November 10, 2020.

The Federal Communications Commission held an Open Meeting on the subjects listed below on Wednesday, November 18, 2020, at 10:30 a.m. Due to the current COVID-19 pandemic and related agency telework and headquarters access policies, this meeting was in a wholly electronic format and was open to the public on the internet via live feed from the FCC's web page at www.fcc.gov/live and on the FCC's YouTube channel.

Item No.	Bureau	Subject
1	OFFICE OF ENGINEERING AND TECHNOLOGY.	TITLE: Modernizing the 5.9 GHz Band (ET Docket No. 19-138). SUMMARY: The Commission considered a First Report and Order, Further Notice of Proposed Rulemaking, and Order of Proposed Modification that would adopt rules to repurpose 45 megahertz of spectrum in the 5.850-5.895 GHz band for unlicensed operations, retain 30 megahertz of spectrum in the 5.895-5.925 GHz band for the Intelligent Transportation Systems (ITS) service, and require the transition of the ITS radio service standard from Dedicated Short-Range Communications technology to Cellular Vehicle-to-Everything technology.
2	INTERNATIONAL	TITLE: Further Streamlining of Satellite Regulations (IB Docket No. 18-314). SUMMARY: The Commission considered a Report and Order that would streamline its satellite licensing rules by creating an optional framework for authorizing space stations and blanket-licensed earth stations through a unified license.
3	INTERNATIONAL	TITLE: Facilitating Next Generation Fixed-Satellite Services in the 17 GHz Band (IB Docket No. 20-330). SUMMARY: The Commission considered a Notice of Proposed Rulemaking that would propose to add a new allocation in the 17.3-17.8 GHz band for Fixed-Satellite Service space-to-Earth downlinks and to adopt associated technical rules.

TITLE: Telecommunications Relay Services and Speech-to-Speech Services for Individuals with Hearing and Speech Disabilities (CG Docket No. 03-123); Structure and Practices of the Video Relay Service Program (CG Docket No. 10-51); and Misuse of Internet Protocol Relay Service (CG Docket No. 12-38). SUMMARY: The Commission considered a Notice of Proposed Rulemaking that would propose expansion of the Telecommunications Relay Services (TRS) Fund contribution base for supporting Video Relay Service (VRS) and Internet Protocol Relay Service (IP Relay) to include intrastate telecommunications revenue, as a way of strengthening the funding base for these forms of TRS and making it more equitable without increasing the size of the Fund itself.

Nature and Extent of Confidentiality: There is no need for confidentiality with this collection of information.

Privacy Act Impact Assessment: No impact(s).

Needs and Uses: On October 27, 2020, the Commission released the *All-Digital AM Broadcasting Report and Order*, FCC 20–154, MB Dkts. 19–311, 13–249, where it adopts rules to allow AM radio stations, on a voluntary basis, to broadcast an all-digital signal using the HD radio in-band on-channel (IBOC) mode name MA3. This action benefits AM stations and their listeners by improving reception quality and listenable signal coverage in stations' service areas and by advancing the Commission's goal of improving the AM service, thereby helping to ensure the future of the service. AM broadcast station licensees are required to notify the Commission of a change to all-digital operations using Digital Notification Form, FCC Form 335–AM.

Specifically pertaining to this Information Collection, in the *All-Digital AM Broadcasting Report and Order*, the Commission requires AM broadcast stations to electronically file a digital notification using the existing

FCC Form 335–AM Digital Notification (or any successor notification form) to notify the Commission of the following changes: (1) The commencement of new all-digital operation; (2) an increase in nominal power of an all-digital AM station; or (3) a transition from core-only to enhanced operating mode. Although we direct broadcasters to use the current Form 335–AM for all-digital notifications, additional information is required for notification of AM all-digital operations specifically. Therefore, until the Form 335–AM is updated to display the new all-digital operation requirements, we direct filers to select “N/A” as appropriate within the form and submit an attachment containing the following information. These new all-digital AM notification requirements have been added to new section 73.406 of the Commission's rules.

(a) The type of notification (all-digital notification, increase in nominal power, reduction in nominal power, transition from core-only to enhanced, transition from enhanced to core-only, reversion from all-digital to hybrid or analog operation);

(b) the date that new or modified all-digital operation will commence or has ceased;

(c) a certification that the all-digital operations will conform to the relevant nominal power and spectral emissions limits;

(d) the nominal power of the all-digital station;

(e) a certification that the all-digital station complies with all EAS requirements; and

(f) if a notification of commencement of new all-digital service or a nominal power change, whether the station is operating in core-only or enhanced mode.

The *All-Digital AM Broadcasting Report and Order* also revises and reorganizes the digital notification requirements formally contained in section 73.404(e) of the rules by removing paragraph 73.404(e) and adding new section 73.406 Notification.

The Notification Requirements Contained Under 47 CFR 73.406 Are as Follows

Hybrid AM and FM licensees must electronically file a digital notification to the Commission in Washington, DC, within 10 days of commencing IBOC digital operation. All-digital licensees must file a digital notification within 10 days of the following changes: (1) Any reduction in nominal power of an all-digital AM station; (2) a transition from enhanced to core-only operating mode; or (3) a reversion from all-digital to
