

Attachments 2 and 3; and Appendix H. In the NH MS4 permit, the following permit parts were the only parts open for modification and comment: 2.0; 2.1; 2.1.1; 2.1.2.a; 2.2.; 2.2.2 (paragraphs 2 and 3); 2.3.3.1; 2.3.5; 2.3.5.3; 2.3.6.a; 2.3.7.2.b.iii; 3.1.3; 4.1.4; 4.4.2.3; Appendix A; Appendix F part III and Attachment 3; and Appendix H. The modifications provide either enhanced clarity regarding permit terms or greater flexibility in permit implementation. EPA prepared Statements of Basis that fully explained the proposed modifications. See www.regulations.gov Docket document EPA-R01-OW-2020-0216-0002, "Statement of Basis for Massachusetts Small MS4 General Permit 2020 Modifications," and document EPA-R01-OW-2020-0216-0005, "Statement of Basis for New Hampshire Small MS4 General Permit 2020 Modifications." EPA has considered all significant public comments on the permit sections that were open for proposed modification. The docket also contains a Memorandum to the Record discussing the potential impacts of the permit modifications and the Response to Comments documents for the Massachusetts and New Hampshire permits. Based on public comments, EPA plans to finalize the permits as proposed, except for the following changes:

Massachusetts Small MS4 General Permit

- EPA updated the typographical error in Appendix F, Table F-6. Grafton and Shrewsbury have the same required percent reduction of 49% for phosphorus from urban stormwater sources for Flint Pond and Lake Quinsigamond.

- EPA updated the permit language to clarify that Part 6.5 is not applicable to the MA Department of Conservation and Recreation, which has its own phosphorus reduction requirements, as indicated in Appendix F Part A.I of the permit.

New Hampshire Small MS4 General Permit

- The proposed modifications to Part 2.3.6 (post-construction stormwater minimum control measures) attempted to rely on the Southeast Watershed Alliance (SWA) model ordinances, a successful local program as described in the Statement of Basis, but erred in requiring some pieces of the SWA Model Ordinance to be adopted by SWA communities and others to be adopted by non-SWA communities. In response to comments noting confusion as to which requirements applied to which

communities, EPA has updated the language in Part 2.3.6 to remove the different requirements for those communities in and out of the SWA. Consistent with the option in the 2017 NH MS4 Permit, the final permit modification requires that all New Hampshire permittees—those in the SWA and those outside the SWA—adopt a regulatory mechanism that is at least as stringent as SWA Model Standards Section 4 Element C and Element D in their entirety.

EPA has emailed notifications of the Final Permit Modifications to regulated parties, parties to this mediation, and other interested parties on EPA Region 1's NPDES permit mailing list. The official public docket for this action, EPA-R01-OW-2020-0216, contains copies of the final permits, response to comments documents, a memorandum describing economic impacts of the modifications, and other supporting material. An electronic version of the public docket is available through www.regulations.gov. These documents are also posted on EPA Region 1's website at <https://www.epa.gov/npdes-permits/npdes-stormwater-permit-program-new-england#smallms4program>. The official public docket is available for public viewing at U.S. EPA Region 1, John W. McCormack Building, 5 Post Office Square, Boston, MA 02109. SUPPLEMENTARY INFORMATION:

I. Executive Summary

A. What action is the Agency taking?

EPA is announcing the availability of and soliciting public comment on the draft compliance guide for the significant new uses EPA identified under section 5(a) the Toxic Substances Control Act (TSCA), 15 U.S.C. 2604(a), for the import of articles with certain long-chain perfluoroalkyl carboxylate (LCPFAC) chemicals as part of the surface coating, as established by EPA's final rule "Long-Chain Perfluoroalkyl Carboxylate and Perfluoroalkyl Sulfonate Chemical Substances; Significant New Use Rule" (85 FR 45109, July 27, 2020) (FRL-10010-44) (Ref. 1). Specifically, the draft compliance guide provides additional clarity on what is meant by a "surface coating," identifies which entities are regulated, describes the activities that are required or prohibited, and summarizes the notification requirements of the final significant new use rule (SNUR).

During the public comment period for the 2020 supplemental proposal (Ref. 2), several commenters asked EPA to define "surface coating" and to include a definition in the regulatory text. In the final rule (Ref. 1), EPA did not finalize a regulatory definition of "surface coating." Rather, EPA stated that the Agency would issue guidance for imported articles that may contain LCPFAC chemical substances as part of a surface coating. This draft compliance guide was prepared consistent with

Executive Order 13891 (84 FR 55235, October 9, 2019) and EPA's procedural rule for guidance, "EPA Guidance; Administrative Procedures for Issuance and Public Petitions" (85 FR 66230, October 19, 2020).

B. Do guidance documents contain binding requirements?

While the requirements in the statutes and Agency regulations are binding on EPA and the regulated entities, the contents of this compliance guide do not have the force and effect of law and are not meant to bind the public in any way. This compliance guide is intended only to provide clarity to the public regarding existing requirements under the law or agency policies. The statements in the compliance guide are intended solely as guidance to aid in complying with the EPA regulations in 40 CFR part 721.

C. Does this action apply to me?

You may be potentially affected by this action if you import articles containing certain LCPFAC chemical substances. The following list of North American Industrial Classification System (NAICS) codes is not intended to be exhaustive, but rather provides a guide to help readers determine whether this document applies to them. Potentially affected entities may include:

- Manufacturers (including importers) of one or more of subject chemical substances (NAICS codes 325 and 324110) (e.g., chemical manufacturing and petroleum refineries).

this action to a particular entity, consult the technical information contact listed under **FOR FURTHER INFORMATION CONTACT**.
