

hybrid or analog operation. All-digital licensees will not be permitted to commence operation sooner than 30 calendar days from public notice of digital notification of the following changes: (1) The commencement of new all-digital operation; (2) an increase in nominal power of an all-digital AM station; or (2) a transition from core-only to enhanced operating mode.

(a) Every digital notification must include the following information:

(1) The call sign and facility identification number of the station;

(2) If applicable, the date on which the new or modified IBOC operation commenced or ceased;

(3) The name and telephone number of a technical representative the Commission can call in the event of interference;

(4) A certification that the operation will not cause human exposure to levels of radio frequency radiation in excess of the limits specified in § 1.1310 of this chapter and is therefore categorically excluded from environmental processing pursuant to § 1.1306(b) of this chapter. Any station that cannot certify compliance must submit an environmental assessment ("EA") pursuant to § 1.1311 of this chapter and may not commence IBOC operation until such EA is ruled upon by the Commission.

(b) Each AM digital notification must also include the following information:

(1) A certification that the IBOC DAB facilities conform to applicable nominal power limits and emissions mask limits;

(2) The nominal power of the station; if separate analog and digital transmitters are used, the nominal power for each transmitter;

(3) If applicable, the amount of any reduction in an AM station's digital carriers;

(4) For all-digital stations, the type of notification (all-digital notification, increase in nominal power, reduction in nominal power, transition from core-only to enhanced, transition from enhanced to core-only, reversion from all-digital to hybrid or analog operation);

(5) For all-digital stations, if a notification of commencement of new all-digital service or a nominal power change, whether the station is operating in core-only or enhanced mode; and

(6) For all-digital stations, a certification that the all-digital station complies with all EAS requirements.

(c) Each FM digital notification must also include the following information:

(1) A certification that the IBOC DAB facilities conform to the HD Radio emissions mask limits;

(2) FM digital effective radiated power used and certification that the FM analog effective radiated power remains as authorized;

(3) If applicable, the geographic coordinates, elevation data, and license file number of the auxiliary antenna employed by an FM station as a separate digital antenna; and

(4) If applicable, for FM systems employing interleaved antenna bays, a certification that adequate filtering and/or isolation equipment has been installed to prevent spurious emissions in excess of the limits specified in § 73.317.

FEDERAL COMMUNICATIONS COMMISSION

[OMB 3060-1139, FRS 17245]

Information Collection Being Submitted for Review and Approval to Office of Management and Budget

AGENCY: Federal Communications Commission.

ACTION: Notice and request for comments.

SUMMARY: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995, the Federal

Communications Commission (FCC or the Commission) invites the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Pursuant to the Small Business Paperwork Relief Act of 2002, the FCC seeks specific comment on how it might "further reduce the information collection burden for small business concerns with fewer than 25 employees."

The Commission may not conduct or sponsor a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number. No person shall be subject to any penalty for failing to comply with a collection of information subject to the PRA that does not display a valid OMB control number.

DATES: Written comments and recommendations for the proposed

information collection should be submitted on or before December 24, 2020.

ADDRESSES: Comments should be sent to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function. Your comment must be submitted into www.reginfo.gov per the above instructions for it to be considered. In addition to submitting in www.reginfo.gov also send a copy of your comment on the proposed information collection to Nicole Ongele, FCC, via email to PRA@fcc.gov and to Nicole.Ongele@fcc.gov. Include in the comments the OMB control number as shown in the **SUPPLEMENTARY INFORMATION** below.

FOR FURTHER INFORMATION CONTACT: For additional information or copies of the

information collection, contact Nicole Ongele at (202) 418-2991. To view a copy of this information collection request (ICR) submitted to OMB: (1) Go to the web page <http://www.reginfo.gov/public/do/PRAMain>, (2) look for the section of the web page called "Currently Under Review," (3) click on the downward-pointing arrow in the "Select Agency" box below the "Currently Under Review" heading, (4) select "Federal Communications Commission" from the list of agencies presented in the "Select Agency" box, (5) click the "Submit" button to the right of the "Select Agency" box, (6) when the list of FCC ICRs currently under review appears, look for the Title of this ICR and then click on the ICR Reference Number. A copy of the FCC submission to OMB will be displayed.

SUPPLEMENTARY INFORMATION: As part of its continuing effort to reduce paperwork burdens, as required by the Paperwork Reduction Act (PRA) of 1995 (44 U.S.C. 3501-3520), the FCC invited the general public and other Federal Agencies to take this opportunity to comment on the following information collection. Comments are requested concerning: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information shall have practical utility; (b) the accuracy of the Commission's burden estimates; (c) ways to enhance the quality, utility, and clarity of the information collected; and (d) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology. Pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107-198, see 44 U.S.C. 3506(c)(4), the FCC seeks specific comment on how it might "further reduce the information collection burden for small business concerns with fewer than 25 employees."

OMB Control Number: 3060-1139.

Title: FCC Consumer Broadband Services Testing and Measurement.

Form Number: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Businesses or other for-profit and individuals or households.

Number of Respondents and Responses: 501,020 respondents and 501,020 responses.

Estimated Time per Response: 1 hour-200 hours.

Frequency of Response: Biennial reporting requirement and third-party disclosure requirement.

Obligation to Respond: Voluntary. Statutory authority for this information collection is contained in the Broadband Data Improvement Act of 2008, Public Law 110-385, Stat 4096, 103(c)(1).

Total Annual Burden: 46,667 hours.

Total Annual Costs: No Cost.

Nature and Extent of Confidentiality: All participation in the Measuring Broadband America Program is voluntary and any participant can decline to participate at any time. No volunteers' personally identifying information (PII) such as name, phone number, or street addresses will be transmitted to the Commission from the contractor as a matter of vendor policy and agency privacy policy. SamKnows maintains a series of administrative, technical, and physical safeguards to protect against the transmission of PII. At point of registration, individuals will be given full disclosure in a "privacy statement" highlighting what information will be collected. Fixed Broadband ISP Partners receive PII about volunteers to confirm the validity of the information against their subscription records, but will be bound by a non-disclosure agreement that will maintain various administrative, technical and physical safeguards to protect the information and limit its use. Mobile Broadband ISP Partners have access to five kinds of information, including location and time of data collection, device type and operating system version, cellular performance and characteristics, and download, upload speed and other broadband performance, also restricted by a non-disclosure agreement that will maintain various administrative, technical and physical safeguards to protect the information and limit its use. ISP Partners providing support to the testing program will likewise be bound to the same series of administrative, technical and physical safeguards developed by SamKnows. In addition, all third parties supporting the program directly will be bound by a "Code of Conduct" to ensure all participate and act in good faith and with other legally enforceable documents such as non-disclosure agreements.

Privacy Act Impact Assessment: This information collection effects individuals or households. However, personally identifiable information (PII) such as name, phone number, or street addresses is not being collected by, made available to or made accessible by the Commission but instead by third parties including SamKnows, a third party contractor, and internet Service Provider (ISP) Partners.

Needs and Uses: The Commission will submit this expiring collection after

this 60-day comment period to the Office of Management and Budget (OMB) to obtain the full three-year clearance.

This study's collection of information on actual speeds and performance of fixed and mobile broadband connections delivered to consumers by ISPs has been reported to be of great value to academic researchers, manufacturers and technology providers, broadband providers, public interest groups and other diverse stakeholders. Validation of fixed broadband subscribed speeds as opposed to actual speeds by participating ISPs remains unique to this program and provides a context for measured speeds. Mobile broadband performance information is measured using the FCC Speed Test app for Android and iOS devices to test the upload and download speeds, latency and packet loss, as well as the wireless performance characteristics of the broadband connection and the kind of handsets and versions of operating systems tested. Information the FCC Speed Test App ("Application") collects is limited to information used to measure volunteers' mobile broadband service and no personally identifiable information, such as subscribers' name, phone number or unique identifiers associated with a device is collected. Software-based tools and online tools exist that can test consumer's broadband connections, including a set of consumer tools launched by the FCC in conjunction with the National Broadband Plan. However, these tools track speeds experienced by consumers, rather than speeds delivered directly to a consumer by an ISP. The distinction is important for supporting Agency broadband policy analysis, as ISPs advertise speeds and performance delivered rather than speeds experienced, which suffers from degradation outside of an ISP's control.

No other dedicated panel of direct fixed and mobile broadband performance measurement using publicly documented methodologies using free and add-free technologies exists today in the country. The program will continue to support existing software-based tools and online tools but the focus of the program will remain the direct measurement of broadband performance delivered to the consumer. The collection effort also has specific elements focused on further network performance statistics, time of day parameters, and other elements affecting consumers' broadband experience that are not tracked elsewhere. The information to be confirmed by ISP Partners about their subscribers or

technical and market data regarding the broadband services they provide is unavailable from other sources.
