Parties that filed entries of appearance in the preliminary phase of the investigations need not enter a separate appearance for the final phase of the investigations. Industrial users, and, if the merchandise under investigation is sold at the retail level, representative consumer organizations have the right to appear as parties in Commission antidumping investigations. The Secretary will prepare a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

Background

On October 7, 2020, Appvion Operations, Inc. (Appleton, Wisconsin) and Domtar Corporation (Fort Mill, South Carolina) filed petitions with the Commission and Commerce, alleging that an industry in the United States is materially injured or threatened with material injury by reason of LTFV imports of thermal paper from Germany, Japan, Korea, and Spain. Accordingly, effective October 7, 2020, the Commission instituted antidumping duty investigation nos. 731-TA-1546-1549 (Preliminary).

Notice of the institution of the Commission's investigations and of a public conference to be held in connection therewith was given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, DC, and by publishing the notice in the **Federal Register** of October 14, 2020 (85 FR 65073). In light of the restrictions on access to the Commission building due to the COVID-19 pandemic, the Commission conducted its conference through written testimony and video conference. All persons who requested the opportunity were permitted to participate.

The Commission made these determinations pursuant to § 733(a) of the Act (19 U.S.C. 1673(a)). It completed and filed its determinations in these investigations on November 23, 2020. The views of the Commission are contained in USITC Publication 5141 (December 2020), entitled *Thermal Paper from Germany, Japan, Korea, and Spain: Investigation Nos. 731-TA-1546-1549 (Preliminary)*.

By order of the Commission.
