

methodology and assumptions used to determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways for FRA to minimize the burden of information collection activities on the public, including the use of automated collection techniques or other forms of information technology. See 44 U.S.C. 3506(c)(2)(A); 5 CFR 1320.8(d)(1).

FRA believes that soliciting public comment may reduce the administrative and paperwork burdens associated with the collection of information that Federal regulations mandate. In summary, FRA reasons that comments received will advance three objectives: (1) Reduce reporting burdens; (2) organize information collection requirements in a “user-friendly” format to improve the use of such information; and (3) accurately assess the resources expended to retrieve and produce information requested. See 44 U.S.C. 3501.

The summary below describes the ICR that FRA will submit for OMB clearance as the PRA requires:

Title: Federal Railroad Administration Alleged Violation and Inquiry Form.¹
OMB Control Number: 2130–0590.

Abstract: The FRA Alleged Violation and Inquiry Form is a response to section 307(b) of the Rail Safety Improvement Act of 2008, which requires FRA to “provide a mechanism for the public to submit written reports of potential violations of Federal railroad safety and hazardous materials transportation laws, regulations, and orders to the Federal Railroad Administration.” The FRA Alleged Violation and Inquiry Form allows the public to submit alleged violations, complaints, or inquiries directly to FRA. The form allows FRA to collect information necessary to investigate the alleged violation, complaint, or inquiry, and to follow up with the submitting party. FRA may share the information collected with partnering State departments of transportation and law enforcement agencies.

FRA will use the information collected under the form to identify problem areas and take necessary action to prevent potential accidents of the type indicated by the information submitted from occurring.

FRA’s proposed revisions to the form include: (1) Adding several dropdown menus for form elements (e.g., type, title, preferred method of contact, position, category of submission, date,

time, city, state, and entity involved) so that users can quickly provide complete contact and incident information while having to hand-enter less information; (2) adding a question requesting the users identify if they are members of the public, a railroad employee, or other; and (3) informing users that they will receive an automated response from FRA after the form is submitted. The revisions are designed to make the existing form easier to use and more understandable, and to simplify the collection of information. The revised form will ensure that users provide the necessary information so that FRA staff can review and respond more quickly. The revised form also will facilitate FRA’s ability to maintain the data collected in a more useful and uniform manner, as the new dropdown boxes will assist FRA in receiving more standardized responses.

Type of Request: Revision of a currently approved information collection.

Affected Public: Public.

Form(s): FRA F 6180.151.

Respondent Universe: Public.

Total Estimated Annual Responses: 600.
