**SUPPLEMENTARY INFORMATION:** On September 22, 2020 (85 FR 59395), the NRC published a direct final rule amending its regulations in part 72 of title 10 of the *Code of Federal Regulations* to revise the NAC International, Inc. MAGNASTOR® Storage System listing within the "List of approved spent fuel storage casks" to include Amendment No. 9 to Certificate of Compliance No. 1031. Amendment No. 9 revises the certificate of compliance to add a new concrete storage overpack; four new heat load zone patterns and their associated decay heats that are specific to Babcock and Wilcox 15x15 fuel assemblies; a new Babcock & Wilcox 15x15 hybrid fuel assembly type (BW15H5); and a new maximum enrichment for the BW15H2 hybrid fuel assembly, including a new minimum soluble boron concentration

during loading and unloading operations and neutron absorber areal density. In addition, Amendment No. 9 makes non-technical changes to reorganize Appendix B of the technical specifications.

In the direct final rule published on September 22, 2020, the NRC stated that if no significant adverse comments were received, the direct final rule would become effective on December 7, 2020. The NRC received and docketed two comments on the companion proposed rule (85 FR 59447; September 22, 2020). Electronic copies of the comments can be obtained from the Federal Rulemaking website at <https://www.regulations.gov> under Docket ID NRC-2020-0166 and are also available in ADAMS under Accession Nos. ML20295A201 and ML20300A482, respectively.

The NRC evaluated the comments against the criteria described in the direct final rule and determined that the comments were not significant and adverse. Specifically, the comments were outside the scope of this rulemaking, did not oppose the rule, or did not propose a change to the rule, such that the rule would be ineffective or unacceptable without a change. Therefore, the direct final rule will become effective as scheduled.

Dated: November 13, 2020.

For the Nuclear Regulatory Commission.
