II. Discussion

The NRC is issuing for public comment, Revision 2 to NUREG–1757, Volume 2, “Consolidated Decommissioning Guidance, Characterization, Survey, and Determination of Radiological Criteria.” NUREG–1757 has been revised to address lessons learned and experience gained from review of license termination plans, decommissioning plans, and final status surveys for licensees undergoing license termination. The NUREG has been updated to include new guidance related to dose modeling, as low as reasonably achievable (ALARA) criteria, surface water and groundwater characterization, use of engineered barriers, and radiological surveys (e.g., composite sampling, subsurface surveys, and surveys demonstrating indistinguishability from background).

The NRC staff recognizes that the proposed revisions to NUREG–1757 are significant advancements. Licensee may choose to take advantage of these advancements immediately. However, this draft NUREG–1757 is being published for comment, and the NRC staff may make revisions and corrections in the final document. Such changes from draft guidance would not be a change in position because a draft guidance document issued for comment does not constitute a staff position.

This NUREG is intended for use by applicants, licensees, and the NRC staff. The purpose of this notice is to notify the public that NUREG–1757, Volume 2, Revision 2 is being issued as a draft report for comment.

Dated: December 2, 2020.

For the Nuclear Regulatory Commission.

Director, Division of Decommissioning, Uranium Recovery, and Waste Programs, Office of Nuclear Material Safety and Safeguards.
