SUPPLEMENTARY INFORMATION: When submitting comments or requesting information, please include the information request collection title for reference.

Information Collection Request Title: Rural Health Care Coordination Program OMB No. 0906–0024—Reinstate with Changes.

Abstract: The Rural Health Care Coordination Program (Care Coordination Program) is authorized under Section 330A(e) of the Public Health Service Act (42 U.S.C. 254(e)), as

amended, to “improve access and quality of care through the application of care coordination strategies with the focus areas of collaboration, leadership and workforce, improved outcomes, and sustainability in rural communities.” This authority permits HRSA’s Federal Office of Rural Health Policy to support rural health consortiums/networks aiming to achieve the overall goals of improving access, delivery, and quality of care through the application of care coordination strategies in rural communities.

This ICR was discontinued in January 2020. HRSA is requesting a reinstatement with changes as it was decided to re-compete this pilot program.

The proposed Rural Health Care Coordination Program draft measures for information collection reflect changes to the Clinical Measures section, which was previously in section eight and now currently in section six. The Clinical Measures Section now expands previous project focus from three chronic diseases (*i.e.* Type 2 diabetes, Congestive Heart Failure, and Chronic Obstructive Pulmonary Disease) to an inclusive list of clinical measures in order to reflect a patient’s overall health and well-being as well as the organization’s overall improved outcomes for the project. Proposed revisions also include measures to examine key elements cited for a successful rural care coordination program: (1) Collaboration, (2) leadership and workforce, (3) improved outcomes, and (4) sustainability.

1. Collaboration—Utilizing a collaborative approach to coordinate and deliver health care services through a consortium, in which member organizations actively engage in integrated, coordinated, patient-centered delivery of health care services.

2. Leadership and Workforce—Developing and strengthening a highly skilled care coordination workforce to respond to vulnerable populations’ unmet needs within the rural communities.

3. Improved Outcomes—Expanding access and improving care quality and delivery, and health outcomes through evidence-based model and/or promising practices tailored to meet the local populations’ needs.

4. Sustainability—Developing and strengthening care coordination program’s financial sustainability by establishing effective revenue sources such as expanded service reimbursement, resource sharing, and/or contributions from partners at the
