCAI-2020-00396-R; Amendment 39-21325; AD 2020-23-09]

RIN 2120-AA64

Airworthiness Directives; Airbus Helicopters

AGENCY: Federal Aviation Administration (FAA), Department of Transportation (DOT).

ACTION: Final rule.

SUMMARY: The FAA is adopting a new airworthiness directive (AD) for all Airbus Helicopters Model EC130B4 helicopters. This AD was prompted by reports of inflight detachment of the left-hand (LH) side cabin sliding doors and cases of impact damage on the main rotor blades, which were caused by degradation of the sliding door locking mechanism. This AD requires repetitive checks (measurements) of the load that operates the sliding door opening mechanism, repetitive inspections of the markings of the attachment screws for proper alignment, modifying the attachment system of the sliding door, and corrective actions if necessary, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

DATES: This AD is effective December 24, 2020.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of December 24, 2020.

ADDRESSES: For material incorporated by reference (IBR) in this AD, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; internet www.easa.europa.eu. You may find this IBR material on the EASA website at <https://ad.easa.europa.eu>. You may view this IBR material at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N-321, Fort Worth, TX

76177. For information on the availability of this material at the FAA, call 817-222-5110. It is also available in the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2020-0685.

Examining the AD Docket

You may examine the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA-2020-0685; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this final rule, any comments received, and other information. The address for Docket Operations is U.S. Department of Transportation, Docket Operations, M-30, West Building Ground Floor, Room W12-140, 1200 New Jersey Avenue SE, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT:

Kristin Bradley, Aviation Safety Engineer, International Validation Branch, General Aviation & Rotorcraft Unit, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817-222-5485; email Kristin.Bradley@faa.gov.

SUPPLEMENTARY INFORMATION:

Discussion

The FAA issued a notice of proposed rulemaking (NPRM) to amend 14 CFR part 39 by adding an AD that would apply to all Airbus Helicopters Model EC130B4 helicopters. The NPRM published in the **Federal Register** on August 6, 2020 (85 FR 47714). The NPRM was prompted by reports of inflight detachment of the LH side cabin sliding doors and cases of impact damage on the main rotor blades, which were caused by degradation of the sliding door locking mechanism. The NPRM proposed to require repetitive checks (measurements) of the load that operates the sliding door opening mechanism, repetitive inspections of the markings of the attachment screws for proper alignment, modifying the attachment system of the sliding door, and corrective actions if necessary, as specified in an EASA AD.

The FAA is issuing this AD to address degradation of the locking mechanism, which could lead to further events of inflight detachment of a LH side cabin sliding door, and possibly result in damage to the helicopter and injury to persons on the ground.

The EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2020-0069, dated March 24, 2020 (EASA AD 2020-0069) (also referred to

as the Mandatory Continuing Airworthiness Information, or the MCAI), to correct an unsafe condition for all Airbus Helicopters Model EC130B4 helicopters. See the MCAI for additional background information.

Comments

The FAA gave the public the opportunity to participate in developing this final rule. The FAA has considered the comments received. An anonymous commenter indicated its support for the NPRM.

Conclusion

The FAA reviewed the relevant data, considered the comment received, and determined that air safety and the public interest require adopting this final rule as proposed, except for minor editorial changes. The FAA has determined that these minor changes:

- Are consistent with the intent that was proposed in the NPRM for addressing the unsafe condition; and
- Do not add any additional burden upon the public than was already proposed in the NPRM.

Related Service Information Under 14 CFR Part 51

EASA AD 2020-0069 describes procedures for repetitive checks (measurements) of the load that operates the sliding door opening mechanism, repetitive inspections of the markings of the attachment screws of the rear LH upper catch for proper alignment, modifying the attachment system of the sliding door, and corrective actions if necessary. Corrective actions include adjusting the rear LH upper catch to increase the load required to operate the sliding door opening mechanism, inspecting the rear LH upper catch to determine if any anchor nut is not locked, and replacing the anchor nuts of the rear LH upper catch. EASA AD2020-0069 also specifies that doing the modification of the attachment system of the sliding door is a terminating action for the repetitive inspections of the markings of the attachment screws of the rear LH upper catch for proper alignment.

This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

Costs of Compliance

The FAA estimates that this AD affects 159 helicopters of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

Labor cost	Parts cost	Cost per product	Cost on U.S. operators
Up to 3 work-hours × \$85 per hour = Up to \$255.	\$0	Up to \$255	Up to \$40,545.

The FAA estimates the following costs to do any necessary on-condition actions that would be required based on

the results of any required actions. The FAA has no way of determining the

number of helicopters that might need these on-condition actions:

ESTIMATED COSTS OF ON-CONDITION ACTIONS

Labor cost	Parts cost	Cost per product
1 work-hours × \$85 per hour = \$85	\$0	\$85

Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

Regulatory Findings

This AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

- (1) Is not a "significant regulatory action" under Executive Order 12866,
- (2) Will not affect intrastate aviation in Alaska, and
- (3) Will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

PART 39—AIRWORTHINESS DIRECTIVES

- 1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

- 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

2020–23–09 Airbus Helicopters:
Amendment 39–21325; Docket No. FAA–2020–0685; Project Identifier MCAI–2020–00396–R.

(a) Effective Date

This airworthiness directive (AD) is effective December 24, 2020.

(b) Affected ADs

None.

(c) Applicability

This AD applies to all Airbus Helicopters Model EC130B4 helicopters, certificated in any category.

(d) Subject

Air Transport Association (ATA) of America Code 52, Doors.

(e) Reason

This AD was prompted by reports of inflight detachment of the left-hand (LH) side cabin sliding doors and cases of impact damage on the main rotor blades, which were caused by degradation of the sliding door locking mechanism. The FAA is issuing this AD to address degradation of the locking mechanism, which could lead to further

events of inflight detachment of a LH side cabin sliding door, and possibly result in damage to the helicopter and injury to persons on the ground.

(f) Compliance

Comply with this AD within the compliance times specified, unless already done.

(g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2020–0069, dated March 24, 2020 (EASA AD 2020–0069).

(h) Exceptions to EASA AD 2020–0069

(1) Where EASA AD 2020–0069 refers to its effective date, this AD requires using the effective date of this AD.

(2) Where EASA AD 2020–0069 refers to January 24, 2019 (the effective date of EASA AD 2020–0069), this AD requires using the effective date of this AD.

(3) The "Remarks" section of EASA AD 2020–0069 does not apply to this AD.

(4) The "Parts Installation" allowance provided in paragraph (8) of EASA AD 2020–0069 does not apply to this AD.

(5) Although the service information referenced in EASA AD 2020–0069 specifies to discard certain parts, this AD does not include that requirement.

(i) Alternative Methods of Compliance (AMOCs)

The Manager, Rotorcraft Standards Branch, FAA, may approve AMOCs for this AD. Send your proposal to: Manager, Rotorcraft Standards Branch, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817–222–5110; email 9-ASW-FTW-AMOC-Requests@faa.gov.

(j) Related Information

For more information about this AD, contact Kristin Bradley, Aviation Safety Engineer, International Validation Branch, General Aviation & Rotorcraft Unit, FAA, 10101 Hillwood Pkwy., Fort Worth, TX 76177; telephone 817–222–5485; email Kristin.Bradley@faa.gov.

(k) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2020–0069, dated March 24, 2020.

(ii) [Reserved]

(3) For EASA AD 2020–0069, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email ADs@easa.europa.eu; internet www.easa.europa.eu. You may find this EASA AD on the EASA website at <https://ad.easa.europa.eu>.

(4) You may view this service information at the FAA, Office of the Regional Counsel, Southwest Region, 10101 Hillwood Pkwy., Room 6N–321, Fort Worth, TX 76177. For information on the availability of this material at the FAA, call 817–222–5110. This material may be found in the AD docket on the internet at <https://www.regulations.gov> by searching for and locating Docket No. FAA–2020–0685.

(5) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email fedreg.legal@nara.gov, or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

Issued on November 4, 2020.

Lance T. Gant,

Director, Compliance & Airworthiness Division, Aircraft Certification Service.

[FR Doc. 2020–25469 Filed 11–18–20; 8:45 am]

BILLING CODE 4910–13–P

DEPARTMENT OF THE TREASURY**Alcohol and Tobacco Tax and Trade Bureau****27 CFR Part 9**

[Docket No. TTB–2020–0006; T.D. TTB–164; Ref: Notice No. 191]

RIN 1513–AC69

Establishment of the Tehachapi Mountains Viticultural Area

AGENCY: Alcohol and Tobacco Tax and Trade Bureau, Treasury.

ACTION: Final rule; Treasury decision.

SUMMARY: The Alcohol and Tobacco Tax and Trade Bureau (TTB) establishes the approximately 58,000-acre “Tehachapi Mountains” viticultural area in Kern County, California. The Tehachapi Mountains viticultural area is not located within, nor does it contain, any established viticultural area. TTB designates viticultural areas to allow

vintners to better describe the origin of their wines and to allow consumers to better identify wines they may purchase.

DATES: This final rule is effective December 21, 2020.

FOR FURTHER INFORMATION CONTACT:

Karen A. Thornton, Regulations and Rulings Division, Alcohol and Tobacco Tax and Trade Bureau, 1310 G Street NW, Box 12, Washington, DC 20005; phone 202–453–1039, ext. 175.

SUPPLEMENTARY INFORMATION:**Background on Viticultural Areas***TTB Authority*

Section 105(e) of the Federal Alcohol Administration Act (FAA Act), 27 U.S.C. 205(e), authorizes the Secretary of the Treasury to prescribe regulations for the labeling of wine, distilled spirits, and malt beverages. The FAA Act provides that these regulations should, among other things, prohibit consumer deception and the use of misleading statements on labels and ensure that labels provide the consumer with adequate information as to the identity and quality of the product. The Alcohol and Tobacco Tax and Trade Bureau (TTB) administers the FAA Act pursuant to section 1111(d) of the Homeland Security Act of 2002, codified at 6 U.S.C. 531(d). The Secretary has delegated the functions and duties in the administration and enforcement of these provisions to the TTB Administrator through Treasury Order 120–01, dated December 10, 2013 (superseding Treasury Order 120–01, dated January 24, 2003).

Part 4 of the TTB regulations (27 CFR part 4) authorizes TTB to establish definitive viticultural areas and regulate the use of their names as appellations of origin on wine labels and in wine advertisements. Part 9 of the TTB regulations (27 CFR part 9) sets forth standards for the preparation and submission to TTB of petitions for the establishment or modification of American viticultural areas (AVAs) and lists the approved AVAs.

Definition

Section 4.25(e)(1)(i) of the TTB regulations (27 CFR 4.25(e)(1)(i)) defines a viticultural area for American wine as a delimited grape-growing region having distinguishing features, as described in part 9 of the regulations, and a name and a delineated boundary, as established in part 9 of the regulations. These designations allow vintners and consumers to attribute a given quality, reputation, or other characteristic of a wine made from grapes grown in an area to the wine’s geographic origin. The

establishment of AVAs allows vintners to describe more accurately the origin of their wines to consumers and helps consumers to identify wines they may purchase. Establishment of an AVA is neither an approval nor an endorsement by TTB of the wine produced in that area.

Requirements

Section 4.25(e)(2) of the TTB regulations (27 CFR 4.25(e)(2)) outlines the procedure for proposing an AVA and provides that any interested party may petition TTB to establish a grape-growing region as an AVA. Section 9.12 of the TTB regulations (27 CFR 9.12) prescribes standards for petitions for the establishment or modification of AVAs. Petitions to establish an AVA must include the following:

- Evidence that the area within the proposed AVA boundary is nationally or locally known by the AVA name specified in the petition;
- An explanation of the basis for defining the boundary of the proposed AVA;
- A narrative description of the features of the proposed AVA affecting viticulture, such as climate, geology, soils, physical features, and elevation, that make the proposed AVA distinctive and distinguish it from adjacent areas outside the proposed AVA boundary;
- The appropriate United States Geological Survey (USGS) map(s) showing the location of the proposed AVA, with the boundary of the proposed AVA clearly drawn thereon; and
- A detailed narrative description of the proposed AVA boundary based on USGS map markings.

Tehachapi Mountains Petition

TTB received a petition from Julie Bell of Per La Vita LLC, on behalf of local vineyard owners and winemakers, proposing to establish the “Tehachapi Mountains” AVA. The proposed AVA is located in Kern County, California, and is not within any established AVA. The proposed Tehachapi Mountains AVA contains approximately 58,000 acres and has 6 commercially-producing vineyards covering approximately 25 acres, as well as 1 winery. The distinguishing features of the proposed Tehachapi Mountains AVA include its topography and climate.

The proposed Tehachapi Mountains AVA is a broad, saddle-shaped region of mountain foot slopes, high valleys and rolling hills situated at the summit of the southernmost pass of the Sierra Nevada mountain range. The proposed AVA has an east-west orientation, and the terrain at the east and west ends of

the “saddle” rise sharply before falling away to the lower elevations of the San Joaquin Valley, to the west, and the Mojave Desert, to the east. Elevations within the proposed AVA range from 3,600 and 5,400 feet, with the majority of the area situated between 3,800 and 4,600 feet. Slope angles average between 3 and 11 degrees within the proposed AVA. According to the petition, the high altitude of the proposed AVA exposes grapes to higher intensity ultraviolet light, which stimulates synthesis of phenolic molecules and produces deep colors and thick skins. Additionally, the gentle slope angles reduce the risk of erosion and allow cold air to drain away from vineyards planted in the proposed AVA.

The petition states that topography also affects the climate of the proposed Tehachapi Mountains AVA and allows for successful viticulture, even at such high elevation. The petition notes that wine grapes are generally grown at elevations below 3,000 feet in the United States and around the world, due to colder temperatures at higher elevations that can permanently damage or kill vines. However, the proposed AVA’s location within a mountain pass allows prevailing west winds from the San Joaquin Valley and east winds from the Mojave Desert to bring warm air from those regions into the proposed AVA. As a result, the proposed AVA has an average growing season of 198 days and accumulates an average of 2,762 growing degree days¹ (GDDs) annually, both of which are sufficient for ripening late season varieties such as syrah, zinfandel, and cabernet sauvignon. Warm air from the neighboring valleys also results in typical winter low temperatures within the proposed AVA that range from 35 to 26 degrees Fahrenheit. The petition notes that grapevines can suffer permanent damage at temperatures between 0 and – 5 degrees Fahrenheit, so vines grown in the proposed AVA are not at risk from serious frost damage.

The Tehachapi Mountains range continues to the south of the proposed AVA. Elevations rise to over 7,000 feet, and slope angles are over 30 degrees. To the north of the proposed Tehachapi Mountains AVA are the Piute Mountains, which have elevations of over 6,000 feet and also have slope

angles over 30 degrees. In portions of the northern region that are not exposed to the Mojave Desert or San Joaquin Valley, growing seasons are shorter and GDD accumulations are lower than within the proposed AVA. For example, to the north-northwest of the proposed AVA, the community of Johnsondale is at an elevation of 4,700 feet, has a growing season of 139 days, and accumulates an average of 2,149 GDDs. However, regions with more direct exposure to the desert or the valley can have longer growing seasons and greater GDD accumulations. For example, the community of Walker Pass, to the north-northeast of the proposed AVA at an elevation of 5,572 feet, is more exposed to the Mojave Desert than the proposed AVA and has an average growing season of 216 days and accumulates an average of 3,834 GDDs.

To the east of the proposed Tehachapi Mountains AVA is the Mojave Desert, which has an average elevation of 2,600 feet. The growing season is longer than within the proposed AVA, averaging 231 days at Edwards Air Force Base. GDD accumulations are also much higher, averaging 4,881 annually. To the west of the proposed AVA is the San Joaquin Valley, where elevations drop below 500 feet near Bakersfield. The growing season length in Bakersfield averages 349 days, and an average annual GDD accumulation of 5,521.

Notice of Proposed Rulemaking and Comments Received

TTB published Notice No. 191 in the **Federal Register** on June 26, 2020 (85 FR 38345), proposing to establish the Tehachapi Mountains AVA. In the notice, TTB summarized the evidence from the petition regarding the name, boundary, and distinguishing features for the proposed AVA. The notice also compared the distinguishing features of the proposed AVA to the surrounding areas. For a detailed description of the evidence relating to the name, boundary, and distinguishing features of the proposed AVA, and for a detailed comparison of the distinguishing features of the proposed AVA to the surrounding areas, see Notice No. 191.

In Notice No. 191, TTB solicited comments on the accuracy of the name, boundary, and other required information submitted in support of the petition. The comment period closed August 25, 2020.

In response to Notice No. 191, TTB received a total of eight comments. The commenters included the Tehachapi city manager, the Mayor of Tehachapi City and Tehachapi City Council, the Second District supervisor for Kern County, California State Assemblyman

Vince Fong, U.S. Representative Kevin McCarthy, and local wine industry members. All of the comments supported the establishment of the proposed Tehachapi Mountains AVA.

TTB Determination

After careful review of the petition and the comments received in response to Notice No. 191, TTB finds that the evidence provided by the petitioner supports the establishment of the Tehachapi Mountains AVA. Accordingly, under the authority of the FAA Act, section 1111(d) of the Homeland Security Act of 2002, and parts 4 and 9 of the TTB regulations, TTB establishes the “Tehachapi Mountains” AVA in Kern County, California, effective 30 days from the publication date of this document.

Boundary Description

See the narrative description of the boundary of the Tehachapi Mountains AVA in the regulatory text published at the end of this final rule.

Maps

The petitioners provided the required maps, and they are listed below in the regulatory text. You may also view the Tehachapi Mountains AVA boundary on the AVA Map Explorer on the TTB website, at <https://www.ttb.gov/wine/ava-map-explorer>.

Impact on Current Wine Labels

Part 4 of the TTB regulations prohibits any label reference on a wine that indicates or implies an origin other than the wine’s true place of origin. For a wine to be labeled with an AVA name or with a brand name that includes an AVA name, at least 85 percent of the wine must be derived from grapes grown within the area represented by that name, and the wine must meet the other conditions listed in 27 CFR 4.25(e)(3). If the wine is not eligible for labeling with an AVA name and that name appears in the brand name, then the label is not in compliance and the bottler must change the brand name and obtain approval of a new label. Similarly, if the AVA name appears in another reference on the label in a misleading manner, the bottler would have to obtain approval of a new label. Different rules apply if a wine has a brand name containing an AVA name that was used as a brand name on a label approved before July 7, 1986. See 27 CFR 4.39(i)(2) for details.

With the establishment of the Tehachapi Mountains AVA, its name, “Tehachapi Mountains,” will be recognized as a name of viticultural significance under § 4.39(i)(3) of the

¹ See Albert J. Winkler et al., *General Viticulture* (Berkeley: University of California Press, 2nd ed. 1974), pages 61–64. In the Winkler climate classification system, annual heat accumulation during the growing season, measured in annual GDDs, defines climatic regions. One GDD accumulates for each degree Fahrenheit that a day’s mean temperature is above 50 degrees F, the minimum temperature required for grapevine growth.

TTB regulations (27 CFR 4.39(i)(3)). The text of the regulations clarifies this point. Consequently, wine bottlers using the name “Tehachapi Mountains” in a brand name, including a trademark, or in another label reference as to the origin of the wine, will have to ensure that the product is eligible to use the AVA name as an appellation of origin. TTB is not designating “Tehachapi,” standing alone, as a term of viticultural significance if the proposed AVA is established, in order to avoid potential conflicts with current label holders who use the word “Tehachapi” in a brand name or a fanciful name on their labels. Accordingly, the proposed part 9 regulatory text set forth in this document specifies only the full name “Tehachapi Mountains” as a term of viticultural significance for purposes of part 4 of the TTB regulations.

Regulatory Flexibility Act

TTB certifies that this regulation will not have a significant economic impact on a substantial number of small entities. The regulation imposes no new reporting, recordkeeping, or other administrative requirement. Any benefit derived from the use of an AVA name would be the result of a proprietor's efforts and consumer acceptance of wines from that area. Therefore, no regulatory flexibility analysis is required.

Executive Order 12866

It has been determined that this final rule is not a significant regulatory action as defined by Executive Order 12866 of September 30, 1993. Therefore, no regulatory assessment is required.

Drafting Information

Karen A. Thornton of the Regulations and Rulings Division drafted this final rule.

List of Subjects in 27 CFR Part 9

Wine.

The Regulatory Amendment

For the reasons discussed in the preamble, TTB amends title 27, chapter I, part 9, Code of Federal Regulations, as follows:

PART 9—AMERICAN VITICULTURAL AREAS

■ 1. The authority citation for part 9 continues to read as follows:

Authority: 27 U.S.C. 205.

Subpart C—Approved American Viticultural Areas

■ 2. Subpart C is amended by adding § 9.273 to read as follows:

§ 9.273 Tehachapi Mountains.

(a) *Name.* The name of the viticultural area described in this section is “Tehachapi Mountains”. For purposes of part 4 of this chapter, “Tehachapi Mountains” is a term of viticultural significance.

(b) *Approved maps.* The eight United States Geological Survey (USGS) 1:24,000 scale topographic maps used to determine the boundary of the Tehachapi Mountains viticultural area are titled:

- (1) Bear Mountain, CA, 2015;
- (2) Keene, CA, 2015;
- (3) Cummings Mountain, CA, 2015;
- (4) Tehachapi North, CA, 2015;
- (5) Tehachapi NE, CA, 2015;
- (6) Monolith, CA, 2015;
- (7) Tehachapi South, CA, 2015; and
- (8) Tejon Ranch, CA, 2015.

(c) *Boundary.* The Tehachapi Mountains viticultural area is located in Kern County, California. The boundary of the Tehachapi Mountains viticultural area is as described below:

(1) The beginning point is on the Bear Mountain map at the intersection of the 4,800-foot elevation contour and an unnamed road known locally as Skyline Drive. From the beginning point, proceed easterly along the 4,800-foot elevation contour, crossing onto the Keene map, to the intersection of the 4,800-foot elevation contour and Horizon Court; then

(2) Proceed south along Horizon Court to its intersection with the 4,600-foot elevation contour; then

(3) Proceed east, then north along the meandering 4,600-foot elevation contour to its intersection with Shenandoah Place; then

(4) Proceed southeast in a straight line to the 4,400-foot elevation contour south of an unnamed road known locally as Big Sky Court; then

(5) Proceed east, then north along the meandering 4,400-foot elevation contour to its intersection with Bear Valley Road; then

(6) Proceed east in a straight line to the 4,600-foot elevation contour; then

(7) Proceed southeasterly along the 4,600-foot elevation contour, crossing onto the Cummings Mountain map and continuing southeasterly, then northerly along the 4,600-foot elevation contour, crossing back onto the Keene map, and continuing northerly along the 4,600-foot elevation contour to a point due west of the intersection of Marcel Drive and an unnamed road known locally as Woodford-Tehachapi Road; then

(8) Proceed east in a straight line to the intersection of Woodford-Tehachapi Road and Marcel Drive; then

(9) Proceed east in a straight line, crossing onto the Tehachapi North map

and crossing Tehachapi Creek, to the 4,400-foot elevation contour northeast of the community of Cable, California; then

(10) Proceed easterly along the 4,400-foot elevation contour, crossing onto the Tehachapi NE map, and continuing southeasterly along the 4,400-foot elevation contour to a point due west of the terminus of Zephyr Court; then

(11) Proceed east in a straight line to the terminus of Zephyr Court; then

(12) Proceed east in a straight line to Sand Canyon Road; then

(13) Proceed south along Sand Canyon Road, crossing onto the Monolith map, to its intersection with East Tehachapi Boulevard; then

(14) Proceed southwesterly in a straight line, crossing the railroad tracks and State Route 58, to the 4,200-foot elevation contour; then

(15) Proceed westerly along the 4,200-foot elevation contour to its intersection with an unnamed intermittent creek; then

(16) Proceed southwest in a straight line to the 4,400-foot elevation contour; then

(17) Proceed west along the 4,400-foot elevation contour, crossing onto the Tehachapi South map, to its intersection with Tehachapi-Willow Springs Road; then

(18) Proceed south along Tehachapi-Willow Springs Road to its intersection with the 4,520-foot elevation contour; then

(19) Proceed west in a straight line to the intersection of the 4,840-foot elevation contour and Snowshoe Lane; then

(20) Proceed north in a straight line to the 4,800-foot elevation contour; then

(21) Proceed westerly along the 4,800-foot elevation contour, crossing onto the Cummings Mountain map and over two unnamed intermittent streams, and continuing to the intersection of the 4,800-foot elevation contour and a third unnamed intermittent stream; then

(22) Proceed south in a straight line to the 5,200-foot elevation contour; then

(23) Proceed southerly along the 5,200-foot elevation contour to a point northeast of the southern terminus of Arosa Road; then

(24) Proceed east in a straight line, crossing onto the Tehachapi South map and over an unnamed road known locally as Water Canyon Road, to the 5,400-foot elevation contour; then

(25) Proceed southeasterly, then south, then southwesterly along the 5,400-foot elevation contour, crossing onto the Cummings Mountain map and continuing to the intersection of the 5,400-foot elevation contour with an unnamed road known locally as Matterhorn Drive; then

(26) Proceed west in a straight line, crossing Mountain Climber Way, to the 4,600-foot elevation contour; then

(27) Proceed westerly along the 4,600-foot elevation contour to its intersection with High Gun Drive; then

(28) Proceed south in a straight line to the second intersection of the line with the 5,000-foot elevation contour; then

(29) Proceed west in a straight line, crossing onto the Tejon Ranch map, to the line's intersection with an unnamed 4-wheel drive road; then

(30) Proceed northwesterly along the 4-wheel drive road to its intersection with the southern terminus of an unnamed road known locally as Carlisle Drive; then

(31) Proceed southwesterly in a straight line to an unmarked 4,680-foot summit; then

(32) Proceed north in a straight line to the 3,640-foot elevation contour; then

(33) Proceed west in a straight line to the 3,600-foot elevation contour; then

(34) Proceed west, then northwesterly along the 3,600-foot elevation contour to its intersection with an unnamed intermittent stream northwest of Jack Springs Road; then

(35) Proceed northeast in a straight line, crossing onto the Bear Mountain map, and continuing to the intersection of the 4,800-foot elevation contour and an unnamed intermittent creek west of Rockspring Court; then

(36) Proceed north along the 4,800-foot elevation to a point due west of the intersection of the 4,800-foot elevation point and an unnamed road known locally as Skyline Drive; then

(37) Proceed east in a straight line to the beginning point.

Signed: October 26, 2020.

Mary G. Ryan,
Administrator.

Approved: November 9, 2020.

Timothy E. Skud,
Deputy Assistant Secretary (Tax, Trade, and Tariff Policy).

BILLING CODE 4810-31-P

DEPARTMENT OF AGRICULTURE

Forest Service

36 CFR Part 220

RIN 0596-AD31

National Environmental Policy Act (NEPA) Compliance

AGENCY: Forest Service, USDA.

ACTION: Final rule.

SUMMARY: The U.S. Department of Agriculture, Forest Service (Agency) is

adopting a final rule amending its National Environmental Policy Act (NEPA) regulations. The final rule establishes new and revised categorical exclusions (pertaining to certain special use authorizations, infrastructure management activities, and restoration and resilience activities) and adds the determination of NEPA adequacy provision to the Agency's NEPA regulations. These amendments will increase efficiency in the Agency's environmental analysis and decision-making while meeting NEPA's requirements and fully honoring the Agency's environmental stewardship responsibilities. Public comment has informed and improved the final rule.

DATES: This rule is effective November 19, 2020.

ADDRESSES: Additional information is available online at <https://www.fs.fed.us/emc/NEPA/revisions/index.shtml>.

FOR FURTHER INFORMATION CONTACT:

Christine Dawe; Director, Ecosystem Management Coordination; 406-370-8865. Individuals who use telecommunication devices for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1-800-877-8339 between 8:00 a.m. and 8:00 p.m., Eastern Standard Time, Monday through Friday.

SUPPLEMENTARY INFORMATION:

Background

The mission of the Forest Service is to sustain the health, diversity, and productivity of the Nation's forests and grasslands to meet the needs of present and future generations. The National Environmental Policy Act (NEPA) has twin goals of requiring Federal agencies (1) to consider the significant environmental impacts of their proposed actions and (2) to inform the public that environmental concerns were considered in the decision-making process. These goals are not only complementary to the Agency's mission, but such informed decision-making is essential to its achievement. The Agency devotes considerable financial and personnel resources to NEPA analyses and documentation, completing on average 1,588 categorical exclusion (CE) determinations, 266 environmental assessments (EAs), and 39 environmental impact statements (EISs) annually (based on Fiscal Years 2014-2019). The Agency is amending its NEPA regulations as described in this final rule to make more efficient use of those resources to fulfill NEPA's requirements and, in turn, its mission. The final rule is consistent with the Council on Environmental Quality's

(CEQ's) intent to ensure that Federal agencies conduct environmental reviews in a coordinated, consistent, predictable, and timely manner, and to reduce unnecessary burdens and delays (40 CFR 1500.1).

An increasing percentage of the Agency's resources have been spent each year to provide for wildfire suppression, resulting in fewer resources available for other management activities, such as restoration. In 1995, wildland fire management funding made up 16 percent of the Forest Service's annual spending, compared to 57 percent in 2018. Along with a shift in funding, there has also been a corresponding shift in staff from non-fire to fire programs, with a 39 percent reduction in all non-fire personnel since 1995.

The Consolidated Appropriations Act of 2018 (2018 Omnibus Bill) included new budget authority for fighting wildfires, in addition to regular appropriations. While this budget stability is welcome, the trends discussed above make it imperative that the Agency makes the most efficient use of available funding and resources consistent with its statutory authorities to fulfill its environmental analysis and decision-making responsibilities.

On January 3, 2018, the Agency published an Advance Notice of Proposed Rulemaking (ANPR) (83 FR 302) announcing its intent to revise its NEPA procedures with the goal of increasing the efficiency of environmental analysis. The Agency received 34,674 comments in response to the ANPR, of which 1,229 were unique. Most of the unique comments expressed support for the Agency's effort to identify efficiencies in the NEPA process. The unique comments in support of the ANPR all generally acknowledged that there is room for increased efficiency in the Agency's NEPA process. Some of these comments expressed unqualified support for increasing efficiency; other comments supported the Agency's goals but included caveats that these gains should not come at a cost to public involvement or conservation of natural resources.

On June 13, 2019, the Agency published a proposed rule (84 FR 27544) proposing revisions to its NEPA procedures. Following an initial 60-day comment period that was extended for 14 days in response to requests from the public, the Agency received roughly 103,000 comments. Roughly 6,200 comments were unique, individual comments; the remainder were organized response campaign comments (form letters). A detailed summary of

comments on the proposed rule and the Agency's response follows below.

After the Forest Service rulemaking process had begun, CEQ published an advance notice of proposed rulemaking on June 20, 2018, announcing that it was "considering updating its implementing regulations for the procedural provisions of the National Environmental Policy Act" (83 FR 28591). On January 10, 2020, after publication of the Forest Service's proposed rule, CEQ published a proposed rule to revise its regulations at 40 CFR parts 1500–1508 (85 FR 1684). On July 16, 2020, CEQ published a final rule revising its regulations (85 FR 43304).

The Council on Environmental Quality's revised regulations took effect on September 14, 2020 (40 CFR 1506.13). Where existing Forest Service NEPA procedures are inconsistent with CEQ's revised regulations, CEQ's revised regulations shall apply, unless there is a clear and fundamental conflict with the requirements of another statute (40 CFR 1507.3(a)). Per CEQ's revised regulations, the Forest Service shall develop, as necessary, proposed procedures to implement the CEQ's revised regulations no more than 12 months after September 14, 2020, including to eliminate any inconsistencies with CEQ's revised regulations (40 CFR 1507.3(b)).

In light of CEQ's revised regulations, the Forest Service's final rule is of limited scope. The Forest Service is amending its NEPA regulations to add only the new and expanded CEs and a Determination of NEPA Adequacy provision as described in more detail below. Other changes to the Forest Service's NEPA regulations that were included in the proposed rule, along with associated comments, will be reconsidered in association with the Agency's review of its NEPA procedures as directed by CEQ's revised regulations. These changes include, but are not limited to, revisions to the Agency's scoping and public engagement requirements, schedule of proposed actions, condition-based management, classes of actions that normally require an EIS, procedures associated with CE determinations, and use of other agency CEs.

Summary of the Final Rule

The amendments in the final rule will increase efficiency in the Agency's environmental analysis and decision-making while meeting NEPA's requirements and fully honoring the Agency's environmental stewardship responsibilities. The final rule adds a Determination of NEPA Adequacy

provision, which outlines a process for determining whether a previously completed Forest Service NEPA analysis can satisfy NEPA's requirements for a subsequently proposed action. The final rule also establishes six new CEs, consolidates two existing CEs into one, and expands two existing CEs. The six new CEs include activities related to recreation special uses, administrative sites, recreation sites, and restoration and resilience projects, along with two CEs for certain road management projects. Two existing CEs are consolidated into one covering clerical modification or reauthorization of existing special uses. The two expanded CEs cover (1) approval, modification, or continuation of special use authorizations on up to 20 acres of NFS lands and (2) decommissioning of both unauthorized roads and trails and National Forest System roads and trails. These CEs are described in greater detail in the comment responses below and in the document titled, "Supporting Statement: Categorical Exclusions For Certain Special Uses, Infrastructure, and Restoration Projects," available at <https://www.fs.fed.us/emc/nepa/revisions/index.shtml>.

Additionally, to avoid public confusion the final rule includes a technical amendment to remove and reserve paragraph § 220.6(e)(10), which was enjoined in *Sierra Club v. Bosworth*, 510 F.3d 1016 (9th Cir. 2007).

The proposed rule would have reordered the content of §§ 220.5, 220.6., and 220.7 to align with the levels of NEPA documentation (CE, EA, EIS). The final rule does not reorder the content of these sections.

Comments on the Proposal/Section by Section Description of the Final Rule

General Comments

Comments expressed a wide range of opinions—both strongly for and against—the proposed rule. Comments expressing support for the proposed rule stated that it was a means to improve the Agency's NEPA processes. Other comments, however, opposed various provisions of the proposed rule, expressing concern that the revisions could: (1) Diminish social, economic, or environmental outcomes and lead to abuse; (2) result in inadequate environmental analysis and undermine the Forest Service's mission; (3) reduce the opportunity for public comment and environmental review of projects; (4) and erode public trust, violate existing laws and regulations, and increase potential litigation.

Response: The Agency notes the general comments in support of or in

opposition to the rule. The Agency has carefully considered the input from the public, other government entities, and Tribes and has made several adjustments to the final rule to address the concerns described above. These changes are described in more detail below and include, for example, not moving forward with some of the proposed CEs and adding additional limitations to other CEs. Throughout the rulemaking process, the Agency's goal has been to develop a final rule that enables the Agency to efficiently deliver environmental analysis to decision-makers that is scientifically based, is of high quality, and honors environmental stewardship responsibilities. The final rule achieves this goal and will facilitate decision-making that fulfills the Agency's mission of sustaining the health, diversity, and productivity of the Nation's forests and grasslands to meet the needs of present and future generations.

The Agency will make diligent efforts to involve the public in implementing its NEPA procedures as required by CEQ's revised NEPA regulations at 40 CFR 1506.6. The Agency's final rule does not address or reduce existing Agency public involvement practices concerning CEs. Scoping and public engagement requirements will be assessed during the development of revised Agency NEPA procedures required by CEQ's revised NEPA regulations. Further, the Agency will continue to comply with the requirements of all applicable laws and regulations, such as the National Environmental Policy Act, National Forest Management Act, Endangered Species Act, and National Historic Preservation Act.

Comment: Some commenters suggest that there is insufficient justification to support the need for the proposed rule as described in the **Federal Register** notice or indicate, in opposing the proposed rule, that the regulations it would amend are relied upon by the commenters and other stakeholders.

Response: The CEQ regulations state that agencies shall reduce excessive paperwork and delay by using CEs and, for efficiency, shall identify CEs in their agency NEPA procedures (40 CFR 1500.4(a), 1500.5(a), and 1501.4(a)). The final rule reduces paperwork and delay by adding the Determination of NEPA Adequacy provision and establishing new and expanded categorical exclusions based on Agency experience and expertise. The CEQ NEPA regulations at 40 CFR parts 1500–1508 encourage agencies to continue to review their NEPA policies and procedures and to revise them as

necessary. To the extent commenters raise concerns about reliance rights, the Forest Service further notes that rules implementing NEPA, such as this one and its predecessor, are purely procedural. They simply direct the actions of public officials. They therefore do not engender specific, reasonable, and detrimental reliance by individuals and groups outside the government.

Comment: Commenters suggested a need to prepare an EIS to assess the potential impacts from implementation of the proposed rule; in particular, comments request that the Forest Service evaluate proposed rule impacts to social, cultural, and economic conditions of affected communities and user groups; climate change and carbon stores; scenic integrity; National Scenic and Historic Trails; and caves and karst resources.

Response: The CEQ regulations do not require agencies to prepare a NEPA analysis before establishing or updating agency NEPA procedures. See, e.g., *Heartwood, Inc. v. U.S. Forest Service*, 230 F.3d 947, 954–55 (7th Cir. 2000). Agency NEPA regulations establish the procedures for fulfilling their responsibilities under NEPA but are not the Agency's final determination of what level of NEPA analysis is required for a particular proposed action. This rule does not authorize any activity or commit resources to a project that may affect the environment. This rule does not have any reasonably foreseeable impact on the environment, nor does the rule authorize or prohibit any action that would have any effect on the environment.

Comment: After CEQ published a notice of proposed rulemaking to revise its regulations for implementing NEPA on January 10, 2020 (85 FR 1684), the Forest Service received a request from several organizations that it abandon or suspend its rulemaking effort pending the outcome of CEQ's rulemaking effort.

Response: The Forest Service has coordinated with CEQ throughout the Forest Service's rulemaking process. Partially as a result of CEQ's revised regulations, the Forest Service's final rule is of limited scope and amends its regulations to add only new and expanded CEs and the DNA provision. On November 10, 2020, CEQ issued a letter stating that CEQ has reviewed this rule and has found it to be in conformity with NEPA and CEQ regulations (per 40 CFR 1507.3). Where existing Agency NEPA procedures are inconsistent with CEQ's revised regulations, CEQ's revised regulations shall apply (see 40 CFR 1507.3(a)). As explained above, the Forest Service will review its NEPA

regulations and initiate another rulemaking process as required by CEQ's revised regulations.¹

Comment: Commenters disagreed with the discussion of costs and benefits of the proposed rule in its accompanying **Federal Register** notice and stated that the determination did not consider all potential costs. Commenters contend that faster decision-making, especially if it eliminates some opportunities for public input, will often result in worse decisions. This, in turn, will increase the overall amount of time spent on projects due to delays from litigation or re-analysis. Comments suggest that spending more time on NEPA analysis will ensure the analysis is of higher quality. Additionally, some commenters argue that there are no efficiencies to be gained in completing a project under a CE instead of an EA, and that CEs take less time only because projects analyzed under a CE are generally of smaller size than those analyzed in an EA.

Response: The amendments in the final rule are more limited in scope than the Forest Service's proposed rule. The Agency has updated the discussion of cost and benefits of the final rule consistent with these changes (see the *Executive Order 12866* section). The final rule does not address existing Agency public involvement practices concerning CEs.

The notion that CEs are no more efficient than EAs runs counter to the Agency's experience that less-detailed NEPA documentation takes less time to complete than more-detailed NEPA documentation. Indeed, this claim by commenters similarly runs contrary to the whole design of the NEPA regulations since their inception and continuing up through the 2020 CEQ NEPA regulations. Specifically, there are three levels of NEPA review, each of which requires successively more documentation and analysis than the prior level: Determination of whether a CE applies, completion of an EA, and completion of an EIS. See 40 CFR 1501.3(a) (describing these three levels); see also 40 CFR 1501.4(a) (2019) (noting how these three levels interrelate).

Nevertheless, the Agency compared the days from project initiation to decision for the 68 sample EAs used to develop the restoration CE to the 140 projects completed under the CE in Section 603 of the Healthy Forests

Restoration Act since its establishment. The Section 603 CE, like the restoration CE, has a maximum project size in the thousands of acres and covers an array of activities, including several similar activities. Using the 68-EA sample, the median time to complete an EA per 1000 acres was 186 days. Conversely, the median time to complete a decision memo using the Section 603 CE per 1000 acres was 111 days. This analysis supports the Agency's premise that CEs represent a more timely and efficient form of NEPA compliance.

Comment: Comments suggest that the Forest Service should focus on addressing causes of agency inefficiency in environmental decision-making (e.g., funding, staffing, training, internal policies and consistency, and agency culture).

Response: The Agency recognizes that factors outside of its NEPA regulations also contribute to inefficiency in environmental analysis and decision-making. In late 2017, the Agency announced its Environmental Analysis and Decision-Making change effort, which intends to reduce the time and cost of environmental analysis and decision-making processes to produce efficient, effective, and high-quality land management decisions. The scope of this change effort includes and extends beyond revising the Agency's NEPA regulations. The Environmental Analysis and Decision-Making change effort includes, for example: A new, national NEPA training program; formation of National Historic Preservation Act and Endangered Species Act task forces to identify and implement efficiencies; compliance performance metrics for leadership; production of an environmental analysis and decision-making information library and network sharing platform; and development of a contracting center of excellence.

Section 220.4 General Requirements (Determination of NEPA Adequacy)

Comment: Some commenters stated that use of Determinations of NEPA Adequacy (DNAs) would curtail effective analysis and public input by relying on non-site-specific, potentially outdated information, and that the Bureau of Land Management (BLM) model is not appropriate for the Agency. Commenters requested the concept be eliminated or that additional sideboards be applied to ensure it is applied correctly. Commenters also requested that the Forest Service provide more details for when a previous NEPA analysis can satisfy NEPA requirements for a subsequent action, such as geographical considerations (e.g.,

¹ CEQ has determined that the categorical exclusions contained in agency NEPA procedures as of September 14, 2020, are consistent with the new CEQ regulations. See § 1507.3. The Forest Service notes its concurrence that its existing categorical exclusions are consistent with the 2020 CEQ NEPA regulations.

location, scale); temporal considerations (e.g., previous decision date); and current and desired conditions considerations. Comments also stated that DNAs should require public input and documentation. Alternatively, comments expressed support for the use of DNAs to expedite agency action by reducing redundant analyses of substantially similar proposed actions with substantially similar impacts. Some comments also urged that the proposed rule should more closely follow BLM guidance and language for DNAs.

Response: Section 220.4(i) of the proposed rule added the DNA provision, which outlines a process for determining whether a previously completed Forest Service NEPA analysis can satisfy NEPA's requirements for a subsequently proposed action. The proposed DNA review process required consideration of the following factors: The similarity between the prior decision and the proposed actions, the adequacy of the alternatives to the proposed action, any significant new circumstances or information since the prior decision, and the adequacy of the impact analysis for the proposed action.

The final rule retains and clarifies the DNA provision at § 220.4(j). A DNA documents the responsible official's review and determination whether a NEPA analysis prepared for a prior activity can satisfy NEPA's requirements for a new proposed action that is substantially the same. For example, approval of a special use permit for a commercial fishing derby at a lake on NFS lands could rely on NEPA documentation prepared for the same or similar event the year before. If the elements outlined at § 220.4(j)(1) are not met for the proposed action currently under consideration, the DNA provision should not be used.

The Forest Service has modelled its DNA regulation after provisions of the BLM's NEPA procedures and is consistent with CEQ's NEPA regulations (40 CFR 1500.4(p), 1501.12, 1502.9(d)(4), and 1506.3). CEQ's regulations require elimination of duplication, encourage incorporation by reference, allow reevaluation of prior NEPA analyses, and allow adoption of other agencies' NEPA documentation. BLM uses DNAs in association with previously prepared BLM NEPA documents. The Forest Service intends the use of DNAs to be in line with BLM's practice and will operate as essentially an "internal adoption" mechanism to be used when a new proposed action is substantially the same as an alternative analyzed in a prior Forest Service NEPA document.

The BLM's DNA mechanism also allows officials to use DNAs to document that no supplementation of an EIS or EA is required. However, the Forest Service will continue to use its Supplemental Information Reports (see FSH 1909.15, sec. 18) to assess new information and changed circumstances rather than use DNAs for such purposes consistent with 40 CFR 1502.9(d)(4).

As requested by some commenters, the final rule revises § 220.4(j) to more closely align with language from the Department of the Interior and the BLM. However, § 220.4(j)(1)(i) uses "substantially the same" instead of the BLM's use of "essentially similar" to describe the required relationship of the new proposed action to the previously analyzed proposed action. This change aligns with CEQ's related adoption provision, 40 CFR 1506.3, as described above.

The final rule also clarifies that, in order to use a DNA, the responsible official must determine that each of the elements set out at § 220.4(j)(1) are met. In addition, the final rule clarifies at § 220.4(j)(2) that proposed actions undergoing a DNA review shall be included on the Schedule of Proposed Actions; be subject to scoping; be subject to administrative review processes that were applicable to the prior decision; and include issuance of a new decision document.

Section 220.6 Categorical Exclusions

Comment: Commenters expressed both general support and opposition to the use or expansion of CEs, as described in the proposed rule. Those in favor stated the new CEs will help the Agency conduct its NEPA review of projects in a more timely and efficient manner, supported the analysis done to substantiate the proposed CEs, and expressed confidence that responsible officials will use CEs appropriately. Those in opposition believed that the proposed CEs involved actions that would or could have significant effects, maintained that many or all proposed actions should undergo detailed analysis and public involvement, or that responsible officials would have too much discretion under the proposed CEs.

Response: The Agency has noted the comments providing general support or opposition. Comments specific to a certain CE are addressed below in additional responses. Administratively established CEs are a valid form of NEPA review. The CEQ regulations direct that for efficiency, agencies shall identify in their agency NEPA procedures categories of actions that normally do not have a significant effect

on the human environment, and therefore do not require preparation of an environmental assessment or environmental impact statement (40 CFR 1501.4).

The Forest Service is establishing new CEs in the final rule pursuant to CEQ's implementing regulations at 40 CFR 1507.3. On November 10, 2020, CEQ issued a letter stating that CEQ has reviewed this rule and has found it to be in conformity with NEPA and CEQ regulations (per 40 CFR 1507.3). The Forest Service has prepared a supporting statement for the CEs that outlines the process the Forest Service followed to substantiate the establishment of the CEs. This document is titled, "Supporting Statement: Categorical Exclusions For Certain Special Uses, Infrastructure, and Restoration Projects," and is available at <https://www.fs.fed.us/emc/nepa/revisions/index.shtml>. Specific responses to comments raised on the supporting statements are also addressed in later sections of this notice.

Categorical exclusions provide an efficient tool to complete the NEPA environmental review process for proposals that normally do not require EAs or EISs. The use of CEs can reduce paperwork and delay, so that EAs or EISs are targeted toward proposed actions where significant environmental impacts are uncertain or anticipated.

Consistent with CEQ regulations, the application of non-statutory Forest Service CEs is limited by "extraordinary circumstances," in which a normally excluded action may have a significant effect (40 CFR 1501.4). Activities conducted under Agency CEs must be consistent with Agency procedures and must comply with all applicable Federal and State laws for protecting the environment. Management direction set forth in Forest Service land management plans also provides important parameters. Land management plans help ensure that potential environmental effects have been taken into account through the consistency requirement set forth in the National Forest Management Act and USDA's implementing regulations (16 U.S.C. 1604(i); 36 CFR 219.15) directing projects and activities be consistent with plan direction or be accounted for through project-specific amendments.

Listing a category of actions as able to be categorically excluded in the agency's NEPA regulations does not constitute a final conclusive determination regarding the appropriate level of NEPA review for a specific proposed action. Listing a category of actions creates an initial presumption

that a CE, rather than an EA or an EIS, is normally appropriate to support approval of the listed actions. The extraordinary circumstances review, interdisciplinary process, or public input can result in the determination to prepare an EA or an EIS.

The Forest Service made several modifications to the final rule regarding CEs as a result of public comment. The proposed CEs for converting unauthorized roads and trails to National Forest System roads and trails, as presented in the proposed rule at § 220.5(e)(23) and (25), were not carried forward in the final rule due to public concerns about whether establishment of those CEs could encourage the creation of unauthorized roads and trails. Additionally, the final rule includes modifications to the restoration CE (§ 220.6(e)(25)); the roads CEs (§ 220.6(e)(23) and (24)); and the special uses CEs (§ 220.6(d)(11) and (12) and § 220.6(e)(3)). Specific changes made to the CEs are discussed further in the responses to comments below and the Supporting Statement.

Comment: Some commenters asked the Forest Service to review all existing CEs and consider increasing their limits. Other commenters suggested the Forest Service is required to review all CEs for their potential for significant effects before proposing additional CEs.

Response: The Agency has exercised its discretion in defining the scope of the current rulemaking process and in electing to pursue additional CEs for special uses, infrastructure, and restoration consistent with its program needs. The Agency believes these program areas present the best opportunities for increasing efficiency in the Agency's NEPA procedures in furtherance of producing efficient, effective, and high-quality land management decisions that will timely accomplish work on the ground consistent with its statutory mission and authorities and be more responsive to the public. Focused consideration on establishing CEs for individual program activities is consistent with past agency practice to develop CEs (see, e.g., Oil and Gas Activities (72 FR 7391), Special Use Authorizations (69 FR 40591), Soil and Water Restoration Activities (78 FR 56153); Limited Timber Harvest (68 FR 44598)).

Comment: Beyond the additional and modified CEs identified in the proposed rule, commenters also asked that the Forest Service incorporate new CEs for a variety of activities, including grazing and range-related activities, vegetation management plans and vegetation management activities, watershed and

other research projects, land exchanges, and mineral exploration.

Response: The Agency appreciates the public interest expressed in identifying additional opportunities for CEs. While the Agency has elected to maintain the rulemaking's focus on special uses, infrastructure, and restoration, this does not preclude the agency from examining additional opportunities for improvement through additional reviews. For example, the Forest Service recently announced in the Spring 2020 Unified Agenda of Regulatory and Deregulatory Actions its intent to update its CE for rangeland management improvement projects at § 220.6(e)(9) to incorporate modern range management practices (see <https://www.reginfo.gov/public/do/eAgendaViewRule?pubId=202004&RIN=0596-AD46>).

Comments on New and Revised CEs Not Requiring Documentation in a Project or Case File and Decision Memo

Comment: Many comments expressed support for the CE in paragraph (d)(11) of the proposed rule, along with the Agency's goals to expedite processing of special use authorizations and reduce confusion in implementation of existing CEs in paragraphs (d)(10) and (e)(15). Some commenters requested limiting this CE to recreation special uses, requiring documentation in a decision memo, requiring public involvement, or adding additional examples of actions that would be covered by the CE.

Response: The final rule consolidates two similar existing CEs regarding special use authorizations into a new category at § 220.6(d)(11). The Forest Service agrees that consolidation of CEs at §§ 220.6(d)(10) (covering amendment to or replacement of an existing special use authorization) and (e)(15) (covering issuance of a new special use authorization for a new term to replace an existing or expired special use authorization) of the existing regulations will reduce confusion and increase efficiency in use of the CE for special use authorizations. The Forest Service has extensive experience using these CEs. A review of use of the CE at § 220.6(e)(15) from fiscal years 2012–2016 demonstrates that responsible officials have been relying on this CE appropriately, well within its constraints. From fiscal years 2012 through 2016, category (e)(15) was used 1,584 times (roughly 317 times per year). A review of these projects indicated that the CE is being used as intended and within its limiting factors. Because the new, consolidated CE is limited to actions to replace an existing authorization where there are no changes to the authorized facilities or

increases in the scope or magnitude of the authorized activities, the Agency has determined that documentation with a decision memo or project file is not required. An applicant or holder also must continue to comply with the terms and conditions of the existing special use authorization.

Some of the examples of actions covered by the CE have been clarified, but the list of examples for the category is not intended to be exhaustive, and additional examples have not been incorporated into the final rule. Outdated terms such as “electric transmission line” and “powerline,” which were used during development of the proposed rule, have been replaced with “powerline facility” to match recent revisions to the Agency's special use regulations (36 CFR part 251). Additional examples requested by commenters covering changes to the terms and conditions of an authorization that require Forest Service approval have not been added to the final rule because these examples are outside the scope of the existing and consolidated CEs. The CE in paragraph (d)(11) has also not been limited to recreation special uses as requested by some commenters. The existing CEs encompass both recreation and non-recreation special uses; limiting the consolidated CE to recreation special uses would undercut the Agency's efficiency goals.

Comment: Some commenters expressed support for the new CE at § 220.5(d)(12) of the proposed rule because it will increase NEPA efficiency related to recreation special use permits. Additionally, some commenters agreed that issuance of an outfitting and guiding permit where the use supported by the outfitter and guide is already allowed in the area should not have significant environmental effects and would be appropriate to cover under a CE. Many commenters requested that the final rule limit this CE to recreation special uses, provide further clarification on where activities covered by the CE could occur, and provide additional examples of activities covered by the CE. Some commenters also requested that the CE require a decision memo or interpreted the language related to land management plan consistency in the proposed CE to mean that a NEPA analysis would not occur. Some commenters more generally opposed issuance of special use permits being analyzed under a CE and that issuance of special use permits should always be subject to a higher level of environmental review and public input.

Response: The final rule retains this CE at § 220.6(d)(12) and makes some

edits to the language used in the proposed rule. The final rule clarifies that the CE in paragraph (d)(12) is limited to recreation special uses. The final rule also revises the CE to clarify that it is limited to recreation special uses that occur on existing roads or trails, in existing facilities, at existing recreation sites, or in areas where the activities supported by recreation special uses are allowed. The intent of the CE is to facilitate issuance of recreation special use permits where the activities supported by those permits are already occurring or allowed on a noncommercial basis. In general, there is no difference in environmental impacts between recreational activities conducted by the general public and recreational activities led by an outfitter and guide. As a result, the final rule retains this CE under those administrative categories that do not require documentation in a decision memo. Agency proposed actions that rely on this CE, like all of the agency's proposed actions subject to NEPA, must be consistent with the land management plan and all other laws, regulations, and policies. This includes compliance with the Endangered Species Act, Clean Water Act, and National Historic Preservation Act.

Comments on New and Expanded CEs Requiring Documentation in a Project or Case File and Decision Memo

Comment: Some commenters opposed the proposed rule's expansion of the existing special use authorization CE at § 220.6(e)(3) from 5 to 20 acres, on the grounds that this change would quadruple the existing acreage subject to the CE, which would result in significant effects. Some commenters stated that the rationale for expanding the CE was insufficient. Tribes and Tribal organizations expressed concern that this CE could adversely affect sacred and cultural sites. Several commenters supported expansion of the CE.

Response: At § 220.6(e)(3), the final rule retains the expansion of the CE from 5 to 20 acres and retains the removal of the words "contiguous" and "minor." These words were removed in the proposed rule to improve clarity and reduce confusion for Agency personnel in determining when the CE can be used. The final rule also modifies the list of examples for this CE to add clarity and reduce redundancy with other CEs. For example, subparagraph (vii) of the former version of the CE ("[a]pproving the continued use of land where such use has not changed and no change in the physical environment or facilities are proposed") largely was

redundant with the two existing CEs now consolidated at § 220.6(d)(11). The types of activities covered under the expanded CE are very similar to those covered under the existing CE. The final supporting statement provides additional information justifying the Agency's conclusion that expanding the CE from 5 to 20 acres will not result in significant impacts. The Agency reviewed 62 EAs, findings of no significant impact, and decision notices for proposed actions like those that would be covered by this CE. The average acreage authorized by these decisions was 41.9 acres. The modest expansion to 20 acres is well below this figure. Based on the agency's history with using the existing CE and the information presented in the supporting statement, the Forest Service has determined that the expansion of the CE is justified.

The Forest Service recognizes the importance of consultation and coordination with Tribes consistent with E.O. 13175, which imposes requirements independent of compliance with NEPA. The Forest Service also will continue to ensure that Tribal consultation occurs on individual projects as required by Agency policy. Additionally, American Indian and Alaska Native religious or cultural sites and archaeological sites or historic properties or areas will be considered as part of the extraordinary circumstances review applicable to all CEs. See 36 CFR 220.6(b)(vi), (vii).

Comment: Some commenters opposed expansion of the existing CE at § 220.6(e)(20) because they believed that such an expansion would allow for closure of roads and trails without any public involvement. Other commenters requested notice, coordination, and consultation with county and local governments and raised concerns about compliance with the National Historic Preservation Act. Some commenters requested additional information regarding use of this CE in relation to the Forest Service's travel management rule at 36 CFR part 212. Other commenters expressed support for the expansion of the CE and agreed with the Agency's finding that the actions and environmental impacts for restoration of lands occupied by a NFS road or NFS trail are generally the same as when restoration occurs for lands occupied by an unauthorized road or unauthorized trail.

Response: The final rule retains the proposed rule's expansion of this CE at § 220.6(e)(20) to include decommissioning of NFS roads and NFS trails, as well as unauthorized roads and trails. The inclusion of NFS roads and

NFS trails in the CE will help accomplish restoration objectives on national forests and grasslands, address road and trail maintenance backlogs, and help the Agency maintain compliance with long-standing policies that require decommissioning of unneeded roads and trails. Regardless of whether the activity undertaken is the restoration of lands occupied by an NFS road or NFS trail or unauthorized road or trail, the actions and environmental impacts are generally the same and not significant.

Proposed actions covered by this CE would be developed in compliance with the travel analysis process and the travel management rule. The Agency uses travel analysis to identify the minimum road system, including unneeded NFS roads and NFS trails. Travel analysis is a dynamic, interdisciplinary, science-based process that examines ecological, social, cultural, and economic concerns. Information from the travel analysis process is used to inform future travel management decisions at the project level. In particular, travel management decisions identify whether a route needs to be added or removed, if an NFS trail or NFS road needs to be constructed, or if a route needs to be decommissioned.

Prior to determining if an NFS road or NFS trail could be decommissioned using this CE, the NFS road or NFS trail would need to be identified as unneeded and eligible for decommissioning through the travel analysis and travel management processes. Appropriate compliance with the requirements of the National Historic Preservation Act is independent of compliance with NEPA, and not dependent on whether a CE, EA, or EIS is prepared for the latter.

This CE will not be used to make access decisions about which roads and trails are to be designated open for public use, or which will be closed from public use. This CE will allow the Forest Service to restore, rehabilitate, or stabilize lands more efficiently where public access is not currently permitted, e.g., for roads and trails that are already closed. This approach is consistent with the initial development and establishment of this CE (see 78 FR 56157).

Comment: Some commenters supported the proposed rule's new CE regarding administrative sites because it would add efficiency to their overall management and help the Agency address deferred maintenance of administrative facilities. Some commenters stated that the CE was written too broadly. Other commenters stated that the CE overlaps with an existing CE that does not require a

decision memo and that this CE would result in unnecessary work and documentation.

Response: At § 220.6(e)(21), the final rule adopts the proposed rule's CE regarding administrative sites. The existing CE for repair and maintenance of administrative sites at 36 CFR 220.6(d)(3) of the final rule is unaffected by the new CE at 36 CFR 220.6(e)(21). The existing CE was established on September 18, 1992 (57 FR 43180), and the **Federal Register** notice for the final rule states that the CE is intended for routine repair and maintenance. Current Forest Service directives define "maintenance" as "an activity that entails preserving, insofar as practical, the original condition of Forest Service-owned buildings and related facilities" (Forest Service Handbook (FSH) 7309.11, Zero Code). Repair is defined as "the refurbishment or replacement of existing facility components with the same kind of materials for the purpose of maintaining the original condition and function while returning the facility to a sound state" (FSH 7309.11, Zero Code).

The new CE in paragraph (e)(21) allows activities beyond routine repair and maintenance at existing administrative sites. Many of the Forest Service's administrative facilities need reconstruction or major repair, could be decommissioned, or may be subject to disposal. The new CE will increase NEPA efficiency associated with improving existing facilities to provide for both employee and public safety and decommissioning or disposing of administrative facilities to reduce the Agency's footprint. The CE in the final rule is limited to activities within an existing administrative site as defined in section 502(1) of Public Law 109-54 (119 Stat. 559; 16 U.S.C. 580d note). Proposed actions covered by this CE will also be subject to established Agency processes for facilities management, including facility master planning.

Comment: Several commenters expressed opposition to the proposed rule's recreation sites CE at § 220.5(e)(22) on the grounds that it is too broad, that the actions covered could result in significant effects, and that changes to recreation sites should require public input and review. Some commenters argued that certain activities covered under this CE should require analysis under an EA or EIS to ensure consideration of social needs through analysis of multiple alternatives.

Response: The final rule retains the new recreation site CE at § 220.6(e)(22). The Forest Service provides access to

roughly 29,700 recreation sites. This CE will increase efficiency in NEPA compliance for proposed actions to improve existing recreation sites that are in decline or pose safety or resource concerns.

The CE is limited to existing recreation sites and covers construction, reconstruction, decommissioning, or disposal of buildings, infrastructure, or existing improvements, including infrastructure or improvements that are adjacent or connected to an existing recreation site and provide access or utilities for that site. The CE does not cover development of new recreation sites. The CE would be used alongside other established Agency processes for recreation and facilities planning.

CEQ regulations define a CE as a category of actions that the agency has determined normally do not have a significant effect on the human environment. CEQ regulations further explain that social effects are not intended by themselves to require preparation of an EIS (40 CFR 1502.16(b)). However, social needs are considered during the recreation site planning process and development of a recreation site design narrative, which precede development of a specific proposed action for which this CE potentially would apply. Additionally, as noted above, this CE is limited to activities at existing recreation sites and does not encompass development of new recreation sites.

During development of this CE, the Forest Service reviewed previously analyzed projects that focused on recreation management and evaluated similar CEs in use by other agencies that manage public recreation sites and facilities. The Agency has determined that the activities covered by this CE will not result in significant effects. Further information and rationale are provided in the supporting statement.

Comment: Comments on the proposed rule's road construction CE at § 220.5(e)(24) were mixed. Those commenters in favor of the CE highlighted the beneficial effects of increasing access and public safety and addressing the Agency's backlog of road reconstruction and rehabilitation. Some of these commenters requested that the CE not have any mileage limitation. Other commenters supported certain road-related activities, such as realignment and culvert and bridge rehabilitation, but only if those activities benefitted fish and aquatic species.

Some commenters stated that the activities covered by the road construction CE would cause erosion and sedimentation and impacts on

water quality and aquatic habitats. Commenters also stated that including construction of new roads in a CE would hamper the Agency's ability to maintain its existing roads. Some of these commenters requested reducing the mileage limits for all road activities.

More generally, commenters requested that the Agency clarify public involvement associated with projects that would be supported by this CE, coordination with state agencies, the CE's relation to travel management, the meaning of terms of like "open" and "close" in this context and the difference between the proposed CE and the existing CE for repair and maintenance of roads.

Response: The proposed rule included a CE for construction or realignment of up to 5 miles of NFS roads, reconstruction of up to 10 miles of NFS roads and associated parking areas, opening or closing an NFS road, and culvert or bridge rehabilitation or replacement along NFS roads. The inclusion of two mileage limits with a single list of examples created confusion. As a result, the final rule divides the proposed rule's roads CE into two separate CEs at §§ 220.6(e)(23) and (24). Each of these CEs applies only to NFS roads. The CE in paragraph (e)(23) covers up to 8 miles of certain road management activities and cannot be used for construction and realignment. The CE in paragraph (e)(24) covers road construction and realignment on up to 2 miles of NFS roads and associated parking areas.

The reduced road mileages in these two CEs are the result of consideration of public comment and additional review conducted by the Agency. As the Agency developed these two CEs, it narrowed the focus of its analysis of previously completed projects from broad, general project purposes to more specific project activities. Specifically, the Agency conducted an additional search of its NEPA database for previously completed projects to define appropriate mileage limitations for each of the CEs. This additional analysis is described in greater detail in the supporting statement.

Also based on additional review and analysis and in response to public comments, the Agency removed the example of opening or closing a road. Additionally, the Agency removed references to culvert rehabilitation and replacement because those activities are covered under the existing CE at 36 CFR 220.6(e)(18) of the final rule. The data used to establish these CEs is included in the supporting statement.

The Forest Service has an existing CE at 36 CFR 220.6(d)(4) of the final rule for

repair and maintenance of roads, trails, and landline boundaries. That CE is intended to be used for routine maintenance of NFS roads and includes no mileage limit and no requirement for documentation in a decision memo. The new CEs established in the final rule cover NFS road management activities that go beyond routine repair and maintenance but have been demonstrated by the Agency's experience not to have significant effects.

In addition to adhering to the mileage limitations, determining that extraordinary circumstances do not exist, and requiring documentation in a decision memo, the responsible official incorporates design features as a standard operating procedure to avoid or minimize resource impacts. Examples of design features that are routinely incorporated are listed in the supporting statement. Design features to prevent impacts from erosion and sedimentation may include requiring road locations to be reviewed by an Agency watershed specialist, requiring erosion control measures in accordance with state department of transportation requirements, or minimizing erosion and removing sediment by capturing and filtering runoff before it leaves the project limits. Additional examples of design features have been added to the supporting statement.

All proposed actions covered under the CEs in paragraphs (e)(23) and (24) must be consistent with applicable travel management decisions. The travel management rule at 36 CFR part 212, subpart A, was promulgated in 2005 and established requirements for administration of the forest transportation system. The Forest Service uses travel analysis to identify the minimum road system. Travel analysis is a dynamic, interdisciplinary, science-based process that examines ecological, cultural, social, and economic concerns. Information from the travel analysis process is used to inform future travel management decisions at the project level. Travel analysis is used to identify whether a road needs to be added to the forest transportation system or decommissioned.

The CEs do not apply to decisions to add roads to the forest transportation system. Rather, once the Agency has determined that a road needs to be constructed during the travel management decision process, a CE could be used to comply with NEPA for the actual road construction. As explained above, the final rule does not address or reduce existing Agency

public involvement practices concerning CEs.

Restoration and Resilience CE Comments

Comment: The Agency received many comments covering a wide range of topics related to the restoration CE included in the proposed rule at § 220.5(e)(26). Some commenters supported the establishment of a restoration CE to help the Agency expedite activities to restore National Forest System lands and increase forest and grassland resilience. Other comments opposed the proposed restoration and resilience CE on general grounds or opposed specific elements of the CE.

Response: The Agency notes the general support or opposition regarding the restoration and resilience CE. The final rule retains a modified version of the CE covering restoration and resilience activities at § 220.5(d)(25). Specific comments and the resulting modifications from the proposed rule are addressed below.

Comment: Several comments on the proposed restoration and resilience CE concerned its scope or included activities. Some commenters requested that clearer examples be provided and that the Agency focus on practices instead of outcomes. Some supportive commenters requested removal of the limitation that commercial and non-commercial harvest activities be allowed only in conjunction with another restoration activity.

Some commenters expressed the general sentiment that the CE is too broad and needs narrowing definitions and limitations. Other commenters stated that the CE would allow activities not focused on restoration. Some commenters requested that either timber harvest generally, or salvage harvest in particular, should be prohibited because such activities are not always associated with restoration or scientific literature did not support such treatments use for restoration or resilience purposes.

Response: Following the public comment period, the Forest Service convened a group of Agency scientists to review the body of literature submitted in public comments specific to the proposed restoration CE. This review, combined with input from other Agency subject matter experts in the watershed, wildlife, and forest management program areas, resulted in changes to the restoration CE in the final rule.

In the final rule, the Agency has narrowed the scope of the category of permissible activities. The final rule requires all activities conducted under

the CE have a primary purpose of meeting restoration objectives or increasing forest and grassland resilience. "Primary purpose" is a well understood operational term both within the Agency and by the public. This adjustment is responsive to concerns that the category focus on outcomes, as well as concerns regarding the use of certain tools that may be used to achieve restoration and resilience goals.

The primary purpose requirement is further amplified in paragraph (ii)(B), which limits qualifying thinning and harvesting activities to those designed to achieve ecological restoration or resilience objectives. Permissible projects may generate secondary or ancillary multiple use benefits other than restoration and resilience. Such is the nature of multiple use management. However, restoration and resilience must be the project's primary objective. Because the final rule adopts a primary purpose requirement, the final rule removes the provision that would have required commercial or non-commercial timber harvest activities to be carried out in combination with at least one additional restoration activity.

The Agency will rely on its standard definition of restoration in applying the category. (Restoration is "the process of assisting the recovery of an ecosystem that has been degraded, damaged, or destroyed. Ecological restoration focuses on reestablishing the composition, structure, pattern, and ecological processes necessary to facilitate terrestrial and aquatic ecosystems sustainability, resilience, and health under current and future conditions. Functional restoration focuses on the underlying processes that may be degraded, regardless of the structural condition of the ecosystem." (FSH 1909.12 and 36 CFR 219.19)).

The final rule clarifies the list of activities to meet restoration and resilience objectives at paragraph (i). These include stream restoration, aquatic organism passage rehabilitation, or erosion control; invasive species control and reestablishment of native species; prescribed burning; reforestation; road and/or trail decommissioning (system and non-system); pruning; vegetation thinning; and timber harvesting. The restoration CE allows timber harvest because timber harvest is a general term that encompasses removal of trees for a variety of purposes. The restoration CE requires harvest activities to be designed to achieve ecological restoration objectives. The CE will not be available for projects designed primarily to achieve economic returns. The

commercial sale of timber harvested via use of the CE is permissible, but as discussed above, only where commercial value is a secondary or ancillary benefit to the primary restoration activity.

Similarly, the Agency has added a limitation to the vegetation thinning and timber harvesting activities provision disallowing salvage harvesting under the restoration and resilience CE. The Agency defines salvage harvest as the removal of dead trees or damaged or dying trees due to injurious agents other than competition, to recover value that would otherwise be lost (FSM 2470). The effects of salvage harvest and its relation to restoration and resilience depend on a variety of factors. The exclusion of salvage harvest from the restoration CE does not mean that salvage harvest cannot be used to achieve restoration or resilience objectives in other contexts or under other categorical exclusions (see, for example, the existing salvage harvest CE at § 220.6(e)(13)). Nor does it imply that the effects of salvage harvest are significant under NEPA.

Comment: Some commenters supported the acreage limits in the proposed restoration CE. Other commenters argued that the acreage limits in the proposed restoration CE would allow for potentially significant effects, questioned their basis, or argued that the supporting statement did not demonstrate that allowing 4,200 acres of commercial or noncommercial harvest would not result in significant effects. Still other commenters requested removing express acreage limits entirely or expanding the acreage limit for all listed activities to 7,300 acres.

Response: The proposed restoration CE would have allowed activities to improve ecosystem health, resilience, and other watershed conditions on up to 7,300 acres. If commercial/non-commercial timber harvest activities were proposed, those aspects of the project were not to exceed 4,200 of the 7,300 acres.

The Agency reviewed information submitted in public comments, conducted a science review, and reviewed the original project data on which the limitations in the proposed rule were based. Based on that review, the final rule's restoration CE at § 220.6(e)(25) allows activities to improve ecosystem health, resilience, and other watershed conditions on up to 2,800 acres. This revision is described in more detail below in the discussion of the supporting statement for the CE. In general, the 2,800-acre limitation better accounts for the effects of outliers in the sampled EA data set, better

reflects the average size of projects from the sampled EAs, and also aligns with average acreages of specific activities in the sampled EA data set for which some commenters had concerns regarding the degree of impacts (such as commercial timber harvest).

Comment: Some commenters supported establishment of the proposed CE and the analysis set forth in the supporting statement associated with the proposed rule and stated that the Agency had provided a strong rationale for the CE. Other commenters questioned the findings that the CE will not result in significant adverse impacts, stating that the supporting statement was insufficient and not supported by science or other benchmarks. Some of these commenters questioned the adequacy of the monitoring information presented, disagreed with reliance on forest plan standards and best management practices to prevent significant effects, questioned how agency experts or cited research papers were used to develop the CE, and argued that the Agency's analysis of sampled EAs did not support the size of the restoration CE in the proposed rule.

Response: The Agency has carefully considered all comments submitted concerning the proposed restoration and resilience CE and made adjustments that refine the terms and parameters for the category. The agency has revised its supporting statement to include more details related to the acreage data and monitoring information. The Agency has revised its acreage calculations to address sampled EAs in order to account for projects with multiple activities occurring per acre. The revised calculations more accurately reflect a net project acreage versus gross total activity acres. The supporting statement now includes a table clearly identifying the source of the acreage data. The appendix of previously implemented projects has also been updated to demonstrate how acreages were calculated.

In response to public comment, the supporting statement for the final rule now includes additional discussion of the project development process and the interactions between proposal development, responsible official engagement, best management practices, design features, extraordinary circumstances, and forest plan compliance. The supporting statement also includes examples of design features that are typically incorporated into a proposed action for activities covered under the CE. The supporting statement also includes additional information related to monitoring and

how professional experts were engaged in the development of the CE.

Comment: Some commenters requested that a public participation or collaboration element should be added to the restoration CE.

Response: The Agency has added a collaboration requirement to the restoration CE at § 220.6(e)(25)(ii)(A): "Projects shall be developed through a collaborative process that includes multiple interested persons representing diverse interests." The Agency has had success working with various types of collaborative processes. This requirement is intended to be flexible, accommodate a variety of collaborative approaches, and does not require convening a formal collaborative group.

Comment: The Forest Service received a variety of comments regarding the road limitations in the proposed restoration and resilience CE. Comments included suggestions to increase the road mileages for construction of permanent and temporary roads, removing road construction from the CE, and questioning why the road mileage limitations for the restoration CE differed from those in the CE proposed rule's road construction CE at 36 CFR 220.5(e)(24).

Response: In the final rule, § 220.6(e)(25) includes adjusted road mileage limitations and addressed reconstruction within the framework of construction limits. The restoration CE allows construction and reconstruction of permanent roads up to 0.5 miles; and construction of temporary roads up to 2.5 miles. The restoration and resilience CE requires all temporary roads to be decommissioned no later than 3 years after the date the project is completed. The final rule also clarifies that the category allows repair and maintenance of NFS roads and trails to prevent or address resource impacts.

Some commenters were confused about the road limitations of the CE and how they compare to the limitations of other CEs. A frequent comparison was the limitation of construction of permanent roads of 0.5 miles when the proposed rule also included a proposed CE that would allow five miles of permanent road construction.

The proposed rule's use of different road mileage limitations reflected the purpose of the individual CE and the agency's experience in managing those activities categories. These two CEs were developed independently based on different supporting data and have different focuses. The restoration and resilience CE was developed with a focus on activities that improve overall ecosystem health and restore national

forests and grasslands. The roads management CE was developed with a focus on road management activities to address access issues and resource impacts; it has a narrower scope than the restoration CE. In the final rule the road management CE was also modified, and the mileage limitations have been lowered to 2 miles for permanent road construction.

Forest Service CEs are independently established, as has been the case with historical agency practice concerning development and use of CEs. The activities covered by, or limitations in, a particular CE do not constrain or limit the operation of any other CE. Likewise, more than one CE may apply to an activity. Integrated, multiple-use management activities, which are designed to accomplish management goals that often cross administrative program boundaries, can fit within multiple CEs.

Regulatory Certifications

National Environmental Policy Act

The final rule amends agency regulations for implementing NEPA. Forest Service NEPA procedures assist in the fulfillment of agency responsibilities under NEPA but are not the agency's final determination of what level of NEPA analysis is required for a particular proposed action. This rule would not authorize any activity or commit resources to a project that may affect the environment. This rule does not have any reasonably foreseeable impact on the environment, nor does the rule authorize or prohibit any action that would have any effect on the environment. The CEQ set forth the requirements for establishing agency NEPA procedures in its regulations at 40 CFR 1507.3. The CEQ regulations do not require agencies to prepare a NEPA analysis before establishing or updating agency NEPA procedures. The determination that establishing agency NEPA procedures does not require NEPA analysis and documentation has been upheld in *Heartwood, Inc. v. U.S. Forest Service*, 230 F.3d 947, 954–55 (7th Cir. 2000).

Energy Effects

The final rule has been reviewed under Executive Order 13211, Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use. It has been determined that the final rule does not constitute a significant energy action as defined in the Executive Order.

Consultation and Coordination With Indian Tribal Governments

The Forest Service considered this final rule in compliance with E.O. 13175, Consultation and Coordination with Indian Tribal Governments. On June 13, 2019, the agency initiated a 120-day consultation period. This period was extended an additional 26 days, based on requests from some Tribes. The Forest Service also considered input from Tribes received after this period. Twenty-eight federally and non-federally recognized Tribes submitted written comments and/or participated in regional tribal meetings.

While some Tribes expressed support for the proposed rule, many Tribes expressed concern over how the rule would impact the Agency's responsibility to consult with Tribes on federal actions. Specifically, many were concerned that the proposed rule's addition of CEs and elimination of the scoping requirement for CEs and EAs would reduce opportunities for tribal engagement.

In response, the Forest Service maintains and reiterates its commitment to ensuring that Tribal consultation occurs for individual projects as appropriate pursuant to Forest Service Manual 1560 and Forest Service Handbook 1509.13. This regulatory revision makes no change to Tribal consultation. Further as discussed above, the final rule is of limited scope and amends the Forest Service NEPA regulations to include only new and expanded CEs and the DNA provision. Projects and activities supported by environmental assessments remain subject to project-level pre-decisional administrative review process ("objections" process) at 36 CFR part 218, which requires notice and a designated opportunity for comments.

The Agency acknowledges that it shares a government-to-government relationship with Tribes that differs from its relationship with the general public. The final rule does not change the Forest Service's Tribal consultation obligations.

Executive Order 12866

This rule has been reviewed under USDA procedures and Executive Order (E.O.) 12866 issued September 30, 1993, on regulatory planning and review. The Office of Management and Budget (OMB) has determined that this is a significant rule as defined by E.O. 12866 and therefore subject to interagency review.

A more timely and efficient process will reduce administrative costs. There are many benefits and costs associated

with the rule; however, they are not quantifiable with available data. Benefits (or cost reductions) derived from timely and focused environmental analysis, flexibility in preparation of environmental documents, and improved decision-making indicate a positive net benefit of the rule. The direct benefits of the rule are, therefore, reduced costs and time spent on environmental analysis.

For example, by implementing the Determination of NEPA Adequacy (DNA) provision, the Agency anticipates reductions in time and cost as a result of reducing redundant analyses. These efficiencies may reduce total Agency costs and decision-making time. These concepts, however, will take some time to become well established and widely used; potential benefits will occur over time.

The rule also establishes 5 new CEs that require a decision memo. Focusing on the new CEs, the Agency assumes for the purpose of this analysis, based on average use of its existing CEs, that each new CE may be used an average of 1 to 30 times per year. Under these assumptions, the rule may potentially result in 5 to 150 decision memos per year being completed in lieu of a decision notice.

From Fiscal Years 2014 to 2019, the Agency's average annual environmental analysis workload included approximately 1,588 CE determinations and 266 EAs. This six-year span includes the most recent data available. The average time to decision for CEs was 204 days and for EAs was 707 days. As a result, the Agency may complete NEPA analysis on proposed actions using the new CEs an average of 1 to 17 months earlier, per proposed action. In practice, these figures will vary dependent upon the proposed action and the particular CE being applied.

The Forest Service has combined and modified some existing CEs with this rulemaking to reduce confusion and better capture Agency proposed actions that do not normally have significant environmental effects. This, in turn, allows for timelier decision-making. Specifically, combining CEs at § 220.6(d)(10) (not requiring a decision memo) and § 220.6(e)(15) (requiring a decision memo) of the existing regulations, which both covered administrative actions on special use permits, eliminates confusion among Agency staff over which CE applies and reduces administrative workload by not requiring a decision memo. Expanding the acreage of special uses on which the existing CE at § 220.6(e)(3) can be applied from 5 acres to 20 acres, as well as expanding the roads and trails on

which the existing CE at § 220.6(e)(20) can be applied, are practical, common sense changes that increase Agency NEPA efficiency.

While CEs replace the more costly use of EAs, several factors contribute to the determination of the most appropriate form of NEPA analysis. In general, qualifying projects that in the past would have been analyzed under an EA may now rely upon the new CEs, but responsible officials retain discretion to use another form of NEPA analysis.

DNAs will further reduce the number of EAs undertaken each year, as Agency staff make use of this tool rather than defaulting to preparing a second EA. However, the Agency expects that use of the DNA provision will be modest at least in the first several years of its establishment.

The Agency anticipates use of DNAs and of the new CEs to slowly increase over time, taking into account time for adoption across the agency as has been observed during implementation of new CEs, statutory categorical exclusions and exceptions over the course of the past several years.

Executive Order 13771

The final rule has been reviewed in accordance with E.O. 13771 on reducing regulation and controlling regulatory costs and is considered an E.O. deregulatory action. The impacts of the final rule are as discussed above.

Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as not a 'major rule', as defined by 5 U.S.C. 804(2).

Regulatory Flexibility Act

The Regulatory Flexibility Act, as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, and Executive Order 13272 require an agency to prepare a regulatory flexibility analysis of a rule if the rule is subject to notice and comment under the Administrative Procedure Act. The final rule directly affects only the Forest Service. Forest Service NEPA procedures assist in the fulfillment of agency responsibilities under NEPA; the final rule does not impose any requirements on small entities. While small entities represent some applicants for special use authorizations that would now be covered by the CEs at §§ 220.6(d)(11) and (12) and 220.6(e)(3), this is a negligible indirect effect only to certain small entities. Not all applicants are small entities and, moreover, the timing of a special use authorization depends

on several factors beyond NEPA compliance, including compliance with other laws and incomplete information provided by the applicant. Therefore, the USDA Under Secretary for Natural Resources and Environment certifies that the rule will not have a significant economic impact on a substantial number of small entities.

Federalism

The Agency has considered this final rule under the requirements of Executive Order 13132, Federalism. The Agency has concluded that the rule conforms with the federalism principles set out in this Executive Order; will not impose any compliance costs on the states; and will not have substantial direct effects on the States or the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, the Agency has determined that no further assessment of federalism implications is necessary.

No Takings Implications

This rule has been analyzed in accordance with the principles and criteria contained in Executive Order 12630, Governmental Actions and Interference with Constitutionally Protected Property Rights, and it has been determined that the rule does not pose the risk of a taking of protected private property.

Civil Justice Reform

This final rule has been reviewed under E.O. 12988, Civil Justice Reform. Under the final rule, (1) all State and local laws and regulations that conflict with this final rule or impede its full implementation will be preempted; (2) no retroactive effect is given to this final rule; and (3) the rule will not require the use of administrative proceedings before parties could file suit in court challenging its provisions.

Unfunded Mandates Reform Act

Pursuant to Title II of the Unfunded Mandates Reform Act (UMRA) of 1995 (2 U.S.C. 1531–1538), the Agency has assessed the effects of the final rule on State, local, and Tribal governments, and the private sector. This final rule would not compel the expenditure of \$100 million or more by any State, local, or Tribal government, or anyone in the private sector. Therefore, this final rule is not subject to the requirements of section 202 and 205 of the UMRA.

Controlling Paperwork and Burdens on the Public

This final rule does not contain any additional recordkeeping or reporting requirements or other information collection requirements as defined in 5 CFR part 1320 that are not already required by law, or are not already approved for use, and therefore imposes no additional paperwork burden on the public. Accordingly, the review provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*) and its implementing regulations at 5 CFR part 1320 do not apply.

List of Subjects in 36 CFR Part 220

Administrative practices and procedures, Environmental impact statements, Environmental protection, National forests, Science and technology.

Therefore, for the reasons set forth in the preamble, part 220 of title 36 of the Code of Federal Regulations is amended as follows:

PART 220—NATIONAL ENVIRONMENTAL POLICY ACT (NEPA) COMPLIANCE

■ 1. The authority citation for part 220 continues to read as follows:

Authority: 42 U.S.C. 4321 *et seq.*; E.O. 11514; 40 CFR parts 1500–1508; 7 CFR part 1b.

■ 2. Amend § 220.4 by adding paragraph (j) to read as follows:

§ 220.4 General requirements.

* * * * *

(j) *Determination of NEPA Adequacy (DNA).* (1) An existing environmental analysis prepared pursuant to NEPA and the Council on Environmental Quality regulations may be used in its entirety for a new proposed action if the Responsible Official determines that the existing NEPA analysis adequately assesses the environmental effects of the proposed action and reasonable alternatives. The responsible official must determine and document that each of the following elements is met:

(i) The new proposed action is substantially the same as a previously analyzed proposed action or alternative analyzed in detail in the existing NEPA analysis.

(ii) The range of alternatives analyzed in the existing NEPA document(s) is appropriate with respect to the new proposed action.

(iii) Any new information or circumstances relevant to environmental concerns would not substantially change the analysis in an existing NEPA document(s).

(iv) The environmental effects that would result from implementation of the new proposed action are similar to those analyzed in the existing NEPA document(s).

(2) A DNA for a new proposed action shall be included in the project record for the new proposed action. Proposed actions undergoing a DNA review shall:

- (i) Be included on the SOPA;
- (ii) Be subject to scoping;
- (iii) Be subject to pre-decisional administrative review, if applicable; and
- (iv) Include issuance of a new decision document (decision memo, decision notice, or record of decision) when approved.

■ 3. Amend § 220.6 by:

- a. Removing and reserving paragraph (d)(10);
- b. Adding paragraphs (d)(11) and (12);
- c. Removing “through (17)” and adding “through (25)” in its place in paragraph (e) introductory text;
- d. Revising paragraph (e)(3);
- e. Removing and reserving paragraphs (e)(10) and (15);
- f. Revising paragraph (e)(20); and
- g. Adding paragraphs (e)(21) through (25).

The additions and revisions read as follows:

§ 220.6 Categorical exclusions.

* * * * *

(d) * * *

(11) Issuance of a new special use authorization to replace an existing or expired special use authorization, when such issuance is to account only for administrative changes, such as a change in ownership of authorized improvements or expiration of the current authorization, and where there are no changes to the authorized facilities or increases in the scope or magnitude of authorized activities. The applicant or holder must be in compliance with all the terms and conditions of the existing or expired special use authorization. Subject to the foregoing conditions, examples include but are not limited to:

- (i) Issuing a new authorization to replace a powerline facility authorization that is at the end of its term;
- (ii) Issuing a new permit to replace an expired permit for a road that continues to be used as access to non-NFS lands; and
- (iii) Converting a transitional priority use outfitting and guiding permit to a priority use outfitting and guiding permit.

(12) Issuance of a new authorization or amendment of an existing authorization for recreation special uses that occur on existing roads or trails, in

existing facilities, in existing recreation sites, or in areas where such activities are allowed. Subject to the foregoing condition, examples include but are not limited to:

- (i) Issuance of an outfitting and guiding permit for mountain biking on NFS trails that are not closed to mountain biking;
- (ii) Issuance of a permit to host a competitive motorcycle event;
- (iii) Issuance of an outfitting and guiding permit for backcountry skiing;
- (iv) Issuance of a permit for a one-time use of existing facilities for other recreational events; and
- (v) Issuance of a campground concession permit for an existing campground that has previously been operated by the Forest Service.

(e) * * *

(3) Approval, modification, or continuation of special uses that require less than 20 acres of NFS lands. Subject to the preceding condition, examples include but are not limited to:

- (i) Approving the construction of a meteorological sampling site;
- (ii) Approving the use of land for a one-time group event;
- (iii) Approving the construction of temporary facilities for filming of staged or natural events or studies of natural or cultural history;
- (iv) Approving the use of land for a utility corridor that crosses a national forest;
- (v) Approving the installation of a driveway or other facilities incidental to use of a private residence; and
- (vi) Approving new or additional communication facilities, associated improvements, or communication uses at a site already identified as available for these purposes.

* * * * *

(20) Activities that restore, rehabilitate, or stabilize lands occupied by roads and trails, including unauthorized roads and trails and National Forest System roads and National Forest System trails, to a more natural condition that may include removing, replacing, or modifying drainage structures and ditches, reestablishing vegetation, reshaping natural contours and slopes, reestablishing drainage-ways, or other activities that would restore site productivity and reduce environmental impacts. Examples include but are not limited to:

- (i) Decommissioning a road to a more natural state by restoring natural contours and removing construction fills, loosening compacted soils, revegetating the roadbed and removing ditches and culverts to reestablish natural drainage patterns;

(ii) Restoring a trail to a natural state by reestablishing natural drainage patterns, stabilizing slopes, reestablishing vegetation, and installing water bars; and

(iii) Installing boulders, logs, and berms on a road segment to promote naturally regenerated grass, shrub, and tree growth.

(21) Construction, reconstruction, decommissioning, relocation, or disposal of buildings, infrastructure, or other improvements at an existing administrative site, as that term is defined in section 502(1) of Public Law 109–54 (119 Stat. 559; 16 U.S.C. 580d note). Examples include but are not limited to:

- (i) Relocating an administrative facility to another existing administrative site;
- (ii) Construction, reconstruction, or expansion of an office, a warehouse, a lab, a greenhouse, or a fire-fighting facility;
- (iii) Surface or underground installation or decommissioning of water or waste disposal system infrastructure;
- (iv) Disposal of an administrative building; and
- (v) Construction or reconstruction of communications infrastructure.

(22) Construction, reconstruction, decommissioning, or disposal of buildings, infrastructure, or improvements at an existing recreation site, including infrastructure or improvements that are adjacent or connected to an existing recreation site and provide access or utilities for that site. Recreation sites include but are not limited to campgrounds and camping areas, picnic areas, day use areas, fishing sites, interpretive sites, visitor centers, trailheads, ski areas, and observation sites. Activities within this category are intended to apply to facilities located at recreation sites managed by the Forest Service and those managed by concessioners under a special use authorization. Examples include but are not limited to:

- (i) Constructing, reconstructing, or expanding a toilet or shower facility;
- (ii) Constructing or reconstructing a fishing pier, wildlife viewing platform, dock, or other constructed feature at a recreation site;
- (iii) Installing or reconstructing a water or waste disposal system;
- (iv) Constructing or reconstructing campsites;
- (v) Disposal of facilities at a recreation site;
- (vi) Constructing or reconstructing a boat landing;
- (vii) Replacing a chair lift at a ski area;
- (viii) Constructing or reconstructing a parking area or trailhead; and

(ix) Reconstructing or expanding a recreation rental cabin.

(23) Road management activities on up to 8 miles of NFS roads and associated parking areas. Activities under this category cannot include construction or realignment. Examples include but are not limited to:

(i) Rehabilitating an NFS road or parking area where management activities go beyond repair and maintenance;

(ii) Shoulder-widening or other safety improvements within the right-of-way for an NFS road; and

(iii) Replacing a bridge along an NFS road.

(24) Construction and realignment of up to 2 miles of NFS roads and associated parking areas. Examples include but are not limited to:

(i) Constructing an NFS road to improve access to a trailhead or parking area;

(ii) Rerouting an NFS road to minimize resource impacts; and

(iii) Improving or upgrading the surface of an NFS road to expand its capacity.

(25) Forest and grassland management activities with a primary purpose of meeting restoration objectives or increasing resilience. Activities to improve ecosystem health, resilience, and other watershed and habitat conditions may not exceed 2,800 acres.

(i) Activities to meet restoration and resilience objectives may include, but are not limited to:

(A) Stream restoration, aquatic organism passage rehabilitation, or erosion control;

(B) Invasive species control and reestablishment of native species;

(C) Prescribed burning;

(D) Reforestation;

(E) Road and/or trail decommissioning (system and non-system);

(F) Pruning;

(G) Vegetation thinning; and

(H) Timber harvesting.

(ii) The following requirements or limitations apply to this category:

(A) Projects shall be developed or refined through a collaborative process that includes multiple interested persons representing diverse interests;

(B) Vegetation thinning or timber harvesting activities shall be designed to achieve ecological restoration objectives, but shall not include salvage harvesting as defined in Agency policy; and

(C) Construction and reconstruction of permanent roads is limited to 0.5 miles. Construction of temporary roads is limited to 2.5 miles, and all temporary roads shall be decommissioned no later

than 3 years after the date the project is completed. Projects may include repair and maintenance of NFS roads and trails to prevent or address resource impacts; repair and maintenance of NFS roads and trails is not subject to the above mileage limits.

James E. Hubbard,

Under Secretary, Natural Resources and Environment.

[FR Doc. 2020–25465 Filed 11–18–20; 8:45 am]

BILLING CODE 3411–15–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R10–OAR–2019–0401; FRL–10016–18–Region 10]

Air Plan Approval; ID, Incorporation by Reference Updates and Rule Revisions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is approving the State Implementation Plan (SIP) revisions submitted by Idaho on June 5, 2019 and May 27, 2020. The submitted revisions update the incorporation by reference of specific Federal requirements and clarify source permitting requirements. The EPA finds that the changes are consistent with Clean Air Act requirements.

DATES: This final rule is effective December 21, 2020.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R10–OAR–2019–0401. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information or other information the disclosure of which is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available at <https://www.regulations.gov>, or please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information.

FOR FURTHER INFORMATION CONTACT: Kristin Hall (15–H13), EPA Region 10, 1200 Sixth Avenue (Suite 155), Seattle, WA 98101, (206) 553–6357, hall.kristin@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document wherever “we,” “us,” or “our” is used, it refers to the EPA.

Table of Contents

- I. Background
- II. Final Action
- III. Incorporation by Reference
- IV. Statutory and Executive Order Reviews

I. Background

On June 5, 2019 and May 27, 2020, Idaho submitted SIP revisions to update the incorporation by reference of Federal regulations and clarify permitting requirements. We proposed to approve the revisions on September 11, 2020 (85 FR 56196). The reasons for our proposed approval are included in the proposal and will not be restated here. The public comment period for our proposal closed on October 13, 2020. We received no public comments and are finalizing our action as proposed.

II. Final Action

The EPA is approving and incorporating by reference revisions to the Idaho SIP submitted on June 5, 2019, and May 27, 2020. Once effective, the Idaho SIP will include the following regulations:

- IDAPA 58.01.01.006.108, definition of “Significant” (State effective 4/11/2019);
- IDAPA 58.01.01.107, Incorporation by Reference, except section 107.03.f through 107.03.p (State effective 3/30/2020);
- IDAPA 58.01.01.221, Category I Exemption (State effective 4/11/2019);
- IDAPA 58.01.01.222, Category II Exemption (State effective 4/11/2019); and
- IDAPA 58.01.01.404, Procedure for Issuing Permits (State effective 4/11/2019).

The EPA is also approving Idaho’s request to remove the following regulations from the Idaho SIP:

- IDAPA 58.01.01.845, Rules for Control of Sulfur Oxide Emissions from Sulfuric Acid Plants (State effective 5/1/1994);
- IDAPA 58.01.01.846, Emission Limits (State effective 4/5/2000);
- IDAPA 58.01.01.847, Monitoring and Testing (State effective 5/1/1994); and
- IDAPA 58.01.01.848, Compliance Schedule (State effective 4/5/2000).

III. Incorporation by Reference

In this document, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR

51.5, the EPA is finalizing the incorporation by reference of Idaho regulatory provisions as described in section II of this preamble. Also, in this document, the EPA is removing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, we are finalizing the removal of Idaho regulatory provisions from incorporation by reference as described in section II of this preamble. The EPA has made, and will continue to make, these materials generally available through <https://www.regulations.gov> and at the EPA Region 10 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information). Therefore, these materials have been approved by the EPA for inclusion in the SIP, have been incorporated by reference by the EPA into that plan, are fully Federally-enforceable under sections 110 and 113 of the CAA as of the effective date of the final rulemaking of the EPA's approval, and will be incorporated by reference in the next update to the SIP compilation.¹

IV. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves State law as meeting Federal requirements and does not impose additional requirements beyond those imposed by State law. For that reason, this action:

- Is not a "significant regulatory action" subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);
- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

The SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and it will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal**

Register. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 19, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. See section 307(b)(2).

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: November 2, 2020.

Christopher Hladick,
Regional Administrator, Region 10.

For the reasons set forth in the preamble, 40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart N—Idaho

- 2. Amend § 52.670, in the table in paragraph (c) by:
- a. Revising the entries "006", "107", "221", "222", and "404"; and
 - b. Removing the entries "845", "846", "847", and "848".

The revisions read as follows:

§ 52.670 Identification of plan.

[EPA–R09–OAR–2019–0498; FRL–10015–31–Region 9]

Air Quality Implementation Plan; California; Calaveras County Air Pollution Control District and Mariposa County Air Pollution Control District; Stationary Source Permits

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finalizing revisions to the Calaveras County Air Pollution Control District (CCAPCD) and the Mariposa County Air Pollution Control District (MCAPCD) portions of the California State Implementation Plan (SIP). In this action, we are approving

two rules, one submitted by the CCAPCD and the other by the MCAPCD, governing the issuance of permits for stationary sources, focusing on the preconstruction review and permitting of major sources and major modifications under part D of title I of the Clean Air Act (CAA or “the Act”).

DATES: These rules will be effective on December 21, 2020.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA–R09–OAR–2019–0498. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information the disclosure of which is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <https://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER**

INFORMATION CONTACT section for additional availability information. If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Amber Batchelder, EPA Region IX, 75 Hawthorne St., San Francisco, CA 94105. By phone: (415) 947–4174 or by email at batchelder.amber@epa.gov.

SUPPLEMENTARY INFORMATION: Throughout this document, the terms “we,” “us,” and “our” refer to the EPA.

- III. EPA Action
- IV. Incorporation by Reference
- V. Statutory and Executive Order Reviews

I. Proposed Action

On July 20, 2020 (85 FR 43785), the EPA proposed to approve the following rules into the California SIP.

TABLE 1—SUBMITTED RULES

District	Rule or regulation No.	Rule title	Adopted	Submitted ¹
Calaveras County APCD	Rule 428	NSR Requirements for New and Modified Major Sources in Nonattainment Areas.	03/12/19	04/05/19
Mariposa County APCD	Regulation XI	NSR Requirements for New and Modified Major Sources in the Mariposa County Air Pollution Control District.	03/12/19	04/05/19

On April 12, 2019, the EPA determined that the California SIP submittals listed above in Table 1 met the completeness criteria in 40 CFR part 51, appendix V, which must be met before formal EPA review.²

For areas designated nonattainment for one or more National Ambient Air Quality Standards (NAAQS), the applicable SIP must include preconstruction review and permitting requirements for new or modified major stationary sources of such nonattainment pollutant(s) under part D of title I of the Act, commonly referred to as Nonattainment New Source Review (NNSR). The rules listed in Table 1 contain the Districts' respective NNSR permit programs applicable to new and modified major sources located in areas designated nonattainment for any ozone NAAQS. These rules also contain the Districts' respective requirements for the review of new major stationary sources or major modifications in a designated nonattainment area that may have an impact on visibility in any mandatory Class I Federal Area in accordance with 40 CFR 51.307. We proposed to approve these rules into the California SIP because we determined that they comply with the relevant CAA requirements. Our proposed action contains more information on the rules and our evaluation.

II. Public Comments and EPA Responses

The EPA's proposed action provided a 30-day public comment period. During this period, we received two comments, which are included in the docket for this action. We do not consider these comments to be germane or relevant to this action, thus these comments are not adverse to this action. Moreover, the comments lack the required specificity to the proposed SIP revisions and the relevant CAA requirements, and do not address the specific regulations or provisions in question or recommend an action on the SIP submission different from what EPA proposed. Therefore, we are finalizing our action as proposed.

III. EPA Action

No comments were submitted that change our assessment of the rules as described in our proposed action. We

continue to find that CCAPCD Rule 428 and MCAPCD Regulation XI satisfy the relevant requirements for a CAA NNSR program for ozone, as well as the associated visibility requirements for sources subject to review under such a program in accordance with 40 CFR 51.307. Therefore, as authorized in section 110(k)(3) and 301(a) of the Act, the EPA is finalizing approval of CCAPCD Rule 428 and MCAPCD Regulation XI. This action incorporates the submitted rules into the California SIP. In conjunction with the EPA's SIP approval of the Districts' respective visibility programs for sources subject to the NNSR program, this action also revises the scope of the visibility Federal Implementation Plan (FIP) at 40 CFR 52.28 in California so that this FIP no longer applies to sources located in the CCAPCD and MCAPCD that are subject to these District visibility programs, while clarifying that the FIP continues to apply in these and other areas within California to sources located on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction.

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of the rules listed in Table 1 of this preamble. The EPA has made, and will continue to make, these materials available electronically through <https://www.regulations.gov> and in hard copy at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Additional information about these statutes and Executive orders can be found at <http://www.epa.gov/laws-regulations/laws-and-executive-orders>.

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);

- Is not an Executive Order 13771 (82 FR 9339, February 3, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;

- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);

- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);

- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);

- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);

- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);

- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and

- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will

¹ Each submittal was transmitted to the EPA via a letter from the California Air Resources Board (CARB) dated April 3, 2019.

² See letter dated April 12, 2019 from Elizabeth J. Adams, US EPA Region 9, to Richard Corey, CARB, regarding the April 5, 2019 submittal of CCAPCD Rule 428; and letter dated April 12, 2019 from Elizabeth J. Adams, US EPA Region 9, to Richard Corey, CARB, regarding the April 5, 2019 submittal of MCAPCD Regulation XI.

submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 19, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Administrative practice and procedure, Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Nitrogen dioxide, Ozone, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: October 21, 2020.

John Busterud,

Regional Administrator, Region IX.

For reasons set out in the preamble, EPA amends 40 CFR part 52, chapter I, to read as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

■ 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

■ 2. Section 52.220 is amended by adding paragraph (c)(544) to read as follows:

§ 52.220 Identification of plan-in part.

* * * * *

(c) * * *

(544) The following regulations were submitted on April 5, 2019 by the Governor’s designee as an attachment to a letter dated April 3, 2019.

(i) *Incorporation by reference.*

(A) Calaveras County Air Pollution Control District.

(1) Rule 428, “NSR Requirements for New and Modified Major Sources in

Nonattainment Areas,” adopted on March 12, 2019.

(2) [Reserved]

(B) Mariposa County Air Pollution Control District.

(1) Regulation XI, “NSR Requirements for New and Modified Major Sources in the Mariposa County Air Pollution Control District,” adopted on March 12, 2019.

(2) [Reserved]

(ii) [Reserved]

* * * * *

■ 3. Section 52.281 is amended by revising paragraph (d) to read as follows:

§ 52.281 Visibility protection.

* * * * *

(d) The provisions of § 52.28 are hereby incorporated and made part of the applicable plan for the State of California, except for the air pollution control districts listed below. The provisions of § 52.28 remain the applicable plan for any Indian reservation lands, and any other area of Indian country where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction, located within the State of California, including any such areas located in the air pollution control districts listed below.

(1) Monterey County air pollution control district,

(2) Sacramento County air pollution control district,

(3) Calaveras County air pollution control district, and

(4) Mariposa County air pollution control district.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R05–OAR–2020–055; FRL–10016–32–Region 5]

Air Plan Approval; Ohio; Technical Amendment

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is finalizing the removal of the air pollution nuisance rule from the Ohio State Implementation Plan (SIP) using a Clean Air Act (CAA) error correction provision. EPA has determined that this rule was not relied upon by Ohio to demonstrate implementation, maintenance or

enforcement of any national ambient air quality standard (NAAQS). Upon the effective date of this action, the nuisance rule will no longer be part of the Ohio SIP.

DATES: This final rule is effective on December 21, 2020.

ADDRESSES: EPA has established a docket for this action under Docket ID No. EPA–R05–OAR–2020–0055. All documents in the docket are listed on the www.regulations.gov website. Although listed in the index, some information is not publicly available, *i.e.*, Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either through www.regulations.gov or at the Environmental Protection Agency, Region 5, Air and Radiation Division, 77 West Jackson Boulevard, Chicago, Illinois 60604. This facility is open from 8:30 a.m. to 4:30 p.m., Monday through Friday, excluding Federal holidays and facility closures due to COVID–19. We recommend that you telephone Rachel Rineheart, Environmental Engineer, at (312) 886–7017 before visiting the Region 5 office.

FOR FURTHER INFORMATION CONTACT:

Rachel Rineheart, Environmental Engineer, Air Permits Section, Air Programs Branch (AR–18)), Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604, (312) 886–7017, rineheart.rachel@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document whenever “we,” “us,” or “our” is used, we mean EPA.

I. What is the background for this action?

The CAA was first enacted in 1970. Section 110(a)(1) required each state to submit to EPA a SIP that provided for the implementation, maintenance and enforcement of the NAAQS. In the 1970s and early 1980s, thousands of state and local agency regulations were submitted to EPA for incorporation into SIPs, ostensibly to fulfill the new Federal requirements. In many cases, states submitted entire regulatory air pollution programs, including many elements not required by the CAA. Due to time and resource constraints, EPA’s review of these submittals focused primarily on the rules addressing the new substantive requirements of the CAA, and we approved many other

elements into the SIP with minimal review. We now recognize that some of these elements may be appropriate for state and local agencies to adopt and implement, but should not become federally enforceable SIP requirements; these include rules that prohibit air pollution nuisances. Such rules generally have no connection to the purposes for which SIPs are developed and approved, namely the implementation, maintenance, and enforcement of the NAAQS.

Ohio rule AP-2-07, “Air pollution nuisances prohibited,” was approved by EPA into the Ohio SIP on April 15, 1974. *See* 39 FR 13542. Subsequently, Ohio amended and renumbered the rule as OAC 3745-15-07 and submitted it as a revision to the SIP. EPA approved the amended rule on August 13, 1984. *See* 49 FR 32182. OAC 3745-15-07 prohibits the “emission or escape into the open air from any source or sources whatsoever, of smoke, ashes, dust, dirt, grime, acids, fumes, gases, vapors, odors, or any other substances or combinations of substances, in such manner or in such amounts as to endanger the health, safety or welfare of the public, or cause unreasonable injury or damage to property.”

On March 23, 2020, EPA proposed, under the authority of section 110(k)(6) of the CAA, to remove Ohio’s nuisance rule from the Ohio SIP because it does not have a reasonable connection to the attainment and maintenance of the NAAQS and EPA erred in approving it as part of the Ohio SIP.

II. Response to Comments Received on the Proposed Rule

EPA received some comments that were political in nature or that were otherwise beyond the scope of this action (*i.e.*, related to climate change, water quality, or other non-NAAQS related issues), and EPA will not be responding to these comments. Adverse comments that were germane to the action and EPA’s response to those comments are summarized below.

A. Extension of Comment Period

EPA’s notice of proposed rulemaking (NPRM) was published in the **Federal Register** on March 23, 2020, with a 30-day comment period ending April 22, 2020. *See* 85 FR 16309. The timing of publication coincided with the Ohio Department of Health Director’s Stay at Home Order, issued on March 22, 2020. EPA received four requests for an extension to the public comment period citing difficulties in communicating with and organizing interested parties, limited access to supporting information, and lack of childcare due

to the COVID-19 pandemic and the Stay at Home Order. Three requests sought a 60-day extension and one request sought an extension to May 13, 2020. On April 22, 2020, EPA granted a 30-day extension to the comment period to May 22, 2020. *See* 85 FR 22378. No additional requests for extension were received.

B. Comments Supporting the Removal of Ohio’s Nuisance Rule From the SIP

EPA received comments in support of EPA’s NPRM from the Ohio Chamber of Commerce, the Ohio Chemistry Technology Council, The Ohio Manufacturers’ Association, API Ohio, and the Ohio Oil and Gas Association.

C. Comments Opposing the Removal of Ohio’s Nuisance Rule From the SIP

EPA received comments opposing the removal of the Ohio nuisance rule from the Sierra Club, the Ohio Environmental Council, Ohio Citizen Action, Altman Newman Co. LPA, the National Resources Defense Council, and more than 1800 individual commenters who submitted their comments as part of a letter-writing campaign. The following discussion provides a summary of the comments received and EPA’s response to each comment.

Comment 1: Commenters had requested a 60-day extension of the April 22, 2020, deadline for comments, while EPA granted a 30-day extension until May 22, 2020. The commenters state: “During the revised comment period there has been no opportunity for neighbors and community groups to learn about this action, to meet face-to-face to discuss its implications, or to even seek public records because public offices have been closed and unable to produce documents. Furthermore, the press has been understandably focused on the immediately life-threatening pandemic. These circumstances have had a particularly devastating impact on the rights of poor and minority communities to learn of EPA’s proposed action and to comment on citizen concerns.”

Response: SIPs are rulemaking actions under the Administrative Procedure Act, which does not specify a period for public comment. However, a 30-day period is consistent with most SIP actions proposed by EPA and with the intent of Congress as reflected in CAA section 307(h) (42 U.S.C. 7607(h)), which governs certain Federal administrative proceedings. It should be noted that EPA is not required to specifically notify any particular entity of its rulemaking actions; notification of all parties is accomplished through publications in the **Federal Register**.

EPA published the NPRM to remove Ohio’s nuisance rule in the **Federal Register** and initially provided 30 days for public comment. As stated previously, the publication of EPA’s NPRM coincided with the Stay at Home Order in Ohio due to the COVID-19 pandemic. Based on the generalized concerns identified by commenters, including difficulty communicating with interested parties and issues with childcare, EPA granted a 30-day extension of the comment period. Although generally claiming, for example, that during the extended comment period there has been “no opportunity” to “seek public records because public offices have been closed,” the commenters did not identify any public records that would have been sought or explained how such records might have been relevant, and have made no showing of any attempt to obtain any such records. Moreover, EPA’s original NPRM and NPRM extension did not limit the ability of any interested party to request an additional extension based on updated or more detailed concerns, but no additional request for extension was received after the NPRM 30-day extension.

Comment 2: EPA cannot lawfully eliminate Ohio Admin. Code 3745-15-07 from Ohio’s State Implementation Plan through the CAA’s error correction mechanism.

Response: Section 110(k)(6) of the CAA provides EPA with the authority to make corrections to actions that are subsequently found to be in error. *Alabama Environmental Council v. Administrator*, 711 F.3d 1277, 1286 (11th Cir. 2013) (“110(k)(6) provides an avenue for correcting a SIP revision approved in error”); see also *Ass’n of Irrigated Residents v. EPA*, 790 F.3d 934, 948 (9th Cir. 2015) (110(k)(6) is a “broad provision” enacted to provide the EPA with an avenue to correct errors). The key provisions of section 110(k)(6) for present purposes are that the Administrator has the authority to “determine” when a SIP approval was “in error,” and when the Administrator does so, may then revise the SIP approval “as appropriate,” in the same manner as the prior action, and do so without requiring any further submission for the state. *Id.* at 1288. Moreover, CAA section 110(k)(6) “confers discretion on the EPA to decide if and when it will invoke the statute to revise a prior action.” *Id.*; 790 F.3d at 948 (section 110(k)(6) grants

“EPA the discretion to decide when to act pursuant to that provision”).¹

While CAA section 110(k)(6) provides EPA with the authority to correct its own “error,” nowhere does this provision or any other provision in the CAA define what qualifies as “error.” Thus, EPA believes that the term should be given its plain language, everyday meaning, which includes all unintentional, incorrect or wrong actions or mistakes.

EPA has used CAA section 110(k)(6) as authority to make substantive corrections to remove a variety of provisions from SIPs that are not related to the attainment or maintenance of NAAQS or any other CAA requirement. *See, e.g., “Approval and Promulgation of Implementation Plans; Kentucky: Approval of Revisions to the State Implementation Plan,”* 75 FR 2440 (January 15, 2010) (correcting the SIP by removing a provision, approved in 1982, used to address hazardous or toxic air pollutants); “Approval and Promulgation of Implementation Plans; New York,” 73 FR 21546 (April 22, 2008) (issuing a direct final rule to correct a prior SIP by removing a general duty “nuisance provision” that had been approved in 1984); “Correction of Implementation Plans; American Samoa, Arizona, California, Hawaii, and Nevada State Implementation Plans,” 63 FR 34641 (June 27, 1997) (correcting five SIPs by deleting a variety of administrative provisions concerning variances, hearing board procedures, and fees that had been approved during the 1970s).

Comment 3: The proposed rule lacks any basis for the assertion that the air pollution nuisance rule in Ohio’s SIP was approved in error and thus fails to meet the plain text requirements for application of 110(k)(6).

Response: The NPRM published on March 23, 2020, 85 FR 16309, states that EPA is “proposing to remove Ohio’s nuisance rule from the Ohio SIP because it does not have a reasonable connection to the attainment and maintenance of

the NAAQS,” and that the “prior approval of OAC 3745–15–07 into the Ohio SIP was in error.” In addition, the NPRM stated that the Ohio Environmental Protection Agency (Ohio EPA) had confirmed that Ohio did not rely on and did not intend to rely on the provision for purposes of attainment or maintenance of the NAAQS.

CAA section 110(k)(6) does not define the term “error.” EPA believes that the term should be given its plain language, common meaning, such that an error is a mistake or an incorrect, wrong, or inaccurate action. Under section 110(k)(6) EPA must make an error determination and provide the “the basis thereof.” There is no indication that this is a substantial burden for the Agency to meet. To the contrary, the requirement is met if EPA clearly articulates the error and the basis thereof. *Ass’n of Irrigated Residents*, 790 F.3d at 948; *see also Alabama Environmental Council*, 711 F.3d at 1287–1288 (EPA must “articulate an ‘error’ and provide ‘the basis’” of its error determination, citing with approval EPA’s error articulation in another EPA action at 76 FR 25178 (May 3, 2011)).

Here, EPA articulated its error and provided the basis thereof: SIPs provide for the implementation, maintenance, and enforcement of the NAAQS; the Ohio nuisance rule is not associated with the implementation, maintenance, or enforcement of the NAAQS; and EPA’s previous approval in the SIP of the rule was erroneous. EPA’s exclusion from the SIP of a nuisance provision unrelated to attainment and maintenance of the NAAQS is consistent with previous Agency practice. EPA has removed nuisance provisions from several SIPs, including those for the State of Michigan, 64 FR 7790, Commonwealth of Kentucky (Jefferson County portion), 66 FR 53657, and the State of Nevada, 69 FR 54006. Additionally, EPA has issued final rules declining to approve nuisance provisions into SIPs. (See 45 FR 73696, 46 FR 11843, 46 FR 26303 and 63 FR 51833.)²

Comment 4: EPA’s approval of the Ohio nuisance rule was purposeful and not in error as demonstrated by the August 13, 1984, 49 FR 32182, approval of revisions to the nuisance rule and subsequent comments from EPA on title V permits issued in Ohio which state

that the nuisance rule is an applicable requirement under the SIP.

Furthermore, inclusion of the nuisance rule is so integral to the SIP that it has been included in every title V permit issued and every permit issued by Ohio since adoption.

Response: The permit comments related to the Ohio nuisance rule are correct in that the rule is currently in the SIP and therefore an “applicable requirement” under the title V operating permit program. Confirmation of the fact that the rule is part of the SIP in the permitting process has no bearing on the appropriateness of that rule for inclusion in the SIP. The determination of whether a state rule is appropriate for inclusion in the SIP is beyond the scope of the permitting process. Inclusion of the Ohio nuisance rule in state permits does not demonstrate that the rule is integral to the SIP which is limited in scope by the CAA to the implementation, maintenance, and enforcement of the NAAQS. To the contrary, as noted, the Ohio EPA indicated that the nuisance rule was not intended to address the attainment or maintenance of the NAAQS.

The fact that EPA approved a revision to the Ohio nuisance rule in 1984 does not make approval any less in error; rather, it merely indicates that EPA unfortunately repeated its error. Nor is it material whether the error was intentional (or, per the commenters, “purposeful”) or inadvertent. It was erroneous for EPA to approve, as part of the SIP, the non-NAAQS related nuisance rule, and EPA has the authority under section 110(k)(6) to correct that error.

Comment 5: States have the right to create regulations that are more stringent than the Federal requirements.

Response: EPA does not dispute a state’s right to create requirements that, as a matter of state law, are more stringent than the Federal requirements. Congress affirmed this principle in section 116 of the CAA. This does not, however, alter the fact that the requirements contained in SIP provisions are limited in scope by section 110(a) of the CAA. SIPs must provide for the implementation, maintenance, and enforcement of the NAAQS. Ohio’s nuisance rule has no nexus to these statutorily prescribed requirements.

Comment 6: The record for the proposed action states that EPA was taking action to promote the novel doctrine of “regional consistency.” Such a doctrine completely contradicts the well-established principle that SIPs are tailored by states to meet their specific

¹ CAA section 110(k)(6) was added to the CAA as part of the CAA Amendments of 1990. Prior to the addition of that subsection, there was no express provision in section 110 for EPA to correct erroneous actions, on its own initiative and without further State action. Indeed, prior to the addition of 110(k)(6), the United States Court of Appeals for the Third Circuit had held that EPA lacked the authority to modify a SIP to correct its mistakes, unless it followed the then-existing revision procedure involving State review and other action. *Concerned Citizens of Bridesburg v. EPA*, 836 F.2d 777 (1987). Although there is no statement in the legislative history of the CAA Amendments of 1990 that Congress specifically responded to *Concerned Citizens* in enacting 110(k)(6), it is telling that the addition 110(k)(6) effectively overruled that decision.

² Moreover, it is EPA’s longstanding position that measures to control non-criteria pollutants may not legally be made part of the SIP. See February 9, 1979, memorandum “Status of State/Local Air Pollution Control Measures Not Related to NAAQS,” from Michael A. James, Associate General Counsel Air, Noise and Radiation Division.

air pollution needs and desired protections.

Response: EPA believes that the commenter's reference to "the record" refers to a January 30, 2020, email from John Mooney, Acting Director, Air and Radiation Division, EPA, Region 5, to Robert Hodanbosi, Chief, Air Pollution Control, Ohio EPA (January email) that was placed in the docket for this rulemaking. It notes that similar provisions had already been removed from the SIPs of other Region 5 states, "because states did not rely on those provisions for attainment and maintenance of the NAAQS." The purpose of the email was to inquire whether Ohio had relied on its nuisance rule in attainment and maintenance of the NAAQS before proceeding with an error correction. The reference in the January email to other state actions merely notes that EPA has reached a similar conclusion in other rulemaking actions.

Comment 7: The public cannot precisely tell what the question asked regarding Ohio EPA's reliance on the nuisance rule for "attainment" or "maintenance" in the January email means.

Response: The January email and the Ohio EPA response were included in the docket for the proposed rulemaking. The January email was clear in its request that Ohio EPA confirm that it had not relied upon the nuisance rule in any aspect related to the attainment or maintenance of a NAAQS. In Ohio EPA's response, it specifically states that it had not relied on the nuisance rule for "SIP planning, nonattainment designations, redesignation requests, maintenance plans, and determination of nonattainment areas or their boundaries." EPA finds that Ohio EPA clearly understood the question being asked and clearly identified what was meant by "attainment" and "maintenance" in its response to EPA.

Comment 8: Commenters provided a declaration from William M. Auberle, a former official with the Regional Air Pollution Control Agency (RAPCA). Mr. Auberle states that he has direct knowledge of the inclusion of the Ohio nuisance rule in the Ohio SIP, that the nuisance rule is an important regulatory tool in achieving and maintaining the NAAQS, and that he personally used the nuisance rule while an official with RAPCA as an enforcement tool for achieving and maintaining the NAAQS.

Response: RAPCA is a bureau of the Division of Environmental Health within Public Health—Dayton and Montgomery County. It is a county agency that contracts with the Ohio EPA to enforce state and local air pollution

control regulations in a six-county region of Ohio. EPA does not dispute that state and local agencies may have used the nuisance rule to achieve reductions in criteria pollutants or the importance of the rule as a tool for local authorities in the protection of public health and welfare. However, using the nuisance rule to achieve criteria pollutant reductions is not equivalent to relying on the rule for SIP purposes, which may include SIP planning, nonattainment designations, redesignation requests, maintenance plans, and determination of nonattainment areas or their boundaries. Furthermore, Ohio EPA, the state agency responsible for development and implementation of the SIP, has stated that it did not find "any instances of the nuisance rule, OAC 3745–15–07, being relied upon, or intended to be relied upon, for attainment or maintenance of any NAAQS."

Comment 9: Congress intended citizen suits to be an integral part of CAA enforcement, including SIP enforcement. The NPRM ignores the important role of citizen suits in CAA enforcement.

Response: Congress limited the scope of SIPs required under section 110 of the CAA to the implementation, maintenance, and enforcement of the NAAQS. The purpose of this rulemaking action is to remove OAC 3745–15–07 from the Ohio SIP because it does not support such implementation, maintenance, and enforcement. This rulemaking action does not invalidate the Ohio law or affect its applicability to Ohio sources. Facilities located in Ohio are still subject to the state nuisance rule. While removal of this rule from the SIP would preclude its enforcement in Federal courts, it has no impact on the authority to bring citizen suits in state courts under state law.

Comment 10: Commenters state that the NPRM would harm already vulnerable Ohioans by eliminating an important environmental justice tool. Commenters also raise concerns with the potential impact on other sensitive populations such as children, the elderly, and individuals with various health issues including respiratory illnesses.

Response: The purpose of this rulemaking action is to remove OAC 3745–15–07 from the Ohio SIP because it is not related to the implementation, maintenance, and enforcement of the NAAQS. This rulemaking action does not invalidate the Ohio law or affect its applicability to Ohio sources. Facilities located in Ohio are still subject to the state nuisance rule. EPA supports

programs and activities that promote enforcement of health and environmental statutes in areas with minority populations and low-income populations and the protection of children, the elderly, and other vulnerable populations.

Comment 11: Several commenters note recent studies linking particulate matter pollution to an increased incidence of COVID–19 infection and the potential for increased adverse outcomes in areas with higher levels of air pollution. Commenters state that considering the current pandemic, EPA should not be relaxing air pollution requirements at this time.

Response: The purpose of this rulemaking action is to remove OAC 3745–15–07 from the Ohio SIP because it is not an element of a plan for the implementation, maintenance, and enforcement of the NAAQS. Consideration of the impacts of air pollution on COVID–19 cases is beyond the scope of section 110 of the CAA and, thus, beyond the scope of this rulemaking. Furthermore, this rulemaking action does not invalidate the Ohio nuisance law or affect its applicability to Ohio sources, which remain subject to the rule as a matter of state law.

Comment 11: The following comment was made by over 1800 individuals through a letter-writing campaign.

"I oppose the rollback of the nuisance provision of Ohio's Clean Air Act regulations.

The nuisance provision ensures that threats to Ohioans' health and safety are prohibited, no matter what, and allows Ohio residents to take local pollution problems into their own hands and protect their communities by taking polluters to court. Without this provision, it will be more difficult for Ohioans to address local pollution problems.

Eliminating this provision also destroys an important tool that gives both regulators and Ohio residents flexibility to address serious health concerns based on new scientific developments."

Response: The purpose of this rulemaking action is to remove OAC 3745–15–07 from the Ohio SIP because it is not an element of a plan for the implementation, maintenance, and enforcement of the NAAQS. This rulemaking action does not invalidate the Ohio nuisance law, affect its applicability to Ohio sources or preclude citizen suits in state court.

III. What action is EPA taking?

EPA has determined that OAC 3745–15–07 was not relied upon by Ohio to

demonstrate the implementation, maintenance, or enforcement of the NAAQS. Consequently, EPA finds that its prior approval of OAC 3745–15–07 into the Ohio SIP was in error. To correct this error, EPA is removing OAC 3745–15–07 from the approved Ohio SIP pursuant to section 110(k)(6) of the CAA, and codifying this removal by revising the appropriate paragraph under 40 CFR part 52, subpart KK, 52.1870 (Identification of Plan).

IV. Incorporation by Reference

In this document, EPA is amending regulatory text that includes incorporation by reference. As described in the amendments to 40 CFR part 52 set forth below, EPA is removing provisions of the EPA-Approved Ohio Regulations from the Ohio SIP, which is incorporated by reference in accordance with the requirements of 1 CFR part 51. EPA has made, and will continue to make the SIP generally available through www.regulations.gov and at the EPA Region 5 Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the CAA, the Administrator is required to approve a SIP submission that complies with the provisions of the CAA and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, EPA's role is to approve state choices, provided that they meet the criteria of the CAA. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 2, 2017) regulatory action because it is not a significant regulatory action under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely

affect small governments, as described in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4);

- Does not have federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the CAA; and
- Does not provide EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a “major rule” as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the CAA, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 19, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and

shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Carbon monoxide, Incorporation by reference, Intergovernmental relations, Lead, Nitrogen dioxide, Ozone, Particulate matter, Reporting and recordkeeping requirements, Sulfur oxides, Volatile organic compounds.

Dated: October 26, 2020.

Kurt Thiede,

Regional Administrator, Region 5.

For reasons set out in the preamble, 40 CFR part 52 is amended as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

§ 52.1870 [Amended]

- 2. In § 52.1870, the table in paragraph (c) is amended by removing the entry for “3745–15–07” under “Chapter 3745–15 General Provisions on Air Pollution Control”.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[EPA–R09–OAR–2019–0127; FRL–10014–90–Region 9]

Air Plan Approval; California; Sacramento Metropolitan Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: The Environmental Protection Agency (EPA) is taking final action to approve revisions to the Sacramento Metropolitan Air Quality Management District (SMAQMD) portion of the California State Implementation Plan (SIP). These revisions concern emissions of volatile organic compounds (VOCs) from the surface coating operations of plastic parts and products. We are approving a local rule to regulate these emission sources under the Clean Air Act (CAA or the “Act”), and we are approving a negative

declaration for a subcategory of a control techniques guidelines (CTG) source in the SMAQMD.

DATES: This rule will be effective on December 21, 2020.

ADDRESSES: The EPA has established a docket for this action under Docket ID No. EPA-R09-OAR-2019-0127. All documents in the docket are listed on the <https://www.regulations.gov> website. Although listed in the index, some information is not publicly available, e.g., Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on

the internet and will be publicly available only in hard copy form. Publicly available docket materials are available through <https://www.regulations.gov>, or please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section for additional availability information. If you need assistance in a language other than English or if you are a person with disabilities who needs a reasonable accommodation at no cost to you, please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

FOR FURTHER INFORMATION CONTACT: Arnold Lazarus, EPA Region IX, (415) 972-3024, lazarus.arnold@epa.gov.

SUPPLEMENTARY INFORMATION:

Throughout this document, “we,” “us” and “our” refer to the EPA.

Table of Contents

- I. Proposed Action
- II. Public Comments and EPA Responses
- III. EPA Action
- IV. Incorporation by Reference
- V. Statutory and Executive Order Reviews

I. Proposed Action

On July 23, 2020 (85 FR 44496), the EPA proposed to approve the following rule and negative declaration, listed in Table 1, into the California SIP.

TABLE 1—SUBMITTED RULE AND NEGATIVE DECLARATION

Local agency	Rule No.	Rule title	Adopted	Submitted
SMAQMD	468	Surface Coating of Plastic Parts and Products	03/22/2018	05/23/2018
SMAQMD	Negative Declaration for “Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings,” EPA-453/R-08-003, September 2008 (Pleasure Craft Coating Portion Only).	03/22/2018	6/11/2018

We proposed to approve this rule and negative declaration because we determined that they comply with the relevant CAA requirements. Our proposed action contains more information on the rule, the negative declaration and our evaluation.

II. Public Comments and EPA Responses

The EPA’s proposed action provided a 30-day public comment period. During this period, we received no comments.

III. EPA Action

Pursuant to section 110(k)(3) of the Act, and for the reasons set forth in the proposed rule and related technical support documents, the EPA is fully approving this rule and negative declaration into the California SIP.

IV. Incorporation by Reference

In this rule, the EPA is finalizing regulatory text that includes incorporation by reference. In accordance with requirements of 1 CFR 51.5, the EPA is finalizing the incorporation by reference of the SMAQMD rule described in the amendments to 40 CFR part 52 set forth below. The EPA has made, and will continue to make, these documents available through www.regulations.gov and at the EPA Region IX Office (please contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section of this preamble for more information).

V. Statutory and Executive Order Reviews

Under the Clean Air Act, the Administrator is required to approve a SIP submission that complies with the provisions of the Act and applicable Federal regulations. 42 U.S.C. 7410(k); 40 CFR 52.02(a). Thus, in reviewing SIP submissions, the EPA’s role is to approve state choices, provided that they meet the criteria of the Clean Air Act. Accordingly, this action merely approves state law as meeting Federal requirements and does not impose additional requirements beyond those imposed by state law. For that reason, this action:

- Is not a significant regulatory action subject to review by the Office of Management and Budget under Executive Orders 12866 (58 FR 51735, October 4, 1993) and 13563 (76 FR 3821, January 21, 2011);
- Is not an Executive Order 13771 (82 FR 9339, February 3, 2017) regulatory action because SIP approvals are exempted under Executive Order 12866;
- Does not impose an information collection burden under the provisions of the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*);
- Is certified as not having a significant economic impact on a substantial number of small entities under the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*);
- Does not contain any unfunded mandate or significantly or uniquely affect small governments, as described

in the Unfunded Mandates Reform Act of 1995 (Pub. L. 104-4);

- Does not have Federalism implications as specified in Executive Order 13132 (64 FR 43255, August 10, 1999);
- Is not an economically significant regulatory action based on health or safety risks subject to Executive Order 13045 (62 FR 19885, April 23, 1997);
- Is not a significant regulatory action subject to Executive Order 13211 (66 FR 28355, May 22, 2001);
- Is not subject to requirements of Section 12(d) of the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 272 note) because application of those requirements would be inconsistent with the Clean Air Act; and
- Does not provide the EPA with the discretionary authority to address, as appropriate, disproportionate human health or environmental effects, using practicable and legally permissible methods, under Executive Order 12898 (59 FR 7629, February 16, 1994).

In addition, the SIP is not approved to apply on any Indian reservation land or in any other area where the EPA or an Indian tribe has demonstrated that a tribe has jurisdiction. In those areas of Indian country, the rule does not have tribal implications and will not impose substantial direct costs on tribal governments or preempt tribal law as specified by Executive Order 13175 (65 FR 67249, November 9, 2000).

The Congressional Review Act, 5 U.S.C. 801 *et seq.*, as added by the Small

Business Regulatory Enforcement Fairness Act of 1996, generally provides that before a rule may take effect, the agency promulgating the rule must submit a rule report, which includes a copy of the rule, to each House of the Congress and to the Comptroller General of the United States. The EPA will submit a report containing this action and other required information to the U.S. Senate, the U.S. House of Representatives, and the Comptroller General of the United States prior to publication of the rule in the **Federal Register**. A major rule cannot take effect until 60 days after it is published in the **Federal Register**. This action is not a "major rule" as defined by 5 U.S.C. 804(2).

Under section 307(b)(1) of the Clean Air Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by January 19, 2021. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this action for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See section 307(b)(2).)

List of Subjects in 40 CFR Part 52

Environmental protection, Air pollution control, Incorporation by reference, Intergovernmental relations, Ozone, Particulate matter, Reporting and recordkeeping requirements, Volatile organic compounds.

Dated: September 25, 2020.

John Busterud,

Regional Administrator, Region IX.

For the reasons stated in the preamble, the EPA amends, part 52, Chapter I, Title 40 of the Code of Federal Regulations as follows:

PART 52—APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

- 1. The authority citation for part 52 continues to read as follows:

Authority: 42 U.S.C. 7401 *et seq.*

Subpart F—California

- 2. Section 52.220 is amended by adding paragraphs (c)(518)(i)(C) and (c)(543) to read as follows:

§ 52.220 Identification of plan-in part.

* * * * *

(c) * * *

(518) * * *

(i) * * *

(C) Sacramento Metropolitan Air Quality Management District.

(1) Rule 468, "Surface Coating of Plastic Parts and Products," adopted on March 22, 2018.

(2) [Reserved]

* * * * *

(543) Negative declaration for following AQMD was submitted on June 11, 2018 by the Governor's designee.

(i) [Reserved]

(ii) Additional materials.

(A) Sacramento Metropolitan Air Quality Management District.

(1) Negative Declaration for "Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings," EPA-453/R-08-003, September 2008 (Pleasure Craft Coating Portion Only), adopted March 22, 2018.

(2) [Reserved]

(B) [Reserved]

- 3. Section 52.222 is amended by adding paragraph (a)(2)(v) to read as follows:

§ 52.222 Negative declarations.

(a) * * *

(2) * * *

(v) Negative Declaration for "Control Techniques Guidelines for Miscellaneous Metal and Plastic Parts Coatings," EPA-453/R-08-003, September 2008 (Pleasure Craft Coating Portion Only) submitted on June 11, 2018 and adopted on March 22, 2018.

BILLING CODE 6560-50-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 622

[Docket No. 201112-0303]

RIN 0648-BK19

Fisheries of the Caribbean, Gulf of Mexico, and South Atlantic; Snapper-Grouper Fishery of the South Atlantic Region; Regulatory Amendment 27; Correction

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Final rule; correcting amendment.

SUMMARY: NMFS corrects the final rule that implemented management measures described in Regulatory

Amendment 27 (Regulatory Amendment 27) to the Fishery Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region (Snapper-Grouper FMP), which published in the **Federal Register** on January 27, 2020. That final rule modified management measures for commercially-caught red porgy in the South Atlantic exclusive economic zone (EEZ). In that final rule, NMFS inadvertently neglected to remove a regulation prohibiting the sale and purchase of red porgy during the months of January through April. The purpose of this correcting amendment is to fix that error.

DATES: This correction is effective November 19, 2020.

FOR FURTHER INFORMATION CONTACT: Mary Vara, Southeast Regional Office, NMFS, telephone: 727-824-5305, email: mary.vara@noaa.gov.

SUPPLEMENTARY INFORMATION: On January 27, 2020, NMFS published a final rule in the **Federal Register** (85 FR 4588) to implement revisions to commercial management measures contained in Regulatory Amendment 27 that included regulatory revisions for South Atlantic red porgy, among other measures for snapper-grouper species. That final rule became effective on February 26, 2020.

Correction

In the regulatory text of the final rule for Regulatory Amendment 27, NMFS inadvertently neglected to remove a prohibition on the sale and purchase of red porgy during the months of January through April in 50 CFR 622.192(f) that NMFS said it was removing.

The discussions in Regulatory Amendment 27, as well as the associated proposed and final rules, were clear that the existing measure that prohibits the sale and purchase of red porgy from January through April was being removed. Thus, through this correcting amendment, NMFS corrects 50 CFR 622.192 by removing paragraph (f).

Classification

Pursuant to section 304(b)(3) of the Magnuson-Stevens Act, the NMFS Assistant Administrator (AA) has determined that this final rule is consistent with Regulatory Amendment 27, the Snapper-Grouper FMP, other provisions of the Magnuson-Stevens Act, and other applicable law.

This final rule has been determined to be not significant under Executive Order 12866. This final rule is not an Executive Order 13771 regulatory action because this final rule is not significant under Executive Order 12866.

Pursuant to 5 U.S.C. 553(b)(B), the AA finds good cause to waive prior notice and opportunity for additional public comment because it would be unnecessary and contrary to the public interest. This correcting amendment removes an incorrect restriction applicable to the sale and purchase of red porgy during the months of January through April. Providing prior notice and opportunity for public comment is unnecessary and contrary to the public interest because the final rule implementing Regulatory Amendment 27 that explained it would be removing this restriction was already subject to notice and public comment, and further opportunity for public comment would delay the removal of the sale and purchase restriction for red porgy during January through April, which remains in the regulations in error. Further, this correction is a non-substantive change and retaining the incorrect restriction will cause

confusion among the affected fishermen and law enforcement.

For the same reasons, the AA also finds good cause, pursuant to 5 U.S.C. 553(d)(3), to waive the 30-day delay in effective date for this correcting amendment, because this non-substantive correction will prevent confusion about the sale and purchase of red porgy each year during January through April.

Because prior notice and opportunity for public comment are not required for this rule by 5 U.S.C. 553, or any other law, this rule is exempt from the procedures of the Regulatory Flexibility Act. Accordingly, no Regulatory Flexibility Analysis is required and none has been prepared.

This final rule contains no information collection requirements under the Paperwork Reduction Act of 1995.

List of Subjects in 50 CFR Part 622

Commercial, Fisheries, Fishing, Red porgy, South Atlantic.

Dated: November 12, 2020.

Samuel D. Rauch III,

*Deputy Assistant Administrator for
Regulatory Programs, National Marine
Fisheries Service.*

Accordingly, 50 CFR part 622 is corrected by making the following correcting amendment:

PART 622—FISHERIES OF THE CARIBBEAN, GULF OF MEXICO, AND SOUTH ATLANTIC

■ 1. The authority citation for part 622 continues to read as follows:

Authority: 16 U.S.C. 1801 *et seq.*

§ 622.192 [Amended]

■ 2. In § 622.192, remove and reserve paragraph (f).

[FR Doc. 2020-25498 Filed 11-18-20; 8:45 am]

BILLING CODE 3510-22-P

Vol. 85, No. 224

Thursday, November 19, 2020

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF HOMELAND SECURITY

8 CFR Parts 215, 217, 231, and 235

19 CFR Parts 4 and 122

[Docket No. DHS–2008–0039]

RIN 1601–AA34

Collection of Alien Biometric Data Upon Exit From the United States at Air and Sea Ports of Departure; United States Visitor and Immigrant Status Indicator Technology Program (“US–VISIT”)

AGENCY: Department of Homeland Security.

ACTION: Withdrawal of notice of proposed rulemaking.

SUMMARY: This notice announces that DHS is withdrawing a notice of proposed rulemaking published in the **Federal Register** on April 24, 2008 which proposed to require commercial air and vessel carriers to collect biometric information from certain aliens departing the United States and submit this information to the Department of Homeland Security (DHS) within a certain timeframe.

DATES: The notice of proposed rulemaking is withdrawn on November 19, 2020.

FOR FURTHER INFORMATION CONTACT: Michael Hardin, Director, Entry/Exit Policy and Planning, Office of Field Operations, U.S. Customs and Border Protection, by phone at (202) 325–1053 or via email at michael.hardin@cbp.dhs.gov.

SUPPLEMENTARY INFORMATION:

Background

On April 24, 2008, DHS published a notice of proposed of rulemaking (2008 NPRM) in the **Federal Register** (73 FR 22065) proposing a biometric exit program at air and sea ports that would require commercial air and vessel carriers to collect biometric data from aliens and submit this information to

DHS within a certain timeframe. The proposed rule set out certain technical requirements and a substantive performance standard for the transmission of biometric data, but provided the carriers with some discretion in the manner of collection and submission of biometric data, including latitude in determining the location of the biometric data collection within the port of entry.

DHS received 118 comments from the public in response to the 2008 NPRM. Most of the comments opposed the adoption of the proposed rule due to issues of cost and feasibility. Among other things, commenters suggested that biometric collection should be a purely governmental function, that requiring air carriers to collect biometrics was not feasible and would unfairly burden air carriers and airports, and that the highly competitive air industry could not support a major new process of biometric collection on behalf of the government.

After consideration of these comments and the results of various biometric exit pilots conducted in 2009,¹ DHS concluded that the process described in the 2008 NPRM was not feasible for implementing a biometric exit program at air and sea ports. After the 2008 NPRM was published, DHS developed a new approach for implementing a biometric exit program based on a facial recognition system that is efficient, accurate, and unobtrusive. Concurrently with this notice, DHS is publishing an NPRM (“2020 NPRM”) that proposes to amend the regulations to enable the implementation of a biometric entry-exit system based on the new approach described in further detail in the 2020 NPRM. Based on the comments received in response to the 2008 NPRM and DHS’s new approach to implementing a biometric entry-exit system as set forth in the 2020 NPRM, DHS has decided to withdraw the 2008 NPRM.

Executive Order 13771

The withdrawal of the 2008 NPRM qualifies as a deregulatory action under Executive Order 13771. See OMB’s Memorandum titled “Guidance Implementing Executive Order 13771, Titled ‘Reducing Regulation and

¹ For more information on the biometric exit pilots conducted in 2009, see Section III.D.2 of the NPRM referenced later in this paragraph.

Controlling Regulatory Costs’” (April 5, 2017).

Signature

The Acting Secretary of Homeland Security, Chad F. Wolf, having reviewed and approved this document, has delegated the authority to electronically sign this document to Chad R. Mizelle, who is the Senior Official Performing the Duties of the General Counsel for DHS, for purposes of publication in the **Federal Register**.

Conclusion

Accordingly, DHS withdraws the notice of proposed rulemaking published in the **Federal Register** (73 FR 22065) on April 24, 2008.

Chad R. Mizelle,

Senior Official Performing the Duties of the General Counsel, U.S. Department of Homeland Security.

BILLING CODE 9111–14–P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 33

[Docket No. FAA–2020–0894; Notice No. 33–19–01–SC]

Special Conditions: magniX USA, Inc., magni250 and magni500 Model Engines

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed special conditions.

SUMMARY: This action proposes special conditions for magniX USA, Inc. (magniX), magni250 and magni500 model engines that operate using electrical technology installed on the aircraft for use as an aircraft engine. These engines have a novel or unusual design feature when compared to the state of technology envisioned in the airworthiness standards applicable to aircraft engines. The design feature is the use of an electric motor, controller, and high-voltage systems as the primary source of propulsion for an aircraft. The applicable airworthiness regulations do not contain adequate or appropriate safety standards for this design feature. These proposed special conditions

contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards.

DATES: Send comments on or before December 21, 2020.

ADDRESSES: Send comments identified by Docket No. FAA–2020–0894 using any of the following methods:

- **Federal eRegulations Portal:** Go to <http://www.regulations.gov/> and follow the online instructions for sending your comments electronically.

- **Mail:** Send comments to Docket Operations, M–30, U.S. Department of Transportation (DOT), 1200 New Jersey Avenue SE, Room W12–140, West Building Ground Floor, Washington, DC, 20590–0001.

- **Hand Delivery or Courier:** Take comments to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

- **Fax:** Fax comments to Docket Operations at 202–493–2251.

Privacy: Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to <http://www.regulations.gov/>, including any personal information you provide. The FAA will also post a report summarizing each substantive verbal contact we received about this proposal.

Confidential Business Information

Confidential Business Information (CBI) is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this Notice contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this Notice, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as “PROPIN.” The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this Notice. Submissions containing CBI should be sent to Gary Horan, AIR–6A1, Engine and Propeller Standards Branch, Aircraft Certification Service, 1200 District Avenue, Burlington, Massachusetts 01803; telephone (781)

238–7164; gary.horan@faa.gov. Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

Docket: Background documents or comments received may be read at <http://www.regulations.gov/> at any time. Follow the online instructions for accessing the docket or go to Docket Operations in Room W12–140 of the West Building Ground Floor at 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

FOR FURTHER INFORMATION CONTACT: Gary Horan, AIR–6A1, Engine and Propeller Standards Branch, Aircraft Certification Service, 1200 District Avenue, Burlington, Massachusetts 01803; telephone (781) 238–7164; gary.horan@faa.gov.

SUPPLEMENTARY INFORMATION:

Comments Invited

The FAA invites interested people to take part in this rulemaking by sending written comments, data, or views. The most helpful comments reference a specific portion of the proposed special conditions, explain the reason for any recommended change, and include supporting data.

The FAA will consider all comments received by the closing date for comments. The FAA may change these proposed special conditions based on the comments received.

Background

On June 4, 2019, magniX applied for a type certificate for its magni250 and magni500 model electric engines. The FAA has not previously type certificated an engine that uses electrical technology for propulsion of the aircraft. Electric propulsion technology is substantially different from the technology used in previously certificated turbine and reciprocating engines; therefore, these engines introduce new safety concerns that need to be addressed in the certification basis.

There is a growing interest within the aviation industry to utilize electric propulsion technology. As a result, international agencies and industry stakeholders formed a new committee under ASTM International Committee F39 to identify the appropriate technical criteria for aircraft engines using electrical technology that has not been previously certificated for aircraft propulsion systems. ASTM International, formerly known as American Society for Testing and Materials, is an international standards organization that develops and

publishes voluntary consensus technical standards for a wide range of materials, products, systems, and services. ASTM International published ASTM F3338–18, *Standard Specification for Design of Electric Propulsion Units for General Aviation Aircraft*, in December 2018.¹ The FAA used the technical criteria from the ASTM standard and engine information from magniX to develop special conditions to establish an equivalent level of safety to that required by title 14, Code of Federal Regulations (14 CFR) part 33.

Type Certification Basis

Under the provisions of 14 CFR 21.17(a)(1), generally, magniX must show that magni250 and magni500 model engines meet the applicable provisions of part 33 in effect on the date of application for a type certificate.

If the Administrator finds that the applicable airworthiness regulations (e.g., 14 CFR part 33) do not contain adequate or appropriate safety standards for the magni250 and magni500 model engines because of a novel or unusual design feature, special conditions may be prescribed under the provisions of § 21.16.

Special conditions are initially applicable to the model for which they are issued. Should the type certificate for that model be amended later to include any other engine model that incorporates the same novel or unusual design feature, these special conditions would also apply to the other engine model under § 21.101.

In addition to the applicable airworthiness regulations and special conditions, the magni250 and magni500 model engines must comply with the noise certification requirements of 14 CFR part 36.

The FAA issues special conditions, as defined in 14 CFR 11.19, in accordance with § 11.38, and they become part of the type certification basis under § 21.17(a)(2).

Novel or Unusual Design Features

The magni250 and magni500 model engines will incorporate the following novel or unusual design features:

An electric motor, controller, and high-voltage systems that are used as the primary source of propulsion for an aircraft.

Discussion

Part 33 Developed for Gas-Powered Turbine and Reciprocating Engines

Aircraft engines make use of an energy source to drive mechanical systems that provide propulsion for the

¹ <https://www.astm.org/Standards/F3338.htm>.

aircraft. Energy can be generated from various sources such as petroleum and natural gas. The turbine and reciprocating aircraft engines certified under part 33 use aviation fuel for an energy source. The reciprocating and turbine engine technology that was anticipated in the development of part 33 converts air and fuel to energy using an internal combustion system, which generates heat and mass flow of combustion products for turning shafts that are attached to propulsion devices such as propellers and ducted fans. Part 33 regulations set forth standards for these engines and mitigate potential hazards resulting from failures and malfunctions. The nature, progression, and severity of engine failures are tied closely to the technology that is used to design and manufacture aircraft engines. These technologies involve chemical, thermal, and mechanical systems. Therefore, the existing engine regulations in part 33 address certain chemical, thermal, and mechanically induced failures that are specific to air and fuel combustion systems operating with cyclically loaded high-speed, high-temperature, and highly-stressed components.

magniX's Proposed Electric Engines Are Novel or Unusual

The existing part 33 airworthiness standards for aircraft engines date back to 1965. These airworthiness standards are based on fuel-burning reciprocating and turbine engine technology. The magni250 and magni500 model engines are not turbine or reciprocating engines. These engines have a novel or unusual design feature, which is the use of electrical sources of energy instead of fuel to drive the mechanical systems that provide propulsion for aircraft. The aircraft engine is also exposed to chemical, thermal, and mechanical operating conditions, unlike those observed in internal combustion systems. Therefore, part 33 does not contain adequate or appropriate safety standards for the magni250 and magni500 model engine's novel design feature.

magniX's proposed aircraft engines will operate using electrical power instead of air and fuel combustion to propel the aircraft. These electric engines will be designed, manufactured, and controlled differently than turbine or reciprocating aircraft engines. They will be built with an electric motor, controller, and high-voltage systems that draw energy from electrical storage or generating systems. The electric motor is a device that converts electrical energy into mechanical energy by electric current flowing through wire

coils in the motor producing a magnetic field that interacts with the magnets on the rotating shaft. The controller is a system that consists of two main functional elements: The motor controller and an electric power inverter to drive the motor.² The high voltage system is a combination of wires and the connectors that couple the motor and the controller.

In addition, the technology required to produce these high-voltage and high-current electronic components introduces potential hazards that do not exist in turbine and reciprocating aircraft engines. For example, high-voltage transmission lines, electromagnetic shields, magnetic materials, and high-speed electrical switches are necessary to use the physical properties essential to the electric engine. However, this technology also exposes the aircraft to potential failures that are not common to gas-powered turbine and reciprocating engines, which could adversely affect safety.

magniX's Electric Engines Require a Mix of Part 33 Standards and Special Conditions

Although the electric aircraft engines proposed by magniX use novel or unusual design features that are not addressed in the existing part 33 airworthiness standards, there are some basic similarities in configuration and function that require similar provisions to prevent hazards that are common to aircraft engines using air and fuel combustion (e.g., fire, uncontained high-energy debris, and loss of thrust control). However, the primary failure concerns and the probability of exposure to common hazards are different for the proposed electric aircraft engines. This creates a need to develop special conditions to ensure the engine's safety and reliability.

The requirements in part 33 ensure the design and construction of aircraft engines, including the engine control systems, are proper for the engine type design and operating limits. However, part 33 does not fully address the use of aircraft engines like magniX's, which operate using electrical technology as the primary means of propelling the aircraft. This necessitates the development of special conditions to provide adequate airworthiness standards for these aircraft engines.

The requirements in part 33, subpart B, are applicable to reciprocating and turbine aircraft engines. Subparts C and

D are applicable to reciprocating aircraft engines. Subparts E through G are applicable to turbine aircraft engines. As such, subparts B through G do not adequately address the use of aircraft engines that operate using electrical technology. This necessitates the development of special conditions to ensure a level of safety commensurate with these subparts, as those regulatory requirements do not contain adequate or appropriate safety standards for aircraft engines that operate using electrical technology to propel the aircraft.

The special conditions that the FAA proposes for magniX's engine design include:

Applicability: Proposed special condition no. 1 would require magniX to comply with 14 CFR part 33, except for those airworthiness standards specifically and explicitly applicable only to reciprocating and turbine aircraft engines.

Engine Ratings and Operating Limitations: Proposed special condition no. 2 would require magniX, in addition to compliance with 14 CFR 33.7(a), to establish engine operating limits related to the power, torque, speed, and duty cycles specific to the magni250 and magni500 model engines. The duty or duty cycle is a statement of the load(s) to which the engine is subjected, including, if applicable, starting, no-load and rest, and de-energized periods, including their durations or cycles and sequence in time.

Materials: Proposed special condition no. 3 would require magniX to comply with 14 CFR 33.15, which sets requirements for the suitability and durability of materials used in the engine, and which would otherwise be applicable only to reciprocating and turbine aircraft engines.

Fire Protection: Proposed special condition no. 4 would require magniX to comply with 14 CFR 33.17, which sets requirements to protect the engine and certain parts and components of the airplane against fire, and which would otherwise be applicable only to reciprocating and turbine aircraft engines. Additionally, this proposed special condition would require magniX to ensure the high-voltage electrical wiring interconnect systems that connect the controller to the motor are protected against arc-faults. An arc-fault is a high power discharge of electricity between two or more conductors. This discharge generates heat, which can break down the wire's insulation and trigger an electrical fire. Arc-faults can range in power from a few amps up to thousands of amps and are highly variable in strength and duration.

² Sometimes this entire system is referred to as an inverter. Throughout this document, it will be referred to as the controller.

Durability: Proposed special condition no. 5 would require the proposed engine design and construction to ensure safe engine operation between maintenance intervals, overhaul periods, and mandatory actions. This proposed condition would also require magniX to develop maintenance instructions and scheduling information.

Engine Cooling: Proposed special condition no. 6 would require magniX to comply with 14 CFR 33.21, which requires the engine design and construction to provide necessary cooling, and which would otherwise be applicable only to reciprocating and turbine aircraft engines. Additionally, this proposed special condition would require magniX to document the cooling system monitoring features and usage in the engine installation manual, in accordance with § 33.5, if cooling is required to satisfy the safety analysis described in proposed special condition no. 17. Loss of adequate cooling to an engine that operates using electrical technology can result in rapid overheating and abrupt engine failure with critical consequences to safety.

Engine Mounting Attachments and Structure: Proposed special condition no. 7 would require magniX and the proposed design to comply with 14 CFR 33.23, which requires the applicant to define, and the proposed design to withstand, certain load limits for the engine mounting attachments and related engine structure. These requirements would otherwise be applicable only to reciprocating and turbine aircraft engines.

Accessory Attachments: Proposed special condition no. 8 would require the proposed design to comply with 14 CFR 33.25, which sets certain design, operational, and maintenance requirements for the engine's accessory drive and mounting attachments, and which would otherwise be applicable only to reciprocating and turbine aircraft engines.

Overspeed: Proposed special condition no. 9 would require magniX to establish by test, validated analysis, or a combination of both, that—(1) the rotor overspeed must not result in a burst, rotor growth, or damage that results in a hazardous engine effect; (2) rotors must possess sufficient strength margin to prevent burst; and (3) operating limits must not be exceeded in-service. The proposed special condition associated with rotor overspeed is necessary because of the differences between turbine engine technology and the technology of these electric engines. Turbine speed is driven by hot air expansion and is impacted by

the aerodynamic loads on the rotor blades. Therefore, the speed or overspeed is not directly controlled in turbine engines. The speed of an electric engine is directly controlled by the electric field created by the controller. The failure modes that can lead to overspeed between turbine engines and these engines are vastly different, and therefore this special condition is necessary.

Engine Control Systems: Proposed special condition no. 10(b) would require magniX to ensure that these engines do not experience any unacceptable operating characteristics (such as unstable speed or torque control) or exceed any of their operating limitations.

The FAA originally issued § 33.28 at amendment 33–15 to address the evolution of the means of controlling the fuel supplied to the engine, from carburetors and hydro-mechanical controls to electronic control systems. These electronic control systems grew in complexity over the years, and as a result, the FAA amended § 33.28 at amendment 33–26 to address these increasing complexities. The controller that forms the controlling system for these electric engines is significantly simpler than the complex control systems used in modern turbine engines. The current regulations for engine control are inappropriate for electric engine control systems; therefore, the proposed special condition no. 10(b) associated with controlling these engines is necessary.

Proposed special condition no. 10(c) would require magniX to develop and verify the software and complex electronic hardware used in programmable logic devices, using proven methods that ensure it can provide the accuracy, precision, functionality, and reliability commensurate with the hazard that is being mitigated by the logic. RTCA DO–254, *Design Assurance Guidance for Airborne Electronic Hardware*, dated April 19, 2000,³ distinguish between complex and simple electronic hardware.

Proposed special condition no. 10(d) would require data from assessments of all functional aspects of the control system to prevent errors that could exist in software programs that are not readily observable by inspection of the code. Also, magniX must use methods that will result in the expected quality that ensures the engine control system performs the intended functions

throughout the declared operational envelope.

The environmental limits referred to in proposed special condition no. 10(e) include temperature, vibration, high-intensity radiated fields (HIRF), and others addressed in RTCA DO–160G, *Environmental Conditions and Test Procedures for Airborne Electronic/Electrical Equipment and Instruments*.⁴ Accordingly, proposed special condition 10(e) would require magniX to document the environmental limits to which the system has been qualified in the engine installation instructions.

Proposed special condition no. 10(f) would require magniX to evaluate various control system failures to assure that these failures will not lead to unsafe conditions. The FAA issued Advisory Circular, AC 33.28–3, *Guidance Material For 14 CFR 33.28, Engine Control Systems*, on May 23, 2014.⁵ Paragraph 6–2 of this AC provides applicants with guidance on defining an engine control system failure when showing compliance with the requirements of 14 CFR 33.28. AC 33.28–3 also includes objectives for the integrity requirements, criteria for a loss of thrust (or power) control (LOT/ LOPC) event, and an acceptable LOT/ LOPC rate. As with other topics within these proposed special conditions, the failure rates that apply to electric engines were not established when the FAA issued this AC.

The phrase “in the full-up configuration” used in proposed special condition no. 10(f)(2) refers to a system without any fault conditions present. The electronic control system must, when in the full-up configuration, be single fault-tolerant, as determined by the Administrator, for electrical, electrically detectable, and electronic failures involving LOPC events.

The term “local” in the context of “local events” used in proposed special condition no. 10(f)(4) means failures or malfunctions leading to events in the intended aircraft installation such as fire, overheat, or failures leading to damage to engine control system components. These local events must not result in a hazardous engine effect due to engine control system failures or malfunctions.

Proposed special condition no. 10(g) would require magniX to conduct a safety assessment of the control system to support the safety analysis in special condition no. 17. This control safety assessment provides failures and rates

⁴ https://my.rtca.org/NC_Product?id=a1B36000001cnSEAS.

³ https://my.rtca.org/NC_Product?id=a1B36000001cjTEAS.

⁵ https://www.faa.gov/documentLibrary/media/Advisory_Circular/AC_33_28-3.pdf.

of these failures that can be used at the aircraft safety assessment level.

Proposed special condition no. 10(h) requires magniX to provide appropriate protection devices or systems to ensure that engine operating limitations will not be exceeded in-service.

Proposed special condition no. 10(i) is necessary to ensure the controllers are self-sufficient and isolated from other aircraft systems. The aircraft-supplied data supports the analysis at the aircraft level to protect the aircraft from common mode failures that could lead to major propulsion power loss. The exception "other than power command signals from the aircraft" noted in proposed special condition no. 10(i) is based on the FAA's determination that there are no reasonable means for the engine controller to determine the validity of any in-range signals from this system. In many cases, the engine control system can detect a faulty signal from the aircraft. The engine control system typically accepts the power command signal as a valid value.

The term "independent" in the context of "fully independent engine systems" referenced in proposed special condition no. 10(i) means the controllers should be self-sufficient and isolated from other aircraft systems or provide redundancy that enables it to accommodate aircraft data system failures. In the case of loss, interruption, or corruption of aircraft-supplied data, the engine must continue to function in a safe and acceptable manner without unacceptable effects on thrust or power, hazardous engine effects, or inability to comply with the operation demonstrations in proposed special condition no. 25.

The term "accommodated" in the context of "detected and accommodated" referenced in proposed special condition 10(i)(2) is to assure that once a fault has been detected, that the system continues to function safely.

Proposed special condition no. 10(j) would require magniX to show that the loss of electric power from the aircraft will not cause the electric engine to malfunction in a manner hazardous to the aircraft. The total loss of electric power to the electric engine may result in an engine shutdown.

Instrument Connection: Proposed special condition no. 11 would require magniX to comply with 14 CFR 33.29(a), (e), (f), and (g), which set certain requirements for the connection and installation of instruments to monitor engine performance. The remaining requirements in section 33.29 apply only to technologies used in reciprocating and turbine aircraft engines.

Instrument connections (wires, wire insulation, potting, grounding, connector designs) present opportunities for unsafe features to be present on the aircraft. Proposed special condition no. 11 would require the safety analysis to include potential hazardous effects from failure of instrument connections to function properly. The outcome of this analysis might identify the need for design enhancements or additional Instructions for Continued Airworthiness (ICA) to ensure safety.

Stress Analysis: Section 33.62 requires applicants to perform a stress analysis on each turbine engine. This regulation is explicitly applicable only to turbine engines and turbine engine components, and not appropriate for the magniX magni250 and magni500 model engines. However, the FAA proposes that a stress analysis particular to these electric engines is necessary.

Proposed special condition no. 12 would require a mechanical, thermal, and electrical stress analysis to show there is a sufficient design margin to prevent unacceptable operating characteristics. Also, the applicant must determine the maximum stresses in the engine by tests, validated analysis, or a combination thereof, and show that they do not exceed minimum material properties.

Critical and Life-Limited Parts: Proposed special condition no. 13 would require magniX to show whether rotating or moving components, bearings, shafts, static parts, and non-redundant mount components should be classified, designed, manufactured, and managed throughout their service life as critical or life-limited parts.

The engineering plan referenced in proposed special condition no. 13(b)(1) would require magniX to establish activities for managing documents, practices, and procedures that govern key design criteria essential to part airworthiness. The engineering plan would be required to contain methods for verifying the characteristics and qualities assumed in the design data using methods that are suitable for the part criticality. The engineering plan flows information from engineering to manufacturing about the criticality of key attributes that affect the airworthiness of the part. The plan also includes a reporting system that flows problematic issues that develop in engines while they operate in service so the design process can address them. For example, the effect of environmental influences on engine performance might not be consistent with the assumptions used to design the part. The impact of ice slab ingestion on engine parts might

not be fully understood until the engine ingests the specific ice quantities and shapes that the airplane sheds. During the pre-certification activities, magniX must ensure the engineering plan is complete, available, and acceptable to the Administrator before the engine is certified.

The term "low-cycle fatigue" referenced in proposed special condition no. 13(a)(2) is a decline in material strength from exposure to cyclic stress at levels beyond the stress threshold the material can sustain indefinitely. This threshold is known as the material endurance limit. Low-cycle fatigue typically causes a part to sustain plastic or permanent deformation during the cyclic loading and can lead to cracks, crack growth, and fracture. Engine parts that operate at high temperatures and high-mechanical stresses simultaneously can experience low-cycle fatigue coupled with creep. Creep is the tendency of a metallic material to permanently move or deform when it is exposed to the extreme thermal conditions created by hot combustion gasses and substantial physical loads such as high rotational speeds and maximum thrust. Conversely, high-cycle fatigue is caused by elastic deformation, small strains caused by alternating stress, and a much higher number of load cycles compared to the number of cycles that cause low-cycle fatigue.

The term "manufacturing definition" referenced in proposed special condition no. 13(b)(2) is the collection of data required to translate documented engineering design criteria into physical parts and verify that the parts comply with the properties established by the design data. Since engines are not intentionally tested to failure during a certification program, there are inherent expectations for performance and durability guaranteed by the documents and processes used to execute production and quality systems required by § 21.137. These systems limit the potential manufacturing outcomes to parts that are consistently produced within design constraints.

The manufacturing plan and service management plan ensure essential information from the engineering plan, such as the design characteristics that ensure the integrity of critical and life-limited parts, is consistently produced and preserved over the lifetime of those parts. The manufacturing plan includes special processes and production controls to prevent inclusion of manufacturing-induced anomalies, which can degrade the part's structural integrity. Examples of manufacturing-induced anomalies are material

contamination, unacceptable grain growth, heat affected areas, and residual stresses. The service management plan has provisions for enhanced detection and reporting of service-induced anomalies that can cause the part to fail before it reaches its life limit or service limit. Anomalies can develop in service from improper handling, unforeseen operating conditions, and long-term environmental effects. The service management plan ensures important information that might affect the assumptions used to design a part is incorporated into the design process to remove unforeseen potential unsafe features from the engine.

Lubrication System: Proposed special condition no. 14 would require magniX to ensure the lubrication system is designed to function properly between scheduled maintenance intervals and prevent contamination of the engine bearings. This proposed condition would also require magniX to demonstrate the unique lubrication attributes and functional capability of the magni250 and magni500 model engine design.

The corresponding part 33 regulations include provisions for lubrication systems used in reciprocating and turbine engines. The part 33 requirements account for safety issues associated with specific reciprocating and turbine engine system configurations. These regulations are not appropriate for the magniX magni250 and magni500 model engines. For example, these engines do not have a crankcase or lubrication oil sump. The bearings are sealed, so they do not require an oil circulation system. The lubrication system in these engines is also independent of the propeller pitch control system. Therefore, proposed special condition no. 14 incorporates only certain requirements from the part 33 regulations.

Power Response: Proposed special condition no. 15 would require the design and construction of the magni250 and magni500 model engines to enable an increase (1) from the minimum power setting to the highest-rated power without detrimental engine effects, and (2) from the minimum obtainable power while in-flight and on the ground to the highest-rated power within a time interval for safe operation of the aircraft.

The engine control system governs the increase or decrease in power in combustion engines to prevent too much (or too little) fuel from being mixed with air before combustion. Due to the lag in rotor response time, improper fuel/air mixtures can result in engine surges, stalls, and exceedances

above rated limits and durations. Failure of the engine to provide thrust, maintain rotor speeds below burst thresholds, and temperatures below limits have the potential for detrimental effects to the aircraft. Similar detrimental effects are possible in the magni250 and magni500 model engines, but the causes are different. Electric engines with reduced power response time can experience insufficient thrust to the aircraft, shaft over-torque, and over-stressed rotating components, propellers, and critical propeller parts. Therefore, this special condition is necessary.

Continued Rotation: Proposed special condition no. 16 would require magniX to design the magni250 and magni500 model engines such that, if the main rotating systems continue to rotate after the engine is shut down while in-flight, this continued rotation will not result in any hazardous engine effects.

The main rotating system of the magniX magni250 and magni500 model engines consists of the rotors, shafts, magnets, bearings, and wire windings that convert electrical energy to shaft torque. This rotating system must continue to rotate after the power source to the engine is shut down. The safety concerns associated with this proposed special condition are substantial asymmetric aerodynamic drag that can cause aircraft instability, loss of control, and reduced efficiency, and result in a forced landing or inability to continue safe flight.

Safety Analysis: Proposed special condition no. 17 would require magniX to comply with 14 CFR 33.75(a)(1), (a)(2), and (a)(3), which require the applicant to conduct a safety analysis of the engine, and which would otherwise be applicable only to turbine aircraft engines. Additionally, this proposed special condition would require magniX to assess its engine design to determine the likely consequences of failures that can reasonably be expected to occur. The failure of such elements and associated prescribed integrity requirements must be stated in the safety analysis.

A primary failure mode is the manner in which a part is most likely going to fail. Engine parts that have a primary failure mode, a predictable life to the failure and a failure consequence that results in a hazardous effect are life-limited or critical parts. Some life-limited or critical engine parts can fail suddenly in their primary failure mode from prolonged exposure to normal engine environments such as temperature, vibration, and stress. Due to the consequence of failure, these parts are not allowed to be managed by

on-condition or probabilistic means because the probability of failure cannot be sensibly estimated in numerical terms. Therefore, the parts are managed by compliance with integrity requirements such as mandatory maintenance (life limits, inspections, inspection techniques) to ensure the qualities, features, and other attributes that prevent the part from failing in its primary failure mode are preserved throughout its service life. For example, if the number of engine cycles to failure are predictable and can be associated with specific design characteristics, such as material properties, then the applicant can manage the engine part with life limits.

Ingestion: Proposed special condition no. 18 would require magniX to ensure that these engines will not experience unacceptable power loss or hazardous engine effects from ingestion. The associated regulation for turbine engines, 14 CFR 33.76, is based on potential damage from birds being ingested into the turbine engine that has an inlet duct, which directs air into the engine for combustion, cooling, and thrust. In contrast, these electric engines do not use an inlet for those purposes.

An "unacceptable" power loss, as used in proposed special condition no. 18(a), is one in which the power or thrust required for safe flight of the aircraft becomes unavailable to the pilot. The specific amount of power loss that is required for safe flight depends on the aircraft configuration, speed, altitude, attitude, atmospheric conditions, phase of flight, and other circumstances where the demand for thrust is critical to safe operation of the aircraft.

Liquid Systems: Proposed special condition no. 19 would require magniX to ensure that liquid systems used for lubrication or cooling of engine components are designed and constructed to function properly. Also, if a liquid system is not self-contained, the interfaces to that system would be required to be defined in the engine installation manual. Liquid systems for the lubrication or cooling of engine components can include heat exchangers, pumps, fluids, tubing, connectors, electronic devices, temperature sensors and pressure switches, fasteners and brackets, bypass valves, and metallic chip detectors. These systems allow the electric engine to perform at extreme speeds and temperatures for durations up to the maintenance intervals without exceeding temperature limits or predicted deterioration rates.

Vibration Demonstration: Proposed special condition no. 20 would require

magniX to ensure (1) the engine is designed and constructed to function throughout its normal operating range of rotor speeds and engine output power without inducing excessive stress caused by engine vibration, and (2) the engine design undergoes a vibration survey.

The vibration demonstration is a survey that characterizes the vibratory attributes of the engine and verifies the stresses from vibration do not impose excessive force or result in natural frequency responses on the aircraft structure. The vibration demonstration also ensures internal vibrations will not cause engine components to fail. Excessive vibration force occurs at magnitudes and forcing functions or frequencies, which may result in damage to the aircraft. Stress margins to failure add conservatism to the highest values predicted by analysis for additional protection from failure caused by influences beyond those quantified in the analysis. The result of the additional design margin is improved engine reliability that meets prescribed thresholds based on the failure classification. The amount of margin needed to achieve the prescribed reliability rates depends on an applicant's experience with a product. The FAA considers the reliability rates when deciding how much vibration is "excessive."

Overtorque: Proposed special condition no. 21 would require magniX to demonstrate that the engine is capable of continued operation without the need for maintenance if it experiences a certain amount of overtorque.

The electric engine proposed by magniX converts electrical energy to shaft torque, which is used for propulsion. The electric motor, controller, and high-voltage systems control the engine torque. When the pilot commands power or thrust, the engine responds to the command and adjusts the shaft torque to meet the demand. During the transition from one power or thrust setting to another, there is a small delay, or latency, in the engine response time. While the engine dwells in this time interval, it can continue to apply torque until the command to reduce the torque is applied by the engine control. The amount of overtorque the FAA permits during operation depends on how well the applicant demonstrates the engine's capability to remain operational without the need for maintenance action. Therefore, this special condition is necessary.

Calibration Assurance: Proposed special condition no. 22 would require

magniX to subject the engine to calibration tests, to establish its power characteristics and the conditions both before and after the endurance and durability demonstrations specified in proposed special condition nos. 23 and 26. The calibration test requirements specified in § 33.85 only apply to the endurance test specified in § 33.87, which is applicable only to turbine engines. The FAA proposes that the methods used for accomplishing those tests for turbine engines is not the best approach for electric engines. The calibration tests in § 33.85 have provisions applicable to ratings that are not relevant to the magniX magni250 and magni500 model engines. Proposed special condition no. 22 would allow magniX to demonstrate the endurance and durability of the electric engine either together or independently, whichever is most appropriate for the engine qualities being assessed. Consequently, the proposed special condition applies the calibration requirement to both the endurance and durability tests.

Endurance Demonstration: Proposed special condition no. 23 would require magniX to perform an endurance demonstration test that is acceptable to the Administrator. The Administrator will evaluate the extent to which the test exposes the engine to failures that could occur when the engine is operated at up to its rated values, to determine if the test is sufficient to show the engine design will not exhibit unacceptable effects in-service, such as significant performance deterioration, operability restrictions, engine power loss or instability, when it is run for sustained periods at extreme operating conditions.

Temperature Limit: Proposed special condition no. 24 would require magniX to ensure the engine can endure operation at its temperature limits plus an acceptable margin. An "acceptable margin," as used in the proposed special condition, is the amount of temperature above that required to prevent the least-capable engine allowed by the type design from failing due to temperature-related causes when operating at the most extreme thermal conditions.

Operation Demonstration: Proposed special condition no. 25 would require the engine to demonstrate safe operating characteristics throughout its declared flight envelope and operating range. Engine operating characteristics define the range of functional and performance values the magniX magni250 and magni500 model engines can achieve without incurring hazardous effects. They are requisite capabilities of the type design that qualify the engine for

installation into aircraft and determine aircraft installation requirements. The primary engine operating characteristics are assessed by the tests and demonstrations that would be required by these special conditions. Some of these characteristics are shaft output torque, rotor speed, power consumption, and engine thrust response. The engine performance data magniX will use to certify the engine must account for installation loads and effects. These are aircraft-level effects that could affect the engine characteristics that are measured in a test cell. These effects could result from elevated inlet cowl temperatures, extreme aircraft maneuvers, flowstream distortion, and hard landings. An engine that is run in a test facility could demonstrate more capability for some operating characteristics than it will when operating on an aircraft and potentially decrease the engine ratings and operating limits. Therefore, the installed performance defines the engine performance capabilities.

Durability Demonstration: Proposed special condition no. 26 would require magniX to subject the engine to a durability demonstration. The durability demonstration must show that each part of the engine is designed and constructed to minimize the development of any unsafe condition of the system between overhaul periods or between engine replacement intervals if overhaul is not defined. Durability is the ability of an engine, in the fully deteriorated state, to continue generating rated power or thrust, retain adequate operating margins, and retain sufficient efficiency that enables the aircraft to reach its destination. The amount of deterioration an engine can experience is restricted by operating limitations and managed by the ICA. Section 33.90 specifies how maintenance intervals are established; it does not include provisions for an engine replacement. Electric engines and turbine engines deteriorate differently; therefore, magniX will use different test effects to establish overhaul periods or engine replacement intervals if no maintenance is specified.

System and Component Tests: Proposed special condition no. 27 would require magniX to show that the systems and components of the engine would perform their intended functions in all declared engine environments and operating conditions.

Sections 33.87 and 33.91, which are specifically applicable to turbine engines, have conditional criteria to decide if additional tests will be required after the engine tests. The criteria are not suitable for electric

engines. Part 33 associates the need for additional testing with the outcome of the § 33.87 endurance test because it is designed to address safety concerns in combustion engines. For example, § 33.91(b) establishes a need for temperature limits and additional testing where the endurance test does not fully expose internal components to thermal conditions that verify the desired operating limits. A safety concern for electric engines is extreme temperatures. The FAA proposes that the § 33.87 endurance test might not be the best way to achieve the highest thermal conditions for all the electronic components of electric engines because heat is generated differently in electronic systems than it is in turbine engines. There are also additional safety considerations that need to be addressed in the test. Therefore, proposed special condition no. 27 would be a performance-based requirement that allows magniX to determine how to challenge the electric engine and to determine the appropriate limitations that correspond to the technology.

Rotor Locking Demonstration: Proposed special condition no. 28 would require the engine to demonstrate reliable rotor locking performance and that no hazardous effects will occur if the engine uses a rotor locking device to prevent shaft rotation.

Some engine designs enable the pilot to prevent a propeller shaft or main rotor shaft from turning while the engine is running or the aircraft is in-flight. This capability is needed for some installations that require the pilot to confirm functionality of certain flight systems before takeoff. The proposed magniX engine installations are not limited to vehicles that will not require rotor locking. Section 33.92 prescribes a test that may not include the appropriate criteria to demonstrate sufficient rotor locking capability for these engines; therefore, this special condition is necessary.

The proposed special condition does not define “reliable” rotor locking, but would allow magniX to classify the hazard (major/minor) and assign the appropriate quantitative criteria that meet the safety objectives required by § 33.75.

Teardown Inspection: Proposed special condition no. 29 would require magniX to perform either a teardown evaluation or a non-teardown evaluation based on the criteria provided in proposed special condition no. 29(a) or (b).

Proposed special condition no. 29(b) includes restrictive criteria for “non-teardown evaluations” to account for electric engines, sub-assemblies, and

components that cannot be disassembled without destroying them. Some electrical and electronic components like magniX’s are constructed in an integrated fashion that precludes the possibility of tearing them down without destroying them. Sections 33.55 and 33.93 do not contain similar requirements because reciprocating and turbine engines can be disassembled for inspection.

Containment: Proposed special condition no. 30 would require the engine to provide containment features that protect against likely hazards from rotating components unless magniX can show, by test or validated analysis, that the margin to rotor burst does not justify the need for containment features. Rotating components in electric engines are typically disks, shafts, bearings, seals, orbiting magnetic components, and the assembled rotor core. However, if the margin to rotor burst does not unconditionally rule out the possibility of a rotor burst, then the condition would require magniX to assume a rotor burst could occur and provide case features that will contain the failed rotors. In addition, magniX must also determine the effects of subsequent damage precipitated by the main rotor failure and characterize any fragments that are released forward or aft of the containment features. The fragment energy levels, trajectories, and size must be documented in the installation manual because the aircraft will need to account for the effects of a rotor failure in the aircraft design. The intent of this special condition is to prevent hazardous engine effects from structural failure of rotating components and the rotating parts that are built into them.

Operation with a Variable Pitch Propeller or Fan: Proposed special condition no. 31 would require magniX to conduct functional demonstrations, including feathering, negative torque, negative thrust, and reverse thrust operations, as applicable, based on the propeller or fan’s variable pitch functions that are planned for use on these electric engines, with a representative propeller. The tests prescribed in § 33.95, for engines operating with variable pitch propellers, are based on the operating characteristics of turbine engines, which include thrust response times, engine stall, propeller shaft overload, loss of thrust control, and hardware fatigue. The electric engines proposed by magniX have different operating characteristics that substantially affect their susceptibility to these and other potential failures. Since magniX’s proposed electric engines may be installed with a variable pitch propeller,

the proposed special condition associated with the operation with a variable pitch propeller or fan is necessary.

General Conduct of Tests: Proposed special condition no. 32 would require magniX to (1) include scheduled maintenance in the engine ICA before certification; (2) include any maintenance, in addition to the scheduled maintenance, that was needed during the test to satisfy the requirement; and (3) conduct any additional tests that the Administrator finds necessary warranted by the test results.

For example, certification endurance test shortfalls might be caused by omitting some prescribed engine test conditions or from accelerated deterioration of individual parts arising from the need to force the engine to operating conditions that drive the engine above the engine cycle values of the type design. If an engine part fails during a certification test, the entire engine might be subjected to penalty runs with a replacement or newer part design installed on the engine to meet the test requirements. Also, the maintenance performed to replace the part so that the engine could complete the test would be included in the engine ICA. In another example, if the applicant replaces a part before completing an engine certification test because of a test facility failure and can substantiate the part to the Administrator through bench testing, they might not need to substantiate the part design using penalty runs with the entire engine.

The term “excessive” is used to describe the frequency of unplanned engine maintenance and the frequency unplanned test stoppages to address engine issues that prevent the engine from completing the tests in proposed special condition nos. 32(b)(1) and (2), respectively. Excessive frequency is an objective assessment from the FAA’s analysis of the amount of unplanned maintenance needed for an engine to complete a certification test. The FAA’s assessment may include the reasons for the unplanned maintenance, such as the effects test facility equipment may have on the engine, the inability to simulate a realistic engine operating environment, and the extent to which an engine requires modifications to complete a certification test. In some cases, the applicant may be able to show that unplanned maintenance has no effect on the certification test results, or they might be able to attribute the problem to the facility or test-enabling equipment that is not part of the type design. In these cases, the ICA will not

be affected. However, if magniX cannot reconcile the amount of unplanned service, then the FAA may consider the unplanned maintenance required during the certification test to be “excessive,” prompting the need to add the unplanned maintenance to mandatory ICA in order to comply with the certification requirements.

These proposed special conditions contain the additional safety standards that the Administrator considers necessary to establish a level of safety equivalent to that established by the existing airworthiness standards for reciprocating and turbine aircraft engines.

Applicability

As discussed above, these proposed special conditions are applicable to the magniX magni250 and magni500 model engines. Should magniX apply at a later date for a change to the type certificate to include another model on the same type certificate incorporating the same novel or unusual design feature, these special conditions would apply to that model as well.

Conclusion

This action affects only magniX magni250 and magni500 model engines. It is not a rule of general applicability.

List of Subjects in 14 CFR Part 33

Aircraft, Aviation safety, Reporting and recordkeeping requirements.

Authority Citation

The authority citation for these special conditions is as follows:

Authority: 49 U.S.C. 106(f), 106(g), 40113, 44701, 44702, 44704.

The Proposed Special Conditions

Accordingly, the Federal Aviation Administration (FAA) proposes the following special conditions as part of the type certification basis for magniX USA, Inc., magni250 and magni500 model engines. The applicant must also comply with the certification procedures set forth in 14 CFR part 21.

1. Applicability

Unless otherwise noted in these special conditions, the design must comply with the airworthiness standards for aircraft engines set forth in 14 CFR part 33, except those airworthiness standards specifically and explicitly applicable only to reciprocating and turbine aircraft engines.

2. Engine Ratings and Operating Limits

In addition to § 33.7(a), the design must comply with the following:

Ratings and operating limitations must be established and included in the type certificate data sheet based on:

(a) Power, torque, speed, and time for: (1) Rated maximum continuous power; and

(2) Rated maximum temporary power and associated time limit.

(b) The duty cycle and the rating at that duty cycle. The manufacturer must declare the duty cycle or cycles in the engine certificate data sheet.

3. Materials

The engine design must comply with 14 CFR 33.15.

4. Fire Protection

The engine design must comply with 14 CFR 33.17.

In addition, high-voltage electrical wiring interconnect systems must be protected against arc-faults. Any non-protected electrical wiring interconnects must be analyzed to show that arc-faults do not cause a hazardous engine effect.

5. Durability

The engine design and construction must minimize the development of an unsafe condition of the engine between maintenance intervals, overhaul periods, or mandatory actions described in the applicable Instructions for Continued Airworthiness (ICA).

6. Engine Cooling

The engine design and construction must comply with 14 CFR 33.21. In addition, if cooling is required to satisfy the safety analysis as described in special condition no. 17, the cooling system monitoring features and usage must be documented in the engine installation manual.

7. Engine Mounting Attachments and Structure

The engine mounting attachments and related engine structure must comply with 14 CFR 33.23.

8. Accessory Attachments

The engine must comply with 14 CFR 33.25.

9. Overspeed

(a) A rotor overspeed must not result in a burst, rotor growth, or damage that results in a hazardous engine effect, as defined in special condition no. 17(d)(2). Compliance with this paragraph must be shown by test, validated analysis, or a combination of both. Applicable assumed speeds must be declared and justified.

(b) Rotors must possess sufficient strength with a margin to burst above certified operating conditions and above

failure conditions leading to rotor overspeed. The margin to burst must be shown by tests, validated analysis, or a combination of both.

(c) The engine must not exceed the speed operational limitations that could affect rotor structural integrity.

10. Engine Control Systems

(a) Applicability.

The requirements of this paragraph apply to any system or device that controls, limits, monitors, or protects engine operation and is necessary for the continued airworthiness of the engine.

(b) Engine control.

The engine control system must ensure the engine does not experience any unacceptable operating characteristics or exceed any of its operating limitations.

(c) Design assurance.

The software and complex electronic hardware, including programmable logic devices, must be—

(1) Designed and developed using a structured and systematic approach that provides a level of assurance for the logic commensurate with the hazard associated with the failure or malfunction of the systems in which the devices are located; and

(2) Substantiated by a verification methodology acceptable to the Administrator.

(d) Validation.

All functional aspects of the control system must be substantiated by tests, analysis, or a combination thereof, to show that the engine control system performs the intended functions throughout the declared operational envelope.

(e) Environmental limits.

Environmental limits that cannot be adequately substantiated by endurance demonstrations, validated analysis, or a combination thereof, must be demonstrated by the system and component tests in special condition no. 27.

(f) Engine control system failures.

The engine control system must—

(1) Have a maximum rate of Loss of Power Control (LOPC) that is suitable for the intended application;

(2) When in the full-up configuration, be single-fault tolerant, as determined by the Administrator, for electrical, electrically detectable, and electronic failures involving LOPC events;

(3) Not have any single failure that result in hazardous engine effects; and

(4) Not have any likely failure or malfunction that lead to local events in the intended aircraft installation.

(g) System safety assessment.

This assessment must identify faults or failures that affect normal operation,

together with the predicted frequency of occurrence of these faults or failures.

(h) Protection systems.

The design and function of the engine control devices and systems, together with engine instruments, operating instructions and maintenance instructions, must ensure that engine operating limitations will not be exceeded in-service.

(i) Aircraft-supplied data.

Any single failure leading to loss, interruption, or corruption of aircraft-supplied data (other than power command signals from the aircraft), or aircraft-supplied data shared between engine systems within a single engine or between fully independent engine systems must—

(1) Not result in a hazardous engine effect, as defined in special condition no. 17(d)(2), for any engine installed on the aircraft; and

(2) Be able to be detected and accommodated by the control system.

(j) Engine control system electrical power.

The engine control system must be designed such that the loss, malfunction, or interruption of the control system electrical power source will not result in a hazardous engine effect, as defined in special condition no. 17(d)(2), the unacceptable transmission of erroneous data, or continued engine operation in the absence of the control function.

11. Instrument Connection

The applicant must comply with 14 CFR 33.29(a), (e), (f), and (g). In addition, as part of the system safety assessment of special condition no. 10(g), the applicant must assess the possibility and subsequent effect of incorrect fit of instruments, sensors, or connectors. Where practicable, the applicant must take design precautions to prevent incorrect configuration of the system.

12. Stress Analysis

(a) A mechanical, thermal, and electrical stress analysis must show there is a sufficient design margin to prevent unacceptable operating characteristics.

(b) Maximum stresses in the engine must be determined by tests, validated analysis, or a combination thereof, and must be shown not to exceed minimum material properties.

13. Critical and Life-Limited Parts

(a) The applicant must show by a safety analysis or means acceptable to the Administrator, whether rotating or moving components, bearings, shafts, static parts, and non-redundant mount

components should be classified, designed, manufactured, and managed throughout their service life as critical or life-limited parts.

(1) *Critical part* means a part that must meet prescribed integrity specifications to avoid its primary failure, which is likely to result in a hazardous engine effect, as defined in special condition no. 17(d)(2) of these special conditions.

(2) *Life-limited part* means a rotor and major structural static part whose failure can result in a hazardous engine effect due to a low-cycle fatigue (LCF) mechanism or any LCF driven mechanism coupled with creep. A life limit is an operational limitation that specifies the maximum allowable number of flight cycles that a part can endure before the applicant must remove it from the engine.

(b) The applicant must establish the integrity of each critical part or life-limited part by providing the following three plans to the Administrator for approval:

(1) An engineering plan that establishes and maintains that the combination of loads, material properties, environmental influences, and operating conditions, including the effects of engine parts influencing these parameters, are sufficiently well-known and predictable by validated analysis, test, or service experience. The engineering plan must ensure each critical part or life-limited part is withdrawn from service at an approved life before hazardous engine effects can occur. The engineering plan must establish activities to be executed both pre- and post-certification. magniX must perform appropriate damage tolerance assessments to address the potential for failure from material, manufacturing, and service-induced anomalies within the approved life of the part. The approved life must be published in the mandatory ICA.

(2) A manufacturing plan that identifies the specific manufacturing definition (drawings, procedures, specifications, etc.) necessary to consistently produce critical or life-limited parts with the attributes required by the engineering plan.

(3) A service management plan that defines in-service processes for maintenance and repair of critical or life-limited parts that maintain attributes consistent with those required by the engineering plan. These processes must become part of the mandatory ICA.

14. Lubrication System

(a) The lubrication system must be designed and constructed to function

properly between scheduled maintenance intervals in all flight attitudes and atmospheric conditions in which the engine is expected to operate.

(b) The lubrication system must be designed to prevent contamination of the engine bearings by particle debris.

(c) The applicant must demonstrate by test, validated analysis, or a combination thereof, the unique lubrication attributes and functional capability of (a) and (b).

15. Power Response

The design and construction of the engine must enable an increase—

(a) From the minimum power setting to the highest-rated power without detrimental engine effects; and

(b) From the minimum obtainable power while in-flight and while on the ground to the highest-rated power within a time interval for safe operation of the aircraft.

16. Continued Rotation

If the design allows any of the engine main rotating systems to continue to rotate after the engine is shut down while in-flight, this continued rotation must not result in any hazardous engine effects, as specified in special condition no. 17(d)(2).

17. Safety Analysis

(a) The applicant must comply with § 33.75(a)(1), (a)(2), and (a)(3) using the failure definitions in special condition no. 17(d).

(b) If the failure of such elements is likely to result in hazardous engine effects, then the applicant may show compliance by reliance on the prescribed integrity requirements of § 33.15, special condition no. 9, or special condition no. 13, as determined by analysis. The failure of such elements and associated prescribed integrity requirements must be stated in the safety analysis.

(c) The applicant must comply with 14 CFR 33.75(d) and (e) using the failure definitions in special condition no. 17(d) of this special condition.

(d) Unless otherwise approved by the Administrator, the following definitions apply to the engine effects when showing compliance with this condition:

(1) An engine failure in which the only consequence is the inability to dispatch the aircraft will be regarded as a minor engine effect.

(2) The engine effects in § 33.75(g)(2) are hazardous engine effects with the addition of:

Electrocution of crew, passengers, operators, maintainers, or others.

(3) Any other engine effect is a major engine effect.

18. Ingestion

(a) Ingestion from likely sources (foreign objects, birds, ice, rain, hail) must not result in unacceptable power loss, or in hazardous engine effects as defined by special condition no. 17(d)(2).

(b) If the design of the engine relies on features, attachments, or systems that may be supplied by the installer for the prevention of unacceptable power loss or hazardous engine effects following potential ingestion, then the features, attachments, or systems must be documented in the engine installation manual.

19. Liquid Systems

(a) Each liquid system used for lubrication or cooling of engine components must be designed and constructed to function properly in all flight attitudes and atmospheric conditions in which the engine is expected to operate.

(b) If a liquid system used for lubrication or cooling of engine components is not self-contained, the interfaces to that system must be defined in the engine installation manual.

20. Vibration Demonstration

(a) The engine must be designed and constructed to function throughout its normal operating range of rotor speeds and engine output power, including defined exceedances, without inducing excessive stress in any of the engine parts because of vibration and without imparting excessive vibration forces to the aircraft structure.

(b) Each proposed engine design must undergo a vibration survey to establish that the vibration characteristics of those components that may be subject to induced vibration are acceptable throughout the declared flight envelope and engine operating range for the specific installation configuration. The possible sources of the induced vibration that the survey must assess are mechanical, aerodynamic, acoustical, or electromagnetic. This survey must be shown by test, validated analysis, or a combination thereof.

21. Overtorque

When approval is sought for a transient maximum engine overtorque, the applicant must demonstrate by tests, validated analysis, or a combination thereof, that the engine is capable of continued operation after operating at the maximum engine overtorque condition without maintenance action.

22. Calibration Assurance

Each engine must be subjected to calibration tests to establish its power characteristics and the conditions both before and after the endurance and durability demonstrations specified in special conditions nos. 23 and 26.

23. Endurance Demonstration

The applicant must subject the engine to an endurance demonstration acceptable to the Administrator to demonstrate the limit capabilities of the engine. The endurance demonstration elevates and decreases the engine's power settings, and dwells at the power settings for durations that produce the extreme physical conditions the engine experiences at rated performance levels, operational limits, and at any other conditions or power settings that are required to verify the limit capabilities of the engine.

24. Temperature Limit

The engine design must demonstrate its capability to endure operation at its temperature limits plus an acceptable margin. The applicant must quantify and justify the margin at each rated condition to the Administrator. The demonstration must be repeated for all declared duty cycles and associated ratings.

25. Operation Demonstration

The engine design must demonstrate safe operating characteristics, including but not limited to, power cycling, acceleration, and overspeeding, throughout its declared flight envelope and operating range. The declared engine operational characteristics must account for installation loads and effects.

26. Durability Demonstration

The engine must be subjected to a durability demonstration to show that each part of the engine has been designed and constructed to minimize the development of any unsafe condition of the system between overhaul periods, or between engine replacement intervals if overhaul is not defined. This test must simulate the conditions in which the engine is expected to operate in-service, including typical start-stop cycles.

27. System and Component Tests

The applicant must show that systems and components will perform their intended functions in all declared environmental and operating conditions.

28. Rotor Locking Demonstration

If shaft rotation is prevented by a means to lock the rotor(s), the engine must demonstrate reliable rotor locking performance and that no hazardous effects will occur.

29. Teardown Inspection

The applicant must comply with either (a) or (b) as follows:

(a) Teardown evaluation.

(1) After the endurance and durability demonstrations have been completed, the engine must be completely disassembled. Each engine component must be within service limits and eligible for continued operation in accordance with the information submitted for showing compliance with § 33.4, *Instructions for Continued Airworthiness*.

(2) Each engine component having an adjustment setting and a functioning characteristic that can be established independent of installation on or in the engine must retain each setting and functioning characteristic within the limits that were established and recorded at the beginning of the endurance and durability demonstrations.

(b) Non-Teardown evaluation.

If a teardown is not performed for all engine components, then the life limits for these components must be established based on the endurance and durability demonstrations.

30. Containment

The engine must provide containment features that protect against likely hazards from rotating components as follows—

(a) The design of the case surrounding rotating components must provide for the containment of the rotating components in the event of failure unless the applicant shows that the rotor has a margin to burst that would justify no need for containment features.

(b) If the margin to burst shows the case must have containment features in the event of failure, the case must provide for the containment of the failed rotating components. The applicant must define by test, validated analysis, or combination thereof, and document in the installation manual the energy level, trajectory, and size of any fragments released from damage caused by the main rotor failure that pass forward or aft of the surrounding case.

31. Operation With a Variable Pitch Propeller or Fan

The applicant must conduct functional demonstrations including feathering, negative torque, negative thrust, and reverse thrust operations, as

applicable, with a representative propeller. These demonstrations may be conducted as part of the endurance and durability demonstrations.

32. General Conduct of Tests

(a) Maintenance of the engine may be made during the tests in accordance with the service and maintenance instructions contained in the proposed ICA.

(b) The applicant must subject the engine or its parts to maintenance and additional tests that the Administrator finds necessary if—

- (1) The frequency of the service is excessive;
- (2) The number of stops due to engine malfunction is excessive;
- (3) Major repairs are needed; or
- (4) Replacement of a part is found necessary during the tests or as the result of findings from the teardown inspection.

(c) Upon completion of all demonstrations and testing specified in these special conditions, the engine and its components must be—

- (1) Within serviceable limits;
- (2) Safe for continued operation; and
- (3) Capable of operating at declared ratings while remaining within limits.

Issued in Burlington, Massachusetts, on October 19, 2020.

BILLING CODE 4910-13-P

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 71

[Docket No. FAA-2020-1016; Airspace
Docket No. 20-ASW-9]

RIN 2120-AA66

Proposed Amendment of Class E Airspace; Dumas, AR

AGENCY: Federal Aviation
Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking
(NPRM).

SUMMARY: This action proposes to amend the Class E airspace extending upward from 700 feet above the surface at Billy Free Municipal Airport, Dumas, AR. The FAA is proposing this action as the result of airspace reviews caused by the decommissioning of the Monticello VHF omnidirectional range (VOR) navigation aid as part of the VOR

Minimum Operational Network (MON) Program.

DATES: Comments must be received on or before January 4, 2021.

ADDRESSES: Send comments on this proposal to: The U.S. Department of Transportation, Docket Operations, 1200 New Jersey Avenue SE, West Building Ground Floor, Room W12-140, Washington, DC 20590-0001; Telephone: (800) 647-5527, or (202) 366-9826. You must identify the Docket No. FAA-2020-1016; Airspace Docket No. 20-ASW-9, at the beginning of your comments. You may also submit comments through the internet at <https://www.regulations.gov>.

FAA Order 7400.11E, Airspace Designations and Reporting Points, and subsequent amendments can be viewed on line at https://www.faa.gov/air_traffic/publications/. For further information, you can contact the Airspace Policy Group, Federal Aviation Administration, 800 Independence Avenue SW, Washington, DC 20591; Telephone: (202) 267-8783. The Order is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of FAA Order 7400.11E at NARA, email fedreg.legal@nara.gov or go to <https://www.archives.gov/federal-register/cfr/ibr-locations.html>.

FOR FURTHER INFORMATION CONTACT: John Fornito, Operations Support Group, Eastern Service Center, Federal Aviation Administration, 1701 Columbia Avenue, College Park, GA 30337; Telephone (770) 404-305-6364.

SUPPLEMENTARY INFORMATION:

Authority for This Rulemaking

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would amend the Class E airspace extending upward from 700 feet above the surface at Billy Free Municipal Airport, Dumas, AR, to support instrument flight rule operations at this airport.

Comments Invited

Interested persons are invited to comment on this proposed rulemaking by submitting such written data, views, or arguments, as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify both docket numbers (Docket No. FAA-2020-1016 and Airspace Docket No. 20-ASW-9) and be submitted in triplicate to DOT Docket Operations (see **ADDRESSES** section for the address and phone number). You may also submit comments through the internet at <https://www.regulations.gov>.

Persons wishing the FAA to acknowledge receipt of their comments on this action must submit with those comments a self-addressed stamped postcard on which the following statement is made: "Comments to FAA Docket No. FAA-2020-1016; Airspace Docket No. 20-ASW-9". The postcard will be date/time stamped and returned to the commenter.

All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this document may be changed in light of the comments received. All comments submitted will be available for examination in the public docket both before and after the comment closing date. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

An electronic copy of this document may be downloaded through the internet at <http://www.regulations.gov>. Recently published rulemaking documents can also be accessed through the FAA's web page at https://www.faa.gov/air_traffic/publications/airspace_amendments/.

You may review the public docket containing the proposal, any comments received and any final disposition in person in the Dockets Office (see the **ADDRESSES** section for address and phone number) between 9:00 a.m. and 5:00 p.m., Monday through Friday, except federal holidays. An informal docket may also be examined between 8:00 a.m. and 4:30 p.m., Monday through Friday, except federal holidays

at the office of the Eastern Service Center, Federal Aviation Administration, Room 350, 1701 Columbia Avenue, College Park, GA 30337.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020. FAA Order 7400.11E is publicly available as listed in the ADDRESSES section of this document. FAA Order 7400.11E lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR part 71) by amending the Class E airspace extending upward from 700 feet above the surface at Billy Free Municipal Airport, Dumas, AR, by removing the Monticello VOR and associated extension from the airspace legal description; and removing the city associated with the airport to comply with changes to FAA Order 7400.2M, Procedures for Handling Airspace Matters.

This action is the result of airspace reviews caused by the decommissioning of the Monticello VOR, which provided navigation information for the instrument procedures this airport, as part of the VOR MON Program.

Class E airspace designations are published in paragraph 6005 of FAA Order 7400.11E, dated July 21, 2020, and effective September 15, 2020, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designations listed in this document will be published subsequently in the Order.

FAA Order 7400.11, Airspace Designations and Reporting Points, is published yearly and effective on September 15.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal.

Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.

Lists of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, B, C, D, AND E AIRSPACE AREAS; AIR TRAFFIC SERVICE ROUTES; AND REPORTING POINTS

- 1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(f), 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

- 2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.11E, Airspace Designations and Reporting Points, dated July 21, 2020, and effective September 15, 2020, is amended as follows:

Paragraph 6005 Class E Airspace Areas Extending Upward From 700 Feet or More Above the Surface of the Earth.

* * * * *

ASW AR E5 Dumas, AR [Amended]

Billy Free Municipal Airport, AR
(Lat. 33°53′04″ N, long. 91°32′03″ W)

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Billy Free Municipal Airport.

Issued in College Park, Georgia, on November 13, 2020.

Matthew N. Cathcart,

Manager, Airspace & Procedures Team North, Eastern Service Center, Air Traffic Organization.

BILLING CODE 4910–13–P

DEPARTMENT OF LABOR

Mine Safety and Health Administration

30 CFR Parts 18 and 74

[Docket No. MSHA–2020–0018]

RIN 1219–AB93

Testing, Evaluation, and Approval of Electric Motor-Driven Mine Equipment and Accessories

AGENCY: Mine Safety and Health Administration, Labor.

ACTION: Proposed rule; request for comments.

SUMMARY: The Mine Safety and Health Administration (MSHA) proposes to revise its regulations that sets out the testing, evaluation, and approval requirements for electric motor-driven mine equipment and accessories intended for use in gassy mines. Under this proposal, MSHA will accept voluntary consensus standards (VCS) that are suitable for gassy mining environments and that provide protection against fire or explosion dangers, to replace approval requirements in its regulations. This proposal is intended to promote the use of innovative and advanced technologies that lead to improvements in mine safety and health and to improve the efficiency and effectiveness of MSHA’s approval process.

DATES: *Comment date:* Comments must be received or postmarked by midnight Eastern Daylight Savings Time on December 21, 2020.

ADDRESSES: Submit comments and informational materials, identified by RIN 1219–AB93 or Docket No. MSHA–2020–0018, by one of the following methods:

- *Federal E-Rulemaking Portal:* <http://www.regulations.gov>. Follow the online instructions for submitting comments.

- *Email:* zzMSHA-comments@dol.gov. Include RIN 1219–AB93 or Docket No. MSHA–2020–0018 in the subject line of the message.

- *Mail:* MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452.

- *Hand Delivery or Courier:* MSHA, 201 12th Street South, Suite 4E401, Arlington, Virginia, between 9:00 a.m. and 5:00 p.m. Monday through Friday, except Federal holidays. Sign in at the receptionist’s desk on the 4th Floor East.

- *Fax:* (202) 693–9441.

Instructions: All submissions must include RIN 1219–AB93 or Docket No. MSHA–2020–0018. Do not include

personal information that you do not want publicly disclosed; MSHA will post all comments without change, including any personal information provided, to <http://www.regulations.gov> and on MSHA's website at <https://www.msha.gov/regulations/rulemaking>.

Docket: For access to the docket to read comments received, go to <http://www.regulations.gov> or <http://www.msha.gov/currentcomments.asp>. To read background documents, go to <http://www.regulations.gov>. Review comments and background documents in person at the Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452. Sign in at the receptionist's desk on the 4th Floor East, Suite 4E401.

Email Notification: To subscribe to receive email notification when MSHA publishes rulemaking documents in the **Federal Register**, go to <https://public.govdelivery.com/accounts/USDOL/subscriber/new>.

FOR FURTHER INFORMATION CONTACT:

Roslyn B. Fontaine, Deputy Director, Office of Standards, Regulations, and Variances, MSHA, at fontaine.roslyn@dol.gov (email), (202) 693–9440 (voice); or (202) 693–9441 (facsimile). These are not toll-free numbers.

SUPPLEMENTARY INFORMATION:

I. Background

The Federal Mine Safety and Health Act of 1977 (30 U.S.C. 801) (Mine Act) requires the Mine Safety and Health Administration (MSHA) to establish requirements for the technical design, construction, and testing of electrical products that must be approved by MSHA prior to use in gassy mines. These regulations are divided into separate parts based on equipment type. Title 30 CFR part 18 (part 18) specifies the procedures and requirements for obtaining MSHA approval, certification, extension, or acceptance of electric motor-driven mine equipment and accessories intended for use in gassy mines.¹ Examples of this equipment include portable two-way radios, remote control units for mining machinery, longwall mining systems, portable oxygen detectors, miner-wearable components for proximity detection systems, and powered air-purifying

respirators (PAPRs). MSHA approves, as “permissible,” completely assembled electrical equipment, components of electrical equipment, and electrical accessories that manufacturers design, construct, and install to meet MSHA's requirements.

Requirements in part 18, including associated tests, are to ensure that such equipment will not cause a fire or explosion (30 CFR 18.4). Applicants must design electrical equipment so that it will not cause a fire or explosion, using at least one of two recognized methods. One way is to design equipment so that it cannot produce a spark strong enough, or temperatures sufficient, to ignite a hazardous gas such as flammable methane-air mixtures. Alternatively, applicants may house the equipment in enclosures that will withstand internal explosions of methane-air mixtures without damage to, or excessive distortion of, its walls or covers, and without ignition of surrounding methane-air mixtures or discharge of flame from inside to outside the enclosure.

Before electric motor-driven equipment or accessories can be used in gassy mines in the U.S., they must first have been approved for such use by MSHA. Those seeking MSHA approval (applicants) are typically product designers and manufacturers of the equipment or accessories. MSHA's approval process includes testing and evaluation of the products, either by MSHA or by an independent laboratory. Applicants that use an independent laboratory to conduct testing or evaluation must submit the results to MSHA for review, along with written evidence of the laboratory's independence and current recognition by a laboratory accrediting organization.

When MSHA receives an application for approval of a completely assembled electrical machine or accessory for use in gassy mines, MSHA reviews the application using the following steps. First, MSHA examines the documents in the application to determine whether the applicant has met the technical requirements of the provisions of part 18. MSHA also checks each drawing and specification in the application against these requirements and, for some products, samples of the product or parts of the product. MSHA may disassemble and examine parts of the product for conformity to the drawings and specifications. Second, after MSHA verifies that an applicant's product complies with the design and construction requirements, MSHA tests the product to determine whether it performs according to the approval requirements. MSHA issues an approval

if the product passes the tests and meets all of MSHA's technical and safety requirements.

Once a product is approved, the applicant is becomes an approval holder and must place an MSHA approval marking on the product to indicate that the product is approved for use in gassy mines.

The use of the MSHA approval marking obligates the approval holder to maintain the quality of the completely assembled product according to the technical requirements upon which its approval was based. If an approval holder wants to modify an approved product and maintain its approval, then the approval holder must submit its proposed changes to MSHA. If MSHA approves the changes, the Agency issues either an extension of approval or a notice of acceptance of the modified product to the approval holder.

II. Regulatory Review and Reform Comments

In 2018, the Agency announced its intent to review existing regulations to assess compliance costs and reduce regulatory burden. As part of this review, MSHA sought stakeholders' assistance in identifying those regulations that could be repealed, replaced, or modified without reducing miners' safety or health. MSHA published on its website (<https://www.msha.gov/provide-or-view-comments-msha-regulations-repeal-replace-or-modify>) a notice that the Agency is seeking assistance in identifying regulations for review. All comments are posted on the Agency's website.

As a result of this solicitation, MSHA received a number of recommendations regarding MSHA's product approval regulations. One commenter recommended that MSHA replace part 18 with a modified set of regulations to provide a clearer and timelier path for approval of new technologies that will improve the health and safety of miners. The commenter noted that many products approved for use under international consensus standards in other countries could not be approved for use by MSHA under part 18. The commenter stated that international coal companies outside the United States may use products designed and manufactured to these international consensus standards, and thus may have access to the latest health and safety technology in their mining operations.

MSHA acknowledges the benefits of using VCS and proposes that VCS replace existing MSHA requirements as discussed below.

¹ MSHA's approval regulations (30 CFR parts 6, 7, 18, 19, 20, 22, 23, 27, and 28) govern the process through which manufacturers may obtain MSHA approval, certification, extension, or acceptance of certain electrical products for use in underground mines. Each of these separate approval actions has specific application procedures and technical requirements for testing and evaluation. Along with “approval,” the terms “certification,” “extension,” and “acceptance” also denote MSHA approval.

Two commenters suggested that MSHA adopt the International Electrotechnical Commission (IEC) 60079 standards for use in approvals of electrical mining equipment, including methane detectors. These IEC standards address the safety of equipment used in explosive gaseous atmospheres. One commenter stated that the IEC series of standards has been adopted by many other countries for use in approving electrical mining equipment for use in explosive atmospheres. For example, Australia uses the IEC 60079 standards with national deviations that are called the ANZEx 60079 standards. For approvals issued under part 18, MSHA agrees and is proposing to adopt VCS that provide protection against fire and explosion dangers.

One commenter suggested that MSHA provide clearly-defined requirements in part 18 for equipment approvals and certifications based on standards that are maintained and updated by industry experts and technical committees. The commenter stated that regularly updating the standards would improve the safety of electrical mining equipment and that allowing the standards to keep pace with technology (through more recent versions of the standards) would improve the safety and health of miners in the U.S.

MSHA agrees with these comments and would use the appropriate rulemaking process with solicitation of public comment to adopt VCS developed by standard-setting bodies that plan, develop, establish, or coordinate standards through agreed-upon, transparent, and deliberate procedures. MSHA further agrees that continuing to adopt VCS as they are maintained and updated through the agreed-upon, transparent, and deliberate procedures, can promote the availability of technologically advanced equipment for use in U.S. mines, thus improving mine safety and health.

III. Discussion of Proposed Rule

A. Voluntary Consensus Standards

MSHA proposes to incorporate by reference 14 VCS—8 American National Standards Institute (ANSI) approved and 6 IEC approved—in their entirety and without modification, to replace existing approval criteria in part 18 for products covered by the incorporated VCS.² MSHA has determined that these VCS (1) are suitable for gassy mining environments and (2) will provide protection against fire or explosion dangers, if substituted in their entirety for MSHA approval requirements specified in part 18, subparts B through E. The existing MSHA subparts B through E requirements would continue to apply to those electrical components not covered by one of the 14 VCS.

Table 1 below lists the U.S. and international VCS that MSHA proposes to incorporate by reference in part 18. As discussed below in the section-by-section analysis, the ANSI standards are based on the similarly-numbered IEC standards. The ANSI and IEC standards on particular topics are generally similar but not identical, as the ANSI standards include modifications of the IEC standards and U.S.-specific requirements (U.S. deviations). IEC standards are prepared and maintained by subject matter experts, using a rigorous and well-defined process. Similarly, the U.S. deviations are developed by nationally-recognized and vetted experts and are approved as American National Standards only if the appropriate procedures are followed.

MSHA believes this approach would promote in U.S. mines the availability of technologically advanced equipment that protects miners against the risk of fire or explosion dangers. Many products conforming to these VCS are broadly recognized across various industries and in other countries as providing an appropriate level of safety for miners and others in work

environments with hazards similar to those encountered in the mining industry. The proposed changes would allow the introduction of products that further mine safety but that MSHA could not otherwise approve because they do not conform to the existing requirements in part 18.

This proposal is also consistent with the Office of Management and Budget's (OMB) Circular A-119 (Jan. 27, 2016 (81 FR 4673)), which establishes policy guidance for Federal agencies. Circular A-119, based on the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 3701 *et seq.*) (Transfer Act), section 12(d), directs Federal agencies to use technical standards developed or adopted by VCS bodies to carry out policies or activities. Additionally, Circular A-119 directs agencies to use VCS in lieu of government-unique standards, except where inconsistent with law or otherwise impractical. The intent of the policy guidance in Circular A-119 is to minimize agency reliance on government-unique standards to decrease the burden of complying with agency regulations and promote efficiency and economic competition through harmonization of standards. (See <https://www.whitehouse.gov/wp-content/uploads/2017/11/Circular-119-1.pdf>). Consistent with Circular A-119, the use of VCS would streamline the MSHA approval process and make it more effective and efficient for applicants by decreasing the reliance on government-unique standards.

While this proposal lists 14 VCS for MSHA to incorporate by reference, the Agency is interested in whether the proposal should be expanded to include other VCS. Please provide rationale, with definitive data and explanation of how this would improve safety, for your position.

The VCS are summarized in the discussion related to § 18.102.

TABLE 1—VOLUNTARY CONSENSUS STANDARDS

ANSI/UL 60079-0 Ed. 7, Explosive Atmospheres—Part 0: Equipment—General Requirements (Group I) (2019). This standard provides the general requirements for the construction, testing, and marking of electrical equipment intended for use in explosive atmospheres.
ANSI/UL 60079-1 Ed. 7, Standard for Explosive Atmospheres—Part 1: Equipment Protection by Flameproof Enclosures “d” (Group I, Level of Protection ‘da’) (2015). This standard contains specific requirements for the construction and testing of electrical equipment, with the Type of Protection flameproof (FP) enclosure designated “d” intended for use in explosive gas atmospheres.
ANSI/ISA 60079-11 ¹ (12.02.01)—2014 Standard for Explosive Atmospheres—Part 11: Equipment Protection by Intrinsic Safety “i” (Group I, Level of Protection ‘ia’) (2014). This standard specifies the construction and testing of intrinsically safe apparatus intended for use in an explosive atmosphere and for associated apparatus, which is intended for connection to intrinsically safe circuits that may enter such atmospheres. This type of protection is applicable to electrical equipment in which the electrical circuits themselves are incapable of causing an explosion in the surrounding explosive atmospheres.

² MSHA has participated on Technical Advisory Groups to the U.S. National Committee (USNC) of the IEC for the past several years. The USNC of the

IEC is an integrated body of ANSI. MSHA staff have provided comments on proposed changes to IEC standards for electrical equipment for use in

hazardous locations. This includes standards for intrinsic safety, flameproof enclosures, and encapsulated assemblies.

TABLE 1—VOLUNTARY CONSENSUS STANDARDS—Continued

ANSI/UL 60079–11 ¹ Ed. 6, Standard for Explosive Atmospheres—Part 11: Equipment Protection by Intrinsic Safety “i” (Group I, Level of Protection ‘ia’) (2013). This standard specifies the construction and testing of intrinsically safe apparatus intended for use in an explosive atmosphere and for associated apparatus, which is intended for connection to intrinsically safe circuits that may enter such atmospheres. This type of protection is applicable to electrical equipment in which the electrical circuits themselves are incapable of causing an explosion in the surrounding explosive atmospheres.
ANSI/UL 60079–18, Ed. 4, Standard for Explosive Atmospheres—Part 18: Equipment Protection by Encapsulation ‘m’ (Group I, Level of Protection ‘ma’) (2015). This standard provides the specific requirements for the construction, testing, and marking of electrical equipment, parts of electrical equipment, and components not intended to be used alone, with the Type of Protection encapsulation “m” intended for use in explosive gas atmospheres or explosive dust atmospheres.
ANSI/ISA 60079–25 ¹ (12.02.05)–2011 Standard for Explosive Atmospheres—Part 25: Intrinsically Safe Electrical Systems (Group I, Level of Protection ‘ia’) (2011). This standard contains the specific requirements for construction and assessment of intrinsically safe electrical systems, intended for use, as a whole or in part, in hazardous locations. A system approved under this standard is comprised of equipment or components approved to the 60079–11 standard, interconnected to form a system.
ANSI/UL 60079–25 ¹ Ed. 2, Standard for Explosive Atmospheres—Part 25: Intrinsically Safe Electrical Systems (Group I, Level of Protection ‘ia’) (2011). This standard contains the specific requirements for construction and assessment of intrinsically safe electrical systems, intended for use, as a whole or in part, in hazardous locations. A system approved under this standard is comprised of equipment or components approved to the 60079–11 standard, interconnected to form a system.
ANSI/UL 60079–28 Ed. 2, Standard for Explosive Atmospheres—Part 28: Protection of Equipment and Transmission Systems Using Optical Radiation (Group I, Equipment Protection Level ‘Ma’) (2017). This standard contains the requirements and testing of equipment emitting optical radiation intended for use in explosive atmospheres. It also covers equipment located outside the explosive atmosphere but which generates optical radiation that is intended to enter an explosive atmosphere.
IEC 60079–0, Ed. 7, Explosive atmospheres—Part 0: Equipment—General requirements (Group I) (2017). This standard provides the general requirements for the construction, testing, and marking of electrical equipment intended for use in explosive atmospheres.
IEC 60079–1 Ed. 7, Standard for Explosive Atmospheres—Part 1: Equipment Protection by Flameproof Enclosures “d” (Group I, Level of Protection ‘da’) (2014). This standard contains specific requirements for the construction and testing of electrical equipment, with the Type of Protection flameproof (FP) enclosure designated “d” intended for use in explosive gas atmospheres.
IEC 60079–11, Ed. 6, Explosive Atmospheres—Part 11: Equipment Protection by Intrinsic Safety “i” (Group I, Level of Protection ‘ia’) (2011). This standard specifies the construction and testing of intrinsically safe apparatus intended for use in an explosive atmosphere and for associated apparatus, which is intended for connection to intrinsically safe circuits that may enter such atmospheres. This type of protection is applicable to electrical equipment in which the electrical circuits themselves are incapable of causing an explosion in the surrounding explosive atmospheres.
IEC 60079–18, Ed. 4.1, Explosive Atmospheres—Part 18: Equipment Protection by Encapsulation ‘m’ (Group I, Level of Protection ‘ma’) (2017). This standard provides the specific requirements for the construction, testing, and marking of electrical equipment, parts of electrical equipment, and components not intended to be used alone, with the Type of Protection encapsulation “m” intended for use in explosive gas atmospheres or explosive dust atmospheres.
IEC 60079–25 Ed. 3, Explosive Atmospheres—Part 25: Intrinsically Safe Electrical Systems (Group I, Level of Protection ‘ia’) (2020). This standard contains the specific requirements for construction and assessment of intrinsically safe electrical systems, intended for use, as a whole or in part, in hazardous locations. A system approved under this standard is comprised of equipment or components approved to the 60079–11 standard, interconnected to form a system.
IEC 60079–28 Ed. 2, Standard for Explosive Atmospheres—Part 28: Protection of Equipment and Transmission Systems Using Optical Radiation (Group I, Equipment Protection Level ‘Ma’) (2015). This standard contains the requirements and testing of equipment emitting optical radiation intended for use in explosive atmospheres. It also covers equipment located outside the explosive atmosphere but which generates optical radiation that is intended to enter an explosive atmosphere.

¹ For VCS that begin with ANSI/UL and ANSI/ISA and follow with a common number, the versions are identical (co-sponsored and co-published by UL LLC (UL) and the International Society of Automation (ISA)).

B. Availability of Voluntary Consensus Standards To Be Incorporated by Reference

The 14 VCS to be incorporated by reference are publicly available and below is the availability information. A copy of each standard proposed to be incorporated by reference is available for inspection at MSHA, Office of Standards, Regulations, and Variances, 201 12th Street South, Suite 4E401, Arlington, Virginia 22202–5452 and at MSHA, Approval and Certification Center, 765 Technology Drive, Triadelphia, WV 26059.

Copies of standards produced by IEC may be obtained from the International Electrotechnical Commission (IEC), 3 rue de Varembe, 1st Floor, P.O. Box 131, CH–1211 Geneva 20, Switzerland, Tel: +41 22 919 0211, and are available for purchase at the IEC website (www.iec.ch).

Copies of standards produced by the ISA, may be obtained from the International Society of Automation (ISA), 67 T.W. Alexander Drive, P.O. Box 12277, Research Triangle Park, NC 27709, Tel: (919) 549–8411, and are also available for purchase at the ISA website (www.isa.org).

Copies of standards produced by UL, may be obtained from UL LLC (UL), Comm 2000, 151 Eastern Avenue, Bensenville, IL 60106, Tel: (888) 853–3503, and are also available for purchase at the UL website (www.ul.com).

Copies of each of the 14 VCS may also be obtained from ANSI at the American National Standards Institute (ANSI), 1899 L Street NW, 11th Floor, Washington, DC 20036, Tel: (202) 293–8020, and online at ANSI’s website (www.ansi.org).

Additionally, during the public comment period of this proposed rule, a free, read-only copy of each of the VCS

is available for public inspection on ANSI’s Standards Connect portal, which is accessible to anyone who registers at <https://www.surveymonkey.com/r/DQVJYMK>.

C. Implementation Dates for Voluntary Consensus Standards

MSHA proposes the following dates for the implementation of the voluntary consensus standard requirements under part 18, also referenced in Table 2 below.

For the period that starts on [effective date of the final rule] and ends on [12 months after the effective date of the final rule]:

- New applications for approval may meet either subparts B through E requirements, or the requirements of the VCS listed in this part;
- Applications for approval in process may meet either subparts B through E requirements, or the

requirements of the VCS listed in this part;³ and

- Applications for formal extensions of approval or certification may meet the requirements under which the last approval, certification, or formal extension was issued by MSHA, or the

requirements of the VCS listed in this part.

Starting on [date 12 months after the effective date of the final rule]:

- New applications for approval must meet the requirements of the VCS listed in this part unless no VCS listed in this part apply; and

- Applications for formal extensions of approval or certification may meet the requirements under which the last approval, certification, or formal extension was issued by MSHA, or meet the requirements of the VCS listed in this part.

TABLE 2—IMPLEMENTATION DATES FOR VCS

Implementation date	Types of applications	Requirements to be used
For a 12-month period starting on [effective date of final rule].	New applications for approval	Either part 18, subparts B through E, or voluntary consensus standards.
	Applications for approval in process	Either part 18, subparts B through E, or voluntary consensus standards.
	Applications for changes to existing approved equipment.	Requirements under which the last approval, certification, or formal extension was issued by MSHA, or voluntary consensus standards.
Starting on [date 12 months after the effective date of the final rule].	New applications for approval	Voluntary consensus standards, and part 18, subparts B through E, if no listed voluntary consensus standard applies.
	Applications for changes to existing approved equipment.	Requirements under which the last approval, certification, or formal extension was issued by MSHA, or voluntary consensus standards.

D. Conforming Changes

The proposed rule also makes technical changes to 30 CFR part 74 (part 74) regarding the approval requirements for Coal Mine Dust Sampling Devices to conform to the proposed changes in part 18.

IV. Section-by-Section Analysis

A. Section 18.2—Definitions

The proposed rule would revise the definition for “permissible equipment.” The proposed rule also would add definitions for “voluntary consensus standard” and “voluntary consensus standards body.”

The definition for “permissible equipment” would be revised to remove the reference to the Mining Enforcement and Safety Administration (MESA). MESA and all its responsibilities were transferred to MSHA in 1978 under the Mine Act. The reference to MESA is no longer necessary (43 FR 12314, March 24, 1978).

The proposed rule would add two new terms and definitions to § 18.2. One is “voluntary consensus standard” that references a safety standard developed or adopted by a standard-setting organization. Another is “voluntary consensus standards body” that means a domestic or international standard-setting organization that plans, develops, establishes, or coordinates VCS using agreed-upon procedures that are consistent with the Transfer Act and Circular A–119.

Under Circular A–119, a voluntary consensus standards body is recognized if it develops VCS in accordance with the following attributes: Openness, balance of interest, due process, an appeals process, and consensus. This standards body also must adopt, publish, and make available to the public the VCS it adopts. Lastly, the voluntary consensus standards body must maintain each voluntary consensus standard through a schedule of review. As a Federal agency, MSHA relies upon OMB guidance in determining whether to incorporate by reference a voluntary consensus standard.

B. Section 18.6—Applications

Currently, § 18.6(e) requires that each drawing an applicant submits as part of the approval application under part 18 include a warning stating that changes in design must be authorized by MSHA before they are applied to approved equipment. This assures that all approval holders understand the importance of the approval for equipment safety and the impact any changes, made by any parties, have on the approval. MSHA proposes to remove this requirement because MSHA specifies in the approval letter sent to applicants that approval holders cannot make changes to designs without MSHA approval. The Agency has determined that the drawing-warning requirement is unnecessary because MSHA ensures throughout the approval process that

approval holders are aware of their responsibility to notify MSHA of changes to approved equipment.

C. Section 18.15—Changes After Approval or Certification

Currently, § 18.15 requires approval holders to submit an application to extend an approval if they want to change any feature of approved equipment or a certified component. Under § 18.15(c), MSHA proposes to add new paragraphs (c)(1) and (2).

Proposed paragraph (c)(1) would allow the application for a change after approval or certification to be made based on the requirements in subparts B through E or the VCS, whichever of these requirements applied to the last approval, certification, or formal extension issued by MSHA. Proposed paragraph (c)(2) would allow an application for a change after approval or certification to be made using the VCS listed in proposed § 18.102 that apply to those components if the applicant chooses to use the VCS requirements even though the last approval, certification, or formal extension issued by MSHA was based on subparts B through E requirements. If no VCS requirements listed in this part apply to a component, then subparts B through E requirements would apply.

Thus, under these proposed changes, approval holders would have the option to make changes based on either the last approval, certification, or formal

³ Applicants whose applications for approval use subparts B through E requirements and are under

MSHA review at the time the final rule becomes

effective may resubmit their applications using the VCS if they so choose.

extension issued by MSHA, or the VCS listed in this part, so that they could make a decision that suits them best. MSHA solicits comments on this aspect of the proposal.

D. Section 18.101—Acceptance and Use of Voluntary Consensus Standards

MSHA proposes to add a new subpart F, Voluntary Consensus Standards, consisting of proposed §§ 18.101 through 18.103.

Proposed § 18.101 is a new section that allows applicants to seek approval under part 18 for designs of electrical machines, accessories, or components that conform to the requirements in the VCS listed in proposed § 18.102. The VCS listed in proposed § 18.102 would apply to many of the components of the completely assembled equipment.

Under this proposal, applications for approval would require specifications to meet the VCS listed in this part, or existing subparts B through E requirements, or both, depending on the types of components in the fully assembled machines and accessories. Powered air-purifying respirators are examples of fully assembled machines that may be approved using only VCS requirements. However, certain completely assembled equipment such as longwall mining systems, continuous mining machines, shuttle cars, and roof-bolters, would not be covered entirely by any VCS of which MSHA is aware. For example, a continuous mining machine is made up of several components such as motors, lights, explosion proof enclosures, and other types of electrical components that are parts of the completely assembled machine. For this type of machine, some components will be subject to VCS requirements and other components will be subject to the subparts B through E requirements for MSHA approval.

Under proposed § 18.101(a), MSHA would replace the requirements specified in subparts B through E for components, accessories, and completely assembled electrical machines with applicable VCS that are suitable for gassy mining environments and that provide protection against fire or explosion dangers.

In proposed paragraph (b), MSHA is providing a transition period for the optional use of VCS for an applicant who submits an application within the first 12 months after the final rule becomes effective. In proposed paragraphs (b)(1) and (2), the applicant may choose to use either the subparts B through E requirements for any components or the VCS listed in proposed § 18.102 for components to which the listed VCS apply.

In proposed paragraph (c), once the 12-month transition period ends, MSHA would require the use of VCS in new applications for approval. Proposed paragraph (c)(1) would require applicants to use the VCS listed in proposed § 18.102 for components to which the listed VCS apply. In proposed paragraph (c)(2), MSHA would allow applicants to use subparts B through E requirements for a component to which no VCS listed in proposed § 18.102 would apply.

MSHA believes that a 12-month transition period will provide manufacturers, approval holders, and applicants enough time to make design and build changes necessary to meet the required specifications of the VCS for new applications.

MSHA requires marking requirements to indicate that a product is approved for use in gassy mines under § 18.11, subpart A. MSHA recognizes that the proposed VCS include non-technical requirements, such as marking requirements. Some of the markings required under § 18.11 may overlap with some of the markings required by the VCS; however, required VCS markings are not necessary for an approval. MSHA will provide the applicant with the required markings upon approval of an application. Therefore, the MSHA marking requirements in § 18.11, subpart A, would still apply to approved products. The MSHA marking on an approved product would continue to signify to the end users that the product is safe for use in gassy mines.

MSHA believes that the use of VCS under proposed § 18.101 will promote the use of innovative and advanced technologies that lead to improvements in mine safety and health. MSHA expects that the use of VCS would provide applicants and manufacturers with additional product design options for products and equipment with potential use in the mining industry without sacrificing the safety assurances associated with approvals. The use of VCS may also provide applicants and manufacturers access to other markets for products and equipment they currently only sell to the U.S. mining industry. Given the small U.S. market for products that the mining industry uses, designing products to meet MSHA-specific approval criteria can be costly, and in some cases may be financially prohibitive, for manufacturers who produce products for broader commercial use. The proposed changes would allow the introduction of products that conform to the VCS requirements and that further mine safety, but that MSHA could not

otherwise approve because the Agency does not currently recognize VCS requirements.

Further, MSHA has determined the VCS that the Agency proposes to incorporate by reference are developed in accordance with the following attributes: Openness, balance of interest, due process, an appeals process, and consensus. The use of VCS would make technologically advanced equipment available for use in U.S. mines in a quicker and more cost-effective manner, which could improve miner safety and health.

E. Section 18.102—Approved Voluntary Consensus Standards

Proposed § 18.102 is a new section. Proposed paragraph (a) establishes that MSHA has determined that the list in proposed paragraph (b) is suitable for gassy mining environments and will provide the protection against fire or explosion dangers if used in their entirety to replace MSHA approval requirements specified in subparts B through E.

The design of the electrically operated equipment must comply with the Types of Protection and Levels of Protection in the relevant VCS, as specified in proposed paragraph (b).

In proposed paragraph (b), MSHA would incorporate by reference the VCS listed in this section.

Proposed paragraphs (b)(1) through (3) include the VCS and specify the category of equipment (Group) and Level of Protection applicable to approvals.

These standards are from three sources. For the IEC standards listed in proposed paragraph (b)(1), the source is the International Electrotechnical Commission. For American National Standards listed in proposed paragraphs (b)(2) and (3), the two sources are the International Society for Automation (ISA) and UL LLC (UL). The IEC approves and publishes consensus-based International Standards and manages conformity assessment systems for electric and electronic products, systems and services, collectively known as electrotechnology. ANSI approves the American National Standards and supports the U.S. voluntary standards and conformity assessment system. In the case of the standards that begin with ANSI/ISA or ANSI/UL and follow with a common number, the ISA and UL versions are identical (co-sponsored and co-published). For example, ANSI/ISA 60079–11 and ANSI/UL 60079–11 refer to the same voluntary consensus standard with the specified Types of

Protection and Levels of Protection indicated.

Either ANSI or the IEC has approved all of the standards listed in proposed § 18.102. In the discussion below, “60079–0,” “60079–1,” “60079–11,” “60079–18,” “60079–25,” and “60079–28” refer to all three numbered versions of the VCS established by IEC, ISA, and UL.

Typically, the voluntary consensus standard-setting bodies base the ANSI standards on similarly-numbered International IEC standards. The ANSI standards are modifications of the IEC standards and include U.S. deviations and encompass both additional and deleted information. Experts prepare and maintain IEC standards using a rigorous and well-defined process. Similarly, the U.S. deviations are developed by nationally-recognized and vetted experts and are approved as American National Standards only if the appropriate procedures are followed.

The listed ANSI standards are interdependent with each other and with the NEC. Also, the listed IEC standards are interdependent with each other. For intrinsically safe devices, for example, 60079–0 provides the general requirements, and 60079–11 supplements and modifies the general requirements of 60079–0 (with documented exceptions). Similarly, for intrinsically safe systems, the 60079–25 standard supplements and modifies the general requirements of 60079–0 and the intrinsic safety standard 60079–11. For encapsulated electrical equipment, the 60079–18 standard also supplements and modifies the general requirements of 60079–0. For equipment and transmission systems using optical radiation, the 60079–28 standard also supplements and modifies the general requirements of 60079–0.

The 60079–0 standard provides the general requirements for the construction, testing, and marking of electrical equipment intended for use in explosive atmospheres.

The 60079–1 standard contains specific requirements for the construction and testing of electrical equipment, with the Type of Protection flameproof (FP) enclosure designated “d” intended for use in explosive gas atmospheres.

Similarly, 60079–11 specifies the construction and testing of intrinsically safe apparatus intended for use in an explosive atmosphere and for associated apparatus, which is intended for connection to intrinsically safe circuits that may enter such atmospheres.

Also, 60079–18 provides the specific requirements for the construction, testing, and marking of electrical

equipment, parts of electrical equipment, and components not intended to be used alone, with the Type of Protection encapsulation “m” intended for use in explosive gas atmospheres or explosive dust atmospheres.

The 60079–25 standard contains the specific requirements for construction and assessment of intrinsically safe electrical systems, intended for use, as a whole or in part, in hazardous locations. A system approved under this standard is comprised of equipment or components approved to the 60079–11 standard, interconnected to form a system.

Finally, 60079–28 contains the requirements of equipment emitting optical radiation intended for use in explosive atmospheres. It also covers equipment located outside the explosive atmosphere but which generates optical radiation that is intended to enter an explosive atmosphere.

The listed standards apply to equipment for use in all explosive atmospheres and locations that are likely to include those hazardous atmospheres. For the risk of ignition associated with gas concentrations, electrical equipment is divided into two broad categories: Group I and Group II.

Group I electrical equipment is intended for use in mines susceptible to firedamp, a flammable gas found in coal mines. Group II electrical equipment is intended for use in places with an explosive gas atmosphere, other than mines susceptible to firedamp. Both the ANSI and IEC standards note that firedamp consists mainly of methane, but also contains small quantities of other gases, such as nitrogen, carbon dioxide, and hydrogen, and sometimes ethane and carbon monoxide. The terms “firedamp” and “methane” are used frequently in mining practice as synonyms. In further discussions below, only the term “methane” will be used for simplicity.

The protections in these standards for Group I electrical equipment account for the ignition of both methane and coal dust, along with enhanced physical protection for equipment used underground. Thus, in this proposed rulemaking, MSHA proposes to use the requirements associated for Group I equipment in the listed standards.

As explained above, Group II electrical equipment is intended for use in places with an explosive gas atmosphere other than mines susceptible to methane. Also, Group II electrical equipment is subdivided according to the nature of the explosive gas atmosphere for which it is intended. Group II subdivisions are as follows:

IIA, a typical gas is propane; IIB, a typical gas is ethylene; and IIC, a typical gas is hydrogen. Because gassy mines where coal dust is commonly present may vary from the environments in which Group II electrical equipment is intended to operate, this proposed rule does not allow the use of Group II requirements in the listed standards.

The standards further define various “Types of Protection,” such as intrinsic safety. These “Types of Protection” are subdivided into “Levels of Protection” that differentiate the likelihood of the equipment becoming a source of ignition. For example, Type of Protection “intrinsic safety i” is defined by National Fire Protection Association (NFPA) 70, National Electrical Code (NEC), as Type of Protection where any spark or thermal effect is incapable of causing ignition of a mixture of flammable or combustible material in air under prescribed test conditions. In U.S. industries other than mining, and in mines internationally, the required Level of Protection is defined by the exposure to the hazard. These hazardous locations are divided into Zones, based on the level of exposure to the hazard. There are three such Zones defined in the NFPA 70, NEC, which is based on international standards. For explosive gases, for example, a Zone 0 location has ignitable concentrations of flammable gases or vapors either continuously present or present for long periods of time. A Zone 0 location, by definition, requires the highest protection levels against fire or explosion for equipment when used in Zone 0 atmospheres. The likelihood of exposure to flammable gases or vapors is lower in Zone 1 locations, and is further reduced in Zone 2 locations. Therefore, Zones 1 and 2 locations have reduced Levels of Protection requirements for equipment used in these locations compared to the Level of Protection for equipment used in Zone 0 locations. The NFPA 70, NEC subdivides Type of Protection “intrinsic safety i” into Levels of Protection “ia,” “ib,” and “ic” and designates that Level of Protection “ia” is appropriate for Zone 0, “ib” is appropriate for Zone 1, and “ic” is appropriate for Zone 2. Thus, Level of Protection “ia” is the highest Level of Protection.

To simplify the selection of electrical equipment for a given purpose, the standards also incorporate “Equipment Protection Levels,” or EPLs. These EPLs are assigned to equipment based on its likelihood of becoming a source of ignition and distinguishing the differences between explosive atmosphere types. For example, EPL G is intended for explosive gas

atmospheres, EPL D is intended for explosive dust atmospheres, and EPL M is intended for explosive atmospheres in mines susceptible to methane. The EPLs are further subdivided into protection levels Ga, Da, and Ma for very high protection suitable for a two-fault scenario; Gb, Db, and Mb for high protection suitable for a single fault scenario; and Gc and Dc for enhanced protection to minimize ignition risk. Thus, EPLs Ga, Da, and Ma are the highest protection levels for explosive gas atmospheres, dust atmospheres, and mine atmospheres susceptible to methane, respectively.

In 2018, researchers at the National Institute for Occupational Safety and Health (NIOSH) presented a paper to the Institute of Electrical and Electronics Engineers' (IEEE) Industry Applications Society titled "Intrinsically Safe Systems: Equivalency of International Standards Compared to U.S. Mining Approval Criteria."⁴ The researchers concluded that the relative Level of Protection afforded miners by the application of the ANSI/ISA 60079 two-fault intrinsically safe (IS) standard is a safe alternative to MSHA's requirements when such electrical equipment is installed in mines. They also concluded that the use of such equipment would provide at least an equivalent level of safety as that provided by equipment approved under MSHA criteria. MSHA is proposing to allow the use of the latest versions of the ANSI and IEC intrinsic safety standards.

The "two-fault IS standard" to which the NIOSH researchers refer above is the 60079–11 standard, Level of Protection "ia." This means that the researchers concluded, for intrinsically safe equipment and associated apparatuses, Level of Protection "ia" in the 60079–0, 60079–11, and 60079–25 standards provide miners with protection against fire and explosion dangers. The researchers subsequently concluded that the use of such equipment would provide at least an equivalent level of safety as that provided by equipment approved to MSHA criteria.⁵ MSHA agrees with this conclusion. Thus, because the NIOSH researchers have determined that Level of Protection "ia" provides miners with protection against fire and explosion, MSHA is proposing to require that manufacturers seeking approval using the incorporated VCS

conform to the "ia" Level of Protection where designated in this proposal.

Further, as discussed above, NFPA 70, NEC notes that intrinsic safety is the designated Type of Protection "ia" (intrinsic safety) for use in Zone 0 locations. The only other types of protection that NFPA 70, NEC allows for use in Zone 0 is Type of Protection "da" (flameproof enclosures) as defined in 60079–1 and Type of Protection "ma" (encapsulation) as defined in the 60079–18 standard. MSHA believes that "ia," "da," and "ma" will provide the necessary Level of Protection for miners because the NEC allows "ia," "da," and "ma" for use in Zone 0. MSHA has allowed encapsulated assemblies to be approved under part 18, since 2009, as noted in MSHA's Encapsulation Criteria, ACRI2010.⁶ ACRI2010 was based, in part, on the requirements of 60079–18 in place at the time it was created. MSHA has received no reports that encapsulated assemblies tested and evaluated to ACRI2010 have failed to provide the intended protection.

MSHA is proposing to include the 60079–1 standard for FP enclosures, but only Level of Protection "da" which is suitable for use in Zone 0 locations. Level of Protection "da" is applicable only to catalytic sensors of portable combustible gas detectors. Levels of Protection "db" and "dc" are not being included because they do not provide miners with suitable protection against fire and explosion in gassy mines.

MSHA proposes to include the 60079–18 standard (Level of Protection "ma") based on the following: (1) MSHA's experience with ACRI2010 and (2) the fact that the hazardous locations community allows the use of "ma" equipment in Zone 0, coupled with the determination by NIOSH researchers that the only other Level of Protection allowed in Zone 0 ("ia") provides miners protection against fire and explosion. Similarly, the 60079–28 standard (Equipment Protection Level Ma) is included based on the same factors.

In conclusion, the proposed rule would allow for the use of the latest versions of the ANSI and IEC standards for intrinsic safety ("ia"), flameproof catalytic sensors ("da"), and encapsulation ("ma") as they apply to Group I (Zone 0) (mining) equipment.

MSHA is interested in whether the proposal should be expanded to include other VCS. Please provide the rationale, with definitive data and explanation, for your position.

In summary, MSHA proposes to incorporate by reference the IEC standards in proposed paragraph (b)(1) and the ANSI standards in proposed paragraphs (b)(2) and (3), which are appropriate for use in Zone 0 locations. MSHA has determined that the VCS in proposed § 18.102 would provide protection against fire or explosion if used in their entirety to replace MSHA approval requirements specified in subparts B through E. However, the marking requirements in subpart A of this part would not be superseded by the requirements specified in the proposed VCS. The marking requirement in the existing rule would be included in the approval marking requirements as specified in § 18.11, subpart A.

F. Section 18.103—Review and Update of Applicable Voluntary Consensus Standards

Proposed § 18.103 is a new section about updating the existing list of VCS. To ensure timely updating of the list in § 18.102, MSHA would review more recent editions of the listed VCS and determine whether to accept them. Also, MSHA may review other VCS that are not listed in § 18.102 and determine whether they are suitable for gassy mining environments and provide protection against fire and explosion dangers. After such thorough reviews, MSHA would use the appropriate rulemaking process to publish an updated list of VCS that the Agency would accept to replace approval requirements in subparts B through E in part 18. MSHA also may remove a standard from the list in § 18.102 if it is withdrawn by a voluntary consensus standards body or for other reasons.

MSHA is aware that manufacturers of approved products currently used in mines may wish to design and manufacture products to more recent versions of MSHA-accepted VCS to keep products up-to-date for improvements and marketability.

Under proposed § 18.103, MSHA would consider updates and alternatives to existing standards that promote the efficiency and effectiveness of the MSHA approval process, which could lead to the use of innovative and advanced technologies in U.S. mines and to improvements in mine safety and health.

Conforming Amendments

This proposal would require conforming amendments to Coal Mine Dust Sampling Devices in existing part 74 based on the proposed changes in part 18.

⁴ William Calder, David P. Snyder, John F. Burr, Intrinsically Safe Systems: Equivalency of International Standards Compared to U.S. Mining Approval Criteria, DOI 10.1109/TIA.2018.2804322, IEEE Transactions on Industry Applications.

⁵ *Ibid.*

⁶ <https://arlweb.msha.gov/techsupp/acc/application/acri2010.pdf>.

Part 74—Coal Mine Dust Sampling Devices

MSHA proposes to change cross-references in §§ 74.5(b) and 74.11(d) for evaluation and testing for permissibility of Coal Mine Dust Sampling Devices from § 18.68 to part 18. This change in part 74 would conform to the proposed changes in part 18 and would allow the use of MSHA-designated VCS for the approval of coal mine dust sampling devices.

V. Regulatory Economic Analysis

A. Executive Orders 12866: Regulatory Planning and Review, and 13563: Improving Regulation and Regulatory Review

Executive Orders (E.O.s) 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). E.O. 13563 emphasizes the importance of quantifying both costs and benefits, of reducing costs, of harmonizing rules, and of promoting flexibility.

Currently, MSHA or an independent laboratory conducts the testing and evaluation of electrical products for which applicants seek MSHA approval for use in gassy mines. For new approval applications, this proposal would allow applicants to use either existing MSHA requirements or VCS for the first 12 months after the final rule becomes effective. After 12 months, MSHA will require new applicants to (1) use VCS requirements that apply to the components of the electrical machine or accessory and (2) use existing MSHA requirements for the components of the electrical machine or accessory to which no listed VCS apply. Under current regulations, costs to approve equipment are defined as transfers and not E.O. 12866 costs. In this case, costs represent MSHA's costs recovered from approval applicants via a fee.

Under the proposed rule, it is unlikely that the number of approval requests will change much. Based on discussions with past applicants, MSHA understands that many products submitted to MSHA for approval have been accepted using VCS for mining outside the U.S. or for other industries (e.g., oil and gas extraction) that have similar safety standards. Applicants submitting these types of products for MSHA approval would likely experience substantially lower approval

costs. Because their products already meet VCS listed in this proposed rule and would no longer need to meet MSHA-specific requirements, no additional technical drawings, documentation, and testing would be necessary beyond that submitted elsewhere for VCS approval.

Some current approval holders may incur costs because of the requirement to use VCS after the 12-month transition period.⁷ For those requesting new approvals, the costs would be mostly attributable to the approval holder having to create new design and build specifications using VCS requirements instead of using already existing design and build specifications based on part 18, subparts B through E, requirements. By contrast, current approval holders that are requesting only a minor modification of an approval should not incur costs, because they would be allowed to choose to use the requirements (either part 18, subparts B through E, or VCS) under which the last approval, certification, or formal extension was issued by MSHA. Based on discussions between MSHA and applicants during past approvals, MSHA concludes that a small number of current approval holders may decide not to stay in the mining market.

This proposed rule will provide benefits to both manufacturers of electrical products and the consumers of those products—mine operators and miners. Currently, some products that use modern technologies that could improve the safety and health of miners are not being introduced into the U.S. mining market. One reason may be that technical requirements set by MSHA differ from those that apply in other countries. These MSHA-specific technical requirements may slow, or even prevent, these new technologies from being implemented in U.S. underground mines. Use of VCS to replace MSHA-specific requirements would likely reduce the overall design and approval costs for many manufacturers; as a result, manufacturers introducing new technologies may experience fewer barriers for product market entry into the mining industry.

This proposed rule would not affect currently approved equipment, as it would allow manufacturers and mine operators to continue to sell or purchase all currently approved equipment. If at a future date, a current approval holder wishes to alter approved equipment, the

application could comply with the requirements on which the approval was based or with the VCS requirements listed in this part.

Therefore, MSHA does not anticipate that manufacturers will have difficulties in meeting these requirements. MSHA's acceptance of VCS would provide more choices of mining products to mine operators and miners, as these VCS are used by the broader market. MSHA does not anticipate problems in manufacturing or purchasing products that meet VCS, as such products are already in use in markets outside of U.S. mining.

In summary, under this proposal, approval holders would not be required to alter equipment or incur any new costs for existing approvals. New applicants may choose the standards most beneficial to them during the 12-month transition period. For those applicants whose products already meet VCS requirements, they would likely experience either no new costs, or cost reductions. Overall, net costs are more likely to go down than up.

The Agency is interested in whether the proposal to include VCS may result in cost differences for applicants due to the proposal to eliminate subparts B through E requirements for new approvals. Please provide the rationale, with definitive data and explanation, for your position.

Under E.O. 12866, a significant regulatory action is one meeting any of a number of specified conditions, including the following:

- Having an annual effect on the economy of \$100 million or more;
- Creating a serious inconsistency or interfering with an action of another agency;
- Materially altering the budgetary impact of entitlements or the rights of entitlement recipients; or
- Raising novel legal or policy issues.

MSHA has determined that this is a not a significant regulatory action under E.O. 12866.

B. E.O. 13771: Reducing Regulation and Controlling Regulatory Costs, and E.O. 13924: Regulatory Relief To Support Economic Recovery

This proposed rule is not expected to be an E.O. 13771 regulatory action, because this proposed rule is not significant under E.O. 12866. As discussed above, the proposed use of VCS would have minimal total costs, but it would have the benefit of streamlining product approval and providing greater flexibility to potential market entrants and therefore MSHA believes it will be deregulatory.

⁷ Applicants may choose to use VCS for new approvals for the first 12 months after the effective date of the final rule. After 12 months, new applications for approval must use VCS, if applicable.

MSHA also believes the proposal meets policy goals of E.O. 13924: It reflects the efforts of businesses to comply with often-complex approval regulations, and it provides businesses with the confidence that requesting approvals covered by this proposal will allow them to meet a single set of standards as they plan product development for global markets.

VI. Feasibility

Economic feasibility is related to an entire industry rather than individual firms. In the E.O. 12866 and E.O. 13563 section above, MSHA discussed that global manufacturers of products for mining already successfully use the VCS for mining outside the U.S. The proposal would provide MSHA and most manufacturers increased flexibility for approval of existing or new equipment for use in gassy mines. Although some businesses might choose not to seek new approvals, MSHA could not identify any product that would likely leave the U.S. market without the availability of an alternative. MSHA has concluded that the requirements of the proposed rule would be both technologically and economically feasible.

VII. Regulatory Flexibility Act; Small Business Regulatory Enforcement Fairness Act; and E.O. 13272

MSHA has analyzed the overall compliance cost impact of the proposed rule on small entities. No current approval holder would be required to make a product change due to this proposal. A small entity would make application for an extension or new approval only if the financial benefit outweighs new costs. For new product approvals, the existing MSHA approval requirement costs would be replaced by compliance costs of the VCS. Because MSHA cannot know what products would be submitted for approval, it is not possible to quantify how much different the costs would be. Based on the discussions between MSHA and applicants described previously, MSHA believes the MSHA standards to be more burdensome, and the Agency projects cost reductions for some small entities. For E.O. 13272 considerations of the applicable statutes, there are no new mandated direct costs of this proposed rule. MSHA proposes to certify that the rule would not have a significant economic impact on a substantial number of small entities. Therefore, the Agency is not required to develop an initial regulatory flexibility analysis.

VIII. Paperwork Reduction Act of 1995

The Paperwork Reduction Act (PRA) provides for the Federal Government's collection, use, and dissemination of information. The goals of the PRA include minimizing paperwork and reporting burdens and ensuring the maximum possible utility from the information that is collected (44 U.S.C. 3501). There are no new information collections associated with this proposed rule.

IX. Other Regulatory Considerations

A. The Unfunded Mandates Reform Act of 1995

MSHA has reviewed the proposed rule under the Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1501 *et seq.*). MSHA has determined that this proposed rule does not include any Federal mandate that may result in increased expenditures by State, local, or tribal governments. Since the proposed rule does not have any costs, the rule is not a major rule under the Unfunded Mandates Reform Act of 1995. Accordingly, the Unfunded Mandates Reform Act of 1995 requires no further Agency action or analysis.

B. E.O. 13132: Federalism

The proposed rule does not have "federalism implications" because it would not "have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government." Accordingly, under E.O. 13132, no further Agency action or analysis is required.

C. E.O. 12630: Government Actions and Interference With Constitutionally Protected Property Rights

The proposed rule does not implement a policy with takings implications. Accordingly, under E.O. 12630, no further Agency action or analysis is required.

D. E.O. 12988: Civil Justice Reform

The proposed rule was written to provide a clear legal standard for affected conduct and was carefully reviewed to eliminate drafting errors and ambiguities, to minimize litigation and undue burden on the Federal court system. Accordingly, the rule meets the applicable standards provided in section 3 of E.O. 12988, Civil Justice Reform.

E. E.O. 13175: Consultation and Coordination With Indian Tribal Governments

This proposed rule does not have "tribal implications" because it would not "have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes." Accordingly, under E.O. 13175, no further Agency action or analysis is required.

F. E.O. 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use

E.O. 13211 requires agencies to publish a statement of energy effects when a rule has a significant energy action that adversely affects energy supply, distribution, or use. MSHA has reviewed this proposed rule for its energy effects. There are no costs associated with this proposed rule. For the energy analysis, this rule would not exceed the relevant criteria for adverse impact.

G. Congressional Review Act

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), this proposed rule is not a "major rule," as defined by 5 U.S.C. 804(2).

List of Subjects

30 CFR Part 18

Incorporation by reference, Mine safety and health, Reporting and recordkeeping requirements.

30 CFR Part 74

Mine safety and health, Occupational safety and health.

For the reasons set out in the preamble, and under the authority of the Federal Mine Safety and Health Act of 1977, as amended by the Mine Improvement and New Emergency Response Act of 2006, MSHA proposes to amend chapter I of title 30 of the Code of Federal Regulations as follows:

PART 18—ELECTRIC MOTOR-DRIVEN MINE EQUIPMENT AND ACCESSORIES

■ 1. The authority citation for part 18 continues to read as follows:

Authority: 30 U.S.C. 957, 961.

■ 2. Amend § 18.2 by:

■ a. Revising the definition for "Permissible equipment"; and

■ b. Adding in alphabetical order the definitions for "Voluntary consensus

standard” and “Voluntary consensus standards body.”

The revision and additions read as follows:

§ 18.2 Definitions.

* * * * *

Permissible equipment means a completely assembled electrical machine or accessory for which an approval has been issued.

* * * * *

Voluntary consensus standard means a safety standard that:

(1) Is developed or adopted by a voluntary consensus standards body; and

(2) Prescribes safety requirements applicable to equipment for which applicants are seeking approval, certification, extension, or acceptance under this part.

Voluntary consensus standards body means a domestic or international organization that plans, develops, establishes, or coordinates voluntary consensus standards using agreed-upon procedures that are consistent with the National Technology Transfer and Advancement Act of 1995 (15 U.S.C. 3710) and the Office of Management and Budget’s Circular A–119 (Jan. 27, 2016).

§ 18.6 [Amended]

■ 3. Amend § 18.6 by removing the third sentence in paragraph (e).

■ 4. Amend § 18.15 by revising paragraph (c) to read as follows:

§ 18.15 Changes after approval or certification.

* * * * *

(c) An application for a formal extension of approval or certification must have a list of new or revised drawings, specifications, and information related to the changes to be added to those already on file for the original approval or certification. MSHA will issue a formal extension of approval or certification to a completely assembled electrical machine or accessory, if each component of such electrical machine or accessory:

(1) Meets the requirements applied to the last approval, certification, or extension thereof; or

(2) Meets voluntary consensus standard requirements listed in this part that apply to those components if the applicant chooses to use the requirements of the voluntary consensus standards.

* * * * *

■ 5. Add subpart F, consisting of §§ 18.101 through 18.103, to read as follows:

Subpart F—Voluntary Consensus Standards

Sec.

18.101 Acceptance and use of voluntary consensus standards.

18.102 Approved voluntary consensus standards.

18.103 Review and update of applicable voluntary consensus standards.

§ 18.101 Acceptance and use of voluntary consensus standards.

(a) MSHA will accept voluntary consensus standards that are suitable for gassy mining environments and that provide protection against fire or explosion, if used in their entirety and without modification to replace the requirements in subparts B through E of this part.

(b) For applications submitted on or after [effective date of final rule] until [date 12 months after the effective date of final rule], an approval will be issued in accordance with subpart A of this part for a completely assembled electrical machine or accessory, if each component of such electrical machine or accessory:

(1) Meets the requirements in subparts B through E of this part; or

(2) Meets voluntary consensus standard requirements listed in this part that apply to those components.

(c) For applications submitted on or after [date 12 months after the effective date of the final rule], an approval will be issued in accordance with subpart A of this part for a completely assembled electrical machine or accessory, if the components of such machine or accessory:

(1) Meet the requirements of the voluntary consensus standards listed in this part that apply to those components; and

(2) Meet the requirements of subparts B through E of this part that apply to components if no voluntary consensus standard listed in this part applies.

§ 18.102 Approved voluntary consensus standards.

(a) MSHA has determined that the provisions associated with the Group and Levels of Protection provisions of the voluntary consensus standards listed in paragraph (b) of this section are suitable for gassy mining environments and will provide the protection for against fire or explosion if used in their entirety and without modification to replace the requirements in subparts B through E of this part.

(b) Certain material is incorporated by reference into this section with the approval of the Director of the Federal Register under 5 U.S.C. 552(a) and 1 CFR part 51. All approved material is

available for inspection at U.S. Department of Labor, Mine Safety and Health Administration, 765 Technology Drive, Triadelphia, WV 26059, Tel: (304) 547–0400, and is available from the sources indicated in this paragraph (b). It is also available for inspection at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email fedreg.legal@nara.gov or go to www.archives.gov/federal-register/cfr/ibr-locations.html.

(ii) ANSI/ISA 60079–25 (12.02.05)—2011 Standard for Explosive Atmospheres—Part 25: Intrinsically Safe Electrical Systems (Group I, Level of Protection ‘ia’), dated December 2, 2011.

(3) UL LLC, Comm 2000, 151 Eastern Avenue, Bensenville, IL 60106, Tel: (888) 853–3503 (<https://www.ul.com>).

(i) ANSI/UL 60079–0 Ed. 7, Explosive Atmospheres—Part 0: Equipment—

General Requirements (Group I), dated March 26, 2019;

(ii) ANSI/UL 60079–1 Ed. 7, Standard for Explosive Atmospheres—Part 1: Equipment Protection by Flameproof Enclosures “d” (Group I, Level of Protection ‘da’), dated September 18, 2015;

(iii) ANSI/UL 60079–11 Ed. 6, Standard for Explosive Atmospheres—Part 11: Equipment Protection by Intrinsic Safety “i” (Group I, Level of Protection ‘ia’), dated February 15, 2013;

(iv) ANSI/UL 60079–18, Ed. 4, Standard for Explosive Atmospheres—Part 18: Equipment Protection by Encapsulation “m” (Group I, Level of Protection ‘ma’), dated December 14, 2015;

(v) ANSI/UL 60079–25 Ed. 2, Standard for Explosive Atmospheres—Part 25: Intrinsically Safe Electrical Systems (Group I, Level of Protection ‘ia’), dated December 2, 2011; and

(vi) ANSI/UL 60079–28 Ed. 2, Standard for Explosive Atmospheres—Part 28: Protection of Equipment and Transmission Systems Using Optical Radiation (Group I, Equipment Protection Level ‘Ma’), dated September 15, 2017.

(4) The voluntary consensus standards listed in this paragraph (b) may also be obtained from the American National Standards Institute, 1899 L Street NW, 11th Floor, Washington, DC 20036, Tel: (202) 293–8020 (<https://www.ansi.org>).

§ 18.103 Review and update of applicable voluntary consensus standards.

(a) MSHA will review more recent editions of voluntary consensus standards listed in § 18.102 to determine whether they can be used in their entirety and without modification to replace the requirements in subparts B through E of this part.

(b) MSHA may review voluntary consensus standards not listed in § 18.102 to determine whether such standards are suitable for gassy mining environments and whether they provide protection against fire or explosion, if substituted in their entirety and without modification to replace the requirements in subparts B through E of this part.

(c) Following such review and determination, MSHA will use the appropriate rulemaking process to publish a list of voluntary consensus standards that it accepts in lieu of the requirements in subparts B through E of this part.

PART 74—COAL MINE DUST SAMPLING DEVICES

■ 6. The authority citation for part 74 continues to read as follows:

Authority: 30 U.S.C. 957.

§§ 74.5 and 74.11 [Amended]

■ 7. In §§ 74.5(b) and 74.11(d), remove “30 CFR 18.68” and add in its place the term “30 CFR part 18.”

David G. Zatezalo,

Assistant Secretary of Labor for Mine Safety and Health.

BILLING CODE 4520–43–P

DEPARTMENT OF HOMELAND SECURITY

Coast Guard

33 CFR Part 117

[Docket No. USCG–2020–0603]

RIN 1625–AA09

Drawbridge Operation Regulation; Hackensack River, Jersey City, NJ

AGENCY: Coast Guard, DHS.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Coast Guard is proposing to modify the operating schedules that govern the new Route 7 Bridge, mile 3.1, crossing the Hackensack River, at Jersey City, NJ. The bridge owner, the New Jersey Department of Transportation (NJDOT), submitted a request to allow the bridge to require four hours advance notice for bridge openings. It is expected that this change to the regulations will create efficiency in drawbridge operations and better serve the needs of the community while continuing to meet the reasonable needs of navigation.

DATES: Comments and related material must reach the Coast Guard on or before January 19, 2021.

ADDRESSES: You may submit comments identified by docket number USCG–2020–0603 using the Federal eRulemaking Portal at <http://www.regulations.gov>.

See the “Public Participation and Request for Comments” portion of the **SUPPLEMENTARY INFORMATION** section below for instructions on submitting comments.

FOR FURTHER INFORMATION CONTACT: If you have questions on this proposed rule, call or email Judy Leung-Yee, Project Officer, First Coast Guard District; telephone 212–514–4336, email Judy.K.Leung-Yee@uscg.mil.

SUPPLEMENTARY INFORMATION:

I. Table of Abbreviations

CFR Code of Federal Regulations

NJDOT New Jersey Department of Transportation

DHS Department of Homeland Security

FR Federal Register

OMB Office of Management and Budget

NPRM Notice of Proposed Rulemaking (Advance, Supplemental)

§ Section

U.S.C. United States Code

II. Background, Purpose and Legal Basis

The new Route 7 Bridge at mile 3.1 over the Hackensack River at Jersey City, New Jersey, is currently under construction and will have a vertical clearance of 70 feet at mean high water in the closed position and 135 feet at mean high water in the open position. Horizontal clearance is approximately 158 feet. The existing Route 7 Bridge over the Hackensack River has a vertical clearance of 35 feet at mean high water in the closed position and 135 feet at mean high water in the open position. Horizontal clearance is approximately 158 feet.

The waterway users include recreational and commercial vessels including tugboat/barge combinations.

The existing regulation, 33 CFR 117.723(k) published under **Federal Register** 85 FR 8747, effective April 19, 2020, requires the existing bridge open on signal; except that, from 11 p.m. to 7 a.m., the draw shall open on signal if at least two hours advance notice is given by calling the number posted at the bridge.

In August of 2020, the owner of the bridge, NJDOT, requested a change to the drawbridge operation regulations to the new bridge anticipating lower volume of bridge openings given that the new bridge vertical clearance in the closed position will be double the clearance of the existing bridge.

Under this proposed rule the new draw would open on signal if at least four hours advance notice is given by calling the number posted at the bridge. This rule change will allow for more efficient and economic operation of the bridge while meeting the reasonable needs of navigation. The Coast Guard is proposing this rulemaking under authority in 33 U.S.C. 499.

NJDOT reached out to the maritime stakeholders with the requested change proposed and received no objections.

III. Discussion of Proposed Rule

The bridge logs show that the Route 7 Bridge had 16 openings in 2018, 10 openings in 2019, and 6 openings in 2020 (through 6/19/2020). The Coast Guard proposes to permanently modify the operating regulation.

The proposed rule would allow that the new Route 7 Bridge shall open on signal if at least four hours advance notice is given by calling the number posted at the bridge. Both new and current bridges will operate under the existing operating schedule until the original bridge is demolished/removed at which point this proposed rule will take effect.

It is the Coast Guard's opinion that the proposed rule meets reasonable needs of marine traffic.

IV. Regulatory Analyses

We developed this proposed rule after considering numerous statutes and Executive Orders related to rulemaking. Below we summarize our analyses based on these statutes and Executive Orders and we discuss First Amendment rights of protestors.

A. Regulatory Planning and Review

Executive Orders 12866 and 13563 direct agencies to assess the costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits. Executive Order 13771 directs agencies to control regulatory costs through a budgeting process. This NPRM has not been designated a "significant regulatory action," under Executive Order 12866. Accordingly, the Office of Management and Budget (OMB) has not reviewed the NPRM and pursuant to OMB guidance, it is exempt from the requirements of Executive Order 13771.

The Coast Guard believes this rule is not a significant regulatory action. The bridge will still open for all vessel traffic after a four-hour advance notice is given. The vertical clearance under the bridge in the closed position is relatively high enough to accommodate most vessel traffic. We believe that this proposed change to the drawbridge operation regulations at 33 CFR 117.723 will meet the reasonable needs of navigation.

B. Impact on Small Entities

The Regulatory Flexibility Act of 1980 (RFA), 5 U.S.C. 601–612, as amended, requires federal agencies to consider the potential impact of regulations on small entities during rulemaking. The term "small entities" comprises small businesses, not-for-profit organizations that are independently owned and operated and are not dominant in their fields, and governmental jurisdictions with populations of less than 50,000. The Coast Guard certifies under 5 U.S.C. 605(b) that this proposed rule would not have a significant economic impact on a substantial number of small entities.

The new Route 7 Bridge provides 70 feet of vertical clearance at mean high water that should accommodate most of the present vessel traffic except deep draft vessels. The new bridge will open on signal for any vessel when a four hour advance notice is given. While some owners or operators of vessels intending to transit the bridge may be small entities, for the reasons stated in section IV.A, above, this proposed rule would not have a significant economic impact on any vessel owner or operator.

If you think that your business, organization, or governmental jurisdiction qualifies as a small entity and that this rule would have a significant economic impact on it, please submit a comment (see **ADDRESSES**) explaining why you think it qualifies and how and to what degree this rule would economically affect it.

Under section 213(a) of the Small Business Regulatory Enforcement Fairness Act of 1996 (Pub. L. 104–121), we want to assist small entities in understanding this proposed rule. If the rule would affect your small business, organization, or governmental jurisdiction and you have questions concerning its provisions or options for compliance, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT**, section. The Coast Guard will not retaliate against small entities that question or complain about this proposed rule or any policy or action of the Coast Guard.

C. Collection of Information

This proposed rule would call for no new collection of information under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520.).

D. Federalism and Indian Tribal Government

A rule has implications for federalism under Executive Order 13132, (Federalism), if it has a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. We have analyzed this proposed rule under that Order and have determined that it is consistent with the fundamental federalism principles and preemption requirements described in Executive Order 13132.

Also, this proposed rule does not have tribal implications under Executive Order 13175 (Consultation and Coordination with Indian Tribal Governments) because it would not have a substantial direct effect on one or more Indian tribes, on the relationship between the Federal Government and

Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. If you believe this proposed rule has implications for federalism or Indian tribes, please contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section.

E. Unfunded Mandates Reform Act

The Unfunded Mandates Reform Act of 1995 (2 U.S.C. 1531–1538) requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a State, local, or tribal government, in the aggregate, or by the private sector of \$100,000,000 (adjusted for inflation) or more in any one year. Though this proposed rule will not result in such an expenditure, we do discuss the effects of this proposed rule elsewhere in this preamble.

F. Environment

We have analyzed this proposed rule under Department of Homeland Security Management Directive 023–01, Rev.1, associated implementing instructions, and Environmental Planning COMDTINST 5090.1 (series), which guides the Coast Guard in complying with the National Environmental Policy Act of 1969 (NEPA) (42 U.S.C. 4321–4370f). The Coast Guard has determined that this action is one of a category of actions that do not individually or cumulatively have a significant effect on the human environment. This proposed rule promulgates the operating regulations or procedures for drawbridges. Normally, such actions are categorically excluded from further review, under paragraph L49, of Chapter 3, Table 3–1 of the U.S. Coast Guard Environmental Planning Implementation Procedures.

Neither a Record of Environmental Consideration nor a Memorandum for the Record are required for this rule. We seek any comments or information that may lead to the discovery of a significant environmental impact from this proposed rule.

G. Protest Activities

The Coast Guard respects the First Amendment rights of protesters. Protesters are asked to contact the person listed in the **FOR FURTHER INFORMATION CONTACT** section to coordinate protest activities so that your message can be received without jeopardizing the safety or security of people, places or vessels.

V. Public Participation and Request for Comments

We view public participation as essential to effective rulemaking, and will consider all comments and material received during the comment period. Your comment can help shape the outcome of this rulemaking. If you submit a comment, please include the docket number for this rulemaking, indicate the specific section of this document to which each comment applies, and provide a reason for each suggestion or recommendation.

We encourage you to submit comments through the Federal e-Rulemaking Portal at <http://www.regulations.gov>. If your material cannot be submitted using <http://www.regulations.gov>, contact the person in the **FOR FURTHER INFORMATION CONTACT** section of this document for alternate instructions.

We accept anonymous comments. All comments received will be posted

without change to <http://www.regulations.gov> and will include any personal information you have provided. For more about privacy and submissions in response to this document, see DHS's eRulemaking System of Records notice (85 FR 14226, March 11, 2020).

Documents mentioned in this NPRM as being available in this docket and all public comments, will be in our online docket at <http://www.regulations.gov> and can be viewed by following that website's instructions. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted or a final rule is published.

List of Subjects in 33 CFR Part 117

Bridges.

For the reasons discussed in the preamble, the Coast Guard proposes to amend 33 CFR part 117 as follows:

PART 117—DRAWBRIDGE OPERATION REGULATIONS

■ 1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 33 CFR 1.05–1; and Department of Homeland Security Delegation No. 0170.1.

■ 2. Revise § 117.723, paragraph (k) to read as follows:

§ 117.723 Hackensack River.

* * * * *

(k) The draw of the Route 7 Bridge, mile 3.1, at Jersey City, shall open on signal if at least four hours advance notice is given by calling the number posted at the bridge.

Dated: November 12, 2020.

T.G. Allan, Jr.,

Rear Admiral, U.S. Coast Guard, Commander, First Coast Guard District.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[Docket. No. AMS–FTPP–20–0088]

Notice of Request for Extension and Revision of a Currently Approved Information Collection

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35)(PRA), this notice announces the Agricultural Marketing Service's (AMS) intention to request approval, from the Office of Management and Budget, for an extension of and revision to the currently approved information collection in support of the reporting and recordkeeping requirements under the Packers and Stockyards Act of 1921, as amended and supplemented (P&S Act). This approval is required under the PRA.

DATES: Comments on this notice must be received by January 19, 2021 to be assured of consideration.

ADDRESSES: Interested persons are invited to submit written comments on the internet at <http://www.regulations.gov> or to Brett Offutt, Chief Legal Officer/Policy Advisor, Packers and Stockyards Division, Rm. 2507, 1400 Independence Ave. SW, Washington, DC 20250–3601, or by email to s.brett.offutt@usda.gov. All comments submitted in response to this proposed rule will be included in the record and will be made available to the public. Please be advised that the identity of the individuals or entities submitting comments will be made public on the internet at the address provided above.

FOR FURTHER INFORMATION CONTACT: Contact Jeana M. Harbison, Enforcement

Branch Chief, Packers and Stockyards Division at (202) 690–3192, or jeana.m.harbison@usda.gov; or Patricia L. Tolle, Supervisory Financial Systems Analyst at 303–375–4274, or patricia.l.tolle@usda.gov.

SUPPLEMENTARY INFORMATION: *Title:* Regulations and Related Reporting and Recording Requirements—Packers and Stockyards Division

OMB Number: 0581–0308.

Expiration Date of Approval: February 28, 2021.

Type of Request: Extension and revision of a currently approved information collection.

Abstract: The P&S Act and the regulations issued under the P&S Act authorize the collection of information for the purpose of enforcing the P&S Act and regulations and for conducting studies requested by Congress. Through the forms in this information collection, the Fair Trade Practices Program (FTPP), Packers and Stockyards Division (PSD) gathers information that keeps PSD current on the ownership and operations of regulated entities which permit PSD oversight of the regulated entities. For example, PSD gathers information regarding the number of head of livestock purchased and the cost of the livestock to determine if an entity is adequately bonded to protect the livestock sellers. The information regarding the amount of livestock purchased is also consolidated for public reporting in PSD's annual report. Other financial information is gathered to determine if regulated entities are operating while solvent as required by the P&S Act. This information collection is necessary for PSD to monitor and examine financial, competitive, and trade practices in the livestock, meat packing and poultry industries. The purpose of this notice is to solicit comments from the public concerning PSD's information collection.

Estimate of Burden: Public reporting burden for this collection of information is estimated to average 1.73 hours per response.

Respondents: Livestock auction markets, livestock dealers, packer buyers, meat packers, and live poultry dealers.

Estimated Number of Respondents: 14,631.

Estimated Total Annual Responses: Less than 2.5 hours.

Estimated Number of Responses per Respondent: 1.

Estimated Total Annual Burden on Respondents: 9,035 hours.

Comments are invited on: (1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden of the proposed collection of information including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility, and clarity of the information to be collected; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

All responses to this notice will be summarized and included in the request for OMB approval. All comments will become a matter of public record.

Bruce Summers,

Administrator, Agricultural Marketing Service.

[FR Doc. 2020–25596 Filed 11–18–20; 8:45 am]

BILLING CODE P

DEPARTMENT OF AGRICULTURE

Submission for OMB Review; Comment Request

November 16, 2020.

The Department of Agriculture has submitted the following information collection requirement(s) to Office of Management and Budget (OMB) for review and clearance under the Paperwork Reduction Act of 1995, Public Law 104–13. Comments are requested regarding: Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; the accuracy of the agency's estimate of burden including the validity of the methodology and assumptions used; ways to enhance the quality, utility and clarity of the information to be collected; ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic,

mechanical, or other technological collection techniques or other forms of information technology.

Comments regarding this information collection received by December 21, 2020 will be considered. Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function.

An agency may not conduct or sponsor a collection of information unless the collection of information displays a currently valid OMB control number and the agency informs potential persons who are to respond to the collection of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number.

Rural Utilities Service

Title: Telecommunications System Construction Policies and Procedures.

OMB Control Number: 0572-0059.

Summary of Collection: The Rural Electrification Act of 1936 (RE Act), 7 U.S.C. 901 *et seq.*, was amended in 2002 by Title IV, Rural Broadband Access, by Farm Security and rural Investment Act, which authorizes Rural Utilities Service (RUS) to provide loans and loan guarantees to fund the cost of construction, improvement, or acquisition for facilities and equipment for the provision of broadband service in eligible rural communities in the States and territories of the United States. Title VI of the RE Act requires that loans are granted only to borrowers who demonstrated that they will be able to repay in full within the time agreed. RUS has established certain standards and specification for materials, equipment and construction to assure that standards are maintained; loans are not adversely affected, and loans are used for intended purposes.

Need and Use of the Information: RUS has developed specific forms for borrowers to use when entering into contracts for goods or services. The information collected is used to implement certain provisions of loan documents about the borrower's purchase of materials and equipment and the construction of its broadband system and is provided on an as needed basis or when the individual borrower undertakes certain projects. The standardization of the forms has resulted in substantial savings to

borrowers by reducing preparation of the documentation and the costly review by the government.

Description of Respondents: Business or other for-profit; Not-for-profit institutions.

Number of Respondents: 1,432.

Frequency of Responses: Reporting: On occasion.

Total Burden Hours: 6,609.

Levi S. Harrell,

Departmental Information Collection Clearance Officer.

Office of the Secretary

Request for Nominations of Members for the Citrus Disease Subcommittee

AGENCY: Office of the Chief Scientist, USDA.

ACTION: Solicitation for membership.

SUMMARY: In accordance with the Federal Advisory Committee Act, the U.S. Department of Agriculture (USDA) announces the opening of the solicitation for nominations to fill vacancies on the National Agricultural Research, Extension, Education, and Economics (NAREEE) Advisory Board—Citrus Disease Subcommittee. There are three vacancies on the Citrus Disease Subcommittee.

DATES: USDA will consider nominations received by December 19, 2020.

ADDRESSES: Due to COVID-19, we ask that you email all correspondence to the email in this notice to ensure receipt of nomination packages. Please email the nominee's name, resume or CV, completed and signed Form AD-755, and any letters of support to nareee@usda.gov.

FOR FURTHER INFORMATION CONTACT: Kate Lewis, Director, National Agricultural Research, Extension, Education, and Economics Advisory Board, 1400 Independence Avenue SW, Room 332A, The Whitten Building, Washington, DC 20250-2255; telephone: 202-631-1434 or email: nareee@usda.gov. Committee website: <https://nareeeab.ree.usda.gov/>.

SUPPLEMENTARY INFORMATION:

Instructions for Nominations: Nominations are solicited from organizations, associations, societies, councils, federations, groups, and companies that represent a wide variety of food and agricultural interests throughout the country.

Nominees may be considered for the NAREEE Advisory Board and or a

subcommittee and may be considered for more than one category and/or subcommittee dependent on the nominee's qualifications. Each nominee must submit a signed form AD-755, "Advisory Committee Membership Background Information," which can be obtained from the contact person above or from: <https://www.ocio.usda.gov/sites/default/files/docs/2012/AD-755%20-%20Approved%20Master%202015.pdf>. A resume or CV should also be submitted. Letters of nomination or support are encouraged.

Nominations are open to all individuals without regard to race, color, religion, sex, national origin, age, mental or physical handicap, marital status, or sexual orientation. To ensure the recommendation of the Advisory Board takes into account the needs of the diverse groups served by the USDA, membership shall include, to the extent practicable, individuals with demonstrated ability to represent the needs of all racial and ethnic groups, women and men, and persons with disabilities.

Please note, individuals may not serve on more than one USDA Federal Advisory Committee. Individuals, who are lobbyists, appointed to committees to exercise their own individual best judgment on behalf of the government (e.g., as Special Government Employees) are ineligible to serve.

All nominees will be carefully reviewed for their expertise, leadership, and relevance. Appointed members will serve two-, or three-year terms in order to properly stagger term rotation. All nominees will be vetted before selection. Appointments to the NAREEE Advisory Board and its subcommittees will be made by the Secretary of Agriculture.

Citrus Disease Subcommittee: The Citrus Disease Subcommittee was established by the Agricultural Act of 2014 (Sec. 7103) to advise the Secretary of Agriculture on citrus research, extension, and development needs, engage in regular consultation and collaboration with USDA and other organizations involved in citrus, and provide recommendations for research and extension activities related to citrus disease. The Citrus Disease Subcommittee will also advise the Department on the research and extension agenda of the Emergency Citrus Disease Research and Extension Program, a grant program of the National Institute of Food and Agriculture. Section 1408(a)(2) of the Agricultural Improvement Act of 2018 amended the membership of the Citrus Disease Subcommittee to increase the number of members from 9 members to

11. Members must be a producer of citrus with representation from the following States: Five members from Arizona or California, five members from Florida, and one member from Texas.

The Citrus Disease Subcommittee is soliciting nominations to fill three vacant positions for membership:

- Two positions to represent Florida, and
- one position to represent California or Arizona.

All nominees will be carefully reviewed for their expertise, leadership, and relevance to a category.

Done at Washington, DC, this day of November 2, 2020.

Steve Censky,

Deputy Secretary, U.S. Department of Agriculture.

BILLING CODE 3410-03-P

COMMISSION ON CIVIL RIGHTS

Notice of Public Meeting of the Maine Advisory Committee to the Commission on Civil Rights

AGENCY: Commission on Civil Rights.

ACTION: Announcement of meeting.

SUMMARY: Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights (Commission) and the Federal Advisory Committee Act that the Maine Advisory Committee (Committee) will hold a meeting on Thursday, November 19, 2020, at 12:00 p.m. (ET) for the purpose of hearing testimony about digital equity issues in Maine.

DATES: The meeting will be held on Thursday, November 19, 2020, at 12:00 p.m. ET.

ADDRESSES: *Public Call Information:* Dial: 1-800-367-2403; conference ID: 1644409.

FOR FURTHER INFORMATION CONTACT: Evelyn Bohor, at ero@usccr.gov or 202-921-2212.

SUPPLEMENTARY INFORMATION: Members of the public can listen to the discussion. This meeting is available to the public through the above listed toll-free number. Any interested member of the public may call this number and listen to the meeting. An open comment period will be provided to allow members of the public to make a statement as time allows. The conference call operator will ask callers to identify themselves, the organization they are affiliated with (if any), and an email address prior to placing callers

into the conference room. Callers can expect to incur regular charges for calls they initiate over wireless lines, according to their wireless plan. The Commission will not refund any incurred charges. Callers will incur no charge for calls they initiate over land-line connections to the toll-free telephone number.

Individuals who are deaf, deafblind and hard of hearing may also follow the proceedings by first calling the Federal Relay Service at 1-800-877-8339 and providing the Federal Relay Service operator with the conference call-in numbers: 1-800-367-2403; Conference ID: 1644409.

Members of the public are also entitled to submit written comments; the comments must be received in the regional office within 30 days following the meeting. Written comments may be emailed to Evelyn Bohor at ero@usccr.gov. Persons who desire additional information may contact the Eastern Regional Office at (202) 376-7533.

Records of the meeting will be available via www.facadatabase.gov under the Commission on Civil Rights, Maine Advisory Committee link. Persons interested in the work of this Committee are directed to the Commission's website, <http://www.usccr.gov>, or may contact the Eastern Regional Office at the above email or phone number.

BILLING CODE 6335-01-P

DEPARTMENT OF COMMERCE

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Management and Organizational Practices Survey—Hospitals (MOPS-HP)

AGENCY: Census Bureau, Commerce.

ACTION: Notice of information collection; request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act (PRA) of 1995, invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for an additional 60 days of public comment on a proposed new information collection, the Management and Organizational Practices Survey—Hospitals (MOPS-HP). An information collection request (ICR) for the MOPS-HP was submitted to OMB for approval on July 7, 2020 and is currently pending OMB review.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before January 19, 2021.

ADDRESSES: Interested persons are invited to submit written comments by email to Thomas.J.Smith@census.gov. Please reference Management and Organizational Practices Survey—Hospitals (MOPS-HP) in the subject line of your comments. You may also submit comments, identified by Docket Number USBC-2020-0029, to the Federal e-

Rulemaking Portal: <http://www.regulations.gov>. All comments received are part of the public record. No comments will be posted to <http://www.regulations.gov> for public viewing until after the comment period has closed. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats.

FOR FURTHER INFORMATION CONTACT:

Requests for additional information or specific questions related to collection activities should be directed to Edward Watkins at edward.e.watkins.iii@census.gov or 301-763-4750.

SUPPLEMENTARY INFORMATION:

I. Abstract

The U.S. Census Bureau plans to conduct the Management and Organizational Practices Survey—Hospitals (MOPS-HP) for survey year 2020 as a joint project with Harvard Business School. The MOPS-HP will utilize a subset of the Service Annual Survey mail-out sample and will collect data on management practices from Chief Nursing Officers (CNOs) at general medical and surgical hospitals to assist in studying their relationship to clinical and financial performance.

A notice seeking public comment on our plans to conduct this survey was previously published in the **Federal Register** on February 12, 2020, on pages 4623-4624. That notice proposed collecting data for survey years 2019 and 2014, but collection has been adjusted due to the ongoing coronavirus pandemic. The pandemic has further highlighted the relevance of hospital management practices, especially as they relate to hospitals' abilities to respond to shocks to their organization and the health care system. In light of this, the Census Bureau has modified the survey proposal to collect data for reference years 2020 and 2019. This change seeks to directly measure management practices and protocols before and during the pandemic to obtain a better understanding of how hospitals have had to adjust and pivot operations during this public health emergency.

The Census Bureau also plans to include two additional questions in the MOPS-HP content to help improve measurement of hospital preparedness.

These questions will provide information on two elements of responsiveness, hospitals' coordinated deployment of frontline clinical workers and hospitals' ability to quickly respond to needed changes in standardized clinical protocols. In an effort to limit respondent burden while adding this content, adjustments were made to keep the total number of questions and estimated burden per response unchanged. The project plan, schedule, and collection strategy are being actively monitored, and adjustments will be made as necessary, as the Census Bureau is cognizant and respectful of the time, resources, and burden placed on CNOs during the pandemic.

After the close of this second comment period, the Census Bureau will submit these planned changes as an amendment to the ICR, which is currently pending review at OMB. Any comments received by the close of the comment period will be summarized and included in the amendment.

Currently, no official statistics on management practices in hospitals exist. Past research shows these practices are related to health care providers' clinical and financial outcomes. This suggests that providing measures on management practices may potentially help the United States health care system, which is challenged by rising health care costs, increased demand from an aging society, and quality objectives. These data would permit users to examine relationships between management practices and financial outcomes using Census Bureau data (e.g., revenues) and relationships with clinical outcomes using external data sources. Additionally, these data would provide hospital administrators and managers information to evaluate their practices in comparison to other hospitals at an aggregate level.

The MOPS-HP content was proposed by external researchers with past experience in surveying hospitals on management practices. Some questions are adapted from the Management and Organizational Practices Survey (MOPS), conducted in the manufacturing sector, allowing for inter-sectoral comparisons. Content for the MOPS-HP includes performance monitoring, financial and clinical targets, and incentives. The 39 questions are grouped into the following sections: Tenure, Management Practices, Management Training, Management of Team Interactions, Staffing and Allocation of Human Resources, Standardized Clinical Protocols, Documentation of Patients' Medical Records, and Organizational Characteristics.

II. Method of Collection

The MOPS-HP sample will consist of approximately 3,200 hospital locations for enterprises classified under General Medical and Surgical Hospitals (NAICS 6221) and sampled in the Service Annual Survey (SAS). The survey will be mailed separately from the 2020 SAS and collected electronically through the Census Bureau's Centurion online reporting system. Respondents will be sent an initial letter with instructions detailing how to log into the instrument and report their information. These letters will be addressed to the location's CNO. In instances where the CNO is not identifiable, the letter will be addressed to the hospital's administrative office with attention to the CNO. Collection is scheduled to begin in the initial months of 2021.

III. Data

OMB Control Number: 0607-XXXX.
Form Number(s): MP-2000.

Type of Review: Regular submission, New Information Collection Request.
Affected Public: General medical and surgical hospitals.

Estimated Number of Respondents: Approximately 3,200.

Estimated Time per Response: 45 minutes.

Estimated Total Annual Burden Hours: 2,400.

Estimated Total Annual Cost to Public: \$0. (This is not the cost of respondents' time, but the indirect costs respondents may incur for such things as purchases of specialized software or hardware needed to report, or expenditures for accounting or records maintenance services required specifically by the collection.)

Respondent's Obligation: Mandatory.
Legal Authority: Title 13 U.S.C., Sections 131 and 182.

IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of

public record. We will include, or summarize, each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

Sheleen Dumas,

Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.

Foreign-Trade Zones Board

[B-47-2020]

Foreign-Trade Zone (FTZ) 49—Newark and Elizabeth, New Jersey; Authorization of Production Activity; Catalent Pharma Solutions (Pharmaceutical Products), Somerset, New Jersey

On July 17, 2020, Catalent Pharma Solutions submitted a notification of proposed production activity to the FTZ Board for its facility within Subzone 49T, in Somerset, New Jersey.

The notification was processed in accordance with the regulations of the FTZ Board (15 CFR part 400), including notice in the **Federal Register** inviting public comment (85 FR 47166-47167, August 4, 2020). On November 16, 2020, the applicant was notified of the FTZ Board's decision that no further review of the activity is warranted at this time. The production activity described in the notification was authorized, subject to the FTZ Act and the FTZ Board's regulations, including Section 400.14.

Dated: November 16, 2020.

Andrew McGilvray,

Executive Secretary.

Foreign-Trade Zones Board

[S-163-2020]

Approval of Subzone Status; Sager Electronics; Carrollton, Texas

On September 17, 2020, the Executive Secretary of the Foreign-Trade Zones (FTZ) Board docketed an application submitted by the Metroplex International Trade Development Corporation, grantee of FTZ 168, requesting subzone status subject to the existing activation limit of FTZ 168, on behalf of Sager Electronics, in Carrollton, Texas.

The application was processed in accordance with the FTZ Act and Regulations, including notice in the **Federal Register** inviting public comment (85 FR 60130, September 24, 2020). The FTZ staff examiners reviewed the application and determined that it meets the criteria for approval. Pursuant to the authority delegated to the FTZ Board Executive Secretary (15 CFR Sec. 400.36(f)), the application to establish Subzone 168G was approved on November 16, 2020, subject to the FTZ Act and the Board's regulations, including Section 400.13, and further subject to FTZ 168's 1,955.59-acre activation limit.

Dated: November 16, 2020.

International Trade Administration

[A-791-826]

Prestressed Concrete Steel Wire Strand From South Africa: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that prestressed concrete steel wire strand (PC strand) from South Africa is being, or is likely to be, sold in the United States at less than fair value. The period of investigation is April 1, 2019 through March 31, 2020. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable November 19, 2020.

FOR FURTHER INFORMATION CONTACT: Jerry Huang, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-4047.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on May 13, 2020.¹ On September 8, 2020, Commerce postponed the preliminary determination of this investigation, and the revised deadline is now November 12, 2020.² For a complete description of the events that followed the initiation of this investigation, see the Preliminary Decision Memorandum.³ A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed and electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is PC strand from South Africa. For a complete description of the scope of the investigation, see Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,⁴ the *Initiation*

Notice set aside a period of time for parties to raise issues regarding product coverage (i.e., scope).⁵ No interested party commented on the scope of the investigation as it appeared in the *Initiation Notice*. Therefore, Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice*. See the scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated export price in accordance with section 772(a) of the Act. Normal value (NV) is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying the preliminary determination, see the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

Commerce calculated an individual estimated weighted-average dumping margin for Scaw Metals Group (Scaw), the only individually examined exporter/producer in this investigation. Because the only individually calculated dumping margin is not zero, *de minimis*, or based entirely on facts otherwise available, the estimated weighted-average dumping margin calculated for Scaw is the margin assigned to all other producers and exporters, pursuant to section 735(c)(5)(A) of the Act.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margin exists:

Exporter/producer	Estimated weighted-average dumping margin (percent)
Scaw Metals Group	59.27
All Others	59.27

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) The cash deposit rate for the respondent listed above will be equal to the company-specific estimated weighted-average dumping margin determined in this preliminary determination; (2) if the exporter is not the respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

Commerce is currently unable to conduct on-site verification of the information relied upon in making its final determination in this investigation. Accordingly, we intend to take additional steps in lieu of on-site verification. Commerce will notify interested parties of any additional documentation or information required.

Public Comment

A timeline for the submission of case briefs and written comments will be notified to interested parties at a later date. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than seven days after the deadline date for case briefs.⁶ Note that Commerce has modified certain of its requirements for serving documents

¹ See *Prestressed Concrete Steel Wire Strand from Argentina, Colombia, Egypt, Indonesia, Italy, Malaysia, the Netherlands, Saudi Arabia, South Africa, Spain, Taiwan, Tunisia, the Republic of Turkey, Ukraine, and the United Arab Emirates: Initiation of Less-Than-Fair-Value Investigations*, 85 FR 28605 (May 13, 2020) (*Initiation Notice*).

² See *Prestressed Concrete Steel Wire Strand from Indonesia, Italy, Malaysia, South Africa, Spain, Tunisia, and Ukraine: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigations*, 85 FR 55413 (September 8, 2020).

³ See Memorandum, "Decision Memorandum for the Preliminary Determination in the Less-Than-Fair-Value Investigation of Prestressed Concrete Steel Wire Strand from South Africa," (Preliminary Decision Memorandum), dated concurrently with, and hereby adopted by, this notice.

⁴ See *Antidumping Duties; Countervailing Duties; Final Rule*, 62 FR 27296, 27323 (May 19, 1997).

⁵ See *Initiation Notice*, 85 FR at 28606.

⁶ See 19 CFR 351.309; see also 19 CFR 351.303 (for general filing requirements).

containing business proprietary information until further notice.⁷ Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date and time of the hearing two days before the scheduled date of the hearing.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On November 3, 2020, pursuant to 19 CFR 351.210(e), Scaw requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.⁸ In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) The

preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: November 12, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is prestressed concrete steel wire strand (PC strand), produced from wire of non-stainless, non-galvanized steel, which is suitable for use in prestressed concrete (both pretensioned and post-tensioned) applications. The product definition encompasses covered and uncovered strand and all types, grades, and diameters of PC strand. PC strand is normally sold in the United States in sizes ranging from 0.25 inches to 0.70 inches in diameter. PC strand made from galvanized wire is only excluded from the scope if the zinc and/or zinc oxide coating meets or exceeds the 0.40 oz./ft² standard set forth in ASTM-A-475.

The PC strand subject to this investigation is currently classifiable under subheadings 7312.10.3010 and 7312.10.3012 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

Prestressed Concrete Steel Wire Strand From Indonesia: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Preliminary Affirmative Determination of Critical Circumstances, in Part, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that prestressed concrete steel wire strand (PC strand) from Indonesia is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation is April 1, 2019 through March 31, 2020. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable November 19, 2020.

FOR FURTHER INFORMATION CONTACT: Abdul Alnoor or Drew Jackson, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-4554 or (202) 482-4406, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on May 13, 2020.¹ On September 8,

⁷ See *Temporary Rule Modifying AD/CVD Service Requirements Due to COVID-19*, 85 FR 17006 (March 26, 2020); and *Temporary Rule Modifying AD/CVD Service Requirements Due to COVID-19; Extension of Effective Period*, 85 FR 41363 (July 10, 2020).

⁸ See Scaw's Letter, "Request to Extend Final Determination," dated November 3, 2020.

¹ See *Prestressed Concrete Steel Wire Strand from Argentina, Colombia, Egypt, Indonesia, Italy, Malaysia, the Netherlands, Saudi Arabia, South Africa, Spain, Taiwan, Tunisia, the Republic of Turkey, Ukraine, and the United Arab Emirates: Initiation of Less-Than-Fair-Value Investigations*, 85 FR 28605 (May 13, 2020) (*Initiation Notice*).

2020, Commerce postponed the preliminary determination in this investigation and the revised deadline is now November 12, 2020.² For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.³ A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is PC Strand from Indonesia. For a complete description of the scope of this investigation, *see* Appendix I.

Scope Comments

In accordance with the *Preamble* to Commerce's regulations,⁴ the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.*, scope).⁵ No interested parties commented on the scope of the investigation as it appeared in the *Initiation Notice*. Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice*. *See* the scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce calculated export prices in accordance with section

772(a) of the Act. Commerce calculated normal value in accordance with section 773 of the Act. Furthermore, pursuant to section 776(a) and (b) of the Act, Commerce has preliminarily relied upon facts otherwise available, with adverse inferences to determine the margin assigned to PT. Bumi Steel Indonesia (PT. Bumi). For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

Preliminary Affirmative Determination of Critical Circumstances, in Part

In accordance with section 733(e) of the Act and 19 CFR 351.206, Commerce preliminarily finds that critical circumstances exist for PT. Bumi, but that critical circumstances do not exist for all other producers and exporters in Indonesia, including P.T. Kingdom Indah (Kingdom Indah). For a full description of the methodology and results of Commerce's critical circumstances analysis, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* dumping margins, and any dumping margins determined entirely under section 776 of the Act.

In this investigation, Commerce preliminarily assigned a rate based entirely on facts available to PT. Bumi. Therefore, the only rate that is not zero, *de minimis* or based entirely on facts otherwise available is the rate calculated for Kingdom Indah. Consequently, the rate calculated for Kingdom Indah is also the rate assigned to all other producers and exporters.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
P.T. Kingdom Indah	2.96
PT. Bumi Steel Indonesia ⁶	** 72.28

Exporter/producer	Estimated weighted-average dumping margin (percent)
All Others	2.96

** (Based on total AFA).

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise from Kingdom Indah and all other producers and exporters, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) The cash deposit rate for the respondents listed in the table above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified in the table above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

Section 733(e)(2) of the Act provides that, given an affirmative determination of critical circumstances, any suspension of liquidation shall apply to unliquidated entries of subject merchandise entered, or withdrawn from warehouse, for consumption on or after the later of: (a) The date which is 90 days before the date on which the suspension of liquidation was first ordered; or (b) the date on which notice of initiation of the investigation was published. As noted above, Commerce preliminarily finds that critical circumstances exist for imports of subject merchandise produced or exported by PT. Bumi. In accordance with section 733(e)(2)(A) of the Act, the suspension of liquidation shall apply to unliquidated entries of shipments of subject merchandise from PT. Bumi that were entered, or withdrawn from

⁶ Also referred to as PT. Bumi Nindiyacipta in this proceeding.

³ *See* Memorandum, "Decision Memorandum for the Preliminary Determination in the Less-Than-Fair-Value Investigation of Prestressed Concrete Steel Wire Strand from Indonesia," (Preliminary Decision Memorandum) from James Maeder, Deputy Assistant Secretary for Antidumping and Countervailing Duty Operations, to Jeffrey I. Kessler, Assistant Secretary for Enforcement and Compliance, dated concurrently with, and hereby adopted by, this notice.

⁴ *See Antidumping Duties; Countervailing Duties; Final Rule*, 62 FR 27296, 27323 (May 19, 1997) (*Preamble*).

⁵ *See Initiation Notice*, 85 FR at 28606.

warehouse, for consumption on or after the date which is 90 days before the publication of this notice.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

Commerce is currently unable to conduct on-site verification of the information relied upon in making its final determination in this investigation. Accordingly, with respect to Kingdom Indah, we intend to take additional steps in lieu of on-site verification. Commerce will notify interested parties of any additional documentation or information required. Because PT. Bumi did not provide information requested by Commerce, and Commerce preliminarily determines PT. Bumi to have been uncooperative, we will not conduct verification of PT. Bumi.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance. A timeline for the submission of case briefs and written comments will be announced at a later date. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than seven days after the deadline for case briefs.⁷ Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.⁸ Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a

written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date and time of the hearing two days before the scheduled date of the hearing.

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On November 2 and 4, 2020, pursuant to 19 CFR 351.210(e), Insteel Wire Products, Sumiden Wire Products Corporation, and Wire Mesh Corp. (collectively, petitioners) and Kingdom Indah requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.⁹ In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) The preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month

period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 12, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is prestressed concrete steel wire strand (PC strand), produced from wire of non-stainless, non-galvanized steel, which is suitable for use in prestressed concrete (both pretensioned and post-tensioned) applications. The product definition encompasses covered and uncovered strand and all types, grades, and diameters of PC strand. PC strand is normally sold in the United States in sizes ranging from 0.25 inches to 0.70 inches in diameter. PC strand made from galvanized wire is only excluded from the scope if the zinc and/or zinc oxide coating meets or exceeds the 0.40 oz./ft² standard set forth in ASTM-A-475.

The PC strand subject to this investigation is currently classifiable under subheadings 7312.10.3010 and 7312.10.3012 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

[A-475-843]

Prestressed Concrete Steel Wire Strand From Italy: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Preliminary Negative Determination of Critical Circumstances, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that prestressed concrete steel wire strand (PC strand) from Italy is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation is April 1, 2019 through March 31, 2020. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable November 19, 2020.

FOR FURTHER INFORMATION CONTACT: Stephanie Berger, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-2483.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on May 13, 2020.¹ On September 8, 2020, Commerce postponed the preliminary determination of this investigation and the revised deadline is now November 12, 2020.² For a complete description of the events that followed the initiation of this investigation, see the Preliminary

Decision Memorandum.³ A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The merchandise covered by this investigation is PC strand from Italy. For a complete description of the scope of this investigation, see Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,⁴ the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.*, scope).⁵ However, Commerce received no comments on the scope of this investigation from interested parties. Therefore, Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice*. See the scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated export price in accordance with section 772(a) of the Act. Normal value is calculated in accordance with section 773 of the Act. In addition, pursuant to sections 776(a) and (b) of the Act, Commerce has preliminarily relied upon facts otherwise available, with adverse inferences, to determine the margin assigned to CB Trafilati Acciai S.p.A. (CB). For a full description of the methodology underlying the preliminary determination, see the Preliminary Decision Memorandum.

Preliminary Negative Determination of Critical Circumstances

In accordance with section 733(e) of the Act and 19 CFR 351.206, Commerce

preliminarily finds that critical circumstances do not exist for CB, WBO Italcables Societa Cooperativa (WBO), or all other producers and exporters. For a full description of the methodology and results of Commerce's critical circumstances analysis, see the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

In this investigation, Commerce preliminarily assigned a rate based entirely on facts available to CB. Therefore, the only rate that is not zero, *de minimis* or based entirely on facts otherwise available is the rate calculated for WBO. Consequently, the rate calculated for WBO is also assigned as the rate for all other producers and exporters.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/Producer	Estimated weighted-average dumping margin (percent)
WBO Italcables Societa Cooperativa	3.67
CB Trafilati Acciai S.p.A	* 19.26
All Others	3.67

*(AFA).

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**.

Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) The cash deposit rate for

¹ See *Prestressed Concrete Steel Wire Strand from Argentina, Colombia, Egypt, Indonesia, Italy, Malaysia, the Netherlands, Saudi Arabia, South Africa, Spain, Taiwan, Tunisia, the Republic of Turkey, Ukraine, and the United Arab Emirates: Initiation of Less-Than-Fair-Value Investigations*, 85 FR 28605 (May 13, 2020) (*Initiation Notice*).

² See *Prestressed Concrete Steel Wire Strand from Indonesia, Italy, Malaysia, South Africa, Spain, Tunisia, and Ukraine: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigations*, 85 FR 55413 (September 8, 2020).

³ See Memorandum, "Decision Memorandum for the Preliminary Determination in the Less-Than-Fair-Value Investigation of Prestressed Concrete Steel Wire Strand from Italy," dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

⁴ See *Antidumping Duties; Countervailing Duties, Final Rule*, 62 FR 27296, 27323 (May 19, 1997).

⁵ See *Initiation Notice*, 85 FR at 28606.

the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

Commerce is currently unable to conduct on-site verification of the information relied upon in making its final determination in this investigation. Accordingly, we intend to take additional steps in lieu of on-site verification. Commerce will notify interested parties of any additional documentation or information required. Because CB did not provide information requested by Commerce, and Commerce preliminarily determines CB to have been uncooperative, we will not conduct verification of CB.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance. Interested parties will be notified of the timeline for the submission of case briefs and written comments at a later date. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than seven days after the deadline date for case briefs.⁶ Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a

hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Parties are reminded that briefs and hearing requests are to be filed electronically using ACCESS and that electronically filed documents must be received successfully in their entirety by 5 p.m. Eastern Time on the due date. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.⁷

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On October 30, 2020, pursuant to 19 CFR 351.210(e), WBO requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.⁸ On November 2, 2020, the petitioners submitted a letter supporting WBO's request that Commerce postpone the final

determination.⁹ In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) The preliminary determination is affirmative; (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 12, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is prestressed concrete steel wire strand (PC strand), produced from wire of non-stainless, non-galvanized steel, which is suitable for use in prestressed concrete (both pretensioned and post-tensioned) applications. The product definition encompasses covered and uncovered strand and all types, grades, and diameters of PC strand. PC strand is normally sold in the United States in sizes ranging from 0.25 inches to 0.70 inches in diameter. PC strand made from galvanized wire is only excluded from the scope if the zinc and/or zinc oxide coating meets or exceeds the 0.40 oz./ft² standard set forth in ASTM-A-475.

The PC strand subject to this investigation is currently classifiable under subheadings

Prestressed Concrete Steel Wire Strand From Tunisia: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that prestressed concrete steel wire strand (PC strand) from Tunisia is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation is April 1, 2019 through March 31, 2020. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable November 19, 2020.

FOR FURTHER INFORMATION CONTACT: Eva Kim, AD/CVD Operations, Office IV, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230, telephone: (202) 482–8283.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation

on May 13, 2020.¹ On September 8, 2020, Commerce postponed the preliminary determination of this investigation, and the revised deadline is now November 12, 2020.² For a complete description of the events that followed the initiation of this investigation, see the Preliminary Decision Memorandum.³ A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <http://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is PC strand from Tunisia. For a complete description of the scope of this investigation, see Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,⁴ the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.*, scope).⁵ However, Commerce received no comments on the scope of this investigation from interested parties. Therefore, Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice*. See the scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has

⁴ See *Antidumping Duties; Countervailing Duties; Final Rule*, 62 FR 27296, 27323 (May 19, 1997).

⁵ See *Initiation Notice*, 85 FR at 28606.

calculated export prices in accordance with section 772(a) of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying the preliminary determination, see the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

Commerce calculated an individual estimated weighted-average dumping margin for Maklada Industries and Maklada SA (collectively, Maklada), the only individually examined exporter/producer in this investigation. Because the only individually calculated dumping margin is not zero, *de minimis*, or based entirely on facts otherwise available, the estimated weighted-average dumping margin calculated for Maklada is the margin assigned to all other producers and exporters, pursuant to section 735(c)(5)(A) of the Act.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
Maklada Industries/Maklada SA	32.72
All Others	32.72

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-

others rate, as follows: (1) The cash deposit rate for the respondent listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not the respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of the date of public announcement, or if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

Commerce is currently unable to conduct on-site verification of the information relied upon in making its final determination in this investigation. Accordingly, we intend to take additional steps in lieu of on-site verification. Commerce will notify interested parties of any additional documentation or information required.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance. Interested parties will be notified of the timeline for the submission of case briefs and written comments at a later date. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than seven days after the deadline date for case briefs.⁶ Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a

written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Parties are reminded that briefs and hearing requests are to be filed electronically using ACCESS and that electronically filed documents must be received successfully in their entirety by 5 p.m. Eastern Time on the due date. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.⁷

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On November 3, 2020, pursuant to 19 CFR 351.210(e), Maklada requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.⁸ On November 2, 2020, Insteel Wire Products, Sumiden Wire Products Corporation, and Wire Mesh Corp. (collectively, the petitioners) requested that Commerce extend the deadline for issuing its final

determinations to not later than 135 days after the date of publication in the **Federal Register** of the preliminary determinations.⁹ In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) The preliminary determination is affirmative; and (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months.

Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.

International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: November 12, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The merchandise covered by this investigation is prestressed concrete steel wire strand (PC strand), produced from wire of non-stainless, non-galvanized steel, which is suitable for use in prestressed concrete (both pretensioned and post-tensioned) applications. The product definition encompasses covered and uncovered strand and all types, grades, and diameters of PC strand. PC strand is normally sold in the United States in sizes ranging from 0.25 inches to 0.70 inches in diameter. PC strand made from galvanized wire is only excluded from the scope if the zinc and/or zinc oxide coating meets or exceeds the 0.40 oz./ft² standard set forth in ASTM-A-475.

⁹ See Petitioners' Letter, "Prestressed Concrete Steel Wire Strand from Indonesia, Italy, Malaysia, South Africa, Spain, Tunisia, and Ukraine—Petitioners' Request for Postponement of Final Antidumping Determinations," dated November 2, 2020.

⁷ See *Temporary Rule Modifying AD/CVD Service Requirements Due to COVID-19; Extension of Effective Period*, 85 FR 41363 (July 10, 2020).

⁸ See Maklada's Letter, "Antidumping Duty Investigation of Prestressed Concrete Steel Wire Strand From Tunisia: Request to Extend Final Determination," dated November 3, 2020.

⁶ See 19 CFR 351.309; see also 19 CFR 351.303 (for general filing requirements).

The PC strand subject to this investigation is currently classifiable under subheadings 7312.10.3010 and 7312.10.3012 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

DEPARTMENT OF COMMERCE

International Trade Administration

[A-469-821]

Prestressed Concrete Steel Wire Strand From Spain: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Preliminary Negative Determination of Critical Circumstances, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that prestressed concrete steel wire strand (PC strand) from Spain is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation is April 1, 2019 through March 31, 2020. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable November 19, 2020.

FOR FURTHER INFORMATION CONTACT: Terre Keaton Stefanova or William Miller, AD/CVD Operations, Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-1280 or (202) 482-3906, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the

notice of initiation of this investigation on May 13, 2020.¹ On September 8, 2020, Commerce postponed the preliminary determination of this investigation and the revised deadline is now November 12, 2020.² For a complete description of the events that followed the initiation of this investigation, see the Preliminary Decision Memorandum.³ A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <https://enforcement.trade.gov/frn/>. The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is PC strand from Spain. For a complete description of the scope of this investigation, see Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,⁴ the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (i.e., scope).⁵ However, Commerce received no comments on the scope of this investigation from interested parties. Therefore, Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice*. See the scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section

¹ See *Prestressed Concrete Steel Wire Strand From Argentina, Colombia, Egypt, Indonesia, Italy, Malaysia, the Netherlands, Saudi Arabia, South Africa, Spain, Taiwan, Tunisia, the Republic of Turkey, Ukraine, and the United Arab Emirates: Initiation of Less-Than-Fair-Value Investigations*, 85 FR 28605 (May 13, 2020) (*Initiation Notice*).

² See *Prestressed Concrete Steel Wire Strand from Indonesia, Italy, Malaysia, South Africa, Spain, Tunisia, and Ukraine: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigations*, 85 FR 55413 (September 8, 2020).

³ See Memorandum, "Decision Memorandum for the Preliminary Determination in the Less-Than-Fair-Value Investigation of Prestressed Concrete Steel Wire Strand From Spain," dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

⁴ See *Antidumping Duties; Countervailing Duties, Final Rule*, 62 FR 27296, 27323 (May 19, 1997).

⁵ See *Initiation Notice*, 85 FR at 28606.

731 of the Act. Commerce has calculated export price in accordance with section 772(a) of the Act and constructed export price in accordance with section 772(b) of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying the preliminary determination, see the Preliminary Decision Memorandum.

Preliminary Negative Determination of Critical Circumstances

In accordance with section 733(e) of the Act and 19 CFR 351.206, Commerce preliminarily finds that critical circumstances do not exist for Global Special Steel Products S.A.U. (d.b.a. Trenzasa y Cables de Acero PSC, S.L. (TYCSA)) or for all other producers or exporters. For a full description of the methodology and results of Commerce's critical circumstances analysis, see the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

Commerce calculated an individual estimated weighted-average dumping margin for TYCSA, the only individually examined exporter/producer in this investigation. Because the only individually calculated dumping margin is not zero, *de minimis*, or based entirely on facts otherwise available, the estimated weighted-average dumping margin calculated for TYCSA is the margin assigned to all other producers and exporters, pursuant to section 735(c)(5)(A) of the Act.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
Global Special Steel Products S.A.U. (d.b.a. Trenzas y Cables de Acero PSC, S.L. (TYCSA))	14.75
All Others	14.75

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) The cash deposit rate for the respondent listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not the respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of the date of public announcement, or if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

Commerce is currently unable to conduct on-site verification of the information relied upon in making its final determination in this investigation. Accordingly, we intend to take additional steps in lieu of on-site verification. Commerce will notify interested parties of any additional documentation or information required.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance. Interested parties will be notified of the timeline for the submission of case briefs and written comments at a later date. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than seven days after the deadline date for case briefs.⁶ Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Parties are reminded that briefs and hearing requests are to be filed electronically using ACCESS and that electronically filed documents must be received successfully in their entirety by 5 p.m. Eastern Time on the due date. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.⁷

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in

the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On October 30, 2020, pursuant to 19 CFR 351.210(e), TYCSA requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.⁸ On November 2, 2020, the petitioners submitted a letter supporting TYCSA's request that Commerce postpone the final determination.⁹ In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) The preliminary determination is affirmative; (2) TYCSA accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.

International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections

⁶ See TYCSA's Letter, "Antidumping Duty Investigation of Prestressed Concrete Steel Wire Strand from Spain: Request for Postponement of Final Determination and Provisional Measures Period," dated October 30, 2020.

⁹ The petitioners are Insteel Wire Products Company, Sumiden Wire Products Corporation, and Wire Mesh Corp. See Petitioners' Letter, "Prestressed Concrete Steel Wire Strand from Indonesia, Italy, Malaysia, South Africa, Spain, Tunisia, and Ukraine—Petitioners' Request for Postponement of Final Antidumping Determinations," dated November 2, 2020.

⁶ See 19 CFR 351.309; see also 19 CFR 351.303 (for general filing requirements).

⁷ See *Temporary Rule Modifying AD/CVD Service Requirements Due to COVID-19; Extension of Effective Period*, 85 FR 41363 (July 10, 2020).

733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 12, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The merchandise covered by this investigation is prestressed concrete steel wire strand (PC strand), produced from wire of non-stainless, non-galvanized steel, which is suitable for use in prestressed concrete (both pretensioned and post-tensioned) applications. The product definition encompasses covered and uncovered strand and all types, grades, and diameters of PC strand. PC strand is normally sold in the United States in sizes ranging from 0.25 inches to 0.70 inches in diameter. PC strand made from galvanized wire is only excluded from the scope if the zinc and/or zinc oxide coating meets or exceeds the 0.40 oz./ft² standard set forth in ASTM-A-475.

The PC strand subject to this investigation is currently classifiable under subheadings 7312.10.3010 and 7312.10.3012 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

BILLING CODE 3510-DS-P

DEPARTMENT OF COMMERCE

International Trade Administration

[A-557-819]

Prestressed Concrete Steel Wire Strand From Malaysia: Preliminary Affirmative Determination of Sales at Less Than Fair Value, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that prestressed concrete steel wire strand (PC strand) from Malaysia is being, or is likely to be, sold in the United States at less than fair value

(LTFV). The period of investigation is April 1, 2019 through March 31, 2020. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable November 19, 2020.

FOR FURTHER INFORMATION CONTACT:

Justin Neuman or Kabir Archuleta, AD/CVD Operations, Office V, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482-0486 or (202) 482-2593, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on May 13, 2020.¹ On September 8, 2020, Commerce postponed the preliminary determination of this investigation, and the revised deadline is now November 12, 2020.² For a complete description of the events that followed the initiation of this investigation, *see* the Preliminary Decision Memorandum.³ A list of topics included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <http://enforcement.trade.gov/frn/>. The signed and the electronic versions of the Preliminary Decision Memorandum are identical in content.

¹ *See Prestressed Concrete Steel Wire Strand from Argentina, Colombia, Egypt, Indonesia, Italy, Malaysia, the Netherlands, Saudi Arabia, Spain, Taiwan, Tunisia, the Republic of Turkey, Ukraine, and the United Arab Emirates: Initiation of Less-Than-Fair-Value Investigations*, 85 FR 28605 (May 13, 2020) (*Initiation Notice*).

² *See Prestressed Concrete Steel Wire Strand from Indonesia, Italy, Malaysia, South Africa, Spain, Tunisia, and Ukraine: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigations*, 85 FR 55413 (September 8, 2020).

³ *See* Memorandum, "Decision Memorandum for the Preliminary Determination in the Less-Than-Fair-Value Investigation of Prestressed Concrete Steel Wire Strand from Malaysia," dated concurrently with, and hereby adopted by, this notice (Preliminary Decision Memorandum).

Scope of the Investigation

The product covered by this investigation is PC strand from Malaysia. For a complete description of the scope of this investigation, *see Appendix I*.

Scope Comments

In accordance with the preamble to Commerce's regulations,⁴ the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.*, scope).⁵ No interested party commented on the scope of the investigation as it appeared in the *Initiation Notice*. Therefore, Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice*. *See* the scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated export price in accordance with section 772(a) of the Act. Normal value is calculated in accordance with section 773 of the Act. In addition, pursuant to sections 776(a) and (b) of the Act, Commerce has preliminarily relied on facts otherwise available, with adverse inferences, to determine the margin assigned to Southern PC Steel Sdn. Bhd. For a full description of the methodology underlying the preliminary determination, *see* the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(A)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

Commerce calculated individual estimated weighted-average dumping margins for the two producers/exporters participating in this investigation, Kiswire Sdn. Bhd. (Kiswire) and Wei Dat Steel Wire Sdn. Bhd. (Wei Dat) that are not zero, *de minimis*, or based entirely on facts otherwise available. Commerce calculated the all-others' rate using a weighted average of the estimated weighted-average dumping

⁴ *See Antidumping Duties; Countervailing Duties, Final Rule*, 62 FR 27296, 27323 (May 19, 1997).

⁵ *See Initiation Notice*, 85 FR 28606.

margins calculated for the individually examined mandatory respondents using each company's publicly ranged values for the merchandise under consideration.⁶

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
Kiswire Sdn. Bhd	3.70
Wei Dat Steel Wire Sdn. Bhd ...	5.45
Southern PC Steel Sdn. Bhd ...	* 18.93
All Others	4.56

* Adverse Facts Available.

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) The cash deposit rate for the respondents listed above will be equal to the company-specific estimated weighted-average dumping margins determined in this preliminary determination; (2) if the exporter is not a respondent identified above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-

average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin. These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

Commerce is currently unable to conduct on-site verification of the information relied upon in making its final determination in this investigation. Accordingly, we intend to take additional steps in lieu of on-site verification. Commerce will notify interested parties of any additional documentation or information required. Because Southern PC Steel Sdn. Bhd did not provide information requested by Commerce, and Commerce preliminarily determines Southern PC Steel Sdn. Bhd to have been uncooperative, we will not conduct verification of Southern PC Steel Sdn. Bhd.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance. Interested parties will be notified of the timeline for the submission of case briefs and written comments at a later date. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than seven days after the deadline date for case briefs.⁷ Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) A statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date

of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date of the hearing.

Parties are reminded that briefs and hearing requests are to be filed electronically using ACCESS and that electronically filed documents must be received successfully in their entirety by 5 p.m. Eastern Time on the due date. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information until further notice.⁸

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On November 3 and 9, 2020, pursuant to 19 CFR 351.210(e), Wei Dat and Kiswire requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.⁹ In accordance with section 735(a)(2)(A) of the Act and 19 CFR 351.210(b)(2)(ii), because: (1) The preliminary determination is affirmative; (2) the

⁸ See *Temporary Rule Modifying AD/CVD Service Requirements Due to COVID-19*, 85 FR 17006 (March 26, 2020); and *Temporary Rule Modifying AD/CVD Service Requirements Due to COVID-19; Extension of Effective Period*, 85 FR 41363 (July 10, 2020).

⁹ See Wei Dat's Letter, "Pre-Stressed Concrete Steel Wire Strand from the Malaysia; Request to Extend Final Determination," dated November 3, 2020; see also Kiswire's Letter, "Prestressed Concrete Steel Wire Strand from Malaysia, Case No. A-557-819: Request to Extend Final Determination," dated November 9, 2020.

⁶ With two respondents under examination, Commerce normally calculates: (A) A weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents; (B) a simple average of the estimated weighted-average dumping margins calculated for the examined respondents; and (C) a weighted-average of the estimated weighted-average dumping margins calculated for the examined respondents using each company's publicly-ranged U.S. sale values for the merchandise under consideration. Commerce then compares (B) and (C) to (A) and selects the rate closest to (A) as the most appropriate rate for producers and exporters not subject to individual examination. See *Ball Bearings and Parts Thereof from France, Germany, Italy, Japan, and the United Kingdom: Final Results of Antidumping Duty Administrative Reviews, Final Results of Changed-Circumstances Review, and Revocation of an Order in Part*, 75 FR 53661, 53663 (September 1, 2010). For a complete analysis of the data, see Memorandum, "Preliminary Determination Calculation for the 'All-Others' Rate," dated concurrently with, and hereby adopted by, this notice.

⁷ See 19 CFR 351.309; and 19 CFR 351.303 (for general filing requirements).

requesting exporters account for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination no later than 135 days after the date of publication of this preliminary determination.

International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act and 19 CFR 351.205(c).

Dated: November 12, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I

Scope of the Investigation

The merchandise covered by this investigation is prestressed concrete steel wire strand (PC strand), produced from wire of non-stainless, non-galvanized steel, which is suitable for use in prestressed concrete (both pretensioned and post-tensioned) applications. The product definition encompasses covered and uncovered strand and all types, grades, and diameters of PC strand. PC strand is normally sold in the United States in sizes ranging from 0.25 inches to 0.70 inches in diameter. PC strand made from galvanized wire is only excluded from the scope if the zinc and/or zinc oxide coating meets or exceeds the 0.40 oz./ft² standard set forth in ASTM-A-475.

The PC strand subject to this investigation is currently classifiable under subheadings 7312.10.3010 and 7312.10.3012 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

Seamless Carbon and Alloy Steel Standard, Line, and Pressure Pipe From the Republic of Korea, the Russian Federation, and Ukraine: Postponement of Preliminary Determinations in the Less-Than-Fair-Value Investigations

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

DATES: Applicable November 19, 2020.

FOR FURTHER INFORMATION CONTACT:

Joshua DeMoss at (202) 482–3362 (the Republic of Korea (Korea)); Kathryn Turlo at (202) 482–3870 (the Russian Federation (Russia)); Zachary Shaykin at (202) 482–2638 (Ukraine); AD/CVD Operations, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230.

SUPPLEMENTARY INFORMATION:

Background

On July 28, 2020, the Department of Commerce (Commerce) initiated less-than-fair-value (LTFV) investigations of imports of Seamless Carbon and Alloy Steel Standard, Line, and Pressure Pipe from the Czech Republic, Korea, Russia, and Ukraine.¹ Currently, the preliminary determinations are due no later than December 15, 2020.

Postponement of Preliminary Determinations

Section 733(b)(1)(A) of the Tariff Act of 1930, as amended (the Act), requires Commerce to issue the preliminary determination in an LTFV investigation within 140 days after the date on which Commerce initiated the investigation. However, section 733(c)(1)(A)(b)(1) of the Act permits Commerce to postpone

the preliminary determination until no later than 190 days after the date on which Commerce initiated the investigation if: (A) The petitioner² makes a timely request for a postponement; or (B) Commerce concludes that the parties concerned are cooperating, that the investigation is extraordinarily complicated, and that additional time is necessary to make a preliminary determination. Under 19 CFR 351.205(e), the petitioner must submit a request for postponement 25 days or more before the scheduled date of the preliminary determination and must state the reasons for the request. Commerce will grant the request unless it finds compelling reasons to deny the request.

On October 15, 2020, the petitioner submitted a timely request that Commerce postpone the preliminary determinations in the Korea, Russia, and Ukraine LTFV investigations.³ The petitioner stated that it requests postponement because Commerce will not otherwise have complete questionnaire responses and sufficient information to issue preliminary determinations.⁴

For the reasons stated above and because there are no compelling reasons to deny the request, Commerce, in accordance with section 733(c)(1)(A) of the Act, is postponing the deadline for the preliminary determinations in the Korea, Russia, and Ukraine LTFV investigations by 50 days (*i.e.*, 190 days after the date on which these investigations were initiated). As a result, Commerce will issue its preliminary determinations in the Korea, Russia, and Ukraine LTFV investigations no later than February 3, 2021. In accordance with section 735(a)(1) of the Act and 19 CFR 351.210(b)(1), the deadline for the final determinations of these investigations will continue to be 75 days after the date of the preliminary determinations, unless postponed at a later date.

This notice is issued and published pursuant to section 733(c)(2) of the Act and 19 CFR 351.205(f)(1).

Dated: November 13, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

International Trade Administration

[A–823–817]

Prestressed Concrete Steel Wire Strand From Ukraine: Preliminary Affirmative Determination of Sales at Less Than Fair Value and Preliminary Negative Determination of Critical Circumstances, Postponement of Final Determination, and Extension of Provisional Measures

AGENCY: Enforcement and Compliance, International Trade Administration, Department of Commerce.

SUMMARY: The Department of Commerce (Commerce) preliminarily determines that prestressed concrete steel wire strand (PC strand) from Ukraine is being, or is likely to be, sold in the United States at less than fair value (LTFV). The period of investigation is April 1, 2019 through March 31, 2020. Interested parties are invited to comment on this preliminary determination.

DATES: Applicable November 19, 2020.

FOR FURTHER INFORMATION CONTACT: Cindy Robinson or Eric Greynolds, AD/CVD Operations, Office III, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–3797 or (202) 482–6071, respectively.

SUPPLEMENTARY INFORMATION:

Background

This preliminary determination is made in accordance with section 733(b) of the Tariff Act of 1930, as amended (the Act). Commerce published the notice of initiation of this investigation on May 13, 2020.¹ On September 8, 2020, Commerce postponed the preliminary determination of this investigation and the revised deadline is now November 12, 2020.² For a complete description of the events that followed the initiation of this investigation, see the Preliminary Decision Memorandum.³ A list of topics

included in the Preliminary Decision Memorandum is included as Appendix II to this notice. The Preliminary Decision Memorandum is a public document and is on file electronically via Enforcement and Compliance's Antidumping and Countervailing Duty Centralized Electronic Service System (ACCESS). ACCESS is available to registered users at <https://access.trade.gov>. In addition, a complete version of the Preliminary Decision Memorandum can be accessed directly at <https://enforcement.trade.gov/frn/>. The signed and electronic versions of the Preliminary Decision Memorandum are identical in content.

Scope of the Investigation

The product covered by this investigation is PC strand from Ukraine. For a complete description of the scope of this investigation, see Appendix I.

Scope Comments

In accordance with the preamble to Commerce's regulations,⁴ the *Initiation Notice* set aside a period of time for parties to raise issues regarding product coverage (*i.e.*, scope).⁵ However, Commerce received no comments on the scope of this investigation from interested parties. Therefore, Commerce is not preliminarily modifying the scope language as it appeared in the *Initiation Notice*. See the scope in Appendix I to this notice.

Methodology

Commerce is conducting this investigation in accordance with section 731 of the Act. Commerce has calculated export price in accordance with section 772(a) of the Act. Normal value is calculated in accordance with section 773 of the Act. For a full description of the methodology underlying the preliminary determination, see the Preliminary Decision Memorandum.

Preliminary Negative Determination of Critical Circumstances

In accordance with section 733(e) of the Act and 19 CFR 351.206, Commerce preliminarily finds that critical circumstances do not exist for PJSC PA Stalkanat-Silur (Stalkanat) and all other producers/exporters of PC strand from Ukraine. For a full description of the methodology and results of Commerce's

critical circumstances analysis, see the Preliminary Decision Memorandum.

All-Others Rate

Sections 733(d)(1)(ii) and 735(c)(5)(A) of the Act provide that in the preliminary determination, Commerce shall determine an estimated all-others rate for all exporters and producers not individually examined. This rate shall be an amount equal to the weighted average of the estimated weighted-average dumping margins established for exporters and producers individually investigated, excluding any zero and *de minimis* margins, and any margins determined entirely under section 776 of the Act.

Commerce calculated an individual estimated weighted-average dumping margin for Stalkanat, the only individually examined exporter/producer in this investigation. Because the only individually calculated dumping margin is not zero, *de minimis*, or based entirely on facts otherwise available, the estimated weighted-average dumping margin calculated for Stalkanat is the margin assigned to all other producers and exporters, pursuant to section 735(c)(5)(A) of the Act.

Preliminary Determination

Commerce preliminarily determines that the following estimated weighted-average dumping margins exist:

Exporter/producer	Estimated weighted-average dumping margin (percent)
PJSC PA Stalkanat-Silur	19.32
All Others	19.32

Suspension of Liquidation

In accordance with section 733(d)(2) of the Act, Commerce will direct U.S. Customs and Border Protection (CBP) to suspend liquidation of entries of subject merchandise, as described in Appendix I, entered, or withdrawn from warehouse, for consumption on or after the date of publication of this notice in the **Federal Register**. Further, pursuant to section 733(d)(1)(B) of the Act and 19 CFR 351.205(d), Commerce will instruct CBP to require a cash deposit equal to the estimated weighted-average dumping margin or the estimated all-others rate, as follows: (1) The cash deposit rate for the respondent listed above will be equal to the company-specific estimated weighted-average dumping margin determined in this preliminary determination; (2) if the exporter is not the respondent identified

⁵ See *Initiation Notice*, 85 FR at 28606.

above, but the producer is, then the cash deposit rate will be equal to the company-specific estimated weighted-average dumping margin established for that producer of the subject merchandise; and (3) the cash deposit rate for all other producers and exporters will be equal to the all-others estimated weighted-average dumping margin.

These suspension of liquidation instructions will remain in effect until further notice.

Disclosure

Commerce intends to disclose its calculations and analysis performed to interested parties in this preliminary determination within five days of any public announcement or, if there is no public announcement, within five days of the date of publication of this notice in accordance with 19 CFR 351.224(b).

Verification

Commerce is currently unable to conduct on-site verification of the information relied upon in making its final determination in this investigation. Accordingly, we intend to take additional steps in lieu of on-site verification. Commerce will notify interested parties of any additional documentation or information required.

Public Comment

Case briefs or other written comments may be submitted to the Assistant Secretary for Enforcement and Compliance. Interested parties will be notified of the timeline for the submission of case briefs and written comments at a later date. Rebuttal briefs, limited to issues raised in case briefs, may be submitted no later than seven days after the deadline date for case briefs.⁶ Pursuant to 19 CFR 351.309(c)(2) and (d)(2), parties who submit case briefs or rebuttal briefs in this investigation are encouraged to submit with each argument: (1) a statement of the issue; (2) a brief summary of the argument; and (3) a table of authorities.

Pursuant to 19 CFR 351.310(c), interested parties who wish to request a hearing, limited to issues raised in the case and rebuttal briefs, must submit a written request to the Assistant Secretary for Enforcement and Compliance, U.S. Department of Commerce, within 30 days after the date of publication of this notice. Requests should contain the party's name, address, and telephone number, the number of participants, whether any

participant is a foreign national, and a list of the issues to be discussed. If a request for a hearing is made, Commerce intends to hold the hearing at a time and date to be determined. Parties should confirm by telephone the date, time, and location of the hearing two days before the scheduled date.

Parties are reminded that briefs and hearing requests are to be filed electronically using ACCESS and that electronically filed documents must be received successfully in their entirety by 5 p.m. Eastern Time on the due date. Note that Commerce has temporarily modified certain of its requirements for serving documents containing business proprietary information, until further notice.⁷

Postponement of Final Determination and Extension of Provisional Measures

Section 735(a)(2) of the Act provides that a final determination may be postponed until not later than 135 days after the date of the publication of the preliminary determination if, in the event of an affirmative preliminary determination, a request for such postponement is made by exporters who account for a significant proportion of exports of the subject merchandise, or in the event of a negative preliminary determination, a request for such postponement is made by the petitioner. Section 351.210(e)(2) of Commerce's regulations requires that a request by exporters for postponement of the final determination be accompanied by a request for extension of provisional measures from a four-month period to a period not more than six months in duration.

On November 2, 2020, the petitioners requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months in duration.⁸

On November 3, 2020, pursuant to 19 CFR 351.210(e), Stalkanat requested that Commerce postpone the final determination and that provisional measures be extended to a period not to exceed six months.⁹ In accordance with section 735(a)(2)(A) of the Act and 19

CFR 351.210(b)(2)(ii), because: (1) The preliminary determination is affirmative; and (2) the requesting exporter accounts for a significant proportion of exports of the subject merchandise; and (3) no compelling reasons for denial exist, Commerce is postponing the final determination and extending the provisional measures from a four-month period to a period not greater than six months. Accordingly, Commerce will make its final determination by no later than 135 days after the date of publication of this preliminary determination, pursuant to section 735(a)(2) of the Act.

International Trade Commission Notification

In accordance with section 733(f) of the Act, Commerce will notify the International Trade Commission (ITC) of its preliminary determination. If the final determination is affirmative, the ITC will determine before the later of 120 days after the date of this preliminary determination or 45 days after the final determination whether these imports are materially injuring, or threaten material injury to, the U.S. industry.

Notification to Interested Parties

This determination is issued and published in accordance with sections 733(f) and 777(i)(1) of the Act, and 19 CFR 351.205(c).

Dated: November 12, 2020.

Jeffrey I. Kessler,

Assistant Secretary for Enforcement and Compliance.

Appendix I—Scope of the Investigation

The merchandise covered by this investigation is prestressed concrete steel wire strand (PC strand), produced from wire of non-stainless, non-galvanized steel, which is suitable for use in prestressed concrete (both pretensioned and post-tensioned) applications. The product definition encompasses covered and uncovered strand and all types, grades, and diameters of PC strand. PC strand is normally sold in the United States in sizes ranging from 0.25 inches to 0.70 inches in diameter. PC strand made from galvanized wire is only excluded from the scope if the zinc and/or zinc oxide coating meets or exceeds the 0.40 oz./ft² standard set forth in ASTM-A-475.

The PC strand subject to this investigation is currently classifiable under subheadings 7312.10.3010 and 7312.10.3012 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and customs purposes, the written description of the scope of this investigation is dispositive.

SUMMARY: The New England Fishery Management Council (Council) is scheduling a public meeting of its Herring Advisory Panel via webinar to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

DATES: This webinar will be held on Wednesday, December 9, 2020 at 9 a.m. Webinar registration URL information: <https://attendee.gotowebinar.com/register/6747145818220045327>.

ADDRESSES: *Council address:* New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

FOR FURTHER INFORMATION CONTACT: Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465-0492.

SUPPLEMENTARY INFORMATION:

Agenda

The Advisory Panel will meet to review and discuss 2021 work priorities for the Atlantic Herring Fishery Management Plan including: (1) A framework action that considers spawning closures on Georges Bank (GB); (2) development of a formal rebuilding plan for Atlantic herring; (3) review and potentially adjust accountability measures (AMs) in the herring plan; and (4) coordinate with the Mid-Atlantic Fishery Management Council (MAFMC) and Atlantic States Marine Fisheries Commission (ASMFC) on various herring management issues (*i.e.*, river herring and shad (RH/S)). Other business will be discussed, as necessary.

Although non-emergency issues not contained on the agenda may come

before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465-0492, at least 5 days prior to the meeting date.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 16, 2020.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

[RTID 0648-XA631]

South Atlantic Fishery Management Council; Public Meetings

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Notice of public meetings.

SUMMARY: The South Atlantic Fishery Management Council (Council) will hold meetings of the following: Snapper Grouper Committee; Dolphin Wahoo Committee; Habitat and Ecosystem-Based Management Committee; Mackerel Cobia Committee; Executive Committee (partially Closed Session); and Citizen Science Committee. The meeting week will also include a formal public comment session and a meeting of the Full Council (with a partially Closed Session). Due to public health concerns associated with COVID-19 and current travel restrictions, the meeting originally planned for Wrightsville Beach, NC will be held via webinar.

DATES: The Council meeting will be held from 9 a.m. on Monday, December

7, 2020 until 5 p.m. on Thursday, December 10, 2020.

ADDRESSES: The meeting will be held via webinar. Webinar registration is required. Details are included in **SUPPLEMENTARY INFORMATION.**

FOR FURTHER INFORMATION CONTACT: Kim Iverson, Public Information Officer, SAFMC; phone: (843) 302-8440 or toll free: (866) SAFMC-10; fax: (843) 769-4520; email: kim.iverson@safmc.net.

SUPPLEMENTARY INFORMATION: Meeting information, including agendas, overviews, briefing materials and the meeting registration link will be posted on the Council's website at: <http://safmc.net/safmc-meetings/council-meetings/>.

Public comment: Written comments may be directed to John Carmichael, Executive Director, South Atlantic Fishery Management Council (see *Council address*) or electronically via the Council's website: <https://safmc.wufoo.com/forms/m1ijpb670ziz2jz/>. Comments received by close of business the Monday before the meeting (11/30/20) will be compiled, posted to the website as part of the meeting materials, and included in the administrative record; please use the Council's online form available from the website. Written comments received after the Monday before the meeting must be submitted using the Council's online form available from the website. Comments will automatically be posted to the website and available for Council consideration. Comments received prior to 9 a.m. on Wednesday, December 9, 2020 will be a part of the meeting administrative record.

The items of discussion in the individual meeting agendas are as follows:

Meeting Agenda

Council Session I, Monday, December 7, 2020, 9 a.m. Until 12 p.m. (Closed Session)

The Council will consider appointments for open advisory panel seats, review the composition of the Mackerel Cobia Advisory Panel (AP), and advisory panel policies. A legal briefing on litigation will also be provided if needed.

Council Session II, Monday, December 7, 2020, 1:30 p.m. Until 2:30 p.m. and 5 p.m. Until 6 p.m.

The Council will discuss the Acceptable Biological Catch (ABC) Control Rule including carry-over and phase-in provisions. Beginning at 5 p.m. Council members will receive a presentation on Draft Amendment 14 to the 2006 Consolidated Highly Migratory

Species Fishery Management Plan (FMP) from NOAA Fisheries. The amendment addresses the ABC Control Rule, phase-in and carry over, and annual catch limit (ACL) provisions.

Snapper Grouper Committee, Monday, December 7, 2020, 2:30 p.m. Until 5 p.m. and Tuesday, December 8, 2020 from 8:30 a.m. Until 12 p.m.

The Committee will: Receive an update from NOAA Fisheries on the status of amendments under review; receive an overview of the stock assessment for yellowtail snapper, discuss and provide recommendations for Council consideration; and discuss whether nine snapper grouper species continue to need conservation and management under the Snapper Grouper FMP and consider options. The Committee will review comments provided by Wreckfish Individual Transferable Quota (ITQ) shareholders and dealers regarding Amendment 48 to the Snapper Grouper FMP addressing Wreckfish ITQ Modernization and is scheduled to approve the amendment for public scoping. The Committee will review potential management measures to end overfishing and revise the rebuilding plan for Red Porgy through draft Amendment 50 to the Snapper Grouper FMP and is scheduled to approve the amendment for public scoping. The Committee will receive an options paper addressing catch levels and management measures for greater amberjack.

Habitat Protection and Ecosystem-Based Management Committee, Tuesday, December 8, 2020, 1:30 p.m. Until 5 p.m.

The Committee will: Review Coral Amendment 10 addressing modifications to area closures for the deepwater shrimp fishery; receive an update on the Ecopath with Ecosim Model Review; receive a report from the Habitat Protection and Ecosystem-Based Management Advisory Panel (AP); receive a Fishery Ecosystem Plan (FEP) Roadmap Progress Report, and discuss the development of a Habitat and Ecosystem Program Blueprint.

Dolphin Wahoo Committee, Wednesday, December 9, 2020, 8:30 a.m. Until 12 p.m.

The Committee will receive an update from NOAA Fisheries on the review status of Amendment 12 to the Dolphin Wahoo FMP addressing bullet and frigate mackerel and receive a report from the Dolphin Wahoo AP. The Committee will review draft Amendment 10 to the Dolphin Wahoo FMP with actions that currently

address: Revisions to recreational data and catch level recommendations, redefining Optimum Yield in the dolphin fishery, modifications to accountability measures, and other management revisions to the dolphin and wahoo fisheries. The Committee is scheduled to approve the amendment for public hearing.

Mackerel Cobia Committee, Wednesday, December 9, 2020, 1:30 p.m. Until 3:45 p.m.

The Committee will receive a report from the Mackerel Cobia AP, address management measures for Atlantic king mackerel following the recent stock assessment (Framework Amendment 10) and is scheduled to approve the amendment for public scoping. The Committee will consider modifications to catch levels and management measures to end overfishing of Gulf cobia (Amendment 32 to the Coastal Migratory Pelagics FMP).

Formal Public Comment, Wednesday, December 9, 2020, 4 p.m.—Public comment will be accepted via webinar on all items on the Council meeting agenda. Highlighted items scheduled to be approved for public scoping: Amendment 48 to the Snapper Grouper FMP (Wreckfish ITQ Modernization); Amendment 50 to the Snapper Grouper FMP (red porgy); and Framework Amendment 10 to the Coastal Migratory Pelagics FMP. Additionally, Amendment 10 to the Dolphin Wahoo FMP (dolphin wahoo management measures) is scheduled to be approved for public hearings. The Council Chair will determine the amount of time provided to each commenter based on the number of individuals wishing to comment.

Executive Committee, Thursday, December 10, 2020, 8:30 a.m. Until 12 p.m. (Partially Closed Session)

The Committee will conduct the annual performance review for the Council's Executive Director in Closed Session. In Open Session, the Committee will receive an update on the Council's 2021 budget and review the 2021 FMP Work Schedule.

Citizen Science Committee, Thursday, December 10, 2020, 10:30 a.m. Until 12 p.m.

The Committee will review Citizen Science Program Planning efforts, the Citizen Science Program Evaluation Plan, and receive an update on Citizen Science program and projects activities.

Council Session III, Thursday, December 10, 2020, 1:30 p.m. Until 5 p.m.

The Council will receive a report from the Executive Director, an update on development of the proposed approach to determine sector allocations, and an update on climate change scenario planning. The Council will also receive a report from the Council's Scientific and Statistical Committee, if needed, on any items not previously addressed during committee meetings. The Council will receive a report from the Outreach and Communications AP and another from the Southeast Data, Assessment and Review (SEDAR) Steering Committee.

NOAA Fisheries Southeast Fisheries Science Center staff will provide an update on staff restructuring and a report on the status of commercial electronic logbooks.

NOAA Fisheries Southeast Regional Office staff will provide an update on the status of For-Hire Electronic Reporting and the status of their evaluation of bycatch reporting efforts in the South Atlantic. The Council will also receive a Protected Resources report.

The Council will receive reports from the following committees: Snapper Grouper; Mackerel Cobia; Dolphin Wahoo; Habitat Protection and Ecosystem-Based Management; Citizen Science; and Executive. The Council will also address advisory panel appointments.

The Council will receive agency and liaison reports, discuss other business and upcoming meetings, and take action as necessary.

Documents regarding these issues are available from the Council office (see **ADDRESSES**).

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during these meetings. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the Council's intent to take final action to address the emergency.

Special Accommodations

These meetings are physically accessible to people with disabilities. Requests for auxiliary aids should be directed to the Council office (see **ADDRESSES**) 5 days prior to the meeting.

Note: The times and sequence specified in this agenda are subject to change.

Authority: 16 U.S.C. 1801 *et seq.*

Dated: November 16, 2020.

Rey Israel Marquez,

Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.

BILLING CODE 3510–22–P

COURT SERVICES AND OFFENDER SUPERVISION AGENCY FOR THE DISTRICT OF COLUMBIA

Agency Information Collection Activities: Proposed Collection; Comment Request; Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

AGENCY: Court Services and Offender Supervision Agency for the District of Columbia (CSOSA).

ACTION: Notice and request for comments.

SUMMARY: This notice announces the intention of the CSOSA to request that the Office of Management and Budget (OMB) approve the proposed Generic Information Collection request (Generic ICR): “Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.” In accordance with the Paperwork Reduction Act, this notice announces CSOSA’s intent to submit this collection to OMB for approval. CSOSA invites the public to comment on this proposed information collection.

DATES: Consideration will be given to all comments received by December 21, 2020.

ADDRESSES: You may submit written comments, identified by “Collection of Qualitative Feedback on Agency Service Delivery” to: Rochelle Durant, Program Analyst, Office of General Counsel, Court Services and Offender Supervision Agency for the District of Columbia, 800 North Capitol Street NW, Washington, DC 20002 or to Rochelle.Durant@csosa.gov.

Comments submitted in response to this notice may be made available to the public. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and may be made available on the internet. Please note that responses to this public comment

request containing any routine notice about the confidentiality of the communication will be treated as public comments that may be made available to the public notwithstanding the inclusion of the routine notice.

FOR FURTHER INFORMATION CONTACT:

Rochelle Durant, Program Analyst, Office of General Counsel, Court Services and Offender Supervision Agency for the District of Columbia at Rochelle.Durant@csosa.gov or (202) 220–5304.

For content support: Trina Stewart, Supervisory Intergovernmental and Community Affairs Specialist, Court Services and Offender Supervision Agency for the District of Columbia at Trina.Stewart@csosa.gov or (202) 220–5526.

SUPPLEMENTARY INFORMATION: Notice and request for public comment on this collection was published in the **Federal Register** on September 8, 2020 at 85 FR 174. The Agency did not receive any comments in response to the 60-day notice published in the **Federal Register**.

Title: Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery.

Abstract: Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they collect or sponsor. Section 3506(c)(2)(A) of the PRA (944 U.S.C. 3506(c)(2)(A) requires federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension of an existing collection of information, before submitting the collection of information to OMB for approval. To comply with this requirement, CSOSA is publishing notice of the proposed collection of information set forth in this document. The proposed information collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration’s commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions, but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of

products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The Agency has traditionally used paper form surveys as its primary public information collection method. However, to further comply with the goals of the PRA, the Agency recently implemented the use of online electronic survey tools to obtain customer and client feedback regarding Agency programs and supervision support services. *During the COVID–19 pandemic*, the approval from OMB to utilize an electronic option to complete the Agency’s standard surveys online was extremely helpful in sustaining our engagement with the community. The contents in the online version and in paper versions of the Agency’s surveys will remain identical. Once in person meetings are resumed, CSOSA will continue to offer paper option for respondents who prefer that option.

Similar to the process used for gaining public feedback via the Agency’s traditional paper form surveys, the online surveys are forwarded to the meeting participants at the conclusion of an event or program via the participants previously registered email address or at the end of a virtual meeting in the chat box or via a slide with a link that leads to the online survey. The results of the electronic surveys are tallied by the online software and then forwarded to a centralized user account for further evaluation and review or to be merged with any results from completed hard copy paper surveys.

The solicitation of feedback will target areas such as: timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public. If this information is not collected, vital feedback from customers and stakeholders on the Agency’s services will be unavailable.

The Agency will only submit a collection for approval under this generic clearance if it meets the following conditions:

1. The collections are voluntary;
2. The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both

the respondents and the federal government;

3. The collections are non-controversial and do not raise issues of concern to other federal agencies;

4. Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;

5. Personally identifiable information (PII) is collected only to the extent necessary and is not retained;

6. Information gathered will be used only internally for general service improvement and program management purposes and is not intended for release outside of the agency;

7. Information gathered will not be used for the purpose of substantially informing influential policy decisions; and

8. Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study.

Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: the target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic mechanisms that are designed to yield quantitative results.

As a general matter, information collections will not result in any new system of records containing privacy information and will not ask questions of a sensitive nature, such as sexual behavior and attitudes, religious beliefs, and other matters that are commonly considered private.

Current Actions: New collection of information.

Type of Review: New Collection.

(1) *Affected Public:* Individuals currently under CSOSA supervision. CSOSA stakeholders including criminal justice system (e.g., judges, law enforcement officers) and community partners.

Estimated Number of Respondents: 540.

Below we provide projected average estimates for the next three years:

Average Expected Annual Number of activities: 18.

Average Number of Respondents per Activity: 30.

Annual Responses: 540.

Frequency of Response: Once per request.

Average Minutes per Response: 10.

Burden Hours: 75.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) whether paper or electronic information collection is preferred and explanation regarding choice; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; to develop, acquire, install and utilize technology and systems for the purpose of collecting, validating and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information, to search data sources, to complete and review the collection of information; and to transmit or otherwise disclose the information.

Rochelle Durant,

Program Analyst, Court Services and Offender Supervision Agency for the District of Columbia.

BILLING CODE P

DEPARTMENT OF DEFENSE

Office of the Secretary

Defense Advisory Committee on Investigation, Prosecution, and Defense of Sexual Assault in the Armed Forces; Notice of Federal Advisory Committee Meeting

AGENCY: General Counsel of the Department of Defense, Department of Defense (DoD).

ACTION: Notice of Federal Advisory Committee meeting.

SUMMARY: The DoD is publishing this notice to announce that the following Federal Advisory Committee meeting of the Defense Advisory Committee on Investigation, Prosecution, and Defense of Sexual Assault in the Armed Forces will take place.

DATES: Open to the public, Friday, December 4, 2020, from 11:00 a.m. to 11:30 a.m. EST.

ADDRESSES: This public meeting will be held via teleconference. To access the teleconference dial: 410-874-6300, Conference Pin: 428 926 205.

FOR FURTHER INFORMATION CONTACT: Dwight Sullivan, 703-695-1055 (Voice), dwight.h.sullivan.civ@mail.mil (Email). Mailing address is DAC-IPAD, One Liberty Center, 875 N Randolph Street, Suite 150, Arlington, Virginia 22203. Website: <http://dacipad.whs.mil/>. The most up-to-date changes to the meeting agenda can be found on the website.

SUPPLEMENTARY INFORMATION: This meeting is being held under the provisions of the Federal Advisory Committee Act (FACA) of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102-3.140 and 102-3.150.

Purpose of the Meeting: In section 546 of the National Defense Authorization Act for Fiscal Year 2015 (Pub. L. 113-291), as modified by section 537 of the National Defense Authorization Act for Fiscal Year 2016 (Pub. L. 114-92), Congress tasked the DAC-IPAD to advise the Secretary of Defense on the investigation, prosecution, and defense of allegations of rape, forcible sodomy, sexual assault, and other sexual misconduct involving members of the Armed Forces. This will be the twenty-first public meeting held by the DAC-IPAD. At this meeting the Committee will vote on the final draft of the DAC-IPAD Report on *Racial and Ethnic Data Relating to Disparities in the Investigation, Prosecution, and Conviction of Sexual Offenses in the Military* as required by section 540I of

the National Defense Authorization Act for Fiscal Year 2020.

Agenda: 11:00 a.m.–11:05 a.m. Public Meeting Begins—Welcome and Introduction; 11:05 a.m.–11:25 a.m. Committee Vote on the Final Draft of the DAC–IPAD *Report on Racial and Ethnic Data Relating to Disparities in the Investigation, Prosecution, and Conviction of Sexual Offenses in the Military*; 11:25 a.m.–11:30 a.m. Meeting Wrap-Up and Public Comment; 11:30 a.m. Public Meeting Adjourns.

Meeting Accessibility: Pursuant to 5 U.S.C. 552b and 41 CFR 102–3.140 through 102–3.165, this meeting is open to the public. This public meeting will be held via teleconference. To access the teleconference dial: 410–874–6300, Conference Pin: 428 926 205. Please consult the website for any changes to the public meeting date or time.

Written Statements: Pursuant to 41 CFR 102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act of 1972, the public or interested organizations may submit written comments to the Committee about its mission and topics pertaining to this public session. Written comments must be received by the DAC–IPAD at least five (5) business days prior to the meeting date so that they may be made available to the Committee members for their consideration prior to the meeting. Written comments should be submitted via email to the DAC–IPAD at whs.pentagon.em.mbx.dacipad@mail.mil in the following formats: Adobe Acrobat or Microsoft Word. Please note that since the DAC–IPAD operates under the provisions of the Federal Advisory Committee Act, as amended, all written comments will be treated as public documents and will be made available for public inspection. Oral statements from the public will be permitted, though the number and length of such oral statements may be limited based on the time available and the number of such requests. Oral presentations by members of the public will be permitted from 11:25 a.m. to 11:30 a.m. EST on December 4, 2020.

Dated: November 12, 2020.

Aaron T. Siegel,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

BILLING CODE 5001–06–P

DEPARTMENT OF EDUCATION

[Docket No. ED–2020–SCC–0128]

Agency Information Collection Activities; Submission to the Office of Management and Budget for Review and Approval; Comment Request; CARES Act Maintenance of Effort (MOE)

AGENCY: Office of Elementary and Secondary Education (OESE), Department of Education (ED).

ACTION: Notice.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, ED is proposing an extension without change of a currently approved collection.

DATES: Interested persons are invited to submit comments on or before December 21, 2020.

ADDRESSES: Written comments and recommendations for proposed information collection requests should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection request by selecting “Department of Education” under “Currently Under Review,” then check “Only Show ICR for Public Comment” checkbox.

FOR FURTHER INFORMATION CONTACT: For specific questions related to collection activities, please contact Tara Ramsey, (202) 260–2063.

SUPPLEMENTARY INFORMATION: The Department of Education (ED), in accordance with the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public’s reporting burden. It also helps the public understand the Department’s information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the

respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: CARES Act Maintenance of Effort (MOE).

OMB Control Number: 1810–0745.

Type of Review: Extension without change of a currently approved collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 56.

Total Estimated Number of Annual Burden Hours: 280.

Abstract: This is a request for an extension of a previously approved information collection that solicits from States, Outlying Areas, and State educational agencies (SEAs) maintenance of effort (MOE) data under section 18008 of the CARES Act. Under four programs—the Governor’s Emergency Education Relief Fund (GEER Fund, Section 18002) and the Elementary and Secondary School Emergency Relief Fund (ESSER Fund, Section 18003) and two formula grant programs to the Outlying Areas authorized under Section 18001(a)(1), Education Stabilization Fund–State Educational Agencies (ESF—SEA) and Education Stabilization Fund–Governors (ESF—Governor)—States are required to maintain fiscal effort on behalf of elementary, secondary and postsecondary education. Recipients of the resources from the ESSER Fund, the GEER Fund, the ESF—SEA Fund, and the ESF—Governor Fund have signed Certifications and Agreements, in which they agree to abide by the provisions of the CARES Act, including MOE requirements. The Department is requesting an extension of the currently approved collection to meet the requirements of the CARES Act and ensure that States and Outlying Areas are meeting the MOE requirement. In the publication of frequently asked questions regarding the Maintenance of Effort requirement, ED issued guidance and a sample form for States and Outlying Areas to submit this statutorily required data.

Dated: November 16, 2020.

Kate Mullan,

PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.

respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Measures and Methods for the National Reporting System for Adult Education.*OMB Control Number:* 1830–0027.*Type of Review:* Revision of a currently approved collection.*Respondents/Affected Public:* State, Local, and Tribal Governments.*Total Estimated Number of Annual Responses:* 57.*Total Estimated Number of Annual Burden Hours:* 5,700.*Abstract:* This information collection request annually solicits performance and related information from the states and outlying areas that receive adult education state grant funds under the Adult Education and Family Literacy Act (AEFLA). The data are used to ensure that states and outlying areas meet the performance accountability requirements of AEFLA. Through this proposal, the Department is submitting a revised the National Reporting System for Adult Education (NRS) Information Collection Request (ICR) to include additional data collection elements consistent with the Workforce Innovation and Opportunity Act of 2014 (WIOA) performance accountability requirements for the AEFLA program. These new data collection elements will become effective on July 1, 2021 and required to be included in the annual performance reports due on October 1, 2021.

Dated: November 16, 2020.

Kate Mullan,*PRA Coordinator, Strategic Collections and Clearance, Governance and Strategy Division, Office of Chief Data Officer, Office of Planning, Evaluation and Policy Development.*

BILLING CODE 4000–01–P**DEPARTMENT OF ENERGY****Federal Energy Regulatory Commission****[Project No. 5124–022]****Washington Electric Cooperative, Inc.; Notice of Application Tendered for Filing With the Commission and Establishing Procedural Schedule for Licensing and Deadline for Submission of Final Amendments**

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection.

a. *Type of Application:* New Minor License.b. *Project No.:* 5124–022.c. *Date Filed:* October 30, 2020.d. *Applicant:* Washington Electric Cooperative, Inc. (WEC).e. *Name of Project:* North Branch No. 3 Hydroelectric Project.f. *Location:* On the North Branch Winooski River in Washington, County, Vermont. The project does not affect federal lands.g. *Filed Pursuant to:* Federal Power Act 16 U.S.C. 791(a)–825(r).h. *Applicant Contact:* Ms. Patricia Richards, General Manager, Washington Electric Cooperative, Inc., P.O. Box 8, 40 Church Street East Montpelier, Vermont 05651; phone: (802) 223–5245 or email at patty.richards@wec.coop.i. *FERC Contact:* Michael Tust at (202) 502–6522; or email at michael.tust@ferc.gov.

j. This application is not ready for environmental analysis at this time.

k. *Project Description:***Existing Project Facilities and Operation**

The project is located at the existing 115-foot-high, 1,525-foot-long Wrightsville Dam which is owned, operated, and maintained by the state of Vermont for flood control but also contains facilities utilized by WEC for hydropower generation. The licensed project consists of the following constructed facilities: A 445-foot-long, 5-foot-diameter steel aboveground penstock emerging from the base of the dam that conveys water to a 1,320-square-foot partially-buried project powerhouse containing three fixed blade turbines with rated capacities of 96, 259, and 578-kilowatts (kW) for a total installed capacity of 933 kW; a 750 square-foot substation located adjacent to the powerhouse that steps up the voltage from 4.16 kilovolts (kV) to 12.5 kV; a 450-foot-long, 12.5-kV transmission line; and appurtenant facilities.

Water from Wrightsville Reservoir enters an existing non-project intake structure at the dam containing two separate intake chambers: A “hydropower bay” located at an elevation of 631 feet and an overflow bay located at an elevation of 635 feet. Water entering the hydropower bay passes through trashracks, a headgate, and non-project conveyance tunnel within the dam and is conveyed to the powerhouse through the project penstock before re-entering the North Branch Winooski River approximately 400 feet downstream of the dam creating a 400-foot bypassed reach. Water entering the overflow bay passes

through trashracks and an overflow tunnel within the dam before being discharged to the bypassed reach through a low-level outlet at the base of the dam. WEC's three turbines located in the powerhouse cannot be throttled; however, WEC operates its turbines in a specific sequence to operate in near run-of-river mode while maintaining reservoir elevations between 633 and 635 feet from September 1 through May 31 and between 634 and 635 feet from June 1 through August 31. Additionally, WEC maintains minimum flows of 3.4 cubic feet per second (cfs) in the bypassed reach and 25 cfs in the North Branch Winooski River downstream of the powerhouse.

Proposed Project Facilities and Operation

WEC proposes to bring the following existing facilities into the project boundary as project structures: the trash racks with one-inch spacing and the 9.5-foot by 6.5-foot headgate located within the non-project hydropower bay at the intake; the 1.3-foot by 1.5-foot automated minimum flow gate located at the base of the wall separating the two intake chambers used to pass

minimum flows to the bypassed reach; the 100 square-foot hydraulic house located within the dam housing a hydraulic pump and controls used to operate the project headgate and minimum flow gate; and the 550-foot-long dirt road used to access the intake structure.

WEC would continue to operate its three turbine units to replicate near run-of-river operations and continue to maintain its existing minimum flows both within the bypassed reach (*i.e.*, 3.4 cfs) and downstream of the powerhouse (*i.e.*, 25 cfs). However, WEC proposes to modify operations by using its minimum flow gate to release more flow into the bypassed reach (up to 25 cfs) as generating units are turned on and off to reduce flow fluctuations downstream of the powerhouse. WEC also proposes to maintain the reservoir between an elevation of 634 and 635 feet year-round (rather than operating between 633–635 feet) and would cease all generation when reservoir levels fall below 634 feet.

1. *Locations of the Application:* In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested

persons an opportunity to view and/or print the contents via the internet through the Commission's Home Page (<http://www.ferc.gov>) using the eLibrary link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID-19), issued by the President on March 13, 2020. For assistance, contact FERC at FERCOnlineSupport@ferc.gov or call toll-free, (866) 208-3676 or TTY, (202) 502-8659.

m. You may also register online at <https://ferconline.ferc.gov/FERCOnline.aspx> to be notified via email of new filings and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

n. *Procedural schedule:* The application will be processed according to the following preliminary Hydro Licensing Schedule. Revisions to the schedule will be made as appropriate.

Milestone	Target date
Issue Notice of Acceptance/Notice of Ready for Environmental Analysis	December 2020.
Filing of recommendations, preliminary terms and conditions, and fishway prescriptions	February 2021.
Commission issues draft NEPA document	August 2021.
Comments on draft NEPA document	September 2021.
Filing of modified terms and conditions	November 2021.
Commission issues final NEPA document	February 2022.

o. Final amendments to the application must be filed with the Commission no later than thirty (30) days from the issuance date of the notice of ready for environmental analysis.

Dated: November 13, 2020.

Nathaniel J. Davis, Sr.,
Deputy Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. CP21–4–000]

Transwestern Pipeline Company, LLC; Notice of Scoping Period Requesting Comments on Environmental Issues for the Proposed Linam Ranch Project

The staff of the Federal Energy Regulatory Commission (FERC or Commission) will prepare an environmental document, that will discuss the environmental impacts of the Linam Ranch Project (Project) involving the abandonment in-place of natural gas transmission facilities by

Transwestern Pipeline Company, LLC (Transwestern) in Lea County, New Mexico. The Commission will use this environmental document in its decision-making process to determine whether the project is in the public convenience and necessity.

This notice announces the opening of the scoping process the Commission will use to gather input from the public and interested agencies regarding the project. As part of the National Environmental Policy Act (NEPA) review process, the Commission takes into account concerns the public may have about proposals and the environmental impacts that could result from its action whenever it considers the issuance of an Authorization to abandon facilities. This gathering of public input is referred to as “scoping.” The main goal of the scoping process is to focus the analysis in the environmental document on the important environmental issues. Additional information about the Commission’s NEPA process is described below in the *NEPA Process and Environmental Document* section of this notice.

By this notice, the Commission requests public comments on the scope of issues to address in the environmental document. To ensure that your comments are timely and properly recorded, please submit your comments so that the Commission receives them in Washington, DC on or before 5:00pm Eastern Time on December 14, 2020. Comments may be submitted in written form. Further details on how to submit comments are provided in the *Public Participation* section of this notice.

Your comments should focus on the potential environmental effects, reasonable alternatives, and measures to avoid or lessen environmental impacts. Your input will help the Commission staff determine what issues they need to evaluate in the environmental document. Commission staff will consider all written comments during the preparation of the environmental document.

If you submitted comments on this project to the Commission before the opening of this docket on October 8, 2020, you will need to file those comments in Docket No. CP21–4–000 to ensure they are considered as part of this proceeding.

This notice is being sent to the Commission’s current environmental mailing list for this project. State and local government representatives should notify their constituents of this proposed project and encourage them to comment on their areas of concern.

Transwestern provided landowners with a fact sheet prepared by the FERC entitled “An Interstate Natural Gas Facility On My Land? What Do I Need To Know?” which addresses typically asked questions, including the use of eminent domain and how to participate in the Commission’s proceedings. This fact sheet along with other landowner topics of interest are available for viewing on the FERC website (www.ferc.gov) under the Natural Gas Questions or Landowner Topics link.

Public Participation

There are three methods you can use to submit your comments to the Commission. Please carefully follow these instructions so that your comments are properly recorded. The Commission encourages electronic filing of comments and has staff available to assist you at (866) 208–3676 or FercOnlineSupport@ferc.gov.

(1) You can file your comments electronically using the *eComment* feature, which is located on the Commission’s website (www.ferc.gov) under the link to FERC Online. Using eComment is an easy method for submitting brief, text-only comments on a project;

(2) You can file your comments electronically by using the *eFiling* feature, which is located on the Commission’s website (www.ferc.gov) under the link to FERC Online. With eFiling, you can provide comments in a variety of formats by attaching them as a file with your submission. New eFiling users must first create an account by clicking on *eRegister*. You will be asked to select the type of filing you are making; a comment on a particular project is considered a “Comment on a Filing”; or

(3) You can file a paper copy of your comments by mailing them to the Commission. Be sure to reference the project docket number (CP21–4–000) on your letter. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

Additionally, the Commission offers a free service called eSubscription which makes it easy to stay informed of all issuances and submittals regarding the dockets/projects to which you subscribe. These instant email notifications are the fastest way to receive notification and provide a link

to the document files which can reduce the amount of time you spend researching proceedings. Go to <https://www.ferc.gov/ferc-online/overview> to register for eSubscription.

Summary of the Proposed Project

Transwestern proposes to abandon in place the Linam Ranch meter station and approximately 2,446 feet of associated 10-inch-diameter natural gas transmission pipeline, both of which are located in Lea County, New Mexico. According to Transwestern, the natural gas market in the project area has changed such that the Project has no firm transportation agreements. Additionally, the maintenance expenses associated with the meter station and piping are excessive and cannot be recovered by its current revenue stream. The general location of the project facilities is shown in appendix 1.¹

Land Requirements

All project-related activities would occur within the existing boundaries of the DCP Linam Ranch Gas Plant yard and existing Transwestern pipeline easement.

NEPA Process and the Environmental Document

Any environmental document issued by the Commission will discuss impacts that could occur as a result of the construction and operation of the proposed project under the relevant general resource areas:

- Geology and soils;
- water resources and wetlands;
- vegetation and wildlife;
- threatened and endangered species;
- cultural resources;
- land use;
- air quality and noise; and
- reliability and safety.

Commission staff will also evaluate reasonable alternatives to the proposed project or portions of the project and make recommendations on how to lessen or avoid impacts on the various resource areas. Your comments will help Commission staff identify and focus on the issues that might have an effect on the human environment and potentially eliminate others from further

¹ The appendices referenced in this notice will not appear in the **Federal Register**. Copies of the appendices were sent to all those receiving this notice in the mail and are available at www.ferc.gov using the link called eLibrary. For instructions on connecting to eLibrary, refer to the last page of this notice. At this time, the Commission has suspended access to the Commission’s Public Reference Room due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact FERC at FercOnlineSupport@ferc.gov or call toll free, (866) 208–3676 or TTY (202) 502–8659.

study and discussion in the environmental document.

Following this scoping period, Commission staff will determine whether to prepare an Environmental Assessment (EA) or an Environmental Impact Statement (EIS). The EA or the EIS will present Commission staff's independent analysis of the issues. If Commission staff prepares an EA, a *Notice of Schedule for the Preparation of an Environmental Assessment* will be issued. The EA may be issued for an allotted public comment period. The Commission would consider timely comments on the EA before making its decision regarding the proposed project. If Commission staff prepares an EIS, a *Notice of Intent to Prepare an EIS/ Notice of Schedule* will be issued, which will open up an additional comment period. Staff will then prepare a draft EIS which will be issued for public comment. Commission staff will consider all timely comments received during the comment period on the draft EIS and revise the document, as necessary, before issuing a final EIS. Any EA or draft and final EIS will be available in electronic format in the public record through eLibrary² and the Commission's natural gas environmental documents web page (<https://www.ferc.gov/industries-data/natural-gas/environment/environmental-documents>). If eSubscribed, you will receive instant email notification when the environmental document is issued.

With this notice, the Commission is asking agencies with jurisdiction by law and/or special expertise with respect to the environmental issues of this project to formally cooperate in the preparation of the environmental document.³ Agencies that would like to request cooperating agency status should follow the instructions for filing comments provided under the *Public Participation* section of this notice.

Consultation Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, the Commission is using this notice to initiate consultation with the applicable State Historic Preservation Office(s), and to solicit their views and those of other government agencies, interested Indian

tribes, and the public on the project's potential effects on historic properties.⁴ The environmental document for this project will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; and Native American Tribes. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project and includes a mailing address with their comments. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project.

If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please return the attached Mailing List Update Form (appendix 2).

Additional Information

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208-FERC, or on the FERC website at www.ferc.gov using the eLibrary link. Click on the eLibrary link, click on General Search and enter the docket number in the Docket Number field. Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or (866) 208-3676, or for TTY, contact (202) 502-8659. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

Public sessions or site visits will be posted on the Commission's calendar located at <https://www.ferc.gov/news-events/events> along with other related information.

Dated: November 13, 2020.

Applicants: Southern Natural Gas Company, L.L.C.

Description: Compliance filing Annual Report on Operational Transactions 2020.

Filed Date: 11/12/20.

Accession Number: 20201112-5120.

Comments Due: 5 p.m. ET 11/24/20.

Docket Numbers: RP21-209-000.

Applicants: Discovery Gas Transmission LLC.

Description: § 4(d) Rate Filing: 2021 HMRE Surcharge Filing to be effective 1/1/2021.

Filed Date: 11/12/20.

Accession Number: 20201112-5160.

Comments Due: 5 p.m. ET 11/24/20.

Docket Numbers: RP21-210-000.

Applicants: Alliance Pipeline L.P.

Description: § 4(d) Rate Filing: Negotiated Rates—Adding K1012327 to be effective 12/1/2020.

Filed Date: 11/12/20.

² For instructions on connecting to eLibrary, refer to the last page of this notice.

³ The Council on Environmental Quality regulations addressing cooperating agency responsibilities are at Title 40, Code of Federal Regulations, Section 1501.6.

⁴ The Advisory Council on Historic Preservation's regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

Accession Number: 20201112–5253.

Comments Due: 5 p.m. ET 11/24/20.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211 and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified date(s). Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: November 13, 2020.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 12635–002]

Moriah Hydro Corporation; Notice of Waiver Period for Water Quality Certification Application

On October 30, 2020, Moriah Hydro Corporation notified the Federal Energy Regulatory Commission that it submitted an application for a Clean Water Act section 401(a)(1) water quality certification to the New York State Department of Environmental Conservation (New York DEC) that same day, in conjunction with the above captioned project. Pursuant to 40 CFR 121.6, we hereby notify New York DEC of the following:

Date of Receipt of the Certification

Request: October 30, 2020

Reasonable Period of Time to Act on the Certification Request: One year

Date Waiver Occurs for Failure to Act: October 30, 2021

If New York DEC fails or refuses to act on the water quality certification request by the above waiver date, then the agency certifying authority is deemed waived pursuant to section 401(a)(1) of the Clean Water Act, 33 U.S.C. 1341(a)(1).

Dated: November 13, 2020.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket Nos. EL21–16–000]

Wisconsin Electric Power Company; Notice of Petition for Declaratory Order

Take notice that on November 13, 2020, pursuant to Rule 207 of the Federal Energy Regulatory Commission's (Commission) Rules of Practice and Procedure, 18 CFR 385.207 (2020),¹ Wisconsin Electric Power Company (Petitioner), filed a petition for declaratory order (Petition) requesting that the Commission find that their Market Rate Tariff Service Agreement with Cloverland Electric Cooperative², does not impede the Commission's regulations and policies concerning the Public Utility Regulatory Policies Act of 1978 (PURPA), as more fully explained in the petition.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Petitioner.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (<http://ferc.gov>) using the eLibrary link. Enter the docket number excluding the last three digits in the docket number field

¹ As required by Rule 381.302(a), 18 CFR 381.302(a) (2020), and the Commission's Annual Update of Filing Fees, 85 FR 1,102 (Jan. 9, 2020), Wisconsin Electric has submitted the required filing fee of \$30,060.

² Edison Sault Electric Company, LLC (ESE) is also listed as a party to the Agreement. Concurrently with the execution of the Service Agreement, Wisconsin Electric's parent company sold all of the membership interests in ESE to Cloverland, and ESE was merged into Cloverland.

to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at FERCOnlineSupport@ferc.gov or call toll-free, (866) 208–3676 or TTY, (202) 502–8659.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the eFiling link at <http://www.ferc.gov>. Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

Comment Date: 5:00 p.m. Eastern time on November 27, 2020.

Dated: November 13, 2020.

Nathaniel J. Davis, Sr.,

Deputy Secretary.

BILLING CODE 6717–01–P

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Agency Information Collection Activities: Existing Collection

AGENCY: Equal Employment Opportunity Commission.

ACTION: Notice of information collection—extension without change: Elementary-Secondary Staff Information Report (EEO–5) and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Equal Employment Opportunity Commission (EEOC or Commission) announces that it intends to submit to the Office of Management and Budget (OMB) a request for a three-year extension without change of the Elementary-Secondary Staff Information Report (EEO–5).

DATES: Written comments on this notice are encouraged and must be submitted on or before January 19, 2021.

ADDRESSES: You may submit comments by any of the following methods—please use only one method:

Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the

instructions on the website for submitting comments.

Mail: Comments may be submitted by mail to Bernadette B. Wilson, Executive Officer, Executive Secretariat, Equal Employment Opportunity Commission, 131 M Street NE, Washington, DC 20507.

Fax: Comments totaling six or fewer pages can be sent by facsimile ("fax") machine to (202) 663-4114. (This is not a toll-free number.) Receipt of fax transmittals will not be acknowledged, except that the sender may request confirmation of receipt by calling the Executive Secretariat staff at (202) 663-4070 (voice) or 800-669-6820 (TTY). (These are not toll-free telephone numbers.)

Instructions: All comments received must include the agency name and docket number. All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided. However, the EEOC reserves the right to refrain from posting libelous or otherwise inappropriate comments, including those that contain obscene, indecent, or profane language; that contain threats or defamatory statements; that contain hate speech directed at race, color, sex, national origin, age, religion, disability, or genetic information; or that promote or endorse services or products.

Although copies of comments received are usually also available for review at the Commission's library, given the EEOC's current 100% telework status due to the Coronavirus Disease 2019 (COVID-19) public health emergency, the Commission's library is closed until further notice. Once the Commission's library is re-opened, copies of comments received in response to the proposed rule will be made available for viewing by appointment only at 131 M Street NE, Suite 4NW08R, Washington, DC 20507, between the hours of 9:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT: Rashida Dorsey, Employer Data Team, Data Development and Information Products Division, Equal Employment Opportunity Commission, 131 M Street NE, Room 4SW32J, Washington, DC 20507; (202) 663-4355 (voice), (202) 663-7063 (TTY) or email at Rashida.dorsey@eeoc.gov.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act and OMB regulation 5 CFR 1320.8(d)(1), the

Commission solicits public comment to enable it to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the Commission's functions, including whether the information will have practical utility; (2) Evaluate the accuracy of the Commission's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of Information Collection

Collection Title: Elementary-Secondary Staff Information Report (EEO-5).

OMB Number: 3046-0003.

Frequency of Report: Biennial, even years.

Type of Respondent: Public elementary and secondary school systems or districts with 100 or more employees within the 50 U.S. states and District of Columbia.

Description of Affected Public: Public elementary and secondary school systems or districts with 100 or more employees within the 50 U.S. states and District of Columbia.

Responses: 7082 per biennial collection.

Reporting Hours: 120,901.07 per biennial collection.

Burden Hour Cost: \$4,055,001.76 per biennial collection.

Federal Cost: \$240,120.85 per biennial collection.

Number of Forms: 1.

Form Number: EEOC Form 168A.

Abstract: Section 709(c) of Title VII of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e-8(c), requires employers to make and keep records relevant to a determination of whether unlawful employment practices have been or are being committed, to preserve such records, and to produce reports as the Commission prescribes by regulation or order. Accordingly, the EEOC issued regulations, 29 CFR 1602.39 and .41-.45, prescribing the reporting and related record retention requirements for public elementary and secondary school systems or districts. 29 CFR 1602.39 requires school districts

to make or keep all records necessary for completion of an EEO-5 submission and retain those records for three years. 29 CFR 1602.41 requires EEO-5 filers to retain a copy of each filed EEO-5 report for three years. These requirements are related to record keeping which is part of standard administrative practices, and as a result, the EEOC believes that any impact on burden would be negligible and nearly impossible to quantify. Public elementary and secondary school systems or districts with 100 or more employees within the 50 U.S. states and District of Columbia were required to submit EEO-5 reports annually from 1974 to 1981 and then biennially in even years from 1982 to the present. The individual reports are confidential. The EEOC uses EEO-5 data to investigate charges of employment discrimination against public elementary and secondary school systems or districts. The data are also used for research. The data are shared with the Department of Education (Office for Civil Rights) and the Department of Justice.

Burden Statement: The EEOC has updated its methodology for calculating annual burden to reflect the different staff responsible for preparing and filing the EEO-5. The EEOC's revised burden estimate reflects that the bulk of the work in biennially preparing an EEO-5 report is performed by computer support specialists, executive administrative staff, and payroll and human resource professionals; the revised estimate also includes time spent by school district finance professionals and superintendents who, in a few cases, may consult briefly during the reporting process. After accounting for the time spent by the various employees who have a role in preparing an EEO-5, the EEOC estimates that a school district will spend 17.07 hours to prepare the report and estimates that the aggregate biennial hour burden for all respondents is 120,901.07. The cost associated with the burden hours was calculated using hourly wage rates obtained from the Department of Labor¹ for each job identified above as participating in the submission of the report; using those rates, we estimate that the burden hour cost per school district will be approximately \$572.58, while the estimated total biennial burden cost for all 7,082 school districts will be \$4,055,001.76 (See Table 1 for calculations).

¹ Median hourly wage rates were obtained from the Bureau of Labor Statistics (see U.S. Dept. of

Labor, Bureau of Labor Statistics, Occupational Outlook Handbook, <http://www.bls.gov/ooh/>).

TABLE 1—ESTIMATE OF BIENNIAL BURDEN FOR EEO-5 REPORT

School district staff	Hourly wage rate	Burden hours per district ^a	Burden cost per district	Total burden hours	Total burden hour cost
N = 7,082					
Computer Support Specialist (IT Professional/Data Processing Specialist)	26.33	3.43	\$90.28	24,281.35	\$639,327.82
Director of School Finance (Financial Managers)	62.45	0.14	8.92	1,012.02	63,200.51
Executive Clerical Staff	26.35	2.93	77.17	20,740.35	546,508.10
Human Resource Specialist	29.77	5.43	161.61	38,445.35	1,144,517.93
Payroll Specialist	19.49	1.43	27.84	10,117.35	197,187.06
Senior Human Resource Managers	56.11	3.43	192.38	24,281.35	1,362,426.28
Superintendent (School Management Occupations)	50.33	0.29	14.38	2,023.33	101,834.07
Total		17.07	572.58	120,901.07	4,055,001.76

Note: Burden Hours per district were determined through interviews with a stratified heterogeneous mixture of school districts used to estimate burden, as approved in the 2018 Paperwork Reduction Act.

^aBurden Hours are rounded to the tenth decimal place in this publication.

Estimates are based on the assumption of some paper reporting. During the 2018 EEO-5 filing period, the EEOC experienced a 49.8 percent increase in paper filing since the 2016 EEO-5 report filing. Despite the increase, paper filing represents 3.3 percent of total reports received in 2018. Electronic filing remains the most efficient, accurate, and secure means of reporting for respondents required to submit the EEO-5 report. The EEOC has made electronic filing much easier for respondents required to file the EEO-5 Report and as a result, more respondents are using this electronic filing method. Accordingly, the EEOC will continue to encourage EEO-5 filers to submit data through electronic filing, and will only accept paper records from filers who have secured permission to submit data via paper submission.

For the Commission.

Janet Dhillon,

Chair.

BILLING CODE 6570-01-P

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Agency Information Collection Activities: Existing Collection

AGENCY: Equal Employment Opportunity Commission.

ACTION: 60-Day Notice of Information Collection—Extension without change of a currently approved collection Local Union Report (EEO-3) and request for comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 (PRA), the Equal Employment Opportunity Commission (EEOC or Commission) announces that it intends

to submit to the Office of Management and Budget (OMB) a request for a three-year extension without change of the existing Local Union Report (EEO-3) (Form 274) as described below.

DATES: Written comments on this notice are encouraged and must be submitted on or before January 19, 2021.

ADDRESSES: You may submit comments by any of the following methods—please use only one method:

Federal eRulemaking Portal: <http://www.regulations.gov>. Follow the instructions on the website for submitting comments.

Mail: Comments may be submitted by mail to Bernadette B. Wilson, Executive Officer, Executive Secretariat, Equal Employment Opportunity Commission, 131 M Street NE, Washington, DC 20507.

Fax: Comments totaling six or fewer pages can be sent by facsimile (“fax”) machine to (202) 663-4114. (This is not a toll-free number.) Receipt of fax transmittals will not be acknowledged, except that the sender may request confirmation of receipt by calling the Executive Secretariat staff at (202) 663-4070 (voice) or 800-669-6820 (TTY). (These are not toll-free telephone numbers.)

Instructions: All comments received must include the agency name and docket number and will be posted without change to <http://www.regulations.gov>, including any personal information provided. However, the EEOC reserves the right to refrain from posting libelous or otherwise inappropriate comments, including those that contain obscene, indecent, or profane language; that contain threats or defamatory statements; that contain hate speech directed at race, color, sex, national origin, age, religion, disability, or

genetic information; or that promote or endorse services or products.

Although copies of comments received are usually also available for review at the Commission’s library, given the EEOC’s current 100% telework status due to the Coronavirus Disease 2019 (COVID-19) public health emergency, the Commission’s library is closed until further notice. Once the Commission’s library is re-opened, copies of comments received in response to the proposed rule will be made available for viewing by appointment only at 131 M Street NE, Suite 4NW08R, Washington, DC 20507, between the hours of 9:30 a.m. and 5 p.m.

FOR FURTHER INFORMATION CONTACT: Rashida Dorsey, Employer Data Team, Data Development and Information Products Division, Equal Employment Opportunity Commission, 131 M Street NE, Room 4SW32J, Washington, DC 20507; (202) 663-4355 (voice), (202) 663-7063 (TTY) or email at Rashida.dorsey@eeoc.gov.

SUPPLEMENTARY INFORMATION: Pursuant to the Paperwork Reduction Act and OMB regulation 5 CFR 1320.8(d)(1), the Commission solicits public comment to enable it to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the Commission’s functions, including whether the information will have practical utility; (2) Evaluate the accuracy of the Commission’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic,

mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submission of responses.

Overview of Information Collection

Collection Title: Local Union Report (EEO-3).

OMB Number: 3046-0006.

Frequency of Report: Biennial.

Type of Respondent: Local referral unions with 100 or more members.

Description of Affected Public: Local referral unions and independent or unaffiliated referral unions and similar labor organizations.

Responses: 1,100¹ per biennial collection.

Reporting Hours: 2,252 per biennial collection.

Burden Hour Cost: \$70,415.95 per biennial collection.

Federal Cost: \$390,120.85 per biennial collection.

Number of Forms: 1.

Form Number: EEOC Form 274.

Abstract: Section 709(c) of Title VII of the Civil Rights Act of 1964, as amended, 42 U.S.C. 2000e-8(c), requires labor organizations to make and keep records relevant to a determination of

whether unlawful employment practices have been or are being committed and produce reports required by the EEOC. Accordingly, the EEOC has issued regulations, 29 CFR 1602.22-.28, which set forth the reporting requirements and record retention policies for various kinds of labor organizations. 29 CFR 1602.22 requires every local union to retain the most recent report filed, and 29 CFR 1602.27-.28 require filers to make records necessary for completion of the EEO-3 and preserve them for a year (or if a charge of discrimination is filed, relevant records must be retained until final disposition of the matter). 29 CFR 1602.22 and 1602.27-.28 are related to record keeping which is part of standard administrative practices, and as a result, the EEOC believes that any impact on burden would be negligible and nearly impossible to quantify. Local referral local unions with 100 or more members have been required to submit EEO-3 reports since 1967 (biennially since 1985). The EEOC uses EEO-3 data for research and to investigate charges of discrimination. The individual reports are confidential.

Burden Statement: The methodology for calculating annual burden reflects

the different staff that are responsible for preparing and filing the EEO-3. These estimates stem from a limited study that was conducted in 2015 with nine EEO-3 respondents. The EEOC accounts for time to be spent biennially on EEO-3 reporting by business agents and administrative staff, as well as time spent by attorneys who, in a few cases, may consult briefly during the reporting process. The estimated number of respondents included in the biennial EEO-3 survey is 1,100 local referral unions, as this is the approximate number of filers from the 2018 reporting cycle. The estimated hour burden per report will be 2.05 hours, and the estimated total biennial respondent burden hours will be 2,251.80. Burden hour cost was calculated using median hourly wage rates for administrative staff and legal counsel, and average hourly wage rates for labor union business agents.²

The burden hour cost per report will be \$67.33, and the estimated total biennial burden hour cost per biennial collection will be \$73,842.75 (See Table 1 for calculations).

TABLE 1—ESTIMATE OF BIENNIAL BURDEN FOR EEO-3 REPORT

Local referral union staff	Hourly wage rate ^a	Hours per local	Cost per local	Total burden hours	Total burden hour cost
Secretaries and Administrative Assistants	\$18.84	1	\$18.84	1,100	\$20,724.00
Business Agent	45.00	1	45.00	1,100	49,500.00
Corporate Legal Counsel	69.86	0.05	3.49	55	191.95
Total		2.05	67.33	2,251.80	70,415.95

Note: A limited study was conducted by the EEOC of local referral union EEO-3 respondents. The methodology included surveying nine local referral union respondents by asking a series of survey questions approved by the EEOC's Office of Legal Counsel regarding the type of local union staff involved in submitting EEO-3 data. The EEOC asked responding study participants to estimate how long on average it took identified local union staff members to complete the EEO-3 report and what proportion of that time was allocated to each staff member job title. The burden hours per local union by job title, 2.05, is estimated based on filer responses. The results of the study were published in the Final Notice of Submission for OMB Review—Extension Without Change: Local Union Report (EEO-3) on January 24, 2017: <https://www.federalregister.gov/documents/2017/01/24/2017-01558/agency-information-collection-activities-proposed-collection-submission-for-omb-review>.

^a Hourly wage rates for administrative staff and legal counsel were obtained from the Bureau of Labor Statistics, May 2019 (see U.S. Dept. of Labor, Bureau of Labor Statistics, Occupational Outlook Handbook, https://www.bls.gov/oes/current/oes_stru.htm) and the average hourly wage rate for a labor union business agent was obtained from salaryexpert.com (see <https://www.salaryexpert.com/salary/job/labor-union-business-agent/united-states>).

These estimates are based upon filers' use of the EEO-3 online filing system to submit reports. The EEOC has made electronic submission much easier for respondents required to file the EEO-3 Report. During the 2018 EEO-3 data collection cycle, approximately 1,100 local referral unions were identified as being eligible to report EEO-3 data, and all but 31 of the 975 responsive EEO-3 filers submitted their data electronically. Electronic filing remains

the most efficient, accurate, and secure means of reporting for respondents required to submit the EEO-3 report. The EEOC has made electronic filing much easier for respondents required to file the EEO-3 report and as a result, more respondents are using this electronic filing method. Accordingly, the EEOC will continue to encourage EEO-3 filers to submit data through electronic filing, and will only accept paper records from filers who have

secured permission to submit data via paper submission.

For the Commission.

Janet Dhillon,

Chair.

BILLING CODE 6570-01-P

¹ This figure is based on the total number of respondents who were eligible to submit EEO-3

data in 2018, which is the most recently completed EEO-3 data year.

EXPORT-IMPORT BANK**[Public Notice EIB–2020–0010]****Application for Final Commitment for a Long-Term Loan or Financial Guarantee in Excess of \$100 million: AP089390XX****AGENCY:** Export-Import Bank of the United States.**ACTION:** Notice.

SUMMARY: This Notice is to inform the public, in accordance with Section 3(c)(10) of the Export-Import Bank Act of 1945, as amended, that the Export-Import Bank of the United States (“EXIM”) has received an application for final commitment for a long-term loan or financial guarantee in excess of \$100 million. Comments received within the comment period specified below will be presented to the EXIM Board of Directors prior to final action on this Transaction.

Reference: AP089390XX.

Purpose and Use: Brief description of the purpose of the transaction:

To support the export of U.S.-manufactured commercial aircraft to Panama.

Brief non-proprietary description of the anticipated use of the items being exported: To be used for passenger air transport between various countries in the Americas.

To the extent that EXIM is reasonably aware, the item(s) being exported are not expected to produce exports or provide services in competition with the exportation of goods or provision of services by a United States industry.

Parties:

Principal Supplier: The Boeing Company

Obligor: Compania Panamena de Aviacion, S.A., Panama

Guarantor(s): Copa Holdings, S.A.; AeroRepublica, Colombia; Oval Financing Leasing, Ltd., British Virgin Islands; and La Nueva Aerolinea, S.A., Panama

Description of Items Being Exported: Boeing commercial jet aircraft.

Information on Decision: Information on the final decision for this transaction will be available in the “Summary Minutes of Meetings of Board of Directors” on <http://exim.gov/newsandevents/boardmeetings/board/>.

Confidential Information: Please note that this notice does not include confidential or proprietary business information; information which, if disclosed, would violate the Trade Secrets Act; or information which would jeopardize jobs in the United States by supplying information that

competitors could use to compete with companies in the United States.

DATES: Comments must be received on or before December 14, 2020 to be assured of consideration before final consideration of the transaction by the Board of Directors of EXIM.

ADDRESSES: Comments may be submitted through *Regulations.gov* at *WWW.REGULATIONS.GOV*. To submit a comment, EIB–2020–0010 under the heading “Enter Keyword or ID” and select Search. Follow the instructions provided at the Submit a Comment screen. Please include your name, company name (if any) and EIB–2020–0010 on any attached document.

FEDERAL COMMUNICATIONS COMMISSION**[GN Docket No. 17–83; FRS 17248]****Meeting of the Broadband Deployment Advisory Committee****AGENCY:** Federal Communications Commission.**ACTION:** Notice.

SUMMARY: In this document, the FCC announces and provides an agenda for the next meeting of the Broadband Deployment Advisory Committee (BDAC), which will be held via live internet link.

DATES: December 17, 2020. The meeting will come to order at 11 a.m.

ADDRESSES: The Meeting will be held via conference call and available to the public via WebEx at <http://www.fcc.gov/live>.

FOR FURTHER INFORMATION CONTACT:

Justin L. Faulb, Designated Federal Authority (DFO) of the BDAC, at Justin.Faulb@fcc.gov or 202–418–1589; Zachary Ross, Deputy DFO of the BDAC, at Zachary.Ross@fcc.gov or 202–418–1033; or Belinda Nixon, Deputy DFO of the BDAC, at 202–418–1382, or Belinda.Nixon@fcc.gov. The TTY number is: (202) 418–0484.

SUPPLEMENTARY INFORMATION: The BDAC meeting is open to the public on the internet via live feed from the FCC’s web page at <http://www.fcc.gov/live>. Open captioning will be provided for this event. Other reasonable accommodations for people with disabilities are available upon request. Requests for such accommodations should be submitted via email to fcc504@fcc.gov or by calling the Consumer & Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY). Such requests should include a detailed description of the accommodation needed. In addition, please include a way for the FCC to contact the requester if more information is needed to fill the request. Please allow at least five days’ advance notice for accommodation requests; last minute requests will be accepted, but may not be possible to accommodate. Oral statements at the meeting by parties or entities not represented on the BDAC will be permitted to the extent time permits, at the discretion of the BDAC Chair and the DFO. Members of the public may submit comments to the BDAC in the FCC’s Electronic Comment Filing System, ECFS, at www.fcc.gov/ecfs. Comments to the BDAC should be filed in Docket 17–83.

Proposed Agenda: At this meeting, the BDAC will consider and vote on a

report and recommendation from the Increasing Broadband Investment in Low-Income Communities working group, and hear any other updates from the BDAC. This agenda may be modified at the discretion of the BDAC Chair and the Designated Federal Officer (DFO).

(5 U.S.C. App 2 § 10(a)(2))

Federal Communications Commission.

Pamela Arluk,

Chief, Competition Policy Division, Wireline Competition Bureau.

FEDERAL COMMUNICATIONS COMMISSION

[DA 20-1269; FRS 17247]

Media Bureau Lifts Freeze on the Filing of Television Station Minor Modification Applications and Rulemaking Petitions; Correction

AGENCY: Federal Communications Commission.

ACTION: Notice; correction.

SUMMARY: The Federal Communications Commission published a document into the **Federal Register** of November 12, 2020, announcing the effective date that filing freezes will be lifted on petitions for rulemaking to change channels in the DTV Table of Allotments, petitions for rulemaking for new DTV allotments, petitions for rulemaking to change communities of license, including changes in technical parameters, and modification applications that increase a full power or Class A station's service area beyond an area that is already served. The document contained an incorrect effective date.

FOR FURTHER INFORMATION CONTACT: Joyce L. Bernstein, Video Division, Media Bureau, Federal Communications Commission, Joyce.Bernstein@fcc.gov, (202) 418-1645.

SUPPLEMENTARY INFORMATION:

Correction

In the **Federal Register** of November 12, 2020, in FR Vol. 85, No. 219, on page 71894, in the second column, correct the "Dates" caption to read:

Dates: The filing freezes will be lifted effective November 27, 2020.

Federal Communications Commission.

Thomas Horan,

Chief of Staff, Media Bureau.

BILLING CODE 6712-01-P

FEDERAL RESERVE SYSTEM

Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at <https://www.federalreserve.gov/foia/request.htm>. Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)).

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington, DC 20551-0001, not later than December 21, 2020.

A. Federal Reserve Bank of Chicago (Colette A. Fried, Assistant Vice President) 230 South LaSalle Street, Chicago, Illinois 60690-1414:

1. *Independence Bancshares, Inc., Independence, Iowa;* to acquire First State Bank, Sumner, Iowa.

Board of Governors of the Federal Reserve System, November 16, 2020.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE P

FEDERAL RESERVE SYSTEM

Agency Information Collection Activities: Announcement of Board Approval Under Delegated Authority and Submission to OMB

AGENCY: Board of Governors of the Federal Reserve System.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) is adopting a proposal to extend for three years, with revision the Annual Daylight Overdraft Capital Report for U.S. Branches and Agencies of Foreign Banks (FR 2225; OMB No. 7100-0216). The revisions are applicable as of October 1, 2020.

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452-3829.

Office of Management and Budget (OMB) Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395-6974.

A copy of the Paperwork Reduction Act (PRA) OMB submission, including the reporting form and instructions, supporting statement, and other documentation will be placed into OMB's public docket files. These documents also are available on the Federal Reserve Board's public website at <https://www.federalreserve.gov/apps/reportforms/review.aspx> or may be requested from the agency clearance officer, whose name appears above.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the PRA to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. Board-approved collections of information are incorporated into the official OMB inventory of currently approved collections of information. Copies of the PRA Submission, supporting statements, and approved collection of information instrument(s) are placed into OMB's public docket files.

Final Approval Under OMB Delegated Authority of the Extension for Three Years, With Revision, of the Following Information Collection

Report title: Annual Daylight Overdraft Capital Report for U.S. Branches and Agencies of Foreign Banks.

Agency form number: FR 2225.

OMB control number: 7100-0216.

Effective date: October 1, 2020.

Frequency: Annually.

Respondents: Foreign banking organizations (FBOs).

Estimated number of respondents: 51.

Estimated average hours per response: 1.

Estimated annual burden hours: 51.

General description of report: The FR 2225 is required for FBOs that wish to and are eligible to establish a non-zero net debit cap for their U.S. branches and agencies under the Federal Reserve Policy on Payment System Risk (PSR policy). The FR 2225 reporting form collects information needed to identify the respondent and its fiscal year-end, and collects four items to determine its year-end capital and assets for purposes of daylight overdraft monitoring. The four items, converted into U.S. dollars collected for the capital and assets determination, are: Worldwide capital for the reporting FBO (item 1); an adjustment to avoid double counting of capital used by any direct or indirect subsidiary of the FBO that also has access to Fedwire and has its own net debit cap (item 2); the FBO's total daylight overdraft capital base for the U.S. branch and agency family (item 3), which is used to calculate the net debit cap; and the reporting FBO's total worldwide assets (item 4). The Reserve Banks use items 1 and 2 as supplemental information to clarify the data reported in item 3. Federal Reserve staff use the assets data reported in item 4 for analytical purposes.

Legal authorization and confidentiality: This information collection is authorized pursuant to section 7(a) of the International Banking Act, 12 U.S.C. 3105(a), which establishes reserve requirements for U.S. branches and agencies of foreign banks, and pursuant to section 13(14) of the Federal Reserve Act (FRA), 12 U.S.C. 347d, which provides that "each Federal Reserve bank may receive deposits from, discount paper endorsed by, and make advances to any branch or agency of a foreign bank in the same manner and to the same extent that it may exercise such powers with respect to a member bank if such branch or agency is maintaining reserves with such Reserve bank pursuant to section 7 of the International Banking Act of 1978." In addition, sections 11(i), 16, and 19(f) of the FRA, 12 U.S.C. 248(i), 248-1, and 464, continue to provide authority for the collection of the FR 2225. The obligation to respond is required to obtain a benefit (*i.e.*, this information is required in order for an FBO to establish a non-zero net debit cap so that its U.S. branches or agencies may be eligible for intraday credit).

The Board does not consider the information collected on the FR 2225 report to be confidential, and the completed version of this report generally is made available to the public upon request. However, in certain instances, specific information collected

on an individual FBO's FR 2225 report may be exempt from disclosure pursuant to exemption 4 of the Freedom of Information Act (FOIA), which protects from public disclosure "trade secrets and commercial or financial information obtained from a person and privileged or confidential" (5 U.S.C. 552(b)(4)). A request for confidential treatment must be submitted by the FBO in writing concurrently with the submission of the FR 2225 report. This written request must identify the specific data for which confidential treatment is sought and must provide the legal justification for the confidentiality request, as provided in the Board's Rules Regarding Availability of Information (12 CFR part 261). The Federal Reserve will review each confidential treatment request on a case-by-case basis to determine if confidential treatment is appropriate. Under the Board's current rules, the Federal Reserve may subsequently release information for which confidential treatment was requested, if (1) disclosure of such information is required by law (other than 5 U.S.C. 552); (2) the request for confidential treatment ("request") was made by the FBO pursuant to 5 U.S.C. 552(b)(4) and more than 10 years have passed since the request; or (3) less than 10 years have passed since the request, but the Board believes that the information cannot be withheld from disclosure under 5 U.S.C. 552(b)(4), and the FBO is provided with written notice of the Board's views and with an opportunity to object to the Board's disclosure.

Current actions: On June 29, 2020, the Board published a notice in the **Federal Register** (85 FR 38896) requesting public comment for 60 days on the extension, with revision, of the Annual Daylight Overdraft Capital Report for U.S. Branches and Agencies of Foreign Banks. The Board revised the instructions to remove references to an FBO's strength of support assessment (SOSA) ranking and its status as a financial holding company (FHC). These changes are related to the revisions to the PSR policy, which the Board implemented on April 1, 2019, and which will take effect on October 1, 2020. The SOSA ranking and FHC status are no longer used for determining an FBO's eligibility for a positive net debit cap, the size of its net debit cap, and its eligibility to request a streamlined procedure to obtain maximum daylight overdraft capacity. The comment period for this notice expired on August 28, 2020. The Board did not receive any comments. The revisions will be implemented as proposed.

Board of Governors of the Federal Reserve System, November 16, 2020.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE 6210-01-P

FEDERAL RESERVE SYSTEM

Proposed Agency Information Collection Activities; Comment Request

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Notice, request for comment.

SUMMARY: The Board of Governors of the Federal Reserve System (Board) invites comment on a proposal to extend for three years, without revision, the Quarterly Report of Interest Rates on Selected Direct Consumer Installment Loans and the Quarterly Report of Credit Card Plans.

DATES: Comments must be submitted on or before January 19, 2021.

ADDRESSES: You may submit comments, identified by *FR 2835* or *FR 2835a*, by any of the following methods:

- Agency website: <https://www.federalreserve.gov/>. Follow the instructions for submitting comments at <https://www.federalreserve.gov/apps/foia/proposedregs.aspx>.

- Email: regs.comments@federalreserve.gov. Include the OMB number in the subject line of the message.

- Fax: (202) 452-3819 or (202) 452-3102.

- Mail: Ann E. Misback, Secretary, Board of Governors of the Federal Reserve System, 20th Street and Constitution Avenue NW, Washington, DC 20551.

All public comments are available from the Board's website at <https://www.federalreserve.gov/apps/foia/proposedregs.aspx> as submitted, unless modified for technical reasons or to remove personally identifiable information at the commenter's request. Accordingly, comments will not be edited to remove any identifying or contact information. Public comments may also be viewed electronically or in paper in Room 146, 1709 New York Avenue NW, Washington, DC 20006, between 9:00 a.m. and 5:00 p.m. on weekdays. For security reasons, the Board requires that visitors make an appointment to inspect comments. You may do so by calling (202) 452-3684. Upon arrival, visitors will be required to present valid government-issued photo identification and to submit to security

screening in order to inspect and photocopy comments.

Additionally, commenters may send a copy of their comments to the Office of Management and Budget (OMB) Desk Officer—Shagufta Ahmed—Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10235, 725 17th Street NW, Washington, DC 20503, or by fax to (202) 395-6974.

FOR FURTHER INFORMATION CONTACT:

Federal Reserve Board Clearance Officer—Nuha Elmaghrabi—Office of the Chief Data Officer, Board of Governors of the Federal Reserve System, Washington, DC 20551, (202) 452-3829.

SUPPLEMENTARY INFORMATION: On June 15, 1984, OMB delegated to the Board authority under the PRA to approve and assign OMB control numbers to collections of information conducted or sponsored by the Board. In exercising this delegated authority, the Board is directed to take every reasonable step to solicit comment. In determining whether to approve a collection of information, the Board will consider all comments received from the public and other agencies.

A copy of the Paperwork Reduction Act (PRA) OMB submission, including the reporting form and instructions, supporting statement, and other documentation will be available at <https://www.reginfo.gov/public/do/PRAMain>, if approved. These documents will also be made available on the Board's public website at <https://www.federalreserve.gov/apps/reportforms/review.aspx> or may be requested from the agency clearance officer, whose name appears above.

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following

a. Whether the proposed collection of information is necessary for the proper performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents,

including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal.

Proposal Under OMB Delegated Authority To Extend for Three Years, Without Revision, the Following Information Collection

Report title: Quarterly Report of Interest Rates on Selected Direct Consumer Installment Loans and Quarterly Report of Credit Card Plans.

Agency form number: FR 2835; FR 2835a.

OMB control number: 7100-0085.

Frequency: Quarterly.

Respondents: Commercial banks.

Estimated number of respondents: FR 2835: 150; FR 2835a: 50.

Estimated average hours per response: FR 2835: .29; FR 2835a: .50.

Estimated annual burden hours: FR 2835: 176; FR 2835a: 100.

General description of report: The FR 2835 collects information from a sample of commercial banks on interest rates charged on loans for new vehicles and loans for other consumer goods and personal expenses. The FR 2835a collects information on two measures of credit card interest rates from a sample of commercial banks with \$1 billion or more in credit card receivables and a representative group of smaller issuers. The data from these reports help the Board analyze current household financial conditions and the implications of these conditions for household spending and, as such, these data provide valuable input to the monetary policymaking process.

Legal authorization and confidentiality: The FR 2835 and the FR 2835a are authorized by sections 2A and 11 of the Federal Reserve Act ("FRA"). Section 2A of the FRA requires that the Board and the Federal Open Market Committee maintain long-run growth of the monetary and credit aggregates commensurate with the economy's long run potential to increase production, so as to promote effectively the goals of maximum employment, stable prices, and moderate long-term interest rates.¹ Section 11 of the FRA authorizes the Board to require reports from each member bank as it may deem necessary and authorizes the Board to prescribe

reports of liabilities and assets from insured depository institutions to enable the Board to discharge its responsibility to monitor and control monetary and credit aggregates.² The obligation to respond to both the FR 2835 and FR 2835a is voluntary.

Most of the information collected through the FR 2835 is not considered confidential; however, to the extent narrative information submitted to explain large fluctuations in reported data contains nonpublic commercial or financial information, which is both customarily and actually treated as private by the respondent, such information may be kept confidential pursuant to exemption 4 of the Freedom of Information Act (FOIA).³ Individual respondent data collected through the FR 2835a may be considered confidential pursuant to FOIA exemption 4 to the extent the response contains nonpublic commercial or financial information, which is both customarily and actually treated as private by the respondent.⁴

Board of Governors of the Federal Reserve System, November 16, 2020.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

Request for Comment on Information Collection Proposal

The Board invites public comment on the following information collection, which is being reviewed under authority delegated by the OMB under the PRA. Comments are invited on the following:

a. Whether the proposed collection of information is necessary for the proper performance of the Board's functions, including whether the information has practical utility;

b. The accuracy of the Board's estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

c. Ways to enhance the quality, utility, and clarity of the information to be collected;

d. Ways to minimize the burden of information collection on respondents, including through the use of automated collection techniques or other forms of information technology; and

e. Estimates of capital or startup costs and costs of operation, maintenance, and purchase of services to provide information.

At the end of the comment period, the comments and recommendations received will be analyzed to determine the extent to which the Board should modify the proposal.

Proposal Under OMB Delegated Authority To Extend for Three Years, With Revision, the Following Information Collection

Report title: Government-Administered, General-Use Prepaid Card Surveys.

Agency form number: FR 3063.

OMB control number: 7100-0343.

Frequency: Annually.

Respondents: Depository institutions that administer general-use prepaid cards.

Estimated number of respondents: 15.

Estimated average hours per response: 10.

Estimated annual burden hours: 150.

General description of report: The issuer survey (FR 3063a) collects data from issuers of government-administered, general-use prepaid cards including information on the pre-paid card program, the number of cards outstanding, card funding, ATM transactions, purchase transactions, fees paid by issuers to third parties, interchange fees, and cardholder fees. The issuer survey (FR 3063a) is

mandatory. The government survey (FR 3063b), which is being discontinued, was originally designed to collect data from state governments, the District of Columbia, and U.S. territories (collectively "state governments"), and municipal government offices located within the United States (local government offices) that administer general-use prepaid card payment programs. It was intended that the FR 3063b survey would collect similar information from state governments and local government offices to supplement the information collected from card issuers in the FR 3063a survey on the usage of general-use prepaid cards in federal, state or local government-administered payment programs. However, the government survey was voluntary and, ultimately, did not end up being utilized to collect information from state governments or local government offices because relevant information on the use of prepaid cards was obtained from the issuer survey.

The Board uses data from the FR 3063a survey to support an annual report to Congress on the prevalence of use of general-use prepaid cards in federal, state, and local government-administered payment programs and on the interchange and cardholder fees charged with respect to such use of such cards.

Proposed revisions: The Board proposes to revise and streamline the FR 3063a reporting structure to reduce burden on respondents by deleting various questions, which are no longer necessary to support the Board's annual report. The Board believes that the proposed structure would reduce reporting burden without significantly compromising the value of the data collected. The proposed revisions to the FR 3063a would be effective for the data collection administered during the first half of 2021 for calendar year 2020 data. In addition, the Board proposes to discontinue the FR 3063b.

Legal authorization and confidentiality: The issuer survey is authorized by subsection 920(a)(7) of the Electronic Fund Transfer Act, 15 U.S.C. 1693o-2(a)(7), which was added by section 1075(a) of the Dodd-Frank Wall Street Reform and Consumer Protection Act. This subsection requires the Board to submit an annual report to Congress on the prevalence of the use of general-use prepaid cards in federal, state or local government-administered payment programs and the interchange transaction fees and card-holder fees charged with respect to the use of such general-use prepaid cards (15 U.S.C. 1693o-2(a)(7)(D)). It also provides the Board with authority to require issuers

to provide information to enable the Board to carry out the provisions of the subsection (15 U.S.C. 1693o–2(a)(3)(B)). The obligation of issuers to respond to the issuer survey is mandatory. The Board generally regards the information collected from each individual issuer on the FR 3063a survey as confidential commercial and financial information, which is protected by exemption 4 of the Freedom of Information Act (5 U.S.C. 552(b)(4)). The Board, however, may publicly release aggregate or summary information in a way that does not reveal the individual issuer.

Board of Governors of the Federal Reserve System, November 16, 2020.

Michele Taylor Fennell,

Deputy Associate Secretary of the Board.

BILLING CODE 6210–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Agency for Healthcare Research and Quality

Supplemental Evidence and Data Request on Integrated Pain Management Programs

AGENCY: Agency for Healthcare Research and Quality (AHRQ), HHS.

ACTION: Request for Supplemental Evidence and Data Submissions.

SUMMARY: The Agency for Healthcare Research and Quality (AHRQ) is seeking scientific information submissions from the public. Scientific information is being solicited to inform our review on *Integrated Pain Management Programs*, which is currently being conducted by the AHRQ's Evidence-based Practice Centers (EPC) Program. Access to published and unpublished pertinent scientific information will improve the quality of this review.

DATES: Submission Deadline on or before December 21, 2020.

ADDRESSES:

Email submissions: epc@ahrq.hhs.gov.

Print submissions:

Mailing Address: Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, ATTN: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E53A, Rockville, MD 20857.

Shipping Address (FedEx, UPS, etc.): Center for Evidence and Practice Improvement, Agency for Healthcare Research and Quality, ATTN: EPC SEADs Coordinator, 5600 Fishers Lane, Mail Stop 06E77D, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT:

Jenae Benms, Telephone: 301–427–1496 or Email: epc@ahrq.hhs.gov.

SUPPLEMENTARY INFORMATION: The Agency for Healthcare Research and Quality has commissioned the Evidence-based Practice Centers (EPC) Program to complete a review of the evidence for *Integrated Pain Management Programs*. AHRQ is conducting this systematic review pursuant to Section 902 of the Public Health Service Act, 42 U.S.C. 299a.

The EPC Program is dedicated to identifying as many studies as possible that are relevant to the questions for each of its reviews. In order to do so, we are supplementing the usual manual and electronic database searches of the literature by requesting information from the public (e.g., details of studies conducted). We are looking for studies that report on *Integrated Pain Management Programs*, including those that describe adverse events. The entire research protocol is available online at: <https://effectivehealthcare.ahrq.gov/products/integrated-pain-management/protocol>.

This is to notify the public that the EPC Program would find the following information on Integrated Pain Management Programs helpful:

- A list of completed studies that your organization has sponsored for this indication. In the list, please *indicate whether results are available on ClinicalTrials.gov along with the ClinicalTrials.gov trial number.*

- *For completed studies that do not have results on ClinicalTrials.gov, a summary, including the following elements: Study number, study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion criteria, primary and secondary outcomes, baseline characteristics, number of patients screened/eligible/enrolled/lost to follow-up/withdrawn/analyzed, effectiveness/efficacy, and safety results.*

- *A list of ongoing studies that your organization has sponsored for this indication. In the list, please provide the ClinicalTrials.gov trial number or, if the trial is not registered, the protocol for the study including a study number, the study period, design, methodology, indication and diagnosis, proper use instructions, inclusion and exclusion*

criteria, and primary and secondary outcomes.

■ Description of whether the above studies constitute *ALL Phase II and above clinical trials* sponsored by your organization for this indication and an index outlining the relevant information in each submitted file.

Your contribution is very beneficial to the Program. Materials submitted must be publicly available or able to be made public. Materials that are considered confidential; marketing materials; study types not included in the review; or information on indications not included in the review cannot be used by the EPC Program. This is a voluntary request for information, and all costs for complying with this request must be borne by the submitter.

The draft of this review will be posted on AHRQ's EPC Program website and available for public comment for a period of 4 weeks. If you would like to be notified when the draft is posted, please sign up for the email list at: <https://>

www.effectivehealthcare.ahrq.gov/email-updates.

The systematic review will answer the following questions. This information is provided as background. AHRQ is not requesting that the public provide answers to these questions.

Key Questions (KQs)

KQ1: What are the effectiveness and harms of integrated or comprehensive pain management programs for Medicare beneficiaries with complex acute/subacute pain or chronic, non-active cancer pain? Population subgroups of interest include those with disabilities (including ESRD), prior substance use disorder, psychological co-morbidities (including suicidal behaviors), and degree of nociplasticity.

KQ2: Have any of the following factors been evaluated and/or shown to impact outcomes in studies of comprehensive or integrated pain management models?

a. *Treatment delivery* including session formats (group, one-on-one),

duration, intensity and frequency of sessions, number of sessions; general structure and scope of sessions.

b. *Treatment components* (e.g., medication review and/or management, including transition from opioid to nonopioid medications; psychological support or mental health services; physical reconditioning, such as physical therapy and occupational therapy; use of complementary and integrative medicine treatments; patient education; use of medical procedures or devices).

c. *Care provision.*

i. Care coordination methods or decision support

ii. Provider types involved

iii. Personalization, care pathways

d. *Program characteristics.*

i. Program emphasis/goals

ii. Target population

iii. Referral sources

iv. Staffing characteristics (e.g., turn over)

PICOTS (POPULATIONS, INTERVENTIONS, COMPARATORS, OUTCOMES, TIMING, SETTINGS)

PICOTS	Inclusion	Exclusion
Population	Medicare beneficiaries (<i>i.e.</i> , adults ≥65 years old and those under 65 years old who qualify for Medicare due to disability including ESRD) with complex acute/subacute pain ^a or chronic non-active cancer pain. ^b In the absence of publications in Medicare populations, studies of adults with these types of pain will be considered. Population subgroups of interest include those with disabilities (including ESRD), prior substance use disorder, psychological co-morbidities (including suicidal behaviors), degree of nociplasticity. ^c	<ul style="list-style-type: none"> • Patients undergoing end-of-life care, terminally ill (e.g., hospice) patients; those under supervised palliative care. • Young, non-disabled populations.
Intervention	Pain management programs that address the biopsychosocial model of pain and include: <ul style="list-style-type: none"> • Multidisciplinary (interdisciplinary) teams that at a minimum have the following components available: Pharmacotherapy review and/or management, psychological care (mental health services), and physical reconditioning (e.g., PT, OT); studies may also include other components in addition to these; <i>and</i> • Description of care coordination, case management or mechanisms of multidisciplinary, interdisciplinary collaboration and communication. Integrated pain management programs (IPMPs) will be defined as those that include the above and are based in primary care. Comprehensive pain management programs (CPMPs) will be defined as those including the above but are not based in primary care.	<ul style="list-style-type: none"> • Unimodal pain management. • Pain management confined to a single provider type, practice, or isolated method of management. • Programs focused on functional restoration and/or occupational health focused on return to work such as work hardening programs, unless they are specifically done in a Medicare eligible population or are clearly applicable to the Medicare population. • Programs in very young and non-disabled populations (e.g., military populations). • Studies evaluating incremental value of adding a single treatment modality to another single treatment modality (e.g., addition of CBT to PT). • Post-operative or post-trauma rehabilitation programs.
Comparator	Any.	None.
Outcome	Patient oriented outcomes: <ul style="list-style-type: none"> • <i>Primary:</i> Pain, function (focus on "success" if reported), opioid use. • <i>Secondary:</i> HRQOL, emotional function (e.g., depression, anxiety), patient satisfaction, global improvement. Harms, adverse events, unintended consequences Program-related outcomes: <ul style="list-style-type: none"> • Utilization (e.g., pain-related hospital/ED visits or short-term skilled nursing facility use, long term care facility or institutional care transfer, Medicaid enrollment). 	Patient-oriented outcomes: <ul style="list-style-type: none"> • Non-validated instruments for outcomes (e.g., pain, function, HRQOL, depression, etc.) • Intermediate outcomes (e.g., range of motion, physical strength, etc.).

PICOTS (POPULATIONS, INTERVENTIONS, COMPARATORS, OUTCOMES, TIMING, SETTINGS)—Continued

PICOTS	Inclusion	Exclusion
Timing	Duration of follow up: Focus on persistence of effects evaluated short term (1 to <6 months), intermediate term (≥6 to <12 months) and long term (≥12 months) following intervention.	
Setting	Outpatient, inpatient, institutional residence.	<ul style="list-style-type: none"> • Inpatient or outpatient settings exclusively providing treatment for SUD/ODU or tertiary care, hospice, or similar settings. • Case reports. • Case series (unless no comparative studies). • Case-control studies, cross-sectional studies. • Conference proceedings, editorials, letters, white papers, citations that have not been peer-reviewed.
Study design, publication type.	Inclusion will focus on RCTs. Prospective cohort studies that control for confounding will be considered if RCTs are not available. Comparative cohorts that do not control for confounding will be considered if cohorts controlling for confounding are not available. In the absence of comparative studies, single arm (e.g., case series, pre-post studies) will be considered if they are clearly relevant to the Medicare population.	

CBT = Cognitive Behavioral Therapy; ED = emergency department; ESDR = end stage renal disease; HRQOL = Health-related quality of life; OT = occupational therapy; OUD = opioid use disorder; PICOTS = population, intervention, comparator, outcomes, timing, study design; PT = physical therapy; RCT = randomized control trial; SUD = substance use disorder.

^aComplex acute or subacute pain: Patients with acute pain (<6 weeks duration) or subacute pain (6 weeks to 12 weeks duration) who are at risk of developing chronic pain).

^bChronic, nonactive cancer pain (based on Mersky 1994): Pain that persists for at least three months and is not associated with [active] malignant disease"; pain could, however, be resultant from a previous malignancy that is no longer active.

^cThe term nociplasticity has been used to describe pain resulting from altered nociception without underlying tissue damage resulting in hypersensitivity (e.g., fibromyalgia). Many pain conditions may have a nociplastic component. Some additional terms used in the literature include centralized pain and amplified pain.

Dated: November 13, 2020.

Marquita Cullom,
Associate Director.

BILLING CODE 4160-90-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[Docket No. CDC-2020-0117]

Advisory Committee on Immunization Practices (ACIP)

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice of meeting and request for comment.

SUMMARY: In accordance with the Federal Advisory Committee Act, the Centers for Disease Control and Prevention (CDC), announces the following meeting of the Advisory Committee on Immunization Practices (ACIP). This meeting is open to the public. Time will be available for public comment. The meeting will be webcast live via the World Wide Web.

DATES: The meeting will be held on November 23, 2020 from 12:00 p.m. to 5:00 p.m., EST (times subject to change).

Written comments must be received on or before November 23, 2020.

ADDRESSES: For more information on ACIP please visit the ACIP website:

<http://www.cdc.gov/vaccines/acip/index.html>.

You may submit comments, identified by Docket No. CDC-2020-0117 by any of the following methods:

- **Federal eRulemaking Portal:**

<https://www.regulations.gov>. Follow the instructions for submitting comments.

- Mail: Docket No. CDC-2020-0117, c/o Attn: November 23, 2020 ACIP Meeting, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H24-8, Atlanta, GA 30329-4027.

Instructions: All submissions received must include the Agency name and Docket Number. All relevant comments received in conformance with the <https://www.regulations.gov> suitability policy will be posted without change to <https://www.regulations.gov>, including any personal information provided. For access to the docket to read background documents or comments received, go to <https://www.regulations.gov>.

Written public comments submitted by 24 hours prior to the ACIP meeting will be provided to ACIP members before the meeting.

FOR FURTHER INFORMATION CONTACT: Stephanie Thomas, ACIP Committee Management Specialist, Centers for Disease Control and Prevention, National Center for Immunization and Respiratory Diseases, 1600 Clifton Road, NE, MS-H24-8, Atlanta, GA 30329-4027; Telephone: 404-639-8367; Email: ACIP@cdc.gov.

SUPPLEMENTARY INFORMATION:

Purpose: The committee is charged with advising the Director, CDC, on the use of immunizing agents. In addition,

under 42 U.S.C. 1396s, the committee is mandated to establish and periodically review and, as appropriate, revise the list of vaccines for administration to vaccine-eligible children through the Vaccines for Children (VFC) program, along with schedules regarding dosing interval, dosage, and contraindications to administration of vaccines. Further, under provisions of the Affordable Care Act, section 2713 of the Public Health Service Act, immunization recommendations of the ACIP that have been approved by the Director of the Centers for Disease Control and Prevention and appear on CDC immunization schedules must be covered by applicable health plans.

Matters To Be Considered: The agenda will include discussions on COVID-19 vaccines. No recommendation vote is scheduled for COVID-19 vaccines. Agenda items are subject to change as priorities dictate. For more information on the meeting agenda visit <https://www.cdc.gov/vaccines/acip/meetings/meetings-info.html>.

Meeting Information: The meeting will be webcast live via the World Wide Web; for more information on ACIP please visit the ACIP website: <http://www.cdc.gov/vaccines/acip/index.html>.

Public Participation

Interested persons or organizations are invited to participate by submitting written views, recommendations, and data. Please note that comments received, including attachments and other supporting materials are part of the public record and are subject to

public disclosure. Do not include any information in your comment or supporting materials that you consider confidential or inappropriate for public disclosure. If you include your name, contact information, or other information that identifies you in the body of your comments, that information will be on public display. CDC will review all submissions and may choose to redact, or withhold, submissions containing private or proprietary information such as Social Security numbers, medical information, inappropriate language, or duplicate/near duplicate examples of a mass-mail campaign. CDC will carefully consider all comments submitted into the docket. CDC does not accept comment by email.

Oral Public Comment: This meeting will include time for members of the public to make an oral comment. Oral public comment will occur before any scheduled votes including all votes relevant to the ACIP's Affordable Care Act and Vaccines for Children Program roles. Priority will be given to individuals who submit a request to make an oral public comment before the meeting according to the procedures below.

Procedure for Oral Public Comment: All persons interested in making an oral public comment at the November ACIP meeting must submit a request at <http://www.cdc.gov/vaccines/acip/meetings/> no later than 11:59 p.m., EST, November 19, 2020 according to the instructions provided.

If the number of persons requesting to speak is greater than can be reasonably accommodated during the scheduled time, CDC will conduct a lottery to determine the speakers for the scheduled public comment session. CDC staff will notify individuals regarding their request to speak by email by November 20, 2020. To accommodate the significant interest in participation in the oral public comment session of ACIP meetings, each speaker will be limited to 3 minutes, and each speaker may only speak once per meeting.

Written Public Comment: Written comments must be received on or before November 23, 2020.

In accordance with 41 CFR 102–3.150(b), less than 15 calendar days' notice is being given for this meeting due to the exceptional circumstances of the COVID–19 pandemic and rapidly evolving COVID–19 vaccine development and regulatory processes. A notice of this ACIP meeting has also been posted on the ACIP website at: <http://www.cdc.gov/vaccines/acip/index.html>.

In the interest of promoting openness and transparency, we are publishing a

late notice in the **Federal Register** to inform the public.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

Kalwant Smagh,

Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention.

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–21–0666]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled National Healthcare Safety Network (NHSN) to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on June 15, 2020 to obtain comments from the public and affected agencies. CDC received two comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570.

Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

National Healthcare Safety Network (NHSN) (OMB Control No. 0920–0666, Exp. 12/31/2022)—Revision—National Center for Emerging and Zoonotic Infection Diseases (NCEZID), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Division of Healthcare Quality Promotion (DHQP), National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), Centers for Disease Control and Prevention (CDC) collects data from healthcare facilities in the National Healthcare Safety Network (NHSN) under OMB Control Number 0920–0666. NHSN provides facilities, states, regions, and the nation with data necessary to identify problem areas, measure the progress of prevention efforts, and ultimately eliminate healthcare-associated infections (HAIs) nationwide. NHSN allows healthcare facilities to track blood safety errors and various healthcare-associated infection prevention practice methods such as healthcare personnel influenza vaccine status and corresponding infection control adherence rates. NHSN currently has six components:

Patient Safety (PS), Healthcare Personnel Safety (HPS), Biovigilance (BV), Long-Term Care Facility (LTCF), Outpatient Procedure (OPC), and the Dialysis Component. NHSN's planned

Neonatal Component is expected to launch during the winter of 2020/2021. This component will focus on premature neonates and the healthcare associated events that occur as a result of their prematurity. This component will be released with one module, which includes Late Onset-Sepsis and Meningitis. Late-onset sepsis (LOS) and Meningitis are common complications of extreme prematurity. These infections are usually serious, causing a prolongation of hospital stay, increased cost, and risk of morbidity and mortality. The data for this module will be electronically submitted, and manual data entry will not be available. This will allow more hospital personnel to be available to care for patients and will reduce annual burden across healthcare facilities. Additionally, LOS data will be utilized for prevention initiatives. Data reported under the Patient Safety Component are used to determine the magnitude of the healthcare-associated adverse events and trends in the rates of the events, in the distribution of pathogens, and in the adherence to prevention practices. Data will help detect changes in the epidemiology of adverse events resulting from new medical therapies and changing patient risks. Additionally, reported data is being used to describe the epidemiology of antimicrobial use and resistance and to better understand the relationship of antimicrobial therapy to this rising problem. Under the Healthcare Personnel Safety Component, protocols and data on events—both positive and adverse—are used to determine (1) the magnitude of adverse events in healthcare personnel, and (2) compliance with immunization and sharps injuries safety guidelines. Under the Biovigilance Component, data on adverse reactions and incidents associated with blood transfusions are reported and analyzed to provide national estimates of adverse reactions and incidents. Under the Long-Term Care Facility Component, data is captured from skilled nursing facilities. Reporting methods under the LTCF component have been created by using forms from the PS Component as a model with modifications to specifically address the specific characteristics of LTCF residents and the unique data needs of these facilities reporting into NHSN. A new form has been introduced for field testing—Respiratory Tract Infection (RTI)—not to be used by NHSN users, but as part of an EIP project with 4 EIP sites. Form title will be *Denominators for Healthcare Associated Infections (HAIs): Respiratory Tract Infections*. The

purpose of this form is to allow testing prior to introducing a new module and forms to NHSN users. The CDC's Epidemiology Research & Innovations Branch (ERIB) team will use the form to perform field testing of variables to explore the utilization, applicability, and data collection burden associated with these variables. This process will inform areas of improvement prior to incorporating the new module, including protocol, forms, and instructions into NHSN. The estimated burden for this form is 20 minutes, which is based on a similar denominator form. The Dialysis Component offers a simplified user interface for dialysis users to streamline their data entry and analyses processes as well as provide options for expanding in the future to include dialysis surveillance in settings other than outpatient facilities. The Outpatient Procedure Component (OPC) gathers data on the impact of infections and outcomes related to operative procedures performed in Ambulatory Surgery Centers (ASCs). The OPC is used to monitor two event types: Same Day Outcome Measures and Surgical Site Infections (SSIs). NHSN has increasingly served as the operating system for HAI reporting compliance through legislation established by the states. As of April 2020, 36 states, the District of Columbia and the City of Philadelphia, Pennsylvania have opted to use NHSN as their primary system for mandated reporting. Reporting compliance is completed by healthcare facilities in their respective jurisdictions, with emphasis on those states and municipalities acquiring varying consequences for failure to use NHSN. Additionally, healthcare facilities in five U.S. territories (Puerto Rico, American Samoa, the U.S. Virgin Islands, Guam, and the Northern Mariana Islands) are voluntarily reporting to NHSN. Additional territories are projected to follow with similar use of NHSN for reporting purposes. NHSN's data is used to aid in the tracking of HAIs and guide infection prevention activities/practices that protect patients. The Centers for Medicare and Medicaid Services (CMS) and other payers use these data to determine incentives for performance at healthcare facilities across the US and surrounding territories, and members of the public may use some protected data to inform their selection among available providers. Each of these parties is dependent on the completeness and accuracy of the data. CDC and CMS work closely and are fully committed to ensuring complete

and accurate reporting, which are critical for protecting patients and guiding national, state, and local prevention priorities. CMS collects some HAI data and healthcare personnel influenza vaccination summary data, which is done on a voluntary basis as part of its Fee-for-Service Medicare quality reporting programs, while others may report data required by a federal mandate. Facilities that fail to report quality measure data are subject to partial payment reduction in the applicable Medicare Fee-for-Service payment system. CMS links their quality reporting to payment for Medicare-eligible acute care hospitals, inpatient rehabilitation facilities, long-term acute care facilities, oncology hospitals, inpatient psychiatric facilities, dialysis facilities, and ambulatory surgery centers. Facilities report HAI data and healthcare personnel influenza vaccination summary data to CMS via NHSN as part of CMS's quality reporting programs to receive full payment. Still, many healthcare facilities, even in states without HAI reporting legislation, submit limited HAI data to NHSN voluntarily. NHSN's data collection updates continue to support the incentive programs managed by CMS. For example, survey questions support requirements for CMS' quality reporting programs. Additionally, CDC has collaborated with CMS on a voluntary National Nursing Home Quality Collaborative, which focuses on recruiting nursing homes to report HAI data to NHSN and to retain their continued participation. This project has resulted in a significant increase in long-term care facilities reporting to NHSN. The ICR previously approved in December of 2019 for 5,352,360 responses; 3,113,631 burden hours. The proposed changes in this new ICR include revisions to eight data collection forms and the addition of ten new forms for a total of 79 proposed data collection forms. In this Revision, CDC requests OMB approval for an estimated 1,321,443 annual burden hours.

The ICR previously approved in December of 2019 for 5,352,360 responses; 3,113,631 burden hours and \$101,009,102 in annual cost, is due to expire on December 31, 2022. The reporting burden decreased by 1,792,188 hours for a total estimated burden of 1,321,443 hours. The annual cost of reporting will increase by \$1,642,524 for a total cost burden of \$102,651,626. The proposed changes in this new ICR include revisions to eight data collection forms and the addition

of two new forms for a total of 79 proposed data collection forms. In this Revision, CDC requests OMB approval for an estimated 1,321,443 annual burden hours.

ESTIMATED ANNUALIZED BURDEN HOURS

Form No. & name	Number of respondents	Number of responses per respondent	Avg. burden per response (min./hour)	Total burden (hours)
57.100 NHSN Registration Form	2,000	1	5/60	167
57.101 Facility Contact Information	2,000	1	10/60	333
57.103 Patient Safety Component—Annual Hospital Survey	6,765	1	55/60	6,201

BILLING CODE 4163–18–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day–21–21AT; Docket No. CDC–2020–0114]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a proposed and/or continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Evaluation of Venous

Thromboembolism Prevention Practices in U.S. Hospitals. This proposed study is designed to support a framework for improving hospital venous thromboembolism (VTE) prevention practices through the evaluation of current VTE prevention practices in U.S. adult general medical and surgical hospitals.

DATES: CDC must receive written comments on or before January 19, 2021.

ADDRESSES: You may submit comments, identified by Docket No. CDC–2020–0114 by any of the following methods:

- ☐ *Federal eRulemaking Portal:* Regulations.gov. Follow the instructions for submitting comments.
- ☐ *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS–D74, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to Regulations.gov.

Please note: Submit all comments through the Federal eRulemaking portal (regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger,

Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS–D74, Atlanta, Georgia 30329; phone: 404–639–7118; Email: omb@cdc.gov.

SUPPLEMENTARY INFORMATION: Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), Federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submissions of responses.

5. Assess information collection costs.

Proposed Project

Evaluation of Venous Thromboembolism Prevention Practices in U.S. Hospitals—New—National Center on Birth Defects and Developmental Disabilities (NCBDDD), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Venous thromboembolism (VTE), which includes deep vein thrombosis (DVT) and pulmonary embolism (PE), is an important and growing public health problem. Each year in the U.S., it is estimated that VTE affects as many as 900,000 people, is responsible for up to 100,000 deaths, and is associated with healthcare costs of approximately \$10 billion. Recurrence after a VTE is common, and complications include post-thrombotic syndrome and chronic thromboembolic pulmonary hypertension. Over half of VTE events are associated with recent hospitalization or surgery and most occur after discharge. An analysis of the National Hospital Discharge Survey from 2007 to 2009 estimated that almost 550,000 U.S. adult hospitalizations had a discharge diagnosis of VTE each year. Hospital-associated VTE (HA-VTE) is often preventable but VTE prevention strategies are not applied uniformly or systematically across U.S. hospitals and healthcare systems.

The Agency for Healthcare Research and Quality (AHRQ) published a guide for preventing HA-VTE in 2016. The framework for improving VTE prevention in hospitalized patients includes a hospital VTE prevention policy, an interdisciplinary VTE team, standardization of VTE prevention processes, monitoring of processes and outcomes, and VTE prevention education for providers and patients. A VTE prevention protocol includes VTE risk assessment, bleeding risk assessment (risk of bleeding with anticoagulant prophylaxis) and clinical decision support for appropriate prophylaxis (*i.e.*, ambulation,

anticoagulant prophylaxis, and/or mechanical prophylaxis) based on both VTE and bleeding risk assessments.

Despite evidence-based guidelines for VTE prophylaxis in at-risk hospitalized patients, there is systemic underuse of appropriate VTE prophylaxis. As many as 70% of HA-VTE events are potentially preventable but less than half of hospitalized patients receive appropriate VTE prophylaxis. An implementation gap exists between evidence-based guidelines for VTE prophylaxis in hospitalized adult patients and implementation of those guidelines in real-world hospital settings. The 2008 Surgeon General's Call to Action to Prevent DVT and PE included instituting formal systems related to risk assessment and the provision of prophylaxis to high-risk hospitalized patients. For World Thrombosis Day in 2016, the International Society on Thrombosis and Haemostasis (ISTH) issued a call to clinical leaders, hospitals, and payers to work together to make VTE risk assessment for all hospitalized patients a priority.

In England, The National Venous Thromboembolism Prevention Programme was launched in 2010 with the goal of reducing preventable HA-VTE morbidity and mortality (Roberts, 2017). VTE risk assessment was mandated for all adult patients on admission to an acute hospital utilizing a previously developed national VTE risk assessment tool/model. Hospitals were required to report VTE risk assessment rates, with a financial incentive applied to achieve a target of 90%. This resulted in an impressive, sustained increase in VTE risk assessment rates with a corresponding increase in anticoagulant prophylaxis. There was evidence of significant reductions in HA-VTE and associated mortality following implementation of this program.

Unlike England, the U.S. has no national VTE prevention program with hospital risk assessment rates tied to financial incentives and no national VTE risk assessment tool/model. Various VTE risk assessment models (RAMs) have been developed and published to identify hospitalized patients whose risk for VTE is high enough to offset the risk of bleeding with anticoagulant prophylaxis. However, there is no standardized RAM currently in use across U.S. hospitals and healthcare systems. Implementation of risk assessment varies in terms of the patient population (*e.g.*, medical vs. surgical), time frames (*e.g.*, on admission, on transfer to another unit), method of administration (*i.e.*,

electronic vs. paper), person/s performing the risk assessment (*e.g.*, physician, nurse, pharmacist), type of RAM (*e.g.*, quantitative vs. qualitative), and linkage to a clinical decision support tool for appropriate VTE prophylaxis.

An evaluation of the extent to which U.S. hospitals utilize VTE risk assessment is needed to better understand the landscape around VTE prevention practices in real-world hospital settings in order to guide efforts and inform interventions to reduce the burden of HA-VTE. CDC is funding The Joint Commission to evaluate VTE prevention practices in U.S. hospitals. The Joint Commission has had a role in patient safety through standards and performance measurement. It is the measure steward for two electronic clinical quality measures (eCQMs) on VTE prevention available for Center for Medicare and Medicaid Services Inpatient Quality Reporting and Joint Commission hospital accreditation since 2016. However, these two VTE prevention eCQMs only address the initiation of VTE prophylaxis within a specified timeframe; they do not assess the patient's level of VTE risk or the appropriateness of prophylaxis.

For this project, The Joint Commission, in collaboration with CDC, developed a survey on hospital VTE prevention practices. The survey was piloted in nine hospitals and their feedback was used to improve the survey. After OMB approval, the survey will be implemented by The Joint Commission as a one-time data collection in a nationally representative sample of U.S. adult general medical and surgical hospitals. No individual-level data will be collected. CDC will not receive any individual or hospital identifiable information.

The overall purpose of this project is to evaluate current VTE prevention practices in a nationally representative sample of U.S. hospitals (American Hospital Association adult general medical and surgical hospital service category) in order to support a framework for HA-VTE prevention. The information collected in this hospital survey will be used to improve understanding of hospital VTE prevention practices, which will guide efforts and inform interventions to reduce the burden of HA-VTE. Specifically, the information collected on hospital VTE prevention policy and protocol, VTE prevention team, VTE data collection and reporting, VTE risk assessment, VTE prophylaxis safety considerations (*i.e.*, bleeding risk assessment), ambulation protocol, VTE prevention education for providers and

patients, and VTE prophylaxis monitoring and support will be used to assess the extent to which hospitals apply these components of the framework for HA–VTE prevention. The responses to specific VTE prevention practices can be used to assess VTE prevention practices by hospital characteristics (e.g., bed size, urban vs. rural location, teaching vs. non-teaching status) to better target efforts or interventions to improve HA–VTE

prevention. Information collected on the barriers to establishing a hospital-wide VTE prevention policy will be helpful in addressing these challenges. Information will be collected on both adult general medical and surgical units since VTE prevention practices differ by specialty. Information on VTE risk assessment (e.g., who conducts the assessment, when is it performed, mandatory or optional, format, type of RAM) will improve understanding of

real-world hospital VTE risk assessment practices. Information on the capacity of hospitals to collect data on VTE risk assessment will be helpful in determining the feasibility of VTE risk assessment as a VTE prevention performance measure. The data collected can also serve as a baseline for evaluation of future HA–VTE prevention initiatives.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number responses per respondent	Average burden per response (in hours)	Total burden hours
The Director of Patient Safety and Quality, the Chairperson of the Patient Safety Committee, other quality improvement professional.	Recruitment material: Implementation email and project information sheet.	384	1	15/60	96
The Director of Patient Safety and Quality, the Chairperson of the Patient Safety Committee, other quality improvement professional.	Evaluation of Venous Thromboembolism Prevention Practices in U.S. Hospitals Questionnaire.	384	1	1	384
Total	480

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[30Day–21–0879]

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled Information Collections to Advance State, Tribal, Local, and Territorial (STLT) Governmental Agency and System Performance, Capacity, and Program Delivery to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on 05/21/2020 to obtain comments from the public and affected agencies. CDC did not receive comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/

do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

Proposed Project

Information Collections to Advance State, Tribal, Local, and Territorial (STLT) Governmental Agency and System Performance, Capacity, and Program Delivery (OMB Control No. 0920–0879, Exp. 1/31/2021)—Extension—Center for State, Tribal, Local and Territorial Support (CSTLTS), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The mission of the Department of Health and Human Services is to enhance the health and well-being of all Americans. As part of HHS, CDC conducts critical science and provides health information to people and communities to save lives and protect people from health threats. To this end, CDC and HHS seek to accomplish their mission by collaborating with partners throughout the nation and the world to

monitor health, detect and investigate health problems, conduct research to enhance prevention, develop and advocate sound public health policies, implement prevention strategies, promote healthy behaviors, foster safe and healthful environments, and provide leadership and training.

CDC is requesting a three-year approval to extend a generic clearance to collect information related to domestic public health issues and services that affect and/or involve state, tribal, local and territorial (STLT) government entities.

The respondent universe is comprised of STLT governmental staff or delegates acting on behalf of a STLT agency involved in the provision of essential

public health services in the United States. Delegate is defined as a governmental or non-governmental agent (agency, function, office or individual) acting for a principal or submitted by another to represent or act on their behalf. The STLT agency is represented by a STLT entity or delegate with a task to protect and/or improve the public's health.

Information will be used to assess situational awareness of current public health emergencies; make decisions that affect planning, response and recovery activities of subsequent emergencies; fill CDC and HHS gaps in knowledge of programs and/or STLT governments that will strengthen surveillance, epidemiology, and laboratory science;

improve CDC's support and technical assistance to jurisdictions. CDC and HHS will conduct brief data collections, across a range of public health topics related to essential public health services.

CDC estimates up to 30 data collections with State, territorial, or tribal governmental staff or delegates, and 10 data collections with local/county/city governmental staff or delegates will be conducted on an annual basis. Ninety-five percent of these data collections will be web-based and five percent telephone, in-person, and focus groups. The total annualized burden of 54,000 hours is based on the following estimates.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per respondent (in hrs.)
State, Territorial, or Tribal government staff or delegate.	Web, telephone, in-person, focus group	800	30	1
Local/County/City government staff or delegate.	Web, telephone, in-person, focus group	3,000	10	1

Jeffrey M. Zirger,

Lead, Information Collection Review Office,
Office of Scientific Integrity, Office of Science,
Centers for Disease Control and Prevention.

BILLING CODE 4163-18-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Medicare & Medicaid Services

Privacy Act of 1974; Matching Program

AGENCY: Centers for Medicare & Medicaid Services (CMS), Department of Health and Human Services (HHS).

ACTION: Notice of new matching program.

SUMMARY: In accordance with subsection (e)(12) of the Privacy Act of 1974, as amended, the Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services (CMS) is providing notice of the re-establishment of a matching program between CMS and the Social Security Administration (SSA), "Determining Enrollment or Eligibility for Insurance Affordability Programs Under the Patient Protection and Affordable Care Act."

DATES: The deadline for comments on this notice is December 21, 2020. The re-established matching program will commence not sooner than 30 days after

publication of this notice, provided no comments are received that warrant a change to this notice. The matching program will be conducted for an initial term of 18 months (from approximately March 9, 2021 to September 8, 2022) and within three months of expiration may be renewed for one additional year if the parties make no change to the matching program and certify that the program has been conducted in compliance with the matching agreement.

ADDRESSES: Interested parties may submit comments on the new matching program to the CMS Privacy Officer by mail at: Division of Security, Privacy Policy & Governance, Information Security & Privacy Group, Office of Information Technology, Centers for Medicare & Medicaid Services, Location: N1-14-56, 7500 Security Blvd., Baltimore, MD 21244-1850, or walter.stone@cms.hhs.gov.

FOR FURTHER INFORMATION CONTACT: If you have questions about the matching program, you may contact Anne Pesto, Senior Advisor, Marketplace Eligibility and Enrollment Group, Center for Consumer Information and Insurance Oversight, Centers for Medicare & Medicaid Services, at 410-786-3492, by email at anne.pesto@cms.hhs.gov, or by mail at 7500 Security Blvd., Baltimore, MD 21244.

SUPPLEMENTARY INFORMATION: The Privacy Act of 1974, as amended (5 U.S.C. 552a) provides certain protections for individuals applying for and receiving federal benefits. The law governs the use of computer matching by federal agencies when records in a system of records (meaning, federal agency records about individuals retrieved by name or other personal identifier) are matched with records of other federal or non-federal agencies. The Privacy Act requires agencies involved in a matching program to:

1. Enter into a written agreement, which must be prepared in accordance with the Privacy Act, approved by the Data Integrity Board of each source and recipient federal agency, provided to Congress and the Office of Management and Budget (OMB), and made available to the public, as required by 5 U.S.C. 552a(o), (u)(3)(A), and (u)(4).

2. Notify the individuals whose information will be used in the matching program that the information they provide is subject to verification through matching, as required by 5 U.S.C. 552a(o)(1)(D).

3. Verify match findings before suspending, terminating, reducing, or making a final denial of an individual's benefits or payments or taking other adverse action against the individual, as required by 5 U.S.C. 552a(p).

4. Report the matching program to Congress and the OMB, in advance and

annually, as required by 5 U.S.C. 552a(o) (2)(A)(i), (r), and (u)(3)(D).

5. Publish advance notice of the matching program in the **Federal Register** as required by 5 U.S.C. 552a(e)(12).

This matching program meets these requirements.

Barbara Demopolus,

Privacy Advisor, Division of Security, Privacy Policy and Governance, Office of Information Technology, Centers for Medicare & Medicaid Services.

PARTICIPATING AGENCIES:

The Department of Health and Human Services (HHS), Centers for Medicare & Medicaid Services (CMS) is the recipient agency, and the Social Security Administration (SSA) is the source agency.

AUTHORITY FOR CONDUCTING THE MATCHING PROGRAM:

The statutory authority for the matching program is 42 U.S.C. secs. 18081 and 18083.

PURPOSE(S):

The purpose of the matching program is to provide CMS with SSA information which CMS and state-based administering entities will use to determine individuals' eligibility for initial enrollment in a Qualified Health Plan through an Exchange established under the Patient Protection and Affordable Care Act, for Insurance Affordability Programs (IAPs), and certificates of exemption from the shared responsibility payment; and to make eligibility redeterminations and renewal decisions, including appeal determinations. IAPs include:

1. Advance payments of the premium tax credit (APTC) and cost sharing reductions (CSRs),
2. Medicaid,
3. Children's Health Insurance Program (CHIP), and
4. Basic Health Program (BHP).

CATEGORIES OF INDIVIDUALS:

The individuals whose information will be used in the matching program are consumers (applicants and enrollees) who receive the eligibility determinations and redeterminations described in the preceding Purpose(s) section.

CATEGORIES OF RECORDS:

The categories of records used in the matching program are identity information, citizenship, death/disability indicators, incarceration information, and income. To request information from SSA, CMS will submit a submission file to SSA that contains

the following mandatory specified data elements: Last name, first name, date of birth, Social Security Number (SSN), and citizenship indicator. When SSA is able to match the SSN and name provided by CMS and information is available, SSA will provide CMS with the following about each individual, as relevant: Last name, first name, date of birth, death indicator, disability indicator, incarceration information, Title II (annual and monthly) income information, and confirmation of attestations of citizenship status and SSN. SSA may also provide Quarters of Coverage data when CMS requests it.

SYSTEM OF RECORDS MAINTAINED BY CMS

CMS Health Insurance Exchanges System (HIX), CMS System No. 09–70–0560, last published in full at 78 FR 63211 (Oct. 23, 2013), and amended at 83 FR 6591 (Feb. 14, 2018). Routine use 3 authorizes CMS' disclosures of identifying information about applicants to SSA for use in this matching program.

B. SYSTEMS OF RECORDS MAINTAINED BY SSA

The SSA SORNs and routine uses that support this matching program are identified below:

(1) Master Files of SSN Holders and SSN Applications, 60–0058, last fully published at 75 FR 82121 (Dec. 29, 2010) and amended at 78 FR 40542 (July 5, 2013), 79 FR 8780 (Feb. 13, 2014), 83 FR 31250 (July 3, 2018), and 83 FR 54969 (Nov. 1, 2018);

(2) Prisoner Update Processing System (PUPS), 60–0269, last fully published at 64 FR 11076 (Mar. 8, 1999) and amended at 72 FR 69723 (Dec. 10, 2007), 78 FR 40542 (July 5, 2013), and 83 FR 54969 (Nov. 1, 2018);

(3) Master Beneficiary Record, 60–0090, last fully published at 71 FR 1826 (Jan. 11, 2006), and amended at 72 FR 69723 (Dec. 10, 2007), 78 FR 40542 (July 5, 2013), 83 FR 31250 (July 3, 2018) and 83 FR 54969 (Nov. 1, 2018);

(4) Earnings Recording and Self-Employment Income System, 60–0059, last fully published at 71 FR 1819 (Jan. 11, 2006) and amended at 78 FR 40542 (July 5, 2013) and 83 FR 54969 (Nov. 1, 2018).

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

ACTION: Notice.

SUMMARY: The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

DATES: Comments must be received by January 19, 2021.

ADDRESSES: When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to <http://www.regulations.gov>. Follow the instructions for "Comment or Submission" or "More Search Options" to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number ____, Room C4–26–05,

7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' website address at <https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html>.

2. Call the Reports Clearance Office at (410) 786–1326.

FOR FURTHER INFORMATION CONTACT:

William N. Parham at (410) 786–4669.

SUPPLEMENTARY INFORMATION:

Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10764 Evaluation of Risk Adjustment Data Validation (RADV) Appeals and Health Insurance Exchange Outreach Training Sessions

CMS–10454 Disclosure of State Rating Requirements

CMS–R–71 Quality Improvement Organization (QIO) Assumption of Responsibilities and Supporting Regulations

CMS–370/CMS–377 ASC Forms for Medicare Program Certification

CMS–1572 Home Health Agency Survey and Deficiencies Report

CMS–10332 Disclosure Requirement for the In-Office Ancillary Services Exception

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term “collection of information” is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

Information Collection

1. *Type of Information Collection Request:* New collection (Request for a

new OMB control number); *Title of Information Collection:* Evaluation of Risk Adjustment Data Validation (RADV) Appeals and Health Insurance Exchange Outreach Training Sessions; *Use:* CMS recognizes that the success of accurately identifying risk-adjustment payments and payment errors is dependent upon the data submitted by Medicare Advantage Organizations (MAOs), and is strongly committed to providing appropriate education and technical outreach to MAOs and third-party administrators (TPAs). In addition, CMS is strongly committed to providing appropriate education and technical outreach to States, issuers, self-insured group health plans and TPAs participating in the Marketplace and/or market stabilization programs mandated by the Affordable Care Act (ACA).

CMS will strengthen outreach and engagement with MAOs and stakeholders in the Marketplace through satisfaction surveys following contract-level (CON) RADV audit and Health Insurance Exchange training events. The survey results will help to determine stakeholders' level of satisfaction with trainings, identify any issues with training and technical assistance delivery, clarify stakeholders' needs and preferences, and define best practices for training and technical assistance. *Form Number:* CMS–10764 (OMB control number: 0938–NEW); *Frequency:* Occasionally; *Affected Public:* Private Sector; *Number of Respondents:* 4,270; *Total Annual Responses:* 4,270; *Total Annual Hours:* 1,068. (For questions regarding this collection contact Melissa Barkai at 410–786–4305.)

2. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of information Collection:* Disclosure of State Rating Requirements; *Use:* The final rule “Patient Protection and Affordable Care Act; Health Insurance Market Rules; Rate Review” implements sections 2701, 2702, and 2703 of the Public Health Service Act (PHS Act), as added and amended by the Affordable Care Act, and sections 1302(e) and 1312(c) of the Affordable Care Act. The rule directs that states submit to CMS certain information about state rating and risk pooling requirements for their individual, small group, and large group markets, as applicable. Specifically, states will inform CMS of age rating ratios that are narrower than 3:1 for adults; tobacco use rating ratios that are narrower than 1.5:1; a state-established uniform age curve; geographic rating areas; whether premiums in the small and large group market are required to

be based on average enrollee amounts (also known as composite premiums); and, in states that do not permit any rating variation based on age or tobacco use, uniform family tier structures and corresponding multipliers. In addition, states that elect to merge their individual and small group market risk pools into a combined pool will notify CMS of such election. This information will allow CMS to determine whether state-specific rules apply or Federal default rules apply. It will also support the accuracy of the federal risk adjustment methodology. *Form Number:* CMS–10454 (OMB control number 0938–1258); *Frequency:* Occasionally; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 3; *Total Annual Responses:* 3; *Total Annual Hours:* 17. (For policy questions regarding this collection contact Russell Tipps at 301–869–3502.)

3. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Quality Improvement Organization (QIO) Assumption of Responsibilities and Supporting Regulations; *Use:* The Peer Review Improvement Act of 1982 amended Title XI of the Social Security Act to create the Utilization and Quality Control Peer Review Organization (PRO) program which replaces the Professional Standards Review Organization (PSRO) program and streamlines peer review activities. The term PRO has been renamed Quality Improvement Organization (QIO). This information collection describes the review functions to be performed by the QIO. It outlines relationships among QIOs, providers, practitioners, beneficiaries, intermediaries, and carriers. *Form Number:* CMS–R–71 (OMB control number: 0938–0445); *Frequency:* Yearly; *Affected Public:* Business or other for-profit and Not-for-profit institutions; *Number of Respondents:* 6,939; *Total Annual Responses:* 972,478; *Total Annual Hours:* 1,034,655. (For policy questions regarding this collection contact Kimberly Harris at 401–837–1118.)

4. *Type of Information Collection Request:* Extension of a currently approved collection; *Titles of Information Collection:* ASC Forms for Medicare Program Certification; *Use:* The form CMS–370 titled “Health Insurance Benefits Agreement” is used for the purpose of establishing an ASC's eligibility for payment under Title XVIII of the Social Security Act (the “Act”). This agreement, upon acceptance by the Secretary of Health & Human Services, shall be binding on the ASC and the Secretary. The agreement may be

terminated by either party in accordance with regulations. In the event of termination of this agreement, payment will not be available for the ASC's services furnished to Medicare beneficiaries on or after the effective date of termination.

The CMS-377 form is used by ASCs to initiate both the initial and renewal survey by the State Survey Agency, which provides the certification required for an ASC to participate in the Medicare program. An ASC must complete the CMS-377 form and send it to the appropriate State Survey Agency prior to their scheduled accreditation renewal date. The CMS-377 form provides the State Survey Agency with information about the ASC facility's characteristics, such as, determining the size and the composition of the survey team on the basis of the number of ORs/procedure rooms and the types of surgical procedures performed in the ASC. *Form Numbers:* CMS-370 and CMS-377 (OMB control number: 0938-0266); *Frequency:* Occasionally; *Affected Public:* Private Sector—Business or other for-profit and Not-for-profit institutions; *Number of Respondents:* 1,567; *Total Annual Responses:* 1,567; *Total Annual Hours:* 1,012. (For policy questions regarding this collection contact Caroline Gallaher at 410-786-8705.)

5. Type of Information Collection
Request: Revision of a currently approved collection; *Title of Information Collection:* Home Health Agency Survey and Deficiencies Report; *Use:* In order to participate in the Medicare Program as a Home Health Agency (HHA) provider, the HHA must meet federal standards. This form is used to record information and patients' health and provider compliance with requirements and to report the information to the federal government. *Form Number:* CMS-1572 (OMB control number: 0938-0355); *Frequency:* Yearly; *Affected Public:* State, Local or Tribal Government; *Number of Respondents:* 3,833; *Total Annual Responses:* 3,833; *Total Annual Hours:* 1,917. (For policy questions regarding this collection contact Tara Lemons at 410-786-3030.)

6. Type of Information Collection
Request: Extension of a currently approved collection; *Title of Information Collection:* Disclosure Requirement for the In-Office Ancillary Services Exception; *Use:* Section 6003 of the Affordable Care Act (ACA) established a new disclosure requirement that a physician must perform for certain imaging services to meet the in-office ancillary services exception to the prohibition of the physician self-referral law. This section

of the ACA amended section 1877(b)(2) of the Act by adding a requirement that the referring physician informs the patient, at the time of the referral and in writing, that the patient may receive the imaging service from another supplier.

Physicians who provide certain imaging services (MRI, CT, and PET) under the in-office ancillary services exception to the physician self-referral prohibition are required to provide the disclosure notice as well as the list of other imaging suppliers to the patient. The patient will then be able to use the disclosure notice and list of suppliers in making an informed decision about his or her course of care for the imaging service.

CMS would use the collected information for enforcement purposes. Specifically, if we were investigating the referrals of a physician providing advanced imaging services under the in-office ancillary services exception, we would review the written disclosure in order to determine if it satisfied the requirement. *Form Number:* CMS-10332 (OMB control number: 0938-1133); *Frequency:* Occasionally; *Affected Public:* Private Sector, Business or other for-profits, Not-for-profits institutions; *Number of Respondents:* 2,239; *Total Annual Responses:* 989,971; *Total Annual Hours:* 18,694. (For questions regarding this collection contact Laura Dash at 410-786-8623.)

Dated: November 16, 2020.

William N. Parham, III,

Director, Paperwork Reduction Staff, Office of Strategic Operations and Regulatory Affairs.

BILLING CODE 4120-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Proposed Information Collection Activity; Addition of New Instruments to Existing Information Collections by the Office of Refugee Resettlement (OMB #s: 0970-0553, 0970-0554, and 0970-0547)

AGENCY: Office of Refugee Resettlement, Administration for Children and Families, Department of Health and Human Services.

ACTION: Request for public comment.

SUMMARY: The Office of Refugee Resettlement (ORR), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS), is inviting public

comments on several proposed instruments. The instruments will be added to the following existing information collections: Services Provided to Unaccompanied Alien Children (OMB #0970-0553), Placement and Transfer of Unaccompanied Alien Children into ORR Care Provider Facilities (OMB #0970-0554), and Administration and Oversight of the Unaccompanied Alien Children Program (OMB #0970-0547).

DATES: *Comments due within 60 days of publication.* In compliance with the requirements of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described in this notice.

ADDRESSES: Copies of the proposed collection of information can be obtained and comments may be forwarded by emailing infocollection@acf.hhs.gov. Alternatively, copies can also be obtained by writing to the Administration for Children and Families, Office of Planning, Research and Evaluation (OPRE), 330 C Street SW, Washington, DC 20201, Attn: ACF Reports Clearance Officer. All requests, emailed or written, should be identified by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: The components of these requests and the existing information collections to which each component will be added are as follows:

Services Provided to Unaccompanied Alien Children Into ORR Care Provider Facilities (OMB #0970-0553)

1. Admission: This instrument is used by ORR grantee case managers and clinicians to document the UAC's initial needs, functioning, and history. The Admission Details tab includes a case status timeline; biographic information on the UAC; admission and educational information; medical clearance information; influx transfer information, if applicable; system-generated information; a clickable, auto-generated list of *Admission Assessments* and the ability to create a new assessment; a clickable, auto-generated list of *Transfer Requests* and the ability to create a new transfer requests, if applicable; and a clickable, auto-generated list of *Long Term Foster Care (LTFC) Travel Requests* and the ability to create a new transfer requests, if applicable. The Related tab includes areas to upload case management, education, and medical documents; an area to add Entry Team members (individuals granted read/write access to the Admission instrument); and an auto-generated list of changes made to the

Admission instrument. The Call Logs tab includes a clickable, auto-generated list of calls and the ability to add a new call to the log.

2. *Home Study/Post-Release Services (HS/PRS) Primary Provider Entity*: This instrument is used by ORR grantee HS/PRS providers to add identifying information about their organization into the UAC Path system. Each organization only needs to be created once. Field values may be updated as often as needed.

3. *Home Study/Post-Release Services (HS/PRS) Subcontractor Entity*: This instrument is used by ORR grantee HS/PRS providers to add identifying information about their sub-grantee organizations into the UAC Path system and link them to their *HS/PRS Primary Provide Entity* record. Each organization only needs to be created once. Field values may be updated as often as needed.

4. *Home Study/Post-Release Services (HS/PRS) Primary Provider Profile*: This instrument is used by primary HS/PRS providers to add identifying information about caseworkers employed by their organization. Each individual only needs to be entered once. Field values may be updated as often as needed.

5. *Home Study/Post-Release Services (HS/PRS) Subcontractor Profile*: This instrument is used by primary HS/PRS providers to add identifying information about caseworkers employed their sub-grantee organizations. Each individual only needs to be entered once. Field values may be updated as often as needed.

6. *Home Study/Post-Release Services (HS/PRS) Referral*: This instrument is used by case managers to refer a UAC for a home study and/or post-release services. The Referral Details tab includes biographic information on the UAC; areas to enter information about

the HS/PRS referral, referring program, sponsor, HS/PRS provider, and disposition of the case; an area to add Entry Team members (individuals granted read/write access to the referral); an area to upload related documents; a clickable, auto-generated list of HS/PRS referral assessments and the ability to create a new assessment; an auto-generated list of changes made to the referral; and a clickable, auto-generated list of related entries/records. The Related tab includes clickable, auto-generated lists of sponsor HS/PRS referrals, related UAC contacts, related UAC HS/PRS referrals, and related records/entries.

7. *Post-Release Services (PRS) Event*: This instrument is used by ORR grantee post-release service caseworkers to document referrals made and services provided at critical junctures of service provision, such as 14-day, 6-month, 12-month, and closure. The instrument contains auto-populated sponsor information and areas to document information about the HS/PRS provider, reason for referral, the minor's placement and safety status, and services areas addressed.

8. *UAC Authorized/Restricted Call List and Call Log*: This instrument is used by grantee case managers to create a list of authorized and restricted contacts to ensure safe communication for the UAC and document the details of phone calls made by a UAC.

9. *Case Manager Call Log and Case Notes*: This instrument is used by case managers to log any contact (in-person, phone, video, social media, or mail) they make in relation to the UAC's case, including any related notes.

10. *Ohio Youth Assessment System (OYAS) Reentry Tool*: This instrument was created by the University of Cincinnati Corrections Institute and consists of an Interview Guide, Self-

Report Questionnaire, and Score Sheet. The tool is a risk/needs assessment used by case managers in secure and staff secure facilities to assess UAC for readiness to transition into the community and measure the UAC's progress while in ORR custody.

Placement and Transfer of Unaccompanied Alien Children Into ORR Care Provider Facilities (OMB #0970-0554)

1. *Family Group Entity*: This instrument is used by the ORR Intakes Team to associate UACs who are member of the same family with each other.

2. *Influx Transfer Manifest*: This instrument is used by designated care provider and ORR staff to plan, track, and notify stakeholders of group transfers to an influx care facility.

3. *Influx Transfer Manual and Prescreen Criteria Review*: This instrument is used by designated care provider staff to evaluate each UAC's eligibility to be transferred to an influx care facility. Care provider staff review and update information on daily during times of influx. The status in the prescreen criteria section is auto-populated based on information in the UAC's profile and may be overridden if requested by ORR.

Administration and Oversight of the Unaccompanied Alien Children Program (OMB #0970-0547)

1. *Notification of Concern*: This instrument is used by home study and post-release service caseworkers, care provider case managers, and the ORR National Call Center to notify ORR of certain concerns that arise after a UAC is released from ORR custody.

Respondents: ORR grantee and contractor staff, UAC, and sponsors.

Annual Burden Estimates:

SERVICES PROVIDED TO UNACCOMPANIED ALIEN CHILDREN [OMB #0970-0553]

Instrument	Annual total number of respondents	Annual total number of responses per respondent	Average burden minutes per response	Annual total burden hours
Admission	216	278	20	20,016
Case Manager Call Log and Case Notes	216	8,426	5	151,668
Home Study/Post-Release Services Primary Provider Entity	9	1	10	2
Home Study/Post-Release Services Primary Provider Profile	9	13	10	20
Home Study/Post-Release Services Subcontractors Entity	51	1	10	9
Home Study/Post-Release Services Subcontractors Profile	51	13	10	111
Home Study/Post-Release Services (HS/PRS) Referral	216	68	15	3,672
Ohio Youth Assessment System (OYAS) Reentry Tool	506	3	75	1,898
Post-Release Services Event	60	968	60	58,080
UAC Authorized/Restricted Call List and Call Log	216	6,981	5	125,658
Estimated Annual Burden Hours Total				361,132

PLACEMENT AND TRANSFER OF UNACCOMPANIED ALIEN CHILDREN INTO ORR CARE PROVIDER FACILITIES
[OMB #0970-0554]

Instrument	Annual total number of respondents	Annual total number of responses per respondent	Average burden minutes per response	Annual total burden hours
Family Group Entity	16	188	5	251
Influx Transfer Manifest	3	12	20	12
Influx Transfer Manual and Prescreen Criteria Review	216	43,333	30	4,679,964
Estimated Annual Burden Hours Total				4,680,227

ADMINISTRATION AND OVERSIGHT OF THE UNACCOMPANIED ALIEN CHILDREN PROGRAM
[OMB #0970-0547]

Instrument	Annual total number of respondents	Annual total number of responses per respondent	Average burden minutes per response	Annual total burden hours
Notification of Concern	301	15	15	1,129
Estimated Annual Burden Hours Total				1,129

Comments: The Department specifically requests comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

BILLING CODE 4184-45-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Administration for Children and Families

Expedited OMB Review and Public Comment: Community Services Block Grant (CSBG) Annual Report (OMB #0970-0492)

AGENCY: Office of Community Services, Administration for Children and

Families, Department of Health and Human Services.

ACTION: Request for public comment.

SUMMARY: The Office of Community Services (OCS), Administration for Children and Families (ACF), U.S. Department of Health and Human Services (HHS), is requesting expedited review of an information collection request from the Office of Management and Budget (OMB) and is inviting public comments on the proposed collection of data for the new Community Services Block Grant (CSBG) CARES Act Supplemental and CSBG Disaster Supplemental funding. This information will be collected through modified versions of the currently approved CSBG Annual Report (OMB #0970-0492, expiration 2/28/2023).

DATES: *Comments due within 60 days of publication.* In compliance with the requirements of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, ACF is soliciting public comment on the specific aspects of the information collection described in this notice.

ADDRESSES: Copies of the proposed collection of information can be obtained and comments may be forwarded by emailing infocollection@acf.hhs.gov. Alternatively, copies can also be obtained by writing to the ACF, Office of Planning, Research, and Evaluation (OPRE), 330 C Street SW, Washington, DC 20201, Attn: ACF Reports Clearance Officer. All requests,

emailed or written, should be identified by the title of the information collection.

SUPPLEMENTARY INFORMATION:

Description: ACF is requesting that OMB grant a 180-day approval for this request under procedures for expedited processing. A request for review under normal procedures will be submitted within 180 days of the approval for this request. Any edits resulting from public comment will be incorporated into the submission under normal procedures. The CSBG Supplemental Annual Reports include modified versions of Modules 1, 2, and 4. Module 1 is modified to align with CSBG Disaster Supplemental and CSBG CARES State Plans and to help reduce the burden to the states. OCS modified Modules 2 and 4 to collect specific data for the supplemental funding and to reduce burden, including the removal of questions that were not pertinent to the data collection for the Supplemental Reports. OCS made additional technical modifications including minor wording, headings, and numbering revisions. Respondents are only expected to submit Module 3 once through the current CSBG Annual Report; OCS made technical revisions to allow respondents to confirm which funding source they are using—CSBG, CARES, or Disaster.

Respondents: State governments, including the District of Columbia and the Commonwealth of Puerto Rico, and U.S. territories and CSBG eligible entities (Community Action Agencies).

ANNUAL BURDEN ESTIMATES

Instrument	Total number of respondents	Total number of responses per respondent	Average burden hours per response	Total burden hours	Annual burden hours
CSBG Annual Report (States)	52	3	198	30,088	10,029
CSBG Annual Report (Eligible Entities)	1,009	3	697	2,109,819	703,273
CSBG CARES Supplemental Annual Report (States)	52	3	107	16,692	5,564
CSBG CARES Annual Report (Eligible Entities)	1,009	3	493	1,492,311	497,437
CSBG Disaster Supplemental Annual Report (States)	15	3	95	4,275	1,425
CSBG Disaster Supplemental Annual Report (Eligible Entities)	50	3	476	71,400	23,800

Estimated Total Annual Burden Hours: 1,241,528.

Comments: The Department specifically requests comments on (a) whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology. Consideration will be given to comments and suggestions submitted within 60 days of this publication.

Authority: 112 Stat. 2729; 42 U.S.C. 9902(2).

Mary B. Jones,

ACF/OPRE Certifying Officer.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2007-D-0369]

Product-Specific Guidances; Draft and Revised Draft Guidances for Industry; Availability

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice of availability.

SUMMARY: The Food and Drug Administration (FDA or Agency) is announcing the availability of additional draft and revised draft product-specific guidances. The guidances provide product-specific recommendations on, among other things, the design of bioequivalence (BE) studies to support abbreviated new

drug applications (ANDAs). In the **Federal Register** of June 11, 2010, FDA announced the availability of a guidance for industry entitled "Bioequivalence Recommendations for Specific Products" that explained the process that would be used to make product-specific guidances available to the public on FDA's website. The guidances identified in this notice were developed using the process described in that guidance.

DATES: Submit either electronic or written comments on the draft guidances by January 19, 2021 to ensure that the Agency considers your comment on these draft guidances before it begins work on the final versions of the guidances.

ADDRESSES: You may submit comments on any guidance at any time as follows:

Electronic Submissions

Submit electronic comments in the following way:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. Follow the instructions for submitting comments. Comments submitted electronically, including attachments, to <https://www.regulations.gov> will be posted to the docket unchanged. Because your comment will be made public, you are solely responsible for ensuring that your comment does not include any confidential information that you or a third party may not wish to be posted, such as medical information, your or anyone else's Social Security number, or confidential business information, such as a manufacturing process. Please note that if you include your name, contact information, or other information that identifies you in the body of your comments, that information will be posted on <https://www.regulations.gov>.

- If you want to submit a comment with confidential information that you do not wish to be made available to the public, submit the comment as a written/paper submission and in the

manner detailed (see "Written/Paper Submissions" and "Instructions").

Written/Paper Submissions

Submit written/paper submissions as follows:

- **Mail/Hand Delivery/Courier (for written/paper submissions):** Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852.

- For written/paper comments submitted to the Dockets Management Staff, FDA will post your comment, as well as any attachments, except for information submitted, marked and identified, as confidential, if submitted as detailed in "Instructions."

Instructions: All submissions received must include the Docket No. FDA-2007-D-0369 for "Product-Specific Guidances; Draft and Revised Draft Guidances for Industry." Received comments will be placed in the docket and, except for those submitted as "Confidential Submissions," publicly viewable at <https://www.regulations.gov> or at the Dockets Management Staff between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

- **Confidential Submissions—**To submit a comment with confidential information that you do not wish to be made publicly available, submit your comments only as a written/paper submission. You should submit two copies total. One copy will include the information you claim to be confidential with a heading or cover note that states "THIS DOCUMENT CONTAINS CONFIDENTIAL INFORMATION." The Agency will review this copy, including the claimed confidential information, in its consideration of comments. The second copy, which will have the claimed confidential information redacted/blacked out, will be available for public viewing and posted on <https://www.regulations.gov>. Submit both copies to the Dockets Management Staff. If you do not wish your name and contact information to be made publicly available, you can provide this

information on the cover sheet and not in the body of your comments and you must identify this information as “confidential.” Any information marked as “confidential” will not be disclosed except in accordance with 21 CFR 10.20 and other applicable disclosure law. For more information about FDA’s posting of comments to public dockets, see 80 FR 56469, September 18, 2015, or access the information at: <https://www.govinfo.gov/content/pkg/FR-2015-09-18/pdf/2015-23389.pdf>.

Docket: For access to the docket to read background documents or the electronic and written/paper comments received, go to <https://www.regulations.gov> and insert the docket number, found in brackets in the heading of this document, into the “Search” box and follow the prompts and/or go to the Dockets Management Staff, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

You may submit comments on any guidance at any time (see 21 CFR 10.115(g)(5)).

Submit written requests for single copies of the draft guidances to the Division of Drug Information, Center for Drug Evaluation and Research, Food and Drug Administration, 10001 New Hampshire Ave., Hillandale Building, 4th Floor, Silver Spring, MD 20993-0002. Send one self-addressed adhesive label to assist that office in processing your requests. See the **SUPPLEMENTARY INFORMATION** section for electronic access to the draft guidance documents.

FOR FURTHER INFORMATION CONTACT: Mara Miller, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New Hampshire Ave., Bldg. 75, Rm. 4709C, Silver Spring, MD 20993-0002, 301-796-0683.

SUPPLEMENTARY INFORMATION:

I. Background

In the **Federal Register** of June 11, 2010 (75 FR 33311), FDA announced the availability of a guidance for industry entitled “Bioequivalence Recommendations for Specific Products” that explained the process that would be used to make product-specific guidances available to the public on FDA’s website at <https://www.fda.gov/Drugs/GuidanceComplianceRegulatoryInformation/Guidances/default.htm>.

As described in that guidance, FDA adopted this process as a means to develop and disseminate product-specific guidances and provide a meaningful opportunity for the public to consider and comment on those guidances. Under that process, draft

guidances are posted on FDA’s website and announced periodically in the **Federal Register**. The public is encouraged to submit comments on those recommendations within 60 days of their announcement in the **Federal Register**. FDA considers any comments received and either publishes final guidances or publishes revised draft guidances for comment. Guidances were last announced in the **Federal Register** on August 26, 2020. This notice announces draft product-specific guidances, either new or revised, that are posted on FDA’s website.

II. Drug Products For Which New Draft Product-Specific Guidances Are Available

FDA is announcing the availability of new draft product-specific guidances for industry for drug products containing the following active ingredients:

TABLE 1—NEW DRAFT PRODUCT-SPECIFIC GUIDANCES FOR DRUG PRODUCTS

Active ingredient(s)
Ceritinib
Clobazam
Crofelemer
Diazepam
Epinephrine
Fluorodopa F-18
Lefamulin acetate
Naloxone hydrochloride; Oxycodone hydrochloride
Pretomanid
Prochlorperazine maleate
Tafamidis
Tafamidis meglumine
Vancomycin hydrochloride

III. Drug Products For Which Revised Draft Product-Specific Guidances Are Available

FDA is announcing the availability of revised draft product-specific guidances for industry for drug products containing the following active ingredients:

TABLE 2—REVISED DRAFT PRODUCT-SPECIFIC GUIDANCES FOR DRUG PRODUCTS

Active ingredient(s)
Azelaic acid
Budesonide
Bupropion hydrochloride; Naltrexone hydrochloride
Calcipotriene
Clobetasol propionate
Desonide
Erythromycin ethylsuccinate (multiple referenced listed drugs)
Erythromycin ethylsuccinate; Sulfisoxazole acetyl

TABLE 2—REVISED DRAFT PRODUCT-SPECIFIC GUIDANCES FOR DRUG PRODUCTS—Continued

Active ingredient(s)
Fluphenazine hydrochloride
Hydrocortisone acetate
Isotretinoin (multiple referenced listed drugs)
Levorphanol tartrate
Lomitapide mesylate
Methylphenidate hydrochloride
Pimavanserin tartrate
Propranolol hydrochloride (multiple referenced listed drugs)
Tofacitinib citrate

For a complete history of previously published **Federal Register** notices related to product-specific guidances, go to <https://www.regulations.gov> and enter Docket No. FDA-2007-D-0369.

These draft guidances are being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). These draft guidances, when finalized, will represent the current thinking of FDA on, among other things, the product-specific design of BE studies to support ANDAs. They do not establish any rights for any person and are not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations.

IV. Paperwork Reduction Act of 1995

FDA tentatively concludes that this draft guidance contains no collection of information. Therefore, clearance by the Office of Management and Budget under the Paperwork Reduction Act of 1995 is not required.

V. Electronic Access

Persons with access to the internet may obtain the draft guidances at either <https://www.fda.gov/drugs/guidance-compliance-regulatory-information/guidances-drugs> or <https://www.regulations.gov>.

Dated: November 13, 2020.

Lauren K. Roth,

Acting Principal Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. FDA-2020-N-1394]

Richard M. Simon: Final Debarment Order

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA or Agency) is issuing an order under the Federal Food, Drug, and Cosmetic Act (FD&C Act) permanently debarring Richard M. Simon from providing services in any capacity to a person that has an approved or pending drug product application. FDA bases this order on a finding that Richard M. Simon was convicted of a felony under Federal law for conduct that relates to the regulation of a drug product under the FD&C Act. Mr. Simon was given notice of the proposed permanent debarment and an opportunity to request a hearing to show why he should not be debarred. As of August 6, 2020 (30 days after receipt of the notice), Mr. Simon had not responded. Mr. Simon's failure to respond and request a hearing constitutes a waiver of his right to a hearing concerning this action.

DATES: This order is applicable November 19, 2020.

ADDRESSES: Submit applications for special termination of debarment to the Dockets Management Staff (HFA-305), Food and Drug Administration, 5630 Fishers Lane, Rm. 1061, Rockville, MD 20852, 240-402-7500.

FOR FURTHER INFORMATION CONTACT: Jaime Espinosa, (ELEM-4029) Division of Enforcement, Office of Strategic Planning and Operational Policy, Office of Regulatory Affairs, Food and Drug Administration, 12420 Parklawn Dr., Rockville, MD 20857, *debarments@fda.hhs.gov*, or at 240-402-8743.

SUPPLEMENTARY INFORMATION:**I. Background**

Section 306(a)(2)(B) of the FD&C Act (21 U.S.C. 335a(a)(2)(B)) requires debarment of an individual from providing services in any capacity to a person that has an approved or pending drug product application if FDA finds that the individual has been convicted of a felony under Federal law for conduct relating to the regulation of any drug product under the FD&C Act. On January 21, 2020, Mr. Simon was convicted as defined in section 306(l)(1) of the FD&C Act when judgment was entered against him in the U.S. District Court for the District of Massachusetts, after a jury verdict, on one count of Racketeering Conspiracy in violation of 18 U.S.C. 1962(d). The pattern of racketeering activity he was convicted of included engaging in multiple acts of mail fraud (18 U.S.C. 1341) and wire fraud (18 U.S.C. 1343).

The factual basis for this conviction is as follows: Mr. Simon held executive

management positions, including Regional Sales Manager for the Southeast Region and Vice President of Sales, of Insys Therapeutics Inc. (Insys), a Delaware Corporation, with headquarters in Chandler, Arizona. Insys developed and owned a drug called SUBSYS, a liquid formulation of fentanyl to be applied under the tongue. FDA approved SUBSYS for the management of breakthrough pain in adult cancer patients who are already receiving and are already tolerant to opioid therapy for their underlying persistent cancer pain. From early 2012 and continuing through 2015, Mr. Simon participated in a conspiracy whereby employees of Insys bribed medical practitioners in various states to get those practitioners to increase prescribing SUBSYS to their patients, many of whom did not have cancer. Mr. Simon, along with his co-conspirators, measured the effect of these bribes on each practitioner's prescribing habits and on the revenue that each bribed practitioner generated for Insys. Mr. Simon, along with his co-conspirators, reduced or eliminated bribes paid to those practitioners who failed to meet the minimum prescription requirements or failed to generate enough revenue to justify additional bribes.

As a result of this conviction, FDA sent Mr. Simon by certified mail on August 3, 2020, a notice proposing to permanently debar him from providing services in any capacity to a person that has an approved or pending drug product application. The proposal was based on a finding, under section 306(a)(2)(B) of the FD&C Act, that Mr. Simon was convicted of a felony under Federal law for conduct relating to the regulation of a drug product under the FD&C Act. The proposal also offered Mr. Simon an opportunity to request a hearing, providing him 30 days from the date of receipt of the letter in which to file the request, and advised him that failure to request a hearing constituted an election not to use the opportunity for a hearing and a waiver of any contentions concerning this action. Mr. Simon received the proposal on August 7, 2020. He did not request a hearing within the timeframe prescribed by regulation and has, therefore, waived his opportunity for a hearing and any contentions concerning his debarment (21 CFR part 12).

II. Findings and Order

Therefore, the Assistant Commissioner, Office of Human and Animal Food Operations, under section 306(a)(2)(B) of the FD&C Act, under authority delegated to the Assistant Commissioner, finds that Mr. Simon has

been convicted of a felony under Federal law for conduct otherwise relating to the regulation of a drug product under the FD&C Act.

As a result of the foregoing finding, Mr. Simon, is permanently debarred from providing services in any capacity to a person with an approved or pending drug product application, effective (see **DATES**) (see section 306(a)(2)(B) and (c)(2)(A)(ii) of the FD&C Act). Any person with an approved or pending drug product application who knowingly employs or retains as a consultant or contractor, or otherwise uses the services of Mr. Simon, in any capacity, during his debarment, will be subject to civil money penalties (section 307(a)(6) of the FD&C Act (21 U.S.C. 335b(a)(6))). If Mr. Simon provides services in any capacity to a person with an approved or pending drug product application during his period of debarment, he will be subject to civil money penalties (section 307(a)(7) of the FD&C Act). In addition, FDA will not accept or review any abbreviated new drug application from Mr. Simon during his period of debarment, other than in connection with an audit under section 306(c)(1)(B) of the FD&C Act. Note that, for purposes of section 306 of the FD&C Act, a "drug product" is defined as a drug subject to regulation under section 505, 512, or 802 of the FD&C Act (21 U.S.C. 355, 360b, or 382) or under section 351 of the Public Health Service Act (42 U.S.C. 262) (see section 201(dd) of the FD&C Act (21 U.S.C. 321(dd))).

Any application by Mr. Simon for special termination of debarment under section 306(d)(4) of the FD&C Act should be identified with Docket No. FDA-2020-N-1394 and sent to the Dockets Management Staff (see **ADDRESSES**). The public availability of information in these submissions is governed by 21 CFR 10.20.

Publicly available submissions will be placed in the docket and will be viewable at <https://www.regulations.gov> or at the Dockets Management Staff (see **ADDRESSES**) between 9 a.m. and 4 p.m., Monday through Friday, 240-402-7500.

Dated: November 16, 2020.

Lauren K. Roth,

Acting Principal Associate Commissioner for Policy.

BILLING CODE 4164-01-P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Health Resources and Services Administration

Agency Information Collection Activities: Proposed Collection: Public Comment Request Information Collection Request Title: Rural Health Network Development Program; OMB No. 0906-0010—Revision

AGENCY: Health Resources and Services Administration (HRSA), Department of Health and Human Services.

ACTION: Notice.

SUMMARY: In compliance with the requirement for opportunity for public comment on proposed data collection projects of the Paperwork Reduction Act of 1995, HRSA announces plans to submit an Information Collection Request (ICR), described below, to the Office of Management and Budget (OMB). Prior to submitting the ICR to OMB, HRSA seeks comments from the public regarding the burden estimate, below, or any other aspect of the ICR.

DATES: Comments on this ICR should be received no later than January 19, 2021.

ADDRESSES: Submit your comments to paperwork@hrsa.gov or mail the HRSA Information Collection Clearance Officer, Room 14N136B, 5600 Fishers Lane, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of the data collection plans and draft instruments, email paperwork@hrsa.gov or call Lisa Wright-Solomon, the HRSA Information Collection Clearance Officer at (301) 443-1984.

SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference.

Information Collection Request Title: Rural Health Network Development Program OMB No. 0906-0010—Revision.

Abstract: The Rural Health Network Development Program (RHND) is authorized under Section 330A(e) of the Public Health Service Act (42 U.S.C. 254(e)). The purpose of this program is to support integrated rural health care networks that have combined the functions of the entities participating in the network to address the health care needs of the targeted rural community. Recipients will combine the functions of the entities participating in the network to address the following legislative aims: (i) Achieve efficiencies; (ii) expand access, coordinate, and improve the quality of essential health care services; and (iii) strengthen the rural health care system as a whole.

RHND-funded programs promote population health management and the transition towards value based care through diverse network membership that includes traditional and non-traditional network partners. Evidence of program impacted demonstrated by outcome data and program sustainability are integral components of the program. This is a 3-year competitive program for networks composed of at least three members that are separate, existing health care providers or entities.

Need and Proposed Use of the Information: This program needs measures that will enable HRSA to provide aggregate program data required by Congress under the Government Performance and Results Act of 1993. These measures cover the principal topic areas of interest to the Federal Office of Rural Health Policy, including: (a) Access to care; (b) population demographics; (c) staffing; (d) consortium/network; (e) sustainability; and (f) project specific domains. All measures will evaluate the Federal

Office of Rural Health Policy (FORHP's) progress toward achieving its goals.

The proposed changes of RHND measures are a result of the accumulation of grantee feedback, peer-reviewed research, and information gathered from the previously approved RHND measures. The proposed changes include additional questions surrounding the network's components of sustainability. Questions surrounding Health Information Technology (HIT) and Telehealth have been modified to reflect updated knowledge on the use of both HIT and Telehealth and to improve understanding of how these important technologies are affecting HRSA grantees. Additional National Quality Forum measures were also included in an effort to allow uniform collection efforts throughout FORHP. In addition, the total number of responses has decreased to 44 since the previous ICR submission. This is due to a new RHND grant cycle with a decreased number of awardees and therefore a decreased number of respondents.

Likely Respondents: Respondents will be awardees of the Rural Health Network Development Program.

Burden Statement: Burden in this context means the time expended by persons to generate, maintain, retain, disclose or provide the information requested. This includes the time needed to review instructions; to develop, acquire, install, and utilize technology and systems for the purpose of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; to train personnel and to be able to respond to a collection of information; to search data sources; to complete and review the collection of information; and to transmit or otherwise disclose the information. The total annual burden hours estimated for this ICR are summarized in the table below.

TOTAL ESTIMATED ANNUALIZED BURDEN HOURS

Form name	Number of respondents	Number of responses per respondent	Total responses	Average burden per response (in hours)	Total burden hours
Performance Improvement and Measurement System Database	44	1	44	6	264
Total	44	44	264

HRSA specifically requests comments on (1) the necessity and utility of the proposed information collection for the proper performance of the agency's functions, (2) the accuracy of the

estimated burden, (3) ways to enhance the quality, utility, and clarity of the information to be collected, and (4) the use of automated collection techniques or other forms of information

technology to minimize the information collection burden.

Maria G. Button,

Director, Executive Secretariat.

BILLING CODE 4140-01-P

DEPARTMENT OF HOMELAND SECURITY

[Docket Number DHS-2020-0047]

Agency Information Collection Activities: DHS Civil Rights Evaluation Tool 1601-0024, DHS Form 3095

AGENCY: Department of Homeland Security, (DHS).

ACTION: 60-Day notice and request for comments; extension without change of a currently approved collection, 1601-0024.

SUMMARY: The Department of Homeland Security, will submit the following Information Collection Request (ICR) to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995.

DATES: Comments are encouraged and will be accepted until January 19, 2021. This process is conducted in accordance with 5 CFR 1320.1.

ADDRESSES: You may submit comments, identified by docket number Docket # DHS-2020-0047, at:

○ *Federal eRulemaking Portal:* <http://www.regulations.gov>. Please follow the instructions for submitting comments.

Instructions: All submissions received must include the agency name and docket number Docket # DHS-2020-0047. All comments received will be posted without change to <http://www.regulations.gov>, including any personal information provided.

Docket: For access to the docket to read background documents or comments received, go to <http://www.regulations.gov>.

SUPPLEMENTARY INFORMATION: Recipients of federal financial assistance from the Department of Homeland Security (DHS) are required to meet certain legal requirements relating to nondiscrimination and nondiscriminatory use of federal funds. Those requirements include ensuring that entities receiving Federal financial

assistance from the Department of Homeland Security do not deny benefits or services, or otherwise discriminate on the basis of race, color, national origin, disability, age, sex, or religion, in accordance with the following authorities:

- Title VI of the Civil Rights Act of 1964 (Title VI) Public Law 88-352, 42 U.S.C. 2000d-1 *et seq.*, and the Department's implementing regulation, 6 CFR part 21 and 44 CFR part 7, which prohibit discrimination on the grounds of race, color, or national origin by recipients of Federal financial assistance. Title VI, through its prohibition against discrimination on the basis of national origin, requires recipients to take reasonable steps to provide meaningful access to persons who are limited English proficient (LEP). *See Guidance to Federal Financial Assistance Recipients Regarding Title VI Prohibition Against National Origin Discrimination Affecting Limited English Proficient Persons*, 76 FR 21755-21768 (April 18, 2011).

- Section 504 of the Rehabilitation Act of 1973 (Section 504), Public Law 93-112, as amended by Public Law 93-516, 29 U.S.C. 794, which prohibits discrimination on the basis of disability by recipients of Federal financial assistance.

- Title IX of the Education Amendments of 1972 (Title IX), 20 U.S.C. 1681 *et seq.*, and the Department's implementing regulations, 6 CFR part 17, and 44 CFR part 19, which prohibits discrimination on the basis of sex in education program and activities received Federal financial assistance.

- Age Discrimination Act of 1975, Public Law 94-135, 42 U.S.C. Section 6101 *et seq.*, and the Department implementing regulation at 44 CFR part 7, which prohibits discrimination on the basis of age by recipients of Federal financial assistance.

- U.S. Department of Homeland Security regulation 6 CFR part 19, which prohibits organizations that receive financial assistance from DHS for a social service program from discriminating against beneficiaries on the basis of religion or religious belief, a refusal to hold a religious belief, or a refusal to attend or participate in a religious practice.

The aforementioned civil rights authorities also prohibit retaliatory acts against individuals for participating or opposing discrimination in a complaint, investigation, or other proceeding related to prohibited discrimination.

DHS has an obligation to enforce nondiscrimination requirements to

ensure that its federally assisted programs and activities are administered in a nondiscriminatory manner. In order to carry out its enforcement responsibilities, DHS must obtain a signed assurance of compliance and collect and review information from recipients to ascertain their compliance with applicable requirements. DHS implementing regulations and the Department of Justice (DOJ) regulation *Coordination of Non-discrimination in Federally Assisted Program*, 28 CFR part 42, provide for the collection of data and information from recipients (see 28 CFR 42.406).

DHS uses DHS Form 3095: DHS Civil Rights Evaluation Tool as the primary tool to implement this information collection. DHS is seeking an extension of the form for another three-year period. DHS is not proposing any changes to the information collected in the form but is proposing changes to Section 1 of the form on instructions to streamline the process for submitting the completed form.

DHS uses the form to collect civil rights related information from all recipients of federal financial assistance from the Department. Recipients are non-federal entities that receive federal financial assistance in the form of a grant, cooperative agreement, or other type of financial assistance directly from the Department and not through another recipient or "pass-through" entity. This information collection does not apply to subrecipients, federal contractors (unless the contract includes the provision of financial assistance), nor the ultimate beneficiaries of services, financial aid, or other benefits from the Department.

Recipients are required to provide the information 30 days from acceptance of award. Recipient of multiple awards of DHS financial assistance only submit one completed form for their organization, not per award. Recipient are required to complete the form once every two years if they have an active award, not every time a grant is awarded. Entities whose award does not run a full two years are required to provide the information again if they receive a subsequent award more than two (2) years after the prior award. In responding to *Section 4: Required Information*, which contains the bulk of the information collection, if the recipient's responses have not changed in the two year period since their initial submission, the recipient does not need to resubmit the information. Instead, the recipient will indicate "no change" for each applicable item.

The purpose of the information collection is to advise recipients of their

civil rights obligations and collect pertinent civil rights information to ascertain if the recipient has in place adequate policies and procedures to achieve compliance, and to determine what, if any, further action may be needed (technical assistance, training, compliance review, etc.) to ensure the recipient is able to meet its civil rights requirements and will carry out its programs and activities in a nondiscriminatory manner.

Over the past three years, DHS has used the information collected via the DHS Civil Rights Evaluation Tool to identify gaps and deficiencies in recipient programs and directly help recipients address these gaps and deficiencies by providing technical assistance on developing or improving policies and procedures to prevent discrimination and ensure accessibility.

DHS requires recipients to submit their completed forms and supporting information electronically, via email, to the Department, in an effort to minimize administrative burden on the recipient and the Department. DHS anticipates that records or files that will be used to respond to the information collection are already maintained in electronic format by the recipient, so providing the information electronically further minimizes administrative burden. DHS allows recipients to scan and submit documents that are not already maintained electronically.

If the recipient is unable to submit their information electronically, alternative arrangements will be made to submit responses in hard copy.

DHS is pursuing further streamlining of the submission process through development of an online portal that would allow recipients to submit the data directly in a fully electronic form and eliminate the need for recipients to email the form and supporting documents as attachments.

The information collection will impact some small entities (*e.g.*, non-profit service providers, local fire departments, etc.), however as described in response to Question 2, recipients will only be required to provide this information once every two years, not every time a grant is awarded. Additionally, in responding to Section 4: Required Information, if the recipient's responses have not changed in the two year period since their initial submission, the recipient does not need to resubmit the information. This will dramatically reduce the administrative burden on recipients after the initial submission. Additionally, DHS will further minimize burden on recipients by making available sample policies and procedures to assist recipients in

completing Section 4 of the Form, and providing technical assistance directly to the recipient as needed.

In accordance with the authorities identified in Question 1, the Department is required to obtain a signed assurance of compliance from recipients and to ensure that its federally assisted programs and activities are administered in a nondiscriminatory manner. If the information collection is not conducted or is conducted less frequently, the Department will not be able to fulfill its obligations to ascertain recipient compliance and enforce nondiscrimination in recipient programs. This could lead to the award of federal financial assistance to recipients that are not complying with federal civil rights law, and the perpetuation of discrimination in the provision of benefits and services to members of the public.

There are no confidentiality assurances associated with this collection. The only privacy-sensitive information the form collects are the names of Point of Contacts (POCs) from recipient organizations. Coverage for the collection of this information is provided under a Department Privacy Impact Assessment, DHS/ALL/PIA-006 General Contacts List.

DHS is seeking an extension of the form for another three-year period. DHS is not proposing any changes to the information collected in the form but is proposing changes to Section 1 of the form on instructions to streamline the process for submitting the completed form. The changes to Section 1 do not impact the burden analysis. The changes in costs in Item 14 reflect increased hourly rates for Federal staff as reported by Office of Personnel Management for 2020, as well as an increase in the number of staff participating in the review process. Despite these increases, because the number of recipients subject to the collection has decreased from the previous reporting period, the total costs reported in Item 13 and 14 have also decreased.

The Office of Management and Budget is particularly interested in comments which:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

3. Enhance the quality, utility, and clarity of the information to be collected; and

4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.*, permitting electronic submissions of responses.

Analysis

Agency: Department of Homeland Security, (DHS).

Title: DHS Civil Rights Evaluation Tool.

OMB Number: 1601-0024.

Frequency: On Occasion.

Affected Public: State, Local and Tribal Government.

Number of Respondents: 2929.

Estimated Time per Respondent: 1 Hour.

Total Burden Hours: 11716.

BILLING CODE 9112-FL-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-6210-N-02]

Notice of Regulatory Waiver Requests Granted for the Second Quarter of Calendar Year 2020

AGENCY: Office of the General Counsel, HUD.

ACTION: Notice.

SUMMARY: The Department of Housing and Urban Development Reform Act of 1989 (the HUD Reform Act) requires HUD to publish quarterly **Federal Register** notices of all regulatory waivers that HUD has approved. Each notice covers the quarterly period since the previous **Federal Register** notice. The purpose of this notice is to comply with the requirements of the HUD Reform Act. This notice contains a list of regulatory waivers granted by HUD during the period beginning on April 1, 2020 and ending on June 30, 2020.

FOR FURTHER INFORMATION CONTACT: For general information about this notice, contact Aaron Santa Anna, Associate General Counsel for Legislation and Regulations, Department of Housing and Urban Development, 451 7th Street SW, Room 10282, Washington, DC 20410-0500, telephone 202-708-5300 (this is not a toll-free number). Persons with

hearing- or speech-impairments may access this number through TTY by calling the toll-free Federal Relay Service at 800-877-8339.

For information concerning a particular waiver that was granted and for which public notice is provided in this document, contact the person whose name and address follow the description of the waiver granted in the accompanying list of waivers that have been granted in the second quarter of calendar year 2020.

SUPPLEMENTARY INFORMATION: Section 106 of the HUD Reform Act added a new section 7(q) to the Department of Housing and Urban Development Act (42 U.S.C. 3535(q)), which provides that:

1. Any waiver of a regulation must be in writing and must specify the grounds for approving the waiver;

2. Authority to approve a waiver of a regulation may be delegated by the Secretary only to an individual of Assistant Secretary or equivalent rank, and the person to whom authority to waive is delegated must also have authority to issue the particular regulation to be waived;

3. Not less than quarterly, the Secretary must notify the public of all waivers of regulations that HUD has approved, by publishing a notice in the **Federal Register**. These notices (each covering the period since the most recent previous notification) shall:

a. Identify the project, activity, or undertaking involved;

b. Describe the nature of the provision waived and the designation of the provision;

c. Indicate the name and title of the person who granted the waiver request;

d. Describe briefly the grounds for approval of the request; and

e. State how additional information about a particular waiver may be obtained.

Section 106 of the HUD Reform Act also contains requirements applicable to waivers of HUD handbook provisions that are not relevant to the purpose of this notice.

This notice follows procedures provided in HUD's Statement of Policy on Waiver of Regulations and Directives issued on April 22, 1991 (56 FR 16337). In accordance with those procedures and with the requirements of section 106 of the HUD Reform Act, waivers of regulations are granted by the Assistant Secretary with jurisdiction over the regulations for which a waiver was requested. In those cases in which a General Deputy Assistant Secretary granted the waiver, the General Deputy Assistant Secretary was serving in the

absence of the Assistant Secretary in accordance with the office's Order of Succession.

This notice covers waivers of regulations granted by HUD from April 1, 2020 through June 30, 2020. For ease of reference, the waivers granted by HUD are listed by HUD program office (for example, the Office of Community Planning and Development, the Office of Fair Housing and Equal Opportunity, the Office of Housing, and the Office of Public and Indian Housing, etc.). Within each program office grouping, the waivers are listed sequentially by the regulatory section of title 24 of the Code of Federal Regulations (CFR) that is being waived. For example, a waiver of a provision in 24 CFR part 58 would be listed before a waiver of a provision in 24 CFR part 570.

Where more than one regulatory provision is involved in the grant of a particular waiver request, the action is listed under the section number of the first regulatory requirement that appears in 24 CFR and that is being waived. For example, a waiver of both § 58.73 and § 58.74 would appear sequentially in the listing under § 58.73.

Waiver of regulations that involve the same initial regulatory citation are in time sequence beginning with the earliest-dated regulatory waiver.

Should HUD receive additional information about waivers granted during the period covered by this report (the second quarter of calendar year 2020) before the next report is published (the third quarter of calendar year 2020), HUD will include any additional waivers granted for the second quarter in the next report.

Accordingly, information about approved waiver requests pertaining to HUD regulations is provided in the Appendix that follows this notice.

The Principal Deputy General Counsel, Michael B. Williams, having reviewed and approved this document, is delegating the authority to electronically sign this document to submitter, Aaron Santa Anna, who is the Federal Register Liaison for HUD, for purposes of publication in the **Federal Register**.

Aaron Santa Anna,

Associate General Counsel for Legislation & Regulations.

Appendix

Listing of Waivers of Regulatory Requirements Granted by Offices of the Department of Housing and Urban Development April 1, 2020 Through June 30, 2020

Note to Reader: More information about the granting of these waivers, including a copy of the waiver request and approval, may be obtained by contacting the person whose

name is listed as the contact person directly after each set of regulatory waivers granted.

The regulatory waivers granted appear in the following order:

- I. Regulatory Waivers Granted by the Office of Community Planning and Development
- II. Regulatory Waivers Granted by the Government National Mortgage Association
- III. Regulatory Waivers Granted by the Office of Housing

I. Regulatory Waivers Granted by the Office of Community Planning and Development

For further information about the following regulatory waivers, please see the name of the contact person that immediately follows the description of the waiver granted.

- *Regulation:* 24 CFR 91.105(c)(2) and (k), 24 CFR 91.115(c)(2) and (i), and, 24 CFR 91.235(e) and 24 CFR 91.401.

Project/Activity: Citizen participation reasonable notice and opportunity to comment.

Nature of Requirement: The regulations set forth citizen participation requirements for participating jurisdictions. For substantial amendments to the consolidated plan, a participating jurisdiction to follow its citizen participation plan, which must state how reasonable notice and opportunity for public comment will be given.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: The waiver permits participating jurisdictions amending their consolidated plans as a result of the COVID-19 pandemic to reduce the comment period to 5 days. Given the unprecedented economic disruptions caused by the COVID-19 pandemic, participating jurisdictions may need to expeditiously reprogram HOME funds to activities that more directly meet their immediate housing needs. Requiring these participating jurisdictions to complete the required public comment period would cause undue delays in the face of urgent and growing need.

Applicability: The waiver is in effect for any necessary substantial amendments to Fiscal Year 2020 and earlier consolidated plans or action plans and to any approved Annual Action Plan being amended. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- *Regulation:* 24 CFR 91.105(c)(2) and (k), 24 CFR 91.115(c)(2) and (i), and, 24 CFR 91.235(e) and 24 CFR 91.401.

Project/Activity: Citizen participation reasonable notice and opportunity to comment.

Nature of Requirement: The regulations set forth citizen participation requirements for participating jurisdictions. For substantial amendments to the consolidated plan, a

participating jurisdiction to follow its citizen participation plan, which must state how reasonable notice and opportunity for public comment will be given.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: The waiver permits participating jurisdictions amending their consolidated plans as a result of the COVID-19 pandemic to reduce the comment period to 5 days. Given the unprecedented economic disruptions caused by the COVID-19 pandemic, requiring participating jurisdictions to complete the required public comment period would cause undue delays in commencing tenant-based rental assistance programs to address an urgent and growing need.

Applicability: The waiver applies to any approved Annual Action Plan being amended to reprogram funds to TBRA to address housing needs related to the COVID-19 pandemic. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

• *Regulations:* 24 CFR 91.220, 24 CFR 91.320.

Project/Activity: Housing and homeless needs assessment, housing market analysis, and strategic plan in Consolidated Plan, and action plans to the extent they are limited to a specific program year.

Nature of Requirement: 42 U.S.C. 12705(a)(2) requires that grantees submit and provide updates to a comprehensive housing affordability strategy, which contains a housing and homeless needs assessment, housing market analysis, and strategic plan, in order to receive CDBG funds. 24 CFR 91.220 for entitlement communities and 24 CFR 91.320 for states require that grantees incorporate the statutory comprehensive housing affordability strategy requirements in their annual action plans.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 9, 2020.

Reason Waived: To expedite grantees' use of CDBG-CV funds, HUD is waiving the requirements at 42 U.S.C. 12705(a)(2) to the extent it requires updates to the housing and homeless needs assessment, housing market analysis, and strategic plan, and 24 CFR 91.220 and 91.320 to the extent the action plan is limited to a specific program year to permit grantees to prepare substantial amendments to their most recent annual action plan, including their 2019 annual action plan.

Applicability: The statutory comprehensive housing affordability strategy requirements are waived to allow grantees to prepare substantial amendments to their most recent annual action plan. In their amended annual action plans, grantees must identify the proposed use of all funds and how the funds will be used to prevent, prepare for, and respond to coronavirus.

Contact: James Höemann, Office of Block Grant Assistance, Entitlement Communities Division, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7282, Washington, DC 20410, telephone (202) 402-5716.

• *Regulation:* 24 CFR 91.520(a).

Project/Activity: The Consolidated Annual Performance and Evaluation Report (performance report) submission to HUD within 90 days after the close of a jurisdiction's program year.

Nature of Requirement: The regulation at 24 CFR 91.520(a) requires each grantee to submit a performance report to HUD within 90 days after the close of the grantee's program year.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: May 7, 2020.

Reason Waived: Under the authority at 24 CFR 91.600, HUD is authorized to waive this requirement when a determination of good cause is made and supported by documentation. Given the outbreak of the coronavirus known as SARS-CoV-2 and the extenuating circumstances placed on state and local governments, and citizens, HUD has determined that there is good cause for waiving this provision. The extenuating circumstances and administrative strain supporting this waiver are well documented in the broad public news coverage related to the outbreak.

Applicability: For program year 2019 CAPERs, the requirement that grantees submit a performance report within 90 days after the close of a jurisdiction's program year is waived, subject to the condition that within 180 days after the close of a jurisdiction's program year the jurisdiction shall submit its performance report.

Contact: James Höemann, Office of Block Grant Assistance, Entitlement Communities Division, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7282, Washington, DC 20410, telephone (202) 402-5716.

• *Regulation:* 24 CFR 92.203(a)(1) and (2), and 24 CFR 92.64(a).

Project/Activity: Source documentation for HOME income determinations.

Nature of Requirement: The regulations require initial income determinations for HOME beneficiaries by examining source documentation covering the most recent two months.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: The waiver permits the participating jurisdiction to use self-certification of income in lieu of source documentation to determine eligibility for HOME assistance of persons requiring emergency assistance related to COVID-19. Many families affected by actions taken to reduce the spread of COVID-19, such as business closures resulting in loss of employment or lay-offs, will not have documentation that accurately reflects current income and will not be able to

qualify for HOME assistance if the requirement remains effective.

Applicability: This waiver is applicable to initial income determinations for individuals and families that have lost employment or income either permanently or temporarily due to the COVID-19 pandemic and who are applying for admission to a HOME rental unit or a HOME tenant-based rental assistance program. This waiver also applies to homeless individuals and families who are applying for admission to a HOME rental unit or a HOME tenant-based rental assistance program. If a PJ chooses to use this waiver availability, the PJ must ensure that self-certified income takes into consideration all income, including any unemployment and emergency benefits the applicant will receive. However, for purposes of an applicant's self-certification, emergency tax relief (commonly referred to as stimulus payments) is not to be included as an emergency benefit. Also, the PJ must arrange to conduct on-site rent and income reviews within 90 days after the waiver period. The PJ must include tenant income certifications in each project file. This requirement is waived through December 31, 2020, for rental assistance provided in response to the COVID-19 pandemic. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

• *Regulation:* 24 CFR 92.203(a)(2) and 24 CFR 92.64(a).

Project/Activity: Source documentation for HOME income determinations.

Nature of Requirement: The regulations require the participating jurisdiction to determine a tenant-based rental assistance tenant's income by examining at least two months of source documentation evidencing income and projecting anticipated income forward for the next 12 months.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: The waiver permits the participating jurisdiction to use self-certification of income in lieu of source documentation to determine eligibility for HOME assistance of persons requiring emergency rental assistance related to COVID-19. Given the rapid and unanticipated economic disruptions caused by the COVID-19 pandemic, source documentation from the past two months may not reflect the current financial circumstances of many households. Requiring participating jurisdictions to use source documentation would be administratively burdensome, may not reflect current or anticipated income, and may result in individuals and families being incorrectly disqualified from receiving TBRA.

Applicability: This waiver is applicable to tenant-based rental assistance provided to individuals and families experiencing financial hardship. The PJ must ensure that

the tenant's self-certification indicates how the tenant's financial situation has changed (i.e., job loss or reduced wages), and include all income, including any unemployment or emergency benefits received by the tenant as a result of the pandemic. However, for the purposes of a tenant's self-certification, emergency tax relief (commonly referred to as stimulus payments) is not to be included as an emergency benefit. The PJ must include tenant income certifications in each project file. This requirement is waived through December 31, 2020, for rental assistance provided in response to the COVID-19 pandemic. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.205(e)(2) and 24 CFR 92.64(a).

Project/Activity: Four-year project completion deadline.

Nature of Requirement: The regulations require that projects assisted with HOME funds be completed within four years of the date that HOME funds were committed.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: This waiver is necessary to provide additional time to permit completion of HOME-assisted projects that may be delayed as a result of the impact of COVID-19 on project timelines.

Applicability: The waiver applies to projects for which the four-year project completion deadline will occur on or after April 10, 2020. The completion deadlines for covered projects are extended to December 31, 2020. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.209(a) and (h) and 24 CFR 92.64(a).

Project/Activity: Eligible tenant-based rental assistance costs and maximum TBRA subsidy.

Nature of Requirement: The regulations state that eligible TBRA costs include rental assistance and security deposit payments made to income-eligible households. Participating jurisdictions can also use HOME funds to provide utility deposit assistance if such assistance is provided in conjunction with TBRA or a security deposit payment. The maximum amount of monthly assistance may not exceed the difference between the participating jurisdiction's rent standard and 30 percent of the tenant's monthly adjusted income.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: The waiver allows participating jurisdictions to provide up to 100 percent subsidy for rent, security deposit payments, and utility bills paid by tenants affected by a reduction or loss of income from the COVID-19 pandemic. The COVID-19 pandemic has caused widespread loss or reduction of income, significantly affecting the financial stability of households, including existing TBRA families, and rendering many unable to pay rent and/or utilities. As individuals experience financial hardship, the amount of assistance required to ensure they remain housed will often exceed the participating jurisdiction's payment standard. Individuals may be unable to pay the participating jurisdiction's minimum required tenant contribution toward rent.

Applicability: This waiver is applicable to TBRA provided to individuals or families experiencing financial hardship, including existing TBRA families. PJs using this waiver authority must execute a rental assistance contract with the owner or tenant for a term mutually agreed upon by all parties, but not to exceed the December 31, 2020, waiver period. The PJ may make utility payments directly to the tenant or utility company based on utility bills submitted for the assisted unit, either by mail or electronically. The waiver applies through December 31, 2020. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.209(e) and 24 CFR 92.64(a).

Project/Activity: Term of rental assistance contract.

Nature of Requirement: The regulations state requirements for the term of rental assistance contracts, including that the term must begin on the first day of the term of the lease.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: The waiver eliminates the requirement that the rental assistance contract begin on the first day of the term of the lease. This waiver is necessary to enable participating jurisdictions to assist tenants that are currently housed, including existing TBRA households, but have experienced sudden financial hardship as a result of the COVID-19 pandemic. Because affected households already have an executed lease, it is impossible for the TBRA contract to begin on the first day of the term of the lease.

Applicability: This requirement is waived through December 31, 2020, for TBRA provided in response to the COVID-19 pandemic. The PJ's requirement to execute a rental assistance contract with the owner or tenant is not waived. PJs using this waiver authority must execute a rental assistance contract with the owner or tenant for a term mutually agreed upon by all parties, but not to exceed the December 31, 2020, waiver

period. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.209(f) and 24 CFR 92.64(a).

Project/Activity: HOME TBRA rent reasonableness.

Nature of Requirement: The regulations require that a participating jurisdiction must disapprove a lease if the rent is not reasonable, based on an assessment of rents charged for comparable unassisted rental units.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: The waiver will permit participating jurisdictions to provide immediate rental assistance without requiring an assessment of rents charged for comparable unassisted rental units. Given the unprecedented need for rental assistance for individuals facing financial hardship during the pandemic, requiring participating jurisdictions to conduct a rent comparison prior to providing rental assistance presents an undue administrative burden.

Applicability: The waiver is applicable to TBRA provided to individuals and tenant households experiencing financial hardship because of a reduction or loss of income. The requirement is waived through December 31, 2020. The waiver is available to all participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.209(g) and 24 CFR 92.64(a).

Project/Activity: HOME TBRA tenant protections—lease.

Nature of Requirement: The regulations require that each HOME-assisted tenant have a lease that complies with the tenant protection requirements of 24 CFR 92.253(a) and (b).

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: The waiver will permit participating jurisdictions to assist individuals currently housed but facing financial hardship, where an executed lease is already in place. During the COVID-19 pandemic, participating jurisdictions may assist individuals that are already in rental units but are unable to pay rent and/or utilities due to job loss or reduced wages. These individuals already have an executed lease that may include one or more of the prohibited lease terms included in 24 CFR 92.253(b). Requiring participating jurisdictions to immediately execute or amend leases creates an undue

administrative burden and may disqualify some in-place tenants from receiving TBRA.

Applicability: The requirement that a tenant assisted by TBRA have a lease that complies with the requirements of 24 CFR 92.253(a) and (b) is waived through December 31, 2020, for rental assistance provided to tenants already housed who have an executed lease. PJs using this waiver authority are required to execute a rental assistance contract with the tenant for a term mutually agreed upon by all parties, but not to exceed the waiver period ending on December 31, 2020. PJs must still comply with all VAWA requirements contained in 24 CFR 92.359 by including, at a minimum, a lease addendum that addresses all VAWA requirements. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.209(i) and 24 CFR 92.64(a).

Project/Activity: HOME TBRA housing quality standards.

Nature of Requirement: The regulations require that all housing occupied by households receiving HOME TBRA must meet the housing quality standards (HQS) at 24 CFR 982.401. The participating jurisdiction is required to inspect the unit for compliance prior to occupancy and annually thereafter.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: This waiver will permit the participating jurisdiction to rapidly house or assist individuals affected by the COVID-19 pandemic without requiring an initial HQS inspection. The COVID-19 pandemic has created an unprecedented need for rental assistance for tenant households facing financial hardship. Participating jurisdictions must act quickly to address these needs and requiring HQS inspections of all units where HOME TBRA assistance is provided would create an administrative burden and reduce participating jurisdictions' ability to respond timely to the housing needs created by the pandemic.

Applicability: The requirement is waived through December 31, 2020, for rental assistance provided in response to the COVID-19 pandemic. The waiver is available to all HOME participating jurisdictions. The lead-safe housing requirements of 24 CFR part 35, subpart M, made applicable to units leased by recipients of HOME TBRA by the HOME regulation at 24 CFR 92.355, cannot be waived. Consequently, units built before 1978 must undergo visual evaluation and paint repair in accordance with 24 CFR part 35, subpart M.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.210(a) and (b) and 24 CFR 92.64(a).

Project/Activity: Use of HOME funds for operating reserves for troubled HOME projects.

Nature of Requirement: The regulations establish provisions to permit HOME rental projects that are not financially viable (*i.e.*, projects for which operating costs significantly exceed operating revenue) to be preserved through the use of HOME funds to recapitalize project reserves. The regulations also require HUD to review market needs, available resources, and the likelihood of long-term viability of the project before approving this use of HOME funds. In addition, a written memorandum of agreement between HUD and the participating jurisdiction is a precondition of this funding and the regulation places certain limitations on the amount of funding.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: Participating jurisdictions will not be required to obtain HUD approval or execute a memorandum of agreement with HUD before providing this assistance. The waiver is necessary to enable participating jurisdictions to take rapid action to preserve the financial viability of HOME-assisted affordable rental projects currently under a HOME period of affordability. Because existing tenants in HOME units may be unable to meet their rent obligations due to the economic impact of the COVID-19 pandemic, HOME rental projects may experience operating deficits due to the sudden decrease in rental revenue.

Applicability: The waiver applies to HOME-assisted rental projects currently within the period of affordability established in the HOME written agreement. PJs will not be required to obtain HUD approval or execute a memorandum of agreement with HUD before providing this assistance. PJs may only exercise this waiver authority when the project owner agrees to forego: (1) Any distributions of residual receipts resulting from the project throughout the waiver period and for a period of 6 months thereafter; (2) any right under the existing lease agreement or State or local law to pursue legal action against tenants of HOME-assisted units for non-payment of rent and the collection of any fees associated with late payments without prior approval of the PJ; and (3) any adverse credit reporting against tenants of HOME-assisted units for nonpayment of rent or fees without prior approval of the PJ.

The PJ may provide additional HOME funds to recapitalize operating deficit reserves for HOME-assisted rental projects if the PJ determines that the project is experiencing operating deficits related to the economic effects of the COVID-19 pandemic during the waiver period. The PJ may only provide this assistance to projects experiencing operating deficits that will not be covered by insurance or other sources (*e.g.*, other private, local, state, or federal funds).

The maximum amount of HOME assistance that may be provided is equal to the total of

the project's operating expenses, previously scheduled payments to a replacement reserve, and actual debt service (excluding debt service of loans in forbearance) multiplied by the proportionate share of HOME-assisted units to the total number of units in the project for the period beginning on April 1, 2020 and ending on December 31, 2020. Project operating expenses may be demonstrated by one of the following:

- The Owner's most recent year to date financials for the project;
- Certified project-level accounting records covering the most recent 3 months; and
- Copies of project-level bank statements covering the most recent 3 months.

Project operating expenses may also be adjusted due to COVID-19-related expenditures and foregone expenses due to social distancing measures and other COVID-19-related impacts. An owner may demonstrate these expenses with recent receipts, copies of work orders, revised budgets that have been certified by the project owner as true, accurate representations of current expenditures.

In order to take advantage of this waiver, PJs must amend the HOME written agreement with the project owner to include the amount of HOME funds that will be provided to an operating reserve (*i.e.*, the proportion of total costs attributable to HOME units as described in the paragraph above), the costs eligible to be paid with HOME funds in the operating reserve (*i.e.*, operating expenses, scheduled payments to a replacement reserve, and qualifying debt service), and the documentation the PJ is required to maintain to demonstrate the allowable amounts and eligibility of costs paid with the HOME funds in the operating reserve.

The written agreement must specify that the owner must forego: (1) Any distributions of residual receipts during the period this waiver is in effect and for a period of 6 months thereafter; (2) any right under the existing lease agreement or State or local law to pursue legal action against tenants of HOME-assisted units for non-payment of rent and the collection of any fees associated with late payments without prior approval of the PJ; and (3) any adverse credit reporting against tenants of HOME-assisted units for nonpayment of rent or fees without prior approval of the PJ.

Within six months following the waiver period, the PJ must review the project's records of actual revenue and operating expenses, total amount of HOME funds expended from the operating reserve, and the eligibility of expenses by examining invoices and receipts. The written agreement must require the project owner to repay any expenditures for costs determined to be ineligible and any balance of HOME funds remaining in the reserve after December 31, 2020. Any HOME funds repaid to the PJ must be deposited in the local HOME account and reported as program income in IDIS. The waiver is effective through December 31, 2020.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development,

Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.252(d)(1) Utility Allowance Requirements.

Project/Activity: San Luis Obispo County, California, requested a waiver of 24 CFR 92.252(d)(1) to allow use of the utility allowance established by local public housing agency (PHA) for a HOME-assisted project—Iron Works Apartments.

Nature of Requirement: The regulation at 24 CFR 92.252(d)(1) requires participating jurisdictions to establish maximum monthly allowances for utilities and services (excluding telephone) and update the allowances annually. However, participating jurisdictions are not permitted to use the utility allowance established by the local public housing authority for HOME-assisted rental projects for which HOME funds were committed on or after August 23, 2013.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 8, 2020.

Reason Waived: The HOME requirements for establishing a utility allowances conflict with Project Based Voucher program requirements. It is not possible to use two different utility allowances to set the rent for a single unit and it is administratively burdensome to require a project owner establish and implement different utility allowances for HOME-assisted units and non-HOME assisted units in a project.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.252(d)(1) Utility Allowance Requirements.

Project/Activity: Los Angeles County, California, requested a waiver of 24 CFR 92.252(d)(1) to allow use of the utility allowance established by local public housing agency (PHA) for two HOME-assisted projects—Francisquito Senior Apartments and Athens Vistas Senior Apartments.

Nature of Requirement: The regulation at 24 CFR 92.252(d)(1) requires participating jurisdictions to establish maximum monthly allowances for utilities and services (excluding telephone) and update the allowances annually. However, participating jurisdictions are not permitted to use the utility allowance established by the local public housing authority for HOME-assisted rental projects for which HOME funds were committed on or after August 23, 2013.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: May 11, 2020.

Reason Waived: The HOME requirements for establishing a utility allowances conflict with Project Based Voucher program requirements. It is not possible to use two different utility allowances to set the rent for a single unit and it is administratively burdensome to require a project owner

establish and implement different utility allowances for HOME-assisted units and non-HOME assisted units in a project.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.252(d)(1) Utility Allowance Requirements.

Project/Activity: The city of Santa Cruz, California, requested a waiver of 24 CFR 92.252(d)(1) to allow use of the utility allowance established by local public housing agency (PHA) for a HOME-assisted project—Water Street Apartments.

Nature of Requirement: The regulation at 24 CFR 92.252(d)(1) requires participating jurisdictions to establish maximum monthly allowances for utilities and services (excluding telephone) and update the allowances annually. However, participating jurisdictions are not permitted to use the utility allowance established by the local public housing authority for HOME-assisted rental projects for which HOME funds were committed on or after August 23, 2013.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: May 11, 2020.

Reason Waived: The HOME requirements for establishing a utility allowances conflict with Project Based Voucher program requirements. It is not possible to use two different utility allowances to set the rent for a single unit and it is administratively burdensome to require a project owner establish and implement different utility allowances for HOME-assisted units and non-HOME assisted units in a project.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.252(d)(1) Utility Allowance Requirements.

Project/Activity: Ventura County, California, requested a waiver of 24 CFR 92.252(d)(1) to allow use of the utility allowance established by local public housing agency (PHA) for a HOME-assisted project—Willett Ranch Apartments.

Nature of Requirement: The regulation at 24 CFR 92.252(d)(1) requires participating jurisdictions to establish maximum monthly allowances for utilities and services (excluding telephone) and update the allowances annually. However, participating jurisdictions are not permitted to use the utility allowance established by the local public housing authority for HOME-assisted rental projects for which HOME funds were committed on or after August 23, 2013.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: May 11, 2020.

Reason Waived: The HOME requirements for establishing a utility allowances conflict with Project Based Voucher program

requirements. It is not possible to use two different utility allowances to set the rent for a single unit and it is administratively burdensome to require a project owner establish and implement different utility allowances for HOME-assisted units and non-HOME assisted units in a project.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.252(d)(1) Utility Allowance Requirements.

Project/Activity: Sonoma County, California, requested a waiver of 24 CFR 92.252(d)(1) to allow use of the utility allowance established by local public housing agency (PHA) for a HOME-assisted project—Altamira Family Apartments.

Nature of Requirement: The regulation at 24 CFR 92.252(d)(1) requires participating jurisdictions to establish maximum monthly allowances for utilities and services (excluding telephone) and update the allowances annually. However, participating jurisdictions are not permitted to use the utility allowance established by the local public housing authority for HOME-assisted rental projects for which HOME funds were committed on or after August 23, 2013.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: June 3, 2020.

Reason Waived: The HOME requirements for establishing a utility allowances conflict with Project Based Voucher program requirements. It is not possible to use two different utility allowances to set the rent for a single unit and it is administratively burdensome to require a project owner establish and implement different utility allowances for HOME-assisted units and non-HOME assisted units in a project.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.254(a)(3) and 24 CFR 92.64(a).

Project/Activity: Nine-month deadline for sale of HOME-assisted homebuyer units

Nature of Requirement: The regulations require that a homebuyer housing unit developed with HOME funds have a ratified contract for sale to an eligible homebuyer within nine months of the date of completion of construction or rehabilitation.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: Many participating jurisdictions will not be able to meet this deadline due to the effect the COVID-19 pandemic will have on the ability of eligible households to qualify for mortgages as a result of income losses or the inability to schedule inspections, title searches, or closings during periods of business closures.

The waiver is necessary to prevent the loss of homeownership opportunities for HOME-eligible families and temporarily suspend the required corrective action of repayment of HOME funds or conversion of the homebuyer units to rental housing.

Applicability: The waiver applies to projects for which the nine-month homebuyer sale deadline occurs on or after the date of this memorandum and extends the deadline for those projects to December 31, 2020. This waiver does not apply to the remaining requirements of the regulation, including that a homebuyer must receive housing counseling, and that a PJ must determine eligibility of a family by including the income of all persons living in the housing. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.504(d)(1)(ii) and 24 CFR 92.64(a).

Project/Activity: On-site inspections of HOME-assisted rental housing.

Nature of Requirement: The regulations require that during the period of affordability participating jurisdictions perform on-site inspections of HOME-assisted rental housing at least once every three years to determine compliance with the property standards and to verify the information submitted by the owners in accordance with the income and rent requirements.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: Waiving the requirement to perform ongoing on-site inspections will help protect participating jurisdiction staff and limit the spread of COVID-19. To protect participating jurisdiction staff and reduce the spread of COVID-19, this waiver extends the timeframe for participating jurisdictions to perform on-going periodic inspections and on-site reviews to determine a HOME rental project's compliance with property standards and rent and income requirements.

Applicability: The waiver is applicable to ongoing periodic inspections and does not waive the requirement to perform initial inspections of rental properties upon completion of construction or rehabilitation. The waiver is also applicable to on-site reviews to determine a HOME rental project's compliance with rent and income requirements if the project owner is unable to make documentation available electronically. The waiver is in effect through December 31, 2020. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.504(d)(1)(iii); 24 CFR 92.209(i) and 24 CFR 92.64(a).

Project/Activity: Annual inspection of units occupied by recipients of HOME tenant-based rental assistance (TBRA).

Nature of Requirement: The regulations require participating jurisdictions to annually inspect each unit occupied by a recipient of HOME TBRA.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: Waiving the requirement that these annual inspections be performed according to schedule will protect the health of both inspectors and TBRA tenants by observing physical distancing recommendations to limit the spread of COVID-19.

Applicability: The waiver is applicable to annual housing quality standards inspections required to occur from April 10, 2020, through December 31, 2020. PJs shall make reasonable efforts to address any tenant reported health and safety issues during the waiver period. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room 7160, Washington, DC 20410, telephone (202) 708-2684.

- **Regulation:** 24 CFR 92.551(b)(1) and 24 CFR 92.64(a).

Project/Activity: Timeframe for a HOME participating jurisdiction's response to findings of noncompliance.

Nature of Requirement: The regulations require that if HUD determines that a participating jurisdiction has not met a provision of the HOME regulations, the participating jurisdiction must be notified and given an opportunity to respond within a time period prescribed by HUD, not to exceed 30 days.

Granted By: John Gibbs, Acting Assistant Secretary for Community Planning and Development.

Date Granted: April 10, 2020.

Reason Waived: The waiver is necessary to permit HUD to provide participating jurisdictions with an extended period to respond to findings of noncompliance in recognition of the unanticipated circumstances created by the COVID-19 pandemic. Requiring participating jurisdictions to respond to all findings of noncompliance within 30 days may interfere with a participating jurisdiction's ability to address the unprecedented housing needs caused by the COVID-19 pandemic.

Applicability: The waiver applies to all findings of HOME regulatory noncompliance issued from April 10, 2020, through December 31, 2020. In the notice of findings, HUD will specify a time period for the participating jurisdiction's response. HUD may also extend time periods imposed before April 10, 2020. The waiver is available to all HOME participating jurisdictions.

Contact: Virginia Sardone, Director, Office of Affordable Housing Programs, Office of Community Planning and Development, Department of Housing and Urban Development, 451 Seventh Street SW, Room

7160, Washington, DC 20410, telephone (202) 708-2684.

II. Regulatory Waivers Granted by the Office of Government National Mortgage Association

For further information about the following regulatory waivers, please see the name of the contact person that immediately follows the description of the waiver granted.

- **Regulation:** 24 CFR 320.15(a). **Project/Activity:** Regulatory Waiver of Issuer Default Status in Connection with The Pass-Through Assistance Program Related To The COVID-19 National Emergency.

Nature of the Requirement: The regulation at 24 CFR 320.15(a) establishes that any failure or inability of the issuer to make payments as due, as well as such other events as may be identified by the Association and included in the applicable guaranty agreement, contractual agreement or MBS Guide, shall constitute a default of the issuer.

Granted By: Seth D. Appleton, Principal Executive Vice President, Ginnie Mae.

Date Granted: April 10, 2020.

Reason Waived: On March 13, 2020, the President declared a National Emergency related to the COVID-19 pandemic. For the first time, with the COVID-19 National Emergency, Ginnie Mae is facing a situation in which the potential liquidity threat from the emergency has virtually no limitations within the universe of approved Issuers. Because of statutory changes by Congress, such as CARES Act, Public Law 116-136, and policy changes by the insuring and guaranteeing agencies made in response to the COVID-19 National Emergency, it is conceivable that a broad cross section of non-bank Issuers participating in the Ginnie Mae program would seek assistance as the result of liquidity concerns and inability to make payments as due. Ginnie Mae's program allows for the pass-through assistance (PTAP) in limited situations. Given the potential number of issuers that may be impacted, Ginnie Mae has determined that this situation warrants a regulatory waiver because the potential breadth and scale of the impact, and subsequent need for assistance, makes it impractical—and unwise—to assume that there would be no negative impact on the secondary mortgage market if a large number of issuers are declared to be in default because of financial challenges caused by statutes and policies related to a Presidentially-declared National Emergency. Therefore, modifying the definition of default as inapplicable to issuers that request PTAP assistance due to COVID-19 National Emergency is reasonable to meet Ginnie Mae's statutory mission to provide stability in the secondary market for residential mortgages.

Contact: Rene Mondonado, Director, Monitoring & Asset Management, Office of Issuer & Portfolio Management, Government National Mortgage Association, Department of Housing and Urban Development, 425 Third St. SW, 4th FL, Washington, DC 20024, Telephone (202) 475-7992.

III. Regulatory Waivers Granted by the Office of Housing—Federal Housing Administration (FHA)

For further information about the following regulatory waivers, please see the name of the contact person that immediately follows the description of the waiver granted.

- **Regulation:** 24 CFR 5.801 (c)(2).

Project/Activity: Financial Statement Due Date.

Nature of Requirement: For specified Multifamily and Residential Care Borrowers otherwise required to submit Annual Financial Statements on or before June 30, 2020, extend the due date of the Borrower Annual Financial Statements to September 30, 2020, and as otherwise provided by law.

Granted By: Len Wolfson, Acting Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: June 25, 2020.

Reason Waived: Due to COVID-19 National Health Emergency the Borrower Annual Financial Statements have been extended by 90-days.

Contact: Brandt Witte, Program Analyst, Multifamily Asset and Counterparty Oversight Division, Office of Housing, Office of Asset Management and Portfolio Oversight, Department of Housing and Urban Development, 451 Seventh Street SW, Room, telephone (202) 402-2614.

- **Regulation:** 24 CFR 200.73 (c).

Project/Activity: Henderson Heights Apartment, Hendersonville, North Carolina, Project No. 053-11454.

Nature of Requirement: HUD's regulation at 24 CFR 200.73 (c) requiring that "not less than five rental dwelling units [of an FHA insured multifamily housing project] shall be on one site. The Housing Authority has and will continue to manage the project post-conversion. Henderson Heights consists of 19 residential parcels with 164 buildings with a total of 352 units. The cluster of units/projects were acquired by HHA over a 22-year period. Two satellite sites are located north and west of Hendersonville and are not located within the city limits. The units were acquired and/or developed in seven phases/projects between 1960 and 1982. Out of the 19 parcels, 4 parcels are non-conforming as they each contain fewer than 5 units. The 4 non-conforming parcels contain a total of 12 units. All the non-conforming parcels are located within the City of Hendersonville in close proximity to the larger, conforming parcels. Three of the parcels are located on the same street within a block of each other.

Granted by: Len Wolfson, Acting Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: May 22, 2020.

Reason Waived: The waiver will meet HUD's goal of preserving and maintaining affordable rental housing for low income families. The proposed FHA-insured loan/RAD conversion will preserve and rehabilitate necessary affordable housing and will contribute to the revitalization of this Hendersonville community.

Contact: Patricia M. Burke, Director, Office of Multifamily Production, HTD, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room

6132, Washington, DC 20410-8000, telephone (202) 402-5693.

- **Regulation:** 24 CFR 200.73 (c).

Project/Activity: Neighborhood Apartments, Kalamazoo, Michigan, Project No. 047-11246.

Nature of Requirement: HUD's regulation at 24 CFR 200.73 (c) requiring that "not less than five rental dwelling units [of an FHA insured multifamily housing project] shall be on one site. All sites composing the Neighborhood Apartment project are located in one neighborhood outside downtown Kalamazoo. The project constitutes one manageable, marketable real estate asset. The project offers 12 one bedroom/one bath units and 32 two bedroom/one bath housed within 11 one-story and two-story buildings. The project consists of three one-story buildings and seven two-story buildings located on 8 separate scattered sites. Two of the parcels are contiguous and contain two units each. One parcel contains 4 units. The remaining 5 parcels all contain 5 or more units.

Granted by: Len Wolfson, Acting Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: June 23, 2020.

Reason Waived: The waiver will meet HUD's goal of preserving and maintaining affordable rental housing for low income families. The proposed FHA-insured loan/RAD conversion will preserve and rehabilitate necessary affordable housing and will contribute to the revitalization of this Kalamazoo community.

Contact: Patricia M. Burke, Director, Office of Multifamily Production, HTD, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 6132, Washington, DC 20410, telephone (202) 402-5693.

- **Regulation:** 24 CFR 200.73(c).

Project/Activity: Satchmo Plaza, New Orleans, LA, Project No. 064-11213.

Nature of Requirement: The 24 CFR part 200.73 (c) which states that a site must contain no less than five rental dwelling units. Section 3.1.CC of the 2016 MAP Guide permits a project with two or more non-contiguous parcels of land when the parcels comprise one marketable, manageable real estate entity. Bedford Lending Corporation has applied for mortgage insurance under the Section 223(f) program to refinance Satchmo Plaza. The proposal is to combine two separate, scattered site, Section 8 assisted properties known as Satchmo Plaza and Arment Plaza into a single manageable property consisting of 46 total units and to be known as Satchmo Plaza. The projects are now owned by mortgagors controlled by the same non-profit entity. The existing Satchmo Plaza is 7 buildings on 5 sites totaling 30 units. It is a Section 202 property for the elderly. The existing Arment Plaza is 8 buildings on 3 sites with a total of 16 units. Arment is assisted with HOME/CDBG funds but is not presently age restricted. All of the combined scattered sites (8 sites, 15 buildings) are located in the same neighborhood near downtown New Orleans. Of the 8 sites, 4 have less than five units. The mortgage amount is \$2,668,000.

Granted by: Len Wolfson, Acting Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: June 24, 2020.

Reason Waived: The waiver will meet HUD's goal of preserving and maintaining affordable rental housing for low income families. The proposed FHA-insured loan/RAD conversion will preserve and rehabilitate necessary affordable housing and will contribute to the revitalization of this New Orleans community.

Contact: Patricia M. Burke, Director, Office of Multifamily Production, HTD, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 6132, Washington, DC 20410, telephone (202) 402-5693.

- **Regulation:** 24 CFR 200.194(d).

Project/Activity: FHA Single Family Waiver for Non-Profit Roster Recertification.

Nature of Requirement: Under 24 CFR 200.194 (d), HUD-approved nonprofit organizations must reapply for approval before the expiration of an existing 2-year authorization term to continue participating in FHA programs. Approximately 30 HUD-approved non-profit organizations that have been impacted by the COVID-19 pandemic are within 90-120 days of their approval or recertification date.

Granted by: Len Wolfson, Acting Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: June 20, 2020.

Reason Waived: A temporary 120-day extension makes it possible for FHA-approved non-profit organizations to operate without disruption during the COVID-19 pandemic. The temporary waiver is consistent with the Departments mission to promote and support affordable housing objectives and it does not violate any statutory requirements.

Contact: Kevin Stevens, Acting Director, Office of Single Family Program Development, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 9266, Washington, DC 20410, telephone (202) 402-4317.

- **Regulation:** 24 CFR 203.255(b)(11).

Project/Activity: COVID-19 Certification and Pre-Endorsement Review Requirements for The United States and Its Surrounding Territories.

Nature of Requirement: The U.S. Department of Housing and Urban Development's (HUD) regulation at 24 CFR 203.255(b) addresses the documentation that must be submitted to HUD for mortgages originated under the Direct Endorsement and Lender Insurance Programs. Additionally, subsection 203.255(b)(11) requires a mortgage certification on a form prescribed by the Secretary, stating that the authorized representative of the mortgagee has reviewed the mortgage documents and certifies that the mortgage complies with the requirements of paragraph (b) incorporating all certification items that apply to the mortgage loan as set forth in the applicable handbook (*i.e.*, HUD Handbook 4000.1). The referenced prescribed form is Form HUD 92900-A. A mortgagee must certify at the time of insurance endorsement the loan is in compliance with all FHA origination and underwriting requirements including that the borrower's employment status and ability to make mortgage payments is accurate.

Granted by: Len Wolfson, Acting Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: June 3, 2020.

Reason Waived: The waiver of the requirement in 24 CFR 203.255(b)(11) that states the mortgagee must certify, as prescribed on the 92900-A, at the time of insurance endorsement that the loan is in compliance with all FHA origination and underwriting requirements solely to the extent that the borrower's employment status and ability to make mortgage payments, will permit the mortgagee that grants the borrower an Accommodation as defined at 4021 of the Coronavirus Aid, Relief, and Economic Security Act (CARES Act) for forbearance of mortgage payments, after closing of the mortgage transaction to be in compliance with all FHA origination and underwriting requirements.

Contact: Kevin Stevens, Acting Director Single Family Program Development, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 9266, Washington, DC 20410, telephone (202) 402-4317.

• *Regulation:* 24 CFR 219.220(b).

Project/Activity: City View Park Walnut I, FHA Project Number 083-14002; City View Park Chestnut II, FHA Project Number 083-12004; and City View Park Acorn III, FHA Project Number 083-12005, Louisville, KY. The owner of City View Park I, II, and III seeks approval to defer repayment of the Flexible Subsidy Operating Assistance Loans on the subject projects.

Nature of Requirement: The regulation at 24 CFR 219.220(b) (1995), which governs the repayment of operating assistance provided under the Flexible Subsidy Program for Troubled Properties, states "Assistance that has been paid to a project owner under this subpart must be repaid at the earlier of the expiration of the term of the mortgage, termination of mortgage insurance, prepayment of the mortgage, or a sale of the project."

Granted by: Brian D. Montgomery, Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: January 31, 2020.

Reason Waived: The owner requested and was granted waiver of the requirement to repay the Flexible Subsidy Operating Assistance Loans in full when they became due. Deferring the loan payments will preserve these affordable housing resources for an additional 40 years through the execution and recordation of a Rental Use Agreement.

Contact: Walter D. Wynn, Director, FAMD, Office of Housing, Department of Housing and Urban Development, 451 7th Street SW, Room 6164, Washington, DC 20410, telephone (202) 402-2231.

• *Regulation:* 24 CFR 242.17(c)(2).

Project/Activity: Maimonides Medical Center, Brooklyn, New York.

Nature of Requirement: 24 CFR 242.17(c)(2) prohibits FHA from extending Commitments for Insurance of Advances for more than 180 days following the original commitment date.

Granted By: Brian D. Montgomery, Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: April 28, 2020.

Reason Waived: Initial Endorsement of Maimonides Medical Center's supplement (Section 241) loan was delayed due to the Covid-19 pandemic. The waiver allowed the Federal Housing Administration to schedule closing of Maimonides Medical Center's supplemental (Section 241) construction loan for August 2020.

Contact: Paul Giaudrone, Underwriting Director, Office of Hospital Facilities, Office of Healthcare Programs, Office of Housing, Department of Housing and Urban Development, 409 3rd Street SW, Washington, DC 20024, telephone (202) 708-0599 Ext. 5684.

• *Regulation:* 24 CFR 266.200(b)(2).

Project/Activity: Massachusetts Housing Partnership (MHP) The Department requires, in 24 CFR 266.200(b)(2), Substantial Rehabilitation, that substantial rehabilitation (S/R) is defined as any combination of the following work to an existing facility of a project that aggregates to at least 15 percent of the project's value after the rehabilitation and that results in material improvement of the project's economic life, livability, marketability, and profitability. Boston, Massachusetts. There is no project number.

Nature of Requirement: The Waiver of 24 CFR 266.200(b)(2), Substantial Rehabilitation. The waiver would permit Mass Housing Partnership (MHP) to use the revised definition published in the Revised MAP Guide on January 29, 2016, such that S/R is: Any scope of work that either (a) exceeds in aggregate cost a sum equal to the 'base per dwelling unit limit' times the applicable *High Cost Factor, or (b) replacement of two or more building systems. Replacement is when the cost of replacement work exceeds 50 percent of the cost of replacing the entire system.

**The High Cost Factors for 2019 were published through a Housing Notice (HN) on May 20, 2019, and the revised statutory limits were recently published in the Federal Register on January 1, 2018. The 2019 base dwelling unit amount to determine substantial rehabilitation for FHA insured loan programs has been increased from \$15,933 (changed from \$6,500 per unit in the 2016 MAP guide) to \$15,933. This amount will change annually based upon the change in the annual Consumer Price Index (CPI), along with the statutory limits or other inflation cost index published by HUD.*

The regulatory waiver is subject to the following conditions:

1. The waiver is limited to forty-eight (48) projects and expires on December 31, 2023 for waiver request related to regulation 24 CFR 266.200(b)(2) and (c)(2).
2. MHP must elect to take 50 percent or more of the risk of loss on all transactions.
3. Mortgages made under this waiver may have amortization periods of up to 40 years, but with a minimum term of 17 years.
4. All other requirements of 24 CFR 266.410—Mortgage Provision remain applicable. The waiver is applicable only to loans made under MHP's Risk Sharing Agreement.
5. Projects must comply with Davis-Bacon labor standards in accordance with 24 CFR 266.225.

6. MHP must comply with regulations stated in 24 CFR 266.210 for insured advances or insurance upon completion transactions.

7. The loans exceeding \$50 million require a separate waiver request.

8. Occupancy is no less than 93 percent for previous 12 months.

9. No defaults in the last 12 months of the HFA loan to be refinanced.

10. A 20-year affordable housing deed restriction placed on title that conforms to the Section 542(c) statutory definition.

11. A Property Capital Needs Assessment (PCNA) must be performed and funds escrowed for all necessary repairs, and reserves funded for future capital needs; and

12. For projects subsidized by Section 8 Housing Assistance Payment (HAP) contracts:

a: Owner agrees to renew HAP contract(s) for 20-year term, (subject to appropriations and statutory authorization, etc.), and b: In accordance with regulations in 24 CFR 883.306(e), and Housing Notice 2012-14—Use of "New Regulation" Section 8 Housing Assistance Payments (HAP) Contracts Residual Receipts of Offset Project-Based Section 8 Housing Assistance Payments, if at any time MHP determines that a project's excess funds (surplus cash) after project operations, reserve requirements and permitted distributions are met, MHP must place the excess funds into a separate interest-bearing account. Upon renewal of a HAP Contract the excess funds can be used to reduce future HAP payments or other project operations/purposes. When the HAP Contract expires, is terminated, or any extensions are terminated, any unused funds remaining in the Residual Receipt Account at the time of the contract's termination must be returned.

Granted By: Len Wolfson, Acting Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: June 30, 2020.

Reason Waived: The Department is approving your request for forty-eight (48) insured under the 542(c) HFA Risk Sharing Program expiring on December 31, 2023. The waiver of 24 CFR 266.200(b)(2) would permit MHP to use the revised definition published in the Revised MAP Guide on January 29, 2016, such that S/R is: Any scope of work that either (a) exceeds in aggregate cost a sum equal to the 'base per dwelling unit limit' times the applicable *High Cost*High Cost Factor, or (b) replacement of two or more building systems. Replacement is when the cost of replacement work exceeds 50 percent of the cost of replacing the entire system.

Contact: Patricia M. Burke, Director, Office of Multifamily Production, HTD, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 6132, Washington, DC 20410, telephone (202) 402-5693.

• *Regulation:* 24 CFR 266.200(c)(2).

Project/Activity: The Waiver of 24 CFR 266.200(c)(2), Existing Project "Equity Take-out", that the refinancing of HFA refinance loan is permissible if the preservation is the result, with certain conditions: (1) Occupancy at least 93 percent for previous 12 months; (2) underwrite to the lower of

Section 8 or market rents; (3) no equity take-outs: Risk sharing loan cannot exceed sum of existing indebtedness, cost of repairs, and transaction costs; (4) no defaults in the last 12 months of HFA loans. This waiver's Massachusetts Housing Partnership (MHP) in Boston, Massachusetts, no project name, or number listed.

Nature of Requirement: The Waiver of 24 CFR 266.200(c)(2), Existing Projects "Equity Take-outs". The waiver of 24 CFR 266.200(c)(2) would permit equity take-outs for any existing property, including both MHP-financed developments and those outside of MHP's portfolio, to be refinanced by MHP, where MHP and HUD split the risk of loss 50/50.

In order to mitigate risk to FHA, ensure affordability of projects, loans to be refinanced cannot have been in default in the 12 months prior to the date of application for refinancing, the owner must agree to renew the HAP contract for a 20-year term, if applicable, existing and post-refinance HAP residual receipts must be set aside to be used to reduce future HAP payments, the property must be maintained as affordable housing for a period of at least 20 year, regardless of whether the loan is prepaid, and a capital needs assessment must be performed and funds escrowed for all necessary repairs and replacement reserves funded for future capital repairs.

Granted by: Len Wolfson, Acting Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: June 30, 2020.

Reason Waived: The approval of MHP's underwriting guidelines as indicted in Appendix B—Multifamily Loan Underwriting Standards and Reference Manual revised on November 2018. MHP will meet massive affordable housing needs in post MHP requests a waiver of two existing risk sharing requirements to meet agency's massive affordable housing needs in a post 1414B environment. The Department is approving your request forty-eight (48) insured under the 542(c) HFA Risk Sharing Program expiring on December 31, 2023.

Contact: Patricia M. Burke, Director, Office of Multifamily Production, HTD, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 6132, Washington, DC 20410, telephone (202) 402-5693.

• **Regulation:** 24CFR 266.200(d).

Project/Activity: The waiver of 24 CFR 266.200(d), for projects receiving Section 8 rental subsidies or other rental subsidies. For refinancing of Section 202 projects, and for Public Housing Authority (PHA) projects converting to Section 8 through the Rental Assistance Demonstration (RAD) Initiative, Boston, Massachusetts. No project number or name listed.

Nature of Requirement: The waiver of 24 CFR 266.200(d), for projects receiving Section 8 rental subsidies or other rental subsidies. The Department would permit Massachusetts Housing Partnership (MHP) to underwrite Section 202 projects and PHA projects converting to Section 8 through RAD using the current or to-be-adjusted project-based Section 8 rents, even though they exceed the market rates, consistent with HUD

Housing Notice 04–21. "Amendments to Notice 02–16: Underwriting Guidelines for Refinancing of Section 202, and Section 202/8 Direct Loan Repayments", which grants authority only to those lenders refinancing with mortgage programs under the National Housing Act.

Granted By: Len Wolfson, Acting Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: June 30, 2020.

Reason Waived: The waiver would allow Supportive Housing program projects of MHP's assuming at least 50 percent of the risk of loss on mortgages insured under Section 542(c) would be subject to the same underwriting standard as other Section 202 projects in that the loans may be underwritten to contract rents. This waiver better aligns requirements between HUD programs, thereby streamlining and facilitating program administration by HFAs. Waiver will create and preserve affordable housing in the State of Massachusetts. The waiver is limited to forty-eight (48) projects and expires on December 31, 2023.

Contact: Patricia M. Burke, Director, Office of Multifamily Production, HTD, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 6132, Washington, DC 20410, telephone (202) 402-5693.

• **Regulation:** 24 CFR 266.410(e).

Project/Activity: District of Columbia Housing Agency (DCHFA), Washington, DC, no project name or number listed.

Nature of Requirement: The 24 CFR 266.410(e), which requires mortgages insured under the 542(c) Housing Finance Agency Risk Sharing Program to be fully amortized over the term of the mortgage. The waiver would permit DCHFA to use balloon loans that would have a minimum term of 17 years and a maximum amortization period of 40 years for the projects identified in the "Multifamily Pipeline Projects".

Granted by: Len Wolfson, Acting Assistant Secretary for Housing-Federal Housing Commissioner.

Date Granted: June 22, 2020.

Reason Waived: The waiver was granted to allow DCHFA's clients additional financing options to their customers and to align DCHFA business practices with industry standards, thus furthering the creation of a preservation of affordable housing throughout Washington, DC. The regulatory waiver is subject to the following conditions:

1. This waiver is limited to the projects listed in DCHFA's "Multifamily Pipeline Projects" and expires on December 31, 2022.
2. DCHFA must elect to take 50 percent or more of the risk of loss on all transactions.
3. Mortgages made under this waiver may have amortization periods of up to 40 years, but with a minimum term of 17 years.
4. All other requirements of 24 CFR 266.410—Mortgage Provision remain applicable. The waiver is applicable only to loans made under DCHFA's Risk Sharing Agreement.
5. In accordance with 24 CFR 266.200(d), the mortgage may not exceed an amount supportable by the lower of the Section 8 or comparable unassisted rents.

6. Projects must comply with Davis-Bacon labor standards in accordance with 24 CFR 266.225.

7. DCHFA must comply with regulations stated in 24 CFR 266.210 for insured advances or insurance upon completion transactions.

8. A 20-year affordable housing deed restriction placed on title that conforms to the Section 542(c) statutory definition.

9. Occupancy is no less than 93 percent for previous 12 months.

10. No defaults in the last 12 months of the HFA loan to be refinanced.

11. A Property Capital Needs Assessment (PCNA) must be performed and funds escrowed for all necessary repairs, and reserves funded for future capital needs; and

12. For projects subsidized by Section 8 Housing Assistance Payment (HAP) contracts:

i. a: Owner agrees to renew HAP contract(s) for 20-year term, (subject to appropriations and statutory authorization, etc.), and b: In accordance with regulations in 24 CFR 883.306(e), and Housing Notice 2012–14—Use of "New Regulation" Section 8 Housing Assistance Payments (HAP) Contracts Residual Receipts of Offset Project-Based Section 8 Housing Assistance Payments, if at any time DCHFA determines that a project's excess funds (surplus cash) after project operations, reserve requirements and permitted distributions are met, DCHFA must place the excess funds into a separate interest-bearing account. Upon renewal of a HAP Contract the excess funds can be used to reduce future HAP payments or other project operations/purposes. When the HAP Contract expires, is terminated, or any extensions are terminated, any unused funds remaining in the Residual Receipt Account at the time of the contract's termination must be returned.

Contact: Patricia M. Burke, Director, Office of Multifamily Production, HTD, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 6132, Washington, DC 20410, telephone (202) 402-5693.

• **Regulation:** 24 CFR 266.410(e).

Project/Activity: California Housing Finance Agency (CalHFA) no project name or number.

Nature of Requirement: The 24 CFR 266.410(e), which requires mortgages insured under the 542(c) Housing Finance Agency Risk Sharing Program to be fully amortized over the term of the mortgage. The waiver would permit CalHFA to use balloon loans that would have a minimum term of 17 years and a maximum amortization period of 40 years for the projects identified in the "Multifamily Pipeline Projects". CalHFA had previously been granted a waiver of 24 CFR 266.410(e) on May 25, 2018 which expired on December 31, 2019. This was the second waiver granted to CalHFA related to 24 CFR 266.410(e). The first waiver was approved on July 1, 2014 with an expiration date of June 30, 2016. **Granted by:** Len Wolfson, Acting, Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: June 8, 2020.

Reason Waived: The waiver was granted to allow CalHFA's clients additional financing

options to their customers and to align CalHFA business practices with industry standards. This waiver is effective through December 31, 2022. The regulatory waiver is subject to the following conditions: This waiver expires on December 31, 2022. All other requirements of 24 CFR 266.410—Mortgage Provision remain applicable. The waiver is applicable only to loans made under CalHFA's Risk Sharing Agreement.

The regulatory waiver is subject to the following conditions:

1. This waiver is limited to the projects listed in CalHFA's "Multifamily Pipeline Projects" and expires on December 31, 2022.

2. CalHFA must elect to take 50 percent or more of the risk of loss on all transactions.

3. Mortgages made under this waiver may have amortization periods of up to 40 years, but with a minimum term of 17 years.

4. All other requirements of 24 CFR 266.410—Mortgage Provision remain applicable. The waiver is applicable only to loans made under CalHFA's Risk Sharing Agreement.

5. In accordance with 24 CFR 266.200(d), the mortgage may not exceed an amount supportable by the lower of the Section 8 or comparable unassisted rents.

6. Projects must comply with Davis-Bacon labor standards in accordance with 24 CFR 266.225.

7. CalHFA must comply with regulations stated in 24 CFR 266.210 for insured advances or insurance upon completion transactions.

8. A 20-year affordable housing deed restriction placed on title that conforms to the Section 542(c) statutory definition.

9. Occupancy is no less than 93 percent for previous 12 months.

10. No defaults in the last 12 months of the HFA loan to be refinanced.

11. A Property Capital Needs Assessment (PCNA) must be performed and funds escrowed for all necessary repairs, and reserves funded for future capital needs; and

12. For projects subsidized by Section 8 Housing Assistance Payment (HAP) contracts:

i. a: Owner agrees to renew HAP contract(s) for 20-year term, (subject to appropriations and statutory authorization, etc.), and b: In accordance with regulations in 24 CFR 883.306(e), and Housing Notice 2012–14—Use of "New Regulation" Section 8 Housing Assistance Payments (HAP) Contracts Residual Receipts of Offset Project-Based Section 8 Housing Assistance Payments, if at any time CalHFA determines that a project's excess funds (surplus cash) after project operations, reserve requirements and permitted distributions are met, CalHFA must place the excess funds into a separate interest-bearing account. Upon renewal of a HAP Contract the excess funds can be used to reduce future HAP payments or other project operations/purposes. When the HAP Contract expires, is terminated, or any extensions are terminated, any unused funds remaining in the Residual Receipt Account at the time of the contract's termination must be returned.

Contact: Patricia M. Burke, Director, Office of Multifamily Production, HTD, Office of Housing, Department of Housing and Urban

Development, 451 Seventh Street SW, Room 6132, Washington, DC 20410, telephone (202) 402–5693.

• *Regulation:* 24 CFR 266.410(e).

Project/Activity: Massachusetts Housing Partnership (MHP), no project name or number listed.

Nature of Requirement: The 24 CFR 266.410(e), which requires mortgages insured under the 542(c) Housing Finance Agency Risk Sharing Program to be fully amortized over the term of the mortgage. The waiver would permit MHP to use balloon loans that would have a minimum term of 17 years and a maximum amortization period of 40 years for the projects identified in the "Multifamily Pipeline Projects". MHP had previously been granted a waiver of 24 CFR 266.410(e) on May 25, 2018 which expired on December 31, 2019. This was the second waiver granted to MHP related to 24 CFR 266.410(e). The first waiver was approved on July 1, 2014 with an expiration date of June 30, 2016. Granted by: Len Wolfson, Acting, Assistant Secretary for Housing-Federal Housing Commissioner.

Date Granted: June 30, 2020.

Reason Waived: The waiver was granted to allow MHP's clients additional financing options to their customers and to align MHP business practices with industry standards. This waiver is effective through December 31, 2023. The regulatory waiver is subject to the following conditions: This waiver expires on December 31, 2023. All other requirements of 24 CFR 266.410—Mortgage Provision remain applicable. The waiver is applicable only to loans made under MHP's Risk Sharing Agreement.

The regulatory waiver is subject to the following conditions:

1. This waiver is limited to the projects listed in MHP's "Multifamily Pipeline Projects" and expires on December 31, 2023.

2. MHP must elect to take 50 percent or more of the risk of loss on all transactions.

3. Mortgages made under this waiver may have amortization periods of up to 40 years, but with a minimum term of 17 years.

4. All other requirements of 24 CFR 266.410—Mortgage Provision remain applicable. The waiver is applicable only to loans made under MHP's Risk Sharing Agreement.

5. In accordance with 24 CFR 266.200(d), the mortgage may not exceed an amount supportable by the lower of the Section 8 or comparable unassisted rents.

6. Projects must comply with Davis-Bacon labor standards in accordance with 24 CFR 266.225.

7. MHP must comply with regulations stated in 24 CFR 266.210 for insured advances or insurance upon completion transactions.

8. A 20-year affordable housing deed restriction placed on title that conforms to the Section 542(c) statutory definition.

9. Occupancy is no less than 93 percent for previous 12 months.

10. No defaults in the last 12 months of the HFA loan to be refinanced.

11. A Property Capital Needs Assessment (PCNA) must be performed and funds escrowed for all necessary repairs, and reserves funded for future capital needs; and

12. For projects subsidized by Section 8 Housing Assistance Payment (HAP) contracts:

ii. a: Owner agrees to renew HAP contract(s) for 20-year term, (subject to appropriations and statutory authorization, etc.), and b: In accordance with regulations in 24 CFR 883.306(e), and Housing Notice 2012–14—Use of "New Regulation" Section 8 Housing Assistance Payments (HAP) Contracts Residual Receipts of Offset Project-Based Section 8 Housing Assistance Payments, if at any time MHP determines that a project's excess funds (surplus cash) after project operations, reserve requirements and permitted distributions are met, MHP must place the excess funds into a separate interest-bearing account. Upon renewal of a HAP Contract the excess funds can be used to reduce future HAP payments or other project operations/purposes. When the HAP Contract expires, is terminated, or any extensions are terminated, any unused funds remaining in the Residual Receipt Account at the time of the contract's termination must be returned.

Contact: Patricia M. Burke, Director, Office of Multifamily Production, HTD, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 6132, Washington, DC 20410, telephone (202) 402–5693.

• *Regulation:* 24 CFR 3282.14(b).

Project/Activity: Manufactured housing regulatory oversight.

Nature of Requirement: This regulation requires manufacturers of manufactured homes to submit a request for Alternative Construction consideration.

Granted By: Brian D. Montgomery, Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: April 16, 2020.

Reason Waived: Supply chain disruption of conforming windows was impacted due to COVID–19 pandemic. The waiver allows HUD to allow any manufacturer to use an Alternative Construction letter without having supplied a request in advance.

Contact: Jason McJury, Deputy Administrator, Office of Manufactured Housing Programs, Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 9170, Washington, DC 20410, telephone (202) 402–2480.

• *Regulation:* 24 CFR 3286.211(a).

Project/Activity: Manufactured Housing Regulatory Oversight.

Nature of Requirement: This regulation requires each installation license issued or renewed by HUD to expire 3 years after the date of its issuance or renewal.

Granted By: Brian D. Montgomery, Assistant Secretary for Housing—Federal Housing Commissioner.

Date Granted: May 29, 2020.

Reason Waived: Due to impacts from COVID–19 manufactured home installers have been unable to complete continuing education requirements and needed extensions to avoid lapses in licensing that would negatively impact housing installations across the country.

Contact: Angelo Wallace, Civil Engineer, Office of Manufactured Housing Programs,

Office of Housing, Department of Housing and Urban Development, 451 Seventh Street SW, Room 9170, Washington, DC 20410, telephone (202) 402-3848.

BILLING CODE 4210-67-P

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR-7029-N-09]

60-Day Notice of Proposed Information Collection: Reporting for HUD Research, Evaluation, and Demonstration Cooperative Agreements

AGENCY: Office of the Assistant Secretary for Policy Development and Research, HUD.

ACTION: Notice.

SUMMARY: The U.S. Department of Housing and Urban Development (HUD) is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

DATES: *Comments Due Date:* January 19, 2021.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Anna P. Guido, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street

SW, Room 4176, Washington, DC 20410-5000; telephone 202-402-5534 (this is not a toll-free number) or email at Anna.P.Guido@hud.gov for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339.

FOR FURTHER INFORMATION CONTACT:

Anna P. Guido, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Anna P. Guido at Anna.P.Guido@hud.gov or telephone 202-402-5535. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877-8339. Copies of available documents submitted to OMB may be obtained from Ms. Guido.

SUPPLEMENTARY INFORMATION: This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

A. Overview of Information Collection

Title of Information Collection: Reporting for HUD Research, Evaluation, Demonstration and Data Analysis Cooperative Agreements.

OMB Approval Number: 2528-0299.

Description of the need for the information and proposed use: PD&R intends to establish cooperative agreements with qualified for-profit and nonprofit research organizations and universities to conduct research, demonstrations, and data analysis. PD&R will issue a Notice of Funding

Availability (NOFA) describing the cooperative research program. Management of PD&R cooperative agreements for research and demonstrations will require periodic reporting of progress. This information collection will be limited to recipients of cooperative agreements.

Type of Request: (i.e., new, revision or extension of currently approved collection): Revision.

Agency Form Numbers: No agency forms will be used. The quarterly reporting will be accomplished through a short narrative report.

Respondents: HUD anticipates that approximately 14-18 organizations will be selected for cooperative agreement award. Recipients of the cooperative agreements will be the sole members of the affected public for the reporting requirement.

Members of Affected Public: For-profit and nonprofit organizations that apply to participate under the cooperative research agreements NOFA.

Estimated Number of Respondents frequency of response, and hours of response: HUD anticipates that a maximum of 10 organizations will receive cooperative agreements. Quarterly progress reporting, other mandatory federal reporting and recordkeeping requirements are estimated at 72 labor hours annually for each awardee during the life of the agreement. The total estimated burden for progress reporting by all participants is 648 hours annually.

Estimated Total Annual Burden Hours: 648.

Estimated Total Annual Cost: The only cost to the respondents is that of their time.

Information collection	Number of respondents	Frequency of response	Responses per annum	Burden hour per response	Annual burden hours	Hourly cost per response	Cost
Quarterly Reports	18	4	72	4	288	\$0	\$0
Other Reports	18	1	18	4	72	0	0
Recordkeeping	18	1	18	16	288	0	0
Total					648		0

B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

HUD encourages interested parties to submit comment in response to these questions.

C. Authority

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

The Assistant Secretary for Policy Development and Research, Seth Appleton, having reviewed and approved this document, is delegating the authority to electronically sign this document to submitter, Nacheshia Foxx, who is the

Federal Register Liaison for HUD, for purposes of publication in the **Federal Register**.

Nacheshia Foxx,

Federal Register Liaison for the Department of Housing and Urban Development.

BILLING CODE 4210-67-P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

[Docket No. FWS-R4-ES-2020-0135; FXES11140400000-178-FF04EF2000]

Receipt of Incidental Take Permit Application and Proposed Habitat Conservation Plan for the Sand Skink and Blue-Tailed Mole Skink; Highlands County, FL; Categorical Exclusion

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability; request for comments and information.

SUMMARY: We, the Fish and Wildlife Service (Service), announce receipt of an application from Palmetto Avon Park-HWY 17, LLC (applicant) for an incidental take permit (ITP) under the Endangered Species Act. The applicant requests the ITP to take the federally listed sand skink and blue-tailed mole skink incidental to the construction of a commercial development in Highlands County, Florida. We request public comment on the application, which includes the applicant's proposed habitat conservation plan (HCP), and on the Service's preliminary determination that this HCP qualifies as "low-effect," categorically excluded under the National Environmental Policy Act. To make this determination, we used our environmental action statement and low-effect screening form, both of which are also available for public review.

DATES: We must receive your written comments on or before December 21, 2020.

ADDRESSES:

Obtaining Documents: You may obtain copies of the documents online in Docket No. FWS-R4-ES-2020-0135 at <http://www.regulations.gov>.

Submitting Comments: If you wish to submit comments on any of the documents, you may do so in writing through the following methods:

- *Online:* <http://www.regulations.gov>. Follow the instructions for submitting comments on Docket No. FWS-R4-ES-2020-0135.

- *U.S. mail:* Public Comments Processing, Attn: Docket No. FWS-R4-ES-2020-0135; U.S. Fish and Wildlife

Service, MS: PRB/3W, 5275 Leesburg Pike, Falls Church, VA 22041-3803.

FOR FURTHER INFORMATION CONTACT:

Alfredo Begazo, by telephone at (772) 469-4234 or via email at alfredo_begazo@fws.gov. Individuals who are hearing impaired or speech impaired may call the Federal Relay Service at 1-800-877-8339 for TTY assistance.

SUPPLEMENTARY INFORMATION: We, the Fish and Wildlife Service (Service), announce receipt of an application from Palmetto Avon Park-HWY 17, LLC (applicant) for an incidental take permit (ITP) under the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*). The applicant requests the ITP to take the federally listed sand skink (*Neoseps reynoldsi*) and blue-tailed mole skink (*Eumeces egregius lividus*) (skinks) incidental to the construction of a commercial development in Highlands County, Florida. We request public comment on the application, which includes the applicant's HCP, and on the Service's preliminary determination that this HCP qualifies as "low-effect," categorically excluded under the National Environmental Policy Act (NEPA; 42 U.S.C. 4321 *et seq.*). To make this determination, we used our environmental action statement and low-effect screening form, both of which are also available for public review.

Project

The applicant requests a 5-year ITP to take skinks through the conversion of approximately 0.9 acres of occupied skink foraging and sheltering habitat incidental to the construction of a commercial development on a 1.35-acre parcel in Section 6, Township 34S, Range 29E in Highlands County, Florida. The applicant proposes to mitigate for take of the skinks by purchasing credits equivalent to 1.80 acre of skink-occupied habitat from a Service-approved conservation bank in Highlands County. The Service would require the applicant to purchase the credits prior to engaging in any phase of the project.

Public Availability of Comments

Before including your address, phone number, email address, or other personal identifying information in your comment, be aware that your entire comment, including your personal identifying information, may be made available to the public. While you may request that we withhold your personal identifying information, we cannot guarantee that we will be able to do so.

Our Preliminary Determination

The Service has made a preliminary determination that the applicant's project, including the construction of stores, driveways, parking areas, a storm water pond, and associated infrastructure (e.g., electric, water, and sewer lines) would individually and cumulatively have a minor or negligible effect on the skinks and the environment. Therefore, we have preliminarily concluded that the ITP for this project would qualify for categorical exclusion and the HCP would be low effect under our NEPA regulations at 43 CFR 46.205 and 46.210. A low-effect HCP is one that would result in (1) minor or negligible effects on federally listed, proposed, and candidate species and their habitats; (2) minor or negligible effects on other environmental values or resources; and, (3) impacts that, when considered together with the impacts of other past, present, and reasonable foreseeable similarly situated projects, would not result in significant cumulative effects to environmental values or resources over time.

Next Steps

The Service will evaluate the application and the comments to determine whether to issue the requested permit. We will also conduct an intra-Service consultation pursuant to section 7 of the ESA to evaluate the effects of the proposed take. After considering the preceding matters, we will determine whether the permit issuance criteria of section 10(a)(1)(B) of the ESA have been met. If met, the Service will issue ITP number TE82107D-0 to Palmetto Avon Park-HWY 17, LLC.

Authority

The Service provides this notice under section 10(c) of the ESA (16 U.S.C. 1539(c)) and NEPA regulation 40 CFR 1506.6.

Roxanna Hinzman,

Field Supervisor, South Florida Ecological Services Office.

BILLING CODE 4333-15-P

DEPARTMENT OF THE INTERIOR**National Park Service**

[NPS-WASO-NAGPRA-NPS0031150;
PPWOCRADNO-PCU00RP14.R50000]

Notice of Inventory Completion: The University of California Berkeley, Berkeley, CA

AGENCY: National Park Service, Interior.

ACTION: Notice.

SUMMARY: The University of California Berkeley has completed an inventory of human remains, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is a cultural affiliation between the human remains and present-day Indian Tribes or Native Hawaiian organizations. Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request to the University of California Berkeley. If no additional requestors come forward, transfer of control of the human remains to the lineal descendants, Indian Tribes, or Native Hawaiian organizations stated in this notice may proceed.

DATES: Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the University of California Berkeley at the address in this notice by December 21, 2020.

ADDRESSES: Dr. Thomas Torma, NAGPRA Liaison, Office of the Vice Chancellor for Research, University of California Berkeley, 119 California Hall, Berkeley, CA 94720-1500, telephone (510) 672-5388, email t.torma@berkeley.edu.

SUPPLEMENTARY INFORMATION: Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of The University of California Berkeley, Berkeley, CA. The human remains were removed from Modoc and Siskiyou Counties, CA.

This notice is published as part of the National Park Service's administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native

American human remains. The National Park Service is not responsible for the determinations in this notice.

Consultation

A detailed assessment of the human remains objects was made by the University of California Berkeley professional staff in consultation with representatives of the Klamath Tribes and the Modoc Nation (previously listed as The Modoc Tribe of Oklahoma).

History and Description of the Remains

Sometime prior to 1901, human remains representing, at minimum, two individuals were removed by Ernest C. Bonner from an unknown location somewhere in Modoc County, CA. These human remains, which are in a fragmentary state, form part of the "older museums collection." No known individuals were identified. No associated funerary objects are present.

As the human remains are listed as coming from a Modoc Grave in Modoc County, CA, cultural affiliation is based on archeological and historical research.

In 1913, human remains representing, at minimum, one individual were removed from Goose Lake in Modoc County, CA. These human remains were collected by H. H. Stuart from a burial ground located near a small dry run into the lake that covered one acre. The human remains are in a fragmentary state. No known individual was identified. No associated funerary objects are present.

At an unknown date, human remains representing, at minimum, eight individuals were removed from Goose Lake in Modoc County, CA, by H. H. Stuart. Stuart collected the human remains from the bed of the lake. In 1931, the human remains were accessioned by the University. The human remains are in a fragmentary state. No known individuals were identified. No associated funerary objects are present.

At an unknown time, human remains representing, at minimum, one individual were removed from the shore of Goose Lake in Modoc County, CA. The human remains were collected by the father of Dolores Bunyard, who donated them to the University in 1945. The human remains are in a fragmentary state. No known individual was identified. No associated funerary objects are present.

Goose Lake lies within the traditional territory of the Klamath Tribes. Cultural affiliation is based on archeological and historical research.

In August 1954, human remains representing, at minimum, one individual were removed by Gordon L.

Grosscup and Robert J. Squier from a burial on the shore of Copic Island in Lower Klamath Lake, Siskiyou County, CA. The remains were accessioned by the University in the same year. The human remains are in a fragmentary state. No known individual was identified. No associated funerary objects are present.

Copic Island lies within the traditional territory of the Klamath Tribes. Cultural affiliation is based on archeological and historical research.

On August 4, 1925, human remains representing, at minimum, one individual were left outside of Room 5 of the anthropology building at the University of California Berkeley. A note accompanying the human remains stated "Klamath Falls Indian." No known individual was identified. No associated funerary objects are present.

The exact location where this individual was discovered is unknown. Cultural affiliation is based on the documentation accompanying the human remains.

Determinations made by the University of California, Berkeley

Officials of the University of California, Berkeley have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of 14 individuals of Native American ancestry.

- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and the Klamath Tribes.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to Dr. Thomas Torma, NAGPRA Liaison, Office of the Vice Chancellor for Research, University of California Berkeley, 119 California Hall, Berkeley, CA 94720-1500, telephone (510) 672-5388, email t.torma@berkeley.edu, by December 21, 2020. After that date, if no additional requestors have come forward, transfer of control of the human remains to the Klamath Tribes may proceed.

The University of California Berkeley is responsible for notifying the Klamath Tribes and the Modoc Nation (previously listed as The Modoc Tribe of Oklahoma) that this notice has been published.

Dated: November 2, 2020.

Melanie O'Brien,

Manager, National NAGPRA Program.

BILLING CODE 4312–52–P

DEPARTMENT OF THE INTERIOR

Bureau of Ocean Energy Management

[OMB Control Number 1010–0082; Docket ID: BOEM–2017–0016]

Agency Information Collection Activities; Leasing of Minerals Other Than Oil, Gas, and Sulphur in the Outer Continental Shelf

AGENCY: Bureau of Ocean Energy Management, Interior.

ACTION: Notice of information collection; request for comment.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995, the Bureau of Ocean Energy Management (BOEM) is proposing to renew an information collection request (ICR).

DATES: Interested persons are invited to submit comments on or before January 19, 2021.

ADDRESSES: Send your comments on this ICR by mail to the BOEM Information Collection Clearance Officer, Anna Atkinson, Bureau of Ocean Energy Management, 45600 Woodland Road, Sterling, Virginia 20166; or by email to anna.atkinson@boem.gov. Please reference OMB Control Number 1010–0082 in the subject line of your comments.

FOR FURTHER INFORMATION CONTACT: To request additional information about this ICR, contact Anna Atkinson by email, or by telephone at 703–787–1025.

SUPPLEMENTARY INFORMATION: In accordance with the Paperwork Reduction Act of 1995, BOEM provides the general public and other Federal agencies with an opportunity to comment on new, proposed, revised, and continuing collections of information. This helps BOEM assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

BOEM is soliciting comments on the proposed ICR described below. BOEM is especially interested in public comment addressing the following issues: (1) Is the collection necessary to the proper functions of BOEM; (2) what can BOEM do to ensure that this information is processed and used in a timely manner; (3) is the burden estimate accurate; (4)

how might BOEM enhance the quality, utility, and clarity of the information to be collected; and (5) how might BOEM minimize the burden of this collection on the respondents, including minimizing the burden through the use of information technology?

Comments submitted in response to this notice are a matter of public record. BOEM will include or summarize each comment in our request to the Office of Management and Budget (OMB) for approval of this ICR. You should be aware that your entire comment—including your address, phone number, email address, or other personally identifiable information—may be made publicly available at any time. In order for BOEM to withhold from disclosure your personally identifiable information, you must identify any information contained in the submittal of your comments that, if released, would constitute a clearly unwarranted invasion of your personal privacy. You must also briefly describe any possible harmful consequences of the disclosure of information, such as embarrassment, injury, or other harm. While you can ask us in your comment to withhold your personally identifiable information from public review, we cannot guarantee that we will be able to do so.

BOEM protects proprietary information in accordance with the Freedom of Information Act (5 U.S.C. 552) and the Department of the Interior's implementing regulations (43 CFR part 2).

Title of Collection: 30 CFR part 581, Leasing of Minerals Other than Oil, Gas, and Sulphur in the Outer Continental Shelf.

Abstract: The Outer Continental Shelf (OCS) Lands Act (Act), as amended (43 U.S.C. 1334 and 43 U.S.C. 1337(k)), authorizes the Secretary of the Interior (Secretary) to administer the provisions relating to the leasing of the OCS, and to prescribe such rules and regulations as may be necessary to carry out such provisions. Additionally, the Act authorizes the Secretary to implement regulations to grant to qualified persons, offering the highest cash bonuses on the basis of competitive bidding, leases of any mineral other than oil, gas, and sulphur. This applies to any area of the OCS not then under lease for such mineral upon royalty, rental, and other terms and conditions that the Secretary may prescribe at the time of the lease offer. The Secretary is to administer the leasing provisions of the Act and prescribe the rules and regulations necessary to carry out those provisions.

Regulations at 30 CFR part 581 implement these statutory requirements. There has been no leasing activity in the

OCS for minerals other than oil, gas, or sulphur under these regulations for many years, and so BOEM has not generally collected information under this Part of its regulations; however, because these are regulatory requirements, the potential exists for information to be collected. Therefore, we are renewing OMB approval for this information collection.

BOEM will use the information required by 30 CFR part 581 to determine if statutory requirements are met prior to the issuance of a lease. Specifically, BOEM will use the information to:

- Evaluate the area and minerals requested by the lessee to assess the viability of offering leases for sale;
- Request the state(s) to initiate the establishment of a joint task force to assess the proposed action;
- Ensure excessive overriding royalty interests are not created that would put economic constraints on all parties involved;
- Document that a leasehold or geographical subdivision has been surrendered by the record title holder; and
- Determine if activities on the proposed lease area(s) will have a significant impact on the environment.

OMB Control Number: 1010–0082.

Form Number: None.

Type of Review: Renewal of a currently approved collection.

Respondents/Affected Public: As there are no active respondents, we estimate the potential annual number of respondents to be one. Potential respondents are OCS lease requestors, state governments, and OCS lessees.

Total Estimated Number of Annual Responses: 10 responses.

Total Estimated Number of Annual Burden Hours: 984 hours.

Respondent's Obligation: Required to retain or obtain a benefit.

Frequency of Collection: On occasion.

Total Estimated Annual Non-Hour Burden Cost: \$29 non-hour cost burden.

The following table details the individual components and respective hour burden estimates of this ICR. We assumed that respondents perform certain requirements in the normal course of their activities. We consider these to be usual and customary and took that into account in estimating the burden. BOEM is decreasing the total non-hour cost burden from \$50 to \$29 to reflect the current filing application fee amount.

BURDEN TABLE

Citation 30 CFR 581	Reporting and/or recordkeeping requirements *	Non-hour cost burden(s) *

* In the future, BOEM may require electronic filing of certain submissions.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information

unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

Deanna Meyer-Pietruszka,

Chief, Office of Policy, Regulation, and Analysis.

[FR Doc. 2020-25510 Filed 11-18-20; 8:45 am]

BILLING CODE 4310-MR-P

INTERNATIONAL TRADE COMMISSION

[Investigation Nos. 701-TA-658-659 and 731-TA-1538-1542 (Preliminary)]

Aluminum Foil From Armenia, Brazil, Oman, Russia, and Turkey

Determinations

On the basis of the record¹ developed in the subject investigations, the United States International Trade Commission ("Commission") determines, pursuant to the Tariff Act of 1930 ("the Act"), that there is a reasonable indication that an industry in the United States is materially injured by reason of imports of aluminum foil from Armenia, Brazil, Oman, Russia, and Turkey, that are alleged to be sold in the United States at less than fair value ("LTFV") and imports of aluminum foil that are allegedly subsidized by the governments of Oman and Turkey.² The products subject to these investigations are primarily provided for in subheadings 7607.11.30, 7607.11.60, 7607.11.90, and 7607.19.60 of the Harmonized Tariff Schedule of the United States ("HTS").

Commencement of Final Phase Investigations

Pursuant to section 207.18 of the Commission's rules, the Commission also gives notice of the commencement of the final phase of its investigations. The Commission will issue a final phase notice of scheduling, which will be published in the **Federal Register** as provided in § 207.21 of the Commission's rules, upon notice from the U.S. Department of Commerce ("Commerce") of affirmative preliminary determinations in the investigations under §§ 703(b) or 733(b) of the Act, or, if the preliminary determinations are negative, upon notice of affirmative final determinations in those investigations under §§ 705(a) or 735(a) of the Act. Parties that filed entries of appearance in the preliminary phase of the investigations need not enter a separate appearance for the final phase of the investigations. Industrial users, and, if the merchandise under investigation is

sold at the retail level, representative consumer organizations have the right to appear as parties in Commission antidumping and countervailing duty investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

Background

On September 29, 2020, the Aluminum Association Trade Enforcement Working Group, Arlington, Virginia, and its individual members—Granges Americas, Inc., Franklin, Tennessee; JW Aluminum Company, Daniel Island, South Carolina; and Novelis Corporation, Atlanta, Georgia, filed petitions with the Commission and Commerce, alleging that an industry in the United States is materially injured or threatened with material injury by reason of imports of aluminum foil from Armenia, Brazil, Oman, Russia, and Turkey that are alleged to be sold in the United States at LTFV and alleged to be subsidized by the governments of Oman and Turkey. Accordingly, effective September 29, 2020, the Commission instituted countervailing duty investigation Nos. 701-TA-658-659 and antidumping duty investigation Nos. 731-TA-1538-1542 (Preliminary).

Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of October 5, 2020 (85 FR 62759). In light of the restrictions on access to the Commission building due to the COVID-19 pandemic, the Commission conducted its conference through written testimony and video conference on October 20, 2020. All persons who requested the opportunity were permitted to participate.

The Commission made these determinations pursuant to §§ 703(a) and 733(a) of the Act (19 U.S.C. 1671b(a) and 1673b(a)). It completed and filed its determinations in these investigations on November 13, 2020. The views of the Commission are contained in USITC Publication 5138 (November 2020), entitled *Aluminum Foil from Armenia, Brazil, Oman, Russia, and Turkey: Investigation Nos. 701-TA-658-659 and 731-TA-1538-1542 (Preliminary)*.

By order of the Commission.

Issued: November 13, 2020.

Lisa Barton,

Secretary to the Commission.

[FR Doc. 2020-25489 Filed 11-18-20; 8:45 am]

BILLING CODE 7020-02-P

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337-TA-1211]

Certain Vaporizer Cartridges and Components and Accessories Thereof; Notice of Commission Determination Not To Review an Initial Determination Granting Complainant's Motion for Leave To Amend the Complaint and Notice of Investigation

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission ("Commission") has determined not to review the Administrative Law Judge's ("ALJ") initial determination ("ID") (Order No. 22) granting the complainant's motion for leave to amend the complaint and notice of investigation.

FOR FURTHER INFORMATION CONTACT: Lynde Herzbach, Office of the General Counsel, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436, telephone (202) 205-3228. Copies of non-confidential documents filed in connection with this investigation may be viewed on the Commission's electronic docket (EDIS) at <https://edis.usitc.gov>. For help accessing EDIS, please email EDIS3Help@usitc.gov. General information concerning the Commission may also be obtained by accessing its internet server at <https://www.usitc.gov>. Hearing-impaired persons are advised that information on this matter can be obtained by contacting the Commission's TDD terminal on (202) 205-1810.

SUPPLEMENTARY INFORMATION: On August 14, 2020, the Commission instituted this investigation based on a complaint, as supplemented, filed on behalf of Juul Labs, Inc. of San Francisco, California. 85 FR 49679 (Aug. 14, 2020). The complaint, as supplemented, alleges violations of section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, based upon the importation into the United States, the sale for importation, and the sale within the United States after importation of certain vaporizer cartridges and components thereof by reason of infringement of U.S. Design Patent Nos.

¹ The record is defined in § 207.2(f) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(f)).

² 85 FR 67711 (October 26, 2020) and 85 FR 68287 (October 28, 2020).

D842,536; D858,870; D858,869; and D858,868. *Id.* The complaint further alleges that a domestic industry exists. *Id.* The Commission's notice of investigation names forty-nine (49) respondents, including 2nd Wife Vape of Haslet, Texas ("2nd Wife Vape"); CaryTown Tobacco of Richmond, Virginia ("CaryTown Tobacco"); eJuiceDB of Farmingdale, New York ("eJuiceDB"); EZFumes of Bedford, Texas ("EZFumes"); Limitless Accessories, Inc. of Tinley Park, Illinois ("Limitless Accessories, Inc."); Mr. Fog of Bensenville, Illinois ("Mr. Fog"); Naturally Peaked Health Co. of Brewster, New York ("Naturally Peaked Health Co."); Price Point NY of Farmingdale, New York ("Price Point NY"); Puff E-Cig of Imlay City, Michigan ("Puff E-Cig"); Shenzhen Azure Tech USA LLC f/k/a DS Vaping P.R.C. of Guangdong, China ("Shenzhen Azure Tech USA LLC f/k/a DS Vaping P.R.C."); Shenzhen Yark Technology Co., Ltd. of Shenzhen, China ("Shenzhen Yark Technology Co., Ltd."); Smoker's Express of Auburn Hills, Michigan ("Smoker's Express"); Tobacco Alley of Midland of Midland, Texas ("Tobacco Alley of Midland"); Valgous of Bensenville, Illinois ("Valgous"); and Vape 'n Glass of Streamwood, Illinois ("Vape 'n Glass"). *See id.* The Office of Unfair Import Investigations ("OUII") is also a party to the investigation. *See id.*

On October 5, 2020, the complainant filed a motion to amend the complaint and notice of investigation to correct the addresses and list the full legal names of certain respondents. Specifically, the complainant seeks to: (1) Include the true legal names for respondents 2nd Wife Vape, CaryTown Tobacco, eJuiceDB, EZFumes, Price Point NY, Smoker's Express, Tobacco Alley of Midland, Vape 'n Glass, Naturally Peaked Health Co., and Puff E-Cig; (2) correct the addresses for respondents Shenzhen Azure Tech USA LLC f/k/a DS Vaping P.R.C. and Shenzhen Yark Technology Co., Ltd.; (3) correct that respondents Limitless Accessories, Inc. and Valgous are a single legal entity named Limitless Accessories, Inc. d/b/a Valgous; and (4) correct both the name and address for respondent Mr. Fog.

None of the respondents filed a response. On October 15, 2020, OUII filed a response supporting complainant's motion.

On October 21, 2020, the ALJ issued the subject ID granting, pursuant to Commission Rule 210.14(b) (19 CFR 210.14(b)), the complainant's motion. *See* Order No. 22 (Oct. 21, 2020). No party petitioned for review of the subject ID.

The Commission has determined not to review the subject ID.

The Commission vote for this determination took place on November 13, 2020.

While temporary remote operating procedures are in place in response to COVID-19, the Office of the Secretary is not able to serve parties that have not retained counsel or otherwise provided a point of contact for electronic service. Accordingly, pursuant to Commission Rules 201.16(a) and 210.7(a)(1) (19 CFR 201.16(a), 210.7(a)(1)), the Commission orders that the complainant complete service for any party/parties without a method of electronic service noted on the attached Certificate of Service and shall file proof of service on the Electronic Document Information System (EDIS).

The authority for the Commission's determination is contained in section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), and in Part 210 of the Commission's Rules of Practice and Procedure (19 CFR part 210).

By order of the Commission.

Issued: November 13, 2020.

Lisa Barton,

Secretary to the Commission.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Pistoia Alliance, Inc.

Notice is hereby given that, on October 19, 2020, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. Section 4301 *et seq.* (the "Act"), Pistoia Alliance, Inc. filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, WorldQuant Predictive, New York, NY; tellic, New York, NY; Synthace Ltd., London, UNITED KINGDOM; Scinapsis Analytics Inc. d/b/a BenchSci, Toronto, CANADA; Sapio Sciences, Baltimore, MD; Owkin, New York, NY; Novo Nordisk, Plainsboro, NJ; Iktos, Paris, FRANCE; GenAlz, Longueuil, CANADA; Elucidata Corporation, New Delhi,

INDIA; ClinLine, Leiderdorp, NETHERLANDS; Biorelate Ltd., Oldham, UNITED KINGDOM; and Alchemy CGI, Arlington, MA have been added as parties to this venture.

Also, Tag.bio, San Francisco, CA; Stattice GmbH, Berlin, GERMANY; Sciligence Corporation, Cambridge, MA; and Kinapse Limited, London, UNITED KINGDOM have withdrawn as parties to this venture.

No other changes have been made in either the membership or planned activity of the group research project. Membership in this group research project remains open, and Pistoia Alliance, Inc. intends to file additional written notifications disclosing all changes in membership.

On May 28, 2009, Pistoia Alliance, Inc. filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to Section 6(b) of the Act on July 15, 2009 (74 FR 34364).

The last notification was filed with the Department on July 21, 2020. A notice was published in the **Federal Register** pursuant to Section 6(b) of the Act on August 28, 2020 (85 FR 53400).

Suzanne Morris,

Chief, Premerger and Division Statistics, Antitrust Division.

Notice Pursuant to the National Cooperative Research and Production Act of 1993—DVD Copy Control Association

Notice is hereby given that, on October 14, 2020, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* ("the Act"), the DVD Copy Control Association ("DVD CCA") has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing changes in its membership. The notifications were filed for the purpose of extending the Act's provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances. Specifically, AutoSound Electronics (HK) Ltd., Hong Kong, HONG KONG SAR; and Daesung Eltec Co., Ltd., Seoul, SOUTH KOREA, have withdrawn as parties to this venture.

No other changes have been made in either the membership or planned

activity of the group research project. Membership in this group research project remains open, and DVD CCA intends to file additional written notifications disclosing all changes in membership.

On April 11, 2001, DVD CCA filed its original notification pursuant to Section 6(a) of the Act. The Department of Justice published a notice in the **Federal Register** pursuant to Section 6(b) of the Act on August 3, 2001 (66 FR 40727).

The last notification was filed with the Department on July 10, 2020. A notice was published in the **Federal Register** pursuant to Section 6(b) of the Act on July 31, 2020 (85 FR 46177).

Notice Pursuant to the National Cooperative Research and Production Act of 1993—Information Warfare Research Project Consortium

Notice is hereby given that, on October 21, 2020, pursuant to Section 6(a) of the National Cooperative Research and Production Act of 1993, 15 U.S.C. 4301 *et seq.* (“the Act”), Maritime Sustainment and Technology Innovation Consortium (“MSTIC”) has filed written notifications simultaneously with the Attorney General and the Federal Trade Commission disclosing (1) the identities of the parties to the venture and (2) the nature and objectives of the venture. The notifications were filed for the purpose of invoking the Act’s provisions limiting the recovery of antitrust plaintiffs to actual damages under specified circumstances.

Pursuant to Section 6(b) of the Act, the identities of the parties to the venture are: Adaptive Intelligence [AI] Corporation, Banks, OR; ANDRO Computational Solutions, LLC, Rome, NY; Applied Engineering Concepts, Incorporated, Eldersburg, MD; Ashwin-Ushas Corporation, Holmdel, NJ; Colvin Run Networks Inc., Leesburg, VA; Delphinus Engineering, Inc., Eddystone, PA; EHS Technologies Corporation, Moorestown, NJ; Green Expert Technology, Haddonfield, NJ; HII Fleet Support Group LLC, Virginia Beach, VA; Huntington Ingalls Industries Inc., Newport News, VA; ITL LLC., Hampton, VA; Kern Technology Group, LLC, Virginia Beach, VA; Life Cycle

Engineering, Inc., North Charleston, SC; LMI Consulting, LLC, Tysons Corner, VA; Lockheed Martin Corporation—Missiles and Fire Control, Orlando, FL; Main Sail, LLC, Chesterland, OH; Makai Ocean Engineering, Inc., Waimanalo, HI; Micro Focus Government, Solutions LLC, Vienna, VA; NDI Engineering Company, Thorofare, NJ; nGAP Inc., Bonsall, CA; Peregrine Technical Solutions, LLC, Yorktown, VA; Perspecta Labs, Basking Ridge, NJ; Polaris Sensor Technologies, Huntsville, AL; Precision Custom Components, York, PA; QED Systems Inc., Virginia Beach, VA; R Squared Solutions, LLC, Chesapeake, VA; SERCO Inc., Herndon, VA; Siemens Energy, Inc./Marine Solutions, Alpharetta, GA; Southeastern Computer Consultants, Inc., Frederick, MD; Southwest Research Institute, Antonio, TX; Stottler Henke Associates, Inc., San Mateo, CA; TDI Technologies, Inc., King of Prussia, PA; Technical Systems Integrators, Inc., Longwood, FL; and Techtrend, Fairfax, VA.

The general area of MSTIC’s planned activities are to respond to requirements of the Naval Surface Warfare Center, Philadelphia Division (NSWCPD) for innovative sustainment technological solutions to address current and future security threats in maritime environments including the Navy’s ships, submarines, military watercraft and unmanned vehicles. MSTIC’s planned activity is to conduct research, development, and prototyping of projects and programs in the following technology areas: COTS Obsolescence and Tech Refresh Product Development; Data Transformation; Cyber; Fleet Introduction Technologies; Waterfront Industry Support Operations; Develop Asset Fabrication, Revitalization (Remanufacturing) and Packaging Innovations; Logistic Supply Chain Management; and Research and Development. The consortium was formed effective August 21, 2020.

BILLING CODE 4410–11–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 20–18]

Lewis Leavitt III, M.D.; Decision and Order

On March 11, 2020, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause (hereinafter, OSC) to Lewis Leavitt III, M.D. (hereinafter, Respondent) of Houston, Texas. OSC, at 1. The OSC proposed the revocation of Respondent’s Certificate of Registration No. AL1308370. *Id.* It alleged that Respondent is without “authority to handle controlled substances in Texas, the state in which [Respondent is] registered with DEA.” *Id.* at 1–2.

Specifically, the OSC alleged that on January 6, 2020, the Texas Medical Board (hereinafter, Board) suspended Respondent’s medical license, which also expired on February 28, 2020. *Id.* The OSC therefore alleged that Respondent lacks authority to handle controlled substances in Texas. *Id.* (citing 21 U.S.C. 824(a)(3)).

The OSC notified Respondent of the right to request a hearing on the allegations or to submit a written statement, while waiving the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* at 2 (citing 21 CFR 1301.43). The OSC also notified Respondent of the opportunity to

submit a corrective action plan. *Id.* at 2–3 (citing 21 U.S.C. 824(c)(2)(C)).

By letter dated April 10, 2020, Respondent timely requested a hearing.¹ Hearing Request, at 1. In the Hearing Request, Respondent stated that he “expects to prevail in the Texas Medical Board proceedings that are pending.” *Id.*

The Office of Administrative Law Judges put the matter on the docket and assigned it to Administrative Law Judge Mark M. Dowd (hereinafter, ALJ). The ALJ issued an Order for Prehearing Statements, dated April 13, 2020. The Government timely complied with the Briefing Schedule by filing a Motion for Summary Disposition on April 22, 2020, (hereinafter, Government Motion or Govt Motion). In its Motion, the Government submitted evidence that Respondent’s Texas medical license had been suspended and that he therefore lacked authority to handle controlled substances in Texas, the state in which he is registered with DEA. Govt Motion, at 1. In light of these facts, the Government argued that DEA must revoke his registration. Govt Motion, at 3.

On May 1, 2020,² Respondent, requested that the revocation action be suspended until the Board made a final decision on the temporary suspension. Respondent’s Prehearing Statement, at 1.

On May 6, 2020, the ALJ issued an Order Granting the Government’s Motion for Summary Disposition, and Recommended Rulings, Findings of Fact, Conclusions of Law, and Recommended Decision of the Administrative Law Judge (hereinafter, Summary Disposition or SD). In the Summary Disposition, the ALJ denied Respondent’s request for a stay of the proceedings until the Texas Medical Board had concluded its proceedings.³ SD, at 4–5. The ALJ noted that, “even though the Respondent was actively engaged in negotiating or appealing a State Board decision, [i]t is not DEA’s policy to stay [administrative] proceedings . . . while registrants

litigate in other forums.” SD, at 5 (citing *Newcare Home Health Servs.*, 72 FR 42,126, 42,127 n.2 (2007)). The ALJ then granted the Government Motion for Summary Disposition. *Id.* The ALJ found that “summary disposition of an administrative case is warranted where, as here, ‘there is no factual dispute of substance.’” SD, at 7 (citing *Veg-Mix, Inc. v. U.S. Dep’t of Agric.*, 832 F.2d 601, 607 (D.C. Cir. 1987) (“[A]n agency may ordinarily dispense with a hearing when no genuine dispute exists.” (citations omitted))). By letter dated June 15, 2020, the ALJ certified and transmitted the record to me for final Agency action. In that letter, the ALJ advised that neither party filed exceptions. I find that the time period to file exceptions has expired. See 21 CFR 1316.66.

I issue this Decision and Order based on the entire record before me. 21 CFR 1301.43(e). I make the following findings of fact.

Findings of Fact

Respondent’s DEA Registration

Respondent is the holder of DEA Certificate of Registration No. AL1308370 at the registered address of 1900 Yorktown Street, Apartment 728, Houston, Texas 77056. Govt Motion Exhibit (hereinafter, GX) 1, at 1. Pursuant to this registration, Respondent is authorized to dispense controlled substances in schedules II through V as a “practitioner.” *Id.* Respondent’s registration expires on March 31, 2021, and is currently in “active pending status.” *Id.*

The Status of Respondent’s State License

On January 6, 2020, the Texas State Medical Board issued an Order of Temporary Suspension (hereinafter, Board Order) without notice of hearing to Respondent “effective on the date rendered.” GX 2 (Board Order), at 5–6. According to the Board Order, Respondent “engaged in unprofessional and dishonorable conduct” and “also engaged in the non-therapeutically prescribing of opioids and a muscle relaxant, carisprodol, to multiple patients.” *Id.* The Board found that Respondent’s “continuation in the practice of medicine would constitute a continuing threat to the public welfare.” *Id.* at 5.

According to Texas’s online records, of which I take official notice, Respondent’s registration status is “delinquent-non payment” and his disciplinary status is “suspended by

board.”⁴ Texas Medical Board Healthcare Provider Search, https://public.tmb.state.tx.us/HCP_Search/SearchNotice.aspx (last visited October 27, 2020).

Based on the entire record before me, I find that Respondent currently is not licensed to engage in the practice of medicine in Texas, the state in which Respondent is registered with DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the CSA “upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing⁵ of controlled substances.” With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. See, e.g., *James L. Hooper, M.D.*, 76 FR 71,371 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C.

⁴ Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Respondent may dispute my finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Respondent files a motion, the Government shall have fifteen calendar days to file a response. Any motion and response shall be filed and served by email to the other party and to the Office of the Administrator at dea.addo.attorneys@dea.usdoj.gov.

⁵ “[D]ispense[] means to deliver a controlled substance to an ultimate user . . . by, or pursuant to the lawful order of, a practitioner, including the prescribing and administering of a controlled substance” 21 CFR 802(10).

¹ The Hearing Request was deemed filed on April 10, 2020. Order for Prehearing Statements, at 1. I, thus, find that the Government’s service of the OSC was adequate.

² Respondent submitted a “Motion to Accept Late Filed Prehearing Statement,” which noted that the prehearing statement was emailed a few hours after the deadline set by the ALJ and requested that it be accepted nonetheless. The ALJ found, and I agree, that “neither party [would] be unduly prejudiced by acceptance of the Respondent’s out-of-time Prehearing Statement.” Order Granting the Government’s Motion for Summary Disposition, and Recommended Rulings, Findings of Fact, Conclusions of Law, and Recommended Decision of the Administrative Law Judge, at 3 n.1.

³ I find no error in the ALJ’s decision to continue DEA’s proceedings.

802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that "[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices." 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner's registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper*, 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.*, 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton*, 43 FR at 27,617.

Moreover, because "the controlling question" in a proceeding brought under 21 U.S.C. 824(a)(3) is whether the holder of a practitioner's registration "is currently authorized to handle controlled substances in the state," *Hooper*, 76 FR at 71,371 (quoting *Anne Lazar Thorn*, 62 FR 12,847, 12,848 (1997)), the Agency has long held that revocation is warranted even where a practitioner is still challenging the underlying action. *Bourne Pharmacy*, 72 FR 18,273, 18,274 (2007); *Wingfield Drugs*, 52 FR 27,070, 27,071 (1987). Thus, it is of no consequence that the action is being appealed. What is consequential is my finding that Respondent is no longer currently authorized to dispense controlled substances in Texas, the state in which he is registered.

Under the Texas Controlled Substances Act, a practitioner in Texas "may not prescribe, dispense, deliver, or administer a controlled substance or cause a controlled substance to be administered under the practitioner's direction and supervision except for a valid medical purpose and in the course of medical practice." Tex. Health and Safety Code Ann. § 481.071 (West 2019). The Texas Controlled Substances Act defines "practitioner," in relevant part, as "a physician . . . licensed, registered, or otherwise permitted to distribute, dispense, analyze, conduct research with respect to, or administer a controlled substance in the course of professional practice or research in this state." *Id.* at § 481.002 (39)(A). Further, under the Texas Medical Practice Act, a person must hold a license to practice medicine in Texas. Tex. Occupations Code Ann. § 155.001 (West 2019) ("A

person may not practice medicine in this state unless the person holds a license issued under [the Medical Practice Act]."); *see also id.* at § 151.002 ("Physician" means a person licensed to practice medicine in this state."). Additionally, "[a] person commits an offense if the person practices medicine in [Texas] in violation of" the Act. *Id.* at § 165.152(a).

Here, the undisputed evidence in the record is that Respondent currently lacks authority to practice medicine in Texas. I, therefore, find that Respondent is currently without authority to dispense controlled substance in Texas, the state in which he is registered with DEA, and I will order that Respondent's DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. AL1308370 issued to Lewis Leavitt III, M.D. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending application of Lewis Leavitt III, M.D. to renew or modify this registration, as well as any other application of Lewis Leavitt III, M.D. for additional registration in Texas. This Order is effective December 21, 2020.

Timothy J. Shea,

Acting Administrator.

[FR Doc. 2020–25521 Filed 11–18–20; 8:45 am]

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket Nos. 17–09 and 17–10]

Suntree Pharmacy and Suntree Medical Equipment, LLC; Decision and Order

I. Procedural History

On October 5, 2016, a former Assistant Administrator for Diversion Control of the Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause (hereinafter, OSC) to Suntree Pharmacy (hereinafter, Respondent Pharmacy) and Suntree Medical Equipment LLC (hereinafter, Respondent LLC) (hereinafter collectively, Respondents), of Melbourne, Florida. Administrative Law Judge (hereinafter, ALJ) Exhibit (hereinafter, ALJX) 1, (OSC) at 1. The OSC proposed the revocation of and denial of any pending application to modify or renew Respondents'

Certificates of Registration Nos. BS7384174 and FS2194289 "pursuant to 21 U.S.C. 823(f) and 824(a)(4) for the reason that [Respondents'] continued registrations are inconsistent with the public interest, as that term is defined in 21 U.S.C. 823(f)." *Id.*

Specifically, the OSC alleged that "over the course of the seventeen month period from October 2013 through March 2015, [Respondents'] pharmacists filled over 200 controlled substances prescriptions outside the usual course of pharmacy practice in violation of 21 CFR 1306.06, and in contravention of their 'corresponding responsibility' under 21 CFR 1306.04(a)." OSC, at 2. The OSC further alleged that Respondent Pharmacy's failure to exercise its corresponding responsibility was evidenced by its "repeatedly fill[ing] controlled substance prescriptions that contained multiple red flags of diversion and/or abuse without addressing or resolving those red flags, and under circumstances indicating that the pharmacists were willfully blind or deliberately ignorant of the prescriptions' illegitimacy." *Id.* (citing *JM Pharmacy Group, Inc., d/b/a Farmacia Nueva and Best Pharma Corp.*, 80 FR 28,667, 28,670 (2015)). The OSC listed seven red flags of diversion that Respondent Pharmacy allegedly did not resolve prior to filling prescriptions and listed twenty-two¹ patients whose prescriptions indicated red flags. *Id.* at 4, 5–9. Furthermore, the OSC alleged that Respondent Pharmacy was dispensing controlled substances to a physician who wrote prescriptions to himself in violation of Florida law and violated federal law in dispensing controlled substances to an office. *Id.* at 4 (citing Fla. Stat. § 458.331(1)(r) and 21 CFR 1306.04(b)).

The OSC alleged additional violations of Florida state law including: Title XLVI, Fla. Stat., Ch. 893.04(2)(a) (requiring a pharmacist filling a prescription to determine "in the exercise of her or his professional judgment, that the order is valid"); Fla. Bd. of Pharm. Rule 64B16–21.810(1) (requiring a pharmacist to review the patient record before filling a new or refilling a prescription for therapeutic appropriateness); Fla. Administrative Rule 64B16–27.800 (requiring the maintenance of retrievable records including "[p]harmacist comments relevant to the individual's drug therapy" and "any related information

¹ The OSC listed allegations related to three patients, R.A., A.B., and E.A., which the Government withdrew during the hearing "to save time." Tr. 689.

indicated by a licensed health care practitioner.”); *Id.* at 3.

The OSC notified Respondents of the right to request a hearing on the allegations or to submit a written statement, while waiving the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* at 10–11 (citing 21 CFR 1301.43). The OSC also notified Respondents of the opportunity to submit a corrective action plan. *Id.* at 11 (citing 21 U.S.C. 824(c)(2)(C)).

On November 8, 2016, Respondents filed an appearance and a Motion for Extension of Time to File a Request for a Hearing, which the Administrative Law Judge (hereinafter, ALJ) granted in part on November 29, 2016. ALJX 2 (Extension Request), ALJX 5 (Order Granting in Part Extension). Respondents filed a Request for Hearing on November 29, 2016. ALJX 6 (Request for Hearing). The matter was placed on the docket of the Office of Administrative Law Judges and assigned to ALJ Charles W. Dorman (hereinafter, the ALJ). On November 29, 2016, the ALJ established a schedule for the filing of prehearing statements. ALJX 7 (Order for Prehearing Statements). The Government filed its Prehearing Statement on December 20, 2016, and Respondent filed its Prehearing Statement on January 26, 2017.² ALJX 8 (hereinafter, Govt Prehearing) and ALJX 12 (hereinafter, Resp Prehearing). On January 31, 2017, the ALJ issued his Prehearing Ruling that, among other things, ordered that the two matters of Respondent LLC and Respondent Pharmacy would be heard in a consolidated hearing, to which both parties consented, and set out six stipulations already agreed upon and established schedules for the filing of additional joint stipulations and supplemental prehearing statements, which were filed by both the Respondent and the Government on March 8 and 20, 2017, respectively. ALJX 14 (Prehearing Ruling), at 1–5; ALJX 17 (hereinafter, Resp Supp Prehearing); ALJX 16 (hereinafter, Govt Supp Prehearing). During the prehearing proceedings, the Government filed a Motion *In Limine*, requesting that certain portions of the Respondents’ testimony and evidence be excluded at the hearing. See ALJX 21 (hereinafter, Govt Mot *In Limine*). In response to the Government’s Motion and Respondents’ response, the ALJ ruled that the proposed testimony of customer J.S.3 was irrelevant, because the issue is

“legal, rather than factual, in nature.”³ ALJX 27, at 3 (Order Granting in part Govt Mot *In Limine*). The ALJ denied the Government’s request to exclude the testimony of several practitioners, the legitimacy of whose prescriptions was at issue in the case, but Respondents ultimately did not present testimony from these individuals. I have reviewed and agree with the procedural rulings of the ALJ with the exception of some of the bases for the findings in the Order Granting in part Govt Mot *In Limine* as explained *infra* Section III(A)(1)(c) and (d). The parties agreed to stipulations about the distances between patients and doctors and Respondent Pharmacy, the schedules and brand names of controlled substances, all of which are incorporated herein. RD, at 16–21.

The hearing in this matter spanned three days.⁴ The Government filed its Proposed Findings of Fact, Conclusions of Law and Argument on June 19, 2017. ALJX 35 (hereinafter, Govt Posthearing). Respondent filed its Closing Argument, Proposed Findings of Fact, and Conclusions of Law on June 19, 2017. ALJX 36 (hereinafter, Resp Posthearing). The Recommended Rulings, Findings of Fact, Conclusions of Law and Decision of the Administrative Law Judge (hereinafter, RD) is dated August 15, 2017. Both the Government and the Respondents filed exceptions to the RD on September 5, 2017 (hereinafter, Govt Exceptions) and September 1, 2017 (hereinafter, Resp Exceptions) (respectively). ALJ Transmittal Letter, at 1. On September 18, 2017, the ALJ transmitted his RD, along with the certified record, to me. *Id.*

Having considered this matter in the entirety, I find that the record as a whole established by substantial evidence that Respondent Pharmacy committed acts that render its continued registration inconsistent with the public interest. Respondent Pharmacy filled hundreds of prescriptions without fulfilling its corresponding responsibility and acting outside of the usual course of professional practice in Florida, in violation of federal and state law. I conclude that revocation of Respondents’ registrations and denial of any pending application to renew or modify Respondents’ registrations are appropriate sanctions.

I issue this Decision and Order based on the entire record before me. 21 CFR

1301.43(e). I make the following findings of fact.

II. Findings of Fact

A. Respondents’ DEA Registrations

Respondents are registered with the DEA as retail pharmacies in schedules II through V under DEA Certificate of Registration Nos. FS2194289 and BS7384174 at the registered addresses of 7640 North Wickham Road, Suites 116 and 117, Melbourne, FL 32940. Government Exhibit (hereinafter, GX) 1.

B. The Government’s Case

The Government’s documentary evidence consists primarily of prescriptions and profile information for twenty-five patients. The Government called four witnesses: an expert, Dr. Tracey Gordon (hereinafter, Dr. Gordon), a DEA Diversion Investigator (hereinafter, the DI), an employee at Respondent LLC (hereinafter, M.P.), and Dr. Diahn Clark, Respondents’ Owner and Pharmacist in Charge (PIC) (hereinafter, Respondents’ Owner and PIC), whose testimony is summarized under the Respondents’ Case section.

1. Dr. Gordon

Dr. Gordon has a bachelor’s degree and a doctorate in pharmacy and is currently employed as a clinical hospice pharmacist. RD, at 7; Transcript (hereinafter, Tr.) at 22; GX 26 (Dr. Gordon’s resume). She holds a Florida pharmacy license and Florida consultant license and she also has twelve years of experience as a retail pharmacist, but she has not practiced as a retail pharmacist in a few years. Tr. 24. As a consultant pharmacist, Dr. Gordon inspects facilities like nursing homes and hospices to make sure that they are following Florida laws. *Id.* at 30. She is familiar with federal and Florida laws regarding dispensing controlled substances and was accepted as “an expert who is familiar with the practice of pharmacy in the State of Florida.” RD, at 7; Tr. 26, 31–32. The matters to which Dr. Gordon testified included a pharmacist’s corresponding responsibility in the State of Florida including the resolution of prescriptions presenting red flags, what constitutes a red flag, and her review and analysis of the prescriptions presented by the Government. Tr. 21–311. She reviewed a series of prescriptions, the Florida Prescription Drug Monitoring Program (hereinafter, E–FORCSE), documents, letters of medical necessity, medical records, computer printouts given to her by DEA from both the Agency and the Respondent “to determine if [Respondents were] exercising their

² Respondent filed for an extension, which the ALJ granted in part over the Government’s objections. ALJX 9–11.

³ The ALJ also excluded the testimony of a pharmacy employee who was proposed by Respondent to testify about an audit report that had not been offered as evidence and another individual who had provided a report that was not relevant to the proceedings. ALJX 27, at 4.

⁴ Hearings were held in Daytona Beach, FL from April 24–26, 2017.

corresponding responsibility by practicing within the normal scope of pharmacy practice.” Tr. at 46–47. The ALJ found, and I agree, that Dr. Gordon’s testimony was “sufficiently objective, detailed, plausible, and internally consistent to be considered credible in this recommended decision.”⁵ RD, at 7.

2. The DI

The Government also presented the testimony of a DI who participated in the administrative investigation of the Respondents. Tr. 312–92. He testified to his training as a DEA DI and his experience in investigating over 100 pharmacies. He testified that Respondent Pharmacy was identified as “an extremely high purchaser of oxycodone, hydromorphone and methadone.” *Id.* at 316–17. He further testified as to the events that transpired pursuant to the two administrative inspections of Respondent Pharmacy. *Id.* at 318–19. The DI testified that DEA investigators traveled to Respondent Pharmacy to conduct an administrative inspection on September 13, 2013, during which time M.P. signed a DEA Form 82, Notice of Inspection, in which M.P. consented to the inspection of the premises. Tr. 317; GX 32 (DEA Form 82). The DI testified that, based on the report issued by the DEA inspectors at the time, Respondents’ Owner and PIC arrived at the pharmacy approximately ninety minutes afterwards. Tr. 318. During that inspection, the DI testified that the DEA inspectors expressed their intent to remove prescriptions from the pharmacy to make photocopies, but Respondents’ Owner and PIC told them that she would provide them with copies later, which M.P. delivered to DEA on September 23, 2013. Tr. 318, 323; GX 33 (DEA Form 12 signed by M.P. confirming delivery). The DI also testified that he served Respondents’ attorney D.M. with a subpoena in February of 2015 to obtain approximately a year and a half of prescriptions, but D.M. “questioned the validity of our ability to even issue a subpoena for records to him and stated, as far as he knew, there was no penalty for noncompliance, so he had privacy concerns, and he ended up not giving us the records.” Tr. 324–27. Thereafter, in April of 2015, DEA obtained and executed an Administrative Inspection Warrant, during which DEA investigators copied portions of

Respondent Pharmacy’s database that it used when filling prescriptions and provided Respondent Pharmacy with an exact copy. *Id.* at 323, 326–32; RD, at 8. The DEA investigators also removed, copied and returned paper medical records for patients. Tr. at 332–33. The DI additionally testified to his research into the ownership of Respondents and his observations of the Respondents’ location and business interactions. *Id.* at 323–60. The ALJ found, and I agree, that the DI’s testimony was “sufficiently objective, detailed, plausible, and internally consistent. Therefore, I merit it as credible” RD, at 8.

C. Respondents’ Case

1. Respondents’ Owner and PIC

Respondents’ Owner and PIC testified on behalf of Respondents. Tr. 529–767; 854–58. She testified that she held a degree in pharmacy and practiced until she went to law school, after which she practiced mostly in intellectual property law until she assumed sole ownership of the Respondents in or around 2009 or 2010. Tr. 530. She testified to her duties at the pharmacy, including supervising several part-time pharmacists who fill in while she is “doing other duties as the owner.” *Id.* at 533. She testified generally as to the policies and procedures of Respondent Pharmacy when she took over.

At that time, the only statute we identified initially was legitimate medical necessity. So my interpretation of that was to derive that from the physicians. So we created a policy where the patient would have to have a Brevard County license, a general policy. Of course, exceptions allowed, but the general policy was a Brevard County patient. If they saw a physician in an adjacent county, they would be required to obtain for me, directed to me individually at the pharmacy, not a group of medical records but a letter to me describing the legitimate medical necessity or the diagnosis that I could then glean the medical necessity from.

Id. at 536.

Respondents’ Owner and PIC additionally testified that Respondent Pharmacy had “broad policies that [Respondent Pharmacy’s pharmacists] better have a good reason for not following or be subject to counseling. But outside of those broad policies that are stated there or that were developed over time, they had their independent judgment” *Id.* at 676–77. Respondents’ Owner and PIC testified that Respondent Pharmacy has a “policy and procedure handbook that employees do receive”; however, Respondents did not produce the

handbook in their defense.⁶ *Id.* at 710–11. She also stated that the policy is “updated regularly, but it’s generally just a day-to-day hands-on training. I’m there all the time.” Tr. 709. Respondents particularly focused on the employment of one of their employee B.S., whom Respondents’ Owner and PIC had hired as a part-time pharmacist in spite of knowing that “he had been suspended by the Board of Pharmacy for a period of time” and he had a prior criminal conviction, and whom she later fired. *Id.* at 553; RX G (employment file for B.S.).

Respondents’ Owner and PIC also testified as to her involvement with the resolution of red flags for her patients. As to the red flag regarding the distance her customers traveled, she testified that her wholesaler would allocate a certain amount of controlled substances to pharmacies and that “is why people drive farther than they normally would.” Tr. 766. She testified that she would look at the letters of medical necessity to help resolve the red flags regarding the distance traveled to obtain prescriptions, Tr. 701, “that would be one thing we would look at, in addition to a conversation with the patient.” Tr. 706.

The ALJ found, and I agree, Respondents’ Owner and PIC’s “testimony to be generally objective, detailed, and with some exceptions it was plausible, and internally consistent. Certain aspects of [Respondents’ Owner and PIC’s] testimony, however, detracted from her overall credibility. Those aspects included unnecessary contentiousness, exaggeration, and a lack of familiarity with the Pharmacy’s records.” RD, at 13. Specifically, the ALJ noted that she exaggerated her relationships with her customers, stating that she always had conversations with D.B. even though she had only filled prescriptions for him three times and similar exaggerations related to M.B., K.B.2, K.B.3 and A.G.

⁶ This Agency has applied, and I apply here, the “adverse inference rule.” As the D.C. Circuit explained, “Simply stated, the rule provides that when a party has relevant evidence within his control which he fails to produce, that failure gives rise to an inference that the evidence is unfavorable to him.” *Int’l Union, United Auto., Aerospace & Agric. Implement Workers of Am. (UAW) v. Nat’l Labor Relations Bd.*, 459 F.2d 1329, 1336 (DC Cir. 1972). The Court reiterated this rule in *Huthnance v. District of Columbia*, 722 F.3d 371, 378 (DC Cir. 2013). According to this legal principle, Respondents’ decision not to provide evidence within their control gives rise to an inference that any such evidence is unfavorable to Respondents. Therefore, I give little weight to instances where Respondents’ Owner and PIC testified that she relied solely on her policies to ensure that red flags were resolved, such as that cash is not a red flag, “because he would have been asked if he had insurance.” Tr. 719

⁵ Respondents argue that Dr. Gordon’s testimony was inconsistent and should not be afforded weight. As explained herein, I reject Respondents’ arguments regarding Dr. Gordon and I agree with the ALJ’s credibility assessment. Resp Posthearing, at 53–58.

He further noted that her testimony contained inconsistencies, such as that she stated the pharmacy had not filled any prescriptions after April 30, 2014, but the records showed that it had, and she stated that D.B.'s dosage had decreased when it had not. RD, at 14. The ALJ concluded, and I agree, that "to the extent, her testimony conflicts with other testimony, or exhibits, [] I find that the exhibits and the other testimony merit greater weight." RD, at 15.

2. Dr. Grant

Respondents presented testimony of an expert, Dr. Wayne Grant, who has been a pharmacist since 1990 and has a bachelor's degree and Doctorate in pharmacy. Tr. 425–527. Dr. Grant works in a "hospice and palliative care organization," where he has been employed for twelve years. *Id.* at 427. He also testified that he teaches a course online as an adjunct faculty at the University of Florida.⁷ Tr. 428. Dr. Grant also worked in an "in-house, closed pharmacy" for about fifteen years and a retail pharmacy for about five years. Tr. 431–32. Dr. Grant is licensed as a pharmacist in Ohio, and he has never worked in or been licensed as a pharmacist in Florida, although he has reviewed "mostly for comparative reasons," but not taken, some of the continuing education courses in Florida. Tr. 433, 437; RD, at 11. The Government objected to accepting Dr. Grant as an expert witness, because he lacked experience in the standard of practice in the state of Florida, but the ALJ accepted Dr. Grant as "an expert in the field of pharmacy." Tr. 237; 442.

The ALJ found, and I agree, that although generally Dr. Grant "appeared to be an honest and candid witness," his testimony merited "little weight" based on six reasons. RD, at 11. First, the ALJ reasoned that Dr. Grant was "deceptive even when answering questions about his qualifications." *Id.* Dr. Grant touted the benefits of working for the University of Florida as including continuing education, stating, "I get a lot of continuing education," but when asked whether he had taken Florida continuing education, he stated that he "had reviewed a number of those," but "mostly for comparative reasons." Tr. 433; RD, at 11. The ALJ further noted that "while professing to be an adjunct faculty member at the University of Florida, it turns out [Dr. Grant] does not teach, but only occasionally lectures."

⁷ The ALJ found, and I agree that Dr. Grant's faculty status at the University of Florida is not clear from his testimony. RD, at 10. Although he testified that he was an adjunct professor, he later testified that he only lectures in Florida once a year, for an "hour, hour and a half." Tr. 517–18.

RD, at 11 (citing Tr. 428, 516–17). Second, the ALJ noted that Dr. Grant's testimony that he did not know if he had been qualified in Florida was not credible, because when the ALJ asked him if he had ever testified in Florida, he stated that he had not. *Id.* (citing Tr. 438). Third, in describing "corresponding duty," Dr. Grant stated, "It looks at a standard in which pharmacy practice is when we're reviewing prescriptions that come into our care." Tr. 445. I agree with the ALJ's finding that Dr. Grant's "'expert' explanation of the phrase 'corresponding duty' is almost incomprehensible." RD, at 11. Fourth, Dr. Grant initially testified that he had reviewed the prescriptions at issue in the case and there did not seem to be any prescriptions on their face that appeared to be a violation of corresponding responsibility such that there needed to be "a conversation with the patient and the prescriber," but then, on cross examination, admitted in several instances that there should have been follow up. Tr. 445, 478–79, 508–11; RD, at 12. Fifth, the ALJ took issue with Dr. Grant's testimony that the term "cocktail" was not "a common term used in pharmacology." When asked if he knew what a cocktail was, Dr. Grant said "I'm familiar with what I think that terminology is" and then later answered the same question, "Other than a drink, I'm not really sure." Tr. 455–56. Then, Dr. Grant contradicted himself by explaining what a cocktail was, stating "[i]n more nefarious [sic] perhaps, they're looking at trying to lump benzos and opioids and a whole host of skeletal muscle relaxers in there too. But we don't teach about cocktails. We don't make cocktails." *Id.* at 456. I agree with the ALJ that not only was his testimony contradictory, but also, DEA "has long discussed drug cocktails." RD, at 12. Contrary to his own statements, that he had not heard of "drug cocktails" or that the term was not used in pharmacology, he later described them accurately and the federal agency that regulates controlled substance registrations uses the term regularly. Finally, the ALJ noted that Dr. Grant "even seemed unwilling to use the term red flag." RD, at 12. Dr. Grant testified that he was "familiar with the concept," but that he does not "teach anything about red flags" and that he had not heard the term in relation to opioids until about two or three years ago. Tr. 449, 518. The ALJ noted that Respondents' Owner and PIC had "no trouble using the term and understanding its meaning," and that DEA has used the term for many years. RD, at 12 (citing Tr. 587, 597–98, 610–

11, 617–18, 642, 650, 671–72, 676, 681, 688, 701, 727, 730).

Based on the issues with the merits and credibility of Dr. Grant's testimony, the ALJ found, and I agree, that "where there is conflict between the testimony of Dr. Grant and the testimony of Dr. Gordon, I find that Dr. Gordon's testimony is more credible and is entitled to greater weight." RD, at 13. As such, I rely on Dr. Gordon's testimony to accurately describe a pharmacist's corresponding responsibility and the usual course of professional practice in the State of Florida.

3. D.M.

D.M. is an attorney who initially was representing Respondents, but who withdrew and became a fact witness prior to the start of the hearing. ALJX 28 (Motion to Withdraw); Tr. 799. He testified that he was retained by Respondent Pharmacy around 2008 to give advice on "compliance and keeping up with what the rules are, regulations, and policies and procedures." *Id.* at 801. As part of his advice, he stated that he researched and communicated red flags. *Id.* at 804–06. D.M. testified that he gave advice⁸ to Respondent Pharmacy in 2008 that it was generally legal for a doctor to self-prescribe,⁹ but that following the Florida Board of Pharmacy's statement to Respondent Pharmacy that it "wasn't allowed," he still thought it was legal, but recommended that Respondent Pharmacy "should not do that anymore." *Id.* at 809–10. He further testified regarding policies that he helped Respondent Pharmacy write in 2008 to not "fill for an out of county, out of the area customer" or "out of the county doctor" unless it was an established patient in which case they would "look at other factors." *Id.* at 807. D.M. also testified that in 2012 or 2013, he helped to write policies for schedule II controlled substances on letters of medical necessity. *Id.* at 821. However, D.M. also testified that he does not ensure or check compliance with the policies that he wrote. *Id.* at 825.

The ALJ found, and I agree that "D.M.'s testimony is consistent with other testimony of record. He testified in a candid and forthright manner and he was a credible witness." RD, at 15.

⁸ Although D.M. and Respondents' Owner and PIC claim this advice was given via email, neither could produce the emails. Tr. 829–30.

⁹ D.M. later clarified that the question in 2008 was not specific to controlled substances, but all prescription drugs. Tr. 823. He addressed controlled substances in his advice in 2015 after the Board of Pharmacy had told Respondent Pharmacy that the prescriptions could not be filled. *Id.* at 827.

D. Corresponding Responsibility and Course of Professional Practice in Florida

Dr. Gordon credibly testified that before filling a prescription “a pharmacist should assure that the medication is safe and exercise their corresponding responsibility to make sure the medication is for a legitimate medical purpose, to look at things like drug interactions, appropriateness of dose, what doctor is writing the prescription, how far the patients traveled,¹⁰ is it appropriate, is it safe for themselves and the community.” Tr. 33. She further testified that in exercising a pharmacist’s corresponding responsibility, “there’s not just one or two red flags you specifically look for.” *Id.* at 34. She testified that such red flags include, “the type of medication,” whether the dose is appropriate, combinations of controlled substances, whether the patient is in the local community, what type of doctor is prescribing, the distance from the doctor and the pharmacy.¹¹ *Id.* at 34–37. Dr. Gordon further testified about short-acting and immediate release medication, and specifically stated that “it does not make pharmacological sense to prescribe two short-acting opioids,” for example hydromorphone and oxycodone, “because they are doing the same thing,” and therefore such prescriptions are red flags. *Id.* at 36–39.¹² Additionally, Dr. Gordon testified

that pattern prescribing by a doctor who prescribes the same dosage and medication to all of his patients is a red flag, and there is also a red flag when those prescriptions are filled sequentially, one after the other. *Id.* at 39. Further, she testified that another red flag is a prescription cocktail, which she described as “the issuance of two or more prescriptions that do the same thing or enhance the effects of the other.” *Id.* She gave examples of prescription cocktails, such as “Soma, a benzodiazepine, like Ativan or Xanax, and an oxycodone or hydromorphone,” but that more recently she sees “just a Benzo with a opioid,” such as “Alprazolam or Xanax or Lorazepam or Ativan, plus hydromorphone or oxycodone, or both.” *Id.* at 40. Dr. Gordon testified that other red flags were when patients appeared to come from the same household and received similar medications, when patients are going to multiple doctors or pharmacies, and that prescriptions purchased with cash¹³ were a “big red flag.” *Id.* at 41–42. She stated that pharmacists can detect doctor shopping through “E-FORCSE,” which is a “computer program set up by the State of Florida that a pharmacy is supposed to report all of their controlled substances: the quantity, the medication, the doctor, and the pharmacy where it was filled, for every patron” and which started around 2010. *Id.* at 43.

Dr. Gordon testified that a pharmacist can resolve these red flags “by either talking to the patient and/or speaking to the physician” and in some cases “you may need to do both.” She further clearly testified that the resolution of the red flag “must be documented¹⁴ before you dispense the medication so

that you can let other pharmacists know what happened the time before” and that documentation must be “either on the prescription itself or in the computer system.”¹⁵ *Id.* at 44–45. When pressed by Respondents’ counsel regarding whether a pharmacy was required by statute to document the resolution of the red flag, Dr. Gordon stated that “it’s not an opinion. It’s the standard of practice” and further clarified “[t]he standard of practice, if there’s something questionable about a prescription, you document it after you speak with the patient or the doctor.” *Id.* at 215. Finally, Dr. Gordon testified that if it is impossible to resolve a red flag, such as a prescription written by a physician to himself or to a business or office, the standard of practice of pharmacy in Florida would require a pharmacist to “not dispense the medication.” *Id.* at 46.

Regarding red flags, Dr. Grant stated, “the only place that I’ve really seen this again is with the continuing education, which I have not completed, in regards to Florida, where they list in—this group lists and they put red flags, and they list a whole bunch of things down there as being red flags. And they suggest pharmacists should be looking at that. But it’s their process. It’s nothing I’m familiar with teaching.” Tr. 450. As explained above, I credit Dr. Gordon’s testimony over Dr. Grant’s.

Respondents’ Owner and PIC testified that she was aware that when a pharmacist spots a red flag for a prescription, that she must “resolve it, and if [she] cannot resolve it, not to fill it.” Tr. 566; RD, at 24. She testified that she trained her pharmacists to identify and resolve red flags. RD, at 24; Tr. 556–57. She also testified that she understands the concept of red flags and that she recognized that there are red flags in Respondent Pharmacy’s prescriptions. Tr. 796. Respondents’ Owner and PIC stated that, “I don’t believe we did as well with documentation. I do believe we did resolve red flags. Even then, I think we

¹⁰ Dr. Gordon testified that she had searched for local pain management doctors and Respondents’ Owner and PIC testified that there were not enough local practitioners in the area. Tr. 568. I agree with the ALJ, who determined that neither party submitted adequate support for their testimony and therefore gave the testimony of each little weight. RD, at 24 n.10.

¹¹ Respondents argued that Dr. Gordon was inconsistent regarding whether the red flag of distance was resolvable. Resp Posthearing, at 53 (citing Tr. 36, 110—however, the quoted material is on page 111). I disagree that this testimony was inconsistent. Dr. Gordon testified that in “this particular scenario” of the group of Dr. R.’s patients coming in together with prescriptions written on the same day and travelling a far distance, one after another in this case, the red flags were not resolvable. Tr. 111. She stated that there is room to clear red flags and gave an extreme example of all of the patients getting into the same car wreck and needing a short supply of something being a possible reason that a pharmacist could still fill the prescription, but she clearly testified that the scenario presented by Dr. R.’s patients coming in together did not present any facts that could have resolved the red flags. *Id.* Furthermore, these prescriptions contained multiple red flags, not solely the red flag regarding distance.

¹² Respondents argued that Dr. Gordon testified that it was a red flag to prescribe two short acting opioids and also to prescribe a long and a short acting opioid. Resp Posthearing, at 54 (citing Tr. 38, 83). I disagree with their characterization of Dr. Gordon’s testimony. Regarding the long and the short acting opioids, she testified that “it’s a red flag to see the dosage has changed or there is a different drug.” Tr. 84.

¹³ Respondents stated that Dr. Gordon was inconsistent on whether cash was a red flag, but I find that she credibly testified that “[i]t’s the combination of the red flags, the cash and the opioid, not just the point that they’re paying cash.” Tr. 295; Resp Posthearing, at 55. I agree with this statement and the ALJ’s finding that cash is a red flag in combination with the other red flags. RD, at 31 n.13.

¹⁴ Respondents suggested that Dr. Gordon “did not testify that the resolution of every red flag must be documented,” but that “she testified that a pharmacist is required to ‘document if you need more information to clear a red flag.’” Resp Posthearing, at 4 (citing Tr. 206). Respondents took Dr. Gordon’s quote out of context. During the hearing, Respondents’ counsel clarified the statement that he quoted in his brief, stating, “Okay. So document the resolution of red flags?” to which Dr. Gordon responded, “Yes. To show that—for each red flag, if there was a specific situation where you felt that the medication was for a legitimate medical purpose, that should be documented.” Tr. 206. I find that Dr. Gordon was very clear that the standard of practice and usual course of professional practice in Florida required a pharmacist to document the resolution of every red flag before dispensing.

¹⁵ Respondents argued that Dr. Gordon would require a pharmacist with multiple red flags “to write paragraphs of data regarding why the patient travelled to the next county, had back pain, was seeking a ‘highly abused medication,’ and had insurance but was not using it to fill the medication.” Resp Posthearing, at 58. There is no evidence or testimony in this case that what Dr. Gordon was proposing to be documented would be “paragraphs of data.” I reject this characterization of Dr. Gordon’s testimony. Respondents are trying to absolve themselves of responsibility to take any notes on their resolution of red flags by exaggerating the burden. The fact is that there was rarely any documentation as to the red flags in this case other than letters of medical necessity, so there is nothing on which to testify to or assess Respondent Pharmacy’s level of detail in resolving them.

could have done better at it.” *Id.* at 796. Finally, she stated that she received the letters of medical necessity, because she “knew that was an absolute requirement. That’s a statutory requirement. The others seemed to gradually evolve. And in my opinion, it was continued professional practice. So documentation of them was innate in my job even prior to the pain epidemic or the requirement of red flags.” *Id.* at 797.

I agree with the ALJ that Dr. Gordon’s testimony should be given the most weight on a pharmacy’s corresponding responsibility and the ordinary course of professional practice in Florida to resolve red flags and document the resolution on the prescription or in the patient record. RD, at 13.

E. Allegation That Respondent Pharmacy Filled Prescriptions Written by a Practitioner to Himself in Violation of Florida Law

The OSC alleged that Respondent Pharmacy dispensed controlled substances to a physician that were prescribed to himself in violation of Florida Statute Section 458.331(1)(r). The relevant Florida law states that it is grounds for disciplinary action or denial of a license to “dispens[e] . . . any medicinal drug appearing on any schedule set forth in chapter 893 by the physician to himself or herself, except one prescribed, dispensed or administered to the physician by another practitioner” Fla. Stat. § 458.331(1)(r).

1. Patient J.S.3

The Government alleged that between March 2014 and December 2014, Respondent Pharmacy violated its corresponding responsibility and Florida law when it dispensed six prescriptions for controlled substances to a doctor, J.S.3, who was prescribing controlled substances to himself in violation of Florida law. OSC, at 4; RD, at 27. It further alleged violations of Respondent Pharmacy’s corresponding responsibility for filling twelve additional prescriptions written by J.S.3 to himself from June 2012 to June 2013. Govt Prehearing, at 8. The Government’s evidence demonstrates that Respondent Pharmacy filled prescriptions written by J.S.3 to himself for various controlled substances to include: Percocet, Ambien and testosterone. GX 2, at 1–34.

Dr. Gordon testified that the prescription to J.S.3 for Ambien filled on June 12, 2012, contained a red flag ¹⁶

because “the name of the patient is the same as the name of the physician” and that “it’s against the law for a physician to write a controlled substance for himself.” Tr. 49–50; GX 2, at 1, 2. She additionally testified that a prescription for oxycodone/Tylenol with the brand name Percocet filled on July 13, 2012, and all of the other prescriptions filled by Respondent Pharmacy for J.S.3 presented red flags and were in violation of Florida law for the same reason.¹⁷ Tr. 51–61; GX 2, at 1–34. Dr. Gordon testified that the fact that “the patient is the physician” is a red flag and that the red flags were unresolved. Tr. 59–60. In response to the Government’s question regarding whether a pharmacist applying “the minimal acceptable standard of practice of pharmacy” in Florida should have filled these prescriptions, Dr. Gordon stated that “[a] pharmacist should not have filled any prescription written by a physician that wrote it for himself, a controlled substance.” *Id.* at 62.

Respondents’ Owner and PIC testified that she had sought advice from her attorney, D.M. about whether it was lawful for a doctor to self-prescribe and D.M. had told her it was lawful in an

represented that the issue with J.S.3’s prescriptions was only an issue as a matter of law, that a pharmacist cannot fill a physician’s prescription as a matter of law.” Tr. 60. The OSC clearly stated that the J.S.3 prescriptions raised red flags, but Respondents’ counsel alleged that there was discussion of this issue in pretrial conferences related to Respondents’ request to provide testimony of J.S.3. *Id.* at 61. This issue became confused when Respondent proposed the testimony of J.S.3, which the ALJ excluded on the basis that “the ultimate issue with regard[] to this allegation is legal, rather than factual, in nature.” ALJX 27 (Order Granting In Part the Government’s Motion *In Limine*), at 3. The Government’s attorney at the hearing stated that “the red flag seems to be a matter of law, and I’m simply asking the expert whether there’s any indication whether the pharmacist was able to justify in its mind the dispensing of these prescriptions.” Tr. 61. The ALJ sustained the Respondents’ objection; however, he overruled the objection related to Dr. Gordon’s opinion regarding whether filling the prescriptions was within the standard of practice. *Id.* Despite this argument at the hearing, I find that Dr. Gordon appropriately testified that the physician’s prescription to himself was a red flag. I do not find that the ALJ erred in excluding the testimony of J.S.3 as irrelevant. The testimony of J.S.3 as described by the Respondent could not have added any additional facts that would alter the finding herein. However, I disagree that the issue here was solely about whether these prescriptions violated Florida law, as explained further herein. I further discuss this issue in Section III(A)(1)(c).

¹⁷Dr. Gordon also identified other red flags with these prescriptions, such as that the prescriptions lacked a DEA number, the prescriptions were paid for by cash, the physician called in the prescription with no hard copy in violation of Florida law; however, these red flags were not identified in the OSC or the Government’s Prehearing statements, so I am not basing my decision on these red flags. Tr. 52–59.

email.¹⁸ Tr. 571, 777, 809; RD, at 28. She further testified that she had received this advice “early on in my ownership of the business,” which “might even have been prior to my ownership of the business. 2008, 2009.” *Id.* at 777. She stated that she did not revisit his advice after that time and that she “probably should have, but [she] did not.” *Id.* D.M. testified that he researched and gave advice to Respondents’ Owner and PIC “in 2008, generally” regarding “could a doctor self-prescribe.” Tr. 809. D.M. concluded that it was permissible and when asked what advice he communicated to Respondent Pharmacy, he stated, “At that point in time, we were not using the words red flag. The word was scrutiny. And that it should pass the sniff test, but it wasn’t prohibited and it was permissible but required scrutiny.” *Id.* at 810. Respondents’ Owner and PIC testified that the Board of Pharmacy visited in 2015 ¹⁹ and told Respondents’ Owner and PIC that “it was not lawful” to fill a prescription that a doctor had written for himself, after which D.M. confirmed his original legal advice, but recommended that Respondent Pharmacy stop filling these prescriptions, and Respondent Pharmacy did not fill any further prescriptions. Tr. 573, 763, 777, 809. The last prescription filled for J.S.3 was on January 14, 2015. GX 2, at 33–34; Tr. 762; RX H, at 2–3; RD, at 28.

Based on the evidence in the record, I find that from 2012–2015, Respondent filled numerous prescriptions from prescriber J.S.3 to himself without resolving the red flag that he was self-

¹⁸The Respondent did not submit the email as evidence.

¹⁹It is noted that Respondents’ version of the Patient profile for J.S.3 included in the E.O.M. or “end of month” statement a typed note that stated “cannot write personal scripts. DC” and the date the record was printed is covered by a photocopied sticky note. RX H, at 1; Tr. 698. The Government noted that the copy in the Government’s evidence that was seized on April 7, 2015, and contains a print date of “April 7, 2015” does not include the same language in the E.O.M. statement. Tr. 699; GX 2, at 35. Nevertheless, Respondents’ PIC and Owner stated that she made that sticky note in January of 2015 and offered no explanation for why the Government’s evidence did not include the typed note in the database. Tr. 699–700. Respondents argued in their Posthearing Brief that there were no prescriptions filled for J.S.3 after January 14, 2015. Resp Posthearing, at 9 n.1. This argument does not explain why the documents in the Government’s possession that were printed three months after the last prescription to J.S.3 did not contain the same typed E.O.M. note. The ALJ found, and I agree, that Respondents’ PIC and Owner did not testify credibly that the document in RX H was the same record that was available to the Government on the date of seizure in April 7, 2015, because the sticky note obscures the date that the document was printed. RD, at 28 n.11. This appears to me to be a falsification of records and further undermines my ability to trust Respondents’ Owner and PIC.

¹⁶Respondents’ counsel objected to Dr. Gordon’s testimony that the J.S.3 prescriptions were unresolved red flags, stating that “the Government

prescribing in violation of state law. *See infra* Section III(A)(1)(c).

F. Allegation That Respondent Pharmacy Filled Prescriptions Written for “Office Use” in Violation of 21 CFR 1306.04(b)

The OSC alleged that Respondent “dispensed testosterone on at least fourteen different occasions pursuant to invalid prescriptions which indicated that the ultimate user was an ‘office’ in violation of 21 CFR 1306.04(b).” OSC, at 4. The Government submitted evidence of prescriptions and fill stickers, which demonstrated that between September 23, 2014, and January 28, 2015, Respondent Pharmacy filled prescriptions for office use to Dr. I’s office on 8 occasions and to Dr. A’s office once. GX 3; RD, at 29.²⁰ The Government’s expert witness Dr. Gordon testified that “written for office use” means that “the pharmacy filled prescriptions for controlled substances not for an individual but for a facility.” Tr. 64. She testified that the prescriptions “for office use” were not purchases by a medical office, but the evidence demonstrated that they were prescriptions because they were “assigned a prescription number,” and had the office name in the place of a “patient’s name,” and further the pharmacy generated “fill stickers.” *Id.* at 65. She stated that “according to the standards set by Florida, a controlled substance should be issued to an individual patient, not an office to be distributed through unknown patients,” and therefore, she testified that the prescriptions dispensed for office use were dispensed outside the usual course of professional practice. *Id.* at 64, 66. Upon prompting by Respondents’ counsel, Dr. Gordon further testified that “if there were an invoice and the prescription was issued to a practitioner,” it would have resolved the issue, but clarified that it was not within the acceptable standard of practice to order controlled substances from a pharmacy to be distributed to a dispensing practitioner and then report it to E-FORCSE. *Id.* at 278–79; 288–89.

Respondents’ Owner and PIC testified that when she “had an interest to wholesale some compounding,” she asked her counsel (D.M.) about whether she could fill prescriptions for an office and that “he said it was lawful between 3 and 5 percent” of her total

inventory.²¹ *Id.* at 583. She also admitted that she did not ask D.M. specifically about dispensing in the context of the prescriptions to Dr. I’s office and that she had not specifically shown him or asked him about using blank prescriptions and fill stickers. *Id.* at 696–97, 777. She testified that she had accessed the accreditations for Dr. I. and found that Dr. I. was a dispensing practitioner.²² *Id.* at 578. However, she testified that after the Board of Pharmacy visited in 2015 and told her that wholesaling was not allowed, Respondent Pharmacy stopped dispensing to practitioners and her counsel changed his advice. *Id.* at 584.

I find that Respondent Pharmacy filled prescriptions for Dr. A’s office and for Dr. I’s office for office use. *See infra* Section III(A)(1)(b) for further discussion.

G. Allegation That Respondent Pharmacy Failed To Exercise Its Corresponding Responsibility When it Dispensed Controlled Substances Pursuant to Prescriptions Not Issued in the Usual Course of Professional Practice or for a Legitimate Medical Purpose

The OSC alleged that Respondent Pharmacy failed to exercise its corresponding responsibility under 21 CFR 1306.04 as evidenced by its having dispensed controlled substances without resolving “red flags of diversion” that were present, including prescriptions: For highly abused narcotics; written to individuals travelling long distances; from groups of individuals who travelled long distances, from the same doctor, presented at the same time; for multiple drugs designed to treat the same condition in the same manner; constituting obvious early refills; and, for “costly narcotic medications, which the customer repeatedly purchased with cash.” OSC, at 4.

1. Red Flags Associated With Patients of Dr. R.

The OSC alleged that between February 12, 2014, and May 3, 2014, Respondent Pharmacy “dispensed narcotic medications to groups of customers who resided in close proximity to [Respondent Pharmacy], but who obtained their prescriptions from a physician located in Miami, Florida, more than 170 miles from their

homes.” OSC, at 4. The Government alleged that the distance between the prescribing practitioner and his patients constituted red flags and Respondent Pharmacy did not adequately resolve the red flags prior to dispensing prescriptions. *Id.* Furthermore, the Government alleged that Dr. R.’s prescriptions presented additional red flags that were unresolved by the pharmacy.

The Government’s evidence includes a letter from Dr. R., dated May 22, 2014, which explains that Dr. R. moved his practice from Broward County to Miami, but his Broward County patients had decided to continue under his care. GX 29, at 1. The letter provided high level details about his office protocols to ensure against diversion. *Id.* The ALJ noted that the letter did not provide any names of Dr. R.’s patients. RD, at 30. Respondents’ Owner and PIC stated that the letter “was issued after [Respondents’ Owner and PIC] decided to no longer accept [Dr. R.’s] prescriptions.” Resp Posthearing, at 11 (citing RX H, at 61). Dr. Gordon opined that the letter did not resolve any of the red flags for patients “because it still doesn’t explain why they’re going to be driving further, putting the patients at risk.” Tr. 193. She testified that although the fact that Dr. R. discusses his practice’s controls²³ could help a pharmacist evaluate the red flags, “[i]t still doesn’t justify them traveling three hours.” *Id.* at 272. Further, Dr. Gordon testified that nothing in the pharmacy records confirmed Dr. R.’s practice controls were actually implemented and there were no written statements from the patients as to why they chose to travel to see Dr. R., and there was no documentation of any pharmacists’ discussion with Dr. R. necessitating the letter in Respondent Pharmacy’s records. Tr. 270, 286–87; RD, at 72.

Respondents’ Owner and PIC testified that she had spoken on the phone to Dr. R. and “found him legitimate.” Tr. 555. However, she stated that she had made a policy not to fill Dr. R.’s prescriptions, around the time that she received a letter from him on May 22, 2014, and she counseled B.S.²⁴ for filling those prescriptions “because we don’t want the scrutiny of it.” *Id.* at 560, 770; 557; RX H, at 62. However, she stated that despite that policy, there were two

²³ Dr. Gordon also testified that there was no information in Respondent Pharmacy’s files that demonstrated that any of the controls mentioned in the letter had been implemented, except for a urine screen, but “[i]t was not monthly” as Dr. R.’s letter had claimed. Tr. 286.

²⁴ Respondents’ Owner and PIC testified that B.S. was later terminated for other reasons in 2016. Tr. 564.

²⁰ Respondents’ Owner and PIC and the RD mentioned thirteen prescriptions to Dr. I’s office, but the Government’s evidence appeared to contain only eight and one to Dr. A’s office and sixteen fill stickers. GX 3; Tr. 577; RD, at 29. The prescription for Dr. A. was filled by the Respondent Pharmacy to [A’s] Office on the fill sticker. GX 3, at 4.

²¹ Respondents’ Owner and PIC stated that she received this legal advice in writing, but Respondent offered no evidence of the advice. Tr. 695–696; RD, at 29.

²² It is noted that Respondents’ Owner and PIC did not offer a similar justification for the prescription to Dr. A’s Office.

instances where Respondents' Owner and PIC had decided to fill Dr. R.'s prescriptions as an exception to that policy. Tr. 771; 560. One was on April 7, 2014 to J.S.2. *Id.* at 773; GX 6, at 7.

a. Pattern of Filled Prescriptions for Dr. R.'s ²⁵ Patients

The Government presented evidence that not only did Dr. R.'s patients travel long distances to receive their medication, but also they often filled the prescriptions on the same date and "at the same time, one after another." RD, at 71. On February 12, 2014, Patients J.S.1, A.J., and S.P. presented prescriptions for oxycodone and hydromorphone from Dr. R. GX 6, at 1–2; GX 5, at 3–4; GX 4, at 3–4; RD, at 70. Dr. Gordon testified that the pattern of filling in groups is a red flag, because "that's a group of patients going to see the same doctor, getting the same type of medication, same class of medication, and going to the pharmacy on the same day to get their prescriptions filled." Tr. 106. Similarly, on March 11, 2014, Patients D.G. and J.S.1 presented prescriptions from Dr. R. for oxycodone and their prescription numbers indicate that "[r]ight after one another they were filled." Tr. 107; GX 9, at 5–6; GX 6, at 3–4. On March 15, 2014, Respondent Pharmacy filled prescriptions for hydromorphone from Dr. R., for Patients E.H., S.P., and A.J., with sequential fill numbers. GX 8, at 1–2; GX 4, at 5–6; GX 5, at 5–6. On April 11, 2014, Respondent Pharmacy filled prescriptions for S.P., A.J. and E.H. for hydromorphone. GX 4, at 1–2; GX 5, at 7–8; GX 8, at 3–4. Finally, on May 3, 2014, Respondent Pharmacy filled prescriptions for J.S.1 and D.G. for oxycodone and hydromorphone with sequential fill numbers. GX 6, at 11–12; GX 9, at 9–10.

Dr. Gordon further explained that under normal pharmacy procedures, these Schedule II controlled substances must be locked up and "the lock and key belongs to the pharmacist," and therefore, the pharmacist would have been aware of the pattern of group filling. Tr. 109–10. She opined that the red flags for these prescriptions were not resolvable and that she would not have filled them, because "it's an effort to take—to get that drug and take it out. And then one right after it is for the same thing." *Id.* at 110–11.

b. S.P.

On February 2, 2014, March 11, 2014, and April 11, 2014, Respondent

Pharmacy filled prescriptions for hydromorphone for S.P. GX 4, at 4, 2, 6. Dr. Gordon testified that the first red flag in the initial prescription was that the prescription for hydromorphone was "written for the highest strength the drug is available." Tr. 67. Further, the prescription was "from a doctor who is about three hours away from where the patient resides." ²⁶ *Id.* Finally, the fill stickers indicate that the patient paid with cash. *Id.* at 68; GX 4, at 2, 4, 6. The prescription dated February 2, 2014, includes a note on the prescription stating that it was "verified by Nicole." GX 4, at 3. Dr. Gordon explained that "when a technician calls the doctor's office to verify the validity of the prescription itself, that the prescription was written and issued by the physician." Tr. 68. S.P.'s file also contains a form letter with handwritten blanks filled in from Dr. R. faxed on February 12, 2014, that states that Dr. R. "examined and prescribed narcotic medications" to S.P. GX 4, at 8. Dr. Gordon opined that the letter provides the "reasoning for issuing this prescription," but does not resolve any of the red flags discussed and stated, "[i]t makes it worse because it's providing a diagnosis that we see a lot with prescriptions that are associated with diversion of chronic pain syndrome or some kind of back reason, and would also make me wonder how a patient could sit in a car for three hours one way to go to a doctor" Tr. 70. She concluded that the prescriptions dispensed to S.P. were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. Tr. at 70.

c. A.J.

From January 21, 2014, to April 11, 2014, Respondent Pharmacy filled prescriptions from Dr. R. for customer A.J. GX 5, at 1–8. A.J.'s address on the prescriptions is Palm Bay, Florida and the distance from Dr. R.'s office in Miami is 176 miles. GX 5, at 3, 5, 7; RD, at 31 (citing Stipulation 8). From December 5, 2014, to March 27, 2015, Respondent Pharmacy filled eight prescriptions for A.J. from another doctor, Dr. D. GX 5, at 9–28. Dr. D.'s office in Orlando, Florida was 74 miles from A.J.'s address. RD, at 32 (citing Stipulation 9). Dr. Gordon testified that the prescriptions from Dr. R. raised numerous flags, including: the type of medication; the fact that it was the

highest strength dosage available (hydromorphone eight milligrams); "the distance traveled by the patient to go see the doctor and that the patient was paying cash." Tr. 77. Dr. Gordon also testified that it was a red flag that the prescriptions from Dr. D. included a prescription for morphine in addition to the hydromorphone at the highest dosage, both of which treat the same condition. *Id.* at 80, 84; e.g., GX 5, at 9, 11. She further testified that the prescriptions from Dr. D. raised red flags because of the type of medications, the fact that A.J. was paying cash and the fact that the "codes that are on here are all back pain or chronic pain syndrome," which are "commonly seen on diverted medications." ²⁷ *Id.*

A.J.'s profile contains an entry that states, "Dr. D. called personally about patient & will send letter over next week." GX 5, at 29. There is no letter from Dr. D. in the file and the Respondents' Owner and PIC testified that it was "generally" the policy to note the receipt of a letter in the system. ²⁸ Tr. 735–36. The file also contains a form letter faxed on January 23, 2014, ²⁹ from Dr. R. with the patient's name, diagnosis and last MRI filled in by hand. GX 5, at 30; RX H, at 59. Dr. Gordon testified that neither the notation regarding Dr. D., nor the letter from Dr. R. resolved the red flags associated with A.J.'s prescriptions, because there was no documentation explaining the long distances that A.J. traveled to see these doctors. Tr. 85–86; see GX 5, at 29, 30; RX H, at 59. She concluded that the prescriptions dispensed to A.J. were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. Tr. at 86.

d. D.G.

From January 14, 2014, to May 3, 2014, Respondent Pharmacy filled prescriptions for customer D.G. written

²⁷ Respondents argue that Dr. Gordon "seems to have an overall bias against patients with back pain." Resp Posthearing, at 54. I disagree. She testified that it had been her "experience" that people who commonly abuse medications present with prescriptions related to back pain. Tr. 220. It is noted that there are numerous red flags on the prescriptions where Dr. Gordon flagged back pain as an additional red flag.

²⁸ However, there was a letter from Dr. R. for patient A.J. and no corresponding notation regarding its receipt in A.J.'s profile. GX 5, at 29, 30; RD, at 32.

²⁹ It is noted that this letter was faxed on January 23, 2014, but the first prescription for A.J. was filled on January 21, 2014; therefore, even had this letter resolved some of the red flags for future prescriptions, which I find it did not, it was not received in time to resolve the red flags for the first prescription. See GX 5, at 2.

²⁵ All of the patients in this section are patients of Dr. R., but some of the patients also received prescriptions from other doctors, which also presented red flags as described herein.

²⁶ The Parties stipulated that the distance from S.P.'s home in Malabar, Florida to Dr. R. in Miami is 170 miles. RD, at 31 (citing Stipulation (hereinafter, Stip.) 7).

by Dr. R. GX 9, 1–10. D.G.’s address on the prescriptions is in Palm Bay, Florida and the distance from Dr. R.’s office in Miami is 175 miles. GX 9, at 2, 4, 6, 8; RD, at 33 (citing Stipulation 13). D.G.’s customer file also includes a prescription, dispensed on October 15, 2014, written by another doctor, Dr. B., in Winter Garden, Florida, which is 76 miles from D.G.’s address. GX 9, at 11; RD, at 33 (citing Stipulation 17). Dr. Gordon testified that these prescriptions raised multiple red flags including: “the type of medication, which is an opioid, the strength³⁰ of the medication, the distance traveled from the patient’s home to the doctor, and cash.” Tr. 94–95. Further, she testified that the prescriptions from Dr. B. had the same red flags and that the patient was traveling an hour away, which would still trigger a red flag. Tr. 97. The Government’s evidence includes a form letter from Dr. R. stating that the date of visit was February 11, 2014,³¹ and a diagnosis of lower back pain. GX 9, at 14. Dr. Gordon testified that nothing in the file,³² including the letter, resolves the red flags, because it does not explain why he is traveling such a distance, particularly considering that he allegedly had lower back pain. Tr. 98. She concluded that the prescriptions dispensed to D.G. were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.* at 98.

e. E.H.

From March 15, 2014, to May 9, 2014, Respondent Pharmacy filled prescriptions for customer E.H. written by Dr. R. GX 8, 1–6. E.H.’s address on the prescriptions is in Palm Bay, Florida and the distance from Dr. R.’s office in Miami is 175 miles. *Id.* at 2, 4, 6; RD, at 34 (citing Stipulation 20). E.H.’s customer file also includes prescriptions filled July 23, 2014, to April 1, 2015, written by various doctors at a pain management clinic in Orlando, Florida, which is 74 miles from E.H.’s address. GX 8, at 7–24; RD, at 34 (citing Stipulation 21). Dr. Gordon testified that

these prescriptions raised multiple red flags including: “the type of medication, the strength of the medication, the distance traveled, and cash.” Tr. 100. Further, she testified that the prescriptions from the practice in Orlando had the same red flags and that the patient was still traveling a distance.³³ *Id.* at 102. The Government’s evidence includes a form letter with the patient, diagnosis and last MRI filled in from Dr. R. faxed on March 14, 2014. GX 8, at 26. Dr. Gordon testified that nothing in the file, including the letter, resolves the red flags. Tr. 105. She concluded that the prescriptions dispensed to E.H. were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.*

f. J.S.1 and J.S.2

From February 12, 2014, to May 5, 2014, Respondent Pharmacy filled prescriptions for customers J.S.1 and J.S.2 written by Dr. R. GX 6, at 1–14. According to the prescriptions, J.S.1 and J.S.2 live at the same address in Palm Bay, Florida. RD, at 34 (citing Tr. 585); compare GX 6, at 1–2, with GX 6, at 5–6. The distance from the residence of J.S.1 and J.S.2 to Dr. R.’s office in Miami is 174 miles. GX 6; RD, at 35 (citing Stipulation 10). They lived 22 miles from Respondent Pharmacy. RD, at 35 (citing Stipulation 12). Dr. Gordon testified that the prescriptions to J.S.1 and J.S.2 raised the same red flags as the other patients including, “the type of medication, the strength is the highest strength of the medication, the distance traveled, and cash.” Tr. 87, 113. The Government’s evidence includes a form letter for J.S.2 with the patient, diagnosis and last MRI filled in from Dr. R. faxed on March 10, 2014. GX 6, at 16. Dr. Gordon testified that nothing in the file, including the letter, resolves the red flags. Tr. 113. No such letter is in the file for J.S.1. *See generally* GX 6. She concluded that the prescriptions dispensed to J.S.2³⁴ were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.* at 113–114. Dr. Gordon further testified that the fact that J.S.1 and J.S.2 reside at the same address

raises an additional red flag, “because that shows that they’re a group. They both live at the same address, they’re getting the same type of chronically sought after narcotic from the same doctor, both traveling an hour or three hours south one way to get their medication, both have a similar diagnosis of back pain.” *Id.* at 114.

Respondents’ Owner and PIC stated that the majority of the prescriptions Respondent Pharmacy filled for J.S.1 and J.S.2 were filled by B.S, but that she had filled some of J.S.2’s prescriptions. *Id.* at 586. She recalled having a conversation with J.S.2 about the distance driven and that it was “short-term” and “[h]e did tell me the diagnosis. I don’t recall about the time.” *Id.* at 588. She also testified that she had encouraged J.S.2 to find a local pain physician and he had found one in Orlando, which she considered to be local despite being 50 miles away, because “there weren’t the availability of a lot of pain management doctors, period, but there were even less that had openings.” Tr. 593–94.

g. C.C.

From December 28, 2013, to May 5, 2014, Respondent Pharmacy filled prescriptions for customer C.C. written by Dr. R. GX 11, at 1–12. C.C.’s address on the prescriptions is in Melbourne, Florida and the distance from Dr. R.’s office in Miami is 176 miles. GX 11; RD, at 36 (citing Stipulation 28). C.C.’s customer file also includes prescriptions filled from August 18, 2014, to March 30, 2015, written from a practice in Rockledge, Florida. GX 11, at 13–44; RD, at 36. Dr. Gordon testified that the prescriptions from Dr. R. to C.C. raised the same red flags as the other patients.³⁵ Tr. 123. Dr. Gordon also testified that even though the doctor in Rockledge was local to C.C., the prescriptions still raised red flags because the prescriptions were “still the short-acting opioid at the highest dose, the chronic back pain, and cash.” *Id.* at 125; GX 11, 13–44. The Government’s evidence includes a form letter for C.C. from Dr. R. with the patient name diagnosis and last MRI filled in by hand, which although undated, appeared to be received April 7, 2014, according to the notes in the Respondent Pharmacy’s files. GX 11, at 45–46. Dr. Gordon testified that nothing in the file, including the letter, resolves the red flags for the prescriptions for C.C. Tr.

³⁰ Dr. Gordon further explained that the strength is a concern “because it’s the highest dose the drug is available in in an immediate-release form.” Tr. 94.

³¹ It is noted that although the letter was undated, it had to have been sent after the last visit identified in the letter as February 11, 2014, which was after Respondent Pharmacy’s first fill on January 17, 2014, for this patient. GX 9, at 2.

³² The patient profile for D.G. includes a note in the memo section that states “3/17/2015 must have new letter of med necessity for any further fills.” GX 9, at 13. However, that note was dated long after the last prescription in the record for D.G. of October 15, 2014. *Id.* at 12.

³³ One of the prescriptions includes a Rockledge address for the Orlando practice, which Dr. Gordon testified is still far away from E.H.’s home. Tr. 103–04.

³⁴ Dr. Gordon’s testimony did not include a specific conclusion regarding corresponding responsibility for J.S.1 separate and apart from J.S.2; however, I find that the record is clear that the red flags for both of these patients were the same and therefore I draw the same conclusion for J.S.1 that I do for J.S.2.

³⁵ The Government noted that the fill sticker on one of the prescriptions gives an address in Boynton Beach for Dr. R., but Dr. Gordon said that although “it probably shaves off maybe an hour and a half drive,” it still raises the same red flags. Tr. 123–24.

126–127. She concluded that the prescriptions dispensed to C.C. from Dr. R.³⁶ were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.*

h. P.P.

From January 31, 2014, to April 10, 2014, Respondent Pharmacy filled prescriptions for customer P.P. written by Dr. R. GX 12, at 1–6. P.P.'s address on the prescriptions is in Palm Bay, Florida and the distance from Dr. R.'s office in Miami is 173 miles. GX 12; RD, at 36 (citing Stipulation 30). Dr. Gordon testified that the prescriptions from Dr. R. to P.P. raised the same red flags as the other patients for the strength, type of medication, “a highly sought after opioid,” and the distance traveled. Tr. 128. She further stated that P.P. charged his insurance for some of the prescriptions, but paid cash for the prescription filled on February 18, 2014, which indicates a red flag when patients are “maybe trying to hide something from the pharmacist. They get it filled somewhere else and bill their insurance.” *Id.* at 128. The Government's evidence includes a form letter for P.P. from Dr. R. with the patient name, diagnosis and last MRI filled in by hand, which was faxed on January 23, 2014. GX 12, at 8; RX H, at 264. Dr. Gordon testified that nothing in the file, including the letter, resolves the red flags for the prescriptions for P.P. Tr. 129–130. She concluded that the prescriptions dispensed to P.P. prescribed by Dr. R. were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.*

Although the letter of necessity from Dr. R. was included in the Government's evidence, there was no corresponding note of receipt in his patient file and there was no note that Respondent Pharmacy would not take out of county prescriptions.³⁷ GX 12, at 7.

³⁶ Although Dr. Gordon testified that the prescriptions from the physician in Rockledge raised red flags, she limited her opinion that Respondent had not fulfilled its corresponding responsibility or acted within the usual course of professional practice to the prescriptions to C.C. by Dr. R. I am limiting my findings to Dr. R.'s prescriptions, because most of the other prescriptions included a red flag of distance and Dr. Gordon did not explain how or whether the absence of that red flag in this instance might affect the pharmacist's corresponding responsibility and professional practice.

³⁷ The ALJ noted, and I agree, that the Respondents' Owner and PIC testified that even though there was no notation, a pharmacist filling a prescription for P.P. could check the paper file for the letter of necessity; however, without a notation, a pharmacist would not know that the letter existed

Respondents' Owner and PIC stated that no prescriptions were filled for patient P.P. after May 14, 2014, but the ALJ found, and I agree, that Respondents' own exhibits demonstrate that not to be the case. Tr. 633; RD, at 37; RX H, at 265 (showing that the last prescription filled for P.P. by Respondent Pharmacy was on September 22, 2016). Respondents' Owner and PIC also testified that the prescriptions for P.P. were filled by Pharmacist B.S.,³⁸ a former employee of Respondent Pharmacy. Tr. 632–33.

i. K.P.

From February 4, 2014, to April 8, 2014, Respondent Pharmacy filled prescriptions for customer K.P. written by Dr. R. GX 13, 11–16. Additionally, from April 22, 2013, to August 24, 2013, Respondent Pharmacy filled prescriptions for K.P. from a prescriber in Fort Lauderdale, Florida.³⁹ K.P.'s address on the prescriptions varies;⁴⁰ however, K.P.'s address on all of the fill stickers from Respondent Pharmacy indicates that he was located in Fort Lauderdale, Florida. GX 13, at 2, 4, 6, 8, 10, 12, 14, 16. The distance between K.P.'s address and Respondent Pharmacy is 164 miles. RD, at 38 (citing Stipulation 32). Dr. Gordon testified that these prescriptions raised numerous red flags including: “the type of medication, the highly sought out opioid, the strength of the medication, the distance to the pharmacy [. . .] and that the patient was paying cash.” Tr. 132. The Government's evidence includes a form letter with the patient name, diagnosis and last MRI filled in from Dr. R. faxed on January 31, 2014. GX 13, at 18; RX H, at 273. There was no documentation of the letter in the notes section of the patient profile in Respondent Pharmacy's system, but there was an undated note stating not to fill any more “out of county physicians.” GX 13, at 17; RD, at 38. There was no letter of necessity or other notes regarding the prescriber in Fort Lauderdale. *See*

to know to check the paper file. RD, at 37 n.17 (citing Tr. 748–49)

³⁸ Although B.S. may have filled the prescriptions in the Government's evidence, it is noted that Respondents' evidence demonstrates that B.S. was terminated for potential diversion on April 23, 2016; therefore, a different pharmacist must have filled P.P.'s prescriptions following B.S.'s termination. RX G, at 51; Tr. 564.

³⁹ One of the fill stickers for the Fort Lauderdale prescriber indicates a Miami address, but I find this to be irrelevant because the red flag for K.P. related to location is the distance he lived from the pharmacy. *See* GX 13, at 10; Tr. 133.

⁴⁰ A few of the prescriptions show addresses in Sunrise Florida, which is west of Fort Lauderdale. RD, at 38 n.18. Additionally, one of the prescriptions indicates that K.P. lives in Palm Bay, which Dr. Gordon testified “creates more of a red flag. Where does he live?” GX 13, at 11; Tr. 134–35.

generally GX 13; RD, at 38. Dr. Gordon testified that nothing in the file, including the letter, resolves the red flags. Tr. 135–136. She concluded that the prescriptions dispensed to K.P. were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.* at 136.

Based on all of the record evidence, and the testimony of Dr. Gordon, which I credit, I find that the prescriptions issued by Dr. R. and other doctors for Dr. R.'s patients as detailed herein, raised red flags, including that customers arrived in groups, purchased prescriptions with cash, traveled long distances and because the prescriptions were for highly sought after controlled substances at highest strengths. I further find that the letters of medical necessity provided by Dr. R. did not resolve the multiple red flags on his prescriptions and that, even if these red flags were resolvable, there was no credible evidence in the record that Respondent Pharmacy resolved them before it filled the prescriptions. I conclude that the pharmacists filling the prescriptions did not fulfill their corresponding responsibility and the prescriptions were not dispensed in the usual course of professional practice.

2. Other Prescriptions Presenting Red Flags

a. J.C.

From approximately October 11, 2013, to January 16, 2015, Respondent Pharmacy filled prescriptions for customer J.C. written by a prescriber in Fort Lauderdale, Florida. GX 10. Most of the prescriptions record only a street address for the patient without a city, but a few prescriptions list the city as Palm Bay, Florida.⁴¹ *Compare, e.g.*, GX 10, at 1 with GX 10, at 71–82; RD, at 39. The address on all of the fill stickers states that J.C. lives in Indialantic, Florida, which is 158 miles from the prescriber's office in Fort Lauderdale. *See, e.g.*, GX 10, at 2; RD, at 39 (citing Stipulation 22). There is nothing in the record evidence that resolves the discrepancy between the addresses on the prescriptions and the address on the fill stickers. RD, at 39. The first five prescriptions in the Government's exhibit were all issued on January 3, 2014, and are all for varying strengths and amounts of the same controlled substance, Roxicodone, including two prescriptions for 10 milligrams and two prescriptions for 20 milligrams and one prescription for 5 milligrams. Tr. 115,

⁴¹ Dr. Gordon testified that even if the patient had lived in Palm Bay, it would be a 2 to 2.5 hour trip to Fort Lauderdale. Tr. 116.

835; GX 10, at 1–10; RD, at 39. Dr. Gordon testified that the five prescriptions for Roxicodone “just screams red flags.” Tr. 117. “Furthermore, the instructions for taking these five prescriptions for the same controlled substance suggested that J.C. could have been taking all of these medications at the same time.” RD, at 39 (citing Tr. 834–35). On the same date, January 3, 2014, in addition to the five prescriptions for the Roxicodone, Respondent Pharmacy also filled a sixth prescription for J.C. for the highest available dosage of diazepam, or Valium, which “would now constitute a drug cocktail.” Tr. 117; GX 10, at 175–76.

Furthermore, the ALJ found, and I agree, that Respondent Pharmacy additionally filled this same drug cocktail of oxycodone and diazepam for J.C. on January 28, 2014 (Tr. 118–19; GX 10, at 11–20, 177–78); July 19, 2014 (GX 10, at 95–96, 193–194); September 3, 2014 (GX 10, at 111–14,⁴² 191–92); September 23, 2014 (GX 10, at 119–26, 193–94); December 22, 2014 (GX 10, at 141–44, 197–98); and January 16, 2015⁴³ (GX 10, at 145–48, 199–200).

Further, Respondent Pharmacy filled prescriptions for J.C. that constituted early refills. Tr. 121. For example, the ALJ found, and I agree, that Respondent Pharmacy filled multiple prescriptions for J.C. on January 28, 2014 (Tr. 121, GX 10, at 11–19) and then again filled prescriptions on February 11, 2014, and February 26, 2014. GX 10, at 19–20, 21–26, 27–30. Dr. Gordon said this raised red flags because “[t]he patient already got like a ton of oxycodone, and this is just like twelve days later he just got a whole nother [sic] batch.” Tr. 122. She further testified that nothing in the patient records⁴⁴ is written to resolve the red flags for J.C.’s prescriptions. *Id.*

⁴² It was not alleged by the Government and is therefore not being considered, but is noted that the Government’s exhibit also demonstrates that J.C. filled prescriptions written on September 2, 2014 at Respondent Pharmacy on September 3, 2014, and September 5, 2014, and September 10, 2014. GX 10, at 114, 116, 118.

⁴³ The prescriptions for oxycodone and Diazepam were all prescribed on January 16, 2015, but Respondent Pharmacy dispensed them on January 16, 2015, January 19, 2015, and January 28, 2015. GX 10, at 145–152; 199–200. The evidence shows that Respondent Pharmacy dispensed prescriptions for oxycodone and diazepam, which constituted a drug cocktail, on January 19, 2015. *Id.* at 148, 200.

⁴⁴ The Patient profile includes a note that says that someone spoke with the prescriber and verified medical necessity on October 2, 2012. The notes also include a note on March 30, 2015, after several years of filling prescriptions, that the address on RX must match address on the driver’s license and that there could be “no more credit.” GX 10, at 201.

Respondents’ Owner and PIC testified⁴⁵ that if J.C. paid cash for a prescription, the fill sticker stated “cash” and if he used insurance it would read “advance.” Tr. 615. J.C. paid cash for his prescriptions 10 times. RD, at 40 (citing Tr. 613); *see e.g.*, GX 10, at 146. Respondents’ Owner and PIC further testified that she knows J.C. and he was a customer for 10 years. Tr. 596, 740. She further testified that she had had a conversation with the prescribing doctor⁴⁶ “about the therapy because it is different, so I particularly wanted to know about the use of several different strengths of oxycodone.” *Id.* at 597. In speaking with the doctor, Respondents’ Owner and PIC testified that “[J.C.] was on a very tightly tailored pain management treatment plan where as his pain fluctuated, he would use a different dose to use the minimal amount to relieve the pain.” *Id.* at 610. Later, she changed the rationale for the multiple prescriptions, stating, “those were split scripts⁴⁷ so that if the patient either didn’t have the funds or if it wasn’t available because of shortages . . . so that he could get a partial here and there.” Tr. 855.

Dr. Gordon testified that there were no instructions with these prescriptions about how to take them. *Id.* at 832–34. In order to address the prescriptions under the standard of practice, she said that a pharmacist would need to call to find out why the patient needs all of the prescriptions, “and is the patient supposed to take one at a time or can they take all four at the same time.” *Id.* at 835, 837. She concluded that the prescriptions dispensed to J.C. were not dispensed within the usual course of

⁴⁵ Respondents’ Owner and PIC also testified that she believed that the Government had not included all evidence from the patient memo in their exhibits, because she “knew this patient well.” Tr. 612. Respondent did not offer additional evidence and the print out in her exhibits on J.C. contains the same information in the patient memo as the Government’s print out. *Compare* RX H, at 145 with GX 10, at 201.

⁴⁶ Respondents’ Owner and PIC testified that this doctor had a good reputation in the community. At first, Dr. Gordon testified that it is not within the standard of practice to rely on a physician’s reputation to fill a prescription, but later amended her statement to allow that reputation “will come into play.” Tr. 832, 838. I do not find this information particularly relevant, because there is nothing in the record documenting Respondents’ Owner and PIC’s belief that the physician’s reputation resolved the multitude of red flags that these prescriptions presented.

⁴⁷ Some of the prescriptions did include a note indicating “split script;” however, I find Dr. Gordon more credible that this could not resolve the red flag of the need for all of the prescriptions or the instructions on how to take them. *See e.g.*, GX 10, at 161. Additionally, on March 20, 2015, Respondent Pharmacy filled all of the prescriptions that appeared to be duplicative on the same day, which undermines the notion that they were split scripts. *Id.* at 159–64.

professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.* at 120

b. M.B.

From October 3, 2013, to March 13, 2015, Respondent filled prescriptions for patient M.B., whose address on the prescriptions and fill stickers was listed in Palm Bay, Florida. GX 14, at 1–88. Dr. Gordon testified that these prescriptions raised multiple red flags. For example, the prescriptions filled for hydromorphone and lorazepam on December 30, 2013, constituted a drug cocktail. Tr. 137. Dr. Gordon noted many instances of drug cocktails dispensed to M.B., including Ativan and hydromorphone, MS Contin, or extended-release morphine. Tr. 138. The ALJ noted that beginning in December 2014, Respondent Pharmacy was filling two prescriptions for hydromorphone for M.B. at the same time it filled prescriptions for lorazepam for him. RD, at 41; GX 14, at 65–88. Dr. Gordon testified that a further red flag was the location of the physician in Sanford, which is about an hour away from M.B.’s residence in Palm Bay. *Id.* at 138. The records for patient M.B. demonstrate that M.B. paid for his prescriptions “cash for some things and insurance for others.” Tr. 138; *compare* GX 14, at 10, with *id.* at 12.

The Government’s Exhibit included a letter dated May 6, 2013, with a corresponding note in the patient profile from M.B.’s prescriber. GX 14, at 89–92. The letter included a diagnostic code and list of medications, but “provide[d] no information about why M.B. was making a 170 mile round trip to see” the prescriber. RD, at 41; GX 14, at 90–92. Dr. Gordon testified that nothing in the file, including the letter, resolved the red flags. Tr. 138–39. She concluded that the prescriptions dispensed to M.B. were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.* at 139–40.

Respondents’ Owner and PIC testified that she spoke to M.B.’s prescriber and “had a general conversation, not patient specific.” Tr. 640. She testified that “63 out of 91 [of M.B.’s] prescriptions” were paid by insurance, and that M.B.’s payment with cash “raised a red flag that was resolved,” because “the insurance, if they won’t pay for it, then we give them the option to pay cash.”⁴⁸ *Id.* at 642. Respondents’ Owner

⁴⁸ I note that M.B.’s patient records demonstrate that he paid cash for most of his prescriptions for hydromorphone and the other prescriptions with

and PIC testified that M.B. had “presented with a prescription from a different physician,” and that she had “faxed Dr. [C]’s office to see the reason for his discharge” and found out “that he had been discharged for cause,” so she refused to fill further prescriptions for M.B. Tr. 643 (citing RX H, at 274 (found at 283)).

c. C.A.

From December 17, 2013, to February 10, 2014, Respondent Pharmacy filled prescriptions for patient C.A., whose address on the fill stickers was listed as Sebastian, Florida,⁴⁹ which was 86 miles from the prescriber in Orlando. GX 15, at 1–7; RD, at 41 (citing Stipulation 35). Dr. Gordon testified that these prescriptions raised multiple red flags, including the type of medication, the distance traveled and that all of the prescriptions were paid for in cash. Tr. 141; GX 15, at 2, 4, 6. “Two of the three prescriptions that contain these red flags were filled by [Respondents’ Owner and PIC].” RD, at 42 (citing Tr. 142; GX 15, at 1–2, 5–6). The patient’s profile notes “must have letter of med nec for March 2014 fill Dr. Kuhn.” GX 15, at 7. The exhibits included an undated letter. GX 15, at 8. From the date of the note, it appears that this letter must have arrived around the time of the March 2014 fill and after the three prescriptions in the exhibit. Dr. Gordon testified that nothing in the file, including the letter, resolves the red flags. Tr. 143. She concluded that the prescriptions dispensed to C.A. were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.*

d. D.B.

From December 17, 2013, to March 26, 2015, Respondent Pharmacy filled prescriptions for patient D.B. GX 7, at 1–60. D.B.’s address on the fill stickers is in Port St. Lucie, Florida, which is 76 miles from Respondent Pharmacy; however, D.B.’s address on the prescriptions is in Jupiter, Florida. GX

insurance, which would support Respondents’ Owner and PIC’s testimony regarding the resolution of the red flag; however, he used insurance to pay for “hydromorphone 8 MG tablet” on March 13, 2015 (GX 14, at 86) and Respondents offered no explanation to resolve this discrepancy. More importantly, Respondents provided no documentation of the alleged resolution of this red flag or any other of the red flags for patient M.B.

⁴⁹ As the ALJ noted, the address listed for C.A. on the prescriptions had the same street address as the fill stickers, but listed the city as Barefoot Bay, Florida instead of Sebastian, Florida. *Compare* GX 15, at 1, *with id.* at 2. The distance between these two cities is negligible and despite the Government trying to raise the difference as a red flag at the hearing, it does not appear to be relevant. Tr. 141.

7, at 1–60; RD, at 42 (citing Stipulation 27). The doctor’s office in Jupiter, Florida is 111 miles from Respondent Pharmacy. RD, at 42 (citing Stipulation 26).

Dr. Gordon testified that these prescriptions raised multiple red flags, including the type and strength of the medication, the distance traveled to the pharmacy and that many of the prescriptions were paid for with cash. Tr. 144. Additionally, many of the prescriptions filled were for drug cocktails. *Id.* at 144–47. For example, Respondent Pharmacy filled a drug cocktail of: Oxycodone and the highest dose of Xanax (filled by Respondents’ Owner and PIC six days after the oxycodone prescription) in December 2013. GX 7, at 1–3; Tr. 145–46; RD, at 42. Respondents’ Owner and PIC filled a prescription for oxycodone, Percocet and Xanax, which included two immediate release opioids, on July 1, 2014. Tr. 148; GX 7, at 21–26. Respondent Pharmacy filled prescriptions for Percocet, Xanax and Ambien on February 21, 2015. Tr. 146–47; GX 7, at 51–56. Additionally, on October 24, 2014, Respondent Pharmacy filled two identical prescriptions for the highest dosage of oxycodone. Tr. 147; GX 7, at 35–38.

Further, the record demonstrates early fills, which constitute red flags. For example, on June 19, 2014, Respondent Pharmacy filled a prescription for a 30 day supply of Percocet and 30 day supply of oxycodone, and Respondents’ Owner and PIC re-filled both for a 30 day supply on July 1, 2014, despite that 30 days had not passed. Tr. 726–27; GX 7, at 19, 20, 21–14. Respondents’ Owner and PIC admitted that it was an early fill “as to counting the days.” Tr. 727. She further responded “yes” to the question as to whether the early fill constituted a red flag and admitted that nothing in the patient profile or on the prescription resolved the red flag. Tr. 727.⁵⁰

The patient memo box on D.B.’s patient profile includes a note from March 30, 2015, that “address on RX must match driver’s license.” GX 7, at 61; Tr. 733. Further, Respondents’ Owner and PIC testified that she had resolved the red flag that he was traveling so far, because “he had a

⁵⁰ Respondents’ Owner and PIC argued that the fact that the patient “consistently saw the same doctor who wrote subsequent scripts which seemed to legitimize” the prescriptions, because “that would suggest that a conversation was had about how much was used and why he was writing it yet again.” Tr. 729. I reject the notion that a red flag that demonstrates that a prescription may be illegitimate is resolved because the practitioner who issued the initial potentially illegitimate prescription, issued another potentially illegitimate prescription.

residence in Satellite Beach that he intended to move back to” and Respondents provided a copy of what appears to be a scanned prescription, dated March 24, 2015, with a handwritten note in Respondents’ Owner and PIC’s handwriting, stating, “Moving back to Sat Bch July.” Tr. 619; RX H, at 192. However, the ALJ found, and I agree, that “the pharmacy had been filling D.B.’s prescriptions since December of 2013, yet all of the prescription addresses indicated that D.B. lived in Jupiter, Florida, while the fill stickers indicated he lived in Port St. Lucie.” RD, at 43.

Dr. Gordon testified that nothing in the Government’s evidence resolved the red flags on the prescriptions. Tr. 147–49. She concluded that the prescriptions dispensed to D.B. were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.* at 149.

e. J.D.

From October 18, 2013, to April 3, 2015, Respondent Pharmacy filled prescriptions for patient J.D. whose address on the prescriptions and most of the fill stickers⁵¹ was listed as Cocoa Beach, Florida, which was 75 miles from the prescriber in Sanford, Florida. GX 16, at 1–72; RD, at 43 (citing Stipulation 36). Dr. Gordon testified that these prescriptions raised multiple red flags, including the type of medication, the fact that the Xanax and hydromorphone were at high dosages, the distance traveled, paying for prescriptions with cash, and drug cocktails of hydromorphone and Xanax. Tr. 152–54; RD, at 43. The ALJ found, and I agree, that the Government’s evidence demonstrates that Respondent Pharmacy filled prescriptions for both hydromorphone, at its highest dosage, and Xanax on 16 different dates. RD, at 43–44 (citing GX 16, at 7–70). Furthermore, the ALJ found, and I agree, that Respondent Pharmacy provided J.D. with early refills on March 21, 2014, May 16, 2014, October 3, 2014, November 21, 2014, and January 9, 2015. RD, at 44 (citing GX 16, at 11–26, 39–62).

The patient’s profile notes a May 14, 2013, letter of medical necessity from Dr. C., seven months after Respondent Pharmacy began filling J.D.’s prescriptions. GX 16, at 73. The letter provides a list of medications, a diagnosis code and the initial date of

⁵¹ The first two prescriptions list an address of Titusville, Florida on the fill stickers and not the prescriptions, but the rest of the prescriptions list Cocoa Beach on both. GX, 16, at 1–4.

treatment, but no explanation for the distance traveled, strength of the medication or the combination of medications. GX 16, at 74–75. Dr. Gordon testified that nothing in the file, including the letter, resolves the red flags. Tr. 154.⁵²

f. K.B.3

From December 27, 2013, to January 23, 2015, Respondent Pharmacy filled prescriptions for patient K.B.3, whose address on the prescriptions and fill stickers was listed as Palm Bay, Florida, which was 88 miles from the prescriber, Dr. S., in Sanford, Florida. GX 17, at 1–27; RD, at 44 (citing Stipulation 37). Dr. Gordon testified that these prescriptions raised multiple red flags, including the type of medication, the fact that the hydromorphone was prescribed at its highest strength, the distance traveled to the prescriber, and paying for prescriptions with cash. Tr. 155–56; RD, at 44. The ALJ additionally noted that Respondents' Owner and PIC "filled prescriptions for K.B.3 for the maximum available dosage of hydromorphone on June 25, 2014, and July 22, 2014." RD, at 44 (citing GX 17, at 29–35). Respondents' Owner and PIC testified that she did not see any red flags related to the distance traveled or any other red flags related to K.B.3's prescriptions and that she "interacted with him regularly." Tr. 660.

The patient's profile notes that on September 24, 2014, Respondent Pharmacy received a letter of medical necessity from Dr. S. GX 17, at 28. The Government's Exhibits include three different letters dated September 24, 2014, January 30, 2013, and September 2, 2013, explaining that K.B.3 had been under various doctors' care for back pain,⁵³ but they "don't address why the patient's paying cash, they don't address why the patient's going such a long distance to obtain these sought after opioids, desirable opioids." Tr. 157; GX 17, at 29–34. Dr. Gordon testified that nothing in the file resolves the red flags. Tr. 156–157. She concluded that the prescriptions dispensed to K.B.3 were not dispensed within the usual course of professional practice and the

pharmacist did not fulfill his or her corresponding responsibility. *Id.* at 157.

g. K.B.2

From October 21, 2013, to March 26, 2015, Respondent Pharmacy filled prescriptions for patient K.B.2, whose address on the prescriptions and fill stickers was listed as Melbourne, Florida, which was 67 miles from the prescriber in Orlando, Florida. GX 18, at 1–98; RD, at 45 (citing Stipulation 38). Dr. Gordon testified that these prescriptions raised multiple red flags, including the type of medication, the fact that the diazepam and hydromorphone were prescribed at its highest strength, the distance traveled to the prescriber, paying for prescriptions with cash. Tr. 158–64; RD, at 45. Dr. Gordon also testified that Respondent Pharmacy filled drug cocktails for K.B.2 consisting of diazepam, hydromorphone and morphine sulfate.⁵⁴ Tr. 159–61. The ALJ concluded that Respondent Pharmacy filled this drug cocktail for K.B.2 13 times between January 13, 2014, and March 26, 2014. RD, at 45 (citing GX 18, at 11–98). He further noted that "[a]lthough K.B.2 would normally receive his prescriptions for these three controlled substances on the same day, he would frequently present the prescriptions to the Pharmacy within a two or three day time frame." RD, at 45 (citing *e.g.*, GX 18, at 11–16, 17–22, 27–32, 33–38, 39–44, 45–50, 77–82, 93–98). Respondents' Owner and PIC also filled prescriptions for morphine sulfate and diazepam on June 10, 2014. RD, at 45 (citing GX 18, at 41–44).

The patient's profile notes that on April 15, 2013,⁵⁵ Respondent Pharmacy received a letter of medical necessity from Dr. P. GX 18, at 99. The letter describes K.B.2's chronic pain and spine injuries and provides an MRI performed on July 30, 2012. *Id.* at 101. Dr. Gordon testified that nothing in the file, including the letter and MRI, resolves the red flags. Tr. 164–166. She stated, "It's the distance. Why is somebody taking a long-acting opioid, immediate-

release acting opioid, and Valium driving so far?"⁵⁶ *Id.* at 165.⁵⁷

h. A.G.

From December 20, 2013, to March 20, 2015, Respondent Pharmacy filled prescriptions for patient A.G., whose address on the fill stickers⁵⁸ was listed as Indian Harbor, Florida, which was 65 miles from the prescriber in Orlando, Florida. GX 19, at 1–68; RD, at 46 (citing Stipulation 39). Dr. Gordon testified that these prescriptions raised multiple red flags, including the fact that two immediate-release opioids were prescribed and dispensed at the same time, the distance traveled to the prescriber, and paying for prescriptions with cash. Tr. 167–168; RD, at 46. Respondents' Owner and PIC filled prescriptions for A.G. for oxycodone and hydromorphone on February 21, 2014. RD, at 46 (citing GX 19, at 9–12). The ALJ concluded that Respondent Pharmacy filled the two immediate-release opioids 17 times between December 20, 2013, and March 20, 2015. RD, at 46 (citing GX 19, at 1–68). The OSC alleged that A.G. presented both prescriptions every 28 days based on his 28-day prescription for hydromorphone, even though his prescription for 5 oxycodone tablets a day was for a 30-day supply.⁵⁹ OSC, at 8; RD, at 46 (citing GX 19, at 13–60). Therefore, the ALJ concluded, and I agree, that between March 21, 2014, and January 23, 2015, A.G. filled the oxycodone prescription early 11 times with 2 days of 5 tablets each amounting to 10 tablets extra each fill, and as a result, had received an extra 110 tablets of oxycodone over what had been prescribed. RD, at 46 (citing GX 19, at 19–20, 23–24, 27–28, 31–32, 34–36, 39–40, 43–44, 47–50, 55–58). Dr. Gordon testified that two days early she would

⁵⁶ The ALJ found, and I agree, that there was no evidence demonstrating that the patients themselves were driving their cars, but whether or not the patient was driving the car, the distances had to be traveled by some mode of transportation in order to obtain the prescriptions. Tr. 165. Further, I credit Dr. Gordon's testimony that traveling a long distance with lower back pain is a red flag. Tr. 98.

⁵⁷ Dr. Gordon's testimony did not include a specific conclusion regarding corresponding responsibility for K.B.2; however, I find that the record is clear that the red flags are the same as the other patients' prescriptions and therefore I draw the conclusion that these were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility.

⁵⁸ There is no address on the prescriptions. GX 19.

⁵⁹ The oxycodone prescription was for 150 tablets of oxycodone 30 milligrams to be taken 5 times a day. GX 19, at 14. Therefore, filling the prescription in full every 28 days resulted in A.G. receiving two days extra of tablets of oxycodone.

⁵² Dr. Gordon's testimony did not include a specific conclusion regarding corresponding responsibility for J.D.; however, I find that the record is clear that the red flags are the same as the other patients' prescriptions and therefore I draw the conclusion that these were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility.

⁵³ It is noted that one of the records contains a physical exam that notes that the patient's back is normal and does not identify any pain. GX 17, at 33.

⁵⁴ The ALJ noted, and I agree, that although the Government did not allege the drug cocktails in the OSC for K.B.2, they were noticed in the prehearing statement. RD, at 45 n.23; Govt Prehearing, at 16.

⁵⁵ The letter predates by several months any of the prescriptions in the Government's records; however, Respondent submitted evidence that it had been filling similar prescriptions for K.B.2 since November 2011. GX 18, at 100; GX 18, at 1; RX H, at 324.

let go, but she would not be willing to fill for a patient two days early repetitively. Tr. 233. Dr. Grant testified that “after a long period of time . . . There would be a considerable amount. But I don’t know until I have the conversation.” Tr. 510. He further testified that repeatedly filling a prescription two days early would require a conversation first with the patient and then with the prescriber. Tr. 510. Therefore, I agree with the ALJ that the record supports that the repeated filling of these prescriptions constituted an early refill and in accordance with the testimony of Respondents’ Owner and PIC, an early refill is a red flag. Tr. 727. There is no evidence that this red flag was resolved.⁶⁰

The patient’s profile notes a March 22, 2014, letter of medical necessity from Dr. K,⁶¹ four months after Respondent Pharmacy began filling A.G.’s prescriptions. GX 19, at 69. The letter stated that it was necessary for A.G. to use this medication, but did not identify the type of medication. GX 19, at 70; RX H, at 334. Dr. Gordon testified that nothing in the file resolves the red flags and the treatment plan “does not address why there’s two—why the need for two immediate-release opioids, because that doesn’t make any pharmacological sense.” Tr. 168–69; 171. Further, Dr. Gordon stated that the MRI that was included for A.G. raised additional questions, because it was from 2011 and was “dated.” Tr. 305. She concluded that the prescriptions dispensed to A.G. were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.* at 169.

i. K.B.1 and C.K.

Respondent Pharmacy filled prescriptions for patients K.B.1 and C.K., whose prescriptions lack addresses. GX 20. The address on fill stickers for K.B.1 was listed as Malabar, Florida, which is 73 miles from the prescriber in Orlando, and the address

for C.K. is listed as Cocoa Beach, Florida, which is 51 miles from the same prescriber. GX 20, at 1–64; RD, at 47 (citing Stipulations 40 and 42). Dr. Gordon testified that these prescriptions raised multiple red flags, including the type of medication being a commonly sought-after opioid (oxycodone) of the highest dosage,⁶² the distance traveled to the prescriber, and paying for prescriptions with cash. Tr. 172–175; RD, at 47. Furthermore, Dr. Gordon pointed out that these two patients obtained their prescriptions from the same provider on the same date, so it “seems this was a group, a small group of two going to the same doctor on the same date and filling similar prescriptions.” Tr. 173. Further, on March 31, 2015, K.B.1 and C.K. filled a prescriptions for oxycodone prescribed on the same day from Dr. K. with sequential fill numbers. GX 20, at 29–30, 64–65; Tr. 173–174. The ALJ further found that Respondent Pharmacy filled prescriptions for “these two individuals on the same day 14 times between April 1, 2014, and March 31, 2015.” RD, at 48; (citing GX 20, at 3–30, 37–64).⁶³ Respondents’ Owner and PIC filled two prescriptions for oxycodone for these two patients one minute apart on May 28, 2014, and November 11, 2014. RD, at 48 (citing GX 20, at 7–8, 41–42, 19–20, 53–54).

The patient’s profile for C.K. notes an April 15, 2013, letter of medical necessity from Dr. K. GX 20, at 67. The letter seemed to be in response to a letter from Respondent Pharmacy requesting medical necessity, because it was attached to the letter, and it referred to an attached MRI, which was not in the file. GX 20, at 68–69. The patient’s profile for K.B.1 notes receipt of a letter of medical necessity on April 1, 2014, which gives his diagnosis and does not identify the medication. *Id.* at 65. Dr. Gordon testified that nothing in the file resolves the red flags. Tr. 174–76. She concluded that the prescriptions dispensed to C.K. and K.B.1 were not dispensed within the usual course of

professional practice and the pharmacist did not fulfill his or her corresponding responsibility in dispensing these prescriptions. *Id.* at 175–76.

j. J.M. and M.M.

Respondent Pharmacy filled prescriptions for patients J.M. and M.M., whose prescriptions lack addresses, but the address on fill stickers for both patients was listed as Satellite Beach, Florida, which is about 65 miles from Dr. K., the prescriber, in Orlando. GX 21, at 1–42; RD, at 49 (citing Stipulations 46–47). Dr. Gordon testified that these prescriptions raised multiple red flags, including the medication, the distance traveled to the prescriber, drug cocktails of Xanax and oxycodone and carisoprodol and oxycodone and that the doctor’s education was not in pain management, but OB–GYN.⁶⁴ Tr. 177–80; RD, at 49. The OSC also alleged and the evidence clearly supports that “M.M. always sought to pay cash for the prescriptions and J.M. occasionally sought to pay cash.” OSC, at 8. Dr. Gordon also identified a red flag in that the records show a group of patients “going to the same doctor on the same day and then going to the pharmacy and getting their medications dispensed on the same day.” Tr. 178. The ALJ further found that Respondent Pharmacy filled prescriptions for “these two individuals on the same day 15 times between January 7, 2014, and March 31, 2015.” RD, at 49 (citing GX 21, at 3–30, 37–64). It is noted also that these individuals were coming in sequentially during the same timeframe as the C.K. and K.B.1 and all four were patients of Dr. K. The ALJ further found that “many times the prescriptions [sic] numbers on the fill stickers were sequentially only one number apart, and other times they were separated only by a few numbers, and the prescriptions were frequently picked up within minutes of each other.” *Id.* (citing GX 21, at 1–12, 15–30, 33–36, 39–42, 57–60, 63–66, 69–76, 79–82, 85–88, 95–102, 105–116, 119–22, 129–32, 135–38; RX H, at 419). Respondents’ Owner and PIC filled sequential prescriptions for oxycodone for these two patients on January 7, 2014, May 27, 2014, July 22, 2014, December 9, 2014, January 6, 2015, March 3, 2015, and March 31, 2015. RD, at 48 (citing GX 21, at 1–4, 23–26, 33–36, 63–66, 69–72, 79–82, 85–88, 109–12, 135–38.). These prescriptions were dropped off within minutes of each other and the fill numbers were in sequence in all but one instance. *Id.* Additionally, the majority of the prescriptions that Respondent

⁶⁰ Although I agree with the ALJ that these early fills were a red flag, I find that the other red flags for A.G. were egregious enough to demonstrate that filling his prescriptions violated the pharmacist’s corresponding responsibility.

⁶¹ Dr. Gordon remarked that Dr. K’s residency was an OB–GYN and that a pharmacist should look up a practitioner’s credentials where there is a red flag. Tr. 168, 177. She further explained in relation to other patients of this doctor that she thought that the education of the doctor as an OB–GYN was a red flag, because she “didn’t specialize in pain management.” *Id.* at 177. Although I accept Dr. Gordon’s rationale as to why the doctor’s education is a red flag, her practice at the time of the prescriptions was clearly in pain management, and therefore, I am not relying on this possible red flag in my final determination. See GX 19, at 70.

⁶² The ALJ noted and I agree that initially the prescription for K.B.1 was for 15 mg of oxycodone, but it was increased to 30 mg on September 16, 2014. RD, at 47 n.25 (citing GX 20, at 3–4, 15–16).

⁶³ Although Respondents argued that the Government had not presented evidence that the two patients were visiting Respondent Pharmacy as a group, Respondents’ Owner and PIC testified that “I don’t know why they would come in at the same time. But in recollection, they do, I think they do know each other, but I don’t know the relationship.” Tr. At 671; Resp Posthearing, at 34. Respondents’ Owner and PIC testified that she could resolve the red flag of coming in together “by handling them individually.” Tr. 672. However, Dr. Gordon testified that the red flag was presented by the fact that they were a group—handling them individually would ignore the red flag entirely.

⁶⁴ As explained above, I am not considering the doctor’s training as a red flag.

Pharmacy filled for these two patients were for drug cocktails of oxycodone and Soma, and oxycodone and Xanax. RD, at 48–49. Respondents' Owner and PIC filled drug cocktail prescriptions for these two patients on January 7, 2014, May 27, 2014, July 22, 2014, December 9, 2014, January 6, 2015, March 3, 2015, and March 31, 2015. *Id.* (citing GX 21, at 3–4, 89–90, 25–26, 103–04, 33–34, 111–12, 35–36, 109–10, 63–64, 127–28, 65–66, 125–26, 69–70, 133–34, 79–80, 137–38, 81–82, 135–36, 87–88, 139–40).

The patient's profile for J.M. notes a March 29, 2013 letter of medical necessity from Dr. K. GX 21, at 143. The letter states that Dr. K. "feels it medically necessary to prescribe Roxicodone 15 mg" and attaches an MRI stating Lumber IVD degeneration. *Id.* at 144–45. The patient's profile for M.M. notes receipt of a letter of medical necessity on March 14, 2013, which gives his diagnosis and attaches an MRI of his ankle showing mild-to-moderate arthritis and mild synovitis/arthritis in his elbow. *Id.* at 147–49. Dr. Gordon testified that nothing in the file resolves the red flags. Tr. 181–82. She testified that the file contained a drug test for M.M., "which is "[g]etting better," but the ALJ noted, and I agree, that it is unclear what the drug test indicates as a "pass." *Id.* Dr. Gordon concluded that the prescriptions dispensed to J.M. and M.M. were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility. *Id.* at 183–84.

k. H.B.

From November 27, 2013, to March 31, 2015, Respondent Pharmacy filled prescriptions for patient H.B. whose address on some of the fill stickers⁶⁵ was listed as Melbourne, Florida, which was approximately 54 miles from multiple prescribers in Orlando, Florida.⁶⁶ GX 22, at 1–122; RD, at 51

⁶⁵ As the ALJ remarked, "[i]t is unclear where H.B. actually lived, because [GX] 22 reports several different addresses;" however, the OSC did not contain any allegations regarding H.B.'s address. RD, at 51; see GX 22.

⁶⁶ Respondents noted that, "[O]n February 3, 2015, the patient transferred to another provider" who prescribed the same medication and whose office was within Respondent Pharmacy's county. Resp Posthearing, at 37 (citing GX 22, at 109). It is noted that the prescriptions written on February 3, 2015, March 3, 2015, March 31, 2015, appear to be written from a different physician in Merritt Island, FL, which does not pose the same distance concern from the pharmacy or residence. (GX 22, at 109, 111, 113). Respondents note that the new doctor prescribed H.B. Oxycodone 30 mg., "the same medication prescribed by Dr. [S.] on previous occasions;" however, Dr. S. notably did not prescribe the duplicative prescriptions of oxycodone that H.B. had received previously. RX H, at 435; Resp Posthearing, at 37. Furthermore,

(citing Stipulation 48). Dr. Gordon testified that these prescriptions raised multiple red flags. Tr. 185–190. She testified that H.B. was receiving "uppers and downers" including Adderall, which is an amphetamine and central nervous system (hereinafter, CNS) depressant, and a red flag was "the necessity for Ambien and Xanax at the same time. Both suppress the CNS system." *Id.* at 185. She stated that the combination of an amphetamine with a depressant is contraindicated, "because one suppresses the central nervous system and one stimulates the central nervous system. They're working against each other." *Id.* at 189. Further, Dr. Gordon noted that a doctor in Orlando was prescribing H.B. oxycodone and the distance traveled was a red flag. *Id.* at 186. H.B. was also obtaining prescriptions for both 15 mg. and 30 mg. of oxycodone at the same time, which Dr. Gordon testified is "called therapeutic duplication." *Id.* at 186–87. Dr. Gordon testified that H.B. was also receiving the highest dose of Ambien, "[s]o on top of the Xanax and on top of the oxys, it's just a dangerous combination. Cocktail." *Id.* at 187. The ALJ found that Respondents' Owner and PIC filled prescriptions constituting therapeutic duplication on July 1, 2014, and one⁶⁷ of the two prescriptions constituting therapeutic duplication on September 23, 2014. RD, at 51 (citing GX 22, at 15–26, 49–52, 71–72). She also filled one of the two prescriptions constituting therapeutic duplication on May 8, 2014—the other was dispensed on May 7, 2014. GX 22, at 41 and 40.

I agree with the ALJ's findings that Respondent Pharmacy filled multiple drug cocktails for H.B. between February 12 and February 20, 2014, for oxycodone, Xanax, and Ambien, on March 12, 2014, for two prescriptions of oxycodone and one of Adderall, and on February 3, 2015, for oxycodone and Soma. RD, at 52 (citing Tr. 187–90; GX 22, at 15–18, 21–26, 28–32, 109–112).

The OSC alleged that H.B. also received early refills. OSC, at 9. The ALJ found, and I agree, that H.B. received early refills: On February 12, 2014, for Adderall, after having received a 30-day supply on January 31, 2014; on February 20, 2014, for alprazolam, after having received a 30-day supply on February 12, 2014; and on February 3, 2015, after

although I find that the prescriptions on March 3, 2015, and March 31, 2015, do not present the red flag of distance traveled or therapeutic duplication, the red flag of drug cocktail remained unresolved, and the February 3, 2015 prescriptions were for a drug cocktail and one was refilled early.

⁶⁷ The ALJ noted and I agree that it appears that B.S. filled the other duplicative prescription. RD, at 51 n.32.

having received a 30-day supply on January 13, 2015. RD, at 51–52 (citing GX 22, at 13–14, 19–20, 21–22, 25–26, 107–10). Respondents' Owner and PIC admitted that a fill with a similar timeframe was an early fill and that an early fill was a red flag. See *supra* Section II(G)(2)(k) (citing Tr. 727).

The records for H.B. include two letters of medical necessity for H.B. GX 22, at 124–25. The letter from Mid Florida Health stated that it was necessary for H.B. to have her medications, but did not identify the type of medication, nor was it clear which prescriptions in H.B.'s file originated from this practice. GX 22, at 124. The other letter is an unsigned form letter from Dr. S. describing office diversion protections with H.B.'s name and her diagnosis as a "lumber tear" and "lumbago," but does not, as the ALJ pointed out, explain why it was necessary to have the medications or what they were. Dr. Gordon testified that nothing in the file resolved the red flags. Tr. 190. Dr. Gordon also stated that she "didn't see any documentation that showed that the pharmacy contacted one doctor and told them what was going on with the other doctor," which would be done under the normal standard of practice. *Id.* at 189.⁶⁸

Based on all of the record evidence, I find that the prescriptions for J.C., M.B., C.A., D.B., J.D., K.B.3, K.B.2, A.G., K.B.1, C.K., J.M., M.M., H.B. raised red flags, because customers arrived in groups, purchased prescriptions with cash, traveled long distances, refilled their prescriptions early, and because the prescriptions were for highly sought after controlled substances at highest strengths. I further find that the letters of medical necessity in Respondents' files did not resolve the multiple red flags on these prescriptions and that, even if these red flags were resolvable, Respondent Pharmacy produced no contemporaneous documentary evidence to support its claim that it resolved them before it filled the prescriptions.

H. Relationship Between Respondent Pharmacy and Respondent LLC

The OSC was addressed to both Respondent Pharmacy and Respondent LLC, but the allegations in the OSC

⁶⁸ Dr. Gordon's testimony did not include a specific conclusion regarding corresponding responsibility for H.B.; however, I find that the record is clear that the red flags are the same as the other patients' prescriptions and therefore I draw the conclusion that these were not dispensed within the usual course of professional practice and the pharmacist did not fulfill his or her corresponding responsibility.

relate only to the actions of Respondent Pharmacy, and not Respondent LLC.⁶⁹ OSC, at 1; RD, at 100; Resp Posthearing, at 77. However, the ALJ found, and I agree, that Respondents are “essentially one and the same.” RD, at 100. In particular, Respondent Pharmacy and Respondent LLC share the same Owner and PIC.⁷⁰ RD, at 52 (citing Tr. 337–43; 345–46; 348–52, 356; GX 27,⁷¹ 28). The DI testified that, although Respondents have separate doors, they share a lobby entrance, entering either door allows access to either business, and they are “separated by a partition wall which comes approximately three-quarters of the way up through the business but stops just shy of the lobby.” Tr. 347; RD, at 52. Further he testified that “the offices in the back seem to be collocated,” and that “during the execution of the admin warrant, the computer that [DEA was] using to access [Respondent Pharmacy’s] data was located on the [Respondent LLC] side of the wall in an office.” Tr. 347.

The DI testified that he had confirmed through Florida Department of Revenue that M.P. was the only employee of Respondent LLC during the last two quarters of 2016. Tr. 354–55; RD, at 53. M.P. testified that he is the Manager of Respondent LLC and his boss is Respondents’ Owner and PIC. Tr. 409–410. M.P. also handles human resources, discipline, interviewing, and payroll for Respondent Pharmacy, but he considers himself to be employed by Respondent LLC, because he is paid out of its funds.⁷² *Id.* at 395, 404, 410; RD,

at 53. Additionally, M.P. has been engaged in “managing marketing, and developing [Respondent Pharmacy] for over nine years” and he is the senior individual in both Respondents other than the Respondents’ Owner and PIC. GX 30, at 8; Tr. 395, 416.

The DI testified that he inquired with Respondents’ supplier and Respondent LLC had never purchased any controlled substances under its DEA registration; therefore, the ALJ concluded, and I agree, that Respondent LLC “does not handle controlled substances.” RD, at 53; Tr. 356.

III. Discussion

A. Allegation That Respondents’ Registrations Are Inconsistent With the Public Interest

Under Section 304 of the Controlled Substances Act (hereinafter, CSA), “[a] registration . . . to . . . dispense a controlled substance . . . may be suspended or revoked by the Attorney General upon a finding that the registrant . . . has committed such acts as would render his registration under section 823 of this title inconsistent with the public interest as determined under such section.” 21 U.S.C. 824(a)(4). In the case of a “practitioner,” defined in 21 U.S.C. 802(21) to include a “pharmacy,” Congress directed the Attorney General to consider the following factors in making the public interest determination:

(1) The recommendation of the appropriate State licensing board or professional disciplinary authority.

(2) The applicant’s experience in dispensing . . . controlled substances.

(3) The applicant’s conviction record under Federal or State laws relating to the . . . distribution[] or dispensing of controlled substances.

(4) Compliance with applicable State, Federal, or local laws relating to controlled substances.

(5) Such other conduct which may threaten the public health and safety.

21 U.S.C. 823(f). These factors are considered in the disjunctive. *Robert A. Leslie, M.D.*, 68 FR 15,227, 15,230 (2003).

According to Agency decisions, I “may rely on any one or a combination of factors and may give each factor the weight [I] deem[] appropriate in determining whether” to revoke a registration. *Id.*; see also *Jones Total Health Care Pharmacy, LLC v. Drug*

he identified himself as the manager of Respondent Pharmacy on the Notice of Inspection. *Id.* at 320; GX 32. I do not find that the information related to which of Respondents employed M.P. to be relevant to the underlying issues in this case, because I do not find that the Government unlawfully searched Respondent Pharmacy. See *infra* III(B)(1).

Enft Admin., 881 F.3d 823, 830 (11th Cir. 2018) (citing *Akhtar-Zaidi v. Drug Enft Admin.*, 841 F.3d 707, 711 (6th Cir. 2016); *MacKay v. Drug Enft Admin.*, 664 F.3d 808, 816 (10th Cir. 2011); *Volkman v. U. S. Drug Enft Admin.*, 567 F.3d 215, 222 (6th Cir. 2009); *Hoxie v. Drug Enft Admin.*, 419 F.3d 477, 482 (6th Cir. 2005). Moreover, while I am required to consider each of the factors, I “need not make explicit findings as to each one.” *MacKay*, 664 F.3d at 816 (quoting *Volkman*, 567 F.3d at 222); see also *Hoxie*, 419 F.3d at 482. “In short, . . . the Agency is not required to mechanically count up the factors and determine how many favor the Government and how many favor the registrant. Rather, it is an inquiry which focuses on protecting the public interest; what matters is the seriousness of the registrant’s misconduct.” *Jayam Krishna-Iyer, M.D.*, 74 FR 459, 462 (2009). Accordingly, as the Tenth Circuit has recognized, findings under a single factor can support the revocation of a registration. *MacKay*, 664 F.3d at 821.

Under DEA’s regulation, “[a]t any hearing for the revocation . . . of a registration, the . . . [Government] shall have the burden of proving that the requirements for such revocation . . . pursuant to . . . 21 U.S.C. [§] 824(a) . . . are satisfied.” 21 CFR 1301.44(e). In this matter, while I have considered all of the factors, the Government’s evidence in support of its *prima facie* case is confined to Factors Two and Four.⁷³ I find that the Government’s

⁷³ Respondents note that the Florida Board of Pharmacy has not made a recommendation in this matter, nor have the Respondents been convicted of any state or federal crimes related to controlled substances. Resp Posthearing, at 50. As Respondents have noted, the record in this case contains no evidence of a recommendation regarding Respondent Pharmacy’s privilege to operate as a pharmacy by the relevant state licensing board or professional disciplinary authority or any action by the state licensing board that demonstrates that it has considered the same facts in relation to Respondent Pharmacy’s continued licensure. See *John O. Dimowo*, 85 FR 15,800, 15,809 (2020). Prior Agency decisions have found that where the record contains no evidence of a recommendation by a state licensing board, that absence does not weigh for or against revocation. See, e.g., *Ajay S. Ahuja, M.D.*, 84 FR 5479, 5490 (2019) (finding that “where the record contains no evidence of a recommendation by a state licensing board that absence does not weigh for or against revocation.”); *Holiday CVS LLC dba CVS Pharmacy Nos 219 and 5195*, 77 FR 62,316, 62,340 (2012); *Roni Dreszer, M.D.*, 76 FR 19,434, 19,444 (2011). Accordingly, I agree with the ALJ’s finding that Factor One does not weigh for or against revocation in this matter. RD, at 61. I also agree with the ALJ that, because there is no evidence related to any convictions “relating to the manufacture, distribution, or dispensing of controlled substances,” Factor Three does not weigh for or against revocation in this case. RD, at 61 (citing 21 U.S.C. 823(f)(3)).

⁶⁹ Respondents also argue that the claims against Respondent LLC should be “dismissed as a matter of law for lack of notice.” Resp Posthearing, at 77. The OSC clearly is addressed to both Respondents and the hearing proceeded with the consent of the Respondents to consolidate the two cases; therefore, I find this argument meritless.

⁷⁰ Records from the Florida Health Department show Respondents’ Owner and PIC as the Supervising Pharmacist for both Respondents. GX 27, at 8–9; GX 28, at 8–9; Tr. 350–51. Additionally, she is listed as the point of contact on both DEA registrations. GX 27, at 1; GX 28, at 1; Tr. 338–39.

⁷¹ Respondents’ counsel objected to Page 2 of GX 27, because he noted that it cannot be considered a business record due to its inclusion of notes related to the investigation. Tr. 363. This part of the exhibit was produced only to demonstrate that Respondents’ Owner and PIC was listed as the point of contact for both DEA registrations. Respondents’ Owner and PIC testified that she was “the sole owner of both;” and the record does not reflect that there is any dispute of fact about the Respondents’ Owner and PIC’s ownership of both entities, to which she, herself, attested. Tr. 529.

⁷² M.P. testified that he had “never been employed by Respondent Pharmacy,” but to the extent that his statements were intended to demonstrate that he lacked authority over Respondent Pharmacy or support the notion that the two entities were distinct, I do not find his testimony to be credible. Tr. 395. He admitted that he was basing his definition of employment only on the origin of his paycheck. *Id.* He also admitted that

evidence with respect to Two and Four satisfies its *prima facie* burden of showing that Respondents' continued registrations would be "inconsistent with the public interest." 21 U.S.C. 824(a)(4). I further find that Respondents failed to produce sufficient evidence to rebut the Government's *prima facie* case.

1. Factors Two and Four—The Respondents' Experience in Dispensing Controlled Substances and Compliance With Applicable Laws Related to Controlled Substances

Under the CSA, it is "unlawful for any person knowingly or intentionally . . . to . . . distribute[] or dispense, or possess with intent to . . . distribute[] or dispense, a controlled substance" "except as authorized" by the Act. 21 U.S.C. 841(a)(1). A pharmacy's registration authorizes it to "dispense," or "deliver controlled substance to an ultimate user . . . by, or pursuant to the lawful order of . . . a practitioner." 21 U.S.C. 802(10).

(a) Allegations Regarding Respondent Pharmacy's Failure To Exercise its Corresponding Responsibility

According to the CSA's implementing regulations, an effective controlled substance prescription is one that is "issued for a legitimate medical purpose by an individual practitioner acting in the usual course of his professional practice." 21 CFR 1306.04(a). While the "responsibility for the proper prescribing and dispensing of controlled substances is upon the prescribing practitioner, . . . a corresponding responsibility rests with the pharmacist who fills the prescription." *Id.* The regulations establish the parameters of the pharmacy's corresponding responsibility.

An order purporting to be a prescription issued not in the usual course of professional treatment . . . is not a prescription within the meaning and intent of . . . 21 U.S.C. 829 . . . and the person knowingly filling such a purported prescription, as well as the person issuing it, shall be subject to the penalties provided for violations of the provisions of law relating to controlled substances.

Id. "The language in 21 CFR 1306.04 and caselaw could not be more explicit. A pharmacist has his own responsibility to ensure that controlled substances are not dispensed for non-medical reasons." *Ralph J. Bertolino, d/b/a Ralph J. Bertolino Pharmacy*, 55 FR 4729, 4730 (1990) (citing *United States v. Hayes*, 595 F.2d 258 (5th Cir. 1979), *cert. denied*, 444 U.S. 866 (1979); *United States v. Henry*, 727 F.2d 1373 (5th Cir. 1984) (reversed on other grounds)). As

the Supreme Court explained in the context of the CSA's requirement that schedule II controlled substances may be dispensed only by written prescription, "the prescription requirement . . . ensures patients use controlled substances under the supervision of a doctor so as to prevent addiction and recreational abuse . . . [and] also bars doctors from peddling to patients who crave the drugs for those prohibited uses." *Gonzales v. Oregon*, 546 U.S. 243, 274 (2006).

The evidence in this case demonstrates that Respondent Pharmacy filled prescriptions from a group of Dr. R's patients repeatedly "at approximately the same time, one after the other." RD, at 71; *supra* Section (II)(G)(1)(a). Dr. Gordon testified that these red flags are not resolvable and she would not have filled the prescriptions. *Id.*; Tr. 111. The record demonstrates numerous red flags associated with the prescriptions issued to patients of Dr. R. For example, S.P. and E.H. made a 340 and 350 mile-round trip respectively to see Dr. R. and received the highest dosage of opioids and paid cash. RD, at 72; *supra* Section (II)(G)(1)(a), (e). In addition, J.S.1 and J.S.2 lived at the same address, received their prescriptions often on the same day for highly diverted and abused controlled substances, and travelled long distances. RD, at 75. In accordance with the testimony of Dr. Gordon, these prescriptions should not have been filled and Respondent Pharmacy violated its corresponding responsibility in filling them. Further, the ALJ found, and I agree, that nothing in Respondent Pharmacy's files resolved any of the red flags for the prescriptions for the patients of Dr. R., where they may have been resolvable, and Respondent Pharmacy violated its corresponding responsibility by filling the prescriptions in the Government's evidence for Dr. R.'s patients. RD, at 71–80; *supra* Section (II)(G)(1).

Further, the evidence shows that Respondent Pharmacy filled prescriptions written by other physicians that contained multiple red flags indicating that the prescriptions were not issued for a legitimate medical purpose. J.C. presented five prescriptions for the same short-acting opioid and the doctor's instructions allowed J.C. to be taking all of them at once. Dr. Gordon testified that she would not have filled these prescriptions. Respondents' Owner and PIC offered two different justifications for filling them. There is nothing in Respondent Pharmacy's records that resolves the red flags and Respondents' post-hoc justification is inconsistent,

which clearly demonstrates that her memory of events is not adequate to determine whether the red flags were resolved. Section (II)(G)(2)(a). The prescriptions that Respondent Pharmacy filled for M.B. raised unresolved red flags for highly abused opioids and cocktails, payment by cash, long distances to obtain and fill prescriptions, and high dosages. Finally, the ALJ found, and I agree, that Respondent Pharmacy filled prescriptions for C.A., D.B., J.D., K.B.3, K.B.2, and A.G. in violation of its corresponding responsibility and outside the course of professional practice of pharmacies, because the numerous red flags of highly diverted and abused controlled substances, distance travelled, cash payments, early refills, and cocktails were unresolved.

To prove a pharmacist violated his corresponding responsibility, the Government must show that the pharmacist acted with the requisite degree of scienter. See 21 CFR 1306.04(a) ("[T]he person *knowingly* filling [a prescription issued not in the usual course of professional treatment] . . . shall be subject to the penalties provided for violations of the provisions of law relating to controlled substances.") (emphasis added). DEA has also consistently interpreted the corresponding responsibility regulation such that "[w]hen prescriptions are clearly not issued for legitimate medical purposes, a pharmacist may not intentionally close his eyes and thereby avoid [actual] knowledge of the real purpose of the prescription." *Bertolino*, 55 FR at 4730 (citations omitted); see also *JM Pharmacy Group, Inc. d/b/a Pharmacia Nueva and Best Pharmacy Corp.*, 80 FR 28,667, 28,670–72 (2015) (applying the standard of willful blindness in assessing whether a pharmacist acted with the requisite scienter). Pursuant to their corresponding responsibility, pharmacists must exercise "common sense and professional judgment" when filling a prescription issued by a physician. *Bertolino*, 55 FR at 4730. When a pharmacist's suspicions are aroused by a red flag, the pharmacist must question the prescription and, if unable to resolve the red flag, refuse to fill the prescription. *Id.*; *Medicine Shoppe-Jonesborough*, 300 F. App'x 409, 412 (6th Cir. 2008) ("When pharmacists' suspicions are aroused as reasonable professionals, they must at least verify the prescription's propriety, and if not satisfied by the answer they must refuse to dispense.").

In this matter, the Government did not allege that Respondent dispensed the subject prescriptions having actual

knowledge that the prescriptions lacked a legitimate medical purpose. Instead, the Government alleged that Respondent violated the corresponding responsibility regulation as evidenced by it “repeatedly distribut[ing] controlled substances pursuant to prescriptions that contained one or more unresolved red flags for diversion.” Govt Posthearing, at 41.

As I already found, many prescriptions from Respondent Pharmacy presented multiple, red flags including long distances, cash payments, drug cocktails, high doses/quantities of high-alert controlled substances, patients with the same address presenting the same prescription within a short period of time, patients sequentially presenting prescriptions prescribed by the same doctor on the same day, therapeutic duplication (two drugs in the same class prescribed together), and early refills. Agency decisions have consistently found that prescriptions with the same red flags at issue here were so suspicious as to support a finding that the pharmacists who filled them violated the Agency’s corresponding responsibility rule due to actual knowledge of, or willful blindness to, the prescriptions’ illegitimacy. 21 CFR 1306.04(a); *see, e.g., Pharmacy Doctors Enterprises d/b/a Zion Clinic Pharmacy*, 83 FR 10,876, 10,898, *pet. for rev. denied*, 789 F. App’x 724 (11th Cir. 2019) (long distances; pattern prescribing; customers with the same street address presenting the same prescriptions on the same day; drug cocktails; cash payments; early refills); *Hills Pharmacy*, 81 FR 49,816, 49,836–39 (2016) (multiple customers presenting prescriptions written by the same prescriber for the same drugs in the same quantities; customers with the same last name and street address presenting similar prescriptions on the same day; long distances; drug cocktails); *The Medicine Shoppe*, 79 FR 59,504, 59,507, 59,512–13 (2014) (unusually large quantity of a controlled substance; pattern prescribing; irregular dosing instructions; drug cocktails); *Holiday CVS*, 77 FR 62,316, 62,317–22 (2012) (long distances; multiple customers presenting prescriptions written by the same prescriber for the same drugs in the same quantities; customers with the same last name and street address presenting virtually the same prescriptions within a short time span; payment by cash); *East Main Street Pharmacy*, 75 FR 66,149, 66,163–65 (2010) (long distances; lack of individualized therapy or dosing; drug cocktails; early fills/refills; other

pharmacies’ refusals to fill the prescriptions). Dr. Gordon credibly testified as to the presence of red flags on the prescriptions that Respondent Pharmacy filled. Respondents’ Owner and PIC also testified that she recognized red flags on the prescriptions.

I agree with the ALJ that Respondent Pharmacy “repeatedly filled numerous prescriptions for highly abused and diverted controlled substances in the face of blatant red flags. The Pharmacy did little to nothing to resolve these numerous red flags, but instead relied on ‘rubber stamped’ types of letters of medical necessity that were often not tailored towards a particular patient, and were obviously missing information.” RD, at 97. When asked by Respondents’ counsel if she “believe[d] pharmacists can make decisions about the treatment of patients’ medical conditions,” Dr. Gordon testified, “Pharmacists are part of the medical care team. We’re there, we’re the stop gate to make sure that that patient is safe and taking a medication that’s appropriate for them.” Tr. 217. The evidence in this case shows that Respondent Pharmacy failed at the responsibility described by Dr. Gordon.

Dr. Gordon credibly testified that a Florida pharmacist should have recognized these red flags and that a Florida pharmacist exercising his or her corresponding responsibility would not dispense controlled substances without investigating, documenting the investigation, and resolving any red flags. Respondents’ Owner and PIC also admitted during her testimony that she had actual knowledge of some of the red flags on the prescriptions, but that she felt like she had resolved them.

I have considered and reject Respondent Pharmacy’s claim that it investigated and resolved the red flags on the subject prescriptions before they were filled and therefore complied with its corresponding responsibility. Tr. 796. Respondents’ Owner and PIC testified that she relied on written policies and procedures that she stated Respondent Pharmacy had in place, which by virtue of being followed would have resolved the red flags prior to dispensing; however, Respondent Pharmacy produced neither the procedures themselves⁷⁴ nor any

evidence that, if they had been in place, they had been followed. For example, she stated that payment of cash is not a red flag because Respondent Pharmacy’s policy was to ask for insurance from every customer, and then concluded that if a customer paid cash, it was a result of a negative answer regarding insurance, thereby resolving the red flag. Tr. 719. She stated that she is not assuming it happened, because “it is the policy.” *Id.* However, despite the policies that she so strongly asserted were in place, according to her testimony, B.S. filled dozens of prescriptions in violation of those policies and had to be counseled. *Id.* at 560, 770. In addition, she admitted to making exceptions to the policies herself without documenting her rationale for the departures. Tr. 773. The prescriptions or patient profiles from Respondent Pharmacy do not contain pharmacist remarks regarding the resolution of red flags on the prescriptions, and Dr. Gordon testified that the letters from the prescribers, which were often issued after controlled substances had already been dispensed, did not adequately resolve the red flags. *See United States v. Hayes*, 595 F.2d at 260 (“Verification by the issuing practitioner on request of the pharmacist is evidence that the pharmacist lacks knowledge that the prescription was issued outside the scope of professional practice. But it is not an insurance policy against a fact finder’s concluding that the pharmacist had the requisite knowledge despite a purported but false verification. . . . What is required by [a pharmacist] is the responsibility not to fill an order that purports to be a prescription but is not a prescription within the meaning of the statute because he knows that the issuing practitioner issued it outside the scope of medical practice.”). Furthermore, Dr. Gordon credibly testified that some of the prescriptions, particularly to groups of Dr. R.’s patients, contained red flags that were not resolvable and the prescriptions should not have been filled. *Id.* at 110–11. Finally, I agree with the ALJ that Respondents’ Owner and PIC’s testimony was not always credible, particularly where she exaggerated her relationship with her customers in order

⁷⁴ Respondents contest that requiring them to document their resolutions of red flags is inappropriately “requiring Respondents to prove their innocence.” Resp Exceptions, at 17. The Government in this case demonstrated that the standard of practice in Florida required documentation of the resolution of red flags and Respondent Pharmacy did not document. The Government proved that Respondent Pharmacy

repeatedly filled multiple prescriptions with red flags demonstrating that Respondent Pharmacy had violated its corresponding responsibility and that Respondent Pharmacy’s registration is inconsistent with the public interest. The burden shifts to the Respondents to show why they can be entrusted with the responsibility carried by their registrations. *Garrett Howard Smith, M.D.*, 83 FR 18,882, 18,910 (2018) (citing *Samuel S. Jackson*, 72 FR 23,848, 23,853 (2007)).

to suggest that she had resolved red flags. RD, at 13–14.

Respondents further contest that when Respondents' Owner and PIC was confronted with one employee, B.S., who "exercised his own independent judgment and filled prescriptions from South Florida, she halted the practice and counseled the employee." Resp Posthearing, at 52. Although Respondents' Owner and PIC stated that, although she had no personal knowledge that the prescriptions were legitimate, she thought that Dr. R. was legitimate, but she also stated that she had counseled B.S., "because we don't want the scrutiny of it." *Id.* at 560, 770, 557; RX H, at 62. She clearly understood that there was a high probability that the prescriptions were illegitimate due to the red flags that they presented and that they suggested the need for "scrutiny." Yet in filling the prescriptions, neither she nor B.S. provided any documentation regarding the "scrutiny" that the prescriptions presented. As stated above, she also testified that she, herself, filled Dr. R.'s prescriptions twice. Tr. 771; 560.

Further, I reject the insinuation that Respondent Pharmacy should not be held responsible for the actions of its pharmacist B.S. When considering whether a pharmacy has violated its corresponding responsibility, the Agency considers whether the entity, not the pharmacist, can be charged with the requisite knowledge. *See Pharmboy Ventures Unlimited, Inc.*, 77 FR 33,770, 33,772 n.2 (2012) ("DEA has long held that it can look behind a pharmacy's ownership structure 'to determine who makes decisions concerning the controlled substance business of a pharmacy.'"); *S&S Pharmacy, Inc.*, 46 FR 13,051, 13,052 (1981) (the corporate pharmacy acts through the agency of its PIC). Knowledge obtained by the pharmacists and other employees acting within the scope of their employment may be imputed to the pharmacy itself.

At times during her testimony, Respondents' Owner and PIC stated that she relied on the personal judgment of her pharmacists, while also stating that the pharmacy's policy is "updated regularly, but it's generally just a day-to-day hands-on training. I'm there all the time." Tr. 709. Ultimately, as the Owner and PIC, she is responsible for the actions of Respondents, and her own statements support that notion. She chose to hire someone while knowing that he had a criminal history and Board of Pharmacy disciplinary history, she had the means to meaningfully supervise his work because she was present at Respondent Pharmacy "all the time," and further, as the individual

responsible for the entity, she had a duty⁷⁵ to ensure that the pharmacists she employed, while acting in the scope of their employment, were following her policies and the law. Finally, the violations of corresponding responsibility and standard of practice in this case are not limited to the actions of B.S. The Government's evidence clearly demonstrates that Respondents' Owner and PIC herself filled prescriptions with multiple red flags herself for customers such as H.B., C.A., D.B., K.B.2, and J.S.2.

I have also considered and reject Respondents' argument that Dr. Gordon relied only on DEA decisions to identify red flags. Resp Exceptions, at 7. Dr. Gordon testified that "[r]ed flags is just a term . . . that the lawyers and the Courts have come up with, but . . . there's always been red flags, since inception of pharmacy." Tr. 209–10. She further stated that "[t]he Courts called it red flags. Pharmacists just call it checking to make sure that that medication is safe or legitimate." *Id.* at 211. Dr. Gordon's testimony is further supported by Respondents' Owner and PIC's testimony, that she was aware that when a pharmacist spots a red flag for a prescription, that she must "resolve it, and if [she] cannot resolve it, not to fill it." Tr. 566; RD, at 24. Respondents' Owner and PIC also testified that she understands the concept of red flags and that she recognized that there are red flags in Respondent Pharmacy's prescriptions. Tr. 796. There is no evidence that the Agency has set a standard independent of pharmacy practice as Respondents have contended. Resp Exceptions, at 9. Dr. Gordon testified repeatedly that

⁷⁵ I reject Respondents' claim that imposing a duty on its pharmacists to ensure that they were meeting their corresponding responsibility would violate Florida Rule 64B16–27.831(2)(a), which provides that "[w]hen validating a prescription, neither a person nor a licensee shall interfere with the exercise of the pharmacist's independent professional judgment." Resp Posthearing, at 69 (quoting Fla. Admin Code Ann. r. 64B16–27.831(2)(a)). There is no evidence that the State of Florida's provision would prevent an employer from ensuring that an employee was resolving and documenting red flags. The judgment in question is resolving "any concerns about the validity of the prescription," not complying with pharmacy policies, to include documenting the pharmacist's rationale for deciding to fill a prescription whose legitimacy was in question. *Id.* In fact, the regulation itself requires that the pharmacist resolve the concerns. *Id.* I decline to permit Respondent Pharmacy to hire an employee, whom it knew to have disciplinary issues and a criminal record, to fill dozens of prescriptions whose legitimacy was in question and then to relinquish all responsibility for that pharmacist's actions. The DEA registration is issued to the pharmacy, not the individual pharmacist, and the pharmacy has responsibility under federal law to ensure compliance with the law in order to maintain its registration.

documentation was "the standard of practice, if there's something questionable about a prescription, you document it after you speak with the patient or the doctor," and further, she gave a credible rationale as to why it was the standard of practice, "so that you can let other pharmacists know what happened the time before." Tr. 215, 44–45. If there were red flags on a prescription, which were necessary to be resolved in order to confirm the prescription's legitimacy, it is unclear how another pharmacist filling a subsequent prescription would know that they had been resolved without documentation. Dr. Gordon's testimony is supported by the facts in this case, because Respondents' Owner and PIC blamed B.S. for filling prescriptions not in accordance with policy, but then filled prescriptions for the same patients with the same red flags. Without documentation of the resolution of the red flags, there was no way for her to know whether B.S. had resolved them, or in fact, whether she had resolved them. Her memory of her own conversations with customers that supposedly resolved the red flags did not always prove to be reliable. *See e.g.*, Tr. 596, 671, 673, 716, 720.

Respondents argue in their Exceptions that DEA is acting outside of its statutory authority in determining that the course of professional practice in Florida requires a pharmacist to resolve and document red flags. Resp Exceptions, at 8–10. Part of Respondents' argument is that the Florida statutes cited by the Government do not require the documentation of red flags. *Id.* at 10. Respondents admit that under Florida law, "if a pharmacist identifies one of the enumerated 'red flags' in the regulations, 'the pharmacist shall take appropriate steps to avoid or resolve the potential problems which shall, if necessary, include consultation with the prescriber.'" Resp Exceptions, at 11 (quoting Fla. Admin. Code Ann. r. 64B16–27.810.) However, Respondents argue that the regulations do not require the documentation of the resolution of such red flags. *Id.*

The Florida Board of Pharmacy requires a pharmacist to conduct prospective drug use review on each prescription and identify such issues as "[o]ver-utilization," "[d]rug-drug interactions," "[i]ncorrect drug dosage," and "[c]linical abuse/misuse," and shall take appropriate steps to avoid or resolve the potential problems which shall, if necessary, include consultation with the prescriber. Fla. Admin. Code Ann. r. 64B16–27.810 (2020). A preceding section of the regulations

states that “a patient record system shall provide for the immediate retrieval of information necessary for the dispensing pharmacist to identify previously dispensed drugs at the time a new or refill prescription is presented for dispensing.” Fla. Admin. Code r. 64B16–27.800(1). The regulation further states that among the information required to be maintained in the patient records is the “pharmacist comments relevant to the individuals’ drug therapy, including any other information peculiar to the specific patient or drug.” *Id.* at (1)(f). Respondents argue that “there is no definition available as to what constitutes ‘peculiar’ information” and that it “should be read to mean peculiar information relevant to treatment.” Resp Exceptions, at 11. The Government argued, and the ALJ found, that Florida law requires not only the resolution of red flags, but also a “pharmacist is required to maintain a patient record, allowing for immediate retrieval of information relative to previously dispensed drugs and those records are to include comments peculiar to the patient, and information provided by a licensed health care provider.” RD, at 65.

Agency decisions have examined whether the resolution of red flags is required by these provisions of Florida law. *See Trinity Pharmacy II*, 83 FR 7304, 7329–30 (2018); *Superior Pharmacy I and II*, 81 FR 31,310, 31,336 (2016) (stating that the regulation required documentation of the prospective drug review in the patient profiles). The Respondents do not argue that the drug review provision is inapplicable, merely that the documentation requirement is more appropriately read to require documentation of information “relevant to treatment.” Resp Exceptions, at 11. The drug review in Florida law appears to be an affirmative obligation on the part of the pharmacist, and therefore, it would be consistent with such an affirmative obligation to read the preceding section of the regulation to require documentation of the prospective drug review. As stated above, the documentation requirements in this section “shall provide for the immediate retrieval of information necessary for the dispensing pharmacist to identify previously dispensed drugs at the time a new or refill prescription is presented for dispensing.” Fla. Admin. Code r. 64B16–27.800(1). In its Posthearing Brief, the Government cited to these regulatory provisions, not as an

individual violation of Florida law,⁷⁶ but as further evidence that Respondent Pharmacy filled prescriptions for controlled substances outside the usual course of practice in Florida. Gov Posthearing, at 44–45. I ultimately do not find it necessary to find a violation of this regulation in this case, because the Government has proven by substantial evidence that Respondent Pharmacy violated its corresponding responsibility and filled prescriptions outside the standard of practice in Florida by not documenting the resolution of the red flags through credible expert testimony. I do consider this regulation to further support the testimony of Dr. Gordon regarding the importance of documentation in the standard of practice of pharmacy in Florida.

Dr. Gordon testified repeatedly that the standard of practice of pharmacy in Florida required documentation of the resolution of red flags. When Respondents’ counsel summarized her testimony and asked if she was stating that documentation was “a requirement for pharmacists in the State of Florida to document red flags,” she stated, “Yes. To show that—for each red flag, if there was a specific situation where you felt that the medication was for a legitimate medical purpose, that should be documented.” Tr. 206. Dr. Gordon is not a lawyer and is not an expert in the details of state law, but she is required as a pharmacist to understand what conduct is outside of the usual course of professional practice in her state, whether that is derived from state law, mandatory training, standards of care or otherwise. Respondents imply that Dr. Gordon’s inability to draw a solid conclusion as to where the requirement to document the resolution of red flags is written somehow demonstrates that there is no such requirement in the standard of practice. Resp Exceptions, at 10. I reject such fallacious reasoning. In this case, I find that Florida state law can be reasonably interpreted to support Dr. Gordon’s testimony, but that her testimony is independently credible that documentation of the resolution of red flags is a requirement of the practice of pharmacy in the State of Florida.

Accordingly, in summary, I agree with the ALJ’s finding in the RD that the Government has proven by substantial evidence that Respondent filled prescriptions for controlled substances that the pharmacists knew were not prescribed for legitimate medical

purposes, or were willfully blind to such, in violation of their corresponding responsibility under 21 CFR 1306.04(a) and outside the usual course of professional practice in violation of 21 CFR 1306.06. I find these violations of federal law and negative dispensing experience to weigh against the Respondents’ continued registrations under Factors Two and Four.

I further find that the Government has demonstrated that pharmacists at Respondent Pharmacy violated Fla. Stat. § 893.04(2)(a) (2009). During the time period covered by the Show Cause Order, Florida law required that a pharmacist, before dispensing a controlled substance listed in schedules II through IV, first determine “in the exercise of her or his professional judgment . . . that the order is valid.” Fla. Stat. § 893.04(2)(a) (2009); *see also* Fla. Stat. § 893.02(22) (2011) (defining a “prescription” as an order for drugs “issued in good faith and in the course of professional practice . . . and meeting the requirements of s. 893.04.”). In this case, I have found that the Government established by substantial evidence that pharmacists at Respondent Pharmacy filled prescriptions outside the usual course of professional practice of pharmacy. I find that the pharmacists did not exercise their professional judgment in acting outside of the usual course of practice and that this is evidence of Respondent Pharmacy’s noncompliance with state law, which I consider under Factor Four and weigh against Respondents’ continued registrations.

(b) Allegation That Respondent Pharmacy Filled Prescriptions Written for “Office Use” in Violation of 21 CFR 1306.04(b)

DEA regulations state that “[a] prescription may not be issued in order for an individual practitioner to obtain controlled substances for supplying the individual practitioner for the purpose of general dispensing to patients.” 21 CFR 1306.04(b). As I found above, Respondent Pharmacy dispensed testosterone to Dr. I’s office on eight occasions and Dr. A’s office once, between September 23, 2014, and January 28, 2015. GX 3; RD, at 29; *supra* Section II(F). As I also found above, the Government’s expert witness testified that the fact that the prescriptions were labeled “for office use,” assigned a prescription number, issued fill stickers, and included the office name in the place of a patient’s name demonstrated that the prescriptions were issued outside of the usual course of professional practice. Tr. 64–65.

⁷⁶ The Order to Show Cause alleged that in filling prescriptions with multiple red flags and not documenting their resolution, Respondent Pharmacy violated Fla. Admin. Code Ann. r. 64B16–27.800 and 64B16–27.810. OSC, at 10.

The Government's expert testified that "if there were an invoice and the prescription was issued to a practitioner," it would have resolved the issue, but clarified that it was not within the acceptable standard of practice to order controlled substances from a pharmacy to be distributed to a dispensing practitioner and then report it to the Florida Prescription Drug Monitoring Program (E-FORCSE). *Id.* at 278–79; 288–89. Respondents' Owner and PIC maintained that these were "wholesale transactions" and not prescriptions. Tr. 697. She maintained that Dr. I. was registered as a dispensing practitioner. Tr. 578. Respondents also argued that Dr. I. was administering the controlled substances to patients in the office.⁷⁷ Resp Posthearing, at 10. The Government argued that these claims were based solely on conjecture and that the clear evidence was that prescriptions with fill stickers were dispensed "for office use." Govt Exceptions, at 1–2; *id.* at 2 n.1.

The ALJ did not sustain the 21 CFR 1306.04(b) violation, because he found that in order to prove such a violation, "it was incumbent upon the Government to prove that Drs. [I and A] were going to be dispensing the controlled substances to patients." RD, at 69. He noted that the prescriptions stated that they were "for office use" and that was consistent with Respondents' Owner and PIC's testimony that the practitioners were administering the testosterone and not dispensing it and that therefore, the prescriptions fell into an exception to the regulatory requirement. *Id.* at 69–70. The Government argued in its Exceptions that the ALJ had applied an exception to the regulation that does not exist and that the ALJ's reasoning related to his finding under 1306.04(b) incorrectly implied that it was "incumbent upon the Government to prove that [the practitioners] were going to be dispensing the controlled substances to patients." RD, at 69; Govt Exceptions, at 3–4. The Government further argued that the ALJ's analysis of the "office use" prescriptions under Section 1306.04(b) was inconsistent with the Agency's decision in *Roberto Zayas, M.D.*, 82 FR 21,410, 21,424 (2017). Govt Exceptions, at 2.

Dr. Gordon clearly testified that if the purpose was to transfer the controlled substances, there was a lawful way in which to conduct such transactions, but issuing and dispensing pursuant to a prescription, using fill stickers and reporting to E-FORCSE was not within

the usual course of professional practice of pharmacy in Florida. If Respondent Pharmacy had intended these documents to be invoices, they facially did not appear to be so, and Respondent did not produce any additional documentation that justified the filling of these prescriptions issued for "office use."⁷⁸ I agree with the Government that the prescriptions themselves appeared to violate 21 CFR 1306.04(b). See *Roberto Zayas, M.D.*, 82 FR 21,410, 21,425 (2017) (holding that prescriptions written "for office use" violated 21 CFR 1306.04(b) and holding the prescriber responsible for calling in the prescriptions).

In this case, the Government initially stated that Dr. Gordon would testify that these prescriptions raised red flags that were not resolved. Govt Prehearing, at 8. The Government's expert did not discuss red flags related to these prescriptions, but did conclude that they were issued outside the usual course of professional practice. Tr. 65–66. In its Posthearing Brief, the Government argued that the prescriptions were issued in violation of 1306.04(b) "and accordingly were not dispensed in the usual course of professional practice." Govt Posthearing, at 9. However, the Government did not allege a violation of 21 CFR 1306.06⁷⁹ for these prescriptions, nor did it sufficiently establish through its expert witness that these prescriptions were dispensed in violation of Respondent Pharmacy's corresponding responsibility in violation of 21 CFR 1306.04(a), and even if the Government had established this, it appeared to abandon this theory in its Posthearing Brief. Therefore, I will not consider the allegation related to the prescriptions issued for "office use," because the Government has not

⁷⁸ Respondents claim that in November 2014, Respondent Pharmacy started using invoices in lieu of prescription pads. Resp Posthearing, at 64 (citing GX 3, at 5–13). The documents in question appear different from the other pages of the exhibit, with the exception of GX 3, at 11, but they state "Prescription Form" at the top. The Respondents have not adequately explained the difference between the different forms and there are fill stickers associated with all of them. However, ultimately, I have not sustained this allegation, so I find it unnecessary to determine the accuracy of Respondents' unexplained claim that some of the exhibits may have been invoices.

⁷⁹ Although the Government had alleged generally that Respondent Pharmacy acted outside the usual course of professional practice in the Order to Show Cause, the Government did not adequately notice a violation of 1306.06 in the context of the 1306.04(b) violation. I have reviewed the Respondents' filings on this matter and I do not find evidence that they were on notice of this theory regarding the 1306.06 violation in order to have litigated the issue by consent. See *Farmacia Yani*, 80 FR 29,053, 29,059 (2015).

adequately established a legal basis for my finding of a violation for Respondent Pharmacy's filling "office use" prescriptions in this case. *Pharmacy Doctors Enterprises d/b/a Zion Clinic Pharmacy*, 83 FR 10,876, 10,900 (2018) (noting that 21 CFR 1306.04(b) only prohibits the issuance of a prescription).

(c) Allegation That Respondent Pharmacy Filled Prescriptions That Were Issued by a Practitioner to Himself in Violation of Fla. Stat. § 458.331(1)(r)

The Order to Show Cause alleged that Respondent Pharmacy filled prescriptions for controlled substances "despite unresolved red flags includ[ing] . . . prescriptions [] written in violation of Florida law, Fla. Stat. 458.331(1)(r)." The ALJ found that "the Pharmacy violated its corresponding responsibility by filling prescriptions that J.S.3 wrote to himself . . ." RD, at 68. Respondents argued that the ALJ incorrectly interpreted Florida state law relating to Respondent Pharmacy's filling of J.S.3's prescriptions to himself. Resp Exceptions, at 5.

Respondents' primary argument is that "[a] plain reading of the statute holds that a physician can prescribe to himself, so long as he is not the one dispensing the medication." Resp Exceptions, at 5. In making this argument, Respondents state that "the statute prohibits a physician from prescribing to himself, unless another practitioner 'prescribed, dispensed, or administered' the controlled substances,"⁸⁰ *Id.* (citing Fla. Stat. § 458.331(1)(r) (emphasis added by Respondents)). Although the basis of the Respondents' argument that the term "or" would permit a physician to prescribe to himself as long as a different practitioner dispensed the controlled substance is well-grounded in canons of statutory construction, Respondent submitted, and I can find, no evidence that the State of Florida permits such a loophole in its prohibition against self-prescribing.⁸² If

⁸⁰ The prescriptions to J.S.3 involved testosterone and oxycodone, which are controlled substances under Fla. Stat. § 893.03.

⁸¹ The ALJ found that the Respondents' evidence included multiple documents that indicated that J.S.3 had not been treated by another doctor, but had been self-prescribing. RD, at 68 (citing RX H, at 2–3, 15–22, 40–41). I agree with the ALJ on this point. Respondents clarify in their Exceptions that their argument is not that there was another practitioner involved in the prescribing or treatment, but that Respondent Pharmacy itself created the exception by dispensing the controlled substances. Resp Exceptions, at 5.

⁸² For example, there is no indication or discussion of a distinction made on Respondents' alleged exception in this Florida disciplinary case on point, just that he violated Fla. Stat.

⁷⁷ It is noted that these two theories seem to contradict each other.

Respondents were correct in this interpretation, it would appear that a practitioner could only violate this law if he prescribed to himself and also dispensed the prescription to himself. Further, the testimony of Respondents' witnesses contradicts this reading of Florida law. D.M. and Respondents' Owner and PIC testified that the Board of Pharmacy visited in 2015 and told Respondents' Owner and PIC "that it was not lawful" to fill a prescription that a doctor had written for himself, after which D.M. changed his advice and Respondent Pharmacy did not fill any further prescriptions. Tr. 573; Tr. 809–10; *supra* Section III(E)(1). Therefore, the record contradicts Respondents' argument that the Florida Board of Pharmacy interprets the statute in the manner that Respondents suggest. However, as explained below, I do not believe that whether the law was or was not actually violated by J.S.3's self-prescribing is essential to a finding that Respondent Pharmacy violated its corresponding responsibility for these prescriptions.

The second argument that Respondents proffered is that Fla. Stat. § 458.331(1)(r) is only grounds for discipline of physicians, not pharmacists. The Florida statute specifically provides that its provisions do not apply to "[o]ther duly licensed health care practitioners acting within the scope of their practice." Fla. Stat. § 458.303(1)(a); Resp Exceptions, at 4. Fla. Stat. § 456.001(4) includes pharmacists in the definition of "health care practitioners." However, as established herein, Florida law clearly requires that a pharmacist, before dispensing a controlled substance listed in schedules II through IV, first determine "in the exercise of her or his professional judgment . . . that the order is valid." Fla. Stat. § 893.04(2)(a) (2009). Additionally, as found above, Dr. Gordon credibly testified that "[a] pharmacist should not have filled any prescription written by a physician that wrote it for himself, a controlled substance" and concluded that these prescriptions were not filled within the standard of practice of pharmacy in Florida. Tr. 62. Therefore, based on Dr. Gordon's testimony, I find that a pharmacist filling these prescriptions could not have been acting within the

scope of his or her practice in order to meet the exception set forth in Fla. Stat. § 458.303(1)(a), and the exception would not apply.

Most importantly, the Government's legal theory about these prescriptions was not that Respondent Pharmacy had directly violated this Florida statute in filling these prescriptions, but instead that J.S.3 wrote the prescriptions in violation of the law and the prescriptions raised red flags, which Respondent failed to resolve, resulting in a violation of its corresponding responsibility. OSC, at 4; Govt Prehearing, at 8; Govt Posthearing, at 7–8. *See supra* II(E)(1).

As to the testimony of D.M. that he had provided legal advice to Respondents' Owner and PIC in which he maintained that a physician could prescribe controlled substances to himself as long as a pharmacist dispensed the prescription, I do not find that this alleged advice resolved the red flags that were presented by these prescriptions for several reasons. First, Respondent did not produce documentation of the advice. Second, per D.M.'s testimony the advice was general and did not pertain to the particular circumstance of J.S.3's prescriptions. *Supra* II(E)(1). Most importantly, D.M. testified that at the time he used the word "scrutiny" in lieu of the term red flag, and that his advice was that "it wasn't prohibited and it was permissible but required scrutiny." *Id.*; Tr. 810. Dr. Gordon testified that the usual course of professional practice in Florida required that the red flags be resolved prior to the pharmacists' dispensing of the prescriptions and that those resolutions be documented. There is no evidence of Respondent Pharmacy's documentation regarding this red flag. As D.M. testified, the fact that there was even a question about whether the prescriptions violated Florida law presented such "scrutiny" or a red flag, and the record evidence demonstrates that Respondent Pharmacy was advised by its attorney that this scrutiny was "required." Therefore, I find that Respondent Pharmacy violated its corresponding responsibility⁸³ in dispensing prescriptions to J.S.3 without resolving the red flag due to Fla. Stat. § 458.331(1)(r), and that the filling of

these prescriptions is appropriately considered under Factor Four as evidence that Respondent Pharmacy was not in "compliance with applicable State, Federal or local laws relating to controlled substances." 21 U.S.C. 823(f)(4).

(d) The Legitimacy of the Prescriptions

Respondents cited,⁸⁴ and the ALJ applied, a clause written by one of my predecessors as part of a footnote in a prior Agency decision (hereinafter, the *Hills* footnote). *Hills Pharmacy, LLC*, 81 FR 49,816, 49,836 n.33 (2016) ("[I]t is true that a pharmacist cannot violate his corresponding responsibility if a prescription was nonetheless issued for a legitimate medical purpose."). The clause is footnoted in one other subsequent Agency decision. *Pharmacy Doctors Enterprises d/b/a Zion Clinic Pharmacy*, 83 FR 10,876, 10,899 n.36 (2018), *pet. for review den.*, 789 F. App'x 724 (11th Cir. 2019).

Although the sentence containing the clause is not entirely clear, the clause itself states as "true" that a pharmacist may not be found to violate his corresponding responsibility unless the prescription at issue violates 21 U.S.C. 829. The concept labeled "true" directly conflicts with DEA regulations and decades of Agency decisions interpreting those regulations.

I unequivocally reject the clause and the notion that a pharmacist may not be found to violate his corresponding responsibility unless the prescription at issue violates 21 U.S.C. 829. I affirm the part of the footnote rejecting the respondent's argument, which stated, "Respondent argues that the Government cannot establish that a pharmacist has violated his corresponding responsibility unless it first establishes that the prescription lacked a legitimate medical purpose Respondent is mistaken."

A pharmacist's corresponding responsibility is to assess prescriptions according to the applicable standard of practice, which typically requires the pharmacist to recognize and resolve red flags on the prescriptions prior to filling them, and to act on that assessment by filling or declining to fill the prescription.

The language in 21 CFR 1306.04 and relevant caselaw could not be more explicit. A pharmacist has his own responsibility to ensure that controlled substances are not dispensed for non-medical reasons. *See*,

⁸³ 458.331(1)(r). *Department of Health vs. Nader W. Said, M.D.*, DOH Case No. 2014–08153 (December 19, 2016), at 19. Available at <https://apps.mqa.doh.state.fl.us/MQASearchServices/Document/Mjk1Nzc5ODY%3D>. If the statute were as limited as Respondents argue, then it would seem that a charge would necessitate including self-dispensing as well or additional facts related to the dispensing of the prescriptions.

⁸³ Respondents' final argument is that the Government did not demonstrate that the prescriptions to J.S.3 "lack[ed] a legitimate medical purpose." Resp Exceptions, at 6. The Respondents cite to the footnote in *Hills Pharmacy, LLC*, 81 FR 49,816, 49,836 n.33 to support this notion, which is further discussed *infra* Section III(A)(1)(d). I reject this argument the reasons discussed in relation to *Hills* below.

⁸⁴ Respondents argued that the Government must prove that the prescriptions Respondent Pharmacy filled lacked a legitimate medical purpose in order to show that Respondent Pharmacy violated its corresponding responsibility based on the language of the *Hills* footnote. Resp Exceptions, at 7.

United States v. Hayes, 595 F.2d 258 (5th Cir. 1979) cert. denied, 444 U.S. 866 (1979); *United States v. Henry*, 727 F.2d 1373 (5th Cir. 1984) (reversed on other grounds). A pharmacist must exercise professional judgment when filling a prescription issued by a physician.

Ralph J. Bertolino, d/b/a Ralph J. Bertolino Pharmacy, 55 FR 4729, 4730 (1990). Respondents have presented no good reason for me to depart from DEA's decades-long statement of a pharmacist's corresponding responsibility, and I decline to do so.⁸⁵

B. Other issues

1. Unlawful Search Allegation

Respondents alleged that many of the records in the Government's case were obtained as a result of an unlawful search. Resp Posthearing, at 77–78. As found above, the first inspection occurred on September 18, 2013, during which M.P. signed a DEA Form 82, identifying himself as the “manager” and consenting to the search. GX 32. Respondents objected to this search claiming that “21 CFR 880 mandates that the ‘owner, operator, or agent’ in charge of such premises must receive notice of the inspection.”⁸⁶ Resp Posthearing, at 77. Respondents contest that DEA's service was improper because: M.P. was not an employee of Respondent Pharmacy;⁸⁷ M.P. testified that he was never given authorization to sign the DEA Form 82; and Respondents' Owner and PIC confirmed that she did not authorize him to do so. *Id.* at 78 (citing Tr. 395; 541); see also Tr. 402. The ALJ rejected Respondents' argument, because the ALJ did “not find the testimonies of [Respondents' Owner and PIC] and [M.P.] to be credible that [Respondents' Owner and PIC] did not give [M.P.] authority to sign the Notice of Inspection on September 18, 2013.” RD, at 60 n.36. The ALJ further noted that Respondents' Owner and PIC arrived at Respondent Pharmacy shortly

after M.P.'s signature and told the agents that she would provide copies of the pharmacy's records to them later, after which M.P. brought the records to the DEA Orlando District Office on September 23, 2013. *Id.*; GX 33 (DEA Form 12, Receipt for Cash or Other Items, signed by M.P.). I agree with the ALJ's determination that “it strains credulity⁸⁸ to suggest that [Respondents' Owner and PIC] did not willingly consent to delivering the documents to the DEA five days later.” RD, at 60 n.36

The second inspection was conducted as a result of an Administrative Inspection Warrant pursuant to 21 U.S.C. 880(d) in April of 2015, which the DI testified was obtained after Respondents' attorney D.M. failed to timely comply with a subpoena. *Supra* (II)(B)(2). Respondents did not appear to make any arguments related to the lawfulness of the second inspection.⁸⁹ See generally Resp Posthearing. I agree with the ALJ and reject Respondents' allegations regarding the legitimacy of the consent in the first DEA inspection. Respondents' Owner and PIC had five days to withdraw consent to the first inspection or refuse to provide copies of the documents, but nevertheless, she voluntarily chose to provide the documents using the same agent who had signed the initial consent form to deliver them.

2. Respondents' Integrated Enterprise

Respondents argue that DEA has not alleged a single violation against

Respondent LLC, and therefore it is inappropriate to revoke Respondent LLC's registration “simply because both companies share common ownership.” Resp Posthearing, at 77. The ALJ found, and I agree, that “Respondents' arguments ignore the obvious, that the Pharmacy and Suntree Medical are essentially one and the same.” RD, at 100. Agency decisions “treat[] two separately organized business entities as one integrated enterprise . . . based on the overlap of ownership, management, and operations of the two entities.” *Jones Total Health Care Pharmacy, L.L.C., and SND Health Care, L.L.C.*, 81 FR 79,188, 79,222 (2016) (citing *MB Wholesale, Inc.*, 72 FR 71,956, 71,958 (2007) (citing *MB Wholesale, Inc.*, 72 FR 71,956, 71,958 (2007))). “[W]here misconduct has previously been proved with respect to the owners, officers, or key employees of a pharmacy, the Agency can deny an application or revoke a registration of a second or subsequent pharmacy where the Government shows that such individuals have influence over the management or control of the second pharmacy.” *Superior Pharmacy I and Superior Pharmacy II*, 81 FR 31,310, 31,341, n.71 (2016). Further, the Agency may revoke a registration, even if there is no misconduct that can be attributed to the registration, if the Agency finds that the registrant committed egregious misconduct under a second registration. *Roberto Zayas, M.D.*, 82 FR 21,410, 21,430 (2017) (revoking physician's DEA registration in Florida due to conduct attributed to a Texas registration that had expired).

Respondents argue that the terms of the CSA in requiring separate registrations for each entity or person and each principal place of business should be read to “suggest two (2) separate entities are not to be considered as one (1).” Resp Exceptions, at 18 (citing 21 U.S.C. 802(49)(a), 802(38), and 822(e)). When a practitioner registrant acts in a manner inconsistent with the public interest, in determining whether to revoke, DEA looks to whether the practitioner can be entrusted with a registration. See e.g., *Arvinder Singh, M.D.*, 81 FR 8247, 8248 (2016). If a practitioner holding multiple registrations cannot be entrusted with one, it would be difficult to justify entrusting the same practitioner with another in a separate location. Similarly, if a corporate entity is owned and operated by the same individuals, who have acted inconsistently with the public interest, I cannot ignore the fact that these same individuals have used one of their registrations not in

⁸⁵ In fact, I find compelling reasons to reject Respondents' proposed interpretation. For example, if I were to interpret a pharmacist's corresponding responsibility in the manner in which Respondents suggest, not only would it be a departure in the Agency position, but the administrative hearings would be mired in irrelevant complexity that is unnecessary given that a pharmacy must exercise its corresponding responsibility prior to the filling of a prescription in order to preserve the CSA's purpose of preventing addiction and abuse. See *Cove Inc. D/B/A Allwell Pharmacy*, 80 FR 29,037, 29,049 (2015) (finding that “[t]he obligations are referred to as ‘corresponding responsibilities,’ as they impose duties on pharmacies and pharmacists that correspond with those of the treating sources.”)

⁸⁶ I have assumed that Respondents intended to cite to 21 U.S.C. 881.

⁸⁷ Although, M.P. stated, “I do work for [Respondent] Pharmacy,” Respondents' Counsel clarified with him that the work he does for Respondent LLC overlaps. Tr. 404.

⁸⁸ I agree with the ALJ that Respondents' argument strains credulity, because Respondents' Owner and PIC provided copies voluntarily five days later. I also find that the argument strains credulity, because M.P. signed the DEA Form 82 writing in the word “Manager” in the blank in the statement “I hereby certify that I am the for the premises described in this Notice of Inspection,” and further stating that “I have the authority to act in this matter and have signed this Notice of Inspection pursuant to my authority.” GX 32 (DEA Form 82). M.P. admitted that he spoke with Respondents' Owner and PIC after DEA arrived and that he did not refuse entry or request that DEA “strike his signature.” Tr. 408. M.P. also signed two DEA Forms 12 on September 23, 2013, and October 14, 2016, in which he listed his title as “Manager.” GX 33, 34. The record evidence shows that M.P. held himself out on numerous occasions to have the authority to act on behalf of both Respondents as its agent within the meaning of 21 U.S.C. 880(c).

⁸⁹ Respondents seem to conflate the facts surrounding the two inspections, alleging that the DI “presented the DEA Form 82 directly to [Respondent Pharmacy] rather than go through the pharmacy's counsel” and that the DI admitted to not knowing whether M.P. was authorized to sign the form. Resp Posthearing, at 78. However, the DI testified that he was not even present at the administrative inspection that occurred on September 18, 2013, so whether he knew about the status of M.P.'s authorization back in 2013, when he served the administrative warrant in April 2015 is irrelevant. Tr. 317–18.

accordance with the law. Respondents quoted the DI stating that Respondent LLC “has never purchased any controlled substances under that DEA registration” and that the two entities “were two (2) separate businesses, one (1) supplying medication including controlled substances, the other involved in the sale of medical equipment;” however, the lack of Respondent LLC’s past use of the registration does not prevent it from using its registration in the future. Resp Exceptions, at 19–20.

The lens through which Congress has instructed me to assess each registration is whether or not such registration is inconsistent with the public interest. 21 U.S.C. 823(f). In this case, if Respondents were allowed to simply shift their operations to an entity with the same owner and essentially the same employees, the effect of the violations found herein against Respondent Pharmacy would be a nullity, and there would be nothing to prevent Respondent LLC from continuing to act in a manner inconsistent with the public interest. Contrary to Respondents’ contention, it would be inconsistent with the intent of the CSA to permit such an easily implementable loophole, and it is consistent with Agency decisions to close the loophole by treating the two overlapping entities as one integrated enterprise for purposes of sanction.

Therefore, I agree with the ALJ that “[b]ecause of the obvious commonality of ownership, management and operations, it is abundantly clear” that if I revoke Respondent Pharmacy’s registration, Respondent LLC “could pick up where the Pharmacy left off without missing a beat. Accordingly, due to that commonality, it is appropriate to treat the [Respondent] Pharmacy and [Respondent LLC] as one integrated enterprise.” RD, at 101.

Finally, Respondents argue that they were given no notice as to the charges against Respondent LLC and therefore a finding against Respondent LLC would violate Constitutional due process. I reject this argument, because the grounds for revocation of Respondent LLC’s registration are the precise grounds that form the basis of the revocation of Respondent Pharmacy’s registration, and Respondent Pharmacy has been afforded due process of law through this proceeding. Furthermore, the OSC was clearly issued to both Respondent LLC and Respondent Pharmacy. See OSC, at 1. Each was initially docketed separately, but prior to the hearing, the ALJ ordered that the two cases would be consolidated, to which the Respondents consented.

ALJX 14 (Prehearing Ruling). Respondents simply cannot argue that they did not know that the adjudication of the alleged violations committed by Respondent Pharmacy were also being adjudicated against Respondent LLC.

C. Summary of the Public Interest Factors

As found above, Respondent Pharmacy filled hundreds of controlled substance prescriptions in violation of its corresponding responsibility and Florida law and outside the usual course of professional practice. Thus, I conclude that Respondent Pharmacy has engaged in misconduct which supports the revocation of its registration, and as explained above, it would be inconsistent with the public interest to permit Respondent LLC to maintain its registration given that Respondents are an integrated enterprise. I therefore find that the Government has established a *prima facie* case that Respondents’ continued registrations “would be inconsistent with the public interest.” 21 U.S.C. 823(f).

IV. Sanction

Where, as here, the Government has met its *prima facie* burden of showing that the Respondents’ continued registration is inconsistent with the public interest due to their violations pertaining to controlled substance dispensing, the burden shifts to the Respondents to show why they can be entrusted with the responsibility carried by their registrations. *Garret Howard Smith, M.D.*, 83 FR 18,882, 18,910 (2018) (citing *Samuel S. Jackson*, 72 FR 23,848, 23,853 (2007)). The CSA authorizes the Attorney General to “promulgate and enforce any rules, regulations, and procedures which he may deem necessary and appropriate for the efficient execution of his functions under this subchapter.” 21 U.S.C. 871(b). This authority specifically relates “to ‘registration’ and ‘control,’ and ‘for the efficient execution of his functions’ under the statute.” *Gonzales v. Oregon*, 546 U.S. at 259. A clear purpose of this authority is to “bar[] doctors from using their prescription-writing powers as a means to engage in illicit drug dealing and trafficking.” *Id.* at 270. In efficiently executing the revocation and suspension authority delegated to me under the CSA for the aforementioned purposes, I review the evidence and argument Respondents submitted to determine whether or not they have presented “sufficient mitigating evidence to assure the Administrator that [they] can be trusted with the responsibility carried by such a registration.” *Samuel S. Jackson*,

D.D.S., 72 FR 23,848, 23,853 (2007) (quoting *Leo R. Miller, M.D.*, 53 FR 21,931, 21,932 (1988)). “Moreover, because ‘past performance is the best predictor of future performance,’ *ALRA Labs, Inc. v. DEA*, 54 F.3d 450, 452 (7th Cir. 1995), [the Agency] has repeatedly held that where a registrant has committed acts inconsistent with the public interest, the registrant must accept responsibility for [the registrant’s] actions and demonstrate that [registrant] will not engage in future misconduct.” *Jayam Krishna-Iyer*, 74 FR 459, 463 (2009) (quoting *Medicine Shoppe*, 73 FR 364, 387 (2008)); see also *Jackson*, 72 FR at 23,853; *John H. Kennedy, M.D.*, 71 FR 35,705, 35,709 (2006); *Prince George Daniels, D.D.S.*, 60 FR 62,884, 62,887 (1995). The issue of trust is necessarily a fact-dependent determination based on the circumstances presented by the individual respondent; therefore, the Agency looks at factors, such as the acceptance of responsibility and the credibility of that acceptance as it relates to the probability of repeat violations or behavior and the nature of the misconduct that forms the basis for sanction, while also considering the Agency’s interest in deterring similar acts. See *Arvinder Singh, M.D.*, 81 FR 8247, 8248 (2016).

Regarding all of these matters, I agree with the analyses and conclusions contained in the Recommended Decision. RD, at 101–04. I agree with the ALJ that there is nothing in the record that suggests Respondent Pharmacy has accepted responsibility for its actions. In fact, as the ALJ found, “the evidence is clear in this case that the Pharmacy has taken no responsibility for its egregious and repeated failure to fulfill its corresponding responsibility to ensure the proper prescribing and dispensing of controlled substances. The evidence is clear because the Pharmacy has specifically denied responsibility.” RD, at 101. In fact, Respondents’ attorney made very clear that Respondents were not accepting any responsibility. He stated, “I’m well aware that I can’t go into remediation unless we were to accept responsibility. Your Honor. And we won’t unless we do.” Tr. 567; RD, at 99. Further, even after the Florida Board of Pharmacy had told Respondents’ Owner and PIC that a practitioner could not prescribe to himself, Respondents maintained that the law permitted them to fill those prescriptions. See Resp Exceptions; Tr. 573, 809–10. Respondent Pharmacy did cease filling the prescriptions as a result of the Board of Pharmacy’s instructions; however, the fact that Respondent Pharmacy

relied on an interpretation involving a legal loophole to fill the prescriptions in the first place, and then continued to argue that the behavior was lawful in spite of the state's assertions to the contrary, not only demonstrates no remorse, but also demonstrates a willingness to push the boundaries of the law to maximize business. Such a willingness does not inspire optimism about Respondents' future compliance with the CSA.

I agree with the ALJ that the egregiousness of Respondent Pharmacy's conduct and the interests of specific and general deterrence support a sanction of revocation. RD, at 99. "Specifically, pharmacists employed by the Pharmacy, as well as [Respondents' Owner and PIC], dispensed numerous prescriptions of controlled substances in violation of their corresponding responsibility." *Id.*

There is nothing in the record that lends support to the proposition that Respondent Pharmacy's future behavior will deviate in any positive respect from its past behavior. Due to the fact that Respondent Pharmacy has accepted no responsibility nor offered any remedial measures, it has given me no reassurance that I can entrust it with a registration and no evidence that it will not repeat its egregious behavior.

Regarding general deterrence, the Agency bears the responsibility to deter similar misconduct on the part of others for the protection of the public at large. *David A. Ruben*, 78 FR at 38,385. Based on the number and egregiousness of the established violations in this case, a sanction less than revocation would send a message to the regulated community that compliance with the law is not a condition precedent to maintaining registration.

A balancing of the statutory public interest factors, coupled with consideration of Respondent Pharmacy's failure to accept responsibility, the absence of any evidence of remedial measures to guard against recurrence, and the Agency's interest in deterrence, support the conclusion that Respondent Pharmacy should not continue to be entrusted with a registration. Further, the ALJ found, and I agree, that if I revoke Respondent Pharmacy's registration, Respondent LLC "could pick up where the Pharmacy left off without missing a beat. Accordingly, due to that commonality, it is appropriate to treat the Pharmacy and Suntree Medical as one integrated enterprise." RD, at 101. Due to the commonality of ownership and procedures, I cannot entrust Respondent LLC with a registration any

more than I can entrust Respondent Pharmacy with one.

Therefore, I shall order the sanctions the Government requested, as contained in the Order below.

V. Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificates of Registration Nos. BS7384174 and FS2194289 issued to Suntree Pharmacy and Suntree Medical Equipment LLC. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending application of Suntree Pharmacy and Suntree Medical Equipment to renew or modify these registrations, as well as any other pending application of Suntree Pharmacy and Suntree Medical Equipment for registration in Florida. This order is effective December 21, 2020.

Timothy J. Shea,

Acting Administrator.

BILLING CODE 4410-09-P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

ECO Apothecary, LLC; Decision and Order

On December 2, 2019, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause (hereinafter, OSC) to Eco Apothecary, LLC (hereinafter, Registrant or Registrant Pharmacy), of Salt Lake City, Utah. Government's Request for Final Agency Action Exhibit (hereinafter, RFAAX) 2 (OSC), at 1. The OSC proposed the revocation of Registrant's Certificate of Registration No. FE7288497. It alleged that Registrant is without "authority to handle controlled substances in the State of Utah, the state in which [Registrant] is registered with the DEA." *Id.* (citing 21 U.S.C. 824(a)(3)).

Specifically, the OSC alleged that Registrant's Utah pharmacy license is expired. *Id.* The OSC further alleged that, because Registrant's Utah pharmacy license is expired, Registrant lacks the authority to handle controlled substances in Utah, and is, therefore, ineligible to maintain a DEA registration. *Id.* at 1-2.

The OSC notified Registrant of the right to either request a hearing on the allegations or submit a written statement in lieu of exercising the right

to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* at 2 (citing 21 CFR 1301.43). The OSC also notified Registrant of the opportunity to submit a corrective action plan. *Id.* at 2-3 (citing 21 U.S.C. 824(c)(2)(C)).

I. Adequacy of Service

A DEA Diversion Investigator declared that he personally served James Ammon, Rph, with the OSC at the Registrant Pharmacy on December 10, 2019. RFAAX 4 (Declaration of Diversion Investigator). James Ammon signed Registrant's online application for a DEA registration on November 23, 2017. RFAAX 1 (Certification of Registration History). The DEA Diversion Investigator declared that he recognized James Ammon because the Diversion Investigator had previously met with him. RFAAX 4.

The Government forwarded its RFAA, along with the evidentiary record, to this office on May 19, 2020. In its RFAA, the Government represents that "Registrant has not requested a hearing" RFAA at 1. DEA did receive a letter from Registrant dated February 25, 2020, which stated that the purpose of the letter was "to complete its duty, and report to the DEA the record of the pharmacy's final inventory, as well as report to the DEA its disposition and transfer of control of the controlled substances previously in the pharmacy's control." RFAAX 6, at 1. Registrant's February 25 letter did not request a hearing and was sent more than thirty days after Registrant received the OSC. *See id.*

Based on the Diversion Investigator's Declaration, the Government's written representations, and my review of the record, I find that the Government accomplished service of the OSC on Registrant on December 10, 2019. I also find that more than thirty days have now passed since the Government accomplished service of the OSC. Further, based on the Government's written representations, I find that neither Registrant, nor anyone purporting to represent Registrant, requested a hearing, submitted a written statement while waiving Registrant's right to a hearing, or submitted a corrective action plan. Accordingly, I find that Registrant has waived the right to a hearing and the right to submit a written statement and corrective action plan. 21 CFR 1301.43(d) and 21 U.S.C. 824(c)(2)(C). I, therefore, issue this Decision and Order based on the record submitted by the Government, which constitutes the entire record before me. 21 CFR 1301.43(e).

II. Findings of Fact

A. Registrant's DEA Registration

Registrant is the holder of DEA Certificate of Registration No. FE7288497 at the registered address of 3702 S. State Street, Suite 117, Salt Lake City 84115. RFAAX 2 (Certification of Registration History). Pursuant to this registration, Registrant is authorized to dispense controlled substances in schedules II–V as a retail pharmacy. *Id.*

B. The Status of Registrant's State License

Registrant was previously the holder of a Utah Pharmacy—Class B license. RFAAX 3 (Verification of Utah Licensure). Registrant's Utah pharmacy license expired on September 30, 2019. *Id.* A certified Verification of Utah Licensure dated November 13, 2019, from the State of Utah, Department of Commerce, Division of Occupational and Professional Licensing, shows the status of Registrant's Utah pharmacy license as “Denied.” *Id.*

According to Utah's online records, of which I take official notice, Registrant's pharmacy license status is still listed as “Denied.”¹ <https://secure.utah.gov/llv/search/index.html> (last visited October 27, 2020). Utah's online records further show that Registrant's Controlled Substance License also expired on September 30, 2019, and the license status is also listed as “Denied.” *Id.*

Accordingly, I find that Registrant does not have a valid pharmacy license or controlled substance license in Utah, the state in which Registrant is registered with DEA.

III. Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the Controlled Substances Act (hereinafter, CSA), “upon a finding that the registrant . . . has had his State license or registration

suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.” A pharmacy is a “practitioner” under the CSA. 21 U.S.C. 802(21). With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the State in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner's registration. *See, e.g., Palafox Pharmacy*, 84 FR 18,320 (2019); *James L. Hooper, M.D.*, 76 FR 71,371 (2011), *pet. for rev. denied*, 481 Fed. Appx. 826 (4th Cir. 2012); *Roots Pharmaceuticals, Inc.*, 76 FR 51,430 (2011); *Bourne Pharmacy, Inc.*, 72 FR 18,273 (2007); *Frederick Marsh Blanton, M.D.*, 43 FR 27,616 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician, . . . pharmacy, . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess State authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner's registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the State in which he practices. *See, e.g., Palafox Pharmacy*, 84 FR at 18,321; *James L. Hooper*, 76 FR at 71,371–72; *Roots Pharmaceuticals, Inc.*, 76 FR at 51,430; *Bourne Pharmacy, Inc.*, 72 FR at 18,274; *Frederick Marsh Blanton*, 43 FR at 27,617.

As found above, Registrant's state pharmacy and controlled substance licenses have expired, and thus, it no longer holds authority in Utah, the state in which it is registered with DEA, to dispense controlled substances. *See* Utah Code Ann. §§ 58–17b–302(1) (requiring a license to act as a pharmacy); 58–37–6(2)(a)(i) (requiring a license to dispense controlled substances) (West 2020). As such, Registrant is not qualified to dispense

controlled substances as a “practitioner.” I will, therefore, order that Registrant's DEA registration be revoked.

IV. Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. FE7288497 issued to Eco Apothecary, LLC. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending application of Eco Apothecary, LLC to renew or modify this registration, as well as any pending application of Eco Apothecary, LLC for registration in Utah. This Order is applicable December 21, 2020.

Timothy J. Shea,
Acting Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 20–11]

Monica Ferguson, F.N.P., R.N.; Decision and Order

On February 20, 2020, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause (hereinafter, OSC) to Monica Ferguson, F.N.P., R.N., (hereinafter, Respondent) of Lake Oswego, Oregon. OSC, at 1. The OSC proposed the revocation of Respondent's Certificate of Registration No. MF1358298. *Id.* It alleged that Respondent is without “authority to handle controlled substances in Oregon, the state in which [Respondent is] registered with DEA.” *Id.* *See also* 21 U.S.C. 823(f) and 824(a)(3).

Specifically, the OSC alleged that the Oregon State Board of Nursing (hereinafter, Board) revoked Respondent's RN license number 099000287RN and her NP–PP Family license number 200650008NP effective on December 31, 2019. *Id.* This revocation, according to the OSC, demonstrated that Respondent lacks authority to handle controlled substances in Oregon. *Id.* (citing 21 U.S.C. 802(21), 823(f), and 824(a)(3)).

The OSC notified Respondent of the right to request a hearing on the allegations or to submit a written statement, while waiving the right to a hearing, the procedures for electing each option, and the consequences for failing

¹ Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.”

United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Registrant may dispute my finding by filing a properly supported motion for reconsideration within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Registrant files a motion, the Government shall have fifteen calendar days to file a response. Any such motion and response may be filed and served by email (dea.addo.attorneys@dea.usdoj.gov).

to elect either option. *Id.* at 2 (citing 21 CFR 1301.43). The OSC also notified Respondent of the opportunity to submit a corrective action plan. *Id.* at 3 (citing 21 U.S.C. 824(c)(2)(C)).

By letter dated March 11, 2020, Respondent, *pro se*, timely requested a hearing.¹ Hearing Request, at 1. In the Hearing Request, Respondent requested that DEA defer proceedings on the proposed revocation of her DEA registration until there is a decision from the Oregon Appellate Court on her March 3, 2020, request for an immediate remand or reversal of the Board's revocation of her state licenses. *Id.* at 2. Respondent also requested an extension of time to prepare for the DEA revocation proceedings in light of a number of delineated personal circumstances which Respondent described as "extreme hardship[s]." *Id.* at 1.

The Office of Administrative Law Judges put the matter on the docket and assigned it to Administrative Law Judge Mark M. Dowd (hereinafter, ALJ). The ALJ issued a Briefing Schedule for Lack of State Authority Allegations, dated March 16, 2020. The Government timely complied with the Briefing Schedule by filing a Motion for Summary Disposition on March 20, 2020, (hereinafter, Government Motion or Govt Motion). Order Granting the Government's Motion for Summary Disposition, and Recommended Rulings, Findings of Fact, Conclusions of Law, and Recommended Decision of the Administrative Law Judge, dated May 5, 2020, (hereinafter, Summary Disposition or SD), at 3. In its Motion, the Government submitted evidence that Respondent's Oregon nurse practitioner licenses had been revoked and that she therefore lacked authority to handle controlled substances in Oregon, the state in which she is registered with DEA. Govt Motion, at 1; SD, at 3. In light of these facts, the Government argued that DEA must revoke her registration. Govt Motion, at 3.

On March 22, 2020, Respondent, asked that the Government Motion be denied, requested that the parties have a hearing, and referenced her Hearing Request, wherein she requested a deferral of proceedings or additional time to prepare evidence. *See* Email from Respondent, dated March 22, 2020; March 23, 2020 Order Granting Respondent Extension to File Response to Government's Motion for Summary Disposition (hereinafter, March 23, 2020

Order), at 1. In the March 23, 2020 Order, the ALJ denied Respondent's request to defer or stay proceedings. March 23, 2020 Order, at 3. The ALJ then granted Respondent an extension of time to respond to the Government Motion. *Id.* at 5. The March 23, 2020 Order also clearly explained to Respondent that the proceeding was focused on "whether Respondent has lost her state authority to handle controlled substances," and that "[t]he underlying merits of the Respondent's loss of state licensure are irrelevant." *Id.* at 2.

On April 12, 2020, Respondent again asked for an extension of time to respond to the Government Motion. *See* Email from Respondent dated April 12, 2020. On April 13, 2020, the ALJ granted Respondent another extension of time to respond and referred back to the March 23, 2020 Order outlining the relevant issues in dispute. Order Granting Respondent's Second Extension to File Response to Government's Motion for Summary Disposition, at 1. On May 4, 2020, Respondent timely filed her "Response to Motion for Summary Disposition" (hereinafter, Respondent's Response or Resp Response). In her Response, Respondent challenged the method of investigation and the merits of the underlying state action, and requested a stay of DEA's proceedings while she appealed the state action. *See generally* Resp Response; SD, at 4. Regarding the relevant issue—whether or not Respondent had state authority to handle controlled substances—Respondent explicitly admitted that she did not. Resp Response, at 8. Respondent "agree[d] that she lacks the authority to handle controlled substance[s]" and further "acknowledge[d] that [her] license has been revoked." ² *Id.* at 8, 9.

In the Summary Disposition, the ALJ again denied the Respondent's request to stay DEA's proceedings.³ SD, at 5–6. The ALJ noted that, even though the Respondent was actively engaged in negotiating or appealing a State Board decision, "[i]t is not DEA's policy to stay [administrative] proceedings . . . while registrants litigate in other forums." SD, at 5 (citing *Newcare Home Health Servs.*, 72 FR 42,126, 42,127 n.2 (2007)). The ALJ then went on to grant the Government Motion. *Id.* The ALJ found that "no dispute exists over the

fact that the Respondent currently lacks state authority to handle controlled substances in the State of Oregon, . . . so there is no contested factual matter that could be introduced at a hearing that would, in the Agency's view, provide authority to allow the Respondent to continue to hold her DEA [registration]." SD, at 8–9. By letter dated June 15, 2020, the ALJ certified and transmitted the record to me for final Agency action. In that letter, the ALJ advised that neither party filed exceptions. I find that the time period to file exceptions has expired. *See* 21 CFR 1316.66.

I issue this Decision and Order based on the entire record before me. 21 CFR 1301.43(e). I make the following findings of fact.

Findings of Fact

Respondent's DEA Registration

Respondent is the holder of DEA Certificate of Registration No. MF1358298 at the registered address of 18238 Tamaway Drive, Lake Oswego, Oregon, 97034. Govt Motion Exhibit (hereinafter, GX) 1, at 1. Pursuant to this registration, Respondent is authorized to dispense controlled substances in schedules II through V as a "MLP–NURSE PRACTITIONER–DW/30." *Id.* Respondent's registration expired on September 30, 2020.⁴ *Id.*

The Status of Respondent's State License

On December 31, 2019, the Oregon State Board of Nursing issued a Final Order revoking Respondent's Nurse Practitioner's Certificate and Registered Nurse License. GX 2, at 33. According to the Final Order, Respondent "engaged in fraud or deceit in the practice of nursing," "fraud or deceit in the admission to [the practice of nursing]," "gross incompetence . . . [or] gross negligence with regard to patient care," and "no less than six separate instances of conduct derogatory to the standards of nursing." *Id.* Examples of the misconduct that gave rise to these findings include, but are not limited to, Respondent operating a vehicle while impaired by prescription narcotics and possessing controlled substances that were stored in unlabeled bottles and that were not prescribed to her. *Id.* at 3–4, 10–12, 17.

According to Oregon's online records, of which I take official notice,

¹ The Hearing Request was deemed filed on March 16, 2020. Briefing Schedule for Lack of State Authority Allegations dated March 16, 2020, at 1. I, thus, find that the Government's service of the OSC was adequate.

² Respondent challenges the date her license was revoked (indicating that it was actually revoked in February 2020) and argues that the matter is still pending because it is being appealed. Resp Response, at 8–9.

³ I find no error in the ALJ's decision to continue DEA's proceedings.

⁴ The fact that Respondent allowed her registration to expire during the pendency of an OSC does not impact my jurisdiction or prerogative under the Controlled Substances Act (hereinafter, CSA) to adjudicate the OSC to finality. *Jeffrey D. Olsen, M.D.*, 84 FR 68,474 (2019).

Respondent's registered nurse and family nurse practitioner licenses are still revoked.⁵ Oregon State Board of Nursing License Verification Search, <http://osbn.oregon.gov/OSBNVerification/default.aspx> (last visited October 27, 2020). The Oregon records show that the end date for each of the license revocations is "Ongoing." *Id.*

Respondent "agrees that she lacks the authority to handle controlled substance[s]" and further "acknowledges that [her] license has been revoked."⁶ Resp Response, at 8, 9. Based on the entire record before me, I find that Respondent currently is not licensed to engage in the practice of nursing in Oregon, the State in which Respondent is registered with DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the CSA "upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing[7] of controlled substances." With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a

practitioner's registration. *See, e.g., James L. Hooper, M.D.*, 76 FR 71,371 (2011), *pet. for rev. denied*, 481 F. App'x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term "practitioner" to mean "a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice." 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner's registration, Congress directed that "[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices." 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner's registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper*, 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.*, 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton*, 43 FR at 27,617.

Moreover, because "the controlling question" in a proceeding brought under 21 U.S.C. 824(a)(3) is whether the holder of a practitioner's registration "is currently authorized to handle controlled substances in the state," *Hooper*, 76 FR at 71,371 (quoting *Anne Lazar Thorn*, 62 FR 12,847, 12,848 (1997)), the Agency has also long held that revocation is warranted even where a practitioner is still challenging the underlying action. *Bourne Pharmacy*, 72 F 18,273, 18,274 (2007); *Wingfield Drugs*, 52 FR 27,070, 27,071 (1987). Thus, it is of no consequence that the action is being appealed. What is consequential is my finding that Respondent is no longer currently authorized to dispense controlled substances in Oregon, the state in which she is registered.

According to Oregon's statute, "[a] registered nurse *licensed* as a nurse practitioner is authorized to prescribe drugs for the use of and administration to other persons if approval has been given under [Oregon Revised Statutes] 678.390." Or. Rev. Stat. Ann. § 678.375

(West 2020) (emphasis added). Oregon Revised Statute § 678.390, provides that "[t]he Oregon State Board of Nursing may authorize a *licensed* nurse practitioner or licensed clinical nurse specialist to write prescriptions, including prescriptions for controlled substances listed in schedules II, III, III N, IV and V." Or. Rev. Stat. Ann. § 678.390(1) (West 2020) (emphasis added). The Oregon statute also states that "[t]he authority to write prescriptions or dispense prescription drugs may be denied, suspended or revoked by the Oregon State Board of Nursing upon proof that the authority has been abused."⁸ *Id.* Here, it is clear that Respondent is no longer a licensed nurse practitioner and it is thus clear that she is no longer authorized to prescribe, administer, or dispense controlled substances in Oregon.

The undisputed evidence in the record is that Respondent currently lacks authority to practice nursing in Oregon. As already discussed, a nurse practitioner must be a licensed nurse practitioner to prescribe or dispense a controlled substance in Oregon. Thus, because Respondent lacks authority to practice nursing in Oregon and, therefore, is not authorized to handle controlled substances in Oregon, Respondent is not eligible to maintain a DEA registration. Accordingly, I will order that Respondent's DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. MF1358298 issued to Monica Ferguson. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending application of Monica Ferguson to renew or modify this registration, as well as any other application of Monica Ferguson, for additional registration in Oregon. This Order is effective December 21, 2020.

Timothy J. Shea,

Acting Administrator.

[FR Doc. 2020–25529 Filed 11–18–20; 8:45 am]

BILLING CODE 4410–09–P

⁵ Under the Administrative Procedure Act, an agency "may take official notice of facts at any stage in a proceeding—even in the final decision." United States Department of Justice, Attorney General's Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), "[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary." Accordingly, Respondent may dispute my finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Respondent files a motion, the Government shall have fifteen calendar days to file a response. Any motion and response shall be filed and served by email to the other party and to the Office of the Administrator at dea.addo.attorneys@dea.usdoj.gov.

⁶ Respondent challenges the date her license was revoked (indicating that it was actually revoked in February 2020) and argues that the matter is still pending because it is being appealed. Resp Response, at 8–9. I find these arguments to be irrelevant as Respondent is not currently authorized to dispense controlled substances in Oregon.

⁷ "[D]ispense[]" means to deliver a controlled substance to an ultimate user . . . by, or pursuant to the lawful order of, a practitioner, including the prescribing and administering of a controlled substance. . . . 21 CFR 802(10).

⁸ Although it appears that the process for a nurse practitioner to become authorized for prescribing and dispensing controlled substances is distinct from the process of becoming a licensed nurse practitioner, the authorization does not appear to be separately listed on the verification website. However, it is clear from Oregon law that it is a prerequisite of prescribing authority to be licensed as a nurse practitioner.

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Jeffrey M. Wolk, M.D.; Decision and Order

On February 14, 2020, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, Government), issued an Order to Show Cause (hereinafter, OSC) to Jeffrey M. Wolk, M.D. (hereinafter, Registrant) of Sierra Vista, Arizona. OSC, at 1. The OSC proposed the revocation of Registrant's Certificate of Registration No. BW2472051. *Id.* It alleged that Registrant is without "authority to handle controlled substances in the State of Arizona, the state in which [Registrant is] registered with DEA." *Id.* (citing 21 U.S.C. 823(f) and 824(a)(3)).

Specifically, the OSC alleged that, on December 3, 2019, the Arizona Medical Board (hereinafter, Arizona Board) issued an "Order for Surrender of License and Consent to the Same." *Id.* at 2. Pursuant to this Order, Registrant "agreed to the immediate surrender of [his] license to practice allopathic medicine," and Registrant's "Arizona license to practice allopathic medicine remains in a surrendered status." *Id.* Therefore, the OSC alleged that Registrant currently lacks authority to practice medicine in Arizona. *Id.*

The OSC notified Registrant of the right to request a hearing on the allegations or to submit a written statement, while waiving the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* (citing 21 CFR 1301.43). The OSC also notified Registrant of the opportunity to submit a corrective action plan. OSC, at 3 (citing 21 U.S.C. 824(c)(2)(C)).

Adequacy of Service

In a Declaration dated May 28, 2020, a Diversion Investigator (hereinafter, the DI) assigned to the Tucson District office, Phoenix Field Division, stated that she spoke with Registrant on the phone on December 13, 2019, and after verifying his identity, "requested that he voluntarily surrender his DEA Certificate of Registration ('COR') because he was no longer authorized to handle controlled substances in the state in which he held a DEA registration." Request for Final Agency Action, dated June 2, 2020 (hereinafter, RFAA), Exhibit (hereinafter, RFAAX) 11 (DI's Declaration), at 2. The DI stated that she told Registrant that if he decided not to surrender his registration, DEA would issue an OSC,

but that "[Registrant] declined to surrender his DEA registration." *Id.* On February 24, 2020, the DI stated that she and another DI traveled to Registrant's registered address located at 3410 Canyon De Flores, Suite B, Sierra Vista, Arizona 8650 to serve him with an OSC. *Id.* The DI stated that there was a sign on the door at the registered address stating that the "office was permanently closed." *Id.* The DI then called Registrant's business telephone number, but the "number was no longer in service." *Id.* Later that day, the DIs traveled to Registrant's last known residence, but there was no answer. The DI also tried to call his cell phone twice and left a voicemail. *Id.* The DI stated, "After multiple unsuccessful attempts at reaching [Registrant] to personally serve him with the [OSC], on April 14, 2020, [she] forwarded a copy of the [OSC] document to [Registrant] at his email address [] and captioned the email 'OTSC.'" *Id.* She stated that she tracked the email and "obtained a confirmation record from the internet Mail Delivery system that the OTSC document had been delivered to the recipient on April 14." *Id.*; RFAAX 5 (Delivery Confirmation). Later that day, Registrant responded to the DI's email. RFAAX 11; RFAAX 6 (Email from Registrant). Further, on April 17, 2020, Registrant forwarded the email and attachment to DEA attorneys along with a written statement explaining his the circumstances surrounding the underlying state action regarding the surrender of his medical license. RFAAX 7, at 1; RFAAX 11. He stated that he "agreed to the Surrender as [he] had already retired." RFAAX 7, at 1.

The Government forwarded its RFAA, along with the evidentiary record, to this office on June 3, 2020. In its RFAA, the Government represented that "more than thirty days have passed since Registrant received the [OSC]; however, Registrant has not submitted to DEA a request for a hearing . . . or otherwise submitted a response with the agency following the issuance of the [OSC]." ¹ RFAA, at 2. The Government requested "a DEA Final Order for the revocation" of Registrant's Certificate of Registration. *Id.* at 6.

Based on the DI's Declaration, the Government's written representations, and my review of the record, I find that the Government accomplished service of the OSC on Registrant on April 14, 2020, as demonstrated by Registrant's specific acknowledgment of receipt of

the OSC via reply email to the DI. I also find that more than thirty days have now passed since the Government accomplished service of the OSC. Further, based on the Government's written representations, I find that neither Registrant, nor anyone purporting to represent the Registrant, requested a hearing or submitted a corrective action plan. Accordingly, I find that Registrant has waived the right to a hearing and corrective action plan. 21 CFR 1301.43(d) and 21 U.S.C. 824(c)(2)(C). I consider the email that DEA received from Registrant to be a written statement from Registrant in accordance with 21 CFR 1301.43(c). RFAAX 7, at 1. In the email, Registrant confirmed the underlying surrender of his Arizona state license and stated that "it was never [his] intention to maintain a DEA license after retirement." *Id.* Although I have considered Registrant's statement, it does not present any issue of fact or law that could affect my final decision, as explained herein. I issue this Decision and Order based on the record submitted by the Government, including Registrant's statement, which constitutes the entire record before me. 21 CFR 1301.43(e).

Findings of Fact

Registrant's DEA Registration

Registrant is the holder of DEA Certificate of Registration No. BW2472051 at the registered address of Arizona Urology Center PLLC, 3410 Canyon de Flores, Suite B, Sierra Vista, Arizona 85650. RFAAX 1. Pursuant to this registration, Registrant is authorized to dispense controlled substances in schedules II–V as a practitioner. *Id.* Registrant's registration expired on May 31, 2020, and "is in acting pending status until the resolution of administrative proceedings." ² RFAAX 2 (Certification of Registration History).

The Status of Registrant's State License

On December 3, 2019, the Registrant entered into a Consent to Entry of Order (hereinafter, Consent Order) with the Arizona Board. RFAAX 3, at 2 (Consent Order). On December 11, 2019, the Arizona Board issued an Order for Surrender of License and Consent to the Same (hereinafter, Surrender Order). RFAAX 3, at 1 (Surrender Order). According to the Surrender Order, Registrant "state[d] that he has retired from professional practice and wishe[d] to surrender his license." *Id.* The Order

¹ It is noted that the Government's Exhibits included an email from Registrant, which includes statements regarding the underlying surrender as discussed herein.

² The fact that a Registrant allows his registration to expire during the pendency of an OSC does not impact my jurisdiction or prerogative under the Controlled Substances Act (hereinafter, CSA) to adjudicate the OSC to finality. *Jeffrey D. Olsen, M.D.*, 84 FR 68,474 (2019).

further stated that “[t]he Board possesses statutory authority to enter into a consent agreement with a physician who admits to committing an act of unprofessional conduct.” *Id.* at 2. The Order therefore ordered the immediate surrender of Registrants License. *Id.*

According to Arizona’s online records, of which I take official notice, Registrant’s license is still surrendered.³ <https://gls.azmd.gov/glsuitweb/clients/azbom/public/webverificationsearch.aspx> (last visited October 27, 2020).

Accordingly, I find that Registrant currently is not licensed to engage in the practice of medicine in Arizona, the state in which Registrant is registered with the DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the CSA “upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.” With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. *See, e.g., James L. Hooper, M.D.*, 76 FR 71,371 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean

“a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper*, 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.*, 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton*, 43 FR at 27,617.

According to Arizona statute, “[e]very person who manufactures, distributes, dispenses, prescribes or uses for scientific purposes any controlled substance within this state or who proposes to engage in the manufacture, distribution, prescribing or dispensing of or using for scientific purposes any controlled substance within this state must first: (1) Obtain and possess a current license or permit as a medical practitioner as defined in § 32–1901 . . .” *Ariz. Rev. Stat. Ann.* § 36–2522(A) (2020). Arizona Statute § 32–1901 defines a “[m]edical practitioner” as “any medical doctor . . . or other person who is licensed and authorized by law to use and prescribe drugs and devices for the treatment of sick and injured human beings or animals or for the diagnosis or prevention of sickness in human beings or animals in this state or any state, territory or district of the United States.” *Ariz. Rev. Stat. Ann.* § 32–1901 (2020). Arizona regulations further clarify that “[a] physician who wishes to dispense a controlled substance as defined in *Ariz. Rev. Stat.* § 32–1901(12),⁴ a prescription-only drug as defined in *Ariz. Rev. Stat.* § 32–1901(65), or a prescription-only device as defined in *Ariz. Rev. Stat.* § 32–

1901(64), shall be currently licensed to practice medicine in Arizona.” *Ariz. Admin. Code* § R4–16–301(A) (2020).

Here, the undisputed evidence in the record is that Registrant currently lacks authority to practice medicine in Arizona, as he no longer retains a medical license in that state. As already discussed, a physician can only dispense controlled substances if he is licensed to practice medicine in Arizona. Thus, because Registrant lacks authority to practice medicine in Arizona and, therefore, is not authorized to dispense controlled substances in Arizona, Registrant is not eligible to maintain a DEA registration in Arizona. Accordingly, I will order that Registrant’s DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. BW2472051 issued to Jeffrey M. Wolk. This Order is applicable December 21, 2020.

Timothy J. Shea,
Acting Administrator.

[FR Doc. 2020–25526 Filed 11–18–20; 8:45 am]

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 20–13]

Julie I. Dee, M.D.; Decision and Order

On February 26, 2020, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause (hereinafter, OSC) to Julie I. Dee, M.D. (hereinafter, Respondent) of Mountain Green, Utah. OSC, at 1. The OSC proposed the revocation of Respondent’s Certificate of Registration No. FD6139491. *Id.* It alleged that Respondent is without “authority to handle controlled substances in Utah, the state in which [Respondent is] registered with DEA.” *Id.* at 1–2 (citing 21 U.S.C. 823(f) and 824(a)(3)).

Specifically, the OSC alleged that on April 9, 2019, the Utah Division of Occupational and Professional Licensing and [Respondent] “entered into a Disciplinary Limitation Stipulation and Order whereby [Respondent] agreed, *inter alia*, that [Respondent] will not ‘engage in activity or employment where [Respondent] will have access to, or prescribe, controlled substance[s]’ pending [Respondent’s]

³ Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Registrant may dispute my finding by filing a properly supported motion for reconsideration of finding of fact within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Registrant files a motion, the Government shall have fifteen calendar days to file a response. Any such motion and response shall be filed and served by email to the other party and to Office of the Administrator, Drug Enforcement Administration at dea.addo.attorneys@dea.usdoj.gov.

⁴ The subsection citations for the referenced sections of the statute moved since the publication of the regulation, but the intent of the regulation is clear.

completion of certain terms and conditions.” *Id.* at 1–2. The OSC further alleged that the terms and conditions were still in place and therefore alleged that Respondent lacks authority to handle controlled substances in Utah. *Id.* (citing 21 U.S.C. 824(a)(3)).

The OSC notified Respondent of the right to request a hearing on the allegations or to submit a written statement, while waiving the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* at 2 (citing 21 CFR 1301.43). The OSC also notified Respondent of the opportunity to submit a corrective action plan. *Id.* at 2–3 (citing 21 U.S.C. 824(c)(2)(C)).

On March 19, 2020, Respondent through counsel requested an Extension of Time to Respond to the Order to Show Cause, arguing that the OSC was mailed to Respondent on February 18, 2020, but she was not properly served until March 3, 2020, when her counsel received the OSC. Extension of Time to Respond, at 2–3.

The Office of Administrative Law Judges put the matter on the docket and assigned it to Chief Administrative Judge Law John J. Mulrooney II (hereinafter, Chief ALJ), who granted Respondent’s request for an extension of time on March 20, 2020, finding that it was both timely and that Respondent provided good cause. Order Granting Respondent’s Request for Extension of Time to Respond to Order to Show Cause, at 1. Respondent timely filed a Request for a Hearing on April 8, 2020, in which she argued that she has a “temporary limitation” in Utah, which “is not a suspension, revocation, or denial as contemplated by 21 U.S.C. 824(a)(3). Upon completion of 2 requirements set forth by DOPL, the temporary limitation will be removed . . . It is anticipated that such temporary limitation will be lifted by November 31, 2020.” Request for a Hearing, at 2. On April 9, 2020, the Chief ALJ issued an Order Directing the Filing of Government Evidence Regarding its Lack of State Authority Allegation and Briefing Schedule, with which the Government complied by filing a Motion for Summary Disposition and Argument in Support of Finding that Respondent Lacks State Authorization to Handle Controlled Substances (hereinafter, Govt Motion) on April 20, 2020.

In its Motion, the Government submitted evidence that Respondent and the Utah Division of Occupational and Professional Licensing entered into a Disciplinary Limitation Stipulation and Order in which “the parties agreed, *inter alia*, that Respondent would ‘not

engage in any activity or employment where [she would] have access to, or prescribe, controlled substance[s]’, and further, that she would not engage in ‘any conduct described in Utah Code Ann. § 58–67–102(17).’” Govt Motion, at 2 (quoting Utah Disciplinary Limitation Stipulation and Order). In light of these facts, the Government argued that DEA must revoke Respondent’s registration. Govt Motion, at 5.

On May 4, 2020, Respondent filed a “Motion to Enlarge Time for Respondent to Respond to the Government’s Motion for Summary Disposition,” which the Chief ALJ granted on May 5, 2020. On May 18, 2020, Respondent filed an Opposition to Government’s Motion for Summary Disposition (hereinafter, Resp Opposition), in which she argued that “Respondent’s Utah Licenses are currently active with a temporary limitation. Because Respondent’s Utah licenses have not be [sic] suspended, revoked, or denied, the power of revocation pursuant to 21 U.S.C. 824(a)(3) does not apply.” Resp Opposition, at 1.

On May 20, 2020, the Chief ALJ issued an Order Granting the Government’s Motion for Summary Disposition, and Recommended Rulings, Findings of Fact, Conclusions of Law, and Recommended Decision of the Administrative Law Judge (hereinafter, Summary Disposition or SD). The Chief ALJ noted that, “[w]hile the parties disagree as to the legal significance of the Respondent’s licensure status, there is no disagreement that at present, the Respondent does not have state authority to handle controlled substances and practice medicine.” SD, at 7 (citing Govt Motion Exhibit (hereinafter, GX) 2 at 2–5; GX 3; GX 5; Resp Opposition, at 2–4). He further concluded that “[i]t is her lack of state authority at the present moment, not some speculative moment in the future, that excludes the Respondent from the definition of a ‘practitioner’ under 21 U.S.C. 823(f).” *Id.* (citing *John B. Freitas, D.O.*, 74 FR 17,524, 17,525 (2009)). By letter dated June 25, 2020, the ALJ certified and transmitted the record to me for final Agency action. I find that the time period to file exceptions has expired. See 21 CFR 1316.66.

A Proposed Corrective Action Plan was received on April 13, 2020. I agree with the decision of the Assistant Administrator of the Diversion Control Division on May 29, 2020, that the Proposed Corrective Action Plan provides no basis for me to discontinue or defer this proceeding. As explained

herein, current state authority is necessary to retain a DEA registration.

I issue this Decision and Order based on the entire record before me. 21 CFR 1301.43(e). I make the following findings of fact.

Findings of Fact

Respondent’s DEA Registration

Respondent is the holder of DEA Certificate of Registration No. FD6139491 at the registered address of 6496 Fairview Drive, Mountain Green, Utah 84050. GX 1, at 1. Pursuant to this registration, Respondent is authorized to dispense controlled substances in schedules II through V as a “practitioner.” *Id.* Respondent’s registration expires on June 30, 2022. *Id.*

The Status of Respondent’s State License

On April 9, 2019, the Division of Occupational and Professional Licensing of the Department of Commerce of the State of Utah (hereinafter, Utah Licensing Division) entered a Disciplinary Limitation Stipulation and Order. GX 2 (Disciplinary Limitation Order). According to the Disciplinary Limitation Order, Respondent “admitted to inappropriately taking fentanyl from her work and becoming addicted to the drug.” *Id.* Respondent agreed in the Order “not to engage in any activity or employment where she will have access to, or be able to prescribe, controlled substances, and she also agrees to not engage in any conduct described in Utah Code Ann. § 58–67–102(17).”¹ *Id.* at 3. She further agreed that prior to engaging in such activity, she “will submit to the Division at least six months of consecutive clean drug testing results before she applies for licensure.” *Id.* at 4. The Order further stated that, “practicing medicine without a license is a criminal offense and that engaging in any conduct described in Utah Code Ann. § 58–67–102(17) after the effective date of this Stipulation would, in effect, be practicing medicine without a license (or without a non-restricted license).” *Id.* at 6.

The Government presented evidence that on, December 8, 2019, a Utah Assistant Attorney informed a DEA Diversion Investigator (hereinafter, DI) that based on conditions set forth in the April 2019 Order, Respondent “. . . cannot engage in anything that

¹ It is noted that this section of Utah law defines the “practice of medicine.” Utah Code Ann. § 58–67–102(17) (2020). Therefore, I find that this provision of the Disciplinary Limitation Order restricted Respondent’s practice of medicine.

constitutes the practice of medicine, including prescribing, administering, dispensing or handling [controlled substances] while her license is limited.” GX 3 (email), GX 5 (Declaration of DI), at 2.

Respondent does not contest the contents of the documents or the fact that she cannot currently prescribe controlled substances. Resp Opposition, at 2–3; SD, at 7.

According to Utah’s online records, of which I take official notice, Respondent’s Physician and Surgeon license remains “Limited Active.”² Utah Division of Occupational and Professional Licensing Licensee Lookup and Verification System, <https://secure.utah.gov/llv/search/index.html> (last visited October 27, 2020).

Based on the entire record before me, I find that Respondent is currently prohibited from dispensing controlled substances in Utah, the state in which Respondent is registered with DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the CSA “upon a finding that the registrant . . . has had [her] State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing[3] of controlled substances.” With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. *See, e.g.,*

James L. Hooper, M.D., 76 FR 71,371 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever the practitioner is no longer authorized to dispense controlled substances under the laws of the state in which the practitioner practices. *See, e.g., James L. Hooper*, 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.*, 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton*, 43 FR at 27,617.

Respondent argues that “[i]n the present matter, the temporary limitation on Respondent’s Utah licenses will be removed once she completes a fitness for duty certification and six months of clean drug tests. Respondent’s reinstatement of handling controlled substances in Utah is not speculative, but rather is automatic upon completion of the fore mentioned tasks.” Resp Opposition, at 6. Therefore, she argues that she has not been “suspended” under the terms of the CSA. *Id.* However, the agreement itself is clear that “practicing medicine without a license is a criminal offense and that engaging in any conduct described in Utah Code Ann. § 58–67–102(17) after the effective date of this Stipulation would, in effect, be practicing medicine without a license (or without a non-restricted license).” GX 2, at 6.

Furthermore, because “the controlling question” in a proceeding brought under 21 U.S.C. 824(a)(3) is whether the holder of a practitioner’s registration “is currently authorized to handle controlled substances in the state,”

Hooper, 76 FR at 71,371 (quoting *Anne Lazar Thorn*, 62 FR 12,847, 12,848 (1997)), the Agency has also long held that revocation is warranted even where a practitioner is still challenging the underlying action or where the state action is temporary. *Kambiz Haghighi, M.D.*, 85 FR 5989 (2020); *Bourne Pharmacy*, 72 FR 18,273, 18,274 (2007); *Wingfield Drugs*, 52 FR 27,070, 27,071 (1987). Thus, it is of no consequence that the action is temporary. What is consequential is my finding that Respondent is not currently authorized to dispense controlled substances in Utah, the state in which she is registered.

Here, the undisputed evidence in the record, in accordance with the explicit terms of the Disciplinary Limitation Order, is that Respondent is currently without authority to dispense controlled substance in Utah, the state in which she is registered with DEA, and I will order that Respondent’s DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. FD6139491 issued to Julie I. Dee, M.D. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending application of Julie I. Dee, M.D. to renew or modify this registration, as well as any other pending application of Julie I. Dee, M.D. for additional registration in Utah. This Order is effective December 21, 2020.

Timothy J. Shea,

Acting Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Verne A. Schwager, M.D.; Decision and Order

On August 24, 2020, the Acting Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, Government or DEA), issued an Order to Show Cause (hereinafter, OSC) to Verne A. Schwager, M.D., (hereinafter, Registrant), of Arlington Heights, Illinois. Government’s Request for Final Agency Action (hereinafter, RFAA) Exhibit (hereinafter RFAAX) 4 (OSC), at 1. The OSC proposed the revocation of Registrant’s Certificate of Registration No. AS2410075. It alleged that Registrant is without “authority to

² Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Respondent may dispute my finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Respondent files a motion, the Government shall have fifteen calendar days to file a response. Any motion and response shall be filed and served by email to the other party and to the Office of the Administrator at dea.addo.attorneys@dea.usdoj.gov.

³ “[D]ispense[] means to deliver a controlled substance to an ultimate user . . . by, or pursuant to the lawful order of, a practitioner, including the prescribing and administering of a controlled substance. . . .” 21 CFR 802(10).

handle controlled substances in Illinois, the state in which [Registrant] is registered with the DEA.” *Id.* at 2 (citing 21 U.S.C. 824(a)(3)).

Specifically, the OSC alleged that “[o]n March 12, 2020, the Illinois Department of Financial and Professional Regulation [hereinafter, “IDFPR”] suspended [Registrant’s] state Physician and Surgeon license . . . for a period of 12 months following its finding of [his] noncompliance with a February 2019 Consent Order that [he] entered into with IDFPR,” and the license remains suspended. *Id.* The OSC further alleged that Registrant is not eligible to obtain or retain a DEA registration because he lacks state authority to handle controlled substances in the State of Illinois. *Id.*

The OSC notified Registrant of the right to either request a hearing on the allegations or submit a written statement in lieu of exercising the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* (citing 21 CFR 1301.43). The OSC also notified Registrant of the opportunity to submit a corrective action plan. *Id.* at 3 (citing 21 U.S.C. 824(c)(2)(C)).

I. Adequacy of Service

On August 26, 2020, a DEA Diversion Investigator (hereinafter, DI) traveled with another DI to Registrant’s registered location at 2025 South Arlington Heights Road, Suite 106, Arlington Heights, Illinois 60005 to serve Registrant with the OSC. RFAAX 7, at 2–3 (Declaration of Diversion Investigator, dated October 6, 2020). At Registrant’s registered location, the DIs met with Registrant’s office manager, who “informed [them] that [Registrant] was out of the office, but was expected to return later that afternoon.” *Id.* at 3. The DI “provided [the office manager] with a copy of the [OSC] and [the DI’s] business card, and asked her to provide both to [Registrant] once he returned to the office. Later in the afternoon of August 26[th], [the DI] contacted the office of [Registrant] by telephone and was informed by [the office manager] that she provided the [OSC] copy to [Registrant].” *Id.* The DI also “sent a copy of the [OSC] via email, to [Registrant’s] counsel,” who “replied to [the] email confirming her receipt of the [OSC].” *Id.*

On September 25, 2020, Registrant, through counsel, explained that Registrant was “continu[ing] to negotiate with the IDFPR” and “ask[ed] that the DEA forebear from proceeding to revoke his DEA registration pending resolution of this matter.” RFAAX 5, at 2. Registrant further stated that “at this

time [he] waives his right to a hearing with the DEA.” *Id.* at 3.

The Government forwarded its RFAA along with the evidentiary record, to this office on October 19, 2020. In its RFAA, the Government represents that “[Registrant], through his legal counsel, has also informed DEA of [Registrant’s] decision to waive his right to a hearing.” RFAA, at 6 (citing *Warren B. Dailey, M.D.*, 82 FR 46,525, 56,526 (2017); *David D. Moon, D.O.*, 82 FR 19,385, 19,387 (2017); 21 CFR 1301.43(e)). The Government argues that “grounds exist for the revocation of [Registrant’s] DEA [registration] pursuant to 21 U.S.C. 823(f) and 824(a)(3)” and requests “the issuance of a DEA Final Order for the revocation” of Registrant’s registration. *Id.* at 6.

I find that more than thirty days have now passed since the Government accomplished service of the OSC. Further, based on the Government’s written representations and Registrant’s own statements, I find that neither Registrant, nor anyone purporting to represent Registrant, requested a hearing, submitted a written statement while waiving Registrant’s right to a hearing, or submitted a corrective action plan. RFAA, at 2. Accordingly, I find that Registrant has waived the right to a hearing and the right to submit a written statement and corrective action plan. 21 CFR 1301.43(d) and 21 U.S.C. 824(c)(2)(C). I, therefore, issue this Decision and Order based on the record submitted by the Government, which constitutes the entire record before me. 21 CFR 1301.46.

II. Findings of Fact

A. Registrant’s DEA Registration

Registrant is the holder of DEA Certificate of Registration No. AS2410075 at the registered address of 2025 S Arlington Heights Road, Suite 106, Arlington Heights, Illinois 60005. RFAAX 2 (Certification of Registration History). Pursuant to this registration, Registrant is authorized to dispense controlled substances in schedules II through V as a practitioner. *Id.* Registrant’s registration expired on its own terms on February 29, 2020, and a renewal application was timely filed on March 4, 2020. *Id.* The registration “is in a renewal pending status until the resolution of administrative proceedings.” *Id.*

B. The Status of Registrant’s State License

On March 12, 2020, the IDFPR indefinitely suspended Registrant’s Illinois Physician and Surgeon license “for a minimum period of 12 months.”

RFAAX 3 (Suspension Order), at 3. The Suspension Order stated that Registrant’s Physician and Surgeon License had been on indefinite probation since February 2019, and as a condition of probation, Registrant “had agreed to comply with all of [its] terms and conditions,” and Registrant “has failed to comply.” *Id.* at 2. Therefore, in accordance with the terms of probation, IDFPR suspended Registrant’s Physician and Surgeon license. *Id.* at 3.

According to Illinois’ online records, of which I take official notice, Registrant’s medical license is still suspended and his “Licensed Physician Controlled Substance” license is “inoperative.”¹ IDFPR Search for a License, available at <https://ilesonline.idfpr.illinois.gov/DFPR/Lookup/LicenseLookup.aspx> (last visited October 27, 2020).

Accordingly, I find that Registrant currently is neither licensed to engage in the practice of medicine nor licensed to dispense controlled substances in Illinois, the state in which Registrant is registered with the DEA.

III. Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the CSA “upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.” With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. *See, e.g., James L. Hooper, M.D.*, 76 FR 71,371 (2011), *pet. for rev. denied*, 481 Fed.

¹ Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.”

United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Registrant may dispute my finding by filing a properly supported motion for reconsideration of finding of fact within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Registrant files a motion, the Government shall have fifteen calendar days to file a response. Any such motion and response may be filed and served by email (dea.addo.attorneys@dea.usdoj.gov).

Appx. 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper*, 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.*, 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton*, 43 FR at 27,617.

Pursuant to the Illinois Controlled Substances Act, a “[p]ractitioner” means a physician licensed to practice medicine in all its branches . . . or other person licensed, registered, or otherwise lawfully permitted by the United States or this State to distribute, dispense, conduct research with respect to, administer or use in teaching or chemical analysis, a controlled substance in the course of professional practice or research.” 720 Ill. Comp. Stat. Ann. 570/102(kk) (West). Illinois law requires that “[e]very person who manufactures, distributes, or dispenses any controlled substances . . . must obtain a registration issued by the Department of Financial and Professional Regulation in accordance with its rules.” *Id.* at 570/302(a).

Further, under Illinois law, the Illinois Controlled Substances Act authorizes the IDFPR to discipline a practitioner holding a controlled substance license. “A registration under Section 303 to manufacture, distribute, or dispense a controlled substance . . . may be denied, refused renewal, suspended, or revoked by the Department of Financial and

Professional Regulation.” *Id.* at 570/304(a).

Here, the undisputed evidence in the record is that Registrant currently lacks authority to handle controlled substances in Illinois, as his controlled substance license is “inoperative.” As already discussed, a practitioner must hold a valid controlled substance license to dispense a controlled substance in Illinois. Thus, because Registrant lacks authority to handle controlled substances in Illinois, Registrant is not eligible to maintain a DEA registration. Accordingly, I order that Registrant’s DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. AS2410075 issued to Verne A. Schwager, M.D. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending application of Verne A. Schwager, M.D. to renew or modify this registration, as well as any pending application of Verne A. Schwager, M.D. for registration in Illinois. This Order is effective December 21, 2020.

Timothy J. Shea,

Acting Administrator.

[FR Doc. 2020–25523 Filed 11–18–20; 8:45 am]

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Jeanne E. Germeil, M.D. Decision and Order

On March 5, 2018, a former Acting Administrator of the Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause and Immediate Suspension of Registration (hereinafter, collectively OSC) to Jeanne E. Germeil, M.D., (hereinafter, Respondent). Administrative Law Judge Exhibit (hereinafter, ALJX) 1 (Order to Show Cause), at 1. The OSC informed Respondent of the immediate suspension of her Certificate of Registration No. FG0560765 pursuant to 21 U.S.C. 824(d), because her continued registration constituted an imminent danger to the public health and safety. *Id.* The OSC also proposed the revocation of Respondent’s Certificate of Registration (hereinafter, registration) pursuant to 21 U.S.C. 824(a)(4), “because [her] continued registration is

inconsistent with the public interest” *Id.* (citing 21 U.S.C. 823(f)).

I. Procedural History

Specifically, the OSC alleged that Respondent “prescribed controlled substances to [two] DEA confidential source[s], Patient Y.H. [and Patient L.G.], that [she] knew or should have known were not for a legitimate medical purpose, in violation of 21 U.S.C. 841(a) and 842(a), 21 CFR 1306.04(a), and Fla. Admin. Code r. 64B8–9.013.” OSC, at 2; *see also id.* at 6. The OSC alleged that Respondent “[was] aware that at least a portion of the controlled substances [she was] prescribing to Y.H. [and to L.G.] were being sold, given to third parties, or otherwise diverted, because Y.H. [and L.G.] told [her] so.” OSC, at 2; *see also id.* at 6. Additionally, the OSC alleged that Respondent “had been falsifying [her] medical records.” *Id.* at 9. The OSC alleged that Respondent’s “falsification of the[] records violated state law, *see* Fla. Stat. § 458.331(1)(m), and further demonstrate[d] that [Respondent] issued prescriptions for controlled substances to Patients Y.H. and L.G. outside the usual course of professional practice and that these prescriptions were beneath the standard of care for the State of Florida, violating both 21 CFR [1306.04(a)]¹ and Fla. Admin. Code r. 64B8–9.013.” *Id.*

On March 5, 2018, the former Acting Administrator made a preliminary finding “that [Respondent had] issued prescriptions for controlled substances that [she] knew were without a legitimate medical purpose and outside the usual course of professional practice, which is inconsistent with the public interest” *Id.* And that “in light of the rampant and deadly problem of prescription controlled substance abuse, that [Respondent’s] continued registration . . . would constitute an imminent danger to the public health or safety because of the substantial likelihood that [she would] continue to unlawfully prescribe controlled substances, thereby allowing the diversion of controlled substances unless [her] DEA [registration was] suspended.” *Id.* The former Acting Administrator concluded that Respondent’s “continued registration . . . [would] constitute[] an imminent danger to the public health and safety.” *Id.*

¹ The citation to 21 CFR 1604(a) throughout the OSC appears to be a typographical error (as no such regulation exists). It is clear from the surrounding text, that where the government typed 21 CFR 1604(a), it was referring to 21 CFR 1306.04(a). The Government also specifically notified Respondent that was alleging violations of 21 CFR 1306.04(a). OSC, at 2.

Pursuant to 21 U.S.C. 824(f) and 21 CFR 1301.36(f), the former Acting Administrator authorized DEA Special Agents (hereinafter, SA) and Diversion Investigators (hereinafter, DI) serving the OSC on Respondent to place under seal or to remove for safekeeping all controlled substances that Respondent possessed pursuant to the suspended registration. *Id.* The former Acting Administrator also directed those employees to take possession of Respondent's registration No. FG0560765 and any unused prescription forms. *Id.*

The OSC notified Respondent of the right to either request a hearing on the allegations or submit a written statement in lieu of exercising the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* at 10 (citing 21 CFR 1301.43). According to the Government's Notice of Service, a member of the DEA Miami Field Division personally served the OSC on Respondent on March 7, 2018. ALJX 2 (Government's Notice of Service of OSC), at 1.

By letter dated April 3, 2018, Respondent timely requested a hearing. ALJX 3 (Request for a Hearing), at 1. The matter was placed on the docket of the Office of Administrative Law Judges and assigned to Administrative Law Judge Charles Wm. Dorman (hereinafter, the ALJ). On April 6, 2018, the ALJ established a schedule for the filing of prehearing statements. ALJX 4 (Order for Prehearing Statements), at 1. The Government filed its prehearing statement on April 20, 2018. ALJX 6 (Government's Prehearing Statement), at 1. After requesting and receiving additional time, Respondent filed her Prehearing Statement on May 31, 2018. *See* ALJX 7 (Unopposed Motion for Extension of Time to File Prehearing Statement), ALJX 8 (Order Granting Respondent's Motion for Extension of Time to File Prehearing Statement), and ALJX 9 (Respondent's Prehearing Statement). Thereafter, the ALJ issued an Order denying Respondent's motion requesting discovery on the grounds that Respondent failed to establish that the documents she sought were relevant, material, and that the denial of access to the documents was prejudicial. ALJX 18 (Order Denying Respondent's Motion to Compel Discovery), at 4; *see also* ALJX 12 (Motion to Compel Discovery or in the Alternative Issuance of Subpoena), and ALJX 15 (Government's Response in Opposition to Respondent's Motion to Compel and Government's Motion to Quash Subpoena).

On June 6, 2018, the ALJ issued a Prehearing Ruling that, among other things, set out 18 agreed upon stipulations and established schedules for the filing of additional joint stipulations and for the hearing. ALJX 11 (Prehearing Ruling), at 3. Joint Stipulations were filed on June 19, 2018, and on June 26, 2018, the Respondent proposed additional Stipulations to which the Government had no objection. *See* ALJX 16 (Joint Stipulations) and ALJX 19 (Additional Stipulations Proposed by Respondent). The hearing in this matter took place in Miami, Florida and spanned three days. *See generally* Transcript of Proceedings in the Matter of Jeanne E. Germeil, M.D. (hereinafter, Tr.). Both parties filed posthearing briefs. *See* ALJX 27 (Government's Posthearing Brief) and ALJX 28 (Respondent's Posthearing Brief). The ALJ's Recommended Rulings, Findings of Fact, Conclusions of Law and Decision (hereinafter, RD) is dated August 31, 2018. Neither party filed exceptions to the RD. Transmittal Letter, at 2. I have reviewed and agree with the procedural rulings of the ALJ during the administration of the hearing.

Having considered the record in its entirety, I agree with the RD that the record established, by substantial evidence, that Respondent's "continued registration is inconsistent with the public interest because of her improper prescribing and falsification of medical records." RD, at 106. I further agree with the RD that Respondent's "failure to acknowledge any wrongdoing whatsoever" and her "fabrication of documentation to cover her tracks" shows that she "cannot be entrusted with the ability to continue prescribing controlled substances." *Id.* Moreover, I agree with the RD that revocation is the appropriate sanction. *Id.* I make the following findings of fact.

II. Findings of Fact

A. DEA Registration

The parties stipulated that Respondent is registered with DEA to handle controlled substances in schedules II through V under DEA Certificate of Registration No. FG0560765, at 951 North East 167th Street, North Miami Beach, Florida 33162. ALJX 11, at 1; Tr. 9; and GX 1 (Controlled Substance Registration Certificate). This registration expired on September 30, 2019.² GX 1.

² The fact that a registrant allows his registration to expire during the pendency of an OSC does not impact my jurisdiction or prerogative under the Controlled Substances Act (hereinafter, CSA) to

B. The Investigation

DEA opened its investigation into Respondent after receiving information from the North Miami Beach Police Department that it had responded to Respondent's office several times due to "altercations between the staff at the office and patients . . . [which] appeared to be over prescriptions for oxycodone." Tr. 28.

DEA used two confidential sources (hereinafter, CS), Y.H. and L.G., when conducting the investigation into Respondent. Tr. 28, 150. A DEA SA was the DEA handler for the two confidential sources. Tr. 150. SA would coordinate the undercover operation, meet with the confidential sources, give them direction as to what DEA wanted them to say or do, and provide them with electronic recording devices used to record audio and video of the interaction between the sources and Respondent. Tr. 151. After the undercover operation was finished, SA would obtain the recording devices from the confidential sources, download the information recorded to a DVD, and place the DVD into evidence. Tr. 151–53. SA would also provide a copy of the DVD to a DEA contractor, who would transcribe the DVD. Tr. 154. Thereafter, SA would compare the transcript to the recording for quality control and to make sure the transcript was accurate. Tr. 154–56, 163.

In November 2017, DEA executed a search warrant on Practice Fusion, an electronic medical record software company, to obtain Respondent's patient files. Tr. 29–30. DEA compared the obtained patient files for Y.H. and L.G. with the recordings made by Y.H. and L.G. and determined that there were inaccuracies in the medical records. Tr. 30. Thereafter, DEA retained a medical expert to review the patient files and recorded videos. *Id.*

C. Government's Case

The Government's documentary evidence consists primarily of video recordings³ and transcripts of two confidential sources' visits with Respondent, and prescription records for the two confidential sources. *See* GX 1–19, 22. Additionally, the Government called five witnesses: A DI, confidential source Y.H., confidential source L.G., SA and an expert, Dr. Reuben Hoch, M.D.

DI testified about his investigation-related actions, including his role in

adjudicate the OSC to finality. *Jeffrey D. Olsen, M.D.*, 84 FR 68,474 (2019).

³ Respondent's counsel conceded that "there can be [no] question that the video evidence is always going to be good evidence." Tr. 485.

executing a search warrant to obtain Respondent's patient files. Tr. 26–42; RD, at 5. Having read and analyzed all of the record evidence, I agree with the RD that DI “presented his testimony in a professional, candid, and straightforward manner.” RD, at 5. I also agree that DI's testimony is “sufficiently objective, detailed, plausible, and internally consistent” to be given full credibility. *Id.*

Y.H. testified about her role as a confidential source⁴ during DEA's investigation into Respondent, identified the recordings she made while meeting with Respondent, and identified the prescriptions Respondent issued to her. Tr. 42–95. Y.H. also testified regarding her non-recorded interactions with the staff at Respondent's practice. Tr. 45–46, 52, 57. Y.H. is a felon; however, her last conviction occurred in 1996, and I agree with the ALJ that it is too distant to impact her credibility. RD, at 6; Tr. 43. Having read and analyzed all of the record evidence, I agree with the RD that Y.H. “presented her testimony in a candid and straightforward manner.” RD, at 6. I also agree that “Y.H.'s testimony was sufficiently objective, detailed, plausible, and internally consistent with other evidence of record . . . [to] merit it as credible.”⁵ RD, at 6.

L.G. testified about his role as a confidential source⁶ during DEA's investigation into Respondent, identified the recordings he made while meeting with Respondent, and identified the prescriptions Respondent issued to him. Tr. 96–145. Y.H. also testified regarding his non-recorded interactions with the staff at

Respondent's practice. *Id.* at 98, 106–07, 113–14. On this topic (which I find is irrelevant, *see supra* n.5), the ALJ found that L.G.'s testimony was briefly evasive when he did not acknowledge on cross examination that hypothetical video evidence of his interactions with Respondent's staff would have been better evidence than L.G.'s live testimony. RD, at 7; Tr. 133–35. The RD found that this was relevant to L.G.'s credibility. RD, at 7. L.G. also testified that he was convicted of a felony in 2010 for impersonating a police officer and was released from confinement for that offense in 2015. Tr. 96, 119; RD, at 6. The ALJ found the felony conviction was relevant to L.G.'s credibility. RD, at 7. However, the ALJ found, and I agree, that the two items relevant to L.G.'s credibility, ultimately “do not diminish L.G.'s overall credibility.” RD, at 7. Having read and analyzed all of the record evidence, I agree with the RD that L.G. “presented his testimony in a candid and straightforward manner.” *Id.* I also agree that “L.G.'s testimony was sufficiently objective, detailed, plausible, and internally consistent with other evidence of record . . . [to] merit it as credible.” *Id.*

SA testified about the investigative work he did regarding Respondent, including his work as the handler for both Y.H. and L.G. Tr. 150–52. SA also testified regarding the integrity and authentication of the video evidence and the accompanying transcripts. *Id.* at 152–63. Having read and analyzed all of the record evidence, I agree with the RD that SA presented his testimony “in a professional, candid, and straightforward manner.” RD, at 8. I also agree that SA's testimony is “sufficiently objective, detailed, plausible, and internally consistent” to be given full credibility. *Id.*

Dr. Hoch, is Board-certified in anesthesiology and pain medicine. Tr. 193; GX 22 (Resume of Dr. Hoch); RD, at 8. He is the chief anesthesiologist at the Aventura Hospital, where he is involved in the administration of surgical anesthesia and the management of pain. *Id.* Dr. Hoch has been involved in pain management for at least 25 years, including managing his own pain medicine practice, working as an interventional pain specialist at the JFK Medical Center in Palm Beach, Florida, and working as the Chief of the Division of Pain Medicine at Brooklyn Hospital. Tr. 194–95; RD, at 8. Dr. Hoch is licensed in Florida and was accepted in this matter (and he has been accepted in other DEA matters) “as an expert in pain management and prescribing controlled substances with respect to the standard of care for pain management in the State

of Florida.” RD, at 9; *see also* Tr. 198, 202. Having read and analyzed all of the record evidence, I agree with the RD that Dr. Hoch's testimony “was sufficiently objective, detailed, plausible, and internally consistent . . . [to] merit it as fully credible.” RD, at 10–11. Moreover, Dr. Hoch's expert testimony was un rebutted. *Id.* at 11.

D. Respondent's Case

The Respondent's documentary evidence consists primarily of medical and criminal records for the two confidential sources, photos of the Germeil clinic, employee resumes,⁷ a list of continuing education courses Respondent attended,⁸ discharge letters for various patients⁹ (not including Y.H. or L.G.), and documents related to an Administrative Complaint filed by the State of Florida Department of Health against Respondent. *See* RX 1–8, 11. As for live testimony, Respondent called two witnesses: J.F. and J.W. The main arguments Respondent attempted to establish through the witness testimony were: (1) That Respondent's positive dispensing experience should be considered; (2) that the Germeil clinic's procedures were to conduct a physical exam at the first visit and that medical assistants conducted pain assessments as part of taking a patient's vitals and discussed the vitals (including the pain assessment) with Respondent; and (3) that Respondent demonstrated her acceptance of responsibility by instituting remedial measures. ALJX 28, at 12–15. Notably, Respondent did not testify in this matter.

⁷ Respondent's resume indicates that Respondent has been a licensed physician in the State of Florida since October 2007. RX 5 (Resume of Jeanne Esther Germeil), at 1. She has had her own medical practice, Germeil Medical, Inc., since September 2011. *Id.*

⁸ Among other things, the CLE records show that on October 7, 2017, Respondent completed 5 credits in the educational activity titled “Legal & Ethical Implications in Medicine: A physician's Survival Guide—Laws & Rules.” RX 6 (List of Respondent's Completed Continuing Education Courses), at 7. On October 1, 2017, Respondent completed 8 credits in the live educational activity titled, “Quality Medical Record Keeping for Health Care Professionals.” *Id.* at 9. On December 27, 2017, the Florida Medical Association notified Respondent that her record keeping mentor “noted that [Respondent's] follow-up records showed improvement and that the recommendations made during Phase I, for the most part, were successfully implemented.” *Id.* at 8 (emphasis in original). The Florida Medical Association mentioned that there were additional suggestions for further improvements, but that documentation was not included in the record. *Id.* The CLE records also show that Respondent took courses in prescribing for pain in 2013. *Id.* at 2.

⁹ I note, that there are 47 pages of discharge letters including 38 unique letters and 9 duplicates. *See* RX 8 (Discharge Letters), at 14, 16, 19, 21, 24–25, 26–27, 32).

⁴ Y.H. has worked for DEA as a paid confidential source since 2002. Tr. 43.

⁵ The Respondent requested that the ALJ treat the testimony of both Y.H. and L.G. as not credible and afford their testimony no weight. RD, at 58; Tr. 487; ALJX 28, at 13–14. In support, Respondent argued that Y.H. and L.G. were both convicted felons who were paid to serve as confidential sources and, as such, they had “every incentive to . . . help the government.” Tr. 486. I agree with the ALJ's thorough assessment of the credibility of Y.H. and L.G. RD, at 94–95. In short, the relevant testimony of Y.H. and L.G. with regard to their encounters with Respondent is fully supported by the video evidence which, as Respondent notes, “speaks for itself.” ALJX 28, at 13; *see also* Tr. 485; RD, at 94. I also agree with the ALJ that the unrecorded interactions that Y.H. and L.G. had with Respondent's office staff and medical assistants are irrelevant to what Respondent herself did or did not do. *See* RD, at 94. As Dr. Hoch testified, it is the physician's responsibility to examine the patient, to draw his or her own conclusions, and to maintain medical records. Tr. 326, 354; RD, at 94. As such, it is the physician's recorded interactions with the patients that are relevant to this case. I fully agree with the ALJ's determination that Y.H. and L.G. are credible witnesses. RD, at 95.

⁶ L.G. has worked as a confidential source for DEA for about two and a half years. Tr. 96.

J.F. is Respondent's husband and the general manager of the Germeil Medical Clinic. Tr. 362, 390. J.F. testified regarding his roll maintaining the clinic's records and regarding the Clinic's procedures. *Id.* at 362. Concerning records, J.F. testified that, since 2011, medical records were contained in the Practice Fusion system and that, early on, the Clinic had problems with the system losing medical records.¹⁰ *Id.* at 368. He also testified that L.G. was ordered to have a urine test performed, and that Respondent would no longer see him as a patient when L.G. did not comply with the order. Tr. 376–78; RX 3 (Lab Order for L.G. dated October 4, 2017). On this issue, the ALJ found “[J.F.’s] reasons why the Clinic had not issued termination letters to Y.H. and L.G. for failing to take urine tests to be less than credible.” RD, at 12. J.F. stated that the Clinic's procedure for vitals included taking blood pressure, weight, height, and conducting a pain assessment. Tr. 372. Further, J.F. testified that he was not present when vitals were taken, but he made sure that the information was entered into Practice Fusion. *Id.* at 372–73. The ALJ found that J.F. lacked credibility when he testified that he had personal knowledge of what vitals were taken with Y.H. and L.G., when really, J.F. simply had to trust that the recorded information was accurate. RD, at 12–13; Tr. 392, 419–20. J.F. also testified regarding the general procedures Respondent used when seeing patients and regarding improvements that the Germeil Clinic had instituted in the year prior to the hearing. Tr. 385, 387–88; RD, at 12.

Having read and analyzed all of the record evidence, I agree with the RD that J.F.'s testimony was not presented in a straightforward and candid manner. RD, at 13. Still, the RD found, and I agree, that J.F. was generally a credible witness. *Id.* The RD went on to find that much of J.F.'s testimony was irrelevant because he had little personal knowledge of how Y.H. and L.G. were treated as patients and because Respondent did not accept responsibility for her actions. *Id.* I agree.

J.W. is the office manager of the Germeil Clinic and, in that role, he supervises the medical assistants. Tr. 433–34, 437; *see also* RX 7 (Resume of J.W.). J.W. testified concerning the office procedures for taking a patient's vitals (which J.W. occasionally did himself). Tr. 442–47. In taking vitals, a medical

assistant obtains a patient's blood pressure, weight, height, and conducts a preliminary pain assessment. *Id.* at 443. The vitals are then provided to Respondent who occasionally asks questions about a patient's pain. Tr. 445, 447, 453. Diminishing J.W.'s credibility, the ALJ found that J.W. painted a picture of being able to consistently monitor (hear and observe) the medical assistants, while they took vitals, when he obviously had other responsibilities as the office manager to which he had to attend. Tr. 434, 459, 471–74. Moreover, while J.W. testified credibly as to the clinic's procedures for taking a patient's vitals, he provided no testimony that he observed the taking of Y.H. or L.G.'s vitals. RD, at 14. Thus, the RD found, and I agree, that J.W.'s testimony does not outweigh the direct testimony of both Y.H. and L.G. concerning how their vitals were taken and whether or not they were asked about their pain.¹¹

The ALJ found the remainder of J.W.'s testimony to be generally credible. RD, at 14. He testified that if Respondent suspected that a patient was diverting drugs, she would send the patient for a urine drug test. Tr. 448. If the patient did not take the urine drug test, the patient would not be seen again until the test is taken. *Id.* If the patient refuses to take the test, the patient would be discharged. *Id.* J.W. testified that since he started in December 2016, the Germeil Clinic had worked to reduce patients' wait times, spend more time with patients, use a pain questionnaire, and give more attention to taking vitals. Tr. 449–50.

Having read and analyzed all of the record evidence, I agree with the RD that J.W.'s testimony was presented in a straightforward and candid manner. RD, at 14. The RD went on to find that, like J.F.'s testimony and for the same reasons, much of J.W.'s testimony was irrelevant to the issues in this case. *Id.* Again, I agree.

E. The Standard of Care in the State of Florida

According to the Controlled Substances Act (hereinafter, CSA), “Except as authorized by this subchapter, it shall be unlawful for any person knowingly or intentionally . . . to . . . distribute, . . . dispense, or with intent to . . . distribute[] or dispense, a controlled substance.” 21 U.S.C.

¹¹ Moreover, this testimony is irrelevant as this matter involves Respondent's failure to conduct physical examinations, not her failure to collect vitals. And as Dr. Hoch explains, Respondent's responsibility to conduct a physical exam cannot be satisfied by her medical assistants. *See infra* n.33; Tr. 307, 326.

841(a)(1). The CSA's implementing regulations state that a lawful controlled substance order or prescription is one that is “issued for a legitimate medical purpose by an individual practitioner acting in the usual course of his professional practice.” 21 CFR 1306.04(a).

During the prehearing conference on June 6, 2018, the parties stipulated that Respondent “is presently” licensed in the State of Florida as a Medical Doctor. Dr. Hoch presented un rebutted testimony regarding the usual course of professional practice and the applicable standard of care for a Florida physician when prescribing controlled substances.

Dr. Hoch explained that Florida Administrative Code, Rule 64B8–9.013, Standards for the Use of Controlled Substances for the Treatment of Pain, lays out a physician's responsibilities when prescribing controlled substances for pain management.¹² RD, at 9; Tr. 203–05. Dr. Hoch acknowledged that Florida Administrative Code § 64B8–9.013¹³ provides guidelines rather than black-and-white rules, but he further acknowledged that those guidelines are authoritative regarding a physician's standard of care in Florida. RD, at 9; Tr. 272, 280–81. The Florida Code states that “[t]he Board will not take disciplinary action against a physician for failing to adhere strictly to the provisions of these standards, if good cause is shown for such deviation.” Fla. Admin. Code r. 64B8–9.013(1)(f) (West 2020).

According to Dr. Hoch, that regulation requires that a doctor: Take a complete medical history and conduct a physical examination¹⁴ before issuing a prescription for a controlled substance; develop a written treatment plan; discuss the risks and benefits of controlled substances with a patient;

¹² Moreover, the parties stipulated that “a Florida licensed physician must follow the standards and rules set forth by the Florida Department of Health, Standards of Practice of Medical Doctors. ALJX 16, at 1; Tr. 10. The parties further stipulated that “Florida Administrative Code, Rule 64B8–9.013, Standards for the Use of Controlled Substances for the Treatment of Pain, applies to a Florida licensed [p]hysician dispensing controlled substances.” *Id.*

¹³ The relevant portions of Florida Administrative Code § 64B8–9.013 have not been amended at any time during the relevant time period in this matter.

¹⁴ The Florida Code does not define what constitutes a physical exam and does not necessarily require that a physician conduct a physical examination of a patient each time the patient presents for an appointment. RD, at 50; Tr. 289. However, Dr. Hoch opined that the standard of care requires a physician to perform a physical examination in certain circumstances including before first prescribing a controlled substance, when the patient requests a higher dose of controlled substances, presents with new symptoms or complaints, has a new diagnosis, or has not been seen for a period of months. *See* Tr. 290, 341–42, 345–46.

¹⁰ DI testified that he has investigated at least three clinics that used the Practice Fusion program and he has not found that the program deletes or omits things. Tr. 32–33.

and maintain complete and accurate records with respect to a patient. RD, at 9; Tr. 205–06, 338. Additionally, a physician is required to conduct a periodic review of the course of treatment provided to a patient. RD, at 50; Tr. 337–38.

Further, a physician's medical records must also meet the standards set forth in Florida Administrative Code Rule 64B8–9.003¹⁵ and Florida Statute § 458.331(1)(m).¹⁶ Under the Florida Administrative Code, “[a] licensed physician shall maintain patient medical records . . . with sufficient detail to clearly demonstrate why the course of treatment was undertaken.” Fla. Admin. Code r. 64B8–9.003(2) (West 2020). The regulation also states that physician's “medical record shall contain sufficient information to identify the patient, support the diagnosis, justify the treatment and document the course and results of treatment accurately, by including, at a minimum, patient histories; examination results; test results; records of drugs prescribed” *Id.* at 9.003(3). The Florida Statute provides that the “following acts constitute grounds for denial of a license or disciplinary action . . . : [f]ailing to keep legible . . . medical records . . . that justify the course of treatment of the patient, including, but not limited to, patient histories; examination results; test results; records of drugs prescribed, dispensed, or administered; and reports of consultations and hospitalizations.” Fla. Stat. Ann. § 458.331(1)(m) (West 2020).

The Florida Administrative Code provides the following standards and record keeping requirements, *see* Fla. Admin. Code r. 64B8–9.013 (West 2020):

- “A complete medical history and physical examination must be conducted and documented in the medical record.” Fla. Admin. Code r. 64B8–9.013(3)(a) (West 2020). A Florida physician “is required to keep accurate and complete records to include . . . [t]he complete medical history and a physical examination, including history of drug abuse or dependence, as appropriate.” Fla. Admin. Code r. 64B8–9.013(3)(f)(1) (West 2020).
- “The written treatment plan shall state objectives that will be used to determine treatment success, such as pain relief and improved physical and psychosocial function” Fla. Admin. Code r. 64B8–9.013(3)(b) (West 2020). A Florida physician “is required to keep accurate and

complete records . . . [on t]reatment objectives.” Fla. Admin. Code r. 64B8–9.013(3)(f)(4) (West 2020).

- “The physician shall discuss the risks and benefits of the use of controlled substances with the patient.” Fla. Admin. Code r. 64B8–9.013(3)(c) (West 2020). A Florida physician “is required to keep accurate and complete records to include . . . [d]iscussion of risks and benefits.” Fla. Admin. Code r. 64B8–9.013(3)(f)(5) (West 2020).
- “[T]he physician shall review the course of treatment and any new information about the etiology of the pain. Continuation or modification of therapy shall depend on the physician's evaluation of the patient's progress. If treatment goals are not being achieved, despite medication adjustments, the physician shall reevaluate the appropriateness of continued treatment.” Fla. Admin. Code r. 64B8–9.013(3)(d) (West 2020). A Florida physician “is required to keep accurate and complete records to include . . . [p]eriodic reviews. Records must remain current, maintained in an accessible manner, readily available for review” Fla. Admin. Code r. 64B8–9.013(3)(f)(10) (West 2020).

Dr. Hoch explained that the basic rule of thumb for medical documentation is a “SOAP” note. RD, at 51; Tr. 212. The “S” is a patient's subjective complaint; the “O” is the doctor's objective findings based on a physical examination; “A” is the doctor's assessment or impression or the diagnosis of the condition the doctor is treating; and the “P” is the plan where a doctor explains why a particular treatment has been selected. RD, at 51; Tr. 212. He testified that the plan is the most important part of the documentation because it allows a doctor to explain “why [she's] doing what [she's] doing . . . [and] detail [her] decision-making.” Tr. 212. Dr. Hoch explained that it is a doctor's responsibility to maintain patients' records. RD, at 50; Tr. 354.

The Florida Administrative Code provides that “[p]hysicians should be diligent in preventing the diversion of drugs for illegitimate purposes.” Fla. Admin. Code r. 64B8–9.013(1)(d) (West 2020). Dr. Hoch explained that, in Florida, “it is a very big responsibility for prescribing physicians to be concerned about diversion.” Tr. 224. When a patient tells a doctor that he or she is diverting his or her controlled substances that statement “is a very big red flag that has to be addressed at that moment.” RD, at 51; Tr. 224–25. In fact, Dr. Hoch stated that if a patient tells a doctor that he or she is selling or giving away controlled substances, “that's sort of a deal breaker”¹⁷ Tr. 351.

¹⁷ Dr. Hoch's meaning by “deal breaker” is clarified by the totality of his testimony. Tr. 351. He

Therefore, in accordance with Dr. Hoch's testimony and the record as a whole, I find that the standard of care in Florida requires that a physician stop writing prescriptions for a patient following statements from the patient that are consistent with diversion. *See* Tr. 256–57.

F. The Florida Department of Health Complaint

The parties stipulated that Respondent's license to practice medicine has never been suspended or revoked by the State of Florida, Board of Medicine. ALJX 19 (Additional Joint Stipulations Proposed by Respondent), at 1.

On January 20, 2017, the Florida Department of Health issued an Administrative Complaint (hereinafter, Complaint) against Respondent. Respondent's Exhibit (RX) 11 (Records from the Florida Administrative Complaint against Respondent), at 16–24. The Complaint alleged, among other things, that Respondent's medical treatment of a patient M.N.,¹⁸ between July 2013, and August 2015, “fell below the prevailing professional standard of care,” that she “prescribed controlled substances inappropriately . . . ,” and that she “failed to adequately create or maintain medical records that justified [the] amount and/or type of controlled substances she prescribed” in violation of Florida Statute Section 458.331(1)(m) and Florida Administrative Code Rule 64B8–9.003. *Id.* at 20, 22–23. The facts alleged in support of the Complaint are that Respondent: Continued prescribing controlled substances to her patient upon learning that the patient was sharing another person's pain medication; failed to obtain a medical history; failed to list a chief complaint or history of present illness; recorded the patient's vitals only one time; and did not have the patient sign a pain medication contract. *Id.* at 17–18, 21. Based on the alleged violations, the Complaint sought “permanent

testified that if he had a patient that admitted to diversion, he would not write another prescription for that patient. Tr. 256–57. Similarly, the Florida Administrative Complaint makes clear that the Florida Department of Health's position is that practitioners should “discontinue prescribing scheduled medications after learning that the patient [engaged in diversion].” RX 11, at 19. I also note that Respondent's Posthearing states, “[Respondent] knows that she should not have issued the prescription for Y.H. and L.G. after they made statements consistent with diversion . . . she had a duty to investigate . . . [and] should have refused to give the prescription[s] and sent them for drug testing immediately.” ALJX 28, at 15.

¹⁸ There are no allegations of improper prescribing in this proceeding relevant to patient M.N.; however, this Complaint is relevant for other reasons as described herein.

¹⁵ The relevant portions of Florida Administrative Code § 64B8–9.003 have not been amended at any time during the relevant time period in this matter.

¹⁶ Florida Statute § 458.331(1)(m) has not been amended at any time during the relevant time period in this matter.

revocation or suspension of Respondent's license, restriction of practice, imposition of an administrative fine, issuance of a reprimand" and/or other lesser penalties against Respondent. RX 11, at 24.

On February 8, 2017, Respondent signed a Settlement Agreement to settle the matters alleged in the Complaint. *Id.* at 6–15. Although Respondent neither admitted nor denied the allegations in the Complaint, she did admit that if the allegations were proven, they “would constitute violations of Chapter 458, Florida Statutes.” *Id.* at 7. The Settlement Agreement (as amended by the Florida Board of Medicine (hereinafter, State Board) pursuant to the Final Order, dated April 21, 2017) required Respondent to pay a fine of \$10,000, reimburse \$2,895.21 in costs, take four classes within a year, have a risk manager evaluate her medical practice, and comply with the risk manager's recommendations for improvements. *Id.* at 1–2, 6–15. Additionally the Settlement Agreement stated that “[i]n the future, Respondent shall not violate Chapter 456, 458 or 893, Florida Statutes, or the rules promulgated pursuant thereto, or any other state or federal law, rule, or regulation relating to the practice or the ability to practice medicine” *Id.* at 12.

G. Allegation of Improper Prescribing to Y.H.

Having read and analyzed all of the record evidence, I agree with the RD and find that the record contains substantial evidence that Respondent improperly prescribed controlled substances to Y.H. without a legitimate medical purpose, beneath the standard of care and outside the usual course of professional practice. RD, at 68, 71, and 73. Y.H. visited in the capacity as a confidential source for DEA a total of eight times between March 3, 2016, and January 25, 2017. Tr. 43–44; RX 1.¹⁹ Y.H.'s first encounter with Respondent was on March 22, 2016. RX 1, at 30. According to the patient records, Y.H.'s chief complaint during the first visit was, “I just came to hav[e] some pain meds. I am not function [sic.] w/o pain meds. . . . I share oxycodone 30 mg. I had 2 MVA and a bad slip[] about 2

years ago. I'd like flexeril as well.” RX 1, at 30. Y.H.'s last three visits with Respondent, and the prescriptions resulting therefrom, presented as evidence in this case—September 8, 2016, October 12, 2016, and January 25, 2017.

1. Y.H.'s September 8, 2016 Visit

On September 8, 2016, Y.H. visited Respondent in her capacity as a confidential source and pursuant to the instructions given to her by her DEA handler. Tr. 43–44. During the visit, Y.H. wore a recording device that provided both audio and visual recordings of the office visit and she activated the device when she began interactions with Respondent. *Id.* at 44. As is evident from the records, Respondent spent approximately ten minutes with Y.H. GX 2 (Video Recording from September 8, Encounter). The vast majority of that time was spent discussing Y.H.'s sexuality and upcoming wedding. GX 3 (Transcript of Recording from September 8, Encounter), at 4–14.

During the visit, there was no discussion regarding the amount of Y.H.'s pain. *See generally* GX 3. Further, Y.H. testified that she was not asked to describe her pain levels by any member of Respondent's staff. Tr. 45, 87–88. The only discussion that occurred regarding pain occurred when Y.H. seemingly could not remember the location of her pain. GX 3, at 3

CS: I don't know. It's hurting my back.

Germeil: Uh—! ²⁰

CS: Oh! I forgot. It's not my back—it's my neck.

Germeil: Uh

CS: It's my back and my neck. Yeah, 'cause [VOICES OVERLAP] ²¹

Germeil: So, it's not on your shoulder but [U/I]

CS: No. Not at all [U/I].

Id. After seemingly not knowing the location of her pain, Y.H. requested additional pills. “Doc, remember last month you were going to give me one twenty (120)—for the Oxy's, but you didn't, and you told Josh to tell me this month you'd give me one forty (140).” *Id.* at 10. After requesting additional pills, Y.H. informed Respondent that

²⁰ Throughout the transcripts of the video recorded encounters (GXs 3, 5, 7, 9, 11, and 13), the transcriber used ellipses to depict pauses in the conversation. I have removed these and replaced them with dashes to prevent confusion between pauses and omissions of word from the quotations. Where they would have appeared at the beginning or end of a line, I have omitted them altogether.

²¹ Bracketed text that describes the mechanics of the conversation between the confidential sources and Respondent, appear in the original transcript. Examples include, [VOICES OVERLAP], [U/I] which stands for unintelligible (Tr. 155, 159–60), [STUDDERS], and [WHISPERING].

she had been giving, even selling, some of her pills to her brother. *Id.* at 17, 19.

CS: Okay, [my brother] is coming and he has to get pills because last month

Germeil: Uh-huh.

CS: when you didn't get—uh—you did not give him enough, and again, he wanted to borrow from me—and I was like “No, I'm selling them to you this time”

Germeil: [U/I]

CS: “You are going to give me money”

CS: Last month he ran out—he's drinking three (3), four (4) pills a day—I said, “Bro, you are not going [to] bum anything of me, you are going to give me money for these pills” and he has to pay me first [U/I] because I'm not going to give them to him for free. I'm tired of him! I'm tired of him, doc!”

Id. Respondent's only response to Y.H.'s admission to diverting her controlled substances was “Okay.” *Id.* at 19.

Despite Y.H. not knowing the location of her own pain, requesting an increase in the number of pills prescribed, and admitting to diversion, Respondent wrote Y.H. prescriptions for controlled substances during the visit. GX 14 (Prescriptions issued to Y.H. on September 8), at 1. The parties stipulated that on September 8, 2016, Respondent prescribed Y.H. one hundred and forty ²² dosage units of oxycodone HCL 30 mg.²³ and sixty dosage units of alprazolam 2 mg.²⁴ ALJX 11, at 2; Tr. 9.

Y.H. testified that during this visit, Respondent did not conduct a physical exam, did not discuss other medical conditions Y.H. might have, did not discuss the medications that Y.H. was taking, did not discuss Y.H.'s diet or exercise. Tr. 48–49. Y.H. testified that the person who took her vitals on September 8, 2016, did not conduct a physical exam, discuss Y.H.'s medical condition, or ask about controlled substances Y.H. was taking. Tr. 45.

According to the patient records for that visit, Y.H.'s chief complaint was “I need a little bit more of my pills, I ran out so fast. I really need them. I am getting married soon and I need a little bit more.” RX 1, at 22. The patient records “Plan” stated that Respondent, among other things, explained the side effects of the medication, advised regarding adverse reactions, discussed lifestyle modifications to control weight and blood pressure, and that a

²² Y.H. requested an increase from one hundred and twenty to one hundred and forty pills a month, and this prescription shows that Respondent agreed to prescribe the additional pills. GX 3, at 10; GX 14.

²³ The parties stipulated that oxycodone HCL is listed by DEA as a Schedule II controlled substance. ALJX 11, at 2.

²⁴ The parties stipulated that alprazolam is listed by DEA as a Schedule IV controlled substance. ALJX 11, at 2.

¹⁹ No videos or transcripts of Y.H.'s earlier visits with Respondent were introduced in this matter. However, based on Y.H.'s credible testimony and the opinion of Dr. Hoch, I find that Respondent did not document or conduct a physical examination of Y.H. during any of her eight visits with Y.H. Tr. 92, 338–39. Respondent presented no evidence to demonstrate that a physical examination was conducted.

“[d]etail[ed] explanation was provided about and against ‘shopping’ from physician to physicians [sic] and the harm (s) [sic] that can provoke.” *Id.* According to the patient records, “[a]pproximately 60 min was spent in this encounter,” and Y.H.’s pain level was “9.” *Id.* However, Y.H.’s testimony and the recordings directly contradict the information in the “Plan.”

Dr. Hoch opined that the two prescriptions issued by Respondent to Y.H. on September 8, 2016, (namely one hundred and forty dosage units of oxycodone HCL 30 mg. and sixty dosage units of alprazolam 2 mg.) were issued outside of the usual course of professional practice and beneath the applicable standard of care in the state of Florida. Tr. 208–09; GX 14. In support of his opinion, Dr. Hoch noted that the plan does not bear any resemblance to the actual visit and discussion between Respondent and Y.H. Tr. 218. *Compare* RX 1, at 22, with GX 2 and GX 3. Dr. Hoch explains that Y.H. is a female and the plan refers to a male. Tr. 213, RX 1 (Patient File for Y.H.), at 22. Additionally, the plan discusses managing blood pressure when Y.H. has “quite a good blood pressure” that does not need to be controlled. Tr. 214. Also, Dr. Hoch explains that Respondent did not discuss side effects with Y.H., fall precautions, or the harms that occur by shopping from physician to physician, but that those non-existent conversations were recorded in the plan. Tr. 213–218. Additionally, Dr. Hoch pointed out that the plan records that the visit lasted approximately 60 minutes when the visit did not last an hour. Tr. 215. Finally, Dr. Hoch found no indication that Respondent performed a physical exam or took a medical history at the visit. Tr. 227. Further, Dr. Hoch opined that there is no indication in the patient treatment notes that Respondent maintained on Y.H. that Respondent conducted a periodic review of her treatment of Y.H.’s conditions by prescribing controlled substances to her. Tr. 246.

Additionally, Dr. Hoch opined that there was nothing documented in the patient file to justify the oxycodone or alprazolam²⁵ prescriptions and that “prescription of these medications together has to be qualified quite extensively in the medical record.” Tr. 259; *see also id.* at 219. Respondent prescribed Y.H. oxycodone 30 mg. which is a “very strong” dosage, and prescribed her one hundred and forty

pills which “means approximately four to maybe five a day . . . [or] 120 milligrams of [o]xycodone a day.” Tr. 219. According to Dr. Hoch, the oxycodone prescription can cause a number of side effects that Respondent did not discuss with Y.H. Tr. 220–21. He further testified that the side effects of opioid use, in the order of “the least to the most disabling,” include pruritus or itching, urinary retention, nausea and vomiting, and constipation. *Id.* at 220.

Dr. Hoch explained that “the most devastating complication or side effect of an opioid [like oxycodone] is respiratory depression, and that’s what kills people.” Tr. 221–22. Dr. Hoch explained that the risk is particularly high where, as here, the opioid is given with a benzodiazepine like alprazolam. Tr. 222. In light of the medications prescribed, Dr. Hoch explained that Respondent was required to warn Y.H. about the risk of respiratory depression and instruct the patient to make sure there was at least a three to four hour gap between administering the two different medications. *Id.* Based on Dr. Hoch’s credible and uncontroverted testimony and based on the video recording and transcript, I find that there was no discussion of the risks at this visit. *Id.*

Dr. Hoch explained that in Florida, “it is a very big responsibility for prescribing physicians to be concerned about diversion.” Tr. 224. Accordingly, when Y.H. informed Respondent that “she[was] either giving or selling pills that she[was] receiving from the doctor,” Respondent should have been “[t]remendous[ly] concern[ed].” *Id.* Dr. Hoch concludes that Y.H.’s diversion admission was “a very big red flag that [had] to be addressed at that moment.” Tr. 224–25. I find that Respondent did not address Y.H.’s diversion admission on September 8, 2016. *See also* RD, at 68.

Accordingly, based on the credible and uncontroverted testimony of Dr. Hoch, I find that the two prescriptions issued by Respondent to Y.H. on September 8, 2016, (namely one hundred and forty dosage units of oxycodone HCL 30 mg. and sixty dosage units of alprazolam 2 mg.) were issued outside of the usual course of professional practice and beneath the applicable standard of care in the state of Florida. *See* RD, at 68.

2. Y.H.’s October 12, 2016 Visit

On October 12, 2016, Y.H. visited Respondent in her capacity as a confidential source and pursuant to the instructions given to her by her DEA handler. Tr. 43–44. During the visit, Y.H. wore a recording device that

provided both audio and visual recordings of the office visit and she activated the device when she began interactions with Respondent. RD, at 27; Tr. 52, 183. As is evident from the records, Respondent spent less than seven minutes with Y.H. GX 4 (Video Recording from October 12, Encounter); GX 5 (Transcript of Recording from October 12, Encounter), at 13. The majority of that time was spent discussing Y.H.’s cancelled wedding and a potential hurricane. GX 5, at 2–9; RD, at 69.

Towards the end of the visit, Y.H. informed Respondent that she had been selling some of her pills to her brother. GX 5, at 12–13.

CS: I tell [my brother], doc. “Go get your own stuff.” I’m tired of selling him my pills.

Germeil: You’re right!

CS: But I sold him the pills, I sure did it, at twenty (20) bucks a pop, and he paid for them. I said, “You don’t go see the doctor?”

Germeil: You’re right about that, but . . .

He has to learn.

CS: Exactly, doc.

Id. The video and transcription of the appointment show that Respondent did not express any concern about Y.H. selling her controlled substances to her brother. RD, at 69; GX 4; GX 5. Instead, Respondent seems to have acknowledged Y.H.’s admission of diversion and to have condoned the conduct. *Id.*; Tr. 231. Dr. Hoch explained, “[Y.H.] is clearly indicating to [Respondent] that they are diverting the medication to someone else . . . selling their [p]ills at \$20 a pop. The doctor notes it, addresses it and condones it.” Tr. 231. Dr. Hoch explains that Respondent’s actions with regard to Y.H.’s admission of diversion were “a tremendous cause for concern.” *Id.*

Not only did Respondent fail to address Y.H.’s admission of diversion, but Respondent, as the parties stipulated, went on to prescribe Y.H. one hundred and forty dosage units of oxycodone HCL 30 mg. and sixty dosage units of alprazolam 2 mg. ALJX 11, at 2; Tr. 9. *See also* GX 15 (Prescriptions Issued to Y.H. on October 12).

Dr. Hoch opined that the two prescriptions issued by Respondent to Y.H. on October 12, 2016, were issued outside of the usual course of professional practice and beneath the applicable standard of care in the state of Florida. Tr. 228–29; GX 15. In support of his opinion, Dr. Hoch noted that the plan documented for the October 12, 2016, visit was identical to, and has the same problems as the plan for the September 9, 2016 visit. Tr. 234, 236. As with the prior visit, Y.H. is a female and the plan refers to a male. Tr.

²⁵ Dr. Hoch explains that “[t]wo milligrams of [a]lprazolam is a very high dose of [a]lprazolam.” Tr. 222.

235; RX 1, at 20. Additionally, the plan discusses managing blood pressure when Y.H.'s does not require management. Tr. 236. Dr. Hoch opined that the plan was too generic and failed to identify what Respondent was "doing for that particular problem." Tr. 235. Dr. Hoch also points out that in the patient record ". . . Subjective is empty . . . [O]bjective is empty . . . Assessment is empty." Tr. 233. Additionally, Dr. Hoch explained that "back pain" is an indication of a complaint, but that a proper complaint, unlike this one, would explain "what the patient is actually feeling, where, . . . what part of their back, the nature and quality of the pain." Tr. 234. Dr. Hoch's credible and uncontroverted testimony is that the patient chart does not justify the prescriptions that Respondent gave to Y.H. on October 12, 2016. Tr. 236.

Additionally, Dr. Hoch explained that these were the same two prescriptions issued on October 12, 2016, as were issued on September 9, 2016, and that the same issues about which he had already opined regarding the issuance of both an opioid and a benzodiazepine were present here. Tr. 232. Also, once again Dr. Hoch pointed out that Respondent failed to discuss with Y.H. the risks involved with prescribing opioids and benzodiazepines together. Tr. 232.

Further, Dr. Hoch explained, that Respondent's October 12, 2016 visit with Y.H. lacked the required "encounter between the physician and the patient [and] discussion of the ongoing problem as this is a chronic pain problem." Tr. 229. Dr. Hoch explained that Respondent did not address the patient's pain, conduct a physical examination, take a complete medical history, discuss the risks of controlled substances, develop a treatment plan, or conduct a periodic review of the treatment of Y.H.'s conditions. Tr. 230, 246.

Based on Dr. Hoch's uncontroverted and credible testimony, the ALJ found, and I agree, that Respondent failed to make any statements that addressed Y.H.'s medical concerns during the October 12, 2016 visit. RD, at 27 (citing GX 4 and GX 5). Respondent did not ask any questions to determine Y.H.'s current medical condition, assess Y.H.'s level of pain or determine whether the treatment regimen she had prescribed to Y.H. was effective. RD, at 28 (citing GX 5); Tr. 87–88, 230. Respondent failed to: Conduct a physical examination of Y.H.;²⁶ discuss the side effects of the

medication she was prescribing to Y.H. or the risks of using controlled substances; discuss the risks of doctor shopping; discuss Y.H.'s diet and exercise; discuss any medications Y.H. was taking; take a complete medical history of Y.H.; or develop an adequate treatment plan for Y.H. RD, at 28 (citing Tr. 54, 230, 232); GX 4; GX 5; RX 1, at 20.

In contrast, the patient notes that Respondent created concerning Y.H.'s October 12, 2016 appointment indicate that: The encounter lasted 60 minutes; and that Respondent discussed "side effects," "adverse reactions," "safety precautions," and doctor shopping with Y.H. RD, at 28 (citing RX 1, at 20). The "Plan" for the October 12, 2016, visit was identical to the "Plan" for the September 8, 2016, visit and did not accurately capture what happened during the October 12, 2016, visit. RD, at 29; and compare RX 1, at 20, with *id.* at 22. Y.H.'s chief complaint was recorded as "I have a lot [of] back pain and I need my pain meds." RX 1, at 20. Y.H.'s pain level was recorded as "9." *Id.* But Dr. Hoch explained that a patient who presents with a pain level of nine would show "a tremendous degree of discomfort." RD, at 29 (citing Tr. 331). The October 12, 2016 records lacked any information in the "Subjective," "Objective," and "Assessment" sections. RX 1, at 20.

The ALJ found based on Dr. Hoch's testimony, and I agree, that Respondent should have recognized Y.H.'s admission that she was diverting controlled substances as a red flag and considered it a "deal breaker" such that Respondent should not have issued prescriptions to Y.H. on October 12, 2016. RD, at 71; Tr. 351. The ALJ found, and I agree, that the prescriptions Respondent issued to Y.H., on October 12, 2016, were not issued for a legitimate medical purpose, and were not issued in the usual course of professional practice in the State of Florida. RD, at 71; Tr. 229, 236.

3. Y.H.'s January 25, 2017 Visit

On January 25, 2017, Y.H. visited Respondent in her capacity as a confidential source and pursuant to the instructions given to her by her DEA handler. Tr. 43–44. During the visit, Y.H. wore a recording device that provided both audio and visual recordings of the office visit and she activated the device when she began interactions with Respondent. RD, at 30; Tr. 58, 183. As is evident from the records, Respondent spent approximately seven and a half minutes with Y.H. GX 6 (Video Recording from October 25, Encounter). The majority of

that time was spent on small talk discussing Y.H.'s family matters, including Y.H.'s trip to Cuba following her aunt's death, her brother's drug dependency, and the financial strain that resulted. GX 7 (Transcript of Recording from October 25, Encounter); RD, at 72.

At several points during the visit, Y.H. informed Respondent that she had been selling some of her pills. GX 7, at 4, 6, 9–11. During a discussion regarding an aunt of Y.H.'s who died in Cuba, Y.H., stated, "I didn't even have money—I had to actually sell my pills unfortunately. I had to make some money. I had to go over there. Everything was on me." GX 7, at 4. Y.H. went on to state, "Thank God I had some—the—some of the—pills that I had I was able to get rid of them and get some money to help me out, which I had to do now, because—I had to pay my rent." GX 7, at 6. Then the visit concluded with a final conversation regarding diversion.

CS: You think is right that I have to sell my own pills, my meds to, to pay for stuff for—[STUTTERS] that's just crazy doc.

Germeil: Listen! [STUTTERS] You are a good person . . . good things happen to good people. . . .

CS: . . . Right now, I'll probably go and I'll take some of these, I have to keep some, and then the others I probably have to sell [to my brother]. He probably, he'll probably take some from me 'cause that's all he does." . . .

Germeil: I feel sorry for you but uh—that's your call. That's mine, too. . . .

CS: Yeah, [o]xycodone's—thirty milligrams—[MURMERS] Yeah, we're good. Quantity one-forty (140). This is great. You don't know how much this helps me out, doc. You just don't know.

Germeil: Relax! Do not say that to nobody.

CS: Of course, not. . . .

Germeil: I know. I don't want to . . . get into trouble.

Id. at 9–11.

Despite Y.H.'s admission of diversion, Respondent, as the parties stipulated, prescribed Y.H. one hundred and forty dosage units of oxycodone HCL 30 mg. and sixty dosage units of alprazolam 2 mg. ALJX 11, at 2; Tr. 9. *See also* GX 16 (Prescriptions Issued to Y.H. on January 25). Dr. Hoch found that the same two prescriptions were issued on January 25, 2017, as were issued on September 9, 2016, and October 12, 2016, and that the same concerns about which he had already opined regarding the issuance of both an opioid and a benzodiazepine were present here. Tr. 237–38.

Dr. Hoch's credible and uncontroverted opinion was that the two prescriptions issued by Respondent to Y.H. on January 25, 2017, (namely

²⁶ In fact, during the appointment, Dr. Germeil sat on one side of an office desk and Y.H. sat across the desk from her. RD, at 70 (citing GX 4).

one hundred and forty dosage units of oxycodone HCL 30 mg. and sixty dosage units of alprazolam 2 mg.) were issued outside of the usual course of professional practice and beneath the applicable standard of care in the State of Florida. Tr. 237, 244; GX 16. In support of his opinion, Dr. Hoch found that the plan documented for the January 25, 2017 visit is nearly identical to, and has the same problems as the plan for the September 9, 2016, and October 12, 2016 visits. Tr. 241. As with the prior visits, Y.H. is a female and the plan refers to a male. Tr. 241; RX 1, at 19. Further, as with the prior visits, the plan stated that side effects, adverse reactions, diet and exercise, blood pressure, doctor shopping, and other matters were discussed during the encounter when the transcript and video evidence make clear that they were not. Tr. 241–42. Dr. Hoch opined that the plan has “a disconnect” in so far as it fails to address Respondent’s approach for treating the diagnoses identified in the assessment section (specifically anxiety disorder and back ache). Tr. 240. Again, Dr. Hoch identified flaws in the chief complaint section of Respondent’s records for Y.H., which contained a list of diagnosis rather than a true complaint. Tr. 239. Dr. Hoch’s opinion was that the patient chart reflects an incomplete medical record and does not justify the prescriptions that Respondent gave to Y.H. on January 25, 2017. Tr. 250.

Additionally, Dr. Hoch explained that, once again, Respondent failed to conduct a thorough physical exam, take a complete medical history, or conduct a periodic review of the treatment of Y.H. Tr. 242, 246. In fact, during the encounter, Respondent sat on one side of an office desk and Y.H. sat across the desk from her. GX 6; RD, at 72. Dr. Hoch’s conclusion is further supported by Respondent’s failure to address Y.H.’s admission of diversion. Dr. Hoch explained, that there was a statement from “the patient to the physician that the pills were being sold[,]” which “is diversion[,]” and that “the rule states that diversion is not acceptable.” Tr. 243–44.

Based on Dr. Hoch’s expert testimony, the ALJ found, and I agree, that Respondent failed to make any statements that addressed Y.H.’s medical concerns during the January 25, 2017 visit. RD, at 30 (citing GX 6 and GX 7). Respondent did not ask any questions to determine Y.H.’s current medical condition, assess Y.H.’s level of pain or determine whether the treatment regimen she had prescribed to Y.H. was effective. RD, at 32 (citing GX 7; Tr. 87–88, 246). Respondent did not discuss the

side effects of the medication she was prescribing to Y.H.; discuss the risks of doctor shopping; discuss Y.H.’s diet and exercise; discuss any medications Y.H. was taking; take a complete medical history of Y.H.; or develop an adequate treatment plan for Y.H. RD, at 32 (citing Tr. 59, 241–243; GX 6; GX 7; RX 1, at 19). Further, Y.H. testified that Respondent did not conduct a physical exam during the encounter. Tr. 59.

In contrast, the patient notes that Respondent created concerning Y.H.’s January 25, 2017, appointment indicate that: the encounter lasted 60 minutes; and that Respondent discussed “side effects,” “adverse reactions,” “safety precautions,” and doctor shopping with Y.H. RD, at 33 (citing RX 1, at 19). The “Plan” for the January 25, 2017 visit was nearly identical to the “Plan” for the September 8, 2016, and October 12, 2016 visits (the only difference is the first line regarding a request for a urine drug test) and did not accurately capture what happened during the January 25, 2017 visit. RD, at 33; *compare* RX 1, at 19, *with id.* at 20, 22, *and with* GX–6, GX–7. Y.H.’s pain level was recorded as “10.” RX 1, at 19. But Dr. Hoch explained that a patient who presents with a pain level of ten would be in “excruciating pain” and one would question how such a patient could “even sit in front of you.” RD, at 33 (citing Tr. 331). If a person has a pain level of ten, then that person is usually in the hospital. *Id.* As with the prior patient records, the January 25, 2017 records lacked any information in the “Subjective,” and “Objective” sections. RX 1, at 19.

The ALJ found, and I agree, that Respondent did not advise Y.H. not to sell her controlled substances or otherwise engage in any meaningful conversation about diversion with Y.H. RD, at 72–73; GX 6; GX 7. The ALJ found, and I agree, that Respondent should have recognized Y.H.’s admission that she was diverting controlled substances as a red flag and considered it a “deal breaker” such that Respondent should not have issued prescriptions to Y.H. on January 25, 2017. RD, at 73; Tr. 242–44, 351.

The ALJ found, and I agree, that based on Dr. Hoch’s testimony, the prescriptions Respondent issued to Y.H., on January 25, 2017, were not issued for a legitimate medical purpose, and were not issued in the usual course of professional practice in the State of Florida. RD, at 73–74.

In summary, I find that the six controlled substance prescriptions Respondent issued to Y.H., on September 8, 2016, October 12, 2016, and January 25, 2017, were not issued

for a legitimate medical purpose and were issued outside of the usual course of professional practice and beneath the applicable standard of care in the State of Florida.

H. Allegation of Improper Prescribing to L.G.

Having read and analyzed all of the record evidence, I agree with the ALJ and find that the record contains substantial evidence that Respondent improperly prescribed controlled substances to L.G. without a legitimate medical purpose, beneath the standard of care, and outside of the usual course of professional practice in the State of Florida. RD, at 77, 80, and 82; *infra*.

L.G. visited Respondent in the capacity as a confidential source for DEA a total of five times between July 2016, and August 2017. Tr. 96–97; RX 2 (Patient File for L.G.). L.G.’s first encounter with Respondent was on July 25, 2016.²⁷ RX 2, at 22. According to the patient records, L.G.’s chief complaint during the first visit was, “I have been having this strong right shoulder pain since a few years back. It just started again. I am tired of: [sic] ibuprofen/ bengay/tylenol.” RX 2, at 22. L.G.’s last three visits with Respondent, and the prescriptions resulting therefrom, were presented as evidence in this case—February 3, 2017, July 18, 2017, and August 3, 2017.

1. L.G.’s February 3, 2017 Visit

On February 3, 2017, L.G. visited Respondent in his capacity as a confidential source and pursuant to the instructions given to him by his DEA handler. Tr. 96–97. During the visit, L.G. wore a recording device that provided both audio and visual recordings of the office visit and he activated the device shortly before he went into Respondent’s office. Tr. 97, 183. As is evident from the records, Respondent spent approximately seven and a half minutes with L.G. GX 8 (Video Recording from February 3rd Encounter). The vast majority of that time was spent discussing L.G.’s family issues and travels. GX 9 (Transcript of Video Recording from February 3, Encounter). At this visit, there was no discussion between L.G. and Respondent regarding any medical concerns. RD, at 35; GX 8; GX 9.

²⁷ No videos or transcripts of L.G.’s other visits with Respondent were introduced in this matter. However, based on L.G.’s credible testimony, I find that Respondent did not document or conduct a physical examination of L.G. during any of his five visits with L.G. Tr. 137, 338–39. Respondent presented no evidence to demonstrate that a physical examination was conducted.

Although medical concerns were not discussed at the visit, L.G. made several statements indicating that he was diverting pills. GX 9.

CS: and—what I did last time—with one of the prescriptions—knowing I'm not supposed to do that, I flipped it—I took some for me . . . took the rest to make some money

CS: I'm not trying to get in trouble or nothing like this.

Germeil: I know. Sometimes you have to help.

Germeil: But don't worry—uh, [L.G.]. You are okay.

CS: No, I mean—I'm being honest with you. That's what I've been doing, I—I sold a few of them . . . I—kept some for me.

Germeil: That's okay. Relax. Okay? But try to keep it for yourself. Try to keep your medication for yourself, okay?

CS: I mean, like I said, I took some—I took some for me and then the rest—just sold some of them

Germeil: Okay.

CS: Well, the majority of them.

Germeil: The majority of them?

Germeil: Okay. That—that is—Isn't, is that illegal, . . . ?

CS: I don't—I don't believe so. I know that but I'm telling you 'cause uh

Germeil: You don't know?

CS: You're my doctor!

Germeil: Be careful, okay?

Id. at 7–8, 11–13.

Despite L.G. admitting to diversion, Respondent wrote L.G. prescriptions for controlled substances during the visit. GX 17 (Prescriptions Issued to L.G. on February 3). The parties stipulated that on February 3, 2017, Respondent prescribed L.G. one hundred and twenty dosage units of oxycodone HCL 30 mg. and sixty dosage units of alprazolam 2 mg. ALJX 11, at 2; Tr. 9.

During the encounter, there was no discussion regarding the amount of L.G.'s pain. GX 9. L.G. testified that on February 3, 2017, Respondent did not conduct a physical exam—in fact, the video evidence shows that Respondent sat on one side of an office desk and L.G. sat across the desk from her. Tr. 103; GX 8. Respondent also did not discuss any medical conditions L.G. had, did not discuss the side effects of or adverse reactions to the medications she was prescribing to L.G., did not discuss other medications L.G. was taking (other than the ones Respondent was prescribing), did not discuss L.G.'s diet or exercise. Tr. 103. L.G. testified that the employee at the Clinic who took his vitals on February 3, 2017, did not conduct a physical exam, ask any question about his medical conditions or ask about his pain. Tr. 98.

The “Plan” in L.G.'s records stated that Respondent, among other things, explained the side effects of the medication, advised regarding adverse reactions, discussed lifestyle modifications to control weight and blood pressure, and that a “[d]etail[ed] explanation was provided about and against ‘shopping’ from physician to physicians [sic] and the harm (s) [sic] that can provoke.” RX 2, at 20. According to the patient records, “[a]pproximately 60 min was spent in this encounter,” and L.G.'s pain level was “9.” *Id.*

Dr. Hoch opined that the two prescriptions issued by Respondent to L.G. on February 3, 2017 (namely one hundred and twenty dosage units of oxycodone HCL 30 mg. and sixty dosage units of alprazolam 2 mg.) were issued outside of the usual course of professional practice and beneath the applicable standard of care in the state of Florida. Tr. 248, GX 17. In support of his opinion, Dr. Hoch explained that the plan does not bear any resemblance to the actual visit and discussion between Respondent and L.G. Tr. 254. *Compare* RX 2, at 20, *with* GX 8 and GX 9. Additionally, the plan discusses managing blood pressure, when L.G.'s blood pressure does not require monitoring. Tr. 253. Also, Dr. Hoch explains that Respondent did not discuss side effects with L.G., fall precautions, or the harms that occur from shopping from physician to physician, but those conversations are recorded in the plan. Tr. 251–54. Additionally, Dr. Hoch explains the plan records that the visit lasted approximately 60 minutes when the visit did not last an hour. Tr. 252–53.

Dr. Hoch testified that the plan Respondent recorded for L.G.'s February 3, 2017 visit was “very similar to,” the plan for Y.H.'s September 9, 2016 visit which, as discussed above, was riddled with problems. Tr. 250. *Also compare*, RX 1, at 22, *with* RX 2, at 20.

Additionally, Dr. Hoch's credible and uncontested opinion was that there was nothing documented in the patient file to justify the oxycodone or alprazolam prescriptions. Tr. 250. As Dr. Hoch has mentioned, this combination of controlled substances is a particular concern due to the risk of respiratory depression—and Respondent did not discuss those risks with L.G. during this visit as was required. Tr. 247. Moreover, Dr. Hoch opined that it was “a source of tremendous concern” (for L.G.'s safety) that L.G. was prescribed this combination of a high-dose opioid and benzodiazepine after Respondent informed the physician that he drinks

alcohol (and Respondent again did not discuss the risks with L.G.). Tr. 255.

Dr. Hoch, as discussed above, explained that in Florida, “it is a very big responsibility for prescribing physicians to be concerned about diversion.” Tr. 224; *see supra* II(E). Accordingly, when L.G. informed Respondent that he was selling these “potentially deadly medications” that was “a huge issue for the community at large.” Tr. 256. Dr. Hoch opined that Respondent failed to follow the “state's recommendation of being always cautious about diversion of the medications . . .” and that she should not have written another prescription for L.G. following his admission of diversion. Tr. 256–57. I find that Respondent did not engage L.G. in any meaningful discussion about diversion. RD, at 76; GX 8; GX 9.

Further, Dr. Hoch testified that Respondent did not conduct a periodic review of her treatment of L.G.'s conditions before prescribing controlled substances to him and also did not document a periodic review in the medical record. Tr. 250.

In conclusion, I concur with the ALJ and find that, based on Dr. Hoch's testimony, the two prescriptions for controlled substances issued by Respondent to L.G. on February 3, 2017, were not issued for a legitimate medical purpose and were issued outside of the usual course of professional practice and beneath the standard of care in the State of Florida. RD, at 77; Tr. 248.

2. L.G.'s July 18, 2017 Visit

On July 18, 2017, L.G. visited Respondent in his capacity as a confidential source and pursuant to the instructions given to him by his DEA handler. Tr. 96–97. During the visit, L.G. wore a recording device that provided both audio and visual recordings of the office visit and he activated the device shortly before he went into Respondent's office. Tr. 97, 183. As is evident from the records, Respondent spent approximately seven minutes with L.G. GX 10 (Video Recording from July 18, Encounter). Much of that time was spent discussing travel to Cuba. GX 11 (Transcript of Recording from July 18, Encounter), at 8–12. At this visit, discussion between L.G. and Respondent regarding medical concerns was limited to L.G. stating that he had pain “like last time.” GX 11, at 6–7; RD, at 40. However, there was no further elaboration of L.G.'s pain intensity or even where it was located, and Respondent and L.G. did not discuss pain at the prior visit. *Id.* Respondent also pointed out that L.G. did not visit Respondent often, in fact, his last

appointment had been more than four months prior, and that he could have an appointment every month. GX 11, at 11. Respondent did not ask L.G. how he had managed his pain between

appointments without a prescription. *Id.* Respondent and L.G. had a more elaborate conversation discussing diversion at the July 18, 2017 visit. GX 11. The conversation began with Respondent admonishing L.G. for selling his pills. GX 11.

CS: Between you and me, [WHISPERING] remember last time I told you I was selling my script.

Germeil: Yes, I know.

CS: I had to sell it to get to Cuba, to help somebody in the family, which I did. And that's why I say, "Thank you!"

Germeil: Yeah, but you cannot sell that.

That's a controlled medication, uh, [Y]ou have to keep that for your pain. . . .

Germeil: Don't do that or I can't give you the medication—medication.

GX 11, at 2–3, 6. Following the admonition, Respondent stated that she was going to "send [L.G.] to have a drug test done." GX 11, at 7. But then, Respondent said that she would still give L.G. a prescription because she knew that L.G. was in pain and she knew that L.G. was joking when he said that he was selling his pills. GX 11, at 8.

Germeil: I know that you have pain so, that's the reason I'm gonna give them to you.

CS: Okay, thank you.

Germeil: Yeah, but I shouldn't [U/I]. Never tell a doctor that you, you sell your medication. I know you didn't sell them, okay?

CS: Okay.

Germeil: You just wanted to be—to be—[i]t's fashionable now, okay?

CS: Okay.

Germeil: It's fashionable that everybody sells their medications but uh . . . I know that you don't do that.

CS: [CHUCKLES] Okay, no

Germeil: Because you joke, right?

CS: Yeah. A joke. Big joke.

Id.

Respondent wrote L.G. prescriptions for controlled substances during the visit. GX 18 (Prescriptions Issued to L.G. on July 18). The parties stipulated that on July 18, 2017, Respondent prescribed L.G. one hundred and twenty dosage units of oxycodone HCL 30 mg. and sixty dosage units of alprazolam 2 mg. ALJX 11, at 2; Tr. 9.

L.G. testified that on July 18, 2017, Respondent did not conduct a physical exam—in fact, the video recording reveals that Respondent sat on one side of an office desk and L.G. sat across the desk from her. Tr. 108–09, GX 10. Again, L.G. testified that Respondent did not discuss any medical conditions L.G. had, did not discuss the side effects

of or adverse reactions to the medications she was prescribing to L.G., did not discuss other medications L.G. was on, did not discuss L.G.'s diet or exercise. Tr. 109. L.G. testified that the clinic employee who took his vitals on February 3, 2017, did not conduct a physical exam, ask any question about his medical conditions or ask about his pain. Tr. 107.

The "Plan" in the patient records for L.G.'s July 18, 2017, visit was identical to the plan for the February 3, 2017, visit. *Compare* RX 2, at 18 with RX 2, at 20. The "Plan" again documents that Respondent, among other things, explained the side effects of the medication, advised regarding adverse reactions, discussed lifestyle modifications to control weight and blood pressure, and that a "[d]etail[ed] explanation was provided about and against 'shopping' from physician to physicians [sic] and the harm (s) [sic] that can provoke." RX 2, at 18. According to the patient records, "[a]pproximately 60 min was spent in this encounter," and L.G.'s pain level was "9." *Id.*

Dr. Hoch opined that the two prescriptions issued by Respondent to L.G. on July 18, 2017 (namely one hundred and twenty dosage units of oxycodone HCL 30 mg. and sixty dosage units of alprazolam 2 mg.) were issued outside of the usual course of professional practice and beneath the applicable standard of care in the state of Florida. Tr. 259; GX 18. In support of his opinion, Dr. Hoch noted that there was no indication that a physical exam was conducted or that a medical history was taken. Tr. 261.

Dr. Hoch explained that the plan Respondent recorded for L.G.'s July 18, 2017 visit was similar to the plan for L.G.'s February 3, 2017, visit. Tr. 262. *Also compare*, RX 2, at 18, with RX 2, at 20. Accordingly, Dr. Hoch opined that the patient's record does not bear any resemblance to the actual visit and discussion between Respondent and L.G. Tr. 264. *Compare* RX 2, at 18, with GX 10 and GX 11. Again, Dr. Hoch explained that Respondent did not discuss side effects or adverse reactions with L.G., fall precautions or safety measures, or the dangers of shopping from physician-to-physician, but those conversations are recorded in the plan as if they had happened. Tr. 263–64.

Additionally, Dr. Hoch opined that there was nothing documented in the patient file to justify the oxycodone or alprazolam prescriptions here. Tr. 258–59, 263. As found above, this combination of controlled substances, namely "a very strong opioid with a very strong [b]enzodiazepine[,] . . . has

to be qualified quite extensively in the medical record to justify that both of them are being given at the same time." Tr. 258–59. Dr. Hoch explained that the justification was not present here. Tr. 259.

Regarding diversion, Dr. Hoch again opined that L.G. "was admitting to [Respondent] that he was diverting medications that were given to him, and regardless of that statement, he did, in fact, get the prescription[s]." Tr. 259. Accordingly, I agree with the ALJ's finding that Respondent did not engage L.G. in any meaningful discussion about diversion. RD, at 79; GX 10; GX 11.

Further, Dr. Hoch opined that the record for L.G. did not indicate that Respondent conducted a periodic review of her treatment of L.G.'s conditions. Tr. 262. Dr. Hoch explained that Respondent's Medical record for L.G.'s July 18, 2020 visit was not accurate, complete, or otherwise sufficient to meet the Florida standard of care. Tr. 262.

In conclusion, based on the credible and uncontroverted opinion of Dr. Hoch, I concur with the ALJ that the two prescriptions for controlled substances issued by Respondent to L.G. on February 3, 2017, were not issued for a legitimate medical purpose and were outside of the usual course of professional practice and beneath the applicable standard of care in the State of Florida. RD, at 80; Tr. 259.

3. L.G.'s August 30, 2017 Visit

On August 30, 2017, L.G. visited Respondent in his capacity as a confidential source and pursuant to the instructions given to him by his DEA handler. Tr. 96–97, 113. During the visit, L.G. wore a recording device that provided both audio and visual recordings of the office visit and he activated the device shortly before he went into Respondent's office. Tr. 97, 183. As is evident from the records, Respondent spent approximately seven minutes with L.G. GX 12 (Video Recording from August 30, Encounter); RD, at 45. The vast majority of that time was spent on small talk and discussing potential appointments for people L.G. knew. GX 13 (Transcript of Recording from August 30, Encounter).

At this visit, there was limited discussion between L.G. and Respondent regarding a new medical concern. RD, at 35; GX 12; GX 13.

CS: . . . Can you, really quick, check my knees right here, cause it's discomfort—Ouch, you saw, you heard?

Germeil: Let me see, let me see.

CS: It's still in discomfort. . . .

Germeil: Uh-huh. Yeah, you have arthritis, bones against bones . . . Listen, you have to put [STUTTERS] a, uh, support. . . .

CS: Yeah, cause it's always been in discomfort.

Germeil: Uh-huh. Maybe you had a, a trauma in this knee before? You, you hit—did you hit it—somewhere? . . .

CS: I mean, I think so. . . .

Germeil: You have arthritis, the worst arthritis . . . [Y]ou need to put a, a support, and then massage. Buy Bengay

GX 13, at 9–10. In response to the newly identified knee problem, L.G. testified that Respondent touched his knee; she “grabbed [his] knee [right on his kneecap] with her two fingers and her thumb, and for like no more than three seconds, and she said [he] had arthritis.” Tr. 143. L.G. further testified that Respondent did not conduct “a thorough physical exam.” Tr. at 115. See also RD, at 81; GX 12.

In addition to the limited discussion of his knee concern, L.G. stated during this appointment that he was no longer selling his pills. GX 13, at 4–5. Later in the visit, Respondent seemed to advise L.G. to “be careful with the medications.” GX 13, at 7. L.G. also explained to Respondent that the guys he was selling to would like to become Respondent’s patients and Respondent told him to check with the front desk. GX 13, at 4–5.

CS: Anyways—pss—[WHISPERING] I’m not selling no more. I’m taking my own stuff.

Germeil: Okay. . . .

CS: . . . I was gonna mention it to you, if I can, the guys that I was, whatever they need to see a doctor. I don’t know if you want new patients or you might need new patients, because they want to get the meds. . . . The [o]xycodone or whatever. . . .

Germeil: You can, you can, you can ask [at the front desk] if they have any, any, uh—any, any spot . . . [f]or new patients.

CS: Yeah, they guys, okay the guys I was selling to, but they are good people, they’re reliable people. They won’t even miss their appointments or nothing. They are good people. . . .

Id.

Respondent wrote L.G. prescriptions for controlled substances during the visit (prior to touching L.G.’s knee). GX 19 (Prescriptions Issued to L.G. on August 30); GX 12. The parties stipulated that on August 30, 2017, Respondent prescribed L.G. one hundred and twenty dosage units of oxycodone HCL 30 mg. and sixty dosage units of alprazolam 2 mg. ALJX 11, at 2; Tr. 9.

Prior to issuing the prescriptions on August 30, 2017, there was no discussion of the amount of L.G.’s pain. GX 12. After receiving the prescriptions, L.G. mentioned that he had

“discomfort” in his right knee, which Respondent quickly looked at and claimed was the result of arthritis. GX 13, at 9; Tr. 115; RD, at 45. L.G. testified that Respondent did not conduct a thorough physical exam. Tr. 115. For most of the appointment, Respondent sat on one side of an office desk and L.G. sat across the desk from her. GX 13; RD, at 81. Respondent also did not discuss any medical conditions L.G. had, did not discuss the side effects of or adverse reactions to the medications she was prescribing to L.G., did not discuss other medications L.G. was on, did not discuss L.G.’s diet or exercise. Tr. 115–16. L.G. testified that the person who took his vitals on August 30, 2017, did not conduct a physical exam, ask any question about his medical conditions or ask about his pain. Tr. 113–14.

The “Plan” in Respondent’s records on L.G. for the August 30, 2017, visit, was identical to the plans for L.G.’s July 18, 2017, and February 3, 2017, visits; and was nearly identical to the plan sections purporting to capture Y.H.’s three visits at issue in the case. *Compare* RX 2, at 16, *with* RX 2, at 18 and 20, and RX 1, at 19, 20, and 22. Once again, the “Plan” stated that Respondent, among other things, explained the side effects of the medication, advised lifestyle modifications to control weight and blood pressure, and that a “[d]etail[ed] explanation was provided about and against ‘shopping’ from physician to physicians [sic] and the harm (s) [sic] that can provoke.” RX 2, at 16. According to the patient records, “[a]pproximately 60 min was spent in this encounter,” and L.G.’s pain level was “9.” *Id.*

Dr. Hoch opined that the two prescriptions issued by Respondent to L.G. on August 30, 2017, (namely one hundred and twenty dosage units of oxycodone HCL 30 mg. and sixty dosage units of alprazolam 2 mg.) were issued outside of the usual course of professional practice and beneath the applicable standard of care in the state of Florida. Tr. 270–71; GX 19. In support of his opinion, Dr. Hoch explained that the plan differs from the actual visit and discussion between Respondent and L.G. Tr. 267–69. *Compare* RX 2, at 16, *with* GX 12 and GX 13. Dr. Hoch explained that Respondent did not discuss side effects or adverse reactions with L.G., fall precautions, or the harms that occur by shopping from physician to physician, but those conversations are recorded in the plan. Tr. 268–69. Dr. Hoch explained that the plan Respondent recorded for L.G.’s August 30, 2017 visit

was “identical” to the plan for L.G.’s July 18, 2017, and February 3, 2017, visits. Tr. 267–68. *Compare* RX 2, at 16, *with* RX 2, at 18 and 20.

Additionally, Dr. Hoch’s expert opinion was that the patient file was insufficient to justify the oxycodone or alprazolam prescriptions here. Tr. 267. He also explained that the record was not complete and accurate. Tr. 269. As found above, per Dr. Hoch, this combination of controlled substances is a particular concern due to the risk of respiratory depression, and Respondent did not discuss those risks with L.G. during this visit as was required. Tr. 247, 265–66.

Regarding diversion, Dr. Hoch pointed out that once again at this visit, L.G. informed Respondent that he had been selling his medication. Tr. 266. Dr. Hoch noted that Respondent did inform L.G. that he needed to be careful with the medications, but opined that the statement was not sufficient to warn L.G. of the dangers of diversion. Tr. 270.

Further, Dr. Hoch opined that Respondent did not conduct a periodic review of her treatment of L.G.’s conditions before prescribing controlled substances to him (let alone document it in the medical record). Tr. 269. He also opined that there was no indication in the record that Respondent gave a physical exam²⁸ or took a full and complete medical history. Tr. 269.

In conclusion, and based on the credible and uncontroverted testimony of Dr. Hoch, I concur with the ALJ that the two prescriptions for controlled substances prescriptions issued by Respondent to L.G. on August 30, 2017, were not issued for a legitimate medical purpose and were outside the usual course of professional practice and beneath the applicable standard of care in the State of Florida. RD, at 83; Tr. 270–71. In summary, I find that the six controlled substance prescriptions Respondent issued to L.G., on February 3, 2017, July 18, 2017, and August 30, 2017, were issued outside of the usual course of professional practice and beneath the applicable standard of care in the State of Florida.

²⁸ Dr. Hoch testified that merely touching a knee is insufficient for a doctor to determine that a patient has arthritis. Tr. 330. To adequately conduct a physical examination regarding knee pain, a physician would “have to do flexion extension exercises . . . palpate or examine the knee, press it and try to find particular locations and then if you[re] very concerned . . . [t]his is where x-rays and perhaps MRIs do come into play.” Tr. 329. Thus, I agree with the ALJ’s finding that Respondent’s touching of L.G.’s right knee on August 30, 2017, did not constitute a sufficient physical examination. RD, at 81.

I. Allegation of Recordkeeping Violations and Other State Law Violations

The medical records at issue in this case cover the six different encounters²⁹ discussed in detail above: Y.H.'s encounters with Respondent on September 8, 2016, October 12, 2016, and January 25, 2017; and L.G.'s encounters with Respondent on February 3, 2017, July 18, 2017, and August 30, 2017. *See* OSC; *supra* II. According to Dr. Hoch's credible and uncontroverted testimony, the records Respondent maintained for Y.H. and L.G. do not document a complete medical history, a physical examination, or a periodic review as required by state law. RD, at 50; Tr. 324, 338–39; RX 1; RX 2. Based on Dr. Hoch's testimony and the record as a whole, I find that the medical records for each of the six encounters are insufficient, inaccurate, and incomplete.

Consistent with the findings of the ALJ and based on the uncontroverted and credible testimony of Dr. Hoch, I find that the "Plan" sections of the patient records for each of the six encounters at issue in this case are identical (with the exception of Y.H.'s January 25, 2017, plan which contains one additional line regarding the need for a drug test). *Compare* RX 1, at 19, 20, 22; and RX 2, at 16, 18, 20; *see also* Tr. 234, 236, 241, 250, 262, 267–68. All six of the patient records document that Respondent, among other things, explained the side effects of the medication, advised regarding adverse reactions, discussed lifestyle modifications to control weight and blood pressure, discussed safety precautions, and that a "[d]etail[ed]" explanation was provided about and against 'shopping' from physician to physicians [sic] and the harm (s) [sic] that can provoke." RX 1, at 19, 20, 22; and RX 2, at 16, 18, 20. In contrast to the patient records, I have found that Respondent did not discuss the side effects of the medication, adverse reactions, lifestyle modifications to control weight and blood pressure, safety precautions, or shopping from physician to physician during any of the six encounters at issue. *See supra* and GX 3, GX 5, GX 7, GX 9, GX 11, and GX 13. My finding is consistent with Dr. Hoch's testimony that the plan section of the patient records does not bear any resemblance to the actual visits and discussions between Respondent and the confidential sources. *See* Tr. 218,

241–42, 251–54, 263–64, 268–69. I agree with the ALJ's finding that "merely by comparing the recordings made by both Y.H. and L.G. when they met with [Respondent] with her treatment notes, it is readily obvious that the records [Respondent] prepared do not accurately report what happened during those encounters." RD, at 91.

Not only are the plans inaccurate, but even if they were accurate, Dr. Hoch opined that none of the plans explain what the objectives are that the Respondent was planning to use to determine the success of her treatment. Tr. 353. *See also* 230, 246. This is because, as Dr. Hoch characterized it, there was a "generic rehashing of the same plan visit after visit" and the plans fail to identify what Respondent was "doing for [any] particular problem." Tr. 235.

I have found above that the patient records for each of the six encounters at issue reflect that "[a]pproximately 60 min was spent in [each] encounter." RX 1, at 19, 20, 22; and RX 2, at 16, 18, 20. In contrast to the patient records, I have found that the lengthiest encounter at issue in this matter was only approximately ten minutes, and that most of the encounters were around seven to seven-and-a-half minutes long. GX 2, GX 4, GX 6, GX 8, GX 10, and GX 12.

I have found above, based on the record as a whole and Dr. Hoch's testimony, that Respondent did not conduct a physical exam during any of the six encounters and that none of Respondent's medical records reflect that a physical exam was conducted at any of the six encounters at issue. GX 2, GX 4, GX 6, GX 8, GX 10, and GX 12; RX 1, at 19, 20, 22; and RX 2, at 16, 18, 20; Tr. 48–49, 54, 103, 109, 115, 230, 232, 242, 246, 269, 324, 339. Additionally, I find, consistent with Dr. Hoch's testimony, that none of the medical records at issue in this matter reflect a complete medical history. Tr. 324. Additionally, I find, consistent with Dr. Hoch's testimony, that there was no periodic review conducted at any of the six encounters at issue here. Tr. 230, 242, 246, 250, 262, 269. Therefore, I agree with the ALJ and find substantial evidence that Respondent issued a total of twelve prescriptions to two different CSs without maintaining sufficient, accurate or complete records.

To summarize my findings above, I agree with the ALJ and find substantial evidence that Respondent issued these twelve prescriptions for controlled substances outside of the usual course of professional practice and beneath the standard of care in the State of Florida in violation of federal and state law.

III. Discussion

A. Allegation That Respondent's Registration is Inconsistent With the Public Interest

Under Section 304 of the CSA, "[a] registration . . . to . . . dispense a controlled substance . . . may be suspended or revoked by the Attorney General upon a finding that the registrant . . . has committed such acts as would render his registration under section 823 of this title inconsistent with the public interest as determined by such section." 21 U.S.C. 824(a)(4). In the case of a "practitioner," defined in 21 U.S.C. 802(21) to include a "physician," Congress directed the Attorney General to consider the following factors in making the public interest determination:

- (1) The recommendation of the appropriate State licensing board or professional disciplinary authority.
- (2) The applicant's experience in dispensing . . . controlled substances.
- (3) The applicant's conviction record under Federal or State laws relating to the . . . distribution[] or dispensing of controlled substances.
- (4) Compliance with applicable State, Federal, or local laws relating to controlled substances.
- (5) Such other conduct which may threaten the public health and safety.

21 U.S.C. 823(f). These factors are considered in the disjunctive. *Robert A. Leslie, M.D.*, 68 F R 15,227, 15,230 (2003).

According to Agency decisions, I "may rely on any one or a combination of factors and may give each factor the weight [I] deem[] appropriate in determining whether" to revoke a registration. *Id.*; *see also Jones Total Health Care Pharmacy, LLC v. Drug Enf't Admin.*, 881 F.3d 823, 830 (11th Cir. 2018) (citing *Akhtar-Zaidi v. Drug Enf't Admin.*, 841 F.3d 707, 711 (6th Cir. 2016); *MacKay v. Drug Enf't Admin.*, 664 F.3d 808, 816 (10th Cir. 2011); *Volkman v. U. S. Drug Enf't Admin.*, 567 F.3d 215, 222 (6th Cir. 2009); *Hoxie v. Drug Enf't Admin.*, 419 F.3d 477, 482 (6th Cir. 2005). Moreover, while I am required to consider each of the factors, I "need not make explicit findings as to each one." *MacKay*, 664 F.3d at 816 (quoting *Volkman*, 567 F.3d at 222); *see also Hoxie*, 419 F.3d at 482. "In short, . . . the Agency is not required to mechanically count up the factors and determine how many favor the Government and how many favor the registrant. Rather, it is an inquiry which focuses on protecting the public interest; what matters is the seriousness of the registrant's misconduct." *Jayam Krishna-Iyer, M.D.*, 74 FR 459, 462

²⁹ Dr. Hoch explains that the word "encounter" refers to the direct encounter for the physician with the patient," and does not include time the patient spent with a medical assistant. Tr. 303.

(2009). Accordingly, as the Tenth Circuit has recognized, findings under a single factor can support the revocation of a registration. *MacKay*, 664 F.3d at 821.

Under DEA's regulation, "[a]t any hearing for the revocation . . . of a registration, the . . . [Government] shall have the burden of proving that the requirements for such revocation . . . pursuant to . . . 21 U.S.C. [§] 824(a) . . . are satisfied." 21 CFR 1301.44(e). In this matter, while I have considered all of the factors, the relevant evidence is confined to Factors One, Two and Four. I find that the evidence satisfies the Government's *prima facie* burden of showing that Respondent's continued registration would be "inconsistent with the public interest." 21 U.S.C. 824(a)(4). I further find that Respondent failed to produce sufficient evidence to rebut the Government's *prima facie* case.

1. Factors One and Three: The Recommendation of the Appropriate State Licensing Board or Professional Disciplinary Authority and Respondent's Conviction Record Under Federal or State Laws Relating to Controlled Substances

Respondent suggests that Factor One weighs in her favor because the parties stipulated and the ALJ found that Respondent holds a valid state medical license in Florida. ALJX 28 (Respondent's Posthearing Brief), at 11; ALJX 11, at 1; RD, at 59.

In determining the public interest, the "recommendation of the appropriate State licensing board or professional disciplinary authority . . . shall be considered." 21 U.S.C. 823(f)(1). Two forms of recommendations appear in Agency decisions: (1) A recommendation to DEA directly from a state licensing board or professional disciplinary authority (hereinafter, appropriate state entity), which explicitly addresses the granting or retention of a DEA COR; and (2) the appropriate state entity's action regarding the licensure under its jurisdiction on the same matter that is the basis for the DEA OSC. *John O. Dimowo, M.D.*, 85 FR 15,800, 15,810 (2020); see also *Vincent J. Scolaro, D.O.*, 67 FR 42,060, 42,065 (2002).

In this case, neither the State Board nor any other state entity has made a direct recommendation to the Agency regarding whether the Respondent's registration should be suspended or revoked; however, as previously discussed, the State Board issued an Order incorporating a Settlement Agreement reached following an Administrative Complaint filed by the State of Florida Department of Health

against Respondent based on Respondent's treatment of one patient, M.N., between July 2013 and August 2015. RX 11, at 19. The Florida allegations regarding Respondent's treatment of M.N. are similar³⁰ to the facts I found above regarding Respondent's treatment of Y.H. and L.G. between 2016 and 2017; however, they clearly do not constitute the same matter as the facts alleged in the OSC (they involved an entirely different patient during a preceding timeframe). See *supra* II(F).

I have much more evidence of misconduct before me than the State Board had at the time that it made its decision. Further, the fact that the State Board did not choose to revoke Respondent's state medical registration carries minimal to no weight under Factor One, because there is no evidence that the State Board would have made the same decision in the face of the egregious conduct found herein involving two further patients, who were openly diverting their prescriptions, *after* the State Board had already disciplined Respondent for similar behavior.³¹ Accordingly, the terms of the State Board Order have been considered, but I find that they have no impact on the public interest inquiry in this case. See *John O. Dimowo, M.D.*, 85 FR at 15,810.

As to Factor Three, the parties stipulated that Respondent has never been convicted of violating any federal or state law relating to the manufacture, distribution, or dispensing of controlled substances. ALJX 19; Tr. 11. See also 21 U.S.C. 823(f)(3). However, as Agency cases have noted, there are a number of

³⁰ Respondent's Posthearing Brief states: "In January 2017, a complaint was filed against Dr. Germeil before the Florida Board of Medicine for allegations similar to the instant case." ALJX 28, at 15. Additionally Respondent's counsel stated in her oral closing arguments, "the allegations, as you'll see, are similar in prescribing medication for not a legitimate purpose and for medical records." Tr. 489–90.

³¹ In *Dimowo*, the Acting Administrator found that "[a]lthough statutory analysis [of the CSA] may not definitively settle . . . [the breadth of the cognizable state 'recommendation' referenced in Factor One], the most impartial and reasonable course of action is to continue to take into consideration all actions indicating a recommendation from an appropriate state;" however, *Dimowo* also limited the "recommendations" DEA would consider to the "actions of an appropriate state entity on the same matters, particularly where it rendered an opinion regarding the practitioner's medical practice in the state due to the same facts alleged in the DEA OSC." *John O. Dimowo*, 85 FR at 15,810. Although the same "matters" may include the same types of violations, in this case, I have no indication that the Board would have made a similar decision in the face of these additional egregious violations and continued misconduct. In fact, Respondent specifically agreed in the settlement not to commit further violations of law. RX 11, at 12.

reasons why a person who has engaged in criminal misconduct may never have been convicted of an offense under this factor, let alone prosecuted for one. *Dewey C. MacKay, M.D.*, 75 FR 49,956, 49,973 (2010). Agency cases have therefore held that "the absence of such a conviction is of considerably less consequence in the public interest inquiry" and is therefore not dispositive. *Id.*

2. Factors Two and Four—the Respondent's Experience in Dispensing Controlled Substances and Compliance With Applicable Laws Related to Controlled Substances

Respondent asks that I consider evidence of her positive dispensing experience. ALJX 28, at 12. In evaluating Respondent's dispensing experience, I note that Respondent has significant experience as a licensed physician in Florida since October 2007, and running her own medical practice since 2011. RX 5, at 1. Respondent claimed, without providing any evidence to support the claim, that she has treated "thousands of patients for pain medicine, and there have been no reported overdoses or deaths during that period of time." ³² Tr. 19. The Agency assumes that all of the prescriptions Respondent issued were issued lawfully, except for those prescriptions that the Government alleged and established were issued unlawfully. See *Wesley Pope, M.D.*, 82 FR 14,944, 14,982–84 (2017). Respondent also claimed, and included 38 unique letters to patients as evidence, that she has discharged patients who refused urine testing. RX 8. However, Respondent's evidence shows that both Y.H. and L.G. were ordered to take urine drug tests, did not take those urine drug tests, and did not receive discharge letters (although they were not seen again). RX 1, at 13, 18; RX 3; RX 8; Tr. 405–06, 409–10, 413. Furthermore, even without the urine drug tests, Respondent knew that Y.H. and L.G. were not taking their medication as prescribed because they directly told her that they were diverting the controlled substances.

Respondent's handling of the two confidential sources as found herein demonstrates that her prescribing practices fell short of the applicable standard of care for twelve

³² I decline to consider that "no reported overdoses or deaths" is an indicator of positive dispensing experience and there is no legal authority for the proposition that I must find death or an overdose before I may suspend or revoke a registration. Agency decisions have found that "diversion occurs whenever controlled substances leave 'the closed system of distribution established by the CSA . . .'" *Roy S. Schwartz*, 79 FR 34,360, 34,363 (2014)).

prescriptions. As I discuss further below, Respondent failed to address patient admissions of diversion, failed to conduct physical exams, failed to discuss the risks of controlled substances, and falsified medical records.

Factor four is demonstrated by evidence that a registrant has not complied with laws related to controlled substances, including violations of the CSA, DEA regulations, or other state or local laws regulating the prescribing of controlled substances.

(a) Allegation that Respondent Issued Prescriptions for Controlled Substances Outside the Usual Course of the Professional Practice

According to the CSA's implementing regulations, a lawful prescription for controlled substances is one that is "issued for a legitimate medical purpose by an individual practitioner acting in the usual course of his professional practice." 21 CFR 1306.04(a). The Supreme Court has stated, in the context of the CSA's requirement that schedule II controlled substances may be dispensed only by written prescription, that "the prescription requirement . . . ensures patients use controlled substances under the supervision of a doctor so as to prevent addiction and recreational abuse . . . [and] also bars doctors from peddling to patients who crave the drugs for those prohibited uses." *Gonzales v. Oregon*, 546 U.S. 243, 274 (2006).

As I have found, in agreement with the RD and based on the credible expert testimony of Dr. Hoch, Florida regulations require that a doctor: Take a complete medical history and conduct a physical examination³³ before issuing a prescription for a controlled substance; develop a written treatment plan; discuss the risks and benefits of controlled substances with a patient; and maintain complete and accurate records with respect to a patient. RD, at 9; Tr. 205–06, 338. Additionally, a physician is required to conduct a periodic review of the course of treatment provided to a patient. RD, at 50; Tr. 337–38.

³³ The Florida Code does not define what constitutes a physical exam and does not necessarily require that a physician conduct a physical examination of a patient each time the patient presents for an appointment. RD, at 50; Tr. 289. However, Dr. Hoch opined that the standard of care requires a physician to perform a physical examination in certain circumstances including when the patient requests a higher dose of controlled substances, presents with new symptoms or complaints, has a new diagnosis, or hasn't been seen for a period of months. See Tr. 290, 341–42, 345–46.

Based on the credible and uncontroverted testimony of Dr. Hoch, and in agreement with the RD, I find that Respondent issued a total of twelve prescriptions outside of the usual course of professional practice and beneath the applicable standard of care in the State of Florida in violation of 21 CFR 1306.04(a). RD, at 92.

i. Failure To Address Patients' Admissions of Diversion

The Florida Code provides that "[p]hysicians should be diligent in preventing the diversion of drugs for illegitimate purposes." Fla. Admin. Code r. 64B8–9.013(1)(d) (West 2020). Dr. Hoch explained that when a patient tells a doctor that he or she is diverting his or her controlled substances that statement "is a very big red flag that has to be addressed at that moment." Tr. 224–25; RD, at 51. In fact, Dr. Hoch stated that if a patient tells a doctor that he or she is selling or giving away controlled substances, "that's sort of a deal breaker" Tr. 351. In other words, as I found above the standard of care in Florida requires that a physician stop writing prescriptions for a patient following statements from the patient that are consistent with diversion. See *supra*, II(E).

I have found above that each of the CIs admitted to having engaged in diversion at each of the six encounters at issue in this matter. Y.H. clearly admitted to Respondent that she had been selling at least some of her pills to her brother on September 8, 2016, October 12, 2016, and January 25, 2017. GX 3, at 17, 19; GX 5, 13 12–13; GX 7, at 4, 6, 9–11. Yet, as I have found, Respondent did not advise Y.H. not to sell her controlled substances or otherwise engage in any meaningful conversation about diversion with Y.H. See RD, at 68, 71, 73. In fact, on October 12, 2016, Respondent clearly acknowledged Y.H.'s admission of diversion and seems to have even condoned the conduct. See *supra*, II(G)(2); GX 5, at 12–13. And on January 25, 2017, Respondent replied to Y.H.'s admission of selling pills by reassuring Y.H. that she was a good person. GX 7, at 9–11. The only counseling Respondent did with Y.H. regarding diversion was to warn Y.H. not to tell anyone that Respondent was helping her out because Respondent "d[idn't] want to . . . get into trouble." *Id.* at 11.

L.G. also clearly admitted to Respondent that he had been selling at least some of his pills to people on February 3, 2017, July 18, 2017, and August 30, 2017. GX 9, at 7–8, 11–13; GX 11, at 2–3, 6; GX 13, at 4–5. Yet, as I have found above, Respondent did not

engage in any meaningful conversation about diversion with L.G. either. See *supra*, II(H); RD, at 76, 79. Respondent did discuss diversion in greater detail with L.G. than she did with Y.H., and Respondent did provide warnings to L.G. at each of the three encounters including: That he needed to "try to keep [his medication] for himself," GX 9, at 12; that "[he] cannot sell [the scripts because] [t]hat's a controlled medication," GX 11, at 3; and that he should "be careful with the medications." GX 13, at 7. However, Respondent issued prescriptions to L.G. immediately following these warnings, which renders her comments perfunctory. See RD, at 80.

Dr. Hoch opined that each of the twelve prescriptions at issue in this case were issued without a legitimate medical purpose because diversion was not appropriately addressed at any of the six visits in this case.³⁴ See Tr. 224, 231, 243–44, 256–57, 259, 270. Indeed, the confidential sources admitted to having engaged in diversion during each of the six visits and the parties have stipulated that prescriptions were issued during each of the six visits.

For all of these reasons, I find that Respondent violated federal law and Florida Administrative Code § 64B8–9.013(1)(d) by prescribing controlled substances to Y.H. and L.G. in spite of their admitting to engaging in diversion immediately prior to the issuance of the prescriptions.

ii. Failure To Conduct Physical Examinations

As I found above based on Dr. Hoch's testimony, the State of Florida requires that, when prescribing controlled

³⁴ The ALJ found that diversion was not properly addressed at only five of the encounters. We both found that the prescriptions issued by Respondent to L.G. were not issued for a legitimate medical purpose on August 30, 2017; however, the ALJ found that Respondent did not have any obligation during this visit to address L.G.'s diversion, because L.G. stated that he was no longer selling pills and that the people he was selling pills to wanted to become patients. RD, at 81–82. I agree that L.G.'s statements indicate that he did not plan to engage in diversion in the future, however L.G. did still admit that he had engaged in diversion of Respondent's prescriptions in the past. Dr. Hoch seemed to be fully aware that L.G. was admitting to past diversion (stating, "[t]he CS or patient informs the doctor that he was selling the medication" Tr. 266 (*emphasis added*)), when he opined that Respondent's discussion of the dangers of diversion at the August 30, 2017, encounter were insufficient and that the prescriptions that followed were not issued in the usual course of professional practice. Tr. 270. I see no reason to stray from Dr. Hoch's credible and uncontroverted opinion. Further, the fact that the former customers of L.G. who previously obtained controlled substances unlawfully might visit Respondent to obtain controlled substances directly from Respondent hardly seems to address the diversion issue.

substances for pain, a “physical examination must be conducted and documented in the medical record.” Fla. Admin. Code r. 64B8–9.013(3)(a) (West 2020); *supra*, II(E). According to Dr. Hoch, the Florida Code does not define what constitutes an initial physical exam and does not necessarily require that a physician conduct a physical examination of a patient each time the patient presents for an appointment. RD, at 50; Tr. 289. However, Dr. Hoch opined that the standard of care requires a physician to perform a follow up physical examination in certain circumstances including when the patient requests a higher dose of controlled substances, presents with new symptoms or complaints, has a new diagnosis, or has not been seen for a period of months. *See* Tr. 290, 341–42, 345–46.

I found above that Respondent did not conduct a physical exam during any of the confidential sources’ six visits.³⁵ *See supra*, II(I); Tr. 230, 232, 242, 246, 269, 324, 339. Not only did the confidential sources credibly testify that no physical examination was conducted during their respective encounters, *see* Tr. 48–49, 54, 59, 104, 109, 115, but Dr. Hoch’s uncontroverted testimony was that there was no indication in the record (including the video evidence) that Respondent performed a physical exam during the six visits. Tr. 227, 230, 242, 249, 261, 269, 338–39. I find that Respondent’s failure to perform a physical exam during any of the six visits in this matter violates the standard of care.

The record in the evidence establishes that Respondent never performed a physical examination on Y.H.³⁶ RD, at 22; Tr. 92. Additionally, Dr. Hoch opined that, even if an initial physical examination had been performed, Respondent would have been required to give a new physical examination to Y.H. on September 8, 2016, to justify the 40% increase in oxycodone HCL 30 mg. that Respondent prescribed. RD, at 25; Tr. 339–342.

Similarly, there is no indication in the record that Respondent ever performed a physical examination of L.G.³⁷ RD, at 79; RX 2, at 16, 18, 20–22. Additionally, Dr. Hoch opined that, even if an initial

physical examination had been performed, Respondent would have been required to give a new physical examination to L.G. on February 3, 2017, because of the new diagnosis of chronic back pain on that date. Tr. 345–46. Per Dr. Hoch a new physical examination would also have been required on both February 3, 2017, and July 18, 2017, because it had been over five months between Respondent’s prescriptions to L.G. for controlled substances for pain and the delay in treatment gives rise to the question of whether L.G. had such severe pain that he needed the controlled substances to relieve his pain. RD, at 37, 43, 76, 79; Tr. 345–48.

For all these reasons, I find that Respondent violated Florida Administrative Code § 64B8–9.013 and issued prescriptions outside the usual course of professional practice and beneath the applicable standard of care by prescribing controlled substances for pain without conducting a physical exam.

iii. Failure To Discuss Risk of Controlled Substances With Patients

In accordance with Dr. Hoch’s opinion, I found above that the State of Florida requires that a doctor discuss the risks and benefits of controlled substances with a patient. *See supra*, II(E); RD, at 9; Tr. 205–06; Fla. Admin. Code r. 64B8–9.013(3)(c) (West 2020). Here Respondent prescribed each confidential source both oxycodone 30 mg., which Dr. Hoch stated is a very strong dose, and alprazolam 2 mg., which Dr. Hoch stated is a very strong dose, during each of the six encounters at issue in this case (for a total of twelve prescriptions). RX 1, at 16; RX 2, at 14; Tr. 219, 222.

Dr. Hoch explained that the oxycodone prescription alone can cause a number of side effects that Respondent did not discuss with Y.H. Tr. 220–221. Some of the less disabling side effects of opioid use include pruritus or itching, urinary retention, nausea and vomiting, and constipation. Tr. 220–221. Dr. Hoch explained that “the most devastating complication or side effect of an opioid [like oxycodone] is respiratory depression, and that’s what kills people.” Tr. 221–222. Dr. Hoch explained that the risk is particularly high where, as here, the opioid is prescribed with a drug like alprazolam. Tr. 222.

In light of the medications prescribed, Dr. Hoch opined that Respondent was required to warn of the risk of side effects including respiratory depression and instruct the patient to make sure there was at least a three-to-four hour

gap between administering the two different medications. *Id.* Based on Dr. Hoch’s credible and uncontroverted opinion, I find that there was no discussion of the risks of using these controlled substances (much less the risk of respiratory depression that can occur when using them together) at any of the six encounters. Tr. 222, 230, 232, 237–38, 241, 247, 251, 258–59, 263, and 268.

Another example of Respondent’s failure to discuss the risks of using controlled substances occurred when L.G. informed Respondent he drinks alcohol. Tr. 255. According to Dr. Hoch, when a physician learns that a patient could be drinking while being prescribed a high dose opioid and benzodiazepine, the patient “should be warned very strongly” that the medications and alcohol should not be taken together. Tr. 255. According to Dr. Hoch, “[w]hen [patients] tell you that they’re drinking, that’s a huge issue for their safety.” Tr. 256. Dr. Hoch opined that on February 3, 2017, L.G. informed Respondent that he drinks alcohol, Respondent was required to warn L.G. of the risks of taking the prescribed controlled substances with alcohol, and Respondent failed to issue the required warning. Tr. 255–56.

For all these reasons, I find that Respondent violated Florida Administrative Code § 64B8–9.013 and issued prescriptions outside of the usual course of professional practice and beneath the applicable standard of care by failing to discuss the risks of using the prescribed controlled substances with Y.H. and L.G.

In light of the above, the ALJ found, and I agree, that Respondent issued a total of twelve prescriptions outside of the usual course of professional practice and beneath the applicable standard of care in the State of Florida. RD, at 92.

iv. Recordkeeping Violations

Florida Administrative Code, Rule 64B8–9.013 lays out a physician’s responsibilities when prescribing controlled substances for pain management.³⁸ *See supra*, II(E); RD, at 9; Tr. 203–05. With regard to medical records, the Florida Administrative Code provides that a physician is required to “keep accurate and complete

³⁵ In fact, the “objective” section of each and every one of the patient records Respondent introduced into evidence was empty. *See* RX 1, and RX 2. Dr. Hoch testified that the “objective” section is where a doctor should identify her objective findings based on a physical examination. RD, at 51; Tr. 212. Based on the records and Dr. Hoch’s testimony, it is fair to conclude that Respondent never conducted a physical exam of either confidential source.

³⁶ *See supra* n.19.

³⁷ *See supra* n.27.

³⁸ Admin. Code r. 64B8–9.013 provides guidelines that are authoritative on physicians in Florida; however, “[t]he Board will not take disciplinary action against a physician for failing to adhere strictly to the provisions of these standards, if good cause is shown for such deviation.” Fla. Admin. Code r. 64B8–9.013(1)(f) (West 2020); *see also* RD, at 9; Tr. 272, 280–81.

medical records” to include, but not be limited to:

- “The complete medical history and a physical examination, including history of drug abuse or dependence as appropriate.” Fla. Admin. Code r. 64B8–9.013(3)(f)(1) (West 2020).
- “Treatment objectives.” Fla. Admin. Code r. 64B8–9.013(3)(f)(4) (West 2020).
- “[D]iscussion of risks and benefits.” Fla. Admin. Code r. 64B8–9.013(3)(f)(5) (West 2020).
- “Periodic reviews. Records must remain current, maintained in an accessible manner, readily available for review, and must be in full compliance with Rule 64B8–9.003” Fla. Admin. Code r. 64B8–9.013(3)(f)(10) (West 2020).

Fla. Admin. Code r. 64B8–9.013(3)(f) (West 2020) (*emphasis added*).

Additionally, a physician’s “medical record shall contain sufficient information to identify the patient, support the diagnosis, justify the treatment and document the course and results of treatment accurately, by including, at a minimum, patient histories; examination results; test results; records of drugs prescribed” Fla. Admin. Code r. 64B8–9.003(3) (West 2020) (*emphasis added*). Similarly, the Florida Statute provides that the “following acts constitute grounds for denial of a license or disciplinary action . . . : Failing to keep legible . . . medical records . . . that justify the course of treatment of the patient, including, but not limited to, patient histories; examination results; test results; records of drugs prescribed, dispensed, or administered; and reports of consultations and hospitalizations.” Fla. Stat. Ann. § 458.331(1)(m) (West 2020).

Dr. Hoch testified that the “plan” portion of Respondent’s records was where Respondent should have provided “a justification as to why [she] was doing what [she was] doing” with regards to her treatment of a patient. Tr. 212. Dr. Hoch further opined that the “plans” contained in Respondent’s medical records concerning L.G. and Y.H. are not plans in so far as they did not contain any objective standards by which treatment success could be measured. Tr. 335–36, 353. In light of Dr. Hoch’s testimony, I find that the Respondent’s records were insufficient to meet the requirements set by the State of Florida. Dr. Hoch also testified that the plans do not bear any resemblance to the recorded corresponding visits they were meant to document. Tr. 218. In fact, the ALJ found, and I agree, that merely by comparing the recordings made by both Y.H. and L.G. when they met with Respondent with the treatment notes, it is readily obvious that the

records that Respondent prepared do not accurately report what happened during these encounters. RD, at 91. I therefore find that Respondent did not maintain the records required by the State of Florida. In fact, Respondent admitted as much in her Posthearing Brief, stating “that her medical records for Y.H. and L.G. were not complete and accurate.” ALJX 28, at 15. Therefore, I find, consistent with the ALJ and Dr. Hoch’s testimony, that in failing to keep sufficient and accurate records as required by the State of Florida, Respondent violated Florida Administrative Code § 64B8–9.013 and 9.003.

The Government further alleged that Respondent violated the state law by “falsify[ing] numerous patient records in order to conceal [her] illegal prescribing.” OSC, at 2. More specifically, the OSC alleged that Respondent falsified her records by documenting that 60 minutes was spent on each encounter when none of the encounters exceeded 15 minutes and by documenting that she discussed side effects, adverse reactions, safety precautions and the risks of physician shopping, when “those issues were never discussed.” OSC, at 9; *see also* RD, at 83.

To support the allegation that Respondent’s recordkeeping was fraudulent, the Government points to the Administrative Complaint filed against Respondent by the State of Florida. ALJX 27 (Gov Posthearing Brief), at 29. The Government states that, regardless of the merits of the allegations contained in the Administrative Complaint, it clearly put Respondent on notice “no later than January 2017 that the standard of care required her to discontinue prescribing controlled substances to patients engaged in diversion and required her to properly maintain medical records.” ALJX 27 (Gov Posthearing), at 30. Despite this notice, Respondent continued to issue prescriptions for controlled substances to Y.H. and L.G., without maintaining proper records in violation of the relevant standard of care and Florida law.

The ALJ found, and I agree, that not only do Respondent’s medical records for Y.H. and L.G. fail to contain the minimum information required under Florida law, they also clearly report events that did not occur during the medical appointments. RD, at 91. DEA has recognized that the falsification of medical records creates a “fair inference” that a prescriber is issuing prescriptions “outside the usual course of professional practice and lacked a legitimate medical purpose.” *Syed*

Jawed Akhtar-Zaidi, M.D., 80 FR 42,962, 42,964 (2015). Here, the ALJ found, and I agree, that Respondent falsified the medical records of Y.H. and L.G., and that these false entries allow for the fair inference that Respondent acted outside of the usual course of professional practice and beneath the standard of care in the State of Florida in issuing the twelve prescriptions to Y.H. and L.G. RD, at 91–92.

For all these reasons, I find that Respondent violated 21 CFR 1306.04(a), Florida Statute § 458.331(1)(m), and Florida Administrative Code §§ 64B8–9.013 and 64B8–9.003, by falsifying patient records.

In total, I find that the Government has proven by substantial evidence that Respondent issued twelve controlled substance prescriptions without a legitimate medical purpose and outside of the usual course of professional practice and beneath the applicable standard of care in the State of Florida in violation of 21 CFR 1306.04(a), Florida Statute § 458.331(1)(m), and Florida Administrative Code §§ 64B8–9.013 and 64B8–9.003. Overall, I find that the Government has established a *prima facie* case that Respondent’s continued registration is inconsistent with the public interest.

B. Summary of Factors Two and Four and Imminent Danger

As found above, the Government’s case establishes by substantial evidence that Respondent issued controlled substance prescriptions outside the usual course of the professional practice. I, therefore, conclude that Respondent engaged in misconduct which supports the revocation of her registration. *See Wesley Pope*, 82 FR 14,944, 14,985 (2017).

For purposes of the imminent danger inquiry, my findings also lead to the conclusion that Respondent has “fail[ed] . . . to maintain effective controls against diversion or otherwise comply with the obligations of a registrant” under the CSA. 21 U.S.C. 824(d)(2). The substantial evidence that Respondent issued controlled substance prescriptions outside the usual course of the professional practice establishes “a substantial likelihood of an immediate threat that death, serious bodily harm, or abuse of a controlled substance . . . [would] occur in the absence of the immediate suspension” of Respondent’s registration. *Id.*; *see e.g.*, Tr. 256 (opinion of the Government’s expert, Dr. Hoch, that Respondent was prescribing “potentially deadly” medications); Tr. 221–22 (opinion of Dr. Hoch that using “an opioid [can result in] respiratory

depression, and that's what kills people").

Not only was Respondent prescribing a "potentially deadly" combination of medications to confidential sources without properly warning them of the risks associated with taking those controlled substances, but, Respondent continued writing the prescriptions after the confidential sources admitted to diverting these "potentially deadly" controlled substances. *See supra*, III(A)(2)(a)(i) and (iii); Tr. 221.

According to Dr. Hoch, when a patient diverts medication "that's a huge issue for the community at large." Tr. 256.

Thus, as I have found above, at the time the Government issued the OSC/ISO, the Government had clear evidence of violations of law based on the two confidential sources, who had been unlawfully prescribed controlled substances, with no physical exam, with no explanation of the risks associated with the potentially deadly combination of controlled substances, and after the confidential sources had admitted to diverting the prescriptions.

IV. Sanction

Where, as here, the Government has met its *prima facie* burden of showing that Respondent's continued registration is inconsistent with the public interest, the burden shifts to the Respondent to show why she can be entrusted with a registration. *Garrett Howard Smith, M.D.*, 83 FR 18,882, 18,910 (2018) (collecting cases). Respondent has made little to no effort to establish that she can be trusted with a registration.

The CSA authorizes the Attorney General to "promulgate and enforce any rules, regulations, and procedures which he may deem necessary and appropriate for the efficient execution of his functions under this subchapter." 21 U.S.C. 871(b). This authority specifically relates "to 'registration' and 'control,' and 'for the efficient execution of his functions' under the statute." *Gonzales v. Oregon*, 546 U.S. 243, 259 (2006). A clear purpose of this authority is to "bar[] doctors from using their prescription-writing powers as a means to engage in illicit drug dealing and trafficking." *Id.* at 270.

In efficiently executing the revocation and suspension authority delegated to me under the CSA for the aforementioned purposes, I review the evidence and argument Respondent submitted to determine whether or not she has presented "sufficient mitigating evidence to assure the Administrator that [she] can be trusted with the responsibility carried by such a registration." *Samuel S. Jackson, D.D.S.*, 72 FR 23,848, 23,853 (2007) (quoting

Leo R. Miller, M.D., 53 FR 21,931, 21,932 (1988)). "Moreover, because 'past performance is the best predictor of future performance,' *ALRA Labs, Inc. v. DEA*, 54 F.3d 450, 452 (7th Cir. 1995), [the Agency] has repeatedly held that where a registrant has committed acts inconsistent with the public interest, the registrant must accept responsibility for [the registrant's] actions and demonstrate that [registrant] will not engage in future misconduct.'" *Jayam Krishna-Iyer*, 74 FR 459, 463 (2009) (quoting *Medicine Shoppe*, 73 FR 364, 387 (2008)); *see also Jackson*, 72 FR at 23,853; *John H. Kennedy, M.D.*, 71 FR 35,705, 35,709 (2006); *Prince George Daniels, D.D.S.*, 60 FR 62,884, 62,887 (1995).

The issue of trust is necessarily a fact-dependent determination based on the circumstances presented by the individual respondent; therefore, the Agency looks at factors, such as the acceptance of responsibility and the credibility of that acceptance as it relates to the probability of repeat violations or behavior and the nature of the misconduct that forms the basis for sanction, while also considering the Agency's interest in deterring similar acts. *See Arvinder Singh, M.D.*, 81 FR 8247, 8248 (2016).

In evaluating the degree required of a respondent's acceptance of responsibility to entrust him with a registration, in *Mohammed Asgar, M.D.*, 83 FR 29,569, 29,572 (2018), the Agency looked for "unequivocal acceptance of responsibility when a respondent has committed knowing or intentional misconduct." *Id.* (citing *Lon F. Alexander, M.D.*, 82 FR 49,704, 49,728).

In this case, Respondent made statements to the confidential sources during their encounters that I believe demonstrate that she knew it was unlawful to prescribe controlled substances after the confidential sources had admitted to diversion. For example, on January 25, 2017, Y.H. told Respondent how much the prescriptions helped her out (in connection with her need to sell pills to make money) and Respondent replied, "Relax! Do not say that to nobody . . . I don't want to . . . get into trouble." ³⁹ GX 7, at 10–11. Additionally, the State of Florida Administrative Complaint,⁴⁰ clearly

³⁹ Additional examples include Respondent's statement on July 8, 2017, that if L.G. sells his medication then Respondent cannot give him medication. GX 11, at 3 and 6. And during the same appointment Respondent tried to cover herself by stating that she knew L.G. was just joking and really did not sell his medication. GX 11, at 8.

⁴⁰ Respondent seems to have received the Administrative Complaint on or about January 20–23, 2017, but certainly received it no later than

notified Respondent that the professional standard of care required that Respondent discontinue prescribing scheduled medications upon learning that a patient was sharing medications. RX 11, at 19. The ALJ found, and I agree, "it is clear that when [Respondent] issued prescriptions to Y.H. and L.G. after they told her they were selling their prescriptions, her actions constituted a knowing diversion of oxycodone HCL and alprazolam." RD, at 100.

But there is no clear acceptance of responsibility in the record. Here, Respondent did not testify on her own behalf, and did not attempt to explain why, in spite of her egregious misconduct, she can be entrusted with a registration.⁴¹ Such silence weighs against the Respondent's continued registration. *Zvi H. Perper, M.D.*, 77 FR 64,131, at 64,142 (citing *Medicine Shoppe*, 73 FR at 387); *see also Samuel S. Jackson*, 72 FR at 23,853.

Respondent argued, that even though she did not testify in this case, her actions showed her acceptance of responsibility. ALJX 28, at 15. Respondent claimed that she updated the practice's procedures and equipment, completed continuing education courses, and discharged patients who refused to submit to urine drug screening.⁴² *Id.*; RD, at 105. "The degree of acceptance of responsibility that is required does not hinge on the respondent uttering 'magic words' of repentance, but rather on whether the respondent has credibly and candidly demonstrated that [s]he will not repeat the same behavior and endanger the public in a manner that instills confidence in the Administrator." *Jeffrey Stein, M.D.*, 84 FR 46,968, 49,973 (2019). In this case, Respondent has not issued any words of repentance or acceptance of responsibility, because she has not testified, nor has she made any admissions of fault. As such, I cannot trust that Respondent would not repeat her behavior. *See MacKay*, 664 F.3d at 820 (upholding the Agency's finding that a respondent's failure to testify warranted an adverse inference,

February 8, 2017, when she signed the Settlement Agreement. *See RX* 11, at 15, 24.

⁴¹ In *Zvi H. Perper*, the Respondent did not testify in this proceeding; therefore, the Agency found, "he neither took responsibility for his misconduct nor provided any assurances that he has implemented remedial measures to ensure such conduct is not repeated." *Zvi H. Perper, M.D.*, 77 FR 64,131, at 64,142.

⁴² The continuing education courses were required by Respondent's Settlement Agreement and the remaining actions appear to have been related to the Settlement Agreement's requirement to engage a risk manager to conduct a quality assurance consultation or risk management assessment. *See RX* 11, at 10–12; Tr. at 385–386.

because there was “no evidence that [respondent] recognized the extent of his misconduct and was prepared to remedy his prescribing practices”); *see also T.J. McNichol, M.D.*, 77 FR 57,133 (2012) (stating that “it is appropriate to draw an adverse inference from Respondent’s failure to testify.”).

Indeed, the facts on the record irrefutably demonstrate that Respondent cannot be entrusted to amend her behavior. The State of Florida Administrative Complaint, dated January 20, 2017, notified Respondent that she should discontinue prescribing after learning that a patient is diverting. RX 11, at 19. Days later, on January 25, 2017, Respondent prescribed to Y.H. following an admission of diversion. *See supra* II(G)(3). On or about February 8, 2017, Respondent signed a Settlement Agreement (which became a Final Order on April 21, 2017), wherein Respondent agreed to not violate Chapters 456, 458 or 893 of the Florida Statutes or any other state or federal law relating to the practice of medicine. RX 11, at 15. Yet, on both July 18, 2017, and on August 30, 2017, Respondent violated those laws when she again issued prescriptions (this time to L.G.) following an admission of diversion. *See supra* II(H)(2) and (3).

The Agency also looks to the egregiousness and extent of the misconduct which are significant factors in determining the appropriate sanction. *Garrett Howard Smith, M.D.*, 83 FR at 18,910 (collecting cases). In this case, I agree with the ALJ that Respondent’s actions can be characterized as “particularly egregious.” RD, at 100. On six separate occasions over an eleven-month period, Respondent issued twelve prescriptions to confidential sources without having conducted a physical exam or warning of the potential risks in violation of state law. *Supra* III(A)(2)(a); RD, at 104. Furthermore, Respondent issued prescriptions to the confidential sources immediately after those confidential sources admitted to diverting the medication. *Supra* III(A)(2)(a)(i); Tr. 221. As a separate matter, the medical records that Respondent maintained on the confidential sources not only contained false information, but they did not document any physical examinations, medical history, or periodic reviews. *See supra* II(I). I agree with the ALJ’s finding “that [Respondent’s] misconduct of diversion and falsifying records to cover it up, as proven in the Administrative Record, is egregious and supports the revocation of her registration.” RD, at 104.

In sanction determinations, the Agency has historically considered its

interest in deterring similar acts, both with respect to the respondent in a particular case and the community of registrants. *See Joseph Gaudio, M.D.*, 74 FR 10,083, 10,095 (2009); *Singh*, 81 FR at 8248. I agree with the ALJ who found “that considerations of both specific and general deterrence weigh in favor of revocation in this case.” RD, at 105. There is simply no evidence that Respondent’s egregious behavior is not likely to recur in the future such that I can entrust her with a CSA registration; in other words, the factors weigh in favor of revocation as a sanction.

I will therefore order that Respondent’s registration be revoked and that any pending applications be denied as contained in the Order below.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. FG0560765 issued to Jeanne E. Germeil, M.D. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending application of Jeanne E. Germeil, M.D. to renew or modify this registration, as well as any other pending application of Jeanne E. Germeil, M.D. for registration in Florida. This Order is effective December 21, 2020.

Timothy J. Shea,

Acting Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

Hil Rizvi, M.D.; Decision and Order

On July 20, 2020, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, Government), issued an Order to Show Cause (hereinafter, OSC) to Hil Rizvi, M.D. (hereinafter, Registrant) of Tyrone, Pennsylvania. OSC, at 1, 3. The OSC proposed the revocation of Registrant’s Certificate of Registration No. BR4988599. It alleged that Registrant is without “authority to handle controlled substances in Pennsylvania, the state in which [Registrant is] registered with DEA.” *Id.* at 1 (citing 21 U.S.C. 823(f) and 824(a)(3)).

Specifically, the OSC alleged that the Pennsylvania State Board of Medicine (hereinafter, the Board) revoked Registrant’s license to practice medicine

effective October 28, 2018.¹ *Id.* The OSC concluded that “DEA must revoke [Registrant’s] DEA registration based on [his] lack of authority to handle controlled substances in the State of Pennsylvania.” *Id.* at 2.

The OSC notified Registrant of the right to request a hearing on the allegations or to submit a written statement, while waiving the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* (citing 21 CFR 1301.43). The OSC also notified Registrant of the opportunity to submit a corrective action plan. *Id.* at 3 (citing 21 U.S.C. 824(c)(2)(C)).

Adequacy of Service

In a Declaration dated August 20, 2020, the Chief of Police for the Borough of Tyrone Police Department, stated that on July 22, 2020, he, another police officer, and two DEA Diversion Investigators (hereinafter, DIs) traveled to Registrant’s registered address located at 910 Pennsylvania Avenue, Tyrone, PA 16686. Request for Final Agency Action dated July 10, 2019 (hereinafter, RFAA), Exhibit (hereinafter, RFAAX) 8, at 2 (Chief of Police’s Declaration). The Chief of Police stated that upon arrival at the registered address, “[he] knocked repeatedly on the office door to no response.” *Id.* The team then proceeded to Registrant’s residence and again, “knock[ed] repeatedly on the front door of the residence,” but there was no answer. *Id.* The Chief of Police then stated that “[a]fter unsuccessful attempts at reaching [Registrant] on his landline and cell telephone numbers, [he] left [his] business card in the front door slot of the residence.” *Id.* Later that afternoon, the Chief of Police received a phone call from Registrant at the telephone number on his business card. *Id.* at 3. The Chief of Police stated that he had a letter to deliver, but Registrant “insisted” that he was not in town “despite placing a call to [the Chief of Police] at the business card [he] left at the residence earlier that day.” *Id.* Following the phone call, the Chief of Police “immediately returned to [Registrant’s] office location. When [he] knocked on the front door of the office, [Registrant] answered. [He] then handed the envelope containing the [OSC] to [Registrant] and left the premises.” *Id.*

The DEA DI assigned to the case stated that “[s]tarting immediately after his July 22, 2020 receipt of the [OSC], and on several occasions since, [the DI has] received numerous calls and an

¹ It is noted that the effective date of the Order was September 12, 2018. *See* Request for Final Agency Action, at 1 n.1; Exhibit 3, at 12.

email from [Registrant], all with regard to his disagreement with being served with the OTSC.” RFAAX 12, at 4 (Declaration of DEA DI, dated September 2, 2020). The Government’s evidence includes an email from Registrant on July 22, 2020, which was sent to the email address provided for submission of a Corrective Action Plan (hereinafter, CAP). RFAAX 6 (Email from Registrant on July 22, 2020). The Assistant Administrator for Diversion treated the email from Registrant as a proposed CAP and denied the CAP on July 23, 2020. RFAAX 7, at 1 (Letter Denying CAP). Based on all of the above, I find that the OSC was served on July 22, 2020.

The Government forwarded its RFAA, along with the evidentiary record, to this office on September 3, 2020. In its RFAA, the Government represents that “more than thirty days have passed since Registrant received the [OSC]; however, Registrant has not submitted to DEA a request for a hearing . . . Aside from the aforementioned CAP request, and sporadic, nonpertinent communications with DEA personnel (outlined below), Registrant has not otherwise filed a response with the agency following the issuance of the [OSC].” RFAA, at 2.

The Government asserts that DEA cannot “maintain the registration of a practitioner not duly authorized to handle controlled substances in the state in which he conducts business” and requests revocation. *Id.* at 6.

Based on the DI’s and the Chief of Police’s Declarations, the Government’s written representations, and my review of the record, I find that the Government accomplished service of the OSC on Registrant on July 22, 2020. I also find that more than thirty days have now passed since the Government accomplished service of the OSC. Accordingly, I find that Registrant has waived the right to a hearing and corrective action plan. 21 CFR 1301.43(d) and 21 U.S.C. 824(c)(2)(C). Although it is unclear whether the email that DEA received from Registrant is a written statement or a Proposed Corrective Action Plan from Registrant in accordance with 21 CFR 1301.43(c), I have considered it under both. RFAAX 6, at 12. In the email, Registrant stated that the license dispute is pending in Pennsylvania court and that “the license dispute is NOT about clinical issues or malpractice or drug diversion.” *Id.* (emphasis in original). Although I have considered Registrant’s statement, it does not present any issue of fact or law that could affect my final decision, as explained herein. I also agree with the Assistant Administrator of the Diversion

Control Division, that if the email was intended to be a Proposed Corrective Action Plan, it provides no basis for me to discontinue or defer this proceeding. See RFAAX 7, at 1. I issue this Decision and Order based on the record submitted by the Government, including Registrant’s statement, which constitutes the entire record before me. 21 CFR 1301.43(e).

Findings of Fact

Registrant’s DEA Registration

Registrant is the holder of DEA Certificate of Registration No. BR4988599 at the registered address of 910 Pennsylvania Avenue, Tyrone, PA 16686. RFAAX 1 (Registrant’s Certificate of Registration). Pursuant to this registration, Registrant is authorized to dispense controlled substances in schedules II through V as a practitioner-DW/275. RFAAX 2 (Certification of Registration History). Registrant’s registration expires on April 30, 2023, and is “in an active pending status until the resolution of administrative proceedings.” *Id.* at 1.

The Status of Registrant’s State License

On September 12, 2018, the Commonwealth of Pennsylvania State Board of Medicine issued an Order (hereinafter, Board Order) revoking Registrant’s license to practice medicine in Pennsylvania effective immediately. RFAAX 3, at 12. According to the Board Order, Registrant’s Ohio license to practice medicine was revoked and his Maine application to practice medicine was denied. *Id.* at 8. The Board stated that those state actions “indicate that [Registrant] has engaged in a multi-year and multi-state history of providing false, misleading or knowingly incomplete information in association with his applications for licensure and renewal and that he failed to properly advise a board of negative information regarding arrests as required.” *Id.* The Board therefore concluded that Registrant was “essentially an individual who cannot be effectively regulated by the Board.” *Id.* at 9.

According to Pennsylvania’s online records, of which I take official notice, Registrant’s license is still revoked.²

² Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Registrant may dispute my finding by filing a properly supported motion for reconsideration of

Pennsylvania Licensing System Verification Service, <https://www.pals.pa.gov/#/page/search> (last visited October 27, 2020).

Accordingly, I find that Registrant currently is not licensed to engage in the practice of medicine in Pennsylvania, the state in which Registrant is registered with the DEA.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the CSA “upon a finding that the registrant . . . has had his State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing of controlled substances.” With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. See, e.g., *James L. Hooper, M.D.*, 76 FR 71,371 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he

finding of fact within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Registrant files a motion, the Government shall have fifteen calendar days to file a response. Any motion and response shall be filed and served by email to the other party and to the Office of the Administrator at dea.addo.attorneys@dea.usdoj.gov.

is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper*, 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.*, 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton*, 43 FR at 27,617.

Pennsylvania law defines a “practitioner” as “(i) a physician . . . licensed, registered or otherwise permitted to distribute, dispense . . . or to administer a controlled substance . . . in the course of professional practice or research in the Commonwealth of Pennsylvania.” 35 Pa. Stat. and Cons. Stat. Ann. § 780–102 (West 2020). Pennsylvania law further defines a “physician,” as a “medical doctor,” and a “medical doctor,” as an “individual who has acquired” a license “to practice medicine and surgery issued by the board.” Pa. Stat. and Cons. Stat. Ann. § 422.2 (West 2019). Pennsylvania law prohibits “[t]he administration, dispensing, delivery, gift or prescription of any controlled substance by any practitioner . . . unless done (i) in good faith in the course of his professional practice; (ii) within the scope of the patient relationship; (iii) in accordance with treatment principles accepted by a responsible segment of the medical profession.” 35 Pa. Stat. and Cons. Stat. Ann. § 780–113(14) (West 2019). Additionally, the statute prohibits “knowingly or intentionally possessing a controlled . . . substance by a . . . practitioner not registered or licensed by the appropriate state board.” *Id.* at § 780–113(15).

Here, the undisputed evidence in the record is that Registrant currently lacks authority to practice medicine and surgery in Pennsylvania. A practitioner, who is a physician and a medical doctor, must be licensed and cannot prescribe or possess controlled substances in his professional practice without a license. *Id.* § 780–113(14), (15). Because Registrant lacks authority to practice medicine in Pennsylvania and, therefore, is not authorized to possess or prescribe controlled substances in Pennsylvania, Registrant is not eligible to maintain a DEA registration. Accordingly, I will order that Registrant’s DEA registration be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificate of Registration No. BR4988599 issued to

Hil Rizvi, M.D. This Order is effective December 21, 2020.

Timothy J. Shea,

Acting Administrator.

[FR Doc. 2020–25527 Filed 11–18–20; 8:45 am]

BILLING CODE 4410–09–P

DEPARTMENT OF JUSTICE

Drug Enforcement Administration

[Docket No. 20–24]

Jonathan Rosenfield, M.D.; Decision and Order

On June 18, 2020, the Assistant Administrator, Diversion Control Division, Drug Enforcement Administration (hereinafter, DEA or Government), issued an Order to Show Cause (hereinafter, OSC) to Jonathan Rosenfield, M.D. (hereinafter, Respondent) of Houston, Texas, and Grand Forks, North Dakota. OSC, at 1. The OSC proposed the revocation of Respondent’s Certificates of Registration Nos. FR7251642 and FR5327285. *Id.* It alleged that Respondent is without “authority to handle controlled substances.” *Id.* (citing 21 U.S.C. 824(a)(3)).

Specifically, the OSC alleged that on “October 10, 2019, the Texas Medical Board issued an Order of Temporary Suspension, suspending [Respondent’s] Texas medical license. That order remains in effect.” *Id.* at 2. The OSC further stated that “[s]ubsequently, on December 30, 2019, [Respondent] entered into a Stipulation and Non-Practice Agreement with the North Dakota Board of Medicine in which [Respondent] agreed not to practice medicine in the State of North Dakota and in which [Respondent] agreed that [his] North Dakota medical license will be inactive for all purposes.” *Id.* The OSC concluded that “DEA must revoke [Respondent’s] DEA registrations based on [his] lack of authority to handle controlled substances in the State of Texas and the State of North Dakota.” *Id.* (citing 21 U.S.C. 824(a)(3); 21 CFR 1301.37(b)).

The OSC notified Respondent of the right to request a hearing on the allegations or to submit a written statement, while waiving the right to a hearing, the procedures for electing each option, and the consequences for failing to elect either option. *Id.* at 2–3 (citing 21 CFR 1301.43). The OSC also notified Respondent of the opportunity to submit a corrective action plan. *Id.* at 3 (citing 21 U.S.C. 824(c)(2)(C)).

On July 30, 2020, Respondent, through counsel, requested a hearing,

stating that his “medical license in Texas is only temporarily suspended” and he “maintains an active medical license in Ohio and Georgia.” Request for a Hearing, at 1.

The Office of Administrative Law Judges put the matter on the docket and assigned it to Chief Administrative Law Judge John J. Mulrooney II (hereinafter, Chief ALJ), who issued an Order Directing the Filing of Government Evidence Regarding its Lack of State Authority Allegation and Briefing Schedule on July 30, 2020, with which the Government complied by filing a Motion for Summary Disposition (hereinafter, Govt Motion) on August 10, 2020.

In its Motion, the Government submitted evidence that the “Texas Medical Board issued an Order of Temporary Suspension, suspending Respondent’s Texas Medical License,” and “Respondent entered into a Stipulation and Non-practice agreement with the North Dakota Board of Medicine in which Respondent agreed not to practice medicine in the State of North Dakota.” Govt Motion, at 3–4. In light of these facts, the Government argued that DEA must revoke Respondent’s registration. *Id.* at 5.

On August 20, 2020, Respondent filed a “Memorandum Contra to the Government’s Motion for Summary Disposition” (hereinafter, Resp Opposition), in which he argued that “[t]he matter in Texas is temporary in nature, as it is a Temporary Suspension.” Resp Opposition, at 1. He also argued that he has active medical licenses in Georgia and Ohio and that Respondent “contends that he does” have state authority in Texas. *Id.* at 2.

On August 25, 2020, the Chief ALJ issued an Order Granting the Government’s Motion for Summary Disposition, and Recommended Rulings, Findings of Fact, Conclusions of Law, and Recommended Decision of the Administrative Law Judge (hereinafter, Summary Disposition or SD). The Chief ALJ noted that, “Respondent has made the confusing assertion that he ‘has the authority to handle controlled substances’ because the suspension imposed by Texas is temporary and ‘can be lifted at any time’” SD, at 4 (quoting Resp Opposition, at 1). However, he also noted that “[t]he Respondent has represented that no superseding order from the Texas Board has been issued.” *Id.* at 3 (citing Resp Opposition, at 1). Therefore, the ALJ determined that “in view of the Respondent’s current lack of state authority, revocation of the Respondent’s [registrations] stands as the only legally available resolution.”

SD, at 5. The Chief ALJ further concluded that “[s]ummary disposition is proper in an administrative enforcement proceeding where no genuine factual dispute exists.” *Id.* at 6 (citing *Veg-Mix, Inc. v. U.S. Dept. of Agriculture*, 832 F.3d 601, 607 (D.C. Cir. 1987) (comparing the standard for summary disposition in an administrative proceeding to summary judgment in a civil proceeding); *Citizens for Allegan County, Inc. v. Federal Power Commission*, 414 F.2d 1125, 1128 (D.C. Cir. 1969) (affirming that “the right of opportunity for hearing does not require a procedure that will be empty sound and show, signifying nothing”)).

By letter dated September 22, 2020, the ALJ certified and transmitted the record to me for final Agency action. In that letter, the ALJ advised that neither party filed exceptions. I find that the time period to file exceptions has expired. See 21 CFR 1316.66.

I issue this Decision and Order based on the entire record before me. 21 CFR 1301.43(e). I make the following findings of fact.

Findings of Fact

Respondent's DEA Registration

Respondent is the holder of DEA Certificate of Registration No. FR7251642 at the registered address of 4561 Edfield Street, Houston, Texas 77051. Govt Motion Exhibit (hereinafter, GX) 1 (Certification of Registration History Texas),¹ at 1. Pursuant to this registration, Respondent is authorized to dispense controlled substances in schedules II through V as a “practitioner.” *Id.* Respondent’s registration expired on April 20, 2020, and is in “a renewal pending status until the resolution of administrative proceedings.” *Id.* Respondent is also the holder of DEA Certificate of Registration No. FR5327285 at the registered address of 1451 44th Avenue South, Unit E, Grand Forks, North Dakota 58201. GX 2 (Certification of Registration History North Dakota), at 1. Pursuant to this registration, Respondent is authorized to dispense controlled substances in schedules II through V as a “practitioner.” *Id.* Respondent’s registration expires on April 30, 2021, and is in “an active pending status until the resolution of administrative proceedings.” *Id.*

¹ It is noted that the Government’s Exhibits 1 and 2 list several other registrations held by Respondent that are not subject to these proceedings.

The Status of Respondent's State Licenses

Texas

On October 10, 2019, the Texas Medical Board (hereinafter, Texas Board) entered an Order of Temporary Suspension (hereinafter, Suspension Order) “effective on the date rendered.” GX 4 (Suspension Order), at 4. According to the Suspension Order, Respondent engaged in “unprofessional or dishonorable conduct” and the Texas Board had authority to discipline Respondent for “prescribing, administering, or dispensing in a manner inconsistent with public health and welfare dangerous drugs” *Id.* at 3. The Texas Board found that Respondent’s “continued practice of medicine would constitute a continuing threat to the public welfare.” *Id.* at 3. The Order further stated that it “shall remain in effect until it is superseded by an Order of the Board.” *Id.* at 4.

According to Texas’s online records, of which I take official notice, Respondent’s registration status is “suspended, active as of 10/10/2019” and his disciplinary restrictions are “suspended by board as of 10/10/2019.”² Texas Medical Board Healthcare Provider Search, https://public.tmb.state.tx.us/HCP_Search/SearchNotice.aspx (last visited October 27, 2020).

Based on the entire record before me, I find that Respondent currently is not licensed to engage in the practice of medicine in Texas, one of the two states where Respondent maintains a registration subject to this action.

North Dakota

On January 14, 2020, the North Dakota Board of Medicine (hereinafter, North Dakota Board) entered into a Stipulation and Nonpractice Agreement (hereinafter, Nonpractice Agreement) effective “upon execution of [the

² Under the Administrative Procedure Act, an agency “may take official notice of facts at any stage in a proceeding—even in the final decision.” United States Department of Justice, Attorney General’s Manual on the Administrative Procedure Act 80 (1947) (Wm. W. Gaunt & Sons, Inc., Reprint 1979). Pursuant to 5 U.S.C. 556(e), “[w]hen an agency decision rests on official notice of a material fact not appearing in the evidence in the record, a party is entitled, on timely request, to an opportunity to show the contrary.” Accordingly, Respondent may dispute my finding by filing a properly supported motion for reconsideration of findings of fact within fifteen calendar days of the date of this Order. Any such motion shall be filed with the Office of the Administrator and a copy shall be served on the Government. In the event Respondent files a motion, the Government shall have fifteen calendar days to file a response. Any motion and response shall be filed and served by email to the other party and to the Office of the Administrator at dea.addo.attorneys@dea.usdoj.gov.

agreement.” GX 5 (Nonpractice Agreement), at 1. According to the Nonpractice Agreement, Respondent agreed that “he will immediately cease the practice of medicine in North Dakota” and “he will not practice medicine in the State of North Dakota until such time as the Board finalizes any disciplinary action that may be brought against him based on the information obtained by the Board from the Federation of State Medical Boards Physician Data Center, the Texas Medical Board and the United States District Court for the Southern District of Texas.” *Id.*

According to North Dakota’s online records, of which I take official notice, Respondent’s registration status is “inactive-other” and his disciplinary history is “Entered into a stipulated non-practice agreement.”³ North Dakota Board of Medicine Find a Practitioner/Verify License Status, https://www.ndbom.org/public/find_verify/verify.asp (last visited October 27, 2020).

Based on the entire record before me, I find that Respondent currently is not licensed to engage in the practice of medicine in North Dakota, one of the two states where Respondent maintains a registration subject to this action.

Discussion

Pursuant to 21 U.S.C. 824(a)(3), the Attorney General is authorized to suspend or revoke a registration issued under section 823 of the CSA “upon a finding that the registrant . . . has had [her] State license or registration suspended . . . [or] revoked . . . by competent State authority and is no longer authorized by State law to engage in the . . . dispensing⁴ of controlled substances.” With respect to a practitioner, the DEA has also long held that the possession of authority to dispense controlled substances under the laws of the state in which a practitioner engages in professional practice is a fundamental condition for obtaining and maintaining a practitioner’s registration. See, e.g., *James L. Hooper, M.D.*, 76 FR 71,371 (2011), *pet. for rev. denied*, 481 F. App’x 826 (4th Cir. 2012); *Frederick Marsh Blanton, M.D.*, 43 FR 27,616, 27,617 (1978).

This rule derives from the text of two provisions of the CSA. First, Congress defined the term “practitioner” to mean “a physician . . . or other person

³ I take official notice of this fact. See n.1

⁴ “[D]ispense[] means to deliver a controlled substance to an ultimate user . . . by, or pursuant to the lawful order of, a practitioner, including the prescribing and administering of a controlled substance” 21 CFR 802(10).

licensed, registered, or otherwise permitted, by . . . the jurisdiction in which he practices . . . , to distribute, dispense, . . . [or] administer . . . a controlled substance in the course of professional practice.” 21 U.S.C. 802(21). Second, in setting the requirements for obtaining a practitioner’s registration, Congress directed that “[t]he Attorney General shall register practitioners . . . if the applicant is authorized to dispense . . . controlled substances under the laws of the State in which he practices.” 21 U.S.C. 823(f). Because Congress has clearly mandated that a practitioner possess state authority in order to be deemed a practitioner under the CSA, the DEA has held repeatedly that revocation of a practitioner’s registration is the appropriate sanction whenever he is no longer authorized to dispense controlled substances under the laws of the state in which he practices. *See, e.g., James L. Hooper*, 76 FR at 71,371–72; *Sheran Arden Yeates, M.D.*, 71 FR 39,130, 39,131 (2006); *Dominick A. Ricci, M.D.*, 58 FR 51,104, 51,105 (1993); *Bobby Watts, M.D.*, 53 FR 11,919, 11,920 (1988); *Frederick Marsh Blanton*, 43 FR at 27,617.

Respondent argued that “[t]he matter in Texas is temporary in nature, as it is a Temporary Suspension.”⁵ Resp Opposition, at 1. He also argued that he has active medical licenses in Georgia and Ohio and that he does have state authority in Texas. *Id.* at 2. However, the Suspension Order issued by the Texas Board clearly states that the suspension is in effect until the Board issues a superseding Order. GX 4, at 4. Further, I agree with the Chief ALJ that “[a]s has been long established by Agency [decisions], state licensure in a state other than a respondent’s [] registration state is irrelevant to a DEA enforcement proceeding. SD, at 4–5 (citing *Craig K. Alhanati, D.D.S.*, 62 FR 32,658, 32,658 (1997)).

Because “the controlling question” in a proceeding brought under 21 U.S.C. 824(a)(3) is whether the holder of a practitioner’s registration “is currently authorized to handle controlled substances in the state,” *James L. Hooper*, 76 FR at 71,371 (quoting *Anne Lazar Thorn*, 62 FR 12,847, 12,848 (1997)), the Agency has also long held that revocation is warranted even where a practitioner is still challenging the underlying action or where the state action is temporary. *Kambiz Haghighi, M.D.*, 85 FR 5989 (2020); *Bourne Pharmacy*, 72 FR 18,273, 18,274 (2007);

Wingfield Drugs, 52 FR 27,070, 27,071 (1987). Thus, it is of no consequence that the action is a suspension. What is consequential is my finding that Respondent is no longer currently authorized to dispense controlled substances in Texas and North Dakota, the two states where Respondent maintains the registrations subject to this action.

Under the Texas Controlled Substances Act, a practitioner in Texas “may not prescribe, dispense, deliver, or administer a controlled substance or cause a controlled substance to be administered under the practitioner’s direction and supervision except for a valid medical purpose and in the course of medical practice.” Tex. Health and Safety Code Ann. § 481.071 (West 2019). The Texas Controlled Substances Act defines “practitioner,” in relevant part, as “a physician . . . licensed, registered, or otherwise permitted to distribute, dispense, analyze, conduct research with respect to, or administer a controlled substance in the course of professional practice or research in this state.” *Id.* at § 481.002 (39)(A). Further, under the Texas Medical Practice Act, a person must hold a license to practice medicine in Texas. Tex. Occupations Code Ann. § 155.001 (West 2019) (“A person may not practice medicine in this state unless the person holds a license issued under [the Medical Practice Act].”); *see also id.* at § 151.002 (“‘Physician’ means a person licensed to practice medicine in this state.”). Additionally, “[a] person commits an offense if the person practices medicine in [Texas] in violation of” the Act. *Id.* at § 165.152(a).

Under North Dakota law, “[d]ispense” means to deliver a controlled substance to an ultimate user or research subject by or pursuant to the lawful order of a practitioner, including the prescribing, administering, packaging, labeling, or compounding necessary to prepare the substance for that delivery.” N.D. Cent. Code § 19–03.1–01(10) (West 2019). Further, a “practitioner” is defined as, “A physician, dentist, veterinarian, pharmacist, scientific investigator, or other person licensed, registered, or otherwise permitted by the jurisdiction in which the individual is practicing to distribute, dispense, conduct research with respect to, or to administer a controlled substance in the course of professional practice or research.” *Id.* at § 19–03.1–01(25)(a). Therefore, because Registrant currently is not licensed by the jurisdiction in which he is practicing, he is not authorized to dispense controlled substances in North Dakota.

Here, the undisputed evidence in the record is that Respondent currently lacks authority to practice medicine in Texas and North Dakota. I, therefore, find that Respondent is currently without authority to dispense controlled substance in Texas and North Dakota, two states in which he is registered with DEA, and I will order that Respondent’s DEA registrations in these states be revoked.

Order

Pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 824(a), I hereby revoke DEA Certificates of Registration Nos. FR7251642 and FR5327285 issued to Jonathan Rosenfield, M.D. Further, pursuant to 28 CFR 0.100(b) and the authority vested in me by 21 U.S.C. 823(f), I hereby deny any pending application of Jonathan Rosenfield, M.D. to renew or modify these registrations, as well as any other application of Jonathan Rosenfield, M.D. for additional registrations in Texas and North Dakota. This Order is applicable December 21, 2020.

Timothy J. Shea,

Acting Administrator.

BILLING CODE 4410–09–P

DEPARTMENT OF LABOR

Office of the Secretary

Agency Information Collection Activities; Submission for OMB Review; Comment Request; Overhead and Gantry Cranes Standard

ACTION: Notice of availability; request for comments.

SUMMARY: The Department of Labor (DOL) is submitting this Occupational Health and Safety Administration (OSHA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

DATES: The OMB will consider all written comments that agency receives on or before December 21, 2020.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open

⁵ It is noted that Respondent presented no arguments about the status of his medical license in North Dakota.

for Public Comments” or by using the search function.

Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency’s estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

FOR FURTHER INFORMATION CONTACT: Crystal Rennie by telephone at 202–693–0456 (this is not a toll-free number) or by email at DOL_PRA_PUBLIC@dol.gov.

SUPPLEMENTARY INFORMATION: The paperwork provisions of the Standard specify requirements for: Marking the rated load of cranes; preparing certification records to verify the inspection of the crane hooks, hoist chains, and rope; preparing reports of rated load test for repaired hooks or modified cranes. Records and reports must be maintained and disclosed upon request. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on August 18, 2020 (85 FR 50838).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. See 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

Agency: DOL–OSHA.

Title of Collection: Overhead and Gantry Cranes Standard.

OMB Control Number: 1218–0224.

Affected Public: Businesses or other for-profits institutions.

Total Estimated Number of Respondents: 31,495.

Total Estimated Number of Responses: 642,566.

Total Estimated Annual Time Burden: 321,345 hours.

Total Estimated Annual Other Costs Burden: \$0.

Authority: 44 U.S.C. 3507(a)(1)(D).

Dated: November 13, 2020.

Anthony May,

Management and Program Analyst.

BILLING CODE 4510–26–P

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[20–096]

Notice of Centennial Challenges Break the Ice Lunar Challenge Phase 1

AGENCY: National Aeronautics and Space Administration (NASA).

SUMMARY: The Break the Ice Lunar Challenge is open and teams that wish to compete may now register. Centennial Challenges is a program of prize competitions to stimulate

innovation in technologies of interest and value to NASA and the nation. The Break the Ice Lunar Challenge is a prize competition with up to a \$5,000,000 USD total prize purse to incentivize innovative approaches for excavating icy regolith and optimize logistics to transport acquired resources, primarily water, in extreme lunar environments. At this time, NASA is opening Phase 1 of the competition, which has a \$500,000 USD prize purse. In this phase of competition, teams will design a system architecture to excavate icy regolith and deliver water on the lunar surface in a hypothetical mission scenario based on anticipated mission operations and environmental features of human and robotic exploration of the lunar surface. NASA is funding the prize purse and administration of the challenge competition.

DATES: Phase 1 registration opens November 18, 2020, and will remain open until June 18, 2021. No further requests for registration will be accepted after this date.

Other important dates:

November 18, 2020

- Phase 1 registration opens

June 18, 2021

- Deadline for registration

August 13, 2021

- Phase 1 winners announced

ADDRESSES: The Break the Ice Lunar Challenge Phase 1 will be conducted virtually. The Challenge competitors will develop and submit system architecture, excavation plan and other submission elements from their own location.

FOR FURTHER INFORMATION CONTACT: To register for or get additional information regarding the Break the Ice Lunar Challenge, please visit: www.nasa.gov/breaktheice. For general information on the NASA Centennial Challenges Program please visit: <http://www.nasa.gov/challenges>. General questions and comments regarding the program should be addressed to Monsi Roman, Centennial Challenges Program, NASA Marshall Space Flight Center Huntsville, AL 35812. Email address: hq-stmd-centennialchallenges@mail.nasa.gov. Phone: 256–544–4071.

SUPPLEMENTARY INFORMATION:

Summary

Phase 1 of the Break the Ice Lunar Challenge is focused on incentivizing new ideas and approaches to a system architecture for excavation and movement of icy regolith and water on the lunar surface. The Challenge describes a hypothetical Mission Scenario and asks Teams to design a system architecture addressing

necessary hardware, concept of operations, lunar environmental conditions, and specific performance analyses, as well as supporting materials that address credibility and feasibility of the system architecture. In Phase 1, Teams will have approximately seven (7) months to register and submit a system architecture. Phase 1 will last a total of nine (9) months, including approximately two (2) months of judging.

I. Prize Amounts

The Break the Ice Lunar Challenge total prize purse is up to \$5,000,000 USD (five million dollars) to be awarded across two (2) phases of competition.

Prize purse for Phase 1 will total up to \$500,000, with the following prize distribution: 1st place \$125,000, 2nd place \$75,000, 3rd place \$50,000, and up to ten (10) runners-up teams will receive up to \$25,000 each as determined by the judging panel.

The Prize Purse for Phase 2, should there be promising submissions in Phase 1 that demonstrate a viable approach, will be worth up to \$4,500,000.

II. Eligibility

Eligibility To Participate and Win Prize Money

To be eligible to win a prize:

- Individuals must be U.S. citizens or permanent residents of the United States and be 18 years of age or older.
- Organizations must be an entity incorporated in and maintaining a primary place of business in the United States.
- Teams must be comprised of otherwise eligible individuals or organizations and led by an otherwise eligible individual or organization.
- Team leader must be a U.S. citizen or permanent resident.

The eligibility requirements can be found on the official challenge site: www.nasa.gov/breaktheice.

III. Rules

The complete rules for the Break the Ice Lunar Challenge, can be found at: <https://breaktheicechallenge.com>.

Cheryl Parker,

NASA Federal Register Liaison Officer.

BILLING CODE 7510-13-P

NUCLEAR REGULATORY COMMISSION

[NRC-2020-0056]

Information Collection: Grants and Cooperative Agreement Provisions

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of submission to the Office of Management and Budget; request for comment.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) has recently submitted a request for renewal of an existing collection of information to the Office of Management and Budget (OMB) for review. The information collection is entitled, "Grants and Cooperative Agreement Provisions."

DATES: Submit comments by December 21, 2020. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to <https://www.reginfo.gov/public/do/PRAMain>. Find this particular information collection by selecting "Currently under Review—Open for Public Comments" or by using the search function.

FOR FURTHER INFORMATION CONTACT: David Cullison, NRC Clearance Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-2084; email: Infocollects.Resource@nrc.gov.

SUPPLEMENTARY INFORMATION:

I. Obtaining Information and Submitting Comments

A. Obtaining Information

Please refer to Docket ID NRC-2020-0056 when contacting the NRC about the availability of information for this action. You may obtain publicly available information related to this action by any of the following methods:

- *Federal Rulemaking website:* Go to <https://www.regulations.gov> and search for Docket ID NRC-2020-0056. A copy of the collection of information and related instructions may be obtained without charge by accessing Docket ID NRC-2020-0056 on this website.

- *NRC's Agencywide Documents Access and Management System (ADAMS):* You may obtain publicly available documents online in the ADAMS Public Documents collection at <https://www.nrc.gov/reading-rm/>

adams.html. To begin the search, select "Begin Web-based ADAMS Search." For problems with ADAMS, please contact the NRC's Public Document Room (PDR) reference staff at 1-800-397-4209, 301-415-4737, or by email to pdr.resource@nrc.gov. The supporting statement is available in ADAMS under Accession No. ML20260H319.

- *Attention:* The PDR, where you may examine and order copies of public documents is currently closed. You may submit your request to the PDR via email at PDR.Resource@nrc.gov or call 1-800-397-4209 between 8:00 a.m. and 4:00 p.m. (EST), Monday through Friday, except Federal holidays.

- *NRC's Clearance Officer:* A copy of the collection of information and related instructions may be obtained without charge by contacting the NRC's Clearance Officer, David Cullison, Office of the Chief Information Officer, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 301-415-2084; email: Infocollects.Resource@nrc.gov.

B. Submitting Comments

The NRC encourages electronic comment submission through the Federal Rulemaking website (<https://www.regulations.gov>).

Please include Docket ID NRC-2020-0056 in the subject line of your comment submission, in order to ensure that the NRC is able to make your current submission available to the public on this docket.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at <https://www.regulations.gov> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the OMB, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted an existing collection of information to OMB for review entitled,

“Grants and Cooperative Agreement Provisions.” The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on July 1, 2020, (85 FR 39598).

1. *The title of the information collection:* Grants and Cooperative Agreement Provisions.
2. *OMB approval number:* 3150–0107.
3. *Type of submission:* Extension.
4. *The form number if applicable:* Not applicable.

5. *How often the collection is required or requested:* Technical Performance reports are required every 6 months; other information is submitted on occasion as needed.

6. *Who will be required or asked to respond:* Grants and Cooperative Agreement recipients.

7. *The estimated number of annual responses:* 542 (366 responses plus 176 record keepers).

8. *The estimated number of annual respondents:* 176.

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request:* 4,127 (3,851 reporting hours plus 276 record keeping hours).

10. *Abstract:* The Acquisition Management Division is responsible for the awarding grants and cooperative agreement provisions in order to administer the NRC’s financial assistance program. The information collected under the provisions ensures that the Government’s rights are protected, the agency adheres to public laws, the work proceeds on schedule, and that disputes between the Government and recipient are settled.

Dated: November 13, 2020.

For the Nuclear Regulatory Commission.

David C. Cullison,

NRC Clearance Officer, Office of the Chief Information Officer.

BILLING CODE 7590–01–P

POSTAL REGULATORY COMMISSION

[Docket Nos. MC2021–27 and CP2021–27]

New Postal Products

AGENCY: Postal Regulatory Commission.

ACTION: Notice.

SUMMARY: The Commission is noticing a recent Postal Service filing for the

Commission’s consideration concerning a negotiated service agreement. This notice informs the public of the filing, invites public comment, and takes other administrative steps.

DATES: *Comments are due:* November 23, 2020.

ADDRESSES: Submit comments electronically via the Commission’s Filing Online system at <http://www.prc.gov>. Those who cannot submit comments electronically should contact the person identified in the **FOR FURTHER INFORMATION CONTACT** section by telephone for advice on filing alternatives.

FOR FURTHER INFORMATION CONTACT: David A. Trissell, General Counsel, at 202–789–6820.

SUPPLEMENTARY INFORMATION:

Table of Contents

- I. Introduction
- II. Docketed Proceeding(s)

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request’s acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service’s request(s) can be accessed via the Commission’s website (<http://www.prc.gov>). Non-public portions of the Postal Service’s request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3011.301.¹

The Commission invites comments on whether the Postal Service’s request(s) in the captioned docket(s) are consistent with the policies of title 39. For request(s) that the Postal Service states

concern market dominant product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3622, 39 U.S.C. 3642, 39 CFR part 3030, and 39 CFR part 3040, subpart B. For request(s) that the Postal Service states concern competitive product(s), applicable statutory and regulatory requirements include 39 U.S.C. 3632, 39 U.S.C. 3642, 39 CFR part 3035, and 39 CFR part 3040, subpart B. Comment deadline(s) for each request appear in section II.

II. Docketed Proceeding(s)

1. *Docket No(s):* MC2021–27 and CP2021–27; *Filing Title:* USPS Request to Add First-Class Package Service Contract 114 to Competitive Product List and Notice of Filing Materials Under Seal; *Filing Acceptance Date:* November 13, 2020; *Filing Authority:* 39 U.S.C. 3642, 39 CFR 3040.130 through 3040.135, and 39 CFR 3035.105; *Public Representative:* Christopher C. Mohr; *Comments Due:* November 23, 2020.

This Notice will be published in the **Federal Register**.

Erica A. Barker,
Secretary.

[FR Doc. 2020–25570 Filed 11–18–20; 8:45 am]

BILLING CODE 7710–FW–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–90418; File No. SR–NYSEArca–2020–84]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Designation of a Longer Period for Commission Action on a Proposed Rule Change, as Modified by Amendment No. 1, To Amend NYSE Arca Rule 8.900–E To Adopt Generic Listing Standards for Managed Portfolio Shares

November 13, 2020.

On September 22, 2020, NYSE Arca, Inc. filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”) ¹ and Rule 19b–4 thereunder, ² a proposed rule change to amend NYSE Arca Rule 8.900–E to adopt generic listing standards for Managed Portfolio Shares. On October 2, 2020, the Exchange filed Amendment No. 1 to the proposed rule change. The proposed rule change, as modified by Amendment No. 1, was published for comment in the **Federal Register** on October 13,

¹ See Docket No. RM2018–3, Order Adopting Final Rules Relating to Non-Public Information, June 27, 2018, Attachment A at 19–22 (Order No. 4679).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

2020.³ The Commission has received no comment letters on the proposed rule change.

Section 19(b)(2) of the Act⁴ provides that within 45 days of the publication of notice of the filing of a proposed rule change, or within such longer period up to 90 days as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding, or as to which the self-regulatory organization consents, the Commission shall either approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether the proposed rule change should be disapproved. The 45th day after publication of the notice for this proposed rule change is November 27, 2020. The Commission is extending this 45-day time period.

The Commission finds it appropriate to designate a longer period within which to take action on the proposed rule change so that it has sufficient time to consider the proposed rule change. Accordingly, the Commission, pursuant to Section 19(b)(2) of the Act,⁵ designates January 11, 2021 as the date by which the Commission shall either approve or disapprove, or institute proceedings to determine whether to disapprove, the proposed rule change (File No. SR-NYSEArca-2020-84), as modified by Amendment No. 1.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁶

J. Matthew DeLesDernier,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90414; File No. SR-NYSEArca-2020-96]

Self-Regulatory Organizations; NYSE Arca, Inc.; Notice of Filing and Immediate Effectiveness of Proposed Rule Change Modifying the NYSE Arca Options Fee Schedule Regarding the Criteria To Qualify for a Posting Credit on Certain Customer Volume

November 13, 2020.

Pursuant to Section 19(b)(1)¹ of the Securities Exchange Act of 1934 (the

“Act”)² and Rule 19b-4 thereunder,³ notice is hereby given that, on November 2, 2020, NYSE Arca, Inc. (“NYSE Arca” or the “Exchange”) filed with the Securities and Exchange Commission (the “Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the self-regulatory organization. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to modify the NYSE Arca Options Fee Schedule (“Fee Schedule”) regarding the criteria to qualify for a posting credit on certain Customer volume. The Exchange proposes to implement the fee change effective November 2, 2020. The proposed rule change is available on the Exchange’s website at www.nyse.com, at the principal office of the Exchange, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the self-regulatory organization included statements concerning the purpose of, and basis for, the proposed rule change and discussed any comments it received on the proposed rule change. The text of those statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant parts of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and the Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of this filing is to amend the Fee Schedule to modify the criteria to qualify for a posting credit on Customer volume in Penny Issues. The Exchange proposes to implement the rule change on November 2, 2020.

The Exchange currently provides several incentives for OTP Holders and OTP Firms (collectively, “OTPs”) designed to encourage OTPs to direct additional order flow to the Exchange to achieve more favorable pricing and higher credits. Among these incentives are enhanced posted liquidity credits

based on achieving certain percentages of Total Industry Customer equity and ETF option average daily volume (“TCADV”).⁴

Pursuant to the Customer Penny Posting Credit Tiers (the “Penny Credit Tiers”), Customer and Professional Customer orders that post liquidity and are executed on the Exchange earn a base credit of (\$0.25) per contract, and may be eligible for increased credits based on the participant’s activity. Currently, there are seven Penny Credit Tiers, with increasing minimum volume thresholds (as well as increasing credits) associated with each tier, ranging from per contract credits of (\$0.27) to (\$0.50) for OTP Holders that achieve Tiers 1–7, respectively.

Currently, there are two alternative bases for an OTP Holder to qualify for Tier 2, one of which requires the OTP to execute at least 0.25% of TCADV from Customer posted interest in all issues to earn the associated (\$0.43) per contract credit applied to electronic executions of Customer posted interest in Penny Issues.⁵ The Exchange proposes to increase the minimum volume threshold from 0.25% to 0.30% of TCADV from Customer posted interest in all issues for the same (\$0.43) per contract credit.⁶ The Exchange believes this proposed change would still encourage OTP Holders to achieve Tier 2 albeit with increased Customer posted interest, which brings increased liquidity and order flow for the benefit of all market participants.

The Exchange cannot predict with certainty whether any OTP Holders would qualify for Tier 2 under the modified criteria; however, the Exchange believes that OTP Holders would continue to be encouraged to increase Customer posted volume to qualify for this Tier.

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6(b) of the Act,⁷ in general, and

⁴ TCADV includes OCC calculated Customer volume of all types, including Complex Order Transactions and QCC transactions, in equity and ETF options. See Endnote 8 to the Fee Schedule.

⁵ The alternative Tier 2 volume threshold requires an OTP Holder to achieve an “[i]ncrease of at least 0.15% of TCADV in posted interest in all issues, all account types other than Market Maker, over the OTP Holder’s or OTP Firm’s March 2020 level of posted interest in all issues, all account types other than Market Maker.” See Fee Schedule, NYSE Arca OPTIONS: TRADE-RELATED CHARGES FOR STANDARD OPTIONS, CUSTOMER PENNY POSTING CREDIT.

⁶ See proposed Fee Schedule, NYSE Arca OPTIONS: TRADE-RELATED CHARGES FOR STANDARD OPTIONS, CUSTOMER PENNY POSTING CREDIT.

further the objectives of Sections 6(b)(4) and (5) of the Act,⁸ in particular, because it provides for the equitable allocation of reasonable dues, fees, and other charges among its members, issuers and other persons using its facilities and does not unfairly discriminate between customers, issuers, brokers or dealers.

The Proposed Rule Change Is Reasonable

The Exchange operates in a highly competitive market. The Commission has repeatedly expressed its preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system “has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies.”⁹

There are currently 16 registered options exchanges competing for order flow. Based on publicly-available information, and excluding index-based options, no single exchange has more than 16% of the market share of executed volume of multiply-listed equity and ETF options trades.¹⁰ Therefore, currently no exchange possesses significant pricing power in the execution of multiply-listed equity & ETF options order flow. More specifically, in August 2020, the Exchange had slightly more than 10% market share of executed volume of multiply-listed equity & ETF options trades.¹¹

The Exchange believes that the ever-shifting market share among the exchanges from month to month demonstrates that market participants can shift order flow, or discontinue or reduce use of certain categories of products, in response to fee changes. Accordingly, competitive forces constrain options exchange transaction fees. Stated otherwise, changes to exchange transaction fees and rebates can have a direct effect on the ability of an exchange to compete for order flow, including with options exchanges that

offer similar posting credits on Electronic Customer executions.¹²

The Exchange believes that the proposed modification to the criteria to qualify for Tier 2 of the Penny Credit Tiers is reasonably designed to continue to incent OTP Holders to increase the amount and type of Customer interest sent to the Exchange, especially posted interest. The Exchange notes that OTP Holders are still eligible to qualify for Penny Credit Tier 2 under the existing alternative (*see supra* note 5) based on an increase over a specified benchmark in posted interest in all issues, all account types other than Market Maker. By continuing to provide such alternative methods to qualify for a Penny Credit Tier, the Exchange believes the opportunities to qualify for credits is increased, which benefits all participants through increased volume to the Exchange.

To the extent that the proposed change attracts to the Exchange more Customer posted interest in both Penny and non-Penny issues, this increased order flow would continue to make the Exchange a more competitive venue for order execution, which, in turn, promotes just and equitable principles of trade and removes impediments to and perfects the mechanism of a free and open market and a national market system.

The Exchange cannot predict with certainty whether any OTP Holders would qualify for Tier 2 under the modified criteria; however, the Exchange believes that OTP Holders would continue to be encouraged to increase Customer posted volume to qualify for this Tier.

The Proposed Rule Change Is an Equitable Allocation of Credits and Fees

The Exchange believes the proposed rule change is an equitable allocation of its fees and credits. The proposal is based on the amount and type of business transacted on the Exchange and OTP Holders can opt to avail themselves of the modified criteria to qualify for Tier 2 or not. Moreover, the proposal is designed to incent OTP Holders to aggregate all Customer posting interest at the Exchange as a primary execution venue. To the extent that the proposed change attracts more Customer posting interest to the Exchange, this increased order flow would continue to make the Exchange a more competitive venue for, among other things, order execution. Thus, the

Exchange believes the proposed rule change would improve market quality for all market participants on the Exchange and, therefore, attract more order flow to the Exchange thereby improving market-wide quality and price discovery.

The Proposed Rule Change Is Not Unfairly Discriminatory

The Exchange believes it is not unfairly discriminatory to modify the criteria to qualify for Tier 2 because the proposed modification would be available to all similarly-situated market participants on an equal and non-discriminatory basis.

The proposal is based on the amount and type of business transacted on the Exchange and OTP Holders are not obligated to try to achieve Penny Credit Tier 2, as modified, nor are they obligated to execute posted interest. Rather, the proposal is designed to encourage OTP Holders to utilize the Exchange as a primary trading venue for Customer posted interest (if they have not done so previously) or increase volume sent to the Exchange. To the extent that the proposed change attracts to the Exchange more Customer interest, including posted interest, this increased order flow would continue to make the Exchange a more competitive venue for order execution. Thus, the Exchange believes the proposed rule change would improve market quality for all market participants on the Exchange and, therefore, attract more order flow to the Exchange thereby improving market-wide quality and price discovery. The resulting increased volume and liquidity would provide more trading opportunities and tighter spreads to all market participants and thus would promote just and equitable principles of trade, remove impediments to and perfect the mechanism of a free and open market and a national market system and, in general, to protect investors and the public interest.

Finally, the Exchange believes that it is subject to significant competitive forces, as described below in the Exchange’s statement regarding the burden on competition.

B. Self-Regulatory Organization’s Statement on Burden on Competition

In accordance with Section 6(b)(8) of the Act, the Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. Instead, as discussed above, the Exchange believes that the proposed change would encourage the submission of additional liquidity to a public

⁸ 15 U.S.C. 78f(b)(4) and (5).

¹⁰ The OCC publishes options and futures volume in a variety of formats, including daily and monthly volume by exchange, available here: <https://www.theocc.com/market-data/volume/default.jsp>.

¹¹ Based on OCC data, *see id.*, the Exchange’s market share in equity-based options was 9.59% for the month of August 2019 and 10.20% for the month of August 2020.

¹² See e.g., MIAX Pearl Fee Schedule, available here: https://www.miaxoptions.com/sites/default/files/fee_schedule-files/MIAX_PEARL_Fee_Schedule_08252020.pdf (regarding Customer Posting Tiers).

exchange, thereby promoting market depth, price discovery and transparency and enhancing order execution opportunities for all market participants. As a result, the Exchange believes that the proposed change furthers the Commission's goal in adopting Regulation NMS of fostering integrated competition among orders, which promotes "more efficient pricing of individual stocks for all types of orders, large and small."¹³

Intramarket Competition. The proposed change is designed to attract additional order flow (particularly Customer posted interest) to the Exchange. The Exchange believes that the proposed modification to Penny Credit Tier 2 would continue to incent OTP Holders to direct their Customer order flow to the Exchange. Greater liquidity benefits all market participants on the Exchange and increased Customer order flow would increase opportunities for execution of other trading interest. The proposed modification would be available to all similarly-situated market participants that execute Customer posted interest, and, as such, the proposed change would not impose a disparate burden on competition among market participants on the Exchange.

Intermarket Competition. The Exchange operates in a highly competitive market in which market participants can readily favor one of the 16 competing option exchanges if they deem fee levels at a particular venue to be excessive. In such an environment, the Exchange must continually adjust its fees to remain competitive with other exchanges and to attract order flow to the Exchange. Based on publicly-available information, and excluding index-based options, no single exchange has more than 16% of the market share of executed volume of multiply-listed equity and ETF options trades.¹⁴ Therefore, currently no exchange possesses significant pricing power in the execution of multiply-listed equity & ETF options order flow. More specifically, in August 2020, the Exchange had slightly more than 10% market share of executed volume of multiply-listed equity & ETF options trades.¹⁵

The Exchange believes that the proposed modification to the criteria to qualify for Tier 2 reflects this competitive environment because it modifies the Exchange's fees in a manner designed to incent OTP Holders to continue to direct trading interest (particularly Customer posted interest) to the Exchange, to provide liquidity and to attract order flow. To the extent that this purpose is achieved, all the Exchange's market participants should benefit from the improved market quality and increased opportunities for price improvement.

The Exchange believes that the proposed change could promote competition between the Exchange and other execution venues, including those that currently offer similar Customer posting credits, by encouraging additional orders to be sent to the Exchange for execution.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received with respect to the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change is effective upon filing pursuant to Section 19(b)(3)(A)¹⁶ of the Act and subparagraph (f)(2) of Rule 19b-4¹⁷ thereunder, because it establishes a due, fee, or other charge imposed by the Exchange.

At any time within 60 days of the filing of such proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings under Section 19(b)(2)(B)¹⁸ of the Act to determine whether the proposed rule change should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act.

Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NYSEArca-2020-96 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-NYSEArca-2020-96. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NYSEArca-2020-96, and should be submitted on or before December 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁹

J. Matthew DeLesDernier,
Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90422; File No. SR-CboeEDGX-2020-055]

Self-Regulatory Organizations; Cboe EDGX Exchange, Inc.; Notice of Filing of a Proposed Rule Change To Automate the Exchange's Process for Initiating the Re-Opening of a Security Listed on the New York Stock Exchange LLC Following the Resumption of Trading After a Halt, Suspension, or Pause During the Early Trading Session, Pre-Opening Session, or Post-Closing Session

November 13, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 5, 2020, Cboe EDGX Exchange, Inc. ("Exchange" or "EDGX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGX Exchange, Inc. ("EDGX" or the "Exchange") is filing with the Securities and Exchange Commission (the "Commission") a proposed rule change to automate the Exchange's current process for initiating the re-opening of a security listed on the New York Stock Exchange LLC following the resumption of trading after a halt, suspension, or pause during the Early Trading Session, Pre-Opening Session, or Post-Closing Session. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is available on the Exchange's website (http://markets.cboe.com/us/options/regulation/rule_filings/edgx/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed

any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to automate the Exchange's current process for initiating the re-opening of securities listed on the New York Stock Exchange LLC ("NYSE") following the resumption of trading after a halt, suspension, or pause during the Early Trading Session,³ Pre-Opening Session,⁴ or Post-Closing Session.⁵ EDGX Rule 11.7 describes the Exchange's opening process for securities listed on other national securities exchanges, including the process for re-opening such securities following the resumption of trading after a halt, suspension, or pause. Although the Exchange generally employs an automated process for re-opening securities listed on other exchanges, there are situations where manual intervention is currently needed to initiate the Exchange's re-opening process. Specifically, manual intervention is currently needed for the Exchange to initiate its re-opening process in NYSE-listed securities that resume trading after a halt, suspension, or pause when such resumption of trading occurs outside of regular trading hours at times when the Exchange is open for either pre- or post-market trading but NYSE does not trade its listed securities. The proposed rule change would implement an automated process for initiating the re-opening of trading on the Exchange in these circumstances.

Generally, the Exchange's re-opening process is designed to provide an execution at the midpoint of the national best bid and offer ("NBBO") following the initiation of trading on the applicable listing exchange. Specifically, as described in EDGX Rule 11.7(e)(1), the Exchange's re-opening process occurs at the midpoint of the: (i)

First NBBO subsequent to the first reported trade and first two-sided quotation on the listing exchange following the resumption of trading after a halt, suspension, or pause; or (ii) then prevailing NBBO when the first two-sided quotation published by the listing exchange following the resumption of trading after a halt, suspension, or pause if no first trade is reported by the listing exchange within one second of publication of the first two-sided quotation by the listing exchange. In either case, the Exchange must wait for the listing exchange to commence trading before initiating its re-opening procedures.

NYSE operates two trading sessions each day: (1) The "core trading session" between 9:30 a.m. ET to 4:00 p.m. ET, during which all securities are available for trading;⁶ and (2) the "early trading session" between 7:00 a.m. ET and the commencement of the core trading session, during which only securities that trade via unlisted trading privileges are available for trading.⁷ NYSE does not trade its listed securities during its early trading session, *i.e.*, prior to the beginning of regular trading hours, nor does it trade any securities after the end of regular trading hours. As a result, since the Exchange's normal process for re-opening securities listed on other exchanges after a halt, suspension, or pause requires trading to commence on the listing exchange, the Exchange cannot use this process for NYSE-listed securities that resume trading during the Early Trading Session, Pre-Opening Session, or Post-Closing Session.

At the same time, EDGX Rule 11.7(e)(2) provides that where neither of the conditions required for the initiation of the Exchange's automated re-opening process have occurred, trading in the security may be resumed on the Exchange at its discretion. The Exchange therefore periodically invokes its authority pursuant to this rule to manually initiate the resumption of trading in NYSE-listed securities outside of regular trading hours.⁸ However, initiating trading on the Exchange in this manner requires manual intervention by Exchange staff. The Exchange believes that it would be in the interest of market participants and investors to instead automate its process for initiating trading in this

³ The term "Early Trading Session" means the time between 7:00 a.m. and 8:00 a.m. Eastern Time. See EDGX Rule 1.5(ii).

⁴ The term "Pre-Opening Session" means the time between 8:00 a.m. and 9:30 a.m. Eastern Time. See EDGX Rule 1.5(s).

⁵ The term "Post-Closing Session" means the time between 4:00 p.m. and 8:00 p.m. Eastern Time. See EDGX Rule 1.5(r).

⁶ See NYSE Rule 7.34(a)(2). NYSE's core trading session for its listed securities begins with its opening auction and ends with its closing auction if one is conducted. *Id.*

⁷ See NYSE Rule 7.34(a)(1).

⁸ The Exchange estimates that it currently invokes its authority under this rule to manually initiate a re-opening in NYSE-listed securities a handful of times each month.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

situation and avoid the need for manual intervention.

Current Process for NYSE-Listed Securities Re-Opened in Pre- and Post-Market

As discussed, the Exchange currently employs a manual process to initiate the resumption of trading in NYSE-listed securities outside of regular trading hours. This manual process requires personnel from the Exchange's Trade Desk to become aware of, and react to, NYSE's determination to lift a trading halt in one of their listed securities.⁹ Typically, this occurs in one of two ways. First, the Trade Desk performs proactive monitoring of halt notifications from NYSE and subsequent resumptions during the Post-Closing Trading Session.¹⁰ If a security is halted by NYSE during regular trading, Trade Desk personnel will monitor internal tools beginning at 4:00 p.m. ET to identify whether NYSE has lifted the halt. Second, even with the proactive monitoring performed by the Trade Desk, there may be instances where the Exchange has not immediately initiated the manual re-opening of a security that has resumed trading. In such circumstances, Exchange members may reach out to the Trade Desk when they notice that their orders are not reflected in the market. In either case, Trade Desk personnel would check internal tools to confirm that the security is no longer halted, and would routinely invoke the authority described in the paragraph above to initiate the re-opening process on the Exchange after identifying that there are quotes available in the security on other exchanges. The Exchange believes that this manual process is inefficient, and members have also reached out to the Trade Desk with requests that the Exchange replace this process with a more efficient automated process. As a result, the Exchange is proposing to automate its process for initiating trading in this situation to

avoid the need for manual intervention by Exchange staff.

Proposed Automated Process for Initiating the Exchange's Re-Opening

As proposed, the Exchange would replace the manual process described above with automated procedures that would automatically resume trading after one second has passed following the Exchange's receipt of the first NBBO following the resumption of trading after the halt, suspension, or pause.¹¹ This change would allow the Exchange to avoid the need for Trade Desk staff to monitor for resumption messages, and would allow members' orders to be automatically reflected in the market, while continuing to ensure that the Exchange's re-opening is tied to the existence of a market in the security on a national securities exchange(s).¹² With this change, the Exchange would continue to re-open trading in NYSE-listed securities in the same manner that it is able to under EDGX Rule 11.7(e)(2) today, but would not have to rely on manual procedures for initiating the resumption of trading. Specifically, rather than conducting the standard midpoint re-opening described in EDGX Rule 11.7(e)(1) when the listing exchange has not established a market in the security, the Exchange would continue to follow the process described in EDGX Rule 11.7(e)(2), without the need for manual intervention. Thus, as is the case following the manual initiation of re-opening of trading in a security on the Exchange, orders would be processed using the "contingent open" procedures described in EDGX Rule 11.7(d), which provides that orders are to be handled in time sequence and placed on the EDGX Book, routed, cancelled, or executed in accordance with the terms of the order.¹³

In the event that there is no available NBBO in the security, the proposed automated procedures would not resume trading on the Exchange, but the Exchange would retain the ability to

manually resume trading at its discretion pursuant to current EDGX Rule 11.7(e)(2). To increase transparency around when the Exchange could invoke this discretion, the Exchange proposes to amend EDGX Rule 11.7(e)(2) to specifically state that the discretion provided pursuant to this rule applies when a security has not otherwise been re-opened for trading on the Exchange pursuant to Proposed EDGX Rule 11.7(e)(3). This change would not substantively modify the scope of the discretion provided pursuant to EDGX Rule 11.7(e)(2). However, the Exchange believes that modifying the rule in this manner would serve to increase transparency by specifically identifying the times when this discretion is not relevant due to the fact that the Exchange has successfully re-opened the security using its automated procedures.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of Section 6(b) of the Act,¹⁴ in general, and Section 6(b)(5) of the Act,¹⁵ in particular, in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest and not to permit unfair discrimination between customers, issuers, brokers, or dealers. Today, Trade Desk staff must manually intervene to initiate the re-opening on the Exchange of NYSE-listed securities following the resumption of trading after a halt, suspension, or pause, if the security resumes trading during the Early Trading Session, Pre-Opening Session, or Post-Closing Session. Although NYSE may trade securities pursuant to unlisted trading privileges prior to regular trading hours, it does not offer pre- or post-market trading for its listed securities. Since the Exchange's current rules require trading to have commenced on the primary listing market in order to initiate the Exchange's automated process for re-opening securities following a halt, suspension, or pause, the Exchange is forced to periodically invoke manual procedures to resume trading these securities pursuant to unlisted trading privileges. The Exchange believes, however, that an automated process would be more consistent and reliable for market participants and investors as such a process would not rely on manual intervention by Trade Desk staff

⁹ Section 203.07 of NYSE's Listed Company Manual describes its trading halt procedures, and provides NYSE with discretion to declare a material news halt in its listed securities, as well as to lift such a halt when it determines that trading should resume. As a matter of practice, NYSE may exercise its discretion to lift a trading halt in its listed securities outside of its own hours for trading such securities. In that event, NYSE would disseminate a resume message through the SIP, which would permit trading to resume on other national securities exchanges, including the Exchange.

¹⁰ Although it is possible for a resumption to take place in the Early Trading and Pre-Opening Sessions, Trade Desk personnel do not monitor for resumptions in those trading sessions as this scenario normally occurs in the Post-Closing Trading Session.

¹¹ The Exchange utilizes a combination of direct feeds and the applicable securities information processor ("SIP") feeds to determine the NBBO in a security. See EDGX Rule 13.4. In addition, such NBBO information, as well as applicable halt and resume messages, are disseminated to market participants through the SIP feeds during the pre- and post-market trading hours of all U.S. equities exchanges.

¹² Pursuant to Regulation NMS, the NBBO in a given security is established by the best bid and best offer in such security calculated and disseminated on a current and continuing basis by a plan processor pursuant to an effective national market system plan. See 17 CFR 242.600(b)(43). As such, an NBBO may be established when one or more national securities exchanges are disseminating quotations in an equity security.

¹³ See EDGX Rule 11.7(e)(2),(d).

¹⁴ 15 U.S.C. 78f(b).

¹⁵ 15 U.S.C. 78f(b)(5).

before the Exchange can resume trading. In addition to generally increasing efficiency of the re-opening process, the Exchange believes that the proposed automated procedures would reduce the need for members to contact the Trade Desk with questions about the status of their orders. Further, such a process would be responsive to member requests to improve on the inefficient manual process currently employed.

The proposed rule change would promote the public interest and the protection of investors by eliminating the need for manual intervention and replacing it with a more consistent procedure that would be applied by its trading systems on an automated basis. The proposed change would not impact the process by which the security would be re-opened, which would continue to follow the "contingent open" procedures used today. However, instead of relying on Trade Desk staff to manually re-open trading in the security, trading would resume on the Exchange once one second has passed following the Exchange's receipt of the first NBBO following the resumption of trading after the halt, suspension, or pause. This condition is designed to ensure that a market has been established in the security prior to resuming trading on the Exchange, and mirrors the steps that Trade Desk personnel would conduct today to verify that there is a market in the security on one or more other exchanges before manually initiating a re-opening. Specifically, trading on the Exchange would not resume until one second after an NBBO has been established in the security following the resumption of quoting on at least one other national securities exchange. The Exchange believes that resuming trading once this condition has been satisfied would ensure that trading can be resumed in an automated and efficient fashion, while also ensuring that the re-opening of trading on the Exchange continues to be tied to the existence of an established market in the security on one or more other exchanges in the absence of trading on the primary listing market during the pre- and post-market. In addition, the Exchange would continue to have the authority to manually initiate the re-open of trading pursuant to EDGX Rule 11.7(e)(2), which would allow the Exchange to re-open trading in the event that trading is not re-opened pursuant to its automated procedures. The proposed amendments to EDGX Rule 11.7(e)(2) would increase the transparency of that rule by specifically noting that this discretion would be used when the Exchange is not

otherwise able to re-open trading in an automated fashion under its rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is designed to facilitate a more efficient re-opening process in situations where the Exchange's current rules would require unnecessary and inefficient manual intervention, and is not designed to address any competitive issues. The Exchange therefore does not believe that the proposed rule change would have any significant impact on competition. Rather than impact the competitive environment, the proposed rule change would benefit members and investors by eliminating the need for manual intervention when initiating the Exchange's re-opening process for NYSE-listed securities that resume trading during the Early Trading Session, Pre-Opening Session, or Post-Closing Session.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

A. By order approve or disapprove such proposed rule change, or

B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CboeEDGX-2020-055 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-CboeEDGX-2020-055. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR-CboeEDGX-2020-055 and should be submitted on or before December 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁶

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90431/November 13, 2020]

Securities Exchange Act of 1934; In the Matter of: NYSE Arca, Inc., 11 Wall St., New York, NY 10005, File No. SR-NYSEArca-2019-01; Order Setting Aside the Order by Delegated Authority Disapproving SR-NYSEArca-2019-01

On January 28, 2019, NYSE Arca, Inc. ("NYSE Arca") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Exchange Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to list and trade shares of the Bitwise Bitcoin ETF Trust under NYSE Arca Rule 8.201-E. The proposed rule change was published for comment in the **Federal Register** on February 15, 2019.³ On March 29, 2019, pursuant to Section 19(b)(2) of the Exchange Act,⁴ the Division of Trading and Markets ("Division"), for the Commission pursuant to delegated authority, designated a longer period within which to approve the proposed rule change, disapprove the proposed rule change, or institute proceedings to determine whether to approve or disapprove the proposed rule change.⁵ On May 7, 2019, NYSE Arca filed Amendment No. 1 to the proposed rule change, which replaced and superseded the proposed rule change as originally filed, and on May 14, 2019, the Division, for the Commission pursuant to delegated authority, published the proposed rule change, as modified by Amendment No. 1, for notice and comment and instituted proceedings under Section 19(b)(2)(B) of the Exchange Act⁶ to determine whether to approve or disapprove the proposed rule change, as modified by Amendment No. 1.⁷ On August 12, 2019, the Division, for the Commission pursuant to delegated authority, extended the period for consideration of the proposed rule change, as modified by Amendment No. 1.⁸ On October 9, 2019, the Division, for the Commission pursuant to delegated

authority,⁹ disapproved the proposed rule change, as modified by Amendment No. 1.¹⁰

On October 15, 2019, the Secretary of the Commission notified NYSE Arca that, pursuant to Commission Rule of Practice 431,¹¹ the Commission would review the Division's action pursuant to delegated authority and that the Division's action pursuant to delegated authority was stayed until the Commission orders otherwise.¹² On November 12, 2019, the Commission issued a scheduling order allowing the filing of additional statements.¹³

On January 13, 2020, NYSE Arca withdrew the proposed rule change (SR-NYSEArca-2019-01).¹⁴

Under Commission Rule of Practice 431(a), the Commission may "affirm, reverse, modify, set aside or remand for further proceedings, in whole or in part, any action made pursuant to" delegated authority.¹⁵ We find that, in light of the NYSE Arca's withdrawal of the proposed rule change, it is appropriate to set aside the Delegated Order.

Accordingly, *it is ordered* that the October 9, 2019, order disapproving by delegated authority NYSE Arca's proposed rule change number SR-NYSEArca-2019-01, be, and it hereby is, set aside.

By the Commission.

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90415; File No. SR-DTC-2020-013]

Self-Regulatory Organizations; The Depository Trust Company; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend the Reorganizations Service Guide

November 13, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 12, 2020, The Depository Trust Company ("DTC") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II and III below, which Items have been prepared by the clearing agency. DTC filed the proposed rule change pursuant to Section 19(b)(3)(A) of the Act³ and Rule 19b-4(f)(4) thereunder.⁴ The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Clearing Agency's Statement of the Terms of Substance of the Proposed Rule Change

The purpose of the proposed rule change⁵ is to amend the Reorganizations Guide to (1) establish November 16, 2020 as the date for the retirement of the Reorganization Inquiry for Participants ("RIPS")⁶ function for mandatory corporate action events,⁷ and (2) make clarifying and technical changes, as more fully described below.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

³ 15 U.S.C. 78s(b)(3)(A).

⁴ 17 CFR 240.19b-4(f)(4).

⁵ Each term not otherwise defined herein has its respective meaning as set forth in the Rules, By-Laws and Organization Certificate of DTC (the "Rules") and the Reorganizations Service Guide ("Reorganizations Guide"), available at <http://www.dtcc.com/legal/rules-and-procedures.aspx>.

⁶ The RIPS function on the Participant Terminal System ("PTS") is the functional equivalent of the Reorganizations and Redemptions function on the Participant Browser Service System ("PBS"). The PBS Reorganizations and Redemptions function will be retired concurrently with the RIPS function for mandatory reorganizations events. PTS and PBS are user interfaces for DTC's settlement and asset services functions. PTS is mainframe-based and PBS is web-based with a mainframe back-end. Participants may use either PTS or PBS, as they are functionally equivalent. References to a particular PTS function in this rule filing include the corresponding PBS function.

⁷ RIPS will continue to be available for voluntary reorganizations events. See Important Notice 13116-20 (August 3, 2020), available at <https://www.dtcc.com/legal/important-notices>.

II. Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the clearing agency included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The clearing agency has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

(A) Clearing Agency's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to amend the Reorganizations Guide to (1) establish November 16, 2020 as the date for the retirement of the RIPS function for mandatory corporate action events, and (2) make clarifying and technical changes, as more fully described below.

(i) RIPS (Reorganization Inquiry for Participants) Retirement

On May 21, 2019, DTC filed with the Commission a proposed rule change to, among other things, update its corporate action service by transitioning certain corporate action functions on PTS and PBS for the processing of Reorganizations to the Corporate Action Web ("CA Web")⁸ system.⁹ The rule change provided that, at the conclusion of the pilot test phase in Q2 of 2019, Reorganizations activity within the ADJI (Adjustment Inquiries) function, the RIPS function for mandatory reorganizations, and the SDAR Dept. C (Reorg/Redemptions/Dividend Allocations) function would be retired from PTS/PBS and the equivalent functionality would only be available on CA Web.

Subsequent to the May 21, 2019 rule filing, DTC had received feedback from Participants indicating that they needed

additional time to test the parallel RIPS functionality on CA Web, the "Reorganizations Announcements" function. DTC postponed the retirement of the RIPS function for mandatory corporate actions events from PTS to an unspecified future date in order to provide Participants with the additional time for testing.¹⁰

DTC understands that the Participants have completed their testing. Thus, pursuant to this proposed rule change, DTC would retire the RIPS function for mandatory corporate actions events from PTS on November 16, 2020. In addition, DTC would amend the Reorganizations Guide to reference the retirement and to remove references to RIPS for mandatory corporate actions events.

(ii) Clarifying and Technical Changes

Pursuant to the proposed rule change, DTC would make other technical and clarifying changes to the Reorganizations Guide, as described below.

1. "Important Legal Information" Section

Pursuant to the proposed rule change, DTC would update the copyright date from 2019 to 2020.

2. "About Reorganization Services" Section

In the "Preparing to Use the Services" subsection, DTC is proposing to remove the chart of PTS/PBS functions that were retired in 2019. These functions have since been replaced by CA Web functionality.

In the "How Reorganizations Work" subsection, DTC is proposing to delete "Participant Terminal System (PTS) functions" and "Participant Browser Service (PBS)" from the list of delivery mechanism that DTC uses to provide Participants with information pertaining to their entitlements. The PTS/PBS functions that had been used for this purpose were retired.

In the "Associated PTS/PBS and CA Web Functions" subsection, DTC is proposing to delete the ART, POS, SDAR, ADJI rows from the table, as these functions were retired in 2019.¹¹ In addition, DTC is proposing to delete the row for LENP, which was replaced by the Legal Notice System (LENS).¹² Further, pursuant to the proposed rule

change, DTC would delete the "X" in the Mand column for the RIPS row, to reflect the retirement of RIPS for mandatory reorganizations. DTC would also delete the "X" in the PXY column for RIPS because Proxy announcements are not viewed in RIPS, but rather are viewed in PTS PXY and announced in PTS PANS.

3. "Announcements" Section

In the "How the Announcement Service Works" subsection, DTC is proposing to update the final sentence in the subsection to reflect that announcement information is also delivered electronically via ISO 20022 messaging.

In the "How to View Mandatory and Voluntary Reorganization Announcements" subsection, DTC is proposing to amend the first sentence and insert a footnote to reflect that, after the RIPS function for mandatory reorganizations announcements is retired on November 16, 2020, the RIPS function would only be available for voluntary reorganizations announcements.

4. "Processing" Section

In the "Mandatory Reorganizations" subsection, in the "Various Types of Mandatory Reorganizations" table, DTC is proposing to edit the description for the Liquidation event by deleting "securities and/or." The reference to securities is incorrect because DTC does not distribute securities under a Liquidation event type. Securities are distributed under a plan of reorganization.

In the "Reorganization (RRG) Segregated Account" subsection, for consistency, DTC is proposing to move the sentence "Contra-CUSIP numbers are used to segregate your position (representing instructions submitted) for voluntary offers and put bond options." to the "About Contra-CUSIPs" subsection.

In the "About Contra-CUSIPs" subsection, DTC is proposing to streamline the description of contra-CUSIPs to enhance readability, and, for accuracy, to update the description to reflect that a contra-CUSIP contains the same first three digits of the issuer number assigned to the subject security. Further, DTC is proposing to simplify the description of a contra-CUSIP by removing text and examples that address the specific numerical construction of a contra-CUSIP. In addition to the three issuer digits, DTC generates the other digits of a contra-CUSIP on the basis of multiple factors, including, but not limited to, security characteristics, event types, and

⁸ In PTS/PBS, corporate actions are announced using DTC proprietary codes to signify event types. CA Web replaces DTC's proprietary codes with market standard language. For example, a cash dividend payment that PTS/PBS identifies as a "08" function code is identified in CA Web as a "Cash Dividend" event. Additionally, CA Web incorporates the entire lifecycle of an event into one platform with a unique corporate action identifier that follows the event through its lifecycle. CA Web gives Participants the ability to customize screen displays and offers flexible methods for event search, neither of which is available in the PTS/PBS systems.

⁹ See Securities Exchange Act Release No. 85986 (May 31, 2019), 84 FR 26466 (June 6, 2019) (SR-DTC-2019-003).

¹⁰ See Securities Exchange Act Release No. 86255 (July 1, 2019), 84 FR 32508 (July 8, 2019) (SR-DTC-2019-004).

¹¹ See Securities Exchange Act Release No. 85986 (May 31, 2019), 84 FR 26466 (June 6, 2019) (SR-DTC-2019-003).

¹² See Important Notice 6525-10 (March 31, 2010), *supra* note 7.

currency. These other digits are used by DTC for internal tracking and accounting purposes and are not intended to provide information to Participants about the offer or event. The current language of the Reorganizations Guide does not reflect the full scope of the DTC process. In addition, because it is an internal DTC process for internal DTC use, DTC believes that Participants do not need, and may be confused by, information about how DTC generates the specific digits in a contra-CUSIP.

5. "Instructions/Expirations" Section

In the second paragraph of the "Accepting an ATOP-Eligible Offer" subsection, DTC is proposing to insert "ISO 20022" in the list of interfaces through which a Participant can view a notice of a tender offer.

In the "Submitting a Protect for an ATOP-Eligible Offer" subsection, DTC is proposing to insert additional language into the Warning! paragraph to clarify that DTC will only accept cover of protect instructions outside of PTS PTOPTOP or PBS Voluntary Tenders and Exchanges when the window for submitting instructions through PTS PTOPTOP or PBS Voluntary Tenders and Exchanges has closed, and only if the Participant contacted the agent before the offer had actually expired. If the offer expired prior to the Participant contacting the agent, any agreements to handle the protect will be required to be completed outside DTC. Further, DTC is proposing to clarify that if the Participant contacts the agent before the actual expiration of the offer and the agent agrees to accept an email submission directly, the agent will notify DTC and the Participant should email a Protect Submission Form to DTC. Once the communication from both the agent and Participant has been received by DTC, with each having provided the appropriate indemnification language, DTC will then input the protect submission on behalf of the Participant.

In the "Submitting a Cover of Protect via PTS PTOPTOP or PBS Voluntary Tenders and Exchanges for an ATOP-Eligible Offer" subsection, DTC is proposing to insert additional language into the Warning! paragraph to clarify that DTC will not accept cover of protect instructions outside of PTS PTOPTOP or PBS Voluntary Tenders and Exchanges (i) if the window for submitting instructions through PTS PTOPTOP or PBS Voluntary Tenders and Exchanges is still open, or (ii) if the original protect was not accepted in PTS PTOPTOP or PBS Voluntary Tenders and Exchanges. In the paragraph below the Warning!

paragraph, DTC is proposing to insert "ISO 20022 message" in the lists of interfaces through which a Participant can view the notice of a tender offer.

In the "Submitting a Cover of Protect via PTS PTOPTOP or PBS Voluntary Tenders and Exchanges on Behalf of Another Participant" subsection, DTC is proposing to insert additional language into the Warning! paragraph to clarify that in order for one Participant to cover a protect on behalf of a second Participant, the second Participant must have either (i) submitted its protect via PTS/PBS, or (ii) submitted a protect to the agent via email that was subsequently communicated to DTC and input into PTS PTOPTOP by DTC.

In the "Procedures for Submitting Instructions Outside of PTS/PBS"/"Submitting the Instruction" subsection, in the fifth Warning! paragraph, DTC is proposing to insert "CA Web and ISO 20022 messages" as interfaces through which a Participant can view information about a tender offer.

2. Statutory Basis

Section 17A(b)(3)(F) of the Act requires, *inter alia*, that the Rules be designed to promote the prompt and accurate clearance and settlement of securities transactions.¹³

DTC believes that the proposed rule change with respect to establishing November 16, 2020 as the date for the retirement of the RIPS function for mandatory corporate actions events is consistent with Section 17(A)(b)(3)(F) of the Act referenced above. By requiring Participants to utilize the more flexible and robust CA Web interface, DTC would be promoting more efficient access to reorganization services and a broader view of a reorganization event for Participants. Therefore, DTC believes that the proposed rule change would promote the prompt and accurate clearance and settlement of securities transactions relating to mandatory corporate actions events, consistent with Section 17A(b)(3)(F) of the Act, cited above.

DTC believes that the proposed rule change to amend the Reorganizations Guide to make technical and clarifying changes is consistent with Section 17(A)(b)(3)(F) of the Act referenced above because it would enhance the clarity and transparency of the Reorganizations Guide. By enhancing the clarity and transparency of the Reorganizations Guide, the proposed rule change would allow Participants to more efficiently and effectively conduct their business in connection with

processing reorganization events and settling related securities transactions. Therefore, DTC believes that the proposed rule change is designed to promote the prompt and accurate clearance and settlement of securities transactions related to Reorganizations, consistent with Section 17A(b)(3)(F) of the Act, cited above.

(B) Clearing Agency's Statement on Burden on Competition

DTC believes that the proposed rule change with respect to amending the Reorganizations Guide to establish November 16, 2020 as the date for the retirement of the RIPS function for mandatory corporate actions events would not have any impact on competition. As discussed above, DTC had originally postponed the retirement date to allow Participants additional time to test the parallel functionality on CA Web. As Participants' testing is now complete, the retirement of RIPS for mandatory corporate actions, which applies to all Participants equally, can proceed. Therefore, DTC believes that the proposed rule change with respect to amending the Reorganizations Guide to establish November 16, 2020 as the date for the retirement of the RIPS function for mandatory corporate actions events would not have any impact on competition.¹⁴

DTC believes that the proposed rule change to amend the Reorganizations Guide to make technical and clarifying changes would not have any impact on competition because it merely would enhance the clarity and transparency of the Reorganizations Guide, and therefore would not affect the rights and obligations of any party.

(C) Clearing Agency's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments relating to the proposed rule change have not been solicited or received. DTC will notify the Commission of any written comments received by DTC.

III. Date of Effectiveness of the Proposed Rule Change, and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A) ¹⁵ of the Act and paragraph (f) ¹⁶ of Rule 19b-4 thereunder. At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend

¹⁴ 15 U.S.C. 78q-1(b)(3)(I).

¹⁵ 15 U.S.C. 78s(b)(3)(A).

¹⁶ 17 CFR 240.19b-4(f).

¹³ 15 U.S.C. 78q-1(b)(3)(F).

such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-DTC-2020-013 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549.

All submissions should refer to File Number SR-DTC-2020-013. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of DTC and on DTCC's website (<http://dtcc.com/legal/sec-rule-filings.aspx>). All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-DTC-

2020-013 and should be submitted on or before December 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁷

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90423; File No. SR-NASDAQ-2020-074]

Self-Regulatory Organizations; The Nasdaq Stock Market LLC; Notice of Filing and Immediate Effectiveness of Proposed Rule Change To Amend the Exchange's Transaction Credits at Equity 7, Section 118

November 13, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 2, 2020, The Nasdaq Stock Market LLC ("Nasdaq" or "Exchange") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to amend the Exchange's transaction credits at Equity 7, Section 118, as described further below.

The text of the proposed rule change is available on the Exchange's website at <https://listingcenter.nasdaq.com/rulebook/nasdaq/rules>, at the principal office of the Exchange, and at the Commission's Public Reference Room.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The

Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange proposes to amend its schedule of credits at Equity 7, Section 118, to add a new credit for executing orders in securities in all three Tapes.

Presently, the Exchange offers its members a credit of \$0.00295 per share of displayed orders/quotes (other than Supplemental Orders or Designated Retail Orders) that provide liquidity to the extent such members (i) have shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent 0.70% or more of Consolidated Volume³ during the month; (ii) execute 0.20% or more of Consolidated Volume during the month through providing midpoint orders and through MELO; and (iii) remove at least 1.10% of Consolidated Volume during the month of Consolidated Volume during the month through one or more of their Nasdaq Market Center MPIDs [sic]. The purpose of this credit is to incent members to engage in substantial volumes of liquidity adding and removal activity on the Exchange during a month and, in particular, to execute a substantial percentage of such volume through the provision of midpoint and Midpoint Extended Life Orders, or "MELOs."

The Exchange now proposes to add a new, higher credit for members that meet similar criteria, albeit with higher volume requirements. Specifically, the Exchange proposes to provide a new credit of \$0.00305 per share of displayed orders/quotes (other than Supplemental Orders or Designated Retail Orders) that provide liquidity to the extent such members (i) have shares of liquidity provided in all securities through one or more of its Nasdaq Market Center MPIDs that represent 1.20% or more of Consolidated

³ Pursuant to Equity 7, Section 118(a), the term "Consolidated Volume" means the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of a member's trading activity the date of the annual reconstitution of the Russell Investments Indexes is excluded from both total Consolidated Volume and the member's trading activity.

¹⁷ 17 CFR 200.30-3(a)(12).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

Volume⁴ during the month; (ii) execute 0.40% or more of Consolidated Volume during the month through providing midpoint orders and through MELO; and (iii) remove at least 1.10% of Consolidated Volume during the month of Consolidated Volume during the month through one or more of their Nasdaq Market Center MPIDs [sic].

In incentivizing members to increase the extent of their liquidity adding and removal activity on the Exchange, and the extent of their midpoint and M-ELO execution activity on the Exchange, the Exchange intends to improve the overall quality and attractiveness of the market.

Impact of the Changes

Those participants that act as significant providers and removers of liquidity, and who execute substantial volumes of midpoint and M-ELO orders on the Exchange, will benefit directly from the proposed addition of the new credit. Other participants will also benefit from the new credit insofar as any increase in liquidity adding and removal activity on the Exchange will improve the overall quality of the market, to the benefit of all members.

The Exchange notes that its proposals are not otherwise targeted at or expected to be limited in their applicability to a specific segment of market participants nor will they apply differently to different types of market participants.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,⁵ in general, and further the objectives of Sections 6(b)(4) and 6(b)(5) of the Act,⁶ in particular, in that it provides for the equitable allocation of reasonable dues, fees and other charges among members and issuers and other persons using any facility, and is not designed to permit unfair discrimination between customers, issuers, brokers, or dealers. The proposal is also consistent with Section 11A of the Act relating to the establishment of the national market system for securities.

⁴ Pursuant to Equity 7, Section 118(a), the term "Consolidated Volume" means the total consolidated volume reported to all consolidated transaction reporting plans by all exchanges and trade reporting facilities during a month in equity securities, excluding executed orders with a size of less than one round lot. For purposes of calculating Consolidated Volume and the extent of a member's trading activity the date of the annual reconstitution of the Russell Investments Indexes is excluded from both total Consolidated Volume and the member's trading activity.

⁵ 15 U.S.C. 78f(b).

⁶ 15 U.S.C. 78f(b)(4) and (5).

The Proposal is Reasonable

The Exchange's proposed change to its schedule of credits is reasonable in several respects. As a threshold matter, the Exchange is subject to significant competitive forces in the market for equity securities transaction services that constrain its pricing determinations in that market. The fact that this market is competitive has long been recognized by the courts. In *NetCoalition v. Securities and Exchange Commission*, the D.C. Circuit stated as follows: "[n]o one disputes that competition for order flow is 'fierce.' . . . As the SEC explained, '[i]n the U.S. national market system, buyers and sellers of securities, and the broker-dealers that act as their order-routing agents, have a wide range of choices of where to route orders for execution'; [and] 'no exchange can afford to take its market share percentages for granted' because 'no exchange possesses a monopoly, regulatory or otherwise, in the execution of order flow from broker dealers'. . . ." ⁷

The Commission and the courts have repeatedly expressed their preference for competition over regulatory intervention in determining prices, products, and services in the securities markets. In Regulation NMS, while adopting a series of steps to improve the current market model, the Commission highlighted the importance of market forces in determining prices and SRO revenues and, also, recognized that current regulation of the market system "has been remarkably successful in promoting market competition in its broader forms that are most important to investors and listed companies."⁸

Numerous indicia demonstrate the competitive nature of this market. For example, clear substitutes to the Exchange exist in the market for equity security transaction services. The Exchange is only one of several equity venues to which market participants may direct their order flow. Competing equity exchanges offer similar tiered pricing structures to that of the Exchange, including schedules of rebates and fees that apply based upon members achieving certain volume thresholds.

Within this environment, market participants can freely and often do shift their order flow among the Exchange and competing venues in response to

⁷ *NetCoalition v. SEC*, 615 F.3d 525, 539 (D.C. Cir. 2010) (quoting Securities Exchange Act Release No. 59039 (December 2, 2008), 73 FR 74770, 74782–83 (December 9, 2008) (SR–NYSEArca–2006–21)).

⁸ Securities Exchange Act Release No. 51808 (June 9, 2005), 70 FR 37496, 37499 (June 29, 2005) ("Regulation NMS Adopting Release").

changes in their respective pricing schedules. Within the foregoing context, the proposal represents a reasonable attempt by the Exchange to increase its liquidity and market share relative to its competitors.

The Exchange has designed its proposed new credit to provide increased overall incentives to members to increase their liquidity adding and removal activity on the Exchange, and their execution activity in midpoint and M-ELO orders. An increase in liquidity adding and removal activity on the Exchange will, in turn, improve the quality of the Nasdaq market and increase its attractiveness to existing and prospective participants.

The Exchange notes that those market participants that are dissatisfied with the new credit are free to shift their order flow to competing venues that offer them lower charges or higher credits.

The Proposal is an Equitable Allocation of Credits

The Exchange believes its proposal will allocate its credits fairly among its market participants. It is equitable for the Exchange to establish the proposed new credit as a means of incentivizing members to provide and remove meaningful amounts of liquidity to the Exchange, including in midpoint and M-ELO orders. To the extent that the Exchange succeeds in increasing overall activity on the Exchange, including in midpoint and M-ELO orders, then the Exchange would experience improvements in its market quality, which would benefit all market participants.

Any participant that is dissatisfied with the proposed new credit is free to shift their order flow to competing venues that provide more generous pricing or less stringent qualifying criteria.

The Proposed Credit is not Unfairly Discriminatory

The Exchange believes that the proposal is not unfairly discriminatory. As an initial matter, the Exchange believes that nothing about its volume-based tiered pricing model is inherently unfair; instead, it is a rational pricing model that is well-established and ubiquitous in today's economy among firms in various industries—from co-branded credit cards to grocery stores to cellular telephone data plans—that use it to reward the loyalty of their best customers that provide high levels of business activity and incent other customers to increase the extent of their business activity. It is also a pricing model that the Exchange and its

competitors have long employed with the assent of the Commission. It is fair because it incentivizes customer activity that increases liquidity, enhances price discovery, and improves the overall quality of the equity markets.

Moreover, the Exchange believes that its new proposed credit is not unfairly discriminatory because it stands to improve the overall market quality of the Exchange, to the benefit of all market participants, by incentivizing members to provide and remove meaningful amounts of liquidity.

Finally, any participant that is dissatisfied with the proposed new credit is free to shift their order flow to competing venues that provide more generous pricing or less stringent qualifying criteria.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act.

Intramarket Competition

The Exchange does not believe that its proposal will place any category of Exchange participant at a competitive disadvantage. To the contrary, the proposed change will provide an opportunity for members to receive a higher credit based upon their market-improving behavior. Any member may elect to provide the levels of market activity required in order to receive the new credit. Furthermore, all members of the Exchange will benefit from any increase in market activity that the proposals effectuates.

Moreover, members are free to trade on other venues to the extent they believe that the proposed credit is too low or the qualification criteria are not attractive. As one can observe by looking at any market share chart, price competition between exchanges is fierce, with liquidity and market share moving freely between exchanges in reaction to fee and credit changes. The Exchange notes that the tier structure is consistent with broker-dealer fee practices as well as the other industries, as described above.

Intermarket Competition

The Exchange believes that its proposal will not burden competition because the Exchange's execution services are completely voluntary and subject to extensive competition both from the multitude of other live exchanges and from off-exchange venues. The Exchange notes that it operates in a highly competitive market

in which market participants can readily favor competing venues if they deem fee levels at a particular venue to be excessive, or rebate opportunities available at other venues to be more favorable. In such an environment, the Exchange must continually adjust its fees and credits to remain competitive with other exchanges and with alternative trading systems that have been exempted from compliance with the statutory standards applicable to exchanges. Because competitors are free to modify their own fees in response, and because market participants may readily adjust their order routing practices, the Exchange believes that the degree to which fee and credit changes in this market may impose any burden on competition is extremely limited.

The proposed new credit is reflective of this competition because, even as one of the largest U.S. equities exchanges by volume, the Exchange has less than 20% market share, which in most markets could hardly be categorized as having enough market power to burden competition. Moreover, as noted above, price competition between exchanges is fierce, with liquidity and market share moving freely between exchanges in reaction to fee and credit changes. This is in addition to free flow of order flow to and among off-exchange venues which comprises upwards of 40% of industry volume.

The Exchange's proposal is pro-competitive in that the Exchange intends for it to increase liquidity adding and removal activity on the Exchange and thereby render the Exchange a more attractive and vibrant venue to market participants.

In sum, if the change proposed herein is unattractive to market participants, it is likely that the Exchange will lose market share as a result. Accordingly, the Exchange does not believe that the proposed change will impair the ability of members or competing order execution venues to maintain their competitive standing in the financial markets.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were either solicited or received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

The foregoing rule change has become effective pursuant to Section 19(b)(3)(A)(ii) of the Act.⁹

⁹ 15 U.S.C. 78s(b)(3)(A)(ii).

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is: (i) Necessary or appropriate in the public interest; (ii) for the protection of investors; or (iii) otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-NASDAQ-2020-074 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-NASDAQ-2020-074. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit

personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-NASDAQ-2020-074, and should be submitted on or before December 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁰

J. Matthew DeLesDernier,
Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90427/November 13, 2020]

Securities Exchange Act of 1934

In the Matter of: Cboe Exchange, Inc., 400 South LaSalle Street, Chicago, IL 60605, File No. SR-CBOE-2018-060; Order Setting Aside the Order by Delegated Authority Approving SR-CBOE-2018-060

On August 16, 2018, Cboe Exchange, Inc. (“Exchange” or “Cboe”) filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Exchange Act”)¹ and Rule 19b-4 thereunder,² a proposed rule change to amend Rule 6.49A (Transfer of Positions). The proposed rule change was published for comment in the **Federal Register** on September 4, 2018.³ The Commission received no comments during the comment period.⁴ On October 16, 2018, the Division of Trading and Markets, for the Commission pursuant to delegated authority,⁵ approved the proposed rule change.⁶

On October 23, 2018, Susquehanna International Group, LLP submitted a notice of intention to petition the

Delegated Order,⁷ and on October 30, 2018, Susquehanna International Group, LLP filed a petition for review of the Delegated Order.⁸

On February 11, 2019, Cboe withdrew the proposed rule change (SR-CBOE-2018-060).⁹

Under Commission Rule of Practice 431(a), the Commission may “affirm, reverse, modify, set aside or remand for further proceedings, in whole or in part, any action made pursuant to” delegated authority.¹⁰ We find that, in light of Cboe’s withdrawal of the proposed rule change, it is appropriate to set aside the Delegated Order.

Accordingly, *it is ordered* that the October 16, 2018 order approving by delegated authority Cboe’s proposed rule change number SR-CBOE-2018-060, be, and it hereby is, set aside.

By the Commission.

J. Matthew DeLesDernier,
Assistant Secretary.

BILLING CODE 8011–01–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–90421; File No. SR–CboeBYX–2020–032]

Self-Regulatory Organizations; Cboe BYX Exchange, Inc.; Notice of Filing of a Proposed Rule Change To Automate the Exchange’s Process for Initiating the Re-Opening of a Security Listed on the New York Stock Exchange LLC Following the Resumption of Trading After a Halt, Suspension, or Pause During the Early Trading Session, Pre-Opening Session, or After Hours Trading Session

November 13, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b–4 thereunder,² notice is hereby given that on November 5, 2020, Cboe BYX Exchange, Inc. (“Exchange” or “BYX”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe BYX Exchange, Inc. (“BYX” or the “Exchange”) is filing with the Securities and Exchange Commission (the “Commission”) a proposed rule

change to automate the Exchange’s current process for initiating the re-opening of a security listed on the New York Stock Exchange LLC following the resumption of trading after a halt, suspension, or pause during the Early Trading Session, Pre-Opening Session, or After Hours Trading Session. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange’s website (http://markets.cboe.com/us/equities/regulation/rule_filings/byx/), at the Exchange’s Office of the Secretary, and at the Commission’s Public Reference Room.

II. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization’s Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to automate the Exchange’s current process for initiating the re-opening of securities listed on the New York Stock Exchange LLC (“NYSE”) following the resumption of trading after a halt, suspension, or pause during the Early Trading Session,³ Pre-Opening Session,⁴ or After Hours Trading Session.⁵ BYX Rule 11.23 describes the Exchange’s opening process for securities listed on other national securities exchanges, including the process for re-opening such securities following the resumption of trading after a halt, suspension, or pause. Although the Exchange generally employs an automated process for re-opening securities listed on other exchanges, there are situations where

manual intervention is currently needed to initiate the Exchange’s re-opening process. Specifically, manual intervention is currently needed for the Exchange to initiate its re-opening process in NYSE-listed securities that resume trading after a halt, suspension, or pause when such resumption of trading occurs outside of regular trading hours at times when the Exchange is open for either pre- or post-market trading but NYSE does not trade its listed securities. The proposed rule change would implement an automated process for initiating the re-opening of trading on the Exchange in these circumstances.

Generally, the Exchange’s re-opening process is designed to provide an execution at the midpoint of the national best bid and offer (“NBBO”) following the initiation of trading on the applicable listing exchange. Specifically, as described in BYX Rule 11.23(e)(1), the Exchange’s re-opening process occurs at the midpoint of the: (i) First NBBO subsequent to the first reported trade and first two-sided quotation on the listing exchange following the resumption of trading after a halt, suspension, or pause; or (ii) NBBO when the first two-sided quotation is published by the listing exchange following the resumption of trading after a halt, suspension, or pause if no first trade is reported by the listing exchange within one second of publication of the first two-sided quotation by the listing exchange. In either case, the Exchange must wait for the listing exchange to commence trading before initiating its re-opening procedures.

NYSE operates two trading sessions each day: (1) The “core trading session” between 9:30 a.m. ET to 4:00 p.m. ET, during which all securities are available for trading;⁶ and (2) the “early trading session” between 7:00 a.m. ET and the commencement of the core trading session, during which only securities that trade via unlisted trading privileges are available for trading.⁷ NYSE does not trade its listed securities during its early trading session, *i.e.*, prior to the beginning of regular trading hours, nor does it trade any securities after the end of regular trading hours. As a result, since the Exchange’s normal process for re-opening securities listed on other exchanges after a halt, suspension, or pause requires trading to commence on the listing exchange, the Exchange

dated June 17, 2020, available at <https://www.sec.gov/comments/sr-nysearca-2018-02/srnysearca201802-7415693-219417.pdf>.

¹⁵ 17 CFR 201.431(a).

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b–4.

³ The term “Early Trading Session” means the time between 7:00 a.m. and 8:00 a.m. Eastern Time. See BYX Rule 1.5(ee).

⁴ The term “Pre-Opening Session” means the time between 8:00 a.m. and 9:30 a.m. Eastern Time. See BYX Rule 1.5(r).

⁵ The term “After Hours Trading Session” means the time between 4:00 p.m. and 8:00 p.m. Eastern Time. See BYX Rule 1.5(c).

⁶ See NYSE Rule 7.34(a)(2). NYSE’s core trading session for its listed securities begins with its opening auction and ends with its closing auction if one is conducted. *Id.*

⁷ See NYSE Rule 7.34(a)(1).

cannot use this process for NYSE-listed securities that resume trading during the Early Trading Session, Pre-Opening Session, or After Hours Trading Session.

At the same time, BYX Rule 11.23(e)(2) provides that where neither of the conditions required for the initiation of the Exchange's automated re-opening process have occurred, trading in the security may be resumed on the Exchange at its discretion. The Exchange therefore periodically invokes its authority pursuant to this rule to manually initiate the resumption of trading in NYSE-listed securities outside of regular trading hours.⁸ However, initiating trading on the Exchange in this manner requires manual intervention by Exchange staff. The Exchange believes that it would be in the interest of market participants and investors to instead automate its process for initiating trading in this situation and avoid the need for manual intervention.

Current Process for NYSE-Listed Securities Re-Opened in Pre- and Post-Market

As discussed, the Exchange currently employs a manual process to initiate the resumption of trading in NYSE-listed securities outside of regular trading hours. This manual process requires personnel from the Exchange's Trade Desk to become aware of, and react to, NYSE's determination to lift a trading halt in one of their listed securities.⁹ Typically, this occurs in one of two ways. First, the Trade Desk performs proactive monitoring of halt notifications from NYSE and subsequent resumptions during the After Hours Trading Session.¹⁰ If a security is halted by NYSE during regular trading, Trade Desk personnel will monitor internal tools beginning at 4:00 p.m. ET to identify whether NYSE has lifted the halt. Second, even with the proactive monitoring performed by the Trade

Desk, there may be instances where the Exchange has not immediately initiated the manual re-opening of a security that has resumed trading. In such circumstances, Exchange members may reach out to the Trade Desk when they notice that their orders are not reflected in the market. In either case, Trade Desk personnel would check internal tools to confirm that the security is no longer halted, and would routinely invoke the authority described in the paragraph above to initiate the re-opening process on the Exchange after identifying that there are quotes available in the security on other exchanges. The Exchange believes that this manual process is inefficient, and members have also reached out to the Trade Desk with requests that the Exchange replace this process with a more efficient automated process. As a result, the Exchange is proposing to automate its process for initiating trading in this situation to avoid the need for manual intervention by Exchange staff.

Proposed Automated Process for Initiating the Exchange's Re-Opening

As proposed, the Exchange would replace the manual process described above with automated procedures that would automatically resume trading after one second has passed following the Exchange's receipt of the first NBBO following the resumption of trading after the halt, suspension, or pause.¹¹ This change would allow the Exchange to avoid the need for Trade Desk staff to monitor for resumption messages, and would allow members' orders to be automatically reflected in the market, while continuing to ensure that the Exchange's re-opening is tied to the existence of a market in the security on a national securities exchange(s).¹² With this change, the Exchange would continue to re-open trading in NYSE-listed securities in the same manner that it is able to under BYX Rule 11.23(e)(2) today, but would not have to rely on manual procedures for initiating the resumption of trading. Specifically,

rather than conducting the standard midpoint re-opening described in BYX Rule 11.23(e)(1) when the listing exchange has not established a market in the security, the Exchange would continue to follow the process described in BYX Rule 11.23(e)(2), without the need for manual intervention. Thus, as is the case following the manual initiation of the re-opening of trading in a security on the Exchange, orders would be processed using the "contingent open" procedures described in BYX Rule 11.23(d), which provides that orders are to be handled in time sequence and placed on the BYX Book, routed, cancelled, or executed in accordance with the terms of the order.¹³

In the event that there is no available NBBO in the security, the proposed automated procedures would not resume trading on the Exchange, but the Exchange would retain the ability to manually resume trading at its discretion pursuant to current BYX Rule 11.23(e)(2). To increase transparency around when the Exchange could invoke this discretion, the Exchange proposes to amend BYX Rule 11.23(e)(2) to specifically state that the discretion provided pursuant to this rule applies when a security has not otherwise been re-opened for trading on the Exchange pursuant to Proposed BYX Rule 11.23(e)(3). This change would not substantively modify the scope of the discretion provided pursuant to BYX Rule 11.23(e)(2). However, the Exchange believes that modifying the rule in this manner would serve to increase transparency by specifically identifying the times when this discretion is not relevant due to the fact that the Exchange has successfully re-opened the security using its automated procedures.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of Section 6(b) of the Act,¹⁴ in general, and Section 6(b)(5) of the Act,¹⁵ in particular, in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest and not to permit unfair discrimination between customers, issuers, brokers, or dealers. Today, Trade Desk staff must manually intervene to initiate the re-opening on the Exchange of NYSE-listed

⁸ The Exchange estimates that it currently invokes its authority under this rule to manually initiate a re-opening in NYSE-listed securities a handful of times each month.

⁹ Section 203.07 of NYSE's Listed Company Manual describes its trading halt procedures, and provides NYSE with discretion to declare a material news halt in its listed securities, as well as to lift such a halt when it determines that trading should resume. As a matter of practice, NYSE may exercise its discretion to lift a trading halt in its listed securities outside of its own hours for trading such securities. In that event, NYSE would disseminate a resume message through the SIP, which would permit trading to resume on other national securities exchanges, including the Exchange.

¹⁰ Although it is possible for a resumption to take place in the Early Trading and Pre-Opening Sessions, Trade Desk personnel do not monitor for resumptions in those trading sessions as this scenario normally occurs in the After Hours Trading Session.

¹¹ The Exchange utilizes a combination of direct feeds and the applicable securities information processor ("SIP") feeds to determine the NBBO in a security. See BYX Rule 11.26. In addition, such NBBO information, as well as applicable halt and resume messages, are disseminated to market participants through the SIP feeds during the pre- and post-market trading hours of all U.S. equities exchanges.

¹² Pursuant to Regulation NMS, the NBBO in a given security is established by the best bid and best offer in such security calculated and disseminated on a current and continuing basis by a plan processor pursuant to an effective national market system plan. See 17 CFR 242.600(b)(43). As such, an NBBO may be established when one or more national securities exchanges are disseminating quotations in an equity security.

¹³ See BYX Rule 11.23(e)(2),(d).

¹⁴ 15 U.S.C. 78f(b).

¹⁵ 15 U.S.C. 78f(b)(5).

securities following the resumption of trading after a halt, suspension, or pause, if the security resumes trading during the Early Trading Session, Pre-Opening Session, or After Hours Trading Session. Although NYSE may trade securities pursuant to unlisted trading privileges prior to regular trading hours, it does not offer pre- or post-market trading for its listed securities. Since the Exchange's current rules require trading to have commenced on the primary listing market in order to initiate the Exchange's automated process for re-opening securities following a halt, suspension, or pause, the Exchange is forced to periodically invoke manual procedures to resume trading these securities pursuant to unlisted trading privileges. The Exchange believes, however, that an automated process would be more consistent and reliable for market participants and investors as such a process would not rely on manual intervention by Trade Desk staff before the Exchange can resume trading. In addition to generally increasing efficiency of the re-opening process, the Exchange believes that the proposed automated procedures would reduce the need for members to contact the Trade Desk with questions about the status of their orders. Further, such a process would be responsive to member requests to improve on the inefficient manual process currently employed.

The proposed rule change would promote the public interest and the protection of investors by eliminating the need for manual intervention and replacing it with a more consistent procedure that would be applied by its trading systems on an automated basis. The proposed change would not impact the process by which the security would be re-opened, which would continue to follow the "contingent open" procedures used today. However, instead of relying on Trade Desk staff to manually re-open trading in the security, trading would resume on the Exchange once one second has passed following the Exchange's receipt of the first NBBO following the resumption of trading after the halt, suspension, or pause. This condition is designed to ensure that a market has been established in the security prior to resuming trading on the Exchange, and mirrors the steps that Trade Desk personnel would conduct today to verify that there is a market in the security on one or more other exchanges before manually initiating a re-opening. Specifically, trading on the Exchange would not resume until one second after an NBBO has been established in the

security following the resumption of quoting on at least one other national securities exchange. The Exchange believes that resuming trading once this condition has been satisfied would ensure that trading can be resumed in an automated and efficient fashion, while also ensuring that the re-opening of trading on the Exchange continues to be tied to the existence of an established market in the security on one or more other exchanges in the absence of trading on the primary listing market during the pre- and post-market. In addition, the Exchange would continue to have the authority to manually initiate the re-open of trading pursuant to BYX Rule 11.23(e)(2), which would allow the Exchange to re-open trading in the event that trading is not re-opened pursuant to its automated procedures. The proposed amendments to BYX Rule 11.23(e)(2) would increase the transparency of that rule by specifically noting that this discretion would be used when the Exchange is not otherwise able to re-open trading in an automated fashion under its rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is designed to facilitate a more efficient re-opening process in situations where the Exchange's current rules would require unnecessary and inefficient manual intervention, and is not designed to address any competitive issues. The Exchange therefore does not believe that the proposed rule change would have any significant impact on competition. Rather than impact the competitive environment, the proposed rule change would benefit members and investors by eliminating the need for manual intervention when initiating the Exchange's re-opening process for NYSE-listed securities that resume trading during the Early Trading Session, Pre-Opening Session, or After Hours Trading Session.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

- A. By order approve or disapprove such proposed rule change, or
- B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CboeBYX-2020-032 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-CboeBYX-2020-032. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for

inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CboeBYX-2020-032 and should be submitted on or before December 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁶

J. Matthew DeLesDernier,

Assistant Secretary.

[FR Doc. 2020-25495 Filed 11-18-20; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90428/November 13, 2020]

Securities Exchange Act of 1934; In the Matter of: Cboe BZX Exchange, Inc., 400 South LaSalle Street, Chicago, IL 60605, File No. SR-CboeBZX-2018-044; Order Setting Aside the Order by Delegated Authority Disapproving SR-CboeBZX-2018-044

On June 21, 2018, Cboe BZX Exchange, Inc. (“BZX” or “Exchange”) filed with the Securities and Exchange Commission (“Commission”), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Exchange Act”) ¹ and Rule 19b-4 thereunder,² a proposed rule change to amend BZX Rule 14.11(c) to permit either the portfolio holdings of a series of Index Fund Shares or the index underlying a series of Index Fund Shares to satisfy the listing standards under BZX Rules 14.11(c)(3), (4), and (5). The proposed rule change was published for comment in the **Federal Register** on July 11, 2018.³ On August 23, 2018, the Division of Trading and Markets (“Division”), for the Commission pursuant to delegated authority, extended the time period for Commission action on the proposed rule change.⁴ On September 28, 2018, the Exchange filed Amendment No. 1 to the proposed rule change, which amended and replaced the proposed rule change

as originally filed.⁵ On October 5, 2018, the Division, for the Commission pursuant to delegated authority, published notice of Amendment No. 1 and instituted proceedings pursuant to Section 19(b)(2)(B) of the Exchange Act⁶ to determine whether to approve or disapprove the proposed rule change, as modified by Amendment No. 1.⁷ On December 21, 2018, pursuant to Section 19(b)(2) of the Exchange Act,⁸ the Division, for the Commission pursuant to delegated authority, designated a longer period within which to issue an order approving or disapproving the proposed rule change, as modified by Amendment No. 1.⁹ On March 8, 2019, the Division, for the Commission pursuant to delegated authority,¹⁰ disapproved the proposed rule change, as modified by Amendment No. 1.¹¹

On March 18, 2019, the Acting Secretary of the Commission notified BZX that, pursuant to Commission Rule of Practice 431,¹² the Commission would review the Division’s action pursuant to delegated authority and that the Division’s action pursuant to delegated authority was stayed until the Commission orders otherwise.¹³ On April 17, 2019, the Commission issued a scheduling order allowing the filing of additional statements.¹⁴

On June 23, 2020, BZX withdrew the proposed rule change (SR-CboeBZX-2018-044).¹⁵

Under Commission Rule of Practice 431(a), the Commission may “affirm, reverse, modify, set aside or remand for further proceedings, in whole or in part, any action made pursuant to” delegated authority.¹⁶ We find that, in light of BZX’s withdrawal of the proposed rule

change, it is appropriate to set aside the Delegated Order.

Accordingly, *it is ordered* that the March 8, 2019 order disapproving by delegated authority BZX’s proposed rule change number SR-CboeBZX-2018-044, be, and it hereby is, set aside.

By the Commission.

J. Matthew DeLesDernier,

Assistant Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90419; File No. SR-CboeEDGA-2020-029]

Self-Regulatory Organizations; Cboe EDGA Exchange, Inc.; Notice of Filing of a Proposed Rule Change To Automate the Exchange’s Process for Initiating the Re-Opening of a Security Listed on the New York Stock Exchange LLC Following the Resumption of Trading After a Halt, Suspension, or Pause During the Early Trading Session, Pre-Opening Session, or Post-Closing Session

November 13, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (“Act”),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 5, 2020, Cboe EDGA Exchange, Inc. (the “Exchange” or “EDGA”) filed with the Securities and Exchange Commission (“Commission”) the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization’s Statement of the Terms of Substance of the Proposed Rule Change

Cboe EDGA Exchange, Inc. (“EDGA” or the “Exchange”) is filing with the Securities and Exchange Commission (the “Commission”) a proposed rule change to automate the Exchange’s current process for initiating the re-opening of a security listed on the New York Stock Exchange LLC following the resumption of trading after a halt, suspension, or pause during the Early Trading Session, Pre-Opening Session, or Post-Closing Session. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange’s

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to automate the Exchange's current process for initiating the re-opening of securities listed on the New York Stock Exchange LLC ("NYSE") following the resumption of trading after a halt, suspension, or pause during the Early Trading Session,³ Pre-Opening Session,⁴ or Post-Closing Session.⁵ EDGA Rule 11.7 describes the Exchange's opening process for securities listed on other national securities exchanges, including the process for re-opening such securities following the resumption of trading after a halt, suspension, or pause. Although the Exchange generally employs an automated process for re-opening securities listed on other exchanges, there are situations where manual intervention is currently needed to initiate the Exchange's re-opening process. Specifically, manual intervention is currently needed for the Exchange to initiate its re-opening process in NYSE-listed securities that resume trading after a halt, suspension, or pause when such resumption of trading occurs outside of regular trading hours at times when the Exchange is open for either pre- or post-market trading but NYSE does not trade its

listed securities. The proposed rule change would implement an automated process for initiating the re-opening of trading on the Exchange in these circumstances.

Generally, the Exchange's re-opening process is designed to provide an execution at the midpoint of the national best bid and offer ("NBBO") following the initiation of trading on the applicable listing exchange. Specifically, as described in EDGA Rule 11.7(e)(1), the Exchange's re-opening process occurs at the midpoint of the: (i) First NBBO subsequent to the first reported trade and first two-sided quotation on the listing exchange following the resumption of trading after a halt, suspension, or pause; or (ii) then prevailing NBBO when the first two-sided quotation published by the listing exchange following the resumption of trading after a halt, suspension, or pause if no first trade is reported by the listing exchange within one second of publication of the first two-sided quotation by the listing exchange. In either case, the Exchange must wait for the listing exchange to commence trading before initiating its re-opening procedures.

NYSE operates two trading sessions each day: (1) The "core trading session" between 9:30 a.m. ET to 4:00 p.m. ET, during which all securities are available for trading;⁶ and (2) the "early trading session" between 7:00 a.m. ET and the commencement of the core trading session, during which only securities that trade via unlisted trading privileges are available for trading.⁷ NYSE does not trade its listed securities during its early trading session, *i.e.*, prior to the beginning of regular trading hours, nor does it trade any securities after the end of regular trading hours. As a result, since the Exchange's normal process for re-opening securities listed on other exchanges after a halt, suspension, or pause requires trading to commence on the listing exchange, the Exchange cannot use this process for NYSE-listed securities that resume trading during the Early Trading Session, Pre-Opening Session, or Post-Closing Session.

At the same time, EDGA Rule 11.7(e)(2) provides that where neither of the conditions required for the initiation of the Exchange's automated re-opening process have occurred, trading in the security may be resumed on the Exchange at its discretion. The Exchange therefore periodically invokes

its authority pursuant to this rule to manually initiate the resumption of trading in NYSE-listed securities outside of regular trading hours.⁸ However, initiating trading on the Exchange in this manner requires manual intervention by Exchange staff. The Exchange believes that it would be in the interest of market participants and investors to instead automate its process for initiating trading in this situation and avoid the need for manual intervention.

Current Process for NYSE-Listed Securities Re-Opened in Pre- and Post-Market

As discussed, the Exchange currently employs a manual process to initiate the resumption of trading in NYSE-listed securities outside of regular trading hours. This manual process requires personnel from the Exchange's Trade Desk to become aware of, and react to, NYSE's determination to lift a trading halt in one of their listed securities.⁹ Typically, this occurs in one of two ways. First, the Trade Desk performs proactive monitoring of halt notifications from NYSE and subsequent resumptions during the Post-Closing Trading Session.¹⁰ If a security is halted by NYSE during regular trading, Trade Desk personnel will monitor internal tools beginning at 4:00 p.m. ET to identify whether NYSE has lifted the halt. Second, even with the proactive monitoring performed by the Trade Desk, there may be instances where the Exchange has not immediately initiated the manual re-opening of a security that has resumed trading. In such circumstances, Exchange members may reach out to the Trade Desk when they notice that their orders are not reflected in the market. In either case, Trade Desk personnel would check internal tools to confirm that the security is no longer halted, and would routinely invoke the authority described in the paragraph

⁸ The Exchange estimates that it currently invokes its authority under this rule to manually initiate a re-opening in NYSE-listed securities a handful of times each month.

⁹ Section 203.07 of NYSE's Listed Company Manual describes its trading halt procedures, and provides NYSE with discretion to declare a material news halt in its listed securities, as well as to lift such a halt when it determines that trading should resume. As a matter of practice, NYSE may exercise its discretion to lift a trading halt in its listed securities outside of its own hours for trading such securities. In that event, NYSE would disseminate a resume message through the SIP, which would permit trading to resume on other national securities exchanges, including the Exchange.

¹⁰ Although it is possible for a resumption to take place in the Early Trading and Pre-Opening Sessions, Trade Desk personnel do not monitor for resumptions in those trading sessions as this scenario normally occurs in the Post-Closing Trading Session.

³ The term "Early Trading Session" means the time between 7:00 a.m. and 8:00 a.m. Eastern Time. See EDGA Rule 1.5(ii).

⁴ The term "Pre-Opening Session" means the time between 8:00 a.m. and 9:30 a.m. Eastern Time. See EDGA Rule 1.5(s).

⁵ The term "Post-Closing Session" means the time between 4:00 p.m. and 8:00 p.m. Eastern Time. See EDGA Rule 1.5(r).

⁶ See NYSE Rule 7.34(a)(2). NYSE's core trading session for its listed securities begins with its opening auction and ends with its closing auction if one is conducted. *Id.*

⁷ See NYSE Rule 7.34(a)(1).

above to initiate the re-opening process on the Exchange after identifying that there are quotes available in the security on other exchanges. The Exchange believes that this manual process is inefficient, and members have also reached out to the Trade Desk with requests that the Exchange replace this process with a more efficient automated process. As a result, the Exchange is proposing to automate its process for initiating trading in this situation to avoid the need for manual intervention by Exchange staff.

Proposed Automated Process for Initiating the Exchange's Re-Opening

As proposed, the Exchange would replace the manual process described above with automated procedures that would automatically resume trading after one second has passed following the Exchange's receipt of the first NBBO following the resumption of trading after the halt, suspension, or pause.¹¹ This change would allow the Exchange to avoid the need for Trade Desk staff to monitor for resumption messages, and would allow members' orders to be automatically reflected in the market, while continuing to ensure that the Exchange's re-opening is tied to the existence of a market in the security on a national securities exchange(s).¹² With this change, the Exchange would continue to re-open trading in NYSE-listed securities in the same manner that it is able to under EDGA Rule 11.7(e)(2) today, but would not have to rely on manual procedures for initiating the resumption of trading. Specifically, rather than conducting the standard midpoint re-opening described in EDGA Rule 11.7(e)(1) when the listing exchange has not established a market in the security, the Exchange would continue to follow the process described in EDGA Rule 11.7(e)(2), without the need for manual intervention. Thus, as is the case following the manual initiation of the re-opening of trading in a security on the Exchange, orders would be processed using the

"contingent open" procedures described in EDGA Rule 11.7(d), which provides that orders are to be handled in time sequence and placed on the EDGA Book, routed, cancelled, or executed in accordance with the terms of the order.¹³

In the event that there is no available NBBO in the security, the proposed automated procedures would not resume trading on the Exchange, but the Exchange would retain the ability to manually resume trading at its discretion pursuant to current EDGA Rule 11.7(e)(2). To increase transparency around when the Exchange could invoke this discretion, the Exchange proposes to amend EDGA Rule 11.7(e)(2) to specifically state that the discretion provided pursuant to this rule applies when a security has not otherwise been re-opened for trading on the Exchange pursuant to Proposed EDGA Rule 11.7(e)(3). This change would not substantively modify the scope of the discretion provided pursuant to EDGA Rule 11.7(e)(2). However, the Exchange believes that modifying the rule in this manner would serve to increase transparency by specifically identifying the times when this discretion is not relevant due to the fact that the Exchange has successfully re-opened the security using its automated procedures.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of Section 6(b) of the Act,¹⁴ in general, and Section 6(b)(5) of the Act,¹⁵ in particular, in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest and not to permit unfair discrimination between customers, issuers, brokers, or dealers. Today, Trade Desk staff must manually intervene to initiate the re-opening on the Exchange of NYSE-listed securities following the resumption of trading after a halt, suspension, or pause, if the security resumes trading during the Early Trading Session, Pre-Opening Session, or Post-Closing Session. Although NYSE may trade securities pursuant to unlisted trading privileges prior to regular trading hours, it does not offer pre- or post-market trading for its listed securities. Since the Exchange's current rules require trading to have commenced on the primary

listing market in order to initiate the Exchange's automated process for re-opening securities following a halt, suspension, or pause, the Exchange is forced to periodically invoke manual procedures to resume trading these securities pursuant to unlisted trading privileges. The Exchange believes, however, that an automated process would be more consistent and reliable for market participants and investors as such a process would not rely on manual intervention by Trade Desk staff before the Exchange can resume trading. In addition to generally increasing efficiency of the re-opening process, the Exchange believes that the proposed automated procedures would reduce the need for members to contact the Trade Desk with questions about the status of their orders. Further, such a process would be responsive to member requests to improve on the inefficient manual process currently employed.

The proposed rule change would promote the public interest and the protection of investors by eliminating the need for manual intervention and replacing it with a more consistent procedure that would be applied by its trading systems on an automated basis. The proposed change would not impact the process by which the security would be re-opened, which would continue to follow the "contingent open" procedures used today. However, instead of relying on Trade Desk staff to manually re-open trading in the security, trading would resume on the Exchange once one second has passed following the Exchange's receipt of the first NBBO following the resumption of trading after the halt, suspension, or pause. This condition is designed to ensure that a market has been established in the security prior to resuming trading on the Exchange, and mirrors the steps that Trade Desk personnel would conduct today to verify that there is a market in the security on one or more other exchanges before manually initiating a re-opening. Specifically, trading on the Exchange would not resume until one second after an NBBO has been established in the security following the resumption of quoting on at least one other national securities exchange. The Exchange believes that resuming trading once this condition has been satisfied would ensure that trading can be resumed in an automated and efficient fashion, while also ensuring that the re-opening of trading on the Exchange continues to be tied to the existence of an established market in the security on one or more other exchanges in the absence of trading on the primary listing market

¹¹ The Exchange utilizes a combination of direct feeds and the applicable securities information processor ("SIP") feeds to determine the NBBO in a security. See EDGA Rule 13.4. In addition, such NBBO information, as well as applicable halt and resume messages, are disseminated to market participants through the SIP feeds during the pre- and post-market trading hours of all U.S. equities exchanges.

¹² Pursuant to Regulation NMS, the NBBO in a given security is established by the best bid and best offer in such security calculated and disseminated on a current and continuing basis by a plan processor pursuant to an effective national market system plan. See 17 CFR 242.600(b)(43). As such, an NBBO may be established when one or more national securities exchanges are disseminating quotations in an equity security.

¹³ See EDGA Rule 11.7(e)(2), (d).

¹⁴ 15 U.S.C. 78f(b).

¹⁵ 15 U.S.C. 78f(b)(5).

during the pre- and post-market. In addition, the Exchange would continue to have the authority to manually initiate the re-open of trading pursuant to EDGA Rule 11.7(e)(2), which would allow the Exchange to re-open trading in the event that trading is not re-opened pursuant to its automated procedures. The proposed amendments to EDGA Rule 11.7(e)(2) would increase the transparency of that rule by specifically noting that this discretion would be used when the Exchange is not otherwise able to re-open trading in an automated fashion under its rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is designed to facilitate a more efficient re-opening process in situations where the Exchange's current rules would require unnecessary and inefficient manual intervention, and is not designed to address any competitive issues. The Exchange therefore does not believe that the proposed rule change would have any significant impact on competition. Rather than impact the competitive environment, the proposed rule change would benefit members and investors by eliminating the need for manual intervention when initiating the Exchange's re-opening process for NYSE-listed securities that resume trading during the Early Trading Session, Pre-Opening Session, or Post-Closing Session.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

A. By order approve or disapprove such proposed rule change, or

B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CboeEDGA-2020-029 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-CboeEDGA-2020-029. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly.

All submissions should refer to File Number SR-CboeEDGA-2020-029 and should be submitted on or before December 10, 2020.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁶

J. Matthew DeLesDernier,

Assistant Secretary.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90420; File No. SR-CboeBZX-2020-083]

Self-Regulatory Organizations; Cboe BZX Exchange, Inc.; Notice of Filing of a Proposed Rule Change To Automate the Exchange's Process for Initiating the Re-Opening of a Security Listed on the New York Stock Exchange LLC Following the Resumption of Trading After a Halt, Suspension, or Pause During the Early Trading Session, Pre-Opening Session, or After Hours Trading Session

November 13, 2020.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),¹ and Rule 19b-4 thereunder,² notice is hereby given that on November 5, 2020, Cboe BZX Exchange, Inc. ("Exchange" or "BZX") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Cboe BZX Exchange, Inc. ("BZX" or the "Exchange") is filing with the Securities and Exchange Commission (the "Commission") a proposed rule change to automate the Exchange's current process for initiating the re-opening of a security listed on the New York Stock Exchange LLC following the resumption of trading after a halt, suspension, or pause during the Early Trading Session, Pre-Opening Session, or After Hours Trading Session. The text of the proposed rule change is provided in Exhibit 5.

The text of the proposed rule change is also available on the Exchange's website (http://markets.cboe.com/us/equities/regulation/rule_filings/bzx/), at the Exchange's Office of the Secretary, and at the Commission's Public Reference Room.

¹ 15 U.S.C. 78s(b)(1).

² 17 CFR 240.19b-4.

¹⁶ 17 CFR 200.30-3(a)(12).

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The purpose of the proposed rule change is to automate the Exchange's current process for initiating the re-opening of securities listed on the New York Stock Exchange LLC ("NYSE") following the resumption of trading after a halt, suspension, or pause during the Early Trading Session,³ Pre-Opening Session,⁴ or After Hours Trading Session.⁵ BZX Rule 11.24 describes the Exchange's opening process for securities listed on other national securities exchanges, including the process for re-opening such securities following the resumption of trading after a halt, suspension, or pause. Although the Exchange generally employs an automated process for re-opening securities listed on other exchanges, there are situations where manual intervention is currently needed to initiate the Exchange's re-opening process. Specifically, manual intervention is currently needed for the Exchange to initiate its re-opening process in NYSE-listed securities that resume trading after a halt, suspension, or pause when such resumption of trading occurs outside of regular trading hours at times when the Exchange is open for either pre- or post-market trading but NYSE does not trade its listed securities. The proposed rule change would implement an automated process for initiating the re-opening of

trading on the Exchange in these circumstances.

Generally, the Exchange's re-opening process is designed to provide an execution at the midpoint of the national best bid and offer ("NBBO") following the initiation of trading on the applicable listing exchange. Specifically, as described in BZX Rule 11.24(e)(1), the Exchange's re-opening process occurs at the midpoint of the: (i) First NBBO subsequent to the first reported trade and first two-sided quotation on the listing exchange following the resumption of trading after a halt, suspension, or pause; or (ii) NBBO when the first two-sided quotation is published by the listing exchange following the resumption of trading after a halt, suspension, or pause if no first trade is reported by the listing exchange within one second of publication of the first two-sided quotation by the listing exchange. In either case, the Exchange must wait for the listing exchange to commence trading before initiating its re-opening procedures.

NYSE operates two trading sessions each day: (1) The "core trading session" between 9:30 a.m. ET to 4:00 p.m. ET, during which all securities are available for trading;⁶ and (2) the "early trading session" between 7:00 a.m. ET and the commencement of the core trading session, during which only securities that trade via unlisted trading privileges are available for trading.⁷ NYSE does not trade its listed securities during its early trading session, *i.e.*, prior to the beginning of regular trading hours, nor does it trade any securities after the end of regular trading hours. As a result, since the Exchange's normal process for re-opening securities listed on other exchanges after a halt, suspension, or pause requires trading to commence on the listing exchange, the Exchange cannot use this process for NYSE-listed securities that resume trading during the Early Trading Session, Pre-Opening Session, or After Hours Trading Session.

At the same time, BZX Rule 11.24(e)(2) provides that where neither of the conditions required for the initiation of the Exchange's automated re-opening process have occurred, trading in the security may be resumed on the Exchange at its discretion. The Exchange therefore periodically invokes its authority pursuant to this rule to manually initiate the resumption of trading in NYSE-listed securities

outside of regular trading hours.⁸ However, initiating trading on the Exchange in this manner requires manual intervention by Exchange staff. The Exchange believes that it would be in the interest of market participants and investors to instead automate its process for initiating trading in this situation and avoid the need for manual intervention.

Current Process for NYSE-Listed Securities Re-Opened in Pre- and Post-Market

As discussed, the Exchange currently employs a manual process to initiate the resumption of trading in NYSE-listed securities outside of regular trading hours. This manual process requires personnel from the Exchange's Trade Desk to become aware of, and react to, NYSE's determination to lift a trading halt in one of their listed securities.⁹ Typically, this occurs in one of two ways. First, the Trade Desk performs proactive monitoring of halt notifications from NYSE and subsequent resumptions during the After Hours Trading Session.¹⁰ If a security is halted by NYSE during regular trading, Trade Desk personnel will monitor internal tools beginning at 4:00 p.m. ET to identify whether NYSE has lifted the halt. Second, even with the proactive monitoring performed by the Trade Desk, there may be instances where the Exchange has not immediately initiated the manual re-opening of a security that has resumed trading. In such circumstances, Exchange members may reach out to the Trade Desk when they notice that their orders are not reflected in the market. In either case, Trade Desk personnel would check internal tools to confirm that the security is no longer halted, and would routinely invoke the authority described in the paragraph above to initiate the re-opening process on the Exchange after identifying that there are quotes available in the security

⁸ The Exchange estimates that it currently invokes its authority under this rule to manually initiate a re-opening in NYSE-listed securities a handful of times each month.

⁹ Section 203.07 of NYSE's Listed Company Manual describes its trading halt procedures, and provides NYSE with discretion to declare a material news halt in its listed securities, as well as to lift such a halt when it determines that trading should resume. As a matter of practice, NYSE may exercise its discretion to lift a trading halt in its listed securities outside of its own hours for trading such securities. In that event, NYSE would disseminate a resume message through the SIP, which would permit trading to resume on other national securities exchanges, including the Exchange.

¹⁰ Although it is possible for a resumption to take place in the Early Trading and Pre-Opening Sessions, Trade Desk personnel do not monitor for resumptions in those trading sessions as this scenario normally occurs in the After Hours Trading Session.

³ The term "Early Trading Session" means the time between 7:00 a.m. and 8:00 a.m. Eastern Time. See BZX Rule 1.5(ee).

⁴ The term "Pre-Opening Session" means the time between 8:00 a.m. and 9:30 a.m. Eastern Time. See BZX Rule 1.5(r).

⁵ The term "After Hours Trading Session" means the time between 4:00 p.m. and 8:00 p.m. Eastern Time. See BZX Rule 1.5(c).

⁶ See NYSE Rule 7.34(a)(2). NYSE's core trading session for its listed securities begins with its opening auction and ends with its closing auction if one is conducted. *Id.*

⁷ See NYSE Rule 7.34(a)(1).

on other exchanges. The Exchange believes that this manual process is inefficient, and members have also reached out to the Trade Desk with requests that the Exchange replace this process with a more efficient automated process. As a result, the Exchange is proposing to automate its process for initiating trading in this situation to avoid the need for manual intervention by Exchange staff.

Proposed Automated Process for Initiating the Exchange's Re-Opening

As proposed, the Exchange would replace the manual process described above with automated procedures that would automatically resume trading after one second has passed following the Exchange's receipt of the first NBBO following the resumption of trading after the halt, suspension, or pause.¹¹ This change would allow the Exchange to avoid the need for Trade Desk staff to monitor for resumption messages, and would allow members' orders to be automatically reflected in the market, while continuing to ensure that the Exchange's re-opening is tied to the existence of a market in the security on a national securities exchange(s).¹² With this change, the Exchange would continue to re-open trading in NYSE-listed securities in the same manner that it is able to under BZX Rule 11.24(e)(2) today, but would not have to rely on manual procedures for initiating the resumption of trading. Specifically, rather than conducting the standard midpoint re-opening described in BZX Rule 11.24(e)(1) when the listing exchange has not established a market in the security, the Exchange would continue to follow the process described in BZX Rule 11.24(e)(2), without the need for manual intervention. Thus, as is the case following the manual initiation of the re-opening of trading in a security on the Exchange, orders would be processed using the "contingent open" procedures described in BZX Rule 11.24(d), which provides that orders are to be handled in time

sequence and placed on the BZX Book, routed, cancelled, or executed in accordance with the terms of the order.¹³

In the event that there is no available NBBO in the security, the proposed automated procedures would not resume trading on the Exchange, but the Exchange would retain the ability to manually resume trading at its discretion pursuant to current BZX Rule 11.24(e)(2). To increase transparency around when the Exchange could invoke this discretion, the Exchange proposes to amend BZX Rule 11.24(e)(2) to specifically state that the discretion provided pursuant to this rule applies when a security has not otherwise been re-opened for trading on the Exchange pursuant to Proposed BZX Rule 11.24(e)(3). This change would not substantively modify the scope of the discretion provided pursuant to BZX Rule 11.24(e)(2). However, the Exchange believes that modifying the rule in this manner would serve to increase transparency by specifically identifying the times when this discretion is not relevant due to the fact that the Exchange has successfully re-opened the security using its automated procedures.

2. Statutory Basis

The Exchange believes the proposed rule change is consistent with the requirements of Section 6(b) of the Act,¹⁴ in general, and Section 6(b)(5) of the Act,¹⁵ in particular, in that it is designed to remove impediments to and perfect the mechanism of a free and open market and a national market system, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest and not to permit unfair discrimination between customers, issuers, brokers, or dealers. Today, Trade Desk staff must manually intervene to initiate the re-opening on the Exchange of NYSE-listed securities following the resumption of trading after a halt, suspension, or pause, if the security resumes trading during the Early Trading Session, Pre-Opening Session, or After Hours Trading Session. Although NYSE may trade securities pursuant to unlisted trading privileges prior to regular trading hours, it does not offer pre- or post-market trading for its listed securities. Since the Exchange's current rules require trading to have commenced on the primary listing market in order to initiate the Exchange's automated process for re-

opening securities following a halt, suspension, or pause, the Exchange is forced to periodically invoke manual procedures to resume trading these securities pursuant to unlisted trading privileges. The Exchange believes, however, that an automated process would be more consistent and reliable for market participants and investors as such a process would not rely on manual intervention by Trade Desk staff before the Exchange can resume trading. In addition to generally increasing efficiency of the re-opening process, the Exchange believes that the proposed automated procedures would reduce the need for members to contact the Trade Desk with questions about the status of their orders. Further, such a process would be responsive to member requests to improve on the inefficient manual process currently employed.

The proposed rule change would promote the public interest and the protection of investors by eliminating the need for manual intervention and replacing it with a more consistent procedure that would be applied by its trading systems on an automated basis. The proposed change would not impact the process by which the security would be re-opened, which would continue to follow the "contingent open" procedures used today. However, instead of relying on Trade Desk staff to manually re-open trading in the security, trading would resume on the Exchange once one second has passed following the Exchange's receipt of the first NBBO following the resumption of trading after the halt, suspension, or pause. This condition is designed to ensure that a market has been established in the security prior to resuming trading on the Exchange, and mirrors the steps that Trade Desk personnel would conduct today to verify that there is a market in the security on one or more other exchanges before manually initiating a re-opening. Specifically, trading on the Exchange would not resume until one second after an NBBO has been established in the security following the resumption of quoting on at least one other national securities exchange. The Exchange believes that resuming trading once this condition has been satisfied would ensure that trading can be resumed in an automated and efficient fashion, while also ensuring that the re-opening of trading on the Exchange continues to be tied to the existence of an established market in the security on one or more other exchanges in the absence of trading on the primary listing market during the pre- and post-market. In addition, the Exchange would continue

¹¹ The Exchange utilizes a combination of direct feeds and the applicable securities information processor ("SIP") feeds to determine the NBBO in a security. See BZX Rule 11.26. In addition, such NBBO information, as well as applicable halt and resume messages, are disseminated to market participants through the SIP feeds during the pre- and post-market trading hours of all U.S. equities exchanges.

¹² Pursuant to Regulation NMS, the NBBO in a given security is established by the best bid and best offer in such security calculated and disseminated on a current and continuing basis by a plan processor pursuant to an effective national market system plan. See 17 CFR 242.600(b)(43). As such, an NBBO may be established when one or more national securities exchanges are disseminating quotations in an equity security.

¹³ See BZX Rule 11.24(e)(2), (d).

¹⁴ 15 U.S.C. 78f(b).

¹⁵ 15 U.S.C. 78f(b)(5).

to have the authority to manually initiate the re-open of trading pursuant to BZX Rule 11.24(e)(2), which would allow the Exchange to re-open trading in the event that trading is not re-opened pursuant to its automated procedures. The proposed amendments to BZX Rule 11.24(e)(2) would increase the transparency of that rule by specifically noting that this discretion would be used when the Exchange is not otherwise able to re-open trading in an automated fashion under its rules.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change would impose any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act. The proposed rule change is designed to facilitate a more efficient re-opening process in situations where the Exchange's current rules would require unnecessary and inefficient manual intervention, and is not designed to address any competitive issues. The Exchange therefore does not believe that the proposed rule change would have any significant impact on competition. Rather than impact the competitive environment, the proposed rule change would benefit members and investors by eliminating the need for manual intervention when initiating the Exchange's re-opening process for NYSE-listed securities that resume trading during the Early Trading Session, Pre-Opening Session, or After Hours Trading Session.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

No written comments were solicited or received on the proposed rule change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period up to 90 days (i) as the Commission may designate if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission will:

A. By order approve or disapprove such proposed rule change, or

B. institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-CboeBZX-2020-083 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-CboeBZX-2020-083. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-CboeBZX-2020-083 and should be submitted on or before December 10, 2020.

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-90429/November 13, 2020]

Order Setting Aside the Order by Delegated Authority Approving SR-IEX-2018-06; In the Matter of Investors Exchange LLC, 3 World Trade Center 58th Floor, New York, NY 10007, File No. SR-IEX-2018-06

On March 15, 2018, Investors Exchange LLC (the "Exchange" or "IEX") filed with the Securities and Exchange Commission ("Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Exchange Act")¹ and Rule 19b-4 thereunder,² a proposed rule change to establish a new optional listing category on the Exchange, referred to as the "LTSE Listings on IEX" or "LTSE Listings." The proposed rule change was published for comment in the **Federal Register** on April 2, 2018.³ On May 11, 2018, the Division of Trading and Markets, for the Commission pursuant to delegated authority, extended the time period for Commission action on the proposed rule change.⁴ On June 27, 2018, the Exchange filed Amendment No. 1 to the proposed rule change.⁵ On June 29, 2018, the Division of Trading and Markets, for the Commission pursuant to delegated authority,⁶ approved the proposed rule change, as modified by Amendment No. 1.⁷

On June 29, 2018, the Secretary of the Commission notified the Exchange that pursuant to Rule 431 of the Commission's Rules of Practice,⁸ the Commission would review the Delegated Order and that the Delegated Order was stayed until the Commission

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 34095; 812-15155]

Northern Funds and Northern Trust Investments, Inc.

AGENCY: Securities and Exchange Commission (“Commission”).

ACTION: Notice.

Notice of an application under Section 6(c) of the Investment Company Act of 1940 (“Act”) for an exemption from Section 15(c) of the Act.

APPLICANTS: Northern Funds, a registered open-end investment company that is organized as a Delaware statutory trust (the “Trust”) and that may offer one or more series of shares (each a “Series”), and Northern Trust Investments, Inc. (“NTI” or the “Adviser”), an Illinois state banking corporation registered as an investment adviser under the Investment Advisers Act of 1940 (“Advisers Act”), that serves an investment adviser to the Trust (together with the Trust and the Series, the “Applicants”).

⁹ See Letter from Secretary of the Commission to Sophia Lee, Associate General Counsel, Investors Exchange LLC, dated June 29, 2018, available at <https://www.sec.gov/rules/sro/iex/2018/34/83558-letter-from-secretary.pdf>.

¹⁰ See Exchange Act Release No. 83678, 83 FR 35300 (July 25, 2018).

¹¹ See letter from Claudia Crowley, Chief Regulatory Officer, IEX, to Brent J. Fields, Secretary, Commission, dated August 15, 2018.

¹² 17 CFR 201.431(a).

SUMMARY OF APPLICATION: The requested exemption would permit the Trust’s board of trustees (the “Board”) to approve new sub-advisory agreements and material amendments to existing sub-advisory agreements for the Subadvised Series (as defined below), without complying with the in-person meeting requirement of Section 15(c) of the Act.

FLING DATES: The application was filed on August 24, 2020.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by emailing the Commission’s Secretary at Secretarys-Office@sec.gov and serving Applicants with a copy of the request by email. Hearing requests should be received by the Commission by 5:30 p.m. on December 8, 2020, and should be accompanied by proof of service on the Applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0-5 under the Act, hearing requests should state the nature of the writer’s interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request by emailing the Commission’s Secretary.

ADDRESSES: The Commission: Secretarys-Office@sec.gov. Applicants: Jose Del Real, by email to jjd4@ntrs.com; Joshua B. Deringer, by email to joshua.deringer@faegredrinker.com.

FOR FURTHER INFORMATION CONTACT: Jill Ehrlich, Senior Counsel, at (202) 551-6819, or Lisa Reid Ragen, Branch Chief, at (202) 551-6825 (Division of Investment Management, Chief Counsel’s Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained via the Commission’s website by searching for the file number or an Applicant using the “Company” name box, at <http://www.sec.gov/search/search.htm> or by calling (202) 551-8090.

I. Requested Exemptive Relief

1. Applicants request an exemption from Section 15(c) of the Act to permit the Board,¹ including the Independent Board Members,² to approve an

¹ The term “Board” also includes the board of trustees or directors of a future Subadvised Series (as defined below).

² The term “Independent Board Members” means the members of the Board who are not parties to the Sub-Advisory Agreement (as defined below), or “interested persons,” as defined in Section 2(a)(19) of the Act, of any such party.

agreement (each a “Sub-Advisory Agreement”) pursuant to which a sub-adviser manages all or a portion of the assets of one or more of the Series, or a material amendment thereof (a “Sub-Adviser Change”), without complying with the in-person meeting requirement of Section 15(c).³ Under the requested relief, the Independent Board Members could instead approve a Sub-Adviser Change at a meeting at which members of the Board participate by any means of communication that allows them to hear each other simultaneously during the meeting.

2. Applicants request that the relief apply to Applicants, as well as to any future series of the Trust and any other existing or future registered open-end management investment company or Series thereof that intends to rely on the requested order in the future and that: (i) Is advised by the Adviser;⁴ (ii) uses the multi-manager structure described in the application; and (iii) complies with the terms and conditions of the application (each, a “Subadvised Series”).⁵

II. Management of the Subadvised Series

3. The Adviser will serve as the investment adviser to each Subadvised Series pursuant to an investment advisory agreement with the Trust (each an “Investment Management Agreement”). The Adviser, subject to the oversight of the Board, will provide continuous investment management services to each Subadvised Series. Applicants are not seeking an exemption from the Act with respect to the Investment Management Agreements.

4. Applicants state that the Subadvised Series may seek to provide exposure to multiple strategies across various asset classes, thus allowing investors to more easily access such strategies without the additional

³ Applicants do not request relief that would permit the Board and the Independent Board Members to approve renewals of Sub-Advisory Agreements at non-in-person meetings.

⁴ The term “Adviser” includes (i) the Adviser or its successors, and (ii) any entity controlling, controlled by or under common control with, the Adviser or its successors. For the purposes of the requested order, “successor” is limited to an entity or entities that result from a reorganization into another jurisdiction or a change in the type of business organization.

⁵ The term “Subadvised Series” also includes a wholly-owned subsidiary, as defined in the Act, of a Subadvised Series (each a “Subsidiary”) and the term “sub-adviser” includes any sub-adviser to a Subsidiary. All registered open-end investment companies that intend to rely on the requested order are named as Applicants. Any entity that relies on the requested order will do so only in accordance with the terms and conditions contained in the application.

transaction costs and administrative burdens of investing in multiple funds to seek to achieve comparable exposures.

5. To that end, the Adviser may achieve its desired exposures to specific strategies by allocating discrete portions of the Subadvised Series' assets to various sub-advisers. Consistent with the terms of each Investment Management Agreement and subject to the Board's approval,⁶ the Adviser would delegate management of all or a portion of the assets of a Subadvised Series to a sub-adviser.⁷ Each sub-adviser would be an "investment adviser" to the Subadvised Series within the meaning of Section 2(a)(20) of the Act.⁸ The Adviser would retain overall responsibility for the management and investment of the assets of each Subadvised Series.

III. Applicable Law

6. Section 15(c) of the Act prohibits a registered investment company having a board from entering into, renewing or performing any contract or agreement whereby a person undertakes regularly to act as an investment adviser (including a sub-adviser) to the investment company, unless the terms of such contract or agreement and any renewal thereof have been approved by the vote of a majority of the investment company's board members who are not parties to such contract or agreement, or interested persons of any such party, cast in person at a meeting called for the purpose of voting on such approval.

7. Section 6(c) of the Act provides that the Commission may exempt any person, security, or transaction or any class or classes of persons, securities, or transactions from any provisions of the Act, or any rule thereunder, if such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act. Applicants state that the requested relief meets this

standard for the reasons discussed below.

IV. Arguments in Support of the Requested Relief

8. Applicants assert that boards of registered investment companies, including the Board, typically hold in-person meetings on a quarterly basis. Applicants state that during the three to four month period between board meeting dates, market conditions may change or investment opportunities may arise such that the Adviser may wish to make a Sub-Adviser Change. Applicants also state that at these moments it may be impractical and costly to hold an additional in-person Board meeting, especially given the geographic diversity of Board members and the additional cost of holding in-person meetings.

9. As a result, Applicants believe that the requested relief would allow the Subadvised Series to operate more efficiently. In particular, Applicants assert that without the delay inherent in holding in-person Board meetings (and the attendant difficulty of obtaining the necessary quorum for, and the additional costs of, an unscheduled in-person Board meeting), the Subadvised Series would be able to act more quickly and with less expense to add or replace sub-advisers when the Board and the Adviser believe that a Sub-Adviser Change would benefit the Subadvised Series.

10. Applicants also note that the in-person meeting requirement in Section 15(c) of the Act was designed to prohibit absentee approval of advisory agreements. Applicants state that condition 1 to the requested relief is designed to avoid such absentee approval by requiring that the Board approve a Sub-Adviser Change at a meeting where all participating Board members can hear each other and be heard by each other during the meeting.⁹

11. Applicants, moreover, represent that the Board would conduct any such non-in-person consideration of a Sub-Advisory Agreement in accordance with its typical process for approving Sub-Advisory Agreements. Consistent with Section 15(c) of the Act, the Board would request and evaluate such information as may reasonably be necessary to evaluate the terms of any Sub-Advisory Agreement, and the

Adviser and sub-adviser would provide such information.

12. Finally, Applicants note that that if one or more Board members request that a Sub-Adviser Change be considered in-person, then the Board would not be able to rely on the relief and would have to consider the Sub-Adviser Change at an in-person meeting.

V. Applicants' Conditions

Applicants agree that any order granting the requested relief will be subject to the following conditions:

1. The Independent Board Members will approve a Sub-Adviser Change at a non-in-person meeting in which Board members may participate by any means of communication that allows those Board members participating to hear each other simultaneously during the meeting.

2. Management will represent that the materials provided to the Board for the non-in-person meeting include the same information the Board would have received if a Sub-Adviser Change were sought at an in-person Board meeting.

3. The notice of the non-in-person meeting will explain the need for considering the Sub-Adviser Change at a non-in-person meeting. Once notice of the non-in-person meeting to consider a Sub-Adviser Change is sent, Board members will be given the opportunity to object to considering the Sub-Adviser Change at a non-in-person Board meeting. If a Board member requests that the Sub-Adviser Change be considered in-person, the Board will consider the Sub-Adviser Change at an in-person meeting, unless such request is rescinded.

4. A Subadvised Series' ability to rely on the requested relief will be disclosed in the Subadvised Series' registration statement.

5. In the event that the Commission adopts a rule under the Act providing substantially similar relief to that in the order requested in the application, the requested order will expire on the effective date of that rule.

For the Commission, by the Division of Investment Management, under delegated authority.

Dated: November 13, 2020.

J. Matthew DeLesDernier,

Assistant Secretary.

[FR Doc. 2020-25491 Filed 11-18-20; 8:45 am]

BILLING CODE 8011-01-P

⁶ A Sub-Advisory Agreement may also be subject to approval by a Subadvised Series' shareholders. Applicants currently rely on a multi-manager exemptive order to enter into and materially amend Sub-Advisory Agreements without obtaining shareholder approval. See Northern Institutional Funds, *et al.*, Investment Company Act Release Nos. 23596 (Dec. 10, 1998) (notice) and 23637 (Jan. 8, 1999) (order).

⁷ A sub-adviser may manage the assets of a Subadvised Series directly or provide the Adviser with model portfolio or investment recommendation(s) that would be utilized in connection with the management of a Subadvised Series.

⁸ Each sub-adviser would be registered with the Commission as an investment adviser under the Advisers Act or not subject to such registration.

⁹ Applicants state that technology that includes visual capabilities will be used unless unanticipated circumstances arise. Applicants also state that the Board could not rely upon the relief to approve a Sub-Advisory Agreement by written consent or another form of absentee approval by the Board.

SECURITIES AND EXCHANGE COMMISSION

[Investment Company Act Release No. 34094; File No. 812-15150]

NB Crossroads Private Markets Access Fund LLC and Neuberger Berman Investment Advisers LLC

AGENCY: Securities and Exchange Commission (the “Commission”).

ACTION: Notice.

Notice of an application for an order pursuant to section 6(c) of the Investment Company Act of 1940 (the “1940 Act”) for an exemption from sections 18(a)(2), 18(c), and 18(i) of the 1940 Act, pursuant to section 6(c) and 23(c) of the 1940 Act for certain exemptions from rule 23c-3 under the 1940 Act, and for an order pursuant to section 17(d) of the 1940 Act and rule 17d-1 thereunder.

SUMMARY OF APPLICATION: Applicants request an order to permit certain registered closed-end management investment companies to issue multiple classes of interests (“Shares”) with varying sales loads and asset-based service and/or distribution fees and to impose early withdrawal charges.

APPLICANTS: NB Crossroads Private Markets Access Fund LLC (“Initial Fund”) and Neuberger Berman Investment Advisers LLC (“Adviser”).

FILING DATES: The application was filed on August 7, 2020.

HEARING OR NOTIFICATION OF HEARING: An order granting the requested relief will be issued unless the Commission orders a hearing. Interested persons may request a hearing by emailing the Commission’s Secretary at *Secretarys-Office@sec.gov* and serving applicants with a copy of the request by email. Hearing requests should be received by the Commission by 5:30 p.m. on December 7, 2020, and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Pursuant to rule 0-5 under the 1940 Act, hearing requests should state the nature of the writer’s interest, any facts bearing upon the desirability of a hearing on the matter, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by emailing the Commission’s Secretary at *Secretarys-Office@sec.gov*.

ADDRESSES: The Commission: *Secretarys-Office@sec.gov*. Applicants: Corey Issing, Neuberger Berman Investment Advisers LLC, *corey.issing@nb.com*.

FOR FURTHER INFORMATION CONTACT:

Jennifer O. Palmer, Senior Counsel, at (303) 844-1012, or David J. Marcinkus, Branch Chief, at (202) 551-6825 (Division of Investment Management, Chief Counsel’s Office).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained by searching the Commission’s website, at <http://www.sec.gov/search/search.htm>, using the application’s file number or the applicant’s name, or by calling the Commission at (202) 551-8090.

Applicants’ Representations

1. The Initial Fund is a newly organized Delaware limited liability company that is registered under the 1940 Act as a closed-end management investment company and classified as a non-diversified investment company. The Initial Fund’s investment objective is to seek to provide attractive, long-term capital appreciation by investing primarily in an actively managed portfolio of private equity investments.

2. The Adviser, a Delaware organized limited liability company, is registered as an investment adviser under the 1940 Act. The Adviser serves as investment adviser to the Initial Fund. The Adviser is an indirect, wholly-owned subsidiary of Neuberger Berman Group.

3. The applicants seek an order to permit the Initial Fund to offer investors multiple classes of Shares with varying sales loads and asset-based service and/or distribution fees and to impose early withdrawal charges.

4. Applicants request that the order also apply to any other registered closed-end management investment company that conducts a continuous offering of its shares, existing now or in the future, for which the Adviser, its successors,¹ or any entity controlling, controlled by, or under common control with the Adviser, or its successors, acts as investment adviser, and which provides periodic liquidity with respect to its Shares through tender offers conducted in compliance with either rule 23c-3 under the 1940 Act or rule 13e-4 under the Securities Exchange Act of 1934 (the “1934 Act”) (each such closed-end management investment company a “Future Fund” and, together with the Initial Fund, each a “Fund,” and collectively the “Funds”).²

¹ A successor in interest is limited to an entity that results from a reorganization into another jurisdiction or a change in the type of business organization.

² The Initial Fund and any Future Fund relying on the requested relief will do so in compliance with the terms and conditions of the application. Applicants represent that any person presently

5. The Initial Fund’s initial Registration Statement filed on Form N-2 seeks to register two initial classes of Shares, Class A Shares and Institutional Class Shares, each with its own fee and expense structure. If the Initial Fund’s initial Registration Statement is declared effective prior to receipt of the requested relief, the Initial Fund will only offer one class of Shares, Institutional Class Shares, until receipt of the requested relief. Shares will be offered on a continuous basis pursuant to a registration statement under the Securities Act of 1933 at their net asset value per share. The Initial Fund, as a closed-end management investment company, does not intend to continuously redeem Shares as does an open-end management investment company. Shares of the Initial Fund will not be listed on any securities exchange and will not trade on an over-the-counter system. Applicants do not expect that any secondary market will ever develop for the Shares.

6. If the requested relief is granted, the Initial Fund intends to offer multiple classes of Shares, such as the Institutional Class Shares (the “Initial Class Shares”) and Class A Shares (the “New Class Shares”), or any other classes. Because of the different distribution fees, shareholder services fees, and any other class expenses that may be attributable to the different classes, the net income attributable to, and any dividends payable on, each class of Shares may differ from each other from time to time.

7. Applicants state that, from time to time, the Board of a Fund may create and offer additional classes of Shares, or may vary the characteristics described of the Initial Class and New Class Shares, including without limitation, in the following respects: (1) The amount of fees permitted by a distribution and service plan as to such class; (2) voting rights with respect to a distribution and service plan as to such class; (3) different class designations; (4) the impact of any class expenses directly attributable to a particular class of Shares allocated on a class basis as described in the application; (5) differences in any dividends and net asset values per Share resulting from differences in fees under a distribution and service plan or in class expenses; (6) any early withdrawal charge or other sales load structure; and (7) any exchange or conversion features, as permitted under the 1940 Act.

8. Applicants state that, in order to provide a limited degree of liquidity to

intending to rely on the requested relief is listed as an applicant.

shareholders, the Initial Fund may from time to time offer to repurchase Shares at their then current NAV pursuant to written tenders by shareholders in accordance with rule 13e-4 under the 1934 Act. Any other investment company that intends to rely on the requested relief will provide periodic liquidity to shareholders in accordance with either rule 23c-3 under the 1940 Act or rule 13e-4 under the 1934 Act.

9. Applicants represent that any asset-based distribution and servicing fee of a Fund will comply with the provisions of Rule 2341 of the Rules of the Financial Industry Regulatory Authority ("FINRA Rule 2341").³ Applicants also represent that each Fund will disclose in its prospectus the fees, expenses, and other characteristics of each class of Shares offered for sale by the prospectus, as is required for open-end, multiple class funds under Form N-1A. As if it were an open-end management investment company, each Fund will disclose fund expenses borne by shareholders during the reporting period in shareholder reports⁴ and describe in its prospectus any arrangements that result in breakpoints in, or elimination of, sales loads.⁵ In addition, applicants will comply with applicable enhanced fee disclosure requirements for fund of funds, including registered funds of hedge and private equity funds.⁶

10. Each Fund and its distributor (the "Distributor") will also comply with any requirements that may be adopted by the Commission or FINRA regarding disclosure at the point of sale and in transaction confirmations about the costs and conflicts of interest arising out of the distribution of open-end investment company shares, and regarding prospectus disclosure of sales loads and revenue sharing arrangements as if those requirements apply to the Fund and the Distributor. Each Fund or the Distributor will contractually require that any other distributor of the Fund's Shares comply with such requirements in connection with the distribution of Shares of the Fund.

11. All expenses incurred by a Fund will be allocated among its various

classes of Shares based on the net assets of the Fund attributable to each class, except that the net asset value and expenses of each class will reflect the expenses associated with the distribution and service plan of that class (if any), shareholder services fees attributable to a particular class (including transfer agency fees, if any), and any other incremental expenses of that class. Expenses of a Fund allocated to a particular class of the Fund's Shares will be borne on a pro rata basis by each outstanding Share of that class. Applicants state that each Fund will comply with the provisions of rule 18f-3 under the 1940 Act as if it were an open-end management investment company.

12. Applicants state that any privilege or feature offered by a Fund will comply with rule 11a-1, rule 11a-3, and rule 18f-3 as if the Fund were an open-end management investment company.

13. Applicants seek relief to the extent necessary for each Fund to impose an early withdrawal charge on shares submitted for repurchase that have been held less than a specified period. Applicants state that each Fund may grant waivers of the early withdrawal charges on repurchases for certain categories of shareholders or transactions established from time to time. Applicants state that each Fund will apply the early withdrawal charge (and any waivers or scheduled variations of the early withdrawal charge) uniformly to all shareholders in a given class and consistently with the requirements of rule 22d-1 under the 1940 Act as if the Fund were an open-end management investment company.

14. Applicants state that a Fund operating as an interval fund pursuant to rule 23c-3 under the 1940 Act may offer its shareholders an exchange feature under which the shareholders of the Fund may, in connection with the Fund's periodic repurchase offers, exchange their Shares of the Fund for shares of the same class of (i) registered open-end management investment companies or (ii) other registered closed-end investment companies that comply with rule 23c-3 under the 1940 Act and continuously offer their shares at net asset value, that are in the Fund's group of investment companies (collectively, the "Other Funds"). Shares of a Fund operating pursuant to rule 23c-3 that are exchanged for shares of Other Funds will be included as part of the repurchase offer amount for such Fund as specified in rule 23c-3 under the 1940 Act. Any exchange option will comply with rule 11a-3 under the 1940 Act, as if the Fund were an open-end management investment company

subject to rule 11a-3. In complying with rule 11a-3 under the 1940 Act, each Fund will treat an early withdrawal charge as if it were a contingent deferred sales load (a "CDSL").⁷

15. Applicants state that, if a Fund charges a repurchase fee, Shares of the Fund will be subject to a repurchase fee at a rate of no greater than two percent of the shareholder's repurchase proceeds if the interval between the date of purchase of the Shares and the valuation date with respect to the repurchase of those Shares is less than one year.⁸ Repurchase fees, if charged, will equally apply to all classes of Shares of the Fund, consistent with section 18 of the 1940 Act and rule 18f-3 thereunder. To the extent a Fund determines to waive, impose scheduled variations of, or eliminate a repurchase fee, it will do so consistently with the requirements of rule 22d-1 under the 1940 Act as if the repurchase fee were a CDSL and as if the Fund were a registered open-end management investment company. In addition, the Fund's waiver of, scheduled variation in, or elimination of the repurchase fee will apply uniformly to all shareholders of the Fund regardless of class.

Applicants' Legal Analysis

Multiple Classes of Shares

1. Section 18(a)(2)(A) and (B) makes it unlawful for a registered closed-end management investment company to issue a senior security that is a stock unless (a) immediately after such issuance it will have an asset coverage of at least 200% and (b) provision is made to prohibit the declaration of any distribution upon its common stock, or the purchase of any such common stock, unless in every such case such senior security has at the time of the declaration of any such distribution, or at the time of any such purchase, an asset coverage of at least 200% after deducting the amount of such distribution or purchase price, as the case may be. Applicants state that the creation of multiple classes of Shares of the Funds may violate section 18(a)(2) because the Funds may not meet section 18(a)(2)'s requirements with respect to a

⁷ A CDSL, assessed by an open-end fund pursuant to Rule 6c-10 under the 1940 Act, is a distribution-related charge payable to the distributor. Pursuant to the requested order, the early withdrawal charge will likewise be a distribution-related charge payable to the distributor.

⁸ Unlike a distribution-related charge, the repurchase fee is payable to the Fund to compensate long-term shareholders for the expenses related to shorter-term investors, in light of the Fund's generally longer-term investment horizons and investment operations.

³ Any references to FINRA Rule 2341 include any successor or replacement rule that may be adopted by FINRA.

⁴ Shareholder Reports and Quarterly Portfolio Disclosure of Registered Management Investment Companies, Investment Company Act Release No. 26372 (Feb. 27, 2004) (adopting release).

⁵ Disclosure of Breakpoint Discounts by Mutual Funds, Investment Company Act Release No. 26464 (June 7, 2004) (adopting release).

⁶ Fund of Funds Investments, Investment Company Act Release Nos. 26198 (Oct. 1, 2003) (proposing release) and 27399 (June 20, 2006) (adopting release). See also rules 12d1-1, *et seq.* under the 1940 Act.

class of Shares that may be a senior security.

2. Section 18(c) of the 1940 Act provides, in relevant part, that a registered closed-end management investment company may not issue or sell any senior security which is a stock if immediately thereafter the company will have outstanding more than one class of senior security that is a stock. Applicants state that the creation of multiple classes of Shares of a Fund may be prohibited by section 18(c), as a class may have priority over another class as to payment of dividends because shareholders of different classes would pay different fees and expenses.

3. Section 18(i) of the 1940 Act generally provides that each share of stock issued by a registered management investment company will be a voting stock and have equal voting rights with every other outstanding voting stock. Applicants state that permitting multiple classes of Shares of a Fund may violate section 18(i) of the 1940 Act because each class would be entitled to exclusive voting rights with respect to matters solely related to that class.

4. Section 6(c) of the 1940 Act provides that the Commission may exempt any person, security, or transaction, or any class or classes of persons, securities, or transactions, from any provision of the 1940 Act, or from any rule or regulation under the 1940 Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act. Applicants request an exemption under section 6(c) from sections 18(a)(2), 18(c), and 18(i) to permit the Funds to issue multiple classes of Shares.

5. Applicants submit that the proposed allocation of expenses relating to distribution and voting rights is equitable and will not discriminate against any group or class of shareholders. Applicants submit that the proposed arrangements would permit each Fund to facilitate the distribution of its Shares and provide investors with a broader choice of shareholder options. Applicants assert that the proposed closed-end management investment company multiple class structure does not raise the concerns underlying section 18 of the 1940 Act to any greater degree than open-end management investment companies' multiple class structures that are permitted by rule 18f-3 under the 1940 Act. Applicants state that each Fund will comply with the provisions of rule 18f-3 as if it were an open-end management investment company.

Early Withdrawal Charges

1. Section 23(c) of the 1940 Act provides, in relevant part, that no registered closed-end management investment company shall purchase securities of which it is the issuer, except: (a) On a securities exchange or other open market; (b) pursuant to tenders, after reasonable opportunity to submit tenders given to all holders of securities of the class to be purchased; or (c) under other circumstances as the Commission may permit by rules and regulations or orders for the protection of investors.

2. Rule 23c-3 under the 1940 Act permits an interval fund to make repurchase offers of between five and twenty-five percent of its outstanding shares at net asset value at periodic intervals pursuant to a fundamental policy of the interval fund. Rule 23c-3(b)(1) under the 1940 Act permits an interval fund to deduct from repurchase proceeds only a repurchase fee, not to exceed two percent of the proceeds, that is paid to the interval fund and is reasonably intended to compensate the fund for expenses directly related to the repurchase.

3. Section 23(c)(3) of the 1940 Act provides that the Commission may issue an order that would permit a closed-end management investment company to repurchase its shares in circumstances in which the repurchase is made in a manner or on a basis that does not unfairly discriminate against any holders of the class or classes of securities to be purchased.

4. Applicants request relief under section 6(c), discussed above, and section 23(c)(3) from rule 23c-3 to the extent necessary for each Fund to impose early withdrawal charges on shares of the Fund submitted for repurchase that have been held for less than a specified period.

5. Applicants state that the early withdrawal charges they intend to impose are functionally similar to CDSLs imposed by open-end management investment companies under rule 6c-10 under the 1940 Act. Rule 6c-10 permits open-end management investment companies to impose CDSLs, subject to certain conditions. Applicants note that rule 6c-10 is grounded in policy considerations supporting the employment of CDSLs where there are adequate safeguards for the investor. Applicants state that these same policy considerations support imposition of early withdrawal charges in the interval fund context, and are a solid basis for the Commission to grant exemptive relief to permit interval funds to impose

early withdrawal charges. In addition, applicants state that early withdrawal charges may be necessary for the Fund's Distributor to recover distribution costs from shareholders who exit their investments early. Applicants represent that any early withdrawal charge imposed by a Fund will comply with rule 6c-10 under the 1940 Act as if the rule were applicable to closed-end management investment companies. Each Fund will disclose early withdrawal charges in accordance with the requirements of Form N-1A concerning CDSLs.

Asset-Based Service and/or Distribution Fees

1. Section 17(d) of the 1940 Act and rule 17d-1 thereunder prohibit an affiliated person of a registered investment company, or an affiliated person of such person, acting as principal, from participating in or effecting any transaction in connection with any joint enterprise or other joint arrangement in which the investment company participates unless the Commission issues an order permitting the transaction. In reviewing applications submitted under section 17(d) and rule 17d-1, the Commission considers whether the participation of the investment company in a joint enterprise or joint arrangement is consistent with the provisions, policies, and purposes of the 1940 Act, and the extent to which the participation is on a basis different from or less advantageous than that of other participants.

2. Rule 17d-3 under the 1940 Act provides an exemption from section 17(d) and rule 17d-1 to permit open-end management investment companies to enter into distribution arrangements pursuant to rule 12b-1 under the 1940 Act. Applicants request an order pursuant to section 17(d) of the 1940 Act and rule 17d-1 thereunder to the extent necessary to permit each Fund to impose asset-based service and/or distribution fees (in a manner similar to rule 12b-1 fees for an open-end management investment company). Applicants have agreed to comply with rules 12b-1 and 17d-3 as if those rules apply to closed-end management investment companies, which they believe will resolve any concerns that might arise in connection with a Fund financing the distribution of its Shares through asset-based service and/or distribution fees.

For the reasons stated above, applicants submit that the exemptions requested under section 6(c) are necessary and appropriate in the public interest and are consistent with the

protection of investors and the purposes fairly intended by the policy and provisions of the 1940 Act. Applicants further submit that the relief requested pursuant to section 23(c)(3) will be consistent with the protection of investors and will insure that applicants do not unfairly discriminate against any holders of the class of securities to be purchased. Finally, applicants state that the Funds' imposition of asset-based service and/or distribution fees is consistent with the provisions, policies, and purposes of the 1940 Act and does not involve participation on a basis different from or less advantageous than that of other participants.

Applicants' Condition

Applicants agree that any order granting the requested relief will be subject to the following condition:

Each Fund relying on the requested order will comply with the provisions of rules 6c-10, 12b-1, 17d-3, 18f-3, 22d-1 and, where applicable, 11a-3 under the 1940 Act, as amended from time to time or replaced, as if those rules applied to closed-end management investment companies, and will comply with FINRA Rule 2341, as amended from time to time, as if that rule applies to all closed-end management investment companies.

For the Commission, by the Division of Investment Management, under delegated authority.

Dated: November 13, 2020.

J. Matthew DeLesDernier,
Assistant Secretary.

DEPARTMENT OF TRANSPORTATION

Maritime Administration

[Docket No. MARAD-2019-0094]

Deepwater Port License Application: Bluewater Texas Terminal LLC; Correction

AGENCY: Maritime Administration, U.S. Department of Transportation.

ACTION: Notice; correction.

SUMMARY: The Maritime Administration (MARAD) and the U.S. Coast Guard (USCG) published a document in the **Federal Register** of August 7, 2020, concerning Deepwater Port License Application: Bluewater Texas Terminal, LLC; Project Scope Changes; Request for Comments. This document had errors in the "Summary of the Revised Project Description" and "Inshore Components" captions. This notice also seeks public comment regarding the proposed project scope changes. Please note, MARAD and USCG have determined that this notice is sufficient for satisfying National Environmental Policy Act (NEPA) requirements for public scoping and seeking public comment on an agency action.

FOR FURTHER INFORMATION CONTACT: Mr. Roddy Bachman, U.S. Coast Guard, telephone: 202-372-1451, email: Roddy.C.Bachman@uscg.mil, or Ms. Yvette M. Fields, Maritime Administration, telephone: 202-366-0926, email: Yvette.Fields@dot.gov. For questions regarding viewing the Docket, call Docket Operations, telephone: 202-366-9317 or 202-366-9826.

SUPPLEMENTARY INFORMATION:

Corrections

1. In the **Federal Register** of August 7, 2020, in FR Doc 2020–17327, on page 48071, in the second column, correct the “Summary of the Revised Project Description” caption to read:

Bluewater is proposing to construct, own, and operate a deepwater port terminal in the Gulf of Mexico (GOM) to export domestically produced crude oil. The proposed project involves the design, engineering, construction of a deepwater port, and approximately 56.48 miles of pipeline infrastructure. The Bluewater deepwater port would allow for up to two (2) very large crude carriers (VLCCs) or other crude oil carriers to moor at single point mooring (SPM) buoys and connect with the deepwater port via floating connecting crude oil hoses. During single vessel loading operations, the proposed project is capable of loading rates of up to approximately 80,000 barrels per hour (bph) and during simultaneous vessel loading operations, the proposed project is capable of loading rates of 40,000 bph. The facility is expected to service 16 VLCCs per month.

For the purposes of this application, the proposed Bluewater project is described in three distinguishable segments by locality, to include the onshore components, the inshore components and the offshore components.

Onshore components associated with the proposed Bluewater project are defined as those components on the landward side of the western Redfish Bay Mean High Tide (MHT) line, located in San Patricio and Aransas Counties, Texas. The onshore project components include:

- Approximately 22.20 miles of two (2) new parallel 30-inch-diameter crude oil pipelines extending from a planned Multi-Use Terminal located south of the City of Taft in San Patricio County, Texas. The planned multi-use terminal will consist of multiple inbound and outbound crude oil pipelines. Two of those outbound pipelines compose the proposed pipeline infrastructure that will extend to the inshore pipeline which connects to the proposed Harbor Island operational facility described below.

Inshore components associated with the proposed Bluewater project are defined as those components located between the western Redfish Bay MHT line and the MHT line located at the interface of San Jose Island and the GOM. Inshore project components include:

- Approximately 7.15 miles of two (2) new 30-inch-diameter crude oil

pipelines connecting to the onshore facility, an approximately 12-acre operations station and a connection to the offshore pipeline. The onshore pipeline would be located within San Patricio County, Texas and Nueces County, Texas and a proposed operations facility would be located on Harbor Island in Nueces County, Texas. The operations facility located on Harbor Island will cover approximately 12 acres of land and house the necessary infrastructure to support the transport of crude oil through the proposed pipeline infrastructure to the deepwater port for the loading of moored vessels. The facility would consist of pig launchers/receivers, meters and valves, operations building, and a communications facility.

Offshore components associated with the proposed Bluewater project are defined as those components located seaward of the MHT line located at the interface of San Jose Island and the GOM. Offshore project components include:

- Approximately 26.76 miles of two (2) new 30-inch-diameter crude oil pipelines extending from the shoreline crossing at the interface of San Jose Island to the offshore Bluewater deepwater port for crude oil delivery to Single Point Mooring (SPM) buoys.

- Two (2) SPMs in Outer Continental Shelf Matagorda Island Area TX4 lease blocks 698 and 699, approximately 15 nautical miles (17.26 statute miles) off the coast of San Patricio County, Texas in a water depth of approximately 89 feet.

- A catenary anchor leg mooring (CALM) system for each SPM buoy connected to a pipeline end manifold (PLEM) system, mooring hawsers, floating hoses, and sub-marine hoses to allow for the loading of crude oil to vessels moored at the proposed deepwater port. The SPM buoy system will be permanently moored with a symmetrically arranged six-leg anchor dual chain configuration extending to twelve (12) 72-inch-diameter pile anchors installed on the seafloor.

- Each of the proposed SPM buoy systems will consist of inner and outer cylindrical shells subdivided into twelve equal-sized watertight radial compartments. A rotating table will be affixed to the SPM buoy and allow for the connection of moored vessels to the SPM buoy system via mooring hawsers. Two floating hoses equipped with marine break-away couplings will be utilized for the transfer of crude oil from the SPM buoy systems to the moored vessel. Floating hoses will be equipped with strobe lights at 15-foot intervals for detection at night and low-light conditions.

2. In the **Federal Register** of August 7, 2020, in FR Doc 2020–17327, on page 48071, in the second column, correct the “Inshore Components” caption to read:

On May 30, 2019, Bluewater Texas Terminal, (BWTT) revised the design and layout of the proposed facility located on Harbor Island, in Nueces County, Texas. The following notice provides corrected information regarding the originally submitted design and the revised proposed design with respect to the facility located on Harbor Island.

The originally proposed Harbor Island facility occupied an approximate 19-acre area and included two (2) 181,000-barrel (bbl) crude oil storage tanks and two (2) 181,000 bbl water storage tanks. The tanks served to allow for the flushing of crude oil from the offshore pipeline infrastructure in the event of an emergency or for maintenance purposes.

The correct proposed project scope change and BWTT preferred option design eliminates the originally proposed four (4) storage tanks and pumps from Harbor Island. The revised design still maintains pipeline flushing capabilities. This will be accomplished through the use of previously-planned crude oil storage tanks and a new water storage tank located at the planned onshore Multi-Use Terminal (MUT). Based on this design, the facility on Harbor Island would now occupy an approximate 12-acre area, a reduction of 7 acres of permanent impacts.

The preferred Harbor Island project design would still consist of a number of originally proposed infrastructure components, which are required for the operation of the deepwater port (DWP). These facilities include pig launchers/receivers, meters and valves, an operations building, and a communications facility. The USCG valve (*i.e.*, first on land valve from the proposed DWP) is the same as that proposed in the original design at Harbor Island. The facility located on Harbor Island would be surrounded by a 10-foot-tall storm surge protection levee including a 20-footwide vehicle access road, as originally proposed. Based on this design, the facility on Harbor Island would occupy an approximate 12-acre area. The temporary construction workspace located on Harbor Island remains the same as originally proposed to allow the space necessary for the installation of pipeline infrastructure utilizing horizontal directional drill (HDD) installation methods. The 30-inch diameter pipelines entering and exiting the facility located on Harbor Island are proposed to remain the same and be

installed using the construction methodology originally proposed.

Privacy Act

The electronic form of all comments received into the Federal Docket Management System can be searched by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). The DOT Privacy Act Statement can be viewed in the **Federal Register** published on April 11, 2000 (Volume 65, Number 70, pages 19477–78) or by visiting <http://www.regulations.gov>.

DATES:

Comments must be received on or before December 21, 2020.

The license application is available for viewing at the *Regulations.gov* website: <http://www.regulations.gov> under docket number MARAD–2019–0094.

We encourage you to submit comments electronically to the public docket at <http://www.regulations.gov>. If you submit your comments electronically, it is not necessary to also submit a hard copy. If you cannot submit material using <http://www.regulations.gov>, please contact either Mr. Roddy Bachman, USCG or Ms. Yvette M. Fields, MARAD, as listed in the **FOR FURTHER INFORMATION CONTACT** section of this document. This section provides alternate instructions for submitting written comments. Additionally, if you go to the online docket and sign up for email alerts, you will be notified when comments are posted. Anonymous comments will be accepted. All comments received will be posted without change to <http://www.regulations.gov> and will include any personal information you have provided. The Federal Docket Management Facility's telephone number is 202–366–9317 or 202–366–9826, the fax number is 202–493–2251. (Authority: 33 U.S.C. 1501, *et seq.*; 49 CFR 1.93(h))

Dated: November 10, 2020.

By Order of the Maritime Administrator.

T. Mitchell Hudson, Jr.,

Secretary, Maritime Administration.

BILLING CODE 4910–81–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Regulation Project

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Internal Revenue Service, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on continuing information collections, as required by the Paperwork Reduction Act of 1995. The IRS is soliciting comments concerning the statement of liability of lender, surety, or other person for withholding taxes.

DATES: Written comments should be received on or before January 19, 2021 to be assured of consideration.

ADDRESSES: Direct all written comments to Kinna Brewington, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the revenue procedure should be directed to LaNita Van Dyke, at (202) 317–6009 or Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224, or through the internet, at Lanita.VanDyke@irs.gov.

SUPPLEMENTARY INFORMATION:

Title: Statement of Liability of Lender, Surety, or Other Person for Withholding Taxes.

OMB Number: 1545–2254.

Form Number: Form 4219.

Abstract: Third parties who directly pay another's payrolls can be held liable for the full amount of taxes required to be withheld but not paid to the Government (subject to the 25% limitation). IRC 3505 deals with persons who supply funds to an employer for the purpose of paying wages. The notification that a third party is paying or supplying wages will usually be made by filing of the Form 4219, Statement of Liability of Lender, Surety, or Other Person for Withholding Taxes. The Form 4219, Statement of Liability of Lender, Surety, or Other Person for Withholding Taxes, is to be submitted and associated with each employer and for every calendar quarter for which a liability under section 3505 is incurred.

Current Actions: There have been no changes to the form that would affect burden.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profit organizations, Not-for-profit institutions, Farms, Federal Government, State, Local, or Tribal Government.

Estimated Number of Respondents: 1,000.

Estimated Time per Respondent: 12 hours, 50 minutes.

Estimated Total Annual Burden Hours: 12,833.

The following paragraph applies to all of the collections of information covered by this notice.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: November 13, 2020.

Chakinna B. Clemons,

Supervisory Tax Analyst.

BILLING CODE 4830–01–P

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Regulation Project

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice and request for comments.

SUMMARY: The Internal Revenue Service, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on continuing information collections, as required by the Paperwork Reduction Act of 1995. The IRS is soliciting comments concerning the health insurance marketplace statement.

DATES: Written comments should be received on or before January 19, 2021 to be assured of consideration.

ADDRESSES: Direct all written comments to Kinna Brewington, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the form should be directed to LaNita Van Dyke, at (202) 317-6009, or Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington DC 20224, or through the internet, at LaNita.VanDyke@irs.gov.

SUPPLEMENTARY INFORMATION:

Title: Health Insurance Marketplace Statement.

OMB Number: 1545-2232.

Regulation Project Number: Form 1095-A.

Abstract: The IRS developed Form 1095-A under the authority of ICR section 36B(f)(3) for individuals to compute the amount of premium tax credit to which they are entitled under the Patient Protection and Affordable Care Act, P.L. 111-148, as amended, and file an accurate tax return. Marketplaces also must report certain information monthly to the IRS about individuals who receive from the Marketplace a certificate of exemption from the individual shared responsibility provision.

Current Actions: There is no change to this existing regulation. However, the agency has updated the number of respondents to reflect the most recent data available.

Type of Review: Revision of a currently approved collection.

Affected Public: State, local, or tribal government.

Estimated Number of Respondents: 3,250,000.

Estimated Time per Respondent: .3 minutes.

Estimated Total Annual Burden Hours: 16,250.

The following paragraph applies to all of the collections of information covered by this notice.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information

displays a valid OMB control number. Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Request for Comments: Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval. All comments will become a matter of public record. Comments are invited on: (a) Whether the collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology; and (e) estimates of capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

Approved: November 13, 2020.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

Proposed Collection; Comment Request for Revenue Procedure 2003–84

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of information collection; request for comments.

SUMMARY: The Internal Revenue Service (IRS), as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995. The IRS is soliciting comments concerning Revenue Procedure 2003–84, Optional election to make monthly 706(a) computations.

DATES: Written comments should be received on or before January 19, 2021 to be assured of consideration.

ADDRESSES: Direct all written comments to Kinna Brewington, Internal Revenue Service, Room 6526, 1111 Constitution Avenue NW, Washington, DC 20224.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the regulation should be directed to LaNita Van Dyke, at (202) 317–6009, 1111 Constitution Avenue NW, Room 6526, Washington, DC 20224, or through the internet at LaNita.VanDyke@irs.gov.

SUPPLEMENTARY INFORMATION:

Title: Optional election to make monthly 706(a) computations.

OMB Number: 1545–1768.

Revenue Procedure Number: Revenue Procedure 2003–84.

Abstract: This procedure allows certain partnerships that invest in tax-exempt obligations to make an election that enables the partners to take into account monthly the inclusions required under sections 702 and 707(c) of the Code and provides rules for partnership income tax reporting under section 6031 for such partnerships. Rev. Proc. 2002–68 modified and superseded.

Current Actions: There are no changes being made to the revenue procedure at this time.

Type of Review: Extension of a currently approved collection.

Affected Public: Business or other for-profit organizations.

Estimated Number of Respondents: 1,000.

Estimated Time per Respondent: 30 minutes.

Estimated Total Annual Burden Hours. 500.

The following paragraph applies to all the collections of information covered by this notice:

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless the collection of information displays a valid OMB control number. BILLING CODE 4830-01-P

DEPARTMENT OF VETERANS AFFAIRS

Funding Availability Under Supportive Services for Veteran Families Program

AGENCY: Department of Veterans Affairs.

ACTION: Notice of fund availability.

SUMMARY: The Department of Veterans Affairs (VA) is announcing the availability of funds for supportive services grants under the Supportive Services for Veteran Families (SSVF) Program. This Notice of Fund Availability (NOFA) contains information concerning the SSVF Program, renewal of supportive services grant application processes, and the amount of funding available. Awards

made for supportive services grants will fund operations beginning October 1, 2021.

DATES: Applications for supportive services grants under the SSVF Program must be received by the SSVF Program Office by 4:00 p.m. Eastern Time on February 5, 2021. In the interest of fairness to all competing applicants, this deadline is firm as to date and hour, and VA will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays, computer service outages or other submission-related problems.

ADDRESSES: For a Copy of the Application Package: Copies of the application can be downloaded from the SSVF website at www.va.gov/homeless/ssvf. Questions should be referred to the SSVF Program Office at SSVF@va.gov. For detailed SSVF Program information and requirements, see 38 CFR part 62.

Submission of Application Package: Applicants must submit applications electronically following instructions found at www.va.gov/homeless/ssvf. Applications may not be mailed, hand carried or sent by facsimile (FAX). Applications must be received in the SSVF Program Office by 4:00 p.m. Eastern Time on the application deadline date. Applications must arrive as a complete package. Materials arriving separately will not be included in the application package for consideration and may result in the application being rejected. See Section II.C. of this NOFA for maximum allowable grant amounts.

Technical Assistance: Information regarding how to obtain technical assistance with the preparation of a renewal supportive services grant application is available on the SSVF Program website at www.va.gov/homeless/ssvf.

FOR FURTHER INFORMATION CONTACT: Mr. John Kuhn, National Director, Supportive Services for Veteran Families, at SSVF@va.gov or by phone at 816-806-7348.

SUPPLEMENTARY INFORMATION:

Funding Opportunity Title: Supportive Services for Veteran Families Program.

Announcement Type: Initial.

Funding Opportunity Number: VA-SSVF-103120.

Catalog of Federal Domestic Assistance Number: 64.033, VA Supportive Services for Veteran Families Program.

I. Funding Opportunity Description

A. Purpose: The SSVF Program's purpose is to provide supportive services grants to private non-profit organizations and consumer cooperatives, who will coordinate or provide supportive services to very low-income Veteran families who:

(i) Are residing in permanent housing and at risk of becoming homeless; (ii) are homeless and scheduled to become residents of permanent housing within a specified time period; or (iii) after exiting permanent housing within a specified time period, are seeking other housing that is responsive to such very low-income Veteran family's needs and preferences. SSVF prioritizes the delivery of rapid re-housing services to homeless Veteran households.

Rapid re-housing is an intervention designed to help individuals and families quickly exit homelessness, return to housing in the community and avoid homelessness again in the near term. The core components of a rapid re-housing program are housing identification, move-in and rent financial assistance and rapid re-housing case management and services. These core components represent the minimum that a program must be providing to households to be considered a rapid re-housing program, but do not provide guidance for what constitutes an effective rapid re-housing program. Applicants should familiarize themselves with the Rapid Re-housing Performance Benchmarks and Program Standards found at https://www.va.gov/homeless/ssvf/?page=/ssvf_university/fidelity_tool_ss vf_standards.

B. Funding Priorities: The principle goal for this NOFA is to provide support to those applicants who demonstrate the greatest capacity to end homelessness among Veterans or, in communities that have already met U.S. Interagency Council on Homelessness (USICH) Federal Criteria and Benchmarks, sustain the gains made in ending homelessness among Veterans. Priority will be given to grantees who can demonstrate adoption of evidence-based practices in their application. Priorities 1, 2 and 3 are open only to existing grantees. Under Priority 1, VA will provide funding to those grantees with 3-year accreditation from the Commission on Accreditation of Rehabilitation Facilities (CARF) in Employment and Community Services including: Rapid Rehousing and Homeless Prevention standards, a 4-year accreditation from the Council on Accreditation's (COA) accreditation in Housing Stabilization and Community Living Services standards, or a 3-year

accreditation in The Joint Commission's (JC) Behavioral Health Care: Housing Support Services Standards. Priority 2 includes existing grantees not included in Priority 1 with annual awards, seeking to renew their grants. Priority 3 includes existing grantees previously awarded Priority 3 grants stemming from the SSVF NOFA published on December 5, 2019.

C. *Definitions*: 38 CFR part 62, contains definitions of terms used in the SSVF Program. In addition to the definitions and requirements described in 38 CFR part 62, this NOFA provides further clarification in this paragraph on the use of *Emergency Housing Assistance* (EHA). EHA may be provided by the SSVF grantee under 38 CFR 62.34(f) to offer transition in place when a permanent housing voucher, such as is offered through the Department of Housing and Urban Development's (HUD) Section 8 program, is available from any source, but access to the permanent housing voucher is pending completion of the housing inspection and administrative processes necessary for leasing. In such circumstances, the EHA payment cannot exceed what would otherwise be paid when the voucher is utilized. EHA may also be used as part of a Rapid Resolution or diversion response that helps Veteran households avoid entry into homelessness through placements with family or friends.

D. *Approach*: Respondents to this NOFA will have their renewal funding requests scored based on applications submitted in response to the December 5, 2019, NOFA. Grantees will be expected to leverage supportive services grant funds to enhance the housing stability of very low-income Veteran families who are occupying permanent housing. In doing so, grantees are required to establish relationships with local community resources. Therefore, agencies must work through coordinated partnerships built either through formal agreements or the informal working relationships commonly found among successful social service providers.

The aim of the provision of supportive services is to assist very low-income Veteran families residing in permanent housing to remain stably housed and to rapidly transition those not currently in permanent housing to stable housing. SSVF emphasizes the placement of homeless Veteran families who are described in 38 CFR 62.11(b)–(c) as (i) very low-income Veteran families who lack a fixed, regular and adequate nighttime residence and are scheduled to become residents of permanent housing within 90 days,

pending the location or development of housing suitable for permanent housing, and (ii) very low-income Veteran families who have exited permanent housing within the previous 90 days to seek other housing that is responsive to their needs and preferences. As a crisis intervention program, the SSVF Program is not intended to provide long-term support for participants, nor will it be able to address all of the financial and supportive services needs of participants that affect housing stability. Rather, when participants require long-term support, grantees should focus on connecting such participants to income supports, such as employment and mainstream Federal and community resources (e.g., HUD–VA Supportive Housing program, HUD Housing Choice Voucher programs, McKinney-Vento Funded Supportive Housing Programs, Temporary Assistance for Needy Families (TANF) and Social Security Income/Social Security Disability Insurance (SSI/SSDI), etc.) that can provide ongoing support as required.

Assistance in obtaining or retaining permanent housing is a fundamental goal of the SSVF Program. Grantees must provide case management services in accordance with 38 CFR 62.31. Such case management should include tenant counseling, mediation with landlords and outreach to landlords.

E. *Authority*: Funding available under this NOFA is authorized by 38 U.S.C. 2044. VA implements the SSVF Program through regulations in 38 CFR part 62. Funds made available under this NOFA are subject to the requirements of these regulations.

F. *Requirements for the Use of Supportive Services Grant Funds*: The applicant's request for funding must be consistent with the limitations and uses of supportive services grant funds set forth in 38 CFR part 62 and this NOFA. In accordance with the regulations and this NOFA, the following requirements apply to supportive services grants awarded under this NOFA:

1. Grantees may use a maximum of 10% of supportive services grant funds for administrative costs identified in 38 CFR 62.70(e).

2. Grantees must use a minimum of 60% of the temporary financial assistance portion of their supportive services grant funds to serve very low-income Veteran families who qualify under 38 CFR 62.11(b). (NOTE: Grantees may request a waiver to decrease this minimum, as discussed in section V.B.3.a.)

3. Priority 1 and 2 grantees may use a maximum of 50% of supportive services grant funds to provide the supportive service of temporary

financial assistance paid directly to a third party on behalf of a participant for child care, emergency housing assistance, transportation, rental assistance, utility-fee payment assistance, security deposits, utility deposits, moving costs and general housing stability assistance, in accordance with 38 CFR 62.33 and 38 CFR 62.34, unless a waiver is granted by the SSVF Program Office.

4. Priority 3 grantees must use a minimum of 40% of funds to support temporary financial assistance with the expectation that much of these funds will be used for rental assistance in accordance with 38 CFR 62.34(a)(8). Priority 3 awards will extend to September 30, 2023, existing awards made based on the NOFA published on December 5, 2019.

G. *Guidance for the Use of Supportive Services Grant Funds*: Grantees are expected to demonstrate adoption of evidence-based practices most likely to lead to reductions in homelessness. Housing is not contingent on compliance with mandated therapies or services; instead, participants must comply with a standard lease agreement and are provided with the services and supports that are necessary to help them do so successfully.

Grantees must develop plans that will ensure that Veteran participants have the level of income and economic stability needed to remain in permanent housing after the conclusion of the SSVF intervention. Both employment and benefits assistance from VA and non-VA sources represent a significant underutilized source of income stability for homeless Veterans. Income is not a pre-condition for housing. Case management should include income maximization strategies to ensure households have access to benefits, employment and financial counseling. The complexity of program rules and the stigma some associate with entitlement programs contributes to their lack of use. For this reason, grantees are encouraged to consider strategies that can lead to prompt and successful access to employment and benefits that are essential to retaining housing.

1. Consistent with 38 CFR 62.30–62.34, grantees are expected to offer the following supportive services: Counseling participants about housing; assisting participants in understanding leases; securing utilities; making moving arrangements; providing representative payee services concerning rent and utilities when needed; and mediation and outreach to property owners related to locating or retaining housing. Grantees may also assist participants by

providing rental assistance, security or utility deposits, moving costs, emergency housing or general housing stability assistance; or using other Federal resources, such as HUD's Emergency Solutions Grants Program, or supportive services grant funds, subject to the limitations described in this NOFA and 38 CFR 62.34.

2. As SSVF is a short-term crisis intervention, grantees must develop plans that will produce sufficient income to sustain Veteran participants in permanent housing after the conclusion of the SSVF intervention. Grantees must ensure the availability of employment and vocational services either through the direct provision of these services or their availability through formal or informal service agreements. Agreements with Homeless Veteran Reintegration Programs, funded by the U.S. Department of Labor, are strongly encouraged. For participants unable to work due to disability, income must be established through available benefits programs.

3. Per 38 CFR 62.33, grantees must assist participants in obtaining public benefits. Grantees must screen all participants for eligibility for a broad range of entitlements such as TANF, Social Security, the Supplemental Nutrition Assistance Program, the Low-Income Home Energy Assistance Program, the Earned Income Tax Credit and local General Assistance programs. Grantees are expected to access the Substance Abuse and Mental Health Services Administration's SSI/SSDI Outreach, Access and Recovery (SOAR) program directly by training staff and providing the service or subcontracting services to an organization to provide SOAR services. In addition, where available, grantees should access information technology tools to support case managers in their efforts to link participants to benefits.

4. Grantees are encouraged to provide, or assist participants in obtaining, legal services relevant to issues that interfere with the participants' ability to obtain or retain permanent housing. (NOTE: Information regarding legal services provided may be protected from being released to the grantee or VA under attorney-client privilege, although the grantee must provide sufficient information to demonstrate the frequency and type of service delivered.) Support for legal services can include paying for court filing fees to assist a participant with issues that interfere with the participant's ability to obtain or retain permanent housing or supportive services, including issues that affect the participant's employability and financial security.

Grantees (in addition to employees and members of grantees) may represent participants before VA with respect to a claim for VA benefits, but only if they are recognized for that purpose pursuant to 38 U.S.C. Chapter 59. Further, the individual providing such representation must be accredited pursuant to 38 U.S.C. Chapter 59.

5. Access to mental health and addiction services are required by SSVF; however, grantees cannot fund these services directly through the SSVF grant. Therefore, applicants must demonstrate, through either formal or informal agreements, their ability to promote rapid access to and engagement with mental health and addiction services for the Veteran and family members.

6. VA recognizes that extremely low-income Veterans, with incomes below 30% of the area median income, face greater barriers to permanent housing placement. Grantees should consider how they can support these participants.

7. When serving participants who are residing in permanent housing, the defining question to ask is: "Would this individual or family be homeless but for this assistance?" The grantee must use a VA-approved screening tool with criteria that target those most at-risk of homelessness. To qualify for SSVF services, a participant who is served under 38 CFR 62.11(a) (homeless prevention) must not have sufficient resources or support networks (e.g., family, friends, faith-based or other social networks) immediately available to prevent them from becoming homeless. To further qualify for services under 38 CFR 62.11(a), the grantee must document that the participant meets at least one of the following conditions:

(a) Has moved because of economic reasons 2 or more times during the 60 days immediately preceding the application for homelessness prevention assistance;

(b) Is living in the home of another because of economic hardship;

(c) Has been notified, in writing, that their right to occupy their current housing or living situation will be terminated within 21 days after the date of application for assistance;

(d) Lives in a hotel or motel, and the cost of the hotel or motel stay is not paid by charitable organizations or by Federal, state or local government programs for low-income individuals;

(e) Is exiting a publicly funded institution or system of care (such as a health care facility, a mental health facility or correctional institution) without a stable housing plan; or

(f) Otherwise lives in housing that has characteristics associated with instability and an increased risk of homelessness, as identified in the recipient's approved screening tool.

8. SSVF grantees are required to participate in local planning efforts designed to end Veteran homelessness. Grantees may use grant funds to support SSVF involvement in such community planning by sub-contracting with continuums of care (CoC), when such funding is essential, to create or sustain the development of these data-driven plans.

9. When other funds from community resources are not readily available to assist program participants, grantees may choose to utilize supportive services grants, to the extent described in this NOFA and in 38 CFR 62.33 and 62.34, to provide temporary financial assistance. Such assistance may, subject to the limitations in this NOFA and 38 CFR part 62, be paid directly to a third party on behalf of a participant for child care, transportation, family emergency housing assistance, rental assistance, utility-fee payment assistance, security or utility deposits, moving costs and general housing stability assistance as necessary.

10. SSVF requires grantees to offer Rapid Resolution (also known as diversion) services. These services engage Veterans immediately before or after they become homeless and assist them to avoid continued homelessness. These efforts can reduce the trauma and expense associated with extended periods of homelessness, and the strain on the crisis response and affordable housing resources in the community. Through Rapid Resolution, the grantee and the Veteran explore safe, alternative housing options immediately before or quickly after they become homeless. Rapid Resolution can identify an immediate safe place to stay within the Veteran's network of family, friends or other social networks. All Veterans requesting SSVF services should have a Rapid Resolution screening, and if not appropriate, for Rapid Resolution grantees should then assess the Veteran for other SSVF services. More information about Rapid Resolution can be found at www.va.gov/homeless/ssvf.

II. Award Information

A. *Overview:* This NOFA announces the availability of funds for supportive services grants under the SSVF Program and pertains to proposals for renewal of existing supportive services grant programs.

B. *Funding:* The funding priorities for this NOFA are as follows:

1. Priority 1. Under Priority 1, VA will provide funding to those grantees with 3-year CARF, 4-year COA accreditations or 3-year JC accreditations. Proof of accreditation must be submitted with the application no later than the application due date.

2. Priority 2. Priority 2 includes other existing grantees seeking to renew their annual grant awards.

3. Priority 3. Priority 3 includes existing grantees operating grants previously funded as Priority 3 awards in response to the December 5, 2019, NOFA.

All applicants must apply using Letters of Intent (LOI). Priority 1 and 2 grantees submitting a LOI must include a proposed budget for fiscal year (FY) 2022. Priority 3 grantees would include a budget covering the period through FY 2023. In response to this NOFA, VA will evaluate their previously awarded FY 2020 renewal grants for scoring purposes. To be eligible for renewal of a supportive services grant, the Priority 1 and 2 applicants' program concept must be substantially the same as the program concept of the grantees' current grant award. Renewal applications can request funding that is equal to or less than their current annualized award. If sufficient funding is available, VA may provide an increase of up to 10% from the previous year's award. Any percentage increase, if provided, will be awarded uniformly to all Priority 1 and 2 grant recipients, regardless of their grant award and may be applied to Priority 3 grant recipients if sufficient funding is available.

4. Priority 3. Under Priority 3, VA will provide funding to current grantees previously awarded grants stemming from the SSVF NOFA published on December 5, 2019. Applicants apply by submitting an LOI by the NOFA deadline indicating their intention of continuing SSVF services with a focus on rental subsidies described in 38 CFR 62.34(a). Each Priority 3 award will be up to the amount made to that applicant stemming from the SSVF NOFA published on December 5, 2019. Awards may be increased to reflect additional amounts awarded through funding processes described in 38 CFR 62.25(d) and Section II.C.8. of the December 5, 2019, NOFA. Awards may also be decreased based on annualized spending of grantee if current spending rates of that Priority 3 grantee will not exhaust available funding by September 30, 2023. These awards will extend the duration of existing awards through September 30, 2023.

C. Allocation of Funds: Funding will be awarded under this NOFA to existing grantees for a 1-year to 3-year period

beginning October 1, 2021. The following requirements apply to supportive services grants awarded under this NOFA:

1. In response to this NOFA, only existing grantees can apply as Priority 1, 2 or 3 grantees.

2. Priority 1 and 2 renewal grant requests cannot exceed the current award. (The current award may include funds that were added to the original award through disaster relief support or through the process described in Section II.C.8.)

3. Priority 3 renewal grant requests cannot exceed the award they received based on the December 5, 2019, NOFA. The current award may include funds that were added to the original award through the process described in Section II.C.8.)

4. Existing applicants may request an amount less than their current award. (This will not be considered a substantial change to the program concept.)

5. If a Priority 1 or 2 grantee failed to use all of the awarded funds from FY 2020 by December 31, 2020, VA may elect to limit the renewal award to the amount of funds used in the previous fiscal year, or in the current fiscal year, less the money swept.

6. If, during the course of the grant year, VA determines that grantee spending is not meeting the minimum percentage milestones below, VA may elect to recoup projected unused funds and reprogram such funds to provide supportive services in areas with higher need. Should VA elect to recoup unspent funds, reductions in available grant funds would take place the first business day following the end of the quarter. VA may elect to recoup funds from Priority 1 and 2 grantees under the following circumstances:

(a) By the end of the first quarter (December 31, 2021) of the grantee's supportive services annualized grant award period, the grantee's cumulative requests for supportive services grant funds is fewer than 10% of the total supportive services grant award. (During this same period, the grantee's cumulative requests for supportive services grant funds may not exceed 30% of the total supportive services grant award.)

(b) By the end of the second quarter (March 31, 2022) of the grantee's supportive services annualized grant award period, the grantee's cumulative requests for supportive services grant funds is fewer than 30% of total supportive services grant award. (During this same period, the grantee's cumulative requests for supportive services grant funds may not exceed

55% of the total supportive services grant award.)

(c) By the end of the third quarter (June 30, 2022) of the grantee's supportive services annualized grant award period, the grantee's cumulative requests for supportive services grant funds is fewer than 55% of the total supportive services grant award. (During this same period, the grantee's cumulative requests for supportive services grant funds may not exceed 80% of the total supportive services grant award.) VA may recoup funds from Priority 3 grantees if by the end of the third quarter (June 30, 2022) of the Priority 3 grantee's supportive services grant award period, the grantee's cumulative requests for supportive services grant funds is fewer than 40% of the total supportive services grant award. (During this same period, the grantee's cumulative requests for supportive services grant funds should not exceed 65% of the total supportive services grant award.)

7. Applicants should submit separate LOIs for each supportive services funding request.

8. Should additional funding become available over the course of the grant term from funds recouped under the Award Information section of this Notice, funds that are voluntarily returned by grantees, funds that become available due to a grant termination or other funds still available for grant awards, VA may elect to offer these funds to grantees in areas where demand has exceeded available SSVF resources. Additional funds will be provided first to the highest scoring grantee in the selected area who is in compliance with their grant agreement and has the capacity to utilize the additional funds.

D. Supportive Services Grant Award Period: Priority 2 grants are made for a 1-year period, although selected grants may be eligible for a 3-year award (see Section VI.C.6) as Priority 1 awards. All grants are eligible to be renewed subject to the availability of funding.

III. Eligibility Information

A. Eligible Applicants: Applicants must submit an LOI on their organization letterhead stating the intent to apply for renewal funding and agreement for VA to evaluate their previously awarded FY 2020 application and renewal grant for scoring purposes. Only eligible entities, that are existing grantees previously awarded grants stemming from the SSVF NOFA published on December 5, 2019, can apply in response to this NOFA.

B. Cost Sharing or Matching: None.

IV. Application and Submission Information

A. Obtaining an Application Package: Applications are located at www.va.gov/homeless/ssvf. Any questions regarding this process should be referred to the SSVF Program Office at SSVF@va.gov. For detailed SSVF Program information and requirements, see 38 CFR part 62.

B. Content and Form of Application: Applicants must submit applications electronically following instructions found at www.va.gov/homeless/ssvf.

C. Submission Dates and Times: Applications for supportive services grants under the SSVF Program must be received by the SSVF Program Office by 4:00 p.m. Eastern Time on February 5, 2021. Awards made for supportive services grants will fund operations beginning October 1, 2021. Applications must arrive as a complete package. Materials arriving separately will not be included in the application package for consideration and may result in the application being rejected. Additionally, in the interest of fairness to all competing applicants, this deadline is firm as to date and hour, and VA will treat as ineligible for consideration any application that is received after the deadline. Applicants should take this practice into account and make early submission of their materials to avoid any risk of loss of eligibility brought about by unanticipated delays, computer service outages or other delivery-related problems.

D. Funding Restrictions: Funding will be awarded for supportive services grants under this NOFA depending on funding availability. Only existing SSVF providers may apply for grant renewals. Applicants should submit separate LOIs and accompanying material for each supportive services funding request. VA will evaluate funding requests based on previously awarded FY 2020 applications made in response to the SSVF NOFA published on December 5, 2019, for scoring purposes.

1. Funding used for staff education and training cannot exceed 1% of the overall program grant award. This limitation does not include the cost to attend VA mandated training. All training costs must be directly related to the provision of services to homeless Veterans and their families.

2. Expenses related to maintaining accreditation are allowable. Priority 1 and 2 grantees are allowed to include expenses for seeking initial accreditation only once in a 5-year period. The expenses to renew full accreditation is allowed and is based on the schedule of the accrediting agency: For instance, every 3 years for CARF

and every 4 years for COA. Expenses related to the renewal of less than full accreditation are not allowed.

E. Other Submission Requirements:

1. Existing applicants applying for Priority 1 or 2 grants may apply only by submitting LOIs with required budgets.

2. At the discretion of VA, multiple grant proposals submitted by the same lead agency may be combined into a single grant award if the proposals provide services to contiguous areas.

3. Submission of an incorrect or incomplete application package will result in the application being rejected during threshold review. The application packages must contain all required forms. Applicants and grantees will be notified of any additional information needed to confirm or clarify information provided in the application and the deadline by which to submit such information. Applicants must submit applications electronically. Applications may not be mailed, hand carried or sent by FAX.

V. Application Review Information

A. Criteria: VA will only fund grantees submitting LOIs and required budget information by the application deadline.

B. Review and Selection Process: VA will review all supportive services renewal grant applications in response to this NOFA according to the following steps:

1. As this NOFA requires only LOIs for consideration, it is expected that all grantees will be funded at the same level as the previous award.

2. Should available funding not be sufficient to fully fund all requests, grant awards will be made proportionally with each grantee receiving the same percentage of their award request up to the amount of available funding.

3. VA will also utilize the following considerations, in 38 CFR 62.23(d), to select applicants for funding:

(a) Give preference to applications that provide or coordinate the provision of supportive services for very low-income Veteran families transitioning from homelessness to permanent housing. Consistent with this preference, where other funds from community resources are not readily available for temporary financial assistance, applicants are required to spend no less than 60% of all budgeted temporary financial assistance on participants occupying permanent housing as defined in 38 CFR 62.11(b). Waivers to this 60% requirement may be requested when grantees can demonstrate significant local progress towards eliminating homelessness in

the target service area. Waiver requests must include data from authoritative sources such as USICH certification, that a community has ended homelessness, as defined by Federal Benchmarks and Criteria, or has reached Community Solution's Functional Zero. Waivers for the 60% requirement may also be requested for services provided to rural Indian tribal areas and other rural areas where shelter capacity is insufficient to meet local need. Waiver requests must include an endorsement by the impacted CoC explicitly stating that a shift in resources from rapid rehousing to prevention will not result in an increase in homelessness.

(b) To the extent practicable, ensure that supportive services grants are equitably distributed across geographic regions, including rural communities and tribal lands. This equitable distribution criteria will be used to ensure that SSVF resources are provided to those communities with the highest need as identified by VA's assessment of expected demand and available resources to meet that demand.

VI. Award Administration Information

A. Award Notices: Although subject to change, the SSVF Program Office expects to announce grant recipients for all applicants in the fourth quarter of FY 2021, with grants beginning October 1, 2021. Prior to executing a funding agreement, VA will contact the applicants, make known the amount of proposed funding and verify that the applicant would still like the funding. Once VA verifies that the applicant is still seeking funding, VA will execute an agreement and make payments to the grant recipient in accordance with 38 CFR part 62 and this NOFA.

B. Administrative and National Policy Requirements: As SSVF grants cannot be used to fund treatment for mental health or substance use disorders, applicants must provide evidence that they can provide access to such services to all program participants through formal and informal agreements with community providers.

C. Reporting: VA places great emphasis on the responsibility and accountability of grantees. As described in 38 CFR 62.63 and 62.71, VA has procedures in place to monitor supportive services provided to participants and outcomes associated with the supportive services provided under the SSVF Program. Applicants should be aware of the following:

1. Upon execution of a supportive services grant agreement with VA, grantees will have a VA regional coordinator, assigned by the SSVF Program Office, who will provide

oversight and monitor supportive services provided to participants.

2. Grantees will be required to enter data into a Homeless Management Information System (HMIS) web-based software application. These data will consist of information on the participants served and types of supportive services provided by grantees. Grantees must treat the data, for activities funded by the SSVF Program separate from that of activities funded by other programs. Grantees will be required to work with their HMIS Administrators to export client-level data for activities funded by the SSVF Program to VA on at least a monthly basis.

3. VA will complete annual monitoring evaluations of each grantee. Monitoring will also include the submittal of quarterly and annual financial and performance reports by the grantee. The grantee will be expected to demonstrate adherence to the grantee's proposed program concept, as described in the grantee's application. All grantees are subject to audits conducted by VA or its representative.

4. Grantees will be assessed based on their ability to meet critical performance measures. In addition to meeting program requirements defined by the regulations and applicable NOFA(s), grantees will be assessed on their ability to place participants into housing and the housing retention rates of participants served. Higher placement for homeless participants and higher housing retention rates for at-risk participants are expected for very-low income Veteran families when compared to extremely low-income Veteran families with incomes below 30% of the area median income.

5. Organizations receiving renewal awards that have had ongoing SSVF program operation for at least 1 year (as measured from the start of initial SSVF services until February 5, 2021) may be eligible for a 3-year award. Grantees meeting outcome goals defined by VA and in substantial compliance with their grant agreements (defined by meeting targets and having no outstanding corrective action plans) and who, in addition, receive 3-year accreditation from CARF in Employment and Community Services; Rapid Rehousing and Homeless Prevention standards, a 4-year accreditation from COA accreditation in Supported Community Living Services standards, or a 3 year accreditation in The Joint Commission's Behavioral Health Care; Housing Support Services Standards are eligible for a 3-year grant renewal subject to funding availability. (NOTE: Multi-year

awards are contingent on funding availability.) If awarded a multiple year renewal, grantees may be eligible for funding increases as defined in NOFAs that correspond to years 2 and 3 of their renewal funding.

VII. Other Information

A. VA Goals and Objectives for Funds Awarded Under this NOFA: In accordance with 38 CFR 62.24(c), VA will evaluate an applicant's compliance with VA goals and requirements for the SSVF Program. VA goals and requirements include the provision of supportive services designed to enhance the housing stability and independent living skills of very low-income Veteran families occupying permanent housing across geographic regions and program administration in accordance with all applicable laws, regulations and guidelines. For purposes of this NOFA, VA goals and requirements also include the provision of supportive services designed to rapidly re-house or prevent homelessness among people in the following target populations who also meet all requirements for being part of a very low-income veteran family occupying permanent housing:

1. Veteran families earning less than 30% of area median income, as most recently published by HUD for programs under section 8 of the United States Housing Act of 1937 (42 U.S.C. 1437f) (<http://www.huduser.org>).

2. Veterans with at least one dependent family member.

3. Veterans returning from Operation Enduring Freedom, Operation Iraqi Freedom or Operation New Dawn.

4. Veteran families located in a community, as defined by HUD's CoC, or a county not currently served by an SSVF grantee.

5. Veteran families located in a community, as defined by HUD's CoC, where the current level of SSVF services is not sufficient to meet the demand of Category 2 and 3 (currently homeless) Veteran families.

6. Veteran families located in a rural area.

7. Veteran families located on Indian Tribal Property.

B. Payments of Supportive Services Grant Funds: Grantees will receive payments electronically through the U.S. Department of Health and Human Services Payment Management System. Grantees will have the ability to request payments as frequently as they choose, subject to the following limitations:

1. During the first quarter of the grantee's supportive services annualized grant award period, the grantee's cumulative requests for supportive services grant funds may not exceed

35% of the total supportive services grant award without written approval by VA.

2. By the end of the second quarter of the grantee's supportive services annualized grant award period, the grantee's cumulative requests for supportive services grant funds may not exceed 60% of the total supportive services grant award without written approval by VA.

3. By the end of the third quarter of the grantee's supportive services annualized grant award period, the grantee's cumulative requests for supportive services grant funds may not exceed 80% of the total supportive services grant award without written approval by VA.

4. By the end of the fourth quarter of the grantee's supportive services annualized grant award period, the grantee's cumulative requests for supportive services grant funds may not exceed 100% of the total supportive services grant award.

Signing Authority

The Secretary of Veterans Affairs, or designee, approved this document and authorized the undersigned to sign and submit the document to the Office of the Federal Register for publication electronically as an official document of the Department of Veterans Affairs. Brooks D. Tucker, Assistant Secretary for Congressional and Legislative Affairs, Performing the Delegable Duties of the Chief of Staff, Department of Veterans Affairs, approved this document on November 12, 2020, for publication.

Luvenia Potts,

Regulation Development Coordinator, Office of Regulation Policy & Management, Office of the Secretary, Department of Veterans Affairs.

BILLING CODE 8320-01-P

DEPARTMENT OF VETERANS AFFAIRS

[OMB Control No. 2900-0205]

Agency Information Collection Activity Under OMB Review: Title 38 Positions—Applications and Appraisals for Employment

AGENCY: Veterans Health Administration, Department of Veterans Affairs.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (PRA) of 1995, this notice announces that the Veterans Health Administration,

Department of Veterans Affairs, will submit the collection of information abstracted below to the Office of Management and Budget (OMB) for review and comment. The PRA submission describes the nature of the information collection and its expected cost and burden, and it includes the actual data collection instrument.

DATES: Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Refer to “OMB Control No. 2900–0205.”

FOR FURTHER INFORMATION CONTACT:

Danny S. Green, Office of Quality, Performance and Risk (OQPR), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, (202) 421–1354 or email danny.green2@va.gov Please refer to “OMB Control No. 2900–0205” in any correspondence.

SUPPLEMENTARY INFORMATION:

Authority: 44 U.S.C. 3501–3521.

Title: Title 38 Positions—Applications and Appraisals for Employment (VA Forms 10–2850, 10–2850a, 10–2850c, FL 10–341(a)).

OMB Control Number: 2900–0205.

Type of Review: Reinstatement of a previously approved collection.

Abstract: The collection of this information is authorized by Title 38, United States Code (U.S.C.) 7403, (Veterans’ Benefits), which provides that appointments of Title 38 employees will be made only after qualifications have been satisfactorily verified in accordance with regulations prescribed by the Secretary. Occupations listed in 38 U.S.C. 7401(1) and 7401(3) (Appointments in Veterans Health Administration), are appointed at a grade and step rate or an assignment based on careful evaluation of their education and experience.

VA Forms 10–2850, 10–2850a, and 10–2850c are applications designed

specifically to elicit appropriate information about each candidate’s qualifications for employment with Department of Veterans Affairs (VA) as well as educational and experience. To assure that a full evaluation of each candidate’s credentials can be made prior to employment, the forms require disclosure of details about all licenses ever held, Drug Enforcement Administration certification, board certification, clinical privileges, revoked certification or registration, liability insurance history, and involvement in malpractice proceedings.

VA Form Letter 10–341a is the pre-employment reference form used to elicit information concerning the prior education and/or performance of the Title 38 applicant. This collection of information is necessary to determine eligibility for employment and the appropriate grade and step rate or assignment.

a. VA Form 10–2850, Application for Physicians, Dentists, Podiatrists, Optometrists, and Chiropractors, will collect information used to determine eligibility for appointment to VHA.

b. VA Form 10–2850a, Application for Nurses and Nurse Anesthetists, will collect information used to determine eligibility for appointment to VHA.

c. VA Form 10–2850c, Application for Associated Health Occupations, will collect information used to determine eligibility for appointment to VHA.

d. VA Form Letter 10–341(a), Appraisal of Applicant, will collect information used to determine if applicant meets the requirements for employment.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The **Federal Register** Notice with a 60-day comment period soliciting comments on this collection of information was published at 85 FR 73 on April 15, 2020, page 21071.

40 CFR Part 63

Reclassification of Major Sources as Area Sources Under Section 112 of the Clean Air Act; Final Rule

ENVIRONMENTAL PROTECTION AGENCY**40 CFR Part 63**

[EPA-HQ-OAR-2019-0282; FRL-10014-50-OAR]

RIN 2060-AM75

Reclassification of Major Sources as Area Sources Under Section 112 of the Clean Air Act**AGENCY:** Environmental Protection Agency (EPA).**ACTION:** Final rule.

SUMMARY: This rule finalizes amendments to the General Provisions that apply to National Emission Standards for Hazardous Air Pollutants (NESHAP). These amendments implement the plain language reading of the “major source” and “area source” definitions of section 112 of the Clean Air Act (CAA) and provide that a major source can be reclassified to area source status at any time upon reducing its potential to emit (PTE) hazardous air pollutants (HAP) to below the major source thresholds (MST) of 10 tons per year (tpy) of any single HAP and 25 tpy of any combination of HAP. This rule also finalizes amendments to clarify the compliance dates, notification, and recordkeeping requirements that apply to sources choosing to reclassify to area source status and to sources that revert back to major source status, including a requirement for electronic notification.

DATES: This final rule is effective on January 19, 2021.

ADDRESSES: The Environmental Protection Agency (EPA) has established a docket for this action under Docket ID No. EPA-HQ-OAR-2019-0282. All documents in the docket are listed on the <https://www.regulations.gov/> website. Although listed, some information is not publicly available, e.g., Confidential Business Information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available electronically through <https://www.regulations.gov/>. Out of an abundance of caution for members of the public and our staff, the EPA Docket Center and Reading Room was closed to the public, with limited exceptions, to reduce the risk of transmitting COVID-19. Our Docket Center staff will continue to provide remote customer service via email, phone, and webform. For further information and updates on EPA Docket

Center services and the current status, please visit us online at <https://www.epa.gov/dockets>.

FOR FURTHER INFORMATION CONTACT: For questions about this final rule, contact Ms. Elineth Torres, Sector Policies and Programs Division (D205-02), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541-4347; fax number: (919) 541-4991; and email address: torres.elineth@epa.gov. Questions concerning specific reclassifications should be directed to the appropriate Regional office.

SUPPLEMENTARY INFORMATION:

Preamble acronyms and abbreviations. We use multiple acronyms and terms in this preamble. While this list may not be exhaustive, to ease the reading of this preamble and for reference purposes, the EPA defines the following terms and acronyms here:

VOC volatile organic compound(s)

Background information. On July 26, 2019, the EPA proposed revisions to the General Provisions that apply to the NESHAP to implement the plain language reading of the “major source” and “area source” definitions of CAA section 112 and provide that a major

source can be reclassified to area source status at any time upon limiting its potential to emit HAP to below the MST of 10 tpy of any single HAP and 25 tpy of any combination of HAP (also referred to herein as Major Maximum Achievable Control Technology (MACT) to Area or “MM2A proposal”) (see 84 FR 36304). In this rule, we are taking final action on some of the amendments as proposed, and we are taking final action on other amendments as modified based on the public comments to clarify the requirements that apply to sources choosing to reclassify to area source status at any time, including reclassification that occurs after the first substantive compliance date of applicable major source NESHAP requirements and the requirements that apply to sources that reclassify from major to area source status and then revert back to their previous major source status. Regarding the proposed amendments to the PTE definition, we are not finalizing the definition of “legally and practicably enforceable” PTE limits or the effectiveness criteria for those limits in this action. We are, however, promulgating a ministerial amendment to the regulatory definition of “potential to emit” in the interim. We are also finalizing revisions to the General Provisions tables and initial notification requirements within most NESHAP subparts to account for the regulatory provisions we are finalizing in this rule. We summarize some of the more significant public comments we received regarding the proposed rule and provide our responses to those comments in this preamble. A summary of all other public comments on the proposal and the EPA’s responses to those comments is available in the Response to Comments document available in the docket No. EPA-HQ-OAR-2019-0282. A “track changes” version of the regulatory language that incorporates the changes finalized in this rule is also available in the docket.

Organization of this document. The information in this preamble is organized as follows:

- I. Executive Summary
 - A. Purpose of the Regulatory Action
 - B. Summary of the Major Provisions of the Regulatory Action
 - C. Impacts of the Final Regulatory Action
- II. General Information
 - A. Does this rule apply to me?
 - B. Where can I get a copy of this document and other related information?
 - C. Judicial Review and Administrative Reconsideration
- III. Background
- IV. Statutory Authority
- V. Summary of Final Amendments
 - A. Final Amendments to 40 CFR Part 63, Subpart A: General Provisions

- B. Amendments to Individual NESHAP General Provisions Applicability Tables
- C. Amendments to Individual NESHAP
- VI. Other Considerations
 - A. PTE Determination
 - B. Reclassification Process and Permitting
- VII. Interim Ministerial Revision of 40 CFR Part 63 PTE Definition
- VIII. Summary of Cost, Environmental, and Economic Impacts

 - L. Determination Under CAA Section 307(d)
 - M. Congress Review Act (CRA)

I. Executive Summary

A. Purpose of the Regulatory Action

In this final rule (also referred to herein as “final MM2A rule” or final rule), the EPA is finalizing amendments to the General Provisions of the NESHAP regulations in 40 CFR part 63, subpart A to implement the plain language reading of the “major source” and “area source” statutory definitions of section 112 of the CAA and provide that a major source can be reclassified to area source status at any time upon reducing its emissions and PTE, as defined in 40 CFR 63.2, to below the MST of 10 tpy of any single HAP and 25 tpy of any combination of HAP. Prior to proposing these amendments, the EPA reviewed the statutory provisions that govern when a major source can reclassify to area source status, including after being subject to major source requirements under section 112 of the CAA (also referred to herein as “CAA section 112 requirements” or “requirements”). After further review of

CAA section 112 provisions and public comments received on the MM2A proposal, the EPA is finalizing its conclusion that the statutory definitions of major source and area source contain no language fixing a source’s status at any particular point in time and contain no language suggesting a cutoff date after which the source’s status cannot change. Accordingly, the Agency is finalizing its reading that a major source may be reclassified as an area source at any time upon reducing its HAP emissions and PTE below the applicable CAA section 112 MST. Thus, major sources that reclassify to area source status at any time, including after the first substantive compliance date of an applicable major NESHAP, will no longer be subject to CAA section 112 major source NESHAP requirements and will be subject to any applicable area source NESHAP requirements. A full discussion of the statutory authority for this final MM2A rule can be found in section IV of this preamble.

B. Summary of the Major Provisions of the Regulatory Action

The EPA is finalizing amendments to the General Provisions of the NESHAP regulations in 40 CFR part 63, subpart A to clarify the requirements that apply to sources choosing to reclassify to area source status at any time, including after being subject to major source requirements under section 112 of the CAA. The EPA is finalizing amendments to the applicability section found in 40 CFR 63.1 by adding a new paragraph (c)(6). This paragraph specifies that a major source may become an area source at any time upon reducing its emissions of and PTE HAP, as defined in this subpart, to below the major source thresholds established in 40 CFR 63.2.

The EPA is finalizing in 40 CFR 63.1(c)(6) that a major source reclassifying to area source status remains subject to any applicable major source NESHAP requirements until the reclassification becomes effective. After the reclassification becomes effective, the source is subject to any applicable area source NESHAP requirements in 40 CFR part 63. For sources that reclassify from major to area source status and then revert back to their previous major source status, the EPA is also finalizing in 40 CFR 63.1(c)(6) that the source becomes subject to the applicable major source NESHAP requirements of 40 CFR part 63 immediately upon becoming a major source again. The EPA is finalizing in 40 CFR 63.1(c)(6) regulatory text to address the interaction of the reclassification of sources with enforcement actions arising from

violations that occurred before reclassification. Specifically, we are finalizing that the reclassification of a source does not affect the source’s liability or any enforcement investigations or enforcement actions for a source’s past conduct that occurred prior to the source’s reclassification.

To ensure that all sources that reclassify notify the EPA, the EPA is finalizing amendments clarifying the existing notification requirements in 40 CFR 63.9(b) and (j). With these amendments, the notification requirements of 40 CFR 63.9 will cover not only cases where a source switches from major to area source status, but also cases where an area source reverts to major source status. A source that reclassifies in either direction must notify the EPA of any changes in the applicability of the standards that the source was subject to per the notification requirements of 40 CFR 63.9(j). The EPA is also finalizing amendments to the notification requirements in 40 CFR 63.9(b) and (j) to require in certain circumstances that the notification be submitted electronically through the Compliance and Emissions Data Reporting Interface (CEDRI). The final rule amends the General Provisions to add 40 CFR 63.9(k) to include the CEDRI submission procedures. The EPA is finalizing amendments to remove the time limit for record retention in 40 CFR 63.10(b)(3) so sources that obtain enforceable PTE limits after the effective date of this final rule are required to keep the applicability determination records as long as they rely on the PTE limits to be area sources. The EPA is also finalizing amendments to 40 CFR 63.12(c) to clarify that a source may not be exempted from electronic reporting requirements. Further, the EPA is finalizing amendments to 40 CFR 63.13 to clarify that when required by this part, or at the request of the EPA Regional office, submitting a report or notification to CEDRI fulfills the obligation to report to the EPA Regional office.

This final action includes amendments to the General Provisions applicability tables contained within most subparts of 40 CFR part 63 to add a reference to the new provision in 63.1(c)(6) discussed above. We are also finalizing revisions to several NESHAP subparts by removing the date limitation after which a major source cannot become an area source. The provisions amended are: 40 CFR part 63, subpart HH at 63.760(a)(1); 40 CFR 63, subpart HHH at 63.1270(a); 40 CFR part 63, subpart QQQ at 63.1441; 40 CFR part 63, subpart QQQQ at 63.9485; 40 CFR

part 63, subpart RRRRR at 63.9581; and Table 2 of 40 CFR part 63, subpart WWWW. The final rule also includes amendments to the initial notification requirements of most NESHAP subparts because the date that was specified in the regulations has passed.

The EPA is still considering the proposed effectiveness criteria for HAP PTE limits and the proposed changes to the definition of “potential to emit” in 40 CFR 63.2 and is not taking any final action on those aspects of the proposed rule at this time. Thus, this final rule does not include responses to comments on proposed effectiveness criteria for PTE limits or comments related to the proposed changes to the PTE definition. The EPA is still reviewing comments received and will respond to them in a subsequent action. In the meantime, while we continue to consider what final action to take on the proposed amendments, the EPA is making an interim ministerial revision to the PTE definition to address the court decision in *National Mining Association (NMA) v. EPA*, 59 F.3d 1351, 1363–1365 (D.C. Cir. 1995). Specifically, this revision removes the word “federally” from the phrase “federally enforceable” in the PTE definition. This interim ministerial revision is also consistent with the EPA’s long-standing policy¹ that allows for any physical or operational limitation on the capacity of the stationary source to emit a pollutant to be treated as part of the source’s design if the limitation or the effect it would have on emissions is, first, either federally enforceable or legally enforceable by a state or local permitting authority and, second, practicably enforceable.

C. Impacts of the Final Regulatory Action

The final rule does not require any source to reclassify to area source status. An evaluation of the potential to reclassify from major source to area source status involves many source-specific considerations. Each source will assess its own circumstances to determine whether it is feasible and advantageous to undergo the reclassification process. The unique nature of each source’s decision process makes it difficult for the EPA to determine the number and type of sources that may choose to reclassify under this rule. Because of this, the EPA is limited to presenting illustrative analyses concerning the impacts of this final rule. The illustrative assessment of impacts includes the potential net cost savings and potential emissions changes that may result from this final action. The illustrative impacts are estimated for the three analytical scenarios established for the rule and are estimated in relation to a baseline in which sources remain subject to major source NESHAP requirements after the first substantive compliance date of such standards. The potential impacts presented in the preamble reflect the results of the illustrative analysis of the primary scenario, which, for analytical purposes, is defined as including those facilities whose actual emissions are below 75 percent of the MST (*i.e.*, 7.5 tpy for a single HAP and 18.75 tpy for all HAP). This scenario is further described in section VIII of this preamble, in the technical support memorandums (TSM),² and the Regulatory Impact Analysis (RIA) that is available in the docket for this action. The memorandums and RIA also

present an analysis of two alternative scenarios to provide a range of estimated potential cost impacts.³

The EPA estimates that this final action may result in substantial annual cost savings of \$90.6 million (2017\$) based on illustrative estimates of its potential reduction in administrative burden if sources reclassify to area source status.⁴ The voluntary actions taken by sources to reclassify will be carried out over a period of time, but once a source reclassifies, the cost savings will accrue for as long as the source continues to operate as an area source. While cost savings will accrue for the life of the facility, we present a 5-year outlook of potential cost savings from this action to provide insight into the cost distribution over time. Results are also presented as the present value (PV) and equivalent annualized value (EAV) of the cost savings of the final MM2A rule in 2017 dollars. The PV is the one-time value of a stream of impacts over time, discounted to the current (or nearly current) day. The EAV is a measure of the annual cost that is calculated consistent with the PV. The illustrative cost savings of the final MM2A rule in 2017 dollars are presented in detail later in section VIII of this preamble and in the RIA.

Table 1 presents a summary of key results from the RIA for the final MM2A rule. This table presents the PV and EAV, estimated in 2017 dollars using discount rates of 7 and 3 percent and discounted to 2020, of the illustrative net cost savings of the final MM2A rule. The EAV estimates are consistent with the PV and reflect the illustrative total net cost savings of the rule from 2021, the first year after rule promulgation, and subsequent years.

TABLE 1—ILLUSTRATIVE NET COST SAVINGS INCREMENTAL TO THE BASELINE
[(Including following years) (Billions 2017\$) *]

	7 Percent		3 Percent	
	Present value	Equivalent annualized value	Present value	Equivalent annualized value
Potential Net Cost Savings	\$0.86	0.07	\$1.50	0.08

* The overall analytic timeline begins in 2021 and continues thereafter for an indefinite period. The cost savings in 2016 dollars and discounted to 2016, as defined as a present value, are \$0.654 billion at 7 percent and \$1.13 billion at 3 percent. As equivalent annualized values, the cost savings are \$52 million at 7 percent and \$58 million at 3 percent.

¹ See January 25, 1995, memorandum titled “Options for Limiting the Potential to Emit (PTE) of a Stationary Source Under Section 112 and Title V of the Clean Air Act (Act)” and December 20, 1999, memorandum titled “Third Extension of January 25, 1995 Potential to Emit Transition Policy.” Available at <https://www.epa.gov/guidance/guidance-documents-managed-office-air-and-radiation> and in the docket of this rule.

² See “Documentation of the Data for Analytical Evaluations and Summary of Industries Potentially

Impacted by the Final Rule titled *Reclassification of Major Sources as Area Sources Under Section 112 of the Clean Air Act*,” and “Analysis of Illustrative 125% Scenario for MM2A Final—Potential Cost Impacts from HAP Major Sources Reducing Emissions as part of Reclassifying to HAP Area Sources.”

³ Alternative scenario 1 analyzes those facilities whose actual emissions are below 50 percent of the MST (5 tpy for a single HAP and 12.5 tpy for all HAP). Alternative scenario 2 analyzes that sources

below 125 percent of the MST (12.5 tpy for a single HAP and 31.25 tpy for all HAP). Discussions of these scenarios and results can be found in the RIA for this final action.

⁴ Annual cost savings reflect impacts in Year 2 of the reclassification process for all sources that choose to reclassify under the primary scenario. All cost savings are net of any additional permitting and recordkeeping costs to state regulatory agencies and sources. These annual cost savings are those for 2025 and subsequent years.

Impacts in Table 1 reflect the potential impacts of the final MM2A rule for the year in which all reclassifications are expected to have taken place (2025) and beyond.

To assess the potential changes in emissions that may result from the reclassification of major sources to area sources under this rule, we reviewed the permits and other information from 69 sources that have reclassified since January 2018, consistent with the EPA's plain language reading of the CAA section 112 definitions of "major" and "area" source, and also performed an illustrative analysis of 72 source categories in detail. Because we do not have information on the major sources that may choose to reclassify to area source status in the future and the enforceable conditions they will take in order to reclassify, we are not able to provide an assessment of the emissions impacts for actual reclassifications beyond the 69 sources that have already reclassified.⁵ Therefore, we conducted a detailed illustrative analysis of 72 source categories to provide a broad characterization of the potential changes in emissions for all NESHAP source categories that could be impacted by this action. The assessment of the 69 reclassifications shows that 68 facilities have requirements in their operating permits that would continue to implement the compliance methods used to comply with the major source NESHAP requirements and prevent emissions increases. However, the EPA found that one of the 69 reclassified sources will not continue to employ the same compliance methods that it used to meet the major source NESHAP and thus it may increase its emissions. For the illustrative analysis of emissions impacts conducted, we find that 65 source categories in the major source NESHAP program will either not be impacted or will not increase emissions as a result of the rule. Based on the broad assumptions applied in the analysis, we found a potential for emissions increases for some facilities in seven source categories. While a majority of facilities are not anticipated to change emissions, approximately 3.1 percent of the facilities in the MM2A database that we were able to analyze could increase emissions if sources: (1) Voluntarily opt to reclassify and (2) were allowed to reduce operation of adjustable add-on controls. We also found a potential for emissions decreases in cases where sources choose to reduce emissions from above the

MST to below the MST to reclassify. The facilities that we were able to assess for emission increases and decreases are located across the United States (*i.e.*, in more than 10 states and in every region of the United States) and are not clustered in close proximity to each other. Further discussion of the impacts of the final rule are presented in section VIII of this preamble and presented in detail in the technical support memorandums, titled *Documentation of the Emissions Analysis for the Final Rule "Reclassification of Major Sources as Area Sources Under Section 112 of the Clean Air Act"* and the *Analysis of the Illustrative 125% Scenario for MM2A Rule—Potential Cost Impacts from HAP Major Sources Reducing Emissions as part of Reclassifying to HAP Area Sources*, and the RIA for the final rule, all of which are available in the docket for this action.

II. General Information

A. Does this rule apply to me?

Categories and entities potentially impacted by this rule include sources subject to NESHAP requirements under section 112 of the CAA.

The final amendments are applicable to sources that reclassify from major source to area source status under section 112 of the CAA and sources that revert from their reclassified area source status to their previous major source status.

Federal, state, local, and tribal governments may be affected by this rule if they own or operate sources that choose to request reclassification from major source status to area source status or if reclassified sources choose to revert to their previous major source status at some time in the future. The EPA is the permitting authority for issuing, rescinding, and amending permits for sources that request reclassification in Indian country, with four exceptions.⁶ State, local, or tribal regulatory authorities⁷ may receive requests to

issue new permits or make changes to existing permits for sources in their jurisdiction to address reclassification-related activities (*e.g.*, title V, synthetic minor permits, establishing limits on a source's PTE).

B. Where can I get a copy of this document and other related information?

In addition to being available in the docket, an electronic copy of the final MM2A rule is available on the internet. Following signature by the EPA Administrator, the EPA will post a copy of this final action at <https://www.epa.gov/stationary-sources-air-pollution/reclassification-major-sources-area-sources-under-section-112-clean>. Following publication in the **Federal Register**, the EPA will post the **Federal Register** version and key technical documents at this same website.

A redline version of the regulatory language that incorporates the amendments finalized in this rule is available in the docket for this action (Docket ID No. EPA-HQ-OAR-2019-0282).

C. Judicial Review and Administrative Reconsideration

Under CAA section 307(b)(1), judicial review of this final rule is available only by filing a petition for review in the United States Court of Appeals for the District of Columbia Circuit (DCCir.) by January 19, 2021. Under CAA section 307(b)(2), the requirements established by this final rule may not be challenged separately in any civil or criminal proceedings brought by the EPA to enforce the requirements.

Section 307(d)(7)(B) of the CAA further provides that only an objection to a rule or procedure that was raised with reasonable specificity during the period for public comment (including any public hearing) may be raised during judicial review. This section also provides a mechanism for the EPA to reconsider the rule if the person raising an objection can demonstrate to the Administrator that it was impracticable to raise such objection within the period for public comment or if the grounds for such objection arose after the period for public comment (but within the time specified for judicial review) and if such objection is of central relevance to the outcome of the rule. Any person seeking to make such a demonstration should submit a Petition for Reconsideration to the Office of the Administrator, U.S. EPA, Room 3000, WJC South Building,

reclassification requests and issuance of enforceable PTE limits.

⁵ Of the 69 sources, 68 have already reclassified and one was undergoing the process of reclassification.

⁶ Two tribes have approved title V programs or delegation of 40 CFR part 71. The tribes may have sources that request to no longer be covered by title V. Neither of these two tribes have approved minor source permitting programs but may in the future. In the meantime, the tribes will need to coordinate with the EPA, who is the permitting authority in Indian country for these requests. In addition, two other tribes have approved Tribal Implementation Plans (TIPs) authorizing the issuance of minor source permits. Only one of these tribes has a major source that would be eligible to request reclassification. If that source requests a new permit, the tribe may issue the minor source permit, but the EPA would need to be made aware of the request, as the EPA is the permitting authority for title V.

⁷ The term regulatory authority is intended to be inclusive of the federal, state, tribal, or local air pollution control agency with authority to process

1200 Pennsylvania Ave. NW, Washington, DC 20460, with a copy to both the person(s) listed in the preceding **FOR FURTHER INFORMATION CONTACT** section, and the Associate General Counsel for the Air and Radiation Law Office, Office of General Counsel (Mail Code 2344A), U.S. EPA, 1200 Pennsylvania Ave. NW, Washington, DC 20460.

III. Background

Shortly after the EPA began implementing individual NESHAP resulting from the 1990 CAA Amendments, the Agency received multiple requests to clarify when a major source of HAP could avoid CAA section 112 requirements applicable to major sources by taking enforceable limits on its PTE below the major source thresholds. In response, the EPA issued, on May 16, 1995, a memorandum from John Seitz, Director of the Office of Air Quality Planning and Standards, to the EPA Regional Air Division Directors (the May 1995 Seitz Memorandum).⁸ The May 1995 Seitz Memorandum provided guidance on three timing issues related to avoidance of CAA section 112 requirements for major sources:

- “By what date must a facility limit its PTE if it wishes to avoid major source requirements of a MACT standard?”
- “Is a facility that is required to comply with a MACT standard permanently subject to that standard?”
- “In the case of facilities with two or more sources in different source categories: If such a facility is a major source for purposes of one MACT standard, is the facility necessarily a major source for purposes of subsequently promulgated MACT standards?”

In the May 1995 Seitz Memorandum, the EPA stated its interpretation of the relevant statutory language that facilities that are major sources of HAP may switch to area source status at any time until the “first compliance date” of the standard.⁹ Under this interpretation, facilities that are major sources on the first substantive compliance date of an

applicable major source NESHAP were required to comply permanently with that major source standard even if the source was subsequently to become an area source by limiting its PTE. This position was commonly referred to as the “Once In, Always In” (OIAI) policy. The May 1995 Seitz Memorandum provided that a source that is major for one NESHAP would not be considered major for a subsequent NESHAP if the source’s potential to emit HAP emissions was reduced to below major source levels by complying with the first major source NESHAP. In the May 1995 Seitz Memorandum, the EPA set forth transitional policy guidance that was intended to remain in effect only until the Agency proposed and promulgated amendments to the 40 CFR part 63 General Provisions.

After issuing the May 1995 Seitz Memorandum, the EPA twice proposed regulatory amendments that would have altered the OIAI policy. In 2003, the EPA proposed amendments that focused on HAP emissions reductions resulting from pollution prevention (P2) activities. Apart from certain provisions associated with the EPA’s National Environmental Performance Track Program—a national voluntary program designed to recognize and encourage top environmental performers whose program participants go beyond compliance with regulatory requirements to attain levels of environmental performance that benefit people, communities, and the environment—that proposal was never finalized. See 68 FR 26249 (May 15, 2003); 69 FR 21737 (April 22, 2004). In 2007, the EPA issued a proposed rule to replace the OIAI policy set forth in the May 1995 Seitz Memorandum. See 72 FR 69 (January 3, 2007). In that proposal, the EPA reviewed the provisions in CAA section 112 relevant to the OIAI policy interpretation, applicable regulatory language, stakeholder concerns, and potential implications. *Id.* at 71–74. Based on that review, the EPA proposed an interpretation of the relevant statutory language that a major source that is subject to a major source NESHAP would no longer be subject to that major source standard if the source were to become an area source through enforceable limitations on its PTE HAP emissions. *Id.* at 72–73. Under the 2007 proposal, major sources could take such limits on their PTE and obtain “area source” status at any time and would not be limited to doing so only before the “first substantive compliance date,” as the OIAI policy provided. *Id.* at 70.

The EPA did not take final action on this 2007 proposal.

In 2017, the EPA received public comments pursuant to Executive Order 13777, Enforcing the Regulatory Reform Agenda (February 24, 2017), and the Presidential Memorandum on Streamlining Permitting and Reducing Regulatory Burdens for Domestic Manufacturing (January 24, 2017) supporting the withdrawal of the OIAI policy.¹⁰ Per these comments, the OIAI policy imposed an artificial time limit on major sources obtaining area source status not found in the definitions of “major source” and “area source” in CAA sections 112(a)(1) and (2). Commenters further stated that the temporal limitation imposed by the OIAI policy was inconsistent with the CAA and created an arbitrary date by which sources must determine whether their HAP PTE will exceed either of the major source thresholds.

On January 25, 2018, the EPA issued a guidance memorandum from William L. Wehrum, Assistant Administrator of the Office of Air and Radiation, to the EPA Regional Air Division Directors titled “*Reclassification of Major Sources as Area Sources Under Section 112 of the Clean Air Act*” (MM2A Memorandum).¹¹ The MM2A Memorandum discussed the statutory provisions that govern when a source subject to major source NESHAP requirements under section 112 of the CAA may be reclassified as an area source and thereby avoid being subject thereafter to major source NESHAP requirements and other requirements applicable to major sources under CAA section 112. In the MM2A Memorandum, the EPA discussed the plain language of CAA section 112(a) stating Congress’s definitions of “major source” and “area source” and determined that the OIAI policy articulated in the 1995 Seitz Memorandum was contrary to the plain language of the CAA and, therefore, must be withdrawn. In the MM2A Memorandum, the EPA announced the future publication of a proposed rule to receive input from the public on adding regulatory text consistent with the plain reading of the statute as described in the MM2A Memorandum.

On July 26, 2019, the EPA proposed regulatory text to implement the plain

⁸ See “*Potential to Emit for MACT Standards-Guidance on Timing Issues*.” From John Seitz, Director, Office of Air Quality Planning and Standards, to the EPA Regional Air Division Directors. May 16, 1995, <https://www.epa.gov/sites/production/files/2018-02/documents/pteguid.pdf>. Also available in the docket of this rule.

⁹ The “first substantive compliance date” is defined as the first date a source must comply with an emissions limitation or other substantive regulatory requirement (*i.e.*, leak detection and repair programs, work practice measures, etc. . . . , but not a notice requirement) in the applicable standard.

¹⁰ See Executive Order 13777 at 82 FR 12285 (February 24, 2017) and request for comment at 82 FR 17793 (April 13, 2017), Docket ID No. EPA-HQ-OAR-2017-0190. See Presidential Memorandum at 82 FR 8667 (January 24, 2017) and request for information at 82 FR 12786 (March 7, 2017), Docket ID No. DOC-2017-0001.

¹¹ See notice of issuance of this guidance memorandum at 83 FR 5543 (February 8, 2018).

language reading of the statute as discussed in the MM2A Memorandum. See 84 FR 36304. The 2019 MM2A proposal superseded and replaced the 2007 proposal. See 72 FR 69 (January 3, 2007). The EPA solicited comment on all aspects of the MM2A proposal, including the EPA's position that the withdrawal of the OIAI policy and the proposed approach gives proper effect to the statutory definitions of "major source" and "area source" in CAA section 112(a) and is consistent with the plain language and structure of the CAA as well as the impacts of the proposal on costs, benefits, and emissions impacts. Publication of the MM2A proposal in the **Federal Register** opened comment on the proposal for an initial 60-day public comment period. The EPA held a public hearing on August 15, 2019, in Washington, DC. In response to requests for an extension of the comment period, the EPA reopened the public comment period for an additional 30 days through November 1, 2019. The EPA received more than 16,000 comments on the MM2A proposal. After review and consideration of public comments, the EPA is finalizing the implementation of the plain language reading of the definitions of major source and area source under CAA section 112. Per CAA section 307(d)(6)(B), the EPA is providing a response to the to the most significant comments received on the MM2A proposal in this preamble, and responses to the other comments in the Response to Comments document available in the docket.

IV. Statutory Authority

As discussed in the preamble of the MM2A proposal at 84 FR 36304, 36309–36313 (July 26, 2019), CAA section 112 distinguishes between major and area sources of HAP emissions. Indeed, the very first provisions in CAA section 112 are the major source definition in CAA section 112(a)(1) and area source definition in CAA section 112(a)(2) that create the major/area distinction. Major sources emit more HAP than area sources and, generally, different requirements apply to major sources and area sources. For some section 112 source categories, the EPA has promulgated requirements for only major sources, and HAP emissions from area sources are not regulated under the NESHAP program.

Whether a source is a "major source" or an "area source" depends on the amount of HAP emitted by the source based on its actual and potential emissions. Congress defined "major source" to mean a source that emits or has the potential to emit at or above

either of the statutory thresholds of 10 tpy of any one HAP or 25 tpy of total HAP. CAA section 112(a)(1). An "area source" is defined as any source of HAP that is not a major source. CAA section 112(a)(2). If a source does not emit or does not have the potential to emit at or above either of the major source thresholds, then it is an "area source." The statutory definitions of "major source" and "area source" do not contain any language that fixes a source's status as a major source or area source at any particular point in time, nor do they otherwise contain any language suggesting that there is a cutoff date after which a source's status cannot change.

Congress did, however, create a distinction based on timing in CAA section 112 in defining and creating provisions related to "new sources" and "existing sources." Specifically, Congress defined "new source" to mean a source that is constructed or reconstructed after the EPA first proposes regulations covering the source. CAA section 112(a)(4). An "existing source" is defined as any source other than a new source. CAA section 112(a)(10). A source will be subject to different requirements depending on whether it is a new source or an existing source. See, e.g., CAA section 112(d)(3) (identifying different minimum levels of stringency (known as "MACT floors") for new and existing sources).

The emissions-based distinction (arising from the definitions of major source and area source) and the timing-based distinction (arising from the definitions of new source and existing source) are independent, and neither is tied to the other. For example, the statutory definition of "major source" does not provide that major source status is determined based on a source's emissions or PTE as of the date that the EPA first proposes regulations applicable to that source or any other point in time. As noted above, the plain language of the "major source" and "area source" definitions create a distinction that is based solely on amount of emissions and PTE, and not timing. Similarly, with respect to the timing-based distinction, a source is a "new source" or an "existing source" based entirely on the timing of its construction or reconstruction and without consideration of its actual emissions or PTE. The contrast between the temporal distinction in the contrasting definitions of existing and new sources on the one hand, and the absence of any temporal dimension to the contrasting definitions of major and area sources on the other, is further

evidence that Congress did not intend to place a temporal limitation on a source's ability to be classified as an area source (including a source's ability to be classified as an area source through the permitting authority's "considering controls" that may have been imposed after the source was initially classified as major).

Notwithstanding the independence of the two distinctions that the statute created based on amount of emissions and timing (and without addressing that independence or otherwise addressing the plain language of the statutory definitions of "major source" and "area source"), the EPA issued the May 1995 Seitz Memorandum, which set forth the OIAI policy. Under the OIAI policy, a source's status as a major source for the purpose of applying a specific major source MACT standard issued under the requirements of CAA section 112 was deemed to be unalterably fixed on the first substantive compliance date of the specific applicable major source requirements. Thus, a source that was a major source on that first compliance date would continue to be subject to the major source requirements for that specific NESHAP even if the source reduced its emissions of and PTE HAP to below the statutory thresholds in the definition of "major source," and, thus, fell within the definition of "area source."

On January 25, 2018, the EPA issued the MM2A Memorandum. The MM2A Memorandum discussed the statutory definitions of "major source" and "area source" and explained that the OIAI policy articulated in the May 1995 Seitz Memorandum was contrary to the plain language of the CAA, and, therefore, must be withdrawn.

As discussed above, Congress expressly defined the terms "major source" and "area source" in CAA section 112(a) in unambiguous language. Nonetheless, under the OIAI policy, a source that reduced its emissions of and PTE HAP to below the statutory thresholds for major source status after the relevant compliance date would continue to be subject to the requirements applicable to major sources. This policy was applied notwithstanding that the statutory definitions of "major source" and "area source" lack any reference to the compliance date of major source requirements or any other text that indicates a time limit for changing between major source status and area source status. In short, Congress placed no temporal limitations on the determination of whether a source emits or has the potential to emit HAP in sufficient quantity to be a major source

under CAA section 112. Because the OIAI policy imposed such a temporal limitation (before the “first compliance date”), the EPA had no authority for the OIAI policy under the plain language of the CAA. Under the plain language of the statute, a major source that takes enforceable limits on its PTE to bring its HAP emissions below the CAA section 112 major source thresholds, no matter when it may choose to do so, becomes an area source under Congress’s definition in CAA section 112(a)(2). In this final action, we are implementing the plain language of CAA section 112 and making clear that such a source can reclassify to area source status at any time, and after reclassification, will no longer be subject to the CAA section 112 requirements applicable to the source as a major source under CAA section 112—so long as the source’s actual and PTE HAP emissions remain below the CAA section 112 thresholds—and will instead be subject to any applicable area source requirements.

A discussion of the statutory definitions of “new source” and “existing source” in CAA section 112(a)(4) and (10) further demonstrates that the OIAI policy was inconsistent with the language of the statute. As discussed above, the major source/area source distinction and the new source/existing source distinction are two separate and independent features of the statute. Significantly, the statutory definitions of “new source” and “existing source” dictate that the new source/existing source distinction is determined by when a source commences construction or reconstruction and says nothing about the source’s volume of emissions. No one can reasonably suggest that this silence concerning volume of emissions indicates that Congress intended to give the EPA the discretion to conclude that sources should be classified as new or existing based, in part, on how much they emit. For example, if the EPA were to say that a source is only a new source if it both (1) commences construction after regulations are first proposed (as stated in CAA section 112(a)(4)), and (2) emits more than 20 tpy of any single HAP (which is not stated anywhere in the statute), that second element would be contrary to the plain language of the statute. Similarly, the OIAI policy of considering timing as part of the major source/area source distinction is contrary to the plain language of the statute, because it interjects timing into the major/area distinction when Congress provided that such distinction would be based only on the source’s actual and potential emissions. In short,

Congress’s creation of the timing distinction in the new source and existing source definitions shows that Congress was explicit when it wanted to classify sources based on timing, and it did not do so in creating the major/area source distinction.

Some commenters have argued that the EPA’s plain language reading cannot be correct in light of various provisions in CAA section 112. The EPA has considered these comments and concluded that the EPA’s plain language reading is the correct reading, for the reasons discussed below, in the Response to Comments document and elsewhere in the record.

CAA section 112(i)(3)(A)—Some commenters assert that the EPA’s plain language reading of the definitions of “major source” and “area source” is contradicted by CAA section 112(i)(3)(A). Specifically, they contend that the first phrase in CAA section 112(i)(3)(A) precludes a major source from reclassifying to area source status after the source has become subject to a major source standard and that this statutory text compels the OIAI policy. The EPA disagrees with this contention. The first phrase in CAA section 112(i)(3)(A) states: “After the effective date of any emissions standard, limitation or regulation promulgated under this section and applicable to a source, no person may operate such source in violation of such standard, limitation or regulation” As discussed in the proposal (84 FR 36311), the EPA reads this phrase to have the same meaning as similar “effective date” provisions in the CAA, such as CAA section 111(e), notwithstanding that CAA section 112(i)(3)(A) has somewhat different phrasing. In short, this text simply provides that, after the effective date of a CAA section 112 rule, sources to which a standard is applicable must comply with that standard. This text is not reasonably read to say that, once a standard is applicable to a source, that standard continues to be applicable to the source for all time, even if the source’s potential to emit changes such that it no longer meets the applicability criteria for the standard. Such a reading would produce some results that are clearly incorrect. For example, if the first phrase in CAA section 112(i)(3)(A) were read to say that a source’s applicable requirements are determined at the point in time that a source first becomes subject to CAA section 112 requirements, then an area source would continue to be subject to area source requirements even if that source increased its potential to emit above either of the major source thresholds.

Such a result would be contrary to the EPA regulations, which provide that an area source that increases its emissions or PTE above the MST becomes subject to the applicable major source requirements. 40 CFR 63.6(a)(2), 63.6(b)(7), 63.6(c)(5).

Further, reliance on CAA 112(i)(3)(A) to argue against the EPA’s plain language reading and for a return to the OIAI policy ignores that the “effective date” of a CAA section 112 standard is not the same as the “compliance date.” CAA section 112(i)(3)(A) expressly provides that the EPA may set the “compliance date” for existing sources up to 3 years after the “effective date.” Similarly, CAA section 112(i)(5) (which is applicable in certain circumstances for sources that make early reductions in HAP emissions) provides for a delayed compliance date that will be after the effective date. This is significant because the cutoff deadline for reclassification that the commenters say is required under CAA section 112(i)(3)(A) is not the effective date. Under the OIAI policy, the cutoff date for reclassification was the first substantive compliance date, which (as just discussed) is clearly distinguished from the effective date in CAA section 112(i)(3)(A) in the statute. Thus, commenters’ reading of CAA section 112(i)(3)(A) would not only be contrary to the EPA’s plain language reading but would also be contrary to the OIAI policy under which sources could reclassify after the effective date as long as they did so before the first substantive compliance date.

In sum, the EPA has concluded that the CAA section 112 definitions of “major source” and “area source” and the “effective date” provision in CAA section 112(i)(3)(A) are properly read together to say that sources must comply with the applicable requirements corresponding to their major source or area source status, and that if this status changes, then the source becomes subject to the requirements corresponding to its status after the change.

CAA sections 112(c)(3) and (6)—Some commenters argue that CAA sections 112(c)(3) and (6) reflect a Congressional intent that sources be subject to continuous, permanent compliance with major source standards and that these provisions are, therefore, inconsistent with the EPA’s plain language reading. But there is no inconsistency here. Those provisions required the EPA to ensure that sources accounting for 90 percent of the emissions of specific pollutants were listed and regulated by November 2000. The premise of the commenters’ argument based on CAA

sections 112(c)(3) and (6) is that these provisions do not simply require the EPA to list and regulate sufficient source categories to meet the 90-percent requirement at a given point in time; rather, they require that the EPA's regulations ensure that 90 percent of emissions are subject to regulation on an ongoing basis. This is not a reasonable reading of CAA sections 112(c)(3) and (6) because, as explained in greater detail in the proposed rule preamble at 84 FR 36311, the requirements of the statute and subsequent standards will result in the emissions from the listed source categories falling below the 90-percent threshold once those source categories are regulated. If commenters' interpretation were correct, CAA sections 112(c)(3) and (6) would create a never-ending cycle of listing and regulation in order to achieve an unattainable goal of ensuring that 90 percent of emissions are regulated. See 84 FR 36311.

In response to the EPA's discussion in the proposed rule preamble, commenters have stated that the statutory text in CAA sections 112(c)(3) and (6) is properly read not to focus on the source categories that those provisions require to be listed but on the individual sources that are within those categories—specifically, that these provisions require the EPA to regulate the sources that produced those emissions. But if the listing and regulation required pursuant to CAA sections (c)(3) and (6) were read to apply to the sources that produced the emissions as of the time of the listing of the categories, then that would mean that new sources within the listed source categories would not be regulated. The EPA does not think this is a reasonable reading of those provisions. Instead, the proper reading of these provisions is that the EPA is to list and regulate source categories, and then a source is regulated pursuant to the standard applicable to a given source category to the extent that, and as long as, the source remains within the source category. Thus, under a proper reading of CAA sections 112(c)(3) and (6), those provisions do not prevent reclassification, so there is no conflict between the EPA's plain language reading of CAA sections 112(a)(1)–(2) and the requirements of CAA sections 112(c)(3) and (6).

CAA section 112(f)(2)—Commenters also point to CAA section 112(f)(2) (commonly referred to as the residual risk provision) and contend that the EPA's plain language reading allows reclassified sources to avoid the review required under that provision. But this argument fails to refute the discussion

that the EPA provided in the proposed rule preamble (at 84 FR 36311–36312). First, as a general matter, Congress in CAA section 112 plainly distinguished between major sources emitting above the MST and area sources emitting below the MST and subjected them to different requirements. Second, with regard to CAA section 112(f), CAA section 112(f)(5) contains an express exemption from the CAA section (f)(2) review for area sources, and there is no statutory basis or logical reason for treating an area source differently just because it is a former major source. For these reasons, CAA section 112(f) is not inconsistent with the EPA's plain language reading.

CAA section 112(d)—Some commenters have pointed to the requirements of CAA section 112(d) as requiring sources that are at any point subjected to major source standards must continue to be subject to major source standards permanently. These commenters have argued that the EPA's plain language reading undermines the emissions reductions required by these CAA section 112 standards. Section 112(d)—and in particular, sections 112(d)(2) and (3) of the CAA—addresses how the EPA sets MACT standards for major sources (based on the maximum degree of emissions reduction the EPA determines is achievable, which may be a complete prohibition on emissions). But the question of what standard is applicable to major sources in a source category—whether MACT floor standards or otherwise—logically cannot determine which sources are major sources. Instead, the text and structure of CAA section 112 demonstrate that whether a source is classified as a major source or an area source is the threshold question under CAA section 112, and what requirements apply to the source flows from how the source is classified, with major sources and area sources facing significantly different regulation.

As noted above, the very first provisions in CAA section 112 are the major source definition in CAA section 112(a)(1) and area source definition in CAA section 112(a)(2) that create the major/area distinction. Following from this threshold distinction, CAA section 112 treats major sources and area sources differently in fundamental ways. To state a few examples that illustrate this:

(1) The EPA must list all categories of major sources of HAP pursuant to CAA section 112(c)(1), but only has to list categories of area sources representing 90 percent of HAP under CAA section 112(c)(3). This distinction is then carried over to what sources are

regulated, as provided in CAA section 112(d)(1), which provides that the EPA will regulate those categories listed under CAA section 112(c).

(2) Major sources are subject to MACT standards under CAA section 112(d)(2) and (3), but area sources may be subject to generally available control technology (GACT) standards under CAA section 112(d)(5).

(3) Area source categories and subcategories listed under CAA section 112(c)(3) and for which standards are set under CAA section 112(d)(5) are not subject to residual risk review under CAA section 112(f)(2), pursuant to CAA section 112(f)(5).

In short, to the extent that major sources become area sources by reducing their emissions of and PTE HAP below the MST, and, thus, are no longer subject to major source requirements, that is not a “loophole” or an “end-run” around the major source requirements. That is simply the result of the provisions and structure of CAA section 112 that Congress enacted and reflects the fundamental distinction between how CAA section 112 addresses major sources and area sources.

Further, allowing a major source to take a PTE limit below the major source threshold and thereby avoid having to comply with major source requirements is not a new concept under MM2A. Indeed, that is precisely what happened under the OIAI policy. The only change under MM2A is one of timing. Under the OIAI policy, major sources could reclassify if they took the PTE limit before the first substantive compliance date. Under MM2A, sources can reclassify at any time. Nothing in the statute says, and there is no logical reason why, a major source that could reclassify to area source status on the day before its first substantive compliance date (as allowed under the OIAI policy) is foreclosed from doing so on the day after its first substantive compliance date.

Similarly, having a source reclassify after the first substantive compliance date is not a new concept under MM2A. During the time that the OIAI policy was in effect, area sources were reclassified to major source status at any time that they increased emissions or their PTE above the major source threshold, even if the increase occurred after the first substantive compliance date under the applicable area source rule.

For these reasons, the EPA concludes that the standard-setting provisions in CAA sections 112(d)(2) and (3) do not contradict the plain language of the major source and area source definitions

on the issue of whether a source can reclassify at any time.

Parties opposed to the EPA's plain language reading also suggest that the EPA's reading is inconsistent with the purpose and provisions of CAA section 112 because it will lead major sources that reclassify to area source status to increase their emissions above what they could emit if they continued to be major sources. The EPA disagrees with the suggestion that a source's reclassification from major source to area source will necessarily lead to an increase in emissions from the source above what would have been allowed to emit under the major source standard. As discussed in section VIII of the preamble, there are a number of reasons why reclassified sources are generally not expected to increase their emissions. The EPA's analysis of the sources that have reclassified to date and sources that might reclassify from various source categories shows that in 68 out of 69 operating permits for sources that have already reclassified to area source status since January 2018, sources achieved and maintain area source status by operating the emission controls or continuing to implement the practices they used to comply with the major source NESHAP requirements. However, the EPA found that one of the 69 reclassified sources will not continue to employ the same compliance method that it used to meet the major source standard, and thus may increase its emissions. In addition to this review of actual reclassification actions since January 2018, the EPA also prepared an illustrative analysis for 72 source categories in the major source NESHAP program (114 total) to evaluate the potential emissions impacts. After considering the information and data available for the illustrative emissions analysis, we found that 65 source categories will not change emissions as a result of the rule. For the other seven, there was a potential for (but not a certainty of) emissions increases based on conservative assumptions that are likely to overstate the change in emissions at some facilities. Sources in these in seven source categories assessed in the primary scenario could increase emissions if those facilities (1) opted to reclassify and (2) were permitted to change the operation of adjustable add-on controls. Further details of this illustrative analysis and the results are provided below in section VIII.

Further, allowing major sources to reclassify to area source status after the first substantive compliance date may create an incentive for sources to evaluate their operations and consider

changes that can further reduce their HAP emissions to below the MST if the source views those changes as an opportunity to reduce costs of production, increase productivity, or reduce the costs of complying with major source NESHAP requirements. For example, sources using surface coatings may see the opportunity to become an area source as an extra incentive to invest in the development of new low- or no-HAP content coatings, inks, and binders. Similarly, sources with boilers and engines may benefit from replacing old boilers and engines with new, more efficient, and clean technologies. Such a replacement not only could help a source reduce HAP to below the MST but could also reduce fuel use and associated costs. To assess the opportunity for such emission decreases, we looked at an alternative scenario and determined that some sources operating between 75 and 125 percent of the MST could decrease emissions if those sources were to reclassify. Further details of this illustrative analysis and the results are provided below in section VIII.

In the MM2A proposal, the EPA took comment on whether it can and should promulgate regulatory provisions that would prevent a source that has reclassified from major to area source status from increasing emissions above what the source was allowed to emit when it was a major source. See 84 FR 36312–36313. Upon further consideration of this issue and the comments received, the EPA has concluded that the plain language of CAA section 112 precludes the promulgation of such provisions. As discussed above, the plain language of CAA section 112 provides that a source is an area source if its emissions and PTE are below the thresholds of 10 tpy of any one HAP and 25 tpy of any combination of HAP. Just as there is nothing in the statutory definitions in CAA sections 112(a)(1) and (2) or elsewhere in CAA section 112 that sets, or gives the EPA the authority to set, a cut-off date after which a major source cannot classify to area source status, there is nothing in CAA section 112 that imposes, or gives the EPA the authority to impose, a requirement that a source can only be an area source if it limits its emissions to some level below the MST. Congress clearly identified the thresholds of 10 tpy of any one HAP and 25 tpy of all combined HAP as the dividing line between major source status and area source status. The EPA cannot impose a different dividing line from what Congress wrote into CAA section 112. See *Utility Air Regulatory*

Group v. EPA, 573 U.S. 302, 325–326 (2014) (where Congress created precise numerical thresholds in the statute, the EPA's rewriting of the statutory thresholds is impermissible).

Further, even if there were some ambiguity in the text and structure of CAA section 112 that gave the EPA the discretion to impose such a requirement, the EPA's conclusion in light of both the statute and policy considerations is that such a requirement should not be imposed. As discussed above, whether a source is classified as a major source or an area source is the threshold question under CAA section 112, and what requirements apply to the source flows from how the source is classified, with major sources and area sources facing significantly different statutory requirements. If the EPA were to mandate that a reclassified area source maintain its emissions below the level that the source was subject to as a major source, that would be contrary to the fundamental structure that Congress created in CAA section 112. Further, as discussed below in section VIII, even in the absence of any provisions preventing emissions above what a reclassified source was allowed to emit as a major source, most sources are not expected to increase emissions and those that do would have only modest increases. Thus, as a matter of policy judgment, the EPA would not interpret any ambiguity in the statute to allow the imposition of a new limit on reclassified area sources more stringent than the limit applied to other area sources.

For these reasons, the EPA is not promulgating provisions that would prevent a source that has reclassified from major to area source status from increasing emissions above what the source was allowed to emit when it was a major source.

V. Summary of Final Amendments

To implement the plain language reading of the statute as discussed in section IV above, the EPA is finalizing amendments to the General Provisions of 40 CFR part 63, subpart A. The EPA is also finalizing amendments to the General Provisions tables contained within most subparts of 40 CFR part 63 to account for the regulatory provisions we are finalizing in the General Provisions of 40 CFR part 63, subpart A. Finally, the EPA is finalizing changes to several individual NESHAP intended to remove rule-specific OIAI provisions. For all comments not discussed in this preamble, comment summaries and the EPA's responses can be found in the Response to Comments document available in the docket.

A. Final Amendments to 40 CFR Part 63, Subpart A: General Provisions

1. Applicability

The EPA is finalizing amendments to the applicability section of the General Provisions of 40 CFR part 63.1 by adding a new provision 40 CFR 63.1(c)(6) to implement the plain language reading of the “major source” and “area source” statutory definitions of section 112 of the CAA and provide that a major source can be reclassified to area source status at any time upon reducing its actual emissions of and potential to emit HAP to below the MST of 10 tpy of any single HAP and 25 tpy of any combination of HAP. At proposal, this new applicability provision also included regulatory language addressing the compliance date with applicable NESHAP requirements for reclassification and interactions with enforcement actions. We received comments on all aspects of the new applicability provision. Below we discuss each aspect of the proposed MM2A applicability provision and what we are finalizing after considering public comments.

a. Reclassification Provision

The EPA proposed to amend 40 CFR 63.1 by adding a new paragraph (c)(6). As proposed, this paragraph specifies that a major source can become an area source at any time by limiting its PTE HAP to below the major source thresholds established in 40 CFR 63.2, provided certain conditions are met. We received comments in support of and against the proposed text in 40 CFR 63.1(c)(6) and comments requesting changes to or clarification on the proposed provision. Comments against the proposed reclassification provision based on the statutory text or other legal issues (such as legal comments opposing the EPA’s plain language reading of CAA section 112 definitions of major and area sources allowing sources to reclassify at any time) are addressed in section IV of this preamble and in the Response to Comments document available in the docket. The comments requesting changes to or clarification on the new provision are summarized below.

Some commenters recommended that the EPA add language to the new provision in 40 CFR 63.1(c)(6) to specify that the provision applies to sources that reclassify to area source status after being subject to major source NESHAP requirements. The EPA disagrees that the language only applies to reclassification by a major source after the source has been subject to major source NESHAP requirements. The

regulatory language in this provision implements the EPA’s plain language reading of the definition of major and area sources in section 112 of the CAA, as discussed in length in section IV of this preamble, allowing sources to reclassify at any time. This provision allows for reclassification to area source status regardless of whether the reclassification occurs before or after the first substantive compliance date of a major source NESHAP.

Other commenters stated that the proposed provision in 40 CFR 63.1(c)(6) could be read to require all types of sources to obtain PTE limits in order to be reclassified to area source status. These commenters stated that this could be problematic for sources that were major at the first substantive compliance date of a particular NESHAP but are no longer within the definition of “major source” at the time of reclassification because the source’s emissions of and PTE HAP are below the MST even in the absence of a governmental restriction on emissions in a PTE limit. The EPA agrees with the commenters that the language in the proposed provision can be clarified and has amended the language of 40 CFR 63.1(c)(6) in the final rule to read: “A major source may become an area source at any time upon reducing its emissions of and potential to emit (PTE) hazardous air pollutants, as defined in this subpart, to below the major source thresholds established in 40 CFR 63.2, subject to the provisions in paragraphs (c)(6)(i) and (ii) of this section.” The provisions in 40 CFR 63.1(c)(6)(i) and (ii) as finalized in this action are discussed later in this preamble.

In the final regulatory language of 40 CFR 63.1(c)(6), the EPA replaced the phrase “limiting its potential to emit (PTE) hazardous air pollutants . . .” with the phrase “reducing its emissions of and potential to emit (PTE) hazardous air pollutants . . .”. This updated language removes the ambiguity in the proposed language and makes it clear that PTE limits would be needed for area source reclassification for sources with PTE HAP at or above the MST. In contrast, consistent with the statutory definitions of “major source” and “area source” and the regulatory definition of PTE in 40 CFR 63.2, so called “true” area sources,¹² which in this preamble means sources that do not have the capacity to emit HAP at major source levels under their physical and

operational design (even if the source owner and regulatory agency disregard any enforceable limitations), are not within the definition of “major source.” These “true” area sources do not need to obtain enforceable PTE limits to be reclassified to area source status. Accordingly, sources that have permanently removed equipment, changed their processes, or by other means currently do not have a maximum capacity to emit HAP at major source levels are “true” area sources (*i.e.*, enforceable limits are not needed on the source’s physical or operational design to restrict the source’s PTE HAP below MST) and do not need to adopt PTE limits to be reclassified. Any source that adopts a physical or operational limit on its maximum capacity to emit (including requirements for the use of air pollution control equipment or restrictions on the hours of operations or on the type or amount of material combusted, stored, or processed) to limit its PTE HAP below the MST is not a true area source. These are often referred to as “synthetic” area sources.¹³

Relatedly, commenters claimed that the MM2A proposal did not appear to explain that the definition of “potential to emit” does not require enforceable limitations for restrictions on HAP emissions that are inherent in the physical or operational design of the production process. Note that the EPA recognizes that, on a case-by-case basis, a situation may warrant an assessment of whether a given device or strategy should be considered as air pollution control equipment or as an inherent part of the process.¹⁴ That said, the final rule is not revising the EPA’s view on how to determine “the maximum capacity of a stationary source to emit a pollutant under its physical and operational design.” Sources with questions about the proper way to determine PTE HAP or whether they should obtain PTE limits for reclassification to area source

¹² This preamble follows the convention about the meaning of these terms adopted in an EPA memorandum titled “*Potential to Emit (PTE) Guidance for Specific Source Categories*” (April 14, 1998), available at <https://www.epa.gov/sites/production/files/2015-07/documents/lowmarch.pdf>.

¹³ We note that in the Oil and Natural Gas Federal Implementation Plan (O&NG FIP) in Indian Country, “true area sources” include the reductions due to compliance with various NESHAP and new source performance standards (NSPS) standards, which are applicable requirements of the O&NG FIP. True minor sources in the oil and natural gas production and natural gas processing segments of the oil and natural gas sector are required to comply with the O&NG FIP instead of obtaining a source-specific minor source permit, unless a source chooses to opt out of the FIP and to obtain a source-specific minor New Source Review (NSR) permit instead under the “Federal Minor New Source Review (NSR) Program in Indian Country.” See FIP for True Minor Sources in Indian Country in the Oil and Natural Gas Production and Natural Gas Processing Segments of the Oil and Natural Gas Sector. 81 FR 35944 (June 3, 2016).

status are encouraged to consult applicable permitting program regulations and work with their corresponding regulatory authorities on a determination that considers their situation. See also, 40 CFR 63.10(b)(3), which explains in detail the analysis and contents of the records to be kept for applicability determinations made by a source for purposes of 40 CFR part 63.

Multiple commenters objected to the EPA's proposed viewpoint that a major source that had been complying with a NESHAP as of the first substantive compliance date of the standard, but reduced its PTE HAP below the MST by complying with non-section 112 CAA requirements, would be required to obtain HAP PTE limits to ensure that HAP emissions remain below the MST. These commenters argued the EPA should make clear in the final rule that a limitation on another pollutant or parameter can be recognized as a limitation on the source's potential to emit HAP if the limitation on the other pollutant emissions or parameter results, as a practical matter, in a restriction on the source's HAP emissions. The commenters noted that limits that qualify to reduce a source's PTE HAP emissions do not need to be "HAP PTE limits," *i.e.*, a requirement need not place limits directly on a HAP to have the effect of limiting a HAP. The commenters cited as example that volatile organic compound (VOC) limits could reduce HAP emissions and further stated that the EPA provided no explanation why requiring the source to obtain HAP PTE limits is essential to ensure that the area source's HAP emissions are effectively limited. The EPA recognizes that the proposal may have caused confusion about whether the EPA recognizes HAP reductions due to surrogate criteria pollutant controls for purposes of reclassifying to area source status.¹⁵ That said, the EPA has concluded that it does not need to revise the regulatory text to make this specific point because the definition of PTE (as revised in this final rule) allows for the effect of such limitations to count toward limiting the PTE HAP. A source relying on the effect of non-HAP enforceable limitation to constrain its

PTE HAP below the MST may need to show the regulatory authority processing the reclassification the effect of such limitation on the source's PTE HAP to confirm that such source has a PTE HAP that allows it to reclassify to area source status.¹⁶ As explained before, the determination of a source's PTE HAP under the PTE definition in 40 CFR 63.2 requires consideration of any enforceable controls, including "nested" HAP usage limits in permits intended as enforceable VOC limits, and other enforceable non-HAP limitations within a permit that have the effect of reducing HAP emissions. To the extent that a source's PTE considering controls exceeds the MST, a source would need to obtain enforceable limitations constraining its PTE HAP below the MST in order to be reclassified to area source status. Finally, the revised language in 40 CFR 63.1(c)(6) that now states "reducing emissions and its potential to emit (PTE) hazardous air pollutants . . ." (as opposed to the proposed language stating "limiting its potential to emit (PTE) hazardous air pollutants . . .") supports the EPA's conclusion that the PTE regulatory definition means that enforceable limits on other pollutants can have the effect of reducing PTE HAP and can be the basis for reclassification. See also 40 CFR 63.10(b)(3) about the analysis and record contents.

Finally, some commenters asked the EPA to clarify what requirements apply to sources that reclassified before the effective date of this rule. These commenters asked the EPA to state in the final rule that sources that reclassified to area source status prior to the MM2A final rule would not be required to undertake any additional actions. To the extent that sources have reclassified before the effective date of this final rule, their ability to reclassify is governed by the plain language reading of the statute. We discuss the notification and recordkeeping requirements for sources that reclassified before the effective date of this final rule later in this preamble. In contrast, sources that reclassify after the effective date of this final rule are governed by the plain language reading of the statute and by the provisions being finalized in this final rule. In either case, a reclassification is not a

safe harbor for the source if the limits taken do not effectively limit the HAP emissions and the source emits HAP in excess of the MST.

b. Compliance Dates for Applicable Standards

In the proposed language of 40 CFR 63.1(c)(6), the EPA included regulatory text addressing applicability of standards and other requirements under 40 CFR part 63 for sources that reclassify to area source status, including dates for compliance with standards and notifications requirements. Because sources must comply with requirements corresponding to their status, the proposed provision in 40 CFR 63.1(c)(6) specified, "Until the PTE limitations become effective, the source remains subject to major source requirements. After the PTE limitations become effective, the source is subject to any applicable requirements for area sources." In response to comments and to clarify the requirements associated with applicability of NESHAP requirements and the compliance dates for sources reclassifying to area source status, both before and after compliance with applicable major source NESHAP requirements, and for reclassified area sources that subsequently become major sources again, the EPA is consolidating these requirements in the final regulatory text at 40 CFR 63.1(c)(6)(i). The final provision also addresses the notification requirements for these sources. We discuss notification requirements below in section V.A.2 of the preamble.

The final regulatory text in 40 CFR 63.1(c)(6)(i)(A) addresses the applicability of standards and compliance dates for sources reclassifying to area source status either before or after being subject to major source requirements under 40 CFR part 63. The final regulatory text in 40 CFR 63.1(c)(6)(i)(B) addresses the applicability of standards and compliance dates for reclassified area sources that subsequently become major sources again. These final provisions are discussed below.

In this final rule, the EPA is updating the regulatory language in 40 CFR 63.1(c)(6)(i)(A) to include the applicability of standards and compliance dates for sources reclassifying to area source status. The final amended text in 40 CFR 63.1(c)(6)(i)(A) reads as follows: "A major source reclassifying to area source status under this part remains subject to any applicable major source requirements established under this part until the reclassification becomes

¹⁵ See, *e.g.*, January 25, 1995, memorandum titled "Options for Limiting the Potential to Emit (PTE) of a Stationary Source Under Section 112 and Title V of the Clean Air Act (Act)," also, memorandum, "Crediting of Maximum Achievable Control Technology (MACT) Emission Reductions for New Source Review (NSR) Netting and Offsets," available at <https://www.epa.gov/sites/production/files/2015-07/documents/netnoff.pdf>. See, also, 81 FR 35944, explaining that HAP compliance reductions of volatile organic HAP to meet MACT may also result in emissions reductions of VOC.

¹⁶ The EPA expects that state and local and tribal agencies will exercise care when drafting enforceable permit conditions in the situation where the "effect" of criteria pollutant limits will not be straight forward. See January 25, 1995, memorandum titled "Options for Limiting the Potential to Emit (PTE) of a Stationary Source Under Section 112 and Title V of the Clean Air Act (Act)."

effective. After the reclassification becomes effective, the source must comply with any applicable area source requirements established under this part immediately, provided the compliance date for the area source requirements has passed. The owner or operator of a major source that becomes an area source subject to newly applicable area source requirements under this part must comply with the initial notification pursuant to § 63.9(b). The owner or operator of a reclassified source must also provide to the Administrator notification of the change in the information already provided under § 63.9(b) per § 63.9(j)."

As stated in this provision, sources remain subject to any applicable major source requirements under 40 CFR part 63 "until the reclassification becomes effective" instead of the proposed language "until the PTE limitations become effective." In the MM2A proposal, the EPA explained that reclassification to area source status is a voluntary action on the part of a source, and sources are required to apply with their corresponding regulatory authority and follow the corresponding authority's procedures to be reclassified to area source status. This includes sources that, at the time of reclassification, are no longer within the definition of "major source" because they are true area sources (as described above in the preamble), because they had already obtained PTE limits below the MST, or due to other enforceable compliance obligations under a permit, permit by rule, or State Implementation Plan (SIP). As explained elsewhere in this preamble, such sources are area sources under the CAA section 112 definition, but as a result of our previous policy they may continue to have enforceable permit conditions, including major source NESHAP requirements, for example, until their title V permit is revised or revoked in agreement with their permitting authority procedures.

Because reclassification to area source status currently occurs under a regulatory authority's area or minor source program, the reclassification of a source to area source status is effective when the corresponding regulatory authority grants a source's request to be considered an area source via a permit registration, permit by rule, applicability determination, etc. (As explained in this preamble, 40 CFR part 63 separately requires notification of the applicability of a standard and recordkeeping of information on the applicability determination decision.) We expect that the process for sources to reclassify to area source status for

HAP will rely on existing programs (e.g., minor source programs, title V permitting procedures, and/or approved programs for issuing PTE limits under CAA section 112(l)). Consistent with how regulation of area sources is currently implemented under CAA programs, the EPA expects that determinations of area source status or major source status, as requested by a source for reclassification, will occur in a single action or concurrently with permitting actions needed to reconcile the revised requirements for the source under the newly acquired status or as appropriate for permit closure or revocation. (A permitting authority program may have simpler, less burdensome processes for specific groups of sources.) The language finalized about the effective date of reclassification equitably considers the current implementation mechanisms and sources situation.

As proposed, the regulatory language in 40 CFR 63.1(c)(6)(i) stated that "[a] major source that becomes an area source must meet all applicable area source requirements promulgated under this part immediately upon becoming an area source, provided the first substantive compliance date for the area source standard has passed, . . ." Some commenters requested that the EPA include language in the final rule providing that sources reclassifying to area source status may meet the major source NESHAP requirements as a means of complying with newly applicable area source NESHAP requirements. The EPA is not including such language in the final rule. Any source that reclassifies to area source status is no longer subject to major source NESHAP requirements and is subject to area source NESHAP requirements instead. That said, the area source is not precluded from streamlining the applicable area source NESHAP requirements with permit terms from a previously applicable major source NESHAP standard if compliance with applicable area source NESHAP requirements is assured. Because the reclassification to area source status is a voluntary action on the part of the source, the source must evaluate the area source NESHAP requirements that will become applicable to the source at the time of the reclassification to area source status and be in a position to meet such requirements at the time it reclassifies.

In the regulatory language of 40 CFR 63.1(c)(6)(i)(A), the EPA is finalizing the proposed immediate compliance rule for major sources that reclassify to area source status. These sources will be subject to applicable area source

NESHAP requirements in 40 CFR part 63 immediately upon reclassification to area source status, provided the compliance date for the area source requirements has passed. In the MM2A proposal, the EPA proposed to allow for additional time for compliance with applicable area source NESHAP requirements for particular situations. For reclassifications from major source to area source status, the EPA proposed that additional time (not to exceed 3 years) may be granted by the EPA (or a delegated authority) in a compliance schedule where an area source standard would apply to an existing source upon reclassification and different emission points would need controls or different emission controls would be necessary to comply with the area source standard or other physical changes would be needed to comply with the standard.

The EPA received many comments on the proposed immediate compliance rule, compliance extension provisions, and the process for obtaining a compliance extension. Some commenters agreed with the proposed immediate compliance rule for sources that reclassify to area source status, while others opposed the immediate compliance rule if the EPA did not include provisions to obtain a compliance extension. Commenters supporting the immediate compliance rule without compliance extension provisions argued that sources should be aware of applicable requirements and plan for timely compliance at the time they request reclassification. These commenters opposed the proposed compliance extension provision, noting that any provision to allow compliance at periods later than 3 years from a standard's effective date was unlawful and unnecessary. The commenters argued that CAA section 112(i)(3)(A) requires that compliance must be within 3 years of the effective date of the standard; furthermore, CAA section 112(i)(3)(A) requires compliance "as expeditiously as practicable." The commenters argued that just because physical changes may be required for a source to comply with newly applicable area source NESHAP requirements, it does not mean that compliance cannot be achieved immediately upon reclassification. The commenters emphasized that CAA section 112(i)(3) is clear on the compliance schedule for existing sources; that the schedule is determined by the effective date of any emission standard, limitation, or regulation promulgated under CAA section 112; and that compliance has to be as expeditious as practicable, but in no event later than 3 years after the

effective date of such standard. On the other hand, some commenters stated that there may be a short period of time when a stationary source needs to discontinue compliance with a major source NESHAP requirement before complying with the area source NESHAP requirements to conduct testing and verify monitoring protocols or to physically install emission controls. These commenters argued that the rule should recognize the need for such exceptions to the requirement to comply immediately with the area source NESHAP requirements and that the regulatory authority must be able to consider all the relevant factors in allowing for a compliance extension. While the commenters stated that a stationary source would want an exception to discontinue compliance with major source NESHAP requirements for a short period of time in order to come into compliance with the new area source NESHAP requirements to which they will be subject immediately after reclassification, the commenters did not provide supporting evidence or concrete examples showing that there are real situations where such compliance exception is needed.

The EPA agrees with the commenters that the statutory language in CAA section 112(i)(3)(A) precludes the compliance extension as proposed. For this reason, the EPA is not finalizing the proposed compliance extension for sources reclassifying to area source status. If a source reclassifies to area source status in a source category for which there are applicable area source NESHAP requirements, and the effective date of such requirements has passed, the source must comply immediately upon reclassification. If the compliance date of the applicable area source NESHAP requirements is in the future, the source must comply by the future compliance date specified in the individual subpart. Because reclassification is a voluntary action on the part of the source, the immediate compliance requirement does not represent a compliance issue because a source could delay their reclassification until such time as they are able and equipped to meet the applicable area source NESHAP requirements.

In the MM2A proposal, the EPA included in the proposed provision at 40 CFR 63.1(c)(6)(ii) regulatory language addressing the compliance schedule for sources that reclassify between major and area source status more than once. The EPA proposed that “A major source subject to standards under part 63 that subsequently becomes an area source, and then later becomes a major source

again by increasing its emissions to at or above the major source thresholds, must comply with the previous applicable major source requirements of this part immediately upon becoming a major source again . . .” The EPA also proposed a compliance extension provision for these sources: If the previously applicable standard has been revised since the source was last subject to the standard and, in order to comply, the source must undergo a physical change, install additional emission controls, and/or implement new control measures, the source will have up to the same amount of time to comply as the amount of time allowed for existing sources subject to the revised standard. The EPA received multiple comments on the proposed compliance schedule and compliance extension provision for reclassified area sources reverting to major source status.

Some commenters argued that there was no need for the EPA to address compliance timelines in the context of the MM2A rulemaking for sources that reclassify to area source status and then revert back to major source status. These commenters noted that the existing General Provisions in 40 CFR 63.6(c)(5) already include compliance dates for area sources that become major sources, and that by including compliance dates within the provision in 40 CFR 63.1(c)(6), the EPA was creating disparate compliance schedule requirements. Several other commenters agreed with the proposed immediate compliance rule for area sources reverting to major source status, stating that sources should be aware of applicable requirements and plan for timely compliance at the time they request reclassification. These commenters opposed the proposed compliance extension provision, noting that any provision to allow compliance at periods later than 3 years from a standard’s effective date is unlawful and unnecessary. The commenters argued that CAA section 112(i)(3)(A) requires that compliance must be within 3 years of the effective date of the standard. In addition, the commenters pointed out that CAA section 112(i)(3)(A) does not allow additional time for a source that reverts to major source status when the applicable major source NESHAP has increased in stringency; thus, there is no reason for the proposed extension. The commenters noted that CAA section 112(g)(2) requires that any entity that modifies or constructs a major source first secure a determination that applicable maximum-achievable standards will be met. The commenters argued that any source that proposes to

increase its emissions to exceed the MST should be required to plan sufficiently to comply with the applicable major source NESHAP requirements before it increases its emissions. These commenters stressed that it would be inappropriate to allow stationary sources to prolong compliance with applicable standards, and that allowing sources additional time for compliance could incentivize sources to continually shift stationary source applicability status to avoid complying with applicable NESHAP requirements. These commenters objected to any compliance extension, stating that any extension or consideration of special conditions would remove the protections in existing rules, allowing the public and environment to be exposed to increased HAP emissions.

Other commenters argued that the proposed immediate compliance provisions for sources that revert back to their previous major source status are onerous and seem to be designed to discourage sources from opting to become area sources. These commenters supported the proposed compliance extension provisions but noted that there is no justification to conditioning any extension to the immediate compliance requirement for these sources on an intervening change to the major source standard. They argued that this appeared to be a backdoor attempt to force sources opting to become area sources to continue using major NESHAP add-on controls in case they might need to become a major source again, and that this is something for which the EPA lacks authority. Some commenters supported the immediate compliance rule if appropriate exceptions are made in the final rule and it includes a reasonable process for requesting an extension. The commenters recommended that the compliance extensions be left to the air pollution control agencies and that the EPA should not try to define what changes would be eligible for a longer compliance period, thus, eliminating unnecessary EPA oversight of the process for area sources and simplifying the procedures for acquiring additional compliance time. Finally, the commenters stated that a source that once was a major source may, for example, maintain its area source status for 20 years before seeking to become a major source again; for this source, many things may have changed while it was an area source, including process changes that render the previous compliance approach inapplicable or

require the source to comply in different ways.

The EPA agrees with the commenters that stated that the statutory language in CAA section 112(i)(3)(A) is properly read to preclude the proposed compliance extension for sources that revert back to their previous major source status and are subject to major source requirements for which the compliance date of such requirements has passed. These sources must comply with the major source requirements immediately, even if faced with the circumstances listed in the proposal (needing to “undergo a physical change, install additional emissions controls and/or implement new control measures” in order to meet the applicable NESHAP requirements). In the circumstance where a source is reverting back to major source status for which there are applicable major source NESHAP requirements and the compliance date of such requirements at the time of reclassification is still in the future, the source needs to comply with such requirements by the future compliance date specified in the individual subpart. In sum, a source should not reclassify (in either direction) until it is ready to meet the requirements that are imposed by the new classification.

For the reasons explained above, the final regulatory text included in 40 CFR 63.1(c)(6)(i)(B) addresses the applicability of standards and compliance dates for reclassified area sources that subsequently become major sources again. In this provision, the EPA is finalizing the proposed immediate compliance rule for area sources that become major sources again, if they were previously major sources under 40 CFR part 63. The EPA has amended the language to read as follows: “An area source that previously was a major source under this part and that becomes a major source again must comply with the applicable major source requirements established under this part immediately upon becoming a major source again, provided the compliance date for the major source requirements has passed, notwithstanding any other provision within the applicable subparts. The owner or operator of a source that becomes a major source again must comply with the initial notification pursuant to § 63.9(b). The owner or operator must also provide to the Administrator any change in the information already provided under § 63.9(b) per § 63.9(j).” This updated final provision in 40 CFR 63.1(c)(6)(i)(B) for reclassified area sources that subsequently become major sources again covers both situations of sources

that reclassify back to major source status: (1) Major sources that reclassify to area source status prior to being subject to major NESHAP requirements (including sources that reclassified under the OIAI policy) and then return to major source status and (2) major sources that reclassify to area source status after being subject to major NESHAP requirements and then return to major source status. On the other hand, the compliance dates for area sources that never operated as major sources previously (including sources constructed with enforceable controls or other type of enforceable PTE limits) but that increase emissions or PTE and become major sources for the first time are governed by the provisions in the individual NESHAP (which are not being amended in this rule) and not the provisions applicable to reclassified area sources that return to major source status that are being finalized in this action. The EPA is also finalizing amendments to 40 CFR 63.6(c)(1) to account for the immediate compliance rule as included in the final revisions to 40 CFR 63.1(c)(6)(i)(A) and (B) as discussed above.

Finally, while some commenters requested assurance that if sources revert back to their previous major source status, sources will not be considered new sources, others argued the EPA should expressly provide that relaxation or elimination of a PTE limit that results in the source becoming a major source requires that the source comply with CAA section 112 NESHAP requirements for a new source. These commenters asserted that as a result of a loophole in the existing 40 CFR part 63 regulations, some sources and states are currently under the impression that a source can have its original PTE limit taken at the time of construction relaxed or eliminated without triggering the requirement to comply with major source NESHAP requirements that would have otherwise applied to the source when it was built. This confusion could have arisen from the text in 40 CFR 63.6(c)(5) stating that “the owner or operator of an area source that increases its emissions of (or its potential to emit) hazardous air pollutants such that the source becomes a major source shall be subject to relevant standards for existing sources.” As explained in section IV of this preamble, the CAA section 112 definitions of “new source” and “existing source” dictate that the new source/existing source distinction is determined by when the affected source commences construction or reconstruction with respect to the date

of proposal of the standard and say nothing about the source’s volume of emissions. For this reason, the EPA disagrees that a source reclassifying to major source status after having previously been subject to the major source standards would necessarily be classified as an existing source. The EPA also disagrees with commenters that a reclassifying source would necessarily be a new source for purposes of determining which standard applies. Whether an affected source is new or existing for purposes of compliance with an applicable NESHAP is dictated by when the source commenced construction or reconstruction in relation to when the applicable NESHAP was proposed and not whether the status of the source is major or area.

Moreover, the regulatory text at 40 CFR 63.6(c)—Compliance dates for existing sources—applies only to “existing sources.” Therefore, the regulatory language at 40 CFR 63.6(c)(5) states that “the owner or operator of an [existing] area source that increases its emissions . . . shall be subject to relevant standards for existing sources.” The intent of 40 CFR 63.6(b)(7) and (c)(5) was further explained in the preamble for the March 23, 2001, rule that proposed revisions to 40 CFR 63.6(b)(7) and (c)(5) (66 FR 16328),¹⁷ “[w]e are proposing to revise 63.6(b)(7) and (c)(5) to require new source MACT only on affected sources that commenced construction or reconstruction after the proposal date of the NESHAP . . . Affected sources at former area sources that become major that have not constructed or reconstructed *after the proposal date of the NESHAP* (emphasis added) would be subject only to existing source MACT” Again, each NESHAP provides the dates that determine whether a source is a new source or an existing source. A source’s status of new or existing is determined by dates given in each individual NESHAP, and that does not change when a source reclassifies. If a major source reclassifies to area source status after being subject to new major source NESHAP requirements and then returns back to major source status, the sources that were originally subject to new source requirements would once again be subject to new source requirements. In light of these comments, the EPA is including in the final rule amendments to 40 CFR 63.6(b)(7) and (c)(5) to reflect the new or existing status of sources that become major sources as being determined by

¹⁷ These provisions were finalized on April 5, 2002 (See 67 FR 16582).

the dates provided in the applicable subparts and to also reflect the immediate compliance rule as finalized in 40 CFR 63.1(c)(6)(i)(B) for reclassified area sources that revert back to major source status. The amendments to 40 CFR 63.6(b)(7) read as follows: “When an area source increases its emissions of (or its potential to emit) hazardous air pollutants such that the source becomes a major source, the portion of the facility that meets the definition of a new affected source must comply with all requirements of that standard applicable to new sources. The source owner or operator must comply with the relevant standard upon startup.” The amendments to 40 CFR 63.6(c)(5) read as follows: “Except as provided in paragraph (b)(7) of this section, the owner or operator of an area source that increases its emissions of (or its potential to emit) hazardous air pollutants such that the source becomes a major source and meets the definition of an existing source in the applicable major source standard shall be subject to relevant standards for existing sources. Except as provided in § 63.1(c)(6)(i)(B), such sources must comply by the date specified in the standards for existing area sources that become major sources. If no such compliance date is specified in the standards, the source shall have a period of time to comply with the relevant emission standard that is equivalent to the compliance period specified in the relevant standard for existing sources in existence at the time the standard becomes effective.”

c. Reclassifications and Enforcement Actions

In the MM2A proposal, the EPA included regulatory language in the MM2A applicability provision in 40 CFR 63.1(c) to address the interaction of the reclassification of sources and potential enforcement actions. Specifically, we noted reclassification of a source from major to area source status would not absolve a source of prior liability for noncompliance. Although sources that are the subject of an investigation or enforcement action may still seek area source status for purposes of future applicability, such sources remain liable for any previous or pending violations of the CAA that occurred prior to the reclassification. Enforcement of major source requirements could include penalties, mitigation for illegal emissions, and/or other remedies to address noncompliance. Accordingly, a source cannot use its new area source status as a defense for major source NESHAP violations that occurred prior to its reclassification. Similarly, becoming a

major source does not absolve a source subject to an enforcement action or investigation for area source violations from the consequences of any actions occurring when the source was an area source.

Multiple commenters agreed with the premise that a major source that reclassifies should not be absolved from potential enforcement actions that occurred prior to the reclassification. However, some commenters argued that if a major source is rightfully an area source at the time of an alleged violation, then the source should not be subject to enforcement as a major source. Other commenters argued that it is also appropriate for the EPA to consider the misclassification of a major source instead of the appropriate area source classification, and the requirements for major sources versus area sources, and to examine a past violation to determine if the source actually violated the requirements of the classification under which the firm should have been registered.

One commenter recommended that the EPA add language to 40 CFR 63.1(c)(6) that would allow for modification of an enforcement order affecting a reclassified source if the enforcement order was based on the enforcement authority’s finding that the source was a major source or based on the application of the OIAI policy. The commenter argued that the EPA’s proposed new language in 40 CFR 63.1(c)(6) would leave unclear whether it is the EPA’s intent that: (1) Such a source can never apply to the enforcement authority for relief from such obligations (which often include obligations imposed pursuant to a court’s equity jurisdiction or that otherwise fall outside the universe of obligations specified in the NESHAP) in exchange for accepting restrictions on its PTE in order to become a synthetic HAP area source; or (2) the enforcement authority can never enter into a modification of the order, settlement, or decree that grants such relief. The commenter argued that this lack of clarity could result in foreclosure of such relief in future proceedings that are informed by the final rules, depending on the EPA’s posture at the time and the deference that is sometimes given to agencies’ interpretations of their own regulations.

The commenter argued that because the EPA has withdrawn the OIAI policy on the grounds that it was inconsistent with “the plain language reading of the ‘major source’ and ‘area source’ definitions of section 112” of the CAA, then it stands to reason that: (1) No historical application of the OIAI policy

in the formulation of enforcement orders and negotiation of settlement agreements and consent decrees was ever lawful or appropriate; and (2) orders, agreements, and decrees that were imposed or negotiated based materially on the OIAI policy ought to be subject to retroactive review, on a case-by-case basis and subject to the needs of the particular case, upon application by the respondent for a modification of the instrument. Finally, a commenter argued that the EPA should explicitly state in its regulations that the consequence of violating PTE limitations is the requirement to comply with the applicable major source NESHAP requirements—in addition to an appropriate penalty for violating the PTE limitations.

In the MM2A proposal, the EPA included regulatory language in the proposed MM2A applicability provision in 40 CFR 63.1(c)(6) stating that reclassification from major source to area source does not affect a source’s liability or any enforcement investigations or enforcement actions for a source’s past conduct or violations of major source requirements that occurred prior to the effective date of the source’s enforceable limitations (*i.e.*, the reclassification). This rule revision underscores the importance of a source’s PTE in determining NESHAP, 40 CFR part 63, applicability. The plain language reading of the definitions of “major” and “area” source in section 112 of the CAA as explained in the 2018 MM2A Memorandum and implemented through this rulemaking does not change the Agency’s position that a source may take enforceable production and/or operational limits to effectively constrain its PTE and, thereby, avoid applicability. Rather, it eliminates the timing constraint imposed by the OIAI policy as to when a source may take such limits to avoid applicability. If, before taking such limits to avoid applicability, a source emitted a single HAP in an amount of 10 tpy or greater, or emitted any collection of HAP in an amount of 25 tpy or greater, or it is determined that the source has (or had) a PTE that meets or exceeds these amounts, the source would be considered a major source and subject to the requirements of 40 CFR part 63 (as applicable) up and until the effectiveness of the limits. The same holds true after taking such limits to avoid applicability. That is, even after taking such limits, if a source emits a single HAP in an amount of 10 tpy or greater, or emits any collection of HAP in an amount of 25 tpy or greater, or it is determined that the source has (or

had) a PTE that meets or exceeds these amounts, the source would be considered a major source and subject to the requirements of 40 CFR part 63 (as applicable). Now, as before, any time a source operates as a major source, it must meet the applicable major source requirements in 40 CFR part 63. Neither this rule, nor the 2018 MM2A Memorandum, intends to allow a source that emits (or has the PTE) greater than the MST to avoid compliance with applicable requirements for major sources. Any source that operates without complying with the applicable requirements is subject to enforcement. The revision proposed at 40 CFR 63.1(c)(6) underscores the EPA's position that unless, and until, a source has enforceable production and/or operational limits that effectively limit a source's PTE (and are not just chimeras that do not really restrain an operator from emitting pollution in amounts equal to or exceeding the major source thresholds), the source is a major source and must comply with the major source requirements (as applicable). The D.C. Cir. said as much in its review of the 2018 MM2A Memorandum, *California Communities Against Toxics, et al. v. EPA*, 934 F.3d. 627, 638–639 (D.C. Cir. 2019), (“Major sources must obtain a permit in order to operate, and unless and until that permit is amended or set aside, the stringent requirements set forth therein must be complied with while that equipment is operational. The [MM2A Memorandum] itself does not revoke or amend a single permit.”)

Any order, settlement, or decree (collectively, agreements) issued or entered into addressing a source's compliance with the requirements of NESHAP, 40 CFR part 63, is not affected by this rule or the 2018 MM2A Memorandum. Those agreements were entered into based on the specifics of each case. Reopening or modification of settlements approved by, or orders issued by, federal courts is governed by the Federal Rules of Civil Procedure (F. R. Civ. P. Rule 60). Nothing in this final rule is intended to suggest that any of the prerequisites for reopening any judicial or administrative settlement or modifying a prior order of a court (including orders approving settlements) have been met. There is no additional clarification needed regarding these authorities. While the OIAI policy may have informed the contours of those agreements, it did not (and, in fact, could not) change the statutory basis for those enforcement actions. These agreements reflect a mutual understanding of the parties that settlement is in the interest of all

involved after taking into account the legal and factual circumstances at the time of the settlement. Accordingly, the EPA is finalizing the regulatory language in 40 CFR 63.1(c)(6)(ii) addressing the interaction of the reclassification of sources with enforcement actions as proposed.

d. Reclassifications and Operation of Add-On Pollution Control Equipment

After the issuance of the MM2A Memorandum, some stakeholders were concerned that if sources were to reclassify to area source status, they could stop using the add-on emission control equipment or emission reduction practices implemented for major source NESHAP compliance or no longer maintain the same level of control efficiency as before. At proposal, the EPA requested comments on whether facility owners or operators of sources that reclassify will cease to properly operate their add-on control devices where the operation of the add-on control device is needed to restrict the PTE and appropriate monitoring, recordkeeping, and reporting (MRR) are established as enforceable conditions.

In the proposal, the EPA explained that a source seeking reclassification because it has reduced its HAP emissions to below the MST through use of add-on control devices or emission reduction practices implemented for compliance with major source NESHAP requirements will need to demonstrate to the regulatory authority issuing the PTE limits the degree to which the add-on control devices and emission reduction practices are needed to restrict the source's PTE. In the absence of the applicability of the major source NESHAP requirements, if the source relies on its existing NESHAP add-on control devices and/or emission reduction practices to limit its HAP PTE below the MST, the use of these control devices and/or emission reduction practices must be made enforceable under a permitting authority's legal mechanism. Alternatively, if a source intends to stop using the add-on control device equipment or emission reduction practices used to comply with a previously applicable major source NESHAP requirement, the source must demonstrate that other physical controls or operational limits that the source adopts will restrict the source's actual emissions and maximum capacity to emit HAP below the MST and that these limits are or can be made enforceable to ensure that the source will not emit or have the potential to emit HAP at or above the MST.

Some commenters argued that there is no reason to believe that facility owners or operators would cease to properly operate their add-on control devices where the operation of the control is needed to restrict the PTE and appropriate MRR are established as enforceable conditions. Similarly, some commenters asserted that sources that achieve area source status through compliance with MACT have significant disincentives to alter their control measures to increase emissions thereafter. They argued that HAP emissions control devices are not designed to achieve partial emissions reductions; rather, they are designed to reduce emissions by a specified efficiency rate and a source that already has invested in controls for the purpose of major source MACT compliance is unlikely to cease using them or remove them in favor of less-effective measures to limit its HAP emissions—especially if the source's reclassification to area source status is contingent upon compliance with an enforceable PTE limit.

On the other hand, other commenters expressed concern with the EPA statement in the proposal saying that “it has no reason to believe, and does not anticipate” that sources will cease operating their control devices and hence increase emissions as a result of the MM2A action. One commenter argued that the EPA has collected insufficient data and included no explanation to support what the commenter called an “economically irrational conclusion.” The commenter argued that the EPA has not acknowledged the financial incentives to reduce usage of expensive control devices.

Commenters arguing that sources will reduce control device operation and emission monitoring if the major source NESHAP requirements no longer apply stated the EPA must include in the final rule conditions requiring the continued use of add-on controls and conditions ensuring that monitoring and parametric limits are adequate to meet the required destruction efficiencies needed for sources to constrain their PTE and emissions at area source levels. These commenters argued that without such requirements, sources that reclassify are likely to operate the control device only part of the year. They claim sources will make cost-saving business decisions to turn off controls for several months a year or use less-effective controls to remain just below the MST. Some commenters summarized, as an example, the information collected by the EPA to justify the monitoring requirements for flares in the NESHAP

for Petroleum Refineries and described how, without rigorous monitoring, flare efficiency could be highly variable and substantially lower than 98 percent. The commenters also argued that the EPA cannot assume that other control devices, such as fabric filter baghouses and electrostatic precipitators, would be as effective once the major source NESHAP operating limits or monitoring requirements no longer apply. The commenters argued that the EPA must require the facility to periodically perform source tests to verify that the restriction actually correlates with emissions that are below the MST. The commenters further argued that without requirements ensuring proper operation, maintenance, and monitoring of add-on controls, sources will stop consistently operating the control devices that limit the release of HAP and allow the sources to reclassify to area source status.

The EPA sees these comments as pertaining to the proposed effectiveness criteria of PTE limits. In particular, the EPA may consider provisions concerning the operation and monitoring of add-on controls in the context of the criteria for ensuring that a PTE limit used to reclassify from major source to area source status is practicably enforceable. As discussed later in section VII of the preamble, the EPA is not taking action on the proposed amendments to 40 CFR 63.2 at this time and is continuing to consider the comments received on this aspect of the MM2A proposal. The EPA intends to take final action on this aspect of the MM2A proposal in a separate final action at a later date.

2. 40 CFR 63.9 Notification Requirements

In the MM2A proposal, the EPA included language in the reclassification provision in 40 CFR 63.1(c)(6) specifying that sources reclassifying must comply with the notification requirements of 40 CFR 63.9(b) and (j). The EPA also proposed to clarify the notification requirements for sources reclassifying by amending 40 CFR 63.9(b) so that an owner or operator of a facility must notify the Administrator of any standards to which it becomes subject. The proposed amendment covers situations where a source reclassifies from major to area source status and where a source reclassifies from major to area and subsequently reverts back to major source status. The EPA also proposed to clarify that a source that reclassifies must notify the EPA of any changes in the applicability of the standards to which the source

was subject per the notification requirements of 40 CFR 63.9(j).

Most of the commenters supported the proposed amendments to the notification provisions in 40 CFR 63.9(b) and (j), but a few disagreed that the established General Provisions require notification when going from being subject to not being subject. Other commenters requested that the EPA reduce the number of duplicative notifications and simplify the regulatory authorities that must review 40 CFR 63.9(j). Other commenters requested clarification between notification provisions within individual NESHAP that allow for 120 days for notification versus the 15-day notification in the General Provisions in 40 CFR 63.9(b) and (j). These commenters asked the EPA to clarify the differences between these requirements, harmonize the reporting requirements, and minimize duplicative requirements. The EPA disagrees that the General Provisions do not require a notification when a source is no longer subject to a standard. The provisions of 40 CFR 63.9(j) are applicable to a change in information already provided. The change in a source's status from major to area (or vice versa) is a change in the information provided that determined the initial status of the source as subject to the major or area source standards. This is different from the initial notification required by 40 CFR 63.9(b), as that provides the relevant information to the Administrator of the newly governed provisions and is required to be submitted, per 40 CFR 63.9(b)(2), no later than 120 days after the source becomes subject. The notification of a change in information already required within 15 days is a result of the previously applicable standard. There are cases for which there is no applicable area source standard; the notification required by 40 CFR 63.9(j) is the only notification that would be submitted in those cases. These requirements in two provisions do not require harmonizing, as they are due to different NESHAP subparts being applicable and are not duplicative.

The EPA is finalizing the reclassification provision in 40 CFR 63.1(c)(6) notification requirements as proposed for both major sources that reclassify to area source status and area sources that revert back to major source status. The EPA is also finalizing the proposed amendments to 40 CFR 63.9(b) so that an owner or operator of a facility must notify the Administrator of any standards to which it becomes subject. Further, for clarity, the EPA has finalized at 40 CFR 63.9(j)(i)–(iv) the data elements that a reclassifying source

must provide in the notification of a “change in information already provided” required under 40 CFR 63.9(j). Finally, the EPA is clarifying that the notification requirement of 40 CFR 63.9(j) is an existing requirement. Thus, the EPA requires any source that reclassified after January 2018 (issuance of the 2018 MM2A Memorandum) and before the effective date of this final rule that has not yet provided the notification of a change in information per 40 CFR 63.9(j) to provide such notification within 15 calendar days after the effective date of this final rule.

For the notification requirements in 40 CFR 63.9(b) and (j), the EPA also proposed to require sources that reclassify to submit the notification electronically through CEDRI. The EPA proposed amending the General Provisions to add 40 CFR 63.9(k) to include the CEDRI submission procedures. Several commenters support using CEDRI for notification of status changes. Some commenters requested the EPA to clarify that the new requirements in 40 CFR 63.9(k) only apply when a facility is reclassifying from a major source to an area source or from an area source to a major source, so regulatory authorities could not conclude that all notifications or reports should be done using CEDRI. Some commenters strongly supported the Agency providing this information to the public. While the EPA agrees that the provisions of 40 CFR 63.9(k) only apply when specifically directed there from another provision, as stated in 40 CFR 63.9(k), “[i]f you are required to submit notifications or reports *following the procedures specified in this paragraph (k)*,” (emphasis added), we do not believe that further clarification within the regulatory language is necessary. We are finalizing this provision as proposed requiring sources that reclassify to submit the notification electronically through CEDRI. Additionally, the EPA has clarified that sources that reclassify between January 25, 2018, and the effective date of this final rule also must submit the notification through CEDRI. The EPA acknowledges the support for the public availability of the notifications and notes that the submitted notifications, along with any other notifications and reports submitted through CEDRI, become available to the public through the WebFIRE database (<https://www.epa.gov/electronic-reporting-air-emissions/webfire>) after time for review and approval by the regulatory agencies.

Multiple commenters recommended that the EPA should clarify CEDRI reporting. One commenter indicated that notification is not delegable and

needs to adjust the language in 40 CFR 63.13 that requires submittal of information to Regional offices at specific addresses. The commenter pointed out that the proposed CEDRI reporting makes this requirement excessive and the regulatory text should be fixed to remedy the requirement of reporting in triplicate (Regional offices, CEDRI, Administrator/state). The commenter noted that the last sentence of 40 CFR 63.12(c) does not address this issue and should be deleted/alterd to avoid reporting in triplicate. Another commenter indicated that a separate notification to state agencies should be sent directly to the permitting agency. The commenter requested that the following paragraph be added to 40 CFR 63.9(k):

“If a state or local permitting agency has received delegation for a Part 63 standard that requires you to submit notifications or reports and that permitting agency requires, by way of statute, rule, policy, guidance, permit, or other mechanism, that such notifications or reports must be submitted also to the permitting agency, then such notifications and reports must be submitted to the permitting agency as well as to CEDRI.”

The EPA agrees with the commenters that the language at 40 CFR 63.13 and 63.12(c) was not clear that submission to CEDRI, when required by regulation, fulfills the obligation of submittal to the EPA Regional office. Therefore, the EPA is finalizing at 40 CFR 63.13 a clarifying statement that when required by 40 CFR part 63, the submission of a report or notification to CEDRI fulfills the obligation of reporting to the EPA Regional office. The EPA does not agree that additional language to reflect that reporting to a delegated agency is required in addition to reporting to CEDRI, as that is implicit in 40 CFR 63.12(c), which requires that all information required to be submitted to the EPA be submitted to the delegated authority. The manner of submission is at the discretion of the delegated authority, but the reports and notifications that are required to be submitted to the EPA electronically through CEDRI must be delivered to the EPA through CEDRI. However, delegated authorities have the discretion to consider the submission to CEDRI as meeting the requirement to submit the report to them.

In the MM2A proposal, the EPA identified two broad circumstances in which extensions of the timeframe for electronic submittal may be provided. In both circumstances, the decision to accept the claim of needing additional time to submit is within the discretion of the Administrator, and submittal

should occur as soon as possible. The EPA provided these potential extensions to protect owners or operators from noncompliance in cases where they cannot successfully submit a notification by the submittal deadline for reasons outside of their control. The situation where an extension may be warranted due to outages of the EPA's Central Data Exchange or CEDRI that preclude an owner or operator from accessing the system and submitting a required notification is addressed in 40 CFR 63.9(k)(1). The situation where an extension may be warranted due to a *force majeure* event, which is defined as an event that will be or has been caused by circumstances beyond the control of the affected facility, its contractors, or any entity controlled by the affected facility that prevents an owner or operator from complying with the requirement to submit electronically as required by this rule, is addressed in 40 CFR 63.9(k)(2). Examples of such events are acts of nature, acts of war or terrorism, or equipment failure or safety hazards beyond the control of the facility. Finally, the EPA also proposed to amend 40 CFR 63.12(c) to specify that a delegated authority may not exempt sources from reporting electronically to the EPA when stipulated by this part.

One commenter recommended that the CEDRI late-notification language in proposed 40 CFR 63.9(k)(1) and (2) should be stricken because air pollution control agencies already have experience in using enforcement discretion for addressing late notifications and that discretion should not be codified or limited by regulation. The commenter also argued that the full range of circumstances that could legitimately cause a late notification cannot be covered by the regulation, and the discretion to grant an extension should not be solely within the discretion of the Administrator. Another commenter did not support the proposed additional requirements detailing when late notifications are forgiven for a *force majeure* event or federal EPA computer glitch but not in other meritorious situations. Another commenter suggested that time extensions for electronic reporting should be allowed for circumstances other than CEDRI outage and *force majeure* events, which allow for other situation-specific reasons that may impact the reasonable ability of a facility to achieve timely electronic reporting.

The EPA disagrees with the commenter that the reporting extension allowance for *force majeure* and CEDRI outage should be stricken. Granting an extension is at the discretion of the

Administrator, which is defined in 40 CFR 63.2 to be “the Administrator of the United States Environmental Protection Agency or his or her authorized representative (e.g., a State that has been delegated authority to implement the provisions of this part).” The extension provision does not remove the authority of an air pollution control agency to grant an extension for those subparts for which they have been delegated authority. Further, the EPA disagrees with the commenters that other situations that are not included in these provisions are excluded from obtaining an extension to their reporting deadline. The extension provisions as proposed and finalized are limited to those circumstances out of control of the facility and provide clear direction on the process for requesting an extension. Facilities may still engage with the Administrator on any delays in submittal not specifically covered under the CEDRI outage or *force majeure* provisions. After consideration of public comments, the EPA is finalizing the extension provisions as proposed.

The electronic submittal of the notifications addressed in this rulemaking will increase the usefulness of the notification; is in keeping with current trends in data availability and transparency; will further assist in the protection of public health and the environment; will improve compliance by facilitating the ability of delegated state, local, tribal, and territorial air agencies and the EPA to assess and determine compliance and the applicability of major and area source standards to a facility; and will ultimately reduce burden on regulated facilities, delegated air agencies, and the EPA. Electronic submittal also eliminates paper-based, manual processes, thereby saving time and resources and providing data quickly and accurately to the affected facilities, air agencies, the EPA, and the public. Moreover, electronic reporting is consistent with the EPA's plan¹⁸ to implement Executive Order 13563 and is in keeping with the EPA's Agency-wide policy¹⁹ developed in response to the White House's Digital Government Strategy.²⁰ For more information on the

benefits of electronic reporting, see the memorandum, “*Electronic Reporting Requirements for New Source Performance Standards (NPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP) Rules*,” available in Docket ID No. EPA–HQ–OAR–2019–0282.

3. 40 CFR 63.10 Recordkeeping and Reporting Requirements

In the MM2A proposal, the EPA proposed to amend the recordkeeping requirements for applicability determinations in 40 CFR 63.10(b)(3) by adding text to clarify that this requirement applies to an owner or operator with an existing or new stationary source that is in a source category regulated by a standard established pursuant to CAA section 112 but that is not subject to the relevant standard because of enforceable limitations on the source’s PTE. Specifically, the EPA proposed removing the time limit for record retention in 40 CFR 63.10(b)(3) and requiring that the records be maintained until the source becomes an affected major source subject to major source requirements under 40 CFR part 63.

Many commenters supported the proposed amendment to remove the time limit for record retention such that sources that obtain new enforceable PTE limits are required to keep the required record of the applicability determinations for as long as the source continues to be an area source based on PTE limitations. While many commenters agreed with the removal of time limit in 40 CFR 63.10(b)(3), some commenters argued that major sources that reclassify to area sources should not be subject to additional recordkeeping requirements that do not apply to other area sources. These commenters argued that the EPA should not revise the 5-year record requirement for the applicability determinations because the EPA has not provided a proper justification for adding this requirement for “reclassified” area sources. The commenter noted that the EPA has not described any issue with respect to compliance of PTE limits and emission-standard applicability that arose from the existing 5-year recordkeeping requirement, nor has the EPA explained why area source recordkeeping requirements should differ based on temporal considerations. The commenters noted that title V major sources are subject to a 5-year records requirement for all applicability

determinations used to support identification of applicable requirements and application of the title V permit shield, and this is consistent with the statute of limitations that generally allows only a 5-year period to enforce against alleged violations. The commenter argued that the EPA has not explained why area sources should be subject to more stringent recordkeeping requirements. These commenters stated that the change in the requirement would impose a burden on the facility without additional environmental protection, because 5 years is sufficient time considering that sources still need to report annually that they are in compliance. Some commenters also noted that if the EPA or an air pollution control agency has reason to doubt any source’s exempt status, they can take action under CAA sections 113 and 114 or state/local/tribal “Open Records” analogs to obtain the necessary information.

The EPA disagrees that the extended recordkeeping requirement as proposed applies disproportionately to reclassifying area sources or has any temporal consideration. The requirement to retain the applicability determination applies to all area sources that require an enforceable limitation on the source’s potential to emit to not be subject to a relevant standard or other requirement established pursuant to CAA section 112. The requirement for an applicability determination is only relevant to these sources; the applicability determination itself, rather than the recordkeeping requirement, is the determining factor. The extension of the recordkeeping requirement is in the best interest of the source relying on an applicability determination to avoid CAA section 112 major source requirements, as many sources will rely on such determination for an extended period of time that can last beyond the 5 years. The EPA disagrees with the commenters that the revised record retention requirements are unnecessary due to annual reporting requirements. While many sources may have annual or semiannual reporting requirements after reclassifying into an area source rule, there are some major source NESHAP that do not have a corresponding area source standard. For these sources, the retention of the applicability determination enables the source to easily demonstrate that the major source standard does not apply without the potential additional burden of re-creating the applicability determination. The EPA agrees with the commenter that the EPA under CAA sections 113 or 114, and air pollution control agencies

under their analogs, have the authority to request the necessary information; however, the retention of the applicability determination while the source continues to be an area source based upon that PTE limit and applicability determination provides a lesser burden to facilities compared to potentially re-creating the applicability determination. For the reasons presented above, the EPA is finalizing removing the time limit for record retention in 40 CFR 63.10(b)(3) and requiring that the records be maintained for as long as the source continues to be an area source based on PTE limitations.

Other commenters requested clarification as to whether the amended recordkeeping requirement applies to sources that became area sources prior to the first substantive compliance date of a NESHAP standard or that reclassified after the 2018 MM2A Memorandum. In the preamble of the MM2A proposal, the EPA stated that this amendment was directed to sources that obtain new enforceable PTE limits. The EPA agrees that the proposed language was unclear as to the applicability of the recordkeeping provisions on sources with applicability determinations preceding the date of proposal. We have amended the regulatory text in 40 CFR 63.10(b)(3) clarifying that the owner or operator must keep a record of the applicability determination on site at the source for a period of 5 years or until the source changes its operation to become an affected source subject to the relevant standard or other requirement established under this part, whichever comes first if the determination is made prior to January 19, 2021. For a determination made on or after January 19, 2021, the owner or operator must keep a record of the applicability determination until the source changes its operations to become an affected source subject to the relevant standard or other requirement established under this part. The EPA does, however, strongly recommend that all facilities retain their applicability determination for the time that the source continues to be an area source based upon that PTE limit and such applicability determination.

In addition to the removal of the time limit for record retention, the proposal amended the text that describes the record of the applicability determination. In particular, the proposal clarified that the record must include an “emissions” analysis (or other information) that demonstrates the owner or operator’s conclusion that the source is not subject to major source requirements. The analysis (or other

information) must be sufficiently detailed to allow the Administrator to make an “applicability” finding for the source with regard to the relevant standard or other requirements.

With regard to the analysis for applicability determinations, some commenters expressed concern with the language that the applicability determinations “should be performed in accordance with EPA guidance materials.” The commenters stated that the language is vague and could create binding requirements that are not legislative rules and have not gone through required notice-and-comment rulemaking. The commenter suggested that the EPA should indicate that this is a recommendation rather than a requirement by stating: “EPA recommends that the analysis be performed in accordance with EPA guidance materials” The EPA disagrees that further clarification is necessary regarding the use of guidance documents in this context, as the use of EPA guidance materials was an element of the existing provisions of 40 CFR 63.10(b)(3). However, to avoid creating the impression of additional requirements being imposed due to the proposed edits to the language, the EPA is retaining the sentence of 40 CFR 63.10(b)(3), which states: “If relevant, the analysis should be performed in accordance with EPA guidance materials published to assist sources in making applicability determinations under CAA section 112, if any,” as currently exists in the existing provision without finalizing the changes proposed to it.

The commenters also suggested that the EPA clarify the applicability determination analysis for specific situations, and others advised that additional guidance could be incorporated into the regulation or the preamble to the final rule to recognize that sources often need to use best engineering judgment to estimate emissions from minor sources when assessing the PTE of a whole facility. The commenters then recommended that the EPA indicate that the level of detail and precision for potential to emit calculations can be lower for operations that contribute a relatively small amount to total facility HAP emissions. The wording in the proposed amendments are intended to clarify and to promote better understanding of the current recordkeeping requirements. The EPA did not propose a new view on how to estimate PTE and, relatedly, on how to do major source applicability determinations. In section VII of this preamble, we include references to our PTE guidance that may be of help to

parties with questions about the EPA’s views on these issues.

The EPA also proposed to amend the recordkeeping requirements for records submitted through CEDRI by adding 40 CFR 63.10(g) to clarify that the records submitted through CEDRI may be maintained in electronic format. As proposed, this provision does not remove the requirement for facilities to make records, data, and reports available upon request by a delegated air agency or the EPA. We are not finalizing the proposed addition of 40 CFR 63.10(g) because the provision is redundant with 40 CFR 63.10(b)(1), which allows for storage of records on computer.

B. Amendments to Individual NESHAP General Provisions Applicability Tables

The EPA proposed to amend the General Provisions applicability tables contained within most subparts of 40 CFR part 63 to add a reference to a new reclassification provision contained in 40 CFR 63.1(c)(6) discussed in the section V.A of this preamble and add a reference to reflect the proposed CEDRI submission procedures of 40 CFR 63.9(k) discussed above in section V.A of this preamble. We are finalizing the amendments to the General Provisions applicability tables as proposed. Additionally, the EPA identified four subparts containing the General Provision applicability requirements which did not properly reference the notification provisions. These subparts are 40 CFR part 63 subparts G, H, II, and YY. Accordingly, we are also finalizing revisions to these applicability requirements of 40 CFR part 63 subparts G, H, II, and YY to account for the final amendments to the General Provisions as described above in section V.A.

C. Amendments to Individual NESHAP

At proposal, the EPA identified one general category of regulatory provisions in several NESHAP subparts that reflect the 1995 OIAI policy that requires revision pursuant to this action. This category of provisions addresses the date by which a major source can become an area source. We proposed to revise the following provisions: 40 CFR part 63, subpart QQQ at 63.1441; 40 CFR part 63, subpart QQQQQ at 63.9485; 40 CFR part 63, subpart RRRRR at 63.9581; and Table 2 of 40 CFR part 63, subpart WWW. We solicited comment on whether there are any other regulatory provisions in any of the individual subparts that include OIAI provisions that should be revised pursuant to this action. The EPA received comments regarding multiple provisions in 40 CFR part 63, subpart F

at 63.100(b)(4); subpart I at 63.190(b)(7); subpart HH at 63.760(a)(1); and subpart HHH at 63.1270. The EPA reviewed the provisions raised by commenters in these subparts and is including in this final rule revisions to the provisions in subpart HH at 63.760(a)(1) and subpart HHH at 63.1270(a). The EPA is not making changes with respect to the identified provisions in subparts F and I at 63.100(b)(4) and 63.190(b)(7). The EPA sees these provisions as expired exclusion provisions, not OIAI provisions, that do not prevent a source from reclassifying to area source status.

At proposal, we also identified several area source NESHAP containing notification provisions (*i.e.*, initial notification) applicable to existing sources for which the dates have passed. We proposed to amend the following area source NESHAP that contain notification requirements for existing sources with specific deadlines that are in the past: 40 CFR part 63, subpart HHHHHH at 63.11175; 40 CFR part 63, subpart XXXXXX at 63.11519; 40 CFR part 63, subpart YYYYYY at 63.11529; 40 CFR part 63, subpart AAAAAAA at 63.11564; 40 CFR part 63, subpart BBBBBBBB at 63.11585; 40 CFR part 63, subpart CCCCCC at 63.11603. Consistent with other area source NESHAP notification requirements, we proposed that, for an existing source that reclassifies from major to area source status, the notification shall be submitted no later than 120 calendar days after the source becomes subject to the relevant area source NESHAP requirements. Regarding whether there are any other individual subparts that would warrant modification because initial notification requirements are in the past, commenters pointed at the initial notification requirements in many of the major source NESHAP subparts. They stated that if an area source were to revert back to major source status, these initial notification requirements would have been in the past. The EPA reviewed the initial notification provisions of all NESHAP subparts and is including in this final rule amendments to the initial notification requirements within most NESHAP subparts to include additional language so that the notification shall be submitted no later than 120 calendar days after the source becomes subject to the relevant NESHAP requirements. The EPA is amending the initial notification requirements in the following subparts: 40 CFR part 63, subpart G at 63.151(b)(2) (i), (ii) and (iii); subpart H at 63.182(b)(2)(i), (ii), and (iii); subpart L at 63.311(a); subpart M at 63.324(g); subpart N at 63.347(c)(1); subpart Q at

63.405(a)(1) and (2); subpart S at 63.455(a); subpart T at 63.468(a), (b), (c), and (d); subpart Y at 63.567(b)(2) and (3); subpart DD at 63.697(a)(1); subpart EE Table 1; subpart HH at 63.77(c)(1); subpart JJ Table 1; subpart KK at 63.830(b)(1)(i), subpart CCC at 63.1163(a)(3); subpart PPP at 63.1434(d) and (e), and at 63.1439(e)(3)(ii)(B) and (C); subpart QQQ at 63.1454(b); subpart UUU at 63.1574(b); subpart VVV at 63.1591(a)(1) and (2); subpart DDDD at 63.2280(b); subpart EEEE at 63.2382(b)(1) and (2); subpart FFFF at 63.2515(b); subpart GGGG at 63.2860(a); subpart III at 63.3110(b); subpart JJJ at 63.3400(b)(1); subpart KKKK at 63.3510(b); subpart MMMM at 63.3910(b); subpart NNNN at 63.4110(a)(1); subpart OOOO at 63.4310(b); subpart PPPP at 63.4510(b); subpart QQQQ at 63.4710(b); subpart RRRR at 63.4910(b); subpart SSSS at 63.5180(b)(1); subpart TTTT at 63.5415(b); subpart UUUU, Table 7; subpart XXXX at 63.6009(b); subpart YYYY at 63.6145(b); subpart ZZZZ at 63.6645(b) and (d), subpart AAAAA at 63.7130(b) and (c); subpart BBBB at 63.7189(b); subpart CCCC at 63.7340; subpart DDDDD at 63.7545(b) and (c), subpart EEEEE at 63.7750(b); subpart FFFFF at 63.7840(b); subpart GGGGG at 63.7950(b) and (c); subpart HHHHH at 63.8070(b)(1); subpart IIII at 63.8252(b); subpart JJJJ, Table 8; subpart KKKKK, Table 9; subpart LLLLL at 63.8692(b), subpart MMMMM at 63.8816(b); subpart NNNNN at 63.9045(b), subpart PPPPP at 63.9345(b)(1); subpart QQQQQ at 63.9535(c); subpart RRRRR at 63.9640(b); subpart SSSSS at 63.9812(b); subpart TTTTT at 63.9930(b); subpart BBBBBB at 63.11086(e) and Table 3; subpart CCCCC at 63.11124(a)(1), (b)(1), and Table 3; subpart HHHHHH at 63.11175(a); subpart PPPPPP at 63.11425(b) and (c); subpart QQQQQQ at 63.11432(b) and (c); subpart RRRRRR at 63.11441(a); subpart TTTTTT at 63.11469(a); subpart WWWWWW at 63.11509(a)(3); subpart XXXXXX at 63.11519(a)(1); subpart YYYYYY at 63.11529(a); subpart AAAAAAA at 63.11564(a)(2); subpart BBBBBBBB at 63.11585(b)(1); and subpart CCCCCCCC at 63.11603(a)(1).

VI. Other Considerations

A. PTE Determination

In the MM2A proposal, the EPA included a background discussion associated with the HAP PTE determination. The discussion was intended to provide context for evaluating whether the EPA should include in the General Provisions to 40 CFR part 63 certain elements of the

Federal Minor New Source Review Program in Indian Country, which included application content requirements in those rules as well as the proposed hierarchy of acceptable data and methods a source seeking reclassification would use to calculate and determine the source PTE. We received many comments regarding PTE determinations, including suggestions for clarification on how to do these calculations, which are already addressed in guidance. See section VII of this preamble for additional information regarding implementation of PTE limits and the EPA guidance addressing related topics. Importantly, at this time, the EPA is not taking final action on whether to include in the General Provisions a hierarchy of data and methods for calculating PTE. The EPA will continue to evaluate whether there is a need to issue guidance or rulemaking for such hierarchy and methods in the future.

In the MM2A proposal, the EPA requested comments on whether it would be appropriate to include in the General Provisions of 40 CFR part 63 the minimum requirements for the information that a major source of HAP must submit to its regulatory authority when seeking to obtain PTE limitations to reclassify as area sources under section 112 of the CAA, similar to the information included in a synthetic minor source permit application under Tribal Minor New Source Review. Most of the industry and state commenters asserted that regulatory authorities should retain authority to determine what a major source must submit to reclassify. They argued that these requirements already exist in federal, state, and local rules, and asking state and local governments to add new regulatory requirements onto programs that already provide for the creation and enforcement of synthetic minor limits would be an unnecessarily burdensome administrative resource drain. The EPA agrees with commenters that the addition of minimum requirements for the information that a major source of HAP must submit to its regulatory authority when seeking to obtain PTE limitations to reclassify as area sources under section 112 of the CAA ignores that permitting authorities already have permit application requirements under their programs. Also, the EPA has reconsidered that permit application requirements for PTE programs would be more appropriate under 40 CFR part 63, subpart E and is not including such requirements in the final rule. See section VII of this preamble. This position does not, however, alter how

the EPA will apply the policy that the Agency has been following since 1995, which allows for any physical or operational limitation on the capacity of the stationary source to emit a pollutant (such as air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed), to be treated as part of its design if the limitation or the effect it would have on emissions is federally enforceable or legally enforceable by a state or local permitting authority and practicably enforceable.

B. Reclassification Process and Permitting

The proposal addressed questions from sources and permitting authorities regarding permit process, mechanisms, and the requirements for reclassifying to area source status for 40 CFR part 70 sources. These questions were brought to our attention per our request in the MM2A Memorandum about specific situations that may need to be considered at proposal. The purpose of the discussion was to inform stakeholders about our expectations on how the reclassification process will work in those specific circumstances. The EPA did not propose changes to any of the rules for the permitting programs or to their interpretation. Below, we clarify the related proposal preamble discussion, since it may have introduced ambiguity about our interpretation of the regulations.

Stakeholders asked the EPA to clarify whether a reclassified source continues to have an obligation to comply with the major source requirements in their title V permit that were included solely to comply with the OIAI policy. These scenarios consisted of sources that no longer have the maximum capacity to emit HAP in amounts that exceed major source thresholds because of physical or operational limitations but whose title V permit still includes major source NESHAP requirements. (Often, the operational limitations are enforceable limitations the source has taken to avoid major source requirements in the future, in agreement with the OIAI policy.) The proposal's preamble acknowledged that in that case the source is an area source under the CAA section 112 definition, but it still must comply with its title V permit terms and conditions until the permit is revised or revoked in agreement with the title V permitting authority that issued the permit. The proposal's preamble advised that sources must follow the permitting authority's procedures for permit modification or closure. We continue to stand by our view that the permitting

authority will be in the best position to help a source decide on the appropriate procedures under the specific program rules to reconcile permitting obligations.

The preamble illustrated, with examples, how situations may differ and that we expect those differences to require different procedures. The proposal concluded that in a hypothetical situation when the major source NESHAP permit terms are relied upon to demonstrate compliance with some other applicable requirement (e.g., in the case of streamlining the permit conditions), concurrently with their removal, the permitting authority may need to reevaluate the MRR for applicable requirements remaining in the permit and that the regulations in 40 CFR part 71 would require a significant modification to add these requirements to a title V permit. With regard to this advice, commenters argued that the EPA misspoke in the proposal as to the appropriate process for 40 CFR part 71 sources. The commenters argued that revising the 40 CFR part 71 permit to reflect a change in applicable requirements may not always require a significant modification to a title V permit, and the EPA provided no explanation in the proposal for this cursory conclusion relative to 40 CFR part 71. The EPA first clarifies that the explanation in the proposal about the procedures that apply to the changes in the scenarios presented reflect the EPA's current view regarding the 40 CFR part 71 permitting authority for a general case and does not imply that a particular situation may not merit a different treatment based on the facts and the 40 CFR part 71 regulations. The basis for the EPA conclusion in the preamble is that removing non-applicable NESHAP requirements would almost always involve significant changes to monitoring, recordkeeping, and/or reporting, and, thus, the modification would not qualify as a minor modification under 40 CFR 71.7(e)(1)(i)(2). This is especially true if revised monitoring requirements must be added to substitute for removed NESHAP monitoring requirements. However, we recognize that the procedures will generally depend on the program regulations and the facts of the situation. While the commenter does not provide a compelling argument to change our view on the permit modification procedures that would most likely apply for removing no-longer-applicable requirements from a 40 CFR part 71 permit, a source is free to show that in its situation the changes to existing monitoring, reporting, or recordkeeping, etc., due to the removal

of the no-longer-applicable requirements are not significant. Importantly, the EPA did not propose changes to, and this final rule does not make any changes to, the 40 CFR part 70 or 71 rules and is not prejudging any future proposed process for modifying any 40 CFR part 71 permits.

The EPA received multiple comments regarding the public notice and comment procedures associated with reclassification. As discussed below in section VII, the EPA is not taking action on the proposed effectiveness criteria for PTE limits at this time and is continuing to consider the comments received on this aspect of the MM2A proposal. The EPA intends to take final action on this aspect of the MM2A proposal in a separate final action at a later date. Notwithstanding this, on the issue of public notice and comment procedures currently in use for reclassifications, the EPA reiterates that, consistent with our long-standing policy, regulatory agencies implement public notice and comment procedures for state, local, and tribal programs as required under their regulations and statutes. The authority under which the PTE limits are issued contain issuance procedures, including any procedures for public notice and comment. Importantly, regulatory authorities use different issuing mechanisms depending on the complexity of the PTE limits required for the situation and the pollutants addressed. Typically, states issue enforceable PTE limits for individual sources in a SIP construction permit or a synthetic minor type of operating permit (e.g., operating permits other than title V permit). States can also utilize less burdensome mechanisms for limiting PTE, such as general permits for source categories, permits by rule, or registration programs, as appropriate. Regardless of the mechanism used to issue an enforceable PTE limit, the regulatory agency must follow the applicable procedures for that mechanism, including providing for public notice and comment when required.

Some commenters on the proposal asserted that the EPA had failed to analyze federalism implications of the proposal. According to the commenters, states also rely on title V permitting fees to support permitting, monitoring, and enforcement of title V sources, and the EPA had not considered how states will do so with the loss of title V funds since area sources are frequently exempted from title V. The commenters stated that the EPA had a duty to consult with state and local governments for proposed rules with federalism implications and substantial compliance costs. The EPA

disagrees that this action imposes substantial compliance costs to state and local governments. As the EPA explained in section IV of this preamble, the OIAI policy imposed a time constraint on the ability of a source to change its status for purposes of applicability with CAA section 112 standards that is not found in the statute. This action simply implements the plain language reading of the statutory definitions of major source and area source which contain no language fixing a source's status at any particular point in time and contain no language suggesting a cutoff date after which the source's status cannot change. This rule explains what sources must do if and when they elect to reclassify and does not change the standards established under CAA section 112 nor it changes the permitting authority programs that are used for processing reclassifications.

VII. Interim Ministerial Revision of 40 CFR Part 63 PTE Definition

The definition of PTE in 40 CFR 63.2 interprets the statutory term "potential to emit" found in the definition of a major source in section 112 of the CAA and provides a legal mechanism for sources that wish to restrain their emissions to avoid triggering major source requirements. Under the PTE definition in 40 CFR 63.2 promulgated in 1994, any physical or operational limitation on the capacity of the stationary source to emit a pollutant, including air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed, shall be treated as part of its design if the limitation or the effect it would have on emissions is federally enforceable.²¹ In *National Mining Association (NMA) v. EPA*, 59 F.3d 1351 (D.C. Cir. 1995), the D.C. Cir. remanded the definition of "potential to emit" found in 40 CFR 63.2 to the EPA to justify the requirement that physical or operational limits be "federally enforceable." The *NMA* decision confirmed that the EPA has an obligation to ensure that limits considered in determining a source's PTE are effective, but it stated that the Agency had not adequately explained how "federal enforceability" furthered effectiveness. 59 F.3d at 1363–1365.

In the MM2A proposal, the EPA proposed specific criteria that PTE limits must meet for these limits to be effective. The EPA also proposed to amend the definition of "potential to

²¹ See 40 CFR 63.2 definition of "federally enforceable" available at https://ecfr.io/Title-40/se40.11.63_12.

emit” in 40 CFR 63.2 accordingly by removing the requirement for federally enforceable PTE limits and requiring instead that HAP PTE limits meet the effectiveness criteria of being both legally enforceable and practicably enforceable. The EPA also proposed to amend 40 CFR 63.2 to include the definitions of “legally enforceable” and “practicably enforceable” described in the MM2A proposal. The EPA then took comment on the effectiveness criteria and the proposed amendments to 40 CFR 63.2.

The EPA received significant comments from many stakeholders on the proposed effectiveness criteria and proposed amendments to 40 CFR 63.2. One of the main concerns raised by stakeholders in their comments is the interactions and effects of the proposed amendments with other CAA programs, including prevention of significant deterioration (PSD), NSR, SIP, and title V, and the impacts of the proposed amendments to existing state, local, and tribal agency rules. The EPA is not taking action on the proposed amendments to 40 CFR 63.2 at this time and is continuing to consider the comments received on this aspect of the MM2A proposal. The EPA intends to take final action on this aspect of the MM2A proposal in a separate final action at a later date.

In the meantime, the EPA is making an interim ministerial revision to the definition of “potential to emit” in 40 CFR 63.2. Specifically, the Agency is removing the word “federally” from the phrase “federally enforceable” in the definition of “potential to emit.” A few points need to be made to explain what this interim ministerial revision is and what it is not. First, this revision is not the EPA’s final decision and should not be read to suggest that the EPA is leaning towards or away from any particular final action on this aspect of the proposal. This revision is simply an interim revision to cover the period of time while the EPA continues to consider the comments on this aspect of the proposal and until the Agency takes final action with respect to the proposed amendments concerning the proposed effectiveness criteria and proposed amendments to 40 CFR 63.2. Second, this revision is ministerial because it merely reflects the *NMA* decision, which held that the EPA had not explained why a PTE limit had to be “federally enforceable” to be considered as the basis for reclassifying a major source to area source status. See *NMA v. EPA*, 59 F.3d at 1363–1365.²² Again,

this revision does not represent a final decision by the EPA or signal any direction that the EPA is intending to take in a future final action. It simply makes a ministerial change to the regulatory text that appears in the CFR to reflect the *NMA* decision.

Further, this interim ministerial revision does not alter any rights or legal consequences and simply preserves the status quo that has been in effect since the late 1990s. This revision will not change how the EPA will apply the transitional policy that the Agency has been following since 1995. By removing the word “federally,” the EPA hopes to avoid any ongoing confusion about how the transitional policy is applied. This transitional policy allows for any physical or operational limitation on the capacity of the stationary source to emit a pollutant (such as air pollution control equipment and restrictions on hours of operation or on the type or amount of material combusted, stored, or processed) to be treated as part of its design if the limitation or the effect it would have on emissions is federally enforceable or legally enforceable by a state or local permitting authority and practicably enforceable.

For implementing reclassifications in the interim, state programs may use PTE guidance they have developed for their programs and/or may also continue to rely on the EPA PTE guidance. As noted in the proposal preamble, there is a substantial body of EPA guidance and administrative decisions relating to PTE and PTE limits.²³

and presented no additional legal analysis. In *Chemical Manufacturers Assoc. v. EPA*, 70 F.3d 637 (D.C. Cir. 1995), the D.C. Cir. reviewed a “federally enforceable” limitation in the PTE definition in the PSD and NSR regulations and both vacated and remanded the federal enforceability requirement in those provisions with a three sentence decision that provided no additional analysis and simply referenced the *NMA* decision: “Petitioners challenge regulations of the Environmental Protection Agency that define the term ‘potential to emit’ to exclude controls and limitations on a source’s maximum emissions capacity unless those controls are federally enforceable. We recently decided a similar challenge in *National Mining Association v. EPA*, 313 U.S. App. D.C. 363, 59 F.3d 1351 (D.C. Cir. 1995). Accordingly, it is *ordered and adjudged* that the regulations are vacated and the case is remanded to the Environmental Protection Agency for reconsideration in light of *National Mining Association*.” In *Clean Air Implementation Project v. EPA*, No 96–1224 1996 WL 393118 (D.C. Cir., Jun. 28, 1996) (CAIP), the D.C. Cir. also vacated and remanded the federal enforceability requirement in the title V (40 CFR part 70) regulations.

²³ There is a substantial body of EPA guidance and administrative decisions relating to PTE and PTE limits. E.g., see generally, Terrell E. Hunt and John S. Seitz, “Limiting Potential to Emit in New Source Permitting” (June 13, 1989); John S. Seitz, “Options for Limiting the Potential to Emit (PTE) of a Stationary Source Under Section 112 and Title V

VIII. Summary of Cost, Environmental, and Economic Impacts

In this section, the EPA summarizes the findings of several analyses that we conducted to assess the cost, environmental, and economic impacts of the final rule. It is important to restate that the final rule does not *require* any source to reclassify to area source status. Each source must assess its own circumstances to determine whether it is feasible and advantageous to undergo the reclassification process. The unique nature of each source’s decision process makes it difficult for the EPA to determine the number and type of sources that may choose to reclassify under this rule. Because of this, the EPA can only present illustrative analyses concerning the impacts of this final rule.

For the final rule analyses, based on comments received on the data used for the overall analyses for the MM2A proposal, the EPA updated the MM2A database, removed double counting of facilities, and expanded the number of source categories evaluated for cost, environmental, and economic impacts. The updated MM2A database contains data from the 2017 National Emissions Inventory (NEI), data collected to conduct residual risk and technology reviews (RTR) under sections 112(d)(6) and 112(f) of the CAA (henceforth referred to as RTR modeling file data), and data from the EPA’s Enforcement and Compliance History On-line (ECHO) database. The EPA used the RTR modeling file data and NEI data to estimate the number of facilities in each of 74 source categories and the number of sources within those facilities that could be eligible to reclassify from major to area source status. We used the ECHO data to estimate the number of facilities in 27 additional source categories for which we did not have RTR modeling file data, and we then used an extrapolation methodology to approximate the number of facilities within these 27 source categories that could be eligible to reclassify from major to area source status.²⁴

of the Clean Air Act” (January 25, 1995); Kathie Stein, “Guidance on Enforceability Requirements for Limiting Potential to Emit through SIP and § 112 Rules and General Permits” (January 25, 1995); John Seitz and Robert Van Heuvelen, “Release of Interim Policy on Federal Enforceability of Limitations on Potential to Emit” (January 22, 1996); “In the Matter of Orange Recycling and Ethanol Production Facility, Pencor-Masada Oxynol, LLC,” Order on Petition No. II–2001–05 (April 8, 2002) at 4–7.

²⁴ There are about 114 major source categories subject to NESHAP. The EPA determined that 13 source categories are not impacted by this rule and did not include these categories in the costs or impacts analyses. For the remaining categories, 74 were analyzed using RTR modeling file data while 27 were analyzed using an extrapolation approach.

²² The EPA notes that in two subsequent decisions, the D.C. Cir. relied on the *NMA* decision

As a result of updates to the MM2A database, the number of facilities estimated to be subject to major source NESHAP has been reduced from 7,920 at proposal to 7,187. The detailed methods applied to update the MM2A database and estimate the number of facilities subject to major source NESHAP for purposes of the final rule analyses are described in the TSM titled “*Documentation of the Data for Analytical Evaluations and Summary of Industries Potentially Impacted by the Final Rule titled Reclassification of Major Sources as Area Sources Under Section 112 of the Clean Air Act*,” which is included in the docket for this action.

A. Analytical Scenarios

The potential costs and cost savings presented in the final cost memorandum and RIA are the result of an illustrative assessment. It is unknown how many major sources would choose to take enforceable PTE limits to levels below the MST and reclassify to area source status. If a source voluntarily chooses to reclassify to area source status, it will no longer be subject to previously applicable major source NESHAP, which may result in compliance cost savings for the source. However, the source will be required to comply with any applicable area source NESHAP in response to reclassification, which could result in some compliance costs. Facilities will also have costs associated with applying to modify the facility’s operating permit when they reclassify from major to area source status. Regulatory agencies will also have costs to process those applications. Overall, the sum of costs and cost savings of all actions taken to reclassify under this rule is expected to be a net annual cost savings.

To illustrate the potential emissions changes, costs, and economic impacts of the final rule, we analyzed the same three illustrative analytical scenarios as at proposal. The primary analytical scenario analyzes the sources with actual emissions below 75 percent of the MST (7.5 tpy of a single HAP or 18.75 tpy of all combined HAP). Alternative scenario 1 analyzes facilities with actual emissions below 50 percent of the MST (5 tpy for a single HAP and 12.5 tpy for all HAP). Alternative scenario 2 analyzes sources with actual emissions between 75 percent and 125 percent of the MST (12.5 tpy for a single HAP and 31.25 tpy for all HAP).

The primary analytical scenario considers that sources will normally build a compliance margin into their operations to ensure that their emissions remain below the MST and they do not

revert to major source status. Some commenters suggested that the EPA should conduct its analyses based on the assumption that all sources will emit up to the MST, or the Agency should analyze a scenario with a smaller compliance margin (*i.e.*, at 90 percent of the MST). The appropriate compliance margin to apply is specific to each facility and its operating experience. Some reclassified sources may choose to operate 10 percent below the MST while others may choose to maintain a larger compliance margin to ensure they do not jeopardize their area source status. In addition, some facilities operating slightly above the MST may opt for reclassification to area source status by taking PTE limitations and reducing emissions to a level below the MST. Therefore, we provide illustrative analyses of potential changes in costs and emissions at various compliance margins. The level of actual emissions relative to the MST at which facilities may consider participating in the MM2A reclassification process is actually a continuous line from some level below the MST to a reasonable level above the MST, and our illustrative analyses include three points on this continuous line to estimate the potential impacts of different compliance margins on participation under this final rule. In this section, we present the primary illustrative scenario and two alternative scenarios, one above and one below the primary scenario.

While different compliance margins could be evaluated, the EPA has greater confidence in the primary illustrative scenario where sources at or below 75 percent of the MST can maintain emissions below the MST and thus may be more likely to opt for reclassification. Sources in the MM2A database operating between 50 and 75 percent of the MST, and those operating between 75 and 125 percent of the MST, are also addressed in our analyses, in the first and second alternative scenarios, respectively. These alternative scenarios address the impacts of sources at alternative compliance margins as suggested by commenters. In addition to these analytical scenarios, the updates to the MM2A database detailed in the TSM titled “*Documentation of the Data for Analytical Evaluations and Summary of Industries Potentially Impacted by the Final Rule titled Reclassification of Major Sources as Area Sources Under Section 112 of the Clean Air Act*” presents the incremental count of facilities at 90 and 100 percent of the MST to illustrate a comparison of the difference between the number of

facilities in the database operating in the primary scenario and these alternative views suggested by commenters.²⁵

B. Cost Analysis

For the illustrative cost analysis conducted for the final rule, the EPA analyzed: (1) Facilities with actual emissions below each analytical threshold, (2) the costs that we estimated to be incurred by the facilities associated with permitting actions necessary to obtain area source status, (3) the costs that we estimated to be incurred by permitting authorities associated with permitting actions necessary to process permit applications for facilities requesting reclassification, and (4) cost-savings estimates based solely on estimated reductions in labor burden related to MRR requirements that would either no longer apply or would change based on the specific requirements in the major source NESHAP rules and any area source NESHAP rules that apply to a particular source category. As part of the overall analysis of the 125-percent alternative scenario, we examined the potential control costs for major sources in eight source categories that may opt to further reduce HAP emissions in order to reclassify to area source status. Details of this potential control cost analysis are presented in the TSM titled “*Analysis of Illustrative 125% Scenario for MM2A Final—Potential Cost Impacts from HAP Major Sources Reducing Emissions as part of Reclassifying to HAP Area Sources*” which is available in the docket for this action. The details of the cost analysis are presented in the TSM titled “*Documentation of the Compliance Cost Savings Analysis for the Final Rulemaking Reclassification of Major Sources as Area Sources Under Section 112 of the Clean Air Act*” and also are summarized in the RIA. All of these documents are available in the docket for this action.

The illustrative cost analysis presents estimates of the final rule’s net costs (or savings) over two time periods. The first estimate assumes that all potential reclassifications that might occur as a result of this rulemaking with take place within 1 year of promulgation (*i.e.*, by 2021). The second estimate assumes that not all the reclassifications will occur within 1 year after the MM2A rule is finalized, and instead are assumed to occur over a more extended period of time.

²⁵ See the Response to Comments document for a detailed rationale for the selection of analytical scenarios for the final rule and the EPA’s reasoning for not evaluating impacts at 90 percent of the MST.

For the first illustrative cost analysis, Year 1 costs include the cost for each facility to apply for and obtain an area source or synthetic minor permit or a title V permit modification and for the regulatory agencies to review and approve those applications and issue the permits. These permitting costs to the facilities and state agencies are one-time costs and occur only in Year 1 when a facility reclassifies. Then, in Year 2 and beyond, facilities do not incur the cost to process a reclassification and the net costs (or savings) are the sum of the projected annual cost savings from not having to comply with the major source NESHAP MRR requirements and the estimated cost of compliance with applicable area source NESHAP requirements. These projected savings are expected to continue for each reclassified facility each year beyond the second year, for there is no time specified for review of

reclassifications under the CAA. The permitting costs to the facilities and the permitting costs to the regulatory agencies are not included in the second year because it is assumed the permitting changes are all completed in the year the source submits an application for reclassification and no action is needed in subsequent years in relation to this action.

However, based on the number of potential reclassifications discussed in this analysis, we can confidently conclude that not all of the reclassifications will occur in the first year after the rule is issued. The timing of a reclassification is influenced by several considerations, including time for facilities to determine whether it is in their best interest to reclassify, time to prepare applications for reclassification, and time for permitting authorities to review applications and process reclassification requests. There

is also time allotted for the EPA to review determinations by permitting authorities and for public participation in the process. Therefore, it is reasonable to assume that not all the reclassifications will occur within 1 year after the MM2A rule is finalized, and instead the reclassifications assessed in the cost analysis are assumed to occur over a more extended period of time. To illustrate the spread of costs over time, the EPA also presents a 5-year outlook of costs and cost savings.

A summary of the results of the potential costs and cost savings across different types of source categories from the illustrative cost analysis for Year 1 and Year 2 and beyond is presented in Table 2. Results are presented for the 74 source categories evaluated using RTR modeling data and the 27 source categories that were evaluated using the extrapolation approach.

TABLE 2—ILLUSTRATIVE NET COSTS (OR COST SAVINGS) OF FINAL MM2A RULE FOR THE PRIMARY ANALYTICAL SCENARIO

Source category coverage	Total number of facilities subject to major source NESHAP	Facilities with actual emissions below 75 percent of the MST ¹	Potential net annual costs (or cost savings) in 2017\$ for Year 1 ^{2,4} and Year 2 ^{3,4} and beyond
Source categories with RTR data (74 categories)	4,068	1,614	\$10,147,526 (56,137,515)
Extrapolated source categories (24 categories) ⁵	1,294	266	1,680,049 (9,030,684)
Industrial, commercial, and institutional boilers and process heaters (3 categories) ⁵	1,821	687	4,319,300 (25,456,533)
Total (101 source categories)	7,183	2,567	16,146,875 (90,624,732)

¹ Results are for sources with actual emissions below 75 percent of the MST (*i.e.*, 7.5 tpy for one HAP and 18.75 tpy for combined HAP).

² Costs incurred by sources and permitting authority assumed in year 1.

³ Year 2 impacts are also representative of annual impacts to all reclassified major sources in all subsequent years in the future. Numbers in parenthesis are negative and reflect cost savings.

⁴ The analytic timeline begins in 2021 and continues thereafter for an indefinite period. Year 1 impacts are those for 1 year after reclassification of a major source with reclassifications beginning in 2021, and year 2 impacts are those for the second year after reclassification of a major source and annually afterwards.

⁵ Extrapolated using the EPA's ECHO data.

Table 3 presents the illustrative potential cost (or cost savings) impact of the final rule over time for the primary

analytical scenario. We present the impacts over a 5-year outlook that assumes all sources in our analysis will

reclassify over that timeframe and that the reclassifications will be evenly distributed over that period.

TABLE 3—ILLUSTRATIVE NET COSTS (OR COST SAVINGS) OF THE FINAL MM2A RULE OVER TIME FOR THE PRIMARY ANALYTICAL SCENARIO *

Source category coverage	Distribution of costs (or cost savings) over a 5-year period (\$2017)				
	2021	2022	2023	2024	2025+
Source categories with RTR data (74 categories)	\$2,536,882	\$(11,497,497)	\$(25,531,875)	\$(39,566,254)	\$(56,137,515)
Extrapolated Source Categories (24 categories)	420,012	(1,837,658)	(4,095,329)	(6,353,000)	(9,030,684)

TABLE 3—ILLUSTRATIVE NET COSTS (OR COST SAVINGS) OF THE FINAL MM2A RULE OVER TIME FOR THE PRIMARY ANALYTICAL SCENARIO *—Continued

Source category coverage	Distribution of costs (or cost savings) over a 5-year period (\$2017)				
	2021	2022	2023	2024	2025+
Industrial, Commercial, and Institutional Boilers and Process Heaters (3 categories)	1,079,825	(5,284,308)	(11,648,441)	(18,012,574)	(25,456,533)
Total (101 Source categories)	4,036,719	(18,619,464)	(41,275,647)	(63,931,830)	(90,624,732)

* These results reflect the aggregate of costs and cost savings for all facilities by year of impact. Estimates for 2025 are also representative of all subsequent years.

The EPA also calculated the PV of the illustrative cost savings for the main illustrative scenario. The PV is the value of a stream of impacts over time, discounted to the current (or nearly current) year. The PV of the cost savings for the primary illustrative scenario is \$0.86 billion (in 2017 dollars) at a discount rate of 7 percent, which is discounted to 2020. At a discount rate of 3 percent, the PV is \$1.50 billion (in 2017 dollars), again discounted to 2020. Another measure of the annual cost savings to complement the estimates in Table 2 is the EAV. This annual impact estimate is calculated consistent with the PV. The EAV is \$67 million (2017 dollars) at a 7-percent discount rate for the primary scenario. At a 3-percent discount rate, the EAV is \$75 million (2017 dollars). The PVs and EAVs for each alternative scenario and discount rate in 2017 and 2016 dollars can be found in the RIA for the final rule.

C. Environmental Analysis

At proposal, to assess the potential environmental emissions impacts associated with the reclassification of sources, the EPA reviewed permits and other information for 34 sources that had reclassified to area source status consistent with the EPA's plain language reading of the CAA section 112 definitions of "major" and "area" source since January 2018. The review of these reclassifications provided a representation of the potential real-world impacts on emissions by looking at the facts and circumstances of actual reclassification actions. In addition to the evaluation of the reclassification actions, at proposal the EPA also performed an illustrative assessment for six source categories: Wood Furniture Manufacturing Operations, Surface Coating of Metal Cans, Surface Coating of Miscellaneous Metal Parts and Products, Wet-Formed Fiberglass Mat Production, Hydrochloric Acid Production, and Non-Gasoline Organic Liquids Distribution. The analysis of these six source categories was

informative in some respects but was only illustrative and speculative in nature and only presented a range of possible outcomes dependent on the assumptions that we made in the assessment. The EPA received numerous comments on the emissions analyses presented at proposal. Many commenters argued that the EPA had failed to adequately assess the effects of the rule on HAP emissions and did not perform any health impact analysis. These commenters argued the EPA did not include enough source categories in the emissions analysis at proposal to draw reasonable conclusions. Commenters also opined that the analysis of the actual reclassifications relied on a small sample, and a few speculated that we had "cherry picked" permits to review.

For the final rule, the EPA expanded the emissions impact analysis in several ways to address these comments. We enhanced the MM2A database to include more source categories with detailed data and improved the methodology for analysis based on public comments. We also expanded the review of reclassification actions to include the review of 35 additional reclassifications received from March 2019 through February 2020.²⁶ This allowed us to more than double the number of reclassifications reviewed for the final rule. The details and results of the analysis of 69 reclassification actions are summarized below and presented in detail in the Review of Reclassification Actions TSM for the final rule, which is available in the docket for this action.²⁷ The EPA received several comments on the permit reviews completed for the proposal; we have considered the input

²⁶ The EPA obtained information about these reclassifications through the normal course of business with the permitting authorities that notify us of permitting actions within their jurisdictions.

²⁷ See TSM titled "Review of Reclassification Actions for the Final Rulemaking 'Reclassification of Major Sources as Area Sources under Section 112 of the Clean Air Act'" available in the docket of this rulemaking.

from commenters in the review of the reclassifications included in the final analysis. Finally, we also expanded the illustrative analysis of impacts on the program from the six source categories reviewed at proposal to 72 source categories. The 72 source categories included in the illustrative analysis represent a broad array of the sources subject to major source NESHAP requirements and the types of sources that could seek reclassification to area source status under this final rule. We discuss the reclassification actions reviewed and the illustrative analyses of source categories in detail below. Our analysis indicates that 68 of the 69 sources that have reclassified will not increase emissions. In addition to this review of actual reclassification actions, the EPA also prepared an illustrative analysis for 72 source categories in the major source NESHAP program (114 total) to evaluate the potential emissions impacts. After consideration of the information and data available for the illustrative emissions analysis, we found that 65 source categories will not change emissions as a result of the rule. For the other seven source categories, there was a potential for (but not a certainty of) emissions increases based on conservative assumptions that are likely to overstate the change in emissions at some facilities. As is discussed throughout this preamble and in the TSMs and RIA, any analysis of impacts includes uncertainties, and each subsequent level of analysis compounds the uncertainties to a much greater level. Given the compounding of uncertainty and illustrative nature of the analysis, further quantification of effects of these emissions increases would not be reliable or informative. Instead, we present a qualitative discussion of benefits and disbenefits in the *benefits/disbenefits* subsection of impacts below. Further information of the analyses and findings are presented below.

To assess the potential for emissions impacts for the 69 reclassified sources, the EPA focused its review on the

enforceable conditions associated with the PTE limitations applicable to the emission units previously subject to major source NESHAP requirements. The EPA review focused on whether these emission units at these facilities continue to have enforceable conditions that are either the same as or consistent with the previous applicable major source NESHAP compliance obligations. Summaries of the permit reviews and emissions evaluations are presented in the Review of Reclassification Actions TSM, which is available in the docket for this action.

The EPA's findings from its review of permits for the reclassifications indicate that of the 69 sources that reclassified to area source status, 68 achieved and maintain area source status by operating the emission controls or continuing to implement the practices they used to comply with the major source NESHAP requirements; we expect no emissions increases due to reclassification for these sources. While permitting authorities could allow for changes in the enforceable conditions or practices that the sources used to comply with major source NESHAP requirements that could lead to emissions increases, this happened for only one source out of the 69 actual reclassifications. Below is an overview of the EPA's findings from the permit reviews for these 69 reclassifications.²⁸

Of the 69 sources that have reclassified, 45 sources are in a coating type source category; 11 are chemical sources; six are fuel combustion/boiler sources; five are oil and gas sources and two are heavy industry sources. (See Tables 3 and 4 of Review of Reclassification Actions TSM available in the docket for this action). Of the 69 reclassifications reviewed, 14 sources are classified as true area sources because these sources are no longer physically or operationally able to emit HAP above the MST. Of the 55 sources with enforceable PTE limitations, 15

sources had obtained those enforceable PTE limitations before January 2018 (pre-existing PTE limitations) while 40 obtained the PTE limitations after January 2018 in order to reclassify to area source status (new PTE limitations).

Of the 45 coating sources reviewed, 39 used compliant materials (low-HAP/no-HAP) to meet applicable major source requirements before reclassification, and their continued use of compliant materials is an enforceable condition after reclassification. Five sources relied on the use of regenerative thermal oxidizers (RTOs) to meet applicable major source requirements and maintain enforceable conditions requiring the operation of the RTOs after reclassification. As described in detail in the TSM, the EPA does not expect emissions increases from these sources due to reclassification to area source status. Finally, one source used compliant materials to meet applicable major source requirements, but after reclassification requested a change to use a HAP-containing formulation with accompanying process limitations to maintain area source status. Had the change in formulation happened while the source was a major source, the source would have had to use an add-on control device to comply with the applicable NESHAP. For this source, the change in formulation after reclassification could lead to emissions increases of 4.3 tpy of xylene or 18.75 tpy of combined HAP.

Of the 11 chemical sources reviewed, four sources are miscellaneous organic chemical manufacturing facilities; these relied on a variety of control technologies (including RTOs, scrubbers, and flares) and work practices to maintain compliance before reclassifying and continue to have enforceable conditions requiring the control technologies after reclassification. Three sources are gasoline distribution sources that relied on vapor collection and vapor flare/vapor combustion to meet applicable major source requirements before reclassification, and these controls are enforceable conditions to maintain compliance after reclassification. Three sources are off-site waste recovery facilities that relied on control technologies such as vapor balance/recovery systems, condensers, and scrubbers to meet applicable major source requirements before reclassification. All these sources continue to rely on the same (or additional) requirements as enforceable conditions to maintain compliance after reclassification and the EPA does not expect emissions increases due to

reclassification to area source status. Finally, one source is a former hazardous waste combustor and cement facility that until 2015 fueled its cement kiln using collected hazardous and non-hazardous waste, using various control technologies to maintain compliance. This facility permanently removed all equipment associated with Portland cement manufacturing and took on a new primary role as a hazardous waste storage/transfer facility, using throughput limits and a carbon adsorption system to maintain compliance.

Of the six combustion/boiler sources reviewed, four made permanent operational changes (ceased combustion of coal and/or ceased operation of boilers) allowing the sources to reclassify to area source status. Another source had material and operational limitations prior to reclassification, both of which continue to be enforceable conditions after reclassification, and one source took additional operational restrictions on the usage of natural gas as the mechanism to constrain their emissions and PTE and reclassify to area source status. Three of these sources had emissions above MST before reclassifying; the reclassification of these three sources resulted in a HAP reduction of 56.9 tpy single HAP and 78.8 tpy total HAP.

All five oil and gas production and transmission sources reviewed relied on the use of control technologies (oxidation catalyst [enclosed combustion device] and flares) to meet applicable major source requirements before reclassification, and their continued use is an enforceable condition to maintain compliance after reclassification. One of these sources took additional restrictions on the amount of gas vented to the atmosphere to reclassify to area source status. Also, the reclassification of this facility prevented additional emissions that would have occurred if the source had remained a major source. As described in detail in the TSM, the EPA does not expect emissions increases from these sources due to reclassification to area source status.

Of the two heavy industry sources reviewed, one is a lime manufacturing plant and the other is a flexible polyurethane foam fabrication facility. The lime manufacturing facility, after reclassification, remains subject to other regulatory requirements, including PM emission limitations, the use of a baghouse, and monitored opacity as an operating limit via operation of a continuous opacity monitoring system. The flexible polyurethane foam fabrication facility relied on compliant

²⁸ The analysis of the actual reclassifications includes representation of some of the source categories subject to major source NESHAP requirements. While the actual reclassifications demonstrate a cross-section of the types of industries that have reclassified, we are unable to determine if this cross-section of industries is representative of all types of sources that may seek reclassification in the future. The illustrative emissions analysis includes a broader selection of source categories across similar sectors of the economy as these actual reclassifications (*i.e.*, chemical, energy, combustion, coatings, and heavy industry/manufacturing). While the illustrative analysis is representative with respect to a broader selection of industries in the major source program, we are unable to definitively determine whether the sources within those categories will seek reclassification. Thus, we cannot make a determination of the representativeness of the actual reclassifications.

materials, control technology (carbon adsorption systems), work practices, and operational limitations to meet applicable major source standards before reclassification and continues to rely on these as enforceable conditions to maintain compliance after reclassification. See the Review of Reclassification Actions TSM available in the docket for the detailed permit reviews and emissions evaluations.

In response to comments, for the final rule's illustrative emissions impact analysis, we have also updated the assessment conducted at proposal for six source categories and expanded our assessment to numerous additional source categories. We identified several source categories that are unlikely to experience a change in emissions as a result of MM2A. We also conducted an in-depth analysis of potential changes in emissions upon reclassification for many source categories where we have information. We also reviewed the updated operating permits for a variety of industrial processes to interpret likely response to the final MM2A rule. The details and results of the emissions analysis are summarized below and presented in detail in the illustrative emissions impact analysis TSM titled, "*Documentation of the Emissions Analysis for the Final Rule Reclassification of Major Sources as Area Sources Under Section 112 of the Clean Air Act*," which is available in the docket for this action.²⁹

The EPA considered many factors in assessing the potential emissions impacts from the various NESHAP source categories if facilities in these source categories were to reclassify to area source status. These factors include backstop measures from regulatory and technological limits, as well as limitations on growth for economic reasons. As for regulatory reasons, the EPA assessed, if sources were to reclassify, whether they would be subject to the same NESHAP requirements as before reclassification (which would be the case where the area source requirements are the same as the major source requirements), whether new area source NESHAP requirements will be applicable and how they impact emissions, whether there are NSPS requirements that apply to the source and control emissions at the same levels as the major source NESHAP requirements, and whether there are PSD/NSR/SIP requirements the effect of which will continue to control

HAP emissions to the same extent. As for the technological and economic reasons, the EPA reviewed whether the measures used by the source to reduce emissions could be reversed or discontinued if sources were to reclassify to area source status. This includes, but is not limited to, changes in coating/adhesive formulations, fuel combustion technologies, and some level of backstop for emissions from add-on control technologies. Commenters stated that there are also other factors that will prevent emissions increases, including environmental management systems with which sources are engaged that require them to identify environmental impacts, set performance objectives, implement of standards for training and work practices, audit implementation of such standards, and take corrective action when deviations occur. Other commenters also mentioned that many sources are also required to meet Leadership in Energy and Environmental Design standards that incentivize efficient operations to minimize waste and energy usage, Occupational Safety and Health Administration requirements that protect workers from exposures to HAP and other pollutants, and toxics release inventory requirements. The commenters pointed out that these regulatory requirements continue to apply even if the source reclassifies, providing additional incentives for sources to not increase emissions. The EPA agrees with the commenters in that environmental management systems, even though they are voluntary and not regulatory in nature, will also provide additional incentive for some sources to maintain compliance with environmental legal obligations and not increase emissions.

Based on the EPA's illustrative analysis of potential emissions impacts from the 72 source categories, 65 source categories will either not be impacted by MM2A or are unlikely to experience any emissions changes for the reasons discussed in the above paragraph. After considering the information available for this illustrative analysis, we found that some facilities in seven source categories represented by detailed information from RTR modeling files in the MM2A database could increase emissions if they were to reclassify and were allowed to reduce operation of adjustable add-on controls. These facilities represent 7.9 percent of the facilities illustrated in the primary analytical scenario (*i.e.*, 128 facilities out of a total of 1,614 facilities in the primary analytical scenario), and 3.1

percent of all the facilities included in the analysis of the 72 source categories (*i.e.*, 128 facilities out of a total of 4,068 facilities operating in 72 source categories). Several of the source categories have only one or two facilities impacted, while three source categories have several facilities impacted. The facilities that we were able to assess are located in several states and are not clustered in close proximity to each other. The EPA was unable to evaluate the source categories included in the extrapolated approach used for the cost assessment due to insufficient information. Under alternative scenario 2, we determined that some facilities operating between 75 and 125 percent of the MST might opt to decrease emissions to reclassify to area source status as a result of the MM2A rule.

The EPA made several conservative assumptions when estimating the potential effect on emissions resulting from sources reclassifying from area to major source status. By "conservative," we mean that these assumptions are likely to result in an overestimate of emissions changes. We detail these assumptions in the TSM referenced above.³⁰ Based on these conservative assumptions, the potential change in emissions in the illustrative analyses for seven source categories could be an increase ranging from 919 tpy to 956 tpy of HAP across the NESHAP program under the primary scenario.³¹ In
