

IHA) and alternatives with respect to potential impacts on the human environment.

This action is consistent with categories of activities identified in Categorical Exclusion B4 (IHAs with no anticipated serious injury or mortality) of the Companion Manual for NOAA Administrative Order 216–6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS has determined that the issuance of the IHA qualifies to be categorically excluded from further NEPA review.

Endangered Species Act (ESA)

Section 7(a)(2) of the ESA (16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat.

No incidental take of ESA-listed species is authorized or expected to result from this activity. Therefore, NMFS has determined that formal consultation under section 7 of the ESA is not required for this action.

Authorization

NMFS has issued an IHA to the Coast Guard for the potential harassment of small numbers of five marine mammal species incidental to the Base Los Angeles/Long Beach Wharf Expansion project in Los Angeles, California, provided the previously mentioned mitigation, monitoring and reporting requirements are followed.

Multistakeholder Process on Promoting Software Component Transparency

AGENCY: National Telecommunications and Information Administration, Department of Commerce.

ADDRESSES: The meeting will be held virtually, with online slide share and dial-in information to be posted at <https://www.ntia.gov/SoftwareTransparency>.

SUPPLEMENTARY INFORMATION:

Background

This NTIA cybersecurity multistakeholder process focuses on promoting software component transparency.¹ Most modern software is not written completely from scratch, but includes existing components, modules, and libraries from the open source and commercial software world. Modern development practices such as code reuse, and a dynamic IT marketplace with acquisitions and mergers, make it challenging to track the use of software components. The Internet of Things compounds this phenomenon, as new organizations, enterprises, and innovators take on the role of software developer to add “smart” features or connectivity to their products. While the majority of libraries and components do not have known vulnerabilities, many do, and the sheer quantity of software means that some software products ship with vulnerable or out-of-date components.

The first meeting of this multistakeholder process was held on July 19, 2018, in Washington, DC.² Stakeholders presented multiple perspectives, and identified several inter-related work streams: Understanding the Problem, Use Cases and State of Practice, Standards and Formats, and Healthcare Proof of

Concept. Since then, stakeholders have been discussing key issues and developing products such as guidance documents. NTIA acts as the convener, but stakeholders drive the outcomes. Success of the process will be evaluated by the extent to which broader findings on software component transparency are implemented across the ecosystem.

The first set of stakeholder-drafted documents on Software Bills of Materials was published by NTIA in November 2019. Those documents, and subsequent consensus-approved drafts from the community, are available at: <https://www.ntia.gov/SBOM>. The main objectives of the January 13, 2021 meeting are to share progress from the working groups; to give feedback on the ongoing work around technical challenges, tooling, demonstrations, and awareness and adoption; and to continue discussions around potential guidance or playbook documents. This meeting will also feature short demonstrations of SBOM-related tools and services to help the community understand the growth of the broader ecosystem. Demonstration suggestions and proposals should be 250 words or less and should be submitted to Allan Friedman at afriedman@ntia.gov by December 21, 2020. More information about stakeholders' work is available at: <https://www.ntia.gov/SoftwareTransparency>.

Time and Date: NTIA will convene the next meeting of the multistakeholder process on Software Component Transparency on January 13, 2021, from 12:00 p.m. to 4:00 p.m. Eastern Time. The exact time of the meeting is subject to change. Please refer to NTIA's website, <https://www.ntia.gov/SoftwareTransparency>, for the most current information.

Place: The meeting will be held virtually, with online slide share and dial-in information to be posted at <https://www.ntia.gov/SoftwareTransparency>. Please refer to NTIA's website, <https://www.ntia.gov/SoftwareTransparency>, for the most current information.

Other Information: The meeting is open to the public and the press on a first-come, first-served basis.

The virtual meeting is accessible to people with disabilities. Requests for real-time captioning or other auxiliary aids should be directed to Allan Friedman at (202) 482–4281 or afriedman@ntia.gov at least seven (7) business days prior to the meeting.
