ADDRESSES: You may mail, hand carry, fax, or email written comments to Mr. Chip Lewis, Regional Environmental Protection Officer, BIA Western Regional Office, Branch of Environmental Quality Services, 2600 North Central Avenue, 4th Floor Mail Room, Phoenix, Arizona 85004-3008; fax (602) 379-3833; email: chip.lewis@bia.gov.

FOR FURTHER INFORMATION CONTACT: Mr. Chip Lewis, BIA Western Regional Office, Branch of Environmental Quality Services at (602) 379-6750 or Mr. Garry Cantley at (602) 379-6750.

SUPPLEMENTARY INFORMATION: The proposed Federal action, taken under 25 U.S.C. 415, is BIA's approval of a lease to accommodate the expansion of the solar field previously approved for the MSEC Project and the modification of the existing solar energy ground lease and related agreements entered into by the Moapa Band with the Applicant. The agreements provide for construction, operation and maintenance (O&M), and decommissioning of a 200-megawatt (MW) alternating current solar photovoltaic (PV) electricity generation facility located entirely on the Reservation and specifically on lands held in trust for the Moapa Band.

The MSEC Project was originally developed by Moapa Solar LLC and included an 850-acre solar site on the Reservation and associated rights-of-way (ROWs) on BLM-managed lands for an access road, gen-tie line, and water pipeline. Records of Decision (RODs) were issued by the BIA and BLM in May 2014 and BIA approved the lease one month later. The ROW was issued by BLM in August 2015 for the linear facilities. In March 2017, EDF Renewables Development, Inc. (EDFR) purchased the MSEC Project from the original owner and renamed the Project the Arrow Canyon Solar Project. EDFR subsequently transferred the Project to Arrow Canyon Solar, LLC. Currently, the approved MSEC Project and associated facilities have not yet been constructed.

The Applicant currently plans to expand the solar field on the Reservation from 850 acres to 2,200 acres. This expansion would occur on Tribal lands identified by the Moapa Band that are adjacent to the originally

approved MSEC site. The linear facilities, (*i.e.* main access road, 230kV gen-tie line, and water pipeline) as previously approved by the BLM would remain a part of the Project description; therefore, these facilities are not reevaluated. The FSEIS focuses on the expansion of the solar field only.

Construction of the Project is expected to take approximately 18 to 20 months. The Applicant is expected to operate the energy facility up to 50 years. Major components of the solar site would include multiple blocks of solar PV panels mounted on tracking systems, inverters, transformers, collection lines, battery storage facilities, project substation, and O&M facilities. Water will be needed during construction primarily for dust control and a minimal amount will be needed during operations for administrative and sanitary water use and panel washing. The water supply required for the Project would be from wells owned by the Moapa Band and delivered to the site via the previously approved water pipeline or trucks. Access to the ACSP will be provided via North Las Vegas Boulevard from the I-15/US 93 interchange.

The purposes of the proposed Project are, among other things, to: (1) help provide a long-term, diverse, and viable economic revenue base and job opportunities for the Moapa Band; (2) meet the terms of the existing Power Purchase Agreement for the output of the Project; (3) help Nevada and neighboring states to meet their State renewable energy needs; and (4) allow the Moapa Band, in partnership with the Applicant, to optimize the use of the lease site while maximizing the potential economic benefit to the Moapa Band.

The BIA will use the FSEIS to make a decision on the land lease application under its jurisdiction; the EPA may use the document to make decisions under its authorities; the Band may use the FSEIS to make decisions under its Environmental Policy Ordinance; and the USFWS may use the FSEIS to support its decision under the Endangered Species Act.
