k. *Description of Request:* The applicant requests Commission approval for a temporary variance from the reservoir elevation requirements at Lake Shafer. Due to the severe regional drought conditions and low river flow on the Tippecanoe River, the applicant is operating the project under abnormal river conditions and requests a variance from the allowable elevation at Lake Shafer (maintain fluctuation within of 0.25 feet below elevation 647.47 feet NGVD) so that it can continue to meet the flow requirements from the downstream Lake Freeman development to protect the federally endangered mussel species. Although the duration of drought conditions are difficult to predict, the applicant requests the temporary variance to remain into effect until March 31, 2021, which is when winter weather conditions typically begin to subside and will produce sufficient flow from melting snow and ice to allow Lake Shafer to return to its normal elevation.
