DEPARTMENT OF JUSTICE

Bureau of Alcohol, Tobacco, Firearms and Explosives

[OMB Number 1140–NEW]

Agency Information Collection Activities; Proposed eCollection for eComments Requested; New Information Collection; Prohibited Persons Questionnaire—ATF Form 8620.57

AGENCY: Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

ACTION: 60-Day notice.

SUMMARY: The Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), Department of Justice (DOJ), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection (IC) is also being published to obtain comments from the public and affected agencies.

DATES: Comments are encouraged and will be accepted for 60 days until March 8, 2021.

FOR FURTHER INFORMATION CONTACT: If you have additional comments, regarding the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact: Lakisha Gregory, Chief, Personnel Security Division, either by mail at 99 New York Avenue NE, Washington, DC 20226, by email at Lakisha.Gregory@atf.gov, or by telephone at 202–648–9260.

SUPPLEMENTARY INFORMATION: Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

1. Evaluate the accuracy of the agency’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
2. Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
3. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Overview of This Information Collection

1. Type of Information Collection (check justification or form 83): New collection.
2. The Title of the Form/Collection: Prohibited Persons Questionnaire.
3. The agency form number, if any, and the applicable component of the Department sponsoring the collection: Form number (if applicable): ATF Form 8620.57.
   Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.
4. Affected public who will be asked or required to respond, as well as a brief abstract:
   Primary: Individuals or households. Other (if applicable): None.
   Abstract: The Prohibited Persons Questionnaire—ATF Form 8620.57 will be used to determine if a candidate for Federal or contractor employment at the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), is prohibited from possessing or receiving firearms or explosives as described in 18 U.S.C. 922(g) or (n), and/or 18 U.S.C. 842(l).
5. An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: An estimated 2,000 respondents will use the form annually, and it will take each respondent approximately 5 minutes to complete their responses.
6. An estimate of the total public burden (in hours) associated with the collection: The estimated annual public burden associated with this collection is 167 hours, which is equal to 2,000 (# of respondents) * 0.083333 (5 minutes).

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 3E.405A, Washington, DC 20530.

Melody Braswell,
Department Clearance Officer for PRA,
Department of Justice.

LIBRARY OF CONGRESS

Copyright Office

[Docket No. 2020–13]

Satellite Television Community Protection and Promotion Act of 2019 Study: Notice and Request for Public Comment

AGENCY: Copyright Office, Library of Congress.

ACTION: Notice of Inquiry.

SUMMARY: The U.S. Copyright Office is initiating a study to evaluate the impact on the satellite television market of the Satellite Television Community Protection and Promotion Act of 2019’s adoption of new statutory requirements for certain uses of the section 119 compulsory license for distant-into-local satellite transmission, and sunsetting of other uses from the license. The Office seeks public comment on this topic to assist in preparing a report to Congress.

DATES: Written comments are due on or before March 8, 2021.

ADDRESSES: The Copyright Office is using the regulations.gov system for the submission and posting of public comments in this proceeding. All comments are therefore to be submitted electronically through regulations.gov. Specific instructions are available on the Copyright Office website at http://www.copyright.gov/policy/119. If electronic submission of comments is not feasible due to lack of access to a computer and/or the internet, please contact the Office, using the contact information below, for special instructions.

FOR FURTHER INFORMATION CONTACT: Kimberley Isbell, Deputy Director of Policy and International Affairs, kisbell@copyright.gov, or Chris Weston, Senior Counsel for Policy and International Affairs, cwes@copyright.gov. They can be reached by telephone at 202–707–3000.

SUPPLEMENTARY INFORMATION: On December 20, 2019, the President signed the Satellite Television Community Protection and Promotion Act of 2019 (“STCPA”), which makes permanent the satellite carrier distant broadcast
signal license found in section 119 of the Copyright Act (17 U.S.C. 119) for non-network stations as well as for network stations transmitted both to recreational vehicles (“RVs”) and commercial trucks and to “short markets” that lack one or more of the four most widely available network stations.1 The STCPPA removes other previously permitted uses of the license and requires that a satellite carrier provide local service in all 210 designated market areas (“DMAs”) if it wishes to utilize the section 119 license.2 The STCPPA also amends several provisions of the Communications Act.3 Simultaneously with the enactment of the STCPPA, the Appropriations Committee of the U.S. House of Representatives directed the Register of Copyrights to conduct a study on the impact of the expiration of the STCPPA’s predecessor—the STELA Reauthorization Act of 2014 (“STELAR”)—on the satellite television market.4 The Committee expressed concern that the distant signal provisions of section 119 “may provide a below-market incentive for a mature satellite industry to restrict local news transmission.”5

2 The STCPPA contained a transition provision that allowed satellite carriers who had been utilizing the license but did not satisfy the additional conditions set forth in the STCPPA to continue to use a limited version of the existing license through May 31, 2020. That transitional authorization has now expired. See infra Section I.B.
3 47 U.S.C. 151 et seq.
5 Staff of H.R. Comm. on Appropriations, 116th Cong., Further Consolidated Appropriations Act, 2020, Legislative Text and Explanatory Statement (Comm. Print 2020). While STCPPA made permanent several provisions of STELAR, it also allowed other provisions to expire.
6 Id.
7 Public Law 100–667, 102 Stat. 3949.
8 For purposes of the Satellite Home Viewer Act of 1988, “unserved households” were defined as also known as a compulsory license, allowed satellite carriers to retransmit broadcast signals without the network’s permission, so long as they paid a government-determined royalty rate.9 The section 119 license was intended to encourage satellite carriers to “develop and flourish” in the absence of a sufficient marketplace10 and was scheduled to expire at the end of 1994.11 The section 119 license created by SHVA was extended for successive five-year periods in 1994,12 1999,13 2004,14 2010,15 and 2014.16 With each extension, Congress also modified the statutory terms of the section 119 license. For example, by the time of the 2014 enactment of STELAR, there were multiple types of unserved households eligible to receive distant broadcast signals defined in the statute, including RVs, commercial trucks, and households in “short markets” (markets where one of the four most viewed networks is not available from the local carrier).

1 I. Background

A. The Section 119 Distant Broadcast Signal License

In 1988, Congress enacted the Satellite Home Viewer Act (“SHVA”),7 which created a temporary statutory license (section 119 of the Copyright Act) for satellite carriers to retransmit distant network and certain non-network broadcasts to subscribers with satellite dishes. Distant network retransmissions were available only to those subscribers living in “unserved households.”8 This statutory license, 193

The Copyright Office has, since 1989, administered the section 119 license, which includes collecting statements of account and royalties from satellite carriers and distributing the royalties to the appropriate rightsholders. See Statutory License for Secondary Transmissions for Satellite Carriers— Section 119, U.S. Copyright Office, https://www.copyright.gov/licensing/sec_119.html.10

9 The Copyright Office, The Cable and Satellite Carrier Compulsory Licenses: An Overview and Analysis 104–05 (1992), has explained that a statutory license should be for another fixed-year term.11

11 Public Law 100–667, 102 Stat. 3949, 3960.

17 See U.S. Copyright Office, Analysis and Recommendations Regarding the Section 119 paid by the other satellite carrier, DISH Network, decreased by 85% during the same reporting period.18 In terms of gross numbers, as of 2019, between 500,000 and 870,000 households received at least one distant signal under the pre-STCPPA section 119 license.19 It is estimated that these subscribers typically live in rural areas of the United States.20

This decline in use of the section 119 license has been attributed primarily to the transformation of the television marketplace since 2014, which is exemplified by “over-the-top” (“OTT”) television services that offer broadcast network programming over the internet, such as Hulu with Live TV, YouTube TV, and Sling TV, none of which rely upon a statutory license to operate but instead negotiate licenses with broadcast networks in the marketplace.21

B. The Satellite Television Community Protection and Promotion Act of 2019

With STELAR due to expire at the end of 2019, and with it the section 119 compulsory license, Congress had to decide whether to extend the license again, and, if so, whether the extension should be for another fixed-year term. Congress decided not to reauthorize several of the uses of the license and to

18 See id. Since the 2018 reporting periods, satellite receipts have further declined. According to information from the U.S. Copyright Office’s Licensing Division, total satellite receipts in 2019 were down 20.8% from 2018, and total satellite receipts for the first half of 2020 were down 20% from the first half of 2019. See Licensing Division, U.S. Copyright Office, Report of Receipts 10/31/2020, 2, https://www.copyright.gov/licensing/receipts.pdf.
make others permanent. Specifically, in the STCPPA, Congress removed coverage of the following “unserved households” from the section 119 distant network signal license:

- Households that cannot receive a local over-the-air signal via an antenna;\(^{23}\)
- Households that receive a waiver from a local network affiliate to receive a distant signal;\(^{24}\)
- “Grandfathered” households that received distant signals via a section 119 license on or before October 31, 1999;\(^{25}\)
- Households eligible for the statutory exemption related to receiving “C-Band” satellite signals.\(^{26}\)

For a satellite carrier to transmit distant signals to these households, it must now negotiate directly with the broadcaster for a license.

Additionally, the STCPPA made availability of the section 119 license for transmission of distant network signals permanent for the following “unserved households”:\(^{27}\)

- RVs and commercial trucks;\(^{28}\)
- Subscribers located in short markets.\(^{29}\)

The STCPPA made the use of the section 119 license for these purposes contingent upon satellite carriers providing local-into-local network signals to each of the 210 television designated market areas (“DMAs”).\(^{30}\) It also established a transition period (through May 31, 2020) during which subscribers covered under STELAR who were no longer eligible for the new license (as amended by the STCPPA) remained eligible to receive distant network signals from their satellite carriers.\(^{31}\)

In amending section 119, Congress was particularly concerned with satellite subscribers’ ability to access local network stations. As the House Judiciary Committee described the situation in its STCPPA Report:

Most satellite television subscribers receive local broadcast programming that is retransmitted from their local network stations. When a satellite carrier provides such “local service,” subscribers have access to important local news, local weather, and local emergency information. For some (typically rural) subscribers, instead of seeing news, weather, or emergency information from their own towns, they get retransmissions of “distant” programming from outside of their local market. Those subscribers see network programming from a larger, sometimes much farther, market like New York or Los Angeles instead.\(^{32}\)

In other words, Congress believed that the section 119 license, operating under government-set royalty rates, risked undermining rural communities’ access to local broadcast stations because it encouraged satellite carriers to carry distant-into-local instead of local-into-local broadcast signals.

In light of that concern, Congress sought in the STCPPA to account for “the need to prioritize access to local programming” \(^{33}\) by requiring every satellite carrier using the section 119 license to provide local network television service in all of the 210 DMAs. Additionally, by removing several household types from coverage under section 119, Congress believed that these households would be more likely to receive local instead of distant network signals.\(^{34}\) Congress also “acknowledged the vulnerabilities that some households might face in a purely market-based system” \(^{35}\) by reauthorizing and making permanent the section 119 license for RVs and commercial trucks and households in short markets.

C. The Current Study

In its Committee Print accompanying the Further Consolidated Appropriations Act, 2020, the Committee on Appropriations of the U.S. House of Representatives, in agreement with the U.S. Senate, expressed a “concern that the distant signal provision contained in the STELA Reauthorization Act of 2014 (“STELAR”) . . . may provide a below-market incentive for a mature satellite industry to restrict local news transmission.” \(^{36}\) The statement went on to recognize that STELAR was due to expire at the end of 2019, and directed the Register of Copyrights to “conduct a study on the impact on the market post-expiration,” and deliver the results of this study to the House and Senate Committees on Appropriations by June 20, 2021.\(^{37}\)

Pursuant to this direction, the U.S. Copyright Office is seeking public comment via this notice, as well as via a separate questionnaire that will be directed to “unserved household” subscribers both previously and currently covered by the section 119 license. A copy of this questionnaire is available at http://www.copyright.gov/policy/119. The questions in this notice are divided as to who should answer them, based upon the different stakeholders in the section 119 satellite television ecosystem. The overall aim of these questions is to ascertain (a) whether the STCPPA appropriately incentivizes satellite carriers to provide local network signals to their residential subscribers and (b) the impact of the changes to the section 119 license on RVers and commercial truckers.

II. Subjects of Inquiry

The Copyright Office invites written comments on the subjects below. A party choosing to respond to this Notice of Inquiry need not address every subject, but the Office requests that responding parties clearly identify and separately address each subject for which a response is submitted.

1. General Questions

a. Post-STCPPA, do households that previously did not receive local network stations from their satellite provider now receive them?

b. The STCPPA removed the use of the section 119 license for households that are unable to receive local network stations via an antenna, as well as for certain other categories of households. How do these households now receive network signals? Are they distant or local network signals?

c. The STCPPA makes a revised section 119 license permanent, on the condition that all licensees provide local-into-local service. Does this change resolve previously-voiced concerns about a subsidized distant-into-local license discouraging the provision of local network service by section 119 licensees?

d. Have the changes to the section 119 license made by STCPPA affected the availability of network retransmission service for households previously covered by the license? If so, how?

e. Have the changes to the section 119 license made by STCPPA affected the market for television service for households previously covered by the license? If so, how?

---

\(^{28}\) The STCPPA also made permanent the section 119 license for transmission of distant non-network signals to all subscribers. See 17 U.S.C. 119(a)(1).

\(^{38}\) Id.
2. Questions for Satellite Television Subscribers in Unserved Households

When answering, please indicate if you receive satellite service at your residence, your RV, or your commercial truck. Please also indicate which category of “unserved household” applies to you.

a. Before June 1, 2020, did you receive distant network retransmissions (i.e., network stations from markets outside of your local area) from DISH or DirecTV?

i. If your answer is “yes,” did you continue to receive the same distant networks after June 1, 2020?
   (1) If you continued to receive the same distant networks, did the price of your subscription increase or decrease? If it did, was the reason for the change explained?
   (2) If you did not continue to receive the same distant networks after June 1, 2020, did you receive access to new networks that are physically closer to you as a replacement for the distant networks you no longer receive? Did the price of your subscription increase or decrease? If it did, was the reason for the change explained?

ii. If your answer is “no,” did the price of your satellite subscription increase or decrease on or after June 1, 2020? If it did, was the reason for the change explained?

b. Before June 1, 2020, did you receive local network retransmissions (i.e., network stations from a nearby market) from DISH or DirecTV?

i. If your answer is “yes,” did you continue to receive local networks from DISH or DirecTV on or after June 1, 2020?

   (1) If you continued to receive local networks, did the price of your subscription increase or decrease? If it did, was the reason for the change explained?
   (2) If you did not continue to receive local networks, did you receive access to replacement networks? Were these replacement networks physically closer to or further from your location? Did the price of your subscription increase or decrease? If it did, was the reason for the change explained?

iii. If your answer is “no,” what approach did you take to providing distant-into-local network retransmissions after May 31, 2020?

4. Questions for Satellite Carriers

a. Has the expiration of certain provisions of the section 119 license impacted your ability to provide comparable television service to households previously subject to the section 119 license? If so, how?

Shira Perlmutter,
Register of Copyrights and Director of the U.S. Copyright Office.
