**Draft Environmental Assessment and
Proposed Habitat Conservation Plan;
Receipt of an Application for an
Incidental Take Permit, Bluff Point
Wind Energy Center, Jay and
Randolph Counties, Indiana**

AGENCY: Fish and Wildlife Service,
Interior.

ACTION: Notice of availability of
documents; request for comment and
information.

SUMMARY: We, the U.S. Fish and
Wildlife Service (Service), have received
an application from NextEra Energy
Bluff Point LLC (applicant), for an
incidental take permit (ITP) under the
Endangered Species Act of 1973, as
amended (ESA), for its Bluff Point Wind
Energy Center (project). If approved, the
ITP would be for a 30-year period and
would authorize the incidental take of
an endangered species, the Indiana bat,
and a threatened species, the northern
long-eared bat. The applicant has
prepared a habitat conservation plan
(HCP) that describes the actions and
measures that the applicant would
implement to avoid, minimize, and
mitigate incidental take of the Indiana
bat and northern long-eared bat. We also
announce the availability of a draft
Environmental Assessment (DEA),
which has been prepared in response to
the permit application in accordance
with the requirements of the National
Environmental Policy Act (NEPA). We
request public comment on the
application, the DEA, and associated
documents.

DATES: We will accept comments
received or postmarked on or before
January 15, 2021.

ADDRESSES: *Document availability:*

SUPPLEMENTARY INFORMATION:

Background

Section 9 of the Endangered Species
Act of 1973, as amended (ESA; 16
U.S.C. 1531 *et seq.*), and its
implementing regulations prohibit the
“take” of animal species listed as
endangered or threatened. Take is
defined under the ESA as to “harass,
harm, pursue, hunt, shoot, wound, kill,
trap, capture, or collect “listed animal
species,” or to attempt to engage in such
conduct” (16 U.S.C. 1532). However,
under section 10(a) of the ESA, we may
issue permits to authorize incidental
take of listed species. “Incidental take”
is defined by the ESA as take that is
incidental to, and not the purpose of,
carrying out an otherwise lawful activity
(16 U.S.C. 1539). Regulations governing
incidental take permits for endangered
and threatened species, respectively, are
found in the Code of Federal
Regulations at 50 CFR 17.22 and 50 CFR
17.32.

Applicant's Proposed Project

The applicant requests a 30-year ITP
to take the federally endangered Indiana
bat (*Myotis sodalis*) and threatened
northern long-eared bat (*Myotis*

septentrionalis) at the Bluff Point Wind
Resource Area (BPWRA) in Jay and
Randolph Counties, consisting of
approximately 23,613 acres of private
land. The applicant determined that
unavoidable take is reasonably certain
to occur incidental to operation of 57
previously constructed wind turbines.
The proposed conservation strategy in
the applicant's proposed HCP is
designed to avoid, minimize, and
mitigate the impacts of the covered
activity on the covered species. The
biological goals and objectives are to
minimize potential take of Indiana bats
and northern long-eared bats through
on-site minimization measures and to
provide habitat conservation measures
for Indiana bats and northern long-eared
bats to offset any unavoidable impacts
from operations of the project. The
BPWRA includes confirmed Indiana bat
summer roost habitat and northern long-
eared bat summer maternity habitat. The
HCP provides on-site avoidance and
minimization measures, which include
seasonal turbine operational curtailment
and adaptive management measures that
allow for modifications to the
minimization and mitigation measures
based on monitoring results and other
triggers, and a 1,000 foot minimization
buffer during the summer season to
protect potential summer habitat for
both covered species. Based on the
available data, the predicted level of
take is anticipated to be 63 Indiana bats
and 32 northern long-eared bats over the
30-year permit term. However, the
applicant requests a permit to take 165
Indiana bats and 84 northern long-eared
bats over the 30-year permit term due to
the uncertainty associated with
estimating take and the exact (or
specific) reduction in fatalities from the
minimization without facility specific
data. To fully offset the impacts of the
taking of 122 Indiana bats and 42
northern long-eared bats, the applicant
proposes to protect in perpetuity 77.2
acres of known maternity colony habitat
and staging/swarming habitat through a
conservation easement held by a 501(c)3
non-profit at a Land of Indiana site in
Greene County, Indiana through a third-
party mitigation provider, First Indiana
Resources, LLC. The HCP includes
adaptive management measures if
mitigation is insufficient to fully offset
the impact of the actual take determined
through mortality monitoring.

National Environmental Policy Act

The issuance of an ITP is a Federal
action that triggers the need for
compliance with NEPA (42 U.S.C. 4321
et seq.). We prepared a draft EA that
analyzes the environmental impacts on
the human environment resulting from
