(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(i) of this section.

§ 721.11455 Rare earth oxide (generic).

(a) *Chemical substance and significant new uses subject to reporting.* (1) The chemical substance identified generically as rare earth oxide (PMN P-18-199) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.82(j).

(ii) [Reserved]

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c) and (i) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

(3) *Determining whether a specific use is subject to this section.* The provisions of § 721.1725(b)(1) apply to paragraph (a)(2)(i) of this section.

§ 721.11456 Acid-modified polyether (generic).

Chemical substance and significant new uses subject to reporting. (1) The chemical substance identified generically as acid-modified polyether (PMN P-18-367) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(f) and (o). It is a significant new use to process the substance to a final product formulation of greater than 2% by weight.

(ii) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=9.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c), (i), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The

provisions of § 721.185 apply to this section.

§ 721.11457 Alkenoic acid polymer with 2-ethyl-2-(hydroxymethyl)-1,3-alkyldiol, 1,1'-methylenebis(4-isocyanatocarbomonocycle) and 3-methyl-1,5-alkyldiol (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as alkenoic acid polymer with 2-ethyl-2-(hydroxymethyl)-1,3-alkyldiol, 1,1'-methylenebis(4-isocyanatocarbomonocycle) and 3-methyl-1,5-alkyldiol (PMN P-19-158) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* Requirements as specified in § 721.80(o). It is a significant new use to manufacture, process, or use the substance in a manner that results in inhalation exposure.

(ii) *Release to water.* Requirements as specified in § 721.90(a)(1), (b)(1), and (c)(1).

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in § 721.125(a) through (c), (i), and (k) are applicable to manufacturers and processors of this substance.

(2) *Limitations or revocation of certain notification requirements.* The provisions of § 721.185 apply to this section.

§ 721.11458 Bis-alkoxy substituted alkane, polymer with aminoalkanol (generic).

(a) *Chemical substance and significant new uses subject to reporting.*

(1) The chemical substance identified generically as bis-alkoxy substituted alkane, polymer with aminoalkanol (PMN P-19-164) is subject to reporting under this section for the significant new uses described in paragraph (a)(2) of this section.

(2) The significant new uses are:

(i) *Industrial, commercial, and consumer activities.* It is a significant new use to manufacture, process, or use the substance in a manner that results in inhalation exposure.

(ii) *Release to water.* Requirements as specified in § 721.90(a)(4), (b)(4), and (c)(4) where N=1.

(b) *Specific requirements.* The provisions of subpart A of this part apply to this section except as modified by this paragraph (b).

(1) *Recordkeeping.* Recordkeeping requirements as specified in

§ 721.125(a) through (c), (i), and (k) are applicable to manufacturers and processors of this substance.

(2) Limitations or revocation of certain notification requirements. The provisions of § 721.185 apply to this section.

Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and Final Policy Changes and Fiscal Year 2021 Rates; Quality Reporting and Medicare and Medicaid Promoting Interoperability Programs Requirements for Eligible Hospitals and Critical Access Hospitals; Correction

AGENCY: Centers for Medicare & Medicaid Services (CMS), Health and Human Services (HHS).

ACTION: Final rule; correction.

SUMMARY: This document corrects technical and typographical errors in the final rule that appeared in the September 18, 2020 issue of the **Federal Register** titled “Medicare Program; Hospital Inpatient Prospective Payment Systems for Acute Care Hospitals and the Long-Term Care Hospital Prospective Payment System and Final Policy Changes and Fiscal Year 2021 Rates; Quality Reporting and Medicare and Medicaid Promoting Interoperability Programs Requirements for Eligible Hospitals and Critical Access Hospitals”.

DATES:

Effective Date: This correcting document is effective on December 1, 2020.

Applicability Date: The corrections in this correcting document are applicable to discharges occurring on or after October 1, 2020.

SUPPLEMENTARY INFORMATION:

I. Background

In FR Doc. 2020–19637 of September 18, 2020 (85 FR 58432) there were a number of technical and typographical errors that are identified and corrected in the Correction of Errors section of this correcting document. The corrections in this correcting document are applicable to discharges occurring on or after October 1, 2020, as if they had been included in the document that appeared in the September 18, 2020 **Federal Register**.

II. Summary of Errors

A. Summary of Errors in the Preamble

On the following pages: 58435 through 58436, 58448, 58451, 58453, 58459, 58464, 58471, 58479, 58487, 58495, 58506, 58509, 58520, 58529, 58531 through 58532, 58537, 58540 through 58541, 58553 through 58556, 58559 through 58560, 58580 through 58583, 58585 through 58588, 58596, 58599, 58603 through 58604, 58606 through 58607, 58610, 58719, 58734, 58736 through 58737, 58739, 58741, 58842, 58876, 58893, and 58898 through 58900, we are correcting inadvertent typographical errors in the internal section references.

On page 58596, we are correcting an inadvertent typographical error in the date of the MedPAR data used for developing the Medicare Severity Diagnosis-Related Group (MS–DRG) relative weights.

On pages 58716 and 58717, we are correcting inadvertent errors in the ICD–10–PCS procedure codes describing the BAROSTIM NEO® System technology.

On pages 58721 and 58723, we are correcting inadvertent errors in the ICD–10–PCS procedure codes describing the Cefiderocol technology.

On page 58768, due to a conforming change to the Rural Floor Budget Neutrality adjustment (listed in the table titled “Summary of FY 2021 Budget Neutrality Factors” on page 59034) as discussed in section II.B. of this correcting document and the conforming changes to the Out-Migration Adjustment discussed in section II. D of this correcting document (with regard to Table 4A), we are correcting the 25th percentile wage index value across all hospitals.

On page 59006, in the discussion of Medicare bad debt policy, we are correcting inadvertent errors in the regulatory citations and descriptions.

B. Summary of Errors in the Addendum

On pages 59031 and 59037, we are correcting inadvertent typographical errors in the internal section references.

We are correcting an error in the version 38 ICD–10 MS–DRG assignment for some cases in the historical claims data in the FY 2019 MedPAR files used in the ratesetting for the FY 2021 IPPS/LTCH PPS final rule, which resulted in inadvertent errors in the MS–DRG relative weights (and associated average length-of-stay (LOS)). Additionally, the version 38 MS–DRG assignment and relative weights are used when determining total payments for purposes of all of the budget neutrality factors and the final outlier threshold. As a result, the corrections to the MS–DRG assignment under the ICD–10 MS–DRG GROUPER version 38 for some cases in the historical claims data in the FY 2019 MedPAR files and the recalculation of the relative weights directly affected the calculation of total payments and required the recalculation of all the budget neutrality factors and the final outlier threshold.

In addition, as discussed in section II.D. of this correcting document, we made updates to the calculation of Factor 3 of the uncompensated care payment methodology to reflect updated information on hospital mergers received in response to the final rule. Factor 3 determines the total amount of the uncompensated care payment a hospital is eligible to receive for a fiscal year. This hospital-specific payment amount is then used to calculate the amount of the interim uncompensated care payments a hospital receives per discharge. Per discharge uncompensated care payments are included when determining total payments for purposes of all of the budget neutrality factors and the final outlier threshold. As a result, the revisions made to the calculation of Factor 3 to address additional merger information directly affected the calculation of total payments and required the recalculation of all the budget neutrality factors and the final outlier threshold.

We made an inadvertent error in the Medicare Geographic Classification Review Board (MGCRB) reclassification status of one hospital in the FY 2021 IPPS/LTCH PPS final rule. Specifically, CCN 050481 is incorrectly listed in Table 2 as reclassified to its geographic “home” of CBSA 31084. The correct reclassification area is to CBSA 37100. This correction necessitated the recalculation of the FY 2021 wage index for CBSA 37100 and affected the final FY 2021 wage index with reclassification. The final FY 2021 IPPS wage index with reclassification is used when determining total payments for purposes of all budget neutrality factors (except for the MS–DRG reclassification and recalibration budget neutrality

factor and the wage index budget neutrality adjustment factor) and the final outlier threshold.

Due to the correction of the combination of errors listed previously (corrections to the MS–DRG assignment for some cases in the historical claims data and the resulting recalculation of the relative weights and average length of stay, revisions to Factor 3 of the uncompensated care payment methodology, and the correction to the MGCRB reclassification status of one hospital), we recalculated all IPPS budget neutrality adjustment factors, the fixed-loss cost threshold, the final wage indexes (and geographic adjustment factors (GAFs)), the national operating standardized amounts and capital Federal rate. Therefore, we made conforming changes to the following:

- On page 59034, the table titled “Summary of FY 2021 Budget Neutrality Factors”.
- On page 59037, the estimated total Federal capital payments and the estimated capital outlier payments.
- On page 59040, the calculation of the outlier fixed-loss cost threshold, total operating Federal payments, total operating outlier payments, the outlier adjustment to the capital Federal rate and the related discussion of the percentage estimates of operating and capital outlier payments.
- On page 59042, the table titled “Changes from FY 2020 Standardized Amounts to the FY 2021 Standardized Amounts”.

On page 59039, we are correcting a typographical error in the total cases from October 1, 2018 through September 31, 2019 used to calculate the average covered charge per case, which is then used to calculate the charge inflation factor.

On pages 59047 through 59048, in our discussion of the determination of the Federal hospital inpatient capital-related prospective payment rate update, due to the recalculation of the GAFs as well as corrections to the MS–DRG assignment for some cases in the historical claims data and the resulting recalculation of the relative weights and average length of stay, we have made conforming corrections to the capital Federal rate, the incremental budget neutrality adjustment factor for changes in the GAFs, and the outlier threshold (as discussed previously). As a result of these changes, we also made conforming corrections in the table showing the comparison of factors and adjustments for the FY 2020 capital Federal rate and FY 2021 capital Federal rate. As we noted in the final rule, the capital Federal rate is calculated using unrounded budget neutrality and outlier

adjustment factors. The unrounded GAF/DRG budget neutrality factors and the unrounded outlier adjustment to the capital Federal rate were revised because of these errors. However, after rounding these factors to 4 decimal places as displayed in the final rule, the rounded factors were unchanged from the final rule.

On page 59057, we are making conforming changes to the fixed-loss amount for FY 2021 site neutral payment rate discharges, and the high cost outlier (HCO) threshold (based on the corrections to the IPPS fixed-loss amount discussed previously).

On pages 59060 and 59061, we are making conforming corrections to the national adjusted operating standardized amounts and capital standard Federal payment rate (which also include the rates payable to hospitals located in Puerto Rico) in Tables 1A, 1B, 1C, and 1D as a result of the conforming corrections to certain budget neutrality factors and the outlier threshold previously described.

C. Summary of Errors in the Appendices

On pages 59062, 59070, 59074 through 59076, and 59085 we are correcting inadvertent typographical errors in the internal section references.

On pages 59064 through 59071, 59073 and 59074, and 59092 and 59093, in our regulatory impact analyses, we have made conforming corrections to the factors, values, and tables and accompanying discussion of the changes in operating and capital IPPS payments for FY 2021 and the effects of certain IPPS budget neutrality factors as a result of the technical errors that lead to changes in our calculation of the operating and capital IPPS budget neutrality factors, outlier threshold, final wage indexes, operating standardized amounts, and capital Federal rate (as described in section II.B. of this correcting document). These conforming corrections include changes to the following tables:

- On pages 59065 through 59069, the table titled “Table I—Impact Analysis of Changes to the IPPS for Operating Costs for FY 2021”.

- On pages 59073 and 59074, the table titled “Table II—Impact Analysis of Changes for FY 2021 Acute Care Hospital Operating Prospective Payment System (Payments per discharge)”.

- On pages 59092 and 59093, the table titled “Table III—Comparison of Total Payments per Case [FY 2020 Payments Compared to Final FY 2021 payments]”.

On pages 59076 through 59079, we are correcting the discussion of the “Effects of the Changes to

Uncompensated Care Payments for FY 2021” for purposes of the Regulatory Impact Analysis in Appendix A of the FY 2021 IPPS/LTCH PPS final rule, including the table titled “Modeled Uncompensated Care Payments for Estimated FY 2021 DSHs by Hospital Type: Uncompensated Care Payments (\$ in Millions)*—from FY 2020 to FY 2021” on pages 59077 and 59078, in light of the corrections discussed in section II.D. of this correcting document.

D. Summary of Errors in and Corrections to Files and Tables Posted on the CMS Website

We are correcting the errors in the following IPPS tables that are listed on pages 59059 and 59060 of the FY 2021 IPPS/LTCH PPS final rule and are available on the internet on the CMS website at <https://www.cms.gov/Medicare/Medicare-Fee-for-Service-Payment/AcuteInpatientPPS/index.html>.

The tables that are available on the internet have been updated to reflect the revisions discussed in this correcting document.

Table 2—Case-Mix Index and Wage Index Table by CCN—FY 2021 Final Rule. As discussed in section II.B. of this correcting document, CCN 050481 is incorrectly listed as reclassified to its home geographic area of CBSA 31084. In this table, we are correcting the columns titled “Wage Index Payment CBSA” and “MGCRB Reclass” to accurately reflect its reclassification to CBSA 37100. This correction necessitated the recalculation of the FY 2021 wage index for CBSA 37100. Also, the corrections to the version 38 MS–DRG assignment for some cases in the historical claims data and the resulting recalculation of the relative weights and ALOS, corrections to Factor 3 of the uncompensated care payment methodology, and recalculation of all of the budget neutrality adjustments (as discussed in section II.B. of this correcting document) necessitated the recalculation of the rural floor budget neutrality factor which is the only budget neutrality factor applied to the FY 2021 wage indexes. Because the rural floor budget neutrality factor is applied to the FY 2021 wage indexes, we are making corresponding changes to the wage indexes listed in Table 2. In addition, as also discussed later in this section, because the wage indexes are one of the inputs used to determine the out-migration adjustment, some of the out migration adjustments changed. Therefore, we are making corresponding changes to some of the out-migration adjustments listed in Table 2. Also, as

discussed in section II.A. of this correcting document, we made a conforming change to the 25th percentile wage index value across all hospitals. Accordingly, we are making corresponding changes to the values for hospitals in the columns titled “FY 2021 Wage Index Prior to Quartile and Transition”, “FY 2021 Wage Index With Quartile”, “FY 2021 Wage Index With Quartile and Cap” and “Out-Migration Adjustment”. We also updated footnote number 6 to reflect the conforming change to the 25th percentile wage index value across all hospitals.

Table 3.—Wage Index Table by CBSA—FY 2021 Final Rule. As discussed in section II.B. of this correcting document, CCN 050481 is incorrectly listed in Table 2 as reclassified to its home geographic area of CBSA 31084 instead of reclassified to CBSA 37100. This correction necessitated the recalculation of the FY 2021 wage index for CBSA 37100. Also, corrections to the version 38 MS–DRG assignment for some cases in the historical claims data and the resulting recalculation of the relative weights and ALOS, corrections to Factor 3 of the uncompensated care payment methodology, and the recalculation of all of the budget neutrality adjustments (as discussed in section II.B. of this correcting document) necessitated the recalculation of the rural floor budget neutrality factor which is the only budget neutrality factor applied to the FY 2021 wage indexes. Because the rural floor budget neutrality factor is applied to the FY 2021 wage indexes, we are making corresponding changes to the wage indexes and GAFs of all CBSAs listed in Table 3. Specifically, we are correcting the values and flags in the columns titled “Wage Index”, “GAF”, “Reclassified Wage Index”, “Reclassified GAF”, “State Rural Floor”, “Eligible for Rural Floor Wage Index”, “Pre-Frontier and/or Pre-Rural Floor Wage Index”, “Reclassified Wage Index Eligible for Frontier Wage Index”, “Reclassified Wage Index Eligible for Rural Floor Wage Index”, and “Reclassified Wage Index Pre-Frontier and/or Pre-Rural Floor”.

Table 4A.—List of Counties Eligible for the Out-Migration Adjustment under Section 1886(d)(13) of the Act—FY 2021 Final Rule. As discussed in section II.B. of this correcting document, CCN 050481 is incorrectly listed in Table 2 as reclassified to its home geographic area of CBSA 31084 instead of reclassified to CBSA 37100. This correction necessitated the recalculation of the FY 2021 wage index for CBSA 37100. Also, corrections to the version 38 MS–DRG assignment for some cases

in the historical claims data and the resulting recalculation of the relative weights and ALOS, corrections to Factor 3 of the uncompensated care payment methodology, and the recalculation of all of the budget neutrality adjustments (as discussed in section II.B. of this correcting document) necessitated the recalculation of the rural floor budget neutrality factor which is the only budget neutrality factor applied to the FY 2021 wage indexes. As a result, as discussed previously, we are making corresponding changes to the FY 2021 wage indexes. Because the wage indexes are one of the inputs used to determine the out-migration adjustment, some of the out migration adjustments changed. Therefore, we are making corresponding changes to some of the out-migration adjustments listed in Table 4A. Specifically, we are correcting the values in the column titled “FY 2021 Out Migration Adjustment”.

Table 5.—List of Medicare Severity Diagnosis-Related Groups (MS–DRGs), Relative Weighting Factors, and Geometric and Arithmetic Mean Length of Stay—FY 2021. We are correcting this table to reflect the recalculation of the relative weights, geometric average length-of-stay (LOS), and arithmetic mean LOS as a result of the corrections to the version 38 MS–DRG assignment for some cases in the historical claims data used in the calculations (as discussed in section II.B. of this correcting document).

Table 7B.—Medicare Prospective Payment System Selected Percentile Lengths of Stay: FY 2019 MedPAR Update—March 2020 GROUPER Version 38 MS–DRGs. We are correcting this table to reflect the recalculation of the relative weights, geometric average LOS, and arithmetic mean LOS as a result of the corrections to the version 38 MS–DRG assignment for some cases in the historical claims data used in the calculations (as discussed in section II.B. of this correcting document).

Table 18.—FY 2021 Medicare DSH Uncompensated Care Payment Factor 3. For the FY 2021 IPPS/LTCH PPS final rule, we published a list of hospitals that we identified to be subsection (d) hospitals and subsection (d) Puerto Rico hospitals projected to be eligible to receive uncompensated care interim payments for FY 2021. As stated in the FY 2021 IPPS/LTCH PPS final rule (85 FR 58834 and 58835), we allowed the public an additional period after the issuance of the final rule to review and submit comments on the accuracy of the list of mergers that we identified in the final rule. Based on the comments received during this additional period, we are updating this table to reflect the

merger information received in response to the final rule and to revise the Factor 3 calculations for purposes of determining uncompensated care payments for the FY 2021 IPPS/LTCH PPS final rule.

We are revising Factor 3 for all hospitals to reflect the updated merger information received in response to the final rule. We are also revising the amount of the total uncompensated care payment calculated for each DSH-eligible hospital. The total uncompensated care payment that a hospital receives is used to calculate the amount of the interim uncompensated care payments the hospital receives per discharge; accordingly, we have also revised these amounts for all DSH-eligible hospitals. These corrections will be reflected in Table 18 and the Medicare DSH Supplemental Data File. Per discharge uncompensated care payments are included when determining total payments for purposes of all of the budget neutrality factors and the final outlier threshold. As a result, these corrections to uncompensated care payments impacted the calculation of all the budget neutrality factors as well as the outlier fixed-loss cost threshold. In section IV.C. of this correcting document, we have made corresponding revisions to the discussion of the “Effects of the Changes to Medicare DSH and Uncompensated Care Payments for FY 2021” for purposes of the Regulatory Impact Analysis in Appendix A of the FY 2021 IPPS/LTCH PPS final rule to reflect the corrections discussed previously and to correct minor typographical errors.

The files that are available on the internet have been updated to reflect the corrections discussed in this correcting document.

III. Waiver of Proposed Rulemaking, 60-Day Comment Period, and Delay in Effective Date

Under 5 U.S.C. 553(b) of the Administrative Procedure Act (APA), the agency is required to publish a notice of the proposed rulemaking in the **Federal Register** before the provisions of a rule take effect. Similarly, section 1871(b)(1) of the Act requires the Secretary to provide for notice of the proposed rulemaking in the **Federal Register** and provide a period of not less than 60 days for public comment. In addition, section 553(d) of the APA, and section 1871(e)(1)(B)(i) of the Act mandate a 30-day delay in effective date after issuance or publication of a rule. Sections 553(b)(B) and 553(d)(3) of the APA provide for exceptions from the notice

and comment and delay in effective date APA requirements; in cases in which these exceptions apply, sections 1871(b)(2)(C) and 1871(e)(1)(B)(ii) of the Act provide exceptions from the notice and 60-day comment period and delay in effective date requirements of the Act as well. Section 553(b)(B) of the APA and section 1871(b)(2)(C) of the Act authorize an agency to dispense with normal rulemaking requirements for good cause if the agency makes a finding that the notice and comment process are impracticable, unnecessary, or contrary to the public interest. In addition, both section 553(d)(3) of the APA and section 1871(e)(1)(B)(ii) of the Act allow the agency to avoid the 30-day delay in effective date where such delay is contrary to the public interest and an agency includes a statement of support.

We believe that this correcting document does not constitute a rule that would be subject to the notice and comment or delayed effective date requirements. This document corrects technical and typographical errors in the preamble, addendum, payment rates, tables, and appendices included or referenced in the FY 2021 IPPS/LTCH PPS final rule, but does not make substantive changes to the policies or payment methodologies that were adopted in the final rule. As a result, this correcting document is intended to ensure that the information in the FY 2021 IPPS/LTCH PPS final rule accurately reflects the policies adopted in that document.

In addition, even if this were a rule to which the notice and comment procedures and delayed effective date requirements applied, we find that there is good cause to waive such requirements. Undertaking further notice and comment procedures to incorporate the corrections in this document into the final rule or delaying the effective date would be contrary to the public interest because it is in the public’s interest for providers to receive appropriate payments in as timely a manner as possible, and to ensure that the FY 2021 IPPS/LTCH PPS final rule accurately reflects our policies. Furthermore, such procedures would be unnecessary, as we are not altering our payment methodologies or policies, but rather, we are simply implementing correctly the methodologies and policies that we previously proposed, requested comment on, and subsequently finalized. This correcting document is intended solely to ensure that the FY 2021 IPPS/LTCH PPS final rule accurately reflects these payment methodologies and policies. Therefore, we believe we have good cause to waive

the notice and comment and effective date requirements. Moreover, even if these corrections were considered to be retroactive rulemaking, they would be authorized under section 1871(e)(1)(A)(ii) of the Act, which permits the Secretary to issue a rule for the Medicare program with retroactive effect if the failure to do so would be contrary to the public interest. As we have explained previously, we believe it would be contrary to the public interest not to implement the corrections in this correcting document because it is in the public's interest for providers to receive appropriate payments in as timely a manner as possible, and to ensure that the FY 2021 IPPS/LTCH PPS final rule accurately reflects our policies.

IV. Correction of Errors

In FR Doc. 2020–19637 of September 18, 2020 (85 FR 58432), we are making the following corrections:

A. Corrections of Errors in the Preamble

1. On page 58435, third column, third full paragraph, line 1, the reference, “section II.G.9.b.” is corrected to read “section II.F.9.b.”.

2. On page 58436, first column, first full paragraph, line 10, the reference, “section II.G.9.c.” is corrected to read “section II.F.9.c.”.

3. On page 58448, lower half of the page, second column, first partial paragraph, lines 19 and 20, the reference, “section II.E.2.b.” is corrected to read “section II.D.2.b.”.

4. On page 58451, first column, first full paragraph, line 12, the reference, “section II.E.16.” is corrected to read “section II.D.16.”.

5. On page 58453, third column, third full paragraph, line 13, the reference, “section II.E.2.b.” is corrected to read “section II.D.2.b.”.

6. On page 58459, first column, fourth paragraph, line 3, the reference, “section II.E.1.b.” is corrected to read “section II.D.1.b.”.

7. On page 58464, bottom quarter of the page, second column, partial paragraph, lines 4 and 5, the phrase “and section II.E.15. of this final rule,” is corrected to read “and this final rule.”.

8. On page 58471, first column, first partial paragraph, lines 12 and 13, the reference, “section II.E.15.” is corrected to read “section II.D.15.”.

9. On page 58479, first column, first partial paragraph:

a. Line 6, the reference, “section II.E.16.” is corrected to read “section II.D.16.”.

b. Line 15, the reference, “section II.E.1.b.” is corrected to read “section II.D.1.b.”.

10. On page 58487, first column, first full paragraph, lines 20 through 21, the reference, “section II.E.12.b.” is corrected to read “section II.D.12.b.”.

11. On page 58495, middle of the page, third column, first full paragraph, line 5, the reference, “section II.E.1.b.” is corrected to read “section II.D.1.b.”.

 (1) Third paragraph, line 4, the figure “0.9984” is corrected to read “0.9983”.
 (2) Last paragraph, line 9, the figure “\$466.22” is corrected to read “\$466.21”.

8. On page 59048:
 a. The chart titled “COMPARISON OF FACTORS AND ADJUSTMENTS: FY 2020 CAPITAL FEDERAL RATE AND THE FY 2021 CAPITAL FEDERAL RATE” is corrected to read as follows:

	FY 2020	FY 2021	Change	Percent Change
Update Factor ¹	1.0150	1.0110	1.0110	1.10
GAF/DRG Adjustment Factor ¹	0.9948	0.9971	0.9971	-0.29
Outlier Adjustment Factor ²	0.9463	0.9466	1.0003	0.03
Capital Federal Rate	\$462.33	\$466.21	1.0084	0.84 ³

¹ The update factor and the GAF/DRG budget neutrality adjustment factors are built permanently into the capital Federal rates. Thus, for example, the incremental change from FY 2020 to FY 2021 resulting from the application of the 0.9971 GAF/DRG budget neutrality adjustment factor for FY 2021 is a net change of 0.9971 (or -0.29 percent).

² The outlier reduction factor is not built permanently into the capital Federal rate; that is, the factor is not applied cumulatively in determining the capital Federal rate. Thus, for example, the net change resulting from the application of the FY 2021 outlier adjustment factor is 0.9466/0.9463 or 1.0003 (or 0.03 percent).

³ Percent change may not sum due to rounding.

- ¹ Because data necessary to classify some hospitals by category were missing, the total number of hospitals in each category may not equal the national total. Discharge data are from FY 2019, and hospital cost report data are from reporting periods beginning in FY 2018 and FY 2017.
- ² This column displays the payment impact of the hospital rate update and other adjustments, including the 2.4 percent update to the national standardized amount and the hospital-specific rate (the estimated 2.4 percent market basket update with the 0.0 percentage point multifactor productivity adjustment), and the 0.5 percentage point adjustment to the national standardized amount required under section 414 of the MACRA.
- ³ This column displays the payment impact of the changes to the Version 38 GROUPER, the changes to the relative weights and the recalibration of the MS-DRG weights based on FY 2019 MedPAR data in accordance with section 1886(d)(4)(C)(iii) of the Act. This column displays the application of the recalibration budget neutrality factor of 0.997975 in accordance with section 1886(d)(4)(C)(iii) of the Act.
- ⁴ This column displays the payment impact of the update to wage index data using FY 2017 cost report data and the OMB labor market area delineations based on 2010 Decennial Census data. This column displays the payment impact of the application of the wage budget neutrality factor, which is calculated separately from the recalibration budget neutrality factor, and is calculated in accordance with section 1886(d)(3)(E)(i) of the Act. The wage budget neutrality factor is 1.000447.
- ⁵ Shown here are the effects of geographic reclassifications by the Medicare Geographic Classification Review Board (MGCRB). The effects demonstrate the FY 2021 payment impact of going from no reclassifications to the reclassifications scheduled to be in effect for FY 2021. Reclassification for prior years has no bearing on the payment impacts shown here. This column reflects the geographic reclassification budget neutrality factor of 0.986616.
- ⁶ This column displays the effects of the rural floor. The Affordable Care Act requires the rural floor budget neutrality adjustment to be a 100 percent national level adjustment. The rural floor budget neutrality factor applied to the wage index is 0.993446.
- ⁷ This column shows the combined impact of the policy required under section 10324 of the Affordable Care Act that hospitals located in frontier States have a wage index no less than 1.0 and of section 1886(d)(13) of the Act, as added by section 505 of Pub. L. 108-173, which provides for an increase in a hospital's wage index if a threshold percentage of residents of the county where the hospital is located commute to work at hospitals in counties with higher wage indexes. These are not budget neutral policies.
- ⁸ This column shows the estimated change in payments from FY 2020 to FY 2021 including an estimated decrease in outlier payments of 0.2 percent (from our current estimate of FY 2020 outlier payments of approximately 5.3 percent to 5.1 percent projected for FY 2021 based on the FY 2019 MedPAR data used for this final rule calculated for purposes of this impact analysis). This column also includes the effects of the adoption of the revised labor market area delineations in OMB Bulletin 18-04 and the effects of the transition to apply a 5-percent cap on any decrease in a hospital's wage index from the hospital's final wage index from the prior fiscal year.

12. On pages 59078 and 59079 in the section titled "Effects of the Changes to Uncompensated Care Payments for FY 2021", the section's language (beginning with the phrase "Rural hospitals, in general, are projected to experience" and ending with the sentence "Hospitals with greater than 65 percent Medicare utilization are projected to receive an increase of 0.62 percent.") is corrected to read as follows: "Rural hospitals, in general, are projected to experience larger decreases in uncompensated care payments than their urban counterparts. Overall, rural hospitals are projected to receive a 7.19 percent decrease in uncompensated care payments, while urban hospitals are projected to receive a 0.29 percent decrease in uncompensated care payments. However, hospitals in large urban areas are projected to receive a 0.75 percent increase in uncompensated care payments and hospitals in other urban areas a 1.94 percent decrease.

By bed size, smaller rural hospitals are projected to receive the largest decreases in uncompensated care payments. Rural hospitals with 0-99 beds are projected to receive a 9.46 percent payment decrease, and rural hospitals with 100-249 beds are projected to receive a 7.44 percent decrease. These decreases for smaller rural hospitals are greater than the overall hospital average. However, larger rural hospitals with 250+ beds are projected to receive a 7.64 percent payment increase. In contrast, the smallest urban hospitals (0-99 beds) are

projected to receive an increase in uncompensated care payments of 2.61 percent, while urban hospitals with 100-249 beds are projected to receive a decrease of 1.05 percent, and larger urban hospitals with 250+ beds are projected to receive a 0.18 percent decrease in uncompensated care payments, which is less than the overall hospital average.

By region, rural hospitals are expected to receive larger than average decreases in uncompensated care payments in all Regions, except for rural hospitals in the Pacific Region, which are projected to receive an increase in uncompensated care payments of 9.14 percent. Urban hospitals are projected to receive a more varied range of payment changes. Urban hospitals in the New England, the Middle Atlantic, West South Central, and Mountain Regions, as well as urban hospitals in Puerto Rico, are projected to receive larger than average decreases in uncompensated care payments, while urban hospitals in the South Atlantic, East North Central, East South Central, West North Central, and Pacific Regions are projected to receive increases in uncompensated care payments.

By payment classification, hospitals in urban areas overall are expected to receive a 0.18 percent increase in uncompensated care payments, with hospitals in large urban areas expected to see an increase in uncompensated care payments of 1.15 percent, while hospitals in other urban areas are expected to receive a decrease of 1.60 percent. In contrast, hospitals in rural areas are projected to receive a decrease

in uncompensated care payments of 3.18 percent.

Nonteaching hospitals are projected to receive a payment decrease of 0.99 percent, teaching hospitals with fewer than 100 residents are projected to receive a payment decrease of 0.83 percent, and teaching hospitals with 100+ residents have a projected payment decrease of 0.41 percent. All of these decreases are consistent with the overall hospital average. Proprietary and government hospitals are projected to receive larger than average decreases of 2.42 and 1.14 percent respectively, while voluntary hospitals are expected to receive a payment decrease of 0.03 percent. Hospitals with less than 50 percent Medicare utilization are projected to receive decreases in uncompensated care payments consistent with the overall hospital average percent change, while hospitals with 50 to 65 percent Medicare utilization are projected to receive a larger than average decrease of 4.12 percent. Hospitals with greater than 65 percent Medicare utilization are projected to receive an increase of 0.80 percent."

13. On page 59085, lower half of the page, second column, last partial paragraph, line 20, the section reference "II.H." is corrected to read "IV.H."

14. On pages 59092 and 59093, the table titled "TABLE III.—COMPARISON OF TOTAL PAYMENTS PER CASE [FY 2020 PAYMENTS COMPARED TO FINAL FY 2021 PAYMENTS] is corrected to read as:
