

to three minutes for the community surveys and two minutes for the national survey.

Total Estimated Annual Burden

Hours: 1,268 hours for the total study.

NHTSA estimates that for the 3,400 AmeriSpeak panelists that will have to be screened, the estimated total burden is 113 hours (3,400 × 2 min./60). For the

3,100 qualified volunteers who take the national survey, the estimated total burden hours are 775 hours (3,100 × 15 min./60), yielding at least 3,000 fully completed surveys. Likewise, the total estimated burden for the maximum of 1,600 potential participants to be screened for the community survey (400

per wave × 2 communities × 2 waves) is 80 hours (1,600 × 3 min./60). The estimated total burden hours for the 1,200 fully completed surveys (300 per wave × 2 communities × 2 waves) is 300 hours (1,200 × 15 min./60). Table 1 provides a summary of the burden hours per survey.

Participant group	Form name	Number of responses per participant	Estimate burden per response (min.)	Number of participants	Total burden hours
National Survey	Screening	1	2	3,400	113
National Survey	Online Survey	1	15	3,100	775
Community Survey	Screening	1	3	1,600	80
Community Survey	Online Survey	1	15	1,200	300
Total	1,268

Estimated Total Annual Burden Cost:

The only cost to participants will be time spent responding to the screening and the subsequent survey if they volunteer. Participants who volunteer and begin the survey will receive compensation for this time.
