# FEDERAL REGISTER

Vol. 86 Thursday,
No. 9 January 14, 2021

Pages 2953–3732

OFFICE OF THE FEDERAL REGISTER

The **FEDERAL REGISTER** (ISSN 0097–6326) is published daily, Monday through Friday, except official holidays, by the Office of the Federal Register, National Archives and Records Administration, under the Federal Register Act (44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). The Superintendent of Documents, U.S. Government Publishing Office, is the exclusive distributor of the official edition. Periodicals postage is paid at Washington, DC.

The **FEDERAL REGISTER** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders, Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress, and other Federal agency documents of public interest.

Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless the issuing agency requests earlier filing. For a list of documents currently on file for public inspection, see *www.federalregister.gov.*

**The seal of the National Archives and Records Administration authenticates the Federal Register** as the official serial publication established under the Federal Register Act. Under 44 U.S.C. 1507, the contents of the **Federal Register** shall be judicially noticed.

The **Federal Register** is published in paper and on 24x microfiche. It is also available online at no charge at *www.govinfo.gov*, a service of the U.S. Government Publishing Office.

The online edition of the **Federal Register** is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions (44 U.S.C. 4101 and 1 CFR 5.10). It is updated by 6:00 a.m. each day the **Federal Register** is published and includes both text and graphics from Volume 1, 1 (March 14, 1936) forward. For more information, contact the GPO Customer Contact Center, U.S. Government Publishing Office. Phone 202-512-1800 or 866-512-1800 (toll free). E-mail, *gpocusthelp.com.*

The annual subscription price for the **Federal Register** paper edition is $860 plus postage, or $929, for a combined **Federal Register, Federal Register** Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the **Federal Register** Index and LSA is $330, plus postage. Six month subscriptions are available for one-half the annual rate. The prevailing postal rates will be applied to orders according to the delivery method requested. The price of a single copy of the daily **Federal Register,** including postage, is based on the number of pages: $11 for an issue containing less than 200 pages; $22 for an issue containing 200 to 400 pages; and $33 for an issue containing more than 400 pages. Single issues of the microfiche edition may be purchased for $3 per copy, including postage. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard, American Express, or Discover. Mail to: U.S. Government Publishing Office—New Orders, P.O. Box 979050, St. Louis, MO 63197-9000; or call toll free 1-866-512-1800, DC area 202-512-1800; or go to the U.S. Government Online Bookstore site, see *bookstore.gpo.gov.*

There are no restrictions on the republication of material appearing in the **Federal Register.**

**How To Cite This Publication:** Use the volume number and the page number. Example: 85 FR 12345.

**Postmaster:** Send address changes to the Superintendent of Documents, Federal Register, U.S. Government Publishing Office, Washington, DC 20402, along with the entire mailing label from the last issue received.

The Federal Register Printing Savings Act of 2017 (Pub. L. 115-120) placed restrictions on distribution of official printed copies of the daily **Federal Register** to members of Congress and Federal offices. Under this Act, the Director of the Government Publishing Office may not provide printed copies of the daily **Federal Register** unless a Member or other Federal office requests a specific issue or a subscription to the print edition. For more information on how to subscribe use the following website link: *https://www.gpo.gov/frsubs.*

Printed on recycled paper.

**AGENCY:** Office of the General Counsel, U.S. Department of Energy.

**ACTION:** Final rule.

**SUMMARY:** The Department of Energy (''DOE'') publishes this final rule to adjust DOE's civil monetary penalties (''CMPs'') for inflation as mandated by the Federal Civil Penalties Inflation Adjustment Act of 1990, as further amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (collectively referred to herein as ''the Act''). This rule adjusts CMPs within the jurisdiction of DOE to the maximum amount required by the Act.

**DATES:** This rule is effective on January 14, 2021.

**FOR FURTHER INFORMATION CONTACT:** Preeti Chaudhari, U.S. Department of Energy, Office of the General Counsel, GC–33, 1000 Independence Avenue SW, Washington, DC 20585, (202) 586–8078, *preeti.chaudhari@hq.doe.gov.*

**SUPPLEMENTARY INFORMATION:**

I. Background
II. Method of Calculation
III. Summary of the Final Rule
IV. Final Rulemaking
V. Regulatory Review

## I. Background

In order to improve the effectiveness of CMPs and to maintain their deterrent effect, the Federal Civil Penalties Inflation Adjustment Act of 1990, 28 U.S.C. 2461 note (''the Inflation Adjustment Act''), as further amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Pub. L. 114–74) (''the 2015 Act''), requires Federal agencies to adjust each CMP provided by law within the jurisdiction of the agency. The 2015 Act required agencies to adjust the level of CMPs with an initial ''catch-up'' adjustment through an interim final rulemaking and to make subsequent annual adjustments for inflation, notwithstanding 5 U.S.C. 553. DOE's initial catch-up adjustment interim final rule was published June 28, 2016 (81 FR 41790) and adopted as final without amendment on December 30, 2016 (81 FR 96349). The 2015 Act also provides that any increase in a CMP shall apply only to CMPs, including those whose associated violation predated such increase, which are assessed after the date the increase takes effect.

In accordance with the 2015 Act, the Office of Management and Budget (OMB) must issue annually guidance on adjustments to civil monetary penalties. This final rule to adjust civil monetary penalties for 2021 is issued in accordance with applicable law and OMB's guidance memorandum on implementation of the 2021 annual adjustment.[1]

## II. Method of Calculation

The method of calculating CMP adjustments applied in this final rule is required by the 2015 Act. Under the 2015 Act, annual inflation adjustments subsequent to the initial catch-up adjustment are to be based on the percent change between the October Consumer Price Index for all Urban Consumers (CPI–U) preceding the date of the adjustment, and the prior year's October CPI–U. Pursuant to the aforementioned OMB guidance memorandum, the adjustment multiplier for 2021 is 1.01182. In order to complete the 2021 annual adjustment, each CMP is multiplied by the 2021 adjustment multiplier. Under the 2015 Act, any increase in CMP must be rounded to the nearest multiple of $1.

## III. Summary of the Final Rule

The following list summarizes DOE authorities containing CMPs, and the penalties before and after adjustment.

| DOE authority containing civil monetary penalty | Before adjustment | After adjustment |
|---|---|---|
| 10 CFR 207.7 | $10,821 | $10,949. |
| 10 CFR 218.42 | $23,437 | $23,714. |
| 10 CFR 429.120 | $468 | $474. |
| 10 CFR 431.382 | $468 | $474. |
| 10 CFR 490.604 | $9,073 | $9,180. |
| 10 CFR 501.181 | —$95,881 | —$97,014. |
| | —$8/mcf | —$8/mcf. |
| | —$39/bbl | —$39/bbl. |
| 10 CFR 601.400 and appendix A | —minimum $20,489 | —minimum $20,731. |
| | —maximum $204,892 | —maximum $207,314. |
| 10 CFR 820.81 | $214,097 | $216,628. |
| 10 CFR 824.1 and appendix A | $152,998 | $154,806. |
| 10 CFR 824.4 and appendix A | $152,998 | $154,806. |
| 10 CFR 851.5 and appendix B | $99,361 | $100,535. |
| 10 CFR 1013.3 | $11,665 | $11,803. |
| 10 CFR 1017.29 | $275,529 | $278,786. |
| 10 CFR 1050.303 | $20,888 | $21,135. |
| 42 U.S.C. 2282(a)[2] | $104,330 | $105,563. |
| 50 U.S.C. 2731[3] | $9,365 | $9,476. |

[1] OMB's annual guidance memorandum was issued on December 23, 2020, providing the 2021 adjustment multiplier and addressing how to apply it.

## IV. Final Rulemaking

The 2015 Act requires that annual adjustments for inflation subsequent to the initial ''catch-up'' adjustment be made notwithstanding 5 U.S.C. 553.

## V. Regulatory Review

### *A. Executive Order 12866*

This rule has been determined not to be a significant regulatory action under Executive Order 12866, ''Regulatory Planning and Review,'' 58 FR 51735 (October 4, 1993). Accordingly, this action was not subject to review under that Executive order by the Office of Information and Regulatory Affairs of the Office of Management and Budget.

### *B. National Environmental Policy Act*

DOE has determined that this final rule is covered under the Categorical Exclusion found in DOE's National Environmental Policy Act regulations at paragraph A5 of appendix A to subpart D, 10 CFR part 1021, which applies to a rulemaking that amends an existing rule or regulation and that does not change the environmental effect of the rule or regulation being amended. Accordingly, neither an environmental assessment nor an environmental impact statement is required.

### *C. Regulatory Flexibility Act*

The Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) requires preparation of an initial regulatory flexibility analysis for any rule that by law must be proposed for public comment. As discussed above, the 2015 Act requires that annual inflation adjustments subsequent to the initial catch-up adjustment be made notwithstanding 5 U.S.C. 553. Because a notice of proposed rulemaking is not required for this action pursuant to 5 U.S.C. 553, or any other law, no regulatory flexibility analysis has been prepared for this final rule.

### *D. Paperwork Reduction Act*

This final rule imposes no new information collection requirements subject to the Paperwork Reduction Act.

### *E. Unfunded Mandates Reform Act of 1995*

The Unfunded Mandates Reform Act of 1995 (Pub. L. 104–4) generally requires Federal agencies to examine closely the impacts of regulatory actions on State, local, and tribal governments. Section 201 excepts agencies from assessing effects on State, local or tribal governments or the private sector of rules that incorporate requirements specifically set forth in law. Because this rule incorporates requirements specifically set forth in 28 U.S.C. 2461 note, DOE is not required to assess its regulatory effects under section 201. Unfunded Mandates Reform Act sections 202 and 205 do not apply to this action because they apply only to rules for which a general notice of proposed rulemaking is published. Nevertheless, DOE has determined that this regulatory action does not impose a Federal mandate on State, local, or tribal governments or on the public sector.

### *F. Treasury and General Government Appropriations Act, 1999*

Section 654 of the Treasury and General Government Appropriations Act, 1999 (Pub. L. 105–277) requires Federal agencies to issue a Family Policymaking Assessment for any proposed rule that may affect family well-being. This rule would not have any impact on the autonomy or integrity of the family as an institution. Accordingly, DOE has concluded that it is not necessary to prepare a Family Policymaking Assessment.

### *G. Executive Order 13132*

Executive Order 13132, ''Federalism,'' 64 FR 43255 (August 4, 1999) imposes certain requirements on agencies formulating and implementing policies or regulations that preempt State law or that have federalism implications. Agencies are required to examine the constitutional and statutory authority supporting any action that would limit the policymaking discretion of the States and carefully assess the necessity for such actions. DOE has examined this rule and has determined that it would not preempt State law and would not have a substantial direct effect on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. No further action is required by Executive Order 13132.

### *H. Executive Order 12988*

With respect to the review of existing regulations and the promulgation of new regulations, section 3(a) of Executive Order 12988, ''Civil Justice Reform,'' 61 FR 4729 (February 7, 1996), imposes on Executive agencies the general duty to adhere to the following requirements: (1) Eliminate drafting errors and ambiguity; (2) write regulations to minimize litigation; and (3) provide a clear legal standard for affected conduct rather than a general standard and promote simplification and burden reduction. With regard to the review required by section 3(a), section 3(b) of Executive Order 12988 specifically requires that Executive agencies make every reasonable effort to ensure that the regulation: (1) Clearly specifies the preemptive effect, if any; (2) clearly specifies any effect on existing Federal law or regulation; (3) provides a clear legal standard for affected conduct while promoting simplification and burden reduction; (4) specifies the retroactive effect, if any; (5) adequately defines key terms; and (6) addresses other important issues affecting clarity and general draftsmanship under any guidelines issued by the Attorney General. Section 3(c) of Executive Order 12988 requires Executive agencies to review regulations in light of applicable standards in section 3(a) and section 3(b) to determine whether they are met or it is unreasonable to meet one or more of them. DOE has completed the required review and determined that, to the extent permitted by law, this rule meets the relevant standards of Executive Order 12988.

### *I. Treasury and General Government Appropriations Act, 2001*

The Treasury and General Government Appropriations Act, 2001 (44 U.S.C. 3516 note) provides for agencies to review most disseminations of information to the public under guidelines established by each agency pursuant to general guidelines issued by OMB. OMB's guidelines were published at 67 FR 8452 (February 22, 2002), and DOE's guidelines were published at 67 FR 62446 (October 7, 2002). DOE has reviewed this rule under the OMB and DOE guidelines and has concluded that it is consistent with applicable policies in those guidelines.

### *J. Executive Order 13211*

Executive Order 13211, ''Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use,'' 66 FR 28355 (May 22, 2001) requires Federal agencies to prepare and submit to OMB, a Statement of Energy Effects for any proposed significant energy action. A ''significant energy action'' is defined as any action by an agency that promulgated or is expected to lead to promulgation of a final rule, and that: (1) Is a significant regulatory action under Executive Order 12866, or any successor order; and (2) is likely to have a significant adverse effect on the supply, distribution, or use of energy, or (3) is designated by the Administrator of the Office of Information and Regulatory

---

[2] Adjustment applies only to violations of 42 U.S.C. 2077(b), consistent with Public Law 115–232 (August 13, 2018).

[3] Implemented by 10 CFR 820.81, 10 CFR 851.5, and appendix B to 10 CFR part 851.

Affairs (OIRA) as a significant energy action. For any proposed significant energy action, the agency must give a detailed statement of any adverse effects on energy supply, distribution, or use should the proposal be implemented, and of reasonable alternatives to the action and their expected benefits on energy supply, distribution, and use. This regulatory action would not have a significant adverse effect on the supply, distribution, or use of energy and is therefore not a significant energy action. Accordingly, DOE has not prepared a Statement of Energy Effects.

*K. Congressional Notification*

As required by 5 U.S.C. 801, DOE will submit to Congress a report regarding the issuance of this final rule prior to the effective date set forth at the outset of this rulemaking. The report will state that it has been determined that the rule is not a ''major rule'' as defined by 5 U.S.C. 801(2).

*L. Approval of the Office of the Secretary*

The Secretary of Energy has approved publication of this final rule.

**List of Subjects**

*10 CFR Part 207*

Administrative practice and procedure, Energy, Penalties.

*10 CFR Part 218*

Administrative practice and procedure, Penalties, Petroleum allocation.

*10 CFR Part 429*

Confidential business information, Energy conservation, Household appliances, Imports, Incorporation by reference, Reporting and recordkeeping requirements.

*10 CFR Part 431*

Administrative practices and procedure, Confidential business information, Energy conservation, Incorporation by reference, Reporting and recordkeeping requirements.

*10 CFR Part 490*

Administrative practice and procedure, Energy conservation, Penalties.

*10 CFR Part 501*

Administrative practice and procedure, Electric power plants, Energy conservation, Natural gas, Petroleum.

*10 CFR Part 601*

Government contracts, Grant programs, Loan programs, Penalties.

*10 CFR Part 820*

Administrative practice and procedure, Government contracts, Penalties, Radiation protection.

*10 CFR Part 824*

Government contracts, Nuclear materials, Penalties, Security measures.

*10 CFR Part 851*

Civil penalty, Hazardous substances, Occupational safety and health, Safety, Reporting and recordkeeping requirements.

*10 CFR Part 1013*

Administrative practice and procedure, Claims, Fraud, Penalties.

*10 CFR Part 1017*

Administrative practice and procedure, Government contracts, National defense, Nuclear energy, Penalties, Security measures.

*10 CFR Part 1050*

Decorations, medals, awards, Foreign relations, Government employees, Government property, Reporting and recordkeeping requirements.

**Signing Authority**

This document of the Department of Energy was signed on January 7, 2021, by William S. Cooper III, General Counsel, pursuant to delegated authority from the Secretary of Energy. That document with the original signature and date is maintained by DOE. For administrative purposes only, and in compliance with requirements of the Office of the Federal Register, the undersigned DOE Federal Register Liaison Officer has been authorized to sign and submit the document in electronic format for publication, as an official document of the Department of Energy. This administrative process in no way alters the legal effect of this document upon publication in the **Federal Register**.

Signed in Washington, DC, on January 7, 2021.

**Treena V. Garrett,**

*Federal Register Liaison Officer, U.S. Department of Energy.*

For the reasons set forth in the preamble, DOE amends chapters II, III, and X of title 10 of the Code of Federal Regulations as set forth below.

## PART 207—COLLECTION OF INFORMATION

■ 1. The authority citation for part 207 continues to read as follows:

**Authority:** 15 U.S.C. 787 *et seq.;* 15 U.S.C. 791 *et seq.;* E.O. 11790, 39 FR 23185; 28 U.S.C. 2461 note.

■ 2. Section 207.7 is amended by revising the first sentence of paragraph (c)(1) to read as follows:

### § 207.7 Sanctions.

* * * * *

(c) * * *

(1) Any person who violates any provision of this subpart or any order issued pursuant thereto shall be subject to a civil penalty of not more than $10,949 for each violation. * * *

* * * * *

## PART 218—STANDBY MANDATORY INTERNATIONAL OIL ALLOCATION

■ 3. The authority citation for part 218 continues to read as follows:

**Authority:** 15 U.S.C. 751 *et seq.;* 15 U.S.C. 787 *et seq.;* 42 U.S.C. 6201 *et seq.;* 42 U.S.C. 7101 *et seq.;* E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267; 28 U.S.C. 2461 note.

■ 4. Section 218.42 is amended by revising paragraph (b)(1) to read as follows:

### § 218.42 Sanctions.

* * * * *

(b) * * *

(1) Any person who violates any provision of this part or any order issued pursuant thereto shall be subject to a civil penalty of not more than $23,714 for each violation.

* * * * *

## PART 429—CERTIFICATION, COMPLIANCE, AND ENFORCEMENT FOR CONSUMER PRODUCTS AND COMMERCIAL AND INDUSTRIAL EQUIPMENT

■ 5. The authority citation for part 429 continues to read as follows:

**Authority:** 42 U.S.C. 6291–6317; 28 U.S.C. 2461 note.

■ 6. Section 429.120 is amended by revising the first sentence to read as follows:

### § 429.120 Maximum civil penalty.

Any person who knowingly violates any provision of § 429.102(a) may be subject to assessment of a civil penalty of no more than $474 for each violation. * * *

## PART 431—ENERGY EFFICIENCY PROGRAM FOR CERTAIN COMMERCIAL AND INDUSTRIAL EQUIPMENT

■ 7. The authority citation for part 431 continues to read as follows:

**Authority:** 42 U.S.C. 6291–6317; 28 U.S.C. 2461 note.

■ 8. Section 431.382 is amended by revising paragraph (b) to read as follows:

**§ 431.382 Prohibited acts.**

* * * * *

(b) In accordance with sections 333 and 345 of the Act, any person who knowingly violates any provision of paragraph (a) of this section may be subject to assessment of a civil penalty of no more than $474 for each violation.

* * * * *

## PART 490—ALTERNATIVE FUEL TRANSPORTATION PROGRAM

■ 9. The authority citation for part 490 continues to read as follows:

**Authority:** 42 U.S.C. 7191 *et seq.;* 42 U.S.C. 13201, 13211, 13220, 13251 *et seq.;* 28 U.S.C. 2461 note.

■ 10. Section 490.604 is amended by revising paragraph (a) to read as follows:

**§ 490.604 Penalties and Fines.**

(a) *Civil penalties.* Whoever violates § 490.603 shall be subject to a civil penalty of not more than $9,180 for each violation.

* * * * *

## PART 501—ADMINISTRATIVE PROCEDURES AND SANCTIONS

■ 11. The authority citation for part 501 continues to read as follows:

**Authority:** 42 U.S.C. 7101 *et seq.;* 42 U.S.C. 8301 *et seq.;* 42 U.S.C. 8701 *et seq.;* E.O. 12009, 42 FR 46267; 28 U.S.C. 2461 note.

■ 12. Section 501.181 is amended by revising paragraph (c)(1) to read as follows:

**§ 501.181 Sanctions.**

* * * * *

(c) * * *

(1) Any person who violates any provisions of the Act (other than section 402) or any rule in this subchapter or order under this subchapter or the Act will be subject to the following civil penalty, which may not exceed $97,014 for each violation: Any person who operates a powerplant or major fuel burning installation under an exemption, during any 12-calendar-month period, in excess of that authorized in such exemption will be assessed a civil penalty of up to $8 for each MCF of natural gas or up to $39 for each barrel of oil used in excess of that authorized in the exemption.

* * * * *

## PART 601—NEW RESTRICTIONS ON LOBBYING

■ 13. The authority citation for part 601 continues to read as follows:

**Authority:** 31 U.S.C. 1352; 42 U.S.C. 7254 and 7256; 31 U.S.C. 6301–6308; 28 U.S.C. 2461 note.

■ 14. Section 601.400 is amended by revising paragraphs (a), (b), and (e) to read as follows:

**§ 601.400 Penalties.**

(a) Any person who makes an expenditure prohibited by this part shall be subject to a civil penalty of not less than $20,731 and not more than $207,314 for each such expenditure.

(b) Any person who fails to file or amend the disclosure form (see appendix B to this part) to be filed or amended if required by this part, shall be subject to a civil penalty of not less than $20,731 and not more than $207,314 for each such failure.

* * * * *

(e) First offenders under paragraph (a) or (b) of this section shall be subject to a civil penalty of $20,731, absent aggravating circumstances. Second and subsequent offenses by persons shall be subject to an appropriate civil penalty between $20,731 and $207,314, as determined by the agency head or his or her designee.

* * * * *

**Appendix A to Part 601 [Amended]**

■ 15. Appendix A to part 601 is amended by:

■ a. Removing ''$20,489'' wherever it appears and adding in its place ''$20,731''; and

■ b. Removing ''$204,892'' wherever it appears and adding in its place ''$207,314''.

## PART 820—PROCEDURAL RULES FOR DOE NUCLEAR ACTIVITIES

■ 16. The authority citation for part 820 continues to read as follows:

**Authority:** 42 U.S.C. 2201; 2282(a); 7191; 28 U.S.C. 2461 note; 50 U.S.C. 2410.

■ 17. Section 820.81 is amended by revising the first sentence to read as follows:

**§ 820.81 Amount of penalty.**

Any person subject to a penalty under 42 U.S.C. 2282a shall be subject to a civil penalty in an amount not to exceed $216,628 for each such violation. * * *

## PART 824—PROCEDURAL RULES FOR THE ASSESSMENT OF CIVIL PENALTIES FOR CLASSIFIED INFORMATION SECURITY VIOLATIONS

■ 18. The authority citation for part 824 continues to read as follows:

**Authority:** 42 U.S.C. 2201, 2282b, 7101 *et seq.,* 50 U.S.C. 2401 *et seq.;* 28 U.S.C. 2461 note.

■ 19. Section 824.1 is amended by revising the second sentence to read as follows:

**§ 824.1 Purpose and scope.**

* * * Subsection a. provides that any person who has entered into a contract or agreement with the Department of Energy, or a subcontract or subagreement thereto, and who violates (or whose employee violates) any applicable rule, regulation, or order under the Act relating to the security or safeguarding of Restricted Data or other classified information, shall be subject to a civil penalty not to exceed $154,806 for each violation. * * *

■ 20. Section 824.4 is amended by revising paragraph (c) to read as follows:

**§ 824.4 Civil penalties.**

* * * * *

(c) The Director may propose imposition of a civil penalty for violation of a requirement of a regulation or rule under paragraph (a) of this section or a compliance order issued under paragraph (b) of this section, not to exceed $154,806 for each violation.

* * * * *

## PART 851—WORKER SAFETY AND HEALTH PROGRAM

■ 21. The authority citation for part 851 continues to read as follows:

**Authority:** 42 U.S.C. 2201(i)(3), (p); 42 U.S.C. 2282c; 42 U.S.C. 5801 *et seq.;* 42 U.S.C. 7101 *et seq.;* 50 U.S.C. 2401 *et seq.;* 28 U.S.C. 2461 note.

■ 22. Section 851.5 is amended by revising the first sentence of paragraph (a) to read as follows:

**§ 851.5 Enforcement.**

(a) A contractor that is indemnified under section 170d. of the AEA (or any subcontractor or supplier thereto) and that violates (or whose employee violates) any requirement of this part shall be subject to a civil penalty of up to $100,535 for each such violation. * * *

* * * * *

■ 23. Appendix B to part 851 is amended by:

■ a. Revising the last sentences of paragraphs (b)(1) and (2) in section VI; and

■ b. Revising paragraph 1.(e)(1) in section IX.

The revisions read as follows:

**Appendix B to Part 851—General Statement of Enforcement Policy**

* * * * *

**VI. Severity of Violations**

* * * * *

(b) * * *

(1) * * * A Severity Level I violation would be subject to a base civil penalty of up to 100% of the maximum base civil penalty of $100,535.

(2) * * * A Severity Level II violation would be subject to a base civil penalty up to 50% of the maximum base civil penalty ($50,267).

* * * * *

**IX. Enforcement Actions**

* * * * *

*Notice of Violation*

* * * * *

(e) * * *

(1) DOE may assess civil penalties of up to $100,535 per violation per day on contractors (and their subcontractors and suppliers) that are indemnified by the Price-Anderson Act, 42 U.S.C. 2210(d). *See* 10 CFR 851.5(a).

* * * * *

## PART 1013—PROGRAM FRAUD CIVIL REMEDIES AND PROCEDURES

■ 24. The authority citation for part 1013 continues to reads as follows:

**Authority:** 31 U.S.C. 3801–3812; 28 U.S.C. 2461 note.

■ 25. Section 1013.3 is amended by revising paragraphs (a)(1)(iv) and (b)(1)(ii) to read as follows:

### § 1013.3 Basis for civil penalties and assessments.

(a) * * *

(1) * * *

(iv) Is for payment for the provision of property or services which the person has not provided as claimed, shall be subject, in addition to any other remedy that may be prescribed by law, to a civil penalty of not more than $11,803 for each such claim.

* * * * *

(b) * * *

(1) * * *

(ii) Contains or is accompanied by an express certification or affirmation of the truthfulness and accuracy of the contents of the statement, shall be subject, in addition to any other remedy that may be prescribed by law, to a civil penalty of not more than $11,803 for each such statement.

* * * * *

## PART 1017—IDENTIFICATION AND PROTECTION OF UNCLASSIFIED CONTROLLED NUCLEAR INFORMATION

■ 26. The authority citation for part 1017 continues to read as follows:

**Authority:** 42 U.S.C. 7101 *et seq.;* 50 U.S.C. 2401 *et seq.;* 42 U.S.C. 2168; 28 U.S.C. 2461 note.

■ 27. Section 1017.29 is amended by revising paragraph (c) to read as follows:

### § 1017.29 Civil penalty.

* * * * *

(c) *Amount of penalty.* The Director may propose imposition of a civil penalty for violation of a requirement of a regulation under paragraph (a) of this section or a compliance order issued under paragraph (b) of this section, not to exceed $278,786 for each violation.

* * * * *

## PART 1050—FOREIGN GIFTS AND DECORATIONS

■ 28. The authority citation for part 1050 continues to read as follows:

**Authority:** The Constitution of the United States, Article I, Section 9; 5 U.S.C. 7342; 22 U.S.C. 2694; 42 U.S.C. 7254 and 7262; 28 U.S.C. 2461 note.

■ 29. Section 1050.303 is amended by revising the last sentence in paragraph (d) to read as follows:

### § 1050.303 Enforcement.

* * * * *

(d) * * * The court in which such action is brought may assess a civil penalty against such employee in any amount not to exceed the retail value of the gift improperly solicited or received plus $21,135.

## Consolidation of Mentor-Protégé Programs and Other Government Contracting Amendments; Correction

**AGENCY:** U.S. Small Business Administration.

**ACTION:** Correcting amendments.

**SUMMARY:** The U.S. Small Business Administration (SBA) is correcting regulations that published in the **Federal Register** on October 16, 2020. The rule merged the 8(a) Business Development (BD) Mentor-Protégé Program and the All Small Mentor-Protégé Program to eliminate confusion and remove unnecessary duplication of functions within SBA. This document is making several technical corrections to the regulations.

**DATES:** Effective January 14, 2021.

**FOR FURTHER INFORMATION CONTACT:** Mark Hagedorn, U.S. Small Business Administration, Office of General Counsel, 409 Third Street SW, Washington, DC 20416; (202) 205–7625; *mark.hagedorn@sba.gov.*

**SUPPLEMENTARY INFORMATION:** In response to the President's directive to simplify regulations, on October 16, 2020, SBA published a final rule revising the regulations pertaining to the 8(a) BD and size programs in order to further reduce unnecessary or excessive burdens on small businesses and to eliminate confusion or more clearly delineate SBA's intent in certain regulations. (85 FR 66146). This is the second set of corrections. The first set of corrections was published in the **Federal Register** on November 16, 2020. (85 FR 72916). This document augments those corrections.

First, in amending § 121.404(a) to provide clarification as to the time at which size is determined for multiple award contracts, SBA inadvertently deleted the general rule that size is determined as of the date of the concern submits a written self-certification that it is small to the procuring activity as part of its initial offer or response which includes price. In other words, in amending the exception to the general rule for multiple award contracts, the final rule inadvertently deleted the general rule itself. That was not SBA's intent and SBA did not intend to make any substantive changes to the general rule itself. This rule adds back the general rule language to § 121.404(a).

Second, the final rule eliminated the requirement that 8(a) Participants seeking to be awarded a competitive 8(a) contract as a joint venture submit the joint venture agreement to SBA for review and approval prior to contract award. The preamble to the final rule explained that such approval is no longer necessary because the size protest process has worked well to ensure that small business joint venture partners control performance on non-8(a) contracts with their large business mentors and could work similarly to monitor a joint venturing activity on competitive 8(a) contracts. To this end, where another offeror believes that a joint venture between a protégé and its large business mentor has not complied with the applicable control regulations, it may protest the size of the joint venture. The appropriate Area Office of SBA's Office of Government Contracting would then review the joint venture agreement to determine whether it meets the requirements of SBA's regulations. If that Office determines that the applicable regulations were not followed, the joint venture would lose its exclusion from affiliation, be found to be other than small, and, thus, ineligible for an award as a small business. Because size protests are authorized for competitive 8(a) contracts, SBA reasoned that prior approval is no longer necessary for joint venture agreements seeking to be awarded such contracts.

The final rule inadvertently did not adequately address how the Area Office will review certain joint venture agreements to perform 8(a) contracts formed outside the Mentor-Protégé Program, such as a joint venture between an 8(a) Participant and one or more other small business concerns. Currently, an unsuccessful offeror, SBA, or a contracting officer may protest the status of the apparent successful offeror for a Service-Disabled Veteran Owned (SDVO), Historically Underutilized Business Zone (HUBZone), Women-Owned Small Business (WOSB), or Economically-Disadvantaged Women-Owned Small Business (EDWOSB) contract. In determining the status eligibility of a joint venture apparent awardee, SBA will review the joint venture agreement to assess whether it complies with the formal requirements to receive and perform the award as a joint venture. If the joint venture does not comply with these requirements, SBA will sustain the protest and deem the joint venture ineligible for award. However, there is no existing regulatory process for an unsuccessful offeror, SBA, or a contracting officer to challenge whether a joint venture meets the formal requirements to receive and perform a competitive 8(a) contract. To this end, the eligibility of a Participant for a sole source or competitive 8(a) requirement may not be challenged by a disappointed offeror or any other party because SBA reviews the apparent successful offeror's eligibility for award in connection with each 8(a) contract. In addition, prior to the final rule, where the apparent successful offeror was a joint venture, the joint venture had to be approved by SBA prior to or concurrent with the contract eligibility review. In eliminating SBA's role to review and approve joint ventures formed to perform competitive 8(a) contracts, it was not SBA's intent to allow 8(a) contract benefits to flow to joint ventures that do not meet the applicable regulatory requirements. To the contrary, as noted above, SBA envisioned that the size protest process would work to ensure compliance with the formal 8(a) joint venture requirements. However, in the context of a joint venture between an 8(a) Participant and one or more other small business concerns, the current size protest procedures are not adequate. Under SBA's size regulations, a joint venture is small if each of the partners to the joint venture individually qualify as small. Thus, a joint venture that does not comply with the applicable requirements set forth in § 124.513(c) and (d) could still qualify as small even though the 8(a) partner to the joint venture was not the lead or controlling partner. This rule amends § 121.103(h)(1)(i) to implement SBA's intent that a joint venture must meet the requirements of § 124.513(c) and (d) in order to be eligible for a competitive 8(a) procurement and to make joint ventures in the 8(a) program consistent with those in the HUBZone, WOSB and SDVO programs. Additionally, SBA inadvertently left out conforming revisions in the final rule to remove references to SBA's now obsolete review and approval of joint ventures formed to receive and perform competitive 8(a) contracts. Specifically, the final rule did not make corresponding changes to § 124.513(a), (f), (g), (h), and (j), leaving inconsistency with respect to the requirement for SBA approval. This rule corrects this inconsistency by removing or clarifying references to joint venture approval in § 124.513(a), (f), (g), (h), and (j).

Third, the final rule added a new § 124.501(k) to clearly make the bona fide office requirement applicable to both sole source and competitive 8(a) awards and better defined the geographical area in which an office needs to be in order to meet the bona fide place of business requirement. Although SBA intended to allow an office in the geographic area served by a contiguous SBA district office to meet the bona fide place of business requirement, the final regulatory provision did not make that clear. This rule corrects that ambiguity.

Fourth, the final rule clarified a procuring activity's responsibilities when evaluating the past performance, experience, business systems and certifications of an entity submitting an offer for a small business contract as a joint venture. Specifically, the final rule amended § 125.8(e) to provide that when evaluating such offers, the procuring activity should not require a small business protégé partner to the joint venture to individually meet any evaluation or responsibility criteria as those required of other offerors generally. SBA inadvertently left out conforming revisions in the final rule to §§ 124.513, 125.18, 126.616, and 127.506 to address the evaluation of past performance, experience, business systems and certifications of a joint venture formed outside SBA's Mentor-Protégé Program to pursue a contract set-aside or reserved for 8(a) Participants, SDVO small business concerns, HUBZone small business concerns, WOSB concerns, or EDWOSB concerns. This rule corrects the inconsistency by revising §§ 124.513, 125.18, 126.616, and 127.506 to incorporate this clarification.

**List of Subjects**

*13 CFR Part 121*

Administrative practice and procedure, Government procurement, Government property, Grant programs—business, Individuals with disabilities, Loan programs—business, Small businesses.

*13 CFR Part 124*

Administrative practice and procedure, Government procurement, Government property, Small businesses.

*13 CFR Part 125*

Government contracts, Government procurement, Reporting and recordkeeping requirements, Small businesses, Technical assistance.

*13 CFR Part 126*

Administrative practice and procedure, Government procurement, Penalties, Reporting and recordkeeping requirements, Small businesses.

*13 CFR Part 127*

Government contracts, Reporting and recordkeeping requirements, Small businesses.

Accordingly, 13 CFR parts 121, 124, 125, 126, and 127 are corrected by making the following correcting amendments:

## PART 121—SMALL BUSINESS SIZE REGULATIONS

■ 1. The authority citation for part 121 continues to read as follows:

**Authority:** 15 U.S.C. 632, 634(b)(6), 636(a)(36), 662, and 694a(9); Pub. L. 116–136, Section 1114.

■ 2. Amend § 121.103 by adding a sentence to the end of paragraph (h)(1)(i) to read as follows:

**§ 121.103 How does SBA determine affiliation?**

* * * * *

(h) * * *

(1) * * *

(i) * * * For a competitive 8(a) procurement, a joint venture between an 8(a) Participant and one or more other small business concerns (including two firms approved by SBA to be a mentor and protégé under § 125.9 of this chapter) must also meet the requirements of § 124.513(c) and (d) of this chapter as of the date of the final proposal revision for negotiated acquisitions and final bid for sealed bidding in order to be eligible for award.

* * * * *

■ 3. Amend § 121.404 by adding introductory text to paragraph (a) to read as follows:

**§ 121.404 When is the size status of a business concern determined?**

(a) *Time of size.* SBA determines the size status of a concern, including its affiliates, as of the date the concern submits a written self-certification that it is small to the procuring activity as part of its initial offer or response which includes price.

* * * * *

## PART 124—8(a) BUSINESS DEVELOPMENT/SMALL DISADVANTAGED BUSINESS STATUS DETERMINATIONS

■ 4. The authority citation for part 124 continues to read as follows:

**Authority:** 15 U.S.C. 634(b)(6), 636(j), 637(a), 637(d), 644 and Pub. L. 99–661, Pub. L. 100–656, sec. 1207, Pub. L. 101–37, Pub. L. 101–574, section 8021, Pub. L. 108–87, Pub. L. 116–260, sec. 330, and 42 U.S.C. 9815.

■ 5. Amend § 124.501 by revising the introductory text to paragraph (k) to read as follows:

**§ 124.501 What general provisions apply to the award of 8(a) contracts?**

* * * * *

(k) In order to be awarded a sole source or competitive 8(a) construction contract, a Participant must have a bona fide place of business within the applicable geographic location determined by SBA. This will generally be the geographic area serviced by the SBA district office, a Metropolitan Statistical Area (MSA), a contiguous county (whether in the same or different state), or the geographical area serviced by a contiguous SBA district office to where the work will be performed. SBA may determine that a Participant with a bona fide place of business anywhere within the state (if the state is serviced by more than one SBA district office), one or more other SBA district offices (in the same or another state), or another nearby area is eligible for the award of an 8(a) construction contract.

* * * * *

■ 6. Amend § 124.513 by revising paragraph (a)(1), the second sentence of paragraph (a)(2), and paragraphs (f), (g), (h), and (j) to read as follows:

**§ 124.513 Under what circumstances can a joint venture be awarded an 8(a) contract?**

(a) * * *

(1) A Participant may enter into a joint venture agreement with one or more other small business concerns, whether or not 8(a) Participants, for the purpose of performing one or more specific 8(a) contracts.

(2) * * * However, where SBA concludes that an 8(a) Participant brings very little to the joint venture relationship in terms of resources and expertise other than its 8(a) status, SBA will not approve the joint venture to receive an 8(a) sole source contract award and will find the joint venture to be ineligible for a competitive 8(a) award if it is determined to be the apparent successful offeror.

* * * * *

(f) *Capabilities, past performance, and experience.* When evaluating the capabilities, past performance, experience, business systems, and certifications of an entity submitting an offer for an 8(a) contract as a joint venture established pursuant to this section, a procuring activity must consider work done and qualifications held individually by each partner to the joint venture as well as any work done by the joint venture itself previously. A procuring activity may not require the 8(a) Participant to individually meet the same evaluation or responsibility criteria as that required of other offerors generally. The partners to the joint venture in the aggregate must demonstrate the past performance, experience, business systems, and certifications necessary to perform the contract.

(g) *Contract execution.* Where an 8(a) award will be made to a joint venture, the procuring activity will execute an 8(a) contract in the name of the joint venture entity or the 8(a) Participant, but in either case will identify the award as one to an 8(a) joint venture or an 8(a) mentor-protege joint venture, as appropriate.

(h) *Amendments to joint venture agreement.* Where SBA has approved a joint venture for a sole source 8(a) contract, all amendments to the joint venture agreement must be approved by SBA.

* * * * *

(j) *Certification of compliance.* Prior to the performance of any 8(a) contract by a joint venture, the 8(a) BD Participant to the joint venture must submit a written certification to the contracting officer and SBA, signed by an authorized official of each partner to the joint venture, stating as follows:

(1) The parties have entered into a joint venture agreement that fully complies with paragraph (c) of this section; and

(2) The parties will perform the contract in compliance with the joint venture agreement and with the performance of work requirements set forth in paragraph (d) of this section.

(3) For a sole source 8(a) contract, the parties have obtained SBA's approval of the joint venture agreement and any addendum to that agreement and that there have been no modifications to the agreement that SBA has not approved.

* * * * *

## PART 125—GOVERNMENT CONTRACTING PROGRAMS

■ 7. The authority citation for part 125 continues to read as follows:

**Authority:** 15 U.S.C. 632(p), (q), 634(b)(6), 637, 644, 657f, 657q, 657r, and 657s; 38 U.S.C. 501 and 8127.

■ 8. Revise § 125.18(b)(5) to read as follows:

**§ 125.18 What requirements must an SDVO SBC meet to submit an offer on a contract?**

* * * * *

(b) * * *

(5) *Capabilities, past performance, and experience.* When evaluating the capabilities, past performance, experience, business systems, and certifications of an entity submitting an offer for an SDVO contract as a joint venture established pursuant to this section, a procuring activity must consider work done and qualifications held individually by each partner to the joint venture as well as any work done by the joint venture itself previously. A procuring activity may not require the SDVO SBC to individually meet the same evaluation or responsibility criteria as that required of other offerors generally. The partners to the joint venture in the aggregate must demonstrate the past performance, experience, business systems, and certifications necessary to perform the contract.

* * * * *

## PART 126—HUBZONE PROGRAM

■ 9. The authority citation for part 126 continues to read as follows:

**Authority:** 15 U.S.C. 632(a), 632(j), 632(p), 644 and 657a; Pub. L. 111–240, 24 Stat. 2504.

■ 10. Revise § 126.616(f) to read as follows:

**§ 126.616 What requirements must a joint venture satisfy to submit an offer and be eligible to perform on a HUBZone contract?**

* * * * *

(f) *Capabilities, past performance, and experience.* When evaluating the capabilities, past performance, experience, business systems, and certifications of an entity submitting an offer for a HUBZone contract as a joint venture established pursuant to this section, a procuring activity must consider work done and qualifications held individually by each partner to the joint venture as well as any work done by the joint venture itself previously. A procuring activity may not require the HUBZone small business concern to individually meet the same evaluation or responsibility criteria as that required of other offerors generally. The partners to the joint venture in the aggregate must demonstrate the past performance, experience, business systems, and certifications necessary to perform the contract.

* * * * *

## PART 127—WOMEN–OWNED SMALL BUSINESS FEDERAL CONTRACT PROGRAM

■ 11. The authority citation for part 127 continues to read as follows:

**Authority:** 15 U.S.C. 632, 634(b)(6), 637(m), 644 and 657r.

■ 12. Amend § 127.506 by revising paragraph (f) to read as follows:

### § 127.506 May a joint venture submit an offer on an EDWOSB or WOSB requirement?

* * * * *

(f) *Capabilities, past performance, and experience.* When evaluating the capabilities, past performance, experience, business systems, and certifications of an entity submitting an offer for an EDWOSB or WOSB contract as a joint venture established pursuant to this section, a procuring activity must consider work done and qualifications held individually by each partner to the joint venture as well as any work done by the joint venture itself previously. A procuring activity may not require the EDWOSB or WOSB small business concern to individually meet the same evaluation or responsibility criteria as that required of other offerors generally. The partners to the joint venture in the aggregate must demonstrate the past performance, experience, business systems, and certifications necessary to perform the contract.

## SMALL BUSINESS ADMINISTRATION

## 13 CFR Part 127

**RIN 3245–AG75**

## Women-Owned Small Business and Economically Disadvantaged Women-Owned Small Business Certification; Correction

**AGENCY:** U.S. Small Business Administration.

**ACTION:** Correcting amendment.

**SUMMARY:** The U.S. Small Business Administration (SBA or Agency) is correcting regulations that published in the **Federal Register** on May 11, 2020. The final rule amended SBA's regulations to implement a statutory requirement to certify Women-Owned Small Business Concerns (WOSBs) and Economically-Disadvantaged Women-Owned Small Business Concerns (EDWOSBs), as well as to clarify existing regulations. This document makes corrections to the final regulations.

**DATES:** Effective January 14, 2021.

**FOR FURTHER INFORMATION CONTACT:** Brenda Fernandez, Office of Policy, Planning and Liaison, 409 Third Street SW, Washington, DC 20416; (202) 205–7337; *brenda.fernandez@sba.gov.*

**SUPPLEMENTARY INFORMATION:** This is a correction to a final rule published in the **Federal Register** on May 11, 2020 (85 FR 27650). SBA is correcting dates that were inadvertently transposed in one of the examples to 13 CFR 127.400. Additionally, SBA is correcting the language in two of the examples to 13 CFR 127.400 to ensure the examples accurately illustrate the application of the new regulatory provisions.

### List of Subjects in 13 CFR Part 127

Government contracts, Reporting and recordkeeping requirements, Small businesses.

Accordingly, 13 CFR part 127 is corrected by making the following correcting amendments:

## PART 127—WOMEN-OWNED SMALL BUSINESS FEDERAL CONTRACT PROGRAM

■ 1. The authority citation for part 127 continues to read as follows:

**Authority:** 15 U.S.C. 632, 634(b)(6), 637(m), 644 and 657r.

■ 2. Amend § 127.400 by revising paragraph (b)(1) to read as follows:

### § 127.400 How does a concern maintain its WOSB or EDWOSB certification?

* * * * *

(b) * * *

(1) SBA or a third-party certifier will conduct a program examination three years after the concern's initial WOSB or EDWOSB certification (whether by SBA or a third-party certifier) or three years after the date of the concern's last program examination, whichever date is later.

*Example 1 to paragraph (b)(1).* Concern A is certified by SBA to be eligible for the WOSB program on July 20, 2021. Concern A will be considered a certified WOSB that is eligible to receive WOSB contracts (as long as it is small for the size standard corresponding to the NAICS code assigned to the contract) through July 19, 2022. To participate in the WOSB Program the following year, Concern A must recertify its eligibility to SBA between June 20, 2022, and July 19, 2022. Concern A will be considered a certified WOSB that is eligible to receive WOSB contracts (as long as it is small for the size standard corresponding to the NAICS code assigned to the contract) through July 19, 2023. To participate in the WOSB Program the following year, Concern A must recertify its eligibility to SBA between June 20, 2023, and July 19, 2023. Concern A will be considered a certified WOSB that is eligible to receive WOSB contracts (as long as it is small for the size standard corresponding to the NAICS code assigned to the contract) through July 19, 2024. To participate in the WOSB Program the following year, Concern A must recertify its eligibility to SBA between June 20, 2024, and July 19, 2024. Because three years will have elapsed since its application and original certification, SBA will conduct a program examination of Concern A at that time. In addition to its representation that it continues to be an eligible WOSB, Concern A must provide additional information as requested by SBA to demonstrate that it continues to meet all the eligibility requirements of the WOSB Program.

*Example 2 to paragraph (b)(1).* Concern B is certified by a third-party certifier to be eligible for the WOSB program on September 27, 2021. Concern B will be considered a certified WOSB that is eligible to receive WOSB contracts (as long as it is small for the size standard corresponding to the NAICS code assigned to the contract) through September 26, 2022. To participate in the WOSB Program the following year, Concern B must recertify its eligibility to SBA between August 28, 2022, and September 26, 2022. Concern B will be considered a certified WOSB that is eligible to receive WOSB contracts (as long as it is small for the size standard corresponding to the NAICS code assigned to the contract) through September 26, 2023. On March 31, 2023, Concern B is awarded a WOSB set-aside contract. Subsequently, Concern B's status as an eligible WOSB is protested. On June 28, 2023, Concern B receives a positive determination from SBA confirming that it is an eligible WOSB. Concern B's new certification date is June 28, 2023. Concern B will be considered a certified WOSB that is eligible to receive WOSB contracts (as long as it is small for the size standard corresponding to the NAICS code assigned to the contract) through June 27, 2024. To participate in the WOSB Program the following year, Concern B must recertify its eligibility to SBA between May 29, 2024, and June 27, 2024. Concern B will be considered a certified WOSB that is eligible to receive WOSB contracts (as long as it is small for the size standard corresponding to the NAICS code assigned to the contract) through June 27, 2025. To participate in the WOSB Program the following year, Concern B must recertify its eligibility to SBA between May 29, 2025, and June 27, 2025. Concern B will be considered a certified WOSB that is eligible to receive WOSB contracts (as long as it is small for the size standard corresponding to the NAICS code assigned to the contract) until June 27, 2026. To participate in the WOSB Program the following year, Concern B must recertify its eligibility to SBA between May 29, 2026, and June 27, 2026. Because three years will have elapsed since its certification date of June 28, 2023, Concern B must seek a program examination, by SBA or a third-party certifier, at that time. In addition to its representation that it continues to be an eligible WOSB, Concern B must provide additional information as requested by SBA or a third-party certifier to demonstrate that it continues to meet all the eligibility requirements of the WOSB Program.

## Airworthiness Directives; Airbus SAS Airplanes

**AGENCY:** Federal Aviation Administration (FAA), DOT.

**ACTION:** Final rule; request for comments.

**SUMMARY:** The FAA is adopting a new airworthiness directive (AD) for all Airbus SAS Model A330–200, –200 Freighter, –300, –800, and –900 series airplanes; Model A340–200 and –300 series airplanes; and Model A340–541 and A340–642 airplanes. This AD was prompted by a report that an erroneous torque value for the attachment nuts to install a pitot probe was included in the affected Aircraft Maintenance Manual (AMM) task. This AD requires re-torqueing the attachment nuts of each affected part. In addition, this AD prohibits the use of the affected AMM task, as specified in a European Union Aviation Safety Agency (EASA) AD, which is incorporated by reference. The FAA is issuing this AD to address the unsafe condition on these products.

**DATES:** This AD becomes effective January 29, 2021.

The Director of the Federal Register approved the incorporation by reference of a certain publication listed in this AD as of January 29, 2021.

The FAA must receive comments on this AD by March 1, 2021.

**ADDRESSES:** You may send comments, using the procedures found in 14 CFR 11.43 and 11.45, by any of the following methods:

- *Federal eRulemaking Portal:* Go to *https://www.regulations.gov.* Follow the instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* U.S. Department of Transportation, Docket Operations, M–30, West Building Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery:* Deliver to Mail address above between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays.

For material incorporated by reference (IBR) in this AD, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu*; internet *www.easa.europa.eu.* You may find this IBR material on the EASA website at *https://ad.easa.europa.eu.* You may view this IBR material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. It is also available in the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–1172.

### Examining the AD Docket

You may examine the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–1172; or in person at Docket Operations between 9 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The AD docket contains this AD, any comments received, and other information. The street address for Docket Operations is listed above. Comments will be available in the AD docket shortly after receipt.

**FOR FURTHER INFORMATION CONTACT:** Vladimir Ulyanov, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3229; email *vladimir.ulyanov@faa.gov.*

**SUPPLEMENTARY INFORMATION:**

### Discussion

The EASA, which is the Technical Agent for the Member States of the European Union, has issued EASA AD 2020–0279, dated December 14, 2020 (EASA AD 2020–0279) (also referred to as the Mandatory Continuing Airworthiness Information, or the MCAI), to correct an unsafe condition for all Model A330–201, A330–202, A330–203, A330–223, A330–223F, A330–243, A330–243F, A330–301, A330–302, A330–303, A330–321, A330–322, A330–323, A330–341, A330–342, A330–343, A330–743L, A330–841, A330–941, A340–211, A340–212, A340–213, A340–311, A340–312, A340–313, A340–541, A340–542, A340–642, and A340–643 airplanes. Model A330–743L, A340–542, and A340–643 airplanes are not certificated by the FAA and are not included on the U.S. type certificate data sheet; this AD therefore does not include those airplanes in the applicability.

This AD was prompted by a report that an erroneous torque value for the attachment nuts to install a pitot probe was included in the affected AMM task. The FAA is issuing this AD to address the erroneous torque value. If not addressed it could lead to erroneous total pressure measurement being relayed to navigation systems, possibly resulting in reduced control of the airplane. See the MCAI for additional background information.

**Related Service Information Under 1 CFR Part 51**

EASA AD 2020–0279 describes procedures for re-torqueing the attachment nuts of each affected part and prohibits the use of the affected AMM task. This material is reasonably available because the interested parties have access to it through their normal course of business or by the means identified in the **ADDRESSES** section.

**FAA's Determination**

This product has been approved by the aviation authority of another country, and is approved for operation in the United States. Pursuant to the FAA's bilateral agreement with the State of Design Authority, the FAA has been notified of the unsafe condition described in the MCAI referenced above. The FAA is issuing this AD because the FAA evaluated all pertinent information and determined the unsafe condition exists and is likely to exist or develop on other products of the same type design.

**Requirements of This AD**

This AD requires accomplishing the actions specified in EASA AD 2020–0279 described previously, as incorporated by reference, except for any differences identified as exceptions in the regulatory text of this AD.

**Explanation of Required Compliance Information**

In the FAA's ongoing efforts to improve the efficiency of the AD process, the FAA initially worked with Airbus and EASA to develop a process to use certain EASA ADs as the primary source of information for compliance with requirements for corresponding FAA ADs. The FAA has since coordinated with other manufacturers and civil aviation authorities (CAAs) to use this process. As a result, EASA AD 2020–0279 is incorporated by reference in this final rule. This AD, therefore, requires compliance with EASA AD 2020–0279 in its entirety, through that incorporation, except for any differences identified as exceptions in the regulatory text of this AD. Using common terms that are the same as the heading of a particular section in the EASA AD does not mean that operators need comply only with that section. For example, where the AD requirement refers to "all required actions and compliance times," compliance with this AD requirement is not limited to the section titled "Required Action(s) and Compliance Time(s)" in the EASA AD. Service information specified in EASA AD 2020–0279 that is required for compliance with EASA AD 2020–0279 is available on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–1172.

**FAA's Justification and Determination of the Effective Date**

An unsafe condition exists that requires the immediate adoption of this AD without providing an opportunity for public comments prior to adoption. The FAA has found that the risk to the flying public justifies waiving notice and comment prior to adoption of this rule because an erroneous torque value for the attachment nuts to install a pitot probe could lead to erroneous total pressure measurement being relayed to navigation systems, possibly resulting in reduced control of the airplane. In addition, the compliance time for the required action is shorter than the time necessary for the public to comment and for publication of the final rule. Therefore, the FAA finds good cause that notice and opportunity for prior public comment are impracticable. In addition, for the reasons stated above, the FAA finds that good cause exists for making this amendment effective in less than 30 days.

**Comments Invited**

The FAA invites you to send any written relevant data, views, or arguments about this AD. Send your comments to an address listed under **ADDRESSES**. Include "Docket No. FAA–2020–1172; Project Identifier MCAI–2020–01661–T" at the beginning of your comments. The most helpful comments reference a specific portion of the final rule, explain the reason for any recommended change, and include supporting data. The FAA will consider all comments received by the closing date and may amend this final rule because of those comments.

Except for Confidential Business Information (CBI) as described in the following paragraph, and other information as described in 14 CFR 11.35, the FAA will post all comments received, without change, to *https://www.regulations.gov,* including any personal information you provide. The agency will also post a report summarizing each substantive verbal contact received about this final rule.

**Confidential Business Information**

CBI is commercial or financial information that is both customarily and actually treated as private by its owner. Under the Freedom of Information Act (FOIA) (5 U.S.C. 552), CBI is exempt from public disclosure. If your comments responsive to this AD contain commercial or financial information that is customarily treated as private, that you actually treat as private, and that is relevant or responsive to this AD, it is important that you clearly designate the submitted comments as CBI. Please mark each page of your submission containing CBI as "PROPIN." The FAA will treat such marked submissions as confidential under the FOIA, and they will not be placed in the public docket of this AD. Submissions containing CBI should be sent to Vladimir Ulyanov, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3229; email *vladimir.ulyanov@faa.gov.* Any commentary that the FAA receives which is not specifically designated as CBI will be placed in the public docket for this rulemaking.

**Regulatory Flexibility Act (RFA)**

The requirements of the RFA do not apply when an agency finds good cause pursuant to 5 U.S.C. 553 to adopt a rule without prior notice and comment. Because the FAA has determined that it has good cause to adopt this rule without notice and comment, RFA analysis is not required.

**Costs of Compliance**

The FAA estimates that this AD affects 112 airplanes of U.S. registry. The FAA estimates the following costs to comply with this AD:

ESTIMATED COSTS FOR REQUIRED ACTIONS

| Labor cost | Parts cost | Cost per product | Cost on U.S. operators |
|---|---|---|---|
| 1 work-hour × $85 per hour = $85 | $0 | $85 | $9,520 |

### Authority for This Rulemaking

Title 49 of the United States Code specifies the FAA's authority to issue rules on aviation safety. Subtitle I, section 106, describes the authority of the FAA Administrator. Subtitle VII: Aviation Programs, describes in more detail the scope of the Agency's authority.

The FAA is issuing this rulemaking under the authority described in Subtitle VII, Part A, Subpart III, Section 44701: General requirements. Under that section, Congress charges the FAA with promoting safe flight of civil aircraft in air commerce by prescribing regulations for practices, methods, and procedures the Administrator finds necessary for safety in air commerce. This regulation is within the scope of that authority because it addresses an unsafe condition that is likely to exist or develop on products identified in this rulemaking action.

### Regulatory Findings

The FAA determined that this AD will not have federalism implications under Executive Order 13132. This AD will not have a substantial direct effect on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government.

For the reasons discussed above, I certify that this AD:

(1) Is not a ''significant regulatory action'' under Executive Order 12866, and

(2) Will not affect intrastate aviation in Alaska.

### List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety, Incorporation by reference, Safety.

### Adoption of the Amendment

Accordingly, under the authority delegated to me by the Administrator, the FAA amends 14 CFR part 39 as follows:

## PART 39—AIRWORTHINESS DIRECTIVES

■ 1. The authority citation for part 39 continues to read as follows:

**Authority:** 49 U.S.C. 106(g), 40113, 44701.

### § 39.13 [Amended]

■ 2. The FAA amends § 39.13 by adding the following new airworthiness directive:

**2021–02–05 Airbus SAS:** Amendment 39–21388; Docket No. FAA–2020–1172; Project Identifier MCAI–2020–01661–T.

#### (a) Effective Date

This airworthiness directive (AD) becomes effective January 29, 2021.

#### (b) Affected ADs

None.

#### (c) Applicability

This AD applies to all Airbus SAS airplanes, certificated in any category, identified in paragraphs (c)(1) through (9) of this AD.

(1) Model A330–201, A330–202, A330–203, A330–223, and A330–243 airplanes.

(2) Model A330–223F and A330–243F airplanes.

(3) Model A330–301, A330–302, A330–303, A330–321, A330–322, A330–323, A330–341, A330–342, and A330–343 airplanes.

(4) Model A330–841 airplanes.

(5) Model A330–941 airplanes.

(6) Model A340–211, A340–212, and A340–213 airplanes.

(7) Model A340–311, A340–312, and A340–313 airplanes.

(8) Model A340–541 airplanes.

(9) Model A340–642 airplanes.

#### (d) Subject

Air Transport Association (ATA) of America Code 34, Navigation.

#### (e) Reason

This AD was prompted by a report that an erroneous torque value for the attachment nuts to install a pitot probe was included in the affected Aircraft Maintenance Manual (AMM) task. The FAA is issuing this AD to address the erroneous torque value. If not addressed it could lead to erroneous total pressure measurement being relayed to navigation systems, possibly resulting in reduced control of the airplane.

#### (f) Compliance

Comply with this AD within the compliance times specified, unless already done.

#### (g) Requirements

Except as specified in paragraph (h) of this AD: Comply with all required actions and compliance times specified in, and in accordance with, European Union Aviation Safety Agency (EASA) AD 2020–0279, dated December 14, 2020 (EASA AD 2020–0279).

#### (h) Exceptions to EASA AD 2020–0279

(1) Where EASA AD 2020–0279 refers to its effective date, this AD requires using the effective date of this AD.

(2) The ''Remarks'' section of EASA AD 2020–0279 does not apply to this AD.

#### (i) No Reporting Requirement

Although the service information referenced in EASA AD 2020–0279 specifies to submit certain information to the manufacturer, this AD does not include that requirement.

#### (j) Other FAA AD Provisions

The following provisions also apply to this AD:

(1) *Alternative Methods of Compliance (AMOCs):* The Manager, Large Aircraft Section, International Validation Branch, FAA, has the authority to approve AMOCs for this AD, if requested using the procedures found in 14 CFR 39.19. In accordance with 14 CFR 39.19, send your request to your principal inspector or responsible Flight Standards Office, as appropriate. If sending information directly to the Large Aircraft Section, International Validation Branch, send it to the attention of the person identified in paragraph (k) of this AD. Information may be emailed to: *9-AVS-AIR-730-AMOC@faa.gov.* Before using any approved AMOC, notify your appropriate principal inspector, or lacking a principal inspector, the manager of the responsible Flight Standards Office.

(2) *Contacting the Manufacturer:* For any requirement in this AD to obtain instructions from a manufacturer, the instructions must be accomplished using a method approved by the Manager, Large Aircraft Section, International Validation Branch, FAA; or EASA; or Airbus SAS's EASA Design Organization Approval (DOA). If approved by the DOA, the approval must include the DOA-authorized signature.

(3) *Required for Compliance (RC):* Except as required by paragraph (j)(2) of this AD, if any service information referenced in EASA AD 2020–0279 that contains paragraphs that are labeled as RC, the instructions in RC paragraphs, including subparagraphs under an RC paragraph, must be done to comply with this AD; any paragraphs, including subparagraphs under those paragraphs, that are not identified as RC are recommended. The instructions in paragraphs, including subparagraphs under those paragraphs, not identified as RC may be deviated from using accepted methods in accordance with the operator's maintenance or inspection program without obtaining approval of an AMOC, provided the instructions identified as RC can be done and the airplane can be put back in an airworthy condition. Any substitutions or changes to instructions identified as RC require approval of an AMOC.

#### (k) Related Information

For more information about this AD, contact Vladimir Ulyanov, Aerospace Engineer, Large Aircraft Section, International Validation Branch, FAA, 2200 South 216th St., Des Moines, WA 98198; telephone and fax 206–231–3229; email *vladimir.ulyanov@faa.gov.*

#### (l) Material Incorporated by Reference

(1) The Director of the Federal Register approved the incorporation by reference (IBR) of the service information listed in this paragraph under 5 U.S.C. 552(a) and 1 CFR part 51.

(2) You must use this service information as applicable to do the actions required by this AD, unless this AD specifies otherwise.

(i) European Union Aviation Safety Agency (EASA) AD 2020–0279, dated December 14, 2020.

(ii) [Reserved]

(3) For EASA AD 2020–0279, contact the EASA, Konrad-Adenauer-Ufer 3, 50668 Cologne, Germany; telephone +49 221 8999 000; email *ADs@easa.europa.eu*; internet *www.easa.europa.eu.* You may find this

EASA AD on the EASA website at *https://ad.easa.europa.eu.*

(4) You may view this material at the FAA, Airworthiness Products Section, Operational Safety Branch, 2200 South 216th St., Des Moines, WA. For information on the availability of this material at the FAA, call 206–231–3195. This material may be found in the AD docket on the internet at *https://www.regulations.gov* by searching for and locating Docket No. FAA–2020–1172.

(5) You may view this material that is incorporated by reference at the National Archives and Records Administration (NARA). For information on the availability of this material at NARA, email *fedreg.legal@nara.gov,* or go to: *https://www.archives.gov/federal-register/cfr/ibr-locations.html.*

Issued on January 7, 2021.

**Gaetano A. Sciortino,**

*Deputy Director for Strategic Initiatives, Compliance & Airworthiness Division, Aircraft Certification Service.*

## Department of Labor Federal Civil Penalties Inflation Adjustment Act Annual Adjustments for 2021

**AGENCY:** Employment and Training Administration, Office of Workers' Compensation Programs, Office of the Secretary, Wage and Hour Division, Occupational Safety and Health Administration, and Mine Safety and Health Administration, Department of Labor.

**ACTION:** Final rule.

**SUMMARY:** The U.S. Department of Labor (Department) is publishing this final rule to adjust for inflation the civil monetary penalties assessed or enforced by the Department, pursuant to the Federal Civil Penalties Inflation Adjustment Act of 1990 as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Inflation Adjustment Act). The Inflation Adjustment Act requires the Department to annually adjust its civil money penalty levels for inflation no later than January 15 of each year. The Inflation Adjustment Act provides that agencies shall adjust civil monetary penalties notwithstanding Section 553 of the Administrative Procedure Act (APA). Additionally, the Inflation Adjustment Act provides a cost-of-living formula for adjustment of the civil penalties. Accordingly, this final rule sets forth the Department's 2021 annual adjustments for inflation to its civil monetary penalties.

**DATES:** This final rule is effective on January 15, 2021. As provided by the Inflation Adjustment Act, the increased penalty levels apply to any penalties assessed after January 15, 2021.

**FOR FURTHER INFORMATION CONTACT:** Erin FitzGerald, Senior Policy Advisor, U.S. Department of Labor, Room S–2312, 200 Constitution Avenue NW, Washington, DC 20210; telephone: (202) 693–5076 (this is not a toll-free number). Copies of this final rule may be obtained in alternative formats (large print, Braille, audio tape or disc), upon request, by calling (202) 693–5959 (this is not a toll-free number). TTY/TDD callers may dial toll-free 1–877–889–5627 to obtain information or request materials in alternative formats.

F. Environmental Impact Assessment
G. Executive Order 13211: Energy Supply
H. Executive Order 12630: Constitutionally Protected Property Rights
I. Executive Order 12988: Civil Justice Reform Analysis

### I. Background

On November 2, 2015, Congress enacted the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015, Public Law 114–74, sec. 701 (Inflation Adjustment Act), which further amended the Federal Civil Penalties Inflation Adjustment Act of 1990 as previously amended by the 1996 Debt Collection Improvement Act (collectively, the ''Prior Inflation Adjustment Act''), to improve the effectiveness of civil monetary penalties and to maintain their deterrent effect. The Inflation Adjustment Act required agencies to (1) adjust the level of civil monetary penalties with an initial ''catch-up'' adjustment through an interim final rule (IFR); and (2) make subsequent annual adjustments for inflation no later than January 15 of each year.

On July 1, 2016, the Department published an IFR that established the initial catch-up adjustment for most civil penalties that the Department administers and requested comments. *See* 81 FR 43430 (DOL IFR). On January 18, 2017, the Department published the final rule establishing the 2017 Annual Adjustment for those civil monetary penalties adjusted in the DOL IFR. *See* 82 FR 5373 (DOL 2017 Annual Adjustment). On July 1, 2016, the U.S. Department of Homeland Security (DHS) and the U.S. Department of Labor (DOL) (collectively, ''the Departments'') jointly published an IFR that established the initial catch-up adjustment for civil monetary penalties assessed or enforced in connection with the employment of temporary nonimmigrant workers under the H–2B program. *See* 81 FR 42983 (Joint IFR). On March 17, 2017, the Departments jointly published the final rule establishing the 2017 Annual Adjustment for the H–2B civil monetary penalties. *See* 82 FR 14147 (Joint 2017 Annual Adjustment). The Joint 2017 Annual Adjustment also explained that DOL would make future adjustments to the H–2B civil monetary penalties consistent with DOL's delegated authority under 8 U.S.C. 1184(c)(14), Immigration and Nationality Act section 214(c)(14), and the Inflation Adjustment Act. *See* 82 FR 14147–48. On January 2, 2018, the Department published the final rule establishing the 2018 Annual Adjustment for civil monetary penalties assessed or enforced by the Department, including H–2B civil monetary penalties. *See* 83 FR 7 (DOL 2018 Annual Adjustment). On January 23, 2019, the Department published the final rule establishing the 2019 Annual Adjustment for civil monetary penalties assessed or enforced by the Department, including H–2B civil monetary penalties. *See* 84 FR 213 (DOL 2019 Annual Adjustment). On January 15, 2020, the Department published the final rule establishing the 2020 Annual Adjustment for civil monetary penalties assessed or enforced by the Department, including H–2B civil monetary penalties. *See* 85 FR 2292 (DOL 2020 Annual Adjustment).

This rule implements the 2021 annual inflation adjustments, as required by the Inflation Adjustment Act, for civil monetary penalties assessed or enforced by the Department, including H–2B civil monetary penalties.[1] The Inflation Adjustment Act provides that the increased penalty levels apply to any penalties assessed after the effective date of the increase. Pursuant to the Inflation Adjustment Act, this final rule is published notwithstanding Section 553 of the APA.

This rule is not an Executive Order 13771 regulatory action because this rule is not significant under Executive Order 12866.

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this rule as not a 'major rule,' as defined by 5 U.S.C. 804(2).

## II. Adjustment for 2020

The Department has undertaken a thorough review of civil penalties administered by its various components pursuant to the Inflation Adjustment Act and in accordance with guidance issued by the Office of Management and Budget.[2]

The Department first identified the most recent penalty amount, which is the amount established by the 2020 annual adjustment as set forth in the DOL 2020 Annual Adjustment published on January 15, 2020. The Department is required to calculate the annual adjustment based on the Consumer Price Index for all Urban Consumers (CPI–U). Annual inflation adjustments are based on the percent change between the October CPI–U preceding the date of the adjustment, and the prior year's October CPI–U; in this case, the percent change between the October 2020 CPI–U and the October 2019 CPI–U. The cost-of-living adjustment multiplier for 2021, based on the Consumer Price Index (CPI–U) for the month of October 2020, not seasonally adjusted, is 1.01182.[3] In order to compute the 2021 annual adjustment, the Department multiplied the most recent penalty amount for each applicable penalty by the multiplier, 1.01182, and rounded to the nearest dollar. This resulted in increases to all but four of the penalties administered by the Department, as set forth in the Appendix.

As provided by the Inflation Adjustment Act, the increased penalty levels apply to any penalties assessed after the effective date of this rule.[4] Accordingly, for penalties assessed after January 15, 2021, whose associated violations occurred after November 2, 2015, the higher penalty amounts outlined in this rule will apply. The tables below demonstrate the penalty amounts that apply:

### Civil Monetary Penalties for the H–2B Temporary Non-Agricultural Worker Program

| Violations occurring | Penalty assessed | Which penalty level applies |
|---|---|---|
| On or before November 2, 2015 | On or before August 1, 2016 | Pre-August 1, 2016 levels. |
| On or before November 2, 2015 | After August 1, 2016 | Pre-August 1, 2016 levels. |
| After November 2, 2015 | After August 1, 2016, but on or before March 17, 2017 | August 1, 2016 levels. |
| After November 2, 2015 | After March 17, 2017 but on or before January 2, 2018 | March 17, 2017 levels. |
| After November 2, 2015 | After January 2, 2018 but on or before January 23, 2019. | January 2, 2018 levels. |
| After November 2, 2015 | After January 23, 2019 but on or before January 15, 2020. | January 23, 2019 levels. |
| After November 2, 2015 | After January 15, 2020 but on or before January 15, 2021. | January 15, 2020 levels. |
| After November 2, 2015 | After January 15, 2021 | January 15, 2021 levels. |

### Civil Monetary Penalties for Other DOL Programs

| Violations occurring | Penalty assessed | Which penalty level applies |
|---|---|---|
| On or before November 2, 2015 | On or before August 1, 2016 | Pre-August 1, 2016 levels. |
| On or before November 2, 2015 | After August 1, 2016 | Pre-August 1, 2016 levels. |
| After November 2, 2015 | After August 1, 2016, but on or before January 13, 2017. | August 1, 2016 levels. |
| After November 2, 2015 | After January 13, 2017 but on or before January 2, 2018. | January 13, 2017 levels. |
| After November 2, 2015 | After January 2, 2018 but on or before January 23, 2019. | January 2, 2018 levels. |
| After November 2, 2015 | After January 23, 2019 but on or before January 15, 2020. | January 23, 2019 levels. |
| After November 2, 2015 | After January 15, 2020 but on or before January 15, 2021. | January 15, 2020 levels. |

[1] The Department is also responsible for administering and enforcing a newly-enacted civil monetary penalty under the Fair Labor Standards Act (*see* Public Law 115–141, section 1201 (2018)) and proposed regulations that would codify this civil monetary penalty in the Code of Federal Regulations (CFR) on October 8, 2019. See Tip Regulations Under the Fair Labor Standards Act (FLSA), 84 FR 53956 (proposed Oct. 8, 2019). On December 30, 2020, the Department published a final rule that codifies this civil monetary penalty, adjusted for inflation pursuant to the Inflation Adjustment Act, in the CFR, to be effective on March 1, 2021.

[2] M–21–10, Implementation of Penalty Inflation Adjustments for 2021, Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Dec. 23, 2020).

[3] OMB provided the year-over-year multiplier, rounded to 5 decimal points. *Id.* at 1.

[4] Appendix 1 consists of a table that provides ready access to key information about each penalty.

CIVIL MONETARY PENALTIES FOR OTHER DOL PROGRAMS—Continued

| Violations occurring | Penalty assessed | Which penalty level applies |
|---|---|---|
| After November 2, 2015 | After January 15, 2021 | January 15, 2021 levels. |

## III. Paperwork Reduction Act

The Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)) requires that the Department consider the impact of paperwork and other information collection burdens imposed on the public. The Department has determined that this final rule does not require any collection of information.

## IV. Administrative Procedure Act

The Inflation Adjustment Act provides that agencies shall annually adjust civil monetary penalties for inflation notwithstanding section 553 of the APA. Additionally, the Inflation Adjustment Act provides a nondiscretionary cost-of-living formula for annual adjustment of the civil monetary penalties. For these reasons, the requirements in sections 553(b), (c), and (d) of the APA, relating to notice and comment and requiring that a rule be effective 30 days after publication in the **Federal Register**, are inapplicable.

## V. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review

Executive Order 12866 requires that regulatory agencies assess both the costs and benefits of significant regulatory actions. Under the Executive Order, a ''significant regulatory action'' is one meeting any of a number of specified conditions, including the following: Having an annual effect on the economy of $100 million or more; creating a serious inconsistency or interfering with an action of another agency; materially altering the budgetary impact of entitlements or the rights of entitlement recipients; or raising novel legal or policy issues.

The Department has determined that this final rule is not a ''significant'' regulatory action and a cost-benefit and economic analysis is not required. This regulation merely adjusts civil monetary penalties in accordance with inflation as required by the Inflation Adjustment Act, and has no impact on disclosure or compliance costs. The benefit provided by the inflationary adjustment to the maximum civil monetary penalties is that of maintaining the incentive for the regulated community to comply with the laws enforced by the Department, and not allowing the incentive to be diminished by inflation.

Executive Order 13563 directs agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). Executive Order 13563 emphasizes the importance of quantifying both costs and benefits, reducing costs, harmonizing rules, and promoting flexibility to minimize burden.

The Inflation Adjustment Act directed the Department to issue the annual adjustments without regard to section 553 of the APA. In that context, Congress has already determined that any possible increase in costs is justified by the overall benefits of such adjustments. This final rule makes only the statutory changes outlined herein; thus there are no alternatives or further analysis required by Executive Order 13563.

## VI. Regulatory Flexibility Act and Small Business Regulatory Enforcement Fairness Act

The Regulatory Flexibility Act, 5 U.S.C. 601 *et seq.* (RFA), imposes certain requirements on Federal agency rules that are subject to the notice and comment requirements of the APA, 5 U.S.C. 553(b). This final rule is exempt from the requirements of the APA because the Inflation Adjustment Act directed the Department to issue the annual adjustments without regard to section 553 of the APA. Therefore, the requirements of the RFA applicable to notices of proposed rulemaking, 5 U.S.C. 603, do not apply to this rule. Accordingly, the Department is not required to either certify that the final rule would not have a significant economic impact on a substantial number of small entities or conduct a regulatory flexibility analysis.

## VII. Other Regulatory Considerations

### *A. The Unfunded Mandates Reform Act of 1995*

The Unfunded Mandates Reform Act of 1995, 2 U.S.C. 1531–1538, requires Federal agencies to assess the effects of their discretionary regulatory actions. In particular, the Act addresses actions that may result in the expenditure by a state, local, or tribal government, in the aggregate, or by the private sector of $100,000,000 (adjusted for inflation) or more in any one year. This Final Rule will not result in such an expenditure. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

### *B. Executive Order 13132: Federalism*

Section 18 of the Occupational Safety and Health Act of 1970 (OSH Act) (29 U.S.C. 667) requires Occupational Safety and Health Administration (OSHA)-approved State Plans to have standards and an enforcement program that are at least as effective as Federal OSHA's standards and enforcement program. OSHA-approved State Plans must have maximum and minimum penalty levels that are at least as effective as Federal OSHA's, per section 18(c)(2) of the OSH Act. *See also* 29 CFR 1902.4(c)(2)(xi); 1902.37(b)(12). State Plans are required to increase their penalties in alignment with OSHA's penalty increases to maintain at least as effective penalty levels.

State Plans are not required to impose monetary penalties on state and local government employers. *See* § 1956.11(c)(2)(x). Five (5) states and one territory have State Plans that cover only state and local government employees: Connecticut, Illinois, Maine, New Jersey, New York, and the Virgin Islands. Therefore, the requirements to increase the penalty levels do not apply to these State Plans. Twenty-one states and one U.S. territory have State Plans that cover both private sector employees and state and local government employees: Alaska, Arizona, California, Hawaii, Indiana, Iowa, Kentucky, Maryland, Michigan, Minnesota, Nevada, New Mexico, North Carolina, Oregon, Puerto Rico, South Carolina, Tennessee, Utah, Vermont, Virginia, Washington, and Wyoming. They must increase their penalties for private-sector employers.

Other than as listed above, this final rule does not have federalism implications because it does not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government. Accordingly, Executive Order 13132, Federalism, requires no further agency action or analysis.

*C. Executive Order 13175: Indian Tribal Governments*

This final rule does not have ''tribal implications'' because it does not have substantial direct effects on one or more Indian tribes, on the relationship between the Federal Government and Indian tribes, or on the distribution of power and responsibilities between the Federal Government and Indian tribes. Accordingly, Executive Order 13175, Consultation and Coordination with Indian Tribal Governments, requires no further agency action or analysis.

**List of Subjects**

*20 CFR Part 655*

Immigration, Labor, Penalties.

*20 CFR Part 702*

Administrative practice and procedure, Longshore and harbor workers, Penalties, Reporting and recordkeeping requirements, Workers' compensation.

*20 CFR Part 725*

Administrative practice and procedure, Black lung benefits, Coal miners, Penalties, Reporting and recordkeeping requirements.

*20 CFR Part 726*

Administrative practice and procedure, Black lung benefits, Coal miners, Mines, Penalties.

*29 CFR Part 500*

Administrative practice and procedure, Aliens, Housing, Insurance, Intergovernmental relations, Investigations, Migrant labor, Motor vehicle safety, Occupational safety and health, Penalties, Reporting and recordkeeping requirements, Wages, Whistleblowing.

*29 CFR Part 501*

Administrative practice and procedure, Agriculture, Aliens, Employment, Housing, Housing standards, Immigration, Labor, Migrant labor, Penalties, Transportation, Wages.

*29 CFR Part 503*

Administrative practice and procedure, Aliens, Employment, Housing, Immigration, Labor, Penalties, Transportation, Wages.

*29 CFR Part 530*

Administrative practice and procedure, Clothing, Homeworkers, Indians-arts and crafts, Penalties, Reporting and recordkeeping requirements, Surety bonds, Watches and jewelry.

*29 CFR Part 570*

Child labor, Law enforcement, Penalties.

*29 CFR Part 578*

Penalties, Wages.

*29 CFR Part 579*

Child labor, Penalties.

*29 CFR Part 801*

Administrative practice and procedure, Employment, Lie detector tests, Penalties, Reporting and recordkeeping requirements.

*29 CFR Part 825*

Administrative practice and procedure, Airmen, Employee benefit plans, Health, Health insurance, Labor management relations, Maternal and child health, Penalties, Reporting and recordkeeping requirements, Teachers.

*29 CFR Part 1903*

Intergovernmental relations, Law enforcement, Occupational Safety and Health, Penalties.

*30 CFR Part 100*

Mine safety and health, Penalties.

For the reasons set out in the preamble, 20 CFR chapters V and VI, 29 CFR chapters V and XVII, and 30 CFR chapter I are amended as follows:

## DEPARTMENT OF LABOR

## Employment and Training Administration

**Title 20—Employees' Benefits**

## PART 655—TEMPORARY EMPLOYMENT OF FOREIGN WORKERS IN THE UNITED STATES

■ 1. The authority citation for part 655 continues to read as follows:

**Authority:** Section 655.0 issued under 8 U.S.C. 1101(a)(15)(E)(iii), 1101(a)(15)(H)(i) and (ii), 8 U.S.C. 1103(a)(6), 1182(m), (n), (p) and (t), 1184(c), (g), and (j), 1188, and 1288(c) and (d); sec. 3(c)(1), Pub. L. 101–238, 103 Stat. 2099, 2102 (8 U.S.C. 1182 note); sec. 221(a), Pub. L. 101–649, 104 Stat. 4978, 5027 (8 U.S.C. 1184 note); sec. 303(a)(8), Pub. | § 726.302(c)(5) | January 15, 2020 | January 15, 2021. |
| § 726.302(c)(5) | 436 | 441. |
| § 726.302(c)(6) | January 15, 2020 | January 15, 2021. |
| § 726.302(c)(6) | 2,976 | 3,011. |

## DEPARTMENT OF LABOR

## Wage and Hour Division

## Title 29—Labor

## PART 500—MIGRANT AND SEASONAL AGRICULTURAL WORKER PROTECTION

■ 9. The authority citation for part 500 continues to read as follows:

**Authority:** Pub. L. 97–470, 96 Stat. 2583 (29 U.S.C. 1801–1872); Secretary's Order No. 01–2014 (Dec. 19, 2014), 79 FR 77527 (Dec. 24, 2014); 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); and Pub. L. 114–74, 129 Stat 584.

### § 500.1 [Amended]

■ 10. In § 500.1, amend paragraph (e) by removing ''$2,549'' and adding in its place ''$2,579''.

## PART 501—ENFORCEMENT OF CONTRACTUAL OBLIGATIONS FOR TEMPORARY ALIEN AGRICULTURAL WORKERS ADMITTED UNDER SECTION 218 OF THE IMMIGRATION AND NATIONALITY ACT

■ 11. The authority citation for part 501 continues to read as follows:

**Authority:** 8 U.S.C. 1101(a)(15)(H)(ii)(a), 1184(c), and 1188; 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); and Pub. L. 114–74 at § 701.

### § 501.19 [Amended]

■ 12. In the following table, for each paragraph indicated in the left column, remove the dollar amount indicated in the middle column from wherever it appears in the paragraph and add in its place the dollar amount indicated in the right column.

| Paragraph | Remove | Add |
|---|---|---|
| § 501.19(c) introductory text | $1,766 | $1,787 |
| § 501.19(c)(1) | 5,942 | 6,012 |
| § 501.19(c)(2) | 57,833 | 59,528 |
| § 501.19(c)(4) | 117,664 | 119,055 |
| § 501.19(d) | 5,942 | 6,012 |
| § 501.19(e) | 17,650 | 17,859 |
| § 501.19(f) | 17,650 | 17,859 |

## PART 503—ENFORCEMENT OF OBLIGATIONS FOR TEMPORARY NONIMMIGRANT NON-AGRICULTURAL WORKERS DESCRIBED IN THE IMMIGRATION AND NATIONALITY ACT

■ 13. The authority citation for part 503 continues to read as follows:

**Authority:** 8 U.S.C. 1101(a)(15)(H)(ii)(b); 8 U.S.C. 1184; 8 CFR 214.2(h); 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); Pub. L. 114–74 at § 701.

### § 503.23 [Amended]

■ 14. In the following table, for each paragraph indicated in the left column, remove the dollar amount indicated in the middle column from wherever it appears in the paragraph, and add in its place the dollar amount indicated in the right column:

| Paragraph | Remove | Add |
|---|---|---|
| § 503.23(b) | $12,919 | $13,072 |
| § 503.23(c) | 12,919 | 13,072 |
| § 503.23(d) | 12,919 | 13,072 |

## PART 530—EMPLOYMENT OF HOMEWORKERS IN CERTAIN INDUSTRIES

■ 15. The authority citation for part 530 continues to read as follows:

**Authority:** Sec. 11, 52 Stat. 1066 (29 U.S.C. 211) as amended by sec. 9, 63 Stat. 910 (29 U.S.C. 211(d)); Secretary's Order No. 01–2014 (Dec. 19, 2014), 79 FR 77527 (Dec. 24, 2014); 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); Pub. L. 114–74 at § 701, 129 Stat 584.

■ 16. In § 530.302:

■ a. Amend paragraph (a) by removing ''$1,071'' and adding in its place ''$1,084;'' and

■ b. Revising paragraph (b).

The revision reads as follows:

### § 530.302 Amounts of civil penalties.

* * * * *

(b) The amount of civil money penalties shall be determined per affected homeworker within the limits set forth in the following schedule, except that no penalty shall be assessed in the case of violations which are deemed to be *de minimis* in nature:

TABLE 1 TO PARAGRAPH (b)

| Nature of violation | Penalty per affected homeworker | | |
|---|---|---|---|
| | Minor | Substantial | Repeated, intentional or knowing |
| Recordkeeping | $21–217 | $217–433 | $433–1,084 |
| Monetary violations | 21–217 | 217–433 | |
| Employment of homeworkers without a certificate | | 217–433 | 433–1,084 |
| Other violations of statutes, regulations or employer assurances | 21–217 | 217–433 | 433–1,084 |

## PART 570—CHILD LABOR REGULATIONS, ORDERS AND STATEMENTS OF INTERPRETATION

### Subpart G—General Statements of Interpretation of the Child Labor Provisions of the Fair Labor Standards Act of 1938, as Amended

■ 17. The authority citation for subpart G of part 570 continues to read as follows:

**Authority:** 52 Stat. 1060–1069, as amended; 29 U.S.C. 201–219; 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); Pub. L. 114–74 at § 701.

### § 570.140 [Amended]

■ 18. In § 570.140, amend paragraph (b)(1) by removing ''$13,072'' and adding in its place ''$13,227'' and paragraph (b)(2) by removing ''$59,413'' and adding in its place ''$60,115''.

## PART 578—MINIMUM WAGE AND OVERTIME VIOLATIONS—CIVIL MONEY PENALTIES

■ 19. The authority citation for part 578 continues to read as follows:

**Authority:** Sec. 9, Pub. L. 101–157, 103 Stat. 938, sec. 3103, Pub. L. 101–508, 104 Stat. 1388–29 (29 U.S.C. 216(e)), Pub. L. 101–410, 104 Stat. 890 (28 U.S.C. 2461 note), as amended by Pub. L. 104–134, section 31001(s), 110 Stat. 1321–358, 1321–373, and Pub. L. 114–74, 129 Stat 584.

### § 578.3 [Amended]

■ 20. In § 578.3, amend paragraph (a) by removing ''$2,050'' and adding in its place ''$2,074''.

## PART 579—CHILD LABOR VIOLATIONS—CIVIL MONEY PENALTIES

■ 21. The authority citation for part 579 continues to read as follows:

**Authority:** 29 U.S.C. 203(l), 211, 212, 213(c), 216; Reorg. Plan No. 6 of 1950, 64 Stat. 1263, 5 U.S.C. App; secs. 25, 29, 88 Stat. 72, 76; Secretary of Labor's Order No. 01–2014 (Dec. 19, 2014), 79 FR 77527 (Dec. 24, 2014); 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); and Pub. L. 114–7, 129 Stat 584.

### § 579.1 [Amended]

■ 22. In the following table, for each paragraph indicated in the left column, remove the dollar amount indicated in the middle column from wherever it appears in the paragraph and add in its place the dollar amount indicated in the right column.

| Paragraph | Remove | Add |
|---|---|---|
| § 579.1(a)(1)(i)(A) | $13,072 | $13,227 |
| § 579.1(a)(1)(i)(B) | 59,413 | 60,115 |
| § 579.1(a)(2) | 2,050 | 2,074 |

## PART 801—APPLICATION OF THE EMPLOYEE POLYGRAPH PROTECTION ACT OF 1988

■ 23. The authority citation for part 801 continues to read as follows:

**Authority:** Pub. L. 100–347, 102 Stat. 646, 29 U.S.C. 2001–2009; 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); Pub. L. 114–74 at § 701, 129 Stat 584.

### § 801.42 [Amended]

■ 24. In § 801.42, amend paragraph (a) introductory text by removing ''$21,410'' and adding in its place ''$21,663''.

## PART 825—THE FAMILY AND MEDICAL LEAVE ACT OF 1993

■ 25. The authority citation for part 825 continues to read as follows:

**Authority:** 29 U.S.C. 2654; 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990); and Pub. L. 114–74 at § 701.

### § 825.300 [Amended]

■ 26. In § 825.300, amend paragraph (a)(1) by removing ''$176'' and adding in its place ''$178''.

## DEPARTMENT OF LABOR

## Occupational Safety and Health Administration

## Title 29—Labor

## PART 1903—INSPECTIONS, CITATIONS, AND PROPOSED PENALTIES

■ 27. The authority citation for part 1903 continues to read as follows:

**Authority:** Secs. 8 and 9 of the Occupational Safety and Health Act of 1970 (29 U.S.C. 657, 658); 5 U.S.C. 553; 28 U.S.C. 2461 note (Federal Civil Penalties Inflation Adjustment Act of 1990), as amended by Section 701, Pub. L. 114–74; Secretary of Labor's Order No. 1–2012 (77 FR 3912, Jan. 25, 2012).

### § 1903.15 [Amended]

■ 28. In the following table, for each paragraph indicated in the left column, remove the dollar amount or date indicated in the middle column from wherever it appears in the paragraph and add in its place the dollar amount or date indicated in the right column.

| Paragraph | Remove | Add |
|---|---|---|
| § 1903.15(d) introductory text | January 15, 2020 | January 15, 2021. |
| § 1903.15(d)(1) | $9,639 | $9,753. |
| § 1903.15(d)(1) | $134,937 | $136,532. |
| § 1903.15(d)(2) | $134,937 | $136,532. |
| § 1903.15(d)(3) | $13,494 | $13,653. |
| § 1903.15(d)(4) | $13,494 | $13,653. |
| § 1903.15(d)(5) | $13,494 | $13,653. |
| § 1903.15(d)(6) | $13,494 | $13,653. |

**DEPARTMENT OF LABOR**

**Mine Safety and Health Administration**

## Update of Commission's Conciliation Procedures

**AGENCY:** Equal Employment Opportunity Commission

**ACTION:** Final rule.

**SUMMARY:** The Equal Employment Opportunity Commission (EEOC or Commission) is amending its procedural rules governing the conciliation process to bring greater transparency and consistency to the conciliation process and help ensure that the Commission meets its statutory obligations regarding conciliation.

**DATES:** This rule will become effective February 16, 2021. However, this Rule shall only apply to conciliations for charges for which a Letter of Determination invitation to engage in conciliation has been sent to respondent on or after the effective date.

**FOR FURTHER INFORMATION CONTACT:** Andrew Maunz, Legal Counsel, Office of Legal Counsel at *andrew.maunz@eeoc.gov.* Requests for this document in an alternative format should be made to the EEOC's Office of Communications and Legislative Affairs at (202) 663–4191 (voice) or (202) 663–4494 (TTY).

**SUPPLEMENTARY INFORMATION:**

### Introduction

On October 9, 2020, the Commission published a Notice of Proposed Rulemaking (NPRM) outlining proposed revisions designed to update the Commission's conciliation procedures for charges alleging violations of Title VII of the Civil Rights Act of 1964 (Title VII), the Americans with Disabilities Act (ADA), the Genetic Information Nondiscrimination Act (GINA), and/or the Age Discrimination in Employment Act (ADEA). 85 FR 64079. The NPRM described the Commission's obligations to engage in conciliation to resolve these charges, as articulated in Title VII and other statutes and explained by the Supreme Court in *Mach Mining, LLC* v. *EEOC*, 575 U.S. 480 (2015).

Conciliation is an essential component of Title VII's statutory framework that Congress designed to prohibit, identify, and eradicate discriminatory employment practices. *See Alexander* v. *Gardner-Denver, Co.,* 415 U.S. 36, 44 (1974); *Ford Motor Co.* v. *EEOC*, 458 U.S. 219, 228 (1982) (''[t]he 'primary objective' of Title VII is to bring employment discrimination to an end.''); *Griggs* v. *Duke Power Co.*, 401 U.S. 424, 429–30 (1971) (the objective of Title VII was to break down discriminatory employment practices that ''favor an identifiable group . . . over other employees''). Rather than simply afford victims a cause of action for damages as in other statutory regimes, Congress settled on a framework that ''preferred'' cooperation and voluntary compliance, over litigation. *Mach Mining,* 575 U.S. at 486 (citation omitted). The Supreme Court explained that Title VII was designed to encourage '' '. . . 'voluntary compliance' and ending discrimination far more quickly than could litigation proceeding at its often ponderous pace.'' *Ford Motor,* 458 U.S. at 228. ''Delays in litigation unfortunately are now commonplace, forcing the victims of discrimination to suffer years of underemployment or unemployment before they can obtain a court order awarding them the jobs unlawfully denied them.'' *Id.* Conciliation was designed—and remains—a critical component of the Commission's mission to eliminate discriminatory employment practices, if possible, without litigation.

The Commission issued conciliation regulatory procedures in 1977 and has not changed them significantly since that time. *See* 85 FR at 64079. The NPRM described various challenges confronting the Commission's conciliation program. Notably, approximately one-third of respondents who receive a reasonable cause finding refuse to participate in conciliation. Overall, more than half of the cases in which the Commission finds reasonable cause that discrimination occurred are not resolved through conciliation. *Id.* at 64080.[1] In order to increase the effectiveness of the EEOC's conciliation program and more frequently achieve the agency's statutory mission, the NPRM proposed certain targeted and straightforward revisions to the Commission's conciliation procedures. *See* 85 FR at 64083–84. The primary objective of these revisions is to make conciliation a more powerful mechanism to halt and remedy unlawful discriminatory employment practices in a greater percentage of charges without litigation—either by the Commission or by employees. The Commission aims to accomplish this with these revisions by implementing requirements regarding the information that it must provide in preparation for and during conciliation, particularly with respect to its findings and demands. At their core, they ensure the Commission will provide certain information—the essential facts and the law supporting the claim, findings, and demands. Compliance with these requirements should put beyond reasonable dispute in most, if not all, cases the Commission's compliance with *Mach Mining.* More important, it will facilitate as a matter of course in all cases respondents' identification of the specific discriminatory practices at issue. This will directly facilitate voluntary prospective remedial action regarding the policy or practice, notwithstanding respondents' position during conciliation or subsequent litigation. And by eliminating such discriminatory practices without litigation, the Commission accomplishes its primary statutory objective in conciliation to purge unlawful discrimination in employment. Moreover, by providing information regarding the basis for the Commission's

[1] The Commission's failure to conciliate cases may have significant ramifications. Each year, failed conciliations leave many victims of discrimination to fend for themselves. As explained below, too often many of these individuals do not commence an action in court because they cannot obtain an attorney and the prospect of litigating is too daunting. Many of those who litigate do so without counsel, potentially placing victims at a disadvantage. Even those represented by counsel may not prevail—and those who do obtain relief sought may not receive it until several years after the discrimination at issue. By conciliating more cases, the Commission will be getting more victims relief, preventing more future discrimination, and ensuring that relief is more timely obtained.

finding and demands, the respondent will be able to more effectively assess its potential liability. This increased information will enhance the conciliation process for all parties to conciliation and may focus discussions in a way more likely to achieve a meeting of the minds or, alternatively, clearly distill areas of disagreement that may aid the Commission in subsequent litigation.

The Commission recognizes that currently, certain information is generally provided to employers prior to a cause finding and in the Letter of Determination, all of which occur prior to conciliation. The Commission also recognizes that the respondent is generally the holder of its own records and information. This rule is not meant to replace those disclosures or duplicate them,[2] but instead to ensure that the information the Commission provides about its position and findings enables respondents to properly evaluate their potential liability and the Commission's settlement offer, and ultimately, result in respondents becoming more likely to participate and resolve the charge.

The comment period for the NPRM closed on November 9, 2020. The Commission received a total of 58 comments in response to the NPRM—15 in favor, 33 in opposition, and 10 non-responsive. Commenters on both sides of the proposal included organizations and individuals. The Commission also received a comment from members of Congress in support of the rule. Former officials and employees of the Commission also submitted comments against the proposed changes. At least one commenter submitted two comments.

As explained in greater detail below, the Commission has carefully considered each of the comments it received. Based on these submissions, the Commission is publishing this final rule that, while similar to the proposed rule in most respects, nevertheless contains certain modifications, which are explained below.

**Comments in Support of Proposal and the Commission's Responses**

Several commenters agreed that there are challenges in the Commission's conciliation practices and procedures as recounted in the proposed rule. Specifically, they echoed and illustrated the ways in which the Commission's procedures and practices complicated and prevented the communication necessary to conciliate charges and stop employment practices that the Commission has determined after an investigation to be discriminatory. Commenters highlighted illustrative examples of conciliations in which the commenters allege the Commission issued large demands, with minimal explanation and insufficient support for the Commission's position. The commenters noted that in these and similar circumstances, the Commission's communications did not describe the act or practice alleged to be discriminatory, why it violated federal law, and which person or class was unlawfully harmed. 42 U.S.C. 2000e–5(b); *Mach Mining,* 575 U.S. at 488. The Commission agrees that without this basic information, the respondent may not be able to evaluate the merit of the Commission's position or demand, weigh the demand against the risk and expense of possible litigation and take directed action to ameliorate the problem. Even more important, a demand without commensurate support does not ''inform the employer about the specific allegations'' in a way that ''endeavors to achieve voluntary compliance.'' *Mach Mining,* 575 U.S. at 488, 494. Indeed, it is axiomatic that a party cannot adequately evaluate a claim or related demand without understanding the factual and legal basis for it. A lack of information can also impact the employer's ability to evaluate its practices or provide potentially helpful information to the Commission that may facilitate conciliation or, at a minimum, inform the Commission's subsequent litigation assessment. In the commenters' view, this short-circuits the conciliation process before meaningful communication between the parties even commences. Without this information, a respondent cannot engage in this analysis and determine whether the offer presented by the EEOC is the best way to resolve the case under the circumstances.

Commenters emphasized the importance of a thorough understanding of the opposing party's position during discussions aimed at reaching a resolution prior to litigation. As one commenter put it, the lack of factual and legal support for a demand or response leaves both the Commission and the employer with an ''asymmetrical view'' of their own position and a lack of understanding of the other side's position. One law firm asserted that the ubiquity of the EEOC's ''no facts'' strategy during conciliation indicates it is deeply engrained in the agency's culture. In the commenter's experience, the dearth of factual and legal support for demands frequently implies weaknesses in the underlying reasonable cause determinations. As another law firm put it: ''[w]hen the conciliation process becomes simply a series of demands, unsupported by relevant facts or legal authority, it is at best a futile and resource-consuming exercise, and at worst, an attempt to bring the weight of the federal government to bear on and extort an employer with little proof of wrongdoing.''

Members of Congress who submitted comments highlighted that on several occasions they had identified issues with the Commission's conciliation process; these issues were distinct from the examples provided by law firm and industry commenters.

The commenters in favor of the proposed rule agreed that the Commission's proposal addresses the principal challenges in its conciliation procedures and processes in ways that are likely to result in more meaningful conciliations and, ultimately, more agreements. Specifically, commenters stated that the proposed changes would ''entice'' more respondents to participate in conciliation. Commenters also noted that establishing these requirements through regulations, as opposed to through sub-regulatory guidance or employee training, would bring more certainty to the conciliation process. As articulated by the Ranking Member of the House Committee on Education and Labor, ''[t]hese commonsense requirements will increase transparency in the conciliation process and facilitate quicker resolutions of charges as the employer will have more information about the underlying charge, EEOC's position, and the employer's legal obligations.''

*Commission Response:* The Commission recognizes the importance of an effective conciliation program in its mission to identify and eradicate discriminatory employment actions and practices and, in so doing, obtain relief for its victims without the delay, expense, and uncertainty of possible litigation. The Commission also appreciates the place of primacy that conciliation holds in Title VII's statutory framework. By providing information concerning the factual and legal bases for its position for charges where it has found reasonable cause, the Commission believes it places itself in a stronger position to achieve conciliation in more cases—eliminating a greater number of unlawful employment practices and obtaining relief for victims of discrimination

[2] In many instances, these previous disclosures will satisfy the Commission's disclosure requirements under the final rule because the rule only requires disclosure of the information if the Commission has not already done so.

earlier than it can through litigation. By providing such information, the Commission can alleviate criticisms that demands are excessive or not supported by the evidence and the law. Providing this information should facilitate respondents' identification and redress of discriminatory practices regardless of the outcome of conciliation. Provided with this information, the Commission believes that a greater number of respondents will be more likely to engage in the conciliation process and comply voluntarily to resolve the charge. And by employing its revised conciliation procedures, the Commission will satisfy the requirements of 42 U.S.C. 2000e–5(b), as elucidated in *Mach Mining.* The Commission hopes that this final rule will reduce collateral attacks on the conciliation process during Commission litigation. In the event of such a challenge, the Commission will be able to demonstrate that it has met the conciliation requirements of the statute by submitting an affidavit stating that it has taken the required steps. *See Mach Mining,* 575 U.S. at 494–95. Ultimately, the Commission has concluded that the final rule will improve its ability to carry out in more cases its statutory mandate to eliminate discriminatory employment practices and achieve relief for workers ''far more quickly than could litigation proceeding at its often ponderous pace.'' *Ford Motor Co.,* 458 U.S. at 228.

As noted above, by improving the Commission's effectiveness to carry out its conciliation responsibilities, the final rule also affords considerable benefits to charging parties. As the EEOC is only able to litigate a small fraction of cases that fail conciliation, in most cases where conciliation fails, workers must fend for themselves in court to obtain relief. This means that charging parties must file and litigate their own lawsuits to secure any relief. Many choose not to sue. And, as several commenters noted, those that decide to seek legal action may be in the position of having to litigate without counsel. Even those who obtain counsel frequently fail to obtain significant relief and, if they prevail, may wait years for discovery, motions, trial, and appeals to conclude. By resolving more cases through conciliation, more victims of discrimination will obtain relief than would have otherwise and even the ones that would have obtained relief through litigation eventually, will receive relief more quickly, without incurring the expense and risk of litigation.

*Suggestions by Commenters:* Several commenters who supported the proposed rule also suggested what they saw as improvements. The Commission addresses each of the suggestions below:

1. *Extend the time period by which respondents must respond to the Commission's conciliation offer beyond fourteen days:* Several commenters stated that the Commission should give respondents more than 14 days to respond, especially in certain complex and systemic cases.

*Commission response:* The Commission declines to change the language or the requirement as it was originally proposed in sections 1601.24(d)(5) and 1626.12(b)(5) because the Commission concludes that these sections contain sufficient flexibility to allow longer response periods in appropriate cases. The proposed rule stated that respondents will be provided ''*at least* 14 days.'' There will certainly be cases where the Commission extends this period beyond 14 days, and the language allows the Commission to make this determination on a case-by-case basis. As a result, the Commission leaves unchanged the proposed language in the final rule.

2. *Allow anonymity in circumstances only where charging parties or aggrieved individuals are at risk of retaliation:* Several commenters urged the Commission to limit the charging parties or aggrieved individuals to whom it grants anonymity in conciliation under sections 1604.24(d)(1) and 1626.12(b)(1). Specifically, commenters suggested that the Commission grant anonymity only to current employees of the respondent because they, unlike former employees or failed applicants, are at risk of retaliation. Commenters indicated that it is often difficult to respond to the Commission's findings of discrimination, particularly in individual cases, when they do not know the identity or circumstances of a particular victim. Although conciliation is not intended to provide an opportunity to challenge the cause finding, one commenter noted that that a respondent could face an allegation that it did not hire an individual because of her race and that if the identity of the individual is withheld, it would not be able to determine if there were other reasons the individual was not hired, such as failing to show up for her interview.

*Commission response:* The Commission acknowledges that it in some cases it may be difficult for respondents to evaluate the merits of the Commission's conciliation proposal if the respondent is unaware of the identity of the victim(s). Respondents do receive the name of the charging parties when they are notified of the charge soon after it is filed. Some commenters suggest that anonymity be limited to only current employees recognizing their concern about potential retaliation. However, the Supreme Court has noted that former, current, and prospective employees are protected from retaliation. *See Robinson* v. *Shell Oil Co.*, 519 U.S. 337, 345–46 (1997). Therefore, the Commission does not adopt this proposed change.

3. *Requiring the charging party to participate in conciliation:* One commenter suggested that the charging party should be required to participate in the conciliation, similar to a mediation.

*Commission response:* The Commission declines to adopt this proposed change. In conciliation, the Commission does not merely serve as the advocate of the charging party or aggrieved individual. Rather, the Commission's core objective is to vindicate the public's interest and eliminate discriminatory employment policies and practices. In some cases, but not all, this will achieve relief for the charging party as well as other workers and potential employees. Given these varied interests, conciliations take different forms and the charging party's participation varies from case to case for a myriad of reasons. The Commission believes it is important to the Commission's ability to achieve the broader purposes of conciliation to preserve its flexibility regarding the involvement of the charging party in each case. *See EEOC* v. *Waffle House, Inc.,* 534 U.S. 279, 291 (2002) (''The statute clearly makes the EEOC the master of its own case and confers on the agency the authority to evaluate the strength of the public interest at stake.''). As a result, the Commission declines to mandate the charging party's participation in every instance.

4. *Commission must respond to all counteroffers and affirmative defenses:* Multiple commenters stated that the rule should require the Commission to respond to all counteroffers a respondent makes and that the Commission must respond to all affirmative defenses that are raised during conciliation.

*Commission response:* Conciliation is, first and foremost, the means Congress ''preferred'' the Commission to use to target and eliminate discrimination in employment. Indeed, Congress did not afford the Commission authority to commence litigation until 1972. Conciliation is not a rigid, structured, bargaining framework. As the Supreme Court made clear in *Mach Mining,* Congress afforded the Commission wide latitude to pursue voluntary compliance with a statutory provision, ''every aspect'' of which ''smacks of flexibility.'' *Mach Mining,* 575 U.S. at 492; 42 U.S.C. 2000e–5(b). And like the Supreme Court in that case, the Commission declines to infuse the conciliation process with a rigid code of rules that handcuffs the agency by limiting the broad strategic leeway Title VII affords to it to execute its mission. *See Mach Mining,* 575 U.S. at 492 (rejecting the petitioner's ''proposed code of conduct'' and ''bargaining checklist'' because ''Congress left to the EEOC such strategic questions about whether to make a bare-minimum offer, to lay all its cards on the table, or to respond to each of an employer's counter-offers, however far afield.''). The Commission meets its statutory obligation by providing the basic factual and legal information for the respondent to evaluate the claim and identify the discriminatory action or practice. But once this is accomplished, the Commission retains ''discretion over the pace and duration of conciliation efforts, the plasticity or firmness of its negotiating positions, and the content of its demands for relief.'' *Id.* The Commission declines to adopt such proposals because they damage the flexibility critical to its ability to conciliate claims without any concomitant benefit.

5. *Disclosures should be made in writing:* In the NPRM, the Commission solicited comments on whether the disclosures described in the proposed rule should be made in writing. 85 FR at 64081. Several commenters advocated written disclosures in order to ensure clarity. Significantly, one commenter contended that written disclosure of all material should be required so that all parties have a complete and unambiguous understanding of the Commission's position. Another commenter explained that written disclosures are more effective than mere oral exchanges in the negotiation process. This commenter noted that if the parties are required to communicate and exchange information in writing, it is less likely that the parties will be unclear as to the other parties' positions and information exchanged during the process.

*Commission response:* The Commission agrees that written disclosures help ensure clarity throughout the conciliation process. The Commission further agrees that providing information in writing will ensure full transparency of the conciliation process. Exchanging information in writing, where appropriate, eliminates confusion and promotes more accurate and complete information regarding the relevant issues. For these reasons, the Commission will keep the ''written'' reference that was in the NRPM and clarify that the other disclosures be in writing. However, for sections 1601.24(d)(3) and 1626.12(b)(3), the requirement that the disclosure be in writing shall apply only to the initial conciliation proposal made by the EEOC. In order to preserve the Commission's flexibility in conciliation, in recognition of the fact that demands are made at various times in a sequence of offers and counteroffers, and in order to avoid the increased burden on its staff to prepare a written explanation to accompany each change of position, the Commission has determined that disclosures explaining the basis for its requests for relief for subsequent offers and counteroffers need not be in writing and may be issued orally.

6. *Mediators should handle conciliation, not investigators:* One commenter urged the Commission to assign mediators to handle conciliations instead of investigators.

*Commission response:* The Commission disagrees with this comment and shall not adopt it. As the Commission has maintained throughout this process, it is not looking fundamentally to change its conciliation structure with this rule. Investigators remain in the best position to handle conciliation discussions as they are familiar with the case and the issues surrounding it. Furthermore, the process and purpose of conciliation is different than mediation. Accordingly, the Commission rejects this proposal.

7. *The Commission should disclose additional information:* A number of commenters stated that the Commission should make certain disclosures under sections 1601.24(d)(1), such as the identity of harassers or at-fault supervisors and potential class sizes.

*Commission response:* The Commission agrees that these disclosures will allow respondents to better assess their potential liability by identifying discriminatory practices, policies, and actions, and as a result advance the Commission's conciliation efforts to identify and eliminate discriminatory employment practices. However, the identities of harassers or supervisors may not be known at the time of conciliation. Similarly, sometimes class size may not have been fully determined. Accordingly, the final rule makes the disclosures references in the last two sentences of § 1601.24(d)(1) mandatory, only if known to the Commission.

8. *Establish a ''good faith'' standard:* A few commenters requested that the Commission impose a ''good faith'' standard on itself during conciliation.

*Commission Response:* At the outset, the Commission rejects the notion that it does not undertake its statutory responsibilities in good faith. All Commission employees are expected to approach conciliation in good faith and endeavor to achieve conciliation and its purposes within the framework of the Commission's procedures. In those situations where a respondent may disagree with the Commission's strategy in a particular case or a hard line taken in discussions does not mean that Commission personnel are not acting in good faith. The Commission declines to impose upon itself a standard as suggested that could open a door to collateral litigation. For these reasons the Commission declines to adopt such a standard, preferring the straightforward approach as updated by the final rule.

9. *Alter the privilege standard:* Several commenters requested that the Commission revise provisions concerning privilege contained in sections 1601.24(e) and 1626.12(c). Specifically, these commenters argued that the Commission should preclude itself from claiming privilege on the underlying facts it gathers and limiting the discretion of Commission employees in identifying privileged material.

*Commission response:* The Commission declines to make specific statements regarding privilege beyond that which is set forth in the proposed rule. The Commission will continue to claim all privileges to which it is entitled by law. The Commission declines to amend the rule to outline specific criteria for employees to follow concerning assertions of privilege.

10. *Confidentiality of conciliations:* Multiple commenters asked that the Commission prohibit itself from seeking publication of the conciliation, through terms in the conciliation agreement. One commenter explains that, in their experience, it is common for the Commission to require, as a condition of successful conciliation, that a respondent agree to waive confidentiality and allow the Commission to issue a public press release announcing some or all of the terms of the parties' agreement. The commenter contends that this serves not only to deter employers from entering conciliation at the outset but can serve to lead a case that might otherwise be resolved via conciliation to instead fail to be resolved in conciliation.

*Commission response:* The Commission will not make this change.

Section 706 of Title VII clearly requires approval to disclose information concerning conciliation. 42 U.S.C. 2000e–5(b) (''Nothing said or done during and as a part of such informal endeavors may be made public by the Commission, its officers or employees, or used as evidence in a subsequent proceeding without the written consent of the persons concerned.''). As the Commission has explained, conciliation is a ''favored'' method to identify and eliminate illegal discrimination in employment. Publication of conciliation results—or certain elements of those results—often furthers this objective. There are valid reasons for the Commission to seek approval to publicize certain successful agreements and the Commission will continue to do so where appropriate.

11. *Limit disclosure of individual's information to another aggrieved individual:* Some commenters were concerned that sections 1601.24(f) and 1626.12(d) would result in disclosure of information about other victims to the charging party or to other aggrieved individuals that may violate a victim's privacy.

*Commission response:* The Commission agrees with this concern and has included language in the rule that information may be shared with charging parties ''except for information about another charging party or individual'' to ensure that information about an individual is not disclosed to another charging party or aggrieved individual. Although objected to by some commenters who opposed the rule, the Commission will not be taking out the ''upon request'' language regarding disclosures to charging parties. It is important for the Commission to maintain its discretion and flexibility with how it engages with aggrieved individuals during the conciliation process. Moreover, the burden on staff to provide this information to all identified aggrieved parties would be substantial in class cases.

12. *Commission should always make initial offer:* One commenter advocated a requirement that the Commission always make the initial offer in conciliation.

*Commission Response:* The Commission will not add this requirement to the final rule. Although the Commission agrees that often it is appropriate for the Commission to make the initial offer in conciliation, this is not always the case. There are circumstances in which a respondent may prefer to make the initial offer or where such an outcome is otherwise appropriate or more likely to secure terms ''acceptable to the Commission.'' 42 U.S.C. 2000e–5(f)(1). The imposition of such a procedural requirement could operate to impede the Commission's ability to execute this critical statutory obligation to eliminate unlawful discriminatory practices. Therefore, the Commission declines to make this change.

13. *Provide more details to support demands for monetary damages:* Several commenters contend that the Commission should require more explanation for the basis of its damages requested in conciliation. One commenter argues that the Commission will often take the position with respect to compensatory or punitive damages that a charging party is entitled to the maximum statutory cap on compensatory and punitive damages from the start. Consequentially, the commenter urges the Commission to make clear that an initial offer should not routinely rely on the maximum statutory damages cap in an attempt to leverage a higher final settlement. Likewise, another commenter echoes this sentiment and states that the final rule should provide that merely reciting the statutory maximums for compensatory or punitive damages does not satisfy the rule's requirements.

*Commission Response:* The Commission believes that the descriptions provided in sections 1601.24(d)(3) and 1626.12(b)(3) in the NPRM are sufficient because the language covers all requests for damages and relief, including punitive damages. Under the final rule, whatever the Commission's offer—including if it is the statutory cap—must be accompanied by an explanation based on the facts of the case. Furthermore, the commenters' suggestions risk taking away the flexibility that the Commission is seeking to maintain while also increasing transparency in conciliation.

14. *Add language about providing funds to third parties:* One commenter suggested adding language to the rule that would expressly encourage terms allowing distribution of excess settlement funds to third parties, such as charities.

*Commission response:* The Commission declines to add this provision. While these type of clauses may be appropriate in certain circumstances, the Commission is aware that they have recently been subject to greater scrutiny. For these reasons, and to ensure maximum flexibility in conciliation and avoid unnecessary encumbrances on its discretion, the Commission concludes that it would be inappropriate to include such a provision in its regulations. *See Frank* v. *Gaos,* 139 S. Ct. 1041 (2019).

**Comments Opposing the Rule Change and the Commission's Responses**

The EEOC also received comments opposing the rule change. These comments included concerns about the length of the comment period, particularly during the COVID–19 pandemic; whether the rule was premature in light of a pilot program; whether the rule favored employers over workers; whether the rule would undermine the Commission's ability to prevent and remedy discrimination; the rule's potential economic impact; the rule's relationship to the *Mach Mining* case; and whether the Commission sufficiently justified the rule's impact on its enforcement mission.

*Comments Regarding the Length of the Comment Period:* Several commenters claimed that a 30-day comment period was too short and asked that it be extended, some citing Executive Order 13563 and arguing that it provides comment periods should generally be at least 60 days. Others suggested that a short time period deprives the public of a sufficient opportunity to weigh in, citing the COVID–19 pandemic.

*Commission Response:* The Administrative Procedure Act (APA) requires that agencies give ''interested persons an opportunity to participate'' in rulemaking, but it does not establish specific time periods in which a rule must be open for public comment. 5 U.S.C. 553(c). Neither does Executive Order 13563, which provides that an agency ''afford the public a meaningful opportunity to comment through the internet on a proposed regulation, with a comment period that should generally be at least 60 days.'' The language of the APA and Executive Order 13563 anticipates that some rules are extensive and complex, running scores or hundreds of pages in the **Federal Register**; others are far less so. As a result, the ''60 days'' benchmark is neither mandatory nor necessarily appropriate for all rules. Here, as with all EEOC rulemakings, the Office of Management and Budget reviewed the NPRM before publication and agreed that the 30-day comment period was appropriate in light of the contents of the proposed rule.[3] The comment period must afford the public a meaningful opportunity to comment. This has occurred. The depth and breadth of the substantive comments the

[3] Similarly, Section 6(a) of Executive Order 12866 states that in ''most cases'' the comment period should be ''not less than 60 days.''

Commission received evidences that interested persons had a meaningful opportunity to comment.

In addition, the Commission conducted a meeting that called attention to the proposed rule. Specifically, on August 18, 2020, the Commission held a public meeting to discuss and vote on the NPRM. Notice of the meeting was published in the **Federal Register** which identified the topic of the meeting. The public was invited to listen to the meeting live. Press reports before and after the meeting reported the discussion of the proposed rule. The transcript of the meeting was timely uploaded on to the EEOC website.[4] As a result, the public had notice of this proposed rule from several sources and ample opportunity to research and evaluate the proposal, beginning nearly two months before the NPRM was published in the **Federal Register**. The Commission concludes that the length of the comment period on this rule was appropriate and declines to extend it.

*Allegation that the Rule is Premature Because of the Ongoing Pilot Program:* Some commenters contend that the NPRM fails to acknowledge the Commission's ongoing pilot program regarding conciliation procedures and that the Commission should wait to finalize the rule until after the pilot has concluded and been studied. Others argued that the public too should be given the opportunity to study the pilot and incorporate those efforts in further comments regarding this rule. Some commenters expressed concern that the results of the pilot program could be at odds with the rule, suggesting the Commission should delay the final rule to ensure harmony with the results of the pilot.

*Commission response:* In May of 2020, the EEOC launched a six-month pilot program. The pilot was extended in November 2020. This pilot made only a single change to the conciliation process.[5] Specifically, the pilot added a requirement that conciliation offers of certain amounts be approved by the certain levels of management prior to being shared with respondents. This requirement adds additional oversight by management to ensure that conciliation proposals are in line with the facts of the case. The pilot program is not related to this rulemaking; it addresses a different aspect of conciliation. It does not incorporate or add any of the changes to the conciliation procedures that were proposed or are being implemented in this final rule. Given the lack of overlap or connection between the pilot program and this rule, the results of the pilot are not relevant to this rulemaking and there is no reason to delay the latter so that the Commission or the public may study the former. As this rule is neither related to nor dependent on the pilot or its outcome, the Commission declines the delay sought by these commenters.

*Comments that the Rule Primarily Benefits Employers and Respondents:* Some commenters faulted the rule for requiring the Commission to disclose certain information to respondent automatically, while only providing the information to charging parties and aggrieved individuals upon request. Others raised concerns that the new rules could turn the conciliation process into ''quasi-litigation'' by making conciliation more formal and could generate collateral litigation. Still others expressed concern that the disclosures contemplated could potentially reveal the Commission's litigation strategy and inadvertently assist respondents in litigation.

*Commission Response:* The Commission appreciates the concerns expressed regarding the circumstances under which disclosures are made to respondents versus charging parties and aggrieved individuals. However, because the Commission is mindful of the need to maintain flexibility with respect to how staff engage with charging parties and aggrieved individuals, and recognizes the burden disclosure would impose upon staff, the Commission will retain the language ''upon request''.

The Commission is implementing the final rule to improve conciliation. The final rule should enhance the Commission's effectiveness in executing its statutory mandate to identify and eliminate discriminatory employment practices and obtain appropriate relief for victims without litigation, as Congress preferred. The rule accomplishes this end by requiring that the Commission provide certain basic information—the facts and law in support of the claim and who or what class of victims was affected by the allegedly discriminatory practice—that it already develops. By providing this information, respondents can better identify and correct the discriminatory action, policy, or practice. By facilitating such a result without litigation, the Commission achieves its primary goal of ending the discriminatory practice and potentially impacting other employees who may have been affected by the practice. As a result, the primary beneficiaries of more effective conciliations are victims and potential victims of discrimination, as well as the public. The Commission intends for these improvements to encourage more respondents to engage in the process, thus increasing the likelihood of voluntary compliance, and successful conciliations. These results should also provide benefits to discrimination victims by obtaining relief far sooner than would be possible in litigation. Without successful conciliation, employees and applicants are, in most cases, left to fend for themselves to try and obtain relief through litigation. For these reasons, the Commission disagrees with commenters' assertion that the final rule primarily benefits employers.

Nothing in the final rule is intended to create new causes of action for respondents or others; to the contrary, the rule is designed to alleviate concerns that the Commission has failed to meet its conciliation obligation, as explained in *Mach Mining.* Should the Commission's conciliation efforts be challenged in litigation, the final rule provides a framework that allows the Commission to easily demonstrate it has met the requirements laid out in *Mach Mining,* by simply affirming through an affidavit that it followed the procedures described in the statute. Thus, rather than raising the likelihood of collateral litigation over conciliation, the final rule will have the opposite effect by providing a guidepost for the Commission to follow in meeting its conciliation obligations. Furthermore, as the Commission pointed out in the NPRM, the confidentiality provisions of Title VII are inherent barriers to a probing judicial review of conciliation and protects the information disclosed. *See* 85 FR at 64080–81. For these reasons, the Commission has determined that this final rule will not unnecessarily open its conciliation process to judicial review or collateral attacks from employers.

The Commission appreciates the concerns expressed regarding the circumstances under which disclosures are made to respondents versus charging parties and aggrieved individuals. However, because the Commission is mindful of the need to maintain flexibility regarding how staff engage

[4] *See https://www.eeoc.gov/meetings/meeting-august-18-2020-discussion-notice-proposed-rulemaking-conciliation.*

[5] Concurrently with the pilot, the agency conducted refresher training on conciliation practices. In addition to training on the pilot, the refresher training included an emphasis on the pre-determination interview (PDI) requirement, which is conducted before the Commission issues its reasonable cause finding. While some overlap may occur between what employees are already expected to disclose during the PDI and what this final rule ensures is disclosed during conciliation, the pilot did not require any new disclosures.

with charging parties and aggrieved individuals, and in recognition of the burden disclosure would impose upon staff, the Commission will retain the language ''upon request'' as it relates to charging parties and aggrieved individuals. As noted above, the level of engagement by a charging party or aggrieved individual can vary from conciliation to conciliation. Furthermore, as also noted above, the Commission must also focus on the public interest when attempting to resolve the case through conciliation.

The rule is designed to improve the conciliation process by making it more meaningful and effective. Adequate information must be provided to the respondent to allow it to address the discriminatory conduct as well as assess its potential liability. The rule protects disclosure of privileged information, which will protect any confidential attorney work product related to litigation strategy.

*Concerns That the Rule Would Undermine the Commission's Ability to Prevent and Remedy Discrimination and Would Harm Workers:* Some commenters expressed concern that compliance with this rule would divert resources that otherwise would be used to directly serve charging parties. For example, some commenters stated that the new rule would cause the Commission to initiate fewer actions in court or somehow disincentivize the Commission from issuing cause findings. There was also concern that the disclosures required by the proposed rule could lead to retaliation against workers.

*Commission response:* The law requires that the Commission provide information to respondents regarding ''the alleged unlawful employment practice.'' *Mach Mining,* 575 U.S. at 488. The Commission has determined that, at a minimum, this must include factual and legal information sufficient to support its reasonable cause finding and any demand that it has made. This affords a respondent with basic information about the claim, such as the action or practice that the Commission has determined to be discriminatory in violation of Title VII, and the person or categories of persons it has harmed. *Id.* Instead of being ''extensive'' or ''burdensome,'' the disclosures required by the final rule are straight forward. The Commission's employees already engage in the analysis and work outlined in the rule such that compliance with the rule will not ''divert'' resources away from services currently provided to the victims of discrimination. In every case where there is a finding of discrimination, the Commission develops facts, identifies aggrieved parties, evaluates the scope and potential of class or systemic allegations, analyzes legal theories, and calculates potential damages. The rule requires that some of this information be communicated to respondent so that it may evaluate the claim to be conciliated. In communicating this information, the Commission will support its conciliation demand and reinforce its reasonable cause finding, thereby increasing the likelihood of voluntary resolution of charges, just as Congress preferred.

However, in recognition of the complications that could arise with respect to conciliations already in progress, this rule will only apply to conciliations for charges for which a Letter of Determination invitation to engage in conciliation has been sent to respondent on or after the effective date.

Concerns that the rule will cause fewer cases in which reasonable cause is found are inconsistent with the requirements of the final rule. The Commission's mission in conciliation is to identify and designate for elimination unlawful discriminatory employment practices, as well as to obtain relief for victims of discrimination. Whenever the investigation of a charge reveals that unlawful discrimination has likely occurred, the Commission will issue a finding of reasonable cause. This rule merely requires that certain basic information regarding such a charge be provided to the respondent. The Commission is confident that this information will support its findings of reasonable cause and convey the strength of the Commission's determination.

The Commission also rejects the assertion that the final rule will somehow frustrate its mission. The Commission's mission is to prevent and remedy unlawful employment discrimination. While litigation is a useful tool in achieving that end, it is not the exclusive means to achieve that result. Indeed, as noted above, Congress favored conciliation over litigation as a means to eliminate discriminatory employment practices. Furthermore, there is no reason to believe that the new rule will cause Commission employees to find reasonable cause in fewer cases where such a finding is merited pursuant to the facts and the law.

Section 706 of Title VII directs the Commission, after it finds reasonable cause, to endeavor to eliminate discrimination through informal methods of conference, conciliation, and persuasion. Congress further directed that the EEOC could only commence a civil action if, and only if, conciliation fails. By so doing, Congress made it clear that conciliation is the preferred method to address discrimination. *See Mach Mining,* 575 U.S. at 486 (''in pursuing the goal of bringing employment discrimination to an end, Congress chose 'cooperation and voluntary compliance' as its preferred means''). This rule advances that choice.

Commenters' concerns that disclosures could result in retaliation against aggrieved parties are misplaced. The rule provides protection for all workers reasonably susceptible of retaliation, which, of course, is prohibited by Title VII. The Commission will vigorously pursue employers who engage in retaliation against employees who attempt to vindicate their rights.

*Concerns About Economic Impact:* Some commenters expressed concern that the rule does not take into account the negative economic effects of discrimination. Others lodged concerns that the rule claims economic benefits of more conciliations, while ignoring the additional costs to the Commission. One commenter said the Commission relied on ''trickle-down economics'' to claim that cost savings would benefit the economy overall.

*Commission response:* Concerns that the rule does not take into account the negative economic effects of discrimination are misplaced. The Commission is aware of the economic effects of unlawful discrimination and uses every tool available to it to prevent and end unlawful discrimination. Conciliation is an important part of that. The more cases the Commission successfully conciliates, the greater the number of unlawful employment practices it eliminates and the greater number of incidents of discrimination are remedied, achieving its statutory mission. The Commission believes the final rule will lead to greater participation and more successful conciliations, which will have positive economic impacts for employees, employers, and the public at large.

The Commission disagrees with the comments that this rule will increase the rates of discrimination or allow discrimination to go unpunished or unaddressed. These comments fail to explain how the rule will cause more employers to engage in unlawful discrimination or to discriminate more extensively. To the contrary, this rule requires the Commission to provide to respondents factual and legal information about the claim to be conciliated. This will allow the respondent to better identify and address any underlying policy or practice that is discriminatory, even if the respondent elects to contest the particular charge or litigate for other reasons. And as more such policies and practices are identified and eliminated, fewer workers will suffer unlawful discrimination.

*Concerns That the Rule is Inconsistent with Mach Mining and Statutory Authority:* Some commenters argued that the rule is inconsistent with the Supreme Court decision in *Mach Mining,* and that because the changes are not required by statute or court decision the Commission should not make them. For example, a number of commenters pointed to the language of the *Mach Mining* decision that said Title VII's conciliation provision ''smacks of flexibility'' to argue that the Commission's proposed rule was contrary to the Court's holding. *Id.* at 492. Others believe conciliation is already successful and fear that these additional procedures will introduce an unnecessary rigidity that will compromise that success. Still others suggest that any changes to the Commission's conciliation process should be accomplished through internal guidance or pilots instead of rulemaking. Some commenters also claimed that the proposal was inconsistent with the language of Title VII itself, primarily citing to the use of ''informal'' in the statute regarding conciliation, and was therefore outside of the Commission's authority.

*Commission response:* The Commission disagrees that the final rule conflicts with *Mach Mining.* In *Mach Mining,* the Supreme Court began by emphasizing the importance of conciliation. The Court noted that Title VII ''imposes a duty on the EEOC to attempt conciliation of a discrimination charge prior to filing a lawsuit.'' *Mach Mining,* 575 U.S. at 486. That ''obligation,'' as the Court has held repeatedly, is ''mandatory, not precatory'' and ''is a key component of the statutory scheme. In pursuing the goal of bringing employment discrimination to an end, Congress chose cooperation and voluntary compliance as its preferred means.'' *Id.* (punctuation and citations omitted). When undertaken effectively, conciliation should ''end discrimination far more quickly than could litigation proceeding at its often ponderous pace.'' *Ford Motor,* 458 U.S. at 228.

The Court found that Title VII ''provides certain concrete standards pertaining to what that endeavor must entail.'' *Mach Mining,* 575 U.S. at 488. Based on the statutory language describing the ''attempt'' the Commission must undertake in conciliation, namely ''informal methods of conference, conciliation, and persuasion,'' the Court explained that ''[t]hose specified methods necessarily involve communication between parties, including the exchange of information and views.'' *Id.* (citing 42 U.S.C. 2000e–5(b)). Not only does Title VII require ''communication,'' the Court continued, but ''[t]hat communication . . . concerns a particular thing: The 'alleged unlawful employment practice.' '' *Id.* (citing 42 U.S.C. 2000e–5(b)). Specifically, the Court held, in order ''to meet the statutory condition, [the Commission] must tell the employer about the claim—essentially, what practice has harmed which person or class—and must provide the employer with an opportunity to discuss the matter in an effort to achieve voluntary compliance.'' *Id.* If ''the Commission does not take those specified actions, it has not satisfied Title VII's requirement to attempt conciliation.'' *Id.*

Beyond these basic requirements that are mandatory in all cases, the Court recognized that the Commission enjoys broad discretion regarding the way in which it conducts conciliations. *Id.* at 492. The Court's statement regarding ''flexibility'' cited by commenters was in support of ''the latitude Title VII gives the Commission to pursue voluntary compliance with the law's commands.'' *Id.* The Commission is not required ''to devote a set amount of time or resources'' or take ''any specific steps or measures'' in conciliation. *Id.* The Commission ''alone decides whether in the end to make an agreement or resort to litigation,'' including ''whenever [it is] unable to secure terms acceptable *to the Commission*.'' *Id.* Once it has satisfied its obligations, the Commission decides how it will respond to the respondent and negotiate and how long it will do so. *Id.* (stating that ''Congress left to the EEOC such strategic decisions as whether to make a bare-minimum offer, to lay all its cards on the table, or to respond to each of an employer's counter-offers, however far afield. So too Congress granted the EEOC discretion over the pace and duration of conciliation efforts, the plasticity or firmness of its negotiating positions, and the content of its demands for relief.'').

The Commission's final rule focuses on the requirement that it communicate about the ''claim.'' *Id.* at 488. The Supreme Court held that the Commission must, at a minimum, communicate to the respondent ''what practice has harmed which person or class'' in order to comply with its conciliation obligation and that courts may review such efforts to ensure compliance with Title VII. *See id.* The Commission has determined that the final rule comprehensively and thoroughly covers the information required to make it compliant with *Mach Mining.* If respondents raise specious challenges, the Commission will be in a strong position to respond and, as appropriate, seek sanctions or other relief.

Some commenters point out that the rule is not mandated by *Mach Mining* or Title VII. While the requirements set out in the rule are not spelled out in either the Court's opinion or the statute, the final rule—or any regulation—need not be *required* by the Supreme Court or a statute to be appropriate. In fact, both Title VII and *Mach Mining* make clear that the Commission ''must tell the employer about the claim—essentially, what practice has harmed which person or class—and must provide the employer with an opportunity to discuss the matter in an effort to achieve voluntary compliance. *Mach Mining,* 575 U.S. at 488. The Commission is exercising its ''wide latitude'' and ''expansive discretion'' over the conciliation process to clarify the contents of statutorily required communications to respondents in such a way that its satisfaction of the requirements will be clear. *Id.* at 488–89. The Commission has concluded that a recitation and summary of the factual and legal basis is a core component of any ''communication about the claim''. This would include the identification of the action or practice the Commission has deemed discriminatory, the reason for its conclusion, as well as ''what person or class'' has been unlawfully harmed—all so that the respondent might be able to bring itself into compliance. With this rule the Commission is implementing a procedure to ensure that it satisfies the conciliation requirements of Title VII, as elucidated in *Mach Mining.*

Some commenters argue that the final rule imposes ''rigid'' or ''extensive'' burdens that will curtail the Commission's ''flexibility'' and ''discretion''. As noted above, the final rule requires the Commission to provide certain basic information that the Commission has concluded will categorically satisfy the minimum statutory requirements of its ''communication'' with respondents. Since EEOC staff already perform this work, this rule does not require the reallocation of resources, and is neither extensive nor voluminous. Contrary to assertions in many comments, this does not weaken the Commission's position in conciliation or litigation in that it does not require the Commission to ''lay all its cards on the table,'' ''devote a set amount of time or resources,'' or ''take any specific steps or measures'' in *any* conciliation. Once the information has been provided, the Commission ''alone decides'' in each case how it will respond to a particular respondent, the manner and particulars of how it will negotiate, and how long it will do so. *See id.* at 492. The Commission ''alone decides whether in the end to make an agreement or resort to litigation,'' including ''whenever [it is] unable to secure terms acceptable *to the Commission.*'' *Id.* The final rule ensures clear and consistent satisfaction of statutory requirements in accordance with the Court's opinion in *Mach Mining* while maintaining the Commission's flexibility to conciliate as it deems appropriate.[6]

While several commenters expressed a preference for internal guidance or pilot programs rather than a rule, the Commission has previously implemented Quality Enforcement Practices and internal guidance to enhance its conciliation efforts, changes that resulted in significant training of EEOC staff. While these changes improved the conciliation process, the Commission believes more should be done to build on that progress and has concluded the structure and predictability of a rule is the best way to make sure that it is consistently satisfying its statutory conciliation obligations. As already noted in the NPRM and above, less than half the cases for which the Commission finds reasonable cause are resolved through conciliation. The Commission aims to achieve more success, including fewer cases in which the respondent opts out of the process entirely. The Commission's purpose is to enhance the processes that will improve its ability to remedy unlawful discrimination without the need to resort to litigation.

Some commenters argued that conciliation is already successful and that the allegedly rigid procedures imposed in the final rule are unnecessary. One commenter noted that following *Mach Mining,* the amount of collateral litigation attacking conciliation decreased and the number of successful conciliations increased. An increase in successful conciliations is admirable and the Commission recognizes and commends the achievements of its employees in the conciliation process. Nothing in the final rule diminishes or recharacterizes that success. To the contrary, the final rule aims to build upon that success. As noted in the NPRM, from fiscal years 2016 to 2019, the Commission successfully conciliated approximately 41.23% of those cases in which it found reasonable cause. This amounts to only a slight increase over the previous four fiscal years. Also, during these years, employers continued to decline to participate in conciliation in approximately 33% of such cases. 85 FR at 64080. The Commission is concerned about the overall rate of successful conciliation and that one-third of employers refuse to participate in conciliation. While there may be many reasons why an employer refuses to conciliate, at least some of these respondents may be motivated, at least in part, by the belief that the current conciliation process is flawed and not worth the effort. The Commission is not targeting a specific percentage of successful conciliations or employer participation. However, the Commission is making minor changes that it believes will allow it to continue to improve its processes and, in so doing, identify and eliminate more discriminatory employment practices.

Finally, this final rule is consistent with section 706 of Title VII's use of ''informal'' when describing the Commission's efforts to resolve cases after finding reasonable cause, and in turn, the Commission's procedural rulemaking authority. The Commission's final rule does not establish a ''formal'' process, but instead provides basic procedures for information sharing that are fundamental to any settlement discussion. The rule does not establish ''quasi-litigation'' with formal rules of evidence or rules of procedure that would be found in federal court. It instead establishes base level procedures, but otherwise leaves conciliation as an informal process that can be adjusted as needed by the case.

*Concerns that the Commission Did Not Justify How the Rule Furthers Its Enforcement Mission:* A few commenters contended that the Commission had not presented any statistics or other data to support its belief that the proposed changes would make successful conciliation more likely or increase respondents' participation in conciliation. In addition, one commenter, argued that many respondents simply have no interest in conciliating, for reasons beyond the Commission's control. In support of this position, the commenter described instances in which employers agreed to resolve a matter after the Commission had filed suit for a higher amount than what the Commission offered in conciliation. Finally, other commenters challenged the portions of the proposed rule requiring that the Commission disclose information obtained that caused it to doubt there was reasonable cause on a variety of grounds.

*Commission response:* The Commission has explained the reasons it believes that the final rule is reasonably likely to increase participation in conciliation. These provisions should encourage greater confidence that the communications in the conciliation process will include the sort of information that the Court determined were required. Providing such basic factual and legal information will encourage more employers to participate and will provide them with a better understanding of the Commission's position.

As explained above, there are many reasons that respondents elect not to conciliate and, as the commenter explained, some of these reasons are beyond the Commission's control. A decision by a respondent to settle a case during litigation for more than what it could have settled during conciliation actually supports the Commission's reason for the rule change. In these situations, a respondent was willing to reach an agreement with the Commission after it received more information about the strength of the case against them, which they obtained in the litigation process. By better explaining its case in conciliation, the Commission makes it more likely that respondents will understand the risk of litigation and be more willing to resolve the matter during conciliation, freeing the Commission's resources to litigate other more challenging cases.

The Commission's Office of Enterprise, Data, and Analytics (OEDA) has conducted a comprehensive analysis of the reasons why conciliations fail.[7] Their analysis identifies two primary reasons charges are not resolved through conciliation: (1) The respondent's choice not to participate and (2) the parties cannot agree on monetary relief. OEDA's statistics also indicate that in cases

[6] As the Court explained in *Mach Mining* and the Commission noted above, ''Congress left to the EEOC such strategic decisions as whether to make a bare-minimum offer, to lay all its cards on the table, or to respond to each of an employer's counter-offers, however far afield. So too Congress granted the EEOC discretion over the pace and duration of conciliation efforts, the plasticity or firmness of its negotiating positions, and the content of its demands for relief.'' *Id.* at 492. The final rule does nothing to limit or curtail this discretion that the Commission has applied for decades in pursuit of its mission to eradicate unlawful employment discrimination.

[7] The need to complete this analysis was cited by a commenter opposed to the proposed rule as a reason not to move forward. The analysis has been completed and is consistent with the changes made in the final rule.

where employers agree to participate in conciliation, there is more than a 50% chance of achieving resolution. Getting more employers to agree to participate is the first step to getting more resolutions. By providing basic information about the facts and legal arguments behind the claim, the Commission increases the likelihood that the respondent will recognize the merit of the Commission's position and conciliate.

Finally, the Commission has decided to remove from the final rule any requirement that it disclose material information that caused it to doubt its determination of reasonable cause. After reviewing the points raised by several commenters, the Commission is concerned about the potential for collateral challenges that this requirement may create. As the Commission has stated above, the purpose of this final rule is not to create or encourage potential new avenues for dilatory litigation on conciliation. Based on its review of the comments, the Commission believes the litigation risks of this part of the proposal outweigh the increase in transparency that would be achieved specifically by this provision. The Commission expects that its personnel will continue to evaluate, weigh, and proactively address evidence that runs contrary to a reasonable cause finding in its summary under § 1601.24(d)(2). In cases where the facts or the law suggest that reasonable cause is lacking, existing protocols require field personnel not to make such a finding. And the Commission's employees adhere to these protocols—and their professional obligations—in evaluating cases. For these reasons and after carefully considering the comments regarding this proposal, the Commission has removed this requirement from the final rule.

**Final Regulatory Revisions**

After considering all comments received, the Commission is finalizing the proposed rule as modified in the discussion above.[8] These changes will bring more clarity, transparency, and consistency to the conciliation process. They will encourage more respondents to participate and the Commission to better articulate it positions at the outset of conciliation. The final rule sets out procedures that will support the Commission's ability to meet statutory obligations to attempt to conciliate, *i.e.,* to ''tell the employer about the claim—essentially, what practice has harmed which person or class—and provide the employer with an opportunity to discuss the matter in an effort to achieve voluntary compliance.'' *Mach Mining,* 575 U.S. at 488. As the Court noted, conciliations ''necessarily involve communication between parties, including the exchange of information and views.'' *Id.* This final rule ensures that the Commission's exchange of information occurs in an open, transparent manner. These changes should make the conciliation process more successful and, in so doing, enhance the Commission's fulfilment of its mission to eliminate unlawful discrimination in employment.

**Regulatory Procedures**

*Executive Order 12866*

This rule has been determined to be significant under E.O. 12866 by the Office of Management and Budget because it raises novel legal or policy issues arising out of legal mandates or the President's priorities. The rule will not have an annual effect on the economy of $100 million or more, nor will it adversely affect the economy in any material way. Thus, it is not economically significant for purposes of E.O. 12866 review. However, the rule will have many benefits as demonstrated by the following cost-benefit analysis.

The rule imposes no direct costs on any third parties and only imposes requirements on the EEOC itself. The rule, if implemented, will likely require the EEOC to conduct training of staff to ensure that it is complying with the new regulation. While these changes and training would likely be absorbed within the Commission's normal operating expenses, any additional expenses that the agency would incur could be offset by cost savings derived from these changes. For example, charging parties often file Freedom of Information Act (FOIA) requests with the Commission after receiving a ''right to sue notice'' in order to receive the charge file. If more cases are resolved in conciliation, these cases would not result in right to sue notices and the Commission would receive fewer FOIA requests, resulting in cost savings for the government.

Furthermore, while the parties ultimately determine whether a conciliation agreement is reached, if the Commission is able to conciliate more cases successfully, it will benefit employees, employers, and the economy as a whole. With respect to employees, an increase in successful conciliations will result in more employees receiving remedies for the discrimination they suffered within an accelerated timeframe. Many employees who receive reasonable cause findings are unable to obtain any relief without conciliation because they do not pursue litigation for fiscal, emotional, or other reasons, or even if they do pursue litigation, ultimately do not attain relief. Even employees who ultimately would otherwise be successful in litigation may benefit from a conciliation because they would then receive remedies sooner and avoid the time, cost, stress, and uncertainty of litigation.

Employers will also benefit from the EEOC conciliating cases more successfully. In some cases, conciliations may provide an opportunity for employers to more quickly correct any discriminatory conduct or policies and seek compliance assistance from the EEOC. Additionally, while employers pay $45,466[9] on average to settle cases in conciliation, they will save time, resources, and money by avoiding (often costly and lengthy) litigation. It is difficult to quantify the average cost of litigating an employment discrimination case for an employer because the cost of a case depends on several factors, such as the complexity of the case, length of the litigation, and the jurisdiction in which it is litigated.[10]

The stage at which litigation concludes has a large effect on litigation costs—attorneys' fees and other litigation expenses are significantly higher for cases that go through trial, as

[8] As noted in the NPRM, the language in § 1626.12 is slightly different in some places than the language of 1601.24 due to the different conciliation language in the ADEA. 85 FR at 64081 n. 10. This includes the fact that the ADEA does not require that conciliation start after a reasonable cause finding, so the provisions in 1601.24 that are dependent on a reasonable cause finding are not found in § 1626.12. *See* 29 U.S.C. 626(d)(2). A letter from former employees of the Commission took issue with the Commission using the phrase ''allegations'' in the ADEA portion of this rule. The reason that Commission used the phrase ''allegations'' instead of referencing a reasonable cause finding is because the ADEA section that describes the Commission's conciliation obligations is not dependent on a reasonable cause finding, unlike Title VII. *See* 29 U.S.C. 626(d)(2).

[9] This was the average for fiscal year 2019.

[10] This analysis focuses only on an employer's litigation costs because most plaintiff-side attorneys use contingency-fee arrangements for pursuing claims, in which the attorney receives a portion of the recovery and charges little or nothing if no recovery is obtained. *See* Martindale-Nolo Research, *Wrongful Termination Claims: How Much Does a Lawyer Cost?* (Nov. 14, 2019), *available at https://www.lawyers.com/legal-info/labor-employment-law/wrongful-termination/wrongful-termination-claims-how-much-does-a-lawyer-cost.html* (noting that 75% of plaintiffs lawyers in employment litigation use contingency fee arrangements and another 15% use a combination of a contingency fee and hourly rate). Thus, more frequent conciliation will save litigation costs for those few plaintiffs who pay their attorneys an hourly rate.

opposed to those that end in summary judgment. For example, in 2013, one experienced defense attorney estimated that the average attorney's fees for employers for cases that end in summary judgment was between $75,000 and $125,000; while cases that go to trial average between $175,000 and $250,000 in fees.[11] Factoring for inflationary changes in legal fees, the present value of those costs is closer to $83,000 to $139,000 for cases ending in summary judgment and $195,000 to $279,000 for cases that end after a trial.[12] Taking the middle of each range in present value results in average costs of $111,000 for cases ending in summary judgment and $237,000 for cases that end after trial. The Commission recognizes that many employers will find these fee estimates to be low, but because there is insufficient, publicly available data for calculating the amount that employers have expended in defending against a charge through conciliation [13] and which otherwise would be subtracted for purposes of this analysis, the Commission believes such a conservative estimate is appropriate.

To determine the average amount spent on attorney's fees, the Commission also must consider the number of cases that were the subject of conciliation that are either resolved at summary judgment or proceed to trial. The majority of cases of employment discrimination are not tried.[14] Some studies suggest that two-thirds or more of employment discrimination lawsuits that are filed in court end in summary judgment.[15] Those statistics, however, include cases filed in court after the EEOC dismissed the charge without a reasonable cause determination. In conciliation cases, by contrast, the EEOC has conducted an investigation and found reasonable cause to conclude that discrimination may have occurred. The Commission believes it is reasonable to assume that more of these latter cases will survive summary judgment. With this assumption, the average litigation cost for employers is $174,000.[16]

Resolving more cases through conciliation will be beneficial to the economy as a whole because the litigation costs that the parties save can be put towards more productive uses, such as expanding businesses and hiring more employees. It is difficult to quantify how many cases in which the Commission finds reasonable cause end up being litigated in court because, if the EEOC decides to not litigate the case, the Commission does not track lawsuits filed by private plaintiffs. The Commission believes that cases in which the EEOC found reasonable cause are the most likely to be litigated by a private plaintiff because the EEOC has already determined that there is reasonable cause to believe that the case has merit. While not all cases in which reasonable case is found and conciliation is unsuccessful are litigated, there is reason to believe that a significant portion are. The Commission itself files lawsuits in roughly 10% of the cases in which reasonable cause is found and conciliation is not successful.[17] It is reasonable to believe that private plaintiffs file lawsuits in at least an additional 40% of cases, so that overall half the cases in which reasonable cause is found, but conciliation is unsuccessful, end up being litigated in court.[18]

Using the numbers above, if the Commission successfully conciliated only 100 more cases each year, that would save the economy over $4 million in litigation costs.[19]

Therefore, the Commission's rule, which establishes basic information disclosure requirements that will make it more likely that employers have a better understanding of the EEOC's position in conciliation and, thus, make it more likely that the conciliation will be successful, will result in significant economic benefits when it is successfully implemented.

*Executive Order 13771*

This rule is not expected to be an E.O. 13771 regulatory action because it will not impose total costs greater than $0. As described above, the Commission's rule will result in more successful conciliations and therefore, overall cost reduction, so this is considered a deregulatory action. Details on the expected impacts of the rule can be found in the Commission's analysis above.

[11] John Hyman, *How Much Does it Cost to Defend an Employment Lawsuit,* in Workforce, (May 14, 2013), *available at https://www.workforce.com/news/how-much-does-it-cost-to-defend-an-employment-lawsuit.*

[12] These calculations were made using the Department of Labor Bureau of Labor Statistics's (BLS) Consumer Price Index calculator, *available at https://www.bls.gov/data/inflation_calculator.htm.* These increases are likely conservative, as they are similar to increases in legal service costs over a shorter time frame. Historical data for the BLS Producer Price Index for Legal Services in the Mid-Atlantic region, *available at https://www.bls.gov/regions/mid-atlantic/data/producerpriceindexlegal_us_table.htm,* reveals that average costs for employment and labor legal services increased from 100 in December 2014 (the earliest data available) to 109.9 in April 2020 (the most recent non-''preliminary'' data), an increase of approximately 10%. Similarly, the U.S. Department of Justice's USAO Attorney's Fees Matrix, which only measures the change in fees between 2015–2020 across the legal field, reveals a roughly 12% change in hourly rate for the most experienced attorneys in the District of Columbia. *See https://www.justice.gov/usao-dc/page/file/1305941/download.*

[13] ''There do not appear to be any reliable statistics on the percentage of employers who retained outside counsel to defend charges filed with the EEOC.'' Philip J. Moss, *The Cost of Employment Discrimination Claims,* 28 Maine Bar J. 24, 25 (Winter 2013). Supposing ''conservatively'' that 50% of employers relied on outside counsel at an hourly rate averaging $250 (in 2013) and invested 20 hours in cases during the EEO process, *Id.,* employers would average $2,500 in legal costs during the EEO process ($250 × 20 hours × 0.5), which in present value would average $2,792. The costs for employers who use in-house counsel or human resource professionals to handle their EEOC charges are more difficult to quantify.

[14] Paul D. Seyfarth, *Efficiently and Effectively Defending Employment Discrimination Cases,* 63 AmJur Trials 127, § 81 (Supp. 2020) (''It is an undeniable fact that most employment discrimination cases do not get tried; they are either settled or disposed of via summary judgment.'').

[15] Charlotte S. Alexander, Nathan Dahlberg, Anne M. Tucker, *The Shadow Judiciary,* 39 Rev. of Lit. 303 (2020) (Table 3) (finding that among summary judgment motions in employment cases handled by magistrate judges in the Northern District of Georgia, 78% are granted in part or in full); Deborah Thompson Eisenberg, *Stopped at the Starting Gate: The Overuse of Summary Judgment in Equal Pay Cases,* 57 N.Y. L. Sch. L. Rev. 815, 817 (2012/2013) (finding that approximately two-thirds of all equal pay act cases end at the summary judgment stage).

[16] Average summary judgment fees ($111,000) + average trial fees ($237,000)/2 = $174,000. This figure is within the range of other estimates for average attorney fee costs. *See* AmTrust Financial, Employment Practices Liability (EPLI) Claims Trends, Stats & Examples, *available at https://amtrustfinancial.com/blog/insurance-products/top-trends-employment-practices-liability-claims* (asserting that attorney fee costs in 2018 averaged $160,000, which in present value would amount to $167,000); Moss, *supra* note 7 (*citing* Blasi and Doherty, California Employment Discrimination Law and its Enforcement: The Fair Employment and Housing Act at $0, UCLA–RAND Center for Law and Public Policy (2010)) (estimating costs to employers in state-level employment discrimination cases in California in 2010 at $150,000, which taken to present value would average approximately $180,000).

[17] For fiscal year 2019, the Commission filed 157 lawsuits. EEOC Litigation Statistics, *https://www.eeoc.gov/statistics/eeoc-litigation-statistics-fy-1997-through-fy-2019.* Overall, in fiscal year 2019, there were 1,427 cases in which the Commission found reasonable cause but conciliation was unsuccessful. *https://www.eeoc.gov/statistics/all-statutes-charges-filed-eeoc-fy-1997-fy-2019.*

[18] To give some sense of the scope of cases, federal courts reported that 42,053 ''Civil Rights'' cases were filed in federal court during the most recent year. *https://www.uscourts.gov/sites/default/files/data_tables/fcms_na_distprofile0630.2020.pdf.* While not all these civil rights cases involve employment discrimination, and this number would include cases where a private plaintiff filed suit after the EEOC did not find reasonable cause, it illustrates that the assumption—that half of the roughly 1,400 cases in which conciliation is unsuccessful end up in court—is likely a low estimate.

[19] 100 successful conciliations × $45,466 (average conciliation for fiscal year 19) = $4,546,600. However, this number is offset by the litigation costs saved in 50 cases (assuming half the cases would have ended in in litigation): 50 × $174,000 = $8,700,000. $8,700,000 − $4,546,600 = $4,153,400 in savings for every 100 cases that are conciliated.

*Paperwork Reduction Act*

This rule contains no new information collection requirements subject to review by the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. chapter 35).

*Regulatory Flexibility Act*

The Commission certifies under 5 U.S.C. 605(b) that this rule will not have a significant economic impact on a substantial number of small entities because it applies exclusively to employees and agencies of the federal government and does not impose a burden on any business entities. For this reason, a regulatory flexibility analysis is not required.

*Unfunded Mandates Reform Act of 1995*

This rule will not result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of $100 million or more in any one year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

*Congressional Review Act*

While the Commission believes the rule is a rule of agency procedure that does not substantially affect the rights or obligations of non-agency parties and, accordingly, is not a ''rule'' as that term is used by the Congressional Review Act (Subtitle E of the Small Business Regulatory Enforcement Fairness Act of 1996), it will still follow the reporting requirement of 5 U.S.C. 801. This is not a ''major rule'' as the term is defined in 5 U.S.C. 804(2).

**List of Subjects in 29 CFR Parts 1601 and 1626**

Administrative practice and procedure, Equal Employment Opportunity.

For the Commission.

**Janet Dhillon,**

*Chair.*

For the reasons set forth in the preamble, the Commission amends 29 CFR parts 1601 and 1626 as follows:

## PART 1601—PROCEDURAL REGULATION

■ 1. The authority citation for part 1601 continues to read as follows:

**Authority:** 42 U.S.C. 2000e to 2000e–17; 42 U.S.C. 12111 to 12117; 42 U.S.C. 2000ff to 2000ff–11.

■ 2. Amend § 1601.24 by adding paragraphs (d), (e), and (f) to read as follows:

**§ 1601.24 Conciliation: Procedure and authority.**

* * * * *

(d) In any conciliation process pursuant to this section, after the respondent has agreed to engage in conciliation, the Commission will:

(1) To the extent it has not already done so, provide the respondent with a written summary of the known facts and non-privileged information that the Commission relied on in its reasonable cause finding, including identifying known aggrieved individuals or known groups of aggrieved individuals for whom relief is being sought, unless the individual(s) has requested anonymity. In the event that it is anticipated that a claims process will be used subsequently to identify aggrieved individuals, to the extent it has not already done so, identify for respondent the criteria that will be used to identify victims from the pool of potential class members. In cases in which that information does not provide an accurate assessment of the size of the class, for example, in harassment or reasonable accommodation cases, the Commission shall provide more detail to respondent, such as the identities of the harassers or supervisors, if known, or a description of the testimony or facts we have gathered from identified class members during the investigation. The Commission will disclose the current class size and, if class size is expected to grow, an estimate of potential additional class members to the extent known;

(2) To the extent it has not already done so, provide the respondent with a written summary of the Commission's legal basis for finding reasonable cause, including an explanation as to how the law was applied to the facts. In addition, the Commission may, but is not required to, provide a response to the defenses raised by respondent;

(3) Provide the respondent with the basis for monetary or other relief, including the calculations underlying the initial conciliation proposal and an explanation thereof in writing. A written explanation is not required for subsequent offers and counteroffers;

(4) If it has not already done so, and if there is a designation at the time of the conciliation, advise the respondent in writing that the Commission has designated the case as systemic, class, or pattern or practice as well as the basis for the designation; and

(5) Provide the respondent at least 14 calendar days to respond to the Commission's initial conciliation proposal.

(e) The Commission shall not disclose any information pursuant to paragraph (d) of this section where another federal law prohibits disclosure of that information or where the information is protected by privilege.

(f) Any information the Commission provides pursuant to paragraph (d) of this section to the Respondent, except for information about another charging party or aggrieved individual, will also be provided to the charging party, upon request. Any information the Commission provides pursuant to paragraph (d) of this section about an aggrieved individual will also be provided to the aggrieved individual, upon request.

## PART 1626—PROCEDURES—AGE DISCRIMINATION IN EMPLOYMENT ACT

■ 1. The authority citation for part 1626 continues to read as follows:

**Authority:** Sec. 9, 81 Stat. 605, 29 U.S.C. 628; sec. 2, Reorg Plan No. 1 of 1978, 3 CFR, 1978 Comp., p. 321.

■ 2. Revise § 1626.12 to read as follows:

**§ 1626.12 Conciliation efforts pursuant to section 7(d) of the Act.**

(a) Upon receipt of a charge, the Commission shall promptly attempt to eliminate any alleged unlawful practice by informal methods of conciliation, conference, and persuasion. Upon failure of such conciliation the Commission will notify the charging party. Such notification enables the charging party or any person aggrieved by the subject matter of the charge to commence action to enforce their rights without waiting for the lapse of 60 days. Notification under this section is not a Notice of Dismissal or Termination under § 1626.17.

(b) In any conciliation process pursuant to this section the Commission will:

(1) If it has not already done so, provide the respondent with a written summary of the known facts and non-privileged information that form the basis of the allegation(s), including identifying known aggrieved individuals or known groups of aggrieved individuals, for whom relief is being sought, but not if the individual(s) has requested anonymity. In the event that it is anticipated that a claims process will be used subsequently to identify aggrieved individuals, if it has not already done so, identify for respondent the criteria that will be used to identify victims from the pool of potential class members;

(2) If it has not already done so, provide the respondent with a written summary of the legal basis for the allegation(s). In addition, the Commission may, but is not required to provide a response to the defenses raised by respondent;

(3) Provide a written basis for any monetary or other relief including the calculations underlying the initial conciliation proposal, and an explanation thereof. A written explanation is not required for subsequent offers and counteroffers;

(4) If it has not already done so, advise the respondent in writing that the Commission has designated the case as systemic, class, or pattern or practice, if the designation has been made at the time of the conciliation, and the basis for the designation; and

(5) Provide the respondent at least 14 calendar days to respond to the Commission's initial conciliation proposal.

(c) The Commission shall not disclose any information pursuant to paragraph (b) of this section where another federal law prohibits disclosure of that information or where the information is protected by privilege.

(d) Any information the Commission provides pursuant to paragraph (b) of this section to the respondent, except for information about another charging party or aggrieved individual, will also be provided to the charging party, upon request. Any information the Commission provides pursuant to paragraph (b) of this section to the respondent about an aggrieved individual will be provided to the aggrieved individual, upon request.

■ 3. Amend § 1626.15 by adding a new sentence to the end of paragraph (d) to read as follows:

**§ 1626.15 Commission enforcement.**

* * * * *

(d) * * * Any conciliation process under this paragraph shall follow the procedures as described in § 1626.12.

* * * * *

**BILLING CODE 6570–01–P**

## POSTAL SERVICE

### 39 CFR Part 233

### Inspection Service Authority; Civil Monetary Penalty Inflation Adjustment

**AGENCY:** Postal Service™.

**ACTION:** Interim final rule.

**SUMMARY:** This document updates postal regulations by implementing inflation adjustments to civil monetary penalties that may be imposed under consumer protection and mailability provisions enforced by the Postal Service pursuant to the Deceptive Mail Prevention and Enforcement Act and the Postal Accountability and Enhancement Act. These adjustments are required under the Federal Civil Penalties Inflation Adjustment Act of 1990, as amended by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015. This document includes the adjustments for 2021 for statutory civil monetary penalties subject to the 2015 Act.

**DATES:** *Effective date:* January 14, 2021.

**FOR FURTHER INFORMATION CONTACT:** Steven Sultan, (202) 268–7385, *SESultan@uspis.gov.*

**SUPPLEMENTARY INFORMATION:** The Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (2015 Act), Public Law 114–74, 129 Stat. 584, amended the Federal Civil Penalties Inflation Adjustment Act of 1990 (1990 Act), Public Law 101–410, 104 Stat. 890 (28 U.S.C. 2461 note), to improve the effectiveness of civil monetary penalties and to maintain their deterrent effect. Section 3 of the 1990 Act specifically includes the Postal Service in the definition of "agency" subject to its provisions.

Beginning in 2017, the 2015 Act requires the Postal Service to make an annual adjustment for inflation to civil penalties that meet the definition of "civil monetary penalty" under the 1990 Act. The Postal Service must make the annual adjustment for inflation and publish the adjustment in the **Federal Register** by January 15 of each year. Each penalty will be adjusted as instructed by the Office of Management and Budget (OMB) based on the Consumer Price Index (CPI–U) from the most recent October. OMB has furnished detailed instructions regarding the annual adjustment for 2021 in memorandum M–21–10, *Implementation of Penalty Inflation Adjustments for 2021, Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015* (December 23, 2020), *https://www.whitehouse.gov/wp-content/uploads/2020/12/M-21-10.pdf.* This year, OMB has advised that an adjustment multiplier of 1.01182 will be used. The new penalty amount must be rounded to the nearest dollar.

The 2015 Act allows the interim final rule and annual inflation adjustments to be published without prior public notice or opportunity for public comment.

**Adjustments to Postal Service Civil Monetary Penalties**

Civil monetary penalties may be assessed for postal offenses under sections 106 and 108 of the Deceptive Mail Prevention and Enforcement Act, Public Law 106–168, 113 Stat. 1811, 1814 (*see,* 39 U.S.C. 3012(a), (c)(1), (d), and 3017 (g)(2), (h)(1)(A)); and section 1008 of the Postal Accountability and Enhancement Act, Public Law 109–435, 120 Stat. 3259–3261 (*see,* 39 U.S.C. 3018 (c)(1)(A)). The statutory civil monetary penalties subject to the 2015 Act and the amount of each penalty after implementation of the annual adjustment for inflation are as follows:

*39 U.S.C. 3012(a)—False Representations and Lottery Orders*

Under 39 U.S.C. 3005(a)(1)–(3), the Postal Service may issue administrative orders prohibiting persons from using the mail to obtain money through false representations or lotteries. Persons who evade, attempt to evade, or fail to comply with an order to stop such prohibited practices may be liable to the United States for a civil penalty under 39 U.S.C. 3012(a). The regulations implemented pursuant to this section currently impose a $73,951 penalty for each mailing less than 50,000 pieces, $147,899 for each mailing of 50,000 to 100,000 pieces, and $14,791 for each additional 10,000 pieces above 100,000 not to exceed $2,957,993. The new penalties will be as follows: A $74,825 penalty for each mailing less than 50,000 pieces, $149,647 for each mailing of 50,000 to 100,000 pieces, and $14,966 for each additional 10,000 pieces above 100,000 not to exceed $2,992,956.

*39 U.S.C. 3012(c)(1)—False Representation and Lottery Penalties in Lieu of or as Part of an Order*

In lieu of or as part of an order issued under 39 U.S.C. 3005(a)(1)–(3), the Postal Service may assess a civil penalty. Currently, the amount of this penalty, set in the implementing regulations to 39 U.S.C. 3012(c)(1), is $36,975 for each mailing that is less than 50,000 pieces, $73,951 for each mailing of 50,000 to 100,000 pieces, and an additional $7,395 for each additional 10,000 pieces above 100,000 not to exceed $1,478,996. The new penalties will be $37,412 for each mailing that is less than 50,000 pieces, $74,825 for each mailing of 50,000 to 100,000 pieces, and an additional $7,482 for each additional 10,000 pieces above 100,000 not to exceed $1,496,478.

*39 U.S.C. 3012(d)—Misleading References to the United States Government; Sweepstakes and Deceptive Mailings*

Persons may be liable to the United States for a civil penalty under 39 U.S.C. 3012(d) for sending certain deceptive mail matter described in 39 U.S.C. 3001((h)–(k), including:

• Solicitations making false claims of Federal Government connection or approval;

• Certain solicitations for the purchase of a product or service that may be obtained without cost from the Federal Government;

• Solicitations containing improperly prepared ''facsimile checks''; and

• Certain solicitations for ''skill contests'' and ''sweepstakes'' sent to individuals who, in accordance with 39 U.S.C. 3017(d), have requested that such materials not be mailed to them.

Currently, under the implementing regulations, this penalty is not to exceed $14,791 for each mailing. The new penalty will be $14,966.

*39 U.S.C. 3017(g)(2)—Commercial Use of Lists of Persons Electing Not To Receive Skill Contest or Sweepstakes Mailings*

Under 39 U.S.C. 3017(g)(2), the Postal Service may impose a civil penalty against a person who provides information for commercial use about individuals who, in accordance with 39 U.S.C. 3017(d), have elected not to receive certain sweepstakes and contest information. Currently, this civil penalty may not exceed $2,957,993 per violation, pursuant to the implementing regulations. The new penalty may not exceed $2,992,956 per violation.

*39 U.S.C. 3017(h)(1)(A)—Reckless Mailing of Skill Contest or Sweepstakes Matter*

Currently, under 39 U.S.C. 3017(h)(1)(A) and its implementing regulations, any promoter who recklessly mails nonmailable skill contest or sweepstakes matter may be liable to the United States in the amount of $14,791 per violation for each mailing to an individual. The new penalty is $14,966 per violation.

*39 U.S.C. 3018(c)(1)(A)—Hazardous Material*

Under 39 U.S.C. 3018(c)(1)(A), the Postal Service may impose a civil penalty payable into the Treasury of the United States on a person who knowingly mails nonmailable hazardous materials or fails to follow postal laws on mailing hazardous materials. Currently, this civil penalty is at least $320, but not more than $127,525 for each violation, pursuant to the implementing regulations. The new penalty is at least $324, but not more than $129,032 for each violation.

**List of Subjects in 39 CFR Part 233**

Administrative practice and procedure, Banks, Banking, Credit, Crime, Infants and children, Law enforcement, Penalties, Privacy, Seizures and forfeitures.

For the reasons set out in the preamble, the Postal Service amends 39 CFR part 233 as follows:

## PART 233—INSPECTION SERVICE AUTHORITY

■ 1. The authority citation for part 233 continues to read as follows:

**Authority:** 39 U.S.C. 101, 102, 202, 204, 401, 402, 403, 404, 406, 410, 411, 1003, 3005(e)(1), 3012, 3017, 3018; 12 U.S.C. 3401–3422; 18 U.S.C. 981, 983, 1956, 1957, 2254, 3061; 21 U.S.C. 881; Pub. L. 101–410, 104 Stat. 890 (28 U.S.C. 2461 note); Pub. L. 104–208, 110 Stat. 3009; Secs. 106 and 108, Pub. L. 106–168, 113 Stat. 1806 (39 U.S.C. 3012, 3017); Pub. L. 114–74, 129 Stat. 584.

**§ 233.12 [Amended]**

■ 2. In § 233.12:

■ a. In paragraph (a), remove ''$73,951'' and add in its place ''$74,825'', remove ''$147,899'' and add in its place ''$149,647'', remove ''$14,791'' and add in its place ''$14,966'', and remove ''$2,957,993'' and add in its place ''$2,992,956''.

■ b. In paragraph (b), remove ''$36,975'' and add in its place ''$37,412'', remove ''$73,951'' and add in its place ''$74,825'', remove ''$7,395'' and add in its place ''$7,482'', and remove ''$1,478,996'' and add in its place ''$1,496,478''.

■ c. In paragraph (c)(4), remove ''$14,791'' and add in its place ''$14,966''.

■ d. In paragraph (d), remove ''$2,957,993'' and add in its place ''$2,992,956''.

■ e. In paragraph (e), remove ''$14,791'' and add in its place ''$14,966''.

■ f. In paragraph (f), remove ''$320'' and add in its place ''$324'' and remove ''$127,525'' and add in its place ''$129,032''.

## 42 CFR Part 405

**[CMS–3372–F]**

**RIN 0938–AT88**

## Medicare Program; Medicare Coverage of Innovative Technology (MCIT) and Definition of ''Reasonable and Necessary''

**AGENCY:** Centers for Medicare & Medicaid Services (CMS), HHS.

**ACTION:** Final rule.

**SUMMARY:** This final rule establishes a Medicare coverage pathway to provide Medicare beneficiaries nationwide with faster access to new, innovative medical devices designated as breakthrough by the Food and Drug Administration (FDA). The Medicare Coverage of Innovative Technology (MCIT) pathway will result in 4 years of national Medicare coverage starting on the date of FDA market authorization or a manufacturer chosen date within 2 years thereafter. This rule also implements regulatory standards to be used in making reasonable and necessary determinations under section 1862(a)(1)(A) of the Social Security Act (the Act) for items and services that are furnished under Part A and Part B.

**DATES:** This final rule is effective on March 15, 2021.

**FOR FURTHER INFORMATION CONTACT:** Tamara Syrek Jensen and JoAnna Baldwin, (410) 786–2281 or *CAGinquiries@cms.hhs.gov.*

**SUPPLEMENTARY INFORMATION:**

### I. Background

The Department is committed to ensuring Medicare beneficiaries have access to new cures and technologies that improve health outcomes. Section 6 of the October 3, 2019 Executive Order 13890 (E.O. 13890) ''Executive Order on Protecting and Improving Medicare for Our Nation's Seniors,'' [1] directs the Secretary to ''propose regulatory and sub-regulatory changes to the Medicare program to encourage innovation for patients'' including by ''streamlining the approval, coverage, and coding process''.[2] The E.O. 13890 explicitly

[1] Executive Order on Protecting and Improving Medicare for Our Nation's Seniors, *available at https://www.whitehouse.gov/presidential-actions/executive-order-protecting-improving-medicare-nations-seniors/.*

[2] *Id.*

includes making coverage of breakthrough medical devices ''widely available, consistent with the principles of patient safety, market-based policies, and value for patients.'' [3] The E.O. also directs the Secretary to ''clarify the application of coverage standards.'' [4]

Consistent with these directives, we proposed to create a new coverage pathway for breakthrough devices, which we are calling Medicare Coverage of Innovative Technology (MCIT). This pathway will accelerate the coverage of new, innovative breakthrough devices to Medicare beneficiaries. We also proposed to codify the term ''reasonable and necessary'' to provide greater certainty to stakeholders seeking coverage for innovative items and services and to ensure that this substantive legal standard is codified.

The MCIT coverage pathway is specifically for Medicare coverage of devices that are designated as part of the Food and Drug Administration's (FDA) Breakthrough Devices Program (hereafter referred to as ''breakthrough devices'') and are FDA market authorized. FDA's Breakthrough Devices Program is for certain medical devices, device-led combination products, and can include lab tests.[5] The MCIT pathway would be voluntary and device manufacturers would notify CMS if they want to utilize this coverage option.

We proposed that National Medicare coverage under the MCIT pathway could begin immediately upon the date of FDA market authorization (that is, the date the medical device receives Premarket Approval (PMA); 510(k) clearance; or the granting of a De Novo classification request) for the breakthrough device or on the date designated by the manufacturer within any point during the four year eligibility period for coverage under MCIT. This coverage can occur unless the device does not have a Medicare benefit category or is otherwise excluded from coverage by statute (that is, the Medicare statute does not allow for coverage of the particular device.) This coverage pathway delivers on the Administration's commitment to give Medicare beneficiaries access to the newest innovations on the market, consistent with the statutory definitions of Medicare benefits. Because Medicare is a defined benefit program, devices that do not fit within the statutory definitions may not be considered for MCIT. As an example, medical equipment for home use by the beneficiary must be durable (that is, withstand repeated use) for it to be coverable by Medicare (as defined in statutes and regulations by the Secretary).

The Secretary has authority to determine whether a particular medical item or service is ''reasonable and necessary'' under section 1862(a)(1)(A) of the Act. (*See Heckler* v. *Ringer,* 466 U.S. 602, 617 (1984).) When making coverage determinations, our policies have long considered whether the item or service is safe and effective, not experimental or investigational, and appropriate. (For more information see the January 30, 1989 notice of proposed rulemaking (54 FR 4307)). These factors are found in Chapter 13 of the Medicare Program Integrity Manual (PIM) at section 13.5.4—*Reasonable and Necessary Provisions in LCDs* as instructions for Medicare contractors.[6] We proposed to codify in regulations the Program Integrity Manual definition of ''reasonable and necessary'' with modifications, including to add a reference to Medicare patients and a reference to commercial health insurer coverage policies. We proposed that an item or service would be considered ''reasonable and necessary'' if it is—(1) safe and effective; (2) not experimental or investigational; and (3) appropriate for Medicare patients, including the duration and frequency that is considered appropriate for the item or service, in terms of whether it is—

- Furnished in accordance with accepted standards of medical practice for the diagnosis or treatment of the patient's condition or to improve the function of a malformed body member;
- Furnished in a setting appropriate to the patient's medical needs and condition;
- Ordered and furnished by qualified personnel;
- One that meets, but does not exceed, the patient's medical need; and
- At least as beneficial as an existing and available medically appropriate alternative.

We also proposed that an item or service would be ''appropriate for Medicare patients'' under (3) if it is covered in the commercial insurance market, except where evidence supports that there are clinically relevant differences between Medicare beneficiaries and commercially insured individuals. An item or service deemed appropriate for Medicare coverage based on commercial coverage would be covered on that basis without also having to satisfy the previously listed bullets. We believed this definition would be a significant step in meeting the E.O.'s discussion of the need to bring clarity to coverage standards. Stakeholders have expressed interest in codifying a definition of ''reasonable and necessary'' for many years.

### *A. Statutory Authority*

As stated in the previous section, we proposed to codify the PIM's definition of reasonable and necessary with a modification to the appropriateness factor to allow CMS to refer to commercial coverage. We will finalize in regulation the factors we have historically used in making ''reasonable and necessary'' determinations under section 1862(a)(1)(A) of the Act, with a modification, discussed below, to factor (3) to determine whether an item or service is appropriate based, in prescribed circumstances, on coverage in the commercial market. In general, this section of the Act permits Medicare payment under part A or part B for any expenses incurred for items or services that are reasonable and necessary for the diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member. Thus, with some exceptions, section 1862(a)(1)(A) of the Act requires that an item or service be ''reasonable and necessary'' to be covered by Medicare. The courts have recognized that the Secretary has significant authority to determine whether a particular item or service is ''reasonable and necessary,'' and that the statute affords broad discretion to interpret this term (*Heckler* v. *Ringer,* 466 U.S. 602, 617 (1984). *See also, Yale-New Haven Hospital* v. *Leavitt,* 470 F.3d 71, 84 (2d Cir. 2006); *Kort* v. *Burwell,* 209 F. Supp. 3d 98, 110 (D. D.C. 2016) (The statute vests substantial authority in the Secretary.)) In regard to the MCIT coverage pathway, we proposed national Medicare coverage for breakthrough devices that are FDA market-authorized and used consistent with the FDA approved or cleared indication for use (also referred to as the ''FDA-required labeling'').[7] This device coverage under the MCIT pathway is reasonable and necessary for a duration of time under section 1862(a)(1)(A) of the Act because the device has met the very unique criteria of the FDA Breakthrough Devices Program.

### B. FDA Breakthrough Devices Program

Under the MCIT coverage pathway, CMS will coordinate with FDA and manufacturers as medical devices move through the FDA regulatory processes for breakthrough device designation and market authorization to ensure seamless Medicare coverage after market authorization unless CMS determines those devices do not have a Medicare benefit category. The Breakthrough Devices Program is an evolution of the Expedited Access Pathway Program and the Priority Review Program (section 515B of the Federal Food, Drug, and Cosmetic Act (FD&C Act)), 21 U.S.C. 360e–3; see also final guidance for industry entitled, ''Breakthrough Devices Program,'' *https://www.fda.gov/downloads/MedicalDevices/DeviceRegulationandGuidance/GuidanceDocuments/UCM581664.pdf*).

The FDA's Breakthrough Devices Program is not for all new medical devices; rather, it is only for those that the FDA determines meet the standards for breakthrough device designation. In accordance with section 3051 of the 21st Century Cures Act (21 U.S.C. 360e–3),[8] the Breakthrough Devices Program is for medical devices and device-led combination products that meet two criteria. The first criterion is that the device provide for more effective treatment or diagnosis of life-threatening or irreversibly debilitating human disease or conditions. The second criterion is that the device must satisfy one of the following elements: It represents a breakthrough technology; no approved or cleared alternatives exist; it offers significant advantages over existing approved or cleared alternatives, including additional considerations outlined in the statute; or device availability is in the best interest of patients (for more information see 21 U.S.C. 360e–3(b)(2)). These criteria make breakthrough designated devices unique among all other medical devices.[9] The parameters of the breakthrough devices program focus on innovations for patients, in turn, MCIT, focuses on these breakthrough devices consistent with E.O. 13890 and in order to streamline coverage of innovative medical devices. We note that the FDA's guidance stresses the need for breakthrough devices to still meet the statutory standard of reasonable assurance of safety and effectiveness at the time of approval, meaning that a device which receives FDA breakthrough designation automatically satisfies factor (1) of our reasonable and necessary definition.

### C. Current Medicare Coverage Pathways

Currently, we utilize several coverage pathways for items and services, which includes medical devices. None of the coverage pathways described in this section offer immediate, predictable coverage concurrently with FDA market authorization like the proposed MCIT pathway would do. We summarize the other coverage pathways here to provide context for MCIT.

- National Coverage Determinations (NCDs): Section 1862(l)(6)(A) of the Act defines the term national coverage determination as ''a determination by the Secretary with respect to whether or not a particular item or service is covered nationally under this title.'' In general, NCDs are national policy statements published to identify the circumstances under which particular items and services will be considered covered by Medicare. Traditionally, CMS relies heavily on health outcomes data to make NCDs. Most NCDs have involved determinations under section 1862(a)(1)(A) of the Act, but NCDs can be made based on other provisions of the Act, and includes a determination that the item or service under consideration has a Medicare benefit category. The NCD pathway, which has statutorily prescribed timeframes, generally takes 9 to 12 months to complete.[10]
- Local Coverage Determinations (LCDs): Medicare contractors develop LCDs based on section 1862(a)(1)(A) of the Act that apply only within their geographic jurisdictions. (Sections 1862(l)(6)(B) and 1869(f)(2)(B) of the Act.) MACs will not need to develop LCDs for breakthrough devices when they are nationally covered through MCIT. Manufacturers declining to participate in the MCIT pathway may still seek LCDs from the MACs during and after the four year eligibility period, using the current process.

The MACs follow specific guidance for developing LCDs for Medicare coverage in the CMS Program Integrity Manual, and in some instances, an LCD can also take 9 to 12 months to develop (MACs must finalize proposed LCDs within 365 days from opening per Chapter 13—Local Coverage Determinations of the (PIM) 13.5.1). We note that the MCIT pathway does not alter the existing coverage standards in Chapter 13—Local Coverage Determinations of the PIM.[11] That chapter will continue to be used, to the extent consistent with other parts of this final rule, in making determinations under section 1862(a)(1)(A) of the Act.

- Claim-by-claim Adjudication: In the absence of an NCD or LCD, MACs would make coverage decisions under section 1862(a)(1)(A) of the Act and may cover or not cover items and services on a claim-by-claim basis. The majority of claims are handled through the claim adjudication process.
- Clinical Trial Policy (CTP) NCD 310.1: The CTP pathway can be used for coverage of routine care items and services (but generally not the technology under investigation) in a clinical study that is supported by certain Federal agencies. The CTP coverage pathway was developed in 2000.[12] This coverage pathway has not generally been utilized by device manufacturers because they usually seek coverage of the device, which is not included in the CTP pathway.
- Parallel Review: Parallel Review is a mechanism for FDA and CMS to simultaneously review the submitted clinical data to help decrease the time between FDA's approval of a premarket application or granting of a de novo classification and the subsequent CMS NCD. Parallel Review has two stages: (1) FDA and CMS meet with the manufacturer to provide feedback on the proposed pivotal clinical trial within the FDA pre-submission process; and (2) FDA and CMS concurrently review (''in parallel'') the clinical trial results submitted in the PMA, or De Novo request. FDA and CMS independently review the data to determine whether it meets their respective Agency's standards and communicate with the manufacturer during their respective reviews. This program is most successful for devices that have a significant amount of clinical evidence. (Candidates for parallel review are not be appropriate for simultaneous MCIT consideration.)

[8] 21st Century Cures Act, *available at https://www.congress.gov/114/plaws/publ255/PLAW-114publ255.pdf; see* FDA Guidance for Industry and Food and Drug Administration Staff, Breakthrough Devices Program *available at https://www.fda.gov/medical-devices/how-study-and-market-your-device/breakthrough-devices-program.*

[9] FDA does not publish a list of breakthrough designated or breakthrough designated and subsequently market authorized devices. However if a breakthrough device gains market authorization through a PMA only, then the summary of safety and effectiveness data (SSED) will contain a reference for the breakthrough designation. This is not true for De Novos which have been granted or cleared 510(k)'s. In consideration of that approach, this notice of public rulemaking does not contain such lists.

In contrast to these other coverage pathways, MCIT is readily available to provide immediate national coverage for new breakthrough devices with a Medicare benefit category as early as the same date as FDA market authorization. The MCIT pathway can support manufacturers that are interested in combining coverage with their own clinical study to augment clinical evidence of improved health outcomes, particularly for Medicare patients.

*Comment:* Many commenters generally supported the MCIT concept, expressing that it would result in faster and more consistent access to newly authorized technologies for Medicare beneficiaries. Those commenters recognized that immediate coverage of newly FDA market-authorized breakthrough technologies via the pathway would avoid the ambiguity and possible inconsistency of claim-by-claim coverage by the MACs as well as the delays inherent in either the LCD or NCD pathways. Commenters suggested that MCIT will bring closer alignment of FDA and CMS decision-making, and would help to more closely coordinate coverage, coding and payment functions. Those who were supportive also stated their belief that the proposal would promote innovation; decrease uncertainty and delays in coverage; improve FDA—CMS coordination; and improve beneficiary access to cutting-edge treatments. Many commenters expressed support for the MCIT proposal in principle but nonetheless requested important clarifications or expressed significant reservations about specific elements.

Some commenters did not believe that the proposed MCIT pathway was necessary because existing coverage pathways provide a sufficient mechanism for coverage of newly FDA market authorized items and services. One commenter expressed concern that the MCIT pathway may undermine or circumvent existing pathways. A few commenters recommended that coverage for breakthrough technologies should be left to MAC discretion because they retain considerable flexibility to cover new technologies and can adjust coverage policy as new evidence emerges. Other commenters discussed the parallel review and Coverage with Evidence Development (CED) programs (CED is a paradigm whereby CMS issues an NCD to cover items and services on the condition that they are furnished in the context of approved clinical studies or with the collection of additional clinical data). The commenters stated that the parallel review program may shorten the time between FDA market authorization and coverage, but is generally more appropriate for items and services where there is relatively greater clinical evidence than under the breakthrough device pathway. For topics where there is less evidence on safety and efficacy available, such as newly FDA market authorized breakthrough technologies, they asserted the CED pathway is more appropriate. A few commenters recommended that instead of establishing the MCIT pathway, more resources should be applied to existing pathways to allow CMS to conduct expeditious review of a larger number of topics.

*Response:* CMS agrees that coverage of breakthrough devices through the MCIT pathway will accelerate access to items and services that address important unmet needs, as well as help CMS work more closely with FDA. We do not believe that simply devoting more resources to the existing coverage pathways will yield the synergy with FDA we anticipate will be created from the MCIT pathway. With the exception of claim-by-claim coverage, both LCDs and NCDs are subject to statutory timeframes and require considerable CMS resources to complete. This includes policy analysts, epidemiologists, physicians, data analysts and additional supporting staff in addition to contract money that is required to host meetings of the Medicare Evidence Development and Coverage Advisory Committee and commission external technical assessments. There are many steps outlined in Chapter 13 of the PIM regarding the process for attaining an LCD, and this process must be repeated in each MAC jurisdiction. The MCIT pathway will increase Medicare beneficiary access to newly FDA market-authorized treatments, for which similar devices may not exist and which improve health outcomes for patients, simplify and accelerate the process to gain coverage, and eliminate geographic variations in coverage that may occur for treatments covered on a claim-by-claim basis. Support for further innovation is a secondary benefit of the MCIT coverage pathway. We also agree with commenters that the parallel review program or CED may not be available to innovators under all circumstances, or may not be the most appropriate pathway for their circumstances, which is in part why we are making the MCIT pathway available as another route to CMS coverage. We remind commenters that coverage under MCIT is provisional, and that once MCIT coverage expires, our standard definition of reasonable and necessary as modified in this rulemaking, will be applied to determine whether and when to cover these devices.

We do not agree that the MCIT pathway will undermine or circumvent existing pathways. Only breakthrough devices will be eligible for the MCIT pathway. Sec. 515B(c) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 360e–3(c)) states that a request for a breakthrough device designation may be made at any time prior to the submission of an application for premarket approval, approval under Sec. 510(k) of the FD&C Act (21 U.S.C. 360(k)), or approval under a de novo marketing authorization. Because requesting a breakthrough device designation presumes an application for approval under one of these three pathways, the MCIT pathway depends on, and does not undermine, these three avenues for FDA approval. We also do not agree that coverage for breakthrough technologies should be left to MAC discretion. The MCIT pathway will provide innovators greater certainty of initial Medicare coverage.

*Comment:* We solicited comments in the MCIT proposed rule on whether the MCIT pathway should also include diagnostics, drugs and/or biologics that utilize breakthrough or expedited approaches at the FDA (for example, Breakthrough Therapy, Fast Track, Priority Review, Accelerated Approval) or all diagnostics, drugs, and/or biologics. Some commenters expressed support for changing the way innovative technologies without FDA breakthrough device designation are covered by Medicare. These commenters pointed out that there may be innovative technologies which they believe ought to be covered by Medicare that choose not to use FDA's breakthrough device pathway or may be an innovative technology that may not qualify for the designation. One commenter suggested that CMS should preclude MACs from non-covering these technologies. Other commenters suggested non-breakthrough devices, drugs, and biologics should be eligible for an MCIT type of coverage pathway because non-breakthrough items and services also improve patient health outcomes. One commenter recommended that CMS be able to include non-breakthrough devices based on agency discretion as to when beneficiaries should have expedited access to an item or service.

In response to the question CMS posed about whether MCIT should include diagnostics, drugs, and biologics that use the breakthrough or other expedited FDA pathways, commenters provided varied suggestions. Some commenters offering general support of the MCIT program stated that the MCIT program should be limited, as we proposed, to technologies that are designated by the FDA as breakthrough devices. Some of these commenters supported their position by suggesting that device coverage lags further behind that of drugs and biologics and; therefore, devices are more in need of a program like MCIT. There were specific requests for CMS to include humanitarian use devices. Other commenters suggested that innovative devices using FDA Investigational Device Exemption (IDE) Category B designation should be eligible for MCIT.

*Response:* We appreciate that commenters shared their interest in CMS providing a pathway for non-breakthrough designated devices, and we share their interest in furthering innovation. Noting that, as stated in our proposed rule, E.O. 13890 makes explicit mention of medical devices in its directive, we have heard concerns from stakeholders that there is more uncertainty surrounding coverage of devices than for other items and services, such as drugs and biologics. For this reason, our proposal centered on breakthrough designated devices, since we believed that this was the area with the most immediate need, particularly in light of the unique FDA criteria for breakthrough designation status. We agree with commenters that we should undertake efforts to promote innovation across all items and services which could potentially be covered under Medicare. However, because we have consistently heard from stakeholders about the need for more rapid approval of breakthrough devices in particular, E.O. 13890 explicitly mentions devices, and because the immediate opportunity is to align with the FDA's breakthrough device designation, we are not expanding beyond breakthrough devices for the final rule. As the MCIT pathway develops and proves successful, we may consider expanding its application to other items and services, including Category B IDE and HUD devices in future rulemaking.

*Comment:* Some commenters asserted that FDA market authorization of breakthrough devices should suffice to establish that they are safe and effective. Other commenters argued further that establishment of safety and effectiveness is within the exclusive purview of the FDA, and no additional evidence should be required to meet the CMS reasonable and necessary evidence standard.

*Response:* We agree that establishment of safety and effectiveness is generally within the purview of the FDA under its statute, but not all items and services that may be covered under Medicare are regulated by the FDA.

*Comment:* A significant number of commenters noted that some breakthrough devices have no clinical data at the time of FDA market authorization, and many breakthrough devices lack data on patients older than 65, patients with disabilities, and patients with end stage renal disease, which poses some uncertainty about the FDA's ability to gauge safety and efficacy in the context of the Medicare population. There was also concern expressed about how the Medicare population is often excluded from clinical trials due to age and health status. Numerous commenters noted that the FDA frequently extends market authorization after reviewing short-term clinical studies with the proviso that ongoing data collection in the post-market authorization period is required to establish long-term durability of treatment effect. Furthermore, commenters cited evidence that FDA mandated post-market studies are not reliably completed and asserted that explicit assessment of safety and effectiveness in Medicare beneficiaries is essential. Several commenters provided specific examples of FDA market authorized devices that failed to demonstrate benefit when subjected to post-market clinical study.

*Response:* FDA assessments of safety and efficacy are general characterizations of a product. It is always up to an individual, in consultation with their physician, to determine whether an item or service is best applied to their individual health circumstances. Given this fact, we believe that current FDA requirements for demonstrating safety and efficacy are sufficient in determining whether to grant coverage to a breakthrough device under MCIT. We also note that our rule provides for the termination of MCIT coverage in instances where a medical device safety communication or warning letter is issued by the FDA, or if the FDA revokes market authorization for a device. We believe that these provisions will help protect beneficiary safety while ensuring that beneficiaries have more rapid access to new and innovative technology.

Additionally, in our proposed rule, we recognized that breakthrough devices are those that HHS has determined may provide better health outcomes for patients facing life-threatening or irreversibly debilitating human disease or conditions. We believe that a device meeting these criteria, once also FDA market authorized, is ''reasonable and necessary'' for purposes of Medicare coverage. The MCIT pathway establishes rapid coverage of breakthrough devices because existing coverage pathways do not provide immediate, national Medicare coverage. We believe this policy will provide a balance of ensuring rapid adoption of breakthrough devices, which by definition provide more effective treatment or diagnosis for life threatening or debilitating conditions, while benefitting beneficiaries. We do not agree that automatic coverage for other FDA approved products under section 1862(a)(1)(A) is warranted because by definition, breakthrough devices are those for which no approved alternative exists or that offer significant advantages over existing approved or cleared alternatives (21 U.S.C. 360e–3(b)(2)). Because other alternatives exist for conditions that can be treated with non-breakthrough devices, the urgency to provide coverage for these items and services on a provisional basis is not as great. In addition, we believe other avenues exist for non MICT eligible items and services to expeditiously gain coverage. For example, FDA has special procedures in place to grant fast track designation for certain new drugs, and other types of new drugs are eligible for a separate breakthrough therapy designation (not to be confused with the breakthrough device designation for which this rule makes MCIT coverage available). Furthermore, the need for certainty in this regard is not as high as compared to breakthrough devices because, the FDA only grants breakthrough designation to devices where no approved or cleared alternatives exist and device availability is in the best interests of patients.

### *D. MCIT Pathway*

We proposed that the MCIT pathway would provide immediate national coverage for breakthrough devices beginning on the date of FDA market authorization and continue for up to 4 years, unless we determine the device does not have a Medicare benefit category as determined by us as part of the MCIT pathway process. The MCIT pathway is voluntary (that is, manufacturers would affirmatively opt-in), and would be initiated when a manufacturer notifies CMS of its intention to utilize the MCIT pathway. (This notification process is described further in section III. of this final rule). We would subsequently coordinate with the manufacturer regarding steps that need to be taken for MCIT implementation purposes. The frequency of subsequent engagement will be largely driven by whether the manufacturer has questions for CMS, or CMS and FDA. The timing of coverage will be left to the manufacturer's discretion provided they request to enter the MCIT pathway within the four year timeframe for which they would be eligible to participate. Engagements can take place in the form of in-person meetings, phone calls, emails, etc. We intend to put devices that are covered through the MCIT pathway on the CMS website so that all stakeholders will be aware of what is covered through the MCIT pathway. This measure was completely supported by the public comments. Manufacturers of breakthrough devices will not be obligated or mandated by CMS to conduct clinical studies during coverage under the proposed MCIT pathway. However, we sought comment as to whether CMS should require or incentivize manufacturers to provide data about outcomes or should be obligated to enter into a clinical study similar to CMS's Coverage with Evidence Development (CED) paradigm.[13] We are aware some manufacturers may be required by the FDA to conduct post market data collection as a condition of market authorization, and nothing in this proposed rule would alter that FDA requirement. Manufacturers are encouraged to develop the clinical evidence base needed for one of the other coverage pathways after the MCIT pathway ends. This evidence is encouraged not only for CMS and commercial health insurer coverage policies but also to better inform the clinical community and the public generally about the risks and benefits of treatment. CMS encourages early manufacturer engagement, both before and after FDA market authorization, for manufacturers to receive feedback from CMS on potential clinical study designs and clinical endpoints that may produce the evidence needed for a definitive coverage determination after MCIT. This feedback would not involve CMS predicting specific coverage or non-coverage.

In order to further the goals of E.O. 13890, CMS proposed to rely on FDA's breakthrough device designation and market authorization of those devices to define the universe of devices eligible for MCIT, except for those particular devices CMS determines do not have a Medicare benefit category or are statutorily excluded from coverage under Part A or Part B. We proposed to establish a four year time limit on how long a breakthrough device can be eligible for MCIT (that is, considered a breakthrough device for coverage purposes). The 4 year coverage period is particularly important for manufacturers of breakthrough devices that choose to further develop the clinical evidence basis on which the FDA granted marketing authorization. From our experience with clinical studies conducted as part of an NCD, 4 years is approximately the amount of time it takes to complete a study.

At the end of the 4-year MCIT pathway, coverage of the breakthrough device would be subject to one of these possible outcomes: (1) NCD (affirmative coverage, which may include facility or patient criteria); (2) NCD (non-coverage); or (3) MAC discretion (claim-by-claim adjudication or LCD). Manufacturers that are interested in a NCD are encouraged to submit a NCD request during the third year of MCIT to allow for sufficient time for NCD development. We sought public comment on whether CMS should open a national coverage analysis if a MAC has not issued an LCD for a breakthrough device within 6 months of the expiration date of the 4-year MCIT period.

We sought public comment on the proposed MCIT pathway, the considerations described, whether any of the existing coverage pathways should be modified to achieve the goals set out by the E.O., and solicited alternatives to these proposals. We specifically sought public comment on whether the MCIT pathway should also include diagnostics, drugs and/or biologics that utilize breakthrough or expedited approaches at the FDA (for example, Breakthrough Therapy, Fast Track, Priority Review, Accelerated Approval[14]) or all diagnostics, drugs and/or biologics. We sought data to support including these additional item categories in the MCIT pathway. Also, we specifically sought manufacturer input on whether an opt-in or opt-out approach would work best for utilizing the MCIT pathway. We believe manufactures will welcome this new coverage pathway. We want to preserve manufacturers' business judgment and not assume which Medicare coverage pathway a given manufacturer of a breakthrough device would prefer (if any). Therefore, we proposed an opt-in approach with an email to CMS to indicate affirmative interest in coverage. We expressed interest in whether an opt-out approach would be less burdensome for stakeholders. We encouraged public comment on a process for stakeholders to opt-out of MCIT that would not be burdensome. Also, we sought public comment on whether, once a manufacturer has opted-out of coverage, it can subsequently opt-in to MCIT.

*Comment:* The majority of comments generated by our questions concern issuing an NCD at the end of the four year period did not support CMS automatically opening an NCD if MACs had not issued an LCD after 6 months. One commenter stated that the 6 month timing was arbitrary with another stated that 6 months would not be enough time for MACs to perform a comprehensive analysis as data may not be fully available or there may be LCDs in-process at the 6 month mark. Many manufacturers cited the desire for flexibility in the timing of requesting an NCD and some specifically cited support for claim by claim adjudication by the MACs and believe that FDA approved or cleared indications will be covered by MACs on a claim by claim basis. Some commenters did not want automatic LCDs or NCDs but wanted assurance that absent those mechanisms the MACs would, on a claim by claim basis, cover MCIT graduated technologies consistent with their FDA approved or cleared indications. A few commenters supported some version of a process by which an NCD would automatically be triggered including that the manufacturer would be required to submit an NCD request during year 3 of MCIT coverage and requiring the NCD to be complete by the end of year 4. A few commenters expressed general concern for potential uncertainty among patients and providers regarding whether MCIT coverage of a device would continue past year 4. One commenter noted that submission of requests for NCDs and LCDs are not restricted to manufacturers, anyone can submit a request.

*Response:* We appreciate commenters' input. We agree that manufacturers should have flexibility in timing their request for an NCD under MCIT so that they can adequately prepare to market the device and satisfy consumer expectations. We further believe that flexibility in the case of timing for the development of LCDs and NCDs would be in the best interest of beneficiaries, manufacturers and providers. We believe that there will be situations in which not enough evidence will be available on which an LCD or NCD can

[13] CMS, *Guidance for the Public, Industry, and CMS Staff Coverage with Evidence Development, available at https://www.cms.gov/medicare-coverage-database/details/medicare-coverage-document-details.aspx?MCDId=27.*

[14] Fast Track, Breakthrough Therapy, Accelerated Approval, Priority Review, *available at https://www.fda.gov/patients/learn-about-drug-and-device-approvals/fast-track-breakthrough-therapy-accelerated-approval-priority-review.*

be made and claim by claim adjudication is most appropriate, if even temporarily while the data continues to be developed. A 6-month timeframe may not be appropriate in all situations so this one size fits all approach to trigger an NCD at 6 months after the close of the 4 year MCIT coverage period is not flexible enough to account for the various levels of evidence that may be available. We are not able to require MACs to adjudicate claims for a particular result, this merely sidesteps the NCD process. However, we note that manufacturers and providers can discuss technologies with the clinical staff and medical directors working for each MAC. We also appreciate and are sensitive to the concern over the continuity of care for patients who are using breakthrough devices and find it important to state that beneficiaries with a device covered under MCIT will continue coverage of any routine services or complications related to that device beyond the 4-year period of MCIT coverage. After considering the comments, we are not making any changes in the final rule with respect to the possible outcomes at the end of the 4-year MCIT pathway, which are: (1) NCD (affirmative coverage, which may include facility or patient criteria); (2) NCD (non-coverage); or (3) MAC discretion (claim-by-claim adjudication or LCD). Manufacturers that are interested in a NCD are encouraged to submit a NCD request during the third year of MCIT to allow for sufficient time for NCD development. CMS will not automatically open a national coverage analysis within six months of the expiration four year MCIT period.

*Comment:* CMS received overwhelming support from commenters in favor of the voluntary, opt-in model of MCIT as proposed because it allows manufacturers to use their judgment in determining whether to participate. Some of the commenters who supported opting-in also added that communicating with CMS for entry into the MCIT program would be beneficial for both parties by encouraging discussion about the technology, coding, payment, and the evidentiary expectations after 4 years of coverage under MCIT. Another commenter indicated that opting-in would not be burdensome and would not likely be a deterrent to MCIT participation. A small number of commenters were in favor of automatic participation in MCIT unless a manufacturer chose to opt-out. One of these commenters cited the likelihood of administrative errors that could occur which could delay opting-in and would inadvertently exclude a manufacturer from MCIT.

*Response:* We agree with commenters that supported the voluntary, opt-in model for the MCIT program. Of the commenters that had concerns, we believe their concerns will be addressed by finalizing that manufacturers may opt-into MCIT using no more than an email from the manufacturer to CMS indicating a desire to opt-in and the requested start date of MCIT coverage. We believe that this should ensure a simple engagement with CMS to opt and will limit burden and improve collaboration with CMS. Commenters who expressed support for the opt-in model spoke to increased collaboration with CMS. Commenters who supported the opt-out method in order to limit administrative burden and confusion will be pleased by the simplicity of and public information available for the process of opt-in. Manufacturers may request to opt-in any time during the first 2 years in which they are eligible to participate in MCIT, however, the four year coverage period begins the day the breakthrough devices receives FDA authorization. A more complete discussion including summary of comments and responses on the four-year coverage period and when it begins appears later in this rule.

## II. Provisions of Proposed Regulations and Analysis of and Responses to Public Comments

### *A. Defining ''Reasonable and Necessary''*

As described in section I. of this final rule, the Secretary has authority to determine the meaning of ''reasonable and necessary'' under section 1862(a)(1)(A) of the Act. We proposed to codify the longstanding Program Integrity Manual definition of ''reasonable and necessary'' into our regulations at 42 CFR 405.201(b), with modification. Under the current definition, an item or service is considered ''reasonable and necessary'' if it is (1) safe and effective; (2) not experimental or investigational; and (3) appropriate, including the duration and frequency that is considered appropriate for the item or service, in terms of whether it is—

- Furnished in accordance with accepted standards of medical practice for the diagnosis or treatment of the patient's condition or to improve the function of a malformed body member;
- Furnished in a setting appropriate to the patient's medical needs and condition;
- Ordered and furnished by qualified personnel;
- One that meets, but does not exceed, the patient's medical need; and
- At least as beneficial as an existing and available medically appropriate alternative.

In addition to codifying the previously discussed criteria, we proposed to include a separate basis under which an item or service would be appropriate under (previously stated) (3) that is based on commercial health insurers' coverage policies (that is, non-governmental entities that sponsor health insurance plans). We proposed the commercial market analysis would be initiated if an item/service fails to fulfill the existing factor (3) criteria defining appropriate for Medicare patients but fulfills (1) safe and effective and (2) not experimental or investigational. We believed that this approach would be in line with E.O. 13890 that directs us to make technologies ''widely available, consistent with the principles of patient safety, market-based policies, and value for patients.'' Under this separate basis, we proposed that an item or service would satisfy factor (3) if it is covered under a plan(s) coverage policy if offered in the commercial insurance market, unless evidence supports that differences between Medicare beneficiaries and commercially insured individuals are clinically relevant. Under our proposal, we would exclude Medicaid managed care, Medicare Advantage, and other government administered healthcare coverage programs from the types of coverage CMS would consider, as these enrollees are not in the commercial market. In the following paragraphs, we sought comment on this proposal and on how best to implement this mechanism.

We solicited comments on the following:

- Sources of data that could be used to implement this policy, and whether CMS should make this information public and transparent.
- Appropriate source(s) for these coverage policies and the best way to determine which commercial plan(s) we would rely on for Medicare coverage.
- Whether beneficiaries, providers, innovators, or others wishing to gain coverage for an item or service should demonstrate that the item or service is covered by at least one commercial insurance plan policy. If they could provide CMS with evidence of commercial coverage or if CMS or its MACs identify such coverage from its review of compilations of health insurance offerings or data from other sources, CMS would consider factor (3) to be satisfied.

• Whether we should limit our consideration of commercial plan offerings or covered lives to a subset of the commercial market in the interest of simplicity, including looking at geographic subsets, subsets based on number of enrollees, subsets based on plan type (HMO, PPO, etc.), or other subsets of plans—including utilizing a singular plan.

• Whether, given considerations such the variation and distribution of coverage policies and access to innovations, we should only cover an item or service if it is covered for a majority, or a different proportion such as a plurality, of covered lives amongst plans or a majority, plurality, or some other proportion of plan offerings in the commercial market. (A plan offering is a contract an insurer offers to its enrollees, and a single insurance company may provide many different offerings).

We recognized that plan offerings may impose certain coverage restrictions on an item or service, *e.g.* related to clinical criteria, disease stage, or number and frequency of treatment. We proposed, when coverage is afforded on the basis of commercial coverage, we would adopt the least restrictive coverage policy for the item or service amongst the offerings we examine. However, given potential unreasonable or unnecessary utilization, we also solicited comment on whether we should instead adopt the most restrictive coverage policy. We further considered a variation whereby, if coverage restrictions are largely similar and present across the majority of offerings, CMS would adopt these in its coverage policies. We sought comment on whether, if we were to take this approach, we should instead use a proportion other than a majority, as low as any offering and as high as all offerings, as a sufficient threshold. As a final variation, we proposed we could defer, in the absence of an NCD or national policy, to the MACs to tailor the restrictions on coverage based on what they observe in the commercial market, just as we rely on MACs with regards to the current definition.

We further solicited comment on whether to grant coverage for an item or service to the extent it meets the first and second factors and the commercial coverage basis for the third factor. Under this approach, we would only use the current definition of ''appropriate'' from the current PIM when the exception for clinically relevant differences between Medicare beneficiaries and commercially insured individuals applies (or if the commercial coverage basis is determined by a proportion like a majority and there is insufficient commercial coverage information available). We noted that referring to commercial coverage in this way may expand or narrow the circumstances under which we would cover a particular item or service and; therefore, solicited comment on whether, under such an approach, we should grandfather our current coverage policies for items and services. We also emphasized that the MACs would continue to make judgements in evaluating individual claims for reimbursement, such that a decision by CMS that an item or service is reasonable and necessary in general does not mean that it is reasonable and necessary in all circumstances with respect to individual claims for reimbursement.

We sought public comment on the most appropriate source(s) for these coverage policies. Further, we proposed each MAC would be responsible for reviewing commercial offerings to inform their LCDs or claim by claim decisions, which would include individual medical necessity decisions. We proposed that we may also allow the MACs to develop approaches to address any or all of the considerations as previously outlined, parallel to their current practice of making coverage decisions in the absence of an NCD or national policy. We solicited comment on the best role of the MACs, along these lines or otherwise. We also solicited comment on whether the discretion to use the current criteria in the PIM when there is evidence to believe Medicare beneficiaries have different clinical needs should be exercised through the NCD process or in other ways, as well as what quantum of evidence should be sufficient.

In sum, we proposed to define the term ''reasonable and necessary'' based on the factors currently found in the PIM, plus an alternative basis for meeting factor (3) based on any coverage in the commercial market. We also solicited comment on an alternative under whether an item or service satisfies the commercial coverage basis for factor (3) is determined by how it is treated across a majority of covered lives amongst commercial plan offerings, as well as an alternative whereby an item or service would be appropriate for Medicare patients to the extent it is covered in the commercial market. When evidence supports that differences between Medicare beneficiaries and commercially insured individuals are clinically relevant, we proposed we would rely on the criteria in the current PIM. In the proposed, we stated we would continue relying on local administration of the program by MACs (including coverage on a claim by claim basis and LCDs) and maintain our discretion to issue NCDs based on the final rule.

We solicited comment on the proposed definition of reasonable and necessary, and the previously outlined alternatives, as well as other mechanisms or definitions we could establish for the term ''reasonable and necessary'', and the merits and drawbacks associated with each, including the potential impact on Medicare program expenses or complexity. We proposed to finalize any variation or outgrowth of the policies described in the proposal, or some combination of these options in lieu of or in conjunction with the proposed definition.

''Reasonable and Necessary'' Definition

*Comment:* CMS received many comments requesting that the agency not finalize the reasonable and necessary definition in regulation. These commenters point out the Medicare has not codified the definition since the program was established. Some commenters recognized that the longstanding reasonable and necessary definition in the Program Integrity Manual is understood by stakeholders, including CMS, however, they believed that retaining this definition only in sub-regulatory guidance will allow for greater flexibility.

*Response:* We disagree with those commenters that opposed the agency issuing a final rule codifying long-standing agency policies with modifications. When we establish substantive legal standards governing the scope of benefits, payment for services, or the eligibility of individuals, entities, or organizations definition that is currently in CMS manuals will not change how CMS is implementing reasonable and necessary currently. Adding it to furnish or receive services, the Medicare statute generally requires that the Secretary establish those policies by regulation. Although it is true that regulations cannot be changed as quickly as other policies, the public benefits by having the opportunity to participate in the rulemaking and the resulting policies will have the force of law and provide greater stability. In addition, issuing regulations in these circumstances is consistent with the Supreme Court's decision in *Azar* v. *Allina Health Services,* 139 S. Ct. 1804 (2019). Thus, we believe it is appropriate to establish the reasonable and necessary criteria in regulations, and will not adopt the commenters' suggestion.

*Comment:* Commenters questioned whether the reasonable and necessary definition would apply to items and services beyond devices.

*Response:* Yes, the reasonable and necessary definition applies to all items and services Medicare covers under Part A and Part B. This includes, but may not be limited to, drugs, devices and biologics. Medicare Advantage plans are required to offer coverage of these items and services on terms at least as permissive as those adopted by fee for service Medicare under this policy.

*Comment:* CMS received a few comments regarding broadening the definition of reasonable and necessary to include prevention and screening items and services.

*Response:* We are not adopting this suggestion because Congress has made express exceptions to 1862(a)(1)(A) in order to provide Medicare coverage for covers. Because those services are based on statutory authorities. CMS has already issue specific regulations for those services, it is not necessary or appropriate to amend the regulations defining reasonable and necessary to include preventive measures.

Safe and Effective

*Comment:* Several comments stated that CMS should further define what it means by ''safe and effective.'' For example, one commenter recommend that evidence-based guidelines that should be considered for meeting the safe and effective criteria. In addition, we had other comments state that FDA market authorization should meet the safe and effective criterion. However, other commenters state that there are items and services not regulated by the FDA; therefore, CMS should not further define this criterion to FDA-market authorization/approval.

*Response:* The requirement of safe and effective is a long-standing part of the definition of reasonable and necessary. CMS believes the long-standing factor is an appropriate starting point for a definition, with minor technical changes as proposed and then finalized in this rule.

*Comment:* CMS should establish its own stand-alone criteria that allows for ''investigational and experimental'' treatment to be deemed to be reasonable and necessary.

*Response:* CMS has stand-alone criteria that allows for coverage of certain investigational and experimental items and services. CMS covers certain Investigational Device Exemptions (IDE) devices under 42 CFR 405 Subpart B). In addition, CMS also covers certain investigational items under the Clinical Trial Policy (see *https://www.cms.gov/medicare-coverage-database/details/nca-details.aspx?NCAId=186&bc=AAgAAAAAAAAA&*).

Appropriate for Medicare Patients

*Comment:* Commenters requested more clarification on how the appropriateness criteria may be applied. For example, one commenter requested CMS further explain ''at least as beneficial.'' Another commenter requested clarification regarding appropriate setting.

*Response:* Because this is a long-standing definition and we are not making significant changes, we believe implementation will have no effect on its application to claim-by-claim adjudication, LCDs or NCDs. We also note that all NCDs and LCDs must go through a transparent process that includes opportunities for full stakeholder engagement when applying the reasonable and necessary definition criteria, including ''at least as beneficial.''

*Comment:* A few commenters requested that CMS update the appropriateness standard that states, '' . . . furnished in accordance with accepted standards of medical practice for the diagnosis or treatment of the patient's condition or to improve the function of a malformed body member'' to include additional criteria such as improve, maintain, or prevent.

*Response:* This long-standing definition allows flexibility and consistency to Medicare coverage process. By continuing to use the long-standing definition, there should not be any changes to its applicability when making coverage determinations. We note that prevention is addressed in statute and regulation elsewhere (see 1861(ddd) and 42 CFR 410.64). Further, under 1862(a)(1)(A), the statute states ''diagnosis or treatment of illness or injury or to improve the functioning of a malformed body member.'' The long-standing definition, while not a direct quote, uses the same terms in the statute.

*Comment:* Some public commenters suggested that MACs must maintain flexibility for determining what is appropriate on case-by-case basis, because this factor turns on particular medical facts. They suggested that finalizing the regulatory proposal could mean patients with rare conditions are overlooked because ''appropriate for Medicare patients'' means decisions are not individualized.

*Response:* We appreciate commenters' feedback. We agree that the appropriate factor is made based on the consideration of specific facts and that MACs should continue to adjudicate individual claims to ensure that they are reasonable and necessary, in the absence of a NCD. We also agree that it is important to consider whether an item or service is reasonable and necessary when making NCDs that often apply to a particular patient population. Because it is the same long-standing definition, we do not believe the application of reasonable and necessary determinations on a case-by-case determination, LCDs or NCDs will change. Specifically, for treatments for rare diseases. The application of appropriateness for a small population may be best addressed as a claim-by-claim decision that takes into consideration the individual patient's clinical situation. The MAC will continue to have the flexibility to decide the best approach to coverage on a local level.

*Comment:* One commenter stated that the definition of appropriateness for Medicare beneficiaries should ensure all beneficiaries are considered—not just the aged.

*Response:* We thank commenters for their input. We agree that it is important to consider the entire Medicare population, including beneficiaries younger than age 65, when deciding whether an item or service is reasonable and necessary.

(3) Commercial Insurer Policy Utilization

*Comment:* Commenters point out that review of commercial insurer policies to be the sole determinant of appropriate coverage is a ''substantial policy change'' and needs more stakeholder input. The commenters state that the proposal is vague, stated over 25 questions, and provided little detail to support framework. Commenters questioned why CMS would need to codify this when the agency has already used its authority to look to commercial policies. One commenter outlined several questions CMS should ask the public to ensure we have appropriate stakeholder input and information before finalizing a definition.

*Response:* At this time, we are not codifying the proposed modification to the PIM definition that allows commercial insurers to be the sole determinant. As some commenters pointed out CMS currently has the authority and has exercised this authority in the past to review commercial insurer policies as part of the NCD development process. However, we are including regulatory language that will give CMS clear authority to review the majority of commercial insurers in the event that an item or service does not meet the appropriateness criteria that is long established policy. As part of CMS' consideration, if Medicare coverage is different than the majority of commercial insurers, CMS will include in the national or local coverage determination its reasoning for different coverage. To ensure there is adequate public input, CMS has committed not later than 12 months after the effective date of this rule, CMS will publish for public comment draft methodology by which commercial insurer's policies are determined to be relevant based on the measurement of majority of covered lives.

*Comment:* Some commenters suggested that if CMS were to adopt a review of commercial insurer policies it should not be based on a single commercial policy, but a majority of commercial payers or use the most restrictive policy in the commercial market. Commenters also stated that commercial insurance policies vary widely and CMS could use any of the policies, including the most restrictive. The commenters continued that CMS should only adopt a commercial insurer policy if it expands coverage.

*Response:* To ensure there is adequate public input on which commercial insurers are appropriate and to what extent, CMS has committed not later than 12 months after the effective date of this rule, it will publish draft methodology by which commercial insurer's policies are determined to be relevant based on the measurement of majority of covered lives.

*Comment:* A few commenters suggested that if CMS were to finalize the reasonable and necessary definition that includes consideration of commercial insurer policies, that CMS should consider the model CMS currently uses for compendia (*https://www.cms.gov/Medicare/Coverage/CoverageGenInfo/compendia*) to determine which commercial insurers to include.

*Response:* We appreciate the idea and agree that more stakeholder engagement is needed. Therefore, CMS has committed not later than 12 months after the effective date of this rule, it will establish the methodology by which commercial insurer's policies are determined to be relevant based on the measurement of majority of covered lives.

*Comment:* A commenter asked why the Agency would assess the appropriateness of a service, find it lacking, but then decide to move forward with affirmative coverage because somewhere out in the private insurance landscape the service is covered. This approach would create new areas of important conflicts of interest between manufacturers and payers that would be difficult to monitor.

*Response:* As the commenter stated, CMS will review commercial insurers only in the event it does not meet the appropriateness criteria. We believe it is important to ensure that we have evaluated all relevant evidence. To ensure we have full stakeholder engagement before we evaluate all commercial insurer policies, we will issue a sub-regulatory guidance for the public to comment. Further, CMS has committed to publish this no later than 12 months after the effective date of this rule. The guidance will establish the methodology by which commercial insurer's policies are determined to be relevant based on the measurement of majority of covered lives.

*Comment:* Several commenters noted that commercial insurers typically consider other factors such as cost-effectiveness of items or services in making coverage determinations; whereas, CMS does not. There is no single standard for commercial payer coverage policies which could create significant challenges in applying a commercial payer analysis to an item or service to determine coverage, including some commercial insurers may use Medicare coverage policies as part of its coverage. Commenters wanted to know how CMS will weigh and use these commercial analyses to determine coverage. These same commenters wanted that methodology to be transparent and public.

*Response:* We agree. After further analyzing the definition along with the public comments it would be challenging to fully implement this part of the reasonable and necessary definition without further engagement with stakeholders. CMS has committed not later than 12 months after the effective date of this rule, it will establish the methodology by which commercial insurer's policies are determined to be relevant based on the measurement of majority of covered lives.

*Comment:* Commenters noted that, rather than include commercial payer as a separate criteria in the reasonable and necessary definition, CMS should review commercial policies as part of the established NCD/LCD development process to ensure beneficiaries have access to items and services.

*Response:* We agree. CMS currently may consult commercial insurer policies as part of the NCD and LCD process and we have further committed to establish the methodology by which commercial insurer's policies are determined to be relevant based on the measurement of majority of covered lives.

*Comment:* CMS received many comments that if we adopted commercial insurer policies as part of the reasonable and necessary definition that transparency would be extremely important in the policies we reviewed. Many commenters stated that commercial insurers' coverage policies are not public or transparent. The commenters stated that the public must have access to the scientific basis of commercial payers' coverage decisions, including sources of data and the data itself.

*Response:* We agree transparency is an important aspect of the coverage process. After reviewing the public comments, we recognized that implementation of inclusion of commercial payers would be challenging. Therefore, a transparent analysis of commercial insurers will be part of the NCD and LCD process, which includes public comment period of at least 30 days.

*Comment:* If the reasonable and necessary definition is finalized with the commercial insurer policy provision, commenters were concerned it will cede essential government decisions to commercial insurers.

*Response:* We appreciate the comment. Based on comments, we are finalizing a definition that requires CMS to explain why it would not follow a commercial insurer. This will be added to the NCD and LCD process to allow for a stakeholder engagement during the public comment period. In addition, as mentioned in previous responses, CMS committed not later than 12 months after the effective date of this rule, to establish the methodology by which commercial insurer's policies are determined to be relevant based on the measurement of majority of covered lives.

Commercial Insurer Policy—Universe and Analysis

*Comment:* CMS received a wide variety of comments regarding which commercial insurers we should review for consideration. The comments ranged from supporting any single plan to working with both national and local health care management groups who have a stake in the various regions to a plurality of plans to commercial insurance changes too rapidly and should not be considered. We also received a few comments to include government insurance plans. A few larger insurers stated that it used fully insured commercial plans and not administrative services only (ASO) commercial plans.

*Response:* For reasons noted above including concerns there is not enough information or specificity regarding the commercial insurer criteria, we have committed to issuing standards on what types of commercial insurers should CMS consider for making NCDs and LCDs.

Evidence That Supports Clinically Relevant Differences

*Comment:* Commenters suggested that CMS provide greater specificity regarding its standard for determining when there are ''clinically relevant differences between Medicare beneficiaries and commercially insured individuals.'' Commenters recommended a variety of factors to consider. A commenter also stated there likely are not clinical differences in the need for DME and medical supplies between the privately insured and Medicare beneficiaries.

*Response:* We have removed this criteria from the final definition.

Grandfathering

*Comment:* A few comments stated that CMS should grandfather established NCDs and LCDs that have already been subject to notice, stakeholder comment, and evidence review from any coverage restrictions stemming from incorporation of commercial coverage policies. Another comment stated that CMS should grandfather existing NCDs/LCDs and policies generated through negotiated rulemaking.

*Response:* CMS does not intend to revise its LCDs and NCDs. We believe initially that definition is the familiar and will not require CMS to revise its coverage decisions. As we write the standards for establishing the methodology by which commercial insurer's policies are determined to be relevant based on the measurement of majority of covered lives, we will consider how these standards may effect coverage at that time.

Appeals Process

*Comment:* Several commenters requested that a new appeals process be developed that allows a beneficiary or provider to use a commercial policy as part of their evidence that an item or service is reasonable and necessary, and then require the MAC to afford this policy significant weight as part of its review on reconsideration. Another commenter requested clarification on how the newly codified reasonable and necessary definition will be used for appeals. Another commenter stated that CMS would need a transparent and accelerated process to appeal coverage policies and articles.

*Response:* We thank commenters for their input. We added in the final rule that commercial insurer coverage may be used as part of the evidence during an appeal. Nothing in this rule changes the process to appeal a claim.

*Final Action:* We are finalizing our proposal with modification to define the term ''reasonable and necessary'' based on the factors currently found in the PIM. Further, for national and local coverage determinations, which have insufficient evidence to meet the long-standing appropriateness criteria, CMS will consider coverage to the extent the item or services are covered by a majority of commercial insurers. To ensure there is adequate stakeholder engagement on the standards, CMS committed, not later than 12 months after the effective date of this rule, it will establish the methodology by which commercial insurer's policies are determined to be relevant based on the measurement of majority of covered lives.

This definition is effective 60 days after publication of this final rule in the **Federal Register**.

*B. Application of the ''Reasonable and Necessary'' Standard to the MCIT Pathway*

We proposed that, under the MCIT pathway, an item or service that receives a breakthrough device designation from the FDA would be considered ''reasonable and necessary'' under section 1862(a)(1)(A) of the Act because breakthrough devices have met the FDA's unique breakthrough devices criteria, and they are innovations that serve unmet needs. While other devices are still considered new to the market, for example, PMAs and even some 510(k)s, the devices designated by the FDA as breakthrough are representative of true innovations in the marketplace. This application of the ''reasonable and necessary'' standard in this way would ensure that the MCIT pathway can provide a fast-track to Medicare coverage of innovative devices that may more effectively treat or diagnose life-threatening or irreversibly debilitating human disease or conditions.

MCIT would provide by providing national Medicare coverage for devices receiving the FDA breakthrough device designation, which are FDA market-authorized and used consistent with the FDA approved or cleared indication for use (also referred to as the ''FDA required labeling''),[15] so long as the breakthrough device is described in an appropriate Medicare benefit category under Part A or Part B and is not specifically excluded by statute. We believe the criteria for qualification as a breakthrough device, as defined in section 515B(b) of the Food, Drug and Cosmetic Act (21 U.S.C. 360e–3(b)) is sufficient to satisfy the elements of the ''reasonable and necessary'' standard. The first breakthrough device designation criterion is that a device must ''provide for more effective treatment or diagnosis of life-threatening or irreversibly debilitating human disease or conditions'' (21 U.S.C. 360e–3(b)(1)). The second criterion is that the device must satisfy one of the following elements: It represents a breakthrough technology; there are no approved or cleared alternatives; it offers significant advantages over existing approved or cleared alternatives, including additional considerations outlined in the statute; or availability of the device is in the best interest of patients (21 U.S.C. 360e–3(b)(2)). Thus, breakthrough devices are those that HHS has determined may provide better health outcomes for patients facing life-threatening or irreversibly debilitating human disease or conditions. We believe that a device meeting these criteria, once also FDA market authorized, is ''reasonable and necessary'' for purposes of Medicare coverage.

We recognize that the FDA market authorization of breakthrough devices warrants immediate coverage under the ''reasonable and necessary'' clause in section 1862(a)(1)(A) of the Act. We previously stated that FDA determinations were not controlling determinations for Medicare coverage purposes under section 1862(a)(1)(A) of the Act. (For more information see the January 30, 1989 **Federal Register** (54 FR 4307) (''FDA approval for the marketing of a medical device will not necessarily lead to a favorable coverage recommendation . . . '') and the August 7, 2013 **Federal Register** (78 FR 48165) (''However, FDA approval or clearance alone does not entitle that technology to Medicare coverage.''). Under the Secretary's authority to interpret section 1862(a)(1)(A) of the Act (*supra* section I.A.), we are revising our interpretation of the statute because of the practical concerns that our current standards have delayed access to a unique set of

[15] FDA Guidance for Industry, ''Medical Product Communications That Are Consistent with the FDA—Required Labeling—Questions and Answers'', *available at https://www.fda.gov/media/133619/download.*

innovative devices that FDA has found to be safe and effective, and we believe are ''reasonable and necessary'' for purposes of Medicare coverage.

In light of E.O. 13890, the Secretary has determined that application of the current standards for making ''reasonable and necessary'' determinations may take too long following FDA market authorization of breakthrough devices. More importantly, the existing standard has not always provided Medicare beneficiaries access to certain breakthrough medical devices when needed to improve health outcomes. We proposed that breakthrough devices per se meet the reasonable and necessary standard in order to increase access and to reduce the delay from FDA market authorization to Medicare coverage.

*Comment:* We received a few comments supporting that FDA-designated breakthrough devices should meet the reasonable and necessary definition under the MCIT pathway.

*Response:* We appreciate the comments. Under the Secretary's authority to interpret section 1862(a)(1)(A) of the Act (*supra* section I.A.), we are revising our interpretation, we are finalizing this rule as proposed, FDA-designated breakthrough devices are considered reasonable and necessary for purposes of MCIT.

*Comment:* We received a comment that stated reasonable and necessary should apply to any FDA breakthrough device regardless of entry into MCIT.

*Response:* We disagree, qualification as a breakthrough device, as defined in section 515B(b) of the Food, Drug and Cosmetic Act (21 U.S.C. 360e–3(b)) is sufficient to satisfy the elements of the ''reasonable and necessary'' standard. The first breakthrough device designation criterion is that a device must ''provide for more effective treatment or diagnosis of life-threatening or irreversibly debilitating human disease or conditions'' (21 U.S.C. 360e–3(b)(1)). The second criterion is that the device must satisfy one of the following elements: It represents a breakthrough technology; there are no approved or cleared alternatives; it offers significant advantages over existing approved or cleared alternatives, including additional considerations outlined in the statute; or availability of the device is in the best interest of patients (21 U.S.C. 360e–3(b)(2)). Thus, breakthrough devices are those that HHS has determined may provide better health outcomes for patients facing life-threatening or irreversibly debilitating human disease or conditions. We believe that a device meeting these criteria, once also FDA market authorized, is ''reasonable and necessary'' for purposes of Medicare coverage.

*Comment:* Commenters expressed concern that MCIT eligibility will be based on commercial payer policies.

*Response:* MCIT eligibility is not based on commercial payer policies. It is solely based on the eligibility criteria outlined in the rule.

*Final Action:* After consideration of the public comments we received, we are finalizing this policy as proposed.

*C. MCIT Pathway*

We proposed the MCIT pathway to deliver on the Administration's commitment to provide access to breakthrough devices to Medicare beneficiaries. The MCIT pathway provides up to 4 years of national coverage to newly FDA market authorized breakthrough devices. We are aware that this coverage may also facilitate evidence development on devices for the Medicare population because manufacturers can gather additional data on utilization of the device during the MCIT coverage period.

1. Definitions

In § 405.601(a), we proposed that the MCIT pathway is voluntary. Operationally, we proposed that manufacturers of breakthrough devices notify CMS of their intention to elect MCIT shortly after receiving notice from the FDA of being granted the breakthrough device designation. Ideally, this notification would be sent to CMS within 2 weeks of receiving breakthrough designation. However, entities will not be penalized for notifying CMS after that time. Alternatively, submitting a notification to CMS shortly before or concurrently with the date of the FDA marketing application submission should also afford CMS sufficient time to operationalize MCIT for the device. The CMS Coverage and Analysis Group would establish an email box for these inquiries and notification. This notification alerts CMS to offer guidance to manufacturers about the MCIT pathway and point to resources for coding and payment, which are key conversations to effectuate coverage upon FDA market authorization. We intend to utilize the existing coverage implementation processes to be prepared to offer coverage immediately upon the FDA market authorization when requested by the manufacturer.

In § 405.601(b), we proposed the following definitions for the purposes of 42 CFR part 405. We proposed to define ''breakthrough device'' as a medical device that receives such designation by the FDA (section 515B(d)(1)) of the FD&C Act (21 U.S.C. 360e–3(d)(1)). We also proposed to define, for the sake of clarity in the rule that the acronym MCIT stands for Medicare Coverage of Innovative Technology.

*Comment:* We received a few comments requesting that we not finalize MCIT and do not include drugs and biologics until there is evidence of a gap in coverage. The commenters suggested including drugs and biologics would require separate rulemaking and need to consider other FDA pathways (*e.g.,* accelerated approval, priority review vouchers, orphan drug designation).

*Response:* The final MCIT rule will not include drugs or biologics. The final rule will only include FDA-designated breakthrough devices as defined by the FDA (section 515B(d)(1) of the FD&C Act (21 U.S.C. 360e–3(d)(1)).

*Comment:* We received several comments that support the definition of breakthrough devices. These comments stated that it ''allows Medicare to focus resources and seems to be a reasonable filter to prevent overutilization of the pathway.''

*Response:* We appreciate the comment.

*Comment:* We received several comments requesting clarification of whether FDA-designated breakthrough devices that are clinical diagnostic lab tests or non-implanted devices are considered eligible for the MCIT pathway.

*Response:* Any medical device that receives such designation by the FDA (section 515B(d)(1) of the FD&C Act (21 U.S.C. 360e–3(d)(1)) and meets the other criteria outlined in this rule is eligible for the MCIT pathway. This includes any clinical lab diagnostic test, including in-vitro diagnostics, and devices that are not implanted, as long as it meets the MCIT eligibility criteria as outlined at § 405.603.

*Comment:* Some commenters stated that the greater predictability afforded by the MCIT pathway would decrease reimbursement risk and increase both manufacturer and investor interest in developing new and innovative therapies. Several commenters stated that investors perceive reimbursement risk as a greater threat to innovation than technology, regulatory, or clinical risks. Some commenters asserted that the MCIT pathway would make it easier for innovators to raise funds necessary for development and refinement of new technologies (*e.g.,* artificial kidney). However, some commenters argued that the MCIT pathway could give specific technologies an unfair advantage that would be unavailable to subsequent market entrants, thereby paradoxically decreasing innovation and market competition. As a modification to the proposed MCIT rule, some commenters suggested that CMS cover iterative refinements of the same breakthrough device for the duration of the original device's MCIT term. Some commenters also suggested coverage under the MCIT pathway for similar but unrelated breakthrough and non-breakthrough designated devices of the same type and indication for the balance of the first device's MCIT term. Other commenters proposed that new market entrants that are very similar to a breakthrough device should each receive the full four years of MCIT coverage.

*Response:* CMS agrees that the MCIT pathway is likely to promote development and refinement of innovative technologies and support medical advancement. CMS also agrees that iterative refinements of devices are common following FDA market authorization. These often represent material improvements, and Medicare beneficiaries should have access to the improved version of the predicate breakthrough device. In practice, many of these device refinements are market authorized through a supplement to the initial FDA PMA submission and would therefore remain eligible for coverage through the MCIT pathway for the duration of the original devices MCIT coverage period.

CMS disagrees that the MCIT pathway provides an unfair advantage to a single device, or that it impedes market competition. The FDA defines breakthrough technologies in section 515B(b) of the FD&C Act (21 U.S.C. 360e–3(b)) as those (1) that provide for more effective treatment or diagnosis of life-threatening or irreversibly debilitating human disease or conditions; and (2)(A) that represent breakthrough technologies; (B) for which no approved or cleared alternatives exist; (C) that offer significant advantages over existing approved or cleared alternatives, including the potential, compared to existing approved alternatives, to reduce or eliminate the need for hospitalization, improve patient quality of life, facilitate patients' ability to manage their own care (such as through self-directed personal assistance), or establish long-term NCD definition, FDA breakthrough-designated devices address an unmet need, and subsequent devices do not enjoy the same prioritized review process or breakthrough designation because there is an existing approved or cleared alternative. CMS similarly would not extend automatic coverage to subsequent similar devices because there would no longer be an unmet need in the market. Subsequent similar FDA market-authorized devices will benefit from any evidence generated through MCIT coverage of the predicate device. Please explain that although not automatically covered under the regulation, contractors could make a favorable coverage decision if a claim is submitted.

*Comment:* Several commenters requested that CMS include devices that meet the ''spirit of breakthrough'' regardless of whether the device applied or received the FDA breakthrough designation. Examples commenters gave were second-to-market or subsequent technologies of the same type, even for the same indication or subsequent-to-market non-breakthrough designated technologies that fall under the same class or category as the breakthrough technology and approved for the same indication. Commenters stated that competing devices from other manufacturers that are not breakthrough devices could be caught in a precarious limbo, at least for a time. At least one commenter, submitted a description of its device and how it meets the spirit of the FDA breakthrough designation.

*Response:* If the device meets the eligibility criteria as outlined in § 405.603, it is eligible for the MCIT pathway. Outside of that designation, CMS is not expanding the eligibility for MCIT. We will, of course, consider whether the subsequent devices satisfy the reasonable and necessary criteria if a claim is submitted for review.

*Comment:* We received comments supporting expansion of MCIT to include diagnostic radiopharmaceuticals, combination drug or devices (device or drug-led), drugs, biologics and other technologies. At least one commenter wanted CMS to specifically include pain management and antimicrobial therapies. Another commenter stated that certain cellular and tissue-based wound care products (CTPs) do not require the traditional FDA PMA, BLA and 510k processes, but rather are regulated by the FDA under Section 361 as HCT/Ps.

*Response:* Any medical device that receives such designation by the FDA (section 515B(d)(1)) of the FD&C Act (21 U.S.C. 360e–3(d)(1)) and meets the other criteria outlined in this rule is eligible for the MCIT pathway. We received mixed public comments on expanding beyond devices and have determined to finalize the proposed rule which only includes devices that meet the criteria proposed. We need to provide a rationale not to extend automatic coverage further in light of the language in the Executive Order. We don't provide reasons to support the conclusion.

*Comment:* A few commenters requested that CMS include screening tests and preventive screening tests.

*Response:* Screening and prevention tests have a unique statutory authorities and are not covered based on 1862(a)(1)(A). These items and services fall outside the scope of this rule. Medicare has separate regulations for screening and preventive services that have been codified primarily in 42 CFR part 410, subpart B.

*Comment:* We had several commenters request CMS to create new benefit categories or make a determination that an item or service (*e.g.,* software, digital technologies) falls within a benefit category.

*Response:* Decisions regarding specific items and services and the relevant benefit categories are outside the scope of this rule. For more information on benefit category determinations see the *CMS Innovator's Guide to Navigating Medicare* (*https://www.cms.gov/medicare/coverage/councilontechinnov/downloads/innovators-guide-master-7-23-15.pdf*).

*Comment:* The Executive Order was interpreted too narrow. The commenter stated that MCIT should not be tied to the FDA breakthrough device definition but should include other CMS-recognized innovative non-breakthrough technologies (*e.g.,* technologies eligible for New Technology Add-on Payment or Transitional Pass-through Payment). To aid in operationalizing this, commenter recommend that CMS consider preventing MACs from denying coverage of innovative non-breakthrough technologies that meet predetermined criteria.

*Response:* At this time, CMS will finalize its proposed definition of any medical device that receives such designation by the FDA (section 515B(d)(1) of the FD&C Act (21 U.S.C. 360e–3(d)(1)) and meets the other criteria outlined in this rule is eligible for the MCIT pathway. We received mixed public comments on expanding beyond devices and have determined to finalize the proposed rule which only includes devices. At this time, MACs retain the ability to make coverage determinations through current processes of either an LCD or claim by claim adjudication.

*Comment:* Commenters requested that MCIT include IDEs involving breakthrough devices.

*Response:* Investigation Device Exemptions (IDEs) are devices defined at 42 CFR 405 Subpart B. IDE devices are not FDA market authorized or cleared (often referred to as premarket devices). Any IDE device FDA-designated as breakthrough device is eligible for MCIT when it is FDA authorized for marketing The MCIT pathway begins no earlier than the date the breakthrough device receives FDA market authorization, or the date requested by the manufacturer, provided the requested date is within the four year window for MCIT eligibility.

*Comment:* CMS should continue working to expand to a wider range of innovative medical devices (outside of breakthrough designation).

*Response:* We appreciate the comment. CMS continues to review its coverage pathways to find appropriate efficiencies.

*Comment:* CMS should expand MCIT to include humanitarian use devices. Commenter asserted they approved through an FDA expedited program to get technology to patients with rare conditions.

*Response:* At this time, we are not expanding the MCIT pathway beyond the proposed rule. This includes any medical device that receives such designation by the FDA (section 515B(d)(1) of the FD&C Act (21 U.S.C. 360e–3(d)(1)) and meets the other criteria outlined in this rule is eligible for the MCIT pathway.

*Comment:* If CMS chooses to retain the fifth criteria proposed in Section 405.603(e), then we would ask that the agency clarify that ineligibility is tied to an absolute national non-coverage determination.

*Response:* Upon receiving notification by a manufacturer of interest in MCIT, CMS will determine if there is an existing NCD on point. While possible, it is unlikely that there is pre-existing, explicit non-coverage NCD given the breakthrough nature of eligible devices.

*Comment:* Patient preference should be considered when qualifying devices for MCIT. Commenter gave the example of non-invasive medical devices (including focused ultrasound) that may be strongly preferred by patients.

*Response:* Any medical device that receives such designation by the FDA (section 515B(d)(1) of the FD&C Act (21 U.S.C. 360e–3(d)(1)) and meets the other criteria outlined in this rule is eligible for the MCIT pathway. FDA takes patient preference under consideration as they make market authorization decisions.

After consideration of the public comments we received, we are finalizing our proposed definition of breakthrough devices.

2. MCIT Pathway Device Eligibility

In § 405.603(a) we proposed that the pathway is available to devices that meet the definitions proposed in § 405.601. Based on the explicit mention of devices in E.O. 13890 and our interaction and feedback from stakeholders who expressed their concern that there is more uncertainty of coverage for devices than for other items and services (for example, diagnostics, drugs and biologics), the proposed policy is for devices only.

We proposed in § 405.603(b) that the breakthrough devices that received FDA market authorization no more than 2 calendar years prior to the effective date of this subpart (the date the final rule is finalized) and thereafter will be eligible for coverage for claims submitted on or after the effective date of this rule. Claims for breakthrough devices with dates of service that occurred before the effective date of this rule will not be covered claims through MCIT. Breakthrough devices market authorized prior to the effective date of this rule will not be eligible for all 4 years of coverage. For these ''lookback'' devices, the 4-year period starts on the date of FDA market authorization. We proposed that if a manufacturer initially chooses to not utilize the MCIT pathway, and then chooses to do so some time after the breakthrough device's market authorization, coverage still only lasts 4 years from the date of FDA market authorization. We sought comment on this eligibility criterion for devices and specifically the 2 year lookback.

*Comment:* Almost all commenters were supportive of a lookback period. Many agreed with a two year interval. A few commenters suggested a four year lookback or unlimited to the start of the Breakthrough Devices Program.

*Response:* We appreciate the comments. We proposed a two year lookback to try to maximize the benefit of the MCIT rule. We believe this interval includes the recent period that presented the greatest initial confusion and uncertainty for manufacturers of innovative devices before the MCIT rule. We agree with commenters that the lookback period is important to launch the rule with highest impact. Considering comments, we believe that a two year lookback remains appropriate and maintains efficiency at start up. For breakthrough devices older than 2 years, it is possible that other coverage pathways such as LCDs or NCDs may have been developed and coverage concerns have been addressed. Potential overlap of coverage policies would hinder implementation. In addition, the majority of breakthrough devices were approved in the past 2 years since the program was authorized in 2017 (final agency guidance issued in December 2018 (available at: *https://www.fda.gov/media/108135/download*). We note that the lookback period is a one-time occurrence since there will not be a need for a lookback period for breakthrough devices approved going forward once the MCIT rule is effective.

We proposed in § 405.603(c) that to be part of the MCIT pathway, the device must be used according to its FDA approved or cleared indication for use. We proposed that the device is only covered for use consistent with its FDA approved or cleared indication for use because that is the indication and conditions for use that were reviewed by the FDA and authorized for marketing. Data are unlikely to be available to support uses extending beyond the FDA required labeling for breakthrough devices on the date of marketing authorization. Use of the device for a condition or population that is not labeled (''off-label'') will not be covered as that use would not be FDA authorized. We specifically sought comment on whether off-label use of breakthrough devices should be covered and, if so, under what specific circumstances and/or evidentiary support.

*Comment:* Most commenters agreed with the inclusion of the FDA required indication. A number of commenters noted that off indication or off label uses should be included under MCIT as well. Some commenters raised concern for on-indication use of breakthrough devices because the devices are so new to market.

*Response:* We appreciate the comments. Consistent with the breakthrough device designation, we specified the FDA required indication (on-indication) for MCIT. We did not specifically provide automatic coverage for off-indication or off-label uses in the proposed MCIT rule, but we do not preclude possible coverage under other coverage mechanisms, such as through the claims process. However, we note that in general there is typically little clinical evidence to support off-label uses of new technology. We are aware that concerns for on-indication use of breakthrough devices were reiterated in recent published articles (Neumann and Chambers. Health Affairs, 12/02/2020; Bach. New York Times, 12/01/2020).

*Comment:* Commenters noted that the FDA label indication only is not sufficient since other factors have important roles in determining positive outcomes from device therapy such as physician training and experience and facility capabilities and experience.

*Response:* We appreciate the comments and agree. We proposed provider and facility requirements in the proposed reasonable and necessary definition (please say what they were and where they are addressed in other comments) and finalize these requirements to maximize positive health outcomes for the Medicare population. We will look to the appropriate sources for provider and facility requirements for implementation purposes.

*Comment:* Commenters noted that new FDA approved indications should be included.

*Response:* We appreciate the comments and agree. We recognize that new FDA approved indications for a breakthrough device could be added during the MCIT period. We believe the new FDA required indication would also meet the MCIT definition and would be eligible for the duration of the breakthrough device MCIT period.

In § 405.603(d) and (e), we additionally proposed limitations to what is coverable under the Act. In § 405.603(e), we proposed that if CMS has issued an NCD on a particular breakthrough device, that breakthrough device is not eligible for MCIT. We proposed this because, once the device has been reviewed by CMS for the FDA required approved or cleared indication for use; CMS has made a coverage determination based on the available evidence for that technology. We believe this would happen rarely because breakthrough devices are new technologies that are not likely to have been previously reviewed through the NCD process. In § 405.603(f), we acknowledge that devices in the MCIT pathway may be excluded due to statute or regulation (for example, 42 CFR 411.15, Particular services excluded from coverage) and, like other items and services coverable by Medicare, the device must fall within the scope of a Medicare benefit category under section 1861 of the Act and the implementing regulations. If the device does not fall within a Medicare benefit category as outlined in the statute and implementing regulations, the device is not eligible for Medicare coverage; therefore, the device would not be eligible for the MCIT pathway.

*Comment:* CMS proposed that the breakthrough device must fall into an existing benefit category to be included under MCIT. Commenters supported the benefit category designation. Several comments recommended the inclusion of breakthrough devices that do not fall within an existing benefit category, for example, digital health technologies, or to modify existing benefit categories to include these devices.

*Response:* We appreciate the comments. However, in general, for Medicare coverage, an item or service must fall within an existing benefit category. Benefit categories are generally established by statute. CMS is unable to create a new benefit category or alter the language of existing benefit categories in this rule.

After consideration of the public comments we received, we are finalizing the rule as proposed with slight modification, as we indicated with a placeholder in the proposed, to update 405.603(b) with the latest date for the lookback to be the date two years prior to the effective date of the rule.

3. General Coverage of Items and Services Under the MCIT Pathway

We proposed in § 405.605 that devices covered under the MCIT pathway are covered no differently from devices that are covered outside of MCIT. In other words, provided the items and services are otherwise coverable (that is, not specifically excluded and not found by CMS to be outside the scope of a Medicare benefit category), covered items and services could include the device, reasonable and necessary surgery to implant the device, if implantable, related care and services of the device (for example, replacing reasonable and necessary parts of the device such as a battery), and coverage of any reasonable and necessary treatments due to complications arising from use of the device. What the MCIT pathway offers compared to other pathways is predictable national coverage simultaneous with FDA market authorization that will generally last for a set time period.

The proposed MCIT pathway would support and accelerate beneficiary access to certain innovative devices. CMS encourages manufacturers that have breakthrough devices covered under MCIT to develop additional data for the healthcare community.

*Comment:* Commenters questioned for clarification of whether breakthrough diagnostic medical tests are eligible for MCIT.

*Response:* Diagnostic medical tests are considered FDA medical devices and fall within an existing benefit category. Based on this categorization, breakthrough designated diagnostic medical tests would be eligible to be included under MCIT.

*Comment:* Commenters questioned whether breakthrough medical devices that are approved for screening indications, for example cancer screening tests, would be eligible under MCIT.

*Response:* We appreciate the comments. MCIT is based on a specific Medicare authority. Since screening tests and preventive services have separate and distinct statutory authorities, items and services used for screening and preventive services are outside the scope of the MCIT rule.

*Comment:* Commenters suggested the inclusion of medical devices approved under different FDA designations, such as IDE, Humanitarian Device Exemption (HDE) and devices that have not received the breakthrough device designation.

*Response:* We appreciate the comments. Medical devices that receive breakthrough designation from the FDA and meet the definition and inclusion criteria in the final rule will be eligible for MCIT. By the definition, non-breakthrough devices will not be eligible for MCIT but in general other coverage mechanisms such as the claim review process, NCDs, or LCDs may be available. We note that for certain other medical devices that have received FDA IDE there are existing coverage regulations (42 CFR 405 Subpart B). The IDE regulation generally applies to devices that have not yet received formal FDA approval. Some breakthrough devices may also have IDE status and may be eligible for coverage under the IDE regulation and also may be subsequently eligible for coverage under MCIT once the breakthrough device receives FDA market authorization.

*Comment:* Commenters requested clarification of what is covered under MCIT—the device only or the device and the implantation of the device if required.

*Response:* MCIT would cover both the breakthrough device and the implantation of the device. Other items and services for the diagnosis and treatment of the patient's illness would be recoverable as usual through existing coverage regulations and policies or when determined to be reasonable of the local Medicare Administrative Contractors (MACs) in the claims appeals process. There are existing Medicare coverage and payment policies that also may apply to other items and services that may be used for treatment during hospitalizations and complications that may arise from the device treatment in subsequent hospitalizations. MCIT rule does not supersede existing coverage and payment policies on routine and related items and services for the diagnosis and treatment of the patient's illness.

After consideration of the public comments we received, we are finalizing this section of the proposed rule with only a minor textual clarification to also include reasonable and necessary procedures to *use* the breakthrough device. The proposed text stated only reasonable and necessary procedures to implant the device, which would not be representative of the universe of breakthrough devices.

4. MCIT Pathway for Breakthrough Devices: 4 Years of Coverage

In § 405.607(a), we proposed that the MCIT pathway for coverage would begin on the same date the device receives FDA market authorization. We proposed this point in time to ensure there is no gap between Medicare coverage and FDA market authorization. This start date supported the MCIT pathway's focus of ensuring beneficiaries have a predictable access to new devices.

*Comment:* CMS proposed that MCIT coverage would start on the day of FDA approval of the breakthrough device and last for 4 years. Several commenters supported the MCIT start date as proposed on the day of FDA approval. A number of other commenters recommend flexibility in the start date to be determined by the manufacturer since the breakthrough device may not be immediately available in the market on the date of FDA approval. Commenters noted that flexibility would allow the manufacturer time to be fully prepared for device dissemination with set coding, payment, and evidence development if the manufacturer voluntarily chooses.

*Response:* We appreciate comments and agree. We recognize that not all breakthrough devices may be immediately available in the market on date of FDA approval due to various factors including production, large scale distribution, and coding. We have modified and, in the final rule, will include flexibility in the start date of MCIT to be determined by the manufacturer within certain parameters. We note that regardless of the date the manufacturer selects to begin MCIT coverage, they are eligible only during the four year period beginning on the date of FDA market authorization. Therefore, if a manufacturer waits one year after receiving FDA approval to request MCIT coverage of an item or service, the relevant item or service will have three years of coverage under MCIT. For implementation purposes, manufacturers must inform CMS of the desired future start date. We believe that the clarity and transparency of MCIT will assist manufacturers in developing product development and deployment plans earlier so the 4 years of MCIT can be used more efficiently.

While we believe it is in the best interest of the manufacturer to invoke MCIT coverage early in the 4-year coverage period there may be breakthrough devices that can achieve the desired level of evidence development in less time. Because the time period for evidence development is dependent on the nature of the device and the disease or clinical condition for which it is intended we are comfortable with manufacturers electing their MCIT coverage start date (within the parameters outlined above). We further believe that it is counterintuitive for a breakthrough device manufacturer to opt-into MCIT coverage toward the end of the 2-year opt-in window. However, manufacturers have expressed interest in this type of flexibility and CMS is not in a position to predict the various reasons a manufacturer may find themselves in a position of needing to wait to opt-in.

*Comment:* Commenters noted the potential time delays from coverage, coding, and payment.

*Response:* We appreciate the comments and agree that enhanced coordination of coverage, coding and payment would be useful. While a detailed description of coding and payment is beyond the scope of the MCIT rule and resides in other payment rules, CMS, as directed by E.O. 13890, has worked to streamline coverage, coding, and payment. We have established new collaborations internally to enhance efficiency going forward.

We proposed in § 405.607(b)(1) that the MCIT pathway for breakthrough devices ends 4 years from the date the device received FDA market authorization. We proposed this 4 year time period because it could allow manufacturers to develop clinical evidence and data regarding the benefit of the use of their device in a real world setting. For example, we believe 4 years would allow most manufacturers sufficient time to complete FDA required post-approval or other real-world data collection studies that may have been a condition of FDA market authorization. This assumption is based upon our historical experience with studies conducted through coverage with evidence development (CED). Many of these studies were completed within approximately 4 years. Further, this time period allows Medicare to support manufacturers that, whether required by the FDA or not, have an interest in better understanding the health outcomes of their device in the Medicare population, including impacts on patient-reported and longer-term outcomes.

Further, in § 405.607(b) we proposed reasons that the MCIT pathway may end prior to 4 years. This included circumstances whereby the device became subject to an NCD, regulation, statute, or if the device could no longer be lawfully marketed.

*Comment:* Most commenters were supportive of the four year period. Some commenters suggested longer duration up to 5 years at CMS discretion or if the manufacturer is actively conducting a clinical study.

*Response:* We appreciate the comments and believe the 4 year duration of MCIT continues to be an adequate time period to foster innovation. We recognize the importance of continuing data collection and evidence development but have not mandated evidence development. We believe, with the transparency of MCIT, that manufacturers will be able to appropriately plan studies that could be completed within 4 years. In general evidence on improvements in health outcomes for Medicare patients not only would help support coverage through other mechanisms after MCIT but also importantly help physicians and patients in choosing the treatment that is best suited for the individual patient.

*Comment:* A large number of respondents supported voluntary evidence development. Many commenters noted that the FDA already requires post market-authorization data collection in most cases. Many commenters argued that manufacturers should discuss their evidence development plans with CMS soon after FDA market-authorization. CMS, in turn, should be clear and transparent about any evidence gaps and any additional evidence needed to reach the reasonable and necessary threshold required for durable coverage after MCIT coverage ends. Commenters suggested that CMS be more flexible in agreeing to acceptable study designs and outcomes, including use of real world data. Commenters stated that manufacturers already have considerable incentive to meet the reasonable and necessary standard to assure coverage continuity after MCIT. Some commenters objected to a one-size-fits-all mandate for evidence development noting a diversity of devices come through the FDA breakthrough program. They argued that a voluntary evidence development regime allows flexibility for manufacturers to manage their own clinical study and evidence development programs in line with their goals and business needs.

A larger number of commenters supported mandatory evidence development. One commenter did not support the MCIT pathway, but if implemented, argued that mandatory evidence development mitigates the risks of this regulation. A number of commenters stated that early coverage tied to mandatory evidence development strikes an economically appropriate balance. Some commenters noted that post-market clinical studies may more efficiently capture longer-term outcomes than within conventional clinical studies. Several commenters stated that mandatory evidence development is appropriate provided that it is efficient, streamlined, and time-limited. Several commenters noted that post-market evidence development is essential for development and refinement of clinical practice guidelines that inform evidence-based clinical practice. Other commenters noted that mandatory data collection is necessary to assure appropriate use of technologies, and that use without oversight could be economically disastrous. Furthermore, they stated that low-value practice patterns may be very difficult to reverse once they are established.

*Response:* CMS is not mandating evidence development during MCIT coverage. After coverage through the MCIT pathway ends, all existing coverage pathways will remain available to manufacturers to establish durable coverage. CMS will require breakthrough devices to meet the long-established reasonable and necessary coverage standard, just as they would without the MCIT pathway. CMS anticipates that most manufacturers will voluntarily pursue robust evidence development to secure durable coverage after MCIT coverage sunsets.

We are aware of stakeholders' interest in CMS providing detailed, specific, and actionable guidance to manufacturers on evidence deficits relative to the long-established reasonable and necessary threshold. We are considering the feasibility of this approach. CMS notes that the expected diversity of breakthrough devices speaks to flexibility in evidence development. In some instances, manufacturers may wish to participate in conventional clinical studies; in others, a registry-based clinical study may offer the most robust and cost-efficient option. Manufacturers may also wish to pursue studies that rely on real-world evidence, but they are strongly encouraged to review these study designs with CMS. Manufacturers are encouraged to engage CMS soon after FDA market authorization with an evidence development plan that addresses any identified evidence gaps.

CMS believes that rigorous and publicly available evidence is necessary to inform beneficiaries, the clinical community, and the public about the risks and benefits of available treatment options. Published studies are also necessary for breakthrough devices to be included in evidence-based guidelines, which feature heavily in CMS' assessment of accepted standards of medical practice. Therefore, CMS requires that stakeholders publish evidence in the peer-reviewed clinical literature and applies rigorous methodologic standards in evidence review supporting local or national coverage analyses.

*Comment:* As related to the ending of MCIT, a number of commenters noted safety concerns of breakthrough devices over the four years. Commenters noted the need to continue to monitor use and outcomes and to suspend MCIT if the FDA withdraws approval or there are concerns with safety in post-market data.

*Response:* We appreciate the comments and agree on the need to monitor harms.

These concerns are particularly relevant to the suggested 4 year duration of MCIT. We believe appropriate mechanisms should be in place to end automatic coverage in certain scenarios. In general, safety is within the FDA authority. However, there are appropriate commonalities when the health outcomes are higher mortality or higher numbers of strokes or heart attacks. Based on overall comments on safety, we will include a mechanism in the final rule to allow suspension or termination of MCIT when FDA has issued a warning letter, medical device safety communication, or black box warning and CMS determines that harms outweigh benefits for Medicare patients.

*Comment:* A series of comments cited FDA guidance that the Breakthrough Devices Program allows for greater uncertainty of risks and benefits than non-breakthrough approval processes because the breakthrough devices meet an important and unmet clinical need. Several commenters also note that the FDA relies more heavily on post-market data collection for these devices, and often breakthrough devices lack data on long-term safety and effectiveness at the time of FDA market authorization. Several commenters cited evidence that many FDA mandated post market studies are never completed and that the FDA safety and surveillance system is both flawed and insufficient to assure beneficiary safety during MCIT coverage. One commenter noted that lax FDA safety reporting may allow continued CMS coverage despite important safety problems. One commenter suggested that CMS should mandate safety reporting to both CMS and the FDA Manufacturer and User Facility Device Experience (MAUDE) database at regular intervals as a condition of MCIT coverage. Several commenters suggested that CMS should regularly review FDA safety reports for covered breakthrough devices. Several commenters argued that any safety warnings or product recalls should terminate coverage within the MCIT coverage pathway.

One commenter noted that Medicare beneficiaries are likely to perceive that FDA market-authorized and CMS-covered items or services have been established as safe and effective. Another commenter suggested that Medicare beneficiaries will be unwitting clinical trial subjects if they are treated with a breakthrough device through the MCIT coverage pathway. Several commenters stated that the proposed MCIT regulation lacks any mechanism for stakeholder input, especially specialty societies, into operator and institutional requirements that protect beneficiary safety prior to national coverage. A large number of commenters noted that absent mandatory evidence development, the MCIT regulation lacks a mechanism to assure safety, outcomes, and quality of care for covered breakthrough devices. Several commenters suggested that CMS should monitor safety events using registries, FDA safety reports, and claims data monitoring.

*Response:* The Administration is committed to encouraging medical innovation and to ensuring Medicare beneficiaries have access to new cures and technologies that improve health outcomes. The MCIT regulation meets this goal for FDA market-authorized breakthrough devices. However, patient safety is always a central concern, and CMS agrees that the MCIT regulation must balance early access to innovative medical devices with strong patient safety protections.

CMS has developed a number of process steps to address this important balance of access and safety. First, the Administration has championed transparency as a critical mechanism for beneficiary empowerment in decision-making about their own healthcare. Accordingly, devices covered through the MCIT pathway will be publicly posted on the CMS website. We aim to also indicate publicly available clinical evidence related to the device. Patients and their clinicians are strongly encouraged to review this information. With access to this information, CMS believes that patients and their clinicians are best able to consider the risks and benefits of innovative new treatments in the context of their personal health and values. Second, CMS will continue to engage with relevant stakeholders—notably specialty societies with expert knowledge of the available treatments. CMS recognizes that these guidelines may evolve with greater experience with breakthrough devices and may assist CMS and clinicians in coverage of the devices after MCIT coverage sunsets. CMS advises operators and institutions to consider them carefully when offering breakthrough devices covered through the MCIT pathway. Third, CMS will coordinate with the FDA to receive regular feedback on important safety signals and concerns. As a practical matter, CMS will rely on existing FDA safety and surveillance publicly available reporting structures as an important mechanism for identifying safety concerns about covered breakthrough devices. While evidence development is voluntary, manufacturers have strong incentives to develop evidence that addresses any gaps identified through engagement with CMS at the onset of MCIT coverage. If these gaps are insufficiently addressed during the MCIT coverage pathway, manufacturers may risk not meeting the reasonable and necessary evidentiary threshold when MCIT coverage sunsets. Where manufacturers voluntarily pursue evidence development through robust clinical registries, those data may also provide detailed and timely data on safety of breakthrough devices under real-world conditions. Lastly consistent with some suggestions from commenters, we revised the rule to specify that coverage of a breakthrough device through MCIT can end if the FDA removes market authorization of a breakthrough device or at the discretion of the Secretary, subsequent to an FDA medical device safety communication or Warning Letter about the breakthrough device.

*Comment:* Nearly a fifth of the comments received on the proposed rule were from individuals who urged Medicare to cover artificial kidney technology. The majority of these comments were from people who are affected by or care for someone affected by a form of kidney disease and/or End Stage Renal Disease. While some specifically mentioned MCIT, most did not.

*Response:* CMS appreciates every comment and thanks commenters for sharing their personal stories and how their lives or the life of someone they care for could be improved by coverage of artificial kidney technology when it becomes broadly available.

*Comment:* A large number of comments addressed the issue of how CMS should establish durable coverage after MCIT coverage sunsets. Several commenters acknowledged that CMS has limited resources and cannot open an NCD for all MCIT devices without securing more resources in the Coverage and Analysis Group. One commenter warned that an excessive emphasis on coverage review for MCIT devices could delay consideration of important non-breakthrough NCD requests. Several commenters recommended that CMS be more transparent about the existing NCD wait list, the expected timing of any new NCDs, and the prioritization criteria for NCDs. They argued that manufacturers will need this information when considering which pathway is best after MCIT. The largest proportion of commenters stated that there should not be any automatic opening of an NCD, including if there is no LCD by 6 months after the end of MCIT coverage. Many commenters believe that manufacturers should instead have flexibility in choosing a coverage pathway. A smaller number of commenters recommended automatic opening of an NCD with sufficient time for seamless coverage after MCIT coverage sunsets. Several of these commented that because the MCIT pathway establishes national coverage that an NCD is the appropriate coverage pathway after MCIT coverage sunsets. A small number of commenters argued that coverage for devices in the MCIT pathway should continue indefinitely to the FDA label absent an LCD or NCD that specifically constrains coverage.

*Response:* As previously noted, devices approved through the FDA breakthrough device program may have greater uncertainty about the risks and benefits of treatment than non-breakthrough devices, and they generally lack data on long-term safety and effectiveness at the time of FDA market authorization. By contrast, CMS heavily considers demonstration of improved health outcomes in making positive coverage determinations. All of the conventional coverage pathways will be available for MCIT devices after the pathway sunsets, and our regulatory reasonable and necessary coverage standard will apply. Manufacturers and stakeholders must be aware of the important distinctions between FDA and CMS review criteria and use the time during the MCIT coverage pathway to close any evidence gaps that may be identified at the time of FDA market authorization.

Based on the comments, we are aware not every manufacturer wishes to pursue the NCD coverage pathway. CMS already publishes an NCD Wait List (available here: *https://www.cms.gov/Medicare/Coverage/DeterminationProcess*) which is updated every month as need be and we are aware of stakeholder interest in guidance on how CMS will prioritize formal and complete NCD requests. Additionally, CMS intends to stay abreast of clinical evidence development for breakthrough devices in the MCIT pathway, and focus on whether there is new evidence in the published, peer-reviewed literature that addresses gaps identified at the time of FDA market authorization, especially whether there is compelling evidence that the device improves patient health outcomes. To allow greater stakeholder flexibility and efficient use of CMS resources, CMS will not automatically open a National Coverage Determination (NCD) as a part of the MCIT coverage pathway. As previously noted, the full range of coverage options at the end of the MCIT pathway includes opening an NCD or and claim submission to a MAC. MACs may either open Local Coverage Determinations (LCDs) or cover the breakthrough device on a claim-by-claim basis after MCIT coverage sunsets. After consideration of the public comments we received, we are finalizing the proposed rule and adding modifications consistent with the safety concerns raised by commenters. We updated the text to allow for coverage to end prior to 4 years at the discretion of the Secretary subsequent to an FDA medical device safety communication or Warning Letter. Additionally coverage will end if the FDA removes authorization of a device.

## Final Action

In summary, the MCIT pathway will be voluntary for manufacturers on an opt-in basis, and would provide immediate or near immediate national coverage depending upon the manufacturer's chosen start date. MCIT coverage expires four years after the date of FDA approval, irrespective of when the manufacturer requested activation of their MCIT coverage, at which point, the manufacturer may request CMS to undertake an NCD for the breakthrough device. We sought public comment on all of our proposals, and have included summaries of the comments received and the responses to those comments in this document.

## III. Collection of Information Requirements

Under the Paperwork Reduction Act of 1995, we are required to provide 60-day notice in the **Federal Register** and solicit public comment before a collection of information requirement is submitted to the Office of Management and Budget (OMB) for review and approval. In order to fairly evaluate whether an information collection should be approved by OMB, section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires that we solicit comment on the following issues:

- The need for the information collection and its usefulness in carrying out the proper functions of our agency.
- The accuracy of our estimate of the information collection burden.
- The quality, utility, and clarity of the information to be collected.
- Recommendations to minimize the information collection burden on the affected public, including automated collection techniques.

We solicited public comment on each of the section 3506(c)(2)(A)-required issues for the following sections of this document that contain information collection requirements (ICRs).

To derive average costs, we used data from the U.S. Bureau of Labor Statistics' May 2018 National Occupational Employment and Wage Estimates for all salary estimates (*https://www.bls.gov/oes/current/oes131041.htm,* released May 2019). In this regard, the table that follows presents the mean hourly wage, the cost of fringe benefits (calculated at 100 percent of salary), and the adjusted hourly wage.

TABLE 1—NATIONAL OCCUPATIONAL EMPLOYMENT AND WAGE ESTIMATES FOR MCIT

| Occupation title | Occupation code | Mean hourly wage ($/hr) | Fringe benefit ($/hr) | Adjusted hourly wage ($/hr) |
|---|---|---|---|---|
| Compliance Officer | 13–1041 | 34.86 | 34.86 | 69.72 |

As indicated, we are adjusting our employee hourly wage estimates by a factor of 100 percent. This is necessarily a rough adjustment, both because fringe benefits and overhead costs vary significantly from employer to employer. Nonetheless, there is no practical alternative and we believe that doubling the hourly wage to estimate total cost is a reasonably accurate estimation method.

The proposed coverage pathway allows for a voluntary participation and therefore necessitates that manufacturers of breakthrough devices notify CMS of their intent to enter the MCIT pathway. Therefore, the burden associated with notifying CMS is the time and effort it would take for each of the organizations to send CMS an email or letter. We anticipate two MCIT pathway participants in the first year based upon the number of medical devices that received FY2020 NTAP and were non-covered in at least one MAC jurisdiction by LCDs and related articles.

We estimate notifying CMS of intent to participate in MCIT would involve 15 minutes at $69.72 per hour by a compliance officer. In this regard, we estimate 15 mins per notification at a cost of $17.43 per organization (0.25 hours × $69.72). In aggregate, we estimate 0.5 hours (0.25 hours × 2 submissions) at $34.86 ($17.43 × 2 submissions).

After the anticipated initial 2 submitters, over the next 3 years we expect 3 submitters in year 2, 4 submitters in year 3, and 5 submitters in year 4 to notify CMS of interested in the MCIT pathway. We expect this increase in submitters each year to level off at this point. In this regard, we estimate the same 0.25 hours per submission at a cost of $17.43 per organization. Similarly, in aggregate, we estimate, for year 2 (0.75 hours at $52.29 an hour), for year 3 (1.0 hour at $69.72 an hour), and for year 4 (1.25 hours at $87.15 an hour).

The proposed requirements and burden will be submitted to OMB under control number 0938–NEW.

## IV. Regulatory Impact Statement

This final rule makes Medicare coverage policy updates pursuant to the authority at section 1862(a)(1)(A) of the Act. We are using regulatory action per the October 3, 2019 ''Executive Order on Protecting and Improving Medicare for Our Nation's Seniors'' to create a swift Medicare coverage pathway to allow beneficiaries across the nation to access breakthrough devices after FDA market authorization and define ''reasonable and necessary''.

We have examined the impact of this final rule as required by Executive Order 12866 on Regulatory Planning and Review (September 30, 1993), Executive Order 13563 on Improving Regulation and Regulatory Review (January 18, 2011), the Regulatory Flexibility Act (RFA) (September 19, 1980, Pub. L. 96–354), section 1102(b) of the Social Security Act, section 202 of the Unfunded Mandates Reform Act of 1995 (March 22, 1995; Pub. L. 104–4), Executive Order 13132 on Federalism (August 4, 1999), the Congressional Review Act (5 U.S.C. 804(2)), and Executive Order 13771 on Reducing Regulation and Controlling Regulatory Costs (January 30, 2017).

Executive Orders 12866 and 13563 direct agencies to assess all costs and benefits of available regulatory alternatives and, if regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects, distributive impacts, and equity). A regulatory impact analysis (RIA) must be prepared for major rules with economically significant effects ($100 million or more in any 1 year). This final rule reaches the economic threshold and thus is considered a major rule.

CMS considered several alternatives for defining ''reasonable and necessary.'' These alternatives included not defining the term in regulation, define the term as finalized in this rule (commercial insurer coverage may be considered under the Medicare program), and define the term as commercial insurer coverage being the sole determinant of coverage under the Medicare program. Given the direction in E.O. 13890 to clarify standards we proposed and finalized in regulation, the definition of the term ''reasonable and necessary.'' The definition we are finalizing provides consistency and flexibility regarding the role of commercial insurer coverage in the Medicare program and the majority of public comments did not support the commercial payer alternative without more public engagement. We believe the final rule is consistent with what the public requested.

The impact of defining ''reasonable and necessary'' is hard to quantify without knowing the specific items and services that would be included in future NCDs and LCDs and the criteria that CMS will use for determining which commercial insurers will be considered. Additional information regarding which commercial insurers and policies will be developed within 12 months of the effective date of this rule. In order to demonstrate the potential impact on Medicare spending, we developed scenarios that illustrate the impact of implementing the three alternatives for defining ''reasonable and necessary.'' The number of NCDs and LCDs finalized in a given year can vary and the cost of items and services within the coverage decisions varies. Further, while we reviewed coverage of items and services, we did not take into account unique Medicare rules regarding which type of providers/clinicians may furnish certain services, place of service requirements, or payment rules. Our analysis is based on whether Medicare covered or non-covered an item or service and whether we could find coverage for that item or service by any commercial insurer. Lastly, this impact analysis is based on the numbers of NCDs and LCDs finalized in 2020. (See Table 2 below)

In 2020, CMS and the MACs finalized 3 NCDs and 31 LCDs. (This number represents new LCDs in 2020 and made publically available via the Medicare Coverage Database. If more than one MAC jurisdiction issued an LCD on the same item or service with the same coverage decision, only 1 of the LCDs was included in the count.)

Of the NCDs finalized in 2020, all 3 resulted in expanded national Medicare coverage. Because none of those NCDs resulted in non-coverage we did not evaluate whether commercial insurers also covered. Therefore, based on 2020 data for NCDs only, the impact would be $0 for all three alternatives.

Of the 31 LCDs, 27 provided Medicare positive coverage and 4 resulted in non-coverage. For those items and services non-covered we identified 3 of those items and services were covered in at least 1 commercial insurer policy. For these non-covered items and services we can establish that the possible range of the cumulative cost of covering them could be from $0 to $3.4 billion for a single year (based on price and approximate Medicare beneficiary utilization). Because our analysis looked for any commercial insurer that covered the item or service, the cost may be less when utilizing commercial insurer polices that represent a majority of covered lives (CMS will publish draft guidance explaining its methodology within 12 months of the effective date of this rule). In addition, even if a commercial insurer covers an item or service, for the final rule it is not a requirement to automatically adopt the commercial insurers' coverage. Therefore, not all items and services that are non-covered by Medicare and covered by a can be assumed covered under this rule. Rather, commercial insurer coverage is a factor that CMS will take into account as part of the body of evidence in determining coverage through the NCD and LCDs processes. Because not all commercial insurer positive coverage will necessarily transfer to Medicare coverage and because CMS still to define which types of commercial insurers (based on majority of covered lives) are relevant, we believe that commercial insurer coverage impact is likely much smaller, closer to 15–25% of $3.4 billion, that is, $51–$880 million. Under the third alternative which requires Medicare to rely on any coverage by a commercial insurer in order to achieve Medicare coverage, the cost would much higher. Using the same data for the first 2 alternatives, there were 4 LCDs that resulted in Medicare non-coverage, and 3 commercial insurers covered the item or service. Assuming that for this third assumption that Medicare must cover these items and services, the cost to the program could be at least $3.4 billion for a year for the commercial insurer as sole determinant of coverage. Because our analysis looked for any commercial insurer that covered the item or service, the cost may be less when utilizing commercial insurer polices that represent a majority of covered lives.

TABLE 2—ILLUSTRATED IMPACT FOR THE MEDICARE PROGRAM BY DEFINITION OF REASONABLE AND NECESSARY

| | Estimated change in Medicare costs for the alternatives considered | | |
|---|---|---|---|
| | No change (not codifying a definition) | Codified definition | Commercial insurer coverage as sole determinant |
| Coverage Determinations (NCDs and LCDs) | $0 | $51–880 million. | $3.4+ billion |

Regulatory alternatives to this final rule for MCIT were to combine Medicare coverage with clinical evidence development under section 1862(a)(1)(E) of the Act, to take no regulatory action at this time, or to adjust the duration of the MCIT pathway. Combining coverage with clinical evidence development would have met the E.O. 13890 overarching goal of beneficiary access to breakthrough devices. However, this alternative did not meet the other E.O. 13890 aims of minimizing time between FDA market authorization and Medicare coverage and wide availability. The timing of coverage would depend upon the manufacturer being able to initiate a clinical study and the wide availability of coverage could be an issue if providers did not have the infrastructure necessary to participate in the clinical study. The pathway had the benefit of reducing the potential for patient harm by ensuring Medicare had clinical evidence while providing coverage. CMS chose to not to pursue combining coverage with evidence development for breakthrough devices because we wanted to meet the timing and wide availability aims of E.O. 13890.

CMS also considered taking no regulatory action and trying to leverage the existing Medicare coverage pathways or proposing subregulatory policies to achieve the streamlined coverage process described in E.O. 13890. We could not develop subregulatory policies to achieve the desired national coverage and access envisioned in E.O. 13890 because, as described in this preamble, the existing coverage pathways do not consistently provide swift, national beneficiary access to innovative devices. As discussed elsewhere in the preamble, the nature of the problem being addressed by this final rule is a potential delay between a milestone such as FDA market authorization and

CMS coverage; as such, we requested comment on a policy option of shortening of the duration of the MCIT pathway from the proposed 4 years to 1 year.

The impact of implementing the MCIT pathway is difficult to determine without knowing the specific technologies that would be covered. In addition, many of these technologies would be eligible for coverage in the absence of this rule, such as through a local or national coverage determination, so the impact for certain items may be the acceleration of coverage or adoption by just a few months. Furthermore, some of these devices would be covered immediately if the MACs decide to pay for them, which would result in no impact on Medicare spending for devices approved under this pathway. However, it is possible that some of these innovative technologies would not otherwise be eligible for coverage in the absence of this rule. Because it is not known how these new technologies would otherwise come to market and be reimbursed, it is not possible to develop a point estimate of the impact. In general, we believe the MCIT coverage pathway would range in impact from having no impact on Medicare spending, to a temporary cost for innovations that are adopted under an accelerated basis.

The decision to enter the MCIT pathway is voluntary for the manufacturer. Because manufacturers typically join the Medicare coverage pathway that is most beneficial to them, this could result in selection against the existing program coverage pathways (to what degree is unknown at this point). In addition, the past trend of new technology costing more than existing technology could lead to a higher cost for Medicare if this trend continued for technologies enrolling in the MCIT pathway. Nevertheless, new technology may also mitigate ongoing chronic health issues or improve efficiency of services thereby reducing some costs for Medicare.

In order to demonstrate the potential impact on Medicare spending, the CMS Office of the Actuary (OACT) developed three hypothetical scenarios that illustrate the impact of implementing the proposed MCIT pathway. Scenarios two and three assume that the device would not have been eligible for coverage in the absence of the proposed rule. (See Table 2) The illustration used the new devices that applied for a NTAP in FY 2020 as a proxy for the new devices that would utilize the MCIT pathway. The submitted cost and anticipated utilization for these devices was published in the **Federal Register**.[16] In addition, we assumed that two manufacturers would elect to utilize the MCIT pathway in the first year, three manufacturers in the second year, four manufacturers in the third year, and five manufacturers in the fourth year each year for all three scenarios. This assumption is based on the number of medical devices that received FY 2020 NTAP and were non-covered in at least one MAC jurisdiction by LCDs and related articles and our impression from the FDA that the number of devices granted breakthrough status is increasing. For the first scenario, the no-cost scenario, we assumed that all the devices would be eligible for coverage in the absence of the proposed rule. If the devices received payment nationally and at the same time then there would be no additional cost under this pathway. For the second scenario, the low-cost scenario, we assumed that the new technologies would have the average costs ($2,044) and utilization (2,322 patients) of similar technologies included in the FY 2020 NTAP application cycle. Therefore, to estimate the first year of MCIT, we multiplied the add-on payment for a new device by the anticipated utilization for a new device by the number of anticipated devices in the pathway ($\$2,044 \times 2,322 \times 2 = \$9.5$ million). For the third scenario, the high-cost scenario, we assumed the new technologies would receive the maximum add-on payment from the FY2020 NTAP application cycle ($22,425) and the highest utilization of a device (6,500 patients). Therefore, to estimate for the first year of MCIT, we estimated similarly ($\$22,425 \times 6,500$ patients $\times 2 = \$291.5$ million). For subsequent years, we increased the number of anticipated devices in the pathway by three, four, and five in the last two scenarios until 2024.[17] In addition to not taking into account inflation, the illustration does not reflect any offsets for the costs of these technologies that would be utilized through existing authorities nor the cost of other treatments (except as noted). It is not possible to explicitly quantify these offsetting costs but they could substantially reduce or eliminate the net program cost. However, by assuming that only two to five manufacturers will elect MCIT coverage, we have implicitly assumed that, while more manufacturers could potentially elect coverage under MCIT, the majority of devices would have been covered under a different coverage pathway. Therefore, a substantial portion of the offsetting costs are implicitly reflected.

Based on this analysis, there is a range of potential impacts of the proposed MCIT coverage pathway as shown in Table 2. The difference between the three estimates demonstrates how sensitive the impact is to the cost and utilization of these unknown devices.

TABLE 3—ILLUSTRATED IMPACT ON THE MEDICARE PROGRAM BY MCIT COVERAGE PATHWAY

| | Costs (in millions) | | | |
|---|---|---|---|---|
| | FY 2021 | FY 2022 | FY 2023 | FY 2024 |
| No-cost Scenario | $0 | $0 | $0 | $0 |

[16] FY 2020 Hospital Inpatient Prospective Payment System (IPPS) Proposed Rule (84 FR 19640 and 19641) (May 3, 2019) *available at https://www.govinfo.gov/content/pkg/FR-2019-05-03/pdf/2019-08330.pdf* (accessed October 17, 2019).

[17] An indirect cost of the proposed rule would be increased distortions in the labor markets taxed to support the Medicare Trust Fund. Such distortions are sometimes referred to as marginal excess tax burden (METB), and Circular A–94—OMB's guidance on cost-benefit analysis of federal programs, available at *https://www.whitehouse.gov/sites/whitehouse.gov/files/omb/circulars/A94/a094.pdf*—suggests that METB may be valued at roughly 25 percent of the estimated transfer attributed to a policy change; the Circular goes on to direct the inclusion of estimated METB change in supplementary analyses. If secondary costs—such as increased marginal excess tax burden is, in the case of this final rule—are included in regulatory impact analyses, then secondary benefits must be as well, in order to avoid inappropriately skewing the net benefits results, and including METB only in supplementary analyses provides some acknowledgement of this potential imbalance.

TABLE 3—ILLUSTRATED IMPACT ON THE MEDICARE PROGRAM BY MCIT COVERAGE PATHWAY—Continued

| | Costs (in millions) | | | |
|---|---|---|---|---|
| | FY 2021 | FY 2022 | FY 2023 | FY 2024 |
| Low-cost Scenario | 9.5 | 23.7 | 42.7 | 66.4 |
| High-cost Scenario | 291.5 | 728.8 | 1,311.9 | 2,040.7 |

We believe the assumptions used in the three scenarios are reasonable to show the possible wide range of impacts for implementing this proposed pathway, in particular for a technology that would not have otherwise been eligible for coverage.

*Comment:* A commenter supported CMS' assertion that new technology may mitigate ongoing chronic health issues or improve efficiency of services thereby reducing some cost for Medicare, and that incentivizing breakthrough medical devices will lead to both direct cost offsets (*i.e.,* cost savings) and indirect benefits (*e.g.,* quality of life, clinical outcomes) across multiple therapeutic areas. Another expressed concern that funding for MCIT will result in neutrality adjustments across the Physician Fee Schedule (PFS).

*Response:* We appreciate these comments. Payment for Medicare covered physician services and other services paid under the PFS are subject to statutorily-required budget neutrality adjustments, determined based on the utilization of particular services. The RIA did not incorporate changes to PFS as we do not expect that it is likely PFS will require adjustment.

The RFA requires agencies to analyze options for regulatory relief of small entities. For purposes of the RFA, small entities include small businesses, nonprofit organizations, and small governmental jurisdictions. Some hospitals and other providers and suppliers are small entities, either by nonprofit status or by having revenues of less than $7.5 million to $38.5 million in any 1 year. Individuals and States are not included in the definition of a small entity. We reviewed the Small Business Administration's Table of Small Business Size Standards Matched to North American Industry Classification System (NAICS) Codes to determine the NAICS U.S. industry titles and size standards in millions of dollars and/or number of employees that apply to small businesses that could be impacted by this rule.[18] We determined that small businesses potentially impacted may include surgical and medical instrument manufacturers (NAICS code 339112, dollars not provided/1,000 employees), Offices of Physicians (except Mental Health Specialists) (NAICS code 621111, $12 million/employees not provided), and Freestanding Ambulatory Surgical and Emergency Centers (NAICS code 621493, $16.5 million/employees not provided). During the first 4 years of MCIT, we anticipate approximately 14 surgical and medical instrument manufacturers may participate, and based off of U.S. Census data, the majority of this businesses type are small businesses with less than 1,000 employees (968 out of 1,093 businesses have less than 500 employees).[19] As such, this final rule will impact less than 5 percent of these businesses, and the revenue impact, if any, would not be negative. Rather, it would be a positive impact because MCIT would provide Medicare coverage (and subsequent payment) to providers who purchase the devices from these manufacturers. For Offices of Physicians (except Mental Health Specialists) and Freestanding Ambulatory Surgical and Emergency Centers that may be providing the breakthrough devices, the majority are small businesses with less than 1,000 employees (4,060 out of 4,385 and 160,367 out of 161,286 have less than 500 employees, respectively).[20] Given that we estimate, at most in the high-cost scenario, that 6,500 beneficiaries would utilize breakthrough devices through MCIT per year, and even if each beneficiary were to access services at only one of these small businesses (that is, no two beneficiaries used the same office or center), still less than 5 percent of these small businesses would be impacted by MCIT. As such, the revenue impact, if any, would not be negative, rather, it would be a positive impact because MCIT would provide Medicare coverage (and subsequent payment) to providers. Overall, this final rule results in a payment, not a reduction in revenue. We are not preparing a further analysis for the RFA because we have determined, and the Secretary certifies, that the proposed rule and this subsequent final rule will not have a significant negative economic impact on a substantial number of small entities because small entities are not being asked to undertake additional effort or take on additional costs outside of the ordinary course of business. Rather, for small entities that develop or provide breakthrough devices to patients, the proposed rule and this final rule are a means for the device to be covered through the Medicare program, which does not detract from revenue and could be viewed as a positive economic impact. With the limited information we had to base this estimate, we solicited public comment on improvements to this estimate for this final rule.

After consideration of the public comments we received, we are finalizing the rule as proposed.

In addition, section 1102(b) of the Act requires us to prepare a regulatory impact analysis if a rule may have a significant impact on the operations of a substantial number of small rural hospitals. This analysis must conform to the provisions of section 604 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside of a Metropolitan Statistical Area for Medicare payment regulations and has fewer than 100 beds. We are not preparing an analysis for section 1102(b) of the Act because we have determined, and the Secretary certifies, that the proposed rule and the final rule would not have a significant impact on the operations of a substantial number of small rural hospitals because small rural hospitals are not being asked to undertake additional effort or take on additional costs outside of the ordinary course of business. Obtaining breakthrough devices for patients is at the discretion of providers. We are not requiring the purchase and use of breakthrough devices. Providers should

[18] Small Business Administration, Table of Small Business Size Standards Matched to North American Industry Classification System (NAICS) Codes, *available at https://www.sba.gov/sites/default/files/2019-08/SBA%20Table%20of%20Size%20Standards_Effective%20Aug%2019%2C%202019_Rev.pdf.*

[19] 2017 County Business Patterns and 2017 Economic Census. Number of Firms, Number of Establishments, Employment, Annual Payroll, and Preliminary Receipts by Enterprise Employment Size for the United States, All Industries: 2017 (release date: May 6, 2020).

[20] *Id.*

continue to work with their patients to choose the best treatment. For small rural hospitals that provide breakthrough devices to their patients, this proposed rule is a means for the device to be covered through the Medicare program.

Section 202 of the Unfunded Mandates Reform Act of 1995 also requires that agencies assess anticipated costs and benefits before issuing any rule whose mandates require spending in any 1 year of $100 million in 1995 dollars, updated annually for inflation. In 2020, that threshold was approximately $156 million. This final rule would have no consequential effect on State, local, or tribal governments or on the private sector.

Executive Order 13132 establishes certain requirements that an agency must meet when it promulgates a proposed rule (and subsequent final rule) that imposes substantial direct requirement costs on State and local governments, preempts State law, or otherwise has Federalism implications. Since this final rule does not impose any costs on State or local governments, the requirements of Executive Order 13132 are not applicable.

Executive Order 13771 (E.O. 13771), titled Reducing Regulation and Controlling Regulatory Costs, was issued on January 30, 2017. The proposed rule, is being finalized as proposed, and is expected to impose no more than *de minimis* costs and thus be neither an E.O. 13771 regulatory action nor an E.O. 13771 deregulatory action.

In accordance with the provisions of Executive Order 12866, this final rule was reviewed by the Office of Management and Budget.

**List of Subjects in 42 CFR Part 405**

Administrative practice and procedure, Diseases, Health facilities, Health professions, Medical devices, Medicare, Reporting and recordkeeping requirements, Rural areas, X-rays.

For the reasons set forth in the preamble, the Centers for Medicare & Medicaid Services amends 42 CFR chapter IV as set forth below:

## PART 405—FEDERAL HEALTH INSURANCE FOR THE AGED AND DISABLED

■ 1. The authority for part 405 continues to read as follows:

**Authority:** 42 U.S.C. 263a, 405(a), 1302, 1320b–12, 1395x, 1395y(a), 1395ff, 1395hh, 1395kk, 1395rr, and 1395ww(k).

■ 2. Section 405.201 is amended in paragraph (b) by adding a definition for ''Reasonable and necessary'' in alphabetical order to read as follows:

**§ 405.201 Scope of subpart and definitions.**

* * * * *

(b) * * *

*Reasonable and necessary* means that an item or service is considered—

(i) Safe and effective;

(ii) Except as set forth in § 411.15(o) of this chapter, not experimental or investigational; and

(iii) Appropriate for Medicare patients, including the duration and frequency that is considered appropriate for the item or service, in terms of whether it meets all of the following criteria:

(A) Furnished in accordance with accepted standards of medical practice for the diagnosis or treatment of the patient's condition or to improve the function of a malformed body member;

(B) Furnished in a setting appropriate to the patient's medical needs and condition;

(C) Ordered and furnished by qualified personnel;

(D) Meets, but does not exceed, the patient's medical need; and

(E) Is at least as beneficial as an existing and available medically appropriate alternative; or

(F) Not later than March 15, 2022, CMS will issue draft subregulatory guidance on the methodology of which commercial insurers are relevant based on the measurement of majority of covered lives. For national and local coverage determinations, which have insufficient evidence to meet paragraphs (b)(3)(i) through (v) of this section, CMS will consider coverage to the extent the items or services are covered by a majority of commercial insurers. As part of CMS' consideration, CMS will include in the national or local coverage determination its reasoning for its decision if coverage is different than the majority of commercial insurers.

* * * * *

■ 3. Subpart F, consisting of §§ 405.601–405.607, is added to read as follows:

**Subpart F—Medicare Coverage of Innovative Technology**

Sec.
405.601 Medicare coverage of innovative technology.
405.603 Medical device eligibility.
405.605 Coverage of items and services.
405.607 Coverage period.

### Subpart F—Medicare Coverage of Innovative Technology

**§ 405.601 Medicare coverage of innovative technology.**

(a) *Basis and scope.* Medicare coverage of innovative technology (MCIT) is a program that provides national, time-limited coverage under section 1862(a)(1)(A) of the Act for certain breakthrough medical devices. Manufacturer participation in the pathway for breakthrough device coverage is voluntary.

(b) *Definitions.* For the purposes of this subpart, the following definitions are applicable:

*Breakthrough device* means a device that receives such designation by the Food and Drug Administration (FDA) (section 515B(d)(1) of the FD&C Act (21 U.S.C. 360e–3(d)(1)).

*MCIT* stands for Medicare coverage of innovative technology.

**§ 405.603 Medical device eligibility.**

The MCIT pathway is available only to medical devices that meet all of the following:

(a) That are FDA-designated breakthrough devices.

(b) That were FDA market authorized on [Enter date 2 years prior to effective date of final rule] and thereafter.

(c) That are used according to their FDA approved or cleared indication for use.

(d) That are within a Medicare benefit category.

(e) That are not the subject of a Medicare national coverage determination.

(f) That are not otherwise excluded from coverage through law or regulation.

**§ 405.605 Coverage of items and services.**

Covered items and services furnished within the MCIT pathway may include any of the following, if not otherwise excluded from coverage and according to existing coverage and/or payment policies as applicable:

(a) The breakthrough device.

(b) Any reasonable and necessary procedures to implant and/or use the breakthrough device.

(c) Reasonable and necessary items and services to maintain the breakthrough device.

(d) Related care and services for the breakthrough device.

(e) Reasonable and necessary services to treat complications arising from use of the breakthrough device.

**§ 405.607 Coverage period.**

(a) *Start of the period.* The MCIT pathway begins on the date requested by the manufacturer in an email to CMS at any time opting in to the MCIT pathway provided the requested start date is no earlier than—

(1) The date the breakthrough device receives FDA market authorization; or

(2) The date requested by the manufacturer, provided that such a date is not later than 2 years after the date

described in paragraph (a)(1) of this section.

(b) *End of the period.* The MCIT pathway for a breakthrough device ends as follows:

(1) No later than 4 years from the date the breakthrough device received FDA market authorization.

(2) Prior to 4 years if a manufacturer withdraws the breakthrough device from the MCIT pathway.

(3) Prior to 4 years if the breakthrough device becomes the subject of a national coverage determination or otherwise becomes noncovered through law, regulation, or at the discretion of the Secretary subsequent to an FDA medical device safety communication or Warning Letter.

(4) Prior to 4 years if the FDA removes authorization of a device, the breakthrough device is removed from the MCIT pathway.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### 45 CFR Part 1

**[HHS–OS–2021–0001]**

**RIN 0991–AC18**

## Department of Health and Human Services Transparency and Fairness in Civil Administrative Enforcement Actions

**AGENCY:** Office of the Secretary, Department of Health and Human Services.

**ACTION:** Final rule.

**SUMMARY:** The Department of Health and Human Services is issuing regulations promoting transparency and fairness in civil enforcement actions. These regulations will help to ensure that regulated parties receive fair notice of laws and regulations they are subject to, and have an opportunity to contest an agency determination prior to the agency taking an action that has a legal consequence.

**DATES:** Effective January 12, 2021.

**FOR FURTHER INFORMATION CONTACT:** Brenna Jenny, Department of Health and Human Services, 200 Independence Avenue SW, Room 713F, Washington, DC 20201. Email: *Good.Guidance@hhs.gov.* Telephone: (202) 690–7741.

### I. Statutory and Regulatory Background

The primary legal authority supporting this rulemaking is 5 U.S.C. 301. That provision provides that the ''head of an Executive department or military department may prescribe regulations for the government of his department, the conduct of its employees, the distribution and performance of its business, and the custody, use, and preservation of its records, papers, and property.'' This statute authorizes an ''agency to regulate its own affairs,'' and issue rules, such as this one, that are ''rules of agency organization[,] procedure or practice.'' *Chrysler Corp.* v. *Brown,* 441 U.S. 281, 309–10 (1979). Similarly, 42 U.S.C. 1302 provides that the Secretary ''shall make and publish such rules and regulations, not inconsistent with this chapter, as may be necessary to the efficient administration of the functions with which [he] is charged'' under Chapter 7 of the Social Security Act. Chapter 7 contains, among other things, statutory provisions governing Medicare, Medicaid, and the Health Insurance Portability and Accountability Act (HIPAA).

The Administrative Procedure Act (''APA''), 5 U.S.C. 551 *et seq.,* specifies the process by which such regulations are promulgated. Department heads generally must prescribe regulations through notice-and-comment rulemaking, but there is an exception for ''rules of agency organization, procedure, or practice.'' The requirements for notice and comment prior to finalization also do not apply to regulations that involve ''a matter relating to agency management or personnel.'' 5 U.S.C. 553(a)(2).

Because this final rule only specifies procedures that agency personnel must follow or that will govern civil enforcement actions, it is exempt from the requirement for notice and comment prior to finalization. In determining whether notice-and-comment rulemaking is required, the ''critical feature is that [the rule] covers agency actions that do not themselves alter the rights or interests of the parties, although it may alter the manner in which the parties present themselves or their viewpoints to the agency.'' *Nat'l Sec. Counselors* v. *CIA,* 931 F. Supp. 2d 77, 106–07 (D.D.C. 2013) (quoting *Batterton* v. *Marshall,* 648 F.2d 694, 707 (D.C. Cir. 1980)). This rule is exempt from notice and comment because it does not ''put[ ] a stamp of approval or disapproval on a given type of behavior.'' *Am. Hosp. Assoc.* v. *Bowen,* 834 F.2d 1037, 1047 (D.C. Cir. 1987). What had been a regulatory violation prior to finalization of this rule still is; the Department of Health and Human Services (''HHS'' or ''the Department'') is only modifying the procedures governing civil enforcement actions and the Department's civil enforcement action practices. To be sure, these procedural modifications, like most rules of agency procedure or personnel, might have some impact on the public. But agency rules that impose ''derivative,'' ''incidental,'' or ''mechanical'' burdens upon regulated individuals are considered procedural, rather than substantive, and are therefore exempt from the notice-and-comment requirement. *Id.* at 1051. Moreover, to the extent this rule has effects on the public, it only provides additional protections to the public, rather than depriving the public of any rights or interests it previously had.

The APA requires that ''administrative policies affecting individual rights and obligations be promulgated pursuant to certain stated procedures so as to avoid the inherently arbitrary nature of unpublished *ad hoc* determinations.'' *Morton* v. *Ruiz,* 415 U.S. 199, 232 (1974). The Freedom of Information Act amended the APA to advance this goal, and generally requires that agencies publish in the **Federal Register** their substantive rules of general applicability, statements of general policy, and interpretations of law that are generally applicable. 5 U.S.C. 552(a)(1)(D). Unless a party has actual and timely notice of the terms of a rule or policy, the Freedom of Information Act generally provides that a party may not be adversely affected by a rule or policy required to be published in the **Federal Register** that is not so published. 5 U.S.C. 552(a)(1)(flush language). This rule of agency procedure ensures that HHS actions comport with these requirements.

### II. Summary of Transparency and Fairness Regulations

To provide regulated parties with greater transparency and fairness in administrative actions, and consistent with the requirements of Executive Order 13892 of October 9, 2019, ''Promoting the Rule of Law Through Transparency and Fairness in Civil Administrative Enforcement and Adjudication,'' 84 FR 55239 (Oct. 15, 2019), HHS is setting forth policies that promote transparency and fairness in civil enforcement actions that will apply to all divisions of HHS. The requirements in this rule amend 45 CFR part 1.

This rule is one component of the Department's broader regulatory reform initiative. The rule is designed to ensure accountability, fairness of how the Department uses guidance, proper use of guidance documents, and opportunities for third parties to be heard, and to safeguard the important principles underlying the United States administrative law system.

*A. Scope (45 CFR 1.1)*

The requirements established pursuant to this rule in §§ 1.2(b) and 1.6 through 1.9 apply to civil enforcement actions by any component of the Department. Sections 1.3 through 1.5 (as well as the definitions in § 1.2 that were added through the Good Guidance Practices final rule at 85 FR 78770 (Dec. 7, 2020), and that we will recodify in this rule at § 1.2(a)) will continue to apply to all guidance documents until FDA amends its good guidance practices regulation to be consistent with the HHS Good Guidance Practices rule, at which point §§ 1.2(a) and 1.3 through 1.5 shall apply to all divisions of HHS except FDA.

Nothing in this rule shall apply:

• To any action that pertains to foreign or military affairs, or to a national security or homeland security function of the United States (other than procurement actions and actions involving the import or export of nondefense articles and services);

• To any action related to a criminal investigation or prosecution, including undercover operations, or any civil enforcement action or related investigation by the Department of Justice, including any action related to a civil investigative demand under 18 U.S.C. 1968;

• To any action related to detention, seizure, or destruction of counterfeit goods, pirated goods, or other goods that infringe intellectual property rights;

• To any investigation of misconduct by an agency employee or any disciplinary, corrective, or employment action taken against an agency employee; or

• In any other circumstance or proceeding to which application of this order, or any part of this order, would, in the judgment of the Secretary of HHS, undermine the national security.

*B. Definitions (45 CFR 1.2)*

The definitions section at 45 CFR 1.2 is amended to include the following definitions at paragraph (b).

Civil Enforcement Action

HHS defines ''civil enforcement action'' to mean an action with legal consequence taken by the Department based on an alleged violation of the law. Such actions include administrative enforcement proceedings and enforcement adjudication (which is the administrative process undertaken by any component of the Department to resolve the legal rights and obligations of specific parties with regard to a particular enforcement issue pending before it) but do not include actions taken in the normal course of the Department's regulatory communications or decision-making, for example, decisions on product applications (such as approvals or denials/withdrawals of approval), claims authorizations, responses to citizen petitions, food or color additive petitions, or public health notifications.

Legal Consequence

HHS defines ''legal consequence'' as the result of an action that directly or indirectly affects substantive legal rights or obligations including by subjecting a regulated party to potential liability in an enforcement action. The meaning of this term is informed by the Supreme Court's discussion in *U.S. Army Corps of Engineers* v. *Hawkes Co.,* 136 S. Ct. 1807, 1813–16 (2016), and includes, for example, agency letters or orders establishing or increasing the probability of liability for regulated parties in a subsequent enforcement action, *Ipsen Biopharmaceuticals, Inc.* v. *Azar,* 943 F.3d 953, 956 (D.C. Cir. 2019); *Rhea Lana, Inc.* v. *Dep't of Labor,* 824 F.3d 1023, 1030 (D.C. Cir. 2016). It does not include a warning letter or other communication, such as one describing inspectional observations, that pursuant to agency policy is intended to provide notice to a regulated party and elicit voluntary compliance. Such warning letters and inspectional observations have no immediate regulatory implications for the entity, are an interim step in the agency's compliance communications with an entity, and are not final agency action that has legal consequences for a party. *See Orton Motor, Inc.* v. *HHS,* 884 F.3d 1205, 1215 (D.C. Cir. 2018); *Holistic Candlers & Consumers Ass'n* v. *FDA,* 664 F.3d 940 (D.C. Cir. 2012); *see also Hi-Tech Pharm., Inc.* v. *Hahn,* Civ. No. 19–1268(RBW), 2020 WL 3498588, *5 (D.D.C. June 29, 2020); *Lystn, LLC* v. *FDA,* No. 19–cv–1943–PAB–KLM, 2020 WL 248962, *5 (D. Colo. Jan. 16, 2020); *Cody Labs., Inc.* v. *Sebelius,* No. 10–CV–00147–ABJ, 2010 WL 3119279, *11 (D. Wyo. July 26, 2010), *aff'd,* 446 F. App'x 964, 969 (10th Cir. 2011); *Gomperts* v. *Azar,* No. 1:19–cv–00345–DCN, 2020 WL 3963864, *4–5 (D. Idaho July 13, 2020).

Unfair Surprise

HHS defines ''unfair surprise'' to mean a lack of reasonable certainty or fair warning, from the perspective of a reasonably prudent member of regulated industry, of what a legal standard administered by an agency requires, or the initiation of litigation by HHS following ''a very lengthy period of conspicuous inaction,'' in other words deliberate inaction, suggesting the agency previously had a different interpretation. *Christopher* v. *SmithKline Beecham Corp.,* 567 U.S. 142, 156 (2012). However, an agency does not create unfair surprise when it proceeds with a new interpretation that it established in notice-and-comment rulemaking. *See Martin* v. *Occupational Safety & Health Review Comm'n,* 499 U.S. 144, 158 (1991) (identifying ''adequacy of notice to regulated parties'' as one factor relevant to the reasonableness of the agency's interpretation).

The definitions currently at 45 CFR 1.2 will be moved into a new paragraph (a). All definitions at paragraph (a) apply to all components of HHS until FDA amends its good guidance practices regulation, at which point the definitions at 45 CFR 1.2(a) shall apply to all divisions of HHS except FDA. The definitions at § 1.2(b) will apply to all components of the Department, including FDA.

*C. Proper Department Reliance on Guidance Documents (45 CFR 1.6)*

This rule reiterates the application of certain existing legal principles to HHS's use of guidance documents: When the Department takes a civil enforcement action or otherwise makes a determination based on an alleged violation of law that has legal consequence for a person or state, it must allege or establish the violation of law by applying statutes or regulations. HHS may not use guidance documents to impose binding requirements or prohibitions on persons outside of the executive branch except as authorized by law or expressly incorporated into a contract. Noncompliance with a standard or practice that is not in a statute or regulation and announced solely in a guidance document may not be treated as itself a violation of applicable statutes or regulations, unless expressly authorized by statute.

This rule also explains the appropriate circumstances when the Department may use a guidance document in civil enforcement actions. The Department may use a guidance document to explain the legal applicability of a statute or regulation with regard to prohibition of conduct, but when it does so, HHS may only use the guidance document to articulate the Department's understanding of how a statute or regulation applies to particular circumstances. Except when referring to a guidance document for historical facts, the Department may reference a guidance document in a civil enforcement action only if it has notified the public of such document to convey that understanding in advance. The Department must notify the public in advance of a guidance document through publication in the Department's guidance repository (as described in § 1.4 and available at *hhs.gov/guidance*).

*D. Fairness and Notice in Civil Enforcement Actions and Administrative Inspections (45 CFR 1.7)*

This rule would require the Department to only apply standards or practices that have been publicly stated in a manner that would not cause unfair surprise when HHS takes a civil enforcement action or otherwise makes a determination based on an alleged violation of law that has legal consequence for a person or state, unless a statutory exception applies. *See, e.g.,* 42 U.S.C. 1395hh(e). For purposes of this regulation, the Department would consider standards or practices to be publicly stated if available in paper publications or on the internet.

HHS avoids unfair surprise not only when it imposes penalties but also whenever it adjudges past conduct to have violated the law. For example, the Department generally cannot retroactively impose liability on a party for conduct that violates a new agency interpretation. *But see* 42 U.S.C. 1395hh(e). The Department also may not alter its interpretation during an adjudicative proceeding if doing so would impose new liability on parties who have acted in good faith on the prior interpretation. *SmithKline Beecham,* 567 U.S. at 156 & n.15.

Section 7 of Executive Order 13892 requires that each agency that conducts civil administrative inspections must publish a rule of agency procedure governing such inspections, if such a rule does not already exist. The Department is adding a requirement at 45 CFR 1.7 that HHS shall only conduct civil administrative inspections according to published rules of agency procedure. While the Administrative Procedure Act exempts these subsequently issued rules of agency procedure themselves from notice-and-comment rulemaking, *see* 5 U.S.C. 553(b)(3)(A), each agency must make the rules governing its civil administrative inspections, including audits, publicly available and readily accessible, such as by posting them on a website.

*E. Fairness and Notice in Jurisdictional Determinations (45 CFR 1.8)*

The requirement for fairness and notice also extends to jurisdictional determinations. If the Department relies on a decision previously issued by an agency within the Department in an agency adjudication (*i.e.,* proceedings before and decided by the agency), administrative order, or agency document to assert a new or expanded claim of jurisdiction (*e.g.,* a claim to regulate a new subject matter or a new basis for liability, or a relinquishment of a claim of jurisdiction), the Department must give fair notice by publishing the initial decision in the **Federal Register** or the Department's guidance repository. *See* 45 CFR 1.4. The Department should not rely on the new claim of jurisdiction to take a civil enforcement action regarding conduct that occurred before such publication. A claim of jurisdiction is not ''new or expanded'' simply because it involves a new or novel set of facts so long as it is based on an established principle of general applicability.

If the Department intends to rely on a document arising out of litigation (other than a publicly published opinion of an adjudicator) such as a brief, a consent decree, or a settlement agreement, to establish jurisdiction in future civil enforcement actions involving persons who were not parties to the litigation, the Department must also publish that document in the **Federal Register** or on the Department's guidance repository. Alongside publication of the document, the Department must also provide an explanation of the document's jurisdictional implications. Publication of a document discussed in this paragraph may either be in full or by citation, if the document is publicly available.

HHS is also proposing that if the Department seeks judicial deference to its interpretation of a document arising out of litigation (other than a publicly published opinion of an adjudicator) in order to establish a new or expanded claim of jurisdiction, HHS must, before seeking judicial deference, publish the document or a notice of availability in the **Federal Register** or on the Department's guidance repository, along with an explanation of the document's jurisdictional implications.

*F. Opportunity To Contest Agency Determinations (45 CFR 1.9)*

Providing regulated parties with the opportunity to be heard, including through informal oral or written communications, prior to the Department taking any civil enforcement action that has legal consequence is critical to ensuring that the Department operates with transparency and fairness. This rule will require that, before any component of the Department takes any civil enforcement action with respect to a particular entity that has legal consequence for that entity—including by issuing to such a person a notice of noncompliance or other similar notice that has immediate regulatory consequence or the immediate effect of subjecting the person to potential liability—the Department must afford that person an opportunity to be heard, either orally or in writing, as deemed appropriate at the Department's election. The rule will require HHS to provide the person with its proposed legal and factual determinations and then give the person a reasonable amount of time to respond to those determinations. The specific timeframe shall be in the discretion of the agency but must be long enough to provide a meaningful opportunity to be heard. Certain circumstances may warrant a time period of 30 days, while other circumstances may warrant a shorter period, such as 15 days or fewer, particularly where existing agency procedures already offer a shorter period in which to respond. Unless the Department withdraws the action, the Department must then respond in writing to the regulated party and articulate the final basis for the Department's action. This written response may be issued contemporaneous to the Department taking the action with legal consequence. We anticipate that generally, existing HHS procedures will already satisfy these standards, and where they do, those existing procedures will continue in effect unchanged. This rulemaking is not intended to preempt existing rules of agency procedure that are already consistent with this rule. Furthermore, where the Department takes an action based on a predicate finding that was reached following notice, an opportunity to be heard, and a written response, for example, where the Department revokes Medicare enrollment based on a prior exclusion or felony conviction, these procedural requirements are considered to have already been satisfied.

These procedures regarding fair notice and an opportunity to respond would not apply where the agency, in its discretion, determines there is a serious threat to health, safety, or similar emergency, or where a statute specifically authorizes proceedings that are inconsistent with this section, including proceedings without a prior opportunity to be heard. Where such a threat arises and a statute does not specifically authorize proceedings without a prior opportunity to be heard, HHS would still provide an affected entity with an opportunity to be heard and a written response as soon as practicable. In this context, a serious threat means that, as reasonably determined by the Department, there is a non-negligible likelihood of the threat materializing.

We anticipate that the exception from § 1.9 for actions taken in the context of threats to health, safety, or similar emergencies will apply broadly to public health agencies acting in furtherance of their missions. Actions will be considered to fall into this exception regardless of whether there is a showing of actual, imminent risk or harm, either to persons or animals. The agency has sole discretion to determine when an action falls into this exception. An agency may invoke this exception regardless of whether agency action is taken reactively (*e.g.,* to address an unsafe item currently on the market) or proactively (*e.g.,* to enforce regulations needed to protect public health prior to actual exposure by the public to unsafe items). Actions that fall into this exception include, for example, enforcing age restrictions or other controls around access to certain regulated products, enforcing manufacturer recordkeeping or reporting requirements, enforcing premarket requirements where there is an absence of or insufficient data concerning the product, protecting beneficiary data privacy or a federal healthcare program beneficiary from harm, and taking action to remove unapproved, misbranded, or adulterated human or animal products from the market.

Because of this exception, the procedures in § 1.9 generally will not impact, for example, the administrative detention process for foods, drugs, devices, and tobacco products (21 U.S.C. 334(g), (h)), the detention, refusal, and where authorized, destruction of imported products regulated by FDA (21 U.S.C. 381), disqualification (21 CFR parts 56, 58, 312, 511, 812), administrative detention, recall requests, import alerts, or other public notifications about food, drug, device, or tobacco products, or other actions related to investigating adulterated or misbranded products.

These procedures would also not apply to settlement negotiations between agencies and regulated parties, to notices of a prospective legal action, where a statute specifically precludes review of agency action, or to litigation before courts. Examples of situations where statutes specifically authorize differently structured proceedings include, but are not limited to, the hospital cost report appeals process (42 U.S.C. 1395oo), the individual benefit claims appeals process (42 U.S.C. 1395ff), and the process for the review of disallowances of Medicaid expenditures by the Secretary (42 U.S.C. 1316(e)). In such circumstances, the process and substantive standards governing review of claims arising under a relevant statute or regulation remain governed by those more specific procedures. The procedures would also not apply to any action related to a criminal investigation or prosecution, including undercover operations that may be used in a criminal investigation or prosecution, or any civil enforcement action either related to an investigation by the Department of Justice, or referred to the Department of Justice.

## III. Rulemaking Analyses and Notices

### *A. Executive Orders 12866 and 13563*

Executive Order 12866, ''Regulatory Planning and Review,'' and Executive Order 13563, ''Improving Regulation and Regulatory Review,'' direct agencies to assess all costs and benefits of available regulatory alternatives and, if the regulation is necessary, to select regulatory approaches that maximize net benefits. The Department does not believe that this rulemaking is a significant regulatory action under these Executive Orders. This rule describes an update to the Department's current processes to ensure that it operates with transparency and fairness. The requirements in 45 CFR 1.6 through 1.9 relating to the proper use of guidance documents and fairness and notice in enforcement actions generally already exist in law. The requirements set forth in Section 6 of Executive Order 13892 and codified at 45 CFR 1.6 may exceed the requirements imposed by the Due Process clause of the Constitution and may impose a burden by delaying the time until HHS can take actions with legal consequence. However, this process will also offer important procedural safeguards and potentially reduce economic costs borne by regulated entities, which will have an opportunity to respond in writing before the Department takes an action that has (potentially costly) legal consequence.

The Department anticipates that the public, and, in particular, regulated parties, would benefit from greater efficiencies and more transparency in how the Department regulates, including facilitating smoother operations within HHS by clearly defining how guidance can be used.

### *B. Executive Order 13771*

This final rule is neither a regulatory nor a deregulatory action under Executive Order 13771, ''Reducing Regulation and Controlling Regulatory Costs,'' 82 FR 9339 (Feb. 3, 2017), because this rule is estimated to impose no more than de minimis costs on regulated entities.

### *C. Regulatory Flexibility Act*

The Department has examined the economic implications of this rule as required by the Regulatory Flexibility Act (RFA), 5 U.S.C. 601 *et seq.* The RFA requires an agency to describe the impact of a rulemaking on small entities by providing an initial regulatory flexibility analysis, unless the agency expects that the rule will not have a significant impact on a substantial number of small entities, provides a factual basis for this determination, and proposes to certify the statement. 5 U.S.C. 603(a), 605(b). The Department considers a proposed or final rule to have a significant impact on a substantial number of small entities if it has at least a three percent impact on revenue on at least five percent of small entities. The Department anticipates that this rule will allow small entities to operate more efficiently, by increasing the transparency of government regulation. As a result, the Department has determined, and the Secretary certifies, that this final rule would not have a significant impact on the operations of a substantial number of small entities.

### *D. Executive Order 13132 (Federalism)*

Executive Order 13132, ''Federalism,'' establishes certain requirements that an agency must meet when it promulgates a rule that imposes substantial direct requirement costs on State and local governments or has Federalism implications. The Department has determined that this final rule will not impose such costs or have any federalism implications.

### *E. Paperwork Reduction Act of 1995*

In accordance with the Paperwork Reduction Act of 1995 and its implementing regulations, 44 U.S.C. 3501–3521; 5 CFR part 1320, the

Department has reviewed this rule and has determined that it imposes no new collections of information.

**List of Subjects in 45 CFR Part 1**

Guidance, Government employess.

For the reasons set forth in the preamble, the Department of Health and Human Services amends 45 CFR Part I as set forth below:

## PART 1—TRANSPARENCY AND FAIRNESS IN CIVIL ADMINISTRATIVE ENFORCEMENT AND ADJUDICATION

■ 1. The authority citation for part 1 continues to read as follows:

**Authority:** 42 U.S.C. 1302, 5 U.S.C. 301, 551 *et seq.*

■ 2. Section 1.1 is revised to read as follows:

### § 1.1 Scope.

Sections 1.2(a) and 1.3 through 1.5 of this part shall apply to guidance documents issued by all components of the Department, until the Secretary amends the Food and Drug Administration's good guidance regulations at 21 CFR 10.115 to bring them into conformance with the requirements of this part, at which point, such amended regulations shall apply to the Food and Drug Administration, and §§ 1.2(a) and 1.3 through 1.5 shall apply to all divisions of the Department except the Food and Drug Administration. Sections 1.2(b) and 1.6 through 1.9 of this part shall apply to all components of the Department.

■ 3. Section 1.2 is amended by designating the existing text as paragraph (a) followed by the alphabetical ordered definitions, revising newly designated paragraph (a) introductory text, and adding paragraph (b).

The revision and addition read as follows:

### § 1.2 Definitions.

(a) The following definitions apply to all components of the Department until the Secretary amends the Food and Drug Administration's good guidance regulations at 21 CFR 10.115 to bring them into conformance with the requirements of §§ 1.3 through 1.5 of this part:

* * * * *

(b) The following definitions apply to all components of the Department:

*Civil enforcement action* means an action with legal consequence taken by the Department based on an alleged violation of the law. Such actions include administrative enforcement proceedings and enforcement adjudication (which is the administrative process undertaken by any component of the Department to resolve the legal rights and obligations of specific parties with regard to a particular enforcement issue pending before it) but do not include actions taken in the normal course of the Department's regulatory communications or decision-making, for example, decisions on product applications (such as approvals, denials, or withdrawals of approval), claims authorizations, citizen petitions, food or color additive petitions, or public health notifications.

*Legal consequence* means the result of an action that directly or indirectly affects substantive legal rights or obligations, including by subjecting a regulated party to potential liability in an enforcement action. This includes agency letters or orders establishing greater liability for regulated parties in a subsequent enforcement action, but excludes communications that have no immediate regulatory implications for a person or entity, such as letters (*e.g.,* warning letters) or inspectional observations that serve as an interim step in the agency's compliance communications with a person or entity or that are intended to encourage voluntary compliance.

*Unfair surprise* means a lack of reasonable certainty or fair warning, from the perspective of a reasonably prudent member of regulated industry, of what a legal standard administered by an agency requires.

■ 4. Section 1.6 is added to read as follows:

### § 1.6 Proper Department reliance on guidance documents.

(a) *Overview.* A civil enforcement action must have an appropriate legal basis. When the Department takes a civil enforcement action or makes a determination based on an alleged violation of law that has legal consequence for a person or state, it must allege or establish the violation of law by applying statutes or regulations.

(b) *Limitations on the use of guidance documents.* (1) The Department may not use guidance documents to impose binding requirements or prohibitions on persons outside the executive branch except as expressly authorized by law or as expressly incorporated into a contract.

(2) The Department may not treat noncompliance with a standard or practice announced solely in a guidance document as itself a violation of applicable statutes or regulations except as expressly authorized by law.

(3) If the Department uses a guidance document to explain the legal applicability of a statute or regulation, that document can do no more, with respect to prohibition of conduct, than articulate the Department's understanding of how a statute or regulation applies to particular circumstances.

(4) The Department may cite to a guidance document in a civil enforcement action only if it has notified the public of such document in advance through publication, in the Department's guidance repository, as described in § 1.4.

■ 5. Section 1.7 is added to read as follows:

### § 1.7 Fairness and notice in civil enforcement actions and administrative inspections.

(a) When the Department takes a civil enforcement action, the Department may only apply standards or practices that have been publicly stated in a manner that would not cause unfair surprise.

(b) The Department must avoid unfair surprise when it imposes penalties and whenever it adjudges past conduct to have violated the law.

(c) The Department shall only conduct civil administrative inspections according to published rules of agency procedure.

■ 6. Section 1.8 is added to read as follows:

### § 1.8 Fairness and notice in jurisdictional determinations.

(a) If the Department relies on a decision in an agency adjudication, administrative order, or agency document to assert a new or expanded claim of jurisdiction (*e.g.,* a claim to regulate a new subject matter or a new basis for liability, or a relinquishment of a claim of jurisdiction), the Department must give fair notice by publishing the initial decision before the conduct over which jurisdiction is sought occurs. It must publish the initial decision in full or by citation, if publicly available, in the **Federal Register** or the Department's guidance repository described in § 1.4. A claim of jurisdiction is not ''new or expanded'' simply because it involves a new or novel set of facts so long as it is based on an established principle of general applicability.

(b) If the Department intends to rely on a document arising out of litigation (other than a publicly published opinion of an adjudicator), such as a brief, a consent decree, or a settlement agreement, to establish jurisdiction in future civil enforcement actions involving persons who were not parties to the litigation, the Department must—

(1) Publish that document, either in full or by citation if publicly available, in the **Federal Register** or on the Department's guidance repository described in § 1.4, and

(2) Publish an explanation of the document's jurisdictional implications.

(c) Before seeking judicial deference to the Department's interpretation of a document arising out of litigation (other than a publicly published opinion of an adjudicator) in order to establish a new or expanded claim of jurisdiction in a different case, the Department must—

(1) Publish the document or a notice of availability in the **Federal Register** or on the Department's guidance repository described in § 1.4, and

(2) Publish an explanation of the document's jurisdictional implications.

■ 7. Section 1.9 is added to read as follows:

**§ 1.9 Opportunity to contest agency determination.**

(a) *Departmental overview.* Except as provided in paragraph (c) of this section, prior to the Department taking any civil enforcement action with respect to a particular entity that has legal consequence for that entity, including by issuing to such a person a notice of noncompliance, or other similar notice that has immediate regulatory consequence, but excluding communications that have no immediate regulatory implications for the entity, such as those that serve as an interim step in the agency's compliance communications with the entity or that are intended to encourage voluntary compliance, the Department shall provide—

(1) Written notice to the affected entity of the initial legal and factual determinations underpinning the initial adverse determination;

(2) An opportunity for the affected entity to respond in writing and, if determined appropriate by the Department, orally; and

(3) A written response from the Department to the affected entity after receiving a timely request from the affected entity under paragraph (a)(2) of this section.

(b) *Timing and content of written responses.* (1) The Department will select a meaningful amount of time in which the affected entity must submit a written response to the Department. This writing must be submitted within the time period specified by the Department, unless the Department concludes an extension is warranted, and state the reasons for the entity's disagreement with the Department's proposed action for purposes of requiring a response in accordance with paragraph (a)(3) of this section.

(2) The Department's written response must respond to the affected entity and articulate the basis for its final decision. This written response may be issued contemporaneous to the Department taking the action with legal consequence.

(c) *Exceptions.* The procedures in paragraphs (a) and (b) of this section do not apply where the Department, in its discretion, determines there is a serious threat to health, safety, or similar emergency, or where a statute specifically authorizes proceeding without a prior opportunity to be heard. In such event, HHS would still provide an affected entity with an opportunity to be heard and a written response as soon as practicable. The procedures in paragraphs (a) and (b) do not apply to settlement negotiations between agencies and regulated parties, to notices of a prospective legal action, to litigation before courts, or any action related to a criminal investigation or prosecution, including undercover operations that may be used in a criminal investigation or prosecution, or any civil enforcement action either related to an investigation by the Department of Justice, or referred to the Department of Justice.

Dated: January 7, 2021.

**Alex M. Azar II,**

*Secretary, Department of Health and Human Services.*

## FEDERAL COMMUNICATIONS COMMISSION

## 47 CFR Part 73

**[MB Docket No. 20–340; RM–11865; DA 20–1425; FRS 17287]**

## Television Broadcasting Services; Minneapolis, Minnesota.

**AGENCY:** Federal Communications Commission.

**ACTION:** Final rule.

**SUMMARY:** The Media Bureau, Video Division (Bureau) has before it a Notice of Proposed Rulemaking issued in response to a petition for rulemaking filed by Multimedia Holdings Corporation (Multimedia), licensee of KARE, channel 11, Minneapolis, Minnesota, requesting the substitution of channel 31 for channel 11 at Minneapolis in the DTV Table of Allotments. The Bureau had instituted a freeze on the acceptance of rulemaking petitions by full power television stations requesting channel substitutions in May 2011 and waived the freeze to consider Multimedia's proposal to substitute channel 31 at Minneapolis. TEGNA, Inc., filed comments in support of the petition reaffirming its commitment to applying for channel 31. The Bureau believes the public interest would be served by the substitution and will permit the station to better serve its viewers, who have experienced reception problems with VHF channel 11.

**DATES:** Effective January 14, 2021.

**FOR FURTHER INFORMATION CONTACT:** Joyce Bernstein, Media Bureau, at *Joyce.Bernstein@fcc.gov.*

**SUPPLEMENTARY INFORMATION:** This is a synopsis of the Commission's *Report and Order,* MB Docket No. 20–340; RM–11865; DA 20–1425, adopted December 2, 2020, and released December 2, 2020. The full text of this document is available for download at *https://www.fcc.gov/edocs.* To request materials in accessible formats for people with disabilities (braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at 202–418–0530 (voice), 202–418–0432 (tty).

This document does not contain information collection requirements subject to the Paperwork Reduction Act of 1995, Public Law 104–13. In addition, therefore, it does not contain any proposed information collection burden "for small business concerns with fewer than 25 employees," pursuant to the Small Business Paperwork Relief Act of 2002, Public Law 107–198, *see* 44 U.S.C. 3506(c)(4). Provisions of the Regulatory Flexibility Act of 1980, 5 U.S.C. 601–612, do not apply to this proceeding.

The Commission will send a copy of this *Report and Order* in a report to be sent to Congress and the Government Accountability Office pursuant to the Congressional review Act, *see* 5 U.S.C. 801(a)(1)(A).

### List of Subjects in 47 CFR Part 73

Television.

Federal Communications Commission.

**Thomas Horan,**

*Chief of Staff, Media Bureau.*

### Final Rule

For the reasons discussed in the preamble, the Federal Communications Commission amends 47 CFR part 73 as follows:

## PART 73—Radio Broadcast Service

■ 1. The authority citation for part 73 continues to read as follows:

**Authority:** 47 U.S.C. 154, 303, 334, 336, and 339.

### § 73.622 [Amended]

■ 2. In § 73.622(i), amend the Post-Transition Table of DTV Allotments, under Minnesota, by removing channel 11 and adding channel 31 at Minneapolis.

[FR Doc. 2020–27277 Filed 1–13–21; 8:45 am]

**BILLING CODE 6712–01–P**

## DEPARTMENT OF TRANSPORTATION

## National Highway Traffic Safety Administration

## 49 CFR Part 578

**[Docket No. NHTSA–2021–0001]**

**RIN 2127–AM32**

## Civil Penalties

**AGENCY:** National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

**ACTION:** Interim final rule; request for comments; response to petition for rulemaking.

**SUMMARY:** On October 2, 2020, NHTSA received a petition for rulemaking from the Alliance for Automotive Innovation regarding when to apply an increase to the civil penalty rate applicable to automobile manufacturers that fail to meet applicable corporate average fuel economy (CAFE) standards and are unable to offset such a deficit with compliance credits. After carefully considering the issues raised, NHTSA has granted the petition and promulgates an interim final rule providing that the increase will go into effect beginning in model year 2022 in accordance with NHTSA's December 2016 rule on the same issue, except if the August 31, 2020 decision of the United States Court of Appeals for the Second Circuit in Case No. 19–2395 is vacated. This interim final rule amends the relevant regulatory text accordingly and requests comment. This document also responds to a petition for reconsideration of NHTSA's July 2019 rule from the Institute for Policy Integrity at New York University School of Law.

**DATES:**

*Effective date:* This rule is effective January 14, 2021

*Comments:* Comments must be received by January 25, 2021.

**ADDRESSES:** You may submit comments to the docket number identified in the heading of this document by any of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Mail:* Docket Management Facility, M–30, U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590.
- *Hand Delivery or Courier:* U.S. Department of Transportation, West Building, Ground Floor, Room W12–140, 1200 New Jersey Avenue SE, Washington, DC, between 9 a.m. and 5 p.m. Eastern time, Monday through Friday, except Federal holidays.
- *Fax:* 202–493–2251
- *Instructions:* NHTSA has established a docket for this action. Direct your comments to Docket ID No. NHTSA–2021–0001. See the **SUPPLEMENTARY INFORMATION** section on ''Public Participation'' for more information about submitting written comments.
- *Docket:* All documents in the docket are listed on the *www.regulations.gov* website. Although listed in the index, some information is not publicly available, *e.g.,* confidential business information or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy form. Publicly available docket materials are available either electronically through *www.regulations.gov* or in hard copy at the following location: Docket Management Facility, M–30, U.S. Department of Transportation, West Building, Ground Floor, Rm. W12–140, 1200 New Jersey Avenue SE, Washington, DC 20590. The telephone number for the docket management facility is (202) 366–9324. The docket management facility is open between 9 a.m. and 5 p.m. Eastern Time, Monday through Friday, except Federal holidays.

**FOR FURTHER INFORMATION CONTACT:** Michael Kuppersmith, Office of Chief Counsel, NHTSA, email *michael.kuppersmith@dot.gov,* telephone (202) 366–2992, facsimile (202) 366–3820, 1200 New Jersey Ave. SE, Washington, DC 20590.

### A. Public Participation

NHTSA requests comment on this interim final rule. This section describes how you can participate in this process.

(1) How do I prepare and submit comments?

Your comments must be written and in English. To ensure that your comments are correctly filed in the Docket, please include the Docket number NHTSA–2021–0001 in your comments. Your comments must not be more than 15 pages long.[1] NHTSA established this limit to encourage you to write your primary comments in a concise fashion. However, you may attach necessary additional documents to your comments, and there is no limit on the length of the attachments. If you are submitting comments electronically as a PDF (Adobe) file, we ask that the documents submitted be scanned using the Optical Character Recognition (OCR) process, thus allowing the Agency to search and copy certain portions of your submissions.[2] Please note that pursuant to the Data Quality Act, in order for the substantive data to be relied upon and used by the Agency, it must meet the information quality standards set forth in the OMB and Department of Transportation (DOT) Data Quality Act guidelines. Accordingly, we encourage you to consult the guidelines in preparing your comments. OMB's guidelines may be accessed at *http://www.whitehouse.gov/omb/fedreg/reproducible.html.* DOT's guidelines may be accessed at *http://www.dot.gov/dataquality.htm.*

(2) Tips for Preparing Your Comments

[1] *See* 49 CFR 553.21

[2] Optical character recognition (OCR) is the process of converting an image of text, such as a scanned paper document or electronic fax file, into computer-editable text.

When submitting comments, please remember to:

- Identify the rulemaking by docket number and other identifying information (subject heading, **Federal Register** date and page number).
- Explain why you agree or disagree, suggest alternatives, and substitute language for your requested changes.
- Describe any assumptions and provide any technical information and/or data that you used.
- If you estimate potential costs or burdens, explain how you arrived at your estimate in sufficient detail to allow for it to be reproduced.
- Provide specific examples to illustrate your concerns, and suggest alternatives.
- Explain your views as clearly as possible, avoiding the use of profanity or personal threats.
- Make sure to submit your comments by the comment period deadline identified in the **DATES** section above.

(3) How can I be sure that my comments were received?

If you submit your comments by mail and wish Docket Management to notify you upon its receipt of your comments, enclose a self-addressed, stamped postcard in the envelope containing your comments. Upon receiving your comments, Docket Management will return the postcard by mail.

(4) How do I submit confidential business information?

If you wish to submit any information under a claim of confidentiality, you should submit your complete submission, including the information you claim to be confidential business information (CBI), to the NHTSA Chief Counsel. When you send a comment containing CBI, you should include a cover letter setting forth the information specified in our CBI regulation.[3] In addition, you should submit a copy from which you have deleted the claimed CBI to the Docket by one of the methods set forth above.

To facilitate social distancing due to COVID–19, NHTSA is treating electronic submission as an acceptable method for submitting CBI to the Agency under 49 CFR part 512. Any CBI submissions sent via email should be sent to an attorney in the Office of Chief Counsel at the address given above under **FOR FURTHER INFORMATION CONTACT**. Likewise, for CBI submissions via a secure file transfer application, an attorney in the Office of Chief Counsel must be set to receive a notification when files are submitted and have access to retrieve the submitted files. At this time, regulated entities should not send a duplicate hardcopy of their electronic CBI submissions to DOT headquarters.

Please note that these modified submission procedures are only to facilitate continued operations while maintaining appropriate social distancing due to COVID–19. Regular procedures for part 512 submissions will resume upon further notice, when NHTSA and regulated entities discontinue operating primarily in telework status.

If you have any questions about CBI or the procedures for claiming CBI, please consult the person identified in the **FOR FURTHER INFORMATION CONTACT** section.

(5) How can I read the comments submitted by other people?

You may read the materials placed in the docket for this document (*e.g.,* the comments submitted in response to this document by other interested persons) at any time by going to *http://www.regulations.gov.* Follow the online instructions for accessing the dockets. You may also read the materials at the NHTSA Docket Management Facility by going to the street addresses given above under **ADDRESSES**.

## B. Statutory and Regulatory Background

NHTSA sets[4] and enforces[5] corporate average fuel economy (CAFE) standards for the United States light-duty automobile fleet, and in doing so, assesses civil penalties against manufacturers that fall short of their compliance obligations and are unable to make up the shortfall with credits obtained for exceeding the standards.[6] The civil penalty amount for CAFE non-compliance was originally set by statute in 1975, and beginning in 1997, included a rate of $5.50 per each tenth of a mile per gallon (0.1) that a manufacturer's fleet average CAFE level falls short of its compliance obligation. This shortfall amount is then multiplied by the number of vehicles in that manufacturer's fleet.[7] The basic equation for calculating a manufacturer's civil penalty amount before accounting for credits, is as follows:

(penalty rate, in $ per 0.1 mpg per vehicle) × (amount of shortfall, in tenths of an mpg) × (# of vehicles in manufacturer's non-compliant fleet).

Starting with model year 2011, the CAFE program was amended by the Energy Independence and Security Act of 2007 (EISA) to provide for credit transfers among a manufacturer's various fleets.[8] Starting with that model year, the law also provided for trading between vehicle manufacturers, which has allowed vehicle manufacturers the opportunity to acquire credits from competitors rather than paying civil penalties for non-compliance. Credit purchases involve significant expenditures, and NHTSA believes that an increase in the penalty rate would correlate with an increase in such expenditures.

## C. Civil Penalties Inflation Adjustment Act Improvements Act of 2015

On November 2, 2015, the Federal Civil Penalties Inflation Adjustment Act Improvements Act (Inflation Adjustment Act or 2015 Act), Public Law 114–74, Section 701, was signed into law. The 2015 Act required Federal agencies to make an initial ''catch-up'' adjustment to the ''civil monetary penalties,'' as defined, they administer through an interim final rule and then to make subsequent annual adjustments for inflation. The amount of increase for any ''catch-up'' adjustment to a civil monetary penalty pursuant to the 2015 Act was limited to 150 percent of the then-current penalty. Agencies were required to issue an interim final rule for the initial ''catch-up'' adjustment by July 1, 2016, without providing the opportunity for public comment ordinarily required under the Administrative Procedure Act.

The Director of the Office of Management and Budget (OMB) provided guidance to all Federal agencies in a February 24, 2016 memorandum.[9] For those penalties an agency determined to be ''civil monetary penalties,'' the memorandum provided guidance on how to calculate

[3] *See* 49 CFR part 512.

[4] 49 U.S.C. 32902. The authorities vested in the Secretary under chapter 329 of Title 49, U.S.C., have been delegated to NHTSA. 49 CFR 1.95(a).

[5] 49 U.S.C. 32911, 32912.

[6] Credits may be either *earned* (for over-compliance by a given manufacturer's fleet, in a given model year), *transferred* (from one fleet to another), or *purchased* (in which case, another manufacturer earned the credits by over-complying and chose to sell that surplus). 49 U.S.C. 32903.

[7] A manufacturer may have up to three fleets of vehicles, for CAFE compliance purposes, in any given model year—a domestic passenger car fleet, an imported passenger car fleet, and a light truck fleet. Each fleet belonging to each manufacturer has its own compliance obligation, with the potential for either over-compliance or under-compliance. There is no overarching CAFE requirement for a manufacturer's total production.

[8] Public Law 110–140, sec. 104.

[9] Memorandum from the Director of OMB to Heads of Executive Departments and Agencies, Implementation of the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Feb. 24, 2016), available online at *https://www.whitehouse.gov/sites/whitehouse.gov/files/omb/memoranda/2016/m-16-06.pdf.*

the initial adjustment required by the 2015 Act. The initial catch up adjustment is based on the change between the Consumer Price Index for all Urban Consumers (CPI–U) for the month of October in the year the penalty amount was established or last adjusted by Congress and the October 2015 CPI–U. The February 24, 2016 memorandum contains a table with a multiplier for the change in CPI–U from the year the penalty was established or last adjusted to 2015. To arrive at the adjusted penalty, an agency must multiply the penalty amount when it was established or last adjusted by Congress, excluding adjustments under the 1990 Inflation Adjustment Act, by the multiplier for the increase in CPI–U from the year the penalty was established or adjusted as provided in the February 24, 2016 memorandum. The 2015 Act limits the initial inflationary increase to 150 percent of the current penalty. To determine whether the increase in the adjusted penalty is less than 150 percent, an agency must multiply the current penalty by 250 percent. The adjusted penalty is the lesser of either the adjusted penalty based on the multiplier for CPI–U in Table A of the February 24, 2016 memorandum or an amount equal to 250 percent of the current penalty. Ensuing guidance from OMB identifies the appropriate inflation multiplier for agencies to use to calculate the subsequent annual adjustments.[10]

The 2015 Act also gives agencies discretion to adjust the amount of a civil monetary penalty by less than otherwise required for the initial catch-up adjustment if an agency determines that increasing the civil monetary penalty by the otherwise required amount will have either a negative economic impact or if the social costs of the increased civil monetary penalty will outweigh the benefits.[11] In either instance, the agency must publish a notice, take and consider comments on this finding, and receive concurrence on this determination from the Director of OMB prior to finalizing a lower civil penalty amount.

### D. NHTSA's Actions to Date Regarding CAFE Civil Penalties

#### *1. Interim Final Rule*

On July 5, 2016, NHTSA published an interim final rule, adopting inflation adjustments for civil penalties under its administration, following the procedure and the formula in the 2015 Act. NHTSA did not analyze at that time whether the 2015 Act applied to all of its civil penalties, instead applying the inflation multiplier to increase all amounts found in its penalty schemes as a rote matter. One of the adjustments NHTSA made at the time was raising the civil penalty rate for CAFE non-compliance from $5.50 to $14 starting with model year 2015.[12] NHTSA also indicated in that interim final rule that the maximum penalty rate that the Secretary is permitted to establish for such violations would increase from $10 to $25, but did not codify this change in the regulatory text. NHTSA also raised the maximum civil penalty for other violations of EPCA, as amended, to $40,000.[13]

#### *2. Initial Petition for Reconsideration and Response*

The then-Alliance of Automobile Manufacturers and the Association of Global Automakers (since combined to form the Alliance for Automotive Innovation) jointly petitioned NHTSA for reconsideration of the CAFE penalty provisions issued in the interim final rule.[14] This petition raised concerns with the significant impact that the increased penalty rate would have on CAFE compliance costs, which they estimated to be at least $1 billion annually. Specifically, this petition identified the issue of retroactivity (applying the penalty increase associated with model years that have already been completed or for which a company's compliance plan had already been ''set''); which ''base year'' (*i.e.,* the year the penalty was established or last adjusted) NHTSA should use for calculating the adjusted penalty rate; and whether an increase in the penalty rate to $14 would cause a ''negative economic impact.''

In response to the joint petition, NHTSA issued a final rule on December 28, 2016.[15] In that rule, NHTSA agreed that raising the penalty rate for model years already fully complete would be inappropriate, given how courts generally disfavor the retroactive application of statutes and that doing so could not deter non-compliance, incentivize compliance, or lead to any improvements in fuel economy. NHTSA also agreed that raising the rate for model years for which product changes were infeasible due to lack of lead time did not seem consistent with Congress' intent that the CAFE program be responsive to consumer demand. Accordingly, NHTSA stated that it would not apply the inflation-adjusted penalty rate of $14 until model year 2019, as the Agency believed that would be the first year in which product changes could reasonably be made in response to the higher penalty rate.

#### *3. NHTSA Reconsideration*

Beginning in January 2017, NHTSA took a series of actions to delay the effective date of the December 2016 final rule as it, for the first time, assessed whether the CAFE civil penalty rate was subject to the 2015 Act.[16] As a result of a subsequent decision of the United States Court of Appeals for the Second Circuit, however, that December 2016 final rule was considered to be in force.[17] That decision by the Second Circuit did not affect NHTSA's authority to reconsider the applicability of the 2015 Act to the EPCA CAFE civil penalty provision through notice-and-

[10] Memorandum from the Director of OMB to Heads of Executive Departments and Agencies, Implementation of the 2017 Annual Adjustment Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Dec. 16, 2016), available online at *https://www.whitehouse.gov/sites/whitehouse.gov/files/omb/memoranda/2017/m-17-11_0.pdf;* Memorandum from the Director of OMB to Heads of Executive Departments and Agencies, Implementation of Penalty Inflation Adjustments for 2018, Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Dec. 15, 2017), available online at *https://www.whitehouse.gov/wp-content/uploads/2017/11/M-18-03.pdf;* Memorandum from the Director of OMB to Heads of Executive Departments and Agencies, Implementation of Penalty Inflation Adjustments for 2019, Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Dec. 14, 2018), available online at *https://www.whitehouse.gov/wp-content/uploads/2017/11/m_19_04.pdf;* Memorandum from the Acting Director of OMB to Heads of Executive Departments and Agencies, Implementation of Penalty Inflation Adjustments for 2020, Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Dec. 16, 2019), available online at *https://www.whitehouse.gov/wp-content/uploads/2019/12/M-20-05.pdf;* Memorandum from the Director of OMB to Heads of Executive Departments and Agencies, Implementation of Penalty Inflation Adjustments for 2021, Pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (Dec. 23, 2020), available online at *https://www.whitehouse.gov/wp-content/uploads/2020/12/M-21-10.pdf.*

[11] Public Law 114–74, sec. 701(c).

[12] 81 FR 43524 (July 5, 2016). This interim final rule also updated the maximum civil penalty amounts for violations of all statutes and regulations administered by NHTSA and was not limited solely to penalties administered for CAFE violations.

[13] 81 FR 43524 (July 5, 2016).

[14] Jaguar Land Rover North America, LLC also filed a petition for reconsideration in response to the July 5, 2016, interim final rule raising the same concerns as those raised in the joint petition. Both petitions, along with a supplement to the joint petition, can be found in Docket ID NHTSA–2016–0075 at *www.regulations.gov.*

[17] Order, ECF No. 196, *NRDC* v. *NHTSA,* Case No. 17–2780 (2d Cir., Apr. 24, 2018); Opinion, ECF No. 205, *NRDC* v. *NHTSA,* Case No. 17–2780, at 44 (2d Cir., June 29, 2018) (''The Civil Penalties Rule, 81 FR 95,489, 95,489–92 (December 28, 2016), no longer suspended, is now in force.'').

comment rulemaking. Absent any further action, the rate would have increased beginning with model year 2019.[18]

In July 2019, NHTSA finalized a rule determining that the 2015 Act did not apply to the CAFE civil penalty rate. In line with its statutory role and pursuant to its previous guidance to all Federal Agencies, OMB provided guidance to NHTSA agreeing with this statutory interpretation.[19] The July 2019 rule also stated that, in the alternative, even if the 2015 Act applied, increasing the CAFE civil penalty rate would have a negative economic impact. As discussed in the July 2019 rule, OMB concurred with this negative economic impact determination, as required by the 2015 Act.[20] In either case, NHTSA concluded that the current CAFE civil penalty rate of $5.50 should be retained, instead of increasing to $14 beginning with model year 2019.

On August 31, 2020, the United States Court of Appeals for the Second Circuit issued a ruling vacating the July 2019 rule and announcing that the December 2016 rule is back in force. The Second Circuit denied panel rehearing on November 2, 2020. NHTSA stands by the reasoning set forth in its July 2019 rule, but recognizes that the Second Circuit's decision is currently binding and remains in effect absent a Supreme Court decision to the contrary.

### E. IPI Petition for Reconsideration

On September 9, 2019, the Institute for Policy Integrity at New York University School of Law (IPI) submitted a petition for reconsideration of NHTSA's July 2019 final rule. IPI argued that the rule was unreasonable and not in the public interest for ignoring and improperly weighing the costs and benefits.[21] IPI also alleged that the OMB letters NHTSA relied on were not presented for public comment, contained factual misstatements, and contradicted NHTSA's reasoning. Lastly, IPI challenged NHTSA's statutory interpretations.

### F. The Alliance Petition for Rulemaking

On October 2, 2020, the Alliance for Automotive Innovation (the Alliance) submitted a petition for rulemaking (Alliance Petition) to delay the applicability of the increased $14 CAFE civil penalty rate until model year 2022 for largely the same reasons NHTSA relied on in the December 2016 rule.[22] According to the Alliance Petition, ''Model Years 2019 and 2020 are effectively lapsed now,'' and ''[m]anufacturers are unable to change MY 2021 plans at this point.'' [23] The Alliance argued that applying the increased penalty to any non-compliances that are temporally impossible to avoid or cannot practically be remedied does not serve the statutory purposes of deterring prohibited conduct or incentivizing favored conduct. Doing so would effectively be punishing violators retroactively.

In addition to relying on the reasoning of the December 2016 rule, the Alliance Petition notes the significant economic impact suffered by the industry due to COVID–19. Accordingly, the Alliance Petition also cites Executive Order 13924, requiring Federal Agencies to take appropriate action, consistent with applicable law, to combat the economic emergency caused by COVID–19.[24] Several individual vehicle manufacturers submitted supplemental information to NHTSA further articulating the negative economic position they are in due to COVID–19 and the potential and significant adverse economic consequences of the increased civil penalty rate, particularly during this time of stress on the industry.

### G. NHTSA Response to Petitions

NHTSA granted the Alliance Petition and commenced this rulemaking action. Having carefully considered the issues raised by the petitioner and other available information, NHTSA issues this interim final rule and requests comment. If the August 31, 2020 decision of the United States Court of Appeals for the Second Circuit in Case No. 19–2395 is vacated, NHTSA's July 2019 rule keeping the CAFE civil penalty rate at $5.50 will be reinstated. If that decision is not vacated, however, the CAFE civil penalty rate will increase to $14 beginning with model year 2022, pursuant to the 2015 Act. NHTSA will make any subsequent annual adjustments as necessary and appropriate.[25]

Prior to granting the petition, NHTSA had to determine whether it had authority to issue the requested rule as a threshold matter. NHTSA notes first that it has authority to administer the CAFE program.[26] It is common practice for agencies—including NHTSA—to exercise their authority to administer programs they oversee.[27] NHTSA also

[21] IPI Petition, at 1–2.

[22] The Alliance also submitted a supplement to its petition on October 22, 2020 (Alliance Supplement).

[23] Alliance Petition, at 4.

[24] ''Executive Order on Regulatory Relief to Support Economic Recovery,'' E.O. 13924 (May 19, 2020).

[25] None of the annual inflation adjustment multipliers since the initial catch-up adjustment has been high enough to require a subsequent adjustment of the CAFE civil penalty rate. That is, if the catch-up adjustment to $14 had applied beginning in 2016, the rate would still be $14 through at least 2021.

[26] *See Morton* v. *Ruiz,* 415 U.S. 199, 231 (1974) (''The power of an administrative agency to administer a congressionally created and funded program necessarily requires the formulation of policy and the making of rules to fill any gap left, implicitly or explicitly, by Congress.''); *see also Friends of Boundary Waters Wilderness* v. *Bosworth,* 437 F.3d 815, 823–24 (8th Cir. 2006) (''Agencies given the authority to promulgate a quota are presumed to have the authority to adjust that quota.''); *S. Agencies may even alter their own regulations *sua sponte,* in the absence of complaints, provided they have sufficient reason to do so and follow applicable procedures.''); *Ober* v. *Whitman,* 243 F.3d 1190, 1194–95 (9th Cir. 2001) (indicating that agencies have the inherent authority to exempt *de minimis* violations from regulation if not prohibited by statute); *Tate & Lyle, Inc.* v. *C.I.R.,* 87 F.3d 99, 104 (3d Cir. 1996) (''Inherent in the powers of an administrative agency is the authority to formulate policies and to promulgate rules to fill any gaps left, either implicitly or explicitly, by Congress.'') (citing *Chevron, U.S.A., Inc.* v. *Nat. Res. Def. Council, Inc.,* 467 U.S. 837, 843 (1984)); *Fla. Cellular Mobil Commc'ns Corp.* v. *F.C.C.,* 28 F.3d 191, 196 (D.C. Cir. 1994) (''If an agency is to function effectively, however, it must have some opportunity to amend its rules and regulations in light of its experience.''); *Rainbow Broad. Co.* v. *F.C.C.,* 949 F.2d 405, 409 (D.C. Cir. 1991) (''Agencies enjoy wide latitude when using rulemaking to change their own policies and the manner by which their policies are implemented.''); *Nat. Res. Def. Council, Inc.* v. *Sec. & Exch. Comm'n,* 606 F.2d 1031, 1056 (D.C. Cir. 1979) (''An agency is allowed to be master of its own house, lest effective agency decisionmaking not occur in [a]ny proceeding.'').

[27] 76 FR 22565, 22578 (Apr. 21, 2011) (''[A]n agency may reconsider its methodologies and application of its statutory requirements and may even completely reverse course, regardless of whether a court has determined that its original regulation is flawed, so long as the agency explains its bases for doing so.'') (citations omitted); 75 FR 6883, 6884 (Feb. 12, 2010) (''The Department [of Labor] has inherent authority to change its regulations in accordance with the Administrative Procedure Act (APA).''); 64 FR 60556, 60580 (Nov. 5, 1999) (NHTSA ''believe[s] that nothing in [the statute] derogates our inherent authority to make temporary adjustments in the requirements we adopt if, in our judgment, such adjustments are necessary or prudent to promote the smooth and effective achievement of the goals of the amendments.'').

has specific statutory authority to administer the program [28] and possesses the general authority—beyond its inherent authority—to do so efficiently and in the public interest.[29] NHTSA's obligation to administer the CAFE program consistent with law includes the statutory requirement to establish maximum feasible fuel economy standards through a balancing of competing factors, including economic practicability, and to do so at least eighteen months in advance for more stringent standards.[30] CAFE civil penalties are merely one component of this overall program.

Moreover, EPCA expressly details a procedure for NHTSA, as delegated by the Secretary, to increase the CAFE civil penalty rate.[31] EPCA's delegation necessarily implies that NHTSA also has authority to oversee the administration and enforcement of the rate more generally.[32] Indeed, NHTSA already promulgated a similar rule in December 2016 establishing the first model years to which the increased CAFE civil penalty rate would apply, which was not challenged and has been held to be operative twice by the Second Circuit. The 2015 Act also applies only to penalties that are ''assessed or enforced by an Agency pursuant to Federal law.'' [33] For the CAFE civil penalty rate to be covered under the 2015 Act, NHTSA must have authority to assess or enforce it, and thus inevitably the authority to oversee and administer it as appropriate. To the extent there is any statutory ambiguity, NHTSA is the expert agency on its CAFE program, has been given authority to administer the Federal fuel economy program, and has expert authority to interpret and apply the requirements of EPCA and EISA, including the civil penalty provisions.

If the August 31, 2020 decision of the United States Court of Appeals for the Second Circuit in Case No. 19–2395 is vacated, NHTSA's July 2019 rule will be reinstated, keeping the CAFE civil penalty rate at $5.50. But turning to the merits of the Alliance Petition, NHTSA will assume *arguendo* that the July 2019 rule remains vacated. Under those circumstances, NHTSA agrees with the petitioner that the reasoning of the Agency's December 2016 rule applies here. As NHTSA said then, ''[i]f all the vehicles for a model year have already been produced, then there is no way for their manufacturers to raise the fuel economy level of those vehicles in order to avoid higher penalty rates for non-compliance.'' [34] At the time, NHTSA noted that by November 2015, ''nearly all manufacturers subject to the CAFE standards had completed both model years 2014 and 2015, and no further vehicles in those model years were being produced in significant numbers.'' Likewise now, vehicles for model years 2019 and 2020 have largely if not entirely been produced already, many manufacturers are already selling model year 2021 vehicles, and since some manufacturers launch subsequent model year vehicles as early as the spring, it is reasonable to assume that model year 2022 vehicles will be launched in the coming months. Applying the increased civil penalty rate to violations in these model years ''would not result in additional fuel savings, and thus would seem to impose retroactive punishment without accomplishing Congress' specific intent in establishing the civil penalty provision of the Energy Policy and Conservation Act ('EPCA').'' [35]

As NHTSA explained previously, ''the purpose of civil penalties for non-compliance is to encourage manufacturers to comply with the CAFE standards.'' [36] And more generally, one of the stated purposes of the 2015 Act is to ''maintain the deterrent effect of civil monetary penalties and promote compliance with the law.'' [37] NHTSA agrees with the petitioner that it would be inappropriate to apply the adjustment to model years that could have no deterrence effect and promote no additional compliance with the law.[38]

In addition to failing to serve the purpose of the statutory framework and the regulatory scheme, applying the increased civil penalty rate to completed or largely completed model years would raise serious retroactivity concerns. As NHTSA explained in the December 2016 rule, and in various other contexts, ''[r]etroactivity is not favored in the law.'' [39] NHTSA does not believe that it is appropriate to impose a higher civil penalty rate for model years when doing so would not have incentivized improvements to fuel economy—one of the core purposes of EPCA.[40] Moreover, as NHTSA noted in the December 2016 rule, ''[t]he decision not to apply the increased penalties retroactively is similar to the approach taken by various other [F]ederal [a]gencies in implementing the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015.'' [41] For instance, a fellow DOT agency concluded that applying an inflation adjustment when a penalty had been proposed but not finalized ''would not induce further compliance'' and would

[28] *See, e.g.,* 49 U.S.C. 32902, 32912. The Secretary's authority under EPCA is delegated to NHTSA. 49 CFR 1.95(a), (j) (delegating authority to NHTSA to exercise the authority vested in the Secretary under chapter 329 of title 49 of the U.S. Code and certain sections of the Energy Independence and Security Act of 2007, Public Law 110–140); *see also* 49 CFR 1.94(c). Moreover, NHTSA's regulations provide that ''[t]he Administrator may initiate any further rulemaking proceedings that he finds necessary or desirable.'' 49 CFR 553.25.

[29] *See* 49 U.S.C. 302(a) (stating the Secretary of Transportation is governed by the transportation policy described in part in 49 U.S.C. 13101(b), which provides that oversight of the modes of transportation ''shall be administered and enforced to carry out the policy of this section and to promote the public interest''); 49 U.S.C. 322(a) (''The Secretary of Transportation may prescribe regulations to carry out the duties and powers of the Secretary. An officer of the Department of Transportation may prescribe regulations to carry out the duties and powers of the officer.''); 49 U.S.C. 105(c)(2) (directing the NHTSA Administrator to ''carry out . . . additional duties and powers prescribed by the Secretary''); 49 CFR 1.81(a)(3) (''Except as prescribed by the Secretary of Transportation, each Administrator is authorized to . . . [e]xercise the authority vested in the Secretary to prescribe regulations under 49 U.S.C. 322(a) with respect to statutory provisions for which authority is delegated by other sections in this part.'').

Supp. 598, 604 (D.D.C. 1974), vacated on other grounds, 527 F.2d 853 (D.C. Cir. 1975) (''The policy of the Act with regard to civil penalties is clearly to discourage noncompliance'').

[37] 28 U.S.C. 2461 note, sec. 2(b)(2).

[38] NHTSA's proposal to retain the $5.50 rate was published weeks before the Second Circuit's decision vacating the indefinite delay of the December 2016 rule. Accordingly, manufacturers were aware of NHTSA's tentative reconsideration decision and could begin planning accordingly, despite the December 2016 rule being in force.

[39] 81 FR 95489, 95490 n.8 (Dec. 28, 2016). The Supreme Court has stated that ''congressional enactments . . . will not be construed to have retroactive effect unless their language requires this result.'' *Landgraf* v. *USI Film Products,* 511 U.S. 244, 280 (1994) (citing *Bowen* v. *Georgetown University Hospital,* 488 U.S. 204, 208 (1988)).

[40] The 2015 Act provides that any increases to civil monetary penalties only apply to penalties that ''are assessed after the date the increase takes effect.'' 28 U.S.C. 2461 note, sec. 6. Therefore, at a minimum, any adjustment to the CAFE civil penalty rate would not apply to any penalties that have already been assessed.

[41] *See, e.g.,* Department of Justice, interim final rule with request for comments: Civil Monetary Penalties Inflation Adjustment, 81 FR 42491 (June 30, 2016) (applying increased penalties only to violations after November 2, 2015, the date of the Act's enactment); Federal Aviation Administration, interim final rule: Revisions to Civil Penalty Inflation Adjustment Tables, 81 FR 43463 (July 5, 2016) (applying increased penalties only to violations after August 1, 2016).

thus be contrary to the goals of its specific enforcement statute.[42] Accordingly, the agency announced it would not retroactively adjust the proposed penalty amounts for violations that predated the inflation adjustments.

For similar reasons—and applying the same reasoning as in the December 2016 rule—NHTSA concludes that it would be inappropriate to apply the increased civil penalty rate to model year 2021 as well. In the December 2016 rule, NHTSA recognized the reality of the timeline for the design, development, and production of new vehicles: ''because of industry design, development, and production cycles, vehicle designs (including drivetrains, which are where many fuel economy improvements are made) are often fixed years in advance, making adjustments to fleet fuel economy difficult without a lead time of multiple years.'' [43] At the time of the recent judicial decision indicating that the increase would go into effect, the industry plans for what remains of model year 2020 and model year 2021 were ''fixed and inalterable.'' [44] Accordingly, ''it is too late at this juncture to make significant changes to those plans and avoid non-compliances.'' [45]

NHTSA's decision here also takes account of the industry's serious reliance interests, having made design, development, and production plans based on the $5.50 rate. And reliance upon that rate was reasonable, as NHTSA reconsidered application of the 2015 Act by proposing in 2018 that the 2015 Act did not apply and finalizing the proposal in 2019.[46] The Director of the Office of Management and Budget—the Agency charged with overseeing implementation of the 2015 Act—also issued guidance concurring with NHTSA that the 2015 Act did not apply to the CAFE penalty rate with the final rule, further increasing the reasonableness of such reliance.

The Alliance Petition observes that ''[m]anufacturers long ago made their technology choices, locked in suppliers and production requirements, developed credit purchase/sales strategies, and have largely begun to implement their planned production runs for Model Year 2021''—all with the $5.50 rate in effect.[47] The issue of credits is particularly noteworthy as manufacturers can apply credits well beyond one or two model years. Manufacturers can choose to carry back credits to apply to any of three model years before they are earned or carry them forward to apply to any of the five model years after they are earned. With such a long window of potential applicability, it is likely that manufacturers make long-term plans in determining how to acquire and apply credits. Increasing the rate is likely to lead to an increase in the price of credits, many of which have already been planned around and negotiated and contracted for. For example, in a recent securities filing, Fiat Chrysler Automobiles N.V. stated that it ''has accrued estimated amounts for any probable CAFE penalty based on the $5.50 rate,'' but if the rate was applied to model year 2019, ''FCA may need to accrue additional amounts due to increased CAFE penalties and additional amounts owed under certain agreements for the purchase of regulatory emissions credits'' and ''[t]he amounts accrued could be up to €500 million [nearly $600 million].'' [48] To disregard the industry's serious reliance interests would be unfair and improper.[49]

Accounting for the timeline of vehicle development comports with NHTSA's broader approach to establishing fuel economy standards. As NHTSA explained in the December 2016 rule, NHTSA ''includes product cadence in its assessment of CAFE standards, by limiting application of technology in its analytical model to years in which vehicles are refreshed or redesigned.'' [50] Not only does this consideration function within the industry's long-established development cycle, ''NHTSA believes that this approach facilitates continued fuel economy improvements over the longer term by accounting for the fact that manufacturers will seek to make improvements when and where they are most cost-effective.'' [51]

In the December 2016 rule, NHTSA also analogized the need to provide appropriate lead time for an increase in the civil penalty rate to the EPCA provision requiring that when NHTSA amends a fuel economy standard to make it more stringent, NHTSA must promulgate the standard ''at least 18 months before the beginning of the model year to which the amendment applies.'' [52] As NHTSA explained:

The 18 months' notice requirement for increases in fuel economy standards represents a congressional acknowledgement of the importance of advance notice to vehicle manufacturers to allow them the lead time necessary to adjust their product plans, designs, and compliance plans to address changes in fuel economy standards. Similarly here, affording manufacturers lead time to adjust their products and compliance plans helps them to account for such an increase in the civil penalty amount. In this unique case, the 18-month lead time for increases in the stringency of fuel economy standards provides a reasonable proxy for appropriate advance notice of the application of substantially increased—here nearly tripled—civil penalties.[53]

Similarly, EPCA provides that an increase in the CAFE civil penalty rate prescribed through the statutory process can also only take effect ''for the model year beginning at least 18 months after the regulation stating the higher amount becomes final.'' [54]

As in the December 2016 rule, NHTSA acknowledges that—while none of the individual manufacturers that submitted supplemental information indicated this to be the case—it is conceivable that some manufacturers might be able to change production volumes of certain lower- or higher-fuel-economy models for model years that have not happened yet, which could help them to reduce or avoid CAFE non-compliance penalties. However, NHTSA noted then and reiterates here that compelling such a change by immediately adjusting the civil penalty rate to apply to design decisions that are already locked in would contravene a fundamental purpose of the CAFE program—namely, the statutory requirement that fuel economy standards be attribute-based and thus responsive to consumer demand.[55] Affording some lead time to manufacturers mitigates the concern that manufacturers will be forced to disregard consumer demand, for example by having to restrict the availability of vehicles that consumers want.

The Alliance Petition was submitted on October 2, 2020, and requested that the adjustment apply beginning in model year 2022. While NHTSA accepts that the petitioner believes that timeline provides a sufficient and reasonable

lead time under the circumstances for its industry members to adjust reasonably to the increased penalty rate and, in this interim final rule, postpones the increased rate until that model year, NHTSA also seeks comment on whether it should provide 18 months of lead time before the increase becomes effective. Since NHTSA treats model years as commencing in October of the calendar year prior to the model year, an 18-month lead time would have the $14 penalty rate apply to the 2023 model year under this approach. Such an approach would be consistent with the December 2016 rule's application of the adjustment beginning in model year 2019.

NHTSA also recognizes the significant negative economic consequences caused by the global outbreak of COVID–19. On May 19, 2020, President Trump issued Executive Order (E.O.) 13924, ''Regulatory Relief to Support Economic Recovery,'' ordering agencies to address the economic emergency caused by the pandemic ''by rescinding, modifying, waiving, or providing exemptions from regulations and other requirements that may inhibit economic recovery, consistent with applicable law and with protection of the public health and safety, with national and homeland security, and with budgetary priorities and operational feasibility.'' [56] Where such measures are made temporarily, agencies must evaluate whether those measures would ''promote economic recovery if made permanent.''

The Alliance Petition provided information about the significant negative economic impact on the automotive sector caused by COVID–19. All domestic auto factories were closed by April 2020, for the first time since World War II, for approximately eight weeks.[57] One analyst described the second quarter of 2020 as ''likely to be the toughest in modern history'' for the automotive sector, as companies ''grappled with close to a zero revenue environment for a few months.'' [58] Market projections as of September 2020 indicate that domestic vehicle sales for all of 2020 will be down by as much as 26 percent from 2019.[59] And beyond the immediate economic hit, this negative economic impact is expected to have effects beyond 2020. One market analyst predicts that the auto sector recovery will take several years and that the market will not reach the sales that were previously projected for 2020 until at least 2025.[60] The analyst also notes that because of the COVID–19 effects on sales and revenue, manufacturers have been forced to delay capital-intensive product actions to conserve resources, with the greatest impact to showrooms in calendar years 2023 and 2024.[61]

NHTSA also received information from five individual vehicle manufacturers supplementing the Alliance Petition: Mercedes-Benz AG, Jaguar Land Rover North America, LLC, FCA US LLC, Ford Motor Company, and Ferrari North America, Inc.[62] Each cited the ongoing pandemic in concluding that applying the increased CAFE civil penalty rate prior to model year 2022 would present a substantial hardship.

Mercedes-Benz indicated that since March of this year, it has experienced pandemic-related disruption of supply chains, production, and work force, which has caused unforeseen financial loss for the company and has created a tenuous financial climate. Jaguar Land Rover indicated that due to the pandemic, it had to close showrooms and manufacturing plants, and pause engineering work for months, resulting in reduced sale revenue and the prevention of investment in future fuel-efficient technology product programs. FCA and Ford detailed similar negative economic impacts to their companies. Each company argued that a decision to apply the civil penalty of $14 vehicles prior to MY 2022 would only aggravate their financial hardships during this economic emergency. These economic consequences are on top of those NHTSA already projected for the increase from $5.50 to $14, including the significant increase in costs to manufacturers, increased unemployment, adverse effects on competition, and increases in automobile imports.[63] And these impacts come at a time where NHTSA data shows that the number of fleets with credit shortfalls has substantially increased, while the number of fleets generating credit surpluses has decreased, indicating that more manufacturers—particularly domestic manufacturers—are expected to need to pay penalties going forward.[64] The financial burden on domestic manufacturers is exacerbated by the statutory prohibition against the use of credits acquired by another automaker or transferred from another fleet to offset any non-compliance with the domestic passenger car minimum standard.[65] Manufacturers have already begun to realize this impact: One manufacturer paid over $77 million in civil penalties for failing to meet the minimum domestic passenger car standard for model year 2016 and over $79 million in model year 2017, the highest civil penalties assessed in the history of the CAFE program. Ferrari stated that applying the $14 rate before model year 2022 would save no fuel, instead serving only as a wealth transfer to the manufacturers that have surplus CAFE credits. Other facets of the CAFE program, such as credit transfer caps, credit adjustment factors, availability and price of tradeable credits, and credit banking, are causing similar economic pressures.[66]

Based on the available information, NHTSA believes that applying the adjustment to the CAFE civil penalty rate beginning in model year 2019 ''may inhibit economic recovery,'' while applying the adjustment beginning in model year 2022 is an appropriate action to take ''for the purpose of promoting job creation and economic growth.'' [67]

If the August 31, 2020 decision of the United States Court of Appeals for the Second Circuit in Case No. 19–2395 is vacated, NHTSA's July 2019 rule will be reinstated, keeping the CAFE civil penalty rate at $5.50. Regardless, NHTSA will continue to apply the $5.50 civil penalty rate for violations that occur prior to model year 2022. If the July 2019 rule remains vacated, per the Second Circuit's ruling, the rate will be adjusted to $14 beginning in model year 2022 under this interim final rule for all of the foregoing reasons. And if

[67] 85 FR 31353, 31354 (May 22, 2020).

NHTSA's determination in the July 2019 rule that the CAFE civil penalty rate is not a ''civil monetary penalty'' under the 2015 Act is not restored, NHTSA expects to make subsequent annual adjustments to the rate as appropriate, pursuant to the 2015 Act and in accordance with EPCA and EISA.[68] As it did in the December 2016 rule, ''NHTSA believes this approach appropriately harmonizes the two congressional directives of adjusting civil penalties to account for inflation and maintaining attribute-based, consumer-demand-focused standards, applied in the context of the presumption against retroactive application of statutes'' and particularly ''in the unique context of multi-year vehicle product cycles.'' [69]

Either the Second Circuit's vacatur of the July 2019 final rule or the promulgation of this interim final rule is sufficient to render IPI's petition for reconsideration of the July 2019 final rule moot, since NHTSA's July 2019 final rule is no longer operative. To the extent that the petition is not moot, it is denied. As IPI noted, many of the arguments raised in its petition were already presented to NHTSA in its comments to the April 2018 NPRM.[70] NHTSA adequately responded to these comments in the July 2019 final rule and reaffirms those points here.[71] In accord with OMB's government-wide guidance on implementing the statute, NHTSA sought clarifying guidance from OMB and, as required by the 2015 Act, NHTSA requested OMB's concurrence in its ''negative economic impact'' determination. OMB's interpretations were consistent with those presented in NHTSA's NPRM, on which IPI commented. And OMB's guidance did not contain any material misstatements that undercut NHTSA's determinations in the July 2019 final rule.

## H. Interim Final Rule and Public Comment

Pursuant to the 2015 Act and 5 U.S.C. 553(b)(3)(B), NHTSA finds that good cause exists for immediate implementation of this interim final rule without prior notice and comment because it would be impracticable to delay publication of this rule for notice and comment, public comment is unnecessary, and doing so is in the public interest. As explained above, manufacturers have a compelling need for ample advance notice of an increase to the CAFE civil penalty rate in order to modify their design, development, and production plans accordingly, in order for the inflation adjustment to have its statutorily-intended effect, and as a matter of fairness. It would be impracticable to follow notice-and-comment procedures, further delaying a decision on when the rate should be adjusted. That would leave in place an increased rate applicable to model years 2019 and 2020, which are complete, as well as model year 2021, which is underway. To the extent any manufacturers would have been able to adjust their production volumes in response to an increased penalty rate, NHTSA cannot effectively compel them to do so because it would disregard consumer demand, in contravention of NHTSA's statutory duties. Thus, there is good cause for an immediate effective date to avoid any retroactive application of an increased rate to model years for which manufacturers could not plan to accommodate.

Public comment is also unnecessary. The 2015 Act provides that the first adjustment shall be made through an interim final rulemaking. Because this action is establishing the parameters of NHTSA's first adjustment of the CAFE civil penalty rate, NHTSA is utilizing the process provided by the 2015 Act. NHTSA also notes that pursuant to the 2015 Act, its initial catch-up adjustment was promulgated through an interim final rule without public comment and, more significantly, the December 2016 rule on which this action is largely based was also promulgated without public comment.

The public interest also counsels towards NHTSA's issuance of an interim final rule. As discussed above, the automotive industry has faced unprecedented economic challenges arising from the COVID–19 national emergency situation.[72] The entire manufacturing base was effectively shut down mere months ago, and the industry still faces severe supply chain constraints that have reduced automobile production. Similarly, the general economic difficulties facing the nation have significantly reduced vehicle sales, reducing revenue for manufacturers. Applying the adjustment to the CAFE civil penalty rate beginning in model year 2019 will result in serious harm, including increased penalties for manufacturers with no corresponding societal gain and could very well inhibit economic recovery by reducing the capital manufacturers would have to invest in their product. Applying the adjustment beginning in model year 2022 is an appropriate action to take to avoid serious harm and ''for the purpose of promoting job creation and economic growth.'' [73]

Issuing an interim final rule now while the COVID–19 emergency is ongoing is particularly in the public interest, and consistent with the Executive order to promote the economic recovery. For these reasons, NHTSA finds that notice-and-comment before the interim final rule is promulgated would be impracticable, is unnecessary in this situation, and is contrary to the public interest. NHTSA is nonetheless providing an opportunity for interested parties to comment on the interim final rule.[74]

For these reasons, the Agency has also determined that it has good cause under 5 U.S.C. 553(d)(3) and 5 U.S.C. 808(2) to issue this rule with an immediate effective date. In addition, a delayed effective in not required under 5 U.S.C 553(d)(2) because it ''relieves a restriction'' by allowing additional time before the higher penalty rate begins to apply.

## I. Rulemaking Analyses and Notices

### *1. Executive Order 12866, Executive Order 13563, and DOT Regulatory Policies and Procedures*

NHTSA has considered the impact of this rulemaking action under Executive Order 12866, Executive Order 13563, and the Department of Transportation's regulatory policies and procedures. This rulemaking document has been considered a ''significant regulatory action'' under Executive Order 12866. NHTSA also believes that this rulemaking is ''economically significant,'' as the Agency believes that the difference in the amount of penalties received by the government as a result of this rule, classified as ''transfers,'' are likely to exceed $100 million in at least one of the years affected by this rulemaking. As noted above, the Agency believes this rule will have a limited effect, in any, on the composition of the fleet, as model years 2019 and 2020 are complete and model year 2021 is

[68] *See* Public Law 114–74, Sec. 701(b)(2).

[69] 81 FR 95489, 95491 (Dec. 28, 2016).

[70] IPI Petition, at 2.

[71] *See, e.g.,* 84 FR 36007, 36016, 36023, 36030 (July 26, 2019); *see also* 49 CFR 553.35(c) (''The Administrator does not consider repetitious petitions.'').

[72] *See* ''Proclamation on Declaring a National Emergency Concerning the Novel Coronavirus Disease (COVID–19) Outbreak,'' Presidential Proclamation 9994 (Mar. 13, 2020), available online at *https://www.whitehouse.gov/presidential-actions/proclamation-declaring-national-emergency-concerning-novel-coronavirus-disease-covid-19-outbreak/.*

[73] 85 FR 31353, 31354 (May 22, 2020).

[74] Shortly prior to publication of this interim final rule, NHTSA received two letters regarding this rulemaking. Both letters are included in the docket for this matter and will be treated as comments for appropriate consideration.

already well under way.[75] If the August 31, 2020 decision of the United States Court of Appeals for the Second Circuit in Case No. 19–2395 is not vacated, NHTSA would have no discretion in whether to make the adjustment to $14 and thus no regulatory impact analysis is required. If the August 31, 2020 decision of the United States Court of Appeals for the Second Circuit in Case No. 19–2395 is vacated, NHTSA's July 2019 rule keeping the CAFE civil penalty rate at $5.50 will be reinstated, and as noted in that rule, it has no economic impact because it merely maintains the existing penalty rate.

*2. Regulatory Flexibility Act*

Pursuant to the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.,* as amended by the Small Business Regulatory Enforcement Fairness Act (SBREFA) of 1996), whenever an agency is required to publish a notice of proposed rulemaking or final rule, it must prepare and make available for public comment a regulatory flexibility analysis that describes the effect of the rule on small entities (*i.e.,* small businesses, small organizations, and small governmental jurisdictions). Because this is an interim final rule, no regulatory flexibility analysis is required. In any event, no regulatory flexibility analysis is required if the head of an agency certifies the proposal will not have a significant economic impact on a substantial number of small entities.

Even though this is an interim final rule for which no regulatory flexibility analysis is required, NHTSA has considered the impacts of this notice under the Regulatory Flexibility Act and does not believe that this rule would have a significant economic impact on a substantial number of small entities. NHTSA requests comment on the economic impact of this interim final rule on small entities.

The Small Business Administration's (SBA) regulations define a small business in part as a ''business entity organized for profit, with a place of business located in the United States, and which operates primarily within the United States or which makes a significant contribution to the U.S. economy through payment of taxes or use of American products, materials or labor.'' 13 CFR 121.105(a). SBA's size standards were previously organized according to Standard Industrial Classification (''SIC'') Codes. SIC Code 336211 ''Motor Vehicle Body Manufacturing'' applied a small business size standard of 1,000 employees or fewer. SBA now uses size standards based on the North American Industry Classification System (''NAICS''), Subsector 336—Transportation Equipment Manufacturing. This action is expected to affect manufacturers of motor vehicles. Specifically, this action affects manufacturers from NAICS codes 336111—Automobile Manufacturing, and 336112—Light Truck and Utility Vehicle Manufacturing, which both have a small business size standard threshold of 1,500 employees.

Though civil penalties collected under 49 CFR 578.6(h)(1) and (2) apply to some small manufacturers, low volume manufacturers can petition for an exemption from the Corporate Average Fuel Economy standards under 49 CFR part 525. This would lessen the impacts of this rulemaking on small business by allowing them to avoid liability for penalties under 49 CFR 578.6(h)(2). Small organizations and governmental jurisdictions will not be significantly affected as the price of motor vehicles and equipment ought not change as the result of this rule.

*3. Executive Order 13132 (Federalism)*

Executive Order 13132 requires NHTSA to develop an accountable process to ensure ''meaningful and timely input by State and local officials in the development of regulatory policies that have federalism implications.'' ''Policies that have federalism implications'' is defined in the Executive order to include regulations that have ''substantial direct effects on the States, on the relationship between the [N]ational [G]overnment and the States, or on the distribution of power and responsibilities among the various levels of government.'' Under Executive Order 13132, the Agency may not issue a regulation with federalism implications, that imposes substantial direct compliance costs, and that is not required by statute, unless the Federal Government provides the funds necessary to pay the direct compliance costs incurred by State and local governments, the agency consults with State and local governments, or the agency consults with State and local officials early in the process of developing the proposed regulation.

This rule will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government, as specified in Executive Order 13132.

The reason is that this rule will generally apply to motor vehicle manufacturers. Thus, the requirements of Section 6 of the Executive order do not apply.

*4. Unfunded Mandates Reform Act of 1995*

The Unfunded Mandates Reform Act of 1995, Public Law 104–4, requires agencies to prepare a written assessment of the cost, benefits and other effects of proposed or final rules that include a Federal mandate likely to result in the expenditure by State, local, or tribal governments, in the aggregate, or by the private sector, of more than $100 million annually. Because this rule is not expected to include a Federal mandate, no unfunded mandate assessment will be prepared.

*5. National Environmental Policy Act*

The National Environmental Policy Act of 1969 (NEPA)[76] directs that Federal agencies proposing ''major Federal actions significantly affecting the quality of the human environment'' must, ''to the fullest extent possible,'' prepare ''a detailed statement'' on the environmental impacts of the proposed action (including alternatives to the proposed action).[77] However, as a threshold question, Federal agencies must assess whether NEPA applies to a particular proposed activity or decision.[78] If an agency determines that NEPA is inapplicable, no further analysis is required pursuant to NEPA or the Council on Environmental Quality's (CEQ) NEPA implementing regulations.[79]

In assessing whether NEPA applies, NHTSA has considered ''[w]hether compliance with NEPA would be inconsistent with Congressional intent expressed in another statute.''[80] In particular, NHTSA has considered the Congressional intent with regard to both EPCA (as amended by EISA) and the 2015 Act. As quoted above from the December 2016 rule, ''the purpose of civil penalties for non-compliance is to encourage manufacturers to comply with the CAFE standards.''[81] And more

[75] NHTSA reaffirms the position on economic analysis taken its July 2019 rule. 84 FR 36007, 36030 (July 26, 2019).

[76] 42 U.S.C. 4321–4347.

[77] 42 U.S.C. 4332.

[78] 40 CFR 1501.1(a).

[79] 40 CFR parts 1500–1508. NHTSA has not yet revised its own NEPA implementing regulations (49 CFR part 520) to conform with CEQ's recently revised regulations. *See* 40 CFR 1507.3. However, where an agency's existing NEPA procedures are inconsistent with the CEQ's regulations, the CEQ regulations control. 40 CFR 1507.3(a). If NEPA is inapplicable under 40 CFR 1501.1(a), then NHTSA's own NEPA implementing regulations, promulgated pursuant to NEPA and CEQ guidelines, similarly do not apply.

[80] 40 CFR 1501.1(a)(3).

[81] 81 FR at 95490.

generally, one of the stated purposes of the 2015 Act is to ''maintain the deterrent effect of civil monetary penalties and promote compliance with the law.'' [82] Further, as part of the statutory scheme established by EPCA and the 2015 Act, Congress requires NHTSA to account for such issues as lead time, consumer demand, and negative economic impacts of its actions (especially in light of COVID–19 and the Executive order to combat the economic emergency caused by it). Assuming *arguendo* that NHTSA is obligated to raise the civil penalty rate to $14, the aforementioned factors, as well as legal doctrines of retroactivity and fairness, all point to the necessity of delaying effectiveness until at least model year 2022. Consideration of environmental impacts is inconsistent with these obligations and Congressional intent, and no further analysis pursuant to NEPA is required.

Still, NHTSA ''may prepare an environmental assessment on any action in order to assist agency planning and decision making.'' [83] When a Federal agency prepares an environmental assessment, the CEQ NEPA implementing regulations require it to (1) ''[b]riefly provide sufficient evidence and analysis for determining whether to prepare an environmental impact statement or a finding of no significant impact'' and (2) ''[b]riefly discuss the purpose and need for the proposed action, alternatives . . . , and the environmental impacts of the proposed action and alternatives, and include a listing of [a]gencies and persons consulted.'' [84] Generally, based on the environmental assessment, the agency must make a determination to prepare an environmental impact statement or ''prepare a finding of no significant impact if the [a]gency determines, based on the environmental assessment, not to prepare an environmental impact statement because the proposed action will not have significant effects.'' [85] Although NHTSA concludes that a NEPA analysis is not required, this section may serve as the Agency's Environmental Assessment (EA) and Finding of No Significant Impact (FONSI) for this interim final rule.

## I. Purpose and Need

This interim final rule sets forth the purpose of and need for this action. In response to the Alliance Petition, NHTSA considered whether it is appropriate, pursuant to the Inflation Adjustment Act and EPCA (as amended by EISA), to increase the CAFE civil penalty rate beginning in model year 2022. The Alliance Petition cited cost, retroactivity, and lead time as reasons why a delay in effectiveness until model year 2022 is required. NHTSA considered the findings of this EA prior to deciding that the adjusted rate will go into effect beginning in model year 2022.

## II. Alternatives

NHTSA considered a range of alternatives for this action, including the No Action Alternative of adjusting the CAFE civil penalty rate from $5.50 to $14 beginning in model year 2019 (as originally established by the December 2016 final rule), and the alternatives of applying the adjustment beginning in model years 2020, 2021, 2022, and 2023. This EA describes the potential environmental impacts associated with the various model years in comparison with each other.

Upon consideration of the information presented in this EA, NHTSA is deciding to apply the adjustment beginning in model year 2022 in this interim final rule. NHTSA is seeking comment on whether to instead apply the increase beginning in model year 2023, and commenters should consider NEPA in their discussions of such an approach.

## III. Environmental Impacts of the Action and Alternatives

NHTSA considered a range of alternatives for when to apply the inflation adjustment in the CAFE civil penalty rate from $5.50 to $14. For the reasons explained in the preamble, NHTSA anticipates no differences in environmental impacts associated with the alternatives of applying the adjustment beginning in model years 2019, 2020, 2021, or 2022. Vehicles for model years 2019 and 2020 have largely if not entirely been produced already, and many manufacturers are already selling model year 2021 vehicles. Since some manufacturers launch subsequent model year vehicles as early as the spring, it is reasonable to assume that model year 2022 vehicles will be launched in the coming months. It is impossible for manufacturers to change the design and manufacture of vehicles that are already on the market, and the logistical realities of the industry make it infeasible for manufacturers to change course in the middle of a model year that is already underway or just prior to the start of a model year. Imposing a higher penalty on manufacturers for vehicles that, at this point, cannot be manufactured with improved fuel economy and for which adjustment in production volumes costs manufacturers significantly more compared to the higher civil penalty rate would have no environmental benefit—only incurring costs to those manufacturers (which are likely to be passed on to consumers). In fact, imposing those costs on manufacturers now may make it even harder financially for those manufacturers to make further gains in fuel economy in the future, with less capital to invest in fuel-saving technology, design, marketing of the benefits, and production.

While this interim final rule adjusts the CAFE civil penalty rate beginning no earlier than model year 2022, NHTSA is seeking comment on whether to apply the adjustment beginning in model year 2023. Based on the information included in NHTSA's Final EA in its July 2019 rule, NHTSA tentatively expects that applying the adjustment beginning in model year 2023 would have a minimal environmental impact. NHTSA seeks comments on the environmental impacts of applying the adjustment beginning in model year 2023.

## IV. Agencies and Persons Consulted

NHTSA and DOT have consulted with OMB and the U.S. Department of Justice and provided other Federal agencies with the opportunity to review and provide feedback on this rulemaking.

## V. Conclusion

NHTSA has reviewed the information presented in this EA and concludes that the alternatives to adjust the CAFE civil penalty rate beginning in model years 2019, 2020, 2021, or 2022 all would have the same environmental impacts on the quality of the human environment (or the differences among alternatives would be *de minimis*). Given the practical realities of the design and production process, the environmental impact of adjusting the CAFE civil penalty rate in model year 2022 is expected to be negligible as compared to the No Action Alternative. NHTSA has not made a final decision on whether to apply the adjustment beginning in model year 2023 and seeks comments on the environmental impacts of that alternative.

## VI. Finding of No Significant Impact

I have reviewed this EA. Based on the EA, I conclude that implementation of any of the action alternatives through model year 2022 (including the interim final rule) will not have a significant effect on the human environment and that a ''finding of no significant impact''

[82] 28 U.S.C. 2461 note, sec. 2(b)(2).

[83] 40 CFR 1501.5(b).

[84] 40 CFR 1501.5(c).

[85] 40 CFR 1501.6(a).

is appropriate. This statement constitutes the Agency's ''finding of no significant impact,'' and an environmental impact statement will not be prepared.[86] NHTSA will review comments regarding applying the adjustment beginning in model year 2023 as appropriate.

*6. Executive Order 12778 (Civil Justice Reform)*

This rule does not have a preemptive or retroactive effect—specifically, it modifies a regulation to avoid having a retroactive effect. Judicial review of a rule based on this interim final rule may be obtained pursuant to 5 U.S.C. 702.

*7. Paperwork Reduction Act*

In accordance with the Paperwork Reduction Act of 1980, NHTSA states that there are no requirements for information collection associated with this rulemaking action.

*8. Privacy Act*

Please note that anyone is able to search the electronic form of all comments received into any of DOT's dockets by the name of the individual submitting the comment (or signing the comment, if submitted on behalf of an association, business, labor union, etc.). You may review DOT's complete Privacy Act Statement in the **Federal Register** published on April 11, 2000 (65 FR 19477), or you may visit *http://dms.dot.gov.*

*9. Congressional Review Act*

Pursuant to the Congressional Review Act (5 U.S.C. 801 *et seq.*), the Office of Information and Regulatory Affairs designated this action as a ''major rule,'' as defined by 5 U.S.C. 804(2). For the reasons explained above, NHTSA finds that notice and public comment are impracticable, unnecessary, and contrary to the public interest. NHTSA will submit a rule report to each House of the Congress and to the Comptroller General of the United States.

**List of Subjects in 49 CFR Part 578**

Imports, Motor vehicle safety, Motor vehicles, Penalties, Rubber and rubber products, Tires.

In consideration of the foregoing, 49 CFR part 578 is amended as set forth below.

## PART 578—CIVIL AND CRIMINAL PENALTIES

■ 1. The authority citation for 49 CFR part 578 continues to read as follows:

**Authority:** Pub. L. 101–410, 104 Stat. 890; Pub. L. 104–134, 110 Stat. 1321; Pub. L. 109–59, 119 Stat. 1144; Pub. L. 114–74, 129 Stat. 584; Pub. L. 114–94, 129 Stat. 1312; 49 U.S.C. 30165, 30170, 30505, 32308, 32309, 32507, 32709, 32710, 32902, 32912, and 33115; delegation of authority at 49 CFR 1.81, 1.95.

■ 2. Amend § 578.6 by revising paragraph (h) to read as follows:

**§ 578.6 Civil penalties for violations of specified provisions of Title 49 of the United States Code.**

* * * * *

(h) *Automobile fuel economy.* (1) A person that violates 49 U.S.C. 32911(a) is liable to the United States Government for a civil penalty of not more than $43,280 for each violation. A separate violation occurs for each day the violation continues.

(2) Except as provided in 49 U.S.C. 32912(c), beginning with model year 2022, a manufacturer that violates a standard prescribed for a model year under 49 U.S.C. 32902 is liable to the United States Government for a civil penalty of $14, plus any adjustments for inflation that occurred or may occur (for model years before model year 2022), multiplied by each .1 of a mile a gallon by which the applicable average fuel economy standard under that section exceeds the average fuel economy—

(i) Calculated under 49 U.S.C. 32904(a)(1)(A) or (B) for automobiles to which the standard applies manufactured by the manufacturer during the model year;

(ii) Multiplied by the number of those automobiles; and

(iii) Reduced by the credits available to the manufacturer under 49 U.S.C. 32903 for the model year.

*Note 1 to paragraph (h)(2):* If the August 31, 2020 decision of the United States Court of Appeals for the Second Circuit in Case No. 19–2395 is vacated, 49 CFR 578.6(h)(2), revised October 1, 2019, would apply to all model years, instead of paragraph (h)(2) of this section. In such instance, NHTSA would amend this section in accordance with such vacatur.

Issued in Washington, DC, under authority delegated in 49 CFR 1.95, and 501.5.

**James Clayton Owens,**

*Deputy Administrator.*

## SURFACE TRANSPORTATION BOARD

### 49 CFR Part 1022

**[Docket No. EP 716 (Sub-No. 6)]**

### Civil Monetary Penalties—2021 Adjustment

**AGENCY:** Surface Transportation Board.

**ACTION:** Final rule.

**SUMMARY:** The Surface Transportation Board (Board) is issuing a final rule to implement the annual inflationary adjustment to its civil monetary penalties, pursuant to the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015.

**DATES:** This final rule is effective January 14, 2021.

**FOR FURTHER INFORMATION CONTACT:** Sarah Fancher at (202) 245–0355. Assistance for the hearing impaired is available through the Federal Relay Service at (800) 877–8339.

**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (2015 Act), enacted as part of the Bipartisan Budget Act of 2015, Public Law 114–74, sec. 701, 129 Stat. 584, 599–601, requires agencies to adjust their civil penalties for inflation annually, beginning on July 1, 2016, and no later than January 15 of every year thereafter. In accordance with the 2015 Act, annual inflation adjustments are to be based on the percent change between the Consumer Price Index for all Urban Consumers (CPI–U) for October of the previous year and the October CPI–U of the year before that. Penalty level adjustments should be rounded to the nearest dollar.

**II. Discussion**

The statutory definition of civil monetary penalty covers various civil penalty provisions under the Rail (Part A); Motor Carriers, Water Carriers, Brokers, and Freight Forwarders (Part B); and Pipeline Carriers (Part C) provisions of the Interstate Commerce Act, as amended. The Board's civil (and criminal) penalty authority related to rail transportation appears at 49 U.S.C. 11901–11908. The Board's penalty authority related to motor carriers, water carriers, brokers, and freight forwarders appears at 49 U.S.C. 14901–14916. The Board's penalty authority related to pipeline carriers appears at 49 U.S.C. 16101–16106.[1] The Board has regulations at 49 CFR part 1022 that codify the method set forth in the 2015 Act for annually adjusting for inflation the civil monetary penalties within the Board's jurisdiction.

As set forth in this final rule, the Board is amending 49 CFR part 1022 to

[1] The Board also has various criminal penalty authority, enforceable in a federal criminal court. Congress has not, however, authorized federal agencies to adjust statutorily prescribed criminal penalty provisions for inflation, and this rule does not address those provisions.

make an annual inflation adjustment to the civil monetary penalties in conformance with the requirements of the 2015 Act. The adjusted penalties set forth in the rule will apply only to violations that occur after the effective date of this regulation.

In accordance with the 2015 Act, the annual adjustment adopted here is calculated by multiplying each current penalty by the cost-of-living adjustment factor of 1.01182, which reflects the percentage change between the October 2020 CPI–U (260.388) and the October 2019 CPI–U (257.346). The table at the end of this decision shows the statutory citation for each civil penalty, a description of the provision, the adjusted statutory civil penalty level for 2020, and the adjusted statutory civil penalty level for 2021.

## III. Final Rule

The final rule set forth at the end of this decision is being issued without notice and comment pursuant to the rulemaking provision of the Administrative Procedure Act (APA), 5 U.S.C. 553(b)(B), which does not require that process ''when the agency for good cause finds'' that public notice and comment are ''unnecessary.'' Here, Congress has mandated that the agency make an annual inflation adjustment to its civil monetary penalties. The Board has no discretion to set alternative levels of adjusted civil monetary penalties, because the amount of the inflation adjustment must be calculated in accordance with the statutory formula. Given the absence of discretion, the Board has determined that there is good cause to promulgate this rule without soliciting public comment and to make this regulation effective immediately upon publication.

## IV. Regulatory Flexibility Statement

The Regulatory Flexibility Act (RFA), as amended by the Small Business Regulatory Enforcement Fairness Act of 1996, 5 U.S.C. 601–612, generally requires an agency to prepare a regulatory flexibility analysis of any rule subject to notice and comment rulemaking requirements, unless the agency certifies that the rule will not have a significant economic impact on a substantial number of small entities. Because the Board has determined that notice and comment are not required under the APA for this rulemaking, the requirements of the RFA do not apply.

## V. Congressional Review Act

Pursuant to the Congressional Review Act, 5 U.S.C. 801–808, the Office of Information and Regulatory Affairs has designated this rule as a non-major rule, as defined by 5 U.S.C. 804(2).

## VI. Paperwork Reduction Act

This final rule does not contain a new or amended information collection requirement subject to the Paperwork Reduction Act of 1995, 44 U.S.C. 3501–3521.

## List of Subjects in 49 CFR Part 1022

Administrative practice and procedures, Brokers, Civil penalties, Freight forwarders, Motor carriers, Pipeline carriers, Rail carriers, Water carriers.

*It is ordered:*

1. The Board amends its rules as set forth in this decision. Notice of the final rule will be published in the **Federal Register**.

2. This decision is effective on January 14, 2021.

Decided Date: January 11, 2021.

By the Board, Board Members Begeman, Fuchs, Oberman, and Primus.

**Tammy Lowery,**

*Clearance Clerk.*

For the reasons set forth in the preamble, part 1022 of title 49, chapter X, of the Code of Federal Regulations is amended as follows:

## PART 1022—CIVIL MONETARY PENALTY INFLATION ADJUSTMENT

■ 1. Revise the authority citation for part 1022 to read as follows:

**Authority:** 5 U.S.C. 551–557; 28 U.S.C. 2461 note; 49 U.S.C. 11901, 14901, 14903, 14904, 14905, 14906, 14907, 14908, 14910, 14915, 14916, 16101, 16103.

■ 2. Revise § 1022.4(b) to read as follows:

### § 1022.4 Cost-of-living adjustments of civil monetary penalties.

* * * * *

(b) The cost-of-living adjustment required by the statute results in the following adjustments to the civil monetary penalties within the jurisdiction of the Board:

TABLE 1 TO PARAGRAPH (b)

| U.S. code citation | Civil monetary penalty description | Adjusted penalty amount 2020 | Adjusted penalty amount 2021 |
|---|---|---|---|
| **Rail Carrier Civil Penalties** | | | |
| 49 U.S.C. 11901(a) | Unless otherwise specified, maximum penalty for each knowing violation under this part, and for each day. | $8,128 | $8,224 |
| 49 U.S.C. 11901(b) | For each violation under § 11124(a)(2) or (b) | 813 | 823 |
| 49 U.S.C. 11901(b) | For each day violation continues | 42 | 42 |
| 49 U.S.C. 11901(c) | Maximum penalty for each knowing violation under §§ 10901–10906. | 8,128 | 8,224 |
| 49 U.S.C. 11901(d) | For each violation under §§ 11123 or 11124(a)(1) | 162–813 | 164–823 |
| 49 U.S.C. 11901(d) | For each day violation continues | 81 | 82 |
| 49 U.S.C. 11901(e)(1), (4) | For each violation under §§ 11141–11145, for each day | 813 | 823 |
| 49 U.S.C. 11901(e)(2), (4) | For each violation under § 11144(b)(1), for each day | 162 | 164 |
| 49 U.S.C. 11901(e)(3)–(4) | For each violation of reporting requirements, for each day | 162 | 164 |
| **Motor and Water Carrier Civil Penalties** | | | |
| 49 U.S.C. 14901(a) | Minimum penalty for each violation and for each day | 1,112 | 1,125 |
| 49 U.S.C. 14901(a) | For each violation under §§ 13901 or 13902(c) | 11,125 | 11,257 |
| 49 U.S.C. 14901(a) | For each violation related to transportation of passengers | 27,813 | 28,142 |
| 49 U.S.C. 14901(b) | For each violation of the hazardous waste rules under § 3001 of the Solid Waste Disposal Act. | 22,251–44,501 | 22,514–45,027 |
| 49 U.S.C. 14901(d)(1) | Minimum penalty for each violation of household good regulations, and for each day. | 1,625 | 1,644 |

TABLE 1 TO PARAGRAPH (b)—Continued

| U.S. code citation | Civil monetary penalty description | Adjusted penalty amount 2020 | Adjusted penalty amount 2021 |
|---|---|---|---|
| 49 U.S.C. 14901(d)(2) | Minimum penalty for each instance of transportation of household goods if broker provides estimate without carrier agreement. | 16,258 | 16,450 |
| 49 U.S.C. 14901(d)(3) | Minimum penalty for each instance of transportation of household goods without being registered. | 40,640 | 41,120 |
| 49 U.S.C. 14901(e) | Minimum penalty for each violation of a transportation rule | 3,251 | 3,289 |
| 49 U.S.C. 14901(e) | Minimum penalty for each additional violation | 8,128 | 8,224 |
| 49 U.S.C. 14903(a) | Maximum penalty for undercharge or overcharge of tariff rate, for each violation. | 162,568 | 164,490 |
| 49 U.S.C. 14904(a) | For first violation, rebates at less than the rate in effect | 325 | 329 |
| 49 U.S.C. 14904(a) | For all subsequent violations | 407 | 412 |
| 49 U.S.C. 14904(b)(1) | Maximum penalty for first violation for undercharges by freight forwarders. | 813 | 823 |
| 49 U.S.C. 14904(b)(1) | Maximum penalty for subsequent violations | 3,251 | 3,289 |
| 49 U.S.C. 14904(b)(2) | Maximum penalty for other first violations under § 13702 | 813 | 823 |
| 49 U.S.C. 14904(b)(2) | Maximum penalty for subsequent violations | 3,251 | 3,289 |
| 49 U.S.C. 14905(a) | Maximum penalty for each knowing violation of § 14103(a), and knowingly authorizing, consenting to, or permitting a violation of § 14103(a) or (b). | 16,258 | 16,450 |
| 49 U.S.C. 14906 | Minimum penalty for first attempt to evade regulation | 2,226 | 2,252 |
| 49 U.S.C. 14906 | Minimum amount for each subsequent attempt to evade regulation | 5,562 | 5,628 |
| 49 U.S.C. 14907 | Maximum penalty for recordkeeping/reporting violations | 8,128 | 8,224 |
| 49 U.S.C. 14908(a)(2) | Maximum penalty for violation of § 14908(a)(1) | 3,251 | 3,289 |
| 49 U.S.C. 14910 | When another civil penalty is not specified under this part, for each violation, for each day. | 813 | 823 |
| 49 U.S.C. 14915(a)(1)–(2) | Minimum penalty for holding a household goods shipment hostage, for each day. | 12,919 | 13,072 |
| 49 U.S.C. 14916(c)(1) | Maximum penalty for each knowing violation under § 14916(a) for unlawful brokerage activities. | 11,125 | 11,257 |
| **Pipeline Carrier Civil Penalties** | | | |
| 49 U.S.C. 16101(a) | Maximum penalty for violation of this part, for each day | 8,128 | 8,224 |
| 49 U.S.C. 16101(b)(1), (4) | For each recordkeeping violation under § 15722, each day | 813 | 823 |
| 49 U.S.C. 16101(b)(2), (4) | For each inspection violation liable under § 15722, each day | 162 | 164 |
| 49 U.S.C. 16101(b)(3)–(4) | For each reporting violation under § 15723, each day | 162 | 164 |
| 49 U.S.C. 16103(a) | Maximum penalty for improper disclosure of information | 1,625 | 1,644 |

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

### 50 CFR Part 229

**[Docket No. 210108–0005]**

**RIN 0648–BJ72**

### List of Fisheries for 2021

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Final rule.

**SUMMARY:** The National Marine Fisheries Service (NMFS) publishes its final List of Fisheries (LOF) for 2021, as required by the Marine Mammal Protection Act (MMPA). The LOF for 2021 reflects new information on interactions between commercial fisheries and marine mammals. NMFS must classify each commercial fishery on the LOF into one of three categories under the MMPA based upon the level of mortality and serious injury of marine mammals that occurs incidental to each fishery. The classification of a fishery on the LOF determines whether participants in that fishery are subject to certain provisions of the MMPA, such as registration, observer coverage, and take reduction plan (TRP) requirements.

**DATES:** The effective date of this final rule is February 16, 2021.

**ADDRESSES:** Chief, Marine Mammal and Sea Turtle Conservation Division, Office of Protected Resources, NMFS, 1315 East-West Highway, Silver Spring, MD 20910.

**FOR FURTHER INFORMATION CONTACT:** Jaclyn Taylor, Office of Protected Resources, 301–427–8402; Allison Rosner, Greater Atlantic Region, 978–281–9328; Jessica Powell, Southeast Region, 727–824–5312; Dan Lawson, West Coast Region, 206–526–4740; Suzie Teerlink, Alaska Region, 907–586–7240; Diana Kramer, Pacific Islands Region, 808–725–5167. Individuals who use a telecommunications device for the hearing impaired may call the Federal Information Relay Service at 1–800–877–8339 between 8 a.m. and 4 p.m. Eastern time, Monday through Friday, excluding Federal holidays.

**SUPPLEMENTARY INFORMATION:**

### What is the List of Fisheries?

Section 118 of the MMPA requires NMFS to place all U.S. commercial fisheries into one of three categories based on the level of incidental mortality and serious injury of marine mammals occurring in each fishery (16 U.S.C. 1387(c)(1)). The classification of a fishery on the LOF determines whether participants in that fishery may be required to comply with certain provisions of the MMPA, such as registration, observer coverage, and take reduction plan requirements. NMFS must reexamine the LOF annually, considering new information in the Marine Mammal Stock Assessment Reports (SARs) and other relevant sources, and publish in the **Federal Register** any necessary changes to the LOF after notice and opportunity for public comment (16 U.S.C. 1387 (c)(1)(C)).

**How does NMFS determine in which category a fishery is placed?**

The definitions for the fishery classification criteria can be found in the implementing regulations for section 118 of the MMPA (50 CFR 229.2). The criteria are also summarized here.

**Fishery Classification Criteria**

The fishery classification criteria consist of a two-tiered, stock-specific approach that first addresses the total impact of all fisheries on each marine mammal stock and then addresses the impact of individual fisheries on each stock. This approach is based on consideration of the rate, in numbers of animals per year, of incidental mortalities and serious injuries of marine mammals due to commercial fishing operations relative to the potential biological removal (PBR) level for each marine mammal stock. The MMPA (16 U.S.C. 1362 (20)) defines the PBR level as the maximum number of animals, not including natural mortalities, that may be removed from a marine mammal stock while allowing that stock to reach or maintain its optimum sustainable population (OSP). This definition can also be found in the implementing regulations for section 118 of the MMPA (50 CFR 229.2).

*Tier 1:* Tier 1 considers the cumulative fishery mortality and serious injury for a particular stock. If the total annual mortality and serious injury of a marine mammal stock, across all fisheries, is less than or equal to 10 percent of the PBR level of the stock, all fisheries interacting with the stock will be placed in Category III (unless those fisheries interact with other stock(s) for which total annual mortality and serious injury is greater than 10 percent of PBR). Otherwise, these fisheries are subject to the next tier (Tier 2) of analysis to determine their classification.

*Tier 2:* Tier 2 considers fishery-specific mortality and serious injury for a particular stock.

*Category I:* Annual mortality and serious injury of a stock in a given fishery is greater than or equal to 50 percent of the PBR level (*i.e.,* frequent incidental mortality and serious injury of marine mammals).

*Category II:* Annual mortality and serious injury of a stock in a given fishery is greater than 1 percent and less than 50 percent of the PBR level (*i.e.,* occasional incidental mortality and serious injury of marine mammals).

*Category III:* Annual mortality and serious injury of a stock in a given fishery is less than or equal to 1 percent of the PBR level (*i.e.,* a remote likelihood of or no known incidental mortality and serious injury of marine mammals).

Additional details regarding how the categories were determined are provided in the preamble to the final rule implementing section 118 of the MMPA (60 FR 45086; August 30, 1995).

Because fisheries are classified on a per-stock basis, a fishery may qualify as one category for one marine mammal stock and another category for a different marine mammal stock. A fishery is typically classified on the LOF at its highest level of classification (*e.g.,* a fishery qualifying for Category III for one marine mammal stock and for Category II for another marine mammal stock will be listed under Category II). Stocks driving a fishery's classification are denoted with a superscript ''1'' in Tables 1 and 2.

**Other Criteria That May Be Considered**

The tier analysis requires a minimum amount of data, and NMFS does not have sufficient data to perform a tier analysis on certain fisheries. Therefore, NMFS has classified certain fisheries by analogy to other fisheries that use similar fishing techniques or gear that are known to cause mortality or serious injury of marine mammals, or according to factors discussed in the final LOF for 1996 (60 FR 67063; December 28, 1995) and listed in the regulatory definition of a Category II fishery. In the absence of reliable information indicating the frequency of incidental mortality and serious injury of marine mammals by a commercial fishery, NMFS will determine whether the incidental mortality or serious injury is ''occasional'' by evaluating other factors such as fishing techniques, gear used, methods used to deter marine mammals, target species, seasons and areas fished, qualitative data from logbooks or fishermen reports, stranding data, and the species and distribution of marine mammals in the area, or at the discretion of the Assistant Administrator for Fisheries (50 CFR 229.2).

Further, eligible commercial fisheries not specifically identified on the LOF are deemed to be Category II fisheries until the next LOF is published (50 CFR 229.2).

**How does NMFS determine which species or stocks are included as incidentally killed or injured in a fishery?**

The LOF includes a list of marine mammal species and/or stocks incidentally killed or injured in each commercial fishery. The list of species and/or stocks incidentally killed or injured includes ''serious'' and ''non-serious'' documented injuries as described later in the *List of Species and/or Stocks Incidentally Killed or Injured in the Pacific Ocean* and *List of Species and/or Stocks Incidentally Killed or Injured in the Atlantic Ocean, Gulf of Mexico, and Caribbean* sections. To determine which species or stocks are included as incidentally killed or injured in a fishery, NMFS annually reviews the information presented in the current SARs and injury determination reports. SARs are brief reports summarizing the status of each stock of marine mammals occurring in waters under U.S. jurisdiction, including information on the identity and geographic range of the stock, population statistics related to abundance, trend, and annual productivity, notable habitat concerns, and estimates of human-caused mortality and serious injury (M/SI) by source. The SARs are based upon the best available scientific information and provide the most current and inclusive information on each stock's PBR level and level of interaction with commercial fishing operations. The best available scientific information used in the SARs and reviewed for the 2021 LOF generally summarizes data from 2013–2017. NMFS also reviews other sources of new information, including injury determination reports, bycatch estimation reports, observer data, logbook data, stranding data, disentanglement network data, fishermen self-reports (*i.e.,* MMPA mortality/injury reports), and anecdotal reports from that time period. In some cases, more recent information may be available and used in the LOF.

For fisheries with observer coverage, species or stocks are generally removed from the list of marine mammal species and/or stocks incidentally killed or injured if no interactions are documented in the 5-year timeframe summarized in that year's LOF. For fisheries with no observer coverage and for observed fisheries with evidence indicating that undocumented interactions may be occurring (*e.g.,* fishery has low observer coverage and stranding network data include evidence of fisheries interactions that cannot be attributed to a specific fishery) species and stocks may be retained for longer than 5 years. For these fisheries, NMFS will review the other sources of information listed above and use its discretion to decide when it is appropriate to remove a species or stock.

**Where does NMFS obtain information on the level of observer coverage in a fishery on the LOF?**

The best available information on the level of observer coverage and the spatial and temporal distribution of observed marine mammal interactions is presented in the SARs. Data obtained from the observer program and observer coverage levels are important tools in estimating the level of marine mammal mortality and serious injury in commercial fishing operations. Starting with the 2005 SARs, each Pacific and Alaska SAR includes an appendix with detailed descriptions of each Category I and II fishery on the LOF, including the observer coverage in those fisheries. For Atlantic fisheries, this information can be found in the LOF Fishery Fact Sheets. The SARs do not provide detailed information on observer coverage in Category III fisheries because, under the MMPA, Category III fisheries are not required to accommodate observers aboard vessels due to the remote likelihood of mortality and serious injury of marine mammals. Fishery information presented in the SARs' appendices and other resources referenced during the tier analysis may include: Level of observer coverage; target species; levels of fishing effort; spatial and temporal distribution of fishing effort; characteristics of fishing gear and operations; management and regulations; and interactions with marine mammals. Copies of the SARs are available on the NMFS Office of Protected Resources website at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessment-reports-region.* Information on observer coverage levels in Category I, II, and III fisheries can be found in the fishery fact sheets on the NMFS Office of Protected Resources' website: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/list-fisheries-summary-tables.* Additional information on observer programs in commercial fisheries can be found on the NMFS National Observer Program's website: *https://www.fisheries.noaa.gov/national/fisheries-observers/national-observer-program.*

**How do I find out if a specific fishery is in Category I, II, or III?**

The LOF includes three tables that list all U.S. commercial fisheries by Category. Table 1 lists all of the commercial fisheries in the Pacific Ocean (including Alaska); Table 2 lists all of the commercial fisheries in the Atlantic Ocean, Gulf of Mexico, and Caribbean; and Table 3 lists all U.S. authorized commercial fisheries on the high seas. A fourth table, Table 4, lists all commercial fisheries managed under applicable TRPs or take reduction teams (TRT).

**Are high seas fisheries included on the LOF?**

Beginning with the 2009 LOF, NMFS includes high seas fisheries in Table 3 of the LOF, along with the number of valid High Seas Fishing Compliance Act (HSFCA) permits in each fishery. As of 2004, NMFS issues HSFCA permits only for high seas fisheries analyzed in accordance with the National Environmental Policy Act (NEPA) and the Endangered Species Act (ESA). The authorized high seas fisheries are broad in scope and encompass multiple specific fisheries identified by gear type. For the purposes of the LOF, the high seas fisheries are subdivided based on gear type (*e.g.,* trawl, longline, purse seine, gillnet, troll, etc.) to provide more detail on composition of effort within these fisheries. Many fisheries operate in both U.S. waters and on the high seas, creating some overlap between the fisheries listed in Tables 1 and 2 and those in Table 3. In these cases, the high seas component of the fishery is not considered a separate fishery, but an extension of a fishery operating within U.S. waters (listed in Table 1 or 2). NMFS designates those fisheries in Tables 1, 2, and 3 with an asterisk (*) after the fishery's name. The number of HSFCA permits listed in Table 3 for the high seas components of these fisheries operating in U.S. waters does not necessarily represent additional effort that is not accounted for in Tables 1 and 2. Many vessels/participants holding HSFCA permits also fish within U.S. waters and are included in the number of vessels and participants operating within those fisheries in Tables 1 and 2.

HSFCA permits are valid for 5 years, during which time Fishery Management Plans (FMPs) can change. Therefore, some vessels/participants may possess valid HSFCA permits without the ability to fish under the permit because it was issued for a gear type that is no longer authorized under the most current FMP. For this reason, the number of HSFCA permits displayed in Table 3 is likely higher than the actual U.S. fishing effort on the high seas. For more information on how NMFS classifies high seas fisheries on the LOF, see the preamble text in the final 2009 LOF (73 FR 73032; December 1, 2008). Additional information about HSFCA permits can be found at *https://www.fisheries.noaa.gov/permit/high-seas-fishing-permits.*

**Where can I find specific information on fisheries listed on the LOF?**

Starting with the 2010 LOF, NMFS developed summary documents, or fishery fact sheets, for each Category I and II fishery on the LOF. These fishery fact sheets provide the full history of each Category I and II fishery, including: When the fishery was added to the LOF; the basis for the fishery's initial classification; classification changes to the fishery; changes to the list of species and/or stocks incidentally killed or injured in the fishery; fishery gear and methods used; observer coverage levels; fishery management and regulation; and applicable TRPs or TRTs, if any. These fishery fact sheets are updated after each final LOF and can be found under ''How Do I Find Out if a Specific Fishery is in Category I, II, or III?'' on the NMFS Office of Protected Resources' website: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-protection-act-list-fisheries,* linked to the ''List of Fisheries Summary'' table. NMFS is developing similar fishery fact sheets for each Category III fishery on the LOF. However, due to the large number of Category III fisheries on the LOF and the lack of accessible and detailed information on many of these fisheries, the development of these fishery fact sheets is taking significant time to complete. NMFS began posting Category III fishery fact sheets online with the LOF for 2016.

**Am I required to register under the MMPA?**

Owners of vessels or gear engaging in a Category I or II fishery are required under the MMPA (16 U.S.C. 1387(c)(2)), as described in 50 CFR 229.4, to register with NMFS and obtain a marine mammal authorization to lawfully take non-endangered and non-threatened marine mammals incidental to commercial fishing operations. Owners of vessels or gear engaged in a Category III fishery are not required to register with NMFS or obtain a marine mammal authorization.

**How do I register, renew and receive my Marine Mammal Authorization Program authorization certificate?**

NMFS has integrated the MMPA registration process, implemented through the Marine Mammal Authorization Program (MMAP), with existing state and Federal fishery license, registration, or permit systems for Category I and II fisheries on the LOF. Participants in these fisheries are automatically registered under the MMAP and are not required to submit registration or renewal materials.

In the Pacific Islands, West Coast, and Alaska regions, NMFS will issue vessel or gear owners an authorization certificate via U.S. mail or with their state or Federal license or permit at the time of issuance or renewal. In the Greater Atlantic and Southeast Regions, NMFS will issue vessel or gear owners an authorization certificate via U.S. mail automatically at the beginning of each calendar year.

Vessel or gear owners who participate in fisheries in these regions and have not received authorization certificates by the beginning of the calendar year, or with renewed fishing licenses, must contact the appropriate NMFS Regional Office (see **FOR FURTHER INFORMATION**). Authorization certificates may also be obtained by visiting the MMAP website *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-authorization-program#obtaining-a-marine-mammal-authorization-certificate.*

The authorization certificate, or a copy, must be on board the vessel while it is operating in a Category I or II fishery, or for non-vessel fisheries, in the possession of the person in charge of the fishing operation (50 CFR 229.4(e)). Although efforts are made to limit the issuance of authorization certificates to only those vessel or gear owners that participate in Category I or II fisheries, not all state and Federal license or permit systems distinguish between fisheries as classified by the LOF. Therefore, some vessel or gear owners in Category III fisheries may receive authorization certificates even though they are not required for Category III fisheries.

Individuals fishing in Category I and II fisheries for which no state or Federal license or permit is required must register with NMFS by contacting their appropriate Regional Office (see **ADDRESSES**).

In recognition of logistical challenges with certificate issuance related to the ongoing COVID–19 pandemic, the MMAP certificate issued in 2020 remains in effect, valid through December 31, 2021, for vessel or gear owners participating in all Category I and II fisheries as of the final 2021 LOF. 2020 certificates may be retained or replacements downloaded from *https://go.usa.gov/xArUW.* Vessel or gear owners participating in previous Category III fisheries reclassified as a Category II fishery in this final 2021 LOF can obtain their MMAP certificate on our website *https://go.usa.gov/xArUW.*

**Am I required to submit reports when I kill or injure a marine mammal during the course of commercial fishing operations?**

In accordance with the MMPA (16 U.S.C. 1387(e)) and 50 CFR 229.6, any vessel owner or operator, or gear owner or operator (in the case of non-vessel fisheries), participating in a fishery listed on the LOF must report to NMFS all incidental mortalities and injuries of marine mammals that occur during commercial fishing operations, regardless of the category in which the fishery is placed (I, II, or III) within 48 hours of the end of the fishing trip or, in the case of non-vessel fisheries, fishing activity. ''Injury'' is defined in 50 CFR 229.2 as a wound or other physical harm. In addition, any animal that ingests fishing gear or any animal that is released with fishing gear entangling, trailing, or perforating any part of the body is considered injured, regardless of the presence of any wound or other evidence of injury, and must be reported.

Mortality/injury reporting forms and instructions for submitting forms to NMFS can be found at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-authorization-program#reporting-a-death-or-injury-of-a-marine-mammal-during-commercial-fishing-operations* or by contacting the appropriate regional office (see **FOR FURTHER INFORMATION**). Forms may be submitted via any of the following means: (1) Online using the electronic form; (2) emailed as an attachment to *nmfs.mireport@noaa.gov;* (3) faxed to the NMFS Office of Protected Resources at 301–713–0376; or (4) mailed to the NMFS Office of Protected Resources (mailing address is provided on the postage-paid form that can be printed from the web address listed above). Reporting requirements and procedures are found in 50 CFR 229.6.

**Am I required to take an observer aboard my vessel?**

Individuals participating in a Category I or II fishery are required to accommodate an observer aboard their vessel(s) upon request from NMFS. MMPA section 118 states that the Secretary is not required to place an observer on a vessel if the facilities for quartering an observer or performing observer functions are so inadequate or unsafe that the health or safety of the observer or the safe operation of the vessel would be jeopardized; thereby authorizing the exemption of vessels too small to safely accommodate an observer from this requirement. However, U.S. Atlantic Ocean, Caribbean, or Gulf of Mexico large pelagics longline vessels operating in special areas designated by the Pelagic Longline Take Reduction Plan implementing regulations (50 CFR 229.36(d)) will not be exempted from observer requirements, regardless of their size. Observer requirements are found in 50 CFR 229.7.

**Am I required to comply with any marine mammal TRP regulations?**

Table 4 provides a list of fisheries affected by TRPs and TRTs. TRP regulations are found at 50 CFR 229.30 through 229.37. A description of each TRT and copies of each TRP can be found at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-take-reduction-plans-and-teams.* It is the responsibility of fishery participants to comply with applicable take reduction regulations.

**Where can I find more information about the LOF and the MMAP?**

Information regarding the LOF and the MMAP, including registration procedures and forms; current and past LOFs; descriptions of each Category I and II fishery and some Category III fisheries; observer requirements; and marine mammal mortality/injury reporting forms and submittal procedures; may be obtained at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-protection-act-list-fisheries,* or from any NMFS Regional Office at the addresses listed below:

NMFS, Greater Atlantic Regional Fisheries Office, 55 Great Republic Drive, Gloucester, MA 01930–2298, Attn: Allison Rosner;

NMFS, Southeast Region, 263 13th Avenue South, St. Petersburg, FL 33701, Attn: Jessica Powell;

NMFS, West Coast Region, Long Beach Office, 501 W. Ocean Blvd., Suite 4200, Long Beach, CA 90802–4213, Attn: Dan Lawson;

NMFS, Alaska Region, Protected Resources, P.O. Box 22668, 709 West 9th Street, Juneau, AK 99802, Attn: Suzie Teerlink; or

NMFS, Pacific Islands Regional Office, Protected Resources Division, 1845 Wasp Blvd., Building 176, Honolulu, HI 96818, Attn: Diana Kramer.

**Sources of Information Reviewed for the 2021 LOF**

NMFS reviewed the marine mammal incidental mortality and serious injury information presented in the SARs for all fisheries to determine whether changes in fishery classification are warranted. The SARs are based on the best scientific information available at the time of preparation, including the level of mortality and serious injury of marine mammals that occurs incidental to commercial fishery operations and the PBR levels of marine mammal stocks. The information contained in the SARs is reviewed by regional Scientific Review Groups (SRGs) representing Alaska, the Pacific (including Hawaii), and the U.S. Atlantic, Gulf of Mexico, and Caribbean. The SRGs were established by the MMPA to review the science that informs the SARs, and to advise NMFS on marine mammal population status, trends, and stock structure, uncertainties in the science, research needs, and other issues.

NMFS also reviewed other sources of new information, including marine mammal stranding and entanglement data, observer program data, fishermen self-reports, reports to the SRGs, conference papers, FMPs, and ESA documents.

The LOF for 2021 was based on, among other things, stranding data; fishermen self-reports; and SARs, primarily the 2019 SARs, which are based on data from 2013–2017. The SARs referenced in this LOF include: 2016 (82 FR 29039; June 27, 2017), 2018 (84 FR 28489; June 19, 2019), and 2019 (84 FR 65353; November 27, 2019). The SARs are available at: *https://www.fisheries.noaa.gov/national/marine-mammal-protection/marine-mammal-stock-assessment-reports-region.*

**Comments and Responses**

NMFS received nine comment letters on the proposed LOF for 2021 (85 FR 59258; September 21, 2020). Comments were received from members of the public, Atlantic Offshore Lobstermen's Association (AOLA), Freezer Longline Coalition (FLC), Hawaii Longline Association (HLA), Maine Lobstermen's Association (MLA), Massachusetts Division of Marine Fisheries (MA DMF), Marine Mammal Commission (Commission) and Whale Safe USA. Responses to substantive comments are below; comments on actions not related to the LOF are not included.

*General Comments*

*Comment 1:* A commenter recommends that NMFS require Category III fisheries to accommodate observers aboard vessels in order to expand data collection on marine mammal bycatch in fisheries.

*Response:* MMPA section 118 requires individuals participating in a Category I or II fishery to accommodate an observer aboard their vessel(s) upon request from NMFS. In addition, MMPA section 118(d)(7) provides NMFS, with the consent by the vessel owner, the ability to place an observer on board a vessel participating in Category III fisheries (50 CFR 229.7(d)). The MMPA and implementing regulations (50 CFR 229.6) also include a marine mammal mortality and injury reporting requirement for all Category I, II and III fisheries. Any vessel owner or operator participating in a fishery listed on the LOF must report to NMFS all incidental mortalities and injuries of marine mammals that occur during commercial fishing operations within 48 hours of the end of the fishing trip.

*Comments on Commercial Fisheries in the Pacific Ocean*

*Comment 2:* FLC recommends NMFS reclassify the AK Bering Sea, Aleutian Islands (BSAI) Pacific cod longline fishery from a Category II to Category III. They note that the following marine mammal stocks are included on the list of species/stocks incidentally killed or injured in the BSAI Pacific cod longline fishery: Killer whale (Eastern North Pacific AK resident); killer whale (Gulf of Alaska, BSAI transient); Northern fur seal (Eastern Pacific); spotted seal (AK) and Steller sea lion (Western U.S). FLC provides evidence that from 2013 through 2017 the only marine mammal stock incidentally killed or injured in the BSAI Pacific cod longline fishery was the Western U.S. stock of Steller sea lions and these did not result in annual M/SI greater than 1 percent of the stock's PBR level.

FLC also states that the BSAI Pacific cod longline fishery is currently classified as a Category II based on a killer whale M/SI in 2012. They note that this M/SI is assigned to both the resident and transient stocks of killer whales and is outside the 5 year timeframe (2013–2017) of the 2021 LOF. Therefore, FLC recommends that the BSAI Pacific cod longline fishery be reclassified as a Category III fishery.

*Response:* NMFS reviewed the information provided and agrees with FLC. One killer whale (Gulf of Alaska, BSAI transient stock) M/SI was driving the Category II classification of the BSAI Pacific cod longline fishery. This killer whale M/SI occurred in 2012, and no additional M/SI have been observed or reported for the 2013–2017 data analysis timeframe for this fishery. Therefore, NMFS reclassifies the AK BSAI Pacific cod longline fishery from a Category II to a Category III fishery in this final rule. NMFS also removes both the Eastern North Pacific AK resident stock and Gulf of Alaska, BSAI transient stock of killer whales from the list of species and/or stocks incidentally killed or injured in the BSAI Pacific cod longline fishery.

*Comment 3:* FLC recommends NMFS re-evaluate how a single marine mammal M/SI is assigned to multiple stocks when stock ranges overlap. They state that the M/SI should be distributed between stocks based on the relative proportion of the population of the two stocks combined.

As noted in the 2016 SAR (Muto *et al.,* 2017), the 2012 killer whale M/SI in the BSAI Pacific cod longline fishery was assigned to both the resident and transient stocks of killer whale, given no genetic samples were collected and the overlap in the range of the two stocks in Alaska waters. FLC further states that NMFS attributes the single M/SI to both stocks equally. However, the probability of encountering either stock is not 100 percent, but proportional to the relative population of the stocks throughout the range. The commenter notes that revising the single M/SI between both killer whale stocks (based on probability of encounter) would distribute the single 2012 M/SI in the BSAI Pacific cod longline fishery from 100 percent for both stocks to 80 percent to the resident stock and 20 percent to the transient stock.

*Response:* The SARs are drafted according to NMFS' ''Guidelines for Preparing Stock Assessment Reports Pursuant to the 1994 Amendments to the MMPA'' (NMFS 2016, 02–204–01). This provides directives for consistently assigning M/SI to stocks, including times when the M/SI is documented in an area of overlapping stocks. Because there were no data to indicate specific stock or reliable data that could be used to partition the 2012 killer whale M/SI, the M/SI was assigned to both stocks as prescribed by NMFS' ''Guidelines for Preparing Stock Assessment Reports Pursuant to the 1994 Amendments to the MMPA''.

*Comment 4:* FLC requests that NMFS update the LOF fishery fact sheet for the Category II BSAI Pacific cod longline fishery. The LOF fishery fact sheet for the BSAI Pacific cod longline fishery has an incorrect description for the observer coverage in both the catcher processor and catcher vessel longline sectors. The description of observer coverage included in the LOF fishery fact sheet is outdated and does not reflect the Observer Program structuring for catcher processor and catcher vessels sectors since 2012.

*Response:* NMFS thanks FLC for bringing to our attention that the observer coverage information in the AK BSAI Pacific cod longline fishery fact sheet on NMFS' website needs updating. The fishery fact sheets summarize LOF classification information for the public and we will review and correct this error.

*Comment 5:* The Commission restates a previous comment and recommends NMFS reclassify both the Category II SE Alaska salmon drift gillnet and Yakutat salmon set gillnet fisheries as Category I fisheries. The Commission previously noted that the 2016 SAR for the Southeast Alaska stock of harbor porpoise reported a population-size estimate of 975 and an estimated minimum population size (Nmin) of 896, which produced a PBR of 8.9 animals. That 2016 SAR also reported a total annual M/SI estimate of 34 animals for the two fisheries combined. The Commission states that the estimated annual M/SI has not changed, and although the stock's PBR increased to 12 in the 2019 SAR, fishery-related M/SI still exceed PBR by nearly threefold.

The Commission states that the clearer case can be made for reclassifying the Category II SE Alaska salmon drift gillnet fishery as a Category I fishery. They note that the estimated annual harbor porpoise M/SI in the SE Alaska salmon drift gillnet fishery included the 2019 SAR is 12 animals which equals PBR for the stock and exceeds the Category I classification threshold of 50 percent of PBR. The Commission continues to state that this M/SI estimate is based on data collected in salmon management areas 6–8 in 2012 and 2013, and is a conservative estimate since salmon management areas 6–8 comprise only a small portion of the total area surveyed.

The Commission notes that is more difficult to address the harbor porpoise M/SI in Category II Yakutat salmon set gillnet because there is a geographical disconnect between where observer data was collected and the population surveys were conducted. Thus, the comparison of the estimated annual M/SI does not provide a meaningful basis for classifying this fishery, given the likely population structure found in the Southeast Alaska (SEAK) harbor porpoise stock, as described in the 2019 SAR. Therefore, the Commission reiterates its recommendation that NMFS reclassify the SE Alaska salmon drift gillnet as a Category I fishery.

*Response:* This comment has been addressed previously (see 85 FR 21079, April 16, 2020). The PBR level for the SEAK harbor porpoise stock was estimated based on a survey that covered only a portion of the currently-recognized distribution of this stock, and it included commercial fishery M/SI that occurred far north of the surveyed areas. Over the last year, NMFS has made substantial progress in analyzing genetic data to resolve stock structure of harbor porpoise in Southeast Alaska. Once finalized, the analysis of these data will be helpful in addressing management concerns related to SEAK harbor porpoise and effects from commercial fishing. NMFS continues to pursue options for additional observer coverage to collect more recent and more geographically comprehensive data on mortality in Alaska's state fisheries, and we will prioritize observation of the Southeast Alaska drift gillnet fishery. For the 2021 LOF, NMFS retains the Category II classification for the Yakutat salmon set gillnet and SE Alaska salmon drift gillnet fisheries until more data are available.

*Comment 6:* HLA restates a previous comment recommending NMFS remove the Main Hawaiian Islands (MHI) insular and Northwestern Hawaiian Islands (NWHI) stocks of false killer whales from the list of species and/or stocks incidentally killed or injured in the Category I Hawaii deep-set longline fishery. HLA notes that (a) the False Killer Whale Take Reduction Plan (FKWTRP) closed the deep-set longline fishery for almost the entire range of the MHI insular stock, (b) since this change was made in 2013 there have been no false killer whale interactions in the fishery, and (c) there has never been a deep-set longline fishery interaction in the very small area of the stocks' range where the fishery operates. The commenter also states that no information has been presented to the False Killer Whale TRT or the Pacific Scientific Review Group suggesting any false killer whale interactions in the deep-set fishery can reliably be attributed to the Insular or NWHI stocks of false killer whales. HLA requests that NMFS remove the MHI insular and NWHI stocks of false killer whales from the list of species and/or stocks incidentally killed or injured in the Category I Hawaii deep-set longline fishery.

*Response:* This comment has been addressed previously (see 84 FR 22051, May 16, 2019; 85 FR 21079, April 16, 2020). The MHI insular stock of false killer whales have been documented via telemetry to move far enough offshore to reach longline fishing areas (Bradford *et al.,* 2015). The MHI insular, Hawaii pelagic, and NWHI stocks have partially overlapping ranges. MHI insular false killer whales have been satellite tracked as far as 115 km from the MHI, while pelagic stock animals have been tracked to within 11 kilometers (km) of the MHI and throughout the NWHI. Thus, M/SI of false killer whales of unknown stock within the stock overlap zones must be prorated to MHI insular, pelagic, or NWHI stocks. Annual bycatch estimates are prorated using a process outlined in detail in the SARs, which account for M/SI that occur within the MHI-pelagic or NWHI-pelagic overlap zones.

For observed fisheries with evidence indicating that undocumented interactions may be occurring (*e.g.,* fishery has evidence of fisheries interactions that cannot be attributed to a specific fishery, and stranding network data include evidence of fisheries interactions that cannot be attributed to a specific fishery), stocks may be retained on the LOF for longer than 5 years. For these fisheries, NMFS will review the other sources of relevant information to determine when it is appropriate to remove a species or stock from the LOF. As described in the 2019 LOF (84 FR 22051, May 16, 2019), six false killer whale M/SI incidental to the deep-set longline fishery were observed inside the exclusive economic zone (EEZ) around Hawaii, including three that occurred close to the outer boundary of the Main Hawaiian Islands Longline Fishing Prohibited Area, in close proximity to the outer boundary of the MHI Insular false killer whale stocks' range. Also, MHI Insular false killer whale range overlaps with areas that are open to deep-set longline fishing and MHI Insular false killer whales have been documented with injuries consistent with fisheries interactions that have not been attributed to a specific fishery (Baird *et al.,* 2014). Additionally, in August 2020, NMFS reopened the Southern Exclusion Zone to Hawaii deep-set longline fishing (85 FR 50959, August 19, 2020).

In addition to the SARs, NMFS also reviews other sources of new information for the LOF, including injury determination reports, bycatch estimation reports, and observer data. In some cases, more recent information may be available and used in the LOF. In January 2019, there was an observed mortality of a false killer whale incidental to the Hawaii deep-set longline fishery that occurred within the range of the NWHI stock. Therefore, NMFS retains both the MHI insular and NWHI false killer whale stocks on the list of species and/or stocks incidentally killed or injured in the Category I Hawaii deep-set longline fishery.

*Comment 7:* HLA restates a previous comment opposing the inclusion of the Hawaii stocks of *Kogia* species (pygmy or dwarf sperm whales) on the list of species and/or stocks incidentally killed or injured in the Category I HI deep-set longline fishery. HLA requests that NMFS remove *Kogia* species from the list of species and/or stocks incidentally killed or injured in the deep-set longline fishery because SARs for the two stock does not include M/SI in the deep-set fishery.

*Response:* This comment has been addressed previously (see 84 FR 22051, May 16, 2019). The 2021 LOF generally summarizes data from 2013–2017, and in addition to the SARs, the LOF also reviews other sources of information, including injury determination reports and observer data. In February 2014, there was an observed interaction with a pygmy sperm whale (*Kogia breviceps*) in the Category I HI deep-set longline fishery. Therefore, NMFS retains *Kogia* on the list of species and/or stocks incidentally killed or injured in the Category I HI deep-set longline fishery.

*Comment 8:* HLA recommends NMFS remove the Central North Pacific humpback whale stock from the list of species and/or stocks incidentally killed or injured in the Category II HI shallow-set longline fishery. HLA states that the proposed 2021 LOF includes the Central North Pacific stock of humpback whales on the list of species and/or stocks incidentally killed or injured from the Category II HI shallow-set longline fishery, but the most recent SAR does not identify M/SI in the shallow-set fishery. The HI shallow-set longline fishery has 100 percent observer coverage and therefore, the Central North Pacific stock of humpback whale stock should be removed the list of species and/or stocks incidentally killed or injured in the Category II HI shallow-set longline fishery.

*Response:* In addition to the M/SI included in the SARs, the LOF references data from injury determination reports, bycatch estimation reports, observer data, logbook data, stranding data, disentanglement network data, fishermen self-reports, and anecdotal reports. In March 2015, there was an observed humpback whale, Central North Pacific stock, injury in the Category II Hawaii shallow-set longline fishery. The injury was determined to be non-serious. Due to the observed injury, the Central North Pacific stock of humpback whale is retained on the list of species and/or stocks incidentally killed or injured in the Category II HI shallow-set longline fishery.

*Comment 9:* The Commission recommends that NMFS reclassify the Category III Hawaii troll fishery as a Category II fishery. The Commission states that NMFS proposed to reclassify the Category III Hawaii charter vessel fishery, which is primarily a troll fishery, and the HI trolling, rod and reel fisheries as Category II fisheries in the 2012 LOF (76 FR 37716, June 28, 2011). In the proposed rule, NMFS based the proposed change on reports of hooking spotted dolphins, and information on the prevalence of vessels from these fisheries targeting Pantropical spotted dolphin pods. NMFS estimated that M/SI would be, at a minimum, approximately 2 percent of PBR, justifying the Category II classifications for both fisheries. The Commission notes the final 2012 LOF (76 FR 73912, November 29, 2011) did not finalize the fishery proposed reclassifications.

The Commission states that implementing regulations allow for NMFS, in the absence of reliable estimates of the M/SI, to determine whether M/SI occurs 'not at all or with a remote likelihood' (Category III), 'occasionally' (Category II), or 'frequently' based on analogy to similar fisheries. This is the approach NMFS took this approach in 2012 proposed LOF.

The Commission also notes that the case for reclassifying the troll fisheries as Category II fisheries has strengthened since serious injuries due to hooking or entanglement in fishing line have been documented, and reliable estimates of rates of troll vessels fishing in and through spotted dolphin groups have been published (Baird and Webster, 2020). In addition, the spotted dolphin stock considered in 2011, was later split into four stocks (three insular and one pelagic) in the 2013 SAR, and each of the insular stocks is likely to have a smaller PBR than the estimates used in 2012 proposed LOF. Given NMFS's assessment in 2012 proposed LOF that interactions were likely 'occasional', combined with more recent information, the Commission recommends that NMFS reclassify the Category III Hawaii troll fishery as a Category II fishery.

*Response:* As noted by the Commission, there are four stocks of pantropical spotted dolphins in the Hawaii Islands region: Oahu stock, 4-Islands stock, Hawaii Island stock, and Hawaii pelagic stock. In 2014, one pantropical spotted dolphin from the Hawaii Island stock was observed hooked above the jaw and trailing 8–10 feet of fishing line (Bradford and Lyman, 2018). In 2017, a spotted dolphin from the 4-Islands stock was observed with a band of debris around its rostrum preventing it from opening its mouth (Bradford and Lyman, 2019). Both of these injuries are considered serious injuries and the responsible fishery is not known for either case. In addition, of the four pantropical spotted dolphin stocks, only the Hawaii pelagic stock has a minimum population estimate and resulting PBR.

Without known M/SI attributed to the HI troll fishery, and a minimum population estimate and PBR for only one of the four stocks, we evaluated classification of the fishery by analogy. However, in reviewing available data, there are no documented mortalities or injuries of pantropical spotted dolphins in similar fisheries. There are no current data on interactions with pantropical dolphins (or other dolphin species) in any other Pacific Ocean commercial troll fisheries. In other stocks of pantropical dolphins, the only documented fishery-related M/SI in the Northern Gulf of Mexico stock of pantropical are incidental to the pelagic longline fishery (2015 SAR). The Western North Atlantic stock of pantropical spotted dolphins' total annual estimated fishery-related M/SI is presumed to be zero, as there were no reports of mortalities or serious injuries (2019 SAR). There are no documented interactions with pantropical spotted dolphins in commercial troll fisheries on the high seas (2020 LOF). Therefore, the HI troll fishery cannot be classified by analogy to other fisheries that use similar fishing techniques that are known to cause mortality or serious injury of pantropical spotted dolphins.

The mentioned study, (Baird and Webster, 2020) presented findings on the magnitude and nature of associations between fishing vessels and pantropical spotted dolphin stocks. The study did not estimate mortality or injury rates incidental to fisheries. Results of the study indicated that there is a high frequency of associations between troll and rod and reel fishing, and pantropical spotted dolphins, and in particular with the Hawaii Island stock. This information suggests hookings and/or entanglements may occur, and the fishing technique of trolling through groups and repositioning presents a heightened risk of hooking or entanglement to pantropical spotted dolphins. However, this information alone does not provide sufficient evidence with which to conclude that spotted dolphins are being seriously injured or killed on an ''occasional basis'' as necessary for a Category II fishery classification. Therefore, NMFS is retaining the Category III classification of the Hawaii troll fishery.

*Comments on Commercial Fisheries in the Atlantic Ocean, Gulf of Mexico, and Caribbean*

*Comment 10:* MLA states that NMFS has the flexibility to consider a variety of criteria, such as differences in gear and fishing techniques, and the distribution of endangered stocks relative to individual fisheries when classifying fisheries on the LOF. The commenter notes that the Maine state waters lobster fishery is managed and enforced by the state of Maine. While the Federal waters portion of the Maine lobster fishery is managed through the Atlantic States Marine Fisheries Commission as part of Lobster Management Area 1, it is also subject to further regulation and enforcement by the state of Maine through the Lobster Management Policy Councils. In addition, Maine's state and Federal waters lobstermen must declare a lobster zone and are required to fish the majority of gear in their home zone, limiting the spatial footprint of where individual lobstermen can set gear. MLA states that this requirement differentiates the Maine lobster fishery from all other lobster fisheries throughout the Northeast and mid-Atlantic.

*Response:* NMFS agrees that the Agency has the flexibility to separate out individual fisheries where it is appropriate; however, the commenter has not presented adequate information to substantiate any difference in risk that Maine state and Federal lobster fisheries pose to North Atlantic right whales, or other large whale species, that would warrant a current change in classification for these fisheries. As stated in the 2020 Final LOF (85 FR 21079, April 16, 2020), fisheries are classified based on the gear types used, how the gear is fished, and the behavior of the fishery related to the risk to marine mammals. Multiple states participate in the Northeast/mid-Atlantic American lobster trap/pot fishery, using a wide variety of gear and gear configurations throughout a large portion of coastal waters. While we recognize this variety within the fishery at large, there are not clear boundaries to divide gear use across the wider area as suggested by this comment. Importantly, the state of Maine does not use unique gear configurations from other states and gear configurations within Maine's waters are not uniform or divided across the geographic boundaries (*i.e.,* exemption lines) that MLA has identified. Further, gear marking and right whale monitoring efforts throughout Maine waters are insufficient to determine that the gear or area presents a different risk to large whales. Below we provide further detail as to why the information presented by the MLA is insufficient for the requested changes. At this time, we do not have enough information to suggest Maine's fisheries should be split from the Northeast/mid-Atlantic American lobster trap/pot fishery, because the gear used in Maine waters is not unique from other states.

While NMFS appreciates the state of Maine's efforts to manage the footprint of where individual lobstermen may set their gear, NMFS must look at the risk that the gear itself poses to large whales, particularly North Atlantic right whales. Current Maine state lobster management does not represent unique gear characteristics (*e.g.,* the use of weak rope exclusively or exclusion of vertical lines). In non-exempted waters, risk reduction can be calculated based on implemented changes to gear configurations, and if that risk reduction is substantial enough, NMFS could revisit the fishery classification in a future LOF.

*Comment 11:* MLA states that the NMFS Category I Northeast/mid-Atlantic American lobster trap/pot fishery does not accurately capture marine mammal interactions and risk. MLA recommends NMFS classify Maine's state and Federal water's lobster fisheries as unique fisheries, separate from the Category I Northeast/mid-Atlantic American lobster trap/pot fishery.

The commenter notes that in the absence of sufficient data to properly classify all fisheries, the MMPA provides that NMFS may evaluate other factors such as fishing techniques, gear used, methods used to deter marine mammals, target species, seasons and areas fished, qualitative data from logbooks or fishermen reports, stranding data, and the species and distribution of marine mammals in the area, or at the discretion of the Assistant Administrator for Fisheries. MLA further states that there are several factors with disparity among the Northeast and mid-Atlantic lobster fisheries, as well as significant differences in potential overlap with North Atlantic right whales. These differences among the lobster fisheries include: Fishing techniques, gear used, seasons and areas fished, fishermen's observations of right whales and distribution of marine mammals. MLA alleges that based on these factors, the lobster fishery prosecuted close to shore in Maine is significantly different than lobster fisheries which occur in offshore Lobster Management Area 3 or off of New Jersey.

MLA also alleges that Maine's state and Federal lobster fisheries do not meet the criteria of a Category I fishery under the MMPA. MLA recommends NMFS reclassify the Maine state waters lobster fishery as Category III fishery since there are no documented serious injuries or mortalities with this fishery, and NMFS determined that regulating the waters exempt from the Atlantic Large Whale Take Reduction Plan (ALWTRP) would have no significant benefit to large whales. MLA also recommends NMFS reclassify the Maine Federal waters lobster fishery as Category II fishery. MLA alleges there are no documented M/SI in the Maine Federal lobster fishery, but the Category II classification may be warranted under an abundance of precaution that a future interaction could occur due to the offshore migration of North Atlantic right whales.

MLA states that according to the 2019 North Atlantic right whale SAR, PBR is 0.8, and M/SI for commercial fisheries is 5.55. MLA's further analysis shows zero M/SI attributed to the Maine lobster fishery over this most recent 5 year period, while there were six documented cases in Canadian trap/pot fisheries. In addition, MLA alleges, there has been only one right whale entangled in Maine lobster gear in April 2002, and the entanglement was determined to be a non-serious injury. Maine gear was involved in a second case in 2004, but it was not the primary entangling gear in this case. The commenter states that there are four additional trap/pot entanglement cases that resulted in right whale M/SI for which a fishery was not determined and, therefore, for which the Maine lobster fishery cannot be completely ruled out. However, a close look at these cases reveals that the entangling gear is no longer fished, efforts to trace registration numbers to U.S. fishery were unsuccessful, or a Maine fishery was explicitly ruled out.

*Response:* NMFS uses the classification criteria described in the preamble to classify fisheries as Category I, Category II, or Category III. As noted, a fishery is classified under Category I if the annual M/SI of a stock in a given fishery is greater than or equal to 50 percent of the stock's PBR level. Additional details regarding categorization of fisheries is provided in the preamble to the final rule implementing section 118 of the MMPA (60 FR 45086; August 30, 1995).

As noted in the section of this rule and the LOF proposed rule describing how NMFS determines which species or stocks are included as incidentally killed or injured in a fishery, for fisheries with no observer coverage and for observed fisheries with evidence indicating that undocumented interactions may be occurring (*e.g.,* fishery has evidence of fisheries interactions that cannot be attributed to a specific fishery, and stranding network data include evidence of fisheries interactions that cannot be attributed to a specific fishery), stocks may be retained on the LOF for longer than 5 years. For these fisheries, NMFS will review the other sources of relevant information to determine when it is appropriate to remove a species or stock from the LOF.

At this time, we consider it appropriate to retain North Atlantic right whales as a species listed as driving the classification of the Northeast/mid-Atlantic lobster trap/pot fishery given that PBR is 0.8 and the further detail provided below, which reiterates responses provided in the 2020 Final LOF (85 FR 21079, April 16, 2020).

The commenter cites four cases of unknown entanglements they believe explicitly rule out Maine lobster fisheries from the origin of entanglement. However, the evidence presented is not sufficient to draw these conclusions. In one of the commenter's cited cases (E43–12/RW 4193), red tracers were identified in the recovered gear. Red tracers are indicative of the gear marking scheme required for the ALWTRP Northern Inshore Trap/Pot fishery management area, a management area that overlaps Maine, New Hampshire, and Massachusetts state waters. Therefore, it cannot be ruled out that the entanglement may have occurred off the coast of Maine in non-exempt waters. An additional case from 2011, previously noted in our 2020 Final LOF response to comments (85 FR 21079, April 16, 2020) but not mentioned in MLA's comment, also included recovered gear with these red tracers, though the location of that entanglement remains unknown (E11–11/RW 4040). Therefore, Maine lobster trap/pot fisheries cannot be ruled out as the potential origin for entanglements with undetermined origins.

We also note that two additional entanglements have been identified as Massachusetts lobster trap/pot entanglements (E36–16/RW 3623 and E25–09). This is relevant to the discussion since Maine state and Federal lobster fisheries are functionally equivalent to gear found in these entanglements; and, therefore, gear fished in Maine presents similar risks.

While floating groundline is prohibited in ALWTRP non-exempt management areas, there are waters along the east coast (including off the coast of Maine) that are exempted from this ALWTRP requirement. Therefore, the recovery of floating groundline from an entanglement does not explicitly rule out Maine lobster fisheries. For example, in case E25–10/RW 3911, the gear analysis found ''wire mesh is likely the remains of wire traps that parted off from themselves. This wire mesh, along with the 7/16 inch poly and associated gangions, is consistent with gear used in trap/pot fisheries conducted along the east coast of the U.S. and Canada'' (NMFS 2010 Large Whale Entanglement Report), which is consistent with some gear fished in exempted waters. Additionally, unless a rope diameter is explicitly prohibited in an area, rope diameter does not rule out the potential for an entanglement to have occurred in Maine waters, even if it does not represent the majority's normal fishing practices. Therefore, the 9/16 inch float rope that was recovered from E01–09/RW 3311, again, does not explicitly rule out Maine lobster fisheries.

With this request, the commenter is also not taking into consideration the high percentage of unidentified entanglements that are both first sighted in the U.S. and in Canada. Over the past 5 years, there have been 4.15 M/SI entanglements documented annually where the origin of the entanglement is unknown (Hayes *et al.,* 2020).

The sample size of recovered gear from entanglements is small and much of the retrieved gear is unmarked and cannot be attributed to a particular location. Currently, the state of Maine does not require gear marking in ALWTRP exempted areas. The lack of marks on retrieved gear may indicate the current marking scheme is inadequate, or that entanglements are occurring in areas where gear is not currently marked, such as international waters or current exempted areas. The state is currently pursuing a gear marking regime in these exempted waters that may provide additional data about entanglement risk in these areas in the future.

The commenter alleges ''There are zero instances of Maine lobster gear associated with a right whale serious injury or mortality in any data set, and only one known entanglement where Maine lobster was the primary entangling gear in 2002 resulting in non-serious injury determination.'' We recognize that there has only been one confirmed mortality (in 2012) in identified U.S. trap/pot gear in the past decade. Those cases where we could identify lobster gear from right whale entanglements during the past 10 years were determined to result in non-serious injuries. However, there have been a number of life-threatening entanglements since 2010 that have resulted in a non-serious injury due to disentanglement intervention. (Henry *et al.,* 2019). According to NMFS' ''Process for Distinguishing Serious from Non-Serious Injury of Marine Mammals (NMFS 2015, 02–238–01),'' cases that would have been serious injuries prior to disentanglement are not counted against PBR in the SAR, but they are included in the recorded takes for the LOF and associated management measures. Aerial surveys, whale watching boats, the presence of other fisheries, and the presence and associated outreach by a disentanglement team contribute to the higher reporting of entanglement sightings in certain areas (*i.e.,* Massachusetts) than in Maine state and offshore waters; we cannot conclude that risk is nonexistent in other areas where entanglements are not observed. With 85 percent of all observed right whales exhibiting entanglement scars, it is likely that entanglements are indeed occurring in areas where entanglements have not yet been observed and/or reported.

NMFS will continue to annually evaluate marine mammal interactions and risk posed by a variety of gear types and fisheries through the LOF process. As stated previously, should information suggest that unique gear characteristics have lowered the risk of interaction in a particular geographically unique portion of a fishery, NMFS will evaluate to determine if the risk reduction is sufficient for separating the fishery out from the broader, current, classification of the Category I Northeast/mid-Atlantic American lobster trap/pot fishery.

As stated above, we find that there is insufficient information to suggest that Maine's fisheries should be split from the Northeast/mid-Atlantic American lobster trap/pot fishery because the gear used in Maine waters and the manner in which the gear is used are not unique from other states. Further, we maintain that entanglement data indicate that the gear used across this fishery remains a risk to right whales. Should Maine fisheries make significant changes to their gear configurations that differentiate these fisheries from other state and Federal lobster trap/pot fisheries, such as eliminating vertical lines, NMFS will reconsider this decision.

*Comment 12:* AOLA expresses concern that data used in the LOF do not represent the current conditions of the Category I Northeast/mid-Atlantic American lobster trap/pot fishery nor marine mammal stocks. The commenter notes that the primary information used in the 2021 LOF comes from 2019 SARs, which are based on data from 2013–2017. Yet since 2013, the northwest Atlantic has undergone considerable climatic changes that have influenced the distributions of marine mammals and their prey. AOLA further states that the 2014 ALWTRP regulations as well as the American lobster fishery management plan regulations, reduced vertical lines and enhanced gear marking in the fishery. AOLA requests NMFS incorporate more timely data and recent information into the 2021 LOF.

*Response:* NMFS agrees that the best available scientific information is important for assessing the risk fisheries pose to marine mammal stocks. NMFS uses the best available scientific information to prepare the annual LOF. This includes relying on the SARs, which are peer reviewed by the U.S. Atlantic, Gulf of Mexico, and Caribbean Scientific Review Group. The MMPA established this SRG, along with two others, to review the science that informs the SARs, and to advise NMFS on marine mammal population status, trends, and stock structure, uncertainties in the science, research needs, and other issues. We recognize that this peer review process takes additional time to ensure that the best available are used to inform the LOF. However, the SARs generally provide the most current and inclusive information on each stock's PBR level and level of interaction with commercial fishing operations; there may also be more recent reports that include bycatch estimates.

*Comment 13:* AOLA expresses concern with how NMFS assigns M/SI when the origin of entanglement is unknown. AOLA states to that according to the 2019 North Atlantic right whale SAR the 5-year mean estimated M/SI from entanglements is 5.55. Of those, 0.2 were attributed to U.S. fisheries, 1.2 to Canadian fisheries, and the remaining 4.15 were undetermined. The commenter notes that NMFS splits undetermined North Atlantic right whale M/SI evenly between the two countries. However, 86 percent of known entanglements were in Canadian gear. AOLA recommends NMFS split undetermined North Atlantic right whale M/SI between the two countries based on the percentage of known entanglements from each country and this prorated distribution of M/SI should be used when classifying fisheries on the LOF.

*Response:* For determining a fishery's classification on the LOF, NMFS must assess the M/SI with respect to a stock's PBR. See response to comment #11 above about M/SI of right whales that is attributed to the Northeast/mid-Atlantic American lobster trap/pot fishery.

With respect to the current unknown North Atlantic right whale M/SI being assumed to be divided between both Canada and U.S. equally, this was a scenario that NMFS generated to support ALWTRT deliberations and is not used for classifying fisheries on the MMPA LOF. Given the additional regulatory requirements for Category I and II fisheries, NMFS uses known M/SI that can be attributed to a specific fishery for LOF analysis.

*Comment 14:* AOLA expresses concern over the perceived lack of parity when assessing the impacts of fisheries on marine mammals. AOLA understands that with limited observer coverage and data gaps there is a level of subjectivity into the LOF classification process; however, the process should be equal among fisheries. The commenter notes that the Northeast/mid-Atlantic American lobster trap/pot fishery is classified as a Category I fishery for North Atlantic right whales, yet there has been only one confirmed mortality in American lobster trap/pot gear in the past decade (2012) and no documented serious injuries (as stated in the 2020 LOF final rule). In the 2020 LOF final rule, NMFS cites all U.S. undetermined M/SI, potential M/SI prevented by intervention, and North Atlantic right whale entanglement scarring rates as data used for the Category I classification of the Northeast/mid-Atlantic American lobster trap/pot fishery. AOLA recommends NMFS take a more equitable approach when assessing entanglement risk across fisheries, countries, and non-fishery sources, and also notes this would assist in assuring fishermen are treated fairly.

*Response:* The LOF is the annual process NMFS conducts to place all U.S. commercial fisheries into one of three categories based on the level of incidental mortality and serious injury of marine mammals occurring in each fishery. See response to comment #11 above about how cases that would have been serious injuries prior to disentanglement are not counted against PBR in the SAR, but are included in the LOF classification process.

For fisheries with no observer coverage and for observed fisheries with evidence indicating that undocumented interactions may be occurring (*e.g.,* fishery has low observer coverage and stranding network data include evidence of fisheries interactions that cannot be attributed to a specific fishery), NMFS uses the best available data to inform the LOF; thus, data older than 5 years may be used to retain a fishery classification or the list of species and stocks killed/injured incidental to a fishery. For these fisheries, NMFS will review the other sources of information listed above and use its discretion to decide when it is appropriate to remove a species or stock.

The assessment of large whale M/SI in fisheries with limited observer coverage remains a considerable challenge compared to other gear types that interact with pinniped or small cetaceans. In fisheries with sufficient observer coverage, NMFS extrapolates annual M/SI estimates for bycaught species. However, large whale fishery interaction assessments are dependent on direct counts of entangled whales, not the fishery per se. This observed count of entanglements is not representative of total fishery-related M/SI that goes undetected or unattributed to a particular cause, and therefore represents the minimum M/SI. A method to assign cause to these unknown, as well as undetected mortalities, while addressing country entanglement of origin, is currently under development (Hayes *et al.,* 2020). When these estimations become available, NMFS will solicit public comment through the SAR publication process.

*Comment 15:* MA DMF recommends NMFS reclassify the Massachusetts state waters lobster trap/pot fishery as its own non-Category I fishery, separate from the Category I Northeast/mid-Atlantic American lobster trap/pot fishery based on the gear restrictions and large whale conservation programs that are unique to Massachusetts. They note that the state of Massachusetts has a number of actions currently in place, as well as a number of additional actions that will be in place for the 2021 fishing season, that distinguish the Massachusetts state lobster trap/pot fishery as unique from the rest of the Category I Northeast/mid-Atlantic American lobster trap/pot fishery. MA DMF states that they are the only state lobster trap/trap fishery implementing the following actions either currently or in the future: (1) Lobster trap/pot fishery closure from February 1st to April 30th (currently in place for the Massachusetts Bay Restricted Area, proposed closure of all state waters beginning February 1, 2021); (2) dynamic extension of the lobster trap/pot fishery closure to ensure safe passage of right whales from our waters prior to fixed gear being set (currently in place for the Massachusetts Bay Restricted Area, proposed for all state waters beginning February 1, 2021); (3) ban use of vertical buoy lines greater than ⅜ inch diameter (proposed to begin February 1, 2021); (4) ban fishing single traps by the majority of its active fleet (proposed to begin January 1, 2022); (5) universal requirement of 1,700 pound breaking strength line or equivalent contrivance (proposed to begin February 1, 2021); (6) permitting and regulatory scheme designed to reduce participation and effort over time (currently in place); and (7) demonstrated substantial decline in the number of participants and the number of buoy lines deployed (currently in place). Based on these mitigation efforts, MA DMF recommends NMFS reclassify the Massachusetts state waters lobster trap/pot fishery as its own non-Category I fishery.

*Response:* NMFS appreciates the actions the state of Massachusetts has taken, and continues to take, to help conserve and protect North Atlantic right whales. However, the current implemented measures are not enough to suggest Massachusetts's state waters lobster trap/pot fishery should be split from the Category I Northeast/mid-Atlantic American lobster trap/pot fishery. At this time, NMFS retains the Category I classification for the Northeast/Mid-Atlantic American lobster trap/pot fishery, which includes the state waters of Massachusetts. Additional detail on how gear would be considered unique to differentiate it from other state lobster and trap/pot fisheries is included in response to Comment #11. NMFS looks forward to seeing what measures the state of Massachusetts will finalize and implement for the state lobster trap/pot fishery in the future. Should major changes to lobster gear and fishing practices be required and implemented for all Massachusetts state lobster fishing gear, making this gear unique and easily identified from other state and Federal gear, NMFS will re-evaluate the status of this fishery and consider it in a future proposed LOF.

*Comment 16:* Whale Safe USA requests NMFS maintain the Category I classifications for Northeast/Mid-Atlantic American lobster trap/pot fishery and Northeast sink gillnet fishery.

*Response:* As stated above in response to Comments #11 and 15, NMFS retains the Category I classification of the Northeast/Mid-Atlantic American lobster trap/pot fishery. Additionally, no data is currently available to suggest state fisheries should be separated from the Category I Northeast sink gillnet fishery, therefore NMFS retains the Category I classification for the Northeast sink gillnet fishery.

**Summary of Changes From the Proposed Rule**

NMFS reclassifies the AK BSAI Pacific cod longline fishery from a Category II to Category III fishery. NMFS also removes both the Eastern North Pacific AK resident stock and Gulf of Alaska, BSAI transient stock of killer whales from the list of species and/or stocks incidentally killed or injured in the BSAI Pacific cod longline fishery.

NMFS updates the MMAP certificate process for calendar year 2021. MMAP certificates issued in 2020 remain in effect, valid through December 31, 2021, for vessel or gear owners participating in all Category I and II fisheries as of the final 2021 LOF.

**Summary of Changes to the LOF for 2021**

The following summarizes changes to the LOF for 2021, including the classification of fisheries, fisheries listed, the estimated number of vessels/persons in a particular fishery, and the species and/or stocks that are incidentally killed or injured in a particular fishery. NMFS re-classifies two fisheries in the LOF for 2021. NMFS also makes changes to the estimated number of vessels/persons and list of species and/or stocks killed or injured in certain fisheries. The classifications and definitions of U.S. commercial fisheries for 2021 are identical to those provided in the LOF for 2020 with the changes discussed below. State and regional abbreviations used in the following paragraphs include: AK (Alaska), CA (California), HI (Hawaii), OR (Oregon), WA (Washington), and WNA (Western North Atlantic).

**Commercial Fisheries in the Pacific Ocean**

*Classification of Fisheries*

NMFS reclassifies the AK Bering Sea, Aleutian Islands Pacific cod pot fishery from a Category III to a Category II fishery.

NMFS reclassifies the AK BSAI Pacific cod longline fishery from at Category II to Category III fishery.

*Fishery Name and Organizational Changes*

NMFS adds a superscript ''1'' to the CA/OR/WA stock of minke whale indicating it is driving the Category II classification of the CA thresher shark/swordfish drift gillnet (≥14 in mesh) fishery.

*Number of Vessels/Persons*

NMFS updates the estimated number of vessels/persons in the Pacific Ocean (Table 1) as follows:

Category I

- HI deep-set longline fishery from 145 to 143 vessels/persons;

Category II

- HI shallow-set longline fishery from 18 to 11 vessels/persons;
- American Samoa longline fishery from 15 to 13 vessels/persons; and

Category III

- American Samoa bottomfish handline fishery from fewer than 30 to fewer than 20 vessels/persons.

*List of Species and/or Stocks Incidentally Killed or Injured in the Pacific Ocean*

NMFS adds the Aleutian Islands stock of harbor seal to the list of species/stocks incidentally killed or injured in the Category II AK Bering Sea, Aleutian Islands rockfish trawl fishery.

NMFS adds three stocks to the list of species/stocks incidentally killed or injured in the Category II AK Bering Sea, Aleutian Islands Pacific cod pot fishery: (1) Bristol Bay stock of harbor seal, (2) Western North Pacific stock of humpback whale, and (3) Central North Pacific stock of humpback whale.

NMFS adds both the Eastern North Pacific Gulf of Alaska, Aleutian Islands, and Bering Sea Transient stock, and West Coast Transient stock, of killer whales to the list of species/stocks incidentally killed or injured in the Category II CA Dungeness crab pot fishery.

NMFS adds two stocks to the list of species/stocks incidentally killed or injured in the Category III CA squid purse seine fishery: (1) CA/OR/WA stock of Risso's dolphin and (2) U.S. stock of California sea lion.

NMFS adds the Cook Inlet stock of harbor seal to the list of species/stocks incidentally killed or injured in the Category III AK Gulf of Alaska halibut longline fishery.

NMFS adds the Aleutian Islands stock of harbor seal to the list of species/stocks incidentally killed or injured in the Category III AK Bering Sea, Aleutian Islands Atka mackerel trawl fishery.

NMFS adds the U.S. stock of California sea lion to the list of species/stocks incidentally killed or injured in the Category III WA/OR/CA shrimp trawl fishery.

NMFS adds two stocks to the list of species/stocks incidentally killed or injured in the Category III WA/OR/CA groundfish trawl fishery: (1) California breeding stock of northern elephant seal and (2) CA/OR/WA stock of northern right whale dolphin.

NMFS adds to the Western North Pacific stock of humpback whale to the list of species/stocks incidentally killed or injured in the Category III AK/WA/OR/CA commercial passenger fishing vessel fishery. NMFS removes three stocks from the list of species/stocks incidentally killed or injured in the Category II AK Bering Sea, Aleutian Islands pollock trawl fishery: (1) Alaska stock of ringed seal, (2) Central North Pacific stock of humpback whale and (3) Western North Pacific stock of humpback whale.

NMFS removes the Alaska stock of ringed seal from the list of species/stocks incidentally killed or injured in the Category II AK Bering Sea, Aleutian Islands Pacific cod longline fishery.

NMFS removes the Western U.S. stock of Steller sea lion from the list of species/stocks incidentally killed or injured in the Category II AK Gulf of Alaska sablefish longline fishery.

NMFS removes the Alaska stock of ringed seal from the list of species/stocks incidentally killed or injured in the Category III AK Bering Sea, Aleutian Islands Pacific cod trawl fishery.

NMFS removes the Alaska stock of harbor seal from the list of species/stocks incidentally killed or injured in the Category III AK Gulf of Alaska flatfish trawl fishery.

## Commercial Fisheries in the Atlantic Ocean, Gulf of Mexico, and Caribbean

### *Fishery Name and Organizational Changes and Clarification*

NMFS adds a superscript ''1'' to the following four stocks to indicate they are driving the Category II classification of the Northeast trawl fishery: (1) Western North Atlantic stock of Risso's dolphin, (2) Western North Atlantic stock of long-finned pilot whale, (3) Western North Atlantic offshore stock of bottlenose dolphin, and (4) Western North Atlantic stock of gray seal.

NMFS clarifies the fishery description of the Category II Southeastern U.S. Atlantic, Gulf of Mexico shrimp trawl fishery. NMFS clarifies that this fishery targets shrimp species with various gear types, but mainly utilizes skimmer or otter trawls. These gear types likely entangle marine mammals, particularly bottlenose dolphins, in very similar ways. The common entangling mechanism of these gear types are the ''lazy'' or ''easy'' line.

NMFS clarifies the fishery description of the Category I Atlantic Ocean, Caribbean, Gulf of Mexico large pelagics longline fishery. NMFS clarifies that the fishery does not target bluefin tuna, shortfin mako sharks and other shark species.

As discussed in the proposed rule, NMFS clarifies its response to Comment #14 in the 2020 Final LOF (85 FR 21079; April 16, 2020). In Comment #14, MLA notes ''there has been only one right whale entangled in Maine gear in April 2002, and the entanglement was determined to be a non-serious injury. There are two additional non-serious injury entanglement cases that involved Maine lobster gear. However, Maine lobster gear was not the primary entangling gear in these cases.'' In the 2020 Final LOF, NMFS' response in part to this comment stated: ''We recognize that there has only been one confirmed mortality (in 2012) in American lobster gear in the past decade. All other documented lobster interactions were determined to result in non-serious injuries. However, there have been a number of entanglements for which interventions occurred because these entanglements were determined to be resulting in serious injuries (Henry *et al.,* 2019).''

NMFS clarifies part of the response to Comment #14 to state: We recognize there has been only one confirmed mortality (in 2012) in the past decade in U.S. Northern inshore/nearshore trap/pot gear which could be gear from the Northeast/Mid-Atlantic American lobster trap/pot fishery or the Atlantic mixed species trap/pot fishery. All other documented lobster interactions were determined to result in non-serious injuries. However, there have been a number of entanglements for which interventions occurred because these entanglements were determined to be resulting in serious injuries (Henry *et al.,* 2019).

### *Number of Vessels/Persons*

NMFS updates the estimated number of vessels/persons in the Atlantic Ocean, Gulf of Mexico, and Caribbean (Table 2) as follows:

Category I

- Mid-Atlantic gillnet fishery from 3,950 to 4,020 vessels/person;
- Northeast sink gillnet fishery from 3,163 to 4,072 vessels/persons;

Category II

- Chesapeake Bay inshore gillnet fishery from 248 to 265 vessels/persons;
- Northeast bottom trawl fishery from 2,238 to 968 vessels/persons;
- Southeastern U.S. Atlantic, Gulf of Mexico shrimp trawl fishery from 4,950 to 10,824 vessels/persons;
- Atlantic mixed species trap/pot fishery from 3,332 to 3,493 vessels/persons;
- Mid-Atlantic menhaden purse seine fishery from 19 to 17 vessels/persons;
- Virginia pound net fishery from 26 to 20 vessels/persons;

Category III

- Caribbean gillnet fishery from >991 to 127 vessels/persons;
- Caribbean mixed species trap/pot fishery from >501 to 154 vessels/persons;
- Caribbean spiny lobster trap/pot fishery from >197 to 40 vessels/persons; and
- Caribbean haul/beach seine fishery from 15 to 38 vessels/person.

NMFS notes there is variability in the estimated number of vessels/persons in the Southeastern U.S. Atlantic, Gulf of Mexico shrimp trawl fishery. This variability is due to multiple permitting agencies, differences in fishery management, and artifacts with available data sets. A complete explanation of the variability is available in the Environmental Impact Statement to Reduce the Incidental Bycatch and Mortality of Sea Turtles in the Southeastern U.S. Shrimp Fisheries (November 4, 2019).

### *List of Species and/or Stocks Incidentally Killed or Injured in the Atlantic Ocean, Gulf of Mexico, and Caribbean*

NMFS adds the Mobile Bay, Bonsecour Bay stock of bottlenose dolphin to the list of species/stocks incidentally killed or injured in the Category II Gulf of Mexico gillnet fishery.

NMFS adds the Western North Atlantic offshore stock of bottlenose dolphin to the list of species/stocks incidentally killed or injured in the Category II mid-Atlantic mid-water trawl (including pair trawl) fishery.

NMFS adds the Puerto Rico and U.S. Virgin Islands stock of bottlenose dolphin to the list of species/stocks incidentally killed or injured in Category III Caribbean mixed species trap/pot fishery.

Following consultation with the U.S. Fish and Wildlife Service, NMFS adds the Antillean subspecies (Puerto Rico stock) of West Indian manatee to the list of species/stocks incidentally killed or injured in Category III Caribbean haul/beach seine fishery.

NMFS removes the Western North Atlantic offshore stock of bottlenose dolphin from the list of species/stocks incidentally killed or injured in the Category III Gulf of Maine, U.S. mid-

Atlantic tuna, shark, swordfish hook-and line/harpoon fishery.

**Commercial Fisheries on the High Seas**

*Number of Vessels/Persons*

NMFS updates the estimated number of HSFCA permits for high seas fisheries (Table 3) as follows:

Category I

- Atlantic highly migratory species longline fishery from 53 to 45 HSFCA permits;
- Western Pacific pelagic longline (HI deep-set component) fishery from 145 to 143 HSFCA permits;

Category II

- South Pacific tuna purse seine fishery from 33 to 26 HSFCA permits;
- South Pacific tuna longline fishery from 2 to 3 HSFCA permits;
- Western Pacific pelagic longline (HI shallow-set component) fishery from 18 to 11 HSFCA permits;
- Atlantic highly migratory species handline/pole and line fishery from 2 to 1 HSFCA permits;
- Pacific highly migratory species handline/pole and line fishery from 41 to 43 HSFCA permits;
- South Pacific albacore troll handline/pole and line fishery from 11 to 10 HSFCA permits;
- South Pacific albacore troll fishery from 17 to 18 HSFCA permits;
- Western Pacific pelagic troll fishery from 5 to 4 HSFCA permits;

Category III

- Northwest Atlantic bottom longline fishery from 3 to 2 HSFCA permits;
- Pacific highly migratory species longline fishery from 108 to 105 HSFCA permits; and
- Pacific highly migratory species troll fishery from 119 to 111 HSFCA permits.

**List of Fisheries**

The following tables set forth the list of U.S. commercial fisheries according to their classification under section 118 of the MMPA. Table 1 lists commercial fisheries in the Pacific Ocean (including Alaska), Table 2 lists commercial fisheries in the Atlantic Ocean, Gulf of Mexico, and Caribbean, Table 3 lists commercial fisheries on the high seas, and Table 4 lists fisheries affected by TRPs or TRTs.

In Tables 1 and 2, the estimated number of vessels or persons participating in fisheries operating within U.S. waters is expressed in terms of the number of active participants in the fishery, when possible. If this information is not available, the estimated number of vessels or persons licensed for a particular fishery is provided. If no recent information is available on the number of participants, vessels, or persons licensed in a fishery, then the number from the most recent LOF is used for the estimated number of vessels or persons in the fishery. NMFS acknowledges that, in some cases, these estimates may be inflations of actual effort. For example, the State of Hawaii does not issue fishery-specific licenses, and the number of participants reported in the LOF represents the number of commercial marine license holders who reported using a particular fishing gear type/method at least once in a given year, without considering how many times the gear was used. For these fisheries, effort by a single participant is counted the same whether the fisherman used the gear only once or every day. In the Mid-Atlantic and New England fisheries, the numbers represent the potential effort for each fishery, given the multiple gear types for which several state permits may allow. Changes made to Mid-Atlantic and New England fishery participants will not affect observer coverage or bycatch estimates, as observer coverage and bycatch estimates are based on vessel trip reports and landings data. Tables 1 and 2 serve to provide a description of the fishery's potential effort (state and Federal). If NMFS is able to extract more accurate information on the gear types used by state permit holders in the future, the numbers will be updated to reflect this change. For additional information on fishing effort in fisheries found on Table 1 or 2, contact the relevant regional office (contact information included above in Where can I find more information about the LOF and the MMAP? section).

For high seas fisheries, Table 3 lists the number of valid HSFCA permits currently held. Although this likely overestimates the number of active participants in many of these fisheries, the number of valid HSFCA permits is the most reliable data on the potential effort in high seas fisheries at this time. As noted previously in this LOF, the number of HSFCA permits listed in Table 3 for the high seas components of fisheries that also operate within U.S. waters does not necessarily represent additional effort that is not accounted for in Tables 1 and 2. Many vessels holding HSFCA permits also fish within U.S. waters and are included in the number of vessels and participants operating within those fisheries in Tables 1 and 2.

Tables 1, 2, and 3 also list the marine mammal species and/or stocks incidentally killed or injured (seriously or non-seriously) in each fishery based on SARs, injury determination reports, bycatch estimation reports, observer data, logbook data, stranding data, disentanglement network data, fishermen self-reports (*i.e.,* MMAP reports), and anecdotal reports. The best available scientific information included in these reports is based on data through 2017. This list includes all species and/or stocks known to be killed or injured in a given fishery, but also includes species and/or stocks for which there are anecdotal records of a mortality or injury. Additionally, species identified by logbook entries, stranding data, or fishermen self-reports (*i.e.,* MMAP reports) may not be verified. In Tables 1 and 2, NMFS has designated those species/stocks driving a fishery's classification (*i.e.,* the fishery is classified based on mortalities and serious injuries of a marine mammal stock that are greater than or equal to 50 percent (Category I), or greater than 1 percent and less than 50 percent (Category II), of a stock's PBR) by a ''1'' after the stock's name.

In Tables 1 and 2, there are several fisheries classified as Category II that have no recent documented mortalities or serious injuries of marine mammals, or fisheries that did not result in a mortality or serious injury rate greater than 1 percent of a stock's PBR level based on known interactions. NMFS has classified these fisheries by analogy to other Category I or II fisheries that use similar fishing techniques or gear that are known to cause mortality or serious injury of marine mammals, as discussed in the final LOF for 1996 (60 FR 67063; December 28, 1995), and according to factors listed in the definition of a ''Category II fishery'' in 50 CFR 229.2 (*i.e.,* fishing techniques, gear types, methods used to deter marine mammals, target species, seasons and areas fished, qualitative data from logbooks or fishermen reports, stranding data, and the species and distribution of marine mammals in the area). NMFS has designated those fisheries listed by analogy in Tables 1 and 2 by adding a ''2'' after the fishery's name.

There are several fisheries in Tables 1, 2, and 3 in which a portion of the fishing vessels cross the EEZ boundary and therefore operate both within U.S. waters and on the high seas. These fisheries, though listed separately on Table 1 or 2 and Table 3, are considered the same fisheries on either side of the EEZ boundary. NMFS has designated those fisheries in each table with an asterisk (*) after the fishery's name.

TABLE 1—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE PACIFIC OCEAN

| Fishery description | Estimated # of vessels/persons | Marine mammal species and/or stocks incidentally killed or injured |
|---|---|---|
| **Category I** | | |
| *Longline/Set Line Fisheries:* | | |

| *Pot, Ring Net, and Trap Fisheries:* | | |
| AK Bering Sea, Aleutian Islands Pacific cod pot | 59 | Harbor seal, Bristol Bay.<br>Humpback whale, Central North Pacific.<br>Humpback whale, Western North Pacific. |
| CA coonstripe shrimp pot | 14 | Gray whale, Eastern North Pacific.<br>Harbor seal, CA.<br>Humpback whale, CA/OR/WA. |
| CA spiny lobster | 186 | Bottlenose dolphin, CA/OR/WA offshore.<br>Humpback whale, CA/OR/WA[1].<br>Gray whale, Eastern North Pacific.<br>Southern sea otter. |
| CA spot prawn pot | 23 | Gray whale, Eastern North Pacific. |

TABLE 1—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE PACIFIC OCEAN—Continued

| Fishery description | Estimated # of vessels/persons | Marine mammal species and/or stocks incidentally killed or injured |
|---|---|---|
| | | Humpback whale, CA/OR/WA [1]. |
| | | Long-beaked common dolphin, CA. |
| CA Dungeness crab pot | 501 | Blue whale, Eastern North Pacific [1]. |
| | | Gray whale, Eastern North Pacific. |
| | | Humpback whale, CA/OR/WA [1]. |
| | | Killer whale, Eastern North Pacific GOA, BSAI transient. |
| | | Killer whale, West Coast transient. |
| OR Dungeness crab pot | 342 | Gray whale, Eastern North Pacific. |
| | | Humpback whale, CA/OR/WA [1]. |
| WA/OR/CA sablefish pot | 155 | Humpback whale, CA/OR/WA [1]. |
| WA coastal Dungeness crab pot | 197 | Gray whale, Eastern North Pacific. |
| | | Humpback whale, CA/OR/WA [1]. |
| *Longline/Set Line Fisheries:* | | |
| AK Gulf of Alaska sablefish longline | 295 | Sperm whale, North Pacific. |
| | | Steller sea lion, Eastern U.S. |
| HI shallow-set longline * ^ | 11 | Blainville's beaked whale, HI. |
| | | Bottlenose dolphin, HI Pelagic. |
| | | False killer whale, HI Pelagic [1]. |
| | | Humpback whale, Central North Pacific. |
| | | Risso's dolphin, HI. |
| | | Rough-toothed dolphin, HI. |
| | | Striped dolphin, HI. |
| American Samoa longline [2] | 13 | False killer whale, American Samoa. |
| | | Rough-toothed dolphin, American Samoa. |
| | | Short-finned pilot whale, unknown. |
| HI shortline [2] | 9 | None documented. |
| **Category III** | | |
| *Gillnet Fisheries:* | | |
| AK Kuskokwim, Yukon, Norton Sound, Kotzebue salmon gillnet. | 1,778 | Harbor porpoise, Bering Sea. |
| AK Prince William Sound salmon set gillnet | 29 | Harbor seal, GOA. |
| | | Humpback whale, Central North Pacific. |
| | | Sea otter, South central AK. |
| | | Steller sea lion, Western U.S. |
| AK roe herring and food/bait herring gillnet | 920 | None documented. |
| CA set gillnet (mesh size <3.5 in) | 296 | None documented. |
| HI inshore gillnet | 36 | Bottlenose dolphin, HI. |
| | | Spinner dolphin, HI. |
| WA Grays Harbor salmon drift gillnet (excluding treaty Tribal fishing). | 24 | Harbor seal, OR/WA coast. |
| WA/OR Mainstem Columbia River eulachon gillnet | 15 | None documented. |
| WA/OR lower Columbia River (includes tributaries) drift gillnet. | 110 | California sea lion, U.S. |
| | | Harbor seal, OR/WA coast. |
| WA Willapa Bay drift gillnet | 82 | Harbor seal, OR/WA coast. |
| | | Northern elephant seal, CA breeding. |
| *Miscellaneous Net Fisheries:* | | |
| AK Cook Inlet salmon purse seine | 83 | Humpback whale, Central North Pacific. |
| AK Kodiak salmon purse seine | 376 | Dall's porpoise, AK. |
| | | Humpback whale, Central North Pacific. |
| | | Humpback whale, Western North Pacific. |
| AK Southeast salmon purse seine | 315 | Humpback whale, Central North Pacific. |
| AK roe herring and food/bait herring beach seine | 10 | None documented. |
| AK roe herring and food/bait herring purse seine | 356 | None documented. |
| AK salmon beach seine | 31 | None documented. |
| AK salmon purse seine (Prince William Sound, Chignik, Alaska Peninsula). | 936 | Harbor seal, GOA. |
| | | Harbor seal, Prince William Sound. |
| WA/OR sardine purse seine | 42 | None documented. |
| CA anchovy, mackerel, sardine purse seine | 65 | California sea lion, U.S. |
| | | Harbor seal, CA. |
| CA squid purse seine | 80 | California sea lion, U.S. |
| | | Long-beaked common dolphin, CA. |
| | | Risso's dolphin, CA/OR/WA. |
| | | Short-beaked common dolphin, CA/OR/WA. |
| CA tuna purse seine * | 10 | None documented. |
| WA/OR Lower Columbia River salmon seine | 10 | None documented. |
| WA/OR herring, smelt, squid purse seine or lampara | 130 | None documented. |
| WA salmon purse seine | 75 | None documented. |
| WA salmon reef net | 11 | None documented. |

TABLE 1—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE PACIFIC OCEAN—Continued

| Fishery description | Estimated # of vessels/persons | Marine mammal species and/or stocks incidentally killed or injured |
|---|---|---|
| HI lift net | 17 | None documented. |
| HI inshore purse seine | <3 | None documented. |
| HI throw net, cast net | 23 | None documented. |
| HI seine net | 24 | None documented. |
| *Dip Net Fisheries:* | | |
| CA squid dip net | 115 | None documented. |
| *Marine Aquaculture Fisheries:* | | |
| CA marine shellfish aquaculture | unknown | None documented. |
| CA salmon enhancement rearing pen | >1 | None documented. |
| CA white seabass enhancement net pens | 13 | California sea lion, U.S. |
| HI offshore pen culture | 2 | None documented. |
| WA salmon net pens | 14 | California sea lion, U.S.<br>Harbor seal, WA inland waters. |
| WA/OR shellfish aquaculture | 23 | None documented. |
| *Troll Fisheries:* | | |
| WA/OR/CA albacore surface hook and line/troll | 705 | None documented. |
| CA halibut hook and line/handline | unknown | None documented. |
| CA white seabass hook and line/handline | unknown | None documented. |
| AK Bering Sea, Aleutian Islands groundfish hand troll and dinglebar troll. | unknown | None documented. |
| AK Gulf of Alaska groundfish hand troll and dinglebar troll | unknown | None documented. |
| AK salmon troll | 1,908 | Steller sea lion, Eastern U.S.<br>Steller sea lion, Western U.S. |
| American Samoa tuna troll | 13 | None documented. |
| CA/OR/WA salmon troll | 4,300 | None documented. |
| HI troll | 2,117 | Pantropical spotted dolphin, HI. |
| HI rod and reel | 322 | None documented. |
| Commonwealth of the Northern Mariana Islands tuna troll | 40 | None documented. |
| Guam tuna troll | 432 | None documented. |
| *Longline/Set Line Fisheries:* | | |
| AK Bering Sea, Aleutian Islands Greenland turbot longline | 4 | Killer whale, AK resident. |
| AK Bering Sea, Aleutian Islands Pacific cod longline | 45 | Northern fur seal, Eastern Pacific.<br>Spotted seal, AK.<br>Steller sea lion, Western U.S. |
| AK Bering Sea, Aleutian Islands sablefish longline | 22 | None documented. |
| AK Bering Sea, Aleutian Islands halibut longline | 127 | Northern fur seal, Eastern Pacific.<br>Sperm whale, North Pacific. |
| AK Gulf of Alaska halibut longline | 855 | Harbor seal, Cook Inlet.<br>Steller sea lion, Eastern U.S. |
| AK Gulf of Alaska Pacific cod longline | 92 | Steller sea lion, Western U.S. |
| AK octopus/squid longline | 3 | None documented. |
| AK state-managed waters longline/setline (including sablefish, rockfish, lingcod, and miscellaneous finfish). | 464 | None documented. |
| WA/OR/CA groundfish, bottomfish longline/set line | 367 | Bottlenose dolphin, CA/OR/WA offshore.<br>California sea lion, U.S.<br>Northern elephant seal, California breeding.<br>Sperm whale, CA/OR/WA.<br>Steller sea lion, Eastern U.S. |
| WA/OR Pacific halibut longline | 350 | None documented. |
| CA pelagic longline | 1 | None documented in the most recent 5 years of data. |
| HI kaka line | 15 | None documented. |
| HI vertical line | 3 | None documented. |
| *Trawl Fisheries:* | | |
| AK Bering Sea, Aleutian Islands Atka mackerel trawl | 13 | Bearded seal, AK.<br>Harbor seal, Aleutian Islands.<br>Steller sea lion, Western U.S. |
| AK Bering Sea, Aleutian Islands Pacific cod trawl | 72 | Bearded seal, AK.<br>Ribbon seal, AK.<br>Steller sea lion, Western U.S. |
| AK Gulf of Alaska flatfish trawl | 36 | Northern elephant seal, North Pacific.<br>Steller sea lion, Western U.S. |
| AK Gulf of Alaska Pacific cod trawl | 55 | Harbor seal, AK.<br>Steller sea lion, Western U.S. |
| AK Gulf of Alaska pollock trawl | 67 | Dall's porpoise, AK.<br>Fin whale, Northeast Pacific.<br>Northern elephant seal, North Pacific.<br>Steller sea lion, Western U.S. |
| AK Gulf of Alaska rockfish trawl | 43 | Steller sea lion, Western U.S. |
| AK Kodiak food/bait herring otter trawl | 4 | None documented. |
| AK shrimp otter trawl and beam trawl | 38 | None documented. |

TABLE 1—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE PACIFIC OCEAN—Continued

| Fishery description | Estimated # of vessels/persons | Marine mammal species and/or stocks incidentally killed or injured |
|---|---|---|
| AK state-managed waters of Prince William Sound groundfish trawl. | 2 | None documented. |
| CA halibut bottom trawl | 47 | California sea lion, U.S.<br>Harbor porpoise, unknown.<br>Harbor seal, unknown.<br>Northern elephant seal, CA breeding.<br>Steller sea lion, unknown. |
| CA sea cucumber trawl | 16 | None documented. |
| WA/OR/CA shrimp trawl | 300 | California sea lion, U.S. |
| WA/OR/CA groundfish trawl | 160–180 | California sea lion, U.S.<br>Dall's porpoise, CA/OR/WA.<br>Harbor seal, OR/WA coast.<br>Northern elephant seal, CA breeding.<br>Northern fur seal, Eastern Pacific.<br>Northern right whale dolphin, CA/OR/WA.<br>Pacific white-sided dolphin, CA/OR/WA.<br>Steller sea lion, Eastern U.S. |
| *Pot, Ring Net, and Trap Fisheries:* | | |
| AK Bering Sea, Aleutian Islands sablefish pot | 6 | None documented. |
| AK Bering Sea, Aleutian Islands crab pot | 540 | Bowhead whale, Western Arctic.<br>Gray whale, Eastern North Pacific. |
| AK Gulf of Alaska crab pot | 271 | None documented. |
| AK Gulf of Alaska Pacific cod pot | 116 | Harbor seal, GOA. |
| AK Gulf of Alaska sablefish pot | 248 | None documented. |
| AK Southeast Alaska crab pot | 375 | Humpback whale, Central North Pacific (Southeast AK). |
| AK Southeast Alaska shrimp pot | 99 | Humpback whale, Central North Pacific (Southeast AK). |
| AK shrimp pot, except Southeast | 141 | None documented. |
| AK octopus/squid pot | 15 | None documented. |
| CA rock crab pot | 124 | Gray whale, Eastern North Pacific.<br>Harbor seal, CA. |
| WA/OR/CA hagfish pot | 54 | None documented. |
| WA/OR shrimp pot/trap | 254 | None documented. |
| WA Puget Sound Dungeness crab pot/trap | 249 | None documented. |
| HI crab trap | 5 | Humpback whale, Central North Pacific. |
| HI fish trap | 9 | None documented. |
| HI lobster trap | <3 | None documented in recent years. |
| HI shrimp trap | 10 | None documented. |
| HI crab net | 4 | None documented. |
| HI Kona crab loop net | 33 | None documented. |
| *Hook and Line, Handline, and Jig Fisheries:* | | |
| AK Bering Sea, Aleutian Islands groundfish jig | 2 | None documented. |
| AK Gulf of Alaska groundfish jig | 214 | Fin whale, Northeast Pacific. |
| AK halibut jig | 71 | None documented. |
| American Samoa bottomfish | fewer than 20 | None documented. |
| Commonwealth of the Northern Mariana Islands bottomfish. | 28 | None documented. |
| Guam bottomfish | >300 | None documented. |
| HI aku boat, pole, and line | <3 | None documented. |
| HI bottomfish handline | 578 | None documented in recent years. |
| HI inshore handline | 357 | None documented. |
| HI pelagic handline | 534 | None documented. |
| WA groundfish, bottomfish jig | 679 | None documented. |
| Western Pacific squid jig | 0 | None documented. |
| *Harpoon Fisheries:* | | |
| CA swordfish harpoon | 6 | None documented. |
| *Pound Net/Weir Fisheries:* | | |
| AK herring spawn on kelp pound net | 291 | None documented. |
| AK Southeast herring roe/food/bait pound net | 2 | None documented. |
| HI bullpen trap | 3 | None documented. |
| *Bait Pens:* | | |
| WA/OR/CA bait pens | 13 | California sea lion, U.S. |
| *Dredge Fissheries:* | | |
| AK scallop dredge | 108 (5 AK) | None documented. |
| *Dive, Hand/Mechanical Collection Fisheries:* | | |
| AK clam | 130 | None documented. |
| AK Dungeness crab | 2 | None documented. |
| AK herring spawn on kelp | 266 | None documented. |
| AK miscellaneous invertebrates handpick | 214 | None documented. |
| HI black coral diving | <3 | None documented. |
| HI fish pond | 5 | None documented. |

TABLE 1—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE PACIFIC OCEAN—Continued

| Fishery description | Estimated # of vessels/persons | Marine mammal species and/or stocks incidentally killed or injured |
|---|---|---|
| HI handpick | 46 | None documented. |
| HI lobster diving | 19 | None documented. |
| HI spearfishing | 163 | None documented. |
| WA/CA kelp | 4 | None documented. |
| WA/OR bait shrimp, clam hand, dive, or mechanical collection. | 201 | None documented. |
| OR/CA sea urchin, sea cucumber hand, dive, or mechanical collection. | 10 | None documented. |
| *Commercial Passenger Fishing Vessel (Charter Boat) Fisheries:* | | |
| AK/WA/OR/CA commercial passenger fishing vessel | >7,000 (1,006 AK) | Humpback whale, Western North Pacific.<br>Killer whale, unknown.<br>Steller sea lion, Eastern U.S.<br>Steller sea lion, Western U.S. |
| *Live Finfish/Shellfish Fisheries:* | | |
| CA nearshore finfish live trap/hook-and-line | 93 | None documented. |
| HI aquarium collecting | 90 | None documented. |

List of Abbreviations and Symbols Used in Table 1: AI—Aleutian Islands; AK—Alaska; BS—Bering Sea; CA—California; ENP—Eastern North Pacific; GOA—Gulf of Alaska; HI—Hawaii; MHI—Main Hawaiian Islands; OR—Oregon; WA—Washington;

[1] Fishery classified based on mortalities and serious injuries of this stock, which are greater than or equal to 50 percent (Category I) or greater than 1 percent and less than 50 percent (Category II) of the stock's PBR.

[2] Fishery classified by analogy.

* Fishery has an associated high seas component listed in Table 3; and

^ The list of marine mammal species and/or stocks killed or injured in this fishery is identical to the list of species and/or stocks killed or injured in high seas component of the fishery, minus species and/or stocks that have geographic ranges exclusively on the high seas. The species and/or stocks are found, and the fishery remains the same, on both sides of the EEZ boundary. Therefore, the EEZ components of these fisheries pose the same risk to marine mammals as the components operating on the high seas.

TABLE 2—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE ATLANTIC OCEAN, GULF OF MEXICO, AND CARIBBEAN

| Fishery description | Estimated number of vessels/persons | Marine mammal species and/or stocks incidentally killed or injured |
|---|---|---|
| **Category I** | | |
| *Gillnet Fisheries:* | | |
| Mid-Atlantic gillnet | 4,020 | Bottlenose dolphin, Northern Migratory coastal.<br>Bottlenose dolphin, Southern Migratory coastal.[1]<br>Bottlenose dolphin, Northern NC estuarine system.[1]<br>Bottlenose dolphin, Southern NC estuarine system.[1]<br>Bottlenose dolphin, WNA offshore.<br>Common dolphin, WNA.<br>Gray seal, WNA.<br>Harbor porpoise, GME/BF.<br>Harbor seal, WNA.<br>Hooded seal, WNA.<br>Humpback whale, Gulf of Maine.<br>Minke whale, Canadian east coast. |

TABLE 2—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE ATLANTIC OCEAN, GULF OF MEXICO, AND CARIBBEAN—Continued

| Fishery description | Estimated number of vessels/persons | Marine mammal species and/or stocks incidentally killed or injured |
|---|---|---|
| | | Bottlenose dolphin, Northern GMX coastal.[1] |
| | | Bottlenose dolphin, SC/GA coastal.[1] |
| | | Bottlenose dolphin, Southern migratory coastal. |
| | | Bottlenose dolphin, Western GMX coastal.[1] |
| *Trap/Pot Fisheries:* | | |
| Southeastern U.S. Atlantic, Gulf of Mexico stone crab trap/pot[2]. | 1,101 | Bottlenose dolphin, Biscayne Bay estuarine. |
| | | Bottlenose dolphin, Central FL coastal. |
| | | Bottlenose dolphin, Eastern GMX coastal. |
| | | Bottlenose dolphin, FL Bay. |
| | | Bottlenose dolphin, GMX bay, sound, estuarine (FL west coast portion). |
| | | Bottlenose dolphin, Indian River Lagoon estuarine system. |
| | | Bottlenose dolphin, Jacksonville estuarine system. |
| | | Bottlenose dolphin, Northern GMX coastal. |
| | | Bottlenose dolphin, Sarasota Bay, Little Sarasota Bay. |
| Atlantic mixed species trap/pot[2] | 3,493 | Fin whale, WNA. |
| | | Humpback whale, Gulf of Maine. |
| Atlantic blue crab trap/pot | 6,679 | Bottlenose dolphin, Central FL coastal. |
| | | Bottlenose dolphin, Central GA estuarine system.[1] |
| | | Bottlenose dolphin, Charleston estuarine system.[1] |
| | | Bottlenose dolphin, Indian River Lagoon estuarine system. |
| | | Bottlenose dolphin, Jacksonville estuarine system. |
| | | Bottlenose dolphin, Northern FL coastal.[1] |
| | | Bottlenose dolphin, Northern GA/Southern SC estuarine system. |
| | | Bottlenose dolphin, Northern Migratory coastal. |
| | | Bottlenose dolphin, Northern NC estuarine system.[1] |
| | | Bottlenose dolphin, Northern SC estuarine system. |
| | | Bottlenose dolphin, SC/GA coastal. |
| | | Bottlenose dolphin, Southern GA estuarine system. |
| | | Bottlenose dolphin, Southern Migratory coastal.[1] |
| | | Bottlenose dolphin, Southern NC estuarine system. |
| | | West Indian manatee, FL. |
| *Purse Seine Fisheries:* | | |
| Gulf of Mexico menhaden purse seine | 40–42 | Bottlenose dolphin, GMX bay, sound, estuarine. |
| | | Bottlenose dolphin, Mississippi River Delta. |
| | | Bottlenose dolphin, Mississippi Sound, Lake Borgne, Bay Boudreau. |
| | | Bottlenose dolphin, Northern GMX coastal.[1] |
| | | Bottlenose dolphin, Western GMX coastal.[1] |
| Mid-Atlantic menhaden purse seine[2] | 17 | Bottlenose dolphin, Northern Migratory coastal. |
| | | Bottlenose dolphin, Southern Migratory coastal. |
| *Haul/Beach Seine Fisheries:* | | |
| Mid-Atlantic haul/beach seine | 359 | Bottlenose dolphin, Northern Migratory coastal.[1] |
| | | Bottlenose dolphin, Northern NC estuarine system.[1] |
| | | Bottlenose dolphin, Southern Migratory coastal.[1] |
| NC long haul seine | 22 | Bottlenose dolphin, Northern NC estuarine system.[1] |
| | | Bottlenose dolphin, Southern NC estuarine system. |
| *Stop Net Fisheries:* | | |
| NC roe mullet stop net | 1 | Bottlenose dolphin, Northern NC estuarine system. |
| | | Bottlenose dolphin, unknown (Southern migratory coastal or Southern NC estuarine system). |
| *Pound Net Fisheries:* | | |
| VA pound net | 20 | Bottlenose dolphin, Northern migratory coastal. |
| | | Bottlenose dolphin, Northern NC estuarine system. |
| | | Bottlenose dolphin, Southern Migratory coastal.[1] |
| **Category III** | | |
| *Gillnet Fisheries:* | | |
| Caribbean gillnet | 127 | None documented in the most recent 5 years of data. |
| DE River inshore gillnet | unknown | None documented in the most recent 5 years of data. |
| Long Island Sound inshore gillnet | unknown | None documented in the most recent 5 years of data. |
| RI, southern MA (to Monomoy Island), and NY Bight (Raritan and Lower NY Bays) inshore gillnet. | unknown | None documented in the most recent 5 years of data. |
| Southeast Atlantic inshore gillnet | unknown | Bottlenose dolphin, Northern SC estuarine system. |
| *Trawl Fisheries:* | | |
| Atlantic shellfish bottom trawl | >58 | None documented. |

TABLE 2—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE ATLANTIC OCEAN, GULF OF MEXICO, AND CARIBBEAN—Continued

| Fishery description | Estimated number of vessels/ persons | Marine mammal species and/or stocks incidentally killed or injured |
|---|---|---|
| Gulf of Mexico butterfish trawl | 2 | Bottlenose dolphin, Northern GMX oceanic.<br>Bottlenose dolphin, Northern GMX continental shelf. |
| Gulf of Mexico mixed species trawl | 20 | None documented. |
| GA cannonball jellyfish trawl | 1 | Bottlenose dolphin, SC/GA coastal. |
| *Marine Aquaculture Fisheries:* | | |
| Finfish aquaculture | 48 | Harbor seal, WNA. |
| Shellfish aquaculture | unknown | None documented. |
| *Purse Seine Fisheries:* | | |
| Gulf of Maine Atlantic herring purse seine | >7 | Harbor seal, WNA. |
| Gulf of Maine menhaden purse seine | >2 | None documented. |
| FL West Coast sardine purse seine | 10 | Bottlenose dolphin, Eastern GMX coastal. |
| U.S. Atlantic tuna purse seine * | 5 | None documented in most recent 5 years of data. |
| *Longline/Hook and Line Fisheries:* | | |
| Northeast/Mid-Atlantic bottom longline/hook-and-line | >1,207 | None documented. |
| Gulf of Maine, U.S. Mid-Atlantic tuna, shark, swordfish hook-and-line/harpoon. | 2,846 | Humpback whale, Gulf of Maine. |
| Southeastern U.S. Atlantic, Gulf of Mexico, and Caribbean snapper-grouper and other reef fish bottom longline/ hook-and-line. | >5,000 | Bottlenose dolphin, GMX continental shelf. |
| Southeastern U.S. Atlantic, Gulf of Mexico shark bottom longline/hook-and-line. | 39 | Bottlenose dolphin, Eastern GMX coastal.<br>Bottlenose dolphin, Northern GMX continental shelf. |
| Southeastern U.S. Atlantic, Gulf of Mexico, and Caribbean pelagic hook-and-line/harpoon. | 680 | None documented. |
| U.S. Atlantic, Gulf of Mexico trotline | unknown | None documented. |
| *Trap/Pot Fisheries:* | | |
| Caribbean mixed species trap/pot | 154 | Bottlenose dolphin, Puerto Rico and United States Virgin Islands. |
| Caribbean spiny lobster trap/pot | 40 | None documented. |
| FL spiny lobster trap/pot | 1,268 | Bottlenose dolphin, Biscayne Bay estuarine. Bottlenose dolphin, Central FL coastal.<br>Bottlenose dolphin, Eastern GMX coastal.<br>Bottlenose dolphin, FL Bay estuarine.<br>Bottlenose dolphin, FL Keys. |
| Gulf of Mexico blue crab trap/pot | 4,113 | Bottlenose dolphin, Barataria Bay.<br>Bottlenose dolphin, Eastern GMX coastal.<br>Bottlenose dolphin, GMX bay, sound, estuarine.<br>Bottlenose dolphin, Mississippi Sound, Lake Borgne, Bay Boudreau.<br>Bottlenose dolphin, Mobile Bay, Bonsecour Bay.<br>Bottlenose dolphin, Northern GMX coastal.<br>Bottlenose dolphin, Western GMX coastal.<br>West Indian manatee, FL. |
| Gulf of Mexico mixed species trap/pot | unknown | None documented. |
| Southeastern U.S. Atlantic, Gulf of Mexico golden crab trap/pot. | 10 | None documented. |
| U.S. Mid-Atlantic eel trap/pot | unknown | None documented. |
| *Stop Seine/Weir/Pound Net/Floating Trap/Fyke Net Fisheries:* | | |
| Gulf of Maine herring and Atlantic mackerel stop seine/ weir. | >1 | Harbor porpoise, GME/BF.<br>Harbor seal, WNA.<br>Minke whale, Canadian east coast.<br>Atlantic white-sided dolphin, WNA. |
| U.S. Mid-Atlantic crab stop seine/weir | 2,600 | None documented. |
| U.S. Mid-Atlantic mixed species stop seine/weir/pound net (except the NC roe mullet stop net). | unknown | Bottlenose dolphin, Northern NC estuarine system. |
| RI floating trap | 9 | None documented. |
| Northeast and Mid-Atlantic fyke net | unknown | None documented. |
| *Dredge Fisheries:* | | |
| Gulf of Maine sea urchin dredge | unknown | None documented. |
| Gulf of Maine mussel dredge | unknown | None documented. |
| Gulf of Maine, U.S. Mid-Atlantic sea scallop dredge | >403 | None documented. |
| Mid-Atlantic blue crab dredge | unknown | None documented. |
| Mid-Atlantic soft-shell clam dredge | unknown | None documented. |
| Mid-Atlantic whelk dredge | unknown | None documented. |
| U.S. Mid-Atlantic/Gulf of Mexico oyster dredge | 7,000 | None documented. |
| New England and Mid-Atlantic offshore surf clam/quahog dredge. | unknown | None documented. |
| *Haul/Beach Seine Fisheries:* | | |

TABLE 2—LIST OF FISHERIES—COMMERCIAL FISHERIES IN THE ATLANTIC OCEAN, GULF OF MEXICO, AND CARIBBEAN—Continued

| Fishery description | Estimated number of vessels/ persons | Marine mammal species and/or stocks incidentally killed or injured |
|---|---|---|
| Caribbean haul/beach seine | 38 | West Indian manatee, Puerto Rico. |
| Gulf of Mexico haul/beach seine | unknown | None documented. |
| Southeastern U.S. Atlantic haul/beach seine | 25 | None documented. |
| *Dive, Hand/Mechanical Collection Fisheries:* | | |
| Atlantic Ocean, Gulf of Mexico, Caribbean shellfish dive, hand/mechanical collection. | 20,000 | None documented. |
| Gulf of Maine urchin dive, hand/mechanical collection | unknown | None documented. |
| Gulf of Mexico, Southeast Atlantic, Mid-Atlantic, and Caribbean cast net. | unknown | None documented. |
| *Commercial Passenger Fishing Vessel (Charter Boat) Fisheries:* | | |
| Atlantic Ocean, Gulf of Mexico, Caribbean commercial passenger fishing vessel. | 4,000 | Bottlenose dolphin, Barataria Bay estuarine system.<br>Bottlenose dolphin, Biscayne Bay estuarine.<br>Bottlenose dolphin, Central FL coastal.<br>Bottlenose dolphin, Choctawhatchee Bay.<br>Bottlenose dolphin, Eastern GMX coastal.<br>Bottlenose dolphin, FL Bay.<br>Bottlenose dolphin, GMX bay, sound, estuarine.<br>Bottlenose dolphin, Indian River Lagoon estuarine system.<br>Bottlenose dolphin, Jacksonville estuarine system.<br>Bottlenose dolphin, Mississippi Sound, Lake Borgne, Bay Boudreau.<br>Bottlenose dolphin, Northern FL coastal.<br>Bottlenose dolphin, Northern GA/Southern SC estuarine.<br>Bottlenose dolphin, Northern GMX coastal.<br>Bottlenose dolphin, Northern migratory coastal.<br>Bottlenose dolphin, Northern NC estuarine.<br>Bottlenose dolphin, Southern migratory coastal.<br>Bottlenose dolphin, Southern NC estuarine system.<br>Bottlenose dolphin, SC/GA coastal.<br>Bottlenose dolphin, Western GMX coastal.<br>Short-finned pilot whale, WNA. |

List of Abbreviations and Symbols Used in Table 2:

DE—Delaware; FL—Florida; GA—Georgia; GME/BF—Gulf of Maine/Bay of Fundy; GMX—Gulf of Mexico; MA—Massachusetts; NC—North Carolina; NY—New York; RI—Rhode Island; SC—South Carolina; VA—Virginia; WNA—Western North Atlantic;

[1] Fishery classified based on mortalities and serious injuries of this stock, which are greater than or equal to 50 percent (Category I) or greater than 1 percent and less than 50 percent (Category II) of the stock's PBR;

[2] Fishery classified by analogy; and

* Fishery has an associated high seas component listed in Table 3.

List of Terms, Abbreviations, and Symbols Used in Table 3:

CA—California; GMX—Gulf of Mexico; HI—Hawaii; OR—Oregon; WA—Washington; WNA—Western North Atlantic;

* Fishery is an extension/component of an existing fishery operating within U.S. waters listed in Table 1 or 2. The number of permits listed in Table 3 represents only the number of permits for the high seas component of the fishery;

** These gear types are not authorized under the Pacific HMS FMP (2004), the Atlantic HMS FMP (2006), or without a South Pacific Tuna Treaty license (in the case of the South Pacific Tuna fisheries). Because HSFCA permits are valid for 5 years, permits obtained in past years exist in the HSFCA permit database for gear types that are now unauthorized. Therefore, while HSFCA permits exist for these gear types, it does not represent effort. In order to land fish species, fishers must be using an authorized gear type. Once these permits for unauthorized gear types expire, the permit-holder will be required to obtain a permit for an authorized gear type; and

^ The list of marine mammal species and/or stocks killed or injured in this fishery is identical to the list of marine mammal species and/or stocks killed or injured in U.S. waters component of the fishery, minus species and/or stocks that have geographic ranges exclusively in coastal waters, because the marine mammal species and/or stocks are also found on the high seas and the fishery remains the same on both sides of the EEZ boundary. Therefore, the high seas components of these fisheries pose the same risk to marine mammals as the components of these fisheries operating in U.S. waters.

TABLE 4—FISHERIES AFFECTED BY TAKE REDUCTION TEAMS AND PLANS

| Take reduction plans | Affected fisheries |
| --- | --- |

List of Symbols Used in Table 4:
* Only applicable to the portion of the fishery operating in U.S. waters; and
^ Only applicable to the portion of the fishery operating in the Atlantic Ocean.

## Classification

The Chief Counsel for Regulation of the Department of Commerce has certified to the Chief Counsel for Advocacy of the Small Business Administration (SBA) that this rule would not have a significant economic impact on a substantial number of small entities. No comments were received on that certification, and no new information has been discovered to change that conclusion. Accordingly, no regulatory flexibility analysis is required, and none has been prepared.

This rule contains existing collection-of-information (COI) requirements subject to the Paperwork Reduction Act and would not impose additional or new COI requirements. The COI for the registration of individuals under the MMPA has been approved by the OMB under OMB Control Number 0648–0293 (0.15 hours per report for new registrants). The requirement for reporting marine mammal mortalities or injuries has been approved by OMB under OMB Control Number 0648–0292 (0.15 hours per report). These estimates include the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the COI. Send comments regarding these reporting burden estimates or any other aspect of the COI, including suggestions for reducing burden, to NMFS (see **ADDRESSES**).

Notwithstanding any other provision of law, no person is required to respond to, nor shall a person be subject to a penalty for failure to comply with a COI, subject to the requirements of the Paperwork Reduction Act, unless that COI displays a currently valid OMB control number.

This rule has been determined to be not significant for the purposes of Executive Orders 12866 and 13563.

This rule is not expected to be an Executive Order 13771 regulatory action because this rule is not significant under Executive Order 12866.

In accordance with the Companion Manual for NOAA Administrative Order (NAO) 216–6A, NMFS determined that publishing this LOF qualifies to be categorically excluded from further NEPA review, consistent with categories of activities identified in Categorical Exclusion G7 (‘‘Preparation of policy directives, rules, regulations, and guidelines of an administrative, financial, legal, technical, or procedural nature, or for which the environmental effects are too broad, speculative or conjectural to lend themselves to meaningful analysis and will be subject later to the NEPA process, either collectively or on a case-by-case basis'') of the Companion Manual and we have not identified any extraordinary circumstances listed in Chapter 4 of the Companion Manual for NAO 216–6A that would preclude application of this categorical exclusion. If NMFS takes a management action, for example, through the development of a TRP, NMFS would first prepare an Environmental Impact Statement or Environmental Assessment, as required under NEPA, specific to that action.

This rule would not affect species listed as threatened or endangered under the ESA or their associated critical habitat. The impacts of numerous fisheries have been analyzed in various biological opinions, and this rule will not affect the conclusions of those opinions. The classification of fisheries on the LOF is not considered to be a management action that would adversely affect threatened or endangered species. If NMFS takes a management action, for example, through the development of a TRP, NMFS would consult under ESA section 7 on that action.

This rule would have no adverse impacts on marine mammals and may have a positive impact on marine mammals by improving knowledge of marine mammals and the fisheries interacting with marine mammals through information collected from observer programs, stranding and sighting data, or take reduction teams.

This rule would not affect the land or water uses or natural resources of the coastal zone, as specified under section 307 of the Coastal Zone Management Act.

# Proposed Rules

Federal Register

Vol. 86, No. 9

Thursday, January 14, 2021

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 63

**[EPA–HQ–OAR–2020–0505; FRL–10017–22–OAR]**

**RIN 2060–AU66**

## National Emission Standards for Hazardous Air Pollutants: Carbon Black Production Residual Risk and Technology Review and Carbon Black Production Area Sources Technology Review

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** The U.S. Environmental Protection Agency (EPA) is proposing amendments to the National Emission Standards for Hazardous Air Pollutants (NESHAP) for the Carbon Black Production major source category. The proposal addresses the results of the residual risk and technology review (RTR) for this source category as required under the Clean Air Act (CAA). The proposed amendments address hazardous air pollutant (HAP) emissions that occur after the main unit filter of a carbon black production unit, as well as emissions from boilers and process heaters. The proposed amendments also address the startup, shutdown, and malfunction (SSM) provisions of the existing standards, and would require electronic reporting of certain notifications, performance test results, and semiannual reports. Additionally, the proposal addresses the results of the technology review for the Carbon Black Production Area Source NESHAP.

**DATES:**

*Comments.* Comments must be received on or before March 1, 2021. Under the Paperwork Reduction Act (PRA), comments on the information collection provisions are best assured of consideration if the Office of Management and Budget (OMB) receives a copy of your comments on or before February 16, 2021.

*Public hearing:* If anyone contacts us requesting a public hearing on or before January 19, 2021, we will hold a virtual public hearing. See **SUPPLEMENTARY INFORMATION** for information on requesting and registering for a public hearing.

**ADDRESSES:** You may send comments, identified by Docket ID No. EPA–HQ–OAR–2020–0505, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov/* (our preferred method). Follow the online instructions for submitting comments.
- *Email: a-and-r-docket@epa.gov.* Include Docket ID No. EPA–HQ–OAR–2020–0505 in the subject line of the message.
- *Fax:* (202) 566–9744. Attention Docket ID No. EPA–HQ–OAR–2020–0505.
- *Mail:* U.S. Environmental Protection Agency, EPA Docket Center, Docket ID No. EPA–HQ–OAR–2020–0505, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand/Courier Delivery:* EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operation are 8:30 a.m.–4:30 p.m., Monday–Friday (except federal holidays).

*Instructions:* All submissions received must include the Docket ID No. for this rulemaking. Comments received may be posted without change to *https://www.regulations.gov/,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document. Out of an abundance of caution for members of the public and our staff, the EPA Docket Center and Reading Room are closed to the public, with limited exceptions, to reduce the risk of transmitting COVID–19. Our Docket Center staff will continue to provide remote customer service via email, phone, and webform. We encourage the public to submit comments via *https://www.regulations.gov/* or email, as there may be a delay in processing mail and faxes. Hand deliveries and couriers may be received by scheduled appointment only. For further information on EPA Docket Center services and the current status, please visit us online at *https://www.epa.gov/dockets.*

**FOR FURTHER INFORMATION CONTACT:** For questions about this proposed action, contact Mr. Korbin Smith Sector Policies and Programs Division (D243–04), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–2416; fax number: (919) 541–4991; and email address: *smith.korbin@epa.gov.* For specific information regarding the risk modeling methodology, contact Mr. James Hirtz, Health and Environmental Impacts Division (C539–02), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–0881; fax number: (919) 541–0840; and email address: *hirtz.james@epa.gov.*

**SUPPLEMENTARY INFORMATION:**

*Participation in virtual public hearing.* Please note that the EPA is deviating from its typical approach for public hearings because the President has declared a national emergency. Due to the current Centers for Disease Control and Prevention (CDC) recommendations, as well as state and local orders for social distancing to limit the spread of COVID–19, the EPA cannot hold in-person public meetings at this time.

To request a virtual public hearing, contact the public hearing team at (888) 372–8699 or by email at *SPPDpublichearing@epa.gov.* If requested, the virtual hearing will be held on January 29, 2021. The hearing will convene at 9:00 a.m. Eastern Time (ET) and will conclude at 3:00 p.m. ET. The EPA may close a session 15 minutes after the last pre-registered speaker has testified if there are no additional speakers. The EPA will announce further details at *https://www.epa.gov/stationary-sources-air-pollution/acetal-resins-acrylic-modacrylic-fibers-carbon-black-hydrogen.*

Upon publication of this document in the **Federal Register**, the EPA will begin pre-registering speakers for the hearing, if a hearing is requested. To register to speak at the virtual hearing, please use the online registration form available at *https://www.epa.gov/stationary-sources-air-pollution/acetal-resins-acrylic-modacrylic-fibers-carbon-black-hydrogen* or contact the public hearing team at (888) 372–8699 or by email at *SPPDpublichearing@epa.gov.* The last day to pre-register to speak at the hearing will be January 26, 2021. Prior to the hearing, the EPA will post a general agenda that will list pre-registered speakers in approximate order at: *https://www.epa.gov/stationary-sources-air-pollution/acetal-resins-acrylic-modacrylic-fibers-carbon-black-hydrogen.*

The EPA will make every effort to follow the schedule as closely as possible on the day of the hearing; however, please plan for the hearings to run either ahead of schedule or behind schedule.

Each commenter will have 5 minutes to provide oral testimony. The EPA encourages commenters to provide the EPA with a copy of their oral testimony electronically (via email) by emailing it to *smith.korbin@epa.gov.* The EPA also recommends submitting the text of your oral testimony as written comments to the rulemaking docket.

The EPA may ask clarifying questions during the oral presentations but will not respond to the presentations at that time. Written statements and supporting information submitted during the comment period will be considered with the same weight as oral testimony and supporting information presented at the public hearing.

Please note that any updates made to any aspect of the hearing will be posted online at *https://www.epa.gov/stationary-sources-air-pollution/acetal-resins-acrylic-modacrylic-fibers-carbon-black-hydrogen.* While the EPA expects the hearing to go forward as set forth above, please monitor our website or contact the public hearing team at (888) 372–8699 or by email at *SPPDpublichearing@epa.gov* to determine if there are any updates. The EPA does not intend to publish a document in the **Federal Register** announcing updates.

If you require the services of a translator or a special accommodation such as audio description, please pre-register for the hearing with the public hearing team and describe your needs by January 21, 2021. The EPA may not be able to arrange accommodations without advanced notice.

*Docket.* The EPA has established a docket for this rulemaking under Docket ID No. EPA–HQ–OAR–2020–0505. All documents in the docket are listed in *https://www.regulations.gov/.* Although listed, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy. With the exception of such material, publicly available docket materials are available electronically in *Regulations.gov.*

*Instructions.* Direct your comments to Docket ID No. EPA–HQ–OAR–2020–0505. The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *https://www.regulations.gov/,* including any personal information provided, unless the comment includes information claimed to be CBI or other information whose disclosure is restricted by statute. Do not submit electronically any information that you consider to be CBI or other information whose disclosure is restricted by statute. This type of information should be submitted by mail as discussed below.

The EPA may publish any comment received to its public docket. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the Web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.*

The *https://www.regulations.gov/* website allows you to submit your comment anonymously, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *https://www.regulations.gov/,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any digital storage media you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should not include special characters or any form of encryption and be free of any defects or viruses. For additional information about the EPA's public docket, visit the EPA Docket Center homepage at *https://www.epa.gov/dockets.*

The EPA is temporarily suspending its Docket Center and Reading Room for public visitors, with limited exceptions, to reduce the risk of transmitting COVID–19. Our Docket Center staff will continue to provide remote customer service via email, phone, and webform. We encourage the public to submit comments via *https://www.regulations.gov/* as there may be a delay in processing mail and faxes. Hand deliveries or couriers will be received by scheduled appointment only. For further information and updates on EPA Docket Center services, please visit us online at *https://www.epa.gov/dockets.*

The EPA continues to carefully and continuously monitor information from the CDC, local area health departments, and our Federal partners so that we can respond rapidly as conditions change regarding COVID–19.

*Submitting CBI.* Do not submit information containing CBI to the EPA through *https://www.regulations.gov/* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information on any digital storage media that you mail to the EPA, mark the outside of the digital storage media as CBI and then identify electronically within the digital storage media the specific information that is claimed as CBI. In addition to one complete version of the comments that includes information claimed as CBI, you must submit a copy of the comments that does not contain the information claimed as CBI directly to the public docket through the procedures outlined in *Instructions* above. If you submit any digital storage media that does not contain CBI, mark the outside of the digital storage media clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and the EPA's electronic public docket without prior notice. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 Code of Federal Regulations (CFR) part 2. Send or deliver information identified as CBI only to the following address: OAQPS Document Control Officer (C404–02), OAQPS, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention Docket ID No. EPA–HQ–OAR–2020–0505. Note that written comments containing CBI and submitted by mail may be delayed and no hand deliveries will be accepted.

*Preamble acronyms and abbreviations.* We use multiple acronyms and terms in this preamble.

While this list may not be exhaustive, to ease the reading of this preamble and for reference purposes, the EPA defines the following terms and acronyms here:

AEGL Acute exposure guideline level
AERMOD air dispersion model used by the HEM–3 model
ATSDR Agency for Toxic Substance and Disease Registry
CAA Clean Air Act
CalEPA California EPA
CBI Confidential Business Information
CCD combustion control device
CDC Centers for Disease Control and Prevention
CDX Central Data Exchange
CEDRI Compliance and Emissions Data Reporting Interface
CFR Code of Federal Regulations
EAV equivalent annual value
EPA Environmental Protection Agency
ERPG emergency response planning guideline
ERT Electronic Reporting Tool
GACT generally available control technology
HAP hazardous air pollutant(s)
HCl hydrochloric acid
HEM–3 Human Exposure Model, Version 1.5.5
HF hydrogen fluoride
HI hazard index
HQ hazard quotient
ICBA International Carbon Black Association
ICR Information Collection Request
IRIS Integrated Risk Information System
km kilometer
MACT maximum achievable control technology
mg/m3 milligrams per cubic meter
MIR maximum individual risk
MUF main unit filter
NAAQS National Ambient Air Quality Standards
NAICS North American Industry Classification System
NATA National Air Toxics Assessment
NEI National Emissions Inventory
NESHAP national emission standards for hazardous air pollutants
NOAEL no observed adverse effect level
NOCS Notification of Compliance Status
NSR New Source Review
OAQPS Office of Air Quality Planning and Standards
OMB Office of Management and Budget
PB–HAP hazardous air pollutants known to be persistent and bio-accumulative in the environment
PDF portable document format
POM polycyclic organic matter
ppm parts per million

PV present value
RBLC Reasonably Available Control Technology, Best Available Control Technology, and Lowest Achievable Emission Rate Clearinghouse
REL reference exposure level
RfC reference concentration
RfD reference dose
RTR residual risk and technology review
SAB Science Advisory Board
SV screening value
SSM startup, shutdown, and malfunction
TOSHI target organ-specific hazard index
tpy tons per year
TRIM.FaTE Total Risk Integrated Methodology.Fate, Transport, and Ecological Exposure model
UF uncertainty factor
μg/m3 microgram per cubic meter
URE unit risk estimate
USGS U.S. Geological Survey

*Organization of this document.* The information in this preamble is organized as follows:

I. General Information
A. Does this action apply to me?
B. Where can I get a copy of this document and other related information?
II. Background
A. What is the statutory authority for this action?
B. What is this source category and how does the current NESHAP regulate its HAP emissions?
C. What data collection activities were conducted to support this action?
D. What other relevant background information and data are available?
III. Analytical Procedures and Decision-Making
A. How do we consider risk in our decision-making?
B. How do we perform the technology review?
C. How do we estimate post-MACT risk posed by the source category?
IV. Analytical Results and Proposed Decisions
A. What actions are we taking pursuant to CAA sections 112(d)(2) and 112(d)(3)?
B. What are the results of the risk assessment and analyses?
C. What are our proposed decisions regarding risk acceptability, ample margin of safety, and adverse environmental effect?
D. What are the results and proposed decisions based on our technology review?
E. What other actions are we proposing?
F. What compliance dates are we proposing?
V. Summary of Cost, Environmental, and Economic Impacts
A. What are the affected sources?
B. What are the air quality impacts?
C. What are the cost impacts?
D. What are the economic impacts?
E. What are the benefits?
VI. Request for Comments
VII. Submitting Data Corrections
VIII. Statutory and Executive Order Reviews
A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review
B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs
C. Paperwork Reduction Act (PRA)
D. Regulatory Flexibility Act (RFA)
E. Unfunded Mandates Reform Act (UMRA)
F. Executive Order 13132: Federalism
G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments
H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks
I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use
J. National Technology Transfer and Advancement Act (NTTAA)
K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

## I. General Information

### *A. Does this action apply to me?*

The source categories that are the subject of this proposal are carbon black production major sources regulated under 40 CFR 63, subpart YY, and carbon black production area sources, regulated under 40 CFR 63 Subpart MMMMMM (6M). The North American Industry Classification System (NAICS) code for the carbon black production industry is 325182. This list of categories and NAICS codes is not intended to be exhaustive, but rather provides a guide for readers regarding the entities that this proposed action is likely to affect.

Federal, state, local, and tribal government entities would not be affected by this proposed action. The Carbon Black Production major source category was added to EPA's source category list June 4,1996 (61 FR 28197). As defined in the *National Emission Standards for Hazardous Air Pollutants; Revision of Initial List of Categories of Sources and Schedule for Standards Under Sections 112(c) and (e) of the Clean Air Act Amendments of 1990,* the Carbon Black Production major source categories are any facility engaged in the manufacture of carbon black using the channel, thermal, or furnace process. (61 FR 28197, June 4, 1996). The Carbon Black Production area source category was added to the EPA's source category list in 2002. (67 FR 70427, November 22, 2002).

### *B. Where can I get a copy of this document and other related information?*

In addition to being available in the docket, an electronic copy of this action is available on the internet. Following signature by the EPA Administrator, the EPA will post a copy of this proposed action at *https://www.epa.gov/stationary-sources-air-pollution/acetal-resins-acrylic-modacrylic-fibers-carbon-black-hydrogen.* Following publication in the **Federal Register**, the EPA will post the **Federal Register** version of the proposal and key technical documents at this same website. Information on the overall RTR program is available at *https://www3.epa.gov/ttn/atw/rrisk/rtrpg.html.*

The proposed changes to the CFR that would be necessary to incorporate the changes proposed in this action are set out in an attachment to the memorandum titled *Proposed Regulation Edits for 40 CFR part 63, subpart YY,* available in the docket for this action (Docket ID No. EPA–HQ–OAR–2020–0505). The document includes the specific proposed amendatory language for revising the CFR and, for the convenience of interested parties, a redline version of the regulation. Following signature by the EPA Administrator, the EPA will also post a copy of this memorandum and the attachments to *https://www.epa.gov/stationary-sources-air-pollution/acetal-resins-acrylic-modacrylic-fibers-carbon-black-hydrogen.*

## II. Background

### *A. What is the statutory authority for this action?*

The statutory authority for this action is provided by sections 112 and 301 of the CAA, as amended (42 U.S.C. 7401 *et seq.*). Section 112 of the CAA establishes a two-stage regulatory process to develop standards for emissions of hazardous air pollutants (HAP) from stationary sources. Generally, the first stage involves establishing technology-based standards and the second stage involves evaluating those standards that are based on maximum achievable control technology (MACT) to determine whether additional standards are needed to address any remaining risk associated with HAP emissions. This second stage is commonly referred to as the ''residual risk review.'' In addition to the residual risk review, the CAA also requires the EPA to review standards set under CAA section 112 every 8 years and revise the standards as necessary taking into account any ''developments in practices, processes, or control technologies.'' This review is commonly referred to as the ''technology review.'' When the two reviews are combined into a single rulemaking, it is commonly referred to as the ''risk and technology review.'' The discussion that follows identifies the most relevant statutory sections and briefly explains the contours of the methodology used to implement these statutory requirements. A more comprehensive discussion appears in the document titled *CAA Section 112 Risk and Technology Reviews: Statutory Authority and Methodology,* in the docket for this rulemaking.

In the first stage of the CAA section 112 standard setting process, the EPA promulgates technology-based standards under CAA section 112(d) for categories of sources identified as emitting one or more of the HAP listed in CAA section 112(b). Sources of HAP emissions are either major sources or area sources, and CAA section 112 establishes different requirements for major source standards and area source standards. ''Major sources'' are those that emit or have the potential to emit 10 tons per year (tpy) or more of a single HAP or 25 tpy or more of any combination of HAP. All other sources are ''area sources.'' For major sources, CAA section 112(d)(2) provides that the technology-based NESHAP must reflect the maximum degree of emission reductions of HAP achievable (after considering cost, energy requirements, and non-air quality health and environmental impacts). These standards are commonly referred to as MACT standards. CAA section 112(d)(3) also establishes a minimum control level for MACT standards, known as the MACT ''floor.'' In certain instances, as provided in CAA section 112(h), the EPA may set work practice standards in lieu of numerical emission standards. The EPA must also consider control options that are more stringent than the floor. Standards more stringent than the floor are commonly referred to as beyond-the-floor standards. For area sources, CAA section 112(d)(5) gives the EPA discretion to set standards based on generally available control technologies or management practices (GACT standards) in lieu of MACT standards.

The second stage in standard-setting focuses on identifying and addressing any remaining (*i.e.,* ''residual'') risk pursuant to CAA section 112(f). For source categories subject to MACT standards, section 112(f)(2) of the CAA requires the EPA to determine whether promulgation of additional standards is needed to provide an ample margin of safety to protect public health or to prevent an adverse environmental effect. Section 112(d)(5) of the CAA provides that this residual risk review is not required for categories of area sources subject to GACT standards. Section 112(f)(2)(B) of the CAA further expressly preserves the EPA's use of the two-step approach for developing standards to address any residual risk and the Agency's interpretation of ''ample margin of safety'' developed in the National Emissions Standards for Hazardous Air Pollutants: Benzene Emissions from Maleic Anhydride Plants, Ethylbenzene/Styrene Plants, Benzene Storage Vessels, Benzene Equipment Leaks, and Coke By-Product Recovery Plants (Benzene NESHAP) (54 FR 38044, September 14, 1989). The EPA notified Congress in the Residual Risk Report that the Agency intended to use the Benzene NESHAP approach in making CAA section 112(f) residual risk determinations (EPA–453/R–99–001, p. ES–11). The EPA subsequently adopted this approach in its residual risk determinations and the United States Court of Appeals for the District of Columbia Circuit (D.C. Circuit Court) upheld the EPA's interpretation that CAA section 112(f)(2) incorporates the approach established in the Benzene NESHAP. See *NRDC* v. *EPA,* 529 F.3d 1077, 1083 (D.C. Cir. 2008).

The approach incorporated into the CAA and used by the EPA to evaluate residual risk and to develop standards under CAA section 112(f)(2) is a two-step approach. In the first step, the EPA determines whether risks are acceptable. This determination ''considers all health information, including risk estimation uncertainty, and includes a presumptive limit on maximum individual lifetime [cancer] risk (MIR) [1] of approximately 1 in 10 thousand.'' (54 FR 38045). If risks are unacceptable, the EPA must determine the emissions standards necessary to reduce risk to an acceptable level without considering costs. In the second step of the approach, the EPA considers whether the emissions standards provide an ample margin of safety to protect public health ''in consideration of all health information, including the number of persons at risk levels higher than approximately 1 in 1 million, as well as other relevant factors, including costs and economic impacts, technological feasibility, and other factors relevant to each particular decision.'' *Id.* The EPA must promulgate emission standards necessary to provide an ample margin of safety to protect public health or determine that the standards being reviewed provide an ample margin of safety without any revisions. After conducting the ample margin of safety analysis, we consider whether a more stringent standard is necessary to prevent, taking into consideration costs, energy, safety, and other relevant factors, an adverse environmental effect.

CAA section 112(d)(6) separately requires the EPA to review standards promulgated under CAA section 112 and revise them ''as necessary (taking into account developments in practices, processes, and control technologies)'' no

[1] Although defined as ''maximum individual risk,'' MIR refers only to cancer risk. MIR, one metric for assessing cancer risk, is the estimated risk if an individual were exposed to the maximum level of a pollutant for a lifetime.

less often than every 8 years. In conducting this review, which we call the ''technology review,'' the EPA is not required to recalculate the MACT floor. *Natural Resources Defense Council (NRDC)* v. *EPA,* 529 F.3d 1077, 1084 (D.C. Cir. 2008). *Association of Battery Recyclers, Inc.* v. *EPA,* 716 F.3d 667 (D.C. Cir. 2013). The EPA may consider cost in deciding whether to revise the standards pursuant to CAA section 112(d)(6). The EPA is required to address regulatory gaps, such as missing standards for listed air toxics known to be emitted from the source category. *Louisiana Environmental Action Network (LEAN)* v. *EPA,* 955 F.3d 1088 (D.C. Cir. 2020).

*B. What is this source category and how does the current NESHAP regulate its HAP emissions?*

The NESHAP for the Carbon Black Production major source category was promulgated on July 12, 2002 (67 FR 46258), and codified at 40 CFR part 63, subpart YY. Additionally, the Carbon Black Production area source NESHAP was promulgated on July 16, 2007 (72 FR 38864), and codified at 40 CFR part 63, subpart MMMMMM. Subpart MMMMMM was subsequently amended by a direct final rule on March 26, 2008 (73 FR 15923). As promulgated, the Carbon Black Production major source and area source NESHAPs apply to affected sources of HAP at carbon black production facilities that are, respectively, major sources and area sources of HAP. The affected sources covered by subpart YY include each carbon black production process unit, along with associated process vents and equipment that are located at a major source, as defined in section 112(a) of the CAA.

Emissions limits in the 2002 major source NESHAP for the Carbon Black Production source category were set for process vents associated with the main unit filter (MUF). Process vents at the MUF that have a HAP concentration of the emission stream equal to or greater than 260 parts per million by volume (ppmv), must reduce emissions of HAP by the use of a flare meeting the requirements of 40 CFR part 63, subpart SS, or must reduce emissions of total HAP by 98 weight-percent or to a concentration of 20 ppmv, whichever is less stringent, by venting emissions through a closed vent system to any combination of control devices meeting the requirements of subpart SS of this part, as specified in 40 CFR 63.982(a)(2). 40 CFR 63.982(a)(2) specifies separate compliance depending on whether the closed vent system is routed to a flare, or a non-flare control device. These provisions include flare compliance assessments, and specific monitoring, recordkeeping, and reporting requirements. Emission limits for the Carbon Black Production area source category NESHAP reference the provisions of the major source standard.

*C. What data collection activities were conducted to support this action?*

For the residual risk assessment, the EPA utilized data from the 2016 National Emissions Inventory (NEI). The NEI is a database that contains information about sources that emit criteria air pollutants, their precursors, and HAP. The database includes estimates of annual air pollutant emissions from point, nonpoint, and mobile sources in the 50 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. The EPA collects this information and releases an updated version of the NEI database every 3 years. The NEI contains data necessary for conducting the residual risk assessment, including annual HAP emissions estimates from individual emission points at facilities in the Carbon Black Production source category, and related emissions release parameters.

The 2016 NEI data for the Carbon Black Production source category was reviewed and updated as appropriate by the International Carbon Black Association (ICBA). Major source members of ICBA represent all major sources subject to this regulation. The information received included descriptions of HAP-emitting processes, information on the HAP-containing materials used, estimates of emissions, and descriptions of control technologies, if present.

The EPA used NEI emissions data and the review by ICBA as the primary technical basis for developing the model input files for the residual risk assessment for the Carbon Black Production source category. Additional information on the development of the modeling file for the Carbon Black Production source category can be found in the document, *Residual Risk Assessment for the Carbon Black Production Source Category in Support of the Risk and Technology Review 2020 Proposed Rule,* which is available in the docket for this rulemaking.

To support both the residual risk assessment and the technology review addressed in this action, the EPA visited two carbon black production facilities. During the visits, the EPA discussed process operations, compliance with the existing NESHAP, description of the emission points, process controls, unregulated emissions, and other aspects of facility operations. The EPA used the information provided by the facilities to understand the various operations, existing controls, and new developments in practices, processes, and control technologies for the source category. Additional information can be found in the site visit reports, the *Orion Borger Facility Site Visit Report* and the *Sid Richardson Addis Facility Site Visit Report,* which are available in the docket for this action.

*D. What other relevant background information and data are available?*

For the technology review, we reviewed the Reasonably Available Control Technology (RACT), Best Available Control Technology (BACT), and Lowest Achievable Emission Rate (LAER) Clearinghouse (RBLC). This is a database that contains case-specific information on air pollution control technologies that have been required to reduce the emissions of air pollutants from stationary sources. Under the EPA's New Source Review (NSR) program, if a facility is planning new construction or a modification that will increase the air emissions above certain defined thresholds, an NSR permit may be required. The RBLC promotes the sharing of information among permitting agencies and aids in case-by-case BACT and LAER determinations for NSR permits. We examined information contained in the RBLC to determine what technologies are currently used for this source category to reduce air emissions and did not identify any new technologies.

Additional information about these data collection activities for the technology review is contained in the technology review memorandum, *Technology Review for the Carbon Black Production Source Category,* which is available in the docket for this action.

## III. Analytical Procedures and Decision-Making

In this section, we describe the analyses performed to support the proposed decisions for the RTR and other issues addressed in this proposal.

*A. How do we consider risk in our decision-making?*

As discussed in section II.A of this preamble and in the Benzene NESHAP, in evaluating and developing standards under CAA section 112(f)(2), we apply a two-step approach to determine whether or not risks are acceptable and to determine if the standards provide an ample margin of safety to protect public health. As explained in the Benzene NESHAP, ''the first step judgment on acceptability cannot be reduced to any single factor'' and, thus, ''[t]he Administrator believes that the acceptability of risk under section 112 is best judged on the basis of a broad set of health risk measures and information.'' (54 FR 38046). Similarly, with regard to the ample margin of safety determination, ''the Agency again considers all of the health risk and other health information considered in the first step. Beyond that information, additional factors relating to the appropriate level of control will also be considered, including cost and economic impacts of controls, technological feasibility, uncertainties, and any other relevant factors.'' *Id.*

The Benzene NESHAP approach provides flexibility regarding factors the EPA may consider in making determinations and how the EPA may weigh those factors for each source category. The EPA conducts a risk assessment that provides estimates of the MIR posed by emissions of HAP that are carcinogens from each source in the source category, the hazard index (HI) for chronic exposures to HAP with the potential to cause noncancer health effects, and the hazard quotient (HQ) for acute exposures to HAP with the potential to cause noncancer health effects.[2] The assessment also provides estimates of the distribution of cancer risk within the exposed populations, cancer incidence, and an evaluation of the potential for an adverse environmental effect. The scope of the EPA's risk analysis is consistent with the explanation in the EPA's response to comments on our policy under the Benzene NESHAP:

> The policy chosen by the Administrator permits consideration of multiple measures of health risk. Not only can the MIR figure be considered, but also incidence, the presence of non-cancer health effects, and the uncertainties of the risk estimates. In this way, the effect on the most exposed individuals can be reviewed as well as the impact on the general public. These factors can then be weighed in each individual case. This approach complies with the *Vinyl Chloride* mandate that the Administrator ascertain an acceptable level of risk to the public by employing his expertise to assess available data. It also complies with the Congressional intent behind the CAA, which did not exclude the use of any particular measure of public health risk from the EPA's consideration with respect to CAA section 112 regulations, and thereby implicitly permits consideration of any and all measures of health risk which the Administrator, in his judgment, believes are appropriate to determining what will ''protect the public health.''

(54 FR 38057). Thus, the level of the MIR is only one factor to be weighed in determining acceptability of risk. The Benzene NESHAP explained that ''an MIR of approximately one in 10 thousand should ordinarily be the upper end of the range of acceptability. As risks increase above this benchmark, they become presumptively less acceptable under CAA section 112, and would be weighed with the other health risk measures and information in making an overall judgment on acceptability. Or, the Agency may find, in a particular case, that a risk that includes an MIR less than the presumptively acceptable level is unacceptable in the light of other health risk factors.'' *Id.* at 38045. In other words, risks that include an MIR above 100-in-1 million may be determined to be acceptable, and risks with an MIR below that level may be determined to be unacceptable, depending on all of the available health information. Similarly, with regard to the ample margin of safety analysis, the EPA stated in the Benzene NESHAP that: ''EPA believes the relative weight of the many factors that can be considered in selecting an ample margin of safety can only be determined for each specific source category. This occurs mainly because technological and economic factors (along with the health-related factors) vary from source category to source category.'' *Id.* at 38061. We also consider the uncertainties associated with the various risk analyses, as discussed earlier in this preamble, in our determinations of acceptability and ample margin of safety.

The EPA notes that it has not considered certain health information to date in making residual risk determinations. At this time, we do not attempt to quantify the HAP risk that may be associated with emissions from other facilities that do not include the source category under review, mobile source emissions, natural source emissions, persistent environmental pollution, or atmospheric transformation in the vicinity of the sources in the category.

The EPA understands the potential importance of considering an individual's total exposure to HAP in addition to considering exposure to HAP emissions from the source category and facility. We recognize that such consideration may be particularly important when assessing noncancer risk, where pollutant-specific exposure health reference levels (*e.g.,* reference concentrations (RfCs)) are based on the assumption that thresholds exist for adverse health effects. For example, the EPA recognizes that, although exposures attributable to emissions from a source category or facility alone may not indicate the potential for increased risk of adverse noncancer health effects in a population, the exposures resulting from emissions from the facility in combination with emissions from all of the other sources (*e.g.,* other facilities) to which an individual is exposed may be sufficient to result in an increased risk of adverse noncancer health effects. In May 2010, the Science Advisory Board (SAB) advised the EPA ''that RTR assessments will be most useful to decision makers and communities if results are presented in the broader context of aggregate and cumulative risks, including background concentrations and contributions from other sources in the area.''[3]

In response to the SAB recommendations, the EPA incorporates cumulative risk analyses into its RTR risk assessments. The Agency: (1) Conducts facility-wide assessments, which include source category emission points, as well as other emission points within the facilities; (2) combines exposures from multiple sources in the same category that could affect the same individuals; and (3) for some persistent and bioaccumulative pollutants, analyzes the ingestion route of exposure. In addition, the RTR risk assessments consider aggregate cancer risk from all carcinogens and aggregated noncancer HQs for all noncarcinogens affecting the same target organ or target organ system.

Although we are interested in placing source category and facility-wide HAP risk in the context of total HAP risk from all sources combined in the vicinity of each source, we are concerned about the uncertainties of doing so. Estimates of total HAP risk from emission sources other than those that we have studied in depth during this RTR review would have significantly greater associated uncertainties than the source category or facility-wide estimates. Such aggregate or cumulative assessments would compound those uncertainties, making the assessments too unreliable.

### *B. How do we perform the technology review?*

Our technology review primarily focuses on the identification and

[2] The MIR is defined as the cancer risk associated with a lifetime of exposure at the highest concentration of HAP where people are likely to live. The HQ is the ratio of the potential HAP exposure concentration to the noncancer dose-response value; the HI is the sum of HQs for HAP that affect the same target organ or organ system.

[3] Recommendations of the SAB Risk and Technology Review Methods Panel are provided in their report, which is available at: *https://yosemite.epa.gov/sab/sabproduct.nsf/4AB3966E263D943A8525771F00668381/$File/EPA-SAB-10-007-unsigned.pdf.*

evaluation of developments in practices, processes, and control technologies that have occurred since the MACT standards were promulgated. Where we identify such developments, we analyze their technical feasibility, estimated costs, energy implications, and non-air environmental impacts. We also consider the emission reductions associated with applying each development. This analysis informs our decision of whether it is ''necessary'' to revise the emissions standards. In addition, we consider the appropriateness of applying controls to new sources versus retrofitting existing sources. For this exercise, we consider any of the following to be a ''development'':

- Any add-on control technology or other equipment that was not identified and considered during development of the original MACT standards;
- Any improvements in add-on control technology or other equipment (that were identified and considered during development of the original MACT standards) that could result in additional emissions reduction;
- Any work practice or operational procedure that was not identified or considered during development of the original MACT standards;
- Any process change or pollution prevention alternative that could be broadly applied to the industry and that was not identified or considered during development of the original MACT standards; and
- Any significant changes in the cost (including cost effectiveness) of applying controls (including controls the EPA considered during the development of the original MACT standards).

In addition to reviewing the practices, processes, and control technologies that were considered at the time we originally developed the NESHAP, we review a variety of data sources in our investigation of potential practices, processes, or controls. We also review the NESHAP and the available data to determine if there are any unregulated emissions of HAP within the source category and evaluate this data for use in developing new emission standards. See sections II.C and II.D of this preamble for information on the specific data sources that were reviewed as part of the technology review.

### *C. How do we estimate post-MACT risk posed by the source category?*

In this section, we provide a complete description of the types of analyses that we generally perform during the risk assessment process. In some cases, we do not perform a specific analysis because it is not relevant. For example, in the absence of emissions of HAP known to be persistent and bioaccumulative in the environment (PB–HAP), we would not perform a multipathway exposure assessment. Where we do not perform an analysis, we state that we do not and provide the reason. While we present all of our risk assessment methods, we only present risk assessment results for the analyses actually conducted (see section IV.B of this preamble).

The EPA conducts a risk assessment that provides estimates of the MIR for cancer posed by the HAP emissions from each source in the source category, the HI for chronic exposures to HAP with the potential to cause noncancer health effects, and the HQ for acute exposures to HAP with the potential to cause noncancer health effects. The assessment also provides estimates of the distribution of cancer risk within the exposed populations, cancer incidence, and an evaluation of the potential for an adverse environmental effect. The seven sections that follow this paragraph describe how we estimated emissions and conducted the risk assessment. The docket for this rulemaking contains the following document which provides more information on the risk assessment inputs and models: *Residual Risk Assessment for the Carbon Black Production Source Category in Support of the 2020 Risk and Technology Review Proposed Rule.* The methods used to assess risk (as described in the seven primary steps below) are consistent with those described by the EPA in the document reviewed by a panel of the EPA's SAB in 2009;[4] and described in the SAB review report issued in 2010. They are also consistent with the key recommendations contained in that report.

#### 1. How did we estimate actual emissions and identify the emissions release characteristics?

The estimated actual emissions and the emission release characteristics for each facility in the source category were obtained from the 2016 NEI. In addition, the EPA provided draft actual emissions data and stack parameters to facilities for review and confirmation. In some cases, facilities were contacted to confirm emissions that appeared to be outliers, otherwise inconsistent with our understanding of the industry, or associated with high risk values in our initial risk screening analyses. Where appropriate, emission values and release characteristics were corrected, based on revised stack parameter information provided by the facilities. Additional information on the development of the modeling file for the source category, including the development of the actual emissions and emissions release characteristics, can be found in the Appendix 1 of the document, *Residual Risk Assessment for Carbon Black Production Source Category in Support of the 2020 Risk and Technology Review Proposed Rule,* which is available in the docket for this action.

#### 2. How did we estimate MACT-allowable emissions?

The available emissions data in the RTR emissions dataset include estimates of the mass of HAP emitted during a specified annual time period. These ''actual'' emission levels are often lower than the emission levels allowed under the requirements of the current MACT standards. The emissions allowed under the MACT standards are referred to as the ''MACT-allowable'' emissions. We discussed the consideration of both MACT-allowable and actual emissions in the final Coke Oven Batteries RTR (70 FR 19992, 19998 through 19999, April 15, 2005) and in the proposed and final Hazardous Organic NESHAP RTR (71 FR 34421, 34428, June 14, 2006, and 71 FR 76603, 76609, December 21, 2006, respectively). In those actions, we noted that assessing the risk at the MACT-allowable level is inherently reasonable since that risk reflects the maximum level facilities could emit and still comply with national emission standards. We also explained that it is reasonable to consider actual emissions, where such data are available, in both steps of the risk analysis, in accordance with the Benzene NESHAP approach. (54 FR 38044.)

In order to calculate allowable emissions, a detailed analysis of the source category was conducted to determine how each major source facility meets the emissions standards of the Carbon Black NESHAP. With respect to the various types of controls used within the source category, all facilities use a combination of combustion control devices (CCDs). Facilities that manufacture carbon black typically have several types of CCDs including but not limited to, flares, incinerators, boilers/process heaters, and dryers. CCDs can be used to control emissions for a single emissions source, or as is generally the case, to control emissions from multiple emission sources/emission source types.

[4] U.S. EPA. *Risk and Technology Review (RTR) Risk Assessment Methodologies: For Review by the EPA's Science Advisory Board with Case Studies—MACT I Petroleum Refining Sources and Portland Cement Manufacturing,* June 2009. EPA–452/R–09–006. *https://www3.epa.gov/airtoxics/rrisk/rtrpg.html.*

Historically, the majority of facilities in this source category utilize flares to control emissions. Emissions reductions for flares in this source category presume to control HAP at a level of 98 percent (*e.g.,* see as an example, Technical Supplement 4: Flares in ''2016 Emissions Inventory Guidelines,'' (TCEQ 2017)). Due to ongoing consent decrees, several facilities are transitioning from flares to incinerators to reduce criteria pollutants. Since the current emission limit allows the use of a flare, or to control emissions to 98 percent, and all facilities utilize a CCD meeting those requirements, it is appropriate to estimate actual emissions as equal to allowable emissions.

For equipment leaks, which are subject to work practice standards, there is no difference between actual and MACT-allowable emissions for facilities in the Carbon Black Production source category. This is because all facilities are using the same work practice standard, and when the work practice standard is correctly applied, the actual emissions that result are the same as allowable emissions. For additional information on the allowable calculations, see *Development of the RTR Proposal Risk Modeling Dataset for the Carbon Black Production Source Category,* available in the docket for this rulemaking.

3. How do we conduct dispersion modeling, determine inhalation exposures, and estimate individual and population inhalation risk?

Both long-term and short-term inhalation exposure concentrations and health risk from the source category addressed in this proposal were estimated using the Human Exposure Model (HEM–3).[5] The HEM–3 performs three primary risk assessment activities: (1) Conducting dispersion modeling to estimate the concentrations of HAP in ambient air, (2) estimating long-term and short-term inhalation exposures to individuals residing within 50 kilometers (km) of the modeled sources, and (3) estimating individual and population-level inhalation risk using the exposure estimates and quantitative dose-response information.

a. Dispersion Modeling

The air dispersion model AERMOD, used by the HEM–3 model, is one of the EPA's preferred models for assessing air pollutant concentrations from industrial facilities.[6] To perform the dispersion modeling and to develop the preliminary risk estimates, HEM–3 draws on three data libraries. The first is a library of meteorological data, which is used for dispersion calculations. This library includes 1 year (2016) of hourly surface and upper air observations from 824 meteorological stations selected to provide coverage of the United States and Puerto Rico. A second library of United States Census Bureau census block[7] internal point locations and populations provides the basis of human exposure calculations (U.S. Census, 2010). In addition, for each census block, the census library includes the elevation and controlling hill height, which are also used in dispersion calculations. A third library of pollutant-specific dose-response values is used to estimate health risk. These are discussed below.

b. Risk From Chronic Exposure to HAP

In developing the risk assessment for chronic exposures, we use the estimated annual average ambient air concentrations of each HAP emitted by each source in the source category. The HAP air concentrations at each nearby census block centroid located within 50 km of the facility are a surrogate for the chronic inhalation exposure concentration for all the people who reside in that census block. A distance of 50 km is consistent with both the analysis supporting the 1989 Benzene NESHAP (54 FR 38044) and the limitations of Gaussian dispersion models, including AERMOD.

For each facility, we calculate the MIR as the cancer risk associated with a continuous lifetime (24 hours per day, 7 days per week, 52 weeks per year, 70 years) exposure to the maximum concentration at the centroid of each inhabited census block. We calculate individual cancer risk by multiplying the estimated lifetime exposure to the ambient concentration of each HAP (in micrograms per cubic meter (μg/m$^3$)) by its unit risk estimate (URE). The URE is an upper-bound estimate of an individual's incremental risk of contracting cancer over a lifetime of exposure to a concentration of 1 microgram of the pollutant per cubic meter of air. For residual risk assessments, we generally use UREs from the EPA's Integrated Risk Information System (IRIS). For carcinogenic pollutants without IRIS values, we look to other reputable sources of cancer dose-response values, often using California EPA (CalEPA) UREs, where available. In cases where new, scientifically credible dose-response values have been developed in a manner consistent with EPA guidelines and have undergone a peer review process similar to that used by the EPA, we may use such dose-response values in place of, or in addition to, other values, if appropriate. The pollutant-specific dose-response values used to estimate health risk are available at *https://www.epa.gov/fera/dose-response-assessment-assessing-health-risks-associated-exposure-hazardous-air-pollutants.*

To estimate individual lifetime cancer risks associated with exposure to HAP emissions from each facility in the source category, we sum the risks for each of the carcinogenic HAP[8] emitted by the modeled facility. We estimate cancer risk at every census block within 50 km of every facility in the source category. The MIR is the highest individual lifetime cancer risk estimated for any of those census blocks. In addition to calculating the MIR, we estimate the distribution of individual cancer risks for the source category by summing the number of individuals within 50 km of the sources whose estimated risk falls within a specified risk range. We also estimate annual cancer incidence by multiplying the estimated lifetime cancer risk at each census block by the number of people residing in that block, summing results for all of the census blocks, and then dividing this result by a 70-year lifetime.

To assess the risk of noncancer health effects from chronic exposure to HAP, we calculate either an HQ or a target organ-specific hazard index (TOSHI). We calculate an HQ when a single noncancer HAP is emitted. Where more than one noncancer HAP is emitted, we sum the HQ for each of the HAP that affects a common target organ or target

[6] U.S. EPA. Revision to the *Guideline on Air Quality Models: Adoption of a Preferred General Purpose (Flat and Complex Terrain) Dispersion Model and Other Revisions* (70 FR 68218, November 9, 2005).

[7] A census block is the smallest geographic area for which census statistics are tabulated.

[8] The EPA classification system is, in general, an adaptation of the International Agency for Research on Cancer (IARC, 1982) approach for classifying the weight of evidence for human data and animal data. The EPA classification system for the characterization of the overall weight of evidence for carcinogenicity (animal, human, and other supportive data) includes: Group A—Carcinogenic to Humans; Group B—Probably Carcinogenic to Humans; Group C—Possibly Carcinogenic to Humans; Group D—Not Classifiable as to Human Carcinogenicity; and Group E—Evidence of Noncarcinogenicity for Humans. These classifications also coincide with the terms, ''carcinogenic to humans, probably carcinogenic to humans, and possibly carcinogenic to humans,'' respectively, which are the terms advocated in the EPA's *Guidelines for Carcinogenic Risk Assessment,* published in 1986 (51 FR 33992, September 24, 1986); *https://nepis.epa.gov/Exe/ZyPDF.cgi/30004TZX.PDF?/Dockey=/30004TZX.PDF.*

organ system to obtain a TOSHI. The HQ is the estimated exposure divided by the chronic noncancer dose-response value, which is a value selected from one of several sources. The preferred chronic noncancer dose-response value is the EPA RfC, defined as ''an estimate (with uncertainty spanning perhaps an order of magnitude) of a continuous inhalation exposure to the human population (including sensitive subgroups) that is likely to be without an appreciable risk of deleterious effects during a lifetime'' (*https://iaspub.epa.gov/sor_internet/registry/termreg/searchandretrieve/glossaries/and/keyword/lists/search.do?/details=/&vocabName=/IRIS%20/Glossary*). In cases where an RfC from the EPA's IRIS is not available or where the EPA determines that using a value other than the RfC is appropriate, the chronic noncancer dose-response value can be a value from the following prioritized sources, which define their dose-response values similarly to the EPA: (1) The Agency for Toxic Substances and Disease Registry (ATSDR) Minimum Risk Level (*https://www.atsdr.cdc.gov/mrls/index.asp*); (2) the CalEPA Chronic Reference Exposure Level (REL) (*https://oehha.ca.gov/air/crnr/notice-adoption-air-toxics-hot-spots-program-guidance-manual-preparation-health-risk-0*); or (3) as noted above, a scientifically credible dose-response value that has been developed in a manner consistent with the EPA guidelines and has undergone a peer review process similar to that used by the EPA. The pollutant-specific dose-response values used to estimate health risks are available at *https://www.epa.gov/fera/dose-response-assessment-assessing-health-risks-associated-exposure-hazardous-air-pollutants.*

c. Risk From Acute Exposure to HAP That May Cause Health Effects Other Than Cancer

For each HAP for which appropriate acute inhalation dose-response values are available, the EPA also assesses the potential health risks due to acute exposure. For these assessments, the EPA makes conservative assumptions about emission rates, meteorology, and exposure location. As part of our efforts to continually improve our methodologies to evaluate the risks that HAP emitted from categories of industrial sources pose to human health and the environment,[9] we revised our treatment of meteorological data to use reasonable worst-case air dispersion conditions in our acute risk screening assessments instead of worst-case air dispersion conditions. This revised treatment of meteorological data and the supporting rationale are described in more detail in *Residual Risk Assessment for the Carbon Black Production Source Category in Support of the 2020 Risk and Technology Review Proposed Rule* and in Appendix 5 of the report: *Technical Support Document for Acute Risk Screening Assessment.* This revised approach has been used in this proposed rule and in all other RTR rulemakings proposed on or after June 3, 2019.

To assess the potential acute risk to the maximally exposed individual, we use the peak hourly emission rate for each emission point,[10] reasonable worst-case air dispersion conditions (*i.e.,* 99th percentile), and the point of highest off-site exposure. Specifically, we assume that peak emissions from the source category and reasonable worst-case air dispersion conditions co-occur and that a person is present at the point of maximum exposure.

To characterize the potential health risks associated with estimated acute inhalation exposures to a HAP, we generally use multiple acute dose-response values, including acute RELs, acute exposure guideline levels (AEGLs), and emergency response planning guidelines (ERPG) for 1-hour exposure durations, if available, to calculate acute HQs. The acute HQ is calculated by dividing the estimated acute exposure concentration by the acute dose-response value. For each HAP for which acute dose-response values are available, the EPA calculates acute HQs.

An acute REL is defined as ''the concentration level at or below which no adverse health effects are anticipated for a specified exposure duration.'' [11] Acute RELs are based on the most sensitive, relevant, adverse health effect reported in the peer-reviewed medical and toxicological literature. They are designed to protect the most sensitive individuals in the population through the inclusion of margins of safety. Because margins of safety are incorporated to address data gaps and uncertainties, exceeding the REL does not automatically indicate an adverse health impact. AEGLs represent threshold exposure limits for the general public and are applicable to emergency exposures ranging from 10 minutes to 8 hours.[12] They are guideline levels for ''once-in-a-lifetime, short-term exposures to airborne concentrations of acutely toxic, high-priority chemicals.'' *Id.* at 21. The AEGL–1 is specifically defined as ''the airborne concentration (expressed as ppm (parts per million) or $mg/m^3$ (milligrams per cubic meter)) of a substance above which it is predicted that the general population, including susceptible individuals, could experience notable discomfort, irritation, or certain asymptomatic nonsensory effects. However, the effects are not disabling and are transient and reversible upon cessation of exposure.'' The document also notes that ''Airborne concentrations below AEGL–1 represent exposure levels that can produce mild and progressively increasing but transient and nondisabling odor, taste, and sensory irritation or certain asymptomatic, nonsensory effects.'' *Id.* AEGL–2 are defined as ''the airborne concentration (expressed as parts per million or milligrams per cubic meter) of a substance above which it is predicted that the general population, including susceptible individuals, could experience irreversible or other serious, long-lasting adverse health effects or an impaired ability to escape.'' *Id.*

ERPGs are ''developed for emergency planning and are intended as health-based guideline concentrations for single exposures to chemicals.'' [13] *Id.* at 1. The ERPG–1 is defined as ''the maximum airborne concentration below which it is believed that nearly all individuals could be exposed for up to 1 hour without experiencing other than mild transient adverse health effects or without perceiving a clearly defined,

[10] In the absence of hourly emission data, we develop estimates of maximum hourly emission rates by multiplying the average actual annual emissions rates by a factor (either a category-specific factor or a default factor of 10) to account for variability. This is documented in *Residual Risk Assessment for Carbon Black Production Source Category in Support of the 2020 Risk and Technology Review Proposed Rule* and in Appendix 5 of the report: *Technical Support Document for Acute Risk Screening Assessment.* Both are available in the docket for this rulemaking.

[11] CalEPA issues acute RELs as part of its Air Toxics Hot Spots Program, and the 1-hour and 8-hour values are documented in *Air Toxics Hot Spots Program Risk Assessment Guidelines, Part I, The Determination of Acute Reference Exposure Levels for Airborne Toxicants,* which is available at *https://oehha.ca.gov/air/general-info/oehha-acute-8-hour-and-chronic-reference-exposure-level-rel-summary.*

[13] *ERPGS Procedures and Responsibilities.* March 2014. American Industrial Hygiene Association.

objectionable odor.'' *Id.* at 2. Similarly, the ERPG–2 is defined as ''the maximum airborne concentration below which it is believed that nearly all individuals could be exposed for up to one hour without experiencing or developing irreversible or other serious health effects or symptoms which could impair an individual's ability to take protective action.'' *Id.* at 1.

An acute REL for 1-hour exposure durations is typically lower than its corresponding AEGL–1 and ERPG–1. Even though their definitions are slightly different, AEGL–1s are often the same as the corresponding ERPG–1s, and AEGL–2s are often equal to ERPG–2s. The maximum HQs from our acute inhalation screening risk assessment typically result when we use the acute REL for a HAP. In cases where the maximum acute HQ exceeds 1, we also report the HQ based on the next highest acute dose-response value (usually the AEGL–1 and/or the ERPG–1).

For this source category, carbon black is produced at a steady state, continuously. Due to the consistency of operation, we do not expect significant variability in emissions for this source category. To allow for small variations in production, we have assigned an hourly acute multiplication factor of two for all emission process groups. A further discussion of why this factor was chosen can be found in the memorandum, *Development of the RTR Proposal Risk Modeling Dataset for the Carbon Black Production Source Category,* available in the docket for this rulemaking.

In our acute inhalation screening risk assessment, acute impacts are deemed negligible for HAP for which acute HQs are less than or equal to 1, and no further analysis is performed for these HAP. In cases where an acute HQ from the screening step is greater than 1, we assess the site-specific data to ensure that the acute HQ is at an off-site location.

4. How do we conduct the multipathway exposure and risk screening assessment?

The EPA conducts a tiered screening assessment examining the potential for significant human health risks due to exposures via routes other than inhalation (*i.e.,* ingestion). We first determine whether any sources in the source category emit any HAP known to be persistent and bioaccumulative in the environment, as identified in the EPA's Air Toxics Risk Assessment Library (see Volume 1, Appendix D, at *https://www.epa.gov/fera/risk-assessment-and-modeling-air-toxics-risk-assessment-reference-library*).

For the Carbon Black Production source category, we identified PB–HAP emissions of arsenic, cadmium, lead, mercury, and polycyclic organic matter (POM) of which polycyclic aromatic hydrocarbons is a subset, so we proceeded to the next step of the evaluation. Except for lead, the human health risk screening assessment for PB–HAP consists of three progressive tiers. In a Tier 1 screening assessment, we determine whether the magnitude of the facility-specific emissions of PB–HAP warrants further evaluation to characterize human health risk through ingestion exposure. To facilitate this step, we evaluate emissions against previously developed screening threshold emission rates for several PB–HAP that are based on a hypothetical upper-end screening exposure scenario developed for use in conjunction with the EPA's Total Risk Integrated Methodology.Fate, Transport, and Ecological Exposure (TRIM.FaTE) model. The PB–HAP with screening threshold emission rates are arsenic compounds, cadmium compounds, chlorinated dibenzodioxins and furans, mercury compounds, and POM. Based on the EPA estimates of toxicity and bioaccumulation potential, these pollutants represent a conservative list for inclusion in multipathway risk assessments for RTR rules. (See Volume 1, Appendix D at *https://www.epa.gov/sites/production/files/2013-08/documents/volume_1_reflibrary.pdf.*) In this assessment, we compare the facility-specific emission rates of these PB–HAP to the screening threshold emission rates for each PB–HAP to assess the potential for significant human health risks via the ingestion pathway. We call this application of the TRIM.FaTE model the Tier 1 screening assessment. The ratio of a facility's actual emission rate to the Tier 1 screening threshold emission rate is a ''screening value (SV).''

We derive the Tier 1 screening threshold emission rates for these PB–HAP (other than lead compounds) to correspond to a maximum excess lifetime cancer risk of 1-in-1 million (*i.e.,* for arsenic compounds, polychlorinated dibenzodioxins and furans, and POM) or, for HAP that cause noncancer health effects (*i.e.,* cadmium compounds and mercury compounds), a maximum HQ of 1. If the emission rate of any one PB–HAP or combination of carcinogenic PB–HAP in the Tier 1 screening assessment exceeds the Tier 1 screening threshold emission rate for any facility (*i.e.,* the SV is greater than 1), we conduct a second screening assessment, which we call the Tier 2 screening assessment. The Tier 2 screening assessment separates the Tier 1 combined fisher and farmer exposure scenario into fisher, farmer, and gardener scenarios that retain upper-bound ingestion rates.

In the Tier 2 screening assessment, the location of each facility that exceeds a Tier 1 screening threshold emission rate is used to refine the assumptions associated with the Tier 1 fisher and farmer exposure scenarios at that facility. A key assumption in the Tier 1 screening assessment is that a lake and/or farm is located near the facility. As part of the Tier 2 screening assessment, we use a U.S. Geological Survey (USGS) database to identify actual waterbodies within 50 km of each facility and assume the fisher only consumes fish from lakes within that 50 km zone. We also examine the differences between local meteorology near the facility and the meteorology used in the Tier 1 screening assessment. We then adjust the previously-developed Tier 1 screening threshold emission rates for each PB–HAP for each facility based on an understanding of how exposure concentrations estimated for the screening scenario change with the use of local meteorology and the USGS lakes database.

In the Tier 2 farmer scenario, we maintain an assumption that the farm is located within 0.5 km of the facility and that the farmer consumes meat, eggs, dairy, vegetables, and fruit produced near the facility. We may further refine the Tier 2 screening analysis by assessing a gardener scenario to characterize a range of exposures, with the gardener scenario being more plausible in RTR evaluations. Under the gardener scenario, we assume the gardener consumes home-produced eggs, vegetables, and fruit products at the same ingestion rate as the farmer. The Tier 2 screen continues to rely on the high-end food intake assumptions that were applied in Tier 1 for local fish (adult female angler at 99th percentile fish consumption [14]) and locally grown or raised foods (90th percentile consumption of locally grown or raised foods for the farmer and gardener scenarios [15]). If PB–HAP emission rates do not result in a Tier 2 SV greater than 1, we consider those PB–HAP emissions to pose risks below a level of concern. If the PB–HAP emission rates for a

[15] U.S. EPA. *Exposure Factors Handbook 2011 Edition (Final).* U.S. Environmental Protection Agency, Washington, DC, EPA/600/R–09/052F, 2011.

facility exceed the Tier 2 screening threshold emission rates, we may conduct a Tier 3 screening assessment.

There are several analyses that can be included in a Tier 3 screening assessment, depending upon the extent of refinement warranted, including validating that the lakes are fishable, locating residential/garden locations for urban and/or rural settings, considering plume-rise to estimate emissions lost above the mixing layer, and considering hourly effects of meteorology and plume-rise on chemical fate and transport (a time-series analysis). If necessary, the EPA may further refine the screening assessment through a site-specific assessment.

In evaluating the potential multipathway risk from emissions of lead compounds, rather than developing a screening threshold emission rate, we compare maximum estimated chronic inhalation exposure concentrations to the level of the current National Ambient Air Quality Standard (NAAQS) for lead.[16] Values below the level of the primary (health-based) lead NAAQS are considered to have a low potential for multipathway risk.

For further information on the multipathway assessment approach, see the *Residual Risk Assessment for the Carbon Black Production Source Category in Support of the Risk and Technology Review 2020 Proposed Rule,* which is available in the docket for this action.

5. How do we conduct the environmental risk screening assessment?

a. Adverse Environmental Effect, Environmental HAP, and Ecological Benchmarks

The EPA conducts a screening assessment to examine the potential for an adverse environmental effect as required under section 112(f)(2)(A) of the CAA. Section 112(a)(7) of the CAA defines ''adverse environmental effect'' as ''any significant and widespread adverse effect, which may reasonably be anticipated, to wildlife, aquatic life, or other natural resources, including adverse impacts on populations of endangered or threatened species or significant degradation of environmental quality over broad areas.''

The EPA focuses on eight HAP, which are referred to as ''environmental HAP,'' in its screening assessment: Six PB–HAP and two acid gases. The PB–HAP included in the screening assessment are arsenic compounds, cadmium compounds, dioxins/furans, POM, mercury (both inorganic mercury and methyl mercury), and lead compounds. The acid gases included in the screening assessment are hydrochloric acid (HCl) and hydrogen fluoride (HF).

HAP that persist and bioaccumulate are of particular environmental concern because they accumulate in the soil, sediment, and water. The acid gases, HCl and HF, are included due to their well-documented potential to cause direct damage to terrestrial plants. In the environmental risk screening assessment, we evaluate the following four exposure media: Terrestrial soils, surface water bodies (includes water-column and benthic sediments), fish consumed by wildlife, and air. Within these four exposure media, we evaluate nine ecological assessment endpoints, which are defined by the ecological entity and its attributes. For PB–HAP (other than lead), both community-level and population-level endpoints are included. For acid gases, the ecological assessment evaluated is terrestrial plant communities.

An ecological benchmark represents a concentration of HAP that has been linked to a particular environmental effect level. For each environmental HAP, we identified the available ecological benchmarks for each assessment endpoint. We identified, where possible, ecological benchmarks at the following effect levels: Probable effect levels, lowest-observed-adverse-effect level, and no-observed-adverse-effect level. In cases where multiple effect levels were available for a particular PB–HAP and assessment endpoint, we use all of the available effect levels to help us to determine whether ecological risks exist and, if so, whether the risks could be considered significant and widespread.

For further information on how the environmental risk screening assessment was conducted, including a discussion of the risk metrics used, how the environmental HAP were identified, and how the ecological benchmarks were selected, see Appendix 9 of the *Residual Risk Assessment for the Carbon Black Production Source Category in Support of the Risk and Technology Review 2020 Proposed Rule,* which is available in the docket for this action.

b. Environmental Risk Screening Methodology

For the environmental risk screening assessment, the EPA first determined whether any facilities in the Carbon Black Production source category emitted any of the environmental HAP. For the Carbon Black Production source category, we identified emissions of arsenic, cadmium, lead, mercury, POM and the two acid gasses, hydrochloric and hydrofluoric acid. Because one or more of the environmental HAP evaluated are emitted by at least one facility in the source category, we proceeded to the second step of the evaluation.

c. PB–HAP Methodology

The environmental screening assessment includes six PB–HAP, arsenic compounds, cadmium compounds, dioxins/furans, POM, mercury (both inorganic mercury and methyl mercury), and lead compounds. With the exception of lead, the environmental risk screening assessment for PB–HAP consists of three tiers. The first tier of the environmental risk screening assessment uses the same health-protective conceptual model that is used for the Tier 1 human health screening assessment. TRIM.FaTE model simulations were used to back-calculate Tier 1 screening threshold emission rates. The screening threshold emission rates represent the emission rate in tons of pollutant per year that results in media concentrations at the facility that equal the relevant ecological benchmark. To assess emissions from each facility in the category, the reported emission rate for each PB–HAP was compared to the Tier 1 screening threshold emission rate for that PB–HAP for each assessment endpoint and effect level. If emissions from a facility do not exceed the Tier 1 screening threshold emission rate, the facility ''passes'' the screening assessment, and, therefore, is not evaluated further under the screening approach. If emissions from a facility exceed the Tier 1 screening threshold emission rate, we evaluate the facility further in Tier 2.

In Tier 2 of the environmental screening assessment, the screening threshold emission rates are adjusted to account for local meteorology and the actual location of lakes in the vicinity of facilities that did not pass the Tier 1 screening assessment. For soils, we evaluate the average soil concentration for all soil parcels within a 7.5-km

[16] In doing so, the EPA notes that the legal standard for a primary NAAQS—that a standard is requisite to protect public health and provide an adequate margin of safety (CAA section 109(b))—differs from the CAA section 112(f) standard (requiring, among other things, that the standard provide an ''ample margin of safety to protect public health''). However, the primary lead NAAQS is a reasonable measure of determining risk acceptability (*i.e.,* the first step of the Benzene NESHAP analysis) since it is designed to protect the most susceptible group in the human population—children, including children living near major lead emitting sources. 73 FR 67002/3; 73 FR 67000/3; 73 FR 67005/1. In addition, applying the level of the primary lead NAAQS at the risk acceptability step is conservative, since that primary lead NAAQS reflects an adequate margin of safety.

radius for each facility and PB–HAP. For the water, sediment, and fish tissue concentrations, the highest value for each facility for each pollutant is used. If emission concentrations from a facility do not exceed the Tier 2 screening threshold emission rate, the facility ''passes'' the screening assessment and typically is not evaluated further. If emissions from a facility exceed the Tier 2 screening threshold emission rate, we evaluate the facility further in Tier 3.

As in the multipathway human health risk assessment, in Tier 3 of the environmental screening assessment, we examine the suitability of the lakes around the facilities to support life and remove those that are not suitable (*e.g.,* lakes that have been filled in or are industrial ponds), adjust emissions for plume-rise, and conduct hour-by-hour time-series assessments. If these Tier 3 adjustments to the screening threshold emission rates still indicate the potential for an adverse environmental effect (*i.e.,* facility emission rate exceeds the screening threshold emission rate), we may elect to conduct a more refined assessment using more site-specific information. If, after additional refinement, the facility emission rate still exceeds the screening threshold emission rate, the facility may have the potential to cause an adverse environmental effect.

To evaluate the potential for an adverse environmental effect from lead, we compared the average modeled air concentrations (from HEM–3) of lead around each facility in the source category to the level of the secondary NAAQS for lead. The secondary lead NAAQS is a reasonable means of evaluating environmental risk because it is set to provide substantial protection against adverse welfare effects which can include ''effects on soils, water, crops, vegetation, man-made materials, animals, wildlife, weather, visibility and climate, damage to and deterioration of property, and hazards to transportation, as well as effects on economic values and on personal comfort and well-being.''

d. Acid Gas Environmental Risk Methodology

The environmental screening assessment for acid gases evaluates the potential phytotoxicity and reduced productivity of plants due to chronic exposure to HF and HCl. The environmental risk screening methodology for acid gases is a single-tier screening assessment that compares modeled ambient air concentrations (from AERMOD) to the ecological benchmarks for each acid gas. To identify a potential adverse environmental effect (as defined in section 112(a)(7) of the CAA) from emissions of HF and HCl, we evaluate the following metrics: The size of the modeled area around each facility that exceeds the ecological benchmark for each acid gas, in acres and square kilometers; the percentage of the modeled area around each facility that exceeds the ecological benchmark for each acid gas; and the area-weighted average SV around each facility (calculated by dividing the area-weighted average concentration over the 50-km modeling domain by the ecological benchmark for each acid gas). For further information on the environmental screening assessment approach, see Appendix 9 of the *Residual Risk Assessment for the Carbon Black Production Source Category in Support of the Risk and Technology Review 2020 Proposed Rule,* which is available in the docket for this action.

6. How do we conduct facility-wide assessments?

To put the source category risks in context, we typically examine the risks from the entire ''facility,'' where the facility includes all HAP-emitting operations within a contiguous area and under common control. In other words, we examine the HAP emissions not only from the source category emission points of interest, but also emissions of HAP from all other emission sources at the facility for which we have data. For this source category, we conducted the facility-wide assessment using a dataset compiled from the 2016 NEI. The source category records of that NEI dataset were removed, evaluated, and updated as described in section II.C of this preamble: What data collection activities were conducted to support this action? Once a quality assured source category dataset was available, it was placed back with the remaining records from the NEI for that facility. The facility-wide file was then used to analyze risks due to the inhalation of HAP that are emitted ''facility-wide'' for the populations residing within 50 km of each facility, consistent with the methods used for the source category analysis described above. For these facility-wide risk analyses, the modeled source category risks were compared to the facility-wide risks to determine the portion of the facility-wide risks that could be attributed to the source category addressed in this proposal. We also specifically examined the facility that was associated with the highest estimate of risk and determined the percentage of that risk attributable to the source category of interest. The *Residual Risk Assessment for the Carbon Black Production Source Category in Support of the Risk and Technology Review 2020 Proposed Rule,* available through the docket for this action, provides the methodology and results of the facility-wide analyses, including all facility-wide risks and the percentage of source category contribution to facility-wide risks.

For this source category, we conducted the facility-wide assessment using a dataset that the EPA compiled from the 2016 NEI with updated emissions and release data provided by industry. We analyzed risks due to the inhalation of HAP that are emitted ''facility-wide'' for the populations residing within 50 km of each facility, consistent with the methods used for the source category analysis described above. For these facility-wide risk analyses, we made a reasonable attempt to identify the source category risks, and these risks were compared to the facility-wide risks to determine the portion of facility-wide risks that could be attributed to the source category addressed in this proposal. We also specifically examined the facility that was associated with the highest estimate of risk and determined the percentage of that risk attributable to the source category of interest. The *Residual Risk Assessment for the Carbon Black Production Source Category in Support of the Risk and Technology Review 2020 Proposed Rule,* available through the docket for this action, provides the methodology and results of the facility-wide analyses, including all facility-wide risks and the percentage of source category contribution to facility-wide risks.

7. How do we consider uncertainties in risk assessment?

Uncertainty and the potential for bias are inherent in all risk assessments, including those performed for this proposal. Although uncertainty exists, we believe that our approach, which used conservative tools and assumptions, ensures that our decisions are health and environmentally protective. A brief discussion of the uncertainties in the RTR emissions dataset, dispersion modeling, inhalation exposure estimates, and dose-response relationships follows below. Also included are those uncertainties specific to our acute screening assessments, multipathway screening assessments, and our environmental risk screening assessments. A more thorough discussion of these uncertainties is included in the *Residual Risk Assessment for the Carbon Black*

*Production Source Category in Support of the Risk and Technology Review 2020 Proposed Rule,* which is available in the docket for this action. If a multipathway site-specific assessment was performed for this source category, a full discussion of the uncertainties associated with that assessment can be found in Appendix 11 of that document, *Site-Specific Human Health Multipathway Residual Risk Assessment Report.*

a. Uncertainties in the RTR Emissions Dataset

Although the development of the RTR emissions dataset involved quality assurance/quality control processes, the accuracy of emissions values will vary depending on the source of the data, the degree to which data are incomplete or missing, the degree to which assumptions made to complete the datasets are accurate, errors in emission estimates, and other factors. The emission estimates considered in this analysis generally are annual totals for certain years, and they do not reflect short-term fluctuations during the course of a year or variations from year to year. The estimates of peak hourly emission rates for the acute effects screening assessment were based on an emission adjustment factor applied to the average annual hourly emission rates, which are intended to account for emission fluctuations due to normal facility operations.

b. Uncertainties in Dispersion Modeling

We recognize there is uncertainty in ambient concentration estimates associated with any model, including the EPA's recommended regulatory dispersion model, AERMOD. In using a model to estimate ambient pollutant concentrations, the user chooses certain options to apply. For RTR assessments, we select some model options that have the potential to overestimate ambient air concentrations (*e.g.,* not including plume depletion or pollutant transformation). We select other model options that have the potential to underestimate ambient impacts (*e.g.,* not including building downwash). Other options that we select have the potential to either under- or overestimate ambient levels (*e.g.,* meteorology and receptor locations). On balance, considering the directional nature of the uncertainties commonly present in ambient concentrations estimated by dispersion models, the approach we apply in the RTR assessments should yield unbiased estimates of ambient HAP concentrations. We also note that the selection of meteorology dataset location could have an impact on the risk estimates. As we continue to update and expand our library of meteorological station data used in our risk assessments, we expect to reduce this variability.

c. Uncertainties in Inhalation Exposure Assessment

Although every effort is made to identify all of the relevant facilities and emission points, as well as to develop accurate estimates of the annual emission rates for all relevant HAP, the uncertainties in our emission inventory likely dominate the uncertainties in the exposure assessment. Some uncertainties in our exposure assessment include human mobility, using the centroid of each census block, assuming lifetime exposure, and assuming only outdoor exposures. For most of these factors, there is neither an under nor overestimate when looking at the maximum individual risk or the incidence, but the shape of the distribution of risks may be affected. With respect to outdoor exposures, actual exposures may not be as high if people spend time indoors, especially for very reactive pollutants or larger particles. For all factors, we reduce uncertainty when possible. For example, with respect to census-block centroids, we analyze large blocks using aerial imagery and adjust locations of the block centroids to better represent the population in the blocks. We also add additional receptor locations where the population of a block is not well represented by a single location.

d. Uncertainties in Dose-Response Relationships

There are uncertainties inherent in the development of the dose-response values used in our risk assessments for cancer effects from chronic exposures and noncancer effects from both chronic and acute exposures. Some uncertainties are generally expressed quantitatively, and others are generally expressed in qualitative terms. We note, as a preface to this discussion, a point on dose-response uncertainty that is stated in the EPA's *2005 Guidelines for Carcinogen Risk Assessment;* namely, that ''the primary goal of EPA actions is protection of human health; accordingly, as an Agency policy, risk assessment procedures, including default options that are used in the absence of scientific data to the contrary, should be health protective'' (the EPA's *2005 Guidelines for Carcinogen Risk Assessment,* page 1 through 7). This is the approach followed here as summarized in the next paragraphs.

Cancer UREs used in our risk assessments are those that have been developed to generally provide an upper bound estimate of risk.[17] That is, they represent a ''plausible upper limit to the true value of a quantity'' (although this is usually not a true statistical confidence limit). In some circumstances, the true risk could be as low as zero; however, in other circumstances the risk could be greater.[18] Chronic noncancer RfC and reference dose (RfD) values represent chronic exposure levels that are intended to be health-protective levels. To derive dose-response values that are intended to be ''without appreciable risk,'' the methodology relies upon an uncertainty factor (UF) approach,[19] which considers uncertainty, variability, and gaps in the available data. The UFs are applied to derive dose-response values that are intended to protect against appreciable risk of deleterious effects.

Many of the UFs used to account for variability and uncertainty in the development of acute dose-response values are quite similar to those developed for chronic durations. Additional adjustments are often applied to account for uncertainty in extrapolation from observations at one exposure duration (*e.g.,* 4 hours) to derive an acute dose-response value at another exposure duration (*e.g.,* 1 hour). Not all acute dose-response values are developed for the same purpose, and care must be taken when interpreting the results of an acute assessment of human health effects relative to the dose-response value or values being exceeded. Where relevant to the estimated exposures, the lack of acute dose-response values at different levels of severity should be factored into the risk characterization as potential uncertainties.

Uncertainty also exists in the selection of ecological benchmarks for the environmental risk screening assessment. We established a hierarchy of preferred benchmark sources to allow selection of benchmarks for each environmental HAP at each ecological

[17] IRIS glossary (*https://ofmpub.epa.gov/sor_internet/registry/termreg/searchandretrieve/glossariesandkeywordlists/search.do?details=&glossaryName=IRIS%20Glossary*).

[18] An exception to this is the URE for benzene, which is considered to cover a range of values, each end of which is considered to be equally plausible, and which is based on maximum likelihood estimates.

[19] See *A Review of the Reference Dose and Reference Concentration Processes,* U.S. EPA, December 2002, and *Methods for Derivation of Inhalation Reference Concentrations and Application of Inhalation Dosimetry,* U.S. EPA, 1994.

assessment endpoint. We searched for benchmarks for three effect levels (*i.e.,* no-effects level, threshold-effect level, and probable effect level), but not all combinations of ecological assessment/environmental HAP had benchmarks for all three effect levels. Where multiple effect levels were available for a particular HAP and assessment endpoint, we used all of the available effect levels to help us determine whether risk exists and whether the risk could be considered significant and widespread.

For a group of compounds that are unspeciated (*e.g.,* glycol ethers), we conservatively use the most protective dose-response value of an individual compound in that group to estimate risk. Similarly, for an individual compound in a group (*e.g.,* ethylene glycol diethyl ether) that does not have a specified dose-response value, we also apply the most protective dose-response value from the other compounds in the group to estimate risk.

e. Uncertainties in Acute Inhalation Screening Assessments

In addition to the uncertainties highlighted above, there are several factors specific to the acute exposure assessment that the EPA conducts as part of the risk review under section 112 of the CAA. The accuracy of an acute inhalation exposure assessment depends on the simultaneous occurrence of independent factors that may vary greatly, such as hourly emissions rates, meteorology, and the presence of a person. In the acute screening assessment that we conduct under the RTR program, we assume that peak emissions from the source category and reasonable worst-case air dispersion conditions (*i.e.,* 99th percentile) co-occur. We then include the additional assumption that a person is located at this point at the same time. Together, these assumptions represent a reasonable worst-case actual exposure scenario. In most cases, it is unlikely that a person would be located at the point of maximum exposure during the time when peak emissions and reasonable worst-case air dispersion conditions occur simultaneously.

f. Uncertainties in the Multipathway and Environmental Risk Screening Assessments

For each source category, we generally rely on site-specific levels of PB–HAP or environmental HAP emissions to determine whether a refined assessment of the impacts from multipathway exposures is necessary or whether it is necessary to perform an environmental screening assessment. This determination is based on the results of a three-tiered screening assessment that relies on the outputs from models—TRIM.FaTE and AERMOD—that estimate environmental pollutant concentrations and human exposures for five PB–HAP (dioxins, POM, mercury, cadmium, and arsenic) and two acid gases (HF and HCl). For lead, we use AERMOD to determine ambient air concentrations, which are then compared to the secondary NAAQS standard for lead. Two important types of uncertainty associated with the use of these models in RTR risk assessments and inherent to any assessment that relies on environmental modeling are model uncertainty and input uncertainty.[20]

Model uncertainty concerns whether the model adequately represents the actual processes (*e.g.,* movement and accumulation) that might occur in the environment. For example, does the model adequately describe the movement of a pollutant through the soil? This type of uncertainty is difficult to quantify. However, based on feedback received from previous EPA SAB reviews and other reviews, we are confident that the models used in the screening assessments are appropriate and state-of-the-art for the multipathway and environmental screening risk assessments conducted in support of RTRs.

Input uncertainty is concerned with how accurately the models have been configured and parameterized for the assessment at hand. For Tier 1 of the multipathway and environmental screening assessments, we configured the models to avoid underestimating exposure and risk. This was accomplished by selecting upper-end values from nationally representative datasets for the more influential parameters in the environmental model, including selection and spatial configuration of the area of interest, lake location and size, meteorology, surface water, soil characteristics, and structure of the aquatic food web. We also assume an ingestion exposure scenario and values for human exposure factors that represent reasonable maximum exposures.

In Tier 2 of the multipathway and environmental screening assessments, we refine the model inputs to account for meteorological patterns in the vicinity of the facility versus using upper-end national values, and we identify the actual location of lakes near the facility rather than the default lake location that we apply in Tier 1. By refining the screening approach in Tier 2 to account for local geographical and meteorological data, we decrease the likelihood that concentrations in environmental media are overestimated, thereby increasing the usefulness of the screening assessment. In Tier 3 of the screening assessments, we refine the model inputs again to account for hour-by-hour plume-rise and the height of the mixing layer. We can also use those hour-by-hour meteorological data in a TRIM.FaTE run using the screening configuration corresponding to the lake location. These refinements produce a more accurate estimate of chemical concentrations in the media of interest, thereby reducing the uncertainty with those estimates. The assumptions and the associated uncertainties regarding the selected ingestion exposure scenario are the same for all three tiers.

For the environmental screening assessment for acid gases, we employ a single-tiered approach. We use the modeled air concentrations and compare those with ecological benchmarks.

For all tiers of the multipathway and environmental screening assessments, our approach to addressing model input uncertainty is generally cautious. We choose model inputs from the upper end of the range of possible values for the influential parameters used in the models, and we assume that the exposed individual exhibits ingestion behavior that would lead to a high total exposure. This approach reduces the likelihood of not identifying high risks for adverse impacts.

Despite the uncertainties, when individual pollutants or facilities do not exceed screening threshold emission rates (*i.e.,* screen out), we are confident that the potential for adverse multipathway impacts on human health is very low. On the other hand, when individual pollutants or facilities do exceed screening threshold emission rates, it does not mean that impacts are significant, only that we cannot rule out that possibility and that a refined assessment for the site might be necessary to obtain a more accurate risk characterization for the source category.

The EPA evaluates the following HAP in the multipathway and/or environmental risk screening assessments, where applicable: Arsenic, cadmium, dioxins/furans, lead, mercury (both inorganic and methyl mercury), POM, HCl, and HF. These HAP represent pollutants that can cause adverse impacts either through direct

[20] In the context of this discussion, the term ''uncertainty'' as it pertains to exposure and risk encompasses both *variability* in the range of expected inputs and screening results due to existing spatial, temporal, and other factors, as well as *uncertainty* in being able to accurately estimate the true result.

exposure to HAP in the air or through exposure to HAP that are deposited from the air onto soils and surface waters and then through the environment into the food web. These HAP represent those HAP for which we can conduct a meaningful multipathway or environmental screening risk assessment. For other HAP not included in our screening assessments, the model has not been parameterized such that it can be used for that purpose. In some cases, depending on the HAP, we may not have appropriate multipathway models that allow us to predict the concentration of that pollutant. The EPA acknowledges that other HAP beyond these that we are evaluating may have the potential to cause adverse effects and, therefore, the EPA may evaluate other relevant HAP in the future, as modeling science and resources allow.

## IV. Analytical Results and Proposed Decisions

### *A. What actions are we taking pursuant to CAA sections 112(d)(2) and 112(d)(3)?*

In this proposal, pursuant to CAA section 112(d)(2) and (3), the EPA is proposing to broaden the scope of the existing standard, which applies to process vents associated with the MUF, to include all process vents associated with the carbon black production unit. This would require all process vents, including those located after the MUF, to control to 98 percent where the HAP concentration of the emission stream is equal to or greater than 260 ppmv. Additionally, it would require facilities to conduct performance testing on the additional process vents located after the MUF.

### *B. What are the results of the risk assessment and analyses?*

As described above, for the Carbon Black Production major source category, we conducted an inhalation risk assessment for all HAP emitted, a multipathway screening assessment for the PB–HAP emitted, and an environmental risk screening assessment for the PB–HAP and acid gasses emitted from the source category. We present results of the risk assessment briefly below and in more detail in the *Residual Risk Assessment for the Carbon Black Production Source Category in Support of the Risk and Technology Review 2020 Proposed Rule,* which is available in the docket for this action.

#### 1. Chronic Inhalation Risk Assessment Results

The EPA estimated the inhalation risk for the Carbon Black Production major source category based on actual and allowable emissions. The estimated baseline maximum individual lifetime cancer risk (MIR) from inhalation posed by the source category is less than 1-in-1 million based on actual emissions and MACT-allowable emissions. The total estimated cancer incidence based on actual or allowable emission levels is 0.00004 excess cancer cases per year, or one case every 25,000 years. No one is exposed to cancer risk greater than or equal to 1-in-1 million based upon actual and allowable emissions (see Table 1 of this preamble).

The maximum chronic noncancer TOSHI value for the source category was estimated to be less than 1 (0.06) based on actual and allowable emissions. For both actual and allowable emissions, neurological risks were driven by hydrogen cyanide emissions from process filters and fugitive emissions.

TABLE 1—INHALATION RISK ASSESSMENT SUMMARY FOR CARBON BLACK PRODUCTION [1] SOURCE CATEGORY

[40 CFR part 63, subpart YY]

| Risk assessment | Number of facilities [2] | Maximum individual cancer risk (1-in-1 million) [3] | Estimated population at increased risk of cancer ≥1-in-1 million | Estimated annual cancer incidence (cases per yr) | Maximum chronic noncancer TOSHI [4] | Maximum screening acute noncancer HQ [5] |
|---|---|---|---|---|---|---|
| **Baseline Actual Emissions** | | | | | | |
| Source Category | 15 | 0.06 | 0 | 0.00004 | <1 (neurological) | 0.09 (REL). |
| Facility-Wide | 15 | 0.06 | 0 | 0.00004 | <1 (neurological). | |
| **Baseline Allowable Emissions** | | | | | | |
| Source Category | 15 | 0.06 | 0 | 0.00004 | <1 (neurological). | |

[1] Based on actual and allowable emissions.
[2] Number of facilities evaluated in the risk assessment. Includes 15 operating facilities subject to 40 CFR part 63, subpart YY.
[3] Maximum individual excess lifetime cancer risk due to HAP emissions from the source category.
[4] Maximum TOSHI. The target organ with the highest TOSHI for the Carbon Black Production source category is the neurological system.
[5] The maximum estimated acute exposure concentration was divided by available short-term threshold values to develop an array of HQ values. The acute HQ shown was based upon the lowest acute 1-hour dose-response value, the REL for hydrogen cyanide. When an HQ exceeds 1, we also show the HQ using the next lowest available acute dose-response value.

#### 2. Screening Level Acute Inhalation Risk Assessment Results

Based on our screening analysis of reasonable worst-case acute exposure to actual emissions from the source category, no HAP exposures result in an acute noncancer HQ greater than 0.09 based upon the 1-hour REL. As discussed in section III.C.3.c of this preamble, we used an acute hourly multiplier of 2 for all emission processes.

#### 3. Multipathway Risk Screening Results

PB–HAP emissions were reported from 14 of the 15 facilities in the source category with seven facilities exceeding the Tier 1 screening threshold emission rates for the carcinogenic PB–HAP, arsenic and POM. Emissions from two facilities exceeded the Tier 1 screening threshold emission rates for mercury and cadmium, which are PB–HAP with noncancer health effects. For the PB–HAP and facilities with Tier 1 SVs greater than 1, we conducted a Tier 2 screening analysis.

Two facilities exceeded the arsenic and POM Tier 2 cancer SV with a maximum value of 9 for the farmer scenario. One facility exceeded the cadmium Tier 2 noncancer SV with a maximum value of 2. Two facilities exceeded the mercury Tier 2 noncancer SV under the fisher scenario, with a maximum value of 4. When we evaluated the effect multiple facilities within the source category could have on common lake(s) in the modeling domain, mercury and cadmium emissions exceeded the noncancer SVs with a maximum value of 4 and 2, respectively.

For cadmium and mercury, we continued the fisher scenario screening analysis with a Tier 3 multipathway screen which comprises three individual stages. These stages included lake, plume rise, and time-series assessments. A Tier 3 lake assessment was conducted for the two facilities with Tier 2 noncancer SVs greater than 1. After conducting the lake analysis screen, only one facility was above a noncancer SV of 1, with a Tier 3 noncancer SV of 2 for mercury, including consideration of cumulative lake impacts from facilities within the source category.

Further details on the Tier 3 screening analysis can be found in Appendix 11 of *Residual Risk Assessment for the Carbon Black Production Source Category in Support of the Risk and Technology Review 2020 Proposed Rule.*''

An SV in any of the tiers is not an estimate of the cancer risk or a noncancer HQ (or HI). Rather, an SV represents a high-end estimate of what the risk or HQ may be. For example, facility emissions resulting in an SV of 2 for a non-carcinogen can be interpreted to mean that we are confident that the HQ would be lower than 2. Similarly, facility emissions resulting in a cancer SV of 20 for a carcinogen means that we are confident that the cancer risk is lower than 20-in-1 million. Our confidence comes from the health-protective assumptions that are incorporated into the screens: We choose inputs from the upper end of the range of possible values for the influential parameters used in the screens and we assume food consumption behaviors that would lead to high total exposure. This risk assessment estimates the maximum hazard for mercury and cadmium through fish consumption based on upper bound screens and the maximum excess cancer risks from POM and arsenic through ingestion of fish and farm produce.

When we progress from the model designs of the Tier 1, 2, and 3 screens to a site-specific assessment, we refine the risk assessment through incorporation of additional site-specific data and enhanced model designs. Site-specific refinements include the following: (1) Improved spatial locations identifying the boundaries of the watershed and lakes within the watershed as it relates to surrounding facilities within the source category; (2) calculating actual soil/water run-off amounts to target lakes based upon actual soil type(s) and elevation changes associated with the affected watershed versus assuming a worst-case assumption of 100-percent run-off to target lakes; and (3) incorporating AERMOD deposition of pollutants into TRIM.FaTE to accurately account for site-specific release parameters such as stack heights and exit gas temperatures, versus using TRIM.FaTE's simple dispersion algorithms that assume the pollutant is uniformly distributed within the airshed. These refinements have the net effect of improved modeling of the mass of HAP entering a lake by more accurately defining the watershed/lake boundaries as well as the dispersion of HAP into the atmosphere to better reflect deposition contours across all target watersheds and lakes in our 50-km model domain.

As discussed above, the maximum mercury Tier 3 noncancer SV based upon the lake analysis resulted in a maximum value of 2. The EPA determined that it is not necessary to go beyond the Tier 3 lake analysis or conduct a site-specific assessment. As explained above, the SV of 2 is a high-end estimate of what the risk or hazard may be and can be interpreted to mean that we are confident that the HQ would be lower than 2. Further, risk results from five site-specific mercury assessments the EPA has conducted for five RTR source categories resulted in noncancer HQs that range from 50 times to 800 times lower than the respective Tier 2 SV for these facilities (refer to EPA Docket ID No. EPA–HQ–OAR–2017–0015 for a copy of these reports).[21] Based on our review of these analyses, we would expect at least a one order of magnitude decrease in all Tier 2 noncancer SVs for mercury for the Carbon Black Production source category, if we were to perform a site-specific assessment. In addition, based upon the conservative nature of the screens and the level of additional refinements that would go into a site-specific multipathway assessment, were one to be conducted, we are confident that the HI for ingestion exposure, specifically mercury through fish ingestion, is less than 1. Further details on the Tier 3 screening assessment can be found in Appendix 11 of *Residual Risk Assessment for the Carbon Black Production Source Category in Support of the Risk and Technology Review 2020 Proposed Rule.*

In evaluating the potential for adverse health effects from emissions of lead, the EPA compared modeled annual lead concentrations around each facility to the secondary NAAQS level for lead (0.15 µg/m$^3$, arithmetic mean concentration over a 3-month period. The highest annual average lead concentration, of 0.000099 µg/m$^3$, is below the NAAQS level for lead, indicating a low potential for multipathway impacts.

4. Environmental Risk Screening Results

As described in section III.A of this preamble, we conducted an environmental risk screening assessment for the Carbon Black Production source category for the following pollutants: arsenic, cadmium, HCL, hydrofluoric acid, lead, mercury (methyl mercury and mercuric chloride), and POMs.

In the Tier 1 screening analysis for PB–HAP (other than lead, which was evaluated differently), cadmium, methyl mercury, and divalent mercury resulted in exceedances of ecological benchmarks for two facilities. Cadmium emissions had Tier 1 exceedances for the following benchmarks: surface soil no observed adverse effect levels (NOAELs) for mammalian insectivores and avian ground insectivores, and fish (avian piscivores) NOAEL, geometric-maximum-allowable-toxicant-level, and lowest observed adverse effect level benchmarks with a maximum SV of 6. Divalent mercury emissions had Tier 1 exceedances for the following benchmarks: surface soil threshold level—plant communities, surface soil threshold level—invertebrate communities with a maximum SV of 10. Methyl mercury emissions had Tier 1 exceedances for the following benchmarks: NOAEL—mammalian insectivores and surface soil NOAEL for avian ground insectivores with a maximum SV of 10.

[21] EPA Docket records (EPA–HQ–OAR–2017–0015): Appendix 11 of the *Residual Risk Assessment for the Taconite Manufacturing Source Category in Support of the Risk and Technology Review 2019 Proposed Rule;* Appendix 11 of the *Residual Risk Assessment for the Integrated Iron and Steel Source Category in Support of the Risk and Technology Review 2019 Proposed Rule;* Appendix 11 of the *Residual Risk Assessment for the Portland Cement Manufacturing Source Category in Support of the 2018 Risk and Technology Review Final Rule;* and Appendix 11 of the *Residual Risk Assessment for the Coal and Oil-Fired EGU Source Category in Support of the 2018 Risk and Technology Review Proposed Rule and EPA Docket (EPA–HQ–2019–0373):* Appendix 11 of the *Residual Risk Assessment for the Iron and Steel Foundries Source Category in Support of the Risk and Technology Review 2019 Proposed Rule.*

A Tier 2 screening analysis was performed for cadmium, divalent mercury, and methyl mercury emissions. In the Tier 2 screening analysis, there were no exceedances of any of the ecological benchmarks evaluated for cadmium, divalent mercury, and methyl mercury.

For lead, we did not estimate any exceedances of the secondary lead NAAQS. For HCl and HF, the average modeled concentration around each facility (*i.e.,* the average concentration of all off-site data points in the modeling domain) did not exceed any ecological benchmark. In addition, each individual modeled concentration of HCl and HF (*i.e.,* each off-site data point in the modeling domain) was below the ecological benchmarks for all facilities.

Based on the results of the environmental risk screening analysis, we do not expect an adverse environmental effect as a result of HAP emissions from this source category.

5. Facility-Wide Risk Results

As shown in Table 1, the facility-wide risks are the same as the risks for actual emissions and allowable emissions from units subject to the NESHAP for the Carbon Black Production major source category, with no change in incidence or risk drivers.

6. What demographic groups might benefit from this regulation?

To examine the potential for any environmental justice issues that might be associated with the source category, we performed a demographic analysis, which is an assessment of risks to individual demographic groups of the populations living within 5 km and within 50 km of the facilities. In the analysis, we evaluated the distribution of HAP-related cancer and noncancer risks from the Carbon Black Production source category across different demographic groups within the populations living near facilities.[22]

Results of the demographic analysis indicate that, for four of the 11 demographic groups, African American, age greater than or equal to 65, age greater than or equal to 25 years of age without a high school diploma, and people below the poverty level reside within 5 km of facilities in the source category at a percentage greater than the corresponding national percentage for the same demographic groups. When examining the risk levels of those exposed to emissions from carbon black production facilities, we find that no one is exposed to a cancer risk at or above 1-in-1 million or to a chronic noncancer TOSHI greater than 1.

The methodology and the results of the demographic analysis are presented in a technical report, *Risk and Technology Review—Analysis of Demographic Factors for Populations Living Near Carbon Black Production Source Category Operations,* available in the docket for this action.

*C. What are our proposed decisions regarding risk acceptability, ample margin of safety, and adverse environmental effect?*

1. Risk Acceptability

As explained in section II.A of this preamble, the EPA sets standards under CAA section 112(f)(2) using ''a two-step standard-setting approach, with an analytical first step to determine an 'acceptable risk' that considers all health information, including risk estimation uncertainty, and includes a presumptive limit on MIR of approximately 1-in-10 thousand'' (54 FR 38045, September 14, 1989). The EPA weighed all health risk measures and information, including risk estimation uncertainties, in determining whether risk posed by HAP emissions from the source category is acceptable.

The maximum individual lifetime cancer risk (MIR) for inhalation exposure to actual and allowable emissions from the Carbon Black Production source category (< 1-in-1 million) is two orders of magnitude below 100-in-1 million, which is the presumptive upper limit of acceptable risk. The EPA estimates emissions from the category would result in a cancer incidence of 0.00004 excess cancer cases per year, or one case every 25,000 years. Inhalation exposures to HAP associated with chronic noncancer health effects result in a TOSHI of 0.06 based on actual emissions, 25 times below an exposure that the EPA has determined is without appreciable risk of adverse health effects. An exposure analysis of HAP with acute noncancer health effects demonstrated that the risks are below a level of concern with a max HQ equal to 0.09 based upon the 1-hour REL.

Maximum cancer risk due to ingestion exposures estimated using health-protective risk screening assumptions are below 10-in-1 million for the Tier 2 farmer exposure scenario. Tier 3 screening analyses of mercury exposure due to fish ingestion determined that the maximum HQ for mercury would be less than 2 as explained in section III.C.4 of this preamble. The EPA is confident that this hazard estimate would be reduced to a HQ less than 1, if further refined to incorporate enhanced site-specific analyses such as improved model boundary identification with improved soil/water run-off calculations and AERMOD deposition outputs used in the TRIM.FaTE model. Considering all of the health risk information and factors discussed above, as well as the uncertainties discussed in section III of this preamble, we propose that the risks posed by HAP emissions from the Black Carbon Production source category are acceptable.

2. Ample Margin of Safety Analysis

As directed by CAA section 112(f)(2), we conducted an analysis to determine whether the current emissions standards provide an ample margin of safety to protect public health. In light of the cancer risk being below 1-in-1 million and the noncancer chronic and acute risks being below established levels of concern as well as the low potential for multipathway risks, we propose to conclude that the existing standards provide an ample margin of safety to protect public health.

3. Adverse Environmental Effect

The emissions data for the Carbon Black Production source category indicate that the following environmental HAP are emitted by this category: Arsenic, cadmium, HCl, hydrofluoric acid, lead, mercury (methyl mercury and mercuric chloride), and POMs. The screening-level evaluation of the potential for adverse environmental effects associated with emissions of these environmental HAP from the Carbon Black Production source category indicated that there are no exceedances of Tier 2 screening values for PB–HAP, no exceedances of the average modeled concentration around each facility (*i.e.,* the average concentration of all off-site data points in the modeling domain) for acid gases, and, for lead, we did not estimate any exceedances of the secondary lead NAAQS. In addition, we are unaware of any adverse environmental effects caused by HAP emitted by this source category. Therefore, we do not expect there to be an adverse environmental effect as a result of HAP emissions from this source category and we are proposing that it is not necessary to set a more stringent standard to prevent, taking into consideration costs, energy, safety,

[22] Demographic groups included in the analysis are: White, African American, Native American, other races and multiracial, Hispanic or Latino, children 17 years of age and under, adults 18 to 64 years of age, adults 65 years of age and over, adults without a high school diploma, people living below the poverty level, people living two times the poverty level, and linguistically isolated people.

and other relevant factors, an adverse environmental effect.

*D. What are the results and proposed decisions based on our technology review?*

1. Major Source Technology Review

As described in section III.B of this preamble, the technology review focused on the identification and evaluation of developments in practices, processes, and control technologies that have occurred since the MACT standards were promulgated. In conducting the technology review, we reviewed various informational sources regarding the emissions from the Carbon Black Production major source category. The review included a search of the RBLC database, reviews of air permits for carbon black production facilities, and meetings with industry and the trade association (summarized in the docket for this action). We reviewed these data sources for information on practices, processes, and control technologies that were not considered during the development of the Carbon Black Production NESHAP. We also looked for information on improvements in practices, processes, and control technologies that have occurred since the development of the Carbon Black Production NESHAP for major sources.

After reviewing information from the aforementioned sources, we did not identify any developments in practices, processes, or control technologies used at carbon black production facilities since promulgation of the MACT standard.

Based on the technology review, we are proposing that it is not necessary to revise the existing standards because we did not identify developments in practices, processes, or control technologies. Additional information on our technology review can be found in the memorandum, *Technology Review for Carbon Black Production Source Category,* which is available in the docket for this action.

2. Area Source Technology Review

We performed a technology review of the Carbon Black Production area source NESHAP. As part of that review, we determined that there are no area sources in this source category currently in operation. Given this and the overlap in the requirements for major and area sources, we are concluding that it is not necessary to make changes to the existing area source standards as a result of this review. For more information on the determination that there are no sources subject to the area source standard see the memorandum, *Identification of Area Sources for the Carbon Black Production NESHAP,* available in the docket for this action.

*E. What other actions are we proposing?*

In addition to the proposed actions described above, we are proposing four other revisions to the NESHAP. We are proposing revisions to the SSM-related provisions of the MACT rule in order to ensure that they are consistent with the decision in *Sierra Club* v. *EPA,* 551 F. 3d 1019 (DC Cir. 2008), in which the court vacated two provisions that exempted sources from the requirement to comply with otherwise applicable CAA section 112(d) emission standards during periods of SSM. We are also proposing to require electronic reporting and annual tune-up requirements for applicable process heaters/boilers. Lastly, we are proposing that owners and operators of carbon black production process vents subject to the rule conduct performance tests every 5 years to demonstrate continued compliance with the NESHAP. A discussion of these proposed changes follows.

1. SSM

a. Proposed Elimination of the SSM Exemption

In its 2008 decision in *Sierra Club* v. *EPA,* 551 F.3d 1019 (D.C. Cir. 2008), the D.C. Circuit Court vacated portions of two regulatory provisions governing the emissions of HAP during periods of SSM, which were promulgated pursuant to CAA section 112. Specifically, the court vacated the SSM exemption contained in 40 CFR 63.6(f)(1) and 40 CFR 63.6(h)(1), holding that under section 302(k) of the CAA, emissions standards or limitations must be continuous in nature and that the SSM exemption violates the CAA's requirement that some CAA section 112 standards apply continuously. Consistent with the court's decision in *Sierra Club* v. *EPA,* we are proposing standards in this rule that apply at all times. We are also proposing several revisions to cross-references of SSM exemptions in 40 CFR part 63, subpart SS. We also are proposing to eliminate and revise certain recordkeeping and reporting requirements related to the SSM exemption as further described below.

The EPA has attempted to ensure that the provisions we are proposing to eliminate are inappropriate, unnecessary, or redundant in the absence of the SSM exemption. We are specifically seeking comment on whether we have successfully done so.

We are proposing the elimination of the SSM exemption, which currently appears at 40 CFR 63.1108, and any reference to SSM requirements in 40 CFR part 63, subpart YY that apply to carbon black production affected sources. For example, we are proposing to eliminate the incorporation of the requirement that the source develop an SSM plan. Additionally, we are proposing to eliminate and revise certain recordkeeping and reporting requirements related to the SSM exemption. The EPA is also proposing several similar SSM-related revisions to 40 CFR part 63, subpart YY to remove SSM-related referenced provisions of 40 CFR part 63, subpart SS (National Emission Standards for Closed Vent Systems, Control Devices, Recovery Devices and Routing to a Fuel Gas System or a Process). These revisions are discussed in greater detail below (see sections IV.E.1.b through j of this preamble).

In proposing the standards in this rule, the EPA has taken into consideration the impacts of the SSM exemption as it relates to startup and shutdown periods and is proposing a 13-minute startup work practice standard. This added provision is required for safety purposes in the absence of the SSM exemption and is discussed further below (see section IV.E.1.i of this preamble).

Periods of startup, normal operations, and shutdown are all predictable and routine aspects of a source's operations. Malfunctions, in contrast, are neither predictable nor routine. Instead, they are, by definition, sudden, infrequent, and not reasonably preventable failures of emissions control, process or monitoring equipment. (40 CFR 63.2) (containing regulatory definition of ''malfunction''). The EPA interprets CAA section 112 as not requiring emissions that occur during periods of malfunction to be factored into development of CAA section 112 standards. The EPA's interpretation has been upheld as reasonable. See *United States Sugar Corp.* v. *EPA,* 830 F.3d 579, 606–10 (D.C. Cir. 2016). Under CAA section 112, emissions standards for new sources must be no less stringent than the level ''achieved'' by the best controlled similar source and for existing sources generally must be no less stringent than the average emission limitation ''achieved'' by the best performing 12 percent of sources in the category. There is nothing in CAA section 112 that directs the Agency to consider malfunctions in determining the level ''achieved'' by the best performing sources when setting emission standards. See, *e.g., National*

*Ass'n of Clean Water Agencies* v. *EPA*, 734 F.3d 1115, 1141 (D.C. Cir. 2013) (noting that ''average emissions limitation achieved by the best performing 12 percent of'' sources ''says nothing about how the performance of the best units is to be calculated''). While the EPA accounts for variability in setting emissions standards, nothing in CAA section 112 requires the Agency to consider malfunctions as part of that analysis. The EPA is not required to treat a malfunction in the same manner as the type of variation in performance that occurs during routine operations of a source. A malfunction is a failure of the source to perform in a ''normal or usual manner'' and no statutory language compels the EPA to consider such events in setting CAA section 112 standards.

As the D.C. Circuit Court recognized in *United States Sugar Corp* v. *EPA,* accounting for malfunctions in setting standards would be difficult, if not impossible, given the myriad different types of malfunctions that can occur across all sources in the category and given the difficulties associated with predicting or accounting for the frequency, degree, and duration of various malfunctions that might occur. See *United States Sugar Corp.,* 830 F.3d at 608 (discussing work practice standards and explaining that ''the EPA would have to conceive of a standard that could apply equally to the wide range of possible boiler malfunctions, ranging from an explosion to minor mechanical defects. Any possible standard is likely to be hopelessly generic to govern such a wide array of circumstances.''). As such, the performance of units that are malfunctioning is not ''reasonably'' foreseeable. See, *e.g., Sierra Club* v. *EPA,* 167 F.3d 658, 662 (D.C. Cir. 1999) (''The EPA typically has wide latitude in determining the extent of data-gathering necessary to solve a problem. We generally defer to an agency's decision to proceed on the basis of imperfect scientific information, rather than to 'invest the resources to conduct the perfect study.' ''). See also *Weyerhaeuser* v. *Costle,* 590 F.2d 1011, 1058 (D.C. Cir. 1978) (''In the nature of things, no general limit, individual permit, or even any upset provision can anticipate all upset situations. After a certain point, the transgression of regulatory limits caused by 'uncontrollable acts of third parties,' such as strikes, sabotage, operator intoxication or insanity, and a variety of other eventualities, must be a matter for the administrative exercise of case-by-case enforcement discretion, not for specification in advance by regulation.''). In addition, emissions during a malfunction event can be significantly higher than emissions at any other time of source operation. For example, if an air pollution control device with 99-percent pollutant removal goes off-line as a result of a malfunction (as might happen if, for example, the bags in a baghouse catch fire) and the emission unit is a steady state type unit that would take days to shut down, the source would go from 99-percent control to zero control until the control device was repaired. The source's emissions during the malfunction would be 100 times higher than during normal operations. As such, the emissions over a 4-day malfunction period would exceed the annual emissions of the source during normal operations. As this example illustrates, accounting for malfunctions could lead to standards that are not reflective of, and significantly less stringent than, levels that are achieved by a well-performing non-malfunctioning source. It is reasonable to interpret CAA section 112 in a way as to avoid such a result. The EPA's approach to malfunctions is consistent with CAA section 112 and is a reasonable interpretation of the statute.

Although no statutory language compels the EPA to set standards for malfunctions, the EPA has the discretion to do so where feasible. For example, in the Petroleum Refinery Sector RTR, the EPA established a work practice standard for unique types of malfunction that result in releases from pressure relief devices or emergency flaring events because the EPA had information to determine that such work practices reflected the level of control that applies to the best performers. 80 FR 75178, 75211 through 14 (December 1, 2015). The EPA will consider whether circumstances warrant setting standards for a particular type of malfunction and, if so, whether the EPA has sufficient information to identify the relevant best performing sources and establish a standard for such malfunctions. We also encourage commenters to provide any such information.

In the unlikely event that a source fails to comply with the applicable CAA section 112(d) standards as a result of a malfunction event, the EPA would determine an appropriate response based on, among other things, the good faith efforts of the source to minimize emissions during malfunction periods, including preventative and corrective actions, as well as root cause analyses to ascertain and rectify excess emissions. The EPA would also consider whether the source's failure to comply with the CAA section 112(d) standard was, in fact, sudden, infrequent, not reasonably preventable, and was not instead caused, in part, by poor maintenance or careless operation. 40 CFR 63.2 (definition of malfunction).

If the EPA determines in a particular case that an enforcement action against a source for violation of an emission standard is warranted, the source can raise any and all defenses in that enforcement action and the federal district court will determine what, if any, relief is appropriate. The same is true for citizen enforcement actions. Similarly, the presiding officer in an administrative proceeding can consider any defense raised and determine whether administrative penalties are appropriate.

In summary, the EPA interpretation of the CAA and, in particular, CAA section 112, is reasonable and encourages practices that will avoid malfunctions. Administrative and judicial procedures for addressing exceedances of the standards fully recognize that violations may occur despite good faith efforts to comply and can accommodate those situations. *U.S. Sugar Corp.* v. *EPA,* 830 F.3d 579, 606–610 (2016).

b. Proposed Revisions to 40 CFR Part 63, Subpart YY (and Referenced 40 CFR Part 63, Subpart SS)

The EPA assessed existing applicable provisions that apply to carbon black production affected sources under 40 CFR part 63, subpart YY (including references to 40 CFR part 63, subpart SS), and we are proposing to eliminate the applicability of provisions that are no longer appropriate, unnecessary, or redundant in the absence of the SSM exemption. The revisions to 40 CFR part 63, subpart YY are discussed in sections IV.E.1.c through i of this section. The revisions to 40 CFR part 63, subpart YY related specifically to references to 40 CFR part 63, subpart SS are discussed in section IV.E.1.j of this preamble.

c. General Duty

Section 63.1108(a)(5) states that the emission standards of 40 CFR part 63, subpart YY (including the Carbon Black MACT standards) do not apply during periods of SSM. However, the paragraph maintains that owners and operators still have a general duty to implement measures to prevent or minimize excess emissions and that the measures to be taken to minimize excess emissions during these times shall be identified in the SSM plan (if applicable).

Similarly, 40 CFR 63.1111(a)(2) states that, during ''periods of startup, shutdown, and malfunction, the owner or operator of an affected source subject to this subpart YY shall operate and maintain such affected source (including associated air pollution control equipment and [continuous parament monitoring systems] (CPMS)) in a manner consistent with safety and good air pollution control practices for minimizing emissions to the extent practical. The general duty to minimize emissions during a period of startup, shutdown, or malfunction does not require the owner or operator to achieve emission levels that would be required by the applicable standard at other times if this is not consistent with safety and good air pollution control practices, nor does it require the owner or operator to make any further efforts to reduce emissions if levels required by the applicable standard have been achieved.''

The current language in 40 CFR 63.1108(a)(5) and 40 CFR 63.1111(a)(2) characterizes the general duty to minimize emissions during periods of SSM. With the elimination of the SSM exemption, there is no longer a need to maintain the general duty language of 40 CFR 63.1108(a)(5) and 63.1111(a)(2) as owners and operators would be required to comply with the Carbon Black emission standards at all times (including during periods of SSM). Therefore, the EPA is proposing to remove the applicability of requirements at 40 CFR 63.1108(a)(5) (as specified in the proposed 40 CFR 63.1108(a) introductory text revisions) and 40 CFR 63.1111(a)(2) (as specified in the proposed 40 CFR 63.1111(a) introductory text revisions).

d. SSM Plan

We are proposing to remove the applicability of requirements at 40 CFR 63.1111(a) (as specified in the proposed 40 CFR 63.1111(a) introductory text revisions) requiring owners and operators to develop an SSM plan and specify SSM recordkeeping and reporting requirements related to the SSM plan. As noted, the EPA is proposing to remove the applicability of the SSM exemptions. Therefore, affected units will be subject to emission standards during such events. The applicability of a standard during such events will ensure that sources have ample incentive to plan for and achieve compliance and, thus, the SSM plan requirements are no longer necessary.

e. Compliance With Standards

We are proposing to remove the applicability of the provisions of 40 CFR 63.1108(a)(1) and (2) (as specified in the proposed 40 CFR 63.1108(a) introductory text revisions) which exempts sources from standards during periods of SSM. As discussed above, the D.C. Circuit Court in *Sierra Club* vacated the exemptions contained in this provision and held that the CAA requires that some CAA section 112 standards apply continuously. Consistent with *Sierra Club,* the EPA is proposing to revise standards in this rule to apply at all times.

f. Performance Testing

The proposal does not include the language that precludes startup and shutdown periods from being considered ''representative'' for purposes of performance testing, and instead allows performance testing during periods of startup or shutdown if specified by the Administrator. As in 40 CFR 63.997(e)(1), performance tests conducted under this subpart should not be conducted during malfunctions because conditions during malfunctions are often not representative of normal operating conditions. The EPA is also proposing to add the applicability of the requirements at 40 CFR 63.1108(b)(4)(ii)(B) (as specified in the proposed 40 CFR 63.1108(b)(4)(ii)(B) revisions) that require the owner and operator maintain records of process information that is necessary to document operating conditions during the test and include in such record an explanation to support that such conditions represent normal operation. Finally, the EPA is proposing to add the applicability of language clarifying that the owner and operator make such records available to the Administrator upon request (as specified in the proposed 40 CFR 63.1108(b)(4)(ii)(B) revisions).

g. Recordkeeping

We are not proposing to change the language at 40 CFR 63.1109(a) requiring owners and operators of each affected source to keep copies of reports. However, we are proposing to completely remove the applicability of the requirements at 40 CFR 63.1111(b) (as specified in the proposed 40 CFR 63.1111(b) introductory text revisions), which eliminates periodic SSM reports, consequently eliminating the requirement to keep a copy of this report. These requirements are no longer appropriate for startup and shutdown because SSM plans will no longer be required and the EPA is proposing that recordkeeping and reporting applicable to normal operations will apply to startup and shutdown. In the absence of special provisions applicable to startup and shutdown, such as a startup and shutdown plan, there is no reason to retain additional recordkeeping for startup and shutdown periods.

Furthermore, in lieu of the requirements applicable to malfunctions in 40 CFR 63.1111(b), we are proposing the applicability of the recordkeeping requirements at 40 CFR 63.1111(c)(1). The regulatory text we are proposing to apply at 40 CFR 63.1111(c)(1)(i) differs from 40 CFR 63.1111(b) in that 40 CFR 63.1111(b) requires the creation and retention of a record for each malfunction during which excess emissions occurred, including total duration of all malfunctions for a reporting period. The EPA is proposing that this requirement apply to any failure to meet an applicable standard and is requiring that the source record the date, time, and duration of the failure rather than the total duration of all malfunctions with which excess emissions occurred. For each failure to meet an applicable standard, the EPA is also proposing to revise the rule to include the applicability of the requirements at 40 CFR 63.1111(c)(1)(ii) (as specified in the proposed 40 CFR 63.1111(c) introductory text revisions). This provision requires that sources keep records that include a list of the affected source or equipment, an estimate of the quantity of each regulated pollutant emitted over the standard for which the source failed to meet the standard, and a description of the method used to estimate the emissions. Examples of such methods would include product-loss calculations, mass balance calculations, measurements when available, or engineering judgment based on known process parameters. Furthermore, the EPA is proposing to add the applicability of the requirements at 40 CFR 63.1111(c)(1)(iii) (as specified in the proposed 40 CFR 63.1111(c) introductory text revisions) requiring sources keep records of any corrective actions taken to return the affected unit to its normal or usual manner of operations, and actions taken to minimize emissions in accordance with the general duty regulatory text at 40 CFR 63.1108(a)(4)(ii). The EPA is proposing to require that sources keep records of this information to ensure that there is adequate information to allow the EPA to determine the severity of any failure to meet a standard, and to provide data that may document how the source met the general duty to minimize emissions when the source has failed to meet an applicable standard.

h. Reporting

We are proposing to remove the applicability of the requirements at 40 CFR 63.1111(b) (as specified in the proposed 40 CFR 63.1111(b) introductory text revisions) which describes the reporting requirements for SSM. When applicable, 40 CFR 63.1111(b)(1) requires sources to report actions taken during SSM events to show that actions taken were consistent with their SSM plan. When applicable, 40 CFR 63.1111(b)(2) requires sources to report actions taken during SSM events when actions were inconsistent with their SSM plan. The proposed amendments, therefore, eliminate the applicability of the requirements at 40 CFR 63.1111(b)(2) that require reporting of whether the source deviated from its SSM plan, including required actions to communicate with the Administrator, and the cross-reference to 40 CFR 63.1111(b)(1) that contains the description of the previously required SSM report format and submittal schedule from this section. These specifications are no longer necessary because the events will be reported in otherwise required reports with similar format and submittal requirements. We are proposing to remove the applicability of the requirements at 40 CFR 63.1111(b)(2) for reasons discussed above and because 40 CFR 63.1111(b)(2) describes an immediate report for startups, shutdown, and malfunctions when a source failed to meet an applicable standard but did not follow the SSM plan. We will no longer require owners and operators to report when actions taken during SSM were not consistent with an SSM plan, because plans would no longer be required.

i. Proposed 13-Minute Startup Control Device Bypass Provision

In order to address safety concerns related to the elimination of applicability of the SSM-related provisions when demonstrating compliance with standards under the Carbon Black Production NESHAP, we are proposing that the provisions specified in 40 CFR 63.983(a)(1) of subpart SS, that each closed vent system shall be designed and operated to collect the regulated material vapors from the emission point shall apply at all times, unless complying with the 13-minute startup control device bypass provision. In accordance with the requirements of CAA section 112(h), we are proposing a work practice standard to apply as follows: During periods of startup, when the percent excess oxygen of the collected vapor is greater than or equal to 3 percent, the closed vent system to the control device may be bypassed for the period when the excess oxygen concentration is greater than or equal to 3 percent or for 13 minutes, whichever time is shorter. At all other times, the use of a bypass line on a closed vent system to divert emissions subject to the requirements in Table 8 to 40 CFR 63.1103(f) to the atmosphere or to a control device not meeting the requirements specified in Table 8 of this subpart is an emissions standards violation.

We are proposing this work practice standard because it is not feasible to enforce or prescribe an emission standard during startup. Due to the combustible nature of the tail gas contained in the ductwork and primary bag filter at carbon black facilities, a CCD cannot be safely operated until the contents of the ductwork and primary bag filter are below 3-percent excess oxygen. If a CCD is used while the excess oxygen content is 3 percent or above, this could lead to an explosion at the facility.

After further discussions with the ICBA, we determined that the 13-minute allotment to bypass the CCD, corresponds with the minimum time necessary to completely purge the ductwork and primary bag filter of the facility representing the lowest production rate. A lower production rate results in a lower flow rate through the ductwork, leading to a longer period of time to completely purge the ductwork and primary bag filter. Some facilities that operate using a higher production rate, will be able to purge the line in less than the 13-minute allotment. To address this variability, we are proposing to require that once facilities are under 3-percent excess oxygen content, they must start controlling emissions to meet the applicable emission limit. This requirement minimizes emissions from higher production rate facilities, that can properly purge the ductwork and primary bag filter in less than the 13-minute period.

In order to further reduce emissions during the 13-minute startup work practice period, we are proposing to require that facilities operate using the minimum load for standard starting operating procedures. This requirement will reduce the amount of new HAP being generated during the 13-minute startup period, by limiting the quantity of tail gas being produced, thus, reducing the amount of HAP being released.

All facilities in this source category bypass the combustion control device until the excess oxygen concentration drops below 3-percent and use the minimum load for standard starting operating procedures during startup, therefore, this practice represents the best performers and represents the MACT floor. We did not identify additional measures to reduce emissions during this period, and, therefore, are proposing a standard based on the MACT floor. Based on conversations with industry, there are no other provisions that would need to be proposed as a result of the elimination of the SSM-related provisions being proposed with this action. For additional information on the proposed work practice requirement during periods of startup, see the file, *SSM Email correspondence with ICBA,* available in the docket for this action.

j. 40 CFR Part 63, Subpart SS Revisions

In keeping with the elimination of the SSM exemption, we are also proposing in the Carbon Black Production MACT standards at 40 CFR 63.1103(f)(4) to remove the applicability of SSM-related exemption provisions from 40 CFR part 63, subpart SS referenced by the Carbon Black Production MACT standards under 40 CFR part 63, subpart YY, similar to the revisions to 40 CFR part 63, subpart YY discussed under sections IV.1.E.c through h of this preamble. SSM-exemption related language being proposed for removal includes specific compliance SSM-related provisions/ language such as ''except during periods of start-up, shutdown and malfunction specified in a referencing subpart''; ''other than periods of startups, shutdowns, and malfunctions''; language requiring that an SSM plan be prepared and followed; language referencing operations during periods of SSM not constituting representative conditions for the purpose of a performance test; language allowing the exclusion of SSM data when determining compliance with a standard; excursion language related to SSM periods; and SSM-related record requirements.

2. Electronic Reporting

The EPA is proposing that owners and operators of carbon black production facilities submit electronic copies of required performance test reports, Notification of Compliance Status (NOCS), and periodic reports through the EPA's Central Data Exchange (CDX) using the Compliance and Emissions Data Reporting Interface (CEDRI). A description of the electronic data submission process is provided in the memorandum, *Electronic Reporting Requirements for New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP) Rules,* available in the docket for this action.

The proposed rule requires that performance test results collected using test methods that are supported by the

EPA's Electronic Reporting Tool (ERT) as listed on the ERT website [23] at the time of the test be submitted in the format generated through the use of the ERT or an electronic file consistent with the xml schema on the ERT website, and other performance test results be submitted in portable document format (PDF) using the attachment module of the ERT. The proposed rule requires that NOCS reports be submitted as a PDF upload in CEDRI.

For periodic reports, the proposed rule requires that owners and operators use the appropriate spreadsheet template to submit information to CEDRI. A draft version of the proposed template for these reports is included in the docket for this action.[24] The EPA specifically requests comment on the content, layout, and overall design of the template.

Additionally, the EPA has identified two broad circumstances in which electronic reporting extensions may be provided. These circumstances are (1) outages of the EPA's CDX or CEDRI which preclude an owner and operator from accessing the system and submitting required reports and (2) *force majeure* events, which are defined as events that will be or have been caused by circumstances beyond the control of the affected facility, its contractors, or any entity controlled by the affected facility that prevent an owner and operator from complying with the requirement to submit a report electronically. Examples of *force majeure* events are acts of nature, acts of war or terrorism, or equipment failure or safety hazards beyond the control of the facility. The EPA is providing these potential extensions to protect owners and operators from noncompliance in cases where they cannot successfully submit a report by the reporting deadline for reasons outside of their control. In both circumstances, the decision to accept the claim of needing additional time to report is within the discretion of the Administrator, and reporting should occur as soon as possible.

The electronic submittal of the reports addressed in this proposed rulemaking will increase the usefulness of the data contained in those reports, is in keeping with current trends in data availability and transparency, will further assist in the protection of public health and the environment, will improve compliance by facilitating the ability of regulated facilities to demonstrate compliance with requirements, and by facilitating the ability of delegated state, local, tribal, and territorial air agencies and the EPA to assess and determine compliance, and will ultimately reduce burden on regulated facilities, delegated air agencies, and the EPA. Electronic reporting also eliminates paper-based, manual processes, thereby saving time and resources, simplifying data entry, eliminating redundancies, minimizing data reporting errors, and providing data quickly and accurately to the affected facilities, air agencies, the EPA, and the public. Moreover, electronic reporting is consistent with the EPA's plan [25] to implement Executive Order 13563 and is in keeping with the EPA's Agency-wide policy [26] developed in response to the White House's Digital Government Strategy.[27] For more information on the benefits of electronic reporting, see the memorandum, *Electronic Reporting Requirements for New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP) Rules,* referenced earlier in this section.

3. Boiler and Process Heater Provisions

As a result of the EPA's assessment of the MACT standards that currently apply to the Carbon Black Production source category under 40 CFR part 63, subpart YY, the EPA was made aware that there may be instances where carbon black production process vents at affected sources, route emissions to a boiler/process heater for use as fuel gas may not be subject to any requirements. Under the existing standards, although emission streams may be subject to the Carbon Black Production MACT, these streams are exempt from any requirements under the rule when emissions are routed to a boiler/process heater for use as fuel gas. The EPA assumed that these boilers/process heaters would be subject to the 40 CFR part 63, subpart DDDDD, Industrial, Commercial, and Institutional Boilers and Process Heaters NESHAP (Boiler MACT). However, under the Boiler MACT, process heaters/boilers covered under another standard (as with the Carbon Black Production MACT) would not be subject to the Boiler MACT. Specifically, boilers that are used as control devices for other NESHAP standards, where at least 50 percent of the heat input to the boiler is provided by the NESHAP-regulated gas stream would not be subject to the Boiler MACT. This was an unintended consequence of the Carbon Black Production MACT rule. We are, therefore, proposing that applicable boilers/process heaters that receive tail gas for use as fuel gas must comply with annual tune up requirements specified in 40 CFR 63.1103(f)(3)(iii). The proposed annual boiler/process heater tune-up requirements are similar to what is included for gas 1 units under the Boiler MACT.

4. Performance Test Frequency

The EPA is proposing to revise the MACT standard compliance provisions for the Carbon Black Production source category to require owners and operators of carbon black production affected source process vents subject to the rule conduct performance tests every 5 years. The EPA has determined that an initial performance test is insufficient to demonstrate continued compliance over time. Thus, this proposed revision is necessary to ensure continued compliance with standards.

*F. What compliance dates are we proposing?*

Amendments to the Carbon Black Production standards proposed in this rulemaking for adoption under CAA section 112(d)(2) and (3) and CAA section 112(d)(6) are subject to the compliance deadlines outlined in the CAA under CAA section 112(i). New sources, (*i.e.,* sources that commence construction or reconstruction after proposal of the standard) must comply with the standard immediately upon start-up. Existing sources, as described in CAA section 112(i) provides that the compliance date shall provide for compliance as expeditiously as practicable, but no later than 3 years after the effective date of the standard. (''Section 112(i)(3)'s three-year maximum compliance period applies generally to any emission standard . . . *Association of Battery Recyclers* v. *EPA,* 716 F.3d 667, 672 (D.C. Cir. 2013).) In determining what compliance period is as expeditious as practicable, we consider the amount of time needed to plan and construct projects and change operating procedures by affected sources. The final action is not expected to be a ''major rule'' as defined by 5 U.S.C. 804(2), so the effective date of the

final rule will be the promulgation date as specified in CAA section 112(d)(10).

The EPA is proposing several changes that would impact new and ongoing compliance requirements for carbon black production affected sources under 40 CFR part 63, subpart YY. These changes include: (1) Process vent emission standards being expanded to cover all applicable (based on an applicability threshold) carbon black production process vents; (2) the requirement to conduct performance tests every 5 years when demonstrating compliance with process vent emission control requirements; (3) boiler and process heater tune up requirements; (4) several SSM-related changes (changes proposed as a result of removing the applicability of the SSM exemption from the requirements); (5) the alternative work practice standard specified in 40 CFR 63.1103(f)(5) related to the requirement that a closed vent system route the collected vapors to a control device when demonstrating compliance, and (6) the addition of requirements to submit reports electronically. The compliance applicability dates vary for listed items one through three, and four and five.

The EPA is proposing that, if applicable, all carbon black production affected sources that commenced construction or reconstruction on or before January 14, 2021, must be in compliance with the: (1) Process vent emission standards being expanded to cover all applicable (based on an applicability threshold) carbon black production process vents; (2) the requirement to conduct performance tests every 5 years when demonstrating compliance with process vent emission control requirements; and (3) boiler and process heater tune up requirements by 1 year after the date the final rule is published in the **Federal Register**. The 1-year allowance for existing sources to comply with the rule is based on the EPA's assessment that owners and operators will need time to plan, determine applicability of process vent requirements, and implement performance testing and control requirements (which could include equipment/retrofit investments to comply with new requirements). The EPA is also proposing that, if applicable, all carbon black production affected sources that commenced construction or reconstruction after January 14, 2021, must be in compliance with the: (1) Process vent emission standards being expanded to cover all applicable (based on an applicability threshold) carbon black production process vents; (2) the requirement to conduct performance tests every 5 years when demonstrating compliance with process vent emission control requirements; and (3) boiler and process heater tune up requirements upon initial startup, or the date of publication of the final rule in the **Federal Register**, whichever is later.

For other proposed requirements related to SSM-related changes and electronic reporting, the EPA is proposing that all carbon black production affected sources that commenced construction or reconstruction on or before January 14, 2021, must be in compliance with the: (1) SSM-related changes (changes proposed as a result of removing the SSM exemption from the requirements); (2) the alternative work practice standard specified in 40 CFR 63.1103(f)(5) related to the requirement that a closed vent system route the collected vapors to a control device when demonstrating compliance; and (3) the addition of requirements to submit reports electronically 180 days after publication of the final rule in the **Federal Register**. All carbon black production affected sources that commenced construction or reconstruction after January 14, 2021, must be in compliance with the: (1) SSM-related changes; (2) the alternative work practice standard specified in 40 CFR 63.1103(f)(5) related to the requirement that a closed vent system route the collected vapors to a control device when demonstrating compliance; and (3) the addition of requirements to submit reports electronically upon initial startup, or the date of publication of the final rule in the **Federal Register**, whichever is later. Based on our assessment, for existing sources, the EPA considers a period of 180 days to be the most expeditious compliance period practicable for complying with SSM-related and electronic reporting requirement change planning and implementation.

For SSM-related requirement changes, we believe 180 days is sufficient for owners and operators of affected sources to familiarize themselves with the operational, monitoring, reporting, and recordkeeping changes associated with the SSM-related requirement changes. Additionally, 180 days is sufficient for owners and operators of affected sources to comply with the alternative work practice standard that addresses safety concerns as a result of removing the applicability of SSM-related provisions when demonstrating compliance with standards under the Carbon Black Production NESHAP.[28]

We are also proposing to change the applicability of requirements for SSM by removing the applicability of the exemption from the requirements to meet the standard during SSM periods and by removing the requirement to develop and implement an SSM plan. Our experience with similar industries that are required to convert reporting mechanisms to install necessary hardware and software, become familiar with the process of submitting performance test results electronically through the EPA's CEDRI, test these new electronic submission capabilities, and reliably employ electronic reporting shows that a time period of a minimum of 90 days, and, more typically, 180 days is generally necessary to successfully accomplish these revisions. Our experience with similar industries further shows that owners and operators generally require a time period of 180 days to read and understand the amended rule requirements; to evaluate their operations to ensure that they can meet the standards during periods of startup and shutdown as defined in the rule and make any necessary adjustments; and to update their operation, maintenance, and monitoring plan to reflect the revised requirements.

For electronic reporting changes, the EPA's experience with similar industries that are required to convert reporting mechanisms, to install necessary hardware and software, become familiar with the process of submitting performance test results electronically through the EPA's CEDRI, test these new electronic submission capabilities, and reliably employ electronic reporting shows that a time period of a minimum of 90 days, and, more typically, 180 days, is generally necessary to successfully accomplish these revisions. Our experience with similar industries further shows that this sort of regulated facility generally requires a time period of 180 days to read and understand the amended rule requirements; to evaluate their operations to ensure that they can meet the standards during periods of startup and shutdown as defined in the rule and make any necessary adjustments; and to update their operation, maintenance, and monitoring plan to reflect the revised requirements.

We solicit comment on the proposed compliance periods. Specifically, we request that comments in support of, and in opposition to, the proposed compliance periods for the differing requirements provide supporting

[28] Section 63.983(a)(1) of 40 CFR part 63, subpart SS requires that each closed vent system be designed and operated to collect the regulated material vapors from the emission point, and to route the collected vapors to a control device, apply at all times.

information as to why or why not the compliance periods proposed are sufficient/insufficient.

## V. Summary of Cost, Environmental, and Economic Impacts

### A. What are the affected sources?

The EPA estimates that there are 15 production facilities in the Carbon Black Production major source category that will be subject to the Carbon Black Production NESHAP affected by the proposed amendments to 40 CFR part 63, subpart YY. The basis of our estimates of affected facilities is provided in the memorandum, *Identification of Major Sources for the Carbon Black Production NESHAP,* which is available in the docket for this action. We are not currently aware of any planned or potential new or reconstructed carbon black production facilities in the source category.

### B. What are the air quality impacts?

While we are broadening the scope of the current standard, setting annual tune up requirements for process heaters/boilers, removing the SSM exemption, and establishing a work practice standard for periods of startup, we do not have data to determine quantitatively the reduction in HAP emissions resulting from this action. Nevertheless, we do not anticipate that this action will result in significant HAP emission reductions.

### C. What are the cost impacts?

Costs were developed on a per facility basis, and all facilities were determined to have similar costs. Costs were valued in 2019 dollars. Costs were broken into three separate categories based on proposed requirements: Initial Applicability Test, Performance Test, and Boiler/Process Heater Maintenance Costs.

Initial applicability testing costs include costs associated with the proposed requirement that process vents located after the MUF meet the standard, which will require facilities to determine whether emissions control is needed for process vents after the MUF process vent. We estimate this to be a one-time cost of $21, 350 per facility, due to the assumption that the majority of HAP is removed and controlled at the MUF, which results in the vent stream concentration located after the MUF to fall below the HAP applicability concentration threshold (260 ppmv).

Performance test costs include costs associated with the proposed requirement to conduct emissions tests at the subject process vents every 5 years starting in the first year of the proposed requirement. We estimate that 20 percent of subject facilities will conduct a performance test each year resulting in an annual cost of $15,241 per facility.

Boiler/process heater maintenance costs include costs associated with the proposed requirement to ensure that boilers and process heaters are operating at peak efficiency and not creating excess emissions through inefficient operation. Initial tune-up costs are assumed to be higher to get the units back to peak efficiency. We assume that following year costs would be lower because less maintenance would be needed. As such, we estimate the initial tune-up cost to be $6,750 per facility and subsequent annual tune-ups to cost $1,350 per facility.

Costs were based primarily on labor, equipment, and travel costs. Labor costs are based on Bureau of Labor Statistics data for relevant employees necessary to perform the tests and maintenance. A detailed cost analysis can be found in the memorandum, *Carbon Black Cost Memorandum,* available in the docket for this action.

### D. What are the economic impacts?

Economic impact analyses focus on changes in market prices and output levels. If changes in market prices and output levels in the primary markets are significant enough, impacts on other markets may also be examined. Both the magnitude of costs associated with the proposed requirements and the distribution of these costs among affected facilities can have a role in determining how the market will change in response to a proposed rule.

Economic costs to carbon black producers were measured in Present Value (PV) total costs and Equivalent Annual Value (EAV) costs. All producer facilities were estimated to have similar costs. All costs are presented in 2019 dollars. Refer to the memorandum, *Carbon Black Economic Impact Analysis,* in the docket for this rulemaking for more information. PV total costs and EAV costs were measured at the 3-percent and 7-percent discount rate. The duration of analysis was 10 years which represented two full cycles of cost analysis for the proposed requirements. Per facility PV total costs were estimated to be $70,000 and $63,000 at the 3-percent and 7-percent discount rates, respectively. EAV costs per facility were estimated to be $8,000 and $9,000 at the 3-percent and 7-percent discount rates, respectively. The combined PV total cost of the proposed requirements for all facilities was estimated to be $1,005,000 and $945,000 at the 3-percent and 7-percent discount rates, respectively. The combined EAV cost of the proposed requirements for all facilities was estimated to be $118,000 and $135,000 at the 3-percent and 7-percent discount rates, respectively.

All carbon black producers subject to this rule were determined to be large entities based on Small Business Administration standards. Because the PV and EAV costs associated with the proposed revisions are minimal, no significant economic impacts from the proposed amendments are anticipated. Refer to the *Carbon Black Economic Impact Memorandum,* available in the docket, for more information.

### E. What are the benefits?

Although the EPA does not anticipate any significant reductions in HAP emissions as a result of the proposed amendments, we believe that the action, if finalized as proposed, would result in improvements to the rule, by broadening the current emission limit, requiring an annual tune-up for boilers/process heaters, and revising the SSM standards such that a standard applies at all times, including periods covered by the proposed work practice standard. Additionally, the proposed amendments requiring electronic submittal of NOCS reports, performance test results, and periodic reports will increase the usefulness of the data, are in keeping with current trends of data availability, will further assist in the protection of public health and the environment, and will ultimately result in reduced reporting burden on the regulated community. See section IV.D.3 of this preamble for more information.

## VI. Request for Comments

We solicit comments on this proposed action. In addition to general comments on this proposed action, we are also interested in additional data that may improve the risk assessments and other analyses. We are specifically interested in receiving any improvements to the data used in the site-specific emissions profiles used for risk modeling. Such data should include supporting documentation in sufficient detail to allow characterization of the quality and representativeness of the data or information. Section VII of this preamble provides more information on submitting data.

## VII. Submitting Data Corrections

The site-specific emissions profiles used in the source category risk and demographic analyses and instructions are available for download on the RTR website at *https://www.epa.gov/stationary-sources-air-pollution/acetal-resins-acrylic-modacrylic-fibers-carbon-*

*black-hydrogen.* The data files include detailed information for each HAP emissions release point for the facilities in the source category.

If you believe that the data are not representative or are inaccurate, please identify the data in question, provide your reason for concern, and provide any ''improved'' data that you have, if available. When you submit data, we request that you provide documentation of the basis for the revised values to support your suggested changes. To submit comments on the data downloaded from the RTR website, complete the following steps:

1. Within this downloaded file, enter suggested revisions to the data fields appropriate for that information.

2. Fill in the commenter information fields for each suggested revision (*i.e.,* commenter name, commenter organization, commenter email address, commenter phone number, and revision comments).

3. Gather documentation for any suggested emissions revisions (*e.g.,* performance test reports, material balance calculations).

4. Send the entire downloaded file with suggested revisions in Microsoft® Access format and all accompanying documentation to Docket ID No. EPA–HQ–OAR–2020–0505 (through the method described in the **ADDRESSES** section of this preamble).

5. If you are providing comments on a single facility or multiple facilities, you need only submit one file for all facilities. The file should contain all suggested changes for all sources at that facility (or facilities). We request that all data revision comments be submitted in the form of updated Microsoft® Excel files that are generated by the Microsoft® Access file. These files are provided on the project website at *https://www.epa.gov/stationary-sources-air-pollution/acetal-resins-acrylic-modacrylic-fibers-carbon-black-hydrogen.*

## VIII. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *https://www.epa.gov/laws-regulations/laws-and-executive-orders.*

### *A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review*

This action is not a significant regulatory action and was, therefore, not submitted to OMB for review.

### *B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs*

This action is not expected to be an Executive Order 13771 regulatory action because this action is not significant under Executive Order 12866.

### *C. Paperwork Reduction Act (PRA)*

The information collection activities in this proposed rule have been submitted for approval to the OMB under the PRA. The Information Collection Request (ICR) document that the EPA prepared has been assigned EPA ICR number 2677.01. You can find a copy of the ICR in the docket for this rule, and it is briefly summarized here.

We are proposing changes to the recordkeeping and reporting requirements associated with 40 CFR part 63, subpart YY, in the form of eliminating the SSM plan and reporting requirements; broadening the initial emission limit to include process vents located after the MUF; and including the requirement for electronic submittal of reports. In addition, the number of facilities subject to the standards changed. The number of respondents was reduced from 18 to 15 based on consultation with industry representatives and state/local agencies.

*Respondents/affected entities:* The respondents to the recordkeeping and reporting requirements are owners and operators of carbon black production facilities subject to 40 CFR part 63, subpart YY.

*Respondent's obligation to respond:* Mandatory (40 CFR part 63, subpart YY).

*Estimated number of respondents:* 15 facilities.

*Frequency of response:* The frequency of responses varies depending on the burden item. Responses include one-time review of rule amendments, reports of periodic performance tests, and semiannual compliance reports.

*Total estimated burden:* The annual recordkeeping and reporting burden for responding facilities to comply with all of the requirements in the NESHAP, averaged over the 3 years of this ICR, is estimated to be 289 hours (per year). The average annual burden to the Agency over the 3 years after the amendments are final is estimated to be 213 hours (per year) for the Agency. Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* The annual recordkeeping and reporting cost for responding facilities to comply with all of the requirements in the NESHAP, averaged over the 3 years of this ICR, is estimated to be $180,928 (rounded, per year). There are no estimated capital and operation and maintenance costs. The total average annual Agency cost over the first 3 years after the amendments are final is estimated to be $10,247.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations in 40 CFR are listed in 40 CFR part 9.

Submit your comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden to the EPA using the dockets identified at the beginning of this rule. You may also send your ICR-related comments to OMB's Office of Information and Regulatory Affairs via email to *OIRA_submission@omb.eop.gov,* Attention: Desk Officer for the EPA. Since OMB is required to make a decision concerning the ICR between 30 and 60 days after receipt, OMB must receive comments no later than February 16, 2021. The EPA will respond to any ICR-related comments in the final rule.

### *D. Regulatory Flexibility Act (RFA)*

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. This action will not impose any requirements on small entities, since there are no small entities in the source category.

### *E. Unfunded Mandates Reform Act (UMRA)*

This action does not contain an unfunded mandate of $100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

### *F. Executive Order 13132: Federalism*

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

### *G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments*

This action does not have tribal implications as specified in Executive Order 13175. No tribal facilities are known to be engaged in the Carbon

Black Production source category and would not be affected by this action. Thus, Executive Order 13175 does not apply to this action.

*H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks*

This action is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 12866, and because the EPA does not believe the environmental health or safety risks addressed by this action present a disproportionate risk to children. This action's health and risk assessments are contained in sections III.A and IV.A and B of this preamble.

*I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*

This action is not subject to Executive Order 13211 because it is not a significant regulatory action under Executive Order 12866.

*J. National Technology Transfer and Advancement Act (NTTAA)*

This rulemaking does not involve technical standards.

*K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations*

The EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations, and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994).

The documentation for this decision is contained in sections IV.A, IV.B, IV.F, and IV.G of this preamble. As discussed in sections IV.A, IV.B, IV.F, and IV.G of this preamble, we performed a demographic analysis for each source category, which is an assessment of risks to individual demographic groups, of the population close to the facilities (within 50 km and within 5 km). In our analysis, we evaluated the distribution of HAP-related cancer risks and noncancer hazards from the Carbon Black Production source category across different social, demographic, and economic groups within the populations living near operations identified as having the highest risks.

Results of the demographic analysis performed for the Carbon Black Production source category indicate that, for four of the 11 demographic groups, African American, people age 65 and up, people living below the poverty level, and adults over 25 without a high school diploma that reside within 5 km of facilities in the source category is greater than the corresponding national percentage for the same demographic groups. When examining the risk levels of those exposed to emissions from carbon black production facilities, we find nobody is exposed to a cancer risk at or above 1-in-1 million and nobody is exposed to a chronic noncancer TOSHI greater than 1. For additional information see the memorandum, *Risk and Technology Review—Analysis of Demographic Factors For Populations Living Near Carbon Black Production Source Category Operations,* available in the docket for this action.

## ENVIRONMENTAL PROTECTION AGENCY

### 40 CFR Part 63

**[EPA–HQ–OAR–2020–0148; FRL–10018–66–OAR]**

**RIN 2060–AU67**

## National Emission Standards for Hazardous Air Pollutants: Refractory Products Manufacturing Residual Risk and Technology Review

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Proposed rule.

**SUMMARY:** The U.S. Environmental Protection Agency (EPA) is proposing amendments to address the results of the residual risk and technology review (RTR) that the EPA is required to conduct in accordance with the Clean Air Act (CAA) with regard to the National Emissions Standards for Hazardous Air Pollutants (NESHAP) for Refractory Products Manufacturing. The EPA is proposing to find the risks due to emissions of air toxics from this source category under the current standards to be acceptable and that the standards provide an ample margin of safety to protect public health. We are proposing no revisions to the existing numerical emission limits based on these analyses; however, we are proposing new provisions for certain hazardous air pollutants (HAP). The EPA is also proposing to amend provisions addressing emissions during periods of startup, shutdown, and malfunction (SSM) and provisions addressing emissions during periods of scheduled maintenance; to amend provisions regarding electronic reporting of performance test results; and to make miscellaneous clarifying and technical corrections.

**DATES:** *Comments.*

Comments must be received on or before March 1, 2021. Under the Paperwork Reduction Act (PRA), comments on the information collection provisions are best assured of consideration if the Office of Management and Budget (OMB) receives a copy of your comments on or before February 16, 2021.

*Public hearing.* If anyone contacts us requesting a public hearing on or before January 19, 2021, we will hold a virtual public hearing. See **SUPPLEMENTARY INFORMATION** for information on requesting and registering for a public hearing.

**ADDRESSES:** You may send comments, identified by Docket ID No. EPA–HQ–OAR–2020–0148, by any of the following methods:

- *Federal eRulemaking Portal: https://www.regulations.gov/* (our preferred method). Follow the online instructions for submitting comments.
- *Email: a-and-r-docket@epa.gov.* Include Docket ID No. EPA–HQ–OAR–2020–0148 in the subject line of the message.
- *Fax:* (202) 566–9744. Attention Docket ID No. EPA–HQ–OAR–2020–0148.
- *Mail:* U.S. Environmental Protection Agency, EPA Docket Center, Docket ID No. EPA–HQ–OAR–2020–0148, Mail Code 28221T, 1200 Pennsylvania Avenue NW, Washington, DC 20460.
- *Hand/Courier Delivery (by scheduled appointment only):* EPA Docket Center, WJC West Building, Room 3334, 1301 Constitution Avenue NW, Washington, DC 20004. The Docket Center's hours of operation are 8:30 a.m.–4:30 p.m., Monday–Friday (except federal holidays).

*Instructions:* All submissions received must include the Docket ID No. for this rulemaking. Comments received may be posted without change to *https://www.regulations.gov/,* including any personal information provided. For detailed instructions on sending comments and additional information on the rulemaking process, see the **SUPPLEMENTARY INFORMATION** section of this document. Out of an abundance of caution for members of the public and our staff, the EPA Docket Center and Reading Room are closed to the public, with limited exceptions, to reduce the risk of transmitting COVID–19. Our Docket Center staff will continue to provide remote customer service via email, phone, and webform. We encourage the public to submit comments via *https://www.regulations.gov/* or email, as there may be a delay in processing mail and faxes. Hand deliveries and couriers may be received by scheduled appointment only. For further information on EPA Docket Center services and the current status, please visit us online at *https://www.epa.gov/dockets.*

**FOR FURTHER INFORMATION CONTACT:** For questions about this proposed action, contact Ms. Paula Hirtz, Minerals and Manufacturing Group, Sector Policies and Programs Division (D243–04), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–2618; fax number: (919) 541–4991; and email address: *hirtz.paula@epa.gov.* For specific information regarding the risk modeling methodology, contact Mr. Chris Sarsony, Health and Environmental Impacts Division (C539–02), Office of Air Quality Planning and Standards, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711; telephone number: (919) 541–4843; fax number: (919) 541–0840; and email address: *sarsony.chris@epa.gov.*

**SUPPLEMENTARY INFORMATION:**

*Participation in virtual public hearing.* Please note that the EPA is deviating from its typical approach for public hearings because the President has declared a national emergency. Due to the current Centers for Disease Control and Prevention (CDC) recommendations, as well as state and local orders for social distancing to limit the spread of COVID–19, the EPA cannot hold in-person public meetings at this time.

To request a virtual public hearing, contact the public hearing team at (888) 372–8699 or by email at *SPPDpublichearing@epa.gov.* If requested, the virtual hearing will be held on January 29, 2021. The hearing will convene at 9:00 a.m. Eastern Time and will conclude at 3:00 p.m. ET. The EPA may close a session 15 minutes after the last pre-registered speaker has testified if there are no additional speakers. The EPA will announce further details at *https://www.epa.gov/stationary-sources-air-pollution/refractory-products-manufacturing-national-emissions-standards.*

Upon publication of this document in the **Federal Register**, the EPA will begin pre-registering speakers for the hearing, if a public hearing is requested. To register to speak at the virtual hearing, please use the online registration form available at *https://www.epa.gov/stationary-sources-air-pollution/refractory-products-manufacturing-national-emissions-standards* or contact the public hearing team at (888) 372–8699 or by email at *SPPDpublichearing@epa.gov.* The last day to pre-register to speak at the hearing will be January 26, 2021. Prior to the hearing, the EPA will post a general agenda that will list pre-registered speakers in approximate order at: *https://www.epa.gov/stationary-sources-air-pollution/refractory-products-manufacturing-national-emissions-standards.*

The EPA will make every effort to follow the schedule as closely as possible on the day of the hearing; however, please plan for the hearings to run either ahead of schedule or behind schedule.

Each commenter will have 5 minutes to provide oral testimony. The EPA encourages commenters to provide the EPA with a copy of their oral testimony electronically (via email) by emailing it to *hirtz.paula@epa.gov.* The EPA also recommends submitting the text of your oral testimony as written comments to the rulemaking docket.

The EPA may ask clarifying questions during the oral presentations but will not respond to the presentations at that time. Written statements and supporting information submitted during the comment period will be considered with the same weight as oral testimony and supporting information presented at the public hearing.

Please note that any updates made to any aspect of the hearing will be posted online at *https://www.epa.gov/stationary-sources-air-pollution/refractory-products-manufacturing-national-emissions-standards.* While the EPA expects the hearing to go forward as set forth above, please monitor our website or contact the public hearing team at (888) 372–8699 or by email at *SPPDpublichearing@epa.gov* to determine if there are any updates. The EPA does not intend to publish a document in the **Federal Register** announcing updates.

If you require the services of a translator or a special accommodation such as audio description, please pre-register for the hearing with the public hearing team and describe your needs by January 21, 2021. The EPA may not be able to arrange accommodations without advanced notice.

*Docket.* The EPA has established a docket for this rulemaking. Docket ID No. EPA–HQ–OAR–2020–0148 has been established for 40 CFR part 63, subpart SSSSS, Refractory Products Manufacturing. All documents in the docket are listed in *https://www.regulations.gov/.* Although listed, some information is not publicly available, *e.g.,* Confidential Business Information (CBI) or other information whose disclosure is restricted by statute. Certain other material, such as copyrighted material, is not placed on the internet and will be publicly available only in hard copy. With the exception of such material, publicly available docket materials are available electronically in *Regulations.gov*.

*Instructions.* Direct your comments to Docket ID No. EPA–HQ–OAR–2020–0148. The EPA's policy is that all comments received will be included in the public docket without change and may be made available online at *https://www.regulations.gov/,* including any personal information provided, unless the comment includes information claimed to be CBI or other information whose disclosure is restricted by statute. Do not submit electronically any information that you consider to be CBI or other information whose disclosure is restricted by statue. This type of information should be submitted by mail as discussed below.

The EPA may publish any comment received to its public docket. Multimedia submissions (audio, video, etc.) must be accompanied by a written comment. The written comment is considered the official comment and should include discussion of all points you wish to make. The EPA will generally not consider comments or comment contents located outside of the primary submission (*i.e.,* on the Web, cloud, or other file sharing system). For additional submission methods, the full EPA public comment policy, information about CBI or multimedia submissions, and general guidance on making effective comments, please visit *https://www.epa.gov/dockets/commenting-epa-dockets.*

The *https://www.regulations.gov/* website allows you to submit your comment anonymously, which means the EPA will not know your identity or contact information unless you provide it in the body of your comment. If you send an email comment directly to the EPA without going through *https://www.regulations.gov/,* your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. If you submit an electronic comment, the EPA recommends that you include your name and other contact information in the body of your comment and with any digital storage media you submit. If the EPA cannot read your comment due to technical difficulties and cannot contact you for clarification, the EPA may not be able to consider your comment. Electronic files should not include special characters or any form of encryption and be free of any defects or viruses. For additional information about the EPA's public docket, visit the EPA Docket Center homepage at *https://www.epa.gov/dockets.*

The EPA is temporarily suspending its Docket Center and Reading Room for public visitors, with limited exceptions, to reduce the risk of transmitting COVID–19. Our Docket Center staff will continue to provide remote customer service via email, phone, and webform. We encourage the public to submit comments via *https://www.regulations.gov/* as there may be a delay in processing mail and faxes. Hand deliveries or couriers will be received by scheduled appointment only. For further information and updates on EPA Docket Center services, please visit us online at *https://www.epa.gov/dockets.*

The EPA continues to carefully and continuously monitor information from the CDC, local area health departments, and our Federal partners so that we can respond rapidly as conditions change regarding COVID–19.

*Submitting CBI.* Do not submit information containing CBI to the EPA through *https://www.regulations.gov/* or email. Clearly mark the part or all of the information that you claim to be CBI. For CBI information on any digital storage media that you mail to the EPA, mark the outside of the digital storage media as CBI and then identify electronically within the digital storage media the specific information that is claimed as CBI. In addition to one complete version of the comments that includes information claimed as CBI, you must submit a copy of the comments that does not contain the information claimed as CBI directly to the public docket through the procedures outlined in *Instructions* above. If you submit any digital storage media that does not contain CBI, mark the outside of the digital storage media clearly that it does not contain CBI. Information not marked as CBI will be included in the public docket and the EPA's electronic public docket without prior notice. Information marked as CBI will not be disclosed except in accordance with procedures set forth in 40 Code of Federal Regulations (CFR) part 2. Send or deliver information identified as CBI only to the following address: OAQPS Document Control Officer (C404–02), OAQPS, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Attention Docket ID No. EPA–HQ–OAR–2020–0148. Note that written comments containing CBI and submitted by mail may be delayed and no hand deliveries will be accepted.

*Preamble acronyms and abbreviations.* We use multiple acronyms and terms in this preamble. While this list may not be exhaustive, to ease the reading of this preamble and for reference purposes, the EPA defines the following terms and acronyms here:

AEGL acute exposure guideline level
AERMOD air dispersion model used by the HEM–3 model
ASTM American Society for Testing and Materials
CAA Clean Air Act
CalEPA California EPA
CBI Confidential Business Information
CDX Central Data Exchange
CEDRI Compliance and Emissions Data Reporting Interface
CFR Code of Federal Regulations
ECHO Enforcement and Compliance History Online
EPA Environmental Protection Agency
ERPG emergency response planning guideline
ERT Electronic Reporting Tool
HAP hazardous air pollutant(s)
HCl hydrochloric acid
HEM–3 Human Exposure Model, Version 1.1.0
HF hydrogen fluoride
HI hazard index
HQ hazard quotient
HQREL hazard quotient recommended exposure limit
IBR incorporation by reference
IRIS Integrated Risk Information System
kg kilogram
km kilometer
MACT maximum achievable control technology
mg/m3 milligrams per cubic meter
MIR maximum individual risk
NAAQS National Ambient Air Quality Standards
NEI National Emission Inventory
NESHAP national emission standards for hazardous air pollutants
NTTAA National Technology Transfer and Advancement Act
OAQPS Office of Air Quality Planning and Standards
OMB Office of Management and Budget
PB–HAP hazardous air pollutants known to be persistent and bio-accumulative in the environment
PDF portable document format
POM polycyclic organic matter
PRA Paperwork Reduction Act
RBLC Reasonably Available Control Technology/Best Available Control Technology/Lowest Achievable Emission Rate Clearinghouse
REL reference exposure level
RfC reference concentration
RTO regenerative thermal oxidizer
RTR residual risk and technology review
SAB Science Advisory Board
SSM startup, shutdown, and malfunction
TOSHI target organ-specific hazard index
tpy tons per year
TRIM.FaTE Total Risk Integrated Methodology.Fate, Transport, and Ecological Exposure model
UF uncertainty factor
µg/m3 micrograms per cubic meter
URE unit risk estimate
VCS voluntary consensus standards

*Organization of this document.* The information in this preamble is organized as follows:

I. General Information
A. Does this action apply to me?
B. Where can I get a copy of this document and other related information?
II. Background
A. What is the statutory authority for this action?
B. What is the source category and how does the current NESHAP regulate its HAP emissions?
C. What data collection activities were conducted to support this action?
D. What other relevant background information and data are available?
III. Analytical Procedures and Decision-Making
A. How do we consider risk in our decision-making?
B. How do we perform the technology review?
C. How do we estimate post-MACT risk posed by the source category?
IV. Analytical Results and Proposed Decisions
A. What actions are we taking pursuant to CAA sections 112(d)(2) and (d)(3)?
B. What are the results of the risk assessment and analyses?
C. What are our proposed decisions regarding risk acceptability, ample margin of safety, and adverse environmental effect?
D. What are the results and proposed decisions based on our technology review?
E. What other actions are we proposing?
F. What compliance dates are we proposing?
V. Summary of Cost, Environmental, and Economic Impacts
A. What are the affected sources?
B. What are the air quality impacts?
C. What are the cost impacts?
D. What are the economic impacts?
E. What are the benefits?
VI. Request for Comments
VII. Submitting Data Corrections
VIII. Statutory and Executive Order Reviews
A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review
B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs
C. Paperwork Reduction Act (PRA)
D. Regulatory Flexibility Act (RFA)
E. Unfunded Mandates Reform Act (UMRA)

F. Executive Order 13132: Federalism
G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments
H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks
I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use
J. National Technology Transfer and Advancement Act (NTTAA) and 1 CFR part 51
K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations

## I. General Information

### *A. Does this action apply to me?*

Refractory Products Manufacturing, the source category that is the subject of this proposal, is regulated under 40 CFR part 63, subpart SSSSS. The North American Industry Classification System (NAICS) codes for the refractory products industry are 327124 (clay) and 327125 (nonclay). We estimate that three major source facilities engaged in refractory products manufacturing would be affected by this proposal. The proposed standards, once promulgated, will be directly applicable to the affected sources. Federal, state, local, and tribal government entities would not be affected by this proposed action. The Refractory Products Manufacturing source category was revised since 1992 when it originally appeared in the *Initial List of Categories of Sources Under Section 112(c)(1) of the Clean Air Act Amendments of 1990* (see 57 FR 31576, July 16, 1992) and *Documentation for Developing the Initial Source Category List, Final Report* (see EPA–450/3–91–030, July 1992). At that time the source category was listed as Chromium Refractories Production and it was defined to include any facility engaged in producing chromium-containing refractories. Refractories were defined as heat-resistant materials used to build or line high-temperature industrial furnaces, and chromium-containing refractories were defined as refractories produced from chrome ore or chromic oxide along with other raw materials such as alumina, zirconia, silica, and magnesia. The category included, but was not limited to, facilities that manufacture magnesia-chrome, chrome-magnesite, chrome alumina, and chromic oxide refractories. Also included were facilities that manufactured either formed (bricks) or unformed (mortar, castables) chromium-containing refractories.

The source category was renamed in 1999 to Refractories Manufacturing in the National Emission Standards for Hazardous Air Pollutants (NESHAP): Revision of Source Category List and Schedule for Standards Under Section 112 of the Clean Air Act (see 64 FR 3025, November 18, 1999). By that time the EPA had obtained information from nonchromium refractory manufacturing plants that confirmed they were major sources of HAP emissions. Because the production of nonchromium refractories at those facilities would not be covered by other source categories on the source category list, the EPA decided to expand the scope of the source category to include the nonchromium refractory manufacturing sources.

The source category was subsequently renamed in 2002 to Refractory Products Manufacturing in the National Emission Standards for Hazardous Air Pollutants (NESHAP) for Refractory Products Manufacturing, proposed rule preamble (67 FR 42108, June 20, 2002). In this proposed action, the EPA revised and further clarified the source category as provided by section 112(c) of the CAA. The source category is defined to include, but is not limited to, any facility that manufactures refractory bricks and shapes that are produced using an organic HAP compound, pitch-impregnated refractory products, chromium refractory products, and fired clay refractory products.

### *B. Where can I get a copy of this document and other related information?*

In addition to being available in the docket, an electronic copy of this action is available on the internet. Following signature by the EPA Administrator, the EPA will post a copy of this proposed action at *https://www.epa.gov/stationary-sources-air-pollution/refractory-products-manufacturing-national-emissions-standards.* Following publication in the **Federal Register**, the EPA will post the **Federal Register** version of the proposal and key technical documents at these same websites. Information on the overall RTR program is available at *https://www.epa.gov/stationary-sources-air-pollution/risk-and-technology-review-national-emissions-standards-hazardous.*

The proposed changes to the CFR that would be necessary to incorporate the changes proposed in this action are set out in an attachment to the memorandum titled *Proposed Regulation Edits for 40 CFR part 63, subpart SSSSS,* available in the docket for this action (Docket ID No. EPA–HQ–OAR–2020–0148). The document includes the specific proposed amendatory language for revising the CFR and, for the convenience of interested parties, a redline version of the regulation. Following signature by the EPA Administrator, the EPA will also post a copy of this memorandum and the attachments to *https://www.epa.gov/stationary-sources-air-pollution/refractory-products-manufacturing-national-emissions-standards.*

## II. Background

### *A. What is the statutory authority for this action?*

The statutory authority for this action is provided by sections 112 and 301 of the CAA, as amended (42 U.S.C. 7401 *et seq.*).[1] Section 112 of the CAA establishes a two-stage regulatory process to develop standards for emissions of HAP from stationary sources. Generally, the first stage involves establishing technology-based standards and the second stage involves evaluating those standards that are based on maximum achievable control technology (MACT) to determine whether additional standards are needed to address any remaining risk associated with HAP emissions. This second stage is commonly referred to as the ''residual risk review.'' In addition to the residual risk review, the CAA also requires the EPA to review standards set under CAA section 112 every 8 years and revise the standards as necessary taking into account any ''developments in practices, processes, or control technologies.'' This review is commonly referred to as the ''technology review.'' When the two reviews are combined into a single rulemaking, it is commonly referred to as the ''risk and technology review.'' The discussion that follows identifies the most relevant statutory sections and briefly explains the contours of the methodology used to implement these statutory requirements. A more comprehensive discussion appears in the document titled *CAA Section 112 Risk and Technology Reviews: Statutory Authority and Methodology,* in the docket for this rulemaking (Docket ID No. EPA–HQ–OAR–2020–0148).

In the first stage of the CAA section 112 standard setting process, the EPA promulgates technology-based standards under CAA section 112(d) for categories of sources identified as emitting one or more of the HAP listed in CAA section 112(b). Sources of HAP emissions are

[1] In addition, section 301 of the CAA provides general authority for the Administrator to ''prescribe such regulations as are necessary to carry out his functions'' under the CAA.

either major sources or area sources, and CAA section 112 establishes different requirements for major source standards and area source standards. ''Major sources'' are those that emit or have the potential to emit 10 tons per year (tpy) or more of a single HAP or 25 tpy or more of any combination of HAP. All other sources are ''area sources.'' For major sources, CAA section 112(d)(2) provides that the technology-based NESHAP must reflect the maximum degree of emission reductions of HAP achievable (after considering cost, energy requirements, and non-air quality health and environmental impacts). These standards are commonly referred to as MACT standards. CAA section 112(d)(3) also establishes a minimum control level for MACT standards, known as the MACT ''floor.'' In certain instances, as provided in CAA section 112(h), the EPA may set work practice standards in lieu of numerical emission standards. The EPA must also consider control options that are more stringent than the floor. Standards more stringent than the floor are commonly referred to as beyond-the-floor standards. For area sources, CAA section 112(d)(5) gives the EPA discretion to set standards based on generally available control technologies or management practices (GACT standards) in lieu of MACT standards.

The second stage in standard-setting focuses on identifying and addressing any remaining (*i.e.,* ''residual'') risk pursuant to CAA section 112(f). For source categories subject to MACT standards, section 112(f)(2) of the CAA requires the EPA to determine whether promulgation of additional standards is needed to provide an ample margin of safety to protect public health or to prevent an adverse environmental effect. Section 112(d)(5) of the CAA provides that this residual risk review is not required for categories of area sources subject to GACT standards. Section 112(f)(2)(B) of the CAA further expressly preserves the EPA's use of the two-step approach for developing standards to address any residual risk and the Agency's interpretation of ''ample margin of safety'' developed in the National Emissions Standards for Hazardous Air Pollutants: Benzene Emissions from Maleic Anhydride Plants, Ethylbenzene/Styrene Plants, Benzene Storage Vessels, Benzene Equipment Leaks, and Coke By-Product Recovery Plants (Benzene NESHAP) (54 FR 38044, September 14, 1989). The EPA notified Congress in the Residual Risk Report that the Agency intended to use the Benzene NESHAP approach in making CAA section 112(f) residual risk determinations (EPA–453/R–99–001, p. ES–11). The EPA subsequently adopted this approach in its residual risk determinations and the United States Court of Appeals for the District of Columbia Circuit (the court) upheld the EPA's interpretation that CAA section 112(f)(2) incorporates the approach established in the Benzene NESHAP. See *NRDC* v. *EPA,* 529 F.3d 1077, 1083 (DC Cir. 2008).

The approach incorporated into the CAA and used by the EPA to evaluate residual risk and to develop standards under CAA section 112(f)(2) is a two-step approach. In the first step, the EPA determines whether risks are acceptable. This determination ''considers all health information, including risk estimation uncertainty, and includes a presumptive limit on maximum individual lifetime [cancer] risk (MIR) [2] of approximately 1-in-10 thousand.'' (54 FR at 38045). If risks are unacceptable, the EPA must determine the emissions standards necessary to reduce risk to an acceptable level without considering costs. In the second step of the approach, the EPA considers whether the emissions standards provide an ample margin of safety to protect public health ''in consideration of all health information, including the number of persons at risk levels higher than approximately 1-in-1 million, as well as other relevant factors, including costs and economic impacts, technological feasibility, and other factors relevant to each particular decision.'' *Id.* The EPA must promulgate emission standards necessary to provide an ample margin of safety to protect public health or determine that the standards being reviewed provide an ample margin of safety without any revisions. After conducting the ample margin of safety analysis, we consider whether a more stringent standard is necessary to prevent, taking into consideration costs, energy, safety, and other relevant factors, an adverse environmental effect.

The CAA section 112(d)(6) separately requires the EPA to review standards promulgated under CAA section 112 and revise them ''as necessary (taking into account developments in practices, processes, and control technologies)'' no less often than every 8 years. In conducting this review, which we call the ''technology review,'' the EPA is not required to recalculate the MACT floor. *Natural Resources Defense Council (NRDC)* v. *EPA,* 529 F.3d 1077, 1084 (DC Cir. 2008). *Association of Battery Recyclers, Inc.* v. *EPA,* 716 F.3d 667 (DC Cir. 2013). The EPA may consider cost in deciding whether to revise the standards pursuant to CAA section 112(d)(6). The EPA is required to address regulatory gaps, such as missing standards for listed air toxics known to be emitted from the source category. *Louisiana Environmental Action Network (LEAN)* v. *EPA,* 955 F.3d 1088 (DC Cir. 2020).

[2] Although defined as ''maximum individual risk,'' MIR refers only to cancer risk. MIR, one metric for assessing cancer risk, is the estimated risk if an individual were exposed to the maximum level of a pollutant for a lifetime.

*B. What is the source category and how does the current NESHAP regulate its HAP emissions?*

1. Source Category Description

The NESHAP for the Refractory Products Manufacturing source category was promulgated on April 16, 2003 (68 FR 18730), and is codified at 40 CFR part 63, subpart SSSSS. Minor amendments were made to the NESHAP related to the SSM provisions on April 20, 2006 (71 FR 20471). The Refractory Products Manufacturing NESHAP applies to each new, reconstructed, and existing affected source located at a refractory products manufacturing facility that is a major source of HAP emissions, is located at a major source of HAP emissions, or is part of a major source of HAP emissions. The affected sources include the following: shape dryers, curing ovens, and kilns that are used to manufacture refractory products that use organic HAP; shape preheaters, pitch working tanks, defumers, and coking ovens that are used to produce pitch-impregnated refractory products; kilns that are used to manufacture chromium refractory products; and kilns that are used to manufacture clay refractory products. A refractory products manufacturing facility is a plant site that manufactures refractory products, such as refractory bricks, refractory shapes, monolithics, kiln furniture, crucibles, and other materials used for lining furnaces and other high temperature process units. Refractory products manufacturing facilities typically process raw material by crushing, grinding, and screening; mixing the processed raw materials with binders and other additives; forming the refractory mix into shapes; and drying and firing the shapes.

Based on our search of the 2017 National Emission Inventory (NEI) (*www.epa.gov/air-emissions-inventories/national-emissions-inventory-nei*) and the EPA's Enforcement and Compliance History Online (ECHO) database (*echo.epa.gov)* and a review of active air emissions permits, we estimate that three major source facilities are subject to the Refractory Products Manufacturing

NESHAP. The three facilities that are subject to the Refractory Products Manufacturing NESHAP are listed in Appendix 1 to the memorandum titled *Technology Review for the Refractory Products Manufacturing Source Category,* in the Refractory Products Manufacturing Docket (Docket ID No. EPA–HQ–OAR–2020–0148).

2. HAP Emission Sources

The EPA estimated that a total of 167 refractory products manufacturing plants were operating in the U.S. in 2002. As a result of a comprehensive information collection request (ICR) that was sent out to the refractory products manufacturing industry at that time, the EPA found only eight of the 167 plants to be major sources of HAP and subject to the Refractory Products Manufacturing NESHAP (67 FR 42130, June 20, 2002). At that time, the EPA identified the primary sources of HAP emissions at most refractory products manufacturing plants to be the thermal process units used to manufacture the refractory products (67 FR 42130, June 20, 2002). These included the following:

- Shape dryers, curing ovens, and kilns used to produce clay and nonclay (organic resin-bonded) refractory products; and
- shape preheaters, pitch working tanks, defumers, and coking ovens used to produce pitch-bonded and pitch-impregnated refractory products.

In addition to these types of thermal process units at major sources, we identified other types of thermal process units at area source refractory products manufacturing plants not subject to the NESHAP. These area sources included those plants that manufactured refractory products from refractory ceramic fiber using a melting furnace and plants that manufactured refractory products with a fused-cast process using an electric arc furnace. (67 FR 42112, June 20, 2002)

Both HAP and criteria pollutants were identified as emissions from the thermal process units. The primary HAP emitted from refractory products manufacturing operations were identified as polycylic organic matter (POM), phenol, hydrochloric acid (HCl), hydrofluoric acid (HF), and ethylene glycol. POM emissions accounted for about 60 percent of the total annual HAP emissions, phenol accounted for 13 percent, HF for 10 percent, HCl for 7 percent and ethylene glycol for 7 percent. (68 FR 18744, April 16, 2003). The HAP emissions vary and depend on the raw materials used, the type of resin or additives used, and the type of thermal process unit used. The criteria pollutants emitted from refractory products manufacturing facilities include particulate matter (PM), sulfur dioxide ($SO_2$), carbon monoxide (CO), nitrogen oxides and volatile organic compounds.

The NESHAP groups refractory product manufacturing processes into four subcategories: Clay refractories, nonclay refractories, chromium refractories (nonclay), and pitch-impregnated refractories (nonclay).

A clay refractory product is defined as a refractory product that contains at least 10 percent uncalcined clay by weight prior to firing in a kiln. In this definition, the term ''clay'' means any of the following six classifications of clay defined by the U.S. Geological Survey (USGS): Ball clay, bentonite, common clay and shale, fire clay, fuller's earth, and kaolin. When clay is used as a raw material, HF and HCl emissions are emitted from kilns during firing due to the presence of chlorides and fluorides in the clay.

Nonclay refractories use raw materials such as alumina, magnesium oxide, and silicon carbide and typically require phenolic resins and other additives to hold the raw materials together. The phenolic resins and additives are needed to bind the raw materials and can result in organic HAP emissions from the curing ovens and kilns.

Kilns that are used to fire chromium refractory products can emit particulate chromium and other HAP metals. A chromium refractory product is a refractory product that contains at least 1 percent chromium by weight. The 2002 proposal (67 FR 42122) also identified inorganic HAP emissions from chromium refractory products kilns, which included hexavalent chromium, other chromium compounds, and other nonvolatile HAP metals.

Pitch-bonded and pitch-impregnated processes employ the use of coal tar and petroleum pitch, resulting in the emissions of POM from the curing and coking ovens, kilns, defumers, pitch working tanks, and shape preheaters.

In this action, the EPA estimates that a total of approximately 120 refractory products manufacturing plants are currently operating in the U.S. and three are major sources subject to the Refractory Products Manufacturing NESHAP. The three major sources manufacture clay and nonclay refractory products and can be grouped into the clay and nonclay subcategories. We also identified the same primary sources of HAP emissions at these refractory products manufacturing plants as the thermal process units used to manufacture the refractory products, including the shape dryers, curing ovens, and kilns used to produce clay and nonclay (organic resin-bonded) refractory products. The three major sources currently operating in the U.S. do not produce chromium, pitch-bonded, or pitch-impregnated products. Consequently, the thermal process units associated with these types of refractories (*i.e.,* shape preheaters, pitch working tanks, defumers, and coking ovens used to produce pitch-bonded and pitch-impregnated refractory products) are not used in the production of refractory products by the three major source facilities, and the HAP associated with these thermal process units are not emitted by the three major source facilities, except for trace amounts of POM. The primary HAP identified for the three major source facilities in this action are HCl and HF. Trace amounts of benzene, bis(2-ethylhexyl) phthalate, POM, and phenol are also reported to be emitted by these facilities from the phenolic resins and additives.

3. NESHAP Requirements for Control of HAP

The EPA estimated that the Refractory Products Manufacturing NESHAP requirements would reduce the emissions of HAP from the source category by 137 tpy (68 FR 18730, April 16, 2003). The Refractory Products Manufacturing NESHAP specifies emission limits, operating limits, and work practice standards for existing affected thermal process sources and for new and reconstructed affected thermal process sources that emit organic HAP according to refractory product type.

Existing and new nonclay refractories thermal process sources have two options for meeting a total hydrocarbon (THC) limit, to either (1) meet a THC concentration limit of 20 parts per million by volume, dry basis (ppmvd), corrected to 18 percent oxygen, or (2) reduce the THC mass emissions by at least 95 percent. Compliance with the THC emission limit is calculated differently for continuous and batch thermal process sources. For continuous process sources of organic HAP, compliance is based on meeting the THC emission limit as a 3-hour block average, and for batch process sources, compliance is based on meeting the THC emission limit as the average of 3-hour peak THC emission periods over two test runs.

Existing clay refractories and existing and new chromium refractory products kilns are required to use natural gas or equivalent fuel to limit metal HAP. Existing clay refractory product kilns must use natural gas to limit HF and HCl emissions. Natural gas or equivalent fuel must be used as the kiln fuel at all times except during periods of natural gas curtailment or other times when natural gas is not available.

New clay refractory product kilns are required to meet numeric limits for HF and HCl. For new continuous clay refractory product kilns, the HF limit is 0.038 pounds per ton (lb/ton) of uncalcined clay processed or a reduction in HF mass emissions by at least 90 percent and an HCl limit of 0.18 lb/ton of product or a reduction of uncontrolled HCl emissions by at least 30 percent. For new batch clay refractory product kilns, the NESHAP requires a reduction in HF emissions by at least 90 percent and a reduction in HCl emissions by at least 30 percent.

The NESHAP also establishes operating limits for thermal process sources and control devices, which are based on operating parameters established during performance testing. For thermal process sources emitting organic HAP, the NESHAP requires operating limits on the organic HAP processing rate and the operating temperature of the control devices (thermal and catalytic oxidizers). For new clay refractory products kilns, operating limits are specified for control devices, such as dry limestone absorber, dry lime injection fabric filters, dry lime scrubber/fabric filters, and wet scrubbers. The NESHAP also requires an operation, maintenance and monitoring (OM&M) plan for each continuous parameter monitoring system (CPMS).

The NESHAP also establishes work practice standards for thermal process sources associated with pitch-bonded and pitch-impregnated refractory product operations. As stated above, these refractory products are not manufactured by the three major sources currently operating in the U.S.

*C. What data collection activities were conducted to support this action?*

For the risk modeling portion of this RTR, the EPA used industry-supplied data and data from the 2017 NEI. The NEI is a database that contains information about sources that emit criteria air pollutants, their precursors, and HAP. The database includes estimates of annual air pollutant emissions from point, nonpoint, and mobile sources in the 50 states, the District of Columbia, Puerto Rico, and the U.S. Virgin Islands. The EPA collects this information and releases an updated version of the NEI database every 3 years. The NEI includes the data necessary for conducting risk modeling, including annual HAP emissions estimates from individual emission points at facilities and the associated emission release parameters. We used NEI emissions and data supplied by the three major source facilities as the primary data to develop the model input files for the risk assessment for this source category. Detailed information on the development of the modeling file for the Refractory Products Manufacturing source category can be found in the memorandum titled *Emissions Data Used to Develop the Refractory Products Manufacturing Risk and Technology Review (RTR) Risk Modeling Input Files,* in Appendix 1 to the *Residual Risk Assessment for the Refractory Products Manufacturing Source Category in Support of the 2020 Risk and Technology Review Proposed Rule* (hereafter referred to as the *Refractory Products Risk Assessment Report*), in the Refractory Products Manufacturing Docket (Docket ID No. EPA–HQ–OAR–2020–0148).

For both the risk modeling and technology review portions of this RTR, we gathered additional data from the facilities, including stack test reports and operating permits regarding emission points, air pollution control devices, and process operations. We collected permits and supporting documentation directly from state permitting authorities or through state-maintained online databases. We contacted facility representatives directly to confirm and clarify the sources of emissions that were reported in the NEI. No formal ICR was conducted for this action.

The EPA's ECHO database was used to identify facilities that were potentially subject to the NESHAP. The ECHO database provides integrated compliance and enforcement information for approximately 800,000 regulated facilities nationwide. Using the search feature in ECHO, the EPA identified facilities that could potentially be subject to the NESHAP. We then reviewed operating permits for these facilities to confirm that they were major sources of HAP with emission sources subject to the NESHAP that is the subject of this action.

For the technology review, we reviewed various information sources regarding emission sources that are currently regulated by the Refractory Products Manufacturing NESHAP to support the technology review. The information sources included the Reasonably Available Control Technology/Best Available Control Technology/Lowest Achievable Emission Rate Clearinghouse (RBLC); state regulations; facility operating permits; regulatory actions, including technology reviews promulgated for other similar NESHAP subsequent to the Surface Coating of Metal Cans NESHAP; and discussions with individual refractory product manufacturing facilities. As a result of the technology review, we are proposing additional control measures based on the best practices of one facility in the source category. Additional information about the data collection activities for the technology review and the technology review results are discussed in section IV.D of this preamble and in the technology review memorandum titled *Technology Review for the Refractory Products Manufacturing Source Category,* July 2020 (hereafter referred to as the *Refractory Products Technology Review Memo*), available in Docket ID No. EPA–HQ–OAR–2020–0148.

*D. What other relevant background information and data are available?*

We also reviewed the NESHAP for other similar source categories that were promulgated after the Refractory Products Manufacturing NESHAP as part of the technology review for this source category. We reviewed the regulatory requirements and/or technical analyses associated with these later regulatory actions to identify any practices, processes, and control technologies considered in those rulemakings that could be applied to emission sources in the Refractory Products Manufacturing source category, as well as the costs, non-air impacts, and energy implications associated with the use of those technologies. We also reviewed information available in industry trade publications such as the *Refractories World Forum.* These publications provided information on trends in refractory technologies that can affect emissions from the Refractory Products Manufacturing source category. This literature review did not identify industry trends that would affect emissions from the sources subject to this NESHAP. Additional details regarding our review of these information sources are contained in the memorandum, *Technology Review for Refractory Products Manufacturing NESHAP,* available in Docket ID No. EPA–HQ–OAR–2020–0148.

## III. Analytical Procedures and Decision-Making

In this section, we describe the analyses performed to support the proposed decisions for the RTRs and other issues addressed in this proposal.

*A. How do we consider risk in our decision-making?*

As discussed in section II.A of this preamble and in the Benzene NESHAP, in evaluating and developing standards under CAA section 112(f)(2), we apply a two-step approach to determine whether or not risks are acceptable and to determine if the standards provide an ample margin of safety to protect public health. As explained in the Benzene NESHAP, ''the first step judgment on acceptability cannot be reduced to any single factor'' and, thus, ''[t]he Administrator believes that the acceptability of risk under section 112 is best judged on the basis of a broad set of health risk measures and information.'' (54 FR 38046). Similarly, with regard to the ample margin of safety determination, ''the Agency again considers all of the health risk and other health information considered in the first step. Beyond that information, additional factors relating to the appropriate level of control will also be considered, including cost and economic impacts of controls, technological feasibility, uncertainties, and any other relevant factors.'' *Id.*

The Benzene NESHAP approach provides flexibility regarding factors the EPA may consider in making determinations and how the EPA may weigh those factors for each source category. The EPA conducts a risk assessment that provides estimates of the MIR posed by emissions of HAP that are carcinogens from each source in the source category, the hazard index (HI) for chronic exposures to HAP with the potential to cause noncancer health effects, and the hazard quotient (HQ) for acute exposures to HAP with the potential to cause noncancer health effects.[3] The assessment also provides estimates of the distribution of cancer risk within the exposed populations, cancer incidence, and an evaluation of the potential for an adverse environmental effect. The scope of the EPA's risk analysis is consistent with the explanation in EPA's response to comments on our policy under the Benzene NESHAP:

> The policy chosen by the Administrator permits consideration of multiple measures of health risk. Not only can the MIR figure be considered, but also incidence, the presence of noncancer health effects, and the uncertainties of the risk estimates. In this way, the effect on the most exposed individuals can be reviewed as well as the impact on the general public. These factors can then be weighed in each individual case. This approach complies with the Vinyl Chloride mandate that the Administrator ascertain an acceptable level of risk to the public by employing his expertise to assess available data. It also complies with the Congressional intent behind the CAA, which did not exclude the use of any particular measure of public health risk from the EPA's consideration with respect to CAA section 112 regulations, and thereby implicitly permits consideration of any and all measures of health risk which the Administrator, in his judgment, believes are appropriate to determining what will ''protect the public health.''

(54 FR at 38057). Thus, the level of the MIR is only one factor to be weighed in determining acceptability of risk. The Benzene NESHAP explained that ''an MIR of approximately one in 10 thousand should ordinarily be the upper end of the range of acceptability. As risks increase above this benchmark, they become presumptively less acceptable under CAA section 112, and would be weighed with the other health risk measures and information in making an overall judgment on acceptability. Or, the Agency may find, in a particular case, that a risk that includes an MIR less than the presumptively acceptable level is unacceptable in the light of other health risk factors.'' *Id.* at 38045. In other words, risks that include an MIR above 100-in-1 million may be determined to be acceptable, and risks with an MIR below that level may be determined to be unacceptable, depending on all of the available health information. Similarly, with regard to the ample margin of safety analysis, the EPA stated in the Benzene NESHAP that the: ''EPA believes the relative weight of the many factors that can be considered in selecting an ample margin of safety can only be determined for each specific source category. This occurs mainly because technological and economic factors (along with the health-related factors) vary from source category to source category.'' *Id.* at 38061. We also consider the uncertainties associated with the various risk analyses, as discussed earlier in this preamble, in our determinations of acceptability and ample margin of safety.

The EPA notes that it has not considered certain health information to date in making residual risk determinations. At this time, we do not attempt to quantify the HAP risk that may be associated with emissions from other facilities that do not include the source category under review, mobile source emissions, natural source emissions, persistent environmental pollution, or atmospheric transformation in the vicinity of the sources in the category.

The EPA understands the potential importance of considering an individual's total exposure to HAP in addition to considering exposure to HAP emissions from the source category and facility. We recognize that such consideration may be particularly important when assessing noncancer risk, where pollutant-specific exposure health reference levels (*e.g.,* reference concentrations (RfCs)) are based on the assumption that thresholds exist for adverse health effects. For example, the EPA recognizes that, although exposures attributable to emissions from a source category or facility alone may not indicate the potential for increased risk of adverse noncancer health effects in a population, the exposures resulting from emissions from the facility in combination with emissions from all of the other sources (*e.g.,* other facilities) to which an individual is exposed may be sufficient to result in an increased risk of adverse noncancer health effects. In May 2010, the Science Advisory Board (SAB) advised the EPA ''that RTR assessments will be most useful to decision makers and communities if results are presented in the broader context of aggregate and cumulative risks, including background concentrations and contributions from other sources in the area.''[4]

In response to the SAB recommendations, the EPA incorporates cumulative risk analyses into its RTR risk assessments. The Agency (1) Conducts facility-wide assessments, which include source category emission points, as well as other emission points within the facilities; (2) combines exposures from multiple sources in the same category that could affect the same individuals; and (3) for some persistent and bioaccumulative pollutants, analyzes the ingestion route of exposure. In addition, the RTR risk assessments consider aggregate cancer risk from all carcinogens and aggregated noncancer HQs for all noncarcinogens affecting the same target organ or target organ system.

Although we are interested in placing source category and facility-wide HAP risk in the context of total HAP risk from all sources combined in the vicinity of each source, we are concerned about the uncertainties of doing so. Estimates of total HAP risk from emission sources other than those that we have studied in depth during this RTR review would have significantly greater associated uncertainties than the source category or

[3] The MIR is defined as the cancer risk associated with a lifetime of exposure at the highest concentration of HAP where people are likely to live. The HQ is the ratio of the potential HAP exposure concentration to the noncancer dose-response value; the HI is the sum of HQs for HAP that affect the same target organ or organ system.

[4] Recommendations of the SAB Risk and Technology Review Methods Panel are provided in their report, which is available at: *http://yosemite.epa.gov/sab/sabproduct.nsf/4AB3966E263D943A8525771F00668381/$File/EPA-SAB-10-007-unsigned.pdf.*

facility-wide estimates. Such aggregate or cumulative assessments would compound those uncertainties, making the assessments too unreliable.

*B. How do we perform the technology review?*

Our technology review primarily focuses on the identification and evaluation of developments in practices, processes, and control technologies that have occurred since the MACT standards were promulgated. Where we identify such developments, we analyze their technical feasibility, estimated costs, energy implications, and non-air environmental impacts. We also consider the emission reductions associated with applying each development. This analysis informs our decision of whether it is ''necessary'' to revise the emissions standards. In addition, we consider the appropriateness of applying controls to new sources versus retrofitting existing sources. For this exercise, we consider any of the following to be a ''development'':

- Any add-on control technology or other equipment that was not identified and considered during development of the original MACT standards;
- Any improvements in add-on control technology or other equipment (that were identified and considered during development of the original MACT standards) that could result in additional emissions reduction;
- Any work practice or operational procedure that was not identified or considered during development of the original MACT standards;
- Any process change or pollution prevention alternative that could be broadly applied to the industry and that was not identified or considered during development of the original MACT standards; and
- Any significant changes in the cost (including cost effectiveness) of applying controls (including controls the EPA considered during the development of the original MACT standards).

In addition to reviewing the practices, processes, and control technologies that were considered at the time we originally developed the NESHAP (*i.e.,* the 2003 Refractory Products Manufacturing NESHAP), we review a variety of data sources in our investigation of potential practices, processes, or controls. We also review the NESHAP and the available data to determine if there are any unregulated emissions of HAP within the source category and evaluate this data for use in developing new emission standards. See sections II.C and II.D of this preamble for information on the specific data sources that were reviewed as part of the technology review.

*C. How do we estimate post-MACT risk posed by the source category?*

In this section, we provide a complete description of the types of analyses that we generally perform during the risk assessment process. In some cases, we do not perform a specific analysis because it is not relevant. For example, in the absence of emissions of HAP known to be persistent and bioaccumulative in the environment (PB–HAP), we would not perform a multipathway exposure assessment. Where we do not perform an analysis, we state that we do not and provide the reason. While we present all of our risk assessment methods, we only present risk assessment results for the analyses actually conducted (see section IV.B of this preamble).

The EPA conducts a risk assessment that provides estimates of the MIR for cancer posed by the HAP emissions from each source in the source category, the HI for chronic exposures to HAP with the potential to cause noncancer health effects, and the HQ for acute exposures to HAP with the potential to cause noncancer health effects. The assessment also provides estimates of the distribution of cancer risk within the exposed populations, cancer incidence, and an evaluation of the potential for an adverse environmental effect. The seven sections that follow this paragraph describe how we estimated emissions and conducted the risk assessment. The docket for this rulemaking contains the following document which provides more information on the risk assessment inputs and models: *Residual Risk Assessment for the Refractory Products Manufacturing Source Category in Support of the 2020 Risk and Technology Review Proposed Rule.* The methods used to assess risk (as described in the seven primary steps below) are consistent with those described by the EPA in the document reviewed by a panel of the EPA's SAB in 2009;[5] and described in the SAB review report issued in 2010. They are also consistent with the key recommendations contained in that report.

[5] U.S. EPA. *Risk and Technology Review (RTR) Risk Assessment Methodologies: For Review by the EPA's Science Advisory Board with Case Studies—MACT I Petroleum Refining Sources and Portland Cement Manufacturing,* June 2009. EPA–452/R–09–006. *https://www3.epa.gov/airtoxics/rrisk/rtrpg.html.*

1. How did we estimate actual emissions and identify the emissions release characteristics?

The actual emissions and the emission release characteristics for one of the three major source facilities were obtained primarily from the 2017 NEI. The actual emissions and the emission release characteristics for the other two facilities were developed by the EPA based on data provided by the facilities and refractory emission factors. Additional information on the development of the modeling file for each facility, including the development of the actual emissions estimates and emissions release characteristics, can be found in the memorandum titled *Emissions Data Used to Develop the Refractory Products Manufacturing Risk and Technology Review (RTR) Risk Modeling Input Files,* found in Appendix 1 to the *Refractory Products Risk Assessment Report,* available in Docket ID No. EPA–HQ–OAR–2020–0148.

2. How did we estimate MACT-allowable emissions?

The available emissions data in the RTR emissions dataset include estimates of the mass of HAP emitted during a specified annual time period. These ''actual'' emission levels are often lower than the emission levels allowed under the requirements of the current MACT standards. The emissions allowed under the MACT standards are referred to as the ''MACT-allowable'' emissions. We discussed the consideration of both MACT-allowable and actual emissions in the final Coke Oven Batteries RTR (70 FR 1992, 1998 through 1999, April 15, 2005) and in the proposed and final Hazardous Organic NESHAP RTR (71 FR 34421, 34428, June 14, 2006, and 71 FR 76603, 76609, December 21, 2006, respectively). In those actions, we noted that assessing the risk at the MACT-allowable level is inherently reasonable since that risk reflects the maximum level facilities could emit and still comply with national emission standards. We also explained that it is reasonable to consider actual emissions, where such data are available, in both steps of the risk analysis, in accordance with the Benzene NESHAP approach. (54 FR 38044.)

For Refractory Products Manufacturing sources with compliance test data, we determined allowable emissions by calculating a multiplier for each emission source. Based on the data in compliance test reports, we calculated the multipliers by comparing actual emissions and control efficiencies to the applicable Refractory Products

Manufacturing NESHAP emission limit. For some sources compliance was determined by comparing the concentration of THCs to the emission limit of 20 ppmvd, corrected to 18 percent oxygen, and the emissions were measured at the outlet of the control device. For other sources, compliance was determined by comparing the THC control efficiency to the THC control efficiency requirement of 95 percent, and the emissions were measured at the inlet and outlet of the control device accordingly. For sources without compliance test data, we assumed the actual and the allowable emissions were equal. Additional information on the development of the allowable emissions can be found in the memorandum titled *Emissions Data Used to Develop the Refractory Products Manufacturing Risk and Technology Review (RTR) Risk Modeling Input Files,* found in Appendix 1 to the *Refractory Products Risk Assessment Report,* available in Docket ID No. EPA–HQ–OAR–2020–0148.

3. How do we conduct dispersion modeling, determine inhalation exposures, and estimate individual and population inhalation risk?

Both long-term and short-term inhalation exposure concentrations and health risk from the source category addressed in this proposal were estimated using the Human Exposure Model (HEM–3).[6] The HEM–3 performs three primary risk assessment activities: (1) Conducting dispersion modeling to estimate the concentrations of HAP in ambient air, (2) estimating long-term and short-term inhalation exposures to individuals residing within 50 kilometers (km) of the modeled sources, and (3) estimating individual and population-level inhalation risk using the exposure estimates and quantitative dose-response information.

a. Dispersion Modeling

The air dispersion model AERMOD, used by the HEM–3 model, is one of the EPA's preferred models for assessing air pollutant concentrations from industrial facilities.[7] To perform the dispersion modeling and to develop the preliminary risk estimates, HEM–3 draws on three data libraries. The first is a library of meteorological data, which is used for dispersion calculations. This library includes 1 year (2016) of hourly surface and upper air observations from 824 meteorological stations selected to provide coverage of the U.S. and Puerto Rico. A second library of U.S. Census Bureau census block [8] internal point locations and populations provides the basis of human exposure calculations (U.S. Census, 2010). In addition, for each census block, the census library includes the elevation and controlling hill height, which are also used in dispersion calculations. A third library of pollutant-specific dose-response values is used to estimate health risk. These are discussed below.

b. Risk From Chronic Exposure to HAP

In developing the risk assessment for chronic exposures, we use the estimated annual average ambient air concentrations of each HAP emitted by each source in the source category. The HAP air concentrations at each nearby census block centroid located within 50 km of the facility are a surrogate for the chronic inhalation exposure concentration for all the people who reside in that census block. A distance of 50 km is consistent with both the analysis supporting the 1989 Benzene NESHAP (54 FR 38044, September 14, 1989) and the limitations of Gaussian dispersion models, including AERMOD.

For each facility, we calculate the MIR as the cancer risk associated with a continuous lifetime (24 hours per day, 7 days per week, 52 weeks per year, 70 years) exposure to the maximum concentration at the centroid of each inhabited census block. We calculate individual cancer risk by multiplying the estimated lifetime exposure to the ambient concentration of each HAP (in micrograms per cubic meter ($\mu g/m^3$)) by its unit risk estimate (URE). The URE is an upper-bound estimate of an individual's incremental risk of contracting cancer over a lifetime of exposure to a concentration of 1 microgram of the pollutant per cubic meter of air. For residual risk assessments, we generally use UREs from the EPA's Integrated Risk Information System (IRIS). For carcinogenic pollutants without IRIS values, we look to other reputable sources of cancer dose-response values, often using California EPA (CalEPA) UREs, where available. In cases where new, scientifically credible dose-response values have been developed in a manner consistent with the EPA guidelines and have undergone a peer review process similar to that used by the EPA, we may use such dose-response values in place of, or in addition to, other values, if appropriate. The pollutant-specific dose-response values used to estimate health risk are available at *https://www.epa.gov/fera/dose-response-assessment-assessing-health-risks-associated-exposure-hazardous-air-pollutants.*

To estimate individual lifetime cancer risks associated with exposure to HAP emissions from each facility in the source category, we sum the risks for each of the carcinogenic HAP [9] emitted by the modeled facility. We estimate cancer risk at every census block within 50 km of every facility in the source category. The MIR is the highest individual lifetime cancer risk estimated for any of those census blocks. In addition to calculating the MIR, we estimate the distribution of individual cancer risks for the source category by summing the number of individuals within 50 km of the sources whose estimated risk falls within a specified risk range. We also estimate annual cancer incidence by multiplying the estimated lifetime cancer risk at each census block by the number of people residing in that block, summing results for all of the census blocks, and then dividing this result by a 70-year lifetime.

To assess the risk of noncancer health effects from chronic exposure to HAP, we calculate either an HQ or a target organ-specific hazard index (TOSHI). We calculate an HQ when a single noncancer HAP is emitted. Where more than one noncancer HAP is emitted, we sum the HQ for each of the HAP that affects a common target organ or target organ system to obtain a TOSHI. The HQ is the estimated exposure divided by the chronic noncancer dose-response

[8] A census block is the smallest geographic area for which census statistics are tabulated.

[9] The EPA's 2005 *Guidelines for Carcinogen Risk Assessment* classifies carcinogens as: ''Carcinogenic to humans,'' ''likely to be carcinogenic to humans,'' and ''suggestive evidence of carcinogenic potential.'' These classifications also coincide with the terms ''known carcinogen, probable carcinogen, and possible carcinogen,'' respectively, which are the terms advocated in the EPA's *Guidelines for Carcinogen Risk Assessment,* published in 1986 (51 FR 33992, September 24, 1986). In August 2000, the document, *Supplemental Guidance for Conducting Health Risk Assessment of Chemical Mixtures* (EPA/630/R–00/002), was published as a supplement to the 1986 document. Copies of both documents can be obtained from *https://cfpub.epa.gov/ncea/risk/recordisplay.cfm?deid=20533&CFID=70315376&CFTOKEN=71597944.* Summing the risk of these individual compounds to obtain the cumulative cancer risk is an approach that was recommended by the EPA's SAB in their 2002 peer review of the EPA's National Air Toxics Assessment (NATA) titled *NATA—Evaluating the National-scale Air Toxics Assessment 1996 Data—an SAB Advisory,* available at *https://yosemite.epa.gov/sab/sabproduct.nsf/214C6E915BB04E14852570CA007A682C/$File/ecadv02001.pdf.*

value, which is a value selected from one of several sources. The preferred chronic noncancer dose-response value is the EPA RfC, defined as ''an estimate (with uncertainty spanning perhaps an order of magnitude) of a continuous inhalation exposure to the human population (including sensitive subgroups) that is likely to be without an appreciable risk of deleterious effects during a lifetime'' (*https://iaspub.epa.gov/sor_internet/registry/termreg/searchandretrieve/glossariesandkeywordlists/search.do?details=&vocabName=IRIS%20Glossary*). In cases where an RfC from the EPA's IRIS is not available or where the EPA determines that using a value other than the RfC is appropriate, the chronic noncancer dose-response value can be a value from the following prioritized sources, which define their dose-response values similarly to the EPA: (1) The Agency for Toxic Substances and Disease Registry (ATSDR) Minimum Risk Level (*https://www.atsdr.cdc.gov/mrls/index.asp*); (2) the CalEPA Chronic Reference Exposure Level (REL) (*https://oehha.ca.gov/air/crnr/notice-adoption-air-toxics-hot-spots-program-guidance-manual-preparation-health-risk-0*); or (3) as noted above, a scientifically credible dose-response value that has been developed in a manner consistent with the EPA guidelines and has undergone a peer review process similar to that used by the EPA. The pollutant-specific dose-response values used to estimate health risks are available at *https://www.epa.gov/fera/dose-response-assessment-assessing-health-risks-associated-exposure-hazardous-air-pollutants.*

c. Risk From Acute Exposure to HAP That May Cause Health Effects Other Than Cancer

For each HAP for which appropriate acute inhalation dose-response values are available, the EPA also assesses the potential health risks due to acute exposure. For these assessments, the EPA makes conservative assumptions about emission rates, meteorology, and exposure location. As part of our efforts to continually improve our methodologies to evaluate the risks that HAP emitted from categories of industrial sources pose to human health and the environment,[10] we revised our treatment of meteorological data to use reasonable worst-case air dispersion conditions in our acute risk screening assessments instead of worst-case air dispersion conditions. This revised treatment of meteorological data and the supporting rationale are described in more detail in *Residual Risk Assessment for Refractory Products Manufacturing Source Category in Support of the 2020 Risk and Technology Review Proposed Rule,* and in Appendix 5 of the report: *Technical Support Document for Acute Risk Screening Assessment.* This revised approach has been used in this proposal and in all other RTR rulemakings proposed on or after June 3, 2019.

To assess the potential acute risk to the maximally exposed individual, we use the peak hourly emission rate for each emission point,[11] reasonable worst-case air dispersion conditions (*i.e.,* 99th percentile), and the point of highest off-site exposure. Specifically, we assume that peak emissions from the source category and reasonable worst-case air dispersion conditions co-occur and that a person is present at the point of maximum exposure.

To characterize the potential health risks associated with estimated acute inhalation exposures to a HAP, we generally use multiple acute dose-response values, including acute RELs, acute exposure guideline levels (AEGLs), and emergency response planning guidelines (ERPG) for 1-hour exposure durations, if available, to calculate acute HQs. The acute HQ is calculated by dividing the estimated acute exposure concentration by the acute dose-response value. For each HAP for which acute dose-response values are available, the EPA calculates acute HQs.

An acute REL is defined as ''the concentration level at or below which no adverse health effects are anticipated for a specified exposure duration.'' [12] Acute RELs are based on the most sensitive, relevant, adverse health effect reported in the peer-reviewed medical and toxicological literature. They are designed to protect the most sensitive individuals in the population through the inclusion of margins of safety. Because margins of safety are incorporated to address data gaps and uncertainties, exceeding the REL does not automatically indicate an adverse health impact. AEGLs represent threshold exposure limits for the general public and are applicable to emergency exposures ranging from 10 minutes to 8 hours.[13] They are guideline levels for ''once-in-a-lifetime, short-term exposures to airborne concentrations of acutely toxic, high-priority chemicals.'' *Id.* at 21. The AEGL–1 is specifically defined as ''the airborne concentration (expressed as ppm (parts per million) or $mg/m^3$ (milligrams per cubic meter)) of a substance above which it is predicted that the general population, including susceptible individuals, could experience notable discomfort, irritation, or certain asymptomatic nonsensory effects. However, the effects are not disabling and are transient and reversible upon cessation of exposure.'' The document also notes that ''Airborne concentrations below AEGL–1 represent exposure levels that can produce mild and progressively increasing but transient and nondisabling odor, taste, and sensory irritation or certain asymptomatic, nonsensory effects.'' *Id.* AEGL–2 are defined as ''the airborne concentration (expressed as parts per million or milligrams per cubic meter) of a substance above which it is predicted that the general population, including susceptible individuals, could experience irreversible or other serious, long-lasting adverse health effects or an impaired ability to escape.'' *Id.*

ERPGs are ''developed for emergency planning and are intended as health-based guideline concentrations for single exposures to chemicals.'' [14] *Id.* at 1. The ERPG–1 is defined as ''the maximum airborne concentration below which it is believed that nearly all individuals could be exposed for up to

[10] See, *e.g.,* U.S. EPA. *Screening Methodologies to Support Risk and Technology Reviews (RTR): A Case Study Analysis* (Draft Report, May 2017. *https://www.epa.gov/stationary-sources-air-pollution/risk-and-technology-review-national-emissions-standards-hazardous*).

[11] In the absence of hourly emission data, we develop estimates of maximum hourly emission rates by multiplying the average actual annual emissions rates by a factor (either a category-specific factor or a default factor of 10) to account for variability. This is documented in *Residual Risk Assessment for Refractory Products Manufacturing Source Category in Support of the 2020 Risk and Technology Review Proposed Rule,* and in Appendix 5 of the report: *Technical Support Document for Acute Risk Screening Assessment.* Both are available in the docket for this rulemaking.

[12] CalEPA issues acute RELs as part of its Air Toxics Hot Spots Program, and the 1-hour and 8-hour values are documented in *Air Toxics Hot Spots Program Risk Assessment Guidelines, Part I, The Determination of Acute Reference Exposure Levels for Airborne Toxicants,* which is available at *https://oehha.ca.gov/air/general-info/oehha-acute-8-hour-and-chronic-reference-exposure-level-rel-summary.*

Available at *https://www.epa.gov/sites/production/files/2015-09/documents/sop_final_standing_operating_procedures_2001.pdf.* Note that the National Advisory Committee for Acute Exposure Guideline Levels for Hazardous Substances ended in October 2011, but the AEGL program continues to operate at the EPA and works with the National Academies to publish final AEGLs (*https://www.epa.gov/aegl*).

[14] *ERPGS Procedures and Responsibilities.* March 2014. American Industrial Hygiene Association. Available at: *https://www.aiha.org/get-involved/AIHAGuidelineFoundation/EmergencyResponsePlanningGuidelines/Documents/ERPG%20Committee%20Standard%20Operating%20Procedures%20%20-%20March%202014%20Revision%20%28Updated%2010-2-2014%29.pdf.*

1 hour without experiencing other than mild transient adverse health effects or without perceiving a clearly defined, objectionable odor.'' *Id.* at 2. Similarly, the ERPG–2 is defined as ''the maximum airborne concentration below which it is believed that nearly all individuals could be exposed for up to one hour without experiencing or developing irreversible or other serious health effects or symptoms which could impair an individual's ability to take protective action.'' *Id.* at 1.

An acute REL for 1-hour exposure durations is typically lower than its corresponding AEGL–1 and ERPG–1. Even though their definitions are slightly different, AEGL–1s are often the same as the corresponding ERPG–1s, and AEGL–2s are often equal to ERPG–2s. The maximum HQs from our acute inhalation screening risk assessment typically result when we use the acute REL for a HAP. In cases where the maximum acute HQ exceeds 1, we also report the HQ based on the next highest acute dose-response value (usually the AEGL–1 and/or the ERPG–1).

For this source category, we estimated acute emissions by determining acute multipliers, which we then multiplied by the actual emissions. The acute multipliers for all sources were based on data from compliance tests for the specific sources, when available. For the batch processes, which were tested for 8 to 18 hours, we determined the acute multiplier by calculating mass emissions for each hour of the test and then taking the ratio of the maximum hourly emission rate to the average hourly emission rate. For sources that were tested for three 1-hour test runs, we determined the acute multiplier as the ratio of the mass emissions for the highest test run to the three-run average. The acute emissions were converted from ton per hour to ton per year for the risk modeling input file using 8,760 hours per year. If compliance test results were not available, we applied source specific acute multipliers developed for other similar sources to estimate the acute emissions. Additional information on the development of the acute emissions can be found in the memorandum titled *Emissions Data Used to Develop the Refractory Products Manufacturing Risk and Technology Review (RTR) Risk Modeling Input Files,* found in Appendix 1 to the *Refractory Products Risk Assessment Report,* available in Docket ID No. EPA–HQ–OAR–2020–0148.

In our acute inhalation screening risk assessment, acute impacts are deemed negligible for HAP for which acute HQs are less than or equal to 1, and no further analysis is performed for these HAP. In cases where an acute HQ from the screening step is greater than 1, we assess the site-specific data to ensure that the acute HQ is at an off-site location.

4. How do we conduct the multipathway exposure and risk screening assessment?

The EPA conducts a tiered screening assessment examining the potential for significant human health risks due to exposures via routes other than inhalation (*i.e.,* ingestion). We first determine whether any sources in the source category emit any HAP known to be persistent and bioaccumulative in the environment, as identified in the EPA's Air Toxics Risk Assessment Library (see Volume 1, Appendix D, at *https://www.epa.gov/fera/risk-assessment-and-modeling-air-toxics-risk-assessment-reference-library*).

For the Refractory Products Manufacturing source category, we identified PB–HAP emissions of arsenic, cadmium, POM, mercury (divalent mercury and methyl mercury) and lead, so we proceeded to the next step of the evaluation. Except for lead, the human health risk screening assessment for PB–HAP consists of three progressive tiers. In a Tier 1 screening assessment, we determine whether the magnitude of the facility-specific emissions of PB–HAP warrants further evaluation to characterize human health risk through ingestion exposure. To facilitate this step, we evaluate emissions against previously developed screening threshold emission rates for several PB–HAP that are based on a hypothetical upper-end screening exposure scenario developed for use in conjunction with the EPA's Total Risk Integrated Methodology Fate, Transport, and Ecological Exposure (TRIM.FaTE) model. The PB–HAP with screening threshold emission rates are arsenic compounds, cadmium compounds, chlorinated dibenzodioxins and furans, mercury compounds, and POM. Based on the EPA estimates of toxicity and bioaccumulation potential, these pollutants represent a conservative list for inclusion in multipathway risk assessments for RTR rules. (See Volume 1, Appendix D at *https://www.epa.gov/sites/production/files/2013-08/documents/volume_1_reflibrary.pdf.*) In this assessment, we compare the facility-specific emission rates of these PB–HAP to the screening threshold emission rates for each PB–HAP to assess the potential for significant human health risks via the ingestion pathway. We call this application of the TRIM.FaTE model the Tier 1 screening assessment. The ratio of a facility's actual emission rate to the Tier 1 screening threshold emission rate is a ''screening value (SV).''

We derive the Tier 1 screening threshold emission rates for these PB–HAP (other than lead compounds) to correspond to a maximum excess lifetime cancer risk of 1-in-1 million (*i.e.,* for arsenic compounds, polychlorinated dibenzodioxins and furans, and POM) or, for HAP that cause noncancer health effects (*i.e.,* cadmium compounds and mercury compounds), a maximum HQ of 1. If the emission rate of any one PB–HAP or combination of carcinogenic PB–HAP in the Tier 1 screening assessment exceeds the Tier 1 screening threshold emission rate for any facility (*i.e.,* the SV is greater than 1), we conduct a second screening assessment, which we call the Tier 2 screening assessment. The Tier 2 screening assessment separates the Tier 1 combined fisher and farmer exposure scenario into fisher, farmer, and gardener scenarios that retain upper-bound ingestion rates.

In the Tier 2 screening assessment, the location of each facility that exceeds a Tier 1 screening threshold emission rate is used to refine the assumptions associated with the Tier 1 fisher and farmer exposure scenarios at that facility. A key assumption in the Tier 1 screening assessment is that a lake and/or farm is located near the facility. As part of the Tier 2 screening assessment, we use a USGS database to identify actual waterbodies within 50 km of each facility and assume the fisher only consumes fish from lakes within that 50 km zone. We also examine the differences between local meteorology near the facility and the meteorology used in the Tier 1 screening assessment. We then adjust the previously-developed Tier 1 screening threshold emission rates for each PB–HAP for each facility based on an understanding of how exposure concentrations estimated for the screening scenario change with the use of local meteorology and USGS lakes database.

In the Tier 2 farmer scenario, we maintain an assumption that the farm is located within 0.5 km of the facility and that the farmer consumes meat, eggs, dairy, vegetables, and fruit produced near the facility. We may further refine the Tier 2 screening analysis by assessing a gardener scenario to characterize a range of exposures, with the gardener scenario being more plausible in RTR evaluations. Under the gardener scenario, we assume the gardener consumes home-produced eggs, vegetables, and fruit products at the same ingestion rate as the farmer. The Tier 2 screen continues to rely on the high-end food intake assumptions that were applied in Tier 1 for local fish (adult female angler at 99th percentile fish consumption [15]) and locally grown or raised foods (90th percentile consumption of locally grown or raised foods for the farmer and gardener scenarios [16]). If PB–HAP emission rates do not result in a Tier 2 SV greater than 1, we consider those PB–HAP emissions to pose risks below a level of concern. If the PB–HAP emission rates for a facility exceed the Tier 2 screening threshold emission rates, we may conduct a Tier 3 screening assessment.

There are several analyses that can be included in a Tier 3 screening assessment, depending upon the extent of refinement warranted, including validating that the lakes are fishable, locating residential/garden locations for urban and/or rural settings, considering plume-rise to estimate emissions lost above the mixing layer, and considering hourly effects of meteorology and plume-rise on chemical fate and transport (a time-series analysis). If necessary, the EPA may further refine the screening assessment through a site-specific assessment.

In evaluating the potential multipathway risk from emissions of lead compounds, rather than developing a screening threshold emission rate, we compare maximum estimated chronic inhalation exposure concentrations to the level of the current National Ambient Air Quality Standard (NAAQS) for lead.[17] Values below the level of the primary (health-based) lead NAAQS are considered to have a low potential for multipathway risk.

For further information on the multipathway assessment approach, see the *Refractory Products Risk Assessment Report,* which is available in the docket for this action.

[15] Burger, J. 2002. *Daily consumption of wild fish and game: Exposures of high end recreationists. International Journal of Environmental Health Research,* 12:343–354.

[16] U.S. EPA. *Exposure Factors Handbook 2011 Edition (Final).* U.S. Environmental Protection Agency, Washington, DC, EPA/600/R–09/052F, 2011.

[17] In doing so, the EPA notes that the legal standard for a primary NAAQS—that a standard is requisite to protect public health and provide an adequate margin of safety (CAA section 109(b))—differs from the CAA section 112(f) standard (requiring, among other things, that the standard provide an ''ample margin of safety to protect public health''). However, the primary lead NAAQS is a reasonable measure of determining risk acceptability (*i.e.,* the first step of the Benzene NESHAP analysis) since it is designed to protect the most susceptible group in the human population—children, including children living near major lead emitting sources. 73 FR 67002/3; 73 FR 67000/3; 73 FR 67005/1. In addition, applying the level of the primary lead NAAQS at the risk acceptability step is conservative, since that primary lead NAAQS reflects an adequate margin of safety.

5. How do we conduct the environmental risk screening assessment?

a. Adverse Environmental Effect, Environmental HAP, and Ecological Benchmarks

The EPA conducts a screening assessment to examine the potential for an adverse environmental effect as required under section 112(f)(2)(A) of the CAA. Section 112(a)(7) of the CAA defines ''adverse environmental effect'' as ''any significant and widespread adverse effect, which may reasonably be anticipated, to wildlife, aquatic life, or other natural resources, including adverse impacts on populations of endangered or threatened species or significant degradation of environmental quality over broad areas.''

The EPA focuses on eight HAP, which are referred to as ''environmental HAP,'' in its screening assessment: Six PB–HAP and two acid gases. The PB–HAP included in the screening assessment are arsenic compounds, cadmium compounds, dioxins/furans, POM, mercury (both inorganic mercury and methyl mercury), and lead compounds. The acid gases included in the screening assessment are HCl and HF.

HAP that persist and bioaccumulate are of particular environmental concern because they accumulate in the soil, sediment, and water. The acid gases, HCl and HF, are included due to their well-documented potential to cause direct damage to terrestrial plants. In the environmental risk screening assessment, we evaluate the following four exposure media: Terrestrial soils, surface water bodies (includes water-column and benthic sediments), fish consumed by wildlife, and air. Within these four exposure media, we evaluate nine ecological assessment endpoints, which are defined by the ecological entity and its attributes. For PB–HAP (other than lead), both community-level and population-level endpoints are included. For acid gases, the ecological assessment evaluated is terrestrial plant communities.

An ecological benchmark represents a concentration of HAP that has been linked to a particular environmental effect level. For each environmental HAP, we identified the available ecological benchmarks for each assessment endpoint. We identified, where possible, ecological benchmarks at the following effect levels: Probable effect levels, lowest-observed-adverse-effect level, and no-observed-adverse-effect level (NOAEL). In cases where multiple effect levels were available for a particular PB–HAP and assessment endpoint, we use all of the available effect levels to help us to determine whether ecological risks exist and, if so, whether the risks could be considered significant and widespread.

For further information on how the environmental risk screening assessment was conducted, including a discussion of the risk metrics used, how the environmental HAP were identified, and how the ecological benchmarks were selected, see Appendix 9 of the *Refractory Products Risk Assessment Report,* which is available in the docket for this action.

b. Environmental Risk Screening Methodology

For the environmental risk screening assessment, the EPA first determined whether any facilities in the Refractory Products Manufacturing source category emitted any of the environmental HAP. For the Refractory Products Manufacturing source category, we identified emissions of arsenic, cadmium, HCl, HF, lead, mercury (divalent mercury and methyl mercury), and POM. Because one or more of the environmental HAP evaluated are emitted by at least one facility in the source category, we proceeded to the second step of the evaluation.

c. PB–HAP Methodology

The environmental screening assessment includes six PB–HAP, arsenic compounds, cadmium compounds, dioxins/furans, POM, mercury (both inorganic mercury and methyl mercury), and lead compounds. With the exception of lead, the environmental risk screening assessment for PB–HAP consists of three tiers. The first tier of the environmental risk screening assessment uses the same health-protective conceptual model that is used for the Tier 1 human health screening assessment. TRIM.FaTE model simulations were used to back-calculate Tier 1 screening threshold emission rates. The screening threshold emission rates represent the emission rate in tons of pollutant per year that results in media concentrations at the facility that equal the relevant ecological benchmark. To assess emissions from each facility in the category, the reported emission rate for each PB–HAP was compared to the Tier 1 screening threshold emission rate for that PB–HAP for each assessment endpoint and effect level. If emissions from a facility do not exceed the Tier 1 screening threshold emission rate, the facility ''passes'' the screening assessment, and, therefore, is not evaluated further under the screening approach. If emissions from a facility exceed the Tier 1 screening threshold emission rate, we evaluate the facility further in Tier 2.

In Tier 2 of the environmental screening assessment, the screening threshold emission rates are adjusted to account for local meteorology and the actual location of lakes in the vicinity of facilities that did not pass the Tier 1 screening assessment. For soils, we evaluate the average soil concentration for all soil parcels within a 7.5-km radius for each facility and PB–HAP. For the water, sediment, and fish tissue concentrations, the highest value for each facility for each pollutant is used. If emission concentrations from a facility do not exceed the Tier 2 screening threshold emission rate, the facility ''passes'' the screening assessment and typically is not evaluated further. If emissions from a facility exceed the Tier 2 screening threshold emission rate, we evaluate the facility further in Tier 3.

As in the multipathway human health risk assessment, in Tier 3 of the environmental screening assessment, we examine the suitability of the lakes around the facilities to support life and remove those that are not suitable (*e.g.,* lakes that have been filled in or are industrial ponds), adjust emissions for plume-rise, and conduct hour-by-hour time-series assessments. If these Tier 3 adjustments to the screening threshold emission rates still indicate the potential for an adverse environmental effect (*i.e.,* facility emission rate exceeds the screening threshold emission rate), we may elect to conduct a more refined assessment using more site-specific information. If, after additional refinement, the facility emission rate still exceeds the screening threshold emission rate, the facility may have the potential to cause an adverse environmental effect.

To evaluate the potential for an adverse environmental effect from lead, we compared the average modeled air concentrations (from HEM–3) of lead around each facility in the source category to the level of the secondary NAAQS for lead. The secondary lead NAAQS is a reasonable means of evaluating environmental risk because it is set to provide substantial protection against adverse welfare effects which can include ''effects on soils, water, crops, vegetation, man-made materials, animals, wildlife, weather, visibility and climate, damage to and deterioration of property, and hazards to transportation, as well as effects on economic values and on personal comfort and well-being.''

d. Acid Gas Environmental Risk Methodology

The environmental screening assessment for acid gases evaluates the potential phytotoxicity and reduced productivity of plants due to chronic exposure to HF and HCl. The environmental risk screening methodology for acid gases is a single-tier screening assessment that compares modeled ambient air concentrations (from AERMOD) to the ecological benchmarks for each acid gas. To identify a potential adverse environmental effect (as defined in section 112(a)(7) of the CAA) from emissions of HF and HCl, we evaluate the following metrics: The size of the modeled area around each facility that exceeds the ecological benchmark for each acid gas, in acres and square kilometers; the percentage of the modeled area around each facility that exceeds the ecological benchmark for each acid gas; and the area-weighted average SV around each facility (calculated by dividing the area-weighted average concentration over the 50-km modeling domain by the ecological benchmark for each acid gas). For further information on the environmental screening assessment approach, see Appendix 9 of the *Refractory Products Risk Assessment Report,* which is available in the docket for this action.

6. How do we conduct facility-wide assessments?

To put the source category risks in context, we typically examine the risks from the entire ''facility,'' where the facility includes all HAP-emitting operations within a contiguous area and under common control. In other words, we examine the HAP emissions not only from the source category emission points of interest, but also emissions of HAP from all other emission sources at the facility for which we have data. For this source category, we conducted the facility-wide assessment using a dataset compiled from the 2017 NEI. The source category records of that NEI dataset were removed, evaluated, and updated as described in section II.C of this preamble: What data collection activities were conducted to support this action? Once a quality assured source category dataset was available, it was placed back with the remaining records from the NEI for that facility. The facility-wide file was then used to analyze risks due to the inhalation of HAP that are emitted ''facility-wide'' for the populations residing within 50 km of each facility, consistent with the methods used for the source category analysis described above. For these facility-wide risk analyses, the modeled source category risks were compared to the facility-wide risks to determine the portion of the facility-wide risks that could be attributed to the source category addressed in this proposal. We also specifically examined the facility that was associated with the highest estimate of risk and determined the percentage of that risk attributable to the source category of interest. The *Refractory Products Risk Assessment Report,* available through the docket for this action, provides the methodology and results of the facility-wide analyses, including all facility-wide risks and the percentage of source category contribution to facility-wide risks.

7. How do we consider uncertainties in risk assessment?

Uncertainty and the potential for bias are inherent in all risk assessments, including those performed for this proposal. Although uncertainty exists, we believe that our approach, which used conservative tools and assumptions, ensures that our decisions are health and environmentally protective. A brief discussion of the uncertainties in the RTR emissions dataset, dispersion modeling, inhalation exposure estimates, and dose-response relationships follows below. Also included are those uncertainties specific to our acute screening assessments, multipathway screening assessments, and our environmental risk screening assessments. A more thorough discussion of these uncertainties is included in the *Refractory Products Risk Assessment Report,* which is available in the docket for this action. If a multipathway site-specific assessment was performed for this source category, a full discussion of the uncertainties associated with that assessment can be found in Appendix 11 of that document, *Site-Specific Human Health Multipathway Residual Risk Assessment Report.*

a. Uncertainties in the RTR Emissions Dataset

Although the development of the RTR emissions dataset involved quality assurance/quality control processes, the accuracy of emissions values will vary depending on the source of the data, the degree to which data are incomplete or missing, the degree to which assumptions made to complete the datasets are accurate, errors in emission estimates, and other factors. The emission estimates considered in this analysis reflect short-term fluctuations based on actual emissions testing data. The estimates of peak hourly emission rates for the acute effects screening assessment were also based on actual emissions testing data.

b. Uncertainties in Dispersion Modeling

We recognize there is uncertainty in ambient concentration estimates associated with any model, including the EPA's recommended regulatory dispersion model, AERMOD. In using a model to estimate ambient pollutant concentrations, the user chooses certain options to apply. For RTR assessments, we select some model options that have the potential to overestimate ambient air concentrations (*e.g.,* not including plume depletion or pollutant transformation). We select other model options that have the potential to underestimate ambient impacts (*e.g.,* not including building downwash). Other options that we select have the potential to either under- or overestimate ambient levels (*e.g.,* meteorology and receptor locations). On balance, considering the directional nature of the uncertainties commonly present in ambient concentrations estimated by dispersion models, the approach we apply in the RTR assessments should yield unbiased estimates of ambient HAP concentrations. We also note that the selection of meteorology dataset location could have an impact on the risk estimates. As we continue to update and expand our library of meteorological station data used in our risk assessments, we expect to reduce this variability.

c. Uncertainties in Inhalation Exposure Assessment

Although every effort is made to identify all of the relevant facilities and emission points, as well as to develop accurate estimates of the annual emission rates for all relevant HAP, the uncertainties in our emission inventory likely dominate the uncertainties in the exposure assessment. Some uncertainties in our exposure assessment include human mobility, using the centroid of each census block, assuming lifetime exposure, and assuming only outdoor exposures. For most of these factors, there is neither an under nor overestimate when looking at the maximum individual risk or the incidence, but the shape of the distribution of risks may be affected. With respect to outdoor exposures, actual exposures may not be as high if people spend time indoors, especially for very reactive pollutants or larger particles. For all factors, we reduce uncertainty when possible. For example, with respect to census-block centroids, we analyze large blocks using aerial imagery and adjust locations of the block centroids to better represent the population in the blocks. We also add additional receptor locations where the population of a block is not well represented by a single location.

d. Uncertainties in Dose-Response Relationships

There are uncertainties inherent in the development of the dose-response values used in our risk assessments for cancer effects from chronic exposures and noncancer effects from both chronic and acute exposures. Some uncertainties are generally expressed quantitatively, and others are generally expressed in qualitative terms. We note, as a preface to this discussion, a point on dose-response uncertainty that is stated in the EPA's *2005 Guidelines for Carcinogen Risk Assessment;* namely, that ''the primary goal of EPA actions is protection of human health; accordingly, as an Agency policy, risk assessment procedures, including default options that are used in the absence of scientific data to the contrary, should be health protective'' (the EPA's *2005 Guidelines for Carcinogen Risk Assessment,* pages 1 through 7). This is the approach followed here as summarized in the next paragraphs.

Cancer UREs used in our risk assessments are those that have been developed to generally provide an upper bound estimate of risk.[18] That is, they represent a ''plausible upper limit to the true value of a quantity'' (although this is usually not a true statistical confidence limit). In some circumstances, the true risk could be as low as zero; however, in other circumstances the risk could be greater.[19] Chronic noncancer RfC and reference dose (RfD) values represent chronic exposure levels that are intended to be health-protective levels. To derive dose-response values that are intended to be ''without appreciable risk,'' the methodology relies upon an uncertainty factor (UF) approach,[20] which considers uncertainty, variability, and gaps in the available data. The UFs are applied to derive dose-response values that are intended to protect against appreciable risk of deleterious effects.

Many of the UFs used to account for variability and uncertainty in the development of acute dose-response values are quite similar to those developed for chronic durations. Additional adjustments are often applied to account for uncertainty in extrapolation from observations at one exposure duration (*e.g.,* 4 hours) to derive an acute dose-response value at another exposure duration (*e.g.,* 1 hour). Not all acute dose-response values are developed for the same purpose, and care must be taken when interpreting the results of an acute assessment of human health effects relative to the dose-response value or values being exceeded. Where relevant to the estimated exposures, the lack of acute dose-response values at different levels of severity should be factored into the risk characterization as potential uncertainties.

Uncertainty also exists in the selection of ecological benchmarks for the environmental risk screening assessment. We established a hierarchy of preferred benchmark sources to allow selection of benchmarks for each environmental HAP at each ecological assessment endpoint. We searched for benchmarks for three effect levels (*i.e.,* no-effects level, threshold-effect level, and probable effect level), but not all combinations of ecological assessment/environmental HAP had benchmarks for all three effect levels. Where multiple effect levels were available for a particular HAP and assessment endpoint, we used all of the available effect levels to help us determine whether risk exists and whether the risk could be considered significant and widespread.

Although we make every effort to identify appropriate human health effect dose-response values for all pollutants emitted by the sources in this risk assessment, some HAP emitted by this source category are lacking dose-response assessments. Accordingly, these pollutants cannot be included in the quantitative risk assessment, which could result in quantitative estimates understating HAP risk. To help to alleviate this potential underestimate, where we conclude similarity with a HAP for which a dose-response value is available, we use that value as a surrogate for the assessment of the HAP for which no value is available. To the extent use of surrogates indicates appreciable risk, we may identify a need to increase priority for an IRIS assessment for that substance. We additionally note that, generally

[18] IRIS glossary (*https://ofmpub.epa.gov/sor_internet/registry/termreg/searchandretrieve/glossariesandkeywordlists/search.do?details=&glossaryName=IRIS%20Glossary*).

[19] An exception to this is the URE for benzene, which is considered to cover a range of values, each end of which is considered to be equally plausible, and which is based on maximum likelihood estimates.

[20] See *A Review of the Reference Dose and Reference Concentration Processes,* U.S. EPA, *December 2002, and Methods for Derivation of Inhalation Reference Concentrations and Application of Inhalation Dosimetry,* U.S. EPA, 1994.

speaking, HAP of greatest concern due to environmental exposures and hazard are those for which dose-response assessments have been performed, reducing the likelihood of understating risk. Further, HAP not included in the quantitative assessment are assessed qualitatively and considered in the risk characterization that informs the risk management decisions, including consideration of HAP reductions achieved by various control options.

For a group of compounds that are unspeciated (*e.g.,* glycol ethers), we conservatively use the most protective dose-response value of an individual compound in that group to estimate risk. Similarly, for an individual compound in a group (*e.g.,* ethylene glycol diethyl ether) that does not have a specified dose-response value, we also apply the most protective dose-response value from the other compounds in the group to estimate risk.

e. Uncertainties in Acute Inhalation Screening Assessments

In addition to the uncertainties highlighted above, there are several factors specific to the acute exposure assessment that the EPA conducts as part of the risk review under section 112 of the CAA. The accuracy of an acute inhalation exposure assessment depends on the simultaneous occurrence of independent factors that may vary greatly, such as hourly emissions rates, meteorology, and the presence of a person. In the acute screening assessment that we conduct under the RTR program, we assume that peak emissions from the source category and reasonable worst-case air dispersion conditions (*i.e.,* 99th percentile) co-occur. We then include the additional assumption that a person is located at this point at the same time. Together, these assumptions represent a reasonable worst-case actual exposure scenario. In most cases, it is unlikely that a person would be located at the point of maximum exposure during the time when peak emissions and reasonable worst-case air dispersion conditions occur simultaneously.

f. Uncertainties in the Multipathway and Environmental Risk Screening Assessments

For each source category, we generally rely on site-specific levels of PB–HAP or environmental HAP emissions to determine whether a refined assessment of the impacts from multipathway exposures is necessary or whether it is necessary to perform an environmental screening assessment. This determination is based on the results of a three-tiered screening assessment that relies on the outputs from models—TRIM.FaTE and AERMOD—that estimate environmental pollutant concentrations and human exposures for five PB–HAP (dioxins, POM, mercury, cadmium, and arsenic) and two acid gases (HF and HCl). For lead, we use AERMOD to determine ambient air concentrations, which are then compared to the secondary NAAQS standard for lead. Two important types of uncertainty associated with the use of these models in RTR risk assessments and inherent to any assessment that relies on environmental modeling are model uncertainty and input uncertainty.[21]

Model uncertainty concerns whether the model adequately represents the actual processes (*e.g.,* movement and accumulation) that might occur in the environment. For example, does the model adequately describe the movement of a pollutant through the soil? This type of uncertainty is difficult to quantify. However, based on feedback received from previous EPA SAB reviews and other reviews, we are confident that the models used in the screening assessments are appropriate and state-of-the-art for the multipathway and environmental screening risk assessments conducted in support of RTRs.

Input uncertainty is concerned with how accurately the models have been configured and parameterized for the assessment at hand. For Tier 1 of the multipathway and environmental screening assessments, we configured the models to avoid underestimating exposure and risk. This was accomplished by selecting upper-end values from nationally representative datasets for the more influential parameters in the environmental model, including selection and spatial configuration of the area of interest, lake location and size, meteorology, surface water, soil characteristics, and structure of the aquatic food web. We also assume an ingestion exposure scenario and values for human exposure factors that represent reasonable maximum exposures.

In Tier 2 of the multipathway and environmental screening assessments, we refine the model inputs to account for meteorological patterns in the vicinity of the facility versus using upper-end national values, and we identify the actual location of lakes near the facility rather than the default lake location that we apply in Tier 1. By refining the screening approach in Tier 2 to account for local geographical and meteorological data, we decrease the likelihood that concentrations in environmental media are overestimated, thereby increasing the usefulness of the screening assessment. In Tier 3 of the screening assessments, we refine the model inputs again to account for hour-by-hour plume-rise and the height of the mixing layer. We can also use those hour-by-hour meteorological data in a TRIM.FaTE run using the screening configuration corresponding to the lake location. These refinements produce a more accurate estimate of chemical concentrations in the media of interest, thereby reducing the uncertainty with those estimates. The assumptions and the associated uncertainties regarding the selected ingestion exposure scenario are the same for all three tiers.

For the environmental screening assessment for acid gases, we employ a single-tiered approach. We use the modeled air concentrations and compare those with ecological benchmarks.

For all tiers of the multipathway and environmental screening assessments, our approach to addressing model input uncertainty is generally cautious. We choose model inputs from the upper end of the range of possible values for the influential parameters used in the models, and we assume that the exposed individual exhibits ingestion behavior that would lead to a high total exposure. This approach reduces the likelihood of not identifying high risks for adverse impacts.

Despite the uncertainties, when individual pollutants or facilities do not exceed screening threshold emission rates (*i.e.,* screen out), we are confident that the potential for adverse multipathway impacts on human health is very low. On the other hand, when individual pollutants or facilities do exceed screening threshold emission rates, it does not mean that impacts are significant, only that we cannot rule out that possibility and that a refined assessment for the site might be necessary to obtain a more accurate risk characterization for the source category.

The EPA evaluates the following HAP in the multipathway and/or environmental risk screening assessments, where applicable: Arsenic, cadmium, dioxins/furans, lead, mercury (both inorganic and methyl mercury), POM, HCl, and HF. These HAP represent pollutants that can cause adverse impacts either through direct exposure to HAP in the air or through exposure to HAP that are deposited

[21] In the context of this discussion, the term ''uncertainty'' as it pertains to exposure and risk encompasses both *variability* in the range of expected inputs and screening results due to existing spatial, temporal, and other factors, as well as *uncertainty* in being able to accurately estimate the true result.

from the air onto soils and surface waters and then through the environment into the food web. These HAP represent those HAP for which we can conduct a meaningful multipathway or environmental screening risk assessment. For other HAP not included in our screening assessments, the model has not been parameterized such that it can be used for that purpose. In some cases, depending on the HAP, we may not have appropriate multipathway models that allow us to predict the concentration of that pollutant. The EPA acknowledges that other HAP beyond these that we are evaluating may have the potential to cause adverse effects and, therefore, the EPA may evaluate other relevant HAP in the future, as modeling science and resources allow.

## IV. Analytical Results and Proposed Decisions

### *A. What actions are we taking pursuant to CAA sections 112(d)(2) and (d)(3)?*

In this action, we are proposing standards for previously unregulated HAP for existing sources in the clay and nonclay refractory subcategories pursuant to CAA sections 112(d)(2) and (3).[22] For existing clay refractory sources, we are proposing a MACT floor limit for (non-mercury) metal HAP and a MACT floor limit for mercury (in addition to the existing NESHAP work practice standard to use natural gas as fuel for existing clay refractory sources). For existing nonclay refractory sources, we are proposing a work practice standard to use natural gas as fuel to limit metal HAP emissions as provided in CAA section 112(h) in lieu of a numerical emissions standard (in addition to the existing NESHAP THC limit for existing nonclay refractory sources).

The results and proposed decisions based on the analyses performed pursuant to CAA sections 112(d)(2) and (3) are presented below.

#### 1. Clay Refractory Products

#### a. Background

For existing clay refractory sources, the 2002 Refractory Products Manufacturing NESHAP proposal preamble identifies the primary HAP emissions as HF and HCl from the manufacture of clay products. The NESHAP requires control of HF/HCl with a work practice to use natural gas as a clean fuel replacement for coal, fuel oil, and waste-derived fuels that were used in kilns and ovens at that time. More recent available data in emission test reports for these sources reviewed for this action confirm trace (but measurable) amounts of (non-mercury) metal HAP and mercury emissions. Based on this data, we are proposing MACT floor limits for these HAP for new and existing clay refractory sources. We propose to set a limit for mercury and a limit for PM as a surrogate for (non-mercury) metal HAP. We are setting a limit for PM as a surrogate for (non-mercury) metal HAP because the metal HAP are contained in the PM and the control techniques that would be used to control PM will equally control (non-mercury) metal HAP. We have used PM as a surrogate for (non-mercury) metal HAP for other rules with similar processes (*e.g.,* Portland Cement Manufacturing, Lime Manufacturing, Clay Ceramics Manufacturing).

#### b. Proposed MACT Standards

Pursuant to CAA section 112(d)(3), we are proposing MACT floor limits of 9.5 pounds per hour for PM and 18 micrograms per dry standard cubic meter (µg/dscm), corrected to 18 percent oxygen, for mercury from each existing kiln that is used to produce clay refractory products. Because there are fewer than 30 kilns used to produce clay refractory products in the source category, CAA section 112(d)(3)(B) directs the EPA to base the MACT floor on the best performing five sources for which the EPA has data. For the clay refractory kiln subcategory, we had data for only two clay refractory kilns, so we considered all sources for which we had data as the best performing sources in the subcategory. To calculate the limits, we used the test data from the two clay refractory kilns to calculate the average emissions for each kiln. We then determined upper prediction limits (UPLs) that incorporate the potential variability in future measurements to develop the PM and mercury standards.

Pursuant to CAA section 112(d)(3) requirements for new sources, the standard for new sources shall not be less stringent than the emission control that is achieved in practice by the best controlled similar source. We are proposing MACT floor limits of 3.1 pounds per hour for PM and 6.1 µg/dscm, corrected to 18 percent oxygen, for mercury from each new kiln that is used to produce clay refractory products. These limits were derived using the same test data as the existing source limits but are based on the UPL determinations for the best-performing kiln rather than both existing kilns for which we have data.

The EPA's MACT analyses use the UPL approach to identify the average emission limitation achieved by the best performing sources. The EPA uses this approach because it incorporates the average performance of the best performing sources as well as the variability of the performance during testing conditions. The UPL represents the value which one can expect the mean of a specified number of future observations (*e.g.,* 3-run average) to fall below for the specified level of confidence (99 percent), based upon the results from the same population. In other words, the UPL estimates what the upper bound of future values will be based upon present or past background data. The UPL approach encompasses all the data point-to-data point variability in the collected data, as derived from the dataset to which it is applied. For more details regarding how these limits were derived, see the technical memorandum titled *Development of Proposed Standards and Impacts for the Refractory Products Manufacturing NESHAP,* located in the docket for this rule.

To demonstrate compliance with the emission limits, the EPA is proposing initial and repeat 5-year performance testing for the regulated pollutants, continuous parameter monitoring, and daily visible emissions (VE) checks. Owners and operators whose clay refractory products kilns are equipped with a fabric filter to reduce PM (as a surrogate for metal HAP) have the option of demonstrating compliance using a bag leak detection system instead of daily VE checks.

#### c. Consideration of Beyond-the-Floor Options

The EPA also evaluated the beyond-the-floor option of requiring all existing sources to meet the proposed new source MACT standards for mercury and PM (as a surrogate for total (non-mercury) metal HAP). We assume an uncontrolled kiln would need a fabric filter for control of PM and an activated carbon injection and fabric filter system for control of mercury to meet the new source standards. For the total (non-mercury) metal HAP beyond-the-floor option, we estimate the total capital cost would be $1.74 million, the annual cost would be $649,000, and the control would achieve (non-mercury) metal HAP reductions of 0.015 tpy, for a cost effectiveness of $42.7 million per ton of (non-mercury) metal HAP removed. For the mercury beyond-the-floor option, we estimate the total capital cost would be $1.84 million, the annual cost would be

[22] The EPA not only has authority under CAA sections 112(d)(2) and (3) to set MACT standards for previously unregulated HAP emissions at any time, but is required to address any previously unregulated HAP emissions as part of its periodic review of MACT standards under CAA section 112(d)(6). *LEAN* v. *EPA,* 955 F3d at 1091–1099.

$740,000, and the control would achieve mercury reductions of 0.0023 tpy, for a cost effectiveness of $321 million per ton of mercury removed.

We conclude that the costs of the controls are not reasonable relative to the level of emission reduction achieved for either the mercury or total (non-mercury) metal HAP beyond-the-floor options. In addition, these controls would create additional solid waste, as there would be a need to dispose of the collected metal-contaminated dust. Therefore, we are not proposing beyond-the-floor limits for mercury or total non-mercury metal HAP and are proposing standards based on the MACT floor. See the technical memorandum titled *Development of Proposed Standards and Impacts for the Refractory Products Manufacturing NESHAP,* located in the docket for this rule, for details regarding the derivation of the cost and emission estimates for the beyond-the-floor option.

2. Nonclay Refractory Products That Use Organic HAP

For existing nonclay refractory sources, the 2002 Refractory Products Manufacturing NESHAP proposal preamble identifies organic HAP as the primary emissions from the manufacture of nonclay products that include organic resin binders. The NESHAP requires control of organic HAP with a THC limit for these sources. Sources currently employ the use of thermal oxidizers, regenerative thermal oxidizers, and catalytic oxidizers to meet the THC limit. However, the NESHAP does not require sources to use natural gas as fuel for sources in this subcategory because metal HAP emissions were determined to be below measurable quantities due to the use of purified nonclay raw materials. Available HAP data for these sources in the 2017 NEI were found to be outdated and not reflective of current operating conditions. The 2017 NEI included measurable PM emissions for these existing nonclay refractory sources, and the PM would be expected to have trace amounts of metal HAP; however, we have no emission stack test data to indicate measurable emissions of metal HAP for these existing nonclay refractory sources.[23] Therefore, we are proposing a work practice standard to use natural gas as fuel for existing nonclay refractory sources to limit metal HAP emissions in lieu of a numerical emissions standard as the MACT floor level of control in accordance with CAA section 112(h). Because we expect HAP metals to be emitted in unmeasurable quantities based on the purified raw materials used and we have no emission stack test data to indicate measurable emissions of metal HAP for these existing nonclay refractory sources, we could not identify a beyond the floor measure that would obtain further emission reductions.

*B. What are the results of the risk assessment and analyses?*

As described in section III of this preamble, for the Refractory Products Manufacturing source category, we conducted a risk assessment for all HAP emitted. We present results of the risk assessment briefly below and in more detail in the *Refractory Products Risk Assessment Report,* in the Docket for this action (Docket ID No. EPA–HQ–OAR–2020–0148).

1. Chronic Inhalation Risk Assessment Results

Table 1 below provides a summary of the results of the inhalation risk assessment for the source category. For more detail about the MACT-allowable emission levels, see Appendix 1 to the *Refractory Products Risk Assessment Report,* in the Docket for this action.

TABLE 1—REFRACTORY PRODUCTS MANUFACTURING SOURCE CATEGORY INHALATION RISK ASSESSMENT RESULTS

| Risk assessment | Maximum individual cancer risk (in 1 million) | | Estimated population at increased risk of cancer ≥1-in-1 million | | Estimated annual cancer incidence (cases per year) | | Maximum chronic noncancer TOSHI [1] | | Maximum screening acute noncancer HQ [2] |
|---|---|---|---|---|---|---|---|---|---|
| | Based on actual emissions | Based on allowable emissions | Based on actual emissions | Based on allowable emissions | Based on actual emissions | Based on allowable emissions | Based on actual emissions | Based on allowable emissions | Based on actual emissions |
| Source Category | 0.7 | 0.7 | 0 | 0 | 0.0003 | 0.0003 | 0.04 | 0.04 | HQREL = 0.09 |
| Whole Facility | 0.7 | | 0 | | 0.0004 | | 0.04 | | |

[1] The target organ specific hazard index (TOSHI) is the sum of the chronic noncancer HQs for substances that affect the same target organ or organ system.
[2] The maximum estimated acute exposure concentration was divided by available short-term threshold values to develop HQ values.

The results of the inhalation risk modeling, as shown above, indicate that the maximum individual cancer risk based on actual and allowable emissions (lifetime) is 0.7-in-1 million (driven by trace amounts of chromium, arsenic, nickel, and cadmium emissions from tunnel kilns) and the total estimated annual cancer incidence (national) from these facilities based on actual and allowable emission levels is 0.0003 excess cancer cases per year or one case every 3,333 years. The maximum chronic noncancer TOSHI value based on actual and allowable emissions is 0.04 (driven by HF from tunnel kilns).

2. Screening Level Acute Risk Assessment Results

Table 1 of this preamble shows the acute risk results for the Refractory Products Manufacturing source category. The screening analysis for acute impacts was based on an estimate of acute emissions developed for each emissions source using compliance test report data and engineering calculations. The maximum screening acute noncancer HQ value (off-facility site) is 0.09 (driven by HF). For more detailed acute risk screening results, refer to the *Refractory Products Risk Assessment Report,* in the Docket for this action.

3. Multipathway Risk Screening Results

The emissions data for Refractory Products Manufacturing source category indicate that five PB–HAP are emitted by sources within this source category: Arsenic, cadmium, POM, mercury (divalent mercury and methyl mercury), and lead. The cadmium emissions from these facilities did not exceed the Tier 1 multipathway SV of 1 for cancer or noncancer. The arsenic, methyl mercury, and POM emissions exceeded the Tier 1 multipathway SV of 1 for cancer. Therefore, a Tier 2 screening

[23] Thus, while we believe that there are metal HAP emissions, the lack of data showing measurable emissions leads the EPA to conclude that the application of measurement methodology to this class of sources is not practicable due to technological and economic limitations. See CAA 112(h)(2)(B).

assessment was conducted for arsenic, menthyl mercury and POM. Emissions of arsenic, POM, and methyl mercury from these facilities did not exceed the Tier 2 multipathway SV of 1 for cancer. The Tier 2 noncancer screening assessment resulted in an SV less than 1 for mercury emissions.

An exceedance of a screening threshold emission rate or SV in any of the tiers cannot be equated with a risk value or an HQ (or HI). Rather, it represents a high-end estimate of what the risk or hazard may be. For example, an SV of 2 for a non-carcinogen can be interpreted to mean that we are confident that the HQ would be lower than 2. Similarly, a Tier 2 cancer SV of 5 means that we are confident that the risk is lower than 5-in-1 million. Our confidence comes from the conservative, or health-protective, assumptions encompassed in the screening tiers: we choose inputs from the upper end of the range of possible values for the influential parameters used in the screening tiers, and we assume that the exposed individual exhibits ingestion behavior that would lead to a high total exposure. Based upon the results of this screening assessment no further screening or site-specific assessments were conducted for this source category.

In evaluating the potential for multipathway effects from emissions of lead, modeled maximum annual-average lead concentrations were compared to the NAAQS for lead (0.15 µg/m3). Results of this analysis confirmed that the NAAQS for lead would not be exceeded by any facility.

4. Environmental Risk Screening Results

As described in section III.A of this preamble, we conducted an environmental risk screening assessment for the Refractory Products Manufacturing source category for the following pollutants: Arsenic, cadmium, HCl, HF, lead, mercury (divalent mercury and methyl mercury), and POM.

In the Tier 1 screening analysis for PB–HAP (other than lead, which was evaluated differently), arsenic, cadmium, divalent mercury, and POM had no Tier 1 exceedances for any ecological benchmark. Methyl mercury emissions at one facility had a Tier 1 exceedance for the surface soil NOAEL (avian ground insectivores) by a maximum SV of 2. A Tier 2 screening assessment was performed for methyl mercury. Methyl mercury had no Tier 2 exceedances for any ecological benchmark.

For lead, we did not estimate any exceedances of the secondary lead NAAQS.

For HCl and HF, the average modeled concentration around each facility (*i.e.,* the average concentration of all off-site data points in the modeling domain) did not exceed any ecological benchmark. In addition, each individual modeled concentration of HCl (*i.e.,* each off-site data point in the modeling domain) was below the ecological benchmarks for all facilities. For HF, the maximum facility SV (based on the average concentration of all off-site data points over the modeling domain) was well below 1 (0.007) and the maximum area that exceeded the ecological benchmark was only 0.002 percent of the modeled area.

Based on the results of the environmental risk screening analysis, we do not expect an adverse environmental effect as a result of HAP emissions from this source category.

5. Facility-Wide Risk Results

As shown in Table 1 of this document, the maximum facility-wide cancer MIR is 0.7-in-1 million, driven by chromium, arsenic, nickel, and cadmium emissions from tunnel kilns. The total estimated cancer incidence from the whole facility is 0.0004 excess cancer cases per year, or one excess case in every 2,500 years. No people were estimated to have cancer risks above 1-in-1 million from exposure to HAP emitted from both MACT and non-MACT sources at the three facilities in this source category. The maximum facility-wide TOSHI for the source category is estimated to be 0.04, driven by HF emissions from tunnel kilns.

6. What demographic groups might benefit from this regulation?

To examine the potential for any environmental justice issues that might be associated with the source category, we performed a demographic analysis, which is an assessment of risks to individual demographic groups of the populations living within 5 km and within 50 km of the facilities. In the analysis, we evaluated the distribution of HAP-related cancer and noncancer risks from the Refractory Products Manufacturing source category across different demographic groups within the populations living near facilities.[24]

Results of the demographic analysis indicate that the minority population is significantly lower within 5 km of the facilities than the national percentage (18 percent versus 38 percent). This difference is accounted for by smaller population percentages around the facilities for all minority demographic groups. Specifically, African American (6 percent versus 12 percent nationally), Native American (0.1 percent versus 0.8 percent nationally), Other and Multiracial (5 percent versus 7 percent nationally), and Hispanic or Latino (6 percent versus 18 percent nationally). In addition, the percentage of the population living within 5 km of facilities in the source category is lower than the corresponding national percentage for the demographic groups, ''Over 25 Without a HS Diploma'' (10 percent versus 14 percent nationally) and ''Below the Poverty Level'' (11 percent versus 14 percent nationally). When examining the risk levels of those exposed to emissions from Refractory Products Manufacturing facilities, we find that no one is exposed to a cancer risk at or above 1-in-1 million or to a chronic noncancer TOSHI greater than 1.

The methodology and the results of the demographic analysis are presented in a technical report titled *Risk and Technology Review—Analysis of Demographic Factors for Populations Living Near Refractory Products Manufacturing Source Category Operations,* September 2020 (hereafter referred to as the *Refractory Products Manufacturing Demographic Analysis Report*), in the docket for this action.

*C. What are our proposed decisions regarding risk acceptability, ample margin of safety, and adverse environmental effect?*

1. Risk Acceptability

As noted in section III.A of this preamble, we weigh all health risk factors in our risk acceptability determination, including the cancer MIR, the number of persons in various cancer and noncancer risk ranges, cancer incidence, the maximum noncancer TOSHI, the maximum acute noncancer HQ, the extent of noncancer risks, the distribution of cancer and noncancer risks in the exposed population, and risk estimation uncertainties (54 FR 38044, September 14, 1989).

For the Refractory Products Manufacturing source category, the risk analysis indicates that cancer risk due to actual emissions or allowable emissions is 0.7-in-1 million. The risks are considerably less than 100-in-1 million, which is the presumptive upper limit of acceptable risk. The risk analysis also

[24] Demographic groups included in the analysis are: White, African American, Native American, other races and multiracial, Hispanic or Latino, children 17 years of age and under, adults 18 to 64 years of age, adults 65 years of age and over, adults without a high school diploma, people living below the poverty level, people living two times the poverty level, and linguistically isolated people.

shows we did not identify a potential for adverse chronic noncancer health effects. The acute noncancer risks based on actual emissions are low at an HQ of less than 1 (based on the REL) for HF. Therefore, we find there is little potential concern of acute noncancer health impacts from actual emissions. In addition, the risk assessment indicates no significant potential for multipathway health effects.

Considering all of the health risk information and factors discussed above, including the uncertainties discussed in section III.C.7 of this preamble, we propose to find that the risks from the Refractory Products Manufacturing source category are acceptable.

3. Ample Margin of Safety Analysis

We are proposing that the risks from the Refractory Products Manufacturing source category are acceptable. There are no individuals in the exposed population with lifetime cancer risks above 1-in-1 million as a result of actual or allowable emissions from this category. In addition, in our risk analysis we did not identify a potential for adverse chronic noncancer, acute noncancer, or multipathway health effects. Therefore, we are proposing that the current standards provide an ample margin of safety to protect public health.

4. Adverse Environmental Effect

The emissions data for the Refractory Products Manufacturing source category indicate that the following environmental HAP are emitted by this category: Arsenic, cadmium, HCl, HF, lead, mercury (divalent mercury and methyl mercury), and POM. The screening-level evaluation of the potential for adverse environmental effects associated with emissions of these environmental HAP from the Refractory Products Manufacturing source category indicated that there are no exceedances of Tier 2 SVs for PB–HAP, no exceedances of the average modeled concentration around each facility (*i.e.,* the average concentration of all off-site data points in the modeling domain) for acid gases, and for lead we did not estimate any exceedances of the secondary lead NAAQS. In addition, we are unaware of any adverse environmental effects caused by HAP emitted by this source category. Therefore, we do not expect there to be an adverse environmental effect as a result of HAP emissions from this source category, and taking into consideration costs, energy, safety, and other relevant factors, we are proposing that it is not necessary to set a more stringent standard to prevent an adverse environmental effect.

*D. What are the results and proposed decisions based on our technology review?*

As described in section III.B of this preamble, our technology review focused on identifying developments in practices, processes, and control technologies for the Refractory Products source category. We reviewed various information sources regarding emission sources that are currently regulated by the Refractory Products Manufacturing NESHAP to support the technology review. The information sources included the following: The RBLC; state regulations; facility operating permits; regulatory actions, including technology reviews promulgated for other similar NESHAP subsequent to the Surface Coating of Metal Cans NESHAP; and discussions with individual refractory product manufacturing facilities.

A brief discussion of our review of these various information sources follows. Based on our review of facility operating permits and discussions with individual refractory product manufacturing facilities, we identified an advance in practice that we are proposing under CAA section 112(d)(6) in this action.

Our search of the RBLC database for improvements in refractory products manufacturing technologies did not identify any new developments in practices, processes, or control technologies for the Refractory Products Manufacturing source category under CAA section 112(d)(6).

We also reviewed requirements for other similar source categories. During development of the Refractory Products Manufacturing NESHAP, we identified two other source categories that operate kilns that are similar in design and operation to kilns that manufacture clay refractory products: The Clay Ceramics Manufacturing Industry and the Brick and Structural Clay Products Manufacturing Industry. Since the promulgation of the Refractory Products Manufacturing NESHAP, the NESHAP for these two other source categories were vacated, and new NESHAP for Brick and Structural Clay Products Manufacturing Industry and NESHAP for Clay Ceramics Manufacturing Industry were promulgated on October 26, 2015 (80 FR 65470). However, the control devices have not changed since the promulgation of the Refractory Products Manufacturing NESHAP. Therefore, no developments in practices, processes, and control technologies were identified in the NESHAP for Brick and Structural Clay Products Manufacturing Industry and NESHAP for Clay Ceramics Manufacturing Industry that were not considered during the Refractory Products Manufacturing NESHAP development.

We also contacted representatives for the three major source facilities subject to the Refractory Products Manufacturing NESHAP and the industry trade association, The Refractories Institute, and asked them to identify facility-specific developments in practices, processes, and control technologies. Two of the three facilities indicated they had not made changes in raw materials or manufacturing practices and processes because such changes would detrimentally affect their products. One facility had installed a wet scrubber to control opacity/particulate matter (a surrogate for metal HAP) emitted by its tunnel kilns used to manufacture both clay and nonclay refractory products. Since wet scrubbers were previously considered during the Refractory Products Manufacturing NESHAP development, we did not consider this to be a development in control technology.

We also conducted a review of the state operating permits for the three major source facilities that are subject to the Refractory Products Manufacturing NESHAP and three synthetic area source refractory facilities to determine whether any are using technologies that exceed the MACT level of control or are using technologies that were not considered during the development of the original NESHAP. We found the HAP control devices described in the permits were considered and included in the 2003 Refractory Products Manufacturing NESHAP for the relevant refractory products. Therefore, the permit review did not identify any new developments in processes or control technologies for the refractory manufacturing source category under CAA section 112(d)(6).

Based on our review of facility operating permits and discussions with individual refractory product manufacturing facilities, we identified an advance in practice that we are proposing in this action. The current NESHAP has a work practice standard that applies during periods of scheduled maintenance of emission controls for continuous kilns during bypass periods. We are proposing to limit the provision to THC emission controls and add additional requirements to reflect the best practices for one facility as part of the technology review required by CAA section 112(d)(6). In addition to the best practices, we are proposing an additional reporting requirement. We are aware of only one major source facility that uses this provision and will be affected by these proposed requirements.

To comply with current NESHAP work practice standard, the owner or operator must request approval from the Administrator to bypass the control device, minimize THC emissions during the period when the kiln is operating and the control device is out of service, and minimize the amount of time that the kiln is operating and the control device is out of service. Approval from the Administrator must be requested in advance for each scheduled maintenance event of the control device if the bypass of the control device is required to conduct the maintenance. The procedures for minimizing the THC emissions during the time the control device is out of service and the amount of time the control device is out of service for maintenance must be included in the facility's OM&M plan, and records of the maintenance performed are also required.

Consistent with the demonstrated best practices for one facility, we are proposing a revision to the existing requirements to limit the number of hours bypass of the emission controls can occur to no more than 750 hours per kiln per year. If the control being bypassed is for THC control, the facility is also required to manufacture products with lower HAP binder and limit production to no more than five cars with higher THC binder levels during these periods, Therefore, we are also proposing to require sources to schedule the manufacture of product with binder percentages at the lower end of the range produced (*i.e.,* below the typical average of product binder content) and the number of kiln cars with products for which the mass fraction of organic HAP in the resins, binders, and additives greater than the average must not exceed five for the year on a 12-month rolling basis, consistent with the best practices of the facility. Based on 2017 raw material and production data provided by the facility, we estimate that if the regenerative thermal oxidizer was offline for all 750 hours allowed by the permit for maintenance, the HAP emissions during that 750 hours would be about 61 pounds per year. This estimate is considered conservative because it does not take into account any HAP emission reductions that were achieved by implementing the best practices described in this paragraph for periods when the control device is offline (scheduling products with low HAP binder and limiting higher THC binder levels to five cars).

Finally, we are also proposing to add new reporting requirements for these periods. We are proposing to require reporting of the THC emissions and other information for control device maintenance and bypass periods in semi-annual compliance reports (in addition to the current NESHAP provision to document the planned maintenance procedures in the OM&M plan and to maintain records of continuous kiln maintenance). Reporting of this information in the semi-annual compliance reports will help to ensure compliance with the revised requirements that we are proposing.

As part of the technology review, we also identified previously unregulated HAP, and are proposing new standards under CAA sections 112(d)(2) and (3), as described in section IV.A, above. Additional information supporting the revised standard is provided in the memorandum titled *Technology Review for the Refractory Products Manufacturing NESHAP,* available in the docket for this action.

*E. What other actions are we proposing?*

In addition to the proposed actions described above, we are proposing additional revisions to the NESHAP. We are proposing revisions to the SSM provisions of the MACT rule in order to ensure that they are consistent with the decision in *Sierra Club* v. *EPA,* 551 F. 3d 1019 (D.C. Cir. 2008), in which the court vacated two provisions that exempted sources from the requirement to comply with otherwise applicable CAA section 112(d) emission standards during periods of SSM. We also are proposing various other changes to require electronic submittal of notification of compliance status (NOCS) reports, performance test and performance evaluation reports for refractory products manufacturing facilities, new test methods and incorporation by reference (IBR) of alternative test methods, and making technical and editorial revisions. Our analyses and proposed changes related to these issues are discussed in the sections below.

1. SSM

a. Proposed Elimination of the SSM Exemption

In its 2008 decision in *Sierra Club* v. *EPA,* 551 F.3d 1019 (D.C. Cir. 2008), the court vacated portions of two provisions in the EPA's CAA section 112 regulations governing the emissions of HAP during periods of SSM. Specifically, the court vacated the SSM exemption contained in 40 CFR 63.6(f)(1) and 40 CFR 63.6(h)(1), holding that under section 302(k) of the CAA, emissions standards or limitations must be continuous in nature and that the SSM exemption violates the CAA's requirement that some CAA section 112 standards apply continuously.

We are proposing the elimination of the SSM exemption in this rule, which appears at 40 CFR 63.9792(a)(1). Consistent with *Sierra Club* v. *EPA,* we are proposing standards in this rule that apply at all times. We are also proposing several revisions to Table 11 of 40 CFR part 63, subpart SSSSS (*Applicability of General Provisions to Subpart SSSSS,* hereafter referred to as the ''General Provisions table to subpart SSSSS''). For example, we are proposing to eliminate the incorporation of the General Provisions' requirement that the source develop an SSM plan. Further, we are proposing to eliminate and revise certain recordkeeping and reporting requirements related to the SSM exemption as further described below. The EPA has attempted to ensure that the provisions we are proposing to eliminate are inappropriate, unnecessary, or redundant in the absence of the SSM exemption. We are seeking comment on the specific proposed deletions and revisions and also whether additional provisions should be revised to achieve the stated goal.

In proposing these rule amendments, the EPA has taken into account startup and shutdown periods and, for the reasons explained below, is not proposing alternate standards for those periods. Nonclay refractory sources employ the use of continuous and periodic kilns that use air pollution control devices, including thermal oxidizers, regenerative thermal oxidizers, and catalytic oxidizers, to meet the THC limit in the rule. Facility representatives for these sources indicated that startups and shutdowns of the kilns and air pollution control devices are part of normal operations and they experience no difficulties in meeting the existing THC emission limit during these periods. Therefore, alternative standards are not needed.

Periods of startup, normal operations, and shutdown are all predictable and routine aspects of a source's operations. Malfunctions, in contrast, are neither predictable nor routine. Instead they are, by definition, sudden, infrequent and not reasonably preventable failures of emissions control, process, or monitoring equipment. (40 CFR 63.2) (Definition of malfunction). The EPA interprets CAA section 112 as not requiring emissions that occur during periods of malfunction to be factored into development of CAA section 112 standards and this reading has been upheld as reasonable by the court in *U.S. Sugar Corp.* v. *EPA,* 830 F.3d 579, 606–610 (2016). Under CAA section 112, emissions standards for new sources must be no less stringent than the level ''achieved'' by the best controlled similar source and for existing sources generally must be no less stringent than the average emission limitation ''achieved'' by the best performing 12 percent of sources in the category. There is nothing in CAA section 112 that directs the Agency to consider malfunctions in determining the level ''achieved'' by the best performing sources when setting emission standards. As the court has recognized, the phrase ''average emissions limitation achieved by the best performing 12 percent of'' sources ''says nothing about how the performance of the best units is to be calculated.'' *Nat'l Ass'n of Clean Water Agencies* v. *EPA,* 734 F.3d 1115, 1141 (D.C. Cir. 2013). While the EPA accounts for variability in setting emissions standards, nothing in CAA section 112 requires the Agency to consider malfunctions as part of that analysis. The EPA is not required to treat a malfunction in the same manner as the type of variation in performance that occurs during routine operations of a source. A malfunction is a failure of the source to perform in a ''normal or usual manner'' and no statutory language compels the EPA to consider such events in setting CAA section 112 standards.

As the court recognized in *U.S. Sugar Corp,* accounting for malfunctions in setting standards would be difficult, if not impossible, given the myriad different types of malfunctions that can occur across all sources in the category and given the difficulties associated with predicting or accounting for the frequency, degree, and duration of various malfunctions that might occur. *Id.* at 608 (''the EPA would have to conceive of a standard that could apply equally to the wide range of possible boiler malfunctions, ranging from an explosion to minor mechanical defects. Any possible standard is likely to be hopelessly generic to govern such a wide array of circumstances.''). As such, the performance of units that are malfunctioning is not ''reasonably'' foreseeable. See, *e.g., Sierra Club* v. *EPA,* 167 F.3d 658, 662 (D.C. Cir. 1999) (''The EPA typically has wide latitude in determining the extent of data-gathering necessary to solve a problem. We generally defer to an agency's decision to proceed on the basis of imperfect scientific information, rather than to 'invest the resources to conduct the perfect study.' ''). See also, *Weyerhaeuser* v. *Costle,* 590 F.2d 1011, 1058 (D.C. Cir. 1978) (''In the nature of things, no general limit, individual permit, or even any upset provision can anticipate all upset situations. After a certain point, the transgression of regulatory limits caused by 'uncontrollable acts of third parties,' such as strikes, sabotage, operator intoxication or insanity, and a variety of other eventualities, must be a matter for the administrative exercise of case-by-case enforcement discretion, not for specification in advance by regulation.''). In addition, emissions during a malfunction event can be significantly higher than emissions at any other time of source operation. For example, if an air pollution control device with 99 percent removal goes off-line as a result of a malfunction (as might happen if, for example, the bags in a baghouse catch fire) and the emission unit is a steady state type unit that would take days to shut down, the source would go from 99 percent control to zero control until the control device was repaired. The source's emissions during the malfunction would be 100 times higher than during normal operations. As such, the emissions over a 4-day malfunction period would exceed the annual emissions of the source during normal operations. As this example illustrates, accounting for malfunctions could lead to standards that are not reflective of (and significantly less stringent than) levels that are achieved by a well-performing non-malfunctioning source. It is reasonable to interpret CAA section 112 to avoid such a result. The EPA's approach to malfunctions is consistent with CAA section 112 and is a reasonable interpretation of the statute.

Although no statutory language compels the EPA to set standards for malfunctions, the EPA has the discretion to do so where feasible. For example, in the Petroleum Refinery Sector RTR, the EPA established a work practice standard for unique types of malfunctions that result in releases from pressure relief devices or emergency flaring events because we had information to determine that such work practices reflected the level of control that applies to the best performing sources (80 FR 75178, 75211 through 75214, December 1, 2015). The EPA will consider whether circumstances warrant setting standards for a particular type of malfunction and, if so, whether the EPA has sufficient information to identify the relevant best performing sources and establish a standard for such malfunctions. We also encourage commenters to provide any such information.

In the event that a source fails to comply with the applicable CAA section 112(d) standards as a result of a malfunction event, the EPA will determine an appropriate response based on, among other things, the good faith efforts of the source to minimize emissions during malfunction periods, including preventative and corrective actions, as well as root cause analyses to ascertain and rectify excess emissions. The EPA will also consider whether the source's failure to comply with the CAA section 112(d) standard was, in fact, sudden, infrequent, not reasonably preventable, and was not instead caused, in part, by poor maintenance or careless operation. 40 CFR 63.2 (Definition of malfunction).

If the EPA determines in a particular case that an enforcement action against a source for violation of an emission standard is warranted, the source can raise any and all defenses in that enforcement action and the federal district court will determine what, if any, relief is appropriate. The same is true for citizen enforcement actions. Similarly, the presiding officer in an administrative proceeding can consider any defense raised and determine whether administrative penalties are appropriate.

In summary, the EPA interpretation of the CAA and, in particular, CAA section 112, is reasonable and encourages practices that will avoid malfunctions. Administrative and judicial procedures for addressing exceedances of the standards fully recognize that violations may occur despite good faith efforts to comply and can accommodate those situations. *U.S. Sugar Corp.* v. *EPA,* 830 F.3d 579, 606–610 (2016).

b. 40 CFR 63.9792(b) General Duty

We are proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR 63.6(e)(1)(i) by changing the ''yes'' in column 4 to a ''no.'' Section 63.6(e)(1)(i) describes the general duty to minimize emissions. Some of the language in that section is no longer necessary or appropriate in light of the elimination of the SSM exemption. We are proposing instead to add general duty regulatory text at 40 CFR 63.9792(b) that reflects the general duty to minimize emissions while eliminating the reference to periods covered by an SSM exemption. The current language in 40 CFR 63.6(e)(1)(i) characterizes what the general duty entails during periods of SSM. With the elimination of the SSM exemption, there is no need to differentiate between normal operations, startup and shutdown, and malfunction events in describing the general duty. Therefore, the language the EPA is proposing for 40 CFR 63.9792(b) does not include that language from 40 CFR 63.6(e)(1)(i).

We are also proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR 63.6(e)(1)(ii) by changing the ''yes'' in column 4 to a ''no.'' Section 63.6(e)(1)(ii) imposes requirements that are not necessary with the elimination of the SSM exemption or are redundant with the general duty requirement being added at 40 CFR 63.9792(b).

c. SSM Plan

We are proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR 63.6(e)(3) by changing the ''yes'' in column 4 to a ''no.'' Generally, these paragraphs require development of an SSM plan and specify SSM recordkeeping and reporting requirements related to the SSM plan. We are also proposing to remove from 40 CFR part 63, subpart SSSSS, the current provisions requiring the SSM plan at 40 CFR 63.9792(c). As noted, the EPA is proposing to remove the SSM exemptions. Therefore, affected units will be subject to an emission standard during such events. The applicability of a standard during such events will ensure that sources have ample incentive to plan for and achieve compliance, and, thus, the SSM plan requirements are no longer necessary.

d. Compliance With Standards

We are proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR 63.6(f)(1) by changing the ''yes'' in column 4 to a ''no.'' The current language of 40 CFR 63.6(f)(1) exempts sources from non-opacity standards during periods of SSM. As discussed above, the court in *Sierra Club* vacated the exemptions contained in this provision and held that the CAA requires that some CAA section 112 standards apply continuously. Consistent with *Sierra Club,* the EPA is proposing to revise the standards in this rule to apply at all times.

e. 40 CFR 63.9800 Performance Testing

We are proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR 63.7(e)(1) by changing the entry in column 4 to a ''no.'' Section 63.7(e)(1) describes performance testing requirements. The EPA is instead proposing to add a performance testing requirement at 40 CFR 63.9800(d). The performance testing requirements we are proposing to add differ from the General Provisions performance testing provisions in several respects. The regulatory text does not include the language in 40 CFR 63.7(e)(1) that restated the SSM exemption and language that precluded startup and shutdown periods from being considered ''representative'' for purposes of performance testing. The proposed performance testing provisions will also not allow performance testing during startup or shutdown. As in 40 CFR 63.7(e)(1), performance tests conducted under this subpart should not be conducted during malfunctions because conditions during malfunctions are often not representative of normal operating conditions. Section 63.7(e) requires that the owner or operator maintain records of the process information necessary to document operating conditions during the test and include in such records an explanation to support that such conditions represent normal operation. The EPA is proposing to add language clarifying that the owner or operator must make such records available to the Administrator.

f. Monitoring

We are proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR 63.8(c)(1) by changing the ''yes'' in column 4 to a ''no.'' The cross-references to the general duty and SSM plan requirements in 40 CFR 63.8(c)(1) are not necessary in light of other requirements of 40 CFR 63.8 that require good air pollution control practices (40 CFR 63.8(c)(1)) and that set out the requirements of a quality control program for monitoring equipment (40 CFR 63.8(d)). Further, we are proposing to revise 40 CFR 63.9804(a)(13) and 63.9808(b) to add requirements to maintain the monitoring equipment at all times in accordance with 40 CFR 63.9792(b) and keep the parts readily available for routine repairs of the monitoring equipment, consistent with the requirements in 40 CFR 63.8(c)(1)(ii).

g. 40 CFR 63.9816 Recordkeeping

We are proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR 63.10(b)(2)(i) by changing the ''yes'' in column 4 to a ''no.'' Section 63.10(b)(2)(i) describes the recordkeeping requirements during startup and shutdown. These recording provisions are no longer necessary because the EPA is proposing that recordkeeping and reporting applicable to normal operations will apply to startup and shutdown. In the absence of special provisions applicable to startup and shutdown, such as a startup and shutdown plan, there is no reason to retain additional recordkeeping for startup and shutdown periods.

We are proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR 63.10(b)(2)(ii) by changing the ''yes'' in column 4 to a ''no.'' Section 63.10(b)(2)(ii) describes the recordkeeping requirements during a malfunction, requiring a record of ''the occurrence and duration of each malfunction.'' A similar record is already required in 40 CFR 63.9816(c)(5), which requires a record of ''the date, time, and duration of each deviation,'' which the EPA is retaining. The regulatory text in 40 CFR 63.9816(c)(5) differs from the General Provisions in that the General Provisions requires the creation and retention of a record of the occurrence and duration of each malfunction of process, air pollution control, and monitoring equipment; whereas 40 CFR 63.9816(c)(5) applies to any failure to meet an applicable standard and is requiring that the source record the date, time, and duration of the failure rather than the ''occurrence.'' For this reason, the EPA is proposing to add to 40 CFR 63.9816(c)(5) a requirement that sources also keep records that include a list of the affected source or equipment and actions taken to minimize emissions, an estimate of the quantity of each regulated pollutant emitted over the emission limit for which the source failed to meet the standard, and a description of the method used to estimate the emissions. Examples of such methods would include product-loss calculations, mass balance calculations, measurements when available, or engineering judgment based on known process parameters (*e.g.,* process throughput, rate, operating temperature, organic HAP content, and control device efficiencies). The EPA is proposing to require that sources keep records of this information to ensure that there is adequate information to allow the EPA to determine the severity of any failure to meet a standard, and to provide data that may document how the source met the general duty to minimize emissions when the source has failed to meet an applicable standard.

We are proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR

63.10(b)(2)(iv) and (v) by changing the ''yes'' in column 4 to a ''no.'' When applicable, the provision requires sources to record actions taken during SSM events when actions were inconsistent with their SSM plan. The requirement in 40 CFR 63.10(b)(2)(iv) is no longer appropriate because SSM plans will no longer be required. The requirement previously applicable under 40 CFR 63.10(b)(2)(iv)(B) to record actions to minimize emissions and record corrective actions is now applicable by reference to 40 CFR 63.9816(c)(5). When applicable, the provision in 40 CFR 63.10(b)(2)(v) requires sources to record actions taken during SSM events to show that actions taken were consistent with their SSM plan. The requirement is no longer appropriate because SSM plans will no longer be required.

We are proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR 63.10(b)(2)(vi) by changing the ''yes'' in column 4 to a ''no.'' The provision requires sources to maintain records during continuous monitoring system (CMS) malfunctions. Section 63.9816(c)(5) covers records of periods of deviation from the standard, including instances where a CMS is inoperative or out-of-control.

We are proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR 63.10(c)(15) by changing the ''yes'' in column 4 to a ''no.'' When applicable, the provision allows an owner or operator to use the affected source's SSM plan or records kept to satisfy the recordkeeping requirements of the SSM plan, specified in 40 CFR 63.6(e), to also satisfy the requirements of 40 CFR 63.10(c)(10) through (12). The EPA is proposing to eliminate this requirement because SSM plans would no longer be required, and, therefore, 40 CFR 63.10(c)(15) no longer serves any useful purpose for affected units.

We are proposing to remove the requirement in 40 CFR 63.9816(a)(2) that deviation records specify whether deviations from a standard occurred during a period of SSM. This revision is being proposed due to the proposed removal of the SSM exemption and because, as discussed above in this section, we are proposing that deviation records must specify the cause of each deviation, which could include a malfunction period as a cause. We are also proposing to remove the requirement to report the SSM records in 40 CFR 63.6(e)(3)(iii) through (v) by deleting 40 CFR 63.9816(a)(2).

h. 40 CFR 63.9814 Reporting

We are proposing to revise the General Provisions table to subpart SSSSS (Table 11) entry for 40 CFR 63.10(d)(5) by changing the ''yes'' in column 4 to a ''no.'' Section 63.10(d)(5) describes the reporting requirements for SSM. To replace the General Provisions reporting requirement, the EPA is proposing to remove the immediate SSM report from Table 10 referenced at 40 CFR 63.9814(a) and add reporting requirements to 40 CFR 63.9814(d) and (e). The replacement language differs from the General Provisions requirement in that it eliminates the SSM report as a stand-alone report. We are proposing language that requires sources that fail to meet an applicable standard at any time to report the information concerning such events in the semi-annual compliance report already required under this rule. For deviations from an applicable emission limitation that occur at an affected source where a CPMS is not used to demonstrate compliance, 40 CFR 63.9814(d) already requires that the semi-annual compliance report must contain the number, duration, and the cause of such events (including unknown cause, if applicable). We are proposing that the report also include the date and time of each deviation, a list of the affected source or equipment, an estimate of the quantity of each regulated pollutant emitted over any emission limit for which the source failed to meet the standard, and a description of the method used to estimate the emissions. Similarly, for deviations from an applicable emission limitation that occur at an affected source where a CPMS is used to demonstrate compliance, we are retaining the current requirements in 40 CFR 63.9814(e) to report the date, time, and cause of each deviation. We are proposing that the report must also contain the number and duration of deviations, a list of the affected sources or equipment, an estimate of the quantity of each regulated pollutant emitted over any emission limit, and a description of the method used to estimate the emissions.

Regarding the proposed new requirement discussed above to estimate the quantity of each regulated pollutant emitted over any emission limit for which the source failed to meet the standard and a description of the method used to estimate the emissions, examples of such methods would include product-loss calculations, mass balance calculations, measurements when available, or engineering judgment based on known process parameters (*e.g.,* process throughput, rate, operating temperature, organic HAP content, and control device efficiencies). The EPA is proposing this requirement to ensure that the EPA has adequate information to determine compliance, to allow the EPA to determine the severity of the failure to meet an applicable standard, and to provide data that may document how the source met the general duty to minimize emissions during a failure to meet an applicable standard.

We will no longer require owners or operators to determine whether actions taken to correct a malfunction are consistent with an SSM plan, because plans would no longer be required. The proposed amendments, therefore, eliminate the requirement in Table 10 to 40 CFR part 63, subpart SSSSS to report whether the source deviated from its SSM plan, including required actions to communicate with the Administrator, and the cross-reference to 40 CFR 63.10(d)(5)(ii) that contains the description of the previously required SSM report format and submittal schedule from this section. These specifications are no longer necessary because the events will be reported in otherwise required reports with similar format and submittal requirements.

Section 63.10(d)(5)(ii) describes an immediate report for SSM when a source failed to meet an applicable standard but did not follow the SSM plan. We will no longer require owners and operators to report when actions taken during an SSM event were not consistent with an SSM plan, because plans would no longer be required.

We are proposing to remove the requirement in 40 CFR 63.9814(e)(5) that deviation reports must specify whether deviation from an operating limit occurred during a period of SSM. We are also proposing to remove the requirements in 40 CFR 63.9814(e)(8) to break down the total duration of deviations into the startup and shutdown categories. As discussed above in this section, we are proposing to require reporting of the cause of each deviation. Further, the startup and shutdown categories no longer apply because these periods are proposed to be considered normal operation.

2. Electronic Reporting Requirements

The EPA is proposing that owners and operators of refractory products manufacturing facilities submit electronic copies of NOCS required by 40 CFR 63.7(b) and (c), 40 CFR 63.8(f)(4), and 40 CFR 63.9 (b) through (e) and (h), and 40 CFR 63.9812, and performance test results and performance evaluation results required by 40 CFR 63.9(h) and 40 CFR 63.9800, and 40 CFR 63.9814 through the EPA's Central Data Exchange (CDX) using the Compliance and Emissions Data Reporting Interface (CEDRI). A description of the electronic data submission process is provided in the memorandum, *Electronic Reporting Requirements for New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP) Rules,* available in the docket for this action. The proposal requires that all NOCS be submitted as portable document format (PDF) files and uploaded to CEDRI. For performance test and performance evaluation results the proposal requires test results that use test methods supported by the EPA's Electronic Reporting Tool (ERT) listed on the ERT website [25] at the time of the test be submitted in the format generated through the use of the ERT or an electronic file consistent with the xml schema on the ERT website. Performance test results using test methods that are not supported by the ERT at the time of the test are required to submitted as a PDF file using the attachment module of the ERT.

Additionally, the EPA has identified two broad circumstances in which electronic reporting extensions may be provided. These circumstances are (1) outages of the EPA's CDX or CEDRI that preclude an owner or operator from accessing the system and submitting required reports and (2) *force majeure* events, which are defined as events that will be or have been caused by circumstances beyond the control of the affected facility, its contractors, or any entity controlled by the affected facility that prevent an owner or operator from complying with the requirement to submit a report electronically. Examples of *force majeure* events are acts of nature, acts of war or terrorism, or equipment failure or safety hazards beyond the control of the facility. The EPA is providing these potential extensions to protect owners and operators from noncompliance in cases where they cannot successfully submit a report by the reporting deadline for reasons outside of their control. In both circumstances, the decision to accept the claim of needing additional time to report is within the discretion of the Administrator, and reporting should occur as soon as possible.

The electronic submittal of the reports addressed in this proposed rulemaking will increase the usefulness of the data contained in those reports, is in keeping with current trends in data availability and transparency, will further assist in the protection of public health and the environment, will improve compliance by facilitating the ability of regulated facilities to demonstrate compliance with requirements and by facilitating the ability of delegated state, local, tribal, and territorial air agencies and the EPA to assess and determine compliance, and will ultimately reduce burden on regulated facilities, delegated air agencies, and the EPA. Electronic reporting also eliminates paper-based, manual processes, thereby saving time and resources, simplifying data entry, eliminating redundancies, minimizing data reporting errors, and providing data quickly and accurately to the affected facilities, air agencies, the EPA, and the public. Moreover, electronic reporting is consistent with the EPA's plan [26] to implement Executive Order 13563 and is in keeping with the EPA's Agency-wide policy [27] developed in response to the White House's Digital Government Strategy.[28] For more information on the benefits of electronic reporting, see the memorandum, *Electronic Reporting Requirements for New Source Performance Standards (NSPS) and National Emission Standards for Hazardous Air Pollutants (NESHAP) Rules,* referenced earlier in this section.

3. Incorporation by Reference Under 1 CFR Part 51

The EPA is proposing regulatory text that includes IBR. In accordance with requirements of 1 CFR 51.5, the EPA is proposing to incorporate by reference the following documents described in the amendments to 40 CFR 63.14:

- ANSI/ASME PTC 19.10–1981, ''Flue and Exhaust Gas Analyses [Part 10, Instruments and Apparatus],'' issued August 31, 1981, IBR proposed for Table 4 to 40 CFR part 63, subpart SSSSS. This document specifies methods, apparatus, and calculations which are used to determine quantitatively, the gaseous constituents of the exhausts including oxygen and carbon dioxide resulting from station combustions sources.
- ASTM D6348–12e1, ''Standard Test Method for Determination of Gaseous Compounds by Extractive Direct Interface Fourier Transform Infrared (FTIR) Spectroscopy,'' Approved February 1, 2012, IBR proposed for Table 4 to 40 CFR part 63, subpart SSSSS.
- ASTM D6784–16, ''Standard Test Method for Elemental, Oxidized, Particle-Bound and Total Mercury in Flue Gas Generated from Coal-Fired Stationary Sources (Ontario Hydro Method),'' (Approved March 1, 2016), IBR proposed for Table 4 to 40 CFR part 63, subpart SSSSS.
- EPA–454/R–98–015, Office of Air Quality Planning and Standards (OAQPS), ''Fabric Filter Bag Leak Detection Guidance,'' September 1997, IBR proposed for 40 CFR 63.9804(f). This document provides guidance on the use of triboelectric monitors as fabric filter bag leak detectors. The document includes fabric filter and monitoring system descriptions; guidance on monitor selection, installation, setup, adjustment, and operation; and quality assurance procedures.

The EPA has made, and will continue to make, the EPA document generally available electronically through *https://www.regulations.gov/* and/or in hard copy at the appropriate EPA office (see the **ADDRESSES** section of this preamble for more information). The ANSI/ASME document is available from the American Society of Mechanical Engineers (ASME) at *http://www.asme.org;* by mail at Three Park Avenue, New York, NY 10016–5990; or by telephone at (800) 843–2763. The ASTM methods are available from ASTM International at *http://www.astm.org;* by mail at 100 Barr Harbor Drive, Post Office Box C700, West Conshohocken, PA 19428–2959; or by telephone at (610) 832–9585.

4. Technical and Editorial Changes

The following lists additional proposed changes that address technical and editorial corrections:

- Revise 40 CFR 63.9824 and Table 4 to subpart SSSSS of part 63 to clarify the location in 40 CFR part 60 of applicable EPA test methods; and
- Revise 40 CFR 63.9814 and 40 CFR 63.9816 to include the requirements to record and report information on failures to meet the applicable standard.

### *F. What compliance dates are we proposing?*

We are proposing that affected sources that commence construction or reconstruction after January 14, 2021, must comply with all requirements of

[25] *https://www.epa.gov/electronic-reporting-air-emissions/electronic-reporting-tool-ert.*

[26] EPA's Final Plan for Periodic Retrospective Reviews, August 2011. Available at: *https://www.regulations.gov/document?D=EPA-HQ-OA-2011-0156-0154.*

[27] E-Reporting Policy Statement for EPA Regulations, September 2013. Available at: *https://www.epa.gov/sites/production/files/2016-03/documents/epa-ereporting-policy-statement-2013-09-30.pdf.*

[28] Digital Government: Building a 21st Century Platform to Better Serve the American People, May 2012. Available at: *https://obamawhitehouse.archives.gov/sites/default/files/omb/egov/digital-government/digital-government.html.*

the subpart, including the amendments being proposed, no later than the effective date of the final rule or upon startup, whichever is later. The final action is not expected to be a ''major rule'' as defined by 5 U.S.C. 804(2), so the effective date of the final rule will be the promulgation date as specified in CAA section 112(d)(10).

We are proposing that affected sources that commence construction or reconstruction on or before January 14, 2021, must comply with the all requirements of the subpart, including the amendments being proposed, no later than the dates described below. We are also proposing that existing nonclay affected sources must comply with the requirement to use natural gas as fuel, or an equivalent fuel, as the kiln fuel (except during periods of natural gas curtailment or supply interruption) immediately upon the effective date of the final rule.

Also, we are proposing that existing affected sources must comply with the following two amendments no later than 181 days after the effective date of the final rule (*i.e.,* 181 days after the date of publication of the final rule in the **Federal Register**). First, for existing affected sources, we are proposing a requirement that notifications, performance test results, and performance evaluation results be electronically submitted. Second, for existing affected sources with continuous kilns using THC emission control devices, we are proposing improvements to the existing work practice standard as a result of the CAA section 112(d)(6) technology review *i.e.,* limit the number of hours for bypass of the control device to conduct scheduled maintenance to 750 hours per year per kiln, schedule the manufacture of product with binder percentages at the lower end of the range during periods of control device bypass, and report THC emissions in the semi-annual compliance report. Existing affected facilities would have to continue to meet the current requirements of 40 CFR part 63, subpart SSSSS, until the applicable compliance date of the amended rule (*i.e.,* 181 days after the date of publication of the final rule in the **Federal Register**).

Finally, we are proposing that affected clay refractory product sources that commenced construction or reconstruction on or before January 14, 2021 must meet new limits for PM/metal HAP and mercury no later than 1 year after the effective date of the final rule. The EPA determined that a 1-year compliance date allows sufficient time for notification and testing to demonstrate initial compliance with the new PM/metal HAP and mercury limits.

We are proposing the immediate compliance date for the removal of the SSM exemptions in 40 CFR 63.6(f)(1) in accordance with the SSM court decision. For other SSM changes, excluding the revised requirements for the SSM described above (40 CFR 63.6(f)(1)), our experience with similar industries further shows that this sort of regulated facility generally requires a time period of 181 days to read and understand the amended rule requirements; make any necessary adjustments; to read and understand the rule and adjust computer systems, evaluate whether changes are needed, and to update their OM&M plan to reflect the revised requirements.

We also determined that an immediate compliance date is practicable for the natural gas requirement and is based on current practices and other information provided by the facilities.

We are proposing the 181-day compliance date for electronic reporting and the scheduled maintenance work practice to require facilities to implement these changes as expeditiously as practicable. For electronic reporting, our experience with similar industries that are required to convert reporting mechanisms to install necessary hardware and software, become familiar with the process of submitting performance test results electronically through the EPA's CEDRI, test these new electronic submission capabilities, and reliably employ electronic reporting shows that a time period of a minimum of 90 days, and, more typically, 180 days, is generally necessary to successfully accomplish these revisions. For the scheduled maintenance work practice, we expect facilities would also need this time to seek approval from the Administrator before taking the control device on the affected kiln out of service for scheduled maintenance and update their operation, maintenance, and monitoring plan to reflect the revised requirements.

For the new PM/metal HAP and mercury requirements, we determined the 1-year compliance date would provide existing clay sources with sufficient time to plan and schedule facility resources to meet the notification and compliance demonstration testing requirements associated with the new limits.

We solicit comment on these proposed compliance periods, and we specifically request submission of information from sources in this source category regarding specific actions that would need to be undertaken to comply with the proposed amended requirements and the time needed to make the adjustments for compliance with any of the revised requirements. We note that information provided may result in changes to the proposed compliance dates.

## V. Summary of Cost, Environmental, and Economic Impacts

### *A. What are the affected sources?*

Currently, three major sources subject to the Refractory Products Manufacturing NESHAP are operating in the United States. The NESHAP applies to each new, reconstructed, and existing affected source located at a refractory products manufacturing facility that is a major source of HAP emissions, is located at a major source of HAP emissions, or is part of a major source of HAP emissions. A refractory products manufacturing facility is a plant site that manufactures refractory products, such as refractory bricks, refractory shapes, monolithics, kiln furniture, crucibles, and other materials used for lining furnaces and other high temperature process units. Refractory products manufacturing facilities typically process raw material by crushing, grinding, and screening; mixing the processed raw materials with binders and other additives; forming the refractory mix into shapes; and drying and firing the shapes. The NESHAP lists the affected sources for four subcategories across the industry as the shape dryers, curing ovens, and kilns that are used to manufacture refractory products that use organic HAP; shape preheaters, pitch working tanks, defumers, and coking ovens that are used to produce pitch-impregnated refractory products; kilns that are used to manufacture chromium refractory products; and kilns that are used to manufacture clay refractory products. The three major sources currently operating in the U.S. can be grouped into two of the subcategories and use curing ovens and kilns that are used to manufacture nonclay refractory products that use organic HAP and kilns that are used to manufacture clay refractory products.

### *B. What are the air quality impacts?*

At the current level of control, the estimated emissions of HAP from the Refractory Products Manufacturing source category are approximately 40 tpy. The proposed amendments require that all three major sources in the Refractory Products Manufacturing source category comply with the relevant emission standards at all times, including periods of SSM. The proposed amendments also limit the number of hours a continuous kiln control device can be bypassed during scheduled maintenance and require minimizing emissions of THC during bypass periods. We were unable to quantify the emissions that occur during periods of SSM or the specific emissions reductions that would occur as a result of this action. However, eliminating the SSM exemption has the potential to reduce emissions by requiring facilities to meet the applicable standard during SSM periods. Requiring the use of natural gas as kiln fuel also ensures a reduction in metal HAP emissions from combustion of coal, fuel oil, or waste-derived fuels.

Indirect or secondary air emissions impacts are impacts that would result from the increased electricity usage associated with the operation of control devices (*e.g.,* increased secondary emissions of criteria pollutants from power plants). Energy impacts consist of the electricity and steam needed to operate control devices and other equipment. The proposed amendments would have no effect on the energy needs of the affected facilities in either of the two source categories and would, therefore, have no indirect or secondary air emissions impacts.

*C. What are the cost impacts?*

We estimate that each facility in this source category will experience costs as a result of these proposed amendments. Estimates for reporting and recordkeeping costs for each facility are associated with the electronic reporting requirements, elimination of the SSM exemption, and scheduled maintenance of continuous kiln control devices. The costs associated with the electronic reporting requirements are attributed to submittal of notifications and semi-annual compliance reports using CEDRI and include time for becoming familiar with CEDRI. The costs associated with the revised SSM requirements were estimated for re-evaluating previously developed SSM record systems. The costs associated with recordkeeping to document the frequency and duration of scheduled maintenance of control devices for continuous kilns were also estimated. The recordkeeping and reporting costs are presented in section VIII.C of this preamble.

We also estimated the costs associated with the proposed new compliance testing requirements for the clay refractory sources in this action. Two of the major source refractories manufacture clay refractory and are required to conduct periodic compliance testing for PM/metal HAP and mercury once every 5 years. One clay refractory source has two continuous kilns and the other has two continuous kilns and three batch kilns. The costs associated with conducting the combined PM/metal HAP and mercury test for each continuous kiln stack is estimated to be about $23,600. The costs associated with conducting the combined PM/metal HAP and mercury test for each batch kiln stack is estimated to be about $31,800. We also assumed that tests for additional stacks at the same facility would be conducted in the same trip, so the additional cost is less due to reduced travel costs. The total costs for the two facilities to test the seven kilns in a single year would be $115,300. In addition to the testing costs, each facility performing the testing will have an additional $6,800 in reporting costs per facility in the year in which the test occurs.

For kilns that meet the limits without any controls, owners or operators are required to conduct VE monitoring to demonstrate compliance. One of the continuous kilns is controlled with a wet scrubber, but the other six kilns are expected to need to conduct VE monitoring. We estimate that the monitoring will cost $3,740 per year per stack, for a total of $22,400 per year.

For further information on the potential testing and monitoring costs, see the memorandum titled *Development of Proposed Standards and Impacts for the Refractory Products Manufacturing NESHAP,* located in the docket for this action.

*D. What are the economic impacts?*

The economic impact analysis is designed to inform decision makers about the potential economic consequences of the compliance costs outlined in section V.C of this preamble. To assess the maximum potential impact, the largest cost expected to be experienced in any one year is compared to the total sales for the ultimate owner of the affected facilities to estimate the total burden for each owner. For these proposed amendments, the total cost of testing, monitoring, and recordkeeping and reporting is estimated to be $158,140. The total annual costs associated with the requirements range from 0.00008 to 0.18 percent of annual sales revenue per ultimate owner. These costs are not expected to result in a significant market impact, regardless of whether they are passed on to customers or absorbed by the firms.

The EPA also prepared a small business screening assessment to determine whether any of the identified affected facilities are small entities, as defined by the U.S. Small Business Administration. One of the facilities affected by these amendments is a small entity. However, the annual cost associated with the requirements is 0.18 percent of annual sales revenue for the owner of that facility. Therefore, there are no significant economic impacts on a substantial number of small entities from these amendments.

*E. What are the benefits?*

As stated above in section V.C of this preamble, we were unable to quantify the specific emissions reductions associated with eliminating the SSM exemption, although this proposed change has the potential to reduce emissions of volatile organic HAP.

Because these proposed amendments are not considered economically significant, as defined by Executive Order 12866, we did not monetize the benefits of reducing these emissions. This does not mean that there are no benefits associated with the potential reduction in volatile organic HAP from this rule.

## VI. Request for Comments

We solicit comments on this proposed action. In addition to general comments on this proposed action, we are also interested in additional data that may improve the risk assessments and other analyses. We are specifically interested in receiving any improvements to the data used in the site-specific emissions profiles used for risk modeling. Such data should include supporting documentation in sufficient detail to allow characterization of the quality and representativeness of the data or information. Section VII of this preamble provides more information on submitting data.

## VII. Submitting Data Corrections

The site-specific emissions profiles used in the source category risk and demographic analyses and instructions are available for download on the project website at *https://www.epa.gov/stationary-sources-air-pollution/refractory-products-manufacturing-national-emissions-standards.* The data files include detailed information for each HAP emissions release point for the facilities in the source category.

If you believe that the data are not representative or are inaccurate, please identify the data in question, provide your reason for concern, and provide any ''improved'' data that you have, if available. When you submit data, we request that you provide documentation of the basis for the revised values to support your suggested changes. To submit comments on the data downloaded from the project website, complete the following steps:

1. Within this downloaded file, enter suggested revisions to the data fields appropriate for that information.

2. Fill in the commenter information fields for each suggested revision (*i.e.,* commenter name, commenter organization, commenter email address, commenter phone number, and revision comments).

3. Gather documentation for any suggested emissions revisions (*e.g.,* performance test reports, material balance calculations).

4. Send the entire downloaded file with suggested revisions in Microsoft® Access format and all accompanying documentation to Docket ID No. EPA–HQ–OAR–2020–0148 (through the method described in the **ADDRESSES** section of this preamble).

5. If you are providing comments on a single facility or multiple facilities, you need only submit one file for all facilities. The file should contain all suggested changes for all sources at that facility (or facilities). We request that all data revision comments be submitted in the form of updated Microsoft® Excel files that are generated by the Microsoft® Access file. These files are provided on the project website at *https://www.epa.gov/stationary-sources-air-pollution/refractory-products-manufacturing-national-emissions-standards* .

## VIII. Statutory and Executive Order Reviews

Additional information about these statutes and Executive Orders can be found at *https://www.epa.gov/laws-regulations/laws-and-executive-orders.*

### *A. Executive Order 12866: Regulatory Planning and Review and Executive Order 13563: Improving Regulation and Regulatory Review*

This action is not a significant regulatory action and was, therefore, not submitted to OMB for review.

### *B. Executive Order 13771: Reducing Regulations and Controlling Regulatory Costs*

This action is not expected to be an Executive Order 13771 regulatory action because this action is not significant under Executive Order 12866.

### *C. Paperwork Reduction Act (PRA)*

The information collection activities in this proposal have been submitted for approval to OMB under the PRA. The ICR document that the EPA prepared has been assigned EPA ICR number 2040.08. You can find a copy of the ICR in the docket for this rule, and it is briefly summarized here.

As part of the RTR for the Refractory Products Manufacturing NESHAP, the EPA is not proposing to revise the existing emission limit requirements but is adding new emission limit requirements for existing clay refractory sources and is adding new work practices for existing nonclay refractory sources. The EPA is also proposing to revise the SSM provisions of the rule and proposing the use of electronic data reporting for future performance test data submittals, notifications, and reports. This information is being collected to assure compliance with 40 CFR part 63, subpart SSSSS.

*Respondents/affected entities:* Facilities manufacturing refractory products.

*Respondent's obligation to respond:* Mandatory (40 CFR part 63, subpart SSSSS).

*Estimated number of respondents:* In the 3 years after the amendments are final, approximately three respondents per year would be subject to the NESHAP and no additional respondents are expected to become subject to the NESHAP during that period.

*Frequency of response:* The total number of responses is 21 per year.

*Total estimated burden:* The average annual burden to the three refractory products manufacturing facilities over the 3 years if the amendments are finalized is estimated to be 230 hours (per year). The average annual burden to the Agency over the 3 years after the amendments are final is estimated to be 202 hours (per year). Burden is defined at 5 CFR 1320.3(b).

*Total estimated cost:* The average annual cost to the refractory products manufacturing facilities is $27,100 in labor costs in the first 3 years after the amendments are final. The average annual capital and operation and maintenance cost is $69,900. The total average annual Agency cost over the first 3 years after the amendments are final is estimated to be $9,990.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for the EPA's regulations in 40 CFR are listed in 40 CFR part 9.

Submit your comments on the Agency's need for this information, the accuracy of the provided burden estimates, and any suggested methods for minimizing respondent burden to the EPA using the docket identified at the beginning of this rule. You may also send your ICR-related comments to OMB's Office of Information and Regulatory Affairs via email to *OIRA_submission@omb.eop.gov,* Attention: Desk Officer for the EPA. Since OMB is required to make a decision concerning the ICR between 30 and 60 days after receipt, OMB must receive comments no later than February 16, 2021. The EPA will respond to any ICR-related comments in the final rule.

### *D. Regulatory Flexibility Act (RFA)*

I certify that this action will not have a significant economic impact on a substantial number of small entities under the RFA. The annualized costs associated with the proposed requirements in this action for the affected small entities is described in section V.D. above.

### *E. Unfunded Mandates Reform Act (UMRA)*

This action does not contain an unfunded mandate of $100 million or more as described in UMRA, 2 U.S.C. 1531–1538, and does not significantly or uniquely affect small governments. The action imposes no enforceable duty on any state, local, or tribal governments or the private sector.

### *F. Executive Order 13132: Federalism*

This action does not have federalism implications. It will not have substantial direct effects on the states, on the relationship between the national government and the states, or on the distribution of power and responsibilities among the various levels of government.

### *G. Executive Order 13175: Consultation and Coordination With Indian Tribal Governments*

This action does not have tribal implications as specified in Executive Order 13175. No tribal facilities are known to be engaged in any of the industries that would be affected by this action. In addition, the EPA conducted a proximity analysis for this source category and found that no refractory products manufacturing facilities are located within 50 miles of tribal lands. Thus, Executive Order 13175 does not apply to this action.

### *H. Executive Order 13045: Protection of Children From Environmental Health Risks and Safety Risks*

This action is not subject to Executive Order 13045 because it is not economically significant as defined in Executive Order 12866, and because the EPA does not believe the environmental health or safety risks addressed by this action present a disproportionate risk to children. This action's health and risk assessments are contained in sections

III.A, IV.B, and IV.C of this preamble and are further documented in the Refractory Products Manufacturing Docket.

*I. Executive Order 13211: Actions Concerning Regulations That Significantly Affect Energy Supply, Distribution, or Use*

This action is not subject to Executive Order 13211 because it is not a significant regulatory action under Executive Order 12866.

*J. National Technology Transfer and Advancement Act (NTTAA) and 1 CFR Part 51*

This action involves technical standards. Therefore, the EPA conducted searches for the Refractory Products Manufacturing RTR through the Enhanced National Standards Systems Network Database managed by the American National Standards Institute (ANSI). We also contacted voluntary consensus standards (VCS) organizations and accessed and searched their databases. We conducted searches for EPA Methods 1, 1A, 2, 2A, 2C, 2D, 2F, 2G, 3, 3A, 3B, 4, 5, 25, 25A, 26, 26A, and 29 of 40 CFR part 60, and EPA Methods 311 and 320 of 40 CFR part 63, appendix A. No applicable VCS were identified for EPA Methods 1A, 2A, 2D, 2F, 2G, 5A, 5B, 5D, and 5F.

The EPA is incorporating by reference the VCS ANSI/ASME PTC 19.10–1981, ''Flue and Exhaust Gas Analyses.'' This method determines quantitatively the gaseous constituents of exhausts resulting from stationary combustion sources. The manual procedures (but not instrumental procedures) of VCS ANSI/ASME PTC 19.10–1981—Part 10 may be used as an alternative to EPA Method 3B for measuring the oxygen or carbon dioxide content of the exhaust gas. The gases covered in ANSI/ASME PTC 19.10–1981 are oxygen, carbon dioxide, CO, nitrogen, $SO_2$, sulfur trioxide, nitric oxide, nitrogen dioxide, hydrogen sulfide, and hydrocarbons, however the use in this rule is only applicable to oxygen and carbon dioxide and is an acceptable alternative to the manual portion only and not the instrumental portion.

The EPA is incorporating by reference the VCS ASTM D6348–12e1, ''Determination of Gaseous Compounds by Extractive Direct Interface Fourier Transform (FTIR) Spectroscopy,'' as an acceptable alternative to EPA Method 320. ASTM D6348–03(2010) was determined to be equivalent to EPA Method 320 with caveats. ASTM D6348–12e1 is a revised version of ASTM D6348–03(2010) and includes a new section on accepting the results from the direct measurement of a certified spike gas cylinder, but lacks the caveats placed on the ASTM D6348–03(2010) version. The VCS ASTM D6348–12e1, ''Determination of Gaseous Compounds by Extractive Direct Interface Fourier Transform (FTIR) Spectroscopy,'' is an extractive FTIR field test method used to quantify gas phase concentrations of multiple analytes from stationary source effluent and is an acceptable alternative to EPA Method 320 at this time with caveats requiring inclusion of selected annexes to the standard as mandatory. When using ASTM D6348–12e1, the following conditions must be met:

(1) The test plan preparation and implementation in the Annexes to ASTM D6348–03, Sections A1 through A8 are mandatory; and

(2) In ASTM D6348–03, Annex A5 (Analyte Spiking Technique), the percent (%) R must be determined for each target analyte (Equation A5.5).

In order for the test data to be acceptable for a compound, percent R must be 70 percent $\geq R \leq$ 130 percent. If the %R value does not meet this criterion for a target compound, the test data is not acceptable for that compound and the test must be repeated for that analyte (*i.e.,* the sampling and/or analytical procedure should be adjusted before a retest). The percent R value for each compound must be reported in the test report, and all field measurements must be corrected with the calculated percent R value for that compound by using the following equation:

Reported Results = ((Measured Concentration in Stack))/(%R) × 100.

Finally, the EPA is incorporating by reference the VCS ASTM D6784–16), ''Standard Test Method for Elemental, Oxidized, Particle-Bound and Total Mercury in Flue Gas Generated from Coal-Fired Stationary Sources (Ontario Hydro Method),'' as an acceptable alternative to EPA Method 29 (portion for mercury only) as a method for measuring elemental, oxidized, particle-bound, and total mercury concentrations ranging from approximately 0.5 to 100 micrograms per normal cubic meter. This test method describes equipment and procedures for obtaining samples from effluent ducts and stacks, equipment and procedures for laboratory analysis, and procedures for calculating results. VCS ASTM D6784–16 allows for additional flexibility in the sampling and analytical procedures for the earlier version of the same standard VCS ASTM D6784–02 (Reapproved 2008).

*K. Executive Order 12898: Federal Actions To Address Environmental Justice in Minority Populations and Low-Income Populations*

The EPA believes that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations, and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994).

The documentation for this decision is contained in section IV.B of this preamble and the technical report titled *Risk and Technology Review—Analysis of Demographic Factors for Populations Living Near Refractory Products Manufacturing Source Category Operations,* September 2020, available in the Refractory Products Manufacturing Docket, respectively.

As discussed in section IV.B of this preamble, we performed a demographic analysis for each source category, which is an assessment of risks to individual demographic groups, of the population close to the facilities (within 50 km and within 5 km). In this analysis, we evaluated the distribution of HAP-related cancer risks and noncancer hazards from the Refractory Products Manufacturing source category across different social, demographic, and economic groups within the populations living near operations identified as having the highest risks.

The results of the Refractory Products Manufacturing source category demographic analysis indicate that no one is exposed to a cancer risk at or above 1-in-1 million and no one is exposed to a chronic noncancer HI greater than 1.

The proximity results (irrespective of risk) indicate that the population percentages for ''ages 18 to 64'' and ''ages 65 and up'' demographic categories located within 5 km of refractory products manufacturing facilities and ''ages 65 and up'' demographic categories located within 50 km of refractory products manufacturing facilities are slightly higher than their respective nationwide percentages.

We do not expect this proposal to achieve significant reductions in HAP emissions. The EPA anticipates that this action does not have disproportionately high and adverse human health or environmental effects on minority populations, low-income populations, and/or indigenous peoples, as specified in Executive Order 12898 (59 FR 7629, February 16, 1994) because it does not significantly affect the level of protection provided to human health or the environment. The documentation for this decision is contained in section IV of this preamble and the technical report titled *Risk and Technology Review—Analysis of Demographic Factors for Populations Living Near Refractory Products Manufacturing Source Category Operations,* September 2020, which are available in the Refractory Products Manufacturing Docket, respectively.

## AGENCY FOR INTERNATIONAL DEVELOPMENT

### Privacy Act of 1974; System of Records

**AGENCY:** Agency for International Development (USAID).

**ACTION:** Notice of a Modified System of Records.

**SUMMARY:** The United States Agency for International Development proposes to significantly modify the ''United States Agency for International Development, Partner-Vetting Enhancement Project, USAID–27, Partner-Vetting System, System of Records.'' The purpose of the system is to support the vetting of directors, officers, and other employees of non-governmental organizations that apply to USAID for contracts, grants, cooperative agreements, or other funding. The Agency specifically uses the information collected from the individuals to conduct screening and to mitigate the risk that USAID's funds and USAID-funded activities purposefully or inadvertently provide support to entities or individuals deemed a risk to national security.

**DATES:** Submit comments on or before 12 February 2021. This modified system of records will be effective 12 February 2021 upon publication. The Routine Uses are effective at the close of the comment period.

**ADDRESSES:** You may submit comments:

*Electronic*

- *Federal eRulemaking Portal: http://www.regulations.gov.* Follow the instructions on the website for submitting comments.
- *Email: Privacy@usaid.gov.*

*Paper*

- *Fax:* 202–916–4946.
- *Mail:* Chief Privacy Officer, United States Agency for International Development, 1300 Pennsylvania Avenue NW, Washington, DC 20523.

**FOR FURTHER INFORMATION CONTACT:** Ms. Celida A. Malone, USAID Privacy Program at United States Agency for International Development, Bureau for Management, Office of the Chief Information Officer, Information Assurance Division: ATTN: USAID Privacy Program, 1300 Pennsylvania Avenue NW, Washington, DC 20523, or by phone number at 202–916–4605.

**SUPPLEMENTARY INFORMATION:** For purposes of national-security and counterterrorism vetting, USAID staff use the Partner-Vetting System (PVS) to receive, store, and process organizational information and Personally Identifiable Information (PII) by using USAID Form 500–13, the Partner-Information Form (PIF). See *https://www.usaid.gov/forms/aid-500-13.* The Office of Management and Budget has approved the use of the PIF under the Paperwork Reduction Act. The PII gathered on the PIF, and in PVS, as stated in the current SORN, includes full name (including any aliases or variations of spelling); date and place of birth; government-issued identification information (including, but not limited to, Social Security Number, passport number, or other numbers originated by a government that specifically identify an individual); current mailing address; telephone numbers; email addresses; citizenship; gender; and occupation or other employment data.

USAID is modifying the SORN to delete ''Individuals who are officers or other officials of non-profit, non-governmental organizations who apply for registration with USAID as Private and Voluntary Organizations (PVOs)'' from the ''Categories of Individuals Covered by the System,'' as a result of the Agency's decision to change the registration processes for PVOs. PVOs only must register for the Limited Excess Property Program and the Ocean Freight Reimbursement Program, and to self-certify as part of the application process. USAID also are clarifying under ''Categories of Records in the System'' that the government-issued identification information listed in its existing SORN includes photographic biometric data. We further are adding more detail to the SORN's Routine-Uses Statement, including that we share information with other Federal Departments and Agencies for vetting purposes, and clarifying that the PVS does not contain any classified information.

Dated: October 8, 2020.

**Mark Joseph Johnson,**

*Chief Privacy Officer, United States Agency for International Development.*

**SYSTEM NAME AND NUMBER:**

Partner-Vetting System, USAID–27.

**SECURITY CLASSIFICATION:**

Sensitive but Unclassified.

**SYSTEM LOCATION:**

Amazon Web Services, US–EAST–1, 7600 Doane Drive, Manassas VA 20109.

**SYSTEM MANAGER:**

Chief, Counterterrorism Vetting, Office of Security, United States Agency for International Development, Ronald Reagan Building, 1300 Pennsylvania Avenue NW, Washington, DC 20523.

**AUTHORITY FOR MAINTENANCE OF THE SYSTEM:**

The Foreign Assistance Act of 1961 (FAA), as amended, permits the Administrator of USAID to consider a range of foreign-policy and national-security interests in determining how to provide foreign assistance. Sections 7034 and 7039 of the Department of State, Foreign Operations, and Related Programs Appropriations Act for Fiscal Year 2020 (FY 2020) contain provisions and requirements for the oversight of USAID's programs. Executive Order (E.O.) 9397 created and governs the use of Social Security Numbers.

**PURPOSE OF THE SYSTEM:**

PVS supports the vetting of directors, officers, and other employees of non-governmental organizations that apply to USAID for contracts, grants, cooperative agreements or other funding. The Agency specifically uses the information collected from the individuals to conduct screening, and to mitigate the risk that USAID's funds and USAID-funded activities purposefully or inadvertently provide support to entities or individuals deemed a risk to national security.

**CATEGORIES OF INDIVIDUALS COVERED BY THE SYSTEM:**

Individuals who are directors, officers, or are otherwise employed by either for-profit or non-profit non-governmental organizations that apply for and receive contracts, grants, cooperative agreements, or other types of instruments from USAID; individuals who apply for and receive Personal Services Contracts or other contracts, grants, or cooperative agreements; individuals or organizations that attempt to obtain other assistance or benefits from USAID (excluding for PVOs).

#### CATEGORIES OF RECORDS IN THE SYSTEM:

Full name, Social Security Number, date of birth, place of birth, passport number or permanent resident card number, tax identification number, home address, home telephone number, personal cell phone number, personal email address, work telephone number, work email address, citizenship, sex or gender, photographic biometric information, employment or salary record.

#### RECORD SOURCE CATEGORIES:

USAID may obtain information in this system from a non-governmental organization (USAID contractor or recipient official who is responsible for completing the application package required to obtain funds or assistance from USAID as an award or as a sub-award. In the case of applications by an individual in his/her own capacity, the Agency will collect the information directly from the individual applicant. USAID also may obtain information in this system from public sources, Federal Departments and Agencies that conduct national-security screening, law-enforcement and intelligence-agency record systems, and other Federal Government databases.

#### ROUTINE USES OF RECORDS MAINTAINED IN THE SYSTEM, INCLUDING CATEGORIES OF USERS AND PURPOSES OF SUCH USES:

In addition to those disclosures generally permitted under the Privacy Act (Section 552a (b) of Title 5 of the U.S.C.), the Agency could disclose all or a portion of the records or information contained in this system outside of USAID as a routine use, as follows:

(1) To another Federal Department or Agency, to a court, magistrate, or other administrative body, or to a party in litigation before a court or in an administrative proceeding being conducted by a Federal Department or Agency, when the Government is a party to the judicial or administrative proceedings or has a significant interest in the proceeding where the Department or Agency determines the information to be necessary and relevant.

(2) To any component of the U.S. Department of Justice, or in a proceeding before a court, adjudicative body, or other administrative body before which the Department or Agency is authorized to appear, when; (a) the Department or Agency or any component thereof; or (b) any employee of the Department or Agency in her or his official capacity; or (c) any employee of the Department or Agency in his or her individual capacity where the U.S. Department of Justice or the Department or Agency has agreed to represent the employee; or (d) the United States, when the Department or Agency determines that litigation is likely to affect it or any of its components, is a party to litigation or has an interest in such litigation, and the Department or Agency deems the use of such records by the U.S. Department of Justice or the Department or Agency is relevant and necessary to the litigation provided, however, that in each case the Department or Agency has determined that the disclosure is compatible with the purpose for which the records were collected.

(3) To the U.S. Department of Justice for the purpose of obtaining legal counsel, including whether USAID should disclose the records or information in this system of records outside the Agency.

(4) To a Federal Government Department or Agency that assists USAID for the purpose of vetting, and for the purposes of ensuring accuracy of existing records and updating government records when a match between an applicant and another database is identified.

(5) To disclose information to contractors (Personal Service Contractors or institutional support contractors) in furtherance of the contractor's performance on behalf of USAID under a contract, including contracts that support the partner-vetting program.

(6) To the National Archives and Records Administration (NARA), for the purposes of records-management inspections conducted under the authority of Sections 2904 and 2906 of Title 44 of the U.S.C. and in its role as Archivist.

(7) To appropriate Federal Departments and Agencies, entities, and persons when: (a) USAID suspects or has confirmed that there has been a breach of the system of records; (b) USAID has determined that as a result of the suspected or confirmed breach there is a risk of harm to individuals, USAID (including its information systems, programs, and operations), the Federal Government, or national security; and (c) the disclosure made to such Departments and Agencies, entities, and persons is reasonably necessary to assist in connection with USAID's efforts to respond to the suspected or confirmed breach, or to prevent, minimize, or remedy such harm.

(8) To the Office of Management and Budget (OMB), in connection with review of private relief legislation, as set forth in OMB Circular A–19, at any stage of the legislative coordination and clearance process, as set forth in that Circular.

(9) To another Federal Department or Agency or Federal entity, when USAID determines information from this system of records is reasonably necessary to assist the recipient Department or Agency or entity in: (a) Responding to a suspected or confirmed breach; or (b) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs and operations), the Federal Government, or national security, that might result from a suspected or confirmed Breach.

#### POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

USAID stores records in this system in electronic format. USAID's staff collect paper records that contain information for counterterrorism vetting when USAID's partners need to submit required information other than electronically. USAID's policy is that, following the entry of information contained in such paper copies into PVS, our staff must dispose of the paper copies properly, in accordance with the Agency's procedures for handling information.

#### POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

USAID's staff retrieves records in PVS by individual name, date of birth, place of birth, passport numbers, or other identifying data specified under ''Categories of Records'' in the system, as well as Mission/Program/Department, old awardee identification number (ID), awardee ID, alias, city, vetting status, vetting priority, vetting date, date of final determination, or date USAID created the record.

#### POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

PVS follows NARA Records Schedule Number DAA–0286–2017–0001. USAID maintains vetting records for nine years after making an eligible or ineligible decision, regardless of award status.

#### ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

*For electronic records:* USAID maintains PVS records in a secure cloud database managed by Amazon Web Services on behalf of the Agency. The database is subject to non-disclosure agreement rules of engagement administered by AID Form 545–5. USAID restricts access to vetting requests and results stored in the PVS database to users who are U.S. Government personnel and authorized contractors who need to know this information to perform their duties, who can include the USAID workforce hired and/or appointed by our Missions, Bureaus, and Independent Offices involved in conducting or supporting vetting. The PVS database is housed on, and accessed from, an unclassified computer network. USAID stores vetting results, the analysis of their content, and classified comments separately, outside of PVS, on appropriately classified networks. Computer networks and the PVS database require a user authentication and Agency approval. The Agency maintains and periodically reviews an audit trail to monitor access to the system. Authorized U.S. Government personnel receive instructions in the proper use and protection of PII.

*For paper records:* USAID keeps paper vetting records in an approved security container at our Washington headquarters, and at the relevant locations that conduct vetting-related activities. Access to these records is limited to those authorized U.S. Government personnel and authorized contractors who have a need for the records in the performance of their official duties. USAID does not keep classified records within PVS.

**RECORD ACCESS PROCEDURES:**

Under the Privacy Act, individuals may request access to records about themselves. These individuals must be limited to citizens of the United States or aliens lawfully admitted for permanent residence. If a Federal Department or Agency or a person who is not the individual who is the subject of the records, requests access to records about an individual, the written consent of the individual who is the subject of the records is required.

*Requesters may submit requests to USAID for records under the Privacy Act in the following ways:* (1) By mail to the Freedom of Information Act (FOIA) Office in the Information and Records Division of the Office of Management Services within USAID's Bureau for Management, 1300 Pennsylvania Avenue NW, Room 2.07C, Ronald Reagan Building, Washington, DC 20523–2701; (2) via facsimile to 202–216–3070; (3) via email to *foia@usaid.gov;* (4) on the USAID website, at *www.usaid.gov/foia-requests;* or, (5) in person during regular business hours at USAID, 1300 Pennsylvania Avenue NW, Room 2.07C, Ronald Reagan Building, Washington, DC 20523–2701, or at USAID's overseas Missions.

Requesters who use methods 1 through 4 above may provide a written statement, or may complete and submit USAID Form 507–2, Freedom of Information/Privacy Act Record Request Form, which is available in the following ways: (a) On the USAID website, at *www.usaid.gov/foia-requests;* (b) by email request to *foia@usaid.gov;* or, (c) by writing to USAID's FOIA Office in the Information and Records Division of the Office of Management Services within USAID's Bureau for Management, 1300 Pennsylvania Avenue NW, Room 2.07C, Ronald Reagan Building, Washington, DC 20523–2701. Requesters must provide information that is necessary to identify the records, including the following: The requester's full name; present mailing address; home telephone; work telephone; name of subject, if other than the requester; the requester's relationship to subject; a description of the type of information or specific records; and the purpose of requesting the information. Requesters should provide the system of record (in this case, PVS) identification name and number, if known; and, to facilitate the assembly of records retrieved by Social Security Numbers, the Social Security Number of the individual to whom the record or records pertain.

In addition, requesters who use methods 1 through 4 above must include proof of their identity by providing copies of two (2) source documents notarized by a valid, unexpired notary public. Acceptable proof-of-identity source documents include an unexpired United States passport; Social Security Card (both sides); unexpired U.S. Government employee identity card; unexpired driver's license or identification card issued by a state or United States possession, provided that it contains a photograph; a certificate of United States citizenship; a certificate of naturalization; a card that shows permanent residence in the United States; a United States alien registration receipt card with photograph; a United States military identification card or draft record; or a United States military dependent's identification card.

A requester who use methods 1 through 4 above also must provide a signed and notarized statement that he or she is the person named in the request; that he or she understands that any falsification of this statement is punishable under the provision of Section 1001 of Title 18 of the U.S.C. by a fine, or by imprisonment of not more than five years or, if the offense involves international or domestic terrorism (as defined in Section 2331 of the statute), imprisonment of not more than eight years, or both; and that requesting or obtaining records under false pretenses is punishable under the provisions of Section 552a(i)(3) of Title 5 of the U.S.C. as a misdemeanor, and by a fine of not more than $5,000.

Requesters who use method 5 above must provide such personal identification as is reasonable under the circumstances to verify their identity, including the following: An unexpired United States passport; Social Security Card; unexpired U.S. Government employee identity card; un-expired driver's license or identification card issued by a state or United States possession, provided that it contains a photograph; a certificate of United States citizenship; a certificate of naturalization; a card that shows permanent residence in the United States; a United States alien registration receipt card with photograph; a United States military identification card or draft record; or a United States military dependent's identification card.

**CONTESTING RECORD PROCEDURES:**

See Record Access Procedure.

**NOTIFICATION PROCEDURES:**

See Record Access Procedure.

**EXEMPTIONS PROMULGATED FOR THE SYSTEM:**

Portions of USAID's PVS are exempt from one or more provisions of the Privacy Act (74 FR 9).

Exempt information in this system includes, but is not limited to, the following:

• Results generated from the screening of individuals covered by this notice;

• Intelligence and law-enforcement information related to national security; and

• National-security vetting and counterterrorism screening information, provided to USAID by other Departments and Agencies.

*Section 215.13 of Part 215 of Title 22 of the Code of Federal Regulations,* General Exemptions:

(c) The systems of records USAID is exempt under Section (j)(2) of the Act, the provisions of the Act from which the Agency is exempting them, and the justification for the exemptions, appear below:

(2) Partner-Vetting System (PVS). This system is exempt from Subsections (c)(3) and (4); (d); (e)(1), (2), and (3); (e)(4)(G), (H), and (I); (e)(5) and (8); (f), (g), and (h) of Section 552a of Title 5 of the U.S.C. These exemptions are

necessary to insure the proper functioning of the law-enforcement activity, to protect confidential sources of information, to fulfill promises of confidentiality, to maintain the integrity of law-enforcement procedures, to avoid premature disclosure of the knowledge of criminal activity and the evidentiary basis of possible enforcement actions, to prevent interference with law-enforcement proceedings, to avoid the disclosure of investigative techniques, to avoid endangering law-enforcement personnel, to maintain the ability to obtain candid and necessary information, to fulfill commitments made to sources to protect the confidentiality of information, to avoid endangering these sources, and to facilitate the proper selection or continuance of the best applicants or persons for a given position or contract. Although the primary functions of USAID are not of a law-enforcement nature, the mandate to ensure USAID's funding does not purposefully or inadvertently support entities or individuals deemed to be a risk to national security necessarily requires coordination with law-enforcement and intelligence agencies as well as use of their information. The use of the information by these other Departments or Agencies necessitates the conveyance of these other systems exemptions to protect the information as stated. [57 FR 38277, Aug. 24, 1992, as amended at 74 FR 16, Jan. 2, 2009]

*Section 215.14 of Part 215 of Title 22 of the Code of Federal Regulation,* Specific Exemptions:

(c) The systems of records to be exempted under Section (k) of the Act, the provisions of the Act from which the Agency is exempting them, and the justification for the exemptions, appear below:

(6) Partner Vetting System (PVS). This system is exempt under Subsections (k)(1), (k)(2), and (k)(5) of Section 552a of Title 5 of the U.S.C., and from the provisions of Subsections (c)(3); (d); (e)(1); (e)(4)(G), (H), (I); and (f).5 of Section 552a of U.S.C. 552a. USAID claims these exemptions to protect the materials required by Executive Order to be kept secret in the interest of national defense or foreign policy, to prevent subjects of investigation from frustrating the investigatory process, to ensure the proper functioning and integrity of law-enforcement activities, to prevent the disclosure of investigative techniques, to maintain the ability to obtain candid and necessary information, to fulfill commitments made to sources to protect the confidentiality of information, to avoid endangering these sources, and to facilitate the proper selection or continuance of the best applicants or persons for a given position or contract. [57 FR 38277, Aug. 24, 1992, as amended at 74 FR 17, Jan. 2, 2009]

**HISTORY:**

USAID established the PVS as a new system of records on August 27, 2007 (72FR 39042).

USAID modified the PVS system of records on January 10, 2013 (77 FR 72319).

## DEPARTMENT OF AGRICULTURE

### Food and Nutrition Service

### Food Distribution Program on Indian Reservations 2018 Farm Bill Demonstration Project for Tribal Organizations: Solicitation of Proposals

**AGENCY:** Food and Nutrition Service (FNS), USDA.

**ACTION:** Notice.

**SUMMARY:** The Department of Agriculture (USDA) Food and Nutrition Service (FNS) is soliciting proposals from eligible Tribal Organizations to participate in a demonstration project to purchase agricultural commodities for the Food Distribution Program on Indian Reservations (FDPIR). This demonstration project is authorized under the Agriculture Improvement Act of 2018. Participation in this demonstration project is available to Tribal Organizations that administer FDPIR. Tribal organizations will be selected on a competitive basis and funding will be awarded through a self-determination contract.

**DATES:** Proposals will be accepted until 11:59 p.m. ET on March 15, 2021. See **ADDRESSES** section for submission details.

**ADDRESSES:** Email proposals to *FDPIR-RC@usda.gov* with subject line ''FDPIR Demonstration Project''. Proposals received and date-stamped after the time listed in the **DATES** section of this notice will not be considered. FNS will accept proposals at any time before the deadline and will send a notification of receipt to the return email address on the proposal package, along with a determination of whether the proposal is complete.

**FOR FURTHER INFORMATION CONTACT:** Barbara Lopez, Food Distribution Division, Food and Nutrition Service, U.S. Department of Agriculture, 1320 Braddock Place, Alexandria, Virginia 22314, 703–305–2465, or email *FDPIR-RC@usda.gov.*

**SUPPLEMENTARY INFORMATION:**

I. Program Background
II. 2018 Farm Bill: Demonstration Project for Tribal Organizations
III. Eligibility and Criteria
A. Eligibility of Tribal Organization
B. Agricultural Commodity Criteria
IV. Review, Selection and Evaluation
A. Review and Selection Process
B. Evaluation Criteria
V. Proposal Template

### I. Program Background

The Food Distribution Program on Indian Reservations (FDPIR) is administered by the Food and Nutrition Service (FNS) of the USDA and provides a food package of 100 percent domestically grown foods to income-eligible households living on Indian reservations and to American Indian households residing in approved areas near reservations or in Oklahoma. FDPIR was authorized under the Food Stamp Act of 1977 (Pub. L. 95–113), which was later renamed the Food and Nutrition Act of 2008 (FNA). FDPIR is currently administered by 102 Tribal Organizations and three State agencies and provides benefits and nutrition education services to approximately 276 Federally recognized Tribes across the United States. In FY 2020, the program served approximately 75,500 individuals on an average monthly basis. Each month, participating FDPIR households receive a defined food package to help maintain a nutritionally balanced diet. Based on FNS guidance, participants may select from over 100 domestically grown and produced foods, including fresh fruits and vegetables, a variety of frozen and nonperishable items, and a selection of traditional foods.

FDPIR administering agencies order foods from USDA (*i.e.,* USDA Foods), and the foods are purchased and shipped to Tribal Organizations and State agencies that administer FDPIR. These administering agencies store and distribute the foods, determine applicant eligibility, and provide nutrition education to participants. USDA provides the administering agencies with funds for program administrative costs.

### II. 2018 Farm Bill: Demonstration Project for Tribal Organizations

Currently, the USDA Foods provided in the FDPIR food package are procured by USDA's Agricultural Marketing Service (AMS) in collaboration with FNS. USDA purchases and ships the

USDA Foods to Tribal Organizations and State agencies that administer FDPIR. Tribal Organizations and State agencies store and distribute the foods, determine applicant eligibility, and provide nutrition education to recipients. Section 4003(b) of the Agriculture Improvement Act of 2018 (Pub. L. 115–334, the 2018 Farm Bill) establishes a demonstration project for one or more Tribal Organization(s) within FDPIR to enter into self-determination contracts for them to purchase foods for their Indian Tribe, instead of USDA, for inclusion in the FDPIR food package. Section 4003(b)(1)(E) of the 2018 Farm Bill defines self-determination contract as: *The term ''self-determination contract'' has the meaning given the term in section 4 of the Indian Self-Determination and Education Assistance Act (25 U.S.C. 5304).* Under Section 4003(b)(2), the 2018 Farm Bill further states that the ''*Secretary shall establish a demonstration project under which 1 or more tribal organizations may enter into self-determination contracts to purchase agricultural commodities under the food distribution program for the Indian reservation of that tribal organization.*'' Given the 2018 Farm Bill's specific reference to 25 U.S.C. 5304 and self-determination contracts only, Tribal Organizations selected to participate in this demonstration project would need to enter into a self-determination contract with FNS. No other type of funding agreement will be allowed.

Self-determination contracts, as defined under Section 4 of the Indian Self-Determination and Education Assistance Act (ISDEAA), Public Law 93–638 (25 U.S.C. 5304), as amended, allow a Tribal Organization to have more control over the governmental affairs of their Organizations, fostering further self-governance. The 2018 Farm Bill provision under Section 4003(b) supports Tribal Organization self-governance by specifically allowing Tribal Organizations to procure FDPIR food instead of USDA. This provision also allows FNS to familiarize itself with these types of contracts and to assess how FDPIR could operate under such a food distribution program model.

FNS received $3.0 million to support this demonstration project through the Further Consolidated Appropriations Act of 2020 (Pub. L. 116–94). Section 4003(b)(6)(B) of the 2018 Farm Bill states that only funds appropriated to the Secretary of Agriculture in advance to carry out Section 4003(b) may be used to carry out this demonstration project. Per this statutory language, the only funds currently available to carry out this demonstration project is the $3.0 million appropriated by Congress in the Further Consolidated Appropriations Act of 2020 (Pub. L. 116–94). This appropriated amount must cover all costs associated with the demonstration project, including food procurement costs and contract support costs. In addition, FNS is interested in ensuring that more than one Tribal Organization participates in this demonstration project. Given the amount of available funds, individual proposals may not exceed $1.5 million. Should additional funding be appropriated by Congress for this demonstration project, FNS reserves the right to use this solicitation to select additional proposals or extend an existing contract already awarded under this demonstration project.

The 2018 Farm Bill outlined the following criteria for Tribal Organization participation and procurement of agricultural commodities:

- Selection of Tribal Organization (Section 4003(b)(3)(B) of the 2018 Farm Bill): The Secretary of USDA shall select for participation in the demonstration project Tribal Organizations that: Are successfully administering FDPIR under section 4(b)(2)(B) of the Food and Nutrition Act of 2008 (7 U.S.C. 2013(b)(2)(B)); have the capacity to purchase agricultural commodities for their FDPIR program; and meet any other criteria determined by the Secretary of USDA after consultation with the Secretary of the Interior and Indian Tribes to participate in the demonstration project.
- Procurement of Agricultural Commodities (Section 4003(b)(4) of the 2018 Farm Bill): Tribal Organizations selected to participate in the demonstration project shall only purchase agricultural commodities that: Are domestically produced; will supplant, not supplement, the type of agricultural commodities in the existing FDPIR food package; are of similar or higher nutritional value as the food(s) it is replacing in the existing food package; and meet any other criteria as determined by the Secretary of USDA.

## III. Eligibility and Criteria

During fiscal years (FY) 2019, 2020 and 2021, FNS engaged in six Tribal consultation meetings with Tribal leaders to receive input and feedback on the criteria for FDPIR Tribes to participate in the demonstration project. This feedback has been incorporated into the criteria outlined below to the greatest extent possible.

### *A. Eligibility of Tribal Organization*

1. Tribal Organization must administer FDPIR at the time a proposal is due, either under a direct agreement with FNS or under an agreement with a State agency. The self-determination contract will be between FNS and the Tribal Organization.

2. Prior to contract negotiations, a Tribal Resolution from the Tribal Council authorizing the Tribal Organization to participate in this demonstration project must be submitted with the proposal. Tribal Organizations are encouraged to submit a Tribal Resolution with its proposal. However, if the Tribal Resolution is unavailable at the time the proposal is due, a Tribal Organization may alternatively submit a statement affirming that a Tribal Resolution with this authorization has been requested of the Tribal Council and provide the date the Tribal Resolution is expected to be received in their proposal. Tribal Resolutions must be received no later than 30 days after notification of being selected or the proposal will be disqualified and will not be selected for funding.

3. Tribal Organization must demonstrate success in administering FDPIR. FNS will evaluate this based on the following:

- Tribal Organization must have a current Plan of Operation on file with FNS or with the State agency, if applicable, that meets the regulatory requirements of 7 CFR part 253;
- Tribal Organization must be in compliance with regulatory inventory storage and inventory management requirements at 7 CFR 250.12; and
- Tribal Organization must have no outstanding financial or inventory-related FNS management evaluation findings. If an FNS management evaluation has not been conducted within the last three years, a copy of the most recent Tribal audit report must be submitted.

4. Tribal Organization must have capacity to purchase one or more agricultural commodities meeting all the criteria under III.B. of this notice.

5. Tribal Organization must provide a budget proposal and narrative with all associated costs that will be carried out under the contract. The budget proposal, including all contract support costs (CSC), may not exceed $1.5 million.

6. Tribal Organization must submit a complete proposal by the published due date. A proposal template is provided as part of this notice in section V. The template is not mandatory; a proposal will be accepted for review as long as it

meets all the applicable criteria in this notice.

*B. Agricultural Commodity Criteria*

In addition to the information and documentation required under III.A. of this notice, a Tribal Organization must also provide the following information in its proposal:

1. Identification of the current FDPIR food(s) the Tribal Organization intends to supplant (*i.e.,* replace) in the food package. All foods currently offered by USDA for the FDPIR program, including foods offered intermittently (*e.g.,* traditional foods, bonus foods), are eligible to be supplanted if proposed by the Tribal Organization.

2. A description of the available food(s) proposed for purchase and inclusion in the Tribal Organization's FDPIR program. In its description, Tribal Organization must provide the following:

▪ An attestation that the proposed food(s) is a product grown, processed, and otherwise prepared for sale or distribution exclusively in the United States.

▪ A description of the nutritional value of the proposed food(s) and an explanation of how the proposed food(s) is of similar or higher nutritional value than the food(s) being supplanted. The proposed food(s) does not need to provide the same specific nutrient profile as the food it is replacing. Alternately, Tribal Organizations may describe how the proposed food(s) is nutritionally similar to items in the FDPIR food package category it is replacing. It is not necessary to draw a direct comparison to the specific food being supplanted. For example:

• If a Tribal Organization proposes to supplant frozen blueberries in the FDPIR food package fruit category with a berry traditional to its culture, the Tribal Organization may explain how the traditional berry is nutritionally similar to other fruits currently offered in the fruit category. A comparison of the specific nutrients in frozen blueberries compared to the traditional berry is not required.

• For FDPIR food package categories, please reference Exhibit O: Food Distribution Program on Indian Reservations Monthly Distribution Guide Rates by Household Size (Distribution Rates).

▪ A description of Tribal Organization's capacity to obtain the proposed food(s) in a quantity that meets estimated participant demand. In its description, the Tribal Organization must confirm proposed food(s) will be offered to all participants served by its program.

▪ The estimated number of months the proposed food(s) will be distributed to Tribal Organization's existing FDPIR caseload. A minimum six-month distribution is required (consecutive or non-consecutive).

▪ Documentation that the proposed food(s) is commercially available (*i.e.,* presently being sold through commercial channels to the public by the vendor(s) from which the Tribal Organization is proposing to procure the food(s)).

▪ Letter(s) of Support from vendor(s) which will supply the food(s). Letter(s) should certify that vendor(s) sells food(s) commercially and offers food(s) that is a product grown, processed, and otherwise prepared for sale or distribution entirely in the United States.

**IV. Review, Selection and Evaluation**

*A. Review and Selection Process*

Funding, under this solicitation, will be provided via self-determination contracts, as defined by Section 4 of the ISDEAA, to at least two Tribal Organizations that meet the eligibility criteria established under section III. above. As part of the selection process, FNS will pre-screen and review all proposals to ensure they contain the required documents and information. Upon receiving a proposal, FNS will determine whether the proposal is complete within 7 calendar days. If a proposal is received before the deadline but is determined to be incomplete, the applicant will be notified and given the opportunity to submit missing items within 7 calendar days of being notified. If there are less than 7 calendar days from the date of notification and the deadline or the notification occurs after the deadline has passed, the applicant will still be given 7 calendar days to submit the missing items, but this is only available to proposals that were initially received before the deadline. Any initial proposals, whether complete or incomplete, received after the deadline will not be considered.

Timely, complete proposals will be given to the FNS review panel to be evaluated and scored against the ranking criteria. Proposals will be evaluated using the four ranking criteria listed below, under section IV.B. Evaluation Criteria, with a maximum achievable total of 100 points. The FNS review panel may ask applicants for additional clarification prior to final selection.

Final award selections will be approved by the FNS Administrator. Tribal Organizations not selected for award will be notified in writing. FNS reserves the right to use this solicitation to select additional proposals or extend an existing contract already awarded under this demonstration project should additional funds be made available through future appropriations.

*B. Evaluation Criteria*

The following selection criteria will be used to evaluate proposals for this demonstration project. FNS reserves the right to select proposals to meet geographical representation or project diversity notwithstanding the points awarded to each proposal. To the extent possible, FNS will ensure that the selected proposals, when considered as a group, test a range of geographic location, program size, and diversity in food selection. Tribal leaders, during consultation, also requested FNS consider selecting proposals that test a range of programs as much as possible.

*Program Administration: 20 points.* A proposal will be evaluated under this criterion for applicant's effectiveness in successfully administering FDPIR. Evaluation will be based on the factors listed under section III.A.3 of this notice.

*Project Viability: 30 points.* A proposal will be evaluated on its strength in demonstrating Tribal Organization capacity to purchase agricultural commodities for the FDPIR program. The panel will evaluate the project viability by examining: (1) The applicant's ability to obtain the proposed food(s) in a quantity that meets estimated participant demand; (2) the applicant's ability to obtain the proposed food(s) for a minimum six-month distribution (consecutive or non-consecutive); and (3) the vendor letter(s) of support included with proposal.

*Agricultural Commodity Description: 20 points.* A proposal will be evaluated under this criterion for the agricultural commodity it proposes to introduce to the FDPIR program and the degree to which the proposed food meets project requirements, including that: (1) The proposed food(s) is a product grown, processed, and otherwise prepared for sale or distribution entirely in the United States; and (2) the proposed food(s) is of similar or higher nutritional value than the food(s) being supplanted.

*Budget: 30 points.* A proposal will be evaluated under this criterion for the degree to which its proposed budget is reasonable, necessary, and allocable to costs associated with this demonstration project during its proposed period of performance. The budget narrative should correspond with the proposed line item budget and must justify and support the bona fide needs of the budget's line item costs. Proposal budgets must not exceed $1.5 million, including contract support costs.

**V. Proposal Template**

The following proposal template is provided for the convenience of applicants. The use of this template is recommended but not mandatory. A proposal will be accepted for review as long as it meets all the applicable criteria in this notice. Email completed proposals to *FDPIR-RC@usda.gov* with subject line ''FDPIR Demonstration Project''. Proposals will be accepted until 11:59 p.m. ET on March 15, 2021.

*A. Tribal Organization Information*

Please provide the following information:

1. Full name, address, and telephone number of Tribal Organization proposing to contract.
2. Full name, address, telephone number, and email of Tribal Organization's main contact for this proposal.
3. A copy of signed Federal-State Agreement (FNS–74) with FNS or of signed agreement with the FDPIR State agency.
4. A copy of current FDPIR Plan of Operation.
5. A copy of most recent FNS FDPIR management evaluation within the last three (3) years or, if the management evaluation is not available, copy of most recent Tribal audit report.
6. A Tribal Resolution from the Tribal Council authorizing the Tribal Organization to participate in this demonstration project or a statement affirming that a Tribal Resolution with this authorization has been requested of the Tribal Council and will be submitted prior to contract negotiations and within 30 days, if selected.
7. A detailed description of Tribal Organization's capacity to purchase the proposed food(s) for its FDPIR program.

*B. Agricultural Commodity Procurement*

Please provide the following information:

1. Identification of food(s) from the current FDPIR food package the Tribal Organization intends to supplant (*i.e.,* replace).
2. A detailed description of food(s) proposed for purchase and inclusion in the FDPIR program by Tribal Organization. Specifically, the following information must be included:

a. An attestation that the proposed food(s) is a product grown, processed, and otherwise prepared for sale or distribution exclusively in the United States. See also #5 of this proposal template.

b. A description of the nutritional value of the proposed food(s) and explanation of how the proposed food(s) is of similar or higher nutritional value than the food(s) being supplanted. Alternately, Tribal Organizations may describe how the proposed food(s) is nutritionally similar to the items in the FDPIR food package category of the food it is replacing rather than drawing a direct nutritional comparison to the specific food being supplanted. For example:

▪ If a Tribal Organization proposes to supplant frozen blueberries in the FDPIR food package fruit category (Exhibit O) with a berry traditional to its culture, the Tribal Organization may explain how the traditional berry is nutritionally similar to other fruits currently offered in the fruit category. A comparison of the specific nutrients in frozen blueberries compared to the traditional berry is not required.

c. A description of Tribal Organization's capacity to obtain the proposed food(s) in a quantity that meets estimated participant demand. In the description, Tribal Organization must confirm proposed food(s) will be offered to all FDPIR participants served by its program.

d. The estimated number of months the proposed food(s) will be distributed to Tribal Organization's existing FDPIR caseload. A minimum six-month distribution is required (consecutive or non-consecutive).

e. Documentation that the proposed food(s) is commercially available (*i.e.,* presently being sold to the public through commercial channels by the vendor(s) from which the Tribal Organization is proposing to procure the food(s)). See also #5 of this proposal template.

3. A proposed budget and narrative of estimated costs. Budget proposal, including all contract support costs, may not exceed $1.5 million. The proposed budget must include the following:

a. The total amount of funds requested.

b. A budget narrative that describes all major line-item expenditures that are proposed.

c. A breakout of the amount of funds requested by the following categories:

▪ Food purchases
▪ Personnel
▪ Equipment
▪ Materials and supplies
▪ Travel
▪ Other allowable costs

d. An estimate and description of all contract support costs.

4. A proposed period of performance to perform contract activities.
5. Letter(s) of Support from vendor(s) which will supply the food(s). Letter(s) should certify that vendor(s):

▪ Sells food(s) commercially; and
▪ Offers food(s) that is a product grown, processed, and otherwise prepared for sale or distribution exclusively in the United States.

**Pamilyn Miller,**

## DEPARTMENT OF AGRICULTURE

### Forest Service

### Newspapers Used for Publication of Legal Notices by the Pacific Northwest Region; Oregon, Washington, and Parts of California

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice.

**SUMMARY:** This notice lists the newspapers that will be used by the Ranger Districts, Forests and Regional Office of the Pacific Northwest Region to publish legal notices required under Agency regulations. The intended effect of this action is to inform interested members of the public which newspapers the Forest Service will use to publish notices of proposed actions and notices of decision. This will provide the public with constructive notice of Forest Service proposals and decisions, provide information on the procedures to comment, object, or appeal, and establish the date that the Forest Service will use to determine if comments, appeals, or objection were timely.

**DATES:** Publication of legal notices in the listed newspapers begins on the date of this publication. This list of newspapers will remain in effect until a new list is published in the **Federal Register**.

**FOR FURTHER INFORMATION CONTACT:** Sue Dixon, Regional Environmental Coordinator, Pacific Northwest Region, 1220 Southwest Third Avenue, Portland, OR 97204 and by phone at (503) 808–2276 or by email at *sue.dixon@usda.gov.*

**SUPPLEMENTARY INFORMATION:** The administrative procedures at 36 CFR 218, and 219 require the Forest Service to publish notices in a newspaper of general circulation. The content of the notices is specified in 36 CFR 218 and 219. In general, the notices will identify: The decision or project by title or subject matter; the name and title of the official making the decision; how to obtain additional information; and where and how to file comments or appeals/objection. The date the notice is published will be used to establish the official date for the beginning of the comment, appeal, or objection period.

**Pacific Northwest Regional Office**

**Regional Forester**

Notices for Comment and Decisions and Objections affecting Oregon Forests:-''*The Oregonian*'', Portland, Oregon, for National Forest System Lands in the State of Oregon for any projects of Region-wide impact, or for any projects affecting more than one National Forest or National Grassland in Oregon.

Notices for Comment and Decisions and Objections affecting Washington Forests:—''*The Seattle Times*'', Seattle, Washington, for National Forest System Lands in the State of Washington for any projects of Region-wide impact, or for any projects affecting more than one National Forest or National Grassland in Washington.

## DEPARTMENT OF COMMERCE

### Foreign-Trade Zones Board

**[B–1–2021]**

### Foreign-Trade Zone 114—Peoria, Illinois; Application for Reorganization under Alternative Site Framework

An application has been submitted to the Foreign-Trade Zones (FTZ) Board by the Economic Development Council, Inc., grantee of FTZ 114, requesting authority to reorganize the zone under the alternative site framework (ASF) adopted by the FTZ Board (15 CFR Sec. 400.2(c)). The ASF is an option for grantees for the establishment or reorganization of zones and can permit significantly greater flexibility in the designation of new subzones or ''usage-driven'' FTZ sites for operators/users located within a grantee's ''service area'' in the context of the FTZ Board's standard 2,000-acre activation limit for a zone. The application was submitted pursuant to the Foreign-Trade Zones Act, as amended (19 U.S.C. 81a-81u), and the regulations of the Board (15 CFR part 400). It was formally docketed on January 8, 2021.

FTZ 114 was approved by the FTZ Board on December 21, 1984 (Board Order 288, 50 FR 1606, January 11, 1985) and expanded on October 16, 2009 (Board Order 1647, 74 FR 55813, October 29, 2009).

The current zone includes the following sites: *Site 1* (88 acres)—Peoria Barge Terminal, Inc., 1925 Darst St., Peoria; *Site 2* (150 acres)—United Facilities, Inc., 603 N. Main St., East Peoria; *Site 4* (2 acres)—CDO Distribution, Inc., 5703 Smithville Rd., Bartonville; *Site 5* (37 acres)—KMI Sales, Inc., 278 Koch St., Pekin; *Site 6* (17 acres)—Export Packaging Company, 6409 West Smithville Rd., Bartonville; *Site 7* (360 acres)—Rantoul Airport, 601 S. Century Boulevard, Rantoul; *Site 8* (333 acres)—Logistics Park Galesburg, 659 Knox Road, Galesburg; and, *Site 9* (3 acres)—HK Logistics, 2314 East Wilkins Dr., Mossville.

The grantee's proposed service area under the ASF would be Peoria, Cass, Champaign, Dewitt, Ford, Fulton, Knox, Livingston, Logan, Macon, Marshall, Mason, McDonough, McLean, Menard, Piatt, Putnam, Sangamon, Schuyler, Stark, Tazewell, Woodford and portions of Bureau and LaSalle Counties, Illinois, as described in the application. If approved, the grantee would be able to serve sites throughout the service area based on companies' needs for FTZ designation. The application indicates that the proposed service area is within and adjacent to the Peoria Customs and Border Protection port of entry.

The applicant is requesting authority to reorganize its zone to include existing Sites 7 and 8 as ''magnet'' sites and existing Sites 1, 2, 4, 5 and 6 as ''usage-driven'' sites. The applicant is proposing that existing Site 9 be removed from the zone. The applicant is also requesting approval of a subzone for Rivian Automotive, LLC at the following sites: *Proposed Site 1* (528 acres)—110 N. Rivian Motorway, Normal, McLean County; *Proposed Site 2* (16 acres)—2601 W. College Avenue, Normal, McLean County; and, *Proposed Site 3* (65.6 acres)—301 W. Kerrick Road, Normal, McLean County. The application would have no impact on FTZ 114's previously authorized subzones.

In accordance with the FTZ Board's regulations, Elizabeth Whiteman of the FTZ Staff is designated examiner to evaluate and analyze the facts and information presented in the application and case record and to report findings and recommendations to the FTZ Board.

Public comment is invited from interested parties. Submissions shall be addressed to the FTZ Board's Executive Secretary and sent to: *ftz@trade.gov.* The closing period for their receipt is March 15, 2021. Rebuttal comments in response to material submitted during the foregoing period may be submitted during the subsequent 15-day period to March 30, 2021.

A copy of the application will be available for public inspection in the ''Reading Room'' section of the FTZ Board's website, which is accessible via *www.trade.gov/ftz.* For further information, contact Elizabeth Whiteman at *Elizabeth.Whiteman@trade.gov.*

Dated: January 8, 2021.

**Andrew McGilvray,**

*Executive Secretary.*

## DEPARTMENT OF COMMERCE

### Bureau of Industry and Security

### Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Request for Appointment of a Technical Advisory Committee

**AGENCY:** Bureau of Industry and Security, Commerce.

**ACTION:** Notice of information collection, request for comment.

**SUMMARY:** The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public

comment preceding submission of the collection to OMB.

**DATES:** To ensure consideration, comments regarding this proposed information collection must be received on or before March 15, 2021.

**ADDRESSES:** Interested persons are invited to submit comments by email to Mark Crace, IC Liaison, Bureau of Industry and Security, at *mark.crace@bis.doc.gov* or to *PRAcomments@doc.gov.* Please reference OMB Control Number 0694–0100 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or specific questions related to collection activities should be directed to Mark Crace, IC Liaison, Bureau of Industry and Security, phone 202–482–8093 or by email at *mark.crace@bis.doc.gov.*

**SUPPLEMENTARY INFORMATION:**

## I. Abstract

The Technical Advisory Committees (TACs) were established to advise and assist the U.S. Government on export control matters. In managing the operations of the TACs, the Department of Commerce is responsible for implementing the policies and procedures prescribed in the Federal Advisory Committee Act. The Bureau of Industry and Security provides technical and administrative support for the TACs, such as scheduling a conference room, publishing TAC meeting notices in the **Federal Register**, circulating an agenda, copying documents, etc. The TACs advise the government on proposed revisions to export control lists, licensing procedures, assessments of the foreign availability of controlled products, and export control regulations.

## II. Method of Collection

Supplement No. 2 to Part 730 of the Export Administration Regulations, states that any producers of articles, materials, or supplies, including technology, software, and other information, that are subject to export controls, or are being considered for such controls because of their significance to the national security of the United States, may request (via a letter or an attachment to an email) the Secretary of Commerce to establish a technical advisory committee. Such requests are sent to the Assistant Secretary of Export Administration.

## III. Data

*OMB Control Number:* 0694–0100.

*Form Number(s):* None.

*Type of Review:* Regular submission.

*Affected Public:* Business or other for-profit organizations.

*Estimated Number of Respondents:* 1.

*Estimated Time per Response:* 5 hours.

*Estimated Total Annual Burden Hours:* 5.

*Estimated Total Annual Cost to Public:* 0.

*Respondent's Obligation:* Voluntary.

*Legal Authority:* Section 4812(b)(7) and 4814(b)(1)(B) of the Export Control Reform Act (ECRA).

## IV. Request for Comments

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

**Sheleen Dumas,**

*Department PRA Clearance Officer, Office of the Chief Information Officer, Commerce Department.*

## International Trade Administration

**[A–580–876]**

## Welded Line Pipe From the Republic of Korea: Notice of Court Decision Not in Harmony With the Amended Final Results in the Antidumping Duty Administrative Review and Notice of Amended Final Results

**AGENCY:** Enforcement and Compliance, International Trade Administration, Department of Commerce.

**SUMMARY:** On January 4, 2021, the U.S. Court of International Trade (CIT) sustained the Department of Commerce's (Commerce's) second remand results pertaining to the first administrative review of the antidumping duty order on welded line pipe (WLP) from the Republic of Korea (Korea) covering the period of review (POR) of May 22, 2015 through November 30, 2016. Commerce is notifying the public that the CIT's final judgment in this case is not in harmony with Commerce's amended final results in the first administrative review of WLP from Korea. Consistent with the CIT's final judgment, Commerce is amending the weighted-average dumping margins calculated for Hyundai Steel Company/Hyundai HYSCO (Hyundai Steel), SeAH Steel Corporation (SeAH), and the 22 non-selected companies

**DATES:** Applicable January 14, 2021.

**FOR FURTHER INFORMATION CONTACT:** David Goldberger or Joshua Tucker, AD/CVD Operations Office II, Enforcement and Compliance, International Trade Administration, U.S. Department of Commerce, 1401 Constitution Avenue NW, Washington, DC 20230; telephone: (202) 482–4136 and (202) 482–2044, respectively.

**SUPPLEMENTARY INFORMATION:**

## Background

On July 18, 2018, Commerce published its *Final Results* in the first administrative review of WLP from Korea.[1] Subsequently, on August 10, 2018, Commerce published its *Amended Final Results.*[2] As reflected in the *Amended Final Results,* Commerce calculated weighted-average dumping margins of 18.77 percent for Hyundai

[1] *See Welded Line Pipe from the Republic of Korea: Final Results of Antidumping Duty Administrative Review; 2015–2016,* 83 FR 33919 (July 18, 2018) (*Final Results*).

[2] *See Welded Line Pipe from the Republic of Korea: Amended Final Results of Antidumping Duty Administrative Review; 2015–2016,* 83 FR 39682 (August 10, 2018) (*Amended Final Results*).

Steel, 14.39 percent for SeAH, and 16.58 percent for the 22 companies receiving the review-specific average rate.[3]

Hyundai Steel, SeAH, NEXTEEL Co., Ltd. (NEXTEEL), and Husteel Co., Ltd. appealed Commerce's *Final Results,* as amended by the *Amended Final Results,* to the CIT. On January 3, 2020, the CIT remanded for Commerce to explain or reconsider its: (1) Rejection of SeAH's third country sales to calculate normal value (NV); (2) finding of a particular market situation (PMS) in the Korean market for the hot-rolled coil input; and (3) PMS adjustment to the respondents' cost of production (COP) for the purposes of the sales-below-cost test.[4] On April 1, 2020, Commerce issued the First Remand Results, in which, under protest, it: (1) Relied on SeAH's third-country sales to calculate NV; (2) determined that there is no PMS that distorts the COP of WLP; and (3) recalculated the weighted-average dumping margins for Hyundai Steel and SeAH without the PMS adjustment to the COP for the sales-below-cost test.[5] As a result, Commerce calculated revised weighted-average dumping margins for Hyundai Steel and SeAH of 9.24 percent and 4.70 percent, respectively. In addition, as a result of Commerce's recalculation of the weighted-average dumping margins for the mandatory respondents, Commerce revised the review-specific average rate applied to the non-selected respondents to 6.97 percent.

The CIT sustained Commerce's First Remand Results with respect to these issues.[6] In addition, the CIT granted Commerce's request for a remand to consider whether to apply a constructed export price (CEP) offset to SeAH's Canadian sales.[7] On September 16, 2020, Commerce issued its Second Remand Results, in which it: (1) Granted SeAH a CEP offset; (2) calculated a revised weighted-average dumping margin for SeAH of 4.23 percent; and (3) and revised the review-specific average rate applied to the non-selected respondents to 6.74 percent.[8] On January 4, 2021, the CIT sustained Commerce's Second Remand Results.

## Timken Notice

In its decision in *Timken,*[9] as clarified by *Diamond Sawblades,*[10] the Court of Appeals for the Federal Circuit held that, pursuant to section 516A(c) and (e) of the Tariff Act of 1930, as amended (the Act), Commerce must publish a notice of a court decision that is not ''in harmony'' with a Commerce determination and must suspend liquidation of entries pending a ''conclusive'' court decision.[11] The CIT's January 4, 2021 judgment in this case constitutes a final decision of that court that is not in harmony with Commerce's *Final Results,* as amended by the *Amended Final Results.* This notice is published in fulfillment of the publication requirements of *Timken* and section 516A of the Act.

## Amended Final Results

Because there is now a final court decision, Commerce is amending its *Amended Final Results* with respect to the weighted-average dumping margins for Hyundai Steel, SeAH, and the non-selected respondents.[12] The revised weighted-average dumping margins are as follows:

| Exporter/producer | Weighted-average dumping margin (percent) |
|---|---|
| Hyundai Steel Company/ Hyundai HYSCO | 9.24 |
| SeAH Steel Corporation | 4.23 |
| AJU BESTEEL CO., Ltd | 6.74 |
| Daewoo International Corporation | 6.74 |
| Dong Yang Steel Pipe | 6.74 |
| Dongbu Incheon Steel Co | 6.74 |
| Dongbu Steel Co., Ltd | 6.74 |
| Dongkuk Steel Mill | 6.74 |
| EEW Korea Co, Ltd | 6.74 |
| HISTEEL Co., Ltd | 6.74 |
| Husteel Co., Ltd | 6.74 |
| Keonwood Metals Co., Ltd | 6.74 |

## Cash Deposit Requirements

Because there have been subsequent administrative reviews involving Hyundai Steel, SeAH, and the non-selected respondents covered by the review-specific average rate, the cash deposit rates for these exporters will remain the rate established in the most recently-completed administrative review in which they received a cash deposit rate.

## Liquidation of Suspended Entries

In the event that the CIT's final judgment is not appealed or, if appealed, is upheld by a final and conclusive court decision, Commerce will instruct U.S. Customs and Border Protection (CBP) to assess antidumping duties on unliquidated entries of subject merchandise based on the importer-specific assessment rates recalculated for: (1) Hyundai Steel in the First Remand Results; and (2) SeAH and the non-selected respondents covered by the review-specific average rate (subject to this litigation) in the Second Remand Results.

Consistent with Commerce's assessment practice, for entries of subject merchandise during the POR produced by Hyundai Steel or SeAH for which they did not know that the merchandise was destined for the United States, we will instruct CBP to liquidate unreviewed entries at the all others rate if there is no rate for the intermediate company(ies) involved in the transaction.[13]

Finally, during the pendency of litigation, including any appeal, Commerce remains enjoined by Court order from liquidating entries: (1) Produced and/or exported by Hyundai Steel, SeAH, NEXTEEL, or Husteel; (2) the subject of *Final Results,* as amended by the *Amended Final Results;* (2) entered, or were withdrawn from

## DEPARTMENT OF COMMERCE

### National Institute of Standards and Technology

### Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Organization of Scientific Area Committees for Forensic Science (OSAC) Membership Application

**AGENCY:** National Institute of Standards and Technology (NIST), Commerce.

**ACTION:** Notice of information collection, request for comment.

**SUMMARY:** The Department of Commerce, in accordance with the Paperwork Reduction Act of 1995 (PRA), invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment preceding submission of the collection to OMB.

**DATES:** To ensure consideration, comments regarding this proposed information collection must be received on or before March 15, 2021.

**ADDRESSES:** Interested persons are invited to submit written comments by mail to Maureen O'Reilly, Management Analyst, NIST, at *PRAcomments@doc.gov.* Please reference OMB Control Number 0693–0070 in the subject line of your comments. Do not submit Confidential Business Information or otherwise sensitive or protected information.

**FOR FURTHER INFORMATION CONTACT:** Requests for additional information or specific questions related to collection activities should be directed to John Paul Jones II, Program Manager, Office of Special Programs, NIST, 301–975–2782; *john.jones@nist.gov.*

**SUPPLEMENTARY INFORMATION:**

**I. Abstract**

NIST established the Organization of Scientific Area Committees for Forensic Science (OSAC) to enable a coordinated U.S. approach to standards for the forensic science disciplines. NIST seeks broad participation from forensic science practitioners, researchers, meteorologists, statisticians, accreditation bodes, defense, and prosecution. NIST solicits self-nominations from these communities, using the OSAC Membership Application, to identify individuals interested and qualified to contribute.

**II. Method of Collection**

The OSAC Membership Application may be completed and submitted only via web-based application.

**III. Data**

*OMB Control Number:* 0693–0070.

*Form Number(s):* None.

*Type of Review:* Regular submission, extension of a current information collection.

*Affected Public:* Individuals or households.

*Estimated Number of Respondents:* 1,000.

*Estimated Time per Response:* 30 minutes.

*Estimated Total Annual Burden Hours:* 500.

*Estimated Total Annual Cost to Public:* $0.

*Respondent's Obligation:* Voluntary.

*Legal Authority:*

**IV. Request for Comments**

We are soliciting public comments to permit the Department/Bureau to: (a) Evaluate whether the proposed information collection is necessary for the proper functions of the Department, including whether the information will have practical utility; (b) Evaluate the accuracy of our estimate of the time and cost burden for this proposed collection, including the validity of the methodology and assumptions used; (c) Evaluate ways to enhance the quality, utility, and clarity of the information to be collected; and (d) Minimize the reporting burden on those who are to respond, including the use of automated collection techniques or other forms of information technology.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you may ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

**Sheleen Dumas,**

## New England Fishery Management Council; Public Meeting

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of public meeting.

**SUMMARY:** The New England Fishery Management Council (Council) is scheduling a public meeting of its Skate Committee via webinar to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

**DATES:** This webinar will be held on Thursday, March 25, 2021 at 9 a.m. Webinar registration URL information: *https://attendee.gotowebinar.com/register/4163676123767056652.*

**ADDRESSES:** *Council address:* New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

**FOR FURTHER INFORMATION CONTACT:** Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

**SUPPLEMENTARY INFORMATION:**

**Agenda**

The Skate Committee will review supplemental scoping comments and background work of the Plan Development Team; Committee work on tasking the PDT, developing alternatives or other aspects of Amendment 5 to the Northeast Skate Complex Fishery Management. They will receive an update on progress and timeline of the Skate 2022–23 Specifications. Other business may be discussed, as necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

**Special Accommodations**

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

## National Oceanic and Atmospheric Administration

**[RTID 0648–XA799]**

## Pacific Fishery Management Council; Public Meeting

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of a public meeting.

**SUMMARY:** The Pacific Fishery Management Council's (Pacific Council) will convene a webinar meeting of its Groundfish Management Team (GMT) to discuss items on the Pacific Council's March 2021 meeting agenda. This meeting is open to the public.

**DATES:** The online meeting will be held Wednesday, February 17, 2021, from 1 p.m. to 4 p.m., Pacific Standard Time (PST). The scheduled ending time for this GMT meeting is an estimate, the meeting will adjourn when business for the day is completed.

**ADDRESSES:** This meeting will be held online. Specific meeting information, including directions on how to join the meeting and system requirements will be provided in the meeting announcement on the Pacific Council's website (see *www.pcouncil.org*). You may send an email to Mr. Kris Kleinschmidt (*kris.kleinschmidt@noaa.gov*) or contact him at (503) 820–2412 for technical assistance.

*Council address:* Pacific Fishery Management Council, 7700 NE Ambassador Place, Suite 101, Portland, OR 97220–1384.

**FOR FURTHER INFORMATION CONTACT:** Todd Phillips, Staff Officer, Pacific Council; telephone: (503) 820–2426; email: *todd.phillips@noaa.gov.*

**SUPPLEMENTARY INFORMATION:** The primary purpose of the GMT webinar is to prepare for the Pacific Council's March 2021 agenda items. The GMT will discuss items primarily related to the Pacific Council's groundfish management and administrative agenda items. A detailed agenda for the webinar will be available on the Pacific Council's website prior to the meeting. The GMT may also address other assignments relating to groundfish management. No management actions will be decided by the GMT.

Although non-emergency issues not contained in the meeting agenda may be discussed, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically listed in this document and any issues arising after publication of this document that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

**SUMMARY:** The New England Fishery Management Council (Council) is scheduling a public meeting of its Herring Committee via webinar to consider actions affecting New England fisheries in the exclusive economic zone (EEZ). Recommendations from this group will be brought to the full Council for formal consideration and action, if appropriate.

**DATES:** This webinar will be held on Thursday, February 25, 2021 at 9:30 a.m. Webinar registration URL information: *https://attendee.gotowebinar.com/register/5921431278316794638.*

**ADDRESSES:** *Council address:* New England Fishery Management Council, 50 Water Street, Mill 2, Newburyport, MA 01950.

**FOR FURTHER INFORMATION CONTACT:** Thomas A. Nies, Executive Director, New England Fishery Management Council; telephone: (978) 465–0492.

**SUPPLEMENTARY INFORMATION:**

### Agenda

The Committee will meet to review and discuss 2021 work priorities for the Atlantic Herring Fishery Management Plan including: (1) A framework action that is considering spawning closures on Georges Bank; (2) development of a formal rebuilding plan for Atlantic herring; (3) review and potentially adjust accountability measures (AMs) in the herring plan; and (4) coordinate with the Mid-Atlantic Fishery Management Council (MAFMC) and Atlantic States Marine Fisheries Commission (ASMFC) on various herring management issues (*i.e.,* river herring and shad (RH/S)). Other business will be discussed, as necessary.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.

### Special Accommodations

This meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to Thomas A. Nies, Executive Director, at (978) 465–0492, at least 5 days prior to the meeting date.

(Authority: 16 U.S.C. 1801 *et seq.*)

Dated: January 8, 2021.

### Arms Sales Notification

**AGENCY:** Defense Security Cooperation Agency, Department of Defense (DoD).

**ACTION:** Arms sales notice.

**SUMMARY:** The Department of Defense is publishing the unclassified text of an arms sales notification.

**FOR FURTHER INFORMATION CONTACT:** Karma Job at *karma.d.job.civ@mail.mil* or (703) 697–8976.

**SUPPLEMENTARY INFORMATION:** This 36(b)(5)(C) arms sales notification is published to fulfill the requirements of section 155 of Public Law 104–164 dated July 21, 1996. The following is a copy of a letter to the Speaker of the House of Representatives, Transmittal 20–0K with attached Policy Justification.

Dated: January 8, 2021.

**Aaron T. Siegel,**

*Alternate OSD Federal Register Liaison Officer, Department of Defense.*

**BILLING CODE 5001–06–P**

DEFENSE SECURITY COOPERATION AGENCY
201 12TH STREET SOUTH, SUITE 101
ARLINGTON, VA 22202-5408

DEC 28 2020

The Honorable Nancy Pelosi
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Madam Speaker:

Pursuant to the reporting requirements of Section 36(b)(5)(C) of the Arms Export Control Act (AECA), as amended, we are forwarding Transmittal No. 20-0K. This notification relates to enhancements or upgrades from the level of sensitivity of technology or capability described in the Section 36(b)(1) AECA certification 15-25 of July 7, 2015.

Sincerely,

Heidi H. Grant
Director

Enclosures:
1. Transmittal
2. Regional Balance (Classified document provided under separate cover)

BILLING CODE 5001–06–C

Transmittal No. 20–0K

*REPORT OF ENHANCEMENT OR UPGRADE OF SENSITIVITY OF TECHNOLOGY OR CAPABILITY (SEC. 36(B)(5)(C), AECA)*

(i) *Prospective Purchaser*: Government of Egypt

(ii) Sec. 36(b)(1), AECA Transmittal No.: 15–25

Date: July 7, 2015

Military Department: Air Force

(iii) *Description*: On July 7, 2015, Congress was notified by Congressional certification transmittal number 15–25 of the possible sale under Section 36(b)(l) of the Arms Export Control Act of procurement and construction of one (1) commercial off-the-shelf border security mobile surveillance sensor security system that will include the following sub-systems: mobile surveillance sensor towers, mobile command and control (C2) systems, a regional C2 system, voice/data communications equipment, spare parts, support equipment, personnel training, training equipment, publications and technical documentation, U.S. Government and contractor technical and logistics support services, and other related elements of logistics and program support. The estimated total cost was $100 million. This total was all non-MDE since no Major Defense Equipment (MDE) was purchased.

This transmittal reports the inclusion of the procurement and construction of twenty-three (23) commercial off-the-shelf border security mobile surveillance sensor security (MS3) systems, thirty-six (36) integrated fixed towers, and mobile field workshops and the following sub-systems: mobile and fixed surveillance sensor towers, mobile command and fixed control (C2) systems, a regional C2 system, voice/data communications equipment, spare parts, support equipment, personnel training, training equipment, publications and technical documentation, U.S. Government and contractor technical and logistics support services, and other related elements of logistics and program support. There are no MDE items being added. These additional items of non-MDE will result in an increase in non-MDE cost of $125 million. The MDE cost will remain $0. The total case value will increase to $225 million.

(iv) *Significance*: This notification is being provided to report the inclusion of additional border surveillance systems to complete Egypt's western land border and extend the coverage to Egypt's southern land border were not included in the original notification. Their inclusion represents an increase in capability over what was previously notified. The purpose of the additional border surveillance system is to detect border incursions and communicate information for leadership to determine best methods of interdiction in areas outside of fixed land-based Points of Entry. Further employment of the MS3 capability along the southern border provides sensor depth and network integration to allow for response times to mitigate risks to its forces and population.

(v) *Justification*: This proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a Major Non-NATO Ally country that continues to be an important strategic partner in the Middle East.

(vi) *Date Report Delivered to Congress:* December 28, 2020

BILLING CODE 5001–06–C

Transmittal No. 21–09

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Kazakhstan

(ii) *Total Estimated Value:*

| | |
|---|---|
| Major Defense Equipment * | $ 6.1 million |
| Other | $122.0 million |
| TOTAL | $128.1 million |

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

*Major Defense Equipment (MDE):*
Three (3) Raytheon AST TITAN Communications Intelligence (COMINT) Sensor Suites (2 installed, 1 spare)

*Non-MDE:* Also included are two (2) King Air B300ER Scorpion aircraft; three (3) Leonardo Osprey 30 Active Electronically Scanned Array (AESA) radars (2 installed, 1 spare); three (3) WESCAM MX-15HDi Elector Optical Infrared Turret Electro Optical Infrared Sensors (2 installed, 1 spare); three (3) Sierra Nevada Small SWAP Auto Electronic Intelligence (ELINT) Systems (2 installed, 1 spare); secure communications; fixed and transportable ground control station; ground support equipment; aircraft integration and test support; publications and technical documentation; personnel training and training equipment; spare, component and repair parts; software and software support; US Government and contractor engineering, technical, and logistical support services, and other related elements of program and logistical support.

(iv) *Military Department:* Air Force (KZ–D–SAA)

(v) *Prior Related Cases, if any:* None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* December 22, 2020

* As defined in Section 47(6) of the Arms Export Control Act.

*POLICY JUSTIFICATION*

*Kazakhstan—King Air B300ER Scorpion Aircraft with Intelligence, Surveillance, Reconnaissance (ISR) Mission Systems*

The Government of Kazakhstan has requested to buy three (3) Raytheon AST TITAN Communications Intelligence (COMINT) Sensor Suites (2 installed, 1 spare). Also included are two (2) King Air B300ER Scorpion aircraft; three (3) Leonardo Osprey 30 Active Electronically Scanned Array (AESA) radars (2 installed, 1 spare); three (3) WESCAM MX-15HDi Elector Optical Infrared Turret Electro Optical Infrared Sensors (2 installed, 1 spare); three (3) Sierra Nevada Small SWAP Auto Electronic Intelligence (ELINT) Systems (2 installed, 1 spare); secure communications; fixed and transportable ground control station; ground support equipment; aircraft integration and test support; publications and technical documentation; personnel training and training equipment; spare, component and repair parts; software and software support; US Government and contractor engineering, technical, and logistical support services, and other related elements of program and logistical support. The estimated total cost is $128.1 million.

This proposed sale will support the foreign policy goals and national security objectives of the United States by improving the security of a partner country that is a force for political stability and economic progress in Central Asia.

The proposed sale will improve Kazakhstan's capability to meet current and future threats by improving its capability to deter regional threats and conduct border security operations. Kazakhstan will have no difficulty absorbing this equipment and services into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Sierra Nevada Corporation, Hagerstown, MD. There are no known offset agreements proposed in conjunction with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Kazakhstan.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 21–09

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The King Air B300ER Scorpion is a twin turbo prop aircraft that provides manned surveillance. The King Air B300ER Scorpion provides persistent, real-time route surveillance and border security, counter-terrorism, and smuggling interdiction support for naval and coastal operations, internal defense, and search and rescue operations.

2. The Leonardo Osprey 30 is an Active Electronically Scanned Array (AESA) Radar System that provides the King Air aircraft with all-weather, multi-mission capability for performing Air-to-Air, Air-to-Ground, and Air-to-Maritime surveillance. Air surveillance mode provides a capability for single target tracking and weather mode. Land surveillance mode provides high-resolution ground mapping and navigation. Maritime surveillance mode provides for small target detection and embedded automatic identification system.

3. The WESCAM MX–15HDi Elector Optical Infrared Turret provides high definition video with laser illuminator and laser range-finding capabilities. The sensor is on an electrically operated lift which is located in the extended nose.

4. The Raytheon AST TITAN System provides communications intelligence which searches, collects, analyzes, identifies, locates, records, and disseminates emitter data with range and bearing information. The TITAN System will also include a cellular intercept capability.

5. The Sierra Nevada Small SWAP Auto ELINT system analyses the electromagnetic spectrum to identify and provide the location of the active emitter. The threat library is not being provided but will be developed by the end-user as they conduct missions.

6. The highest level of classification of defense articles, components, and services included in this potential sale is UNCLASSIFIED.

7. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

8. A determination has been made that Kazakhstan can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

9. All defense articles and services listed in this transmittal have been authorized for release and export to Kazakhstan.

BILLING CODE 5001–06–C

Transmittal No. 20–19

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser*: Government of Kuwait

(ii) *Total Estimated Value*:

| | |
|---|---|
| Major Defense Equipment * | $2.0 billion |
| Other | $2.0 billion |
| TOTAL | $4.0 billion |

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase*: The Government of Kuwait has requested to buy eight (8) AH-64E Apache Longbow Attack Helicopters and remanufacture sixteen (16) of their AH-64D Apache Longbow Attack Helicopters to the AH-64E configuration.

*Major Defense Equipment (MDE):*

Eight (8) AH-64E Apache Helicopters (new procurement)

Sixteen (16) AH-64E Apache Helicopters (remanufacture)

Twenty-two (22) T700-GE 701D Engines

Thirty-six (36) Remanufactured T700-GE 701D Engines

Twenty-seven (27) AN/AAR-57 Counter Missile Warning Systems (CMWS)
Eighteen (18) Embedded Global Position Systems with Inertial Navigation (EGI) with Multi-Mode Receiver (MMR)
Thirty-six (36) Remanufactured EGIs with MMR
Eight (8) AN/ASQ-170(V) Modernized Target Acquisition and Designation Sight/AN/AAQ-11 Pilot Night Vision Sensor (MTADS/PNVS)
Seventeen (17) AN/APG-78 Longbow Fire Control Radars (FCR) with Radar Electronics Units (REU)
Seventeen (17) APR-48B Modernized Radar Frequency Interferometers (M-RFI)
Eighteen (18) M299 AGM-114 Hellfire Missile Launchers
Four (4) Remanufactured M299 AGM-114 Hellfire Missile Launchers
Eighteen (18) Hydra 70 (70mm) 2.75 Inch Rocket M260 Rocket Launchers
Four (4) Remanufactured Hydra 70 (70mm) 2.75 Inch Rocket M260 Rocket Launchers
Nine (9) M230El 30mm Chain Gun M139 Area Weapons System (AWS) Guns
Two (2) Remanufactured M230El 30mm Chain Gun M139 AWS Guns
One (1) Longbow Crew Trainers (LCT)
One (1) Remanufactured LCT

*Non-MDE:* Also included are fifty-four (54) AN/ARC-201 non-COMSEC Very-High Frequency/Frequency Modulation (VHF/FM) Radios; fifty-four (54) Ultra-High Frequency (UHF) Radios (AN/ARC 231 or MXF 4027); twenty-eight (28) Identify Friend or Foe Transponders (APX 123 or APX 119); twenty-seven (27) IDM 401 (Improved Data Modem); twenty-seven (27) Link 16 Datalinks; twenty-seven (27) AN/APR-39D (V)2 Radar Warning Receivers; twenty-seven (27) AN/AVR-2 Laser Warning Receivers; twenty-seven (27) Infrared Countermeasures Dispensers (2 flares, 1 chaff); nine (9) ASN-157 Doppler Radar Velocity Sensors; nine (9) AN/ARN-149 (V)3 Automatic Direction Finders (ADF); sixteen (16) remanufactured AN/ARN-149 (V)3 ADFs; nine (9) AN/APN-209 Radar Altimeters; twenty-seven (27) AN/ARN-153 Tactical Airborne Navigation (TACAN) systems; sixteen (16) Manned-Unmanned Teaming International (MUM-Ti) (UPR) Air to Air to Ground Data Link Systems; twenty-four (24) MUM-Ti (Ground) Air to Air to Ground Data Link Systems; twenty-four (24) 100 gallon Internal Auxiliary Fuel Systems (IAFS); twenty-four (24) 125 gallon Reduced Capacity Crashworthy External Fuel Systems (RCEFS); two (2) IAFS Spares; two (2) IAFS Publications; six (6) IAFS Ground Support Equipment (GSE) Apache Magazine and Auxiliary Tank Transfer Systems (AMATTS); five (5) IDM Software Loader Verifiers (SLV); training devices; helmets; simulators; generators; transportation; wheeled vehicles and organizational equipment; spare and repair parts; support equipment; tools and test equipment; technical data and publications; personnel training and training equipment; U.S. government and contractor engineering, technical, and logistics support services; and other related elements of logistics support.

(iv) *Military Department*: Army (KU-B-UXF)

(v) *Prior Related Cases, if any*: KU-B-UKS

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid*: None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold*: See Attached Annex

(viii) *Date Report Delivered to Congress*: December 28, 2020

*As defined in Section 47(6) of the Arms Export Control Act.

*POLICY JUSTIFICATION*

*Kuwait — AH-64E Apache Helicopter*

The Government of Kuwait has requested to buy eight (8) AH-64E Apache Longbow Attack Helicopters and remanufacture sixteen (16) of their AH-64D Apache Longbow Attack Helicopters to the AH-64E configuration consisting of: eight (8) AH-64E Apache Helicopters (new procurement); sixteen (16) AH-64E Apache Helicopters (remanufacture); twenty-two (22) T700-GE 701D engines; thirty-six (36) remanufactured T700-GE 701D engines; twenty-seven (27) AN/AAR-57 Counter Missile Warning Systems (CMWS); eighteen (18) Embedded Global Position Systems with Inertial Navigation (EGI) with Multi-Mode Receiver (MMR); thirty-six (36) remanufactured EGIs with MMR; eight (8) AN/ASQ-170(V) Modernized Target Acquisition and Designation Sight/AN/AAQ-11 Pilot Night Vision Sensor (MTADS/PNVS); seventeen (17) AN/APG-78 Longbow Fire Control Radars (FCR) with Radar Electronics Units (REU); seventeen (17) APR-48B Modernized Radar Frequency Interferometers (M-RFI); eighteen (18) M299 AGM-114 Hellfire Missile Launchers; four (4) remanufactured M299 AGM-114 Hellfire Missile Launchers; eighteen (18) Hydra 70 (70mm) 2.75 Inch Rocket M260 Rocket Launchers; four (4) remanufactured Hydra 70 (70mm) 2.75 Inch Rocket M260 Rocket Launchers; nine (9) M230El 30mm Chain Gun M139 Area Weapons System (AWS) Guns; two (2) remanufactured M230El 30mm Chain Gun M139 AWS Guns; one (1) Longbow Crew Trainers (LCT); and one (1) remanufactured LCT. Also included are fifty-four (54) AN/ARC-201 non-COMSEC Very-High Frequency/Frequency Modulation (VHF/FM) radios; fifty-four (54) Ultra-High Frequency (UHF) radios (AN/ARC-231 or MXF 4027); twenty-eight (28) Identify Friend or Foe Transponders (APX 123 or APX 119); twenty-seven (27) IDM 401 (Improved Data Modem); twenty-seven (27) Link 16 Datalinks; twenty-seven (27) AN/APR-39D (V)2 Radar Warning Receivers; twenty-seven (27) AN/AVR-2 Laser Warning Receivers; twenty-seven (27) Infrared Countermeasures Dispensers (2 flares, 1 chaff); nine (9) ASN-157 Doppler Radar Velocity Sensors; nine (9) AN/ARN-149 (V)3 Automatic Direction Finders (ADF); sixteen (16) remanufactured AN/ARN-149 (V)3 ADFs; nine (9) AN/APN-209 Radar Altimeters; twenty-seven (27) AN/ARN-153 Tactical Airborne Navigation (TACAN) systems; sixteen (16) Manned-Unmanned Teaming International (MUM-Ti) (UPR) Air to Air to Ground Data Link Systems; twenty-four (24) MUM-Ti (Ground) Air to Air to Ground Data Link Systems; twenty-four (24) 100 gallon Internal Auxiliary Fuel Systems (IAFS); twenty-four (24) 125 gallon Reduced Capacity Crashworthy External Fuel Systems (RCEFS); two (2) IAFS Spares; two (2) IAFS Publications; six (6) IAFS Ground Support Equipment (GSE) Apache Magazine and Auxiliary Tank Transfer Systems (AMATTS); five (5) IDM Software Loader Verifiers (SLV); training devices; helmets; simulators; generators; transportation; wheeled vehicles and organizational equipment; spare and repair parts; support equipment; tools and test equipment; technical data and publications; personnel training and training equipment; U.S. government and contractor engineering, technical, and logistics support services; and other related elements of logistics support. The total estimated cost is $4.0 billion.

The proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a Major Non-NATO Ally that is an important force for political stability and economic progress in the Middle East.

The proposed sale of the AH-64E Apache helicopters will supplement and improve Kuwait's capability to meet current and future threats by enhancing Kuwait's close air support, armed reconnaissance, and antitank warfare mission capabilities. Kuwait will have no difficulty absorbing these helicopters into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractors associated with this sale will be The Boeing Company, Mesa, AZ; Lockheed Martin Corporation, Orlando, FL; General Electric, Cincinnati, OH; Lockheed Martin Mission Systems and Sensors, Owego, NY; Longbow Limited Liability Corporation, Orlando, FL; and Raytheon Corporation, Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the temporary assignment of approximately three U.S. Government personnel and five contractor representatives to Kuwait to support delivery of the helicopters and provide support and equipment familiarization. In addition, Kuwait has expressed an interest in a Technical Assistance Fielding Team (TAFT) to provide in-country pilot and maintenance training. Execution of a TAFT will require a team of twelve additional personnel (one military and eleven contractors) to be deployed to Kuwait for the period of approximately three years.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 20–19

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology*:

1. The AH-64E Apache Attack Helicopter is the Army's advanced attack helicopter equipped for performing close air support, anti-armor, and armed reconnaissance missions. The aircraft contains the following sensitive communications and target identification equipment, navigation equipment, aircraft survivability equipment, displays, and sensors:

a. The AN/ARC-201 Very High Frequency-Frequency Modulation (VHF-FM) Single Channel Ground and Airborne Radio System (SINCGARS) airborne radio is a reliable, field-proven voice and data communication system used with the AH-64E. A country-unique non-COMSEC export variant of this radio will be provided that meets Kuwait's requirements.

b. The AN/ARC-231 Ultra High Frequency (UHF) radio is a software defined radio for military aircraft that provides two-way multi-mode voice and data communications over a 30hz to 512hz frequency range. The MFX 4027 is a variant system based on the AN/ARC-231 architecture but incorporating commercial encryption. The radio offered to Kuwait will be determined based on U.S. and Kuwaiti requirements.

c. The Identify Friend-or-Foe (IFF) digital transponder set provides pertinent platform information in response to an IFF interrogator. The digital transponder provides cooperative Mark XII IFF capability using full diversity selection, as well as Mode Select (Mode S) capability. In addition, transponder operation provides interface capability with the aircraft's Traffic Collision and Avoidance System (TCAS). The transponder receives pulsed radio frequency interrogation signals in any of six modes (1, 2, 3/A, S, and 5), decodes the signals, and transmits a pulsecoded reply. The Mark XII IFF operation includes Selective Identification Feature (SIF) Modes 1, 2, 3/A and C, as well as secure cryptographic Mode 5 operational capability.

d. Link 16 Datalink is a military tactical data link network. Link 16 provides aircrews with enhanced situational awareness and the ability to exchange target information to Command and Control (C2) assets via Tactical Digital Information Link-Joint (TADIL-J). Link 16 can provide a range of combat information in near-real time to U.S. and allies' combat aircraft and C2 centers. The AH-64E uses the Harris Small Tactical Terminal (SIT) KOR-24A to provide Airborne and Maritime/Fixed Station (AMF) Small Airborne Link 16 Terminal (SALT) capability. The SIT is the latest generation of small, two-channel, Link 16 and VHF/UHF radio terminals. While in flight, the SIT provides simultaneous communication, voice or data, on two key waveforms.

e. The AN/APR-39 Radar Warning Receiver Signal Detecting Set is a system that provides warning of a radar directed air defense threat and allows appropriate countermeasures. This is the 1553 databus compatible configuration.

f. The AN/AVR-2B Laser Warning Set is a passive laser warning system that receives, processes and displays threat information resulting from aircraft illumination by lasers on the aircraft's multi-functional display.

g. The AAR-57 Common Missile Warning System (CMWS) detects energy emitted by threat missile in-flight, evaluates potential false alarm emitters in the environment, declares validity of threat and selects appropriate counter-measures for defeat. The CMWS consists of an Electronic Control Unit (ECU), Electro-Optic Missile Sensors (EOMSs), and Sequencer and Improved Countermeasures Dispenser (ICMD).

h. The ICMD Countermeasures Dispensing M211 Flare is a countermeasure decoy in a ''xl''x8'' form factor in an aluminum case cartridge. It consists of case, piston, special material payload foils, and end cap. The special material is a pyrophoric metal (iron) foil that reacts with oxygen to generate infrared energy. The M211 decoys are dispersed from an aircraft to be used as a decoy in combination with the currently fielded M206 and M212 countermeasure flares to protect against advanced air-to-air and surface-to-air missile threats.

i. Embedded Global Positioning System (GPS)/Inertial Navigation System (INS) (EGI) with Multi-Mode Receiver (MMR) uses GPS satellite signals to correct or calibrate a solution for precise positioning from an Inertial Navigation System (INS). The aircraft has two EGIs with MMR which use internal accelerometers, rate gyro measurements, and external sensor measurements to estimate the aircraft state, provides aircraft flight and position data to aircraft systems. The EGI is a velocity-aided, strap down, ring laser gyro based inertial unit. The EGI unit houses a GPS receiver. The receiver is capable of operating in either non-encrypted or encrypted. When keyed, the GPS receiver will automatically use anti-spoof/jam capabilities when they are in use. The EGI will retain the key through power on/off/on cycles. Because of safeguards built into the EGI, it is not considered classified when keyed. Integrated within the EGI is an Inertial Measurement Unit (IMU) for processing functions. Each EGI also houses a Multi-Mode Receiver (MMR). The MMR is incorporated to provide for reception of ground based NA VAID signals for instrument aided flight. Provides IMC I IFR integration and certification of improved Embedded Global Positioning System and Inertial (EGI) unit, with attached MMR, with specific cockpit instrumentation allows Apaches to operate within the worldwide IFR route structure. Also includes integration of the Common Army Aviation Map (CAAM), Area Navigation (RNA V), Digital Aeronautical Flight Information File (DAFIF) and Global Air Traffic Management (GATM) compliance.

j. The AN/ASQ-170 Modernized Target Acquisition and Designation Sight/AN/AAQ-11 Pilot Night Vision Sensor (MTADS/PNVS) provides day, night, limited adverse weather target information, as well as night navigation capabilities. The PNVS provides thermal imaging that permits nap-of-the-earth flight to, from, and within the battle area, while TADS provides the co-pilot gunner with search, detection, recognition, and designation by means of Direct View Optics (DVO), television, and Forward Looking Infrared (FLIR) sighting systems that may be used singularly or in combinations.

k. The AN/APR-48B Modernized Radar Frequency Interferometer (M-RFI) is an updated version of the passive radar detection and direction finding system. It utilizes a detachable UDM on the M-RFI processor, which contains the Radar Frequency (RF) threat library.

l. The AN/APG-78 Longbow Fire Control Radar (FCR) with Radar Electronics Unit (REU) is an active, low-probability of intercept, millimeter wave radar. The active radar is combined with a passive Radar Frequency Interferometer (RFI) mounted on top of the helicopter mast. The FCR Ground Targeting Mode detects, locates, classifies and prioritizes stationary or moving armored vehicles, tanks and mobile air defense systems as well as hovering helicopters, helicopters, and fixed wing aircraft in normal flight. If desired, the radar data can be used to refer targets to the regular electro-optical Modernized Target Acquisition and Designation Sight (MTADS).

m. The Manned-Unmanned Teaming International (MUM-Ti) data link system provides cross-platform communication and teaming between Apache, unmanned aerial systems (UAS), and other interoperable aircraft and ground platforms. It provides the ability to display real-time UAS sensor information and MTADs full motion video feeds across MUM-T equipped platforms and ground stations. The MUM-Ti is the multi-band export version of the datalink for the AH-64E.

n. The M299 Missile Launcher, commonly known as the Longbow Hellfire Launcher (LBHL), is a four rail launcher designed to carry the complete family of AGM-114 Hellfire missiles.

o. The M261 2.75 Inch Rocket Launcher is a nineteen tube, three zone rocket launcher utilized on heavy attack aircraft.

p. The Longbow Crew Trainer (LCT) is a containerized, deployable, high-fidelity flight simulator used to train Apache crew members. The LCT provided will be configured to reflect Kuwait's AH-64E Operational Flight Program software.

2. The highest level of information that may be transferred in support of this proposed sale is classified SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures which might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Kuwait can provide substantially the same degree of protection of this technology as the U.S. Government. This proposed sale is necessary in furtherance of U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles, technical data, and services listed in this transmittal are authorized for release and export to the Government of Kuwait.

DEC 2 8 2020

The Honorable Nancy Pelosi
Speaker of the House
U.S. House of Representatives
H-209, The Capitol
Washington, DC 20515

Dear Madam Speaker:

Pursuant to the reporting requirements of Section 36(b)(1) of the Arms Export Control Act, as amended, we are forwarding herewith Transmittal No. 20-55 concerning the Air Force's proposed Letter(s) of Offer and Acceptance to the Government of Egypt for defense articles and services estimated to cost $104 million. After this letter is delivered to your office, we plan to issue a news release to notify the public of this proposed sale.

Sincerely,

Heidi H. Grant

BILLING CODE 5001–06–C

Transmittal No. 20–55

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Egypt

(ii) *Total Estimated Value:*

| | |
|---|---|
| Major Defense Equipment * | $ 10 million |
| Other | $ 94 million |
| TOTAL | $104 million |

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase*: The Government of Egypt has requested to buy one (1) AN/AAQ-24(V)N Large Aircraft Infrared Countermeasures (LAIRCM) system to protect one (1) Airbus 340–200 Head-of-State aircraft. Each LAIRCM system consists of three (3) Guardian Laser Turret Assemblies (GLTA), one (1) LAIRCM System Processor Replacement (LSPR), five (5) Missile Warning Sensors (MWS), one (1) Control Indicator Unit Replacement (CIUR), one (1) Smart Card Assembly (SCA), and one (1) High Capacity Card (HCC/User Data Memory (UDM) card.

*Major Defense Equipment (MDE):*

Six (6) Guardian Laser Turret Assemblies (GLTA) (3 installed, 3 spares)

Four (4) LAIRCM System Processor Replacements (LSPR) (1 installed, 3 spares)

Ten (10) Missile Warning Sensors (MWS) (5 installed, 5 spares)

*Non-MDE:* Also included are LAIRCM CIURs; SCAs; HCCs; UDM cards; simple key loaders; initial spares, consumables, and repair/return support; support and test equipment; integration and test support; personnel training, publications and technical documentation; U.S. Government and contractor engineering, technical and logistics support services; and other related elements of logistical and program support.

(iv) *Military Department:* Air Force (EG–D–QFO)

(v) *Prior Related Cases, if any:* None

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* December 28, 2020

* As defined in Section 47(6) of the Arms Export Control Act.

*POLICY JUSTIFICATION*

*Egypt—Large Aircraft Infrared Countermeasures (LAIRCM) System for Head-of-State Aircraft*

The Government of Egypt has requested to buy one (1) AN/AAQ-24(V)N Large Aircraft Infrared Countermeasures (LAIRCM) system to protect one (1) Airbus 340–200 Head-of-State aircraft. Each LAIRCM system consists of three (3) Guardian Laser Turret Assemblies (GLTA), one (1) LAIRCM System Processor Replacement (LSPR), five (5) Missile Warning Sensors (MWS), one (1) Control Indicator Unit Replacement (CIUR), one (1) Smart Card Assembly (SCA), and one (1) High Capacity Card (HCC/User Data Memory (UDM) card. This proposed sale will include: six (6) Guardian Laser Turret Assemblies (GLTA) (3 installed, 3 spares); four (4) LAIRCM System Processor Replacements (LSPR) (1 installed, 3 spares); ten (10) Missile Warning Sensors (MWS) (5 installed, 5 spares). Also included are LAIRCM CIURs; SCAs; HCCs; UDM cards; simple key loaders; initial spares, consumables, and repair/return support; support and test equipment; integration and test support; personnel training, publications and technical documentation; U.S. Government and contractor engineering, technical and logistics support services; and other related elements of logistical and program support. The estimated total cost is $104 million.

This proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a Major Non-NATO Ally country that continues to be an important strategic partner in the Middle East.

The self-protection suite will improve the survivability of the Airbus from missile attack. Egypt will have no difficulty absorbing this equipment and capability into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Northrup Grumman, Rolling Meadows, IL. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will require the assignment of one U.S. contractor representative in an advisory role to Egypt for one base year with two option years to support operator/maintenance system orientation and original equipment manufacturer factory support.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 20–55

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AN/AAQ-24(V)N LAIRCM system is a self-contained, directed-energy countermeasures system designed to protect aircraft from infrared-guided surface-to-air missiles. The LAIRCM system features digital technology micro-miniature solid-state electronics. The system operates in all conditions, detecting incoming missiles and jamming infrared-seeker equipped missiles with aimed bursts of laser energy. The LAIRCM system consists of the Guardian Laser Transmitter Assembly (GLTA), LAIRCM System Processor Replacement (LSPR), multiple Missile Warning Sensors, the Control Interface Unit Replacement (CIUR), and the Classified Memory Card User Data Module. The AN/PYQ-10 Simple Key Loader is also a necessary device.

2. The Guardian Laser Transmitter Assembly (GLTA) is a laser transmitter pointer/tracker subsystem designed to track the inbound threat missile and point the laser jam source at the missile's seeker. The GLTA automatically deploys the countermeasure.

3. The LAIRCM System Processor Replacement (LSPR) analyzes the data from each Missile Warning Sensor and automatically deploys the appropriate countermeasure via the GLTA. The LSPR contains Built-in-Test (BIT) circuitry.

4. The AN/PYQ-10 Simple Key Loader is a portable, hand-held device used for securely receiving, storing, and transferring data between compatible cryptographic and communications equipment.

5. The Missile Warning Sensors detect and declare threat missiles. The sensors are mounted on the aircraft exterior to provide omni-directional protection. The sensors detect the rocket plume of missiles and send appropriate data signals to the LSPR for processing.

6. The Control Interface Unit Replacement (CIUR) displays the incoming threat for the pilot to take appropriate action. The CIUR also provides operator interface to program the LAIRCM system to initiate built-in-test (BIT), to display system status, and to provide the crew with bearing to threat missile launch.

7. The Classified Memory Card User Data Module contains the laCser jam codes. The Classified Memory Card User Data Module is loaded into the LSPR prior to flight; when not in use, the Classified Memory Card User Data Module is removed from the LSPR and put in secure storage.

8. The highest level of classification of information included in this potential sale is SECRET.

9. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

10. A determination has been made that Egypt can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objective outlined in the Policy Justification.

11. All defense articles and services listed in this transmittal have been authorized for release and export to Egypt.

**BILLING CODE 5001–06–C**

Transmittal No. 20–53

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Government of Kuwait

(ii) *Total Estimated Value:*

| | |
|---|---|
| Major Defense Equipment * | $ 0 million |
| Other | $200 million |
| TOTAL | $200 million |

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:* The Government of Kuwait has requested to buy spare parts to support its upgraded Patriot systems.

*Major Defense Equipment (MDE):* None

*Non-MDE:* Included is one (1) set of Authorized Stockage List (ASL), Prescribed Load List (PLL) and Higher Headquarters Battery (HHB) spare parts; one (1) set of Authorized Stockage List (ASL), Prescribed Load List (PLL) and Higher Headquarters Battery (HHB) spare parts; one (1) set of Fixed Site Antenna Mast Group (ATG)/Information and Coordination Central (ICC) Tethered Manstation Kit (ITMK) spare parts, transportation, organizational equipment, support equipment, tools and test equipment, technical data and publications, personnel training and training equipment, maintenance services, U.S. government and contractor engineering, technical, and logistics support services, and other related elements of logistical and program support.

(iv) *Military Department:* Army (KU–B–UXG)

(v) *Prior Related Cases, if any:* KU–B–ULV, KU–B–UXI, KU–B–UXS, KU–B–UXH

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex

(viii) *Date Report Delivered to Congress:* December 28, 2020

* As defined in Section 47(6) of the Arms Export Control Act.

*POLICY JUSTIFICATION*

*Kuwait—System Spares for Patriot Configuration 3+*

The Government of Kuwait has requested to buy spare parts to support their upgraded Patriot systems. Included is one (1) set of Authorized Stockage List (ASL), Prescribed Load List (PLL) and Higher Headquarters Battery (HHB) spare parts; one (1) set of Authorized Stockage List (ASL), Prescribed Load List (PLL) and Higher Headquarters Battery (HHB) spare parts; one (1) set of Fixed Site Antenna Mast Group (ATG)/Information and Coordination Central (ICC) Tethered Manstation Kit (ITMK) spare parts, transportation, organizational equipment, support equipment, tools and test equipment, technical data and publications, personnel training and training equipment, maintenance services, U.S. government and contractor engineering, technical, and logistics support services, and other related elements of logistical and program support. The total estimated program cost is $200 million.

The proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a Major Non-NATO Ally that is an important force for political stability and economic progress in the Middle East.

The proposed sale of these spare parts for Kuwait's Patriot System will improve Kuwait's capability to meet current and future threats and provide greater security for critical civilian and military infrastructure. The procurement of these spare parts represents a commitment by Kuwait to field and maintain systems that are interoperable with U.S. forces. Kuwait will have no difficulty absorbing this equipment and support into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon Missile Systems, Waltham, MA. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Kuwait.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 20–53

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The spares associated with this sale include unclassified and classified parts associated with the Patriot PAC–3 Configuration 3+. The parts will support sustainment of the critical components of the Patriot whose primary combat element is made up of a radar set, engagement control station, and launching stations. All classified spares in this sale are associated with the Patriot radar set.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements associated with the Patriot missile system, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Government of Kuwait can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Kuwait.

BILLING CODE 5001–06–C

Transmittal No. 20–13

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act, as amended

(i) *Prospective Purchaser:* Kingdom of Saudi Arabia

(ii) *Total Estimated Value:*

| | |
|---|---|
| Major Defense Equipment * | $250 million |
| Other | $ 40 million |
| TOTAL | $290 million |

(iii) *Description and Quantity or Quantities of Articles or Services under Consideration for Purchase:*

*Major Defense Equipment (MDE):* Three thousand (3,000) GBU–39/B Small Diameter Bomb I (SDB I)

*Non-MDE:* Also included are containers; weapon support and support equipment; spare and repair parts; U.S. Government and contractor engineering, technical and logistical support services; and other related elements of logistical and program support.

(iv) *Military Department:* Air Force (SR–D–YAE)

(v) *Prior Related Cases, if any:* SR–D–YBD

(vi) *Sales Commission, Fee, etc., Paid, Offered, or Agreed to be Paid:* None

(vii) *Sensitivity of Technology Contained in the Defense Article or Defense Services Proposed to be Sold:* See Attached Annex.

(viii) *Date Report Delivered to Congress:* December 28, 2020

* As defined in Section 47(6) of the Arms Export Control Act.

*POLICY JUSTIFICATION*

*Saudi Arabia—GBU–39 Small Diameter Bomb I (SDB I) Munitions*

The Kingdom of Saudi Arabia has requested to buy three thousand (3,000) GBU–39 SDB I munitions. Also included are containers; weapon support and support equipment; spare and repair parts; U.S. Government and contractor engineering, technical and logistical support services; and other related elements of logistical and program support. The total estimated program cost will be $290 million.

This proposed sale will support U.S. foreign policy and national security objectives by helping to improve the security of a friendly country that continues to be an important force for political stability and economic growth in the Middle East.

The proposed sale will improve Saudi Arabia's capability to meet current and future threats by increasing its stocks of long-range, precision air-to-ground munitions. The size and accuracy of the SDB I allows for an effective munition with less collateral damage. The potential sale will further strengthen the interoperability between the United States and Saudi Arabia. Saudi Arabia will have no difficulty absorbing this equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Boeing, St. Louis, MO. There are no known offset agreements in connection with this potential sale; however the purchaser typically requests offsets. Any offset agreement will be defined in negotiations between the purchaser and the contractor.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to the Kingdom of Saudi Arabia.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 20–13

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The GBU–39/B Small Diameter Bomb Increment I (SDB I) is a 250-pound class weapon designed as a small, all weather, autonomous, conventional, air-to-ground, precision glide weapon able to strike fixed and stationary re-locatable targets from standoff range. The SDB I weapon system consists of the weapons, the BRU–61/A (4-place pneumatic carriage system), shipping and handling containers for a single weapon and the BRU–61/A either empty or loaded, and a weapon planning module. It has integrated diamond-back type wings that deploy after release, which increases the glide time and therefore maximum range. The SDB I Anti-Jam Global Positioning System aided Inertial Navigation System (AJGPS/INS) provides guidance to the coordinates of a stationary target. The payload/warhead is a very effective multipurpose penetrating and blast fragmentation warhead couples with a cockpit selectable electronic fuze. Its size and accuracy allow for an effective munition with less collateral damage. A proximity sensor provides height of burst capability.

2. The highest level of classification of information included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Kingdom of Saudi Arabia can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal are authorized for release and export to the Kingdom of Saudi Arabia.

*Egypt—Sniper Advanced Targeting Pods (ATPs)*

The Government of Egypt has requested to buy twenty (20) AN/AAQ-33 Sniper ATPs. Also included are pylons; shipping containers; spare and repair/return parts; ground handling equipment; publications and technical documentation; software and software support; personnel training; U.S. Government and contractor engineering, technical, and logistical support services; and other related elements of program and logistical support. The estimated total program cost is $65.6 million.

This proposed sale will support the foreign policy and national security of the United States by helping to improve the security of a Major Non-NATO Ally country that continues to be an important strategic partner in the Middle East.

The proposed sale will improve Egypt's capability and effectiveness to meet current and future threats by providing additional precision targeting capability to conduct border security and counterterrorism operations. The added precision strike capability will better enable Egypt to conduct operations while minimizing collateral damage. Egypt will have no difficultly absorbing the additional equipment into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Lockheed Martin Aeronautics Company in Fort Worth, TX. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this proposed sale will not require the assignment of any additional U.S. Government or contractor representatives to Egypt.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 20–65

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AN/AAQ-33 SNIPER Pod is a multi-sensor, electro-optical targeting pod incorporating infrared, low-light television camera, laser range finder/target designator, and laser spot tracker. It is used to provide navigation and targeting for military aircraft in adverse weather and using precision-guided weapons such as laser-guided bombs. It also provides positive target identification, autonomous tracking, coordinate generation, and precise weapons guidance from extended standoff ranges. It offers much greater target resolution and imagery accuracy than previous systems.

2. The highest level of classification of information included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Government of Egypt can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Egypt.

## DEPARTMENT OF DEFENSE

### Corps of Engineers

### Inland Waterways Users Board Meeting Notice

**AGENCY:** Corps of Engineers, Department of the Army, DoD.

**ACTION:** Notice of open Federal advisory committee virtual meeting.

**SUMMARY:** The Department of the Army is publishing this notice to announce the Federal advisory committee online virtual meeting of the U.S. Army Corps of Engineers, Inland Waterways Users Board (Board). This meeting is open to the public. For additional information about the Board, please visit the committee's website at *http://www.iwr.usace.army.mil/Missions/Navigation/InlandWaterwaysUsersBoard.aspx.*

**DATES:** The Army Corps of Engineers, Inland Waterways Users Board will conduct an online virtual meet from 9:00 a.m. to 1:00 p.m. EDT on February 9, 2021.

**ADDRESSES:** Online Virtual Meeting. The Inland Waterways Users Board will be an online virtual meeting. The online virtual meeting can be accessed at *https://usace1.webex.com/meet/ndc.nav,* Public Call-in: USA Toll-Free 844–800–2712, USA Caller Paid/International Toll: 1–669–234–1177 Access Code: 199 117 3596, Security Code 1234.

**FOR FURTHER INFORMATION CONTACT:** Mr. Mark R. Pointon, the Designated Federal Officer (DFO) for the committee, in writing at the Institute for Water Resources, U.S. Army Corps of Engineers, ATTN: CEIWR–GN, 7701 Telegraph Road, Casey Building, Alexandria, VA 22315–3868; by telephone at 703–428–6438; and by email at *Mark.Pointon@usace.army.mil.* Alternatively, contact Mr. Steven D. Riley, an Alternate Designated Federal Officer (ADFO), in writing at the Institute for Water Resources, U.S. Army Corps of Engineers, ATTN: CEIWR–NDC, 7701 Telegraph Road, Casey Building, Alexandria, VA 22315–3868; by telephone at 703–659–3097; and by email at *Steven.D.Riley@usace.army.mil.*

**SUPPLEMENTARY INFORMATION:** The committee meeting is being held under the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C., Appendix, as amended), the Government in the Sunshine Act of 1976 (5 U.S.C. 552b, as amended), and 41 CFR 102–3.150.

*Purpose of the Meeting:* The Board is chartered to provide independent advice and recommendations to the Secretary of the Army on construction and rehabilitation project investments on the commercial navigation features of the inland waterways system of the United States. At this meeting, the Board will receive briefings and presentations regarding the investments, projects and status of the inland waterways system of the United States and conduct discussions and deliberations on those matters. The Board is interested in written and verbal comments from the public relevant to these purposes.

*Agenda:* At this meeting the agenda will include the status of FY 2021 funding for inland and coastal Navigation; status of the Inland Waterways Trust Fund (IWTF), Board annual report for 2020, and the inland waterways Capital Investment Strategy activities; updates of future IWTF projects currently in Preconstruction, Engineering and Design (PED) phase for Three Rivers, Arkansas, Mississippi River-Illinois Waterway Navigation and Environmental Sustainability Program (NESP) and Upper Ohio River Navigation; status of the ongoing construction activities for the Monongahela River Locks and Dams 2, 3, and 4 Project, the Chickamauga Lock Project and the Kentucky Lock Project; and updates for Inner Harbor Navigation Canal (IHNC) Lock and Bayou Sorrel Lock.

*Availability of Materials for the Meeting.* A copy of the agenda or any updates to the agenda for the February 9, 2021 virtual meeting will be available. The final version will be available at the virtual meeting. All materials will be posted to the website after the meeting.

*Public Accessibility to the Meeting:* Pursuant to 5 U.S.C. 552b, as amended, and 41 CFR 102–3.140 through 102–3.165, and subject to the availability of space, this virtual meeting is open to the public. Registration of members of the public who wish to participate in the virtual meeting will begin at 8:15 a.m. on the day of the meeting. Participation is on a first-to-arrive basis. Any interested person may participate in the meeting, file written comments or statements with the committee, or make verbal comments during the virtual public meeting, at the times, and in the manner, permitted by the committee, as set forth below.

*Special Accommodations:* Individuals requiring any special accommodations related to the virtual public meeting or seeking additional information about the procedures, should contact Mr. Pointon, the committee DFO, or Mr. Riley, an ADFO, at the email addresses or telephone numbers listed in the **FOR FURTHER INFORMATION CONTACT** section, at least five (5) business days prior to the meeting so that appropriate arrangements can be made.

*Written Comments or Statements:* Pursuant to 41 CFR 102–3.105(j) and 102–3.140 and section 10(a)(3) of the Federal Advisory Committee Act, the public or interested organizations may submit written comments or statements to the Board about its mission and/or the topics to be addressed in this virtual public meeting. Written comments or statements should be submitted to Mr. Pointon, the committee DFO, or Mr. Riley, a committee ADFO, via electronic mail, the preferred mode of submission, at the addresses listed in the **FOR FURTHER INFORMATION CONTACT** section in the following formats: Adobe Acrobat or Microsoft Word. The comment or statement must include the author's name, title, affiliation, address, and daytime telephone number. Written comments or statements being submitted in response to the agenda set forth in this notice must be received by the committee DFO or ADFO at least five (5) business days prior to the meeting so that they may be made available to the Board for its consideration prior to the meeting. Written comments or statements received after this date may not be provided to the Board until its next meeting. Please note that because the Board operates under the provisions of the Federal Advisory Committee Act, as amended, all written comments will be treated as public documents and will be made available for public inspection.

*Verbal Comments:* Members of the public will be permitted to make verbal comments during the virtual public meeting only at the time and in the manner allowed herein. If a member of the public is interested in making a verbal comment at the open virtual meeting, that individual must submit a request, with a brief statement of the subject matter to be addressed by the comment, at least three business (3) days in advance to the committee DFO or ADFO, via electronic mail, the preferred mode of submission, at the addresses listed in the **FURTHER INFORMATION CONTACT** section. The committee DFO and ADFO will log each request to make a comment, in the order received, and determine whether the subject matter of each comment is relevant to the Board's mission and/or the topics to be addressed in this public meeting. A 15-minute period near the end of the meeting will be available for verbal public comments. Members of the public who have requested to make a verbal comment and whose comments have been deemed relevant under the process described above, will be allotted no more than three (3) minutes during this period, and will be invited to speak in the order in which their requests were received by the DFO and ADFO.

**Thomas P. Smith,**

*Chief, Operations and Regulatory Division, Directorate of Civil Works, U.S. Army Corps of Engineers.*

## DEPARTMENT OF EDUCATION

**[Docket No.: ED–2021–SCC–0006]**

## Agency Information Collection Activities; Comment Request; Higher Education Emergency Relief Fund (HEERF) Improper Payments Information Form

**AGENCY:** Department of Education (ED), Office of Postsecondary Education (OPE).

**ACTION:** Notice.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, ED is requesting the Office of Management and Budget (OMB) to conduct an emergency review of a new information collection.

**DATES:** The Department is requesting emergency processing and OMB approval for this information collection by January 13, 2021; and therefore, the regular clearance process is hereby being initiated to provide the public with the opportunity to comment under the full comment period. Interested persons are invited to submit comments on or before March 15, 2021.

**ADDRESSES:** To access and review all the documents related to the information collection listed in this notice, please use *http://www.regulations.gov* by searching the Docket ID number ED–2021–SCC–0006. Comments submitted in response to this notice should be submitted electronically through the Federal eRulemaking Portal at *http://www.regulations.gov* by selecting the Docket ID number or via postal mail, commercial delivery, or hand delivery. If the regulations.gov site is not available to the public for any reason, ED will temporarily accept comments at *ICDocketMgr@ed.gov*. Please include the docket ID number and the title of the information collection request when requesting documents or submitting comments. *Please note that comments submitted by fax or email and those submitted after the comment period will not be accepted.* Written requests for information or comments submitted by postal mail or delivery should be addressed to the Director of the Strategic Collections and Clearance Governance and Strategy Division, U.S. Department of Education, 400 Maryland Ave. SW, LBJ, Room 6W208D, Washington, DC 20202–4537.

**FOR FURTHER INFORMATION CONTACT:** For specific questions related to collection activities, please contact Karen Epps, 202–453–6337.

**SUPPLEMENTARY INFORMATION:** The Department of Education (ED), in accordance with the Paperwork

Reduction Act of 1995 (PRA) (44 U.S.C. 3506(c)(2)(A)), provides the general public and Federal agencies with an opportunity to comment on proposed, revised, and continuing collections of information. This helps the Department assess the impact of its information collection requirements and minimize the public's reporting burden. It also helps the public understand the Department's information collection requirements and provide the requested data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

*Title of Collection:* Higher Education Emergency Relief Fund (HEERF) Improper Payments Information Form.

*OMB Control Number:* 1840–NEW.

*Type of Review:* A new information collection.

*Respondents/Affected Public:* Private Sector; State, Local, and Tribal Governments.*Total Estimated Number of Annual Responses:* 5,138.

*Total Estimated Number of Annual Burden Hours:* 5,138.

*Abstract:* Under the CARES Act's Higher Education Emergency Relief Fund (HEERF), the Department has made over 12,000 awards to institutions of higher education (IHEs) to support emergency financial aid to students and institutional costs associated with significant changes to the delivery of instruction due to the coronavirus. This form will be used by institutions that have improperly drawn down funds from their award accounts to provide the Department with information regarding funds being returned to correct these improper payments.

*Additional Information:* An emergency clearance approval for the use of the system is described below due to the following conditions: Under the current unprecedented national health emergency, Congress and the President have come together to offer relief to those individuals and industries affected by the COVID–19 virus under the Coronavirus Aid, Relief, and Economic Security Act or the CARES Act. Under the CARES Act's Higher Education Emergency Relief Fund (HEERF), the U.S. Department of Education (the Department) has made over 12,000 awards to institutions of higher education (IHEs) to support emergency financial aid to students and institutional costs associated with significant changes to the delivery of instruction due to the coronavirus. In the course of monitoring these grant awards, the Department has determined that over 700 IHEs have improperly drawn down funds from their award accounts, totaling over $202 million in funds that must now be returned. Furthermore, during the time that these funds have been drawn down, grantees are earning additional interest in excess of the $500 annual cap prescribed by 2 CFR 200.305(b) of the Uniform Guidance. The Department is concerned that this excess interest, without an expeditious inventory and response by our grantees, may be difficult to account. Therefore, in order to process the return of these funds more efficiently and prevent any further earnings beyond the interest cap, we are requesting emergency approval of a short form that will allow the grantee to provide the Department with information regarding the funds being returned.

Dated: January 8, 2021.

**Kate Mullan,**

*PRA Coordinator, Strategic Collections and Clearance Governance and Strategy Division, Office of Chief Data Officer.*

## DEPARTMENT OF EDUCATION

### Applications for New Awards; Fulbright-Hays Group Projects Abroad Program

**AGENCY:** Office of Postsecondary Education, Department of Education.

**ACTION:** Notice.

**SUMMARY:** The Department of Education is issuing a notice inviting applications for fiscal year (FY) 2021 for the Fulbright-Hays Group Projects Abroad (GPA) Program, Assistance Listing Numbers 84.021A and 84.021B. This notice relates to the approved information collection under OMB control number 1840–0792.

**DATES:**

*Applications Available:* January 14, 2021.

*Deadline for Transmittal of Applications:* March 15, 2021.

*Pre-Application Webinar information:* The Department will hold a pre-application meeting via webinar for prospective applicants. Detailed information regarding this webinar will be provided on the Group Projects Abroad website at *www2.ed.gov/programs/iegpsgpa/index.html.* Additionally, for prospective applicants unfamiliar with grantmaking at the Department, please consult our funding basics resources at *https://www2.ed.gov/documents/funding-101/funding-101-basics.pdf.*

**ADDRESSES:** For the addresses for obtaining and submitting an application, please refer to our Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 13, 2019 (84 FR 3768) and available at *www.govinfo.gov/content/pkg/FR-2019-02-13/pdf/2019-02206.pdf.*

**FOR FURTHER INFORMATION CONTACT:** Cory Neal, U.S. Department of Education, 400 Maryland Avenue SW, room 258–12, Washington, DC 20202. Telephone: (202) 453–6137. Email: *GPA@ed.gov.*

If you use a telecommunications device for the deaf (TDD) or a text telephone (TTY), call the Federal Relay Service (FRS), toll free, at 1–800–877–8339.

**SUPPLEMENTARY INFORMATION:**

### Full Text of Announcement

### I. Funding Opportunity Description

*Purpose of Program:* The purpose of the Fulbright-Hays GPA Program is to promote, improve, and develop the study of modern foreign languages and area studies in the United States. The program provides opportunities for faculty, teachers, and undergraduate and graduate students to conduct individual and group projects overseas. Projects may include either (1) short-term seminars, curriculum development, group research or study, or (2) long-term advanced intensive language programs.

This competition invites applicants to submit an application to request support for either a Fulbright-Hays GPA short-term project (GPA short-term projects 84.021A) or a Fulbright-Hays GPA long-term project (GPA long-term projects 84.021B). Applicants must clearly indicate on the SF 424, the Application for Federal Assistance cover sheet, whether they are applying for a GPA short-term project (84.021A) or a GPA long-term project (84.021B). Additional submission requirements are included in the application package.

There are three types of GPA short-term projects: (1) Short-term seminar projects of four to six weeks in length designed to help participants integrate international studies into an institution's or school system's general curriculum by focusing on a particular aspect of area study, such as the culture of an area or country of study (34 CFR 664.11); (2) curriculum development projects of four to eight weeks in length that provide participants the opportunity to acquire resource materials for curriculum development in modern foreign language and area studies for use and dissemination in the United States (34 CFR 664.12); and (3) group research or study projects of three to twelve months in duration designed to give participants the opportunity to undertake research or study in a foreign country (34 CFR 664.13).

GPA long-term projects are advanced overseas intensive language projects designed by the applicant that may be carried out during a full year, an academic year, a semester, a trimester, a quarter, or a summer. GPA long-term projects provide participants an opportunity for intensive advanced language training overseas and for using the language while experiencing the culture in the foreign country. Participants should have successfully completed at least two academic years of training in the language to be studied to be eligible to participate in a GPA intensive advanced language training program. In addition, the language to be studied must be indigenous to the host country and maximum use must be made of local institutions and personnel (34 CFR 664.14).

*Priorities:* This notice contains one absolute priority and four competitive preference priorities. In accordance with 34 CFR 75.105(b)(2)(ii), the absolute priority is from the regulations for this program (34 CFR 664.32). Competitive Preference Priorities 1 and 2 are from the notice of final priorities and definitions published in the **Federal Register** on June 16, 2016 (81 FR 39196) (the 2016 NFP). Competitive Preference Priority 3 is from the regulations for this program (34 CFR 664.32), and Competitive Preference Priority 4 is from the notice of final priorities published in the **Federal Register** on September 24, 2010 (75 FR 59050) (the 2010 NFP).

*Absolute Priority:* For FY 2021 and any subsequent year in which we make awards from the list of unfunded applications from this competition, this priority is an absolute priority. Under 34 CFR 75.105(c)(3), we consider only applications that meet this priority.

This priority is:

*Specific Geographic Regions of the World.*

A group project that focuses on one or more of the following geographic regions of the world: Africa, East Asia, South Asia, Southeast Asia and the Pacific, the Western Hemisphere (Central and South America, Mexico, and the Caribbean), Eastern and Central Europe and Eurasia, and the Near East.

*Competitive Preference Priorities:* For FY 2021, there are four competitive preference priorities. Under 34 CFR 75.105(c)(2)(i), we award three additional points to an application that meets Competitive Preference Priority 1; two additional points to an application that meets Competitive Preference Priority 2; two additional points for short-term projects or four additional points for long-term projects to an application that meets Competitive Preference Priority 3; and two additional points to an application that meets Competitive Preference Priority 4. Applicants for GPA short-term projects may address Competitive Preference Priorities 1, 3, and 4. Applicants for GPA long-term projects may address Competitive Preference Priorities 2 and 3. In the application narrative, an applicant must indicate the priority or priorities being addressed and provide a substantive description of how the proposed activities support the applicant's selected priority or priorities and provide documentation supporting its claims.

These priorities are:

*Competitive Preference Priority 1—Applications for GPA Short-term Projects from Selected Institutions and Organizations* (3 Points).

Applications for GPA short-term projects from the following types of institutions and organizations:

- Minority-Serving Institutions (MSIs) (as defined in this notice).
- Community colleges (as defined in this notice).
- New applicants (as defined in this notice).
- State educational agencies (as defined in this notice).

*Competitive Preference Priority 2—Applications for GPA Long-term Projects from MSIs* (2 Points).

Applications for GPA long-term advanced overseas intensive language training projects from MSIs.

*Competitive Preference Priority 3—Substantive Training and Thematic Focus on Less Commonly Taught Languages* (2 Points for short-term projects or 4 Points for long-term projects).

Applications that propose GPA short-term projects (2 points) or GPA long-term projects (4 points) that provide substantive training and thematic focus on any modern foreign language except French, German, or Spanish.

*Competitive Preference Priority 4—Inclusion of K–12 Educators* (2 Points).

Applications that propose short-term projects abroad that develop and improve foreign language studies, area studies, or both at elementary and secondary schools by including K–12 teachers or K–12 administrators as at least 50 percent of the project participants.

*Definitions:*

The following definitions are from the 2016 NFP to provide clarity for applicants addressing the competitive preference priorities.

*Community college* means an institution that meets the definition in section 312(f) of the Higher Education Act of 1965, as amended (HEA) (20 U.S.C. 1058(f)); or an institution of higher education (IHE) (as defined in section 101 of the HEA (20 U.S.C. 1001)) that awards degrees and certificates, more than 50 percent of which are not bachelor's degrees (or an equivalent).

*Minority-serving institution (MSI)* means an institution that is eligible to receive assistance under sections 316 through 320 of part A of title III, under part B of title III, or under title V of the HEA.

*New applicant* means any applicant that has not received a discretionary grant from the Department of Education under the Fulbright-Hays Act prior to the deadline date for applications under this program.

*State educational agency* means the State board of education or other agency or officer primarily responsible for the supervision of public elementary and secondary schools in a State. In the absence of this officer or agency, it is an officer or agency designated by the Governor or State law.

*Program Authority:* 22 U.S.C. 2452(b)(6).

**Note:** Projects must be awarded and operated in a manner consistent with the nondiscrimination requirements contained in the U.S. Constitution and the Federal civil rights laws.

*Applicable Regulations:* (a) The Education Department General Administrative Regulations in 34 CFR parts 75, 77, 81, 82, and 86. (b) The Office of Management and Budget Guidelines to Agencies on Governmentwide Debarment and Suspension (Nonprocurement) in 2 CFR part 180, as adopted and amended as regulations of the Department in 2 CFR part 3485. (c) The Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards in 2 CFR part 200, as adopted and amended as regulations of the Department in 2 CFR part 3474. (d) The regulations for this program in 34 CFR part 664. (e) The 2010 NFP. (f) The 2016 NFP.

**Note:** The regulations in 34 CFR part 86 apply to IHEs only.

## II. Award Information

*Type of Award:* Discretionary grants.

*Estimated Available Funds:* The Administration's budget request for FY 2021 does not include funds for this program. However, we are inviting applications to allow enough time to complete the grant process before the end of the current fiscal year, if Congress appropriates funds for this program.

Contingent upon the availability of funds and the quality of applications, we may make additional awards in FY 2022 from the list of unfunded applications from this competition.

*Estimated Available Funds:* $3,532,000.

*Estimated Range of Awards:*

GPA short-term projects: $50,000–$100,000.

GPA long-term projects: $50,000–$250,000.

*Estimated Average Size of Awards:*

GPA short-term projects: $80,059.

GPA long-term projects: $185,025.

*Maximum Award:* We will not make a GPA short-term award exceeding $100,000 for a single project period of 18 months. We will not make a GPA long-term project award exceeding $250,000 for a single budget period of 24 months.

*Estimated Number of Awards:* 25.

GPA short-term projects: 10.

GPA long-term projects: 15.

**Note:** The Department is not bound by any estimates in this notice.

*Project Period:*

GPA short-term projects: Up to 18 months.

GPA long-term projects: Up to 24 months.

## III. Eligibility Information

1. *Eligible Applicants:* (1) IHEs, (2) State educational agencies, (3) private nonprofit educational organizations, and (4) consortia of these entities.

*Eligible Participants:* Citizens, nationals, or permanent residents of the United States, who are (1) faculty members who teach modern foreign languages or area studies at an IHE, (2) teachers in elementary or secondary schools, (3) experienced education administrators responsible for planning, conducting, or supervising programs in modern foreign language or area studies at the elementary, secondary, or postsecondary levels, or (4) graduate students, or juniors or seniors in an IHE, who plan teaching careers in modern foreign languages or area studies.

**Note:** If you are a nonprofit organization, under 34 CFR 75.51, you may demonstrate your nonprofit status by providing: (1) Proof that the Internal Revenue Service currently recognizes the applicant as an organization to which contributions are tax deductible under section 501(c)(3) of the Internal Revenue Code; (2) a statement from a State taxing body or the State attorney general certifying that the organization is a nonprofit organization operating within the State and that no part of its net earnings may lawfully benefit any private shareholder or individual; (3) a certified copy of the applicant's certificate of incorporation or similar document if it clearly establishes the nonprofit status of the applicant; or (4) any item described above if that item applies to a State or national parent organization, together with a statement by the State or parent organization that the applicant is a local nonprofit affiliate.

2. *Cost Sharing or Matching:* This program does not require cost sharing or matching.

3. *Subgrantees:* A grantee under this competition may not award subgrants to entities to directly carry out project activities described in its application.

## IV. Application and Submission Information

1. *Application Submission Instructions:* Applicants are required to follow the Common Instructions for Applicants to Department of Education Discretionary Grant Programs, published in the **Federal Register** on February 13, 2019 (84 FR 3768), and available at *www.govinfo.gov/content/pkg/FR-2019-02-13/pdf/2019-02206.pdf,* which contain requirements and information on how to submit an application.

2. *Intergovernmental Review:* This program is not subject to Executive Order 12372 and the regulations in 34 CFR part 79.

3. *Funding Restrictions:* We specify unallowable costs in 34 CFR 664.33. We reference additional regulations outlining funding restrictions in the *Applicable Regulations* section of this notice.

4. *Recommended Page Limit:* The application narrative is where you, the applicant, address the selection criteria that reviewers use to evaluate your application. We recommend that you (1) limit the application narrative to no more than 40 pages and (2) use the following standards:

- A ''page'' is 8.5″ x 11″, on one side only, with 1'' margins at the top, bottom, and both sides.
- Double space (no more than three lines per vertical inch) all text in the application narrative, including titles, headings, footnotes, quotations, references, and captions, as well as all text in charts, tables, figures, and graphs.
- Use a font that is either 12 point or larger, or no smaller than 10 pitch (characters per inch).
- Use one of the following fonts: Times New Roman, Courier, Courier New, or Arial.

The recommended page limit does not apply to the cover sheet or budget section, including the narrative budget justification; the assurance and certifications; or the one-page abstract, the resumes, the biography, or letters of support. However, the recommended page limit does apply to all of the application narrative.

## V. Application Review Information

1. *Selection Criteria:* The selection criteria for this program are from 34 CFR 664.31 and are as follows:

(a) *Plan of operation.* (20 points)

(1) The Secretary reviews each application for information to determine the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective; and

(v) A clear description of how the applicant will ensure that project participants who are otherwise eligible to participate are selected without regard to race, color, national origin, gender, age, or handicapping condition.

(b) *Quality of key personnel.* (10 points)

(1) The Secretary reviews each application for information to determine the quality of key personnel the applicant plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director;

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (b)(2)(i) and (ii) of this section will commit to the project; and

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, will ensure that its personnel are selected for employment without regard to race, color, national origin, gender, age, or handicapping condition.

(3) To determine the qualifications of a person, the Secretary considers evidence of past experience and training in fields related to the objectives of the project as well as other information that the applicant provides.

(c) *Budget and cost effectiveness.* (10 points)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(d) *Evaluation plan.* (20 points)

(1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project.

(2) The Secretary looks for information that shows that the methods of evaluation are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(e) *Adequacy of resources.* (5 points)

(1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows that the facilities, equipment, and supplies that the applicant plans to use are adequate.

(f) *Specific Program Criteria.* (35 points)

(1) In addition to the general selection criteria contained in this section, the Secretary reviews each application for information that shows that the project meets the specific program criteria.

(2) The Secretary looks for information that shows—

(i) The potential impact of the project on the development of the study of modern foreign languages and area studies in American education. (15 points)

(ii) The project's relevance to the applicant's educational goals and its relationship to its program development in modern foreign languages and area studies. (10 points)

(iii) The extent to which direct experience abroad is necessary to achieve the project's objectives and the effectiveness with which relevant host country resources will be utilized. (10 points)

2. *Review and Selection Process:* We remind potential applicants that in reviewing applications in any discretionary grant competition, the Secretary may consider, under 34 CFR 75.217(d)(3), the past performance of the applicant in carrying out a previous award, such as the applicant's use of funds, achievement of project objectives, and compliance with grant conditions. The Secretary may also consider whether the applicant failed to submit a timely performance report or submitted a report of unacceptable quality.

In addition, in making a competitive grant award, the Secretary requires various assurances including those applicable to Federal civil rights laws that prohibit discrimination in programs or activities receiving Federal financial assistance from the Department (34 CFR 100.4, 104.5, 106.4, 108.8, and 110.23).

For FY 2021, proposed GPA short-term projects will be reviewed by peer review panels with expertise on the world area focus of the application. All proposed GPA long-term projects will be reviewed by one peer review panel. The International and Foreign Language Education office will prepare separate rank order slates for GPA short-term projects and GPA long-term projects recommended for new awards in FY 2021. Each slate will include the peer reviewers' scores for all applications evaluated, from the highest score to the lowest score.

3. *Risk Assessment and Specific Conditions:* Consistent with 2 CFR 200.205, before awarding grants under this competition the Department conducts a review of the risks posed by applicants. Under 2 CFR 3474.10, the Secretary may impose specific conditions and, in appropriate circumstances, high-risk conditions on a grant if the applicant or grantee is not financially stable; has a history of unsatisfactory performance; has a financial or other management system that does not meet the standards in 2 CFR part 200, subpart D; has not fulfilled the conditions of a prior grant; or is otherwise not responsible.

4. *Integrity and Performance System:* If you are selected under this competition to receive an award that over the course of the project period may exceed the simplified acquisition threshold (currently $250,000), under 2 CFR 200.205(a)(2) we must make a judgment about your integrity, business ethics, and record of performance under Federal awards—that is, the risk posed by you as an applicant—before we make an award. In doing so, we must consider any information about you that is in the integrity and performance system (currently referred to as the Federal Awardee Performance and Integrity Information System (FAPIIS)), accessible through the System for Award Management. You may review and comment on any information about yourself that a Federal agency previously entered and that is currently in FAPIIS.

Please note that, if the total value of your currently active grants, cooperative agreements, and procurement contracts from the Federal Government exceeds $10,000,000, the reporting requirements in 2 CFR part 200, Appendix XII, require you to report certain integrity information to FAPIIS semiannually. Please review the requirements in 2 CFR part 200, Appendix XII, if this grant plus all the other Federal funds you receive exceed $10,000,000.

5. *In General:* In accordance with the Office of Management and Budget's guidance located at 2 CFR part 200, all applicable Federal laws, and relevant Executive guidance, the Department will review and consider applications for funding pursuant to this notice inviting applications in accordance with—

(a) Selecting recipients most likely to be successful in delivering results based on the program objectives through an objective process of evaluating Federal award applications (2 CFR 200.205);

(b) Prohibiting the purchase of certain telecommunication and video surveillance services or equipment in alignment with section 889 of the National Defense Authorization Act of 2019 (Pub. L. 115–232) (2 CFR 200.216);

(c) Promoting the freedom of speech and religious liberty in alignment with *Promoting Free Speech and Religious Liberty* (E.O. 13798) and *Improving Free Inquiry, Transparency, and Accountability at Colleges and Universities* (E.O. 13864) (2 CFR 200.300, 200.303, 200.339, and 200.341);

(d) Providing a preference, to the extent permitted by law, to maximize use of goods, products, and materials produced in the United States (2 CFR 200.322); and

(e) Terminating agreements in whole or in part to the greatest extent authorized by law if an award no longer effectuates the program goals or agency priorities (2 CFR 200.340).

## VI. Award Administration Information

1. *Award Notices:* If your application is successful, we notify your U.S. Representative and U.S. Senators and send you a Grant Award Notification (GAN); or we may send you an email containing a link to access an electronic version of your GAN. We may notify you informally, also.

If your application is not evaluated or not selected for funding, we notify you.

2. *Administrative and National Policy Requirements:* We identify administrative and national policy requirements in the application package and reference these and other requirements in the *Applicable Regulations* section of this notice.

We reference the regulations outlining the terms and conditions of an award in the *Applicable Regulations* section of this notice and include these and other specific conditions in the GAN. The GAN also incorporates your approved application as part of your binding commitments under the grant.

3. *Open Licensing Requirements:* Unless an exception applies, if you are awarded a grant under this competition, you will be required to openly license to the public grant deliverables created in whole, or in part, with Department grant funds. When the deliverable consists of modifications to pre-existing works, the license extends only to those modifications that can be separately identified and only to the extent that open licensing is permitted under the terms of any licenses or other legal restrictions on the use of pre-existing works. Additionally, a grantee or subgrantee that is awarded competitive grant funds must have a plan to disseminate these public grant deliverables. This dissemination plan can be developed and submitted after your application has been reviewed and selected for funding. For additional information on the open licensing requirements please refer to 2 CFR 3474.20.

4. *Reporting:* (a) If you apply for a grant under this competition, you must ensure that you have in place the necessary processes and systems to comply with the reporting requirements in 2 CFR part 170 should you receive funding under the competition. This does not apply if you have an exception under 2 CFR 170.110(b).

(b) At the end of your project period, you must submit a final performance report, including financial information, as directed by the Secretary. If you receive a multiyear award, you must submit an annual performance report that provides the most current performance and financial expenditure information as directed by the Secretary under 34 CFR 75.118. The Secretary may also require more frequent performance reports under 34 CFR 75.720(c). For specific requirements on reporting, please go to *www.ed.gov/fund/grant/apply/appforms/appforms.html.*

5. *Performance Measures:* For the purposes of the Government Performance and Results Act of 1993 and Department reporting under 34 CFR 75.110, the following measure will be used by the Department to evaluate the success of the GPA short-term program: The percentage of GPA short-term project participants who disseminated information about or materials from their group project abroad through more than one outreach activity within six months of returning to their home institution. The following measure will be used by the Department to evaluate the success of the GPA long-term program: The percentage of GPA long-term project participants who increased their reading, writing, and/or listening/speaking foreign language scores by one proficiency level. The efficiency of the GPA long-term program will be measured by considering the cost per GPA participant who increased his/her foreign language score in reading, writing, and/or listening/speaking by at least one proficiency level.

The information provided by grantees in their performance reports submitted via the International Resource Information System (IRIS) will be the source of data for this measure. Reporting screens for institutions can be viewed at: *http://iris.ed.gov/iris/pdfs/gpa_director.pdf* and *http://iris.ed.gov/iris/pdfs/gpa_participant.pdf.*

## VII. Other Information

*Accessible Format:* On request to the program contact person listed under **FOR FURTHER INFORMATION CONACT**, individuals with disabilities can obtain this document and a copy of the application package in an accessible format. The Department will provide the requestor with an accessible format that may include Rich Text Format (RTF) or text format (txt), a thumb drive, an MP3 file, braille, large print, audiotape, or compact disc, or other accessible format.

*Electronic Access to This Document:* The official version of this document is the document published in the **Federal Register**. You may access the official edition of the **Federal Register** and the Code of Federal Regulations at *www.govinfo.gov.* At this site you can view this document, as well as all other documents of this Department published in the **Federal Register**, in text or Portable Document Format (PDF). To use PDF you must have Adobe Acrobat Reader, which is available free at the site.

You may also access documents of the Department published in the **Federal Register** by using the article search feature at: *www.federalregister.gov.* Specifically, through the advanced search feature at this site, you can limit your search to documents published by the Department.

## DEPARTMENT OF ENERGY

## Federal Energy Regulatory Commission

**[Docket No. NJ21–9–000]**

## City of Pasadena, California; Notice of Filing

Take notice that on December 23, 2020, the City of Pasadena, California submitted its tariff filing: Annual revision to its Transmission Revenue Balancing Account Adjustment to be effective 1/1/2021.[1]

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. On or before the comment date, it is not necessary to serve motions to intervene or protests on persons other than the Applicant.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://ferc.gov*) using the ''eLibrary'' link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this

[1] Pasadena is a municipal electric utility that is not subject to the jurisdiction of the Commission under Sections 205 and 206 of the Federal Power Act, 16 U.S.C. 824d and 824e (2018). Pasadena became a Participating TO in the CAISO as of January 1, 2005. Without waiving any rights relating to its jurisdictional status, Pasadena submits this filing to the Commission, as it previously submitted its Transmission Revenue Requirement (TRR) and TO Tariff in Docket Nos. EL05–18–000, EL09–67–000, ER11–4375–000, ER17–392–000, and ER19–1136–000, for the purpose of permitting the Commission to review the justness and reasonableness of the CAISO's Tariff charges, which include the TRR of Pasadena as well as those of other non-jurisdictional and jurisdictional Participating TOs.

time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the eFiling link at *http://www.ferc.gov.* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

*Comment Date:* 5:00 p.m. Eastern Time on January 19, 2021.

Dated: January 8, 2021.

**Nathaniel J. Davis, Sr.,**

*Deputy Secretary.*

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

### Combined Notice of Filings #1

Take notice that the Commission received the following electric corporate filings:

*Docket Numbers:* EC21–40–000.
*Applicants:* Energia Sierra Juarez U.S., LLC, Energia Sierra Juarez U.S. Transmission, LLC.
*Description:* Application for Authorization Under Section 203 of the Federal Power Act of Energia Sierra Juarez U.S., LLC, et. al.
*Filed Date:* 1/8/21.
*Accession Number:* 20210108–5071.
*Comments Due:* 5 p.m. ET 1/29/21.

Take notice that the Commission received the following electric rate filings:

*Docket Numbers:* ER16–1404–007.
*Applicants:* New York Independent System Operator, Inc.
*Description:* Compliance filing: NYISO compliance errata to 12/22/20 SSE under BSM rules filing to be effective 2/20/2021.
*Filed Date:* 1/8/21.
*Accession Number:* 20210108–5085.
*Comments Due:* 5 p.m. ET 1/29/21.

*Docket Numbers:* ER20–479–001; ER20–481–001; ER20–482–001; ER20–484–001; ER20–1650–002.
*Applicants:* Little Bear Solar 1, LLC, Little Bear Solar 3, LLC, Little Bear Solar 4, LLC, Little Bear Solar 5, LLC, Little Bear Master Tenant, LLC.
*Description:* Notice of Change in Status of Little Bear Solar 1, LLC, et al.
*Filed Date:* 1/7/21.
*Accession Number:* 20210107–5172.
*Comments Due:* 5 p.m. ET 1/28/21.

*Docket Numbers:* ER20–1912–002.
*Applicants:* Blooming Grove Wind Energy Center LLC.
*Description:* Notice of Change in Status of Blooming Grove Wind Energy Center LLC.
*Filed Date:* 1/7/21.
*Accession Number:* 20210107–5180.
*Comments Due:* 5 p.m. ET 1/28/21.

*Docket Numbers:* ER20–2288–001.
*Applicants:* Tatanka Ridge Wind, LLC.
*Description:* Notice of Change in Status of Tatanka Ridge Wind, LLC.
*Filed Date:* 1/8/21.
*Accession Number:* 20210108–5069.
*Comments Due:* 5 p.m. ET 1/29/21.

*Docket Numbers:* ER20–2445–001.
*Applicants:* Prineville Solar Energy LLC.
*Description:* Notice of Change in Status of Prineville Solar Energy LLC.
*Filed Date:* 1/7/21.
*Accession Number:* 20210107–5179.
*Comments Due:* 5 p.m. ET 1/28/21.

*Docket Numbers:* ER21–13–001.
*Applicants:* NECEC Transmission LLC.
*Description:* Compliance filing: Notice of Effective Date and Consummation (National Grid) to be effective N/A.
*Filed Date:* 1/8/21.
*Accession Number:* 20210108–5178.
*Comments Due:* 5 p.m. ET 1/29/21.

*Docket Numbers:* ER21–14–001.
*Applicants:* NECEC Transmission LLC.
*Description:* Compliance filing: Notice of Effective Date and Consummation (Unitil) to be effective N/A.
*Filed Date:* 1/8/21.
*Accession Number:* 20210108–5179.
*Comments Due:* 5 p.m. ET 1/29/21.

*Docket Numbers:* ER21–15–001.
*Applicants:* NECEC Transmission LLC.
*Description:* Compliance filing: Notice of Effective Date and Consummation (HQUS Eversource) to be effective N/A.
*Filed Date:* 1/8/21.
*Accession Number:* 20210108–5195.
*Comments Due:* 5 p.m. ET 1/29/21.

*Docket Numbers:* ER21–17–001.
*Applicants:* NECEC Transmission LLC.
*Description:* Compliance filing: Notice of Effective Date and Consummation (HQUS National Grid) to be effective N/A.
*Filed Date:* 1/8/21.
*Accession Number:* 20210108–5182.
*Comments Due:* 5 p.m. ET 1/29/21.

*Docket Numbers:* ER21–18–001.
*Applicants:* NECEC Transmission LLC.
*Description:* Compliance filing: Notice of Effective Date and Consummation (HQUS Unitil) to be effective N/A.
*Filed Date:* 1/8/21.
*Accession Number:* 20210108–5183.
*Comments Due:* 5 p.m. ET 1/29/21.

*Docket Numbers:* ER21–19–001.
*Applicants:* NECEC Transmission LLC.
*Description:* Compliance filing: Notice of Effective Date and Consummation (HQUS Additional) to be effective N/A.
*Filed Date:* 1/8/21.
*Accession Number:* 20210108–5184.
*Comments Due:* 5 p.m. ET 1/29/21.

*Docket Numbers:* ER21–445–000.
*Applicants:* Hill Top Energy Center LLC.
*Description:* Supplement to November 20, 2020 Market Based Rate Application of Hill Top Energy Center LLC.
*Filed Date:* 1/7/21.
*Accession Number:* 20210107–5182.
*Comments Due:* 5 p.m. ET 1/19/21.

*Docket Numbers:* ER21–681–001.
*Applicants:* Midcontinent Independent System Operator, Inc., American Transmission Company LLC.
*Description:* Tariff Amendment: 2021–01–08_SA 3592 ATC-Wood County Solar Substitute E&P (J986) to be effective 1/1/2021.

## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

**[Docket No. NJ21–8–000]**

### City of Azusa, California; Notice of Petition for Declaratory Order

Take notice that on December 23, 2020, pursuant to Rules 205 and 207 of the Commission's Rules of Practice and Procedure, 18 CFR 385.205, 385.207, and consistent with the provisions of the Transmission Owner (TO) Tariff, the City of Azusa, California (Azusa), submitted a petition for a declaratory order requesting that the Commission (1) accepting Azusa's annual revisions to its Transmission Revenue Balancing Account Adjustment (TRBAA); (2) approving Azusa's annual update to the costs of its Existing Transmission Contract (ETC) with Southern California Edison Company for purposes of recovery of such costs through the ETC Pass-Through Clause contained in Azusa's TO Tariff; (3) accepting revisions to Appendix I to Azusa's TO Tariff to reflect Azusa's revised TRBAA, ETC costs, and updated Base and High Voltage Transmission Revenue Requirements (TRR);[1] (4) to the extent necessary, waiving the sixty-day notice requirement provided for in the Commission's regulations at 18 CFR 35.3(a); (5) waiving the filing fee associated with this Petition that is provided for by Rule 207 of the Commission's Rules of Practice and Procedure, 18 CFR 385.207; and (6) granting any other relief or waivers necessary or appropriate for approval and implementation of the revisions to Azusa's Base TRR (including the updated ETC cost components), TRBAA, High Voltage TRR, and modifications to Azusa's TO Tariff effective as of January 1, 2021,[2] as more fully explained in the petition.

Any person desiring to intervene or to protest this filing must file in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211, 385.214). Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a notice of intervention or motion to intervene, as appropriate. Such notices, motions, or protests must be filed on or before the comment date. Anyone filing a motion to intervene or protest must serve a copy of that document on the Petitioner.

The Commission strongly encourages electronic filings of comments, protests and interventions in lieu of paper using the eFiling link at *http://www.ferc.gov.* Persons unable to file electronically may mail similar pleadings to the Federal Energy Regulatory Commission, 888 First Street, NE, Washington, DC 20426. Hand delivered submissions in docketed proceedings should be delivered to Health and Human Services, 12225 Wilkins Avenue, Rockville, Maryland 20852.

In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents of this document via the internet through the Commission's Home Page (*http://ferc.gov*) using the eLibrary link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact the Federal Energy Regulatory Commission at *FERCOnlineSupport@ferc.gov* or call toll-free, (886) 208–3676 or TYY, (202) 502–8659.

*Comment Date:* 5:00 p.m. Eastern Time on January 19, 2021.

Dated: January 8, 2021.

### Combined Notice of Filings

Take notice that the Commission has received the following Natural Gas Pipeline Rate and Refund Report filings:

*Docket Number:* PR21–14–000.

*Applicants:* Permian Highway Pipeline LLC.

*Description:* Tariff filing per 284.123(b),(e)/: Petition for NGPA Section 311 Rate Approval to be effective 12/8/2020 under PR21–14.

*Filed Date:* 1/7/2021.

*Accession Number:* 202101075015.

*Comments/Protests Due:* 5 p.m. ET 1/28/2021.

*Docket Numbers:* RP21–376–000.

*Applicants:* Transcontinental Gas Pipe Line Company, LLC.

*Description:* Compliance filing Rate Schedule S–2 Flow Through Refund Report TETCO OFO.

*Filed Date:* 1/7/21.

*Accession Number:* 20210107–5004.

*Comments Due:* 5 p.m. ET 1/19/21.

The filings are accessible in the Commission's eLibrary system (*https://elibrary.ferc.gov/idmws/search/fercgensearch.asp*) by querying the docket number.

Any person desiring to intervene or protest in any of the above proceedings must file in accordance with Rules 211

[1] Azusa's High Voltage Base TRR reflects two separately-stated ETC cost components, including an annually-updated forecast of Azusa's ETC costs for the upcoming calendar year and an annually updated true-up of Azusa's ETC costs for a prior twelve-month period. The High Voltage TRR consists of the High Voltage Base TRR plus the High Voltage TRBAA, which can be either positive or negative.

[2] Azusa is a municipal electric utility that is not subject to the jurisdiction of the Commission under Sections 205 and 206 of the Federal Power Act, 16 U.S.C. 824d and 824e (2018). Azusa became a Participating Transmission Owner (''Participating TO'') in the California Independent System Operator Corporation (''CAISO'') as of January 1, 2003. Without waiving any rights relating to its jurisdictional status, Azusa submits this filing to the Commission, as it previously submitted its TO Tariff in Docket Nos. EL03–14–000 and ER12–489–000, for the purpose of permitting the Commission to review the justness and reasonableness of the CAISO's tariff charges, which include Azusa's TRR as well as the TRRs of other non-jurisdictional and jurisdictional Participating TOs.

and 214 of the Commission's Regulations (18 CFR 385.211 and 385.214) on or before 5:00 p.m. Eastern time on the specified date(s). Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: *http://www.ferc.gov/docs-filing/efiling/filing-req.pdf.* For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

Dated: January 8, 2021.

### Federal Energy Regulatory Commission

**[Project No. 190–105]**

### Moon Lake Electric Association, Inc.; Notice of Effectiveness of Withdrawal of License Application

On January 31, 2017, Moon Lake Electric Association, Inc. (Moon Lake) filed an application for a new license for the 1.2-megawatt Uintah Hydroelectric Project No. 190. On December 23, 2020, Moon Lake filed a notice of withdrawal of its application. Moon Lake states that the anticipated cost of operating the project under the new license will render the project uneconomic.

No motion in opposition to the notice of withdrawal has been filed, and the Commission has taken no action to disallow the withdrawal. Pursuant to Rule 216(b) of the Commission's Rules of Practice and Procedure,[1] the withdrawal of the application became effective on January 8, 2021, and this proceeding is hereby terminated. Commission staff are concurrently issuing a letter to Moon Lake requiring it to file an application to surrender the project.

Dated: January 8, 2021.

### Federal Energy Regulatory Commission

**[Docket No. AD21–8–000]**

### Technical Conference on Reassessment of the Electric Quarterly Report Requirements; Notice of Technical Conference

Take notice that on February 24, 2021, the Federal Energy Regulatory Commission (Commission) will convene a staff-led technical conference via webcast as part of a reassessment of the Electric Quarterly Report (EQR) requirements. A supplemental notice will be issued prior to the conference with further details regarding the agenda, meeting registration information, and electronic log-in information.

The purpose of this technical conference is to provide a forum for Commission staff, filers, and data users to discuss potential changes to the current EQR data fields. This technical conference is intended to be the first in a series of conferences related to a reassessment of the EQR requirements.

Commission conferences are accessible under section 508 of the Rehabilitation Act of 1973. For accessibility accommodations, please send an email to *accessibility@ferc.gov* or call toll free 1–866–208–3372 (voice) or 202–502–8659 (TTY), or send a FAX to 202–208–2106 with the required accommodations.

For more information about the EQR technical conference, please contact Jeff Sanders of the Commission's Office of Enforcement at (202) 502–6455, or send an email to *EQR@ferc.gov.* Additional information will also be provided on the EQR web page.

Dated: January 8, 2021.

### Federal Energy Regulatory Commission

**[Project No. 3428–187]**

### Brown Bear II Hydro, Inc.; Notice of Intent To File License Application, Filing of Pre-Application Document, Commencement of Pre-Filing Process, and Scoping; Waiving Parts of the Pre-Filing Process; Request for Comments on the Pad and Scoping Document, and Identification of Issues and Associated Study Requests

a. *Type of Filing:* Notice of Intent to File License Application for New License and Commencing Pre-filing Process.

b. *Submitted By:* Brown Bear II Hydro, Inc.

c. Name of Project: Worumbo Hydroelectric Project.

d. *Location:* On the Androscoggin River, in Androscoggin County, Maine.

e. *Filed Pursuant to:* 18 CFR part 5 of the Commission's Regulations.

f. Licensee Contact: Michael Scarzello, Regulatory Director, Eagle Creek Renewable Energy, LLC, 116 N State Street, P.O. Box 167, Neshkoro, WI 54960–0167.

g. *FERC Contact:* Ryan Hansen at (202) 502–8074 or email at *ryan.hansen@ferc.gov.*

h. *Cooperating agencies:* Federal, state, local, and tribal agencies with jurisdiction and/or special expertise with respect to environmental issues that wish to cooperate in the preparation of the environmental document should follow the instructions for filing such requests described in item m below. Cooperating agencies should note the Commission's policy that agencies that cooperate in the preparation of the environmental document cannot also intervene. See 94 FERC 61,076 (2001).

i. *With this notice, we are initiating informal consultation with:* (a) The U.S. Fish and Wildlife Service and/or NOAA Fisheries under section 7 of the Endangered Species Act and the joint agency regulations thereunder at 50 CFR, Part 402 and (b) the State Historic Preservation Officer, as required by section 106, National Historic Preservation Act, and the implementing regulations of the Advisory Council on Historic Preservation at 36 CFR 800.2.

j. With this notice, we are designating Brown Bear II Hydro, Inc. as the Commission's non-federal representatives for carrying out informal consultation, pursuant to section 7 of the Endangered Species Act and section

106 of the National Historic Preservation Act.

k. Brown Bear II Hydro, Inc. filed with the Commission a Pre-Application Document (PAD; including a proposed process plan and schedule), pursuant to 18 CFR 5.6 of the Commission's regulations.

l. In addition to publishing the full text of this document in the **Federal Register**, the Commission provides all interested persons an opportunity to view and/or print the contents via the internet through the Commission's Home Page (*http://www.ferc.gov*) using the eLibrary link. Enter the docket number excluding the last three digits in the docket number field to access the document. At this time, the Commission has suspended access to the Commission's Public Reference Room, due to the proclamation declaring a National Emergency concerning the Novel Coronavirus Disease (COVID–19), issued by the President on March 13, 2020. For assistance, contact FERC at *FERCONlineSupport@ferc.gov* or call toll-free, (866) 208–3676 or TYY, (202) 502–8659.

Register online at *http://www.ferc.gov/docs-filing/esubscription.asp* to be notified via email of new filing and issuances related to this or other pending projects. For assistance, contact FERC Online Support.

m. With this notice, we are soliciting comments on the PAD and Commission's staff Scoping Document 1 (SD1), as well as study requests. All comments on the PAD and SD1, and study requests should be sent to the address above in paragraph f. In addition, all comments on the PAD and SD1, study requests, requests for cooperating agency status, and all communications to and from Commission staff related to the merits of the potential application must be filed with the Commission.

The Commission strongly encourages electronic filing. Please file all documents using the Commission's eFiling system at *http://www.ferc.gov/docs-filing/efiling.asp.* Commenters can submit brief comments up to 6,000 characters, without prior registration, using the eComment system at *http://www.ferc.gov/docs-filing/ecomment.asp.* You must include your name and contact information at the end of your comments. For assistance, please contact FERC Online Support at *FERCOnlineSupport@ferc.gov.* In lieu of electronic filing, you may submit a paper copy. Submissions sent via the U.S. Postal Service must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 888 First Street NE, Room 1A, Washington, DC 20426. Submissions sent via any other carrier must be addressed to: Kimberly D. Bose, Secretary, Federal Energy Regulatory Commission, 12225 Wilkins Avenue, Rockville, Maryland 20852.

*All filings with the Commission must bear the appropriate heading:* Comments on Pre-Application Document, Study Requests, Comments on Scoping Document 1, Request for Cooperating Agency Status, or Communications to and from Commission Staff. Any individual or entity interested in submitting study requests, commenting on the PAD or SD1, and any agency requesting cooperating status must do so by March 23, 2021.

n. *Scoping Process:* The Commission's scoping process will help determine the required level of analysis and satisfy the NEPA scoping requirements, irrespective of whether the Commission prepares an environmental assessment or Environmental Impact Statement.

Due to restrictions on mass gatherings related to COVID–19, we are waiving section 5.8(b)(viii) of the Commission's regulations and do not intend to conduct a public scoping meeting and site visit in this case. Instead, we are soliciting written comments, recommendations, and information, on SD1. Any individual or entity interested in submitting scoping comments must do so by the date specified in item m. SD1, which outlines the subject areas to be addressed in the environmental document, was mailed to the individuals and entities on the Commission's official mailing list. Copies of SD1 may be viewed on the web at *http://www.ferc.gov,* using the ''eLibrary'' link. Follow the directions for accessing information in paragraph l. Based on all written comments, a Scoping Document 2 (SD2) may be issued. SD2 may include a revised process plan and schedule, as well as a list of issues, identified through the scoping process.

We may conduct a site visit, if needed, later in the process, such as in conjunction with the study plan meeting required by section 5.11(e) of the Commission's regulations which is required to occur by June 6, 2021. Further revisions to the schedule may be made as appropriate.

Dated: January 8, 2021.

**Nathaniel J. Davis, Sr.,**

## ENVIRONMENTAL PROTECTION AGENCY

**[FRL–10016–72-Region 6]**

## Comprehensive Environmental Response, Compensation, and Liability Act; Proposed Administrative Settlement Agreement for Recovery of Response Costs; ''Delta Shipyard'' Superfund Site in Houma, Terrebonne Parish, LA

**AGENCY:** Environmental Protection Agency (EPA).

**ACTION:** Notice of proposed settlement; request for public comment.

**SUMMARY:** In accordance with the Comprehensive Environmental Response, Compensation, and Liability Act (''CERCLA''), notice is hereby given that a proposed administrative settlement agreement for recovery of response costs (''Proposed Agreement'') associated with the ''Delta Shipyard'' Superfund Site in Houma, Terrebonne Parish, Louisiana (''Site'') was executed by the Environmental Protection Agency (''EPA'') and is now subject to public comment, after which EPA may modify or withdraw its consent if comments received disclose facts or considerations that indicate that the Proposed Agreement is inappropriate, improper, or inadequate.

**DATES:** Comments must be received on or before February 16, 2021.

**ADDRESSES:** As a result of impacts related to the COVID–19 pandemic, requests for documents and submission of comments must be via electronic mail except as provided below. The Proposed Agreement and additional background information relating to the Proposed Agreement are available for public inspection upon request by contacting EPA Assistant Regional Counsel Amy Salinas at *salinas.amy@epa.gov.* Comments must be submitted via electronic mail to this same email address and should reference the ''Delta Shipyard'' Superfund Site, Proposed Settlement Agreement'' and ''EPA CERCLA Docket No. 06–03–19.'' Persons without access to electronic mail may call Ms. Salinas at (215) 665–8063 to make alternative arrangements.

**FOR FURTHER INFORMATION CONTACT:** Amy Salinas at EPA by phone (214) 665–8063 or email at: *salinas.amy@epa.gov.*

**SUPPLEMENTARY INFORMATION:** The Proposed Agreement would resolve potential EPA claims under Section 107(a) of CERCLA, against Dean Services West, LLC (''Settling Party'') for EPA response costs at the Delta Shipyard Superfund Site located in the

Southeastern section of Houma, Louisiana. The settlement amount of $350,000.00 is a reduced amount based on an Ability to Pay Analysis.

For thirty (30) days following the date of publication of this notice, EPA will receive electronic comments relating to the Proposed Agreement. EPA's response to any comments received will be available for public inspection by request. Please see the **ADDRESSES** section of this notice for special instructions in effect due to impacts related to the COVID–19 pandemic.

Dated: December 14, 2020.

## FEDERAL COMMUNICATIONS COMMISSION

**[WC Docket No. 17–97; DA 21–12; FRS 17371]**

## Pleading Cycle Established for Petitions for Reconsideration of Portions of the Call Authentication Trust Anchor Second Report and Order

**AGENCY:** Federal Communications Commission.

**ACTION:** Notice; request for comments.

**SUMMARY:** In this document, the Wireline Competition Bureau establishes a pleading cycle for Petitions for Reconsideration of portions of the Call Authentication Trust Anchor Second Report and Order.

**DATES:** Oppositions due January 29, 2021 and replies due February 8, 2021.

**ADDRESSES:** All pleadings are to reference WC Docket No. 17–97. Oppositions and replies may be filed using the Commission's Electronic Comment Filing System (ECFS), or by filing paper copies.

- *Electronic Filers:* Oppositions and replies may be filed electronically using the internet by accessing the ECFS: *http://apps.fcc.gov/ecfs.*
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing. Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.
- *People with Disabilities:* To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).

**FOR FURTHER INFORMATION CONTACT:** For further information, please contact Mason Shefa, Competition Policy Division, Wireline Competition Bureau, at (202) 418–2962, *mason.shefa@fcc.gov.*

**SUPPLEMENTARY INFORMATION:** On September 29, 2020, the Commission adopted the *Call Authentication Trust Anchor Second Report and Order.* The *Second Report and Order* set forth rules to make clear the obligations and deadlines for voice service providers regarding caller ID authentication and completed implementation of the caller ID authentication provisions of the TRACED Act.

On December 17, 2020, CTIA and Voice on the Net (VON) Coalition each filed petitions for reconsideration of portions of the *Second Report and Order* (together Petitions for Reconsideration). CTIA requests that the Commission eliminate the prohibition in section 64.6305(c) on voice service providers accepting calls from foreign voice service providers that use U.S. North American Numbering Plan resources and are not listed in the Robocall Mitigation Database. VON makes the same request as CTIA and further requests elimination of the requirement in section 64.6305(b)(4) that voice service provider certifications provide the name, telephone number, physical address, and email address of a central point of contact within the company responsible for addressing robocall mitigation-related issues.

Pursuant to the Commission's rules, oppositions to the Petitions for Reconsideration must be filed no later than January 29, 2021, and replies to oppositions must be filed no later than February 8, 2021. Oppositions and replies may be filed using the Commission's Electronic Comment Filing System (ECFS), or by filing paper copies. *See Electronic Filing of Documents in Rulemaking Proceedings,* 63 FR 24121 (1998).

- *Electronic Filers:* Oppositions and replies may be filed electronically using the internet by accessing the ECFS: *https://www.fcc.gov/ecfs.*
- *Paper Filers:* Parties who choose to file by paper must file an original and one copy of each filing. Filings can be sent by commercial overnight courier, or by first-class or overnight U.S. Postal Service mail. All filings must be addressed to the Commission's Secretary, Office of the Secretary, Federal Communications Commission.
  - Commercial overnight mail (other than U.S. Postal Service Express Mail and Priority Mail) must be sent to 9050 Junction Drive, Annapolis Junction, MD 20701.
  - U.S. Postal Service first-class, Express, and Priority mail must be addressed to 45 L Street NE, Washington, DC 20554.
  - Effective March 19, 2020, and until further notice, the Commission no longer accepts any hand or messenger delivered filings. This is a temporary measure taken to help protect the health and safety of individuals, and to mitigate the transmission of COVID–19. *See* FCC Announces Closure of FCC Headquarters Open Windo and Change in Hand-Delivery Policy, Public Notice, DA 20–304 (March 19, 2020), *https://www.fcc.gov/document/fcc-closes-headquarters-open-window-and-changes-hand-delivery-policy.*
- *People with Disabilities.* To request materials in accessible formats for people with disabilities (Braille, large print, electronic files, audio format), send an email to *fcc504@fcc.gov* or call the Consumer & Governmental Affairs Bureau at (202) 418–0530 (voice), (202) 418–0432 (TTY).
- *Ex Parte Rules.* This proceeding shall continue to be treated as a ''permit-but-disclose'' proceeding in accordance with the Commission's *ex parte* rules. Persons making *ex parte* presentations must file a copy of any written presentation or a memorandum summarizing any oral presentation within two business days after the presentation (unless a different deadline applicable to the Sunshine period applies). Persons making oral *ex parte* presentations are reminded that memoranda summarizing the presentation must (1) list all persons attending or otherwise participating in the meeting at which the *ex parte* presentation was made, and (2) summarize all data presented and arguments made during the presentation. If the presentation consisted in whole or in part of the presentation of data or arguments already reflected in the presenter's written comments, memoranda or other filings in the proceeding, the presenter may provide citations to such data or arguments in his or her prior comments, memoranda, or other filings (specifying the relevant page and/or paragraph numbers where such data or arguments can be found) in lieu of summarizing them in the memorandum. Documents shown or given to Commission staff during *ex parte* meetings are deemed to be written *ex parte* presentations and must be filed consistent with rule 1.1206(b). In proceedings governed by

rule 1.49(f) or for which the Commission has made available a method of electronic filing, written *ex parte* presentations and memoranda summarizing oral *ex parte* presentations, and all attachments thereto, must be filed through the electronic comment filing system available for that proceeding, and must be filed in their native format (*e.g.,* .doc, .xml, .ppt, searchable .pdf). Participants in this proceeding should familiarize themselves with the Commission's *ex parte* rules.

Federal Communications Commission.

## FEDERAL RESERVE SYSTEM

### Formations of, Acquisitions by, and Mergers of Bank Holding Companies

The companies listed in this notice have applied to the Board for approval, pursuant to the Bank Holding Company Act of 1956 (12 U.S.C. 1841 *et seq.*) (BHC Act), Regulation Y (12 CFR part 225), and all other applicable statutes and regulations to become a bank holding company and/or to acquire the assets or the ownership of, control of, or the power to vote shares of a bank or bank holding company and all of the banks and nonbanking companies owned by the bank holding company, including the companies listed below.

The public portions of the applications listed below, as well as other related filings required by the Board, if any, are available for immediate inspection at the Federal Reserve Bank(s) indicated below and at the offices of the Board of Governors. This information may also be obtained on an expedited basis, upon request, by contacting the appropriate Federal Reserve Bank and from the Board's Freedom of Information Office at *https://www.federalreserve.gov/foia/request.htm.* Interested persons may express their views in writing on the standards enumerated in the BHC Act (12 U.S.C. 1842(c)).

Comments regarding each of these applications must be received at the Reserve Bank indicated or the offices of the Board of Governors, Ann E. Misback, Secretary of the Board, 20th Street and Constitution Avenue NW, Washington DC 20551–0001, not later than February 16, 2021.

*A. Federal Reserve Bank of Kansas City* (Dennis Denney, Assistant Vice President) 1 Memorial Drive, Kansas City, Missouri 64198–0001:

1. *SBWY Financial Corporation, Evanston, Wyoming;* to become a bank holding company by acquiring State Bank, Green River, Wyoming.

Board of Governors of the Federal Reserve System, January 11, 2021.

**Michele Taylor Fennell,**

*Deputy Associate Secretary of the Board.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

**[30Day–21–0950]**

### Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled The National Health and Nutrition Examination Survey (NHANES) to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on July 20, 2020 to obtain comments from the public and affected agencies. CDC received two non-substantive comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

**Proposed Project**

The National Health and Nutrition Examination Survey (NHANES), (OMB Control No. 0920–0950, Exp. 11/30/2021)—Revision—National Center for Health Statistics (NCHS), Centers for Disease Control and Prevention (CDC).

*Background and Brief Description*

Section 306 of the Public Health Service (PHS) Act (42 U.S.C. 242k), as amended, authorizes the Secretary of Health and Human Services (DHHS), acting through NCHS, to collect statistics on the extent and nature of illness and disability; environmental, social, and other health hazards; and determinants of health of the population of the United States (U.S.). The National Health and Nutrition Examination Surveys (NHANES) have been conducted periodically between 1970 and 1994 and continuously since 1999 by the National Center for Health Statistics (NCHS), CDC. Due to the Coronavirus (COVID–19) pandemic, NHANES 2019–20 paused data collection operations, making this the first time since 1999 that NHANES did not operate on a continuous basis.

NHANES programs produce descriptive statistics, which measure the health and nutrition status of the general population. With physical examinations, laboratory tests, and interviews, NHANES studies the relationship between diet, nutrition, and health in a representative sample of the U.S. NHANES monitors the prevalence of chronic conditions and risk factors and produces national reference data on height, weight, and nutrient levels in the blood. Results from the 2021–22 NHANES will be used to assess current health measures in the U.S. population.

The program is making changes to NHANES content and procedures for 2021–22. The proposed changes include modifications to sample design, questionnaires, exam components, laboratory content, outreach materials, changes in select interview and exam modes, and changes to operational procedures. NHANES proposes these changes in response to COVID–19 and to address issues such as low response rates. The program consulted with collaborators, stakeholders, and the NCHS Board of Scientific Counselors (BSC). Due to these changes, largely driven by the pandemic, NHANES 2021–22 may not be comparable with previous or future NHANES cycles.

NCHS collects personally identifiable information (PII). Participant level data items include basic demographic information, name, address, social security number, Medicare number, and participant health information to allow for linkages to other data sources such as the National Death Index and data from the Centers for Medicare and Medicaid Services (CMS).

A variety of agencies sponsor data collection components on NHANES. To keep burden low and respond to changing public health needs, NCHS cycles in and out various components. In 2021–22, NHANES plans to continue electronic consent procedures and implement multi-mode eligibility screening. Our yearly goal for interview, exam, and post exam components is 5,000 participants. To achieve the goal of 5,000 participants interviewed and examined, we need to screen approximately 7,000 individuals annually, a number lower than the approximately 15,000 screened in previous NHANES because NHANES 2021–22 will not oversample based on race, Hispanic origin, or income. In addition, there will be approximately 600 volunteers as part of a dress rehearsal that takes place in two locations (300 volunteers per location.)

In NHANES 2021–22, the interviews that would historically occur via in-person interviews (*i.e.,* screening, family, and sampled participant) will be conducted primarily over the phone. A significant reduction in interview content will occur in 2021–22 so the length of the interviews is feasible for the designed interview modes with reasonable burden to the respondents. Changes will also be made to focus on retaining questions directly related to the interpretation of examination or lab data collected in the survey and relevant to assess the effect of the pandemic. The program plans to add questions related to COVID–19 to the survey to complement NHANES laboratory measures. The program will drop select questions related to examination and laboratory content cycled out of the survey in 2021–22.

Most sections of the NHANES interviews provide self-reported information for use in combination with specific examination or laboratory content, as independent prevalence estimates, or as covariates in statistical analysis (*e.g.,* socio-demographic characteristics). Some examples include alcohol, drug and tobacco use, sexual behavior, prescription and aspirin use, and indicators of oral, bone, reproductive, and mental health. Several interview components support the nutrition-monitoring objective of NHANES, including questions about food security, nutrition program participation, and dietary supplement use.

In 2021–22, NHANES will initiate screening for COVID–19 prior to participants entering the Mobile Examination Center (MEC). Participants will be reminded via text or telephone call not to report for their examination appointment if they have been exposed or have tested positive. When participants arrive for the examination appointment, they will answer questions to determine if they have been potentially exposed, they will have their temperature checked and finally will have a COVID antibody test, prior to being allowed in the MEC.

The NHANES examinations that will remain unchanged include anthropometry (all ages), blood pressure (8+), and liver elastography (40).

The program is modifying select examination components in 2021–22. These changes include dropping the DXA spine and femur scans while continuing DXA whole body scans (ages 8–69), dropping all visual assessment subcomponents of the standing balance examination, and modifying the phlebotomy component.

Examination components cycled out in 2021–22 include: Oral Health, Audiometry and Words-in Noise (4 audiometry questions are retained in the Household Interview), and Cognitive Functioning assessment. NHANES does not plan to conduct a Blood Pressure Methodology Study.

In previous NHANES cycles, while at the examination center, participants were administered a Day 1 dietary recall interview via in-person interview, and additional interview questions were asked (six and older) both in-person and through Audio Computer-Assisted Self-Interview (ACASI). A second 24-hour dietary recall (all ages) was also scheduled to be conducted by phone 3–10 days later. In NHANES 2021–22, both the Day 1 dietary recall and the second 24-hour dietary recall will be completed as telephone interviews. The interview questions will be completed in the examination center primarily via ACASI.

The biospecimens collected for laboratory testing include urine and blood. Serum, plasma, and urine specimens are stored for future testing, including genetic studies, if the participant consents. Consent to store DNA will continue in NHANES.

In 2021–22, we plan to add the following laboratory tests: Serum Terpenes: α-Pinene, β-Pinene, β-Myrcene, Δ-3-Carene, Limonene, β-Caryophyllene, α-Humulene; Magnesium; HPV, serum; Alpha-1-acid-glycoprotein (AGP); Vitamin D; Vitamin A; Vitamin C; Acrylonitrile; Trans-fatty Acids; Blood butyrylcholinesterase activity, blood butyrylcholinesterase concentration, and red blood cell acetylcholinesterase activity; Enterovirus D68; and COVID–19 serology.

In 2021–22, the following laboratory tests will be modified: Hepatitis D (new testing method, reportable findings); Sex steroid hormone panel (now starting at 3+); Urine VOC metabolites (adding as additional 7); trans, trans-Muconic acid; N-Acetyl-S-phenyl-L-cysteine; N–2-Furoylglycine; 2,5-Furandicarboxylic acid; 5-Hydroxymethyl-2-furancarboxylic acid; 5-Hydroxymethyl-2-furoylglycine; and 5-Hydroxy-N-methyl-2-pyrrolidone.

The laboratory tests cycling out for 2021–22 include: HPV swabs (male and female); HPV oral rinse; Home water sample collection to test for fluoride; Salt home collection for iodine assessment; Chromium/Cobalt; Tuberculosis (TB); and Urine flow rate.

NHANES plans to conduct a dress rehearsal prior to fielding the survey as usual. This will be conducted in two locations, among a sample of approximately 300 volunteers per location (approximately 600 total). The program is taking this step to assure it maintains the consistent quality associated with data collection, given the necessary pause in field operations in 2020. The data collected during dress rehearsal will be used for quality control and training purposes. Dress rehearsal data will not be part of the 2021–22 public release.

NHANES plans to conduct developmental projects during NHANES 2021–22 with a focus on planning for NHANES 2023 and beyond. These may include activities such as tests of new equipment, crossover studies between current and proposed methods, test of different study modes, settings, or technology, outreach materials, incentive strategies, sample storage and processing, or sample designs.

Burden for individuals varies based on their level of participation. For example, infants and children tend to have shorter interviews and exams than adults because young people may have fewer health conditions or medications to report, certain exams are only conducted on individuals 18 and older, etc. In addition, adults often serve as proxy respondents for young people in their families.

Participation in NHANES is voluntary and confidential. There is no cost to respondents other than their time. CDC requests a three-year approval, with 65,630 annualized hours of burden.

ESTIMATED ANNUALIZED BURDEN HOURS

| Type of respondent | Form name | Number of respondents | Number of responses per respondent | Average burden per response (in hours) |
|---|---|---|---|---|
| Individuals in households | Screener | 8,300 | 1 | 10/60 |
| Individuals in households | Household Interview | 5,600 | 1 | 1 |
| Individuals in households | MEC Interview & Examination | 5,600 | 1 | 2.5 |
| Individuals in households | Day 1 and Day 2 Telephone Dietary Recall & Dietary Supplements. | 5,600 | 1 | 1.3 |
| Individuals in households | Flexible Consumer Behavior Survey Phone Follow-Up. | 5,600 | 1 | 20/60 |
| Individuals in households | Developmental Projects & Special Studies | 3,500 | 1 | 3 |
| *Individuals in households* | *24-hour wearable device projects* | *1,000* | *1* | *25* |

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

## Centers for Disease Control and Prevention

## Healthcare Infection Control Practices Advisory Committee (HICPAC)

**AGENCY:** Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

**ACTION:** Notice of meeting.

**SUMMARY:** In accordance with the Federal Advisory Committee Act, the CDC announces the following meeting for the Healthcare Infection Control Practices Advisory Committee (HICPAC). This meeting is open to the public, limited only by audio phone lines available. The public is also welcome to listen to the meeting by dialing 1–877–924–1748, passcode: 3380216. A total of 200 lines will be available. Registration is required. To register for this call, please go to *www.cdc.gov/hicpac.*

**DATES:** The meeting will be held on March 4, 2021, from 9 a.m. to 3 p.m., EST.

**ADDRESSES:** The teleconference access is 1–877–924–1748, and the passcode is 3380216.

**FOR FURTHER INFORMATION CONTACT:** Koo-Whang Chung, M.P.H., HICPAC, Division of Healthcare Quality Promotion, NCEZID, CDC, 1600 Clifton Road NE, Mailstop H16–3, Atlanta, Georgia 30329–4027, Telephone (404) 498–0730; Email: *HICPAC@cdc.gov.*

**SUPPLEMENTARY INFORMATION:**

*Purpose:* The Committee is charged with providing advice and guidance to the Director, Division of Healthcare Quality Promotion (DHQP), the Director, National Center for Emerging and Zoonotic Infectious Diseases (NCEZID), the Director, CDC, the Secretary, Health and Human Services regarding (1) the practice of healthcare infection prevention and control; (2) strategies for surveillance, prevention, and control of infections, antimicrobial resistance, and related events in settings where healthcare is provided; and (3) periodic updating of CDC guidelines and other policy statements regarding prevention of healthcare-associated infections and healthcare-related conditions.

*Matters to be Considered:* The agenda will include the following updates: The Healthcare Personnel Guideline Workgroup; the Long-term Care/Post-acute Care Workgroup; the Neonatal Intensive Care Unit Workgroup; and updates from DHQP including DHQP's engagement on Coronavirus disease response. Agenda items are subject to change as priorities dictate.

*Procedures for Public Comment:* Time will be available for public comment. Members of the public who wish to provide public comments should plan to attend the public comment session at the start time listed. Please note that the public comment period may end before the time indicated, following the last call for comments.

*Procedures for Written Comment:* The public may submit written comments in advance of the meeting. Comments should be submitted in writing by email to the contact person listed above. The deadline for receipt of written public comment is February 25, 2021. All requests must contain the name, address, and organizational affiliation of the speaker, as well as the topic being addressed. Written comments should not exceed one single-spaced typed page in length. Written comments received in advance of the meeting will be included in the official record of the meeting.

The Director, Strategic Business Initiatives Unit, Office of the Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and Prevention and the Agency for Toxic Substances and Disease Registry.

**Kalwant Smagh,**

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

**[30Day–21–1278]**

### Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled *Online Training for Law Enforcement to Reduce Risks Associated with Shift Work and Long Work Hours* to the Office of Management and Budget (OMB) for review and approval. CDC previously published a ''Proposed Data Collection Submitted for Public Comment and Recommendations'' notice on October 1, 2020 to obtain comments from the public and affected agencies. CDC received one comment related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy of the information collection plan and instruments, call (404) 639–7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.*

Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395–5806. Provide written comments within 30 days of notice publication.

**Proposed Project**

Online training for law enforcement to reduce risks associated with shift work and long work hours—Reinstatement without Change—National Institute for Occupational Safety and Health (NIOSH), Centers for Disease Control and Prevention (CDC).

*Background and Brief Description*

Police often work during the evening, at night, and sometimes irregular and long hours. Shift work and long work hours are linked to many health and safety risks due to disturbances to sleep and circadian rhythms. These work schedules also lead to difficulties with personal relationships due to having less time with family and friends, poor mood from sleep deprivation, and problems balancing work and personal responsibilities. These work schedules and inadequate sleep likely contribute to health problems seen in police: Shorter life spans, high occupational injury rates, and burden of chronic illnesses. One strategy to reduce these risks is training programs to inform employers and law enforcement officers about the risks and strategies to reduce their risks.

An Reinstatement is being requested due to delays recruiting participants and initiating data. The delays resulted from the COVID–19 pandemic and the civil unrest after George Floyd's death on May 25 2020. Law enforcement leaders requested that the data collection be delayed until the end of June 2020. As a result, NIOSH is requesting a one-year extension of the data collection end date to May 31, 2021. This pilot study is part of a project awarded National Occupational Research Agenda (NORA) funding. The National Institute for Occupational Safety and Health is authorized to carry out this data collection through Occupational Safety and Health Act of 1970.

The purpose of this project is to develop a training program to relay the risks linked to shift work and long work hours and give workplace strategies for employers and personal strategies for the officers to reduce the risks. Once finalized, the training will be available on the NIOSH website. The training will be pilot tested with 30 recent graduates of a police academy and 30 experienced officers. The study will recruit 60 law enforcement officers during a 30-minute phone call. All respondents will work full-time on fixed night shifts. The pilot test will use a pre-test–post-test design to examine sleep (both duration and quality), worktime sleepiness, and knowledge retained. Pre-test measures will be collected two weeks before the training. Post-test measures will be collected the week of the training (week three of the study), one week after the training (week four) and at eight and nine weeks after the training (weeks 11 and 12 of the study). Additional post-test measures will include feedback about the training and if specific behaviors changed.

Before starting the pretest, the respondent will sign an informed consent form. The pilot pre-test will start with the respondent filling out a 10 minute online survey that includes four short surveys: (1) Demographic information and work experience; (2) the Epworth Sleepiness Scale; (3) the Pittsburgh Sleep Quality Index; and (4) a knowledge test. The respondent will be fitted with a wrist actigraph, which will record activity and estimate the times of sleep. The respondents will keep an online sleep activity diary and wear the actigraph continuously during weeks one to four of the study. The online sleep activity diary takes approximately two minutes a day to complete. The sleep diary and actigraph are being used together to obtain a more accurate timing of respondent's sleep and activity.

During the third week of the study, the respondent will take the 2.5 hour online training program. Immediately after completing the training, the respondent will take the post-test knowledge test and will provide feedback about the training including barriers to using the training information and what influential people in their life would want them to do with the training information. At the end of week four, the respondent will return the actigraph. No data collection will occur during weeks five to 10 of the study.

The second post-test period will be weeks 11 and 12 of the study to gather longer-term outcomes. At the beginning of week 11, the respondents will be fitted with an actigraph. The respondent will wear the actigraph and complete the sleep activity diary for the next 14 days. At the end of week 12 of the study, the respondent will complete the Epworth Sleepiness Scale, Pittsburgh Sleep Quality Index, and Changes in Behaviors After Training. The combined response time is five minutes.

The burden table lists three 10-minute meetings during the post-test period when they will return the actigraph at the end of week four, be fitted with an actigraph at the beginning of week 11 and return it at the end of week 12. The respondents will complete the sleep activity diary for 42 days total (two minutes each day). The total burden hours for the diary is 84.

Study staff will use the findings from the pilot test to make improvements to the training program. The research team will reinforce or expand training content that showed less than desired results on the pilot test. Potential impacts of this project include improvements in management practices such as the design of work schedules and improvements in officers' personal behaviors for coping with the demands of shift work and long work hours. The total estimated annualized burden hours is 334. There are no costs to respondents other than their time.

ESTIMATED ANNUALIZED BURDEN HOURS

| Type of respondents | Form name | Number of respondents | Number of responses per respondent | Average burden per response (in hours) |
|---|---|---|---|---|
| Law enforcement officers | phone call for recruitment & informed consent. | 60 | 1 | 30/60 |
| Law enforcement officers | Initial meeting | 60 | 1 | 15/60 |
| Law enforcement officers | Knowledge survey | 60 | 2 | 5/60 |
| Law enforcement officers | Epworth Sleepiness Scale | 60 | 2 | 1/60 |
| Law enforcement officers | Pittsburgh Sleep Quality Index | 60 | 2 | 2/60 |
| Law enforcement officers | Demographics and work experience | 60 | 1 | 2/60 |
| Law enforcement officers | Sleep diary | 60 | 42 | 2/60 |
| Law enforcement officers | Online training | 60 | 1 | 150/60 |
| Law enforcement officers | Feedback about Training, Barriers, and Influential People. | 60 | 1 | 5/60 |
| Law enforcement officers | Changes in Behaviors after Training | 60 | 1 | 2/60 |
| Law enforcement officers | Actigraph fitting and return | 60 | 3 | 10/60 |

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Medicare & Medicaid Services

**[Document Identifier: CMS–43 and CMS–381]**

### Agency Information Collection Activities: Submission for OMB Review; Comment Request

**AGENCY:** Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

**ACTION:** Notice.

**SUMMARY:** The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, and to allow a second opportunity for public comment on the notice. Interested persons are invited to send comments regarding the burden estimate or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

**DATES:** Comments on the collection(s) of information must be received by the OMB desk officer by *February 16, 2021*.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain*. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' Website address at website address at *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html*.
2. Call the Reports Clearance Office at (410) 786–1326.

**FOR FURTHER INFORMATION CONTACT:** William Parham at (410) 786–4669.

**SUPPLEMENTARY INFORMATION:** Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA (44 U.S.C. 3506(c)(2)(A)) requires federal agencies to publish a 30-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice that summarizes the following proposed collection(s) of information for public comment:

1. *Type of Information Collection Request:* Extension without change of a currently approved collection; *Title of Information Collection:* Application for Health Insurance Benefits Under Medicare for Individual with Chronic Renal Disease and Supporting Regulations in 42 CFR; *Use:* Individuals with End-Stage Renal Disease (ESRD) have the opportunity to apply for Medicare benefits and obtain premium-free Part A if they meet certain criteria outlined in statute. Sections 226A of the Act authorizes entitlement for Medicare Hospital Insurance (Part A) if the individual with ESRD files an application for benefits and meets the requisite contributions through one's own employment or the employment of a related individual to meet the statutory definition of a ''currently insured'' individual outlined in section 214 of the Act. Further, for individuals who meet the requirements for premium-free Part A entitlement, Medicare coverage starts based on the dates in which the individual started dialysis treatment or had a kidney transplant. These statutory provisions are codified at 42 CFR 406.7(c)(3) and 407.13.

The CMS–43 form is used (in conjunction with the CMS–2728, OMB control number 0938–0046) to establish entitlement to Medicare Part A and enrollment in Medicare Part B for individuals with ESRD. Form CMS–43 is only used for initial applications for Medicare by individuals diagnosed with ESRD. Form CMS–2728 provides the medical documentation that the individual has ESRD, and it accompanies Form CMS–43.

Form CMS–43 is completed by the person applying for Medicare or by an SSA representative using information provided by the Medicare enrollee during an in-person interview. The majority of the forms are completed by an SSA representative on behalf of the individual applying for Medicare benefits. *Form Number:* CMS–43 (OMB control number: 0938–0080); *Frequency:* Yearly; *Affected Public:* State, Local, or Tribal Governments; *Number of Respondents:* 20,382; *Total Annual Responses:* 20,382; *Total Annual Hours:* 8,560. (For policy questions regarding this collection contact Carla Patterson at 410–786–1000.)

2. *Type of Information Collection Request:* Revision of a currently approved collection; *Title of Information Collection:* Identification of Extension Units of Medicare Approved Outpatient Physical Therapy/Outpatient Speech Pathology (OPT/OSP) Providers and Supporting Regulations; *Use:* Form CMS–381 was developed to ensure that each OPT/OSP extension location at which OPT/OSP providers furnish services, must be reported by the providers to the State Survey Agencies (SAs). Form CMS–381 is completed when: (1) New OPT/OSP providers enter the Medicare program; (2) when existing OPT/OPS providers delete or add a service, or close or add an extension location; or, (3) when existing OPT/OSP providers are recertified by the State Survey Agency every 6 years. *Form Number:* CMS–381 (OMB control number: 0938–0273); *Frequency:* Occasionally; *Affected Public:* Private Sector; Business or other for-profit and not-for-profit institutions; *Number of Respondents:* 2,083; *Total Annual*

*Responses:* 443; *Total Annual Hours:* 111. (For policy questions regarding this collection contact Caroline Gallaher at 410–786–8705.)

Dated: January 11, 2021.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Medicare & Medicaid Services

**[Document Identifiers CMS–10147]**

### Agency Information Collection Activities: Proposed Collection; Comment Request

**AGENCY:** Centers for Medicare & Medicaid Services, Health and Human Services (HHS).

**ACTION:** Notice.

**SUMMARY:** The Centers for Medicare & Medicaid Services (CMS) is announcing an opportunity for the public to comment on CMS' intention to collect information from the public. Under the Paperwork Reduction Act of 1995 (the PRA), federal agencies are required to publish notice in the **Federal Register** concerning each proposed collection of information (including each proposed extension or reinstatement of an existing collection of information) and to allow 60 days for public comment on the proposed action. Interested persons are invited to send comments regarding our burden estimates or any other aspect of this collection of information, including the necessity and utility of the proposed information collection for the proper performance of the agency's functions, the accuracy of the estimated burden, ways to enhance the quality, utility, and clarity of the information to be collected, and the use of automated collection techniques or other forms of information technology to minimize the information collection burden.

**DATES:** Comments must be received by March 15, 2021.

**ADDRESSES:** When commenting, please reference the document identifier or OMB control number. To be assured consideration, comments and recommendations must be submitted in any one of the following ways:

1. *Electronically.* You may send your comments electronically to *http://www.regulations.gov.* Follow the instructions for ''Comment or Submission'' or ''More Search Options'' to find the information collection document(s) that are accepting comments.

2. *By regular mail.* You may mail written comments to the following address: CMS, Office of Strategic Operations and Regulatory Affairs, Division of Regulations Development, Attention: Document Identifier/OMB Control Number ____, Room C4–26, –05, 7500 Security Boulevard, Baltimore, Maryland 21244–1850.

To obtain copies of a supporting statement and any related forms for the proposed collection(s) summarized in this notice, you may make your request using one of following:

1. Access CMS' website address at website address at *https://www.cms.gov/Regulations-and-Guidance/Legislation/PaperworkReductionActof1995/PRA-Listing.html.*

2. Call the Reports Clearance Office at (410) 786–1326.

**FOR FURTHER INFORMATION CONTACT:** William N. Parham at (410) 786–4669.

**SUPPLEMENTARY INFORMATION:**

### Contents

This notice sets out a summary of the use and burden associated with the following information collections. More detailed information can be found in each collection's supporting statement and associated materials (see **ADDRESSES**).

CMS–10147—Medicare Prescription Drug Coverage and Your Rights

Under the PRA (44 U.S.C. 3501–3520), federal agencies must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. The term ''collection of information'' is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency requests or requirements that members of the public submit reports, keep records, or provide information to a third party. Section 3506(c)(2)(A) of the PRA requires federal agencies to publish a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each proposed extension or reinstatement of an existing collection of information, before submitting the collection to OMB for approval. To comply with this requirement, CMS is publishing this notice.

### Information Collection

1. *Type of Information Collection Request:* Extension of a currently approved collection; *Title of Information Collection:* Medicare Prescription Drug Coverage and Your Rights; *Use:* Section 423.562(a)(3) and an associated regulatory provision at § 423.128(b)(7)(iii) require that Part D plan sponsors' network pharmacies provide Part D enrollees with a printed copy of our standardized pharmacy notice ''Medicare Prescription Drug Coverage and Your Rights'' (hereafter, ''notice'') if an enrollee's prescription cannot be filled.

The purpose of this notice is to provide enrollees with information about how to contact their Part D plans to request a coverage determination, including a request for an exception to the Part D plan's formulary. The notice reminds enrollees about certain rights and protections related to their Medicare prescription drug benefits, including the right to receive a written explanation from the drug plan about why a prescription drug is not covered. Through delivery of this standardized notice, a Part D plan sponsor's network pharmacies are in the best position to inform enrollees at point of sale about how to contact their Part D plan if the prescription cannot be filled. *Form Number:* CMS–10147, OMB 0938–0975; *Frequency:* Annually; *Affected Public:* Private Sector, Business or other for-profits; *Number of Respondents:* 70,000; *Number of Responses:* 49,681,292; *Total Annual Hours:* 827,690. (For questions regarding this collection, contact Trevor Rose at (410) 786 7768.)

Dated: January 8, 2021.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Meeting of the Advisory Committee on Minority Health

**AGENCY:** Office of Minority Health, Office of the Secretary, Department of Health and Human Services.

**ACTION:** Notice of meeting.

**SUMMARY:** As stipulated by the Federal Advisory Committee Act, the U.S. Department of Health and Human Services (HHS or Department) is hereby giving notice that the Advisory Committee on Minority Health (ACMH) will hold a meeting. This meeting will be open to the public. Preregistration is required for the public to attend the meeting, provide comments, and/or distribute printed material(s) to ACMH members. Information about the meeting will be posted on the HHS Office of Minority Health (OMH) website:

*www.minorityhealth.hhs.gov.* Information about ACMH activities can be found on the OMH website under the heading *About OMH, Committees and Workgroups.*

**DATES:** The ACMH meeting will be held on Friday, January 29, 2021, from 1:30 p.m. to 2:00 p.m. ET. If the Committee completes its work before 2:00 p.m., the meeting will end early.

**ADDRESSES:** The meeting will be held virtually and will be accessible by webcast.

**FOR FURTHER INFORMATION CONTACT:** Samuel Wu, Designated Federal Officer, Advisory Committee on Minority Health, Office of Minority Health, Department of Health and Human Services, Tower Building, 1101 Wootton Parkway, Suite 100, Rockville, Maryland 20852. Phone: 240–453–6173; email: *OMH-ACMH@hhs.gov.*

**SUPPLEMENTARY INFORMATION:** In accordance with Public Law 105–392, the ACMH was established to provide advice to the Deputy Assistant Secretary for Minority Health on improving the health of each racial and ethnic minority group and on the development of goals and specific program activities of the OMH.

The purpose of the January 2021 ACMH meeting is to finalize recommendations for improving access to and utilization of clinical preventive services among racial and ethnic minority populations. The recommendations will be given to the Deputy Assistant Secretary for Minority Health to inform efforts for removing barriers to achieving health equity.

The meeting is open to the public. Any individual who wishes to attend the meeting must register by sending an email to *OMH-ACMH@hhs.gov* by 5:00 p.m. ET on January 28, 2021. Each registrant should provide name, affiliation, phone number, and email address. Registrants will receive webcast access information via email. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact *OMH-ACMH@hhs.gov* and reference this meeting. Requests for special accommodations should be made at least ten (10) business days prior to the meeting.

Members of the public will have an opportunity to provide comments at the meeting. Public comments will be limited to two minutes per speaker during the time allotted. Individuals who would like to submit written statements should email *OMH-ACMH@hhs.gov* at least five (5) business days prior to the meeting.

Any members of the public who wish to distribute electronic or printed material(s) related to this meeting's topic to ACMH members should email the Designated Federal Officer at *OMH-ACMH@hhs.gov.* The material should be received by the Designated Federal Officer at least five (5) business days prior to the meeting.

Dated: January 11, 2021.

**Samuel Wu,**

*Designated Federal Officer, Advisory Committee on Minority Health.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### National Institutes of Health

### National Institute on Drug Abuse; Notice of Closed Meeting

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* National Institute on Drug Abuse Special Emphasis Panel; Interventions to Prevent Electronic Nicotine Delivery Systems (ENDS) Use Among Adolescents (R01—Clinical Trial Optional).

*Date:* March 10, 2021.

*Time:* 9:00 a.m. to 6:00 p.m.

*Agenda:* To review and evaluate grant applications.

*Place:* National Institutes of Health, National Institute on Drug Abuse, 301 North Stonestreet Avenue, Bethesda, MD 20892 (Virtual Meeting).

*Contact Person:* Yvonne Owens Ferguson, Ph.D., Scientific Review Officer, Office of Extramural Policy and Review, Division of Extramural Research, National Institute on Drug Abuse, NIH, 301 North Stonestreet Avenue, MSC 6021, Bethesda, MD 20892, (301) 402–7371, *yvonne.ferguson@nih.gov.*

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### National Institutes of Health

### Proposed Collection; 60-Day Comment Request Data and Specimen Hub (DASH) (Eunice Kennedy Shriver National Institute of Child Health and Human Development)

**AGENCY:** National Institutes of Health, HHS.

**ACTION:** Notice.

---

**SUMMARY:** In compliance with the requirement of the Paperwork Reduction Act of 1995 to provide opportunity for public comment on proposed data collection projects, the *Eunice Kennedy Shriver* National Institute of Child Health and Human Development (NICHD), the National Institutes of Health will publish periodic summaries of propose projects to be submitted to the Office of Management and Budget (OMB) for review and approval.

**DATES:** Comments regarding this information collection are best assured of having their full effect if received within 60 days of the date of this publication.

**FOR FURTHER INFORMATION CONTACT:** To obtain a copy of the data collection plans and instruments, submit comments in writing, or request more information on the proposed project, contact: Regina Bures, Ph.D., Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD), National Institutes of Health, 6710B Rockledge Drive, Room 2160, Bethesda, MD 20817, or call non-toll-free number (301) 496–9485 or Email your request, including your address to: *NICHD.DASH@mail.nih.gov.* Formal requests for additional plans and instruments must be requested in writing.

**SUPPLEMENTARY INFORMATION:** Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 requires: Written comments and/or suggestions from the public and affected agencies are invited to address one or more of the following points: (1) Whether the proposed collection of information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

*Proposed Collection Title:* Data and Specimen Hub (DASH)-0925–0744 expiration date 01/31/2022, REVISION, *Eunice Kennedy Shriver* National Institute of Child Health and Human Development (NICHD), National Institutes of Health (NIH).

*Need and Use of Information Collection:* This is a request to revise the previously approved submission (OMB number: 0925–0744) to add the collection of additional information from Users who will submit information to NICHD Data and Specimen Hub (DASH) about studies, and data collections stored in publicly accessible external archives—a process hereinafter referred to as 'cataloging' in DASH.

DASH has been established by NICHD as a data sharing mechanism for biomedical research investigators. It serves as a centralized resource for investigators to share and access de-identified study data from studies funded by NICHD. DASH also serves as a portal for requesting biospecimens from selected DASH studies.

NICHD also supports other public archives, data collections, and resources, such as Data Sharing for Demographic Research (DSDR), NICHD/DIPHR Biospecimen Repository Access and Data Sharing (BRADS), the Down Syndrome Registry (DS-Connect), Zebrafish Information Network (ZFIN), etc. In addition to these NICHD-funded public archives, many collaborative studies funded through NICHD are dispersed across other National Institutes of Health (NIH) designated archives, including the National Heart, Lung, and Blood Institute (NHLBI) Biologic Specimen and Data Repository Information Coordinating Center (BioLINCC), and other NIH-wide repositories, such as the Database of Genotypes and Phenotypes (dbGaP).

In an effort to link these data resources and increase the visibility of NICHD-funded studies and data collections, DASH will enable Users to catalog studies and data collections stored in other external archives to facilitate their discovery through DASH. Users submitting studies or data collections for cataloging in DASH will provide descriptive information about the study required to populate the Study Overview Page in DASH. This cataloging process closely mirrors the existing study data submission process in DASH; however, no study documentation or data will be uploaded to DASH. Requesters will be directed to the external archive via a URL link to obtain access to the data stored in the external archives and resources.

The potential for public benefit to be achieved through sharing study data and/or biospecimen inventories through DASH for secondary analysis is significant. Additionally, the ability to centralize information regarding where to find, and how to access, studies, and data collections funded by NICHD stored across various public archives (*i.e.,* cataloged studies and data collections) further helps to promote information discovery and reuse of data. NICHD DASH supports NICHD's mission to ensure that every person is born healthy and wanted; that women suffer no harmful effects from reproductive processes; that all children have the chance to achieve their full potential for healthy and productive lives, free from disease or disability; and to ensure the health, productivity, independence, and well-being of all people through optimal rehabilitation. Study data and biospecimen sharing and reuse will promote testing of new hypotheses from data and biospecimens already collected, facilitate trans-disciplinary collaboration, accelerate scientific findings and enable NICHD to maximize the return on its investments in research.

Anyone can access NICHD DASH to browse and view descriptive information about the studies and data collections without creating an account. Users who wish to submit studies or request data stored in DASH, and/or request biospecimens (stored in NICHD contracted Biorepository) must register for an account; Users who wish to submit a study catalog and/or data collection catalog must also register for an account.

Information will be collected from those wishing to create an account, sufficient to identify them as unique Users. Those submitting or requesting data and/or biospecimens will be required to provide additional supporting information to ensure proper use and security of NICHD DASH study data and biospecimens. The information collected is limited to the essential data required to ensure the management of Users in NICHD DASH is efficient and the sharing of data and biospecimens among investigators is effective. The primary uses of the information collected from Uses by NICHD will be to:

- Communicate with the Users regarding data submission, study catalog submission, data collection catalog submission, data requests and biospecimen requests;
- Monitor data submissions, study catalog submission, data collection catalog submission, data requests and biospecimen requests;
- Notify interested Users of updates to data and biospecimen inventories stored in NICHD DASH; and
- Help NICHD understand the use of NICHD DASH study data and biospecimen inventories by the research community.

All the data collected from use of NICHD DASH except for information provided in the annual progress reports are for the purposes of internal administrative management of NICHD DASH. Information gathered through the annual progress reports may be used in publications describing performance of the DASH system.

OMB approval is requested for 3 years. There are no costs to respondents other than their time. The total estimated annualized burden hours are 211.

ESTIMATED ANNUALIZED BURDEN HOURS

| Type of form | Number of respondents | Frequency of response per respondent | Average time per response (in hours) | Total annual burden hour |
|---|---|---|---|---|
| User Registration | 200 | 1 | 5/60 | 17 |
| Data and Biospecimen Inventory Submissions | 36 | 1 | 2 | 72 |
| Study Catalog Submission | 10 | 1 | 30/60 | 5 |
| Data Collection Catalog Submission | 6 | 1 | 15/60 | 2 |
| Data Request | 60 | 1 | 1 | 60 |

ESTIMATED ANNUALIZED BURDEN HOURS—Continued

| Type of form | Number of respondents | Frequency of response per respondent | Average time per response (in hours) | Total annual burden hour |
|---|---|---|---|---|
| Biospecimen Request | 36 | 1 | 1 | 36 |
| Data Use Annual Progress Report | 60 | 1 | 10/60 | 10 |
| Biospecimen Use Annual Progress Report | 36 | 1 | 10/60 | 6 |
| Institutional Certification Template | 36 | 1 | 5/60 | 3 |
| Total | 200 | 200 | ........................ | 211 |

### Prospective Grant of an Exclusive Patent License: Development and Commercialization of CD33-Specific Chimeric Antigen Receptor (CAR) Therapies for CD33-Expressing Malignancies Using Natural Killer Cells (NK Cells) Transduced With Retroviral or Lentiviral Vectors

**AGENCY:** National Institutes of Health, HHS.

**ACTION:** Notice.

**SUMMARY:** The National Cancer Institute, an institute of the National Institutes of Health, Department of Health and Human Services, is contemplating the grant of an Exclusive Patent License to practice the inventions embodied in the Patents and Patent Applications listed in the Supplementary Information section of this Notice to Senti Bio (''Senti''), located in South San Francisco, CA.

**DATES:** Only written comments and/or applications for a license which are received by the National Cancer Institute's Technology Transfer Center on or before January 29, 2021 will be considered.

**ADDRESSES:** Requests for copies of the patent applications, inquiries, and comments relating to the contemplated Exclusive Patent License should be directed to: Jim Knabb, Senior Technology Transfer Manager, NCI Technology Transfer Center at Email: *jim.knabb@nih.gov.*

**SUPPLEMENTARY INFORMATION:**

16. United States of America Application No: 16/980,205, filed September 11, 2020 (E–097–2018–0–US–16)
17. South Africa Application No: 2020/05571, filed September 8, 2020 (E–097–2018–0–ZA–17)

The patent rights in these inventions have been assigned and/or exclusively licensed to the government of the United States of America.

The prospective exclusive license territory may be worldwide, and the fields of use may be limited to the following:

An exclusive license to:

1. The development of a CD33-specific logic-gated CAR-based

immunotherapy using autologous human T cells transduced with lentiviral vectors, wherein the viral transduction leads to the expression of a CAR that targets CD33 (comprised of the CD33-binding domain referenced as Hu195 or hP67.6 in the invention as well as an intracellular signaling domain), for the prophylaxis or treatment of CD33-expressing cancers. For clarity, ''CD33-specific logic-gated CAR-based immunotherapy'' means therapies where the CAR-expressing T cells recognize CD33 and are engineered to respond to one or more additional antigens (but not necessarily all of the antigens).

2. The development of a CD33-specific logic-gated CAR-based immunotherapy using allogeneic human NK cells transduced with retroviral vectors, including but not limited to lentiviral vectors, wherein the viral transduction leads to the expression of a CAR that targets CD33 (comprised of the CD33-binding domain referenced as Hu195 or hP67.6 in the invention as well as an intracellular signaling domain), for the prophylaxis or treatment of CD33-expressing cancers. For clarity, ''CD33-specific logic-gated CAR-based immunotherapy'' means therapies where the CAR-expressing NK cells recognize CD33 and are engineered to respond to one or more additional antigens (but not necessarily all of the antigens).

These technologies disclose therapies to treat AML by utilizing CARs that recognize AML cells through a binder for CD33. The CD33 binders are known as Hu195 or hP67.6. CD33 is a well validated immunotherapeutic target that is expressed on the surface of malignant cells, most notably on the surface of acute myelogenous leukemia (AML) blasts.

This Notice is made in accordance with 35 U.S.C. 209 and 37 CFR part 404. The prospective exclusive license will be royalty bearing, and the prospective exclusive license may be granted unless within fifteen (15) days from the date of this published Notice, the National Cancer Institute receives written evidence and argument that establishes that the grant of the license would not be consistent with the requirements of 35 U.S.C. 209 and 37 CFR part 404.

In response to this Notice, the public may file comments or objections. Comments and objections, other than those in the form of a license application, will not be treated confidentially, and may be made publicly available.

License applications submitted in response to this Notice will be presumed to contain business confidential information and any release of information from these license applications will be made only as required and upon a request under the Freedom of Information Act, 5 U.S.C. 552.

Dated: January 7, 2021.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### National Institutes of Health

### National Institute of Allergy and Infectious Diseases; Notice of Closed Meetings

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meetings.

The meetings will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended. The contract proposals and the discussions could disclose confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with the contract proposals, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* National Institute of Allergy and Infectious Diseases Special Emphasis Panel; HHS–NIH–CDC–SBIR PHS 2021–1 Phase I: Production of Adjuvants Mimics (Topic 093) (For SBIRs Phase I)

*Date:* February 1, 2021.

*Time:* 11:00 a.m. to 1:30 p.m.

*Agenda:* To review and evaluate contract proposals.

*Place:* National Institute of Allergy and Infectious Diseases, National Institutes of Health, 5601 Fishers Lane, Room 3F52, Rockville, MD 20892 (Virtual Meeting).

*Contact Person:* Maggie A. Morris Fears, Ph.D., Scientific Review Officer, Scientific Review Program, Division of Extramural Activities, National Institute of Allergy and Infectious Diseases, National Institutes of Health, 5601 Fishers Lane, Room 3F52, Rockville, MD 20852, 301–761–5444, *maggie.morrisfears@nih.gov.*

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

*Name of Committee:* National Institute of Allergy and Infectious Diseases Special Emphasis Panel; HHS–NIH–CDC–SBIR PHS 2021–1 Phase I: Adjuvant Discovery for Vaccines and for Autoimmune and Allergic Disease (Topic 092) (For SBIRs Phase I).

*Date:* February 1, 2021.

*Time:* 1:30 p.m. to 2:30 p.m.

*Agenda:* To review and evaluate contract proposals.

*Place:* National Institute of Allergy and Infectious Diseases, National Institutes of Health, 5601 Fishers Lane, Room 3F52, Rockville, MD 20892 (Virtual Meeting).

*Contact Person:* Maggie A. Morris Fears, Ph.D., Scientific Review Officer, Scientific Review Program, Division of Extramural Activities, National Institute of Allergy and Infectious Diseases, National Institutes of Health, 5601 Fishers Lane, Room 3F52, Rockville, MD 20852, 301–761–5444, *maggie.morrisfears@nih.gov.*

This notice is being published less than 15 days prior to the meeting due to the timing limitations imposed by the review and funding cycle.

*Name of Committee:* National Institute of Allergy and Infectious Diseases Special Emphasis Panel; HHS–NIH–CDC–SBIR PHS 2021–1 Phase II: Adjuvant Discovery for Vaccines and for Autoimmune and Allergic Disease (Topic 092) (For SBIRs Phase II).

*Date:* February 1, 2021.

*Time:* 2:30 p.m. to 4:00 p.m.

*Agenda:* To review and evaluate contract proposals.

*Place:* National Institute of Allergy and Infectious Diseases, National Institutes of Health, 5601 Fishers Lane, Room 3F52, Rockville, MD 20892 (Virtual Meeting).

*Contact Person:* Maggie A. ## DEPARTMENT OF HOMELAND SECURITY

### U.S. Citizenship and Immigration Services

**[OMB Control Number 1615–0124]**

### Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection: Consideration of Deferred Action for Childhood Arrivals

**AGENCY:** U.S. Citizenship and Immigration Services, Department of Homeland Security.

**ACTION:** 30-Day notice.

**SUMMARY:** The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The purpose of this notice is to allow an additional 30 days for public comments.

**DATES:** Comments are encouraged and will be accepted until February 16, 2021.

**ADDRESSES:** Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be submitted via the Federal eRulemaking Portal website at *http://www.regulations.gov* under e-Docket ID number USCIS–2012–0012. All submissions received must include the OMB Control Number 1615–0124 in the body of the letter, the agency name and Docket ID USCIS–2012–0012.

**FOR FURTHER INFORMATION CONTACT:** USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, Telephone number (240) 721–3000 (This is not a toll-free number; comments are not accepted via telephone message.). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *http://www.uscis.gov,* or call the USCIS Contact Center at (800) 375–5283; TTY (800) 767–1833.

**SUPPLEMENTARY INFORMATION:**

### Comments

The original information collection notice for an extension without change was previously published in the **Federal Register** on July 20, 2020, at 85 FR 43866, allowing for a 60-day public comment period. USCIS did receive 26 comments in connection with the 60-day notice. USCIS subsequently published a second notice in the **Federal Register** on November 13, 2020 at 85 FR 72682 for a revision to the collection of information. USCIS published a notice of withdrawal in the **Federal Register** for the revision action on December 31, 2020 at 85 FR 86946, which incorrectly listed the original notice publication as 85 FR 46882.

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2012–0012 in the search box. The comments submitted to USCIS via this method are visible to the Office of Management and Budget and comply with the requirements of 5 CFR 1320.12(c). All submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the

functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

**Overview of This Information Collection**

(1) *Type of Information Collection Request:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Consideration of Deferred Action for Childhood Arrivals.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–821D; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary: Individuals or households.* The information collected on this form is used by USCIS to determine eligibility of certain individuals who were brought to the United States as children and meet the following guidelines to be considered for deferred action for childhood arrivals.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–821D Initial Requests is 40,819 and the estimated hour burden per response is 3 hours; and the estimated total number of respondents for the information collection I–821D Renewal Requests is 418,775 and the estimated hour burden per response is 3 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 1,378,782 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $50,553,340.

Dated: January 8, 2020.

**Samantha L Deshommes,**

*Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.*

## DEPARTMENT OF HOMELAND SECURITY

### U.S. Citizenship and Immigration Services

**[OMB Control Number 1615–0051]**

### Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection: Monthly Report on Naturalization Papers

**AGENCY:** U.S. Citizenship and Immigration Services, Department of Homeland Security.

**ACTION:** 60-Day notice.

**SUMMARY:** The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) invites the general public and other Federal agencies to comment upon this proposed extension of a currently approved collection of information. In accordance with the Paperwork Reduction Act (PRA) of 1995, the information collection notice is published in the **Federal Register** to obtain comments regarding the nature of the information collection, the categories of respondents, the estimated burden (*i.e.,* the time, effort, and resources used by the respondents to respond), the estimated cost to the respondent, and the actual information collection instruments.

**DATES:** Comments are encouraged and will be accepted for 60 days until March 15, 2021.

**ADDRESSES:** All submissions received must include the OMB Control Number 1615–0051 in the body of the letter, the agency name and Docket ID USCIS–2005–0032. Submit comments via the Federal eRulemaking Portal website at *https://www.regulations.gov* under e-Docket ID number USCIS–2005–0032. USCIS is limiting communications for this Notice as a result of USCIS' COVID–19 response actions.

**FOR FURTHER INFORMATION CONTACT:** USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, telephone number (240) 721–3000 (This is not a toll-free number. Comments are not accepted via telephone message). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *https://www.uscis.gov,* or call the USCIS Contact Center at 800–375–5283 (TTY 800–767–1833).

**SUPPLEMENTARY INFORMATION:**

**Comments**

You may access the information collection instrument with instructions or additional information by visiting the Federal eRulemaking Portal site at: *https://www.regulations.gov* and entering USCIS–2005–0032 in the search box. All submissions will be posted, without change, to the Federal eRulemaking Portal at *https://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *https://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

**Overview of This Information Collection**

(1) *Type of Information Collection:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Monthly Report on Naturalization Papers.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* N–4; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Federal Government; or State, local or Tribal Government. This form is used by the clerk of courts that administer the oath of allegiance for naturalization to notify the USCIS of all persons to whom the oath was administered. The information is used by the USCIS to update its alien files and records to indicate that the aliens are now citizens; develop an audit trail on the certificates of naturalization; and determine the payments to be made to the courts for reimbursement of their expenses in connection with the naturalization process.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection N–4 is 160 and the estimated hour burden per response is 0.5 hour.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 960 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $7,200.

Dated: January 8, 2021.

**Samantha L Deshommes,**

*Chief, Regulatory Coordination Division, Office of Policy and Strategy, U.S. Citizenship and Immigration Services, Department of Homeland Security.*

## DEPARTMENT OF HOMELAND SECURITY

### U.S. Citizenship and Immigration Services

**[OMB Control Number 1615–0144]**

### Agency Information Collection Activities; Revision of a Currently Approved Collection: H–1B Registration Tool

**AGENCY:** U.S. Citizenship and Immigration Services, Department of Homeland Security.

**ACTION:** 30-Day notice.

**SUMMARY:** The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The purpose of this notice is to allow an additional 30 days for public comments.

**DATES:** Comments are encouraged and will be accepted until February 16, 2021.

**ADDRESSES:** Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be submitted via the Federal eRulemaking Portal website at *http://www.regulations.gov* under e-Docket ID number USCIS–2008–0014. All submissions received must include the OMB Control Number 1615–0144 in the body of the letter, the agency name and Docket ID USCIS–2008–0014.

**FOR FURTHER INFORMATION CONTACT:** USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, Telephone number (240) 721–3000 (This is not a toll-free number; comments are not accepted via telephone message.). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *http://www.uscis.gov,* or call the USCIS Contact Center at (800) 375–5283; TTY (800) 767–1833.

**SUPPLEMENTARY INFORMATION:**

#### Comments

The information collection notice was previously published in the **Federal Register** on October 22, 2020, at 85 FR 67366, allowing for a 60-day public comment period. USCIS did receive two comments in connection with the 60-day notice.

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2008–0014 in the search box. The comments submitted to USCIS via this method are visible to the Office of Management and Budget and comply with the requirements of 5 CFR 1320.12(c). All submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

#### Overview of This Information Collection

(1) *Type of Information Collection Request:* Revision of a Currently Approved Collection.

(2) *Title of the Form/Collection:* H–1B Registration Tool.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* OMB–64; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Business or other for-profit. USCIS uses the data collected through the H–1B Registration Tool to select a sufficient number of registrations projected to meet the applicable H–1B cap allocations and to notify registrants whether their registration was selected.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection H–1B Registration Tool is

275,000 and the estimated hour burden per response is 0.5 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 137,500 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $0. There are no costs for submitting this collection of information, it is online and only a registration.

**SUPPLEMENTARY INFORMATION:**

### Comments

The information collection notice was previously published in the **Federal Register** on May 19, 2020, at 85 FR 29957, allowing for a 60-day public comment period. USCIS received one comment in connection with the 60-day notice.

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2016–0002 in the search box. The comments submitted to USCIS via this method are visible to the Office of Management and Budget and comply with the requirements of 5 CFR 1320.12(c). All submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

### Overview of This Information Collection

(1) *Type of Information Collection Request:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Citizenship and Integration Direct Service Grant Program.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* G–1482; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Not-for-profit institutions. The USCIS Office of Citizenship (OoC) will use the information collected during the grant application period to determine the number of, and amounts for, approved grant applications. In recent years USCIS has been authorized to expend funds that are collected for adjudication and naturalization services and deposited into the Immigration Examination Fee Account for the Citizenship and Integration Grant Program (CIGP). The USCIS Office of Citizenship will use the data being collected from grant recipients after funding awards have been made to conduct an ongoing evaluation of citizenship education and naturalization outcomes for program participants.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection G–1482 is 300 who respond 1 time and the estimated hour burden per response is 40 hours. The estimated total number of respondents for the information collection Grant Post-Award Evaluation is 85 who respond 13 times a year and the estimated hour burden per response is 28 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual

hour burden associated with this collection is 42,940 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $15,000.

Dated: January 8, 2021.

**SUPPLEMENTARY INFORMATION:**

### Comments

The information collection notice was originally published in the **Federal Register** as a revision on May 19, 2020, at 85 FR 29958, allowing for a 60-day public comment period. USCIS did receive one comment in connection with the 60-day notice. USCIS will be submitting the information collection as an extension, without change, of the currently approved collection and will not be making any changes at this time.

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2007–0038 in the search box. The comments submitted to USCIS via this method are visible to the Office of Management and Budget and comply with the requirements of 5 CFR 1320.12(c). All submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

### Overview of This Information Collection

(1) *Type of Information Collection Request:* Extension, Without Change, of a Currently Approved Collection

(2) *Title of the Form/Collection:* Application to Extend/Change Nonimmigrant Status.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* Form I–539 and I–539A; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. This form will be used for nonimmigrants to apply for an extension of stay, for a change to another nonimmigrant classification, or for obtaining V nonimmigrant classification.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection Form I–539 (paper) is 174,289 and the estimated hour burden per response is 2.38 hours, the estimated total number of respondents for the information collection I–539 (electronic) is 74,696 and the estimated hour burden per response is 1.083 hours; and the estimated total number of respondents for the information collection I–539A is 54,375 and the estimated hour burden per response is 0.5 hours; biometrics processing is 373,477 total respondents requiring an estimated 1.17 hours per response.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 959,860 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $56,121,219.

Dated: January 8, 2021.

## U.S. Citizenship and Immigration Services

**[OMB Control Number 1615–0133]**

## Agency Information Collection Activities; Extension, Without Change, of a Currently Approved Collection: Request for Reduced Fee

**AGENCY:** U.S. Citizenship and Immigration Services, Department of Homeland Security.

**ACTION:** 30-Day notice.

**SUMMARY:** The Department of Homeland Security (DHS), U.S. Citizenship and Immigration Services (USCIS) will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995. The purpose of this notice is to allow an additional 30 days for public comments.

**DATES:** Comments are encouraged and will be accepted until February 16, 2021.

**ADDRESSES:** Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, must be submitted via the Federal eRulemaking Portal website at *http://www.regulations.gov* under e-Docket ID number USCIS–2018–0002. All submissions received must include the OMB Control Number 1615–0133 the body of the letter, the agency name and Docket ID USCIS–2018–0002.

**FOR FURTHER INFORMATION CONTACT:** USCIS, Office of Policy and Strategy, Regulatory Coordination Division, Samantha Deshommes, Chief, Telephone number (240) 721–3000 (This is not a toll-free number; comments are not accepted via telephone message.). Please note contact information provided here is solely for questions regarding this notice. It is not for individual case status inquiries. Applicants seeking information about the status of their individual cases can check Case Status Online, available at the USCIS website at *http://www.uscis.gov,* or call the USCIS Contact Center at (800) 375–5283; TTY (800) 767–1833.

**SUPPLEMENTARY INFORMATION:**

### Background

On November 14, 2019, DHS published the proposed rule, ''U.S. Citizenship and Immigration Services Fee Schedule and Changes to Certain Other Immigration Benefit Request Requirements,'' in the **Federal Register** proposing to adjust certain immigration and naturalization benefit request fees charged by U.S. Citizenship and Immigration Services (USCIS). *See* 84 FR 62280. That rule proposed to eliminate this information collection. On August 3, 2020, DHS published the final rule making the changes effective on October 2, 2020. 85 FR 46788 (Aug. 3, 2020) (final rule). Form I–942 was eliminated in the final rule.

On September 29, 2020, the United States District Court for the Northern District of California granted a motion for a preliminary injunction and a stay of the effective date of the final rule in its entirety. *Immigrant Legal Resource Center* v. *Wolf,* No. 4:20–cv–5883 (N.D. Cal. Sept. 29, 2020). On October 8, 2020, the United States District Court for the District of Columbia also granted a motion for a preliminary injunction of the final rule. *See Northwest Immigrant Rights Project, et al.,* v. *United States Citizenship and Immigration Services, et al.* (No. 19–3283 (RDM) (D.D.C., Oct. 8, 2020). Therefore, DHS is enjoined from implementing or enforcing the final rule in its entirety pending final adjudication of the two cases.

USCIS is publishing this notice in accordance with the Paperwork Reduction Act as required to extend the approval to use Form I–942 while the final rule is enjoined.

### Comments

The information collection notice was previously published in the **Federal Register** on October 30, 2020, at 85 FR 68909, allowing for a 60-day public comment period. USCIS did receive two comments in connection with the 60-day notice.

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2018–0002 in the search box. The comments submitted to USCIS via this method are visible to the Office of Management and Budget and comply with the requirements of 5 CFR 1320.12(c). All submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

### Overview of This Information Collection

(1) *Type of Information Collection Request:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Request for Reduced Fee.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–942; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households. USCIS uses the data collected on this form to verify that the applicant is eligible for a reduced fee for the immigration benefit being requested.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–942 is 4,491 and the estimated hour burden per response is 0.75 hour.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 3,368 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $19,087.

Dated: January 8, 2021.

**Samantha L Deshommes,**

**SUPPLEMENTARY INFORMATION:**

#### Comments

The information collection notice was previously published in the **Federal Register** on September 18, 2020, at 85 FR 58381, allowing for a 60-day public comment period. USCIS did receive one comment in connection with the 60-day notice.

You may access the information collection instrument with instructions, or additional information by visiting the Federal eRulemaking Portal site at: *http://www.regulations.gov* and enter USCIS–2010–0004 in the search box. The comments submitted to USCIS via this method are visible to the Office of Management and Budget and comply with the requirements of 5 CFR 1320.12(c). All submissions will be posted, without change, to the Federal eRulemaking Portal at *http://www.regulations.gov,* and will include any personal information you provide. Therefore, submitting this information makes it public. You may wish to consider limiting the amount of personal information that you provide in any voluntary submission you make to DHS. DHS may withhold information provided in comments from public viewing that it determines may impact the privacy of an individual or is offensive. For additional information, please read the Privacy Act notice that is available via the link in the footer of *http://www.regulations.gov.*

Written comments and suggestions from the public and affected agencies should address one or more of the following four points:

(1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

#### Overview of This Information Collection

(1) *Type of Information Collection Request:* Extension, Without Change, of a Currently Approved Collection.

(2) *Title of the Form/Collection:* Petition for U Nonimmigrant Status.

(3) *Agency form number, if any, and the applicable component of the DHS sponsoring the collection:* I–918; USCIS.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract: Primary:* Individuals or households; Federal Government; or State, local or Tribal Government. This petition permits victims of certain qualifying criminal activity and their immediate family members to apply for temporary nonimmigrant classification. This nonimmigrant classification provides temporary immigration benefits, potentially leading to permanent resident status, to certain victims of criminal activity who: suffered substantial mental or physical abuse as a result of having been a victim of criminal activity; have information regarding the criminal activity; and assist government officials in investigating and prosecuting such criminal activity.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* The estimated total number of respondents for the information collection I–918 is 29,400 and the estimated hour burden per response is 5 hours. The estimated total number of respondents for the information collection I–918A is 17,900 and the estimated hour burden per response is 1.5 hour. The estimated total number of respondents for the information collection I–918B is 29,400 and the estimated hour burden per response is 1 hour. The estimated total number of respondents for the information collection of Biometrics is 47,300 and the estimated hour burden per response is 1.17 hours.

(6) *An estimate of the total public burden (in hours) associated with the collection:* The total estimated annual hour burden associated with this collection is 258,591 hours.

(7) *An estimate of the total public burden (in cost) associated with the collection:* The estimated total annual cost burden associated with this collection of information is $201,025.

Dated: January 8, 2021.

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

**[Docket No. FR–6238–D–02]**

## Order of Succession for Government National Mortgage Association (Ginnie Mae)

**AGENCY:** Office of the President of the Government National Mortgage Association, HUD.

**ACTION:** Notice of order of succession.

**SUMMARY:** In this Notice, the Secretary of Housing and Urban Development designates the Order of Succession for the Government National Mortgage Association (Ginnie Mae). This Order of Succession supersedes all prior Orders of Succession for Ginnie Mae, including the Order of Succession published in the **Federal Register** on January 18, 2018.

**DATES:** Applicability Date: January 11, 2021.

**FOR FURTHER INFORMATION CONTACT:** Senior Vice President and Chief Risk Officer, Office of Enterprise Risk, Government National Mortgage Association, Department of Housing and Urban Development, Capitol View, 425 3rd Street, SW, Washington, DC 20024; telephone number (202) 475–4918. (This is not a toll-free number). Persons with hearing- or speech-impairments may access this number though TTY by calling the toll-free Federal Relay Service at 1–800–877–8339.

**SUPPLEMENTARY INFORMATION:** The Secretary of Housing and Urban Development hereby issues this Order of Succession pursuant to the bylaws of Ginnie Mae which authorize the Secretary of Housing and Urban Development or the Ginnie Mae President to designate the sequence in which other officers of Ginnie Mae shall act. The officers designated below shall perform the duties and exercise the power and authority of the Ginnie Mae President, when the Ginnie Mae President is absent or unable to act, or when there is a vacancy in the Office of the President of Ginnie Mae. This Order of Succession is subject to the provisions of the Federal Vacancies Reform Act of 1998 (5 U.S.C. 3345–3349d) and the bylaws of the Government National Mortgage Association, as published at *www.ginniemae.gov.* Accordingly, the Secretary of Housing and Urban Development designates the following Order of Succession:

### Section A. Order of Succession

Subject to the provisions of the Federal Vacancies Reform Act of 1998 and the bylaws of Ginnie Mae, during any period when, by reason of absence, disability, or vacancy in office, the Ginnie Mae President is not available to exercise the powers or perform the duties of the Ginnie Mae President, the following officials within Ginnie Mae are hereby designated to exercise the powers and perform the duties of the Office. No individual who is serving in an office listed below in an acting capacity shall act as the Ginnie Mae President pursuant to this Order of Succession.

(1) Principal Executive Vice President;
(2) Executive Vice President and Chief Operating Officer;
(3) Executive Vice President of Policy;
(4) Senior Vice President, Strategic Planning and Policy, Office of the President
(5) Senior Vice President and Chief Risk Officer, Office of Enterprise Risk;
(6) Senior Vice President, Office of Issuer and Portfolio Management;
(7) Senior Vice President, Office of Capital Markets;
(8) Senior Vice President, Office of Securities Operations;
(9) Senior Vice President and Chief Financial Officer, Office of Chief Financial Officer;
(10) Senior Vice President, Office of Enterprise Data and Technology Solutions;
(11) Senior Vice President, Office of Management Operations; and
(12) Director of Program Administration, Office of Securities Operations.

These officials shall perform the functions and duties of the Office in the order specified herein, and no official shall serve unless all the other officials, whose position titles precede his/hers in this order, are unable to act by reason of absence, disability, or vacancy in office.

### Section B. Authority Superseded

This Order of Succession supersedes the prior Orders of Succession for the Ginnie Mae President, including the Order of Succession published in the **Federal Register** on January 18, 2018 at 83 FR 2661.

**Authority:** Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)); Bylaws of the Government National Mortgage Association, posted at *www.ginniemae.gov.*

**Benjamin S. Carson, Sr.,**

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

**[Docket No. FR–7042–N–01]**

## 60-Day Notice of Proposed Information Collection: Office of Lead Hazard Control and Healthy Homes Grant Programs Assessment of the HUD Grants To Promote Coordination between Grantees of HUD's Lead Hazard Control Program and DOE's Weatherization Assistance Program

**AGENCY:** Office of Lead Hazard Control and Healthy Homes, HUD.

**ACTION:** Notice.

**SUMMARY:** HUD is seeking approval from the Office of Management and Budget (OMB) for the information collection described below. In accordance with the Paperwork Reduction Act, HUD is requesting comment from all interested parties on the proposed collection of information. The purpose of this notice is to allow for 60 days of public comment.

**DATES:** *Comments Due Date: March 15, 2021.*

**ADDRESSES:** Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Anna P. Guido, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street, SW, Room 4176, Washington, DC 20410–5000; telephone 202–402–5535 (this is not a toll-free number) or email at *Anna.P.Guido@hud.gov* for a copy of the proposed forms or other available information. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

**FOR FURTHER INFORMATION CONTACT:** Anna P. Guido, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street, SW, Washington, DC 20410; email Anna P. Guido at *Anna.P.Guido@hud.gov* or telephone 202–402–5535. This is not a toll-free number. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339.

Copies of available documents submitted to OMB may be obtained from Ms. Guido.

**SUPPLEMENTARY INFORMATION:** This notice informs the public that HUD is seeking approval from OMB for the information collection described in Section A.

## A. Overview of Information Collection

*Title of Information Collection:* Assessment of the HUD Grants to Promote Coordination between Grantees of HUD's Lead Hazard Control Program and DOE's Weatherization Assistance Program.

*OMB Approval Number:* 2539-Pending.

*Type of Request:* New request.

*Form Number:* None.

*Description of the need for the information and proposed use:* Congress requested HUD to do the following: (1) Demonstrate whether the coordination of Healthy Homes remediation activities with weatherization activities achieves cost savings and better outcomes in improving the safety and quality of homes, and (2) collect information on the benefits of coordinating with DOE, evaluate if improved health outcomes are achieved, and provide information on the replicability and sustainability of these models. This information collection request is to collect information on the potential benefits of coordinated service delivery by HUD's Lead Hazard Control Program and DOE's Weatherization Assistance Program grantees and subgrantees.

*Respondents:* Lead Hazard Control (LHC) Grantees; Weatherization Assistance Program (WAP) Grantees; and residential property owners or residents (renters).

*Total Burden Estimate:* The table below reflects our estimate of the burden on the LHC and WAP grantees, and the residents that will be recruited.

| Information collection | Number of respondents | Frequency of response | Responses per annum | Burden hour per response | Annual Burden hours | Hourly cost per response | Annual cost |
|---|---|---|---|---|---|---|---|
| Grantees | 18 | 4 | 4 | 2 | 144 | $17.48 | $ 2,517 |
| Residents | 150 | 4 | 4 | 0.5 | 300 | $7.50 | $ 2,250 |
| Total | 168 | 4 | 4 | | | | $ 4,767 |

## B. Solicitation of Public Comment

This notice is soliciting comments from members of the public and affected parties concerning the collection of information described in Section A on the following:

(1) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(2) The accuracy of the agency's estimate of the burden of the proposed collection of information;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) Ways to minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses

HUD encourages interested parties to submit comments in response to these questions.

## C. Authority:

Section 3507 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35.

The Senior Advisor to the Director for the Office of Lead Hazard Control and Healthy Homes, Warren Friedman, having reviewed and approved this document, is delegating the authority to electronically sign this document to submitter, Nacheshia Foxx, who is the Federal Register Liaison for HUD, for purposes of publication in the **Federal Register**.

**Nacheshia Foxx,**

*Federal Register Liaison for the Department of Housing and Urban Development.*

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

**[Docket No. FR–6238–D–01]**

## Consolidated Delegation of Authority for the Government National Mortgage Association (Ginnie Mae)

**AGENCY:** Office of the Secretary, HUD.

**ACTION:** Notice of Delegation of Authority.

**SUMMARY:** This notice is issued to consolidate the authorities delegated from the Secretary to the President, Principal Executive Vice President, Executive Vice President and Chief Operating Officer, and Executive Vice President of Policy of the Government National Mortgage Association (Ginnie Mae).

**DATES:** Applicability Date: January 11, 2021.

**FOR FURTHER INFORMATION CONTACT:** Senior Vice President and Chief Risk Officer, Office of Enterprise Risk, Government National Mortgage Association, Department of Housing and Urban Development; Capitol View, 425 3rd Street, SW, 4th Floor; Washington, DC 20024; telephone number 202–475–4918 (this is not a toll-free number). Persons with hearing- or speech-impairments may access this number through TTY by calling the Federal Relay Service at 1–800–877–8339 (this is a toll-free number).

**SUPPLEMENTARY INFORMATION:** Ginnie Mae is a wholly owned U.S. Government corporation within the Department of Housing and Urban Development. Ginnie Mae's organic statute vests all the powers and duties of Ginnie Mae in the Secretary of HUD (12 U.S.C. 1723).

In Ginnie Mae's bylaws, the Secretary has delegated all the powers and duties of Ginnie Mae that were vested in the Secretary to Ginnie Mae. In previous **Federal Register** notices, the Secretary has delegated authority over Ginnie Mae to the Ginnie Mae President. Specifically, the Secretary has delegated: (1) All the Secretary's authority with respect to managing Ginnie Mae and Ginnie Mae's programs pursuant to title III of the National Housing Act (12 U.S.C. 1723 and 68 FR 41840); (2) Authority to waive regulations issued by the U.S. Department of Housing and Urban Development (73 FR 76674); (3) Authority to impose suspensions and debarments, with the concurrence of the General Counsel or his or her designee (54 FR 4913 and 63 FR 57133); and (4) The power to affix HUD's seal and authenticate documents (68 FR 41840).

This notice consolidates the functions that the Secretary has delegated to the

Ginnie Mae President, while also delegating certain concurrent authority to Ginnie Mae's Principal Executive Vice President, Executive Vice President and Chief Operating Officer, and Executive Vice President of Policy. While the Secretary has delegated authority to these individuals, the Secretary retains authority under 12 U.S.C. 1723.

**Section A. Consolidation of Authority Delegated**

The Secretary hereby concurrently delegates authority to the President, the Principal Executive Vice President, Executive Vice President and Chief Operating Officer, and Executive Vice President of Policy of Ginnie Mae the following:

1. All powers and duties of Ginnie Mae, which are by law vested in the Secretary, except as otherwise provided in the Ginnie Mae bylaws (12 U.S.C. 1723; 24 CFR part 310, section 1.02; Bylaws of the Government National Mortgage Association, posted at *www.ginniemae.gov*);
2. All authority of the Secretary with respect to the management of Ginnie Mae and Ginnie Mae programs pursuant to title III of the National Housing Act (12 U.S.C. 1723; 68 FR 41840);
3. The power to impose suspensions and debarments, with the concurrence of the General Counsel (Section 7(d), Department of Housing and Urban Development Act, 42 U.S.C. 3535(d); 54 FR 4913; 63 FR 57133); and
4. The authority to authenticate documents and affix the seal of HUD to documents (68 FR 41840).

The Secretary hereby delegates authority to the President of Ginnie Mae the power to waive HUD regulations (Section 7(q), Department of Housing and Urban Development Act, 42 U.S.C. 3535(q); 73 FR 76674).

**Section B. Authority to Redelegate**

The Ginnie Mae President, Ginnie Mae Principal Executive Vice President, Ginnie Mae Executive Vice President and Chief Operating Officer, and Ginnie Mae Executive Vice President of Policy may redelegate the authorities delegated by the Secretary, except for the authority to waive HUD regulations. The authority to waive HUD regulations is reserved for the Ginnie Mae President, pursuant to the Department of Housing and Urban Development Act (42 U.S.C. 3535(q)), and may not be redelegated. However, if the Ginnie Mae President is absent from office then Ginnie Mae's Principal Executive Vice President, Executive Vice President and Chief Operating Officer, Executive Vice President of Policy, or other persons authorized to act in the President's absence may exercise the waiver authority of the President consistent with HUD's policies and procedures (73 FR 76674 and 66 FR 13944).

**Section C. Authority Superseded**

This delegation of authority supersedes all previous delegations of authority and redelegations of authority for Ginnie Mae, including the delegation of authority published in the **Federal Register** on January 18, 2018 (83 FR 2660). The Secretary may revoke the authority authorized herein, in whole or part, at any time.

**Section D. Actions Ratified**

The Secretary hereby ratifies all actions previously taken by the Ginnie Mae President, Ginnie Mae Principal Executive Vice President, Ginnie Mae Executive Vice President and Chief Operating Officer, and Ginnie Mae Executive Vice President of Policy that are consistent with the delegations of authority provided in this notice.

**Authority:** Section 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d)); 24 CFR part 310; Bylaws of the Government National Mortgage Association, posted at *www.ginniemae.gov.*

**Benjamin S. Carson, Sr.,**

*Secretary.*

## DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

**[Docket No. FR–7024–N–60]**

## 30-Day Notice of Proposed Information Collection: Grant Drawdown Payment Request/Line of Credit Control System (LOCCS)/eLOCCS OMB Control No.: 2577–0166

**AGENCY:** Office of the Chief Information Officer, HUD.

**ACTION:** Notice.

**SUMMARY:** HUD has submitted the proposed information collection requirement described below to the Office of Management and Budget (OMB) for review, in accordance with the Paperwork Reduction Act. The purpose of this notice is to allow for an additional 30 days of public comment.

**DATES:** *Comments Due Date:* February 16, 2021.

**ADDRESSES:** Interested persons are invited to submit comments regarding this proposal. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/Start* Printed Page 15501PRAMain. Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

**FOR FURTHER INFORMATION CONTACT:** Colette Pollard, Reports Management Officer, QDAM, Department of Housing and Urban Development, 451 7th Street SW, Washington, DC 20410; email Colette Pollard at *Colette.Pollard@hud.gov* or telephone 202–402–3400. Persons with hearing or speech impairments may access this number through TTY by calling the toll-free Federal Relay Service at (800) 877–8339. This is not a toll-free number. Copies of available documents submitted to OMB may be obtained from Ms. Pollard.

**SUPPLEMENTARY INFORMATION:** This notice informs the public that HUD has submitted to OMB a request for approval of the information collection described in Section A. The **Federal Register** notice that solicited public comment on the information collection for a period of 60 days was published on September 23, 2020 at 85 FR 59817.

**A. Overview of Information Collection**

*Title of Information Collection:* Grant Drawdown Payment Request/LOCCS/VRS Voice Activated.

*OMB Approval Number:* 2577–0166.

*Type of Request:* Extension of a currently approved collection.

*Form Numbers:* 50080–CFP; 50080–OFND; 50080–SC; 50080–PHTA; 50080–URP; 50080–FSS; 50080–IHBG; 50080–TIHD.

*Description of the need for the information and proposed use:* On April 17, 2017, the Grant Drawdown Payment Request/Voice Response System (VRS) was converted to a Business Partner Registration and Secure Systems for both the user and the user's Approving Official. The Secure Systems supports many HUD applications, one of which is Line of Credit Control System (eLOCCS) . The eLOCCS is implementing a Single Sign-On solution under Secure Systems, where Grant recipients will be recognized and authenticated based on a Secure System ID and will no longer separately Sign-in to eLOCCS. Grant recipients use LOCCS system to request funds from HUD by signing into Secure Systems, as they normally do, and select the Line of Credit Control System (eLOCCS) link. Some Grantees (*all new or reinstated users who need to access eLOCCS*) will need to complete the LOCCS HUD–27054E form, have it notarized, send the original HUD–27054E LOCCS Access Authorization Form (with the original signature and notary seal) via U.S. Mail to the Program Office for review. The LOCCS system will automatically generate an Access Authorization email letting the user know that HUD–27054E has been processed, enabling grantees to access their eLOCCS account. The information collected on the payment voucher will also be used as an internal control measure to ensure the lawful and appropriate disbursement of Federal funds as well as provide a service to program recipients.

Below is a link where the HUD–27054E LOCCS Authorized Form can be accessed: *http://portal.hud.gov/hudportal/documents/huddoc?id=27054E.pdf.*

*Respondents:* PHAs, state or local government. Tribes and tribally designated housing entities.

| Information collection | Number of respondents | Frequency of responses | Responses per annum | Burden hour per response | Annual burden hours | Hourly cost per response * | Annual cost |
|---|---|---|---|---|---|---|---|

## DEPARTMENT OF THE INTERIOR

### Office of the Secretary

**[20XD4523WS. DS62400000. DWSN00000.000000. DP62402; OMB Control Number 1084–0034]**

### Agency Information Collection Activities; Documenting, Managing and Preserving Department of the Interior Museum Collections Housed in Non-Federal Repositories

**AGENCY:** Office of Acquisition and Property Management, Interior.

**ACTION:** Notice of information collection; request for comment.

**SUMMARY:** In accordance with the Paperwork Reduction Act of 1995, we, the Office of Acquisition and Property Management, Office of the Secretary, Department of the Interior are proposing to renew an information collection.

**DATES:** Interested persons are invited to submit comments on or before March 15, 2021.

**ADDRESSES:** Send your comments on this information collection request (ICR) by mail to Emily Palus, Office of Acquisition and Property Management, U.S. Department of the Interior, 1849 C Street NW, MS 4262–MIB, Washington, DC 20240; or by email to *Emily_Palus@ios.doi.gov.* Please reference OMB Control Number 1084–0034 in the subject line of your comments.

**FOR FURTHER INFORMATION CONTACT:** To request additional information about this ICR, contact Emily Palus by email at *Emily_Palus@ios.doi.gov,* or by telephone at 202–513–7563.

**SUPPLEMENTARY INFORMATION:** In accordance with the PRA and 5 CFR 1320.8(d)(1), all information collections require approval under the PRA. We may not conduct or sponsor and you are not required to respond to a collection of information unless it displays a currently valid OMB control number.

As part of our continuing effort to reduce paperwork and respondent burdens, we invite the public and other Federal agencies to comment on new, proposed, revised, and continuing collections of information. This helps us assess the impact of our information collection requirements and minimize the public's reporting burden. It also helps the public understand our information collection requirements and provide the requested data in the desired format.

We are especially interested in public comment addressing the following:

(1) Whether or not the collection of information is necessary for the proper performance of the functions of the agency, including whether or not the information will have practical utility;

(2) The accuracy of our estimate of the burden for this collection of information, including the validity of the methodology and assumptions used;

(3) Ways to enhance the quality, utility, and clarity of the information to be collected; and

(4) How might the agency minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of response.

Comments that you submit in response to this notice are a matter of public record. We will include or summarize each comment in our request to OMB to approve this ICR. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

*Abstract:* The Department of the Interior (DOI) manages an estimated 73 million museum objects and over 86 million linear feet of archives in trust for the American public. This diverse collection consists of archaeological artifacts, archives, biological specimens, ethnographic objects, fine arts, geological specimens, historic objects, and paleontological specimens that are owned and managed by the Department's bureaus and offices (bureaus). This information collection request is directed to non-Federal repositories that house DOI museum collections. The information that DOI obtains, on a voluntary basis, concerns DOI museum collections held in non-Federal repositories. Receipt of this information supports the Department's management of its museum collections for public benefit, including preservation, protection, access, and use, as well as where applicable, compliance with the Native American Graves Protection and Repatriation Act (NAGPRA).

The information that DOI seeks consists of the following:

A. Accession Records and associated files regarding acquisition;

B. Catalog Records and associated files describing the objects and their use;

C. Facility Checklist for Spaces Housing DOI Museum Property (Checklist), which addresses the environmental, security and other management controls in place to document and safeguard the collections;

D. Inventory of Museum Collections (Inventory) documenting presence and condition of objects and records; and

E. Input on Collections from Lands Administered by the U.S. Department of the Interior that are Located in Non-Federal Facilities (Input Form) to query a limited range information about the repository; the scope and types of DOI collections in repositories, with which bureaus and offices those collections are associated and the nature of any agreements; the status of documentation and NAGPRA compliance, and availability for research and use.

Although the majority of DOI's documented collections are housed in bureau facilities across the nation, at least ten percent (an estimated more than 25 million objects) are located in approximately 970 non-Federal repositories, primarily state, tribal, and local museums and university departments. Most of the DOI museum artifacts, specimens, and archives housed in non-Federal repositories resulted from projects on Federal lands, and include collections from the disciplines of archaeology, biology, geology, and paleontology, as well as associated project documentation.

DOI museum objects cared for in non-Federal repositories are those artifacts, specimens, and archives that are established as Federal property under Federal law. Common law also confers rights to landowners, including the Federal government, such as ownership of property, resources, and other tangible assets existing on or originating from those lands, unless those rights were previously relinquished, sold, awarded, or otherwise reassigned. Also, permits and other agreements for the collection of artifacts and specimens from public lands managed at the time by the Department may further affirm Federal ownership. In order to maintain accountability of and facilitate access to DOI museum objects, the objects must be documented in the Interior Collection Management System (ICMS), its successor, the Museum Collection Management System (MCMS) or in another collection management database from which the necessary data can be imported into ICMS or MCMS.

Federal regulations and DOI policy requires that all permitees conducting authorized scientific research and authorized individuals performing compliance activities on DOI-managed lands must ensure that any retained museum specimens or objects collected during a project are: (1) Accessioned and cataloged in ICMS/MCMS, according to DOI standards; and (2) housed in an appropriate museum repository that meets DOI museum standards. These requirements ensure the collections' long-term preservation, protection, and accessibility for access and use.

*Title of Collection:* Documenting, Managing and Preserving Department of the Interior Museum Collections Housed in Non-Federal Repositories.

*OMB Control Number:* 1084–0034.

*Form Number:* None.

*Type of Review:* Extension of a currently approved collection.

*Respondents/Affected Public:* Museums; academic, cultural, and research institutions; and, state or local agencies and institutions.

*Total Estimated Number of Annual Respondents:* 900.

*Total Estimated Number of Annual Responses:* 900.

*Estimated Completion Time per Response:* Varies from 1 hour to 12 hours, depending on activity.

*Total Estimated Number of Annual Burden Hours:* 3,600 hours.

*Respondent's Obligation:* Voluntary.

*Frequency of Collection:* Maximum of once per year per collection instrument, and likely less frequently.

*Total Estimated Annual Nonhour Burden Cost:* None.

An agency may not conduct or sponsor and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number.

The authority for this action is the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

**Megan Olsen,**

*Director, Office of Acquisition and Property Management.*

**[212.LLWO230000. L11700000.PH0000.LXSGPL000000]**

### Notice of Availability of the Record of Decision for Greater Sage-Grouse Management, Nevada and Northeastern California

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of availability.

**SUMMARY:** The Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) for the management of Greater Sage-Grouse habitat in Nevada and Northeastern California. The BLM has determined that its decade-long planning and NEPA processes have sufficiently addressed Greater Sage-Grouse habitat conservation and no new land use planning process to consider additional alternatives or new information is warranted. This determination is not a new planning decision. Instead, it is a determination not to amend the applicable land use plans. Thus, it is not subject to appeal or protest. The BLM's decision remains as identified in the 2019 Approved Resource Management Plan Amendment for Greater Sage-Grouse Conservation in Nevada and Northeastern California.

**ADDRESSES:** Copies of the ROD are available for public inspection at the Nevada Bureau of Land Management

State Office at 1340 Financial Boulevard, Reno, Nevada 89502–7147 or the California Bureau of Land Management State Office at 2800 Cottage Way, Sacramento, California 95825. Interested persons may also review the ROD on the internet at: *https://eplanning.blm.gov/eplanning-ui/project/103343/510.*

**FOR FURTHER INFORMATION CONTACT:** Arlene Kosic, California Sage-Grouse Implementation Lead, at 530–279–2726; California Bureau of Land Management Applegate Field Office, 602 Cressler Street, Cedarville, California 96104; *akosic@blm.gov;* or Colleen Dulin, Acting Nevada Sage-Grouse Implementation Lead, at 775–430–3621; 1340 Financial Boulevard Reno, Nevada 89502–7147; *cdulin@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact Ms. Kosic or Ms. Dulin during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

**SUPPLEMENTARY INFORMATION:** The BLM issued this ROD to document the agency's determination regarding the analysis contained in the final supplemental Environmental Impact Statement (EIS) (85 FR 74381). With the issuance of this ROD, the BLM has now completed several planning and NEPA processes for Greater Sage-Grouse management in Nevada and Northeastern California over roughly the last decade, which include the processes that culminated in the 2015 ROD and the Approved Resource Management Plan Amendment (the 2015 planning process), the 2019 ROD and Approved Resource Management Plan Amendment (the 2019 planning process), and this 2020 ROD (the 2020 supplemental EIS process). Together, these processes represent a thorough analysis of Greater Sage-Grouse management, substantial public engagement, and important coordination with state wildlife agencies, other federal agencies, and many others in the range of the species have been collaborating to conserve Greater Sage-Grouse and its habitats.

The BLM prepared the final supplemental EIS in order to review its previous NEPA analysis, clarify and augment it where necessary, and provide the public with additional opportunities to review and comment. It also helped the BLM determine whether its 2015 and 2019 land use planning and NEPA processes sufficiently addressed Greater Sage-Grouse habitat conservation or whether the BLM should initiate a new land use planning process to consider additional alternatives or new information.

The final supplemental EIS addressed four specific issues: the range of alternatives, need to take a hard look at environmental impacts, cumulative effects analysis, and the BLM's approach to compensatory mitigation. Rationale to support BLM's determination, with respect to each of these topical areas, is summarized below and described further in the ROD:

(1) *Range of Alternatives:* Throughout the decade-long planning and NEPA processes, the BLM has analyzed in detail 143 alternatives across the range of Greater Sage-Grouse. Additionally, the BLM has continued to review new science as it is published, which affirms that the BLM has considered a full range of plan-level conservation measures in the alternatives already analyzed.

(2) *Hard Look:* The BLM has continued to take a hard look at environmental impacts every step of the way in planning for Greater Sage-Grouse habitat conservation. In the 2015 planning process, the 2019 planning process, and in the 2020 supplemental EIS process, the BLM incorporated detailed analysis of environmental impacts into our decision-making processes and disclosed these expected impacts to the public. As scientific information has continued to evolve, the BLM has closely reviewed and considered any changes from such science to expected environmental impacts, both at the land use plan scale and in site-specific analyses. To address public comments raised during the supplemental EIS process, the BLM convened a team of biologists and land use planners to evaluate scientific literature provided to the agency. The BLM found that the most up-to-date Greater Sage-Grouse science and other information has incrementally increased, and built upon, the knowledgebase of Greater Sage-Grouse management evaluated by the BLM most recently in its 2019 land use plan amendments, but does not change the scope or direction of the BLM's management; however, new science does suggest adaptations to management may be warranted at site-specific scales.

(3) *Cumulative Effects Analysis:* The BLM considered cumulative impacts on a rangewide basis, organizing that analysis at the geographic scale of each Western Association of Fish and Wildlife Agencies (WAFWA) management zone, in order to consider impacts at biologically meaningful scales. In the 2019 planning process, the BLM incorporated by reference cumulative effects analysis conducted in the 2015 planning process and other environmental impact statements. Since the nature and context of the cumulative effects scenario has not appreciably changed since 2015, and the 2015 analysis covered the entire range of the Greater Sage-Grouse, the BLM's consideration of cumulative effects in the 2015 planning process adequately addresses most, if not all, of the planning decisions made through the 2019 planning process.

While the 2019 planning process largely incorporated by reference the analysis from the 2015 planning process, and updated it where needed to account for current conditions, the 2020 supplemental EIS process elaborated on this information in greater detail and updated the analysis to ensure that the BLM appropriately evaluated cumulative effects at biologically meaningful scales.

(4) *BLM's Approach to Compensatory Mitigation:* In the 2019 planning process, the BLM requested public comments on a number of issues, including the BLM's approach to compensatory mitigation. As part of the 2015 Approved Resource Management Plan Amendments, the BLM selected a net conservation gain standard in its approach to compensatory mitigation, which the 2019 land use plan amendments modified to align with the BLM's 2018 policy on compensatory mitigation. Through the 2020 supplemental EIS process, the BLM requested further comments about the BLM's approach to compensatory mitigation. After reviewing the comments that the BLM received about compensatory mitigation, the BLM determined that its environmental analysis supporting the 2019 land use plan amendments was sound. The public has now had substantial opportunities to consider and comment on the BLM's approach to compensatory mitigation at the land use planning level, including the approach taken in the 2019 land use plan amendments.

Based on the final supplemental EIS, the BLM has determined that its decade-long planning and NEPA processes have sufficiently addressed Greater Sage-Grouse habitat conservation and no new land use planning process to consider additional alternatives or new information is warranted. This determination is not a new planning decision. Instead, it is a determination not to amend the applicable land use plans. Thus, it is not subject to appeal or protest. The BLM's decision remains as identified in the 2019 Approved Resource Management Plan Amendment for Greater Sage-Grouse Conservation in Nevada and Northeastern California.

(Authority: 40 CFR 1505.2; 40 CFR 1506.6; References to the CEQ regulations are to the regulations in effect prior to September 14, 2020. The revised CEQ regulations effective September 14, 2020, are not cited because this supplemental EIS process began prior to that date.)

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

**[(LLCA930000.L13400000.DS0000.21X) MO#450014117]**

### Notice of Availability of the Draft Desert Plan Amendment and Draft Environmental Impact Statement, California

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of availability.

**SUMMARY:** In accordance with the National Environmental Policy Act of 1969, as amended, the Bureau of Land Management (BLM) has prepared a Draft Land Use Plan Amendment (LUPA) and Draft Environmental Impact Statement (EIS), for an amendment to the California Desert Conservation Area (CDCA) Plan and the Bakersfield and Bishop Resource Management Plans (RMPs). The Desert Plan Amendment Draft LUPA/EIS includes consideration of changes to the management or modification to the boundaries of 129 Areas of Critical Environmental Concern (ACECs). By this notice, the BLM is announcing the availability of the Draft LUPA/EIS. In order to comply with Federal regulations, the BLM is also announcing a comment period on proposed changes to the ACECs within the planning area.

**DATES:** To ensure that comments will be considered, the BLM must receive written comments on the Draft LUPA/EIS within 90 days following the date the Environmental Protection Agency publishes its notice of the Draft LUPA/EIS in the **Federal Register**. The BLM will announce future meetings and any other public participation activities at least 15 days in advance through public notices, news releases, and/or mailings.

**ADDRESSES:** The Desert Plan Amendment Draft LUPA/EIS are available on the BLM ePlanning project website at *https://go.usa.gov/x7hdj.* Click the ''Documents'' link on the left side of the screen to find the electronic version of these materials. Hard copies of the Desert Plan Amendment Draft LUPA and Draft EIS are also available for public inspection at the following BLM locations:

California State Office, 2800 Cottage Way, Suite W–1623, Sacramento, CA 95825;
California Desert District Office, 22835 Calle San Juan De Los Lagos, Moreno Valley, CA 92553;
Barstow Field Office, 2601 Barstow Road, Barstow, CA 92311;
El Centro Field Office, 1661 S. 4th Street, El Centro, CA 92243;
Needles Field Office, 1303 S. Highway 95, Needles, CA 92363;
Ridgecrest Field Office, 300 S. Richmond Road, Ridgecrest, CA 93555;
Bakersfield Field Office, 3801 Pegasus Drive, Bakersfield, CA 93308; and
Bishop Field Office, 351 Pacu Lane, Suite 100, Bishop, CA 93514.

You may submit written comments related to the Desert Plan Amendment by either of the following methods:

- *Website: https://go.usa.gov/x7hdj.*
- *Mail:* Bureau of Land Management, California State Office, Attn: Desert Plan Amendment, 2800 Cottage Way, Suite W–1623, Sacramento, CA 95825.

**FOR FURTHER INFORMATION CONTACT:** Jeremiah Karuzas, Renewable Energy Program Manager, telephone: 916–978–4644, email: *jkaruzas@blm.gov;* address Bureau of Land Management, 2800 Cottage Way, W–1623, Sacramento, CA 95825. Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay

Service (FRS) at 1–800–877–8339 to contact Mr. Karuzas during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

**SUPPLEMENTARY INFORMATION:** In September 2016, the BLM issued a Record of Decision (ROD) for the Desert Renewable Energy Conservation Plan (DRECP) LUPA, which amended the CDCA Plan, the Bishop RMP, and the Bakersfield RMP in the Mojave and Colorado/Sonoran Desert regions of southern California. The 2016 ROD was intended to address the streamlining of renewable energy development, conservation of desert resources, and to support multiple use and recreation on the nearly 11 million acres of BLM-managed public land in the planning area. In response to challenges that arose with the implementation of the 2016 DRECP LUPA, as well as in response to Executive Order 13783, Promoting Energy Independence and Economic Growth, and Executive Order 13821 on Streamlining and Expediting Requests to Locate Broadband Facilities in Rural America, the BLM published a Notice of Intent in the **Federal Register** on February 2, 2018 (83 FR 4921) initiating a 45-day public comment period. The BLM sought comments on:

• The potential impacts that land use designations contained in the amended Land Use Plans will have on commercial-scale renewable energy projects, including wind, solar and geothermal energy;

• ACECs that were designated, including where private lands lie within the external boundaries of such designations, as well as comments on increasing opportunities for increased renewable energy development, recreational and off-highway vehicle access, mining access, and grazing; and

• The impact that land-use designations, land-disturbance limits (''disturbance caps''), and visual-management classifications contained in the plans may have on the deployment of future communications infrastructure.

The BLM used public scoping comments to help identify planning issues to formulate alternatives and frame the scope of analysis in the Draft LUPA/EIS. Issues considered in the Draft LUPA/EIS are management actions associated with conservation areas, biological resources (including special status species), cultural resources, renewable energy, minerals, livestock grazing, visual resources, air resources, water resources, and recreation. The LUPA also considers decisions regarding ACECs, California Desert National Conservation Lands (CDNCL), and management of lands with wilderness characteristics. The Desert Plan Amendment Draft LUPA/EIS evaluates the No Action Alternative and two action alternatives (Alternatives 1 and 2). The BLM identifies Alternative 1 as the Preferred Alternative. This alternative, however, does not represent the final agency direction. After the public comment period closes, the BLM will prepare a Proposed LUPA, which may reflect changes or adjustments based on information received during public comment on the Draft LUPA/EIS, new information, or changes in BLM policies or priorities.

The No Action Alternative would retain the decisions specified in the 2016 ROD for the DRECP LUPA, as recently modified by Public Law 116–9. Alternative 1 would reduce the number of ACECs from 129 to 97 thus reducing the acreage of the ACECs by approximately 1.8 million acres; reduce the areas identified as CDNCL by approximately 2.2 million acres; and result in an additional 450,000 acres of General Public Lands (GPL). Alternative 1 would also modify or eliminate 68 Conservation Management Actions (CMAs), which would also change the manner in which disturbance caps are implemented, including elimination of disturbance caps in CDNCL, as well as allowing renewable energy development in Special Recreation Management Areas (SRMA).

Alternative 2 would reduce the number of ACECs to 100, and reduce the acreage of the ACECs by approximately 1.5 million acres; reduce the areas identified as CDNCL by approximately 2.1 million acres; and result in an additional approximate 274,000 acres of General Public Lands (GPL). Alternative 2 would also modify or eliminate the same 68 CMAs, which would also change the manner in which disturbance caps are implemented similar to Alternative 1 but Alternative 2 would retain the one percent disturbance cap for CDNCL. Alternative 2 CMAs would be modified to only allow renewable energy development in a SRMA where there is overlap with Development Focus Areas (DFAs). All other land use allocation decisions and CMAs from the 2016 ROD would be retained in both Alternative 1 and Alternative 2.

As a result of proposed CMA changes, the resource use limitations of the 129 ACECs within the planning area will also change. Therefore, pursuant to 43 CFR 1610.7–2(b), this notice announces a concurrent public comment period on proposed management changes (including alteration or elimination of disturbance caps), and boundary modifications or elimination of the existing ACECs as identified in Table 1.

TABLE 1—ACECS PROPOSED FOR BOUNDARY MODIFICATION OR ELIMINATION

| ACEC name | No action acres | Alternative 1 acres | Alternative 2 acres |
|---|---|---|---|
| Afton Canyon | 8,800 | 8,800 | 8,800 |
| Alligator Rock | 6,800 | 6,200 | 6,200 |
| Amargosa North | 114,000 | 72,760 | 72,760 |

A more detailed description of all proposed ACEC modifications, including maps, is included in the Draft LUPA/EIS and Appendix B of the Draft LUPA/EIS.

The BLM will utilize and coordinate the NEPA process to help fulfill the public involvement process under the National Historic Preservation Act (54 U.S.C. 306108), as provided in 36 CFR 800.2(d)(3). The BLM will continue to consult with Indian tribes on a government-to-government basis, in accordance with Executive Order 13175 and other policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will continue to be given due consideration. Federal, State, and local agencies, along with tribes and other stakeholders that may be interested in or affected by the proposed action that the BLM is evaluating, are invited to participate in the comment period.

Please note that public comments and information submitted, including names, street addresses, and email addresses of persons who submit comments, will be available for public review and disclosure at the BLM California State Office (see **ADDRESSES**) during regular business hours (8 a.m. to 4 p.m.), Monday through Friday, except holidays.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

(Authority: 40 CFR 1506.6, 40 CFR 1506.10)

**[212.LLWO230000. L11700000.PH0000.LXSGPL000000]**

## Notice of Availability of the Record of Decision for Greater Sage-Grouse Management, Wyoming

**AGENCY:** Bureau of Land Management, Interior.

**ACTION:** Notice of availability.

**SUMMARY:** The Bureau of Land Management (BLM) announces the availability of the Record of Decision (ROD) for the management of Greater Sage-Grouse habitat in Wyoming. The BLM has determined that its decade-long planning and NEPA processes have sufficiently addressed Greater Sage-Grouse habitat conservation and no new land use planning process to consider additional alternatives or new information is warranted. This determination is not a new planning decision. Instead, it is a determination not to amend the applicable land use plans. Thus, it is not subject to appeal or protest. The BLM's decision remains as identified in the 2019 Approved Resource Management Plan Amendment for Greater Sage-Grouse conservation in Wyoming.

**ADDRESSES:** Copies of the ROD are available for public inspection at the Wyoming Bureau of Land Management State Office at 5353 Yellowstone Road, Cheyenne, Wyoming 82009. Interested persons may also review the ROD on the internet at: *https://eplanning.blm.gov/eplanning-ui/project/103347/510.*

**FOR FURTHER INFORMATION CONTACT:** Jenny Marzluf, Wyoming Sage-Grouse Implementation Lead, at 307–775–6090; Wyoming Bureau of Land Management State Office, 5353 Yellowstone Road, Cheyenne, Wyoming 82009; *jmarzluf@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact Ms. Marzluf during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

**SUPPLEMENTARY INFORMATION:** The BLM issued this ROD to document the agency's determination regarding the analysis contained in the final supplemental Environmental Impact Statement (EIS) (85 FR 74380). With the issuance of this ROD, the BLM has now completed several planning and NEPA processes for Greater Sage-Grouse management in Wyoming over roughly the last decade, which include the processes that culminated in the 2015 ROD and the Approved Resource Management Plan Amendment (the 2015 planning process), the 2019 ROD and Approved Resource Management Plan Amendment (the 2019 planning process), and this 2020 ROD (the 2020 supplemental EIS process). Together, these processes represent a thorough analysis of Greater Sage-Grouse management, substantial public engagement, and important coordination with state wildlife agencies, other federal agencies, and many others in the range of the species have been collaborating to conserve Greater Sage-Grouse and its habitats.

The BLM prepared the final supplemental EIS in order to review its previous NEPA analysis, clarify and augment it where necessary, and provide the public with additional opportunities to review and comment. It also helped the BLM determine whether its 2015 and 2019 land use planning and NEPA processes sufficiently addressed Greater Sage-Grouse habitat conservation or whether the BLM should initiate a new land use planning process to consider additional alternatives or new information.

The final supplemental EIS addressed four specific issues: The range of alternatives, need to take a hard look at environmental impacts, cumulative effects analysis, and the BLM's approach to compensatory mitigation. Rationale to support BLM's determination, with respect to each of these topical areas, is summarized below and described further in the ROD:

(1) *Range of Alternatives:* Throughout the decade-long planning and NEPA processes, the BLM has analyzed in detail 143 alternatives across the range of Greater Sage-Grouse. Additionally, the BLM has continued to review new science as it is published, which affirms that the BLM has considered a full range of plan-level conservation measures in the alternatives already analyzed.

(2) *Hard Look:* The BLM has continued to take a hard look at environmental impacts every step of the way in planning for Greater Sage-Grouse habitat conservation. In the 2015 planning process, the 2019 planning process, and in the 2020 supplemental EIS process, the BLM incorporated detailed analysis of environmental impacts into our decision-making processes and disclosed these expected impacts to the public. As scientific information has continued to evolve, the BLM has closely reviewed and considered any changes from such science to expected environmental impacts, both at the land use plan scale and in site-specific analyses. To address public comments raised during the supplemental EIS process, the BLM convened a team of biologists and land use planners to evaluate scientific literature provided to the agency. The BLM found that the most up-to-date Greater Sage-Grouse science and other information has incrementally increased, and built upon, the knowledgebase of Greater Sage-Grouse management evaluated by the BLM most recently in its 2019 land use plan amendments, but does not change the scope or direction of the BLM's management; however, new science does suggest adaptations to management may be warranted at site-specific scales.

(3) *Cumulative Effects Analysis:* The BLM considered cumulative impacts on a rangewide basis, organizing that analysis at the geographic scale of each Western Association of Fish and Wildlife Agencies (WAFWA) management zone, in order to consider impacts at biologically meaningful scales. In the 2019 planning process, the BLM incorporated by reference cumulative effects analysis conducted in the 2015 planning process and other environmental impact statements. Since the nature and context of the cumulative effects scenario has not appreciably changed since 2015, and the 2015 analysis covered the entire range of the Greater Sage-Grouse, the BLM's consideration of cumulative effects in the 2015 planning process adequately addresses most, if not all, of the planning decisions made through the 2019 planning process.

While the 2019 planning process largely incorporated by reference the analysis from the 2015 planning process, and updated it where needed to account for current conditions, the 2020 supplemental EIS process elaborated on this information in greater detail and updated the analysis to ensure that the BLM appropriately evaluated cumulative effects at biologically meaningful scales.

(4) *BLM's Approach to Compensatory Mitigation:* In the 2019 planning process, the BLM requested public comments on a number of issues, including the BLM's approach to compensatory mitigation. As part of the 2015 Approved Resource Management Plan Amendments, the BLM selected a net conservation gain standard in its approach to compensatory mitigation, which the 2019 land use plan amendments modified to align with the BLM's 2018 policy on compensatory mitigation. Through the 2020 supplemental EIS process, the BLM requested further comments about the BLM's approach to compensatory mitigation. After reviewing the comments that the BLM received about compensatory mitigation, the BLM determined that its environmental analysis supporting the 2019 land use plan amendments was sound. The public has now had substantial opportunities to consider and comment on the BLM's approach to compensatory mitigation at the land use planning level, including the approach taken in the 2019 land use plan amendments.

Based on the final supplemental EIS, the BLM has determined that its decade-long planning and NEPA processes have sufficiently addressed Greater Sage-Grouse habitat conservation and no new land use planning process to consider additional alternatives or new information is warranted. This determination is not a new planning decision. Instead, it is a determination not to amend the applicable land use plans. Thus, it is not subject to appeal or protest. The BLM's decision remains as identified in the 2019 Approved Resource Management Plan Amendment for Greater Sage-Grouse conservation in Wyoming.

(Authority: 40 CFR 1505.2; 40 CFR 1506.6; References to the CEQ regulations are to the regulations in effect prior to September 14, 2020. The revised CEQ regulations effective September 14, 2020, are not cited because this supplemental EIS process began prior to that date.)

The BLM's decision remains as identified in the 2019 Approved Resource Management Plan Amendment for Greater Sage-Grouse conservation in Utah.

**ADDRESSES:** Copies of the ROD are available for public inspection at the Utah Bureau of Land Management State Office at 440 West 200 South, Suite 500, Salt Lake City, Utah 84101–1345. Interested persons may also review the ROD on the internet at: *https://eplanning.blm.gov/eplanning-ui/project/103346/510.*

**FOR FURTHER INFORMATION CONTACT:** Christine Fletcher, Utah Sage-Grouse Implementation Lead, at 435–865–3035; Utah Bureau of Land Management State Office, 440 West 200 South, Suite 500, Salt Lake City, Utah 84101–1345; *cfletcher@blm.gov.* Persons who use a telecommunications device for the deaf (TDD) may call the Federal Relay Service (FRS) at 1–800–877–8339 to contact Mrs. Fletcher during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question. You will receive a reply during normal business hours.

**SUPPLEMENTARY INFORMATION:** The BLM issued this ROD to document the agency's determination regarding the analysis contained in the final supplemental Environmental Impact Statement (EIS) (85 FR 74379). With the issuance of this ROD, the BLM has now completed several planning and NEPA processes for Greater Sage-Grouse management in Utah over roughly the last decade, which include the processes that culminated in the 2015 ROD and the Approved Resource Management Plan Amendment (the 2015 planning process), the 2019 ROD and Approved Resource Management Plan Amendment (the 2019 planning process), and this 2020 ROD (the 2020 supplemental EIS process). Together, these processes represent a thorough analysis of Greater Sage-Grouse management, substantial public engagement, and important coordination with state wildlife agencies, other federal agencies, and many others in the range of the species that have been collaborating to conserve Greater Sage-Grouse and its habitats.

The BLM prepared the final supplemental EIS in order to review its previous NEPA analysis, clarify and augment it where necessary, and provide the public with additional opportunities to review and comment. It also helped the BLM determine whether its 2015 and 2019 land use planning and NEPA processes sufficiently addressed Greater Sage-Grouse habitat conservation or whether the BLM should initiate a new land use planning process to consider additional alternatives or new information.

The final supplemental EIS addressed four specific issues: The range of alternatives, need to take a hard look at environmental impacts, cumulative effects analysis, and the BLM's approach to compensatory mitigation. Rationale to support BLM's determination, with respect to each of these topical areas, is summarized below and described further in the ROD:

(1) Range of Alternatives: Throughout the decade-long planning and NEPA processes, the BLM has analyzed in detail 143 alternatives across the range of Greater Sage-Grouse. Additionally, the BLM has continued to review new science as it is published, which affirms that the BLM has considered a full range of plan-level conservation measures in the alternatives already analyzed.

(2) Hard Look: The BLM has continued to take a hard look at environmental impacts every step of the way in planning for Greater Sage-Grouse habitat conservation. In the 2015 planning process, the 2019 planning process, and in the 2020 supplemental

EIS process, the BLM incorporated detailed analysis of environmental impacts into our decision-making processes and disclosed these expected impacts to the public. As scientific information has continued to evolve, the BLM has closely reviewed and considered any changes from such science to expected environmental impacts, both at the land use plan scale and in site-specific analyses. To address public comments raised during the supplemental EIS process, the BLM convened a team of biologists and land use planners to evaluate scientific literature provided to the agency. The BLM found that the most up-to-date Greater Sage-Grouse science and other information has incrementally increased, and built upon, the knowledgebase of Greater Sage-Grouse management evaluated by the BLM most recently in its 2019 land use plan amendments, but does not change the scope or direction of the BLM's management; however, new science does suggest adaptations to management may be warranted at site-specific scales.

(3) Cumulative Effects Analysis: The BLM considered cumulative impacts on a rangewide basis, organizing that analysis at the geographic scale of each Western Association of Fish and Wildlife Agencies (WAFWA) management zone, in order to consider impacts at biologically meaningful scales. In the 2019 planning process, the BLM incorporated by reference cumulative effects analysis conducted in the 2015 planning process and other environmental impact statements. Since the nature and context of the cumulative effects scenario has not appreciably changed since 2015, and the 2015 analysis covered the entire range of the Greater Sage-Grouse, the BLM's consideration of cumulative effects in the 2015 planning process adequately addresses most, if not all, of the planning decisions made through the 2019 planning process.

While the 2019 planning process largely incorporated by reference the analysis from the 2015 planning process, and updated it where needed to account for current conditions, the 2020 supplemental EIS process elaborated on this information in greater detail and updated the analysis to ensure that the BLM appropriately evaluated cumulative effects at biologically meaningful scales.

(4) BLM's Approach to Compensatory Mitigation: In the 2019 planning process, the BLM requested public comments on a number of issues, including the BLM's approach to compensatory mitigation. As part of the 2015 Approved Resource Management Plan Amendments, the BLM selected a net conservation gain standard in its approach to compensatory mitigation, which the 2019 land use plan amendments modified to align with the BLM's 2018 policy on compensatory mitigation. Through the 2020 supplemental EIS process, the BLM requested further comments about the BLM's approach to compensatory mitigation. After reviewing the comments that the BLM received about compensatory mitigation, the BLM determined that its environmental analysis supporting the 2019 land use plan amendments was sound. The public has now had substantial opportunities to consider and comment on the BLM's approach to compensatory mitigation at the land use planning level, including the approach taken in the 2019 land use plan amendments.

Based on the final supplemental EIS, the BLM has determined that its decade-long planning and NEPA processes have sufficiently addressed Greater Sage-Grouse habitat conservation and no new land use planning process to consider additional alternatives or new information is warranted. This determination is not a new planning decision. Instead, it is a determination not to amend the applicable land use plans. Thus, it is not subject to appeal or protest. The BLM's decision remains as identified in the 2019 Approved Resource Management Plan Amendment for Greater Sage-Grouse conservation in Utah.

(Authority: 40 CFR 1505.2; 40 CFR 1506.6; References to the CEQ regulations are to the regulations in effect prior to September 14, 2020. The revised CEQ regulations effective September 14, 2020, are not cited because this supplemental EIS process began prior to that date.)

**Gregory Sheehan,**

*BLM Utah State Director.*

**[NPS–WASO–D–COS–POL–30716; PPWODIREP0; PPMPSAS1Y.YP0000]**

## National Park System Advisory Board; Charter Renewal

**AGENCY:** National Park Service, Interior.

**ACTION:** Charter renewal.

**SUMMARY:** The Secretary of the Interior intends to renew the National Park System Advisory Board, in accordance with section 14(b) of the Federal Advisory Committee Act. This action is necessary and in the public interest in connection with the performance of statutory duties imposed upon the Department of the Interior and the National Park Service.

**FOR FURTHER INFORMATION CONTACT:** Joshua Winchell, Staff Director and Designated Federal Officer for the National Park System Advisory Board, Office of Policy, National Park Service, 202–513–7053.

**SUPPLEMENTARY INFORMATION:** The Board is authorized by 54 U.S.C. 102303 (part of the 1935 Historic Sites, Buildings and Antiquities Act) and has been in existence almost continuously since 1935. Pursuant to 54 U.S.C. 102303, the legislative authorization for the Board expired January 1, 2010. However, due to the importance of the issues on which the Board advises, the Secretary of the Interior exercised the authority contained in 54 U.S.C. 100906 to re-establish and continue the Board as a discretionary committee from January 1, 2010, until such time as it may be legislatively reauthorized.

The advice and recommendations provided by the Board fulfill an important need within the Department of the Interior and the National Park Service, and it is necessary to re-establish the Board to ensure its work is not disrupted. The Board's members are balanced to represent a cross-section of disciplines and expertise relevant to the National Park Service mission. The renewal of the Board comports with the requirements of the Federal Advisory Committee Act, as amended.

*Certification:* I hereby certify that the renewal of the National Park System Advisory Board is necessary and in the public interest in connection with the performance of duties imposed on the Department of the Interior by the National Park Service Organic Act (54 U.S.C. 100101(a) *et seq.*), and other statutes relating to the administration of the National Park Service.

**Authority:** 5 U.S.C. Appendix 2

Dated: November 18, 2020.

**David L. Bernhardt,**

*Secretary of the Interior.*

## National Park Service Alaska Region Subsistence Resource Commission Program; Notice of Public Meetings

**AGENCY:** National Park Service, Interior.

**ACTION:** Meeting notice.

**SUMMARY:** The National Park Service (NPS) is hereby giving notice that the Aniakchak National Monument Subsistence Resource Commission (SRC), the Denali National Park SRC, the Cape Krusenstern National Monument SRC, the Lake Clark National Park SRC, the Kobuk Valley National Park SRC, the Wrangell-St. Elias National Park SRC, and the Gates of the Arctic National Park SRC will meet as indicated below.

**DATES:** The Aniakchak National Monument SRC will meet via teleconference from 1:30 p.m. to 5:00 p.m. or until business is completed on Tuesday, February 2, 2021. The alternate meeting date is Wednesday, February 3, 2021, from 1:30 p.m. to 5:00 p.m. or until business is completed. Teleconference participants must call the NPS office at (907) 246–2154 prior to the meeting to receive teleconference passcode information. For more detailed information regarding these meetings, or if you are interested in applying for SRC membership, contact Designated Federal Officer Mark Sturm, Superintendent, at (907) 246–2120, or via email at *mark_sturm@nps.gov,* or Linda Chisholm, Subsistence Coordinator, at (907) 246–2154 or via email at *linda_chisholm@nps.gov,* or Joshua Ream, Federal Advisory Committee Group Federal Officer, at (907) 644–3596 or via email at *joshua_ream@nps.gov.*

The Denali National Park SRC will meet via teleconference from 10:00 a.m. to 5:00 p.m. or until business is completed on Tuesday, February 23, 2021. The alternate meeting date is Tuesday, March 2, 2021, from 10:00 a.m. to 5:00 p.m. or until business is completed. Teleconference participants must call the NPS office at (907) 644–3604 prior to the meeting to receive teleconference passcode information. For more detailed information regarding these meetings, or if you are interested in applying for SRC membership, contact Designated Federal Officer Brooke Merrell, Superintendent, at (907) 683–9627, or via email at *brooke_merrell@nps.gov* or Amy Craver, Subsistence Coordinator, at (907) 644–3604 or via email at *amy_craver@nps.gov* or Joshua Ream, Federal Advisory Committee Group Federal Officer, at (907) 644–3596 or via email at *joshua_ream@nps.gov.*

The Cape Krusenstern National Monument SRC will meet via teleconference or possibly in person from 1:00 p.m. to 5:00 p.m. on Monday, March 1, 2021, and from 9:00 a.m. to 12:00 p.m. on Tuesday March 2, 2021. The alternate meeting dates are Tuesday, March 9, 2021, from 1:00 p.m. to 5:00 p.m., and Wednesday, March 10, 2021, from 9:00 a.m. to 12:00 p.m. at the same location. Teleconference participants must call the NPS office at (907) 442–8342 prior to the meeting to receive teleconference passcode information. For more detailed information regarding this meeting or if you are interested in applying for SRC membership, contact Designated Federal Officer Maija Lukin, Superintendent, at (907) 442–8301, or via email at *maija_lukin@nps.gov* or Hannah Atkinson, Cultural Resource Specialist, at (907) 442–8342 or via email at *hannah_atkinson@nps.gov* or Joshua Ream, Federal Advisory Committee Group Federal Officer, at (907) 644–3596 or via email at *joshua_ream@nps.gov.*

The Lake Clark National Park SRC will meet via teleconference or possibly in person from 1:00 p.m. to 4:00 p.m. or until business is completed on Wednesday, March 24, 2021. The alternate meeting date is Wednesday, April 7, 2021. Teleconference participants must call the NPS office at (907) 644–3648 prior to the meeting to receive teleconference passcode information. For more detailed information regarding this meeting or if you are interested in applying for SRC membership, contact Designated Federal Officer Susanne Green, Superintendent, at (907) 644–3627, or via email at *susanne_green@nps.gov* or Liza Rupp, Subsistence Manager, at (907) 644–3648 or via email at *elizabeth_rupp@nps.gov* or Joshua Ream, Federal Advisory Committee Group Federal Officer, at (907) 644–3596 or via email at *joshua_ream@nps.gov.*

The Kobuk Valley National Park SRC will meet via teleconference or possibly in person from 1:00 p.m. to 5:00 p.m. on Wednesday, March 3, 2021, and from 9:00 a.m. to 12:00 p.m. on Thursday, March 4, 2021. The alternate meeting dates are Thursday, March 11, 2021, from 1:00 p.m. to 5:00 p.m., and Friday, March 12, 2021, from 9:00 a.m. to 12:00 p.m. at the same location. Teleconference participants must call the NPS office at (907) 442–8342 prior to the meeting to receive teleconference passcode information. For more detailed information regarding this meeting or if you are interested in applying for SRC membership, contact Designated Federal Officer Maija Lukin, Superintendent, at (907) 442–8301, or via email at *maija_lukin@nps.gov* or Hannah Atkinson, Cultural Resource Specialist, at (907) 442–8342 or via email at *hannah_atkinson@nps.gov* or Joshua Ream, Federal Advisory Committee Group Federal Officer, at (907) 644–3596 or via email at *joshua_ream@nps.gov.*

The Wrangell-St. Elias National Park SRC will meet via teleconference and possibly in person from 9:00 a.m. to 5:00 p.m. on Thursday, February 11, 2021, and from 9:00 a.m. to 5:00 p.m. or until business is completed on Friday, February 12, 2021. If business is completed on February 11, 2021, the meeting will adjourn, and no meeting will take place on February 12, 2021. The alternate meeting dates are Monday, March 1, 2021, from 9:00 a.m. to 5:00 p.m., and Tuesday, March 2, 2021, from 9:00 a.m. to 5:00 p.m. or until business is completed at the same location. Teleconference access to the meeting may be requested by calling the NPS office at (907) 822–7236 at least two business days prior to the meeting to receive teleconference passcode information. For more detailed information regarding these meetings, or if you are interested in applying for SRC membership, contact Designated Federal Officer Ben Bobowski, Superintendent, (907) 822–5234, or via email at *ben_bobowski@nps.gov* or Barbara Cellarius, Subsistence Coordinator, at (907) 822–7236 or via email at *barbara_cellarius@nps.gov* or Joshua Ream, Federal Advisory Committee Group Federal Officer, at (907) 644–3596 or via email at *joshua_ream@nps.gov.*

The Gates of the Arctic National Park SRC will meet via teleconference from 8:30 a.m. to 5:00 p.m. or until business is completed on both Wednesday, April 7, 2021, and Thursday, April 8, 2021. The alternate meeting dates are Wednesday, April 14, 2021, from 8:30 a.m. to 5:00 p.m., and Thursday, April 15, 2021, from 8:30 a.m. to 5:00 p.m. or until business is completed. Teleconference participants must call the NPS office at (907) 455–0639 prior to the meeting to receive teleconference passcode information. For more detailed information regarding this meeting or if you are interested in applying for SRC membership, contact Designated Federal Officer Greg Dudgeon, Superintendent, at (907) 457–5752, or via email at *greg_dudgeon@nps.gov* or Marcy Okada, Subsistence Coordinator, at (907) 455–0639 or via email at *marcy_okada@nps.gov* or Joshua Ream, Federal Advisory Committee Group Federal

Officer, at (907) 644–3596 or via email at *joshua_ream@nps.gov.*

**ADDRESSES:** The Aniakchak National Monument SRC will meet via teleconference. The Denali National Park SRC will meet via teleconference. The Cape Krusenstern National Monument SRC will meet in-person in the conference room at the Northwest Arctic Heritage Center, 171 3rd Avenue, Kotzebue, AK 99752. If an in-person meeting is not feasible or advisable, the meeting will be held solely by teleconference. The Lake Clark National Park SRC will meet in-person at the Newhalen School, 900 Schoolhouse Road, Iliamna, AK 99606. If an in-person meeting is not feasible or advisable, the meeting will be held solely by teleconference. The Kobuk Valley National Park SRC will meet in-person in the conference room at the Northwest Arctic Heritage Center, 171 3rd Avenue, Kotzebue, AK 99752. If an in-person meeting is not feasible or advisable, the meeting will be held solely by teleconference. The Wrangell-St. Elias National Park SRC will meet in-person at the NPS office in the Copper Center Visitor Center Complex, Wrangell-St. Elias National Park and Preserve, Mile 106.8 Richardson Highway, Copper Center, AK 99573 and via teleconference. If an in-person meeting is not feasible or advisable, the meeting will be held solely by teleconference. The Gates of the Arctic National Park SRC will meet via teleconference.

**SUPPLEMENTARY INFORMATION:** The NPS is holding meetings pursuant to the Federal Advisory Committee Act (5 U.S.C. Appendix 1–16). The NPS SRC program is authorized under title VIII, section 808 of the Alaska National Interest Lands Conservation Act (16 U.S.C. 3118).

SRC meetings are open to the public and will have time allocated for public testimony. The public is welcome to present written or oral comments to the SRC. SRC meetings will be recorded and meeting minutes will be available upon request from the Superintendent for public inspection approximately six weeks after the meeting.

*Purpose of the Meeting:* The agenda may change to accommodate SRC business. The proposed meeting agenda for each meeting includes the following:

1. Call to Order—Confirm Quorum
2. Welcome and Introduction
3. Review and Adoption of Agenda
4. Approval of Minutes
5. Superintendent's Welcome and Review of the SRC Purpose
6. SRC Membership Status
7. SRC Chair and Members' Reports
8. Superintendent's Report
9. Old Business
10. New Business
11. Federal Subsistence Board Update
12. Alaska Boards of Fish and Game Update
13. National Park Service Staff Reports
    a. Superintendent/Ranger Reports
    b. Resource Manager's Report
    c. Subsistence Manager's Report
14. Work Session
15. Public and Other Agency Comments
16. Set Tentative Date and Location for Next SRC Meeting
17. Adjourn Meeting.

SRC meeting location and date may change based on inclement weather or exceptional circumstances, including public health advisories or mandates. If the meeting date and location are changed, the Superintendent will issue a press release and use local newspapers and/or radio stations to announce the rescheduled meeting.

*Public Disclosure of Comments:* Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

**Authority:** 5 U.S.C. Appendix 2.

**Alma Ripps,**

*Chief, Office of Policy.*

## DEPARTMENT OF THE INTERIOR

### National Park Service

**[NPS–CHCH–DTS 29367; PPSECHCH00; PPMPSAS1Z.Y00000]**

### Written Determination: Bicycle Use at Chickamauga and Chattanooga National Military Park

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice of Written Determination.

**SUMMARY:** The National Park Service determines that allowing bicycles on certain administrative roads and two miles of existing hiking trails within Chickamauga and Chattanooga National Military Park is consistent with the protection of the park's natural, scenic, and aesthetic values; safety considerations; and management objectives; and will not disturb wildlife or park resources.

**DATES:** Comments on this written determination must be received by 11:59 EDT on February 16, 2021.

**ADDRESSES:** You may submit comments by either of the following methods:

(1) *Electronically:* Visit *https://parkplanning.nps.gov/chch* and click on the link entitled ''Open for Comment''.

(2) *By hard copy:* Mail to Park Superintendent, Chickamauga and Chattanooga National Military Park, 3370 Lafayette Road, Fort Oglethorpe, GA 30742.

*Document Availability:* The Proposed Bicycle Use Jackson Gap and John Smartt Trails Environmental Assessment and Finding of No Significant Impact provide information and context for this written determination and are available online at *https://parkplanning.nps.gov/chch.*

**FOR FURTHER INFORMATION CONTACT:** Brad Bennett, Superintendent, Chickamauga and Chattanooga National Military Park, (706) 866–9241 x115, *brad_bennett@nps.gov.*

**SUPPLEMENTARY INFORMATION:**

### Background

In 1890, Congress established Chickamauga and Chattanooga National Military Park (the park) to preserve the sites of some of the most remarkable maneuvers and brilliant fighting of the Civil War for historical and professional military study. In addition to the primary purpose for which it was established, the NPS manages the park to allow for recreational activity, which began to increase significantly in the late 1960s and early 1970s. In the 1980s, concerned about potential impacts from the use of mountain bicycles that were becoming very popular at the time, the NPS limited bicycles to (1) park roads open for motor vehicle use by the general public; and (2) a subset of administrative roads closed to motor vehicle use by the public, but open to motor vehicle use by the NPS for administrative purposes. This management framework continues today. Bicycles are allowed on park roads and on the following administrative roads:

- Dalton Ford Road
- Thedford Ford Road
- Vittetoe Road
- Mullis-Vittetoe Road
- the roads located within the South Post area
- the roads known as the Upper Truck Trail and the Lower Truck Trail.

In 2015, the NPS completed the Lookout Mountain Battlefield General Management Plan Amendment (GMPA). The GMPA establishes long-term goals for preserving the park's natural and cultural resources and improving interpretive, educational, and recreational opportunities for visitors. During the scoping period for the GMPA, the NPS received a request to open approximately two miles of the Jackson Gap Trail and the upper portion of the John Smartt Trail to bicycle use. Public comments received during the GMPA supported bicycle use on these two trails. In order to evaluate the potential impacts from the use of bicycles on these trails, the NPS issued the Proposed Bicycle Use Jackson Gap and John Smartt Trails Environmental Assessment (EA) in May 2019. The EA considered two alternatives: (1) A no action alternative that would continue to allow only hiking on these trails; and (2) the NPS preferred alternative that would also allow bicycling on the portions of these trails identified in the EA. The EA was open for public review and comment for 30 days. On September 13, 2019, the Regional Director for DOI Unified Region 2 South Atlantic–Gulf signed a Finding of No Significant Impact that identified the preferred alternative in the EA as the selected alternative.

Prior to designating the trails for bicycle use, NPS regulations at 36 CFR 4.30(d)(3) require the Superintendent to determine that the addition of bicycles is consistent with the protection of the park's natural, scenic and aesthetic values, safety considerations, and management objectives, and will not disturb wildlife or park resources. The regulations require that this written determination be published in the **Federal Register** for a 30-day public comment period. After the 30-day public review period concludes, the Regional Director will evaluate whether to approve the written determination. If the Regional Director approves the written determination, the Superintendent may designate the trails for bicycle use and will provide notice of such designation to the public under 36 CFR 1.7.

During the preparation of this written determination for the Jackson Gap and John Smartt Trails, the NPS recognized an opportunity to evaluate bicycle use on the administrative roads where bicycles are already allowed. NPS regulations require the Superintendent to determine that bicycle use on administrative roads is consistent with the protection of the park's natural, scenic, and aesthetic values; safety considerations; and management objectives; and will not disturb wildlife or park resources. 36 CFR 4.30(b). This is the same written determination that must be made before allowing bicycles on the Jackson Gap Trail and John Smartt Trails. For this reason, this written determination applies to two separate management actions: (1) Continuing to allow bicycles on the administrative roads identified above; and (2) allowing bicycles for the first time on the approximately two miles of the Jackson Gap Trail and the upper portion of the John Smartt Trail that are identified in the EA.

**Written Determination**

*Park Significance, Purpose, and Values*

As stated above, Congress established the park in 1890 for its historic significance. Consisting of more than 9,000 acres, the park is the largest federally protected Civil War battlefield in the United States. The park encompasses multiple administrative units along the Tennessee-Georgia border and contains nearly 1,500 commemorative features such as monuments, markers, and tablets. The park is located in Catoosa, Dade, and Walker Counties in Georgia, and Hamilton County in Tennessee.

A formal statement of the purpose and significance of the park is set forth in the park's 2016 Foundation Document. The purpose of the park is to preserve, protect, and interpret the nationally significant resources associated with the Civil War Campaign for Chattanooga and the 12,000 years of American Indian presence on Moccasin Bend. The fundamental historic and cultural resources and values that contribute to this purpose include battlefields and related sites, commemorative features, archeological resources, strategic and important views, and the contemplative experience.

In addition to these resources and values, the park includes one of the few large open spaces within and near the Chattanooga metropolitan area. The paved tour roads and hiking trails in the park provide outstanding opportunities for recreation and alternative ways to experience park landscapes. Use of the park for fitness activities like walking, running, and bicycling creates a unique opportunity to engage community members and foster the relevancy of the park with local stakeholders. The flora and fauna protected within the park provide the public with opportunities to view wildlife and enjoy natural beauty and scenic views. Recreation at the park provides an opportunity for current and future generations of visitors to experience and appreciate the park in different ways, while at the same time respecting and commemorating the solemnity of the battlefields.

*Management Objectives*

Continuing to allow bicycles on the subset of administrative roads where they are already allowed and adding bicycles to the two miles of existing hiking trails is consistent with the GMPA and the Foundation Document, which emphasize improvements to the visitor experience through the expansion of appropriate recreational activities, including bicycling, while protecting and preserving the park's natural and cultural resources.

Bicycling on the administrative roads has occurred for more than 100 years and is an established form of visiting and experiencing the park. Continuing to allow bicycles on the administrative roads would maintain an important recreational opportunity for park visitors. Many visitors access and travel through the park on bicycles. Bicycles provide visitors with a different experience than other forms of recreation and transportation, such as driving, horseback riding, or hiking. The administrative roads provide approximately 15.82 miles of bicycling access in the park. Bicycling on administrative roads provides more solitude than bicycling on park roads by removing bicyclists from public motor vehicle traffic. This allows for a more contemplative experience for those who seek to interact with and learn about the history of the park in that type of environment.

Adding bicycles to the hiking trails on Lookout Mountain is consistent with the GMPA and the Foundation Document, which emphasize improvements to the visitor experience through the expansion of appropriate recreational activities, including bicycling. These management actions are also consistent with Secretary of the Interior Order 3366, ''Increasing Recreational Opportunities on Lands and Waters Managed by the U.S. Department of the Interior,'' which directs the NPS to expand access to outdoor recreational opportunities on NPS-managed lands and waters.

Currently, bicycle traffic in Lookout Mountain Battlefield is limited to the Upper Truck Trail and Lower Truck Trail, administrative roads that connect the park to the regional bicycle trail system on the Tennessee side. Bicyclists can access the Upper Truck Trail from the Guild Trail, which is part of the regional bicycle trail system owned by the Lookout Mountain Conservancy. In the opposite direction, the Upper Truck Trail connects to the Jackson Gap and John Smartt trails in the park. These trails connect to the regional bicycle trail system in Georgia. Under current rules, when bicyclists reach the end of the Upper Truck Trail, in order to continue riding they must turn around and exit the park on the Tennessee side from where they entered. Otherwise, bicyclists must carry their bikes up hiking trails to exit the park on the Georgia side. Under these circumstances, hikers are the only user group that has continuous access through the park from the regional trail systems in Georgia and Tennessee. If bicycles were allowed on the two miles of the Jackson Gap Trail and the upper portion of the John Smartt Trail identified in the EA, then bicyclists could ride the entire 21 miles, through the park, in either direction between Cloudland Canyon State Park in Georgia and Chattanooga in Tennessee.

*Wildlife*

The NPS strives to maintain all components and processes of naturally evolving ecosystems, including the natural abundance, diversity, and ecological integrity of wildlife. Allowing bicycles on the Jackson Gap and upper John Smartt Trails would increase the overall human traffic on those trails by a small amount. The NPS expects most of the bicycle traffic to be slow due to steep grades. Bicycling on the Jackson Gap and John Smartt trails would occur in areas that already receive frequent human visitation. Typically, wildlife avoid these areas during the daylight to avoid humans. Nonetheless, bicycle use in these locations could create the potential for collisions with wildlife, especially along curves of the trails where forward visibility is diminished. It is unlikely that large species, such as deer, would be impacted. Smaller species, however, such as snakes or lizards, could be injured or killed by bicycle tires. These risks would likely have minimal adverse effects due to the expected low incidence rate of collisions on the Jackson Gap and upper John Smartt Trails. Effects upon wildlife from adding bicycles to the hiking trails were dismissed from further analysis in the EA because the NPS concluded they would be negligible and not likely result in unacceptable impacts.

The Endangered Species Act (ESA) requires examination of impacts to federally listed threatened, endangered, and candidate species. Section 7 of the ESA requires Federal agencies to consult with the U.S. Fish and Wildlife Service to ensure that any action authorized, funded, or carried out by the agency does not jeopardize the continued existence of listed species or critical habitats. NPS Management Policies 2006 require the NPS to examine the impacts to Federal candidate species, as well as state listed threatened, endangered, candidate, rare, declining, and sensitive species. Park records and field surveys did not identify the potential for individual species, or habitat for any of the known special status species, within the vicinity of the hiking trails where bicycles would be allowed nor in proximity to the administrative roads where bicycles are presently allowed. The U.S. Fish and Wildlife Service was consulted and determined the proposed action is not expected to significantly impact fish and wildlife resources under the jurisdiction of the U.S Fish and Wildlife Service. For these reasons, impacts to special status species from adding bicycles to the hiking trails were dismissed from detailed analysis in the EA.

Bicycle use on the administrative roads is considerably less than the volume of bicycles using the park roads. Over the past 34 years, relatively few wildlife-bicycle encounters have been observed on administrative roads and even fewer accidents have been reported by the public as a result of those encounters.

*Cultural Resources*

The NPS preserves and maintains 755 documented historic structures within the park. Most of these are monuments and markers that commemorate the troops that fought across the park landscapes during the two Civil War battles. The NPS expects that allowing bicycles on the hiking trails would result in a relatively small increase (approximately 200 bicyclists per year) to the total number of recreational visitors on the trails. The NPS does not expect this level of increased use would have a measurable impact to cultural resources within this area.

None of the park's documented commemorative features are located along the Jackson Gap Trail or the upper John Smartt Trail. These trails were likely constructed by the Civilian Conservation Corps under the Emergency Conservation Works Administration from either Camp Adolph Ochs or Camp Demaray, both located on Lookout Mountain. They have several dry laid retaining walls and wet weather drainage crossings that are constructed of native stone. These early 20th century stone walls and drainage features, the only extant cultural resources on the trails, have required minor and infrequent maintenance by the NPS. NPS staff within the Resource Management Division would increase the frequency of monitoring the retaining walls and drainages to ensure these resources are protected.

Staff from the NPS Southeast Archeological Center (SEAC) conducted shovel test surveys and a metal detector survey within the area potentially affected by bicycles on the hiking trails. Archeologists tested six sections of the trails, including areas proposed for widening a switchback and locations identified for sign and fence installation. The SEAC determined there was no potential for significant archeological resources to be harmed.

The NPS would implement management strategies to minimize impacts to resources on the trails, including: (1) Issuing citations for off-trail use; (2) increasing monitoring, education, and enforcement of regulations; (3) re-evaluating trail design; and (4) requesting assistance from trail advocates to establish a defined trail edge by barricading short cuts.

Over the last 34 years, the NPS has not recorded any adverse effects to historic structures or archeological resources caused by bicycle use on the administrative roads. For this reason, the NPS does not expect that the continued use of bicycles on the administrative roads would adversely affect the park's cultural resources.

*Natural, Scenic and Aesthetic Values*

The 30-mile network of trails within Lookout Mountain Battlefield and more than 80 miles of trail throughout the park provide ample opportunities for hikers to view wildlife and enjoy natural beauty and scenic views. The proposed actions would extend similar opportunities to bicyclists on approximately two miles of the Jackson Gap Trail and the upper portion of the John Smartt Trail and maintain similar opportunities for bicyclists on the administrative roads. Allowing bicycles on the hiking trails would allow more regional trail users to experience the scenic vistas and natural features in the park.

New signs on the hiking trails would be small scale, low stature, natural metal, and post-mounted with incised letters. Scale and placement would minimally affect the natural landscape. Installation would occur in disturbed locations within the trail beds. Kiosks at trailheads and other locations would be based on standard NPS designs that are appropriate for the selected locations. Aside from signage, bicycle use on the trails would not require the addition of any human-made features and would have no other visual impacts on natural landscape. Trail width and trail tread would remain the same as they currently are on both trails: Single-track trail with a width ranging from 2–4 feet with natural trail tread. Allowing bicycle use on these trails would not negatively impact opportunities for other visitors to experience scenic and aesthetic values on these trails.

Existing signs along the administrative roads provide route information and safety messages about bicycling. The continued use of bicycles on the administrative roads would not require the addition of new human-made features that would impact the natural landscape at the Chickamauga Battlefield.

*Safety Considerations*

The NPS will install new signs on the trails that convey safety messages about bicycling. Due to steep grades, the hiking trails would receive a ''Black Diamond'' designation according to the criteria that has been developed by the International Mountain Biking Association (IMBA). Signs and educational materials would be posted at the Jackson Gap trailhead, at the intersection of the John Smartt Trail and Upper Truck Trail, near switchbacks, and in other strategic locations to convey important safety and regulatory information. Signs and educational materials would provide guidance on trail etiquette to mitigate the potential for user conflict and to help establish user norms. Signs would provide route names, trail direction and appropriate practices for yielding to others.

The Jackson Gap and John Smartt Trails are well-constructed hiking trails within a natural zone of the park. They have existed for many decades in good condition without a high frequency of maintenance. Trail crews would continue to assess the Jackson Gap and John Smartt Trail during annual condition assessments, on regular patrols, and as reports are received concerning fallen trees or other hazards. Crews would continue to clean all drainages and culverts, remove loose rocks and debris, and prune vegetation as necessary. Trail rovers would conduct monthly monitoring to assist in identifying any additional maintenance needs. Volunteers will patrol these trails to provide safety information.

Since the implementation of the current incident reporting system, there have been no reports of bicycle accidents on park administrative roads. As stated above, the administrative roads have signs conveying wayfinding information and safety messages.

*Electric Bicycles*

The NPS will evaluate the environmental impacts of allowing electric bicycles (e-bikes) on the administrative roads and hiking trails under the National Environmental Policy Act (NEPA) after the conclusion of the written determination process. E-bikes will only be considered in locations where traditional bicycles are already allowed. E-bikes will not be allowed anywhere in the park until compliance with the NEPA is completed and the Superintendent designates those locations for e-bike use in accordance with 36 CFR 1.7.

*Determination*

Based upon the foregoing, the NPS determines that (1) continuing to allow bicycle use on the administrative roads identified above; and (2) allowing bicycle use on the two miles of the Jackson Gap Trail and the upper section of the John Smartt Trail (identified in the EA) are consistent with the protection of the park's natural, scenic and aesthetic values; safety considerations; and management objectives; and will not disturb wildlife or park resources.

**Jon Bennett,**

*Superintendent.*

BILLING CODE 4312–52–P

## INTERNATIONAL TRADE COMMISSION

**[Investigation Nos. 701–TA–657 and 731–TA–1537 (Final)]**

### Chassis From China; Scheduling of the Final Phase of Countervailing Duty and Antidumping Duty Investigations

**AGENCY:** United States International Trade Commission.

**ACTION:** Notice.

**SUMMARY:** The Commission hereby gives notice of the scheduling of the final phase of antidumping and countervailing duty investigation Nos. 701–TA–657 and 731–TA–1537 (Final) pursuant to the Tariff Act of 1930 (''the Act'') to determine whether an industry in the United States is materially injured or threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of chassis from China, provided for in subheadings 8716.39.00 and 8716.90.50 of the Harmonized Tariff Schedule of the United States, preliminarily determined by the Department of Commerce (''Commerce'') to be subsidized. The determination with respect to imports of chassis alleged to be sold at less-than-fair-value is pending.

**DATE:** December 28, 2020.

**FOR FURTHER INFORMATION CONTACT:** Ahdia Bavari ((202) 205–3191), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for these investigations may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

**SUPPLEMENTARY INFORMATION:**

*Scope.*—For purposes of these investigations, Commerce has defined the subject merchandise as ''chassis and subassemblies thereof, whether finished or unfinished, whether assembled or unassembled, whether coated or uncoated, regardless of the number of axles, for carriage of containers, or other payloads (including self-supporting payloads) for road, marine roll-on/roll-off (RORO) and/or rail transport. Chassis are typically, but are not limited to, rectangular framed trailers with a suspension and axle system, wheels and tires, brakes, a lighting and electrical system, a coupling for towing behind a truck tractor, and a locking system or systems to secure the shipping container or containers to the chassis using twistlocks, slide pins or similar attachment devices to engage the corner fittings on the container or other payload.

Subject merchandise includes, but is not limited to, the following subassemblies:

- Chassis frames, or sections of chassis frames, including kingpins or kingpin assemblies, bolsters consisting of transverse beams with locking or support mechanisms, goosenecks, drop assemblies, extension mechanisms and/or rear impact guards;
- Running gear assemblies or axle assemblies for connection to the chassis frame, whether fixed in nature or capable of sliding fore and aft or lifting up and lowering down, which may or may not include suspension(s) (mechanical or pneumatic), wheel end components, slack adjusters, axles, brake chambers, locking pins, and tires and wheels;
- Landing gear (legs) or landing gear assemblies, for connection to the chassis frame, capable of supporting the chassis when it is not engaged to a tractor; and

• Assemblies and/or components that connect to the chassis frame or a section of the chassis frame, such as, but not limited to, pintle hooks or B-trains (which include a fifth wheel), which are capable of connecting a chassis to a converter dolly or another chassis.

Importation of any of these subassemblies, whether assembled or unassembled, constitutes an unfinished chassis for purposes of this investigation.

Subject merchandise also includes chassis, whether finished or unfinished, entered with or for further assembly with components such as, but not limited to: Hub and drum assemblies, brake assemblies (either drum or disc), axles, brake chambers, suspensions and suspension components, wheel end components, landing gear legs, spoke or disc wheels, tires, brake control systems, electrical harnesses and lighting systems.

Processing of finished and unfinished chassis and components such as trimming, cutting, grinding, notching, punching, drilling, painting, coating, staining, finishing, assembly, or any other processing either in the country of manufacture of the in-scope product or in a third country does not remove the product from the scope. Inclusion of other components not identified as comprising the finished or unfinished chassis does not remove the product from the scope.

This scope excludes dry van trailers, refrigerated van trailers and flatbed trailers. Dry van trailers are trailers with a wholly enclosed cargo space comprised of fixed sides, nose, floor and roof, with articulated panels (doors) across the rear and occasionally at selected places on the sides, with the cargo space being permanently incorporated in the trailer itself. Refrigerated van trailers are trailers with a wholly enclosed cargo space comprised of fixed sides, nose, floor and roof, with articulated panels (doors) across the rear and occasionally at selected places on the sides, with the cargo space being permanently incorporated in the trailer and being insulated, possessing specific thermal properties intended for use with self-contained refrigeration systems. Flatbed (or platform) trailers consist of load-carrying main frames and a solid, flat or stepped loading deck or floor permanently incorporated with and supported by frame rails and cross members.

The finished and unfinished chassis subject to this investigation are typically classified in the Harmonized Tariff Schedule of the United States (HTSUS) at subheadings 8716.39.00 or 8716.90.50 (statistical reporting numbers 8716.39.0090 or 8716.90.5060). Imports of finished and unfinished chassis may also be reported under HTSUS statistical reporting number 8716.90.5010. While the HTSUS subheadings are provided for convenience and customs purposes, the written description of the merchandise under investigation is dispositive.''

*Background.*—The final phase of these investigations is being scheduled pursuant to section 705(b) of the Tariff Act of 1930 (19 U.S.C. 1671d(b)), as a result of an affirmative preliminary determination by Commerce that certain benefits which constitute subsidies within the meaning of § 703 of the Act (19 U.S.C. 1671b) are being provided to manufacturers, producers, or exporters in China of chassis. The investigations were requested in petitions filed on July 30, 2020, by the Coalition of American Chassis Manufacturers, consisting of Cheetah Chassis Corporation, Fairless Hills, Pennsylvania, Hercules Enterprises, LLC, Hillsborough, New Jersey, Pitts Enterprises, Inc., Pittsview, Alabama, Pratt Industries, Inc., Bridgman, Michigan, and Stoughton Trailers, LLC, Stoughton, Wisconsin.

For further information concerning the conduct of this phase of the investigations, hearing procedures, and rules of general application, consult the Commission's Rules of Practice and Procedure, part 201, subparts A and B (19 CFR part 201), and part 207, subparts A and C (19 CFR part 207).

*Participation in the investigations and public service list.*—Persons, including industrial users of the subject merchandise and, if the merchandise is sold at the retail level, representative consumer organizations, wishing to participate in the final phase of these investigations as parties must file an entry of appearance with the Secretary to the Commission, as provided in § 201.11 of the Commission's rules, no later than 21 days prior to the hearing date specified in this notice. A party that filed a notice of appearance during the preliminary phase of the investigations need not file an additional notice of appearance during this final phase. The Secretary will maintain a public service list containing the names and addresses of all persons, or their representatives, who are parties to the investigations.

Please note the Secretary's Office will accept only electronic filings during this time. Filings must be made through the Commission's Electronic Document Information System (EDIS, *https://edis.usitc.gov.*) No in-person paper-based filings or paper copies of any electronic filings will be accepted until further notice.

*Limited disclosure of business proprietary information (BPI) under an administrative protective order (APO) and BPI service list.*—Pursuant to § 207.7(a) of the Commission's rules, the Secretary will make BPI gathered in the final phase of these investigations available to authorized applicants under the APO issued in the investigations, provided that the application is made no later than 21 days prior to the hearing date specified in this notice. Authorized applicants must represent interested parties, as defined by 19 U.S.C. 1677(9), who are parties to the investigations. A party granted access to BPI in the preliminary phase of the investigations need not reapply for such access. A separate service list will be maintained by the Secretary for those parties authorized to receive BPI under the APO.

*Staff report.*—The prehearing staff report in the final phase of these investigations will be placed in the nonpublic record on March 4, 2021, and a public version will be issued thereafter, pursuant to § 207.22 of the Commission's rules.

*Hearing.*—The Commission will hold a hearing in connection with the final phase of these investigations beginning at 9:30 a.m. on Tuesday, March 16, 2021. Information about the place and form of the hearing, including about how to participate in and/or view the hearing, will be posted on the Commission's website at *https://www.usitc.gov/calendarpad/calendar.html.* Interested parties should check the Commission's website periodically for updates. Requests to appear at the hearing should be filed in writing with the Secretary to the Commission on or before Thursday, March 11, 2021. A nonparty who has testimony that may aid the Commission's deliberations may request permission to present a short statement at the hearing. All parties and nonparties desiring to appear at the hearing and make oral presentations should attend a prehearing conference to be held at 9:30 a.m. on Monday, March 15, 2021. Oral testimony and written materials to be submitted at the public hearing are governed by sections 201.6(b)(2), 201.13(f), and 207.24 of the Commission's rules. Parties must submit any request to present a portion of their hearing testimony *in camera* no later than 7 business days prior to the date of the hearing.

*Written submissions.*—Each party who is an interested party shall submit a prehearing brief to the Commission. Prehearing briefs must conform with the provisions of § 207.23 of the Commission's rules; the deadline for filing is March 10 2021. Parties may also file written testimony in connection with their presentation at the hearing, as provided in § 207.24 of the Commission's rules, and posthearing briefs, which must conform with the provisions of § 207.25 of the Commission's rules. The deadline for filing posthearing briefs is March 24, 2021. In addition, any person who has not entered an appearance as a party to the investigations may submit a written statement of information pertinent to the subject of the investigations, including statements of support or opposition to the petition, on or before March 24, 2021. On April 8, 2021, the Commission will make available to parties all information on which they have not had an opportunity to comment. Parties may submit final comments on this information on or before April 12, 2021, but such final comments must not contain new factual information and must otherwise comply with § 207.30 of the Commission's rules. All written submissions must conform with the provisions of § 201.8 of the Commission's rules; any submissions that contain BPI must also conform with the requirements of §§ 201.6, 207.3, and 207.7 of the Commission's rules. The Commission's *Handbook on Filing Procedures,* available on the Commission's website at *https://www.usitc.gov/documents/handbook_on_filing_procedures.pdf,* elaborates upon the Commission's procedures with respect to filings.

Additional written submissions to the Commission, including requests pursuant to § 201.12 of the Commission's rules, shall not be accepted unless good cause is shown for accepting such submissions, or unless the submission is pursuant to a specific request by a Commissioner or Commission staff.

In accordance with §§ 201.16(c) and 207.3 of the Commission's rules, each document filed by a party to the investigations must be served on all other parties to the investigations (as identified by either the public or BPI service list), and a certificate of service must be timely filed. The Secretary will not accept a document for filing without a certificate of service.

*Authority:* These investigations are being conducted under authority of title VII of the Tariff Act of 1930; this notice is published pursuant to § 207.21 of the Commission's rules.

By order of the Commission.

Issued: January 8, 2021.

**Lisa Barton,**

## INTERNATIONAL TRADE COMMISSION

**[Investigation No. TA–201–77]**

### Fresh, Chilled, or Frozen Blueberries; Change in Starting Time of January 12, 2021 Hearing to 9:00 a.m. From 9:30 a.m.

**AGENCY:** United States International Trade Commission.

**ACTION:** Notice.

**FOR FURTHER INFORMATION CONTACT:** Jordan Harriman (202–205–2610), Office of Investigations, U.S. International Trade Commission, 500 E Street SW, Washington, DC 20436. Hearing-impaired persons can obtain information on this matter by contacting the Commission's TDD terminal on 202–205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at 202–205–2000. General information concerning the Commission may also be obtained by accessing its internet server (*https://www.usitc.gov*). The public record for this investigation may be viewed on the Commission's electronic docket (EDIS) at *https://edis.usitc.gov.*

**SUPPLEMENTARY INFORMATION:** On October 9, 2020, the Commission published a notice in the **Federal Register** concerning the institution and scheduling of Investigation No. TA–201–77 pursuant to section 202 of the Trade Act of 1974 (''the Act'') to determine whether fresh, chilled, or frozen blueberries are being imported into the United States in such increased quantities as to be a substantial cause of serious injury, or the threat thereof, to the domestic industry producing an article like or directly competitive with the imported articles (85 FR 64162, as amended by 85 FR 66360 on October 19, 2020). This notice updates the time at which the hearing on injury will begin. This hearing, originally scheduled to begin at 9:30 a.m. EST on January 12, 2021, now will begin at 9:00 a.m. EST on January 12, 2021.

*Authority:* This investigation is being conducted under authority of Section 202 of the Act; this notice is published pursuant to section 202(b)(3) of the Act.

By order of the Commission.

Issued: January 8, 2021.

## DEPARTMENT OF JUSTICE

### Bureau of Alcohol, Tobacco, Firearms and Explosives

**[OMB Number 1140–0030]**

### Agency Information Collection Activities; Proposed eCollection of eComments Requested; Extension with Change of a Currently Approved Collection; Records and Supporting Data: Importation, Receipt, Storage, and Disposition by Explosives Importers, Manufacturers, Dealers, and Users

**AGENCY:** Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

**ACTION:** 60-day notice.

**SUMMARY:** The Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), Department of Justice (DOJ), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995. The proposed information collection (IC) is also being published to obtain comments from the public and affected agencies.

**DATES:** Comments are encouraged and will be accepted for 60 days until March 15, 2021.

**FOR FURTHER INFORMATION CONTACT:** If you have additional comments, regarding the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact: Anita Scheddel, Program Analyst, Firearms and Explosives Industry Division, Explosives Industry Programs Branch, Mailstop 6N–518, either by mail at 99 New York Ave. NE, Washington, DC 20226, or by email at *eipbinformationcollection@atf.gov,* or by telephone at (202) 648–7120.

**SUPPLEMENTARY INFORMATION:** Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information,

including the validity of the methodology and assumptions used;
—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

**Overview of This Information Collection**

1. *Type of Information Collection (*check justification or form 83): Extension with change of a currently approved collection.

2. *The Title of the Form/Collection:* Records and Supporting Data: Importation, Receipt, Storage, and Disposition by Explosives Importers, Manufacturers, Dealers, and Users Licensed Under Title 18 U.S.C. Chapter 40 Explosives.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:*

Form number (if applicable): None.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: Business or other for-profit.

Other (if applicable): None.

Abstract: This information collection requires the maintenance of records showing daily activities in the importation, manufacture, receipt, storage, and disposition of all explosive materials covered under 18 U.S.C. Chapter 40 Explosives. These records must also show where and to whom explosive materials are sent, thereby ensuring that any diversions will be readily apparent, and that ATF will be immediately notified if these materials are lost or stolen.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 9,411 respondents will prepare records for this information collection annually, and it will take each respondent approximately 12.6 hours to prepare the required records.

6. *An estimate of the total public burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 592,893 hours, which is equal to 47,055 (# of annual responses) * 12.6 (# of hours per response).

7. *An Explanation of the Change in Estimates:* The adjustments associated with this collection include a decrease in the number of respondents, responses and total burden hours by 516, 2,580, and 32,508 hours respectively, since the last IC renewal in 2017.

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 3E.405A, Washington, DC 20530.

Dated: January 11, 2021.

## DEPARTMENT OF JUSTICE

### Drug Enforcement Administration

**[Docket No. DEA–768]**

### Bulk Manufacturer of Controlled Substances Application: Siemens Healthcare Diagnostics Inc.

**AGENCY:** Drug Enforcement Administration, Justice.

**ACTION:** Notice of application.

**SUMMARY:** Siemens Healthcare Diagnostics Inc. has applied to be registered as a bulk manufacturer of basic class(es) of controlled substance(s). Refer to Supplemental Information listed below for further drug information.

**DATES:** Registered bulk manufacturers of the affected basic class(es), and applicants therefore, may file written comments on or objections to the issuance of the proposed registration on or before March 15, 2021. Such persons may also file a written request for a hearing on the application on or before March 15, 2021.

**ADDRESSES:** Written comments should be sent to: Drug Enforcement Administration, Attention: DEA **Federal Register** Representative/DPW, 8701 Morrissette Drive, Springfield, Virginia 22152.

**SUPPLEMENTARY INFORMATION:** In accordance with 21 CFR 1301.33(a), this is notice that on December 11, 2020, Siemens Healthcare Diagnostics Inc., 100 GBC Drive, Mailstop 514, Newark, Delaware 19702–2461, applied to be registered as a bulk manufacturer of the following basic class of controlled substance:

| Controlled substance | Drug code | Schedule |
|---|---|---|
| Ecgonine | 9180 | II |

The company plans to produce the listed controlled substance in bulk to be used in the manufacture of DEA exempt products. No other activities for these drug codes are authorized for this registration.

## DEPARTMENT OF JUSTICE

**[OMB Number 1121–0269]**

## Agency Information Collection Activities: Proposed Collection; Comments Requested; Reinstatement, With Change, of a Previously Approved Collection for Which Approval Has Expired: 2020 Census of Publicly Funded Forensic Crime Laboratories (CPFFCL)

**AGENCY:** Bureau of Justice Statistics, Department of Justice.

**ACTION:** 60-day notice.

**SUMMARY:** The Department of Justice (DOJ), Office of Justice Programs, Bureau of Justice Statistics, will be submitting the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

**DATES:** Comments are encouraged and will be accepted for 60 days until March 15, 2021.

**FOR FURTHER INFORMATION CONTACT:** If you have additional comments especially on the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions or additional information, please contact Connor Brooks, Statistician, Law Enforcement Statistics Unit, Bureau of Justice Statistics, 810 Seventh Street NW, Washington, DC 20531 (email: *Connor.Brooks@usdoj.gov*; phone: 202–514–8633).

**SUPPLEMENTARY INFORMATION:** Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

—Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Bureau of Justice Statistics, including whether the information will have practical utility;

—Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

—Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

### Overview of This Information Collection

(1) *Type of Information Collection:* Reinstatement of the Census of Publicly Funded Forensic Crime Laboratories, with changes, of a previously approved collection for which approval has expired.

(2) *The Title of the Form/Collection:* 2020 Census of Publicly Funded Forensic Crime Laboratories.

(3) *The agency form number, if any, and the applicable component of the Department sponsoring the collection:* The form number is CFCL–20. The applicable component within the Department of Justice is the Bureau of Justice Statistics, Office of Justice Programs.

(4) *Affected public who will be asked or required to respond, as well as a brief abstract:*

This information collection is a census of federal, state, and local publicly funded forensic crime laboratories that analyze criminal evidence. This data collection follows the 2014 study and will collect information on personnel, budgets, workloads, policies, and procedures of crime laboratories. BJS plans to field the 2020 CPFFCL from May to October 2021. The census form was assessed by practitioners and subject matter experts to update it from the 2014 form and ensure its relevance to forensic crime laboratories as well as reduce respondent burden. The form was then cognitively tested with 23 forensic crime laboratories of different sizes, regions, and government levels. In addition to collecting detailed data for the 2020 reference year, CPFFCL will also collect summary data for the 2019 reference year.

(5) *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* A projected 500 respondents will take an average of 2.5 hours each to complete form, including time to research or find information not readily

available. BJS expects additional time will be needed for data quality follow-up for up to 250 respondents, which will require another 15 minutes of respondent's time.

(6) *An estimate of the total public burden (in hours) associated with the collection:* There are an estimated 1312.5 total burden hours associated with this information collection.

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 3E.405A, Washington, DC 20530.

Dated: January 11, 2021.

## DEPARTMENT OF JUSTICE

### Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation and Liability Act

On December 29, 2020, the Department of Justice lodged a proposed Consent Decree with the United States District Court for the Eastern District of Texas in the lawsuit entitled *United States et al.* v. *E. I. du Pont de Nemours and Company and The Chemours Company FC, LLC, Case No. 1:20–cv–00556.* The proposed Consent Decree resolves the United States' claims, on behalf of the National Oceanic and Atmospheric Administration and the United States Department of the Interior, as Federal Trustees, joined by the State of Texas, on behalf of the Texas Commission on Environmental Quality, the Texas General Land Office, and the Texas Parks and Wildlife Department, as State Trustees, pursuant to Section 107(a) of the Comprehensive Environmental Response, Compensation, and Liability Act, 42 U.S.C. 9607(a), and the Texas Hazardous Substances Spill Prevention and Control Act, Texas Water Code §§ 26.261–26.267, for the recovery of damages for injury to, destruction of, loss of, and loss of use of natural resources and their services resulting from the release of hazardous substances at and from the Beaumont Works Industrial Park Complex into the West Marsh Site located in Beaumont, Texas. Plaintiffs are trustees for those natural resources. The proposed Consent Decree resolving these claims provides for Settling Defendants to implement a Restoration Project that entails recording a conservation easement on a 500-acre tract of valuable but otherwise unprotected habitat near the injured area (the ''Acquisition Property'') to compensate for the natural resource damages. The Restoration Project also includes the performance of baseline biological monitoring of the Acquisition Property, annual monitoring of Acquisition Property, and legal enforcement of the Conservation Easement. The Decree also provides for payments by Settling Defendants totaling $198,853 to reimburse the Trustees' costs of assessment and for payment of the Trustees' Future Costs of overseeing the Restoration Project.

The publication of this notice opens a period for public comment on the Consent Decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States et al.* v. *E. I. du Pont de Nemours and Company and The Chemours Company FC, LLC, Case No. 1:20-cv-00556,* D.J. Ref. No. 90–11–3–10852. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

## DEPARTMENT OF JUSTICE

### Notice of Lodging of Proposed Consent Decree Under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)

On December 16, 2020, the Department of Justice lodged a proposed consent decree with the United States District Court for the District of Delaware in the lawsuit entitled *United States* v. *Delaware,* Civil Action No. 1:20–cv–01703–UNA.

The United States filed this lawsuit under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) against the state of Delaware. The complaint seeks recovery of past costs that the United States Environmental Protection Agency (EPA) incurred in responding to releases or threatened releases of hazardous substances at a former landfill at the Governor Bacon Health Center/Fort DuPont State Park in New Castle County, Delaware. Under the consent decree, Delaware agrees to pay $1,889,992.30 of EPA's past response costs, while the United States Department of Defense (Settling Federal Agency) agrees to pay $1,700,993.07 of EPA's past response costs. In return, the United States agrees not to sue Delaware under Sections 107 and 113 of CERCLA, and Delaware agrees not to sue the United States for any portion of EPA's past response costs, including under Sections 107 or 113 of CERCLA.

The publication of this notice opens a period for public comment on the consent decree. Comments should be addressed to the Assistant Attorney General, Environment and Natural Resources Division, and should refer to *United States* v. *Delaware,* D.J. Ref. No. 90–11–3–11709. All comments must be submitted no later than thirty (30) days after the publication date of this notice. Comments may be submitted either by email or by mail:

| *To submit comments:* | *Send them to:* |
|---|---|
| By email | *pubcomment-ees.enrd@usdoj.gov.* |
| By mail | Assistant Attorney General, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611. |

During the public comment period, the consent decree may be examined and downloaded at this Justice Department website: *https://www.justice.gov/enrd/consent-decrees.* We will provide a paper copy of the consent decree upon written request and payment of reproduction costs. Please mail your request and payment to: Consent Decree Library, U.S. DOJ—ENRD, P.O. Box 7611, Washington, DC 20044–7611.

Please enclose a check or money order for $4.75 (25 cents per page reproduction cost) payable to the United States Treasury.

## Agency Information Collection Activities; Proposed eCollection of eComments Requested; New Information Collection; Residency and Citizenship Questionnaire—ATF Form 8620.58

**AGENCY:** Bureau of Alcohol, Tobacco, Firearms and Explosives, Department of Justice.

**ACTION:** 60-day notice.

**SUMMARY:** The Department of Justice (DOJ), Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), will submit the following information collection request to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995.

**DATES:** Comments are encouraged and will be accepted for 60 days until March 15, 2021.

**FOR FURTHER INFORMATION CONTACT:** If you have additional comments, regarding the estimated public burden or associated response time, suggestions, or need a copy of the proposed information collection instrument with instructions, or additional information, please contact: Lakisha Gregory, Chief, Personnel Security Division either by mail at 99 New York Ave. NE, Washington, DC 20226, by email at *Lakisha.Gregory@atf.gov,* or by telephone at 202–648–9260.

**SUPPLEMENTARY INFORMATION:** Written comments and suggestions from the public and affected agencies concerning the proposed collection of information are encouraged. Your comments should address one or more of the following four points:

— Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
— Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
— Evaluate whether and if so how the quality, utility, and clarity of the information to be collected can be enhanced; and
— Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

### Overview of This Information Collection

1. *Type of Information Collection (*check justification or form 83): New collection.

2. *The Title of the Form/Collection:* Residency and Citizenship Questionnaire.

3. *The agency form number, if any, and the applicable component of the Department sponsoring the collection:*

Form number (if applicable): ATF Form 8620.58.

Component: Bureau of Alcohol, Tobacco, Firearms and Explosives, U.S. Department of Justice.

4. *Affected public who will be asked or required to respond, as well as a brief abstract:*

Primary: Individuals or households.

Other (if applicable): None.

Abstract: The Residency and Citizenship Questionnaire—ATF Form 8620.58 will be used to determine if a candidate for Federal or contractor employment at the Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF), meets U.S. residency and citizenship requirements.

5. *An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond:* An estimated 2,000 respondents will use the form annually, and it will take each respondent approximately 5 minutes to complete their responses.

6. *An estimate of the total public burden (in hours) associated with the collection:* The estimated annual public burden associated with this collection is 167 hours, which is equal to 2,000 (# of respondents) * .0833333 (5 minutes).

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 3E.405A, Washington, DC 20530.

—Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, *e.g.,* permitting electronic submission of responses.

**Overview of This Information Collection**

(1) Type of Information Collection: Revision of a currently approved collection.

(2) The Title of the Form/Collection: Biographic Verification Form.

(3) The agency form number, if any, and the applicable component of the Department sponsoring the collection: The form number is 1–791. The applicable component within the Sponsoring component: Department of Justice, Federal Bureau of Investigation, Criminal Justice Information Services Division.

(4) Affected public who will be asked or required to respond, as well as a brief abstract:

Primary: Agencies authorized to submit applicant fingerprints into the Next Generation Identification (NGI) system for noncriminal justice purposes such as employment, benefits, and licensing. This form is completed to obtain a biographic verification (name check) for an applicant when the fingerprints have been rejected twice for quality to ensure eligible individuals are not denied employment, benefits, or licensing.

(5) An estimate of the total number of respondents and the amount of time estimated for an average respondent to respond: It is estimated that 50,000 respondents will complete each form within approximately 8 minutes.

(6) An estimate of the total public burden (in hours) associated with the collection: There are an estimated 6,700 total annual burden hours associated with this collection.

If additional information is required contact: Melody Braswell, Department Clearance Officer, United States Department of Justice, Justice Management Division, Policy and Planning Staff, Two Constitution Square, 145 N Street NE, 3E.405A, Washington, DC 20530.

Public comments on the ICR are invited.

**DATES:** The OMB will consider all written comments that agency receives on or before February 16, 2021.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

*Comments are invited on:* (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

**FOR FURTHER INFORMATION CONTACT:** Anthony May by telephone at 202–693–4129 (this is not a toll-free number) or by email at *DOL_PRA_PUBLIC@dol.gov.*

**SUPPLEMENTARY INFORMATION:** The HIRE Vets Medallion Program is a voluntary employer recognition program administered by the Department of Labor—Veteran's Employment and Training Service (VETS). Through the HIRE Vets Medallion Program, VETS will solicit voluntary applications from employers for an award called the HIRE Vets Medallion Award. These awards are intended to recognize employer efforts to recruit, employ, and retain our Nation's veterans. All employers who employ at least one employee are eligible to apply for the Award.

For additional substantive information about this ICR, see the related notice published in the **Federal Register** on November 3, 2020 (85 FR 69648).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

*Agency:* DOL–VETS.

*Title of Collection:* Honoring Investments in Recruiting and Employing (HIRE) American Veterans (HIRE Vets) Medallion Program.

*OMB Control Number:* 1293–0015.

*Affected Public:* Private Sector—Businesses or other for-profits.

*Total Estimated Number of Respondents:* 7,236.

*Total Estimated Number of Responses:* 34,711.

*Total Estimated Annual Time Burden:* 59,571 hours.

*Total Estimated Annual Other Costs Burden:* $0.

**Authority:** 44 U.S.C. 3507(a)(1)(D).

## Agency Information Collection Activities; Submission for OMB Review; Comment Request; Certification and Qualification To Examine, Test, Operate Hoists and Perform Other Duties

**ACTION:** Notice of availability; request for comments.

**SUMMARY:** The Department of Labor (DOL) is submitting this Mining Safety and Health Administration (MSHA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

**DATES:** The OMB will consider all written comments that agency receives on or before February 16, 2021.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

*Comments are invited on:* (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

**FOR FURTHER INFORMATION CONTACT:** Anthony May by telephone at 202–693–4129 (this is not a toll-free number) or by email at *DOL_PRA_PUBLIC@dol.gov.*

**SUPPLEMENTARY INFORMATION:**

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, section 101(a) of the Mine Act, 30 U.S.C. 811(a), authorizes the Secretary of Labor

(Secretary) to develop, promulgate, and revise as may be appropriate, improved mandatory health or safety standards for the protection of life and prevention of injuries in coal or other mines.

Under section 103(a) of the Mine Act, authorized representatives of the Secretary or Secretary of Health and Human Services must make frequent inspections and investigations in coal or other mines each year for the purpose of gathering information with respect to mandatory health or safety standards.

Title 30 Code of Federal Regulations (CFR) 75.159 and 77.106 require coal mine operators to maintain a list of persons who are certified and qualified to perform duties under 30 CFR parts 75 and 77, such as examining for hazardous conditions, testing for methane and oxygen deficiency, conducting tests of air flow, performing electrical work, repairing energized surface high-voltage lines, and performing the duties of hoisting engineer. This information collection is necessary to ensure that only persons who are properly trained and sufficiently experienced are permitted to perform these duties. Although MSHA does not specify a format for the recordkeeping, it normally consists of the names of the certified and qualified persons listed in two columns on a sheet of paper. One column is for certified persons and the other is for qualified persons.

Sections 75.100 and 77.100 pertain to the certification of certain persons to perform specific examinations and tests. Sections 75.155 and 77.105 outline the requirements necessary to be qualified as a hoisting engineer or hoist-man. Under sections 75.160, 75.161, 77.107, and 77.107–1, the mine operator must have an approved training plan developed to train and retrain the qualified and certified persons to effectively perform their tasks.

These regulations recognize State certification and qualification programs. However, where State programs are not available, MSHA may certify and qualify miners to carry out certain functions prescribed in the Mine Act. Under this program, MSHA will qualify or certify individuals if these individuals meet the requirements for qualification or certification, fulfill any applicable retraining requirements, and remain employed at the same mine or by the same independent contractor.

Applications for MSHA qualification or certification are submitted to the MSHA Qualification and Certification Unit in Denver, Colorado. MSHA Form 5000–41, Safety & Health Activity Certification or Hoisting Engineer Qualification Request provides the coal mining industry with a standardized reporting format that expedites the certification and qualification process while ensuring compliance with the regulations. MSHA uses the information collected through this form to determine if applicants satisfy the requirements to obtain the certification or qualification sought. Persons must meet certain minimum experience requirements depending on the type of certification or qualification sought. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on September 28, 2020 (85 FR 60837).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

*Agency:* DOL–MSHA.

*Title of Collection:* Certification and Qualification To Examine, Test, Operate Hoists and Perform Other Duties.

*OMB Control Number:* 1219–0127.

*Affected Public:* Businesses or other for-profits institutions.

*Total Estimated Number of Respondents:* 674.

*Total Estimated Number of Responses:* 3,259.

*Total Estimated Annual Time Burden:* 330 hours.

*Total Estimated Annual Other Costs Burden:* $56.

BILLING CODE 4510–43–P

## DEPARTMENT OF LABOR

### Office of the Secretary

### Agency Information Collection Activities; Submission for OMB Review; Comment Request; Delinquent Filer Voluntary Compliance Program

**ACTION:** Notice of availability; request for comments.

**SUMMARY:** The Department of Labor (DOL) is submitting this Employee Benefits Security Administration (EBSA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

**DATES:** The OMB will consider all written comments that agency receives on or before February 16, 2021.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

*Comments are invited on:* (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

**FOR FURTHER INFORMATION CONTACT:** Mara Blumenthal by telephone at 202–693–8538 (this is not a toll-free number) or by email at *DOL_PRA_PUBLIC@dol.gov.*

**SUPPLEMENTARY INFORMATION:** Section 502(c)(2) of the Employee Retirement Income Security Act of 1974 (ERISA), authorizes the Secretary of Labor to assess civil penalties against plan administrators who fail or refuse to file complete and timely annual reports (Form 5500 Annual Return/Report of Employee Benefit Plan (OMB Control

Number 1210–0110)) as required under section 101(b)(1) of ERISA and ERISA regulations codified in 29 CFR part 2520. Under the Delinquent Filer Voluntary Compliance Program (DFVC) Program, administrators otherwise subject to the assessment of higher civil penalties are permitted to pay reduced civil penalties for voluntarily complying with the annual reporting requirements under Title I of ERISA. This information collection requires providing data necessary to identify the plan along with the penalty payment. With respect to most pension plans and welfare plans, the requirement is satisfied by sending, along with the penalty payment, a copy of the delinquent annual report (without attachments or schedules) which is filed with the Department at a different address under the EFAST system. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on October 20, 2020 (85 FR 66580).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

*Agency:* DOL–EBSA.

*Title of Collection:* Delinquent Filer Voluntary Compliance Program.

*OMB Control Number:* 1210–0089.

*Affected Public:* Private Sector—Businesses or other for-profits and not-for-profit institutions.

*Total Estimated Number of Respondents:* 10,350.

*Total Estimated Number of Responses:* 10,350.

*Total Estimated Annual Time Burden:* 518 hours.

*Total Estimated Annual Other Costs Burden:* $778,718.

**Authority:** 44 U.S.C. 3507(a)(1)(D).

Dated: January 8, 2021.

**Mara Blumenthal,**

## DEPARTMENT OF LABOR

### Office of the Secretary

### Agency Information Collection Activities; Submission for OMB Review; Comment Request; Request for Assistance From the Department of Labor, Employee Benefits Security Administration

**ACTION:** Notice of availability; request for comments.

**SUMMARY:** The Department of Labor (DOL) is submitting this Employee Benefits Security Administration (EBSA)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

**DATES:** The OMB will consider all written comments that agency receives on or before February 16, 2021.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

**FOR FURTHER INFORMATION CONTACT:** Mara Blumenthal by telephone at 202–693–8538 (this is not a toll-free number) or by email at *DOL_PRA_PUBLIC@dol.gov.*

**SUPPLEMENTARY INFORMATION:** EBSA assists participants in understanding their rights, responsibilities, and benefits under employee benefits laws and intervenes informally on their behalf with the plan sponsor in order to assist them in obtaining the health and retirement benefits to which they may have been inappropriately denied, which can avert the necessity for a formal investigation or a civil action. EBSA has made a request for assistance form available on its website for those wishing to obtain assistance in this manner. For additional substantive information about this ICR, see the related notice published in the **Federal Register** on October 20, 2020 (85 FR 66580).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

*Agency:* DOL–EBSA.

*Title of Collection:* Request for Assistance from the Department of Labor, Employee Benefits Security Administration.

*OMB Control Number:* 1210–0146.

*Affected Public:* Individuals or Households.

*Total Estimated Number of Respondents:* 5,582.

*Total Estimated Number of Responses:* 5,582.

*Total Estimated Annual Time Burden:* 2,791 hours.

*Total Estimated Annual Other Costs Burden:* $0.

**Authority:** 44 U.S.C. 3507(a)(1)(D).

Dated: January 8, 2021.

**Mara Blumenthal,**

*Senior PRA Analyst.*

## DEPARTMENT OF LABOR

### Agency Information Collection Activities; Submission for OMB Review; Comment Request; Nondiscrimination Compliance Information Reporting

**ACTION:** Notice of availability; request for comments.

**SUMMARY:** The Department of Labor (DOL) is submitting this Office of the Assistant Secretary for Administration and Management (OASAM)-sponsored information collection request (ICR) to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act of 1995 (PRA). Public comments on the ICR are invited.

**DATES:** The OMB will consider all written comments that agency receives on or before February 16, 2021.

**ADDRESSES:** Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

*Comments are invited on:* (1) Whether the collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; (2) if the information will be processed and used in a timely manner; (3) the accuracy of the agency's estimates of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (4) ways to enhance the quality, utility and clarity of the information collection; and (5) ways to minimize the burden of the collection of information on those who are to respond, including the use of automated collection techniques or other forms of information technology.

**FOR FURTHER INFORMATION CONTACT:** Anthony May by telephone at 202–693–4129 (this is not a toll-free number) or by email at *DOL_PRA_PUBLIC@dol.gov.*

**SUPPLEMENTARY INFORMATION:**

The Department of Labor collects the Nondiscrimination Compliance Information Reporting data to help ensure a recipient of certain DOL Federal financial assistance programs does not discriminate in the administration, management, or operation of programs and activities. Information collections covered by this ICR include:

• A grant applicant providing assurance that the applicant is aware of and, as a condition of receipt of Federal financial assistance, agrees to comply with the assurance requirements;

• a DOL funds recipient maintaining a record of E.O. characteristics data and a log of any E.O. complaints for activities under an applicable DOL funded program;

• a person who believes a relevant E.O. requirement may have been violated filing a complaint with either the funds recipient or with the DOL Civil Rights Center;

• a State periodically filing a plan outlining administrative methods the State will use to ensure funds are not used in a discriminatory manner; and

• a DOL funds recipient posting required notices.

For additional substantive information about this ICR, see the related notice published in the **Federal Register** on November 12, 2020 (85 FR 71946).

This information collection is subject to the PRA. A Federal agency generally cannot conduct or sponsor a collection of information, and the public is generally not required to respond to an information collection, unless the OMB approves it and displays a currently valid OMB Control Number. In addition, notwithstanding any other provisions of law, no person shall generally be subject to penalty for failing to comply with a collection of information that does not display a valid OMB Control Number. *See* 5 CFR 1320.5(a) and 1320.6.

DOL seeks PRA authorization for this information collection for three (3) years. OMB authorization for an ICR cannot be for more than three (3) years without renewal. The DOL notes that information collection requirements submitted to the OMB for existing ICRs receive a month-to-month extension while they undergo review.

*Agency:* DOL–OASAM.

*Title of Collection:* Certification and Qualification To Examine, Test, Operate Hoists and Perform Other Duties.

## LIBRARY OF CONGRESS

### Copyright Office

**[Docket No. 2019–03]**

### Compendium of U.S. Copyright Office Practices

**AGENCY:** U.S. Copyright Office, Library of Congress.

**ACTION:** Update to Compendium of U.S. Copyright Office Practices, Third Edition.

**SUMMARY:** The U.S. Copyright Office is releasing an update to its administrative manual, the Compendium of U.S. Copyright Office Practices, Third Edition.

**DATES:** The updated version of the *Compendium of U.S. Copyright Office Practices, Third Edition* is available on the Office's website as of January 28, 2021.

**FOR FURTHER INFORMATION CONTACT:** Robert J. Kasunic, Associate Register of Copyrights and Director of Registration Policy and Practice, by email at *rkas@copyright.gov*; Catherine Zaller Rowland, Associate Register of Copyrights and Director of Public Information and Education, by email at *crowland@copyright.gov*; or Regan A. Smith, General Counsel and Associate Register of Copyrights, by email at *regans@copyright.gov.* All can be reached by telephone at 202–707–8350.

**SUPPLEMENTARY INFORMATION:** The *Compendium of U.S. Copyright Office Practices, Third Edition* (''*Compendium*'') is the administrative manual of the U.S. Copyright Office. It ''explains many of the practices and procedures concerning the Office's mandate and statutory duties under title 17 of the United States Code.'' 37 CFR 201.2(b)(7). ''It is both a technical manual for the Copyright Office's staff, as well as a guidebook for authors, copyright licensees, practitioners, scholars, the courts, and members of the general public.'' *Id.* The Office conducted a comprehensive revision of the *Compendium* beginning in 2011, which it released as the Third Edition in December 2014. 79 FR 78911 (Dec. 31, 2014). The Third Edition was revised in 2017 to ensure that its contents were consistent with case law and Office practices. 82 FR 45625 (Sept. 29, 2017).

The Office released the latest draft revision to the *Compendium* on March 15, 2019 (the ''Public Draft''). The Office posted the Public Draft on its public website and invited comments until May 31, 2019. The draft included proposed revisions to the sections discussing useful articles to reflect the Supreme Court's decision in *Star Athletica* v. *Varsity Brands,* 137 S. Ct. 1002 (2017), as well as to reflect rulemakings the Office conducted in the intervening months since the last revision. It provided information regarding the new group registration options for unpublished works, unpublished photographs, published photographs, and serial, newspaper, and newsletter issues. It discussed the new deposit requirements for literary monographs, printed music, and photographic databases, as well as the changes to regulations governing use of the Single Application and Standard Application forms and technical upgrades to the electronic registration system. It also clarified certain Office practices, including under what circumstances the Office communicates with applicants, attempts to correct deficiencies in an application, registers claims with annotations, and refuses registration. An archived copy of the Public Draft is available on the Office's website.[1]

The Office received twenty-four comments on the Public Draft.[2] After carefully reviewing these comments, the Office decided to further revise a number of sections of the Public Draft. The result is a final update (the ''Final Version''), which is discussed in detail below. Additionally, the Final Version: reflects the adoption of the Music Modernization Act in October 2018, the Marrakesh Treaty Implementation Act in October 2018, and the National Defense Authorization Act for Fiscal Year 2020; the Supreme Court's recent decisions in *Georgia* v. *Public.Resource.Org, Inc.,* 140 S. Ct. 1498 (2020), and *Fourth Estate Public Benefit Corp.* v. *Wall-Street.com, LLC,* 139 S. Ct. 881 (2019); the Second Circuit's May 2020 decision in *Sohm* v. *Scholastic Inc.,* 959 F.3d 39 (2d Cir. 2020); as well as rulemaking activity that post-dated the Public Draft, including changes to the fee schedule and to regulations regarding registration of architectural works, the group registration option for short online literary works, group registration options for serials, newspapers, and newsletters, and changes in Office practices regarding the group registration option for unpublished works. A complete list of all sections that have been added, amended, revised, or removed is available on the Office's website at *https://www.copyright.gov/comp3/revisions.html,* along with redlines that provide a direct comparison between the Final Version and the 2017 version of the Third Edition of the *Compendium.*

Key revisions to the Public Draft reflected in the Final Version are as follows:

**1. Correspondence and Refusals**

Many of the comments regarding the Public Draft related to changes in language providing examiners with greater discretion to correspond with the applicant regarding deficiencies in an application or to refuse registration.[3] Commenters expressed concern that these revisions signaled a change in the Office's procedures that would provide fewer opportunities for applicants to correct problems in their applications. Some commenters feared that an undue focus on examining applications efficiently could come at the expense of providing adequate customer service to applicants.

The Office has demonstrated a commitment to providing assistance to applicants as they navigate the registration process, including by publishing the *Compendium* and Circulars, providing a variety of other guidance documents on the Office's website, and through the Office of Public Information and Education. Examiners have always had discretion to correspond with applicants or refuse registration in appropriate cases. In the vast majority of cases, where the issues in an application can be fixed, Examiners have corresponded—and will continue to correspond—with the applicant to request a clarification or to correct information on the application.

However, correspondence is not always the preferred way to address issues. Correspondence can require a great deal of resources in certain situations and may not be productive. For example, if an applicant submits the incorrect form, transferring the application onto the correct form may require collecting additional fees or a different deposit, which cannot be done simply through correspondence. Other times, an applicant may make the same mistake repeatedly, despite guidance from the Office. In these situations, examiners need discretion to cease or forego correspondence and refuse registration. As explained in sections 608, 1702, and 1703 of the *Compendium,* if an application is refused, the applicant will be informed in writing of the refusal, will receive an explanation of the basis for the refusal, and will have the option to appeal the refusal.

To explain how the Office handles correspondence and refusals, and to address the concerns described above expressed by commenters, the Office has revised numerous sections of the *Compendium.* First, the Office further revised several sections in Chapter 600 to clarify how an examiner will respond to a variance in an application. The Office uses the term ''variance'' to refer to any instance in which registration materials submitted by an applicant provide conflicting information. Section 603 explains that there are four types of variances: immaterial; material but resolvable by reviewing the registration materials; material but potentially resolvable through correspondence; and material and not resolvable. The Office added definitions of the terms ''variance,'' ''material,'' and ''immaterial'' to the Glossary and added links to the sections in which those terms are used throughout Chapter 600. The Office removed the term ''deficiencies'' from sections 603.2(C) and 605.3(D) and replaced it with the term ''variances.'' Similarly, the term ''substantial variance'' was replaced with ''material variance'' in sections 610.6(B), 610.6(D)(1), 610.6(D)(4), 613.10(B), 613.10(E)(1)(b), and 618.8(E).

Second, the Office revised sections 603 and 603.2(C) to explain that only in ''exceptional cases'' will the examiner refuse registration based on material variances. Sections 618.1, 618.4(A), 618.8(A)(1), 618.8(A)(7), 618.8(D), 619.13(K), 621.8(C)(2), 621.9(F), and 621.9(H)(2) have been updated to identify specific situations in which the Office will typically correspond with an applicant.

Third, the Office provided representative examples of exceptional circumstances in which an examiner will refuse registration without providing the applicant an opportunity to correct or clarify information in the

application. Section 603.2(C) provides examples of an applicant who repeatedly omits required information despite multiple reminders from the Office that the information is required, and an applicant who submits the wrong form and filing fee. Other examples of instances in which an examiner will refuse registration appear in sections 618.8(C), 618.8(C)(6), 618.8(D), 618.8(D)(4), 621.9(E)(6), 621.9(F), and 621.9(F)(4), which clarify that the Office will refuse registration if the claim appears to be limited to uncopyrightable or *de minimis* material or if there appears to be no basis for asserting a valid claim in the work.

Fourth, in response to the public comments discussed above, the Office revised several sections 204.3 and 609.1 of the *Compendium* to state that an examiner ''may,'' instead of ''will,'' refuse registration if the applicant has not satisfied the formal and legal requirements for registration or if the applicant selects the wrong version of the Standard Application.

Fifth, some revisions addressed important group registration issues. It can be particularly important for examiners to have the discretion to refuse registration when applicants fail to comply with the requirements for group registrations. The Copyright Office imposes requirements for group registration options to streamline the examination of multiple works within one application. Group registration options are not practicable unless applicants comply with the basic requirements for those options. Nevertheless, the Office has revised the *Compendium* to allow examiners discretion to correspond with applicants in appropriate circumstances. In response to comments from the North American Nature Photography Association,[4] the Office revised section 1105.3 to clarify that examiners may refuse registration if the applicant failed to satisfy the eligibility requirements for a particular option or may correspond if they determine the problem can easily be addressed. Similarly, changes to section 1114.1 clarify that if a photographer submits more than 750 photographs in connection with an application for group registration of photographs, the Office may register the first 750 photographs listed in the application and remove the rest of the photos from the claim, or may refuse registration.

Finally, the Office carefully considered a proposal relating to proper deposits but determined that the proposal would not be beneficial to the copyright system. The National Music Publishers' Association expressed concern about an examiner's discretion to refuse to register a work if the deposit was submitted in the wrong format, as discussed in section 625.2(B).[5] The Office cannot register a work unless a proper deposit has been submitted. *See* section 204.3. Nor can the Office examine a work unless it is submitted in a form that can be opened and displayed by the Office's system. The Office added new technology to the electronic system in December 2017 that prevents the submission of deposits in an incorrect format except in cases where the applicant uploads the deposit on a zip file or submits an electronic application and mails a physical copy that contains unacceptable file formats.[6] The Office also updated the automated emails sent in response to applicants when they submit applications and the instructions on the deposit submission screen to indicate that deposits must be submitted in an acceptable file format, with a link to the list of acceptable formats.[7] In light of these improvements, the Office believes it is appropriate to refuse registration if an applicant submits a deposit in an incorrect format.

**2. New Topics Reflecting Court Decisions**

The Public Draft has been updated in light of the Supreme Court's decision in *Fourth Estate Public Benefit Corp.* v. *Wall-Street.com, LLC,* 139 S. Ct. 881 (2019), which held that the owner of a copyright for a U.S. work must have received a registration decision from the Office prior to instituting a claim for infringement in a U.S. court. Prior to this decision, the Office had maintained in the *Compendium* that this was the correct reading of the Copyright Act rather than the ''application rule,'' which would have required only the submission of an application to register the copyright. The Court confirmed that the Office's interpretation was correct. The *Compendium* was revised in several places to delete references to courts that applied the ''application rule.'' Several sections in Chapter 1600 were also revised to reflect the Supreme Court's discussion of preregistration in the *Fourth Estate* decision.

The Public Draft has also been revised to account for the Supreme Court's decision in *Georgia* v. *Public.Resource.Org, Inc.,* 140 S. Ct. 1498 (2020), regarding the government edicts doctrine. Section 313.6(C)(2) was revised in light of the Court's holding that any ''work that [a] judge or legislator produces in the course of his [or her] judicial or legislative duties is not copyrightable.'' *Id.* at 1506. This section has also been revised to include several quotations from the decision that explain the Court's reasoning. Section 717 was also revised in light of the Court's decision to clarify that annotated codes or compilations of legal documents may be copyrightable if they contain sufficient original authorship and were prepared by a private party or non-lawmaking official not acting under the control of a legislative or judicial body.

The Office also revised the Public Draft to account for the Second Circuit's May 2020 decision in *Sohm* v. *Scholastic Inc.,* 959 F.3d 39 (2d Cir. 2020), holding that a registration for a collective work may cover the component works in certain circumstances even if the authors and titles of those works are not listed in the application. The Office added a citation to this case in section 613.10(F) and removed the citation to *Muench* v. *Houghton Mifflin,* a decision from the Southern District of New York that was abrogated by the decision in *Sohm.*

**3. THREAD–ID**

When an examiner sends an email concerning an application, the Office assigns a ''THREAD ID'' to that communication. Several commenters objected to the sections in the Public Draft that indicated that a claim would be closed if an applicant did not include the THEAD–ID in the body of an email replying to email correspondence from the examiner. Commenters suggested that it should be sufficient if the THREAD–ID or case number is included either in the subject line of a response email or the body of the response message.[8] While the Office understands this concern, the current system requires the inclusion of the THREAD–ID in the body of an email reply for the Office to be able to connect correspondence received from applicants with the relevant claims. As mentioned in a recent Statement of Policy and Notification of Inquiry regarding registration modernization, the Office intends to simplify the system

for claims and correspondence when designing the next system.[9]

In response to public comments, the Office updated sections 605.3(A), 605.4, and 605.6(B) in the Final Version to clarify that the THREAD–ID must be included in the body, not the subject line, of any email reply from an applicant in order to connect the reply with the appropriate record. In November 2019, the Office also amended its correspondence templates so that all outgoing emails contain a clear warning at the beginning of the message instructing applicants that the THREAD–ID must be included in the body of any reply and explaining that the examiner will not receive the reply if the applicant does not comply with these instructions. The amended text found in all outgoing emails can be found in section 605.4 of the Final Version. The Office believes the revised text in the *Compendium* and in outgoing correspondence provide clear notice to applicants about the requirement to include the THREAD–ID in all email correspondence with examiners.

**4. No Replies**

One commenter urged the Office to reconsider its practice of closing a claim if there has been no response to written correspondence from the Office within forty-five days. The commenter noted that the original message could have been caught in a spam filter or overlooked by the applicant due to a variety of circumstances. The commenter requested that the Office call and send a second email to each applicant who has not responded to written correspondence within thirty days.[10]

It would be burdensome for the Office to call and send an email to every applicant who has not responded to written correspondence and technical constraints do not allow for that process to be automated within the current system. The Office will consider whether to include that functionality in the next system. Applicants bear the responsibility of providing the Office with accurate contact information and monitoring their email inboxes for correspondence. In the event that an applicant's failure to reply to written correspondence was caused by extraordinary circumstances outside the applicant's control, the applicant may use the process outlined in section 605.8 of the *Compendium* to request that a claim be reopened.

**5. Publication**

Several commenters requested additional guidance in the *Compendium* regarding the distinction between published and unpublished works.[11] The Office issued a Notification of Inquiry in December 2019 seeking comments from the public about possible strategies through which the Office can provide additional guidance regarding the determination as to whether a work has been published, particularly in the online context.[12] The Office is in the process of reviewing the 71 comments and reply comments it received in response to that Notification to determine the appropriate next steps. In the meantime, as suggested by commenters,[13] the Office has provided additional examples of published and unpublished works in various sections of the *Compendium.* Specifically, the Office added several examples to sections 1114.1, 1114.5, and 1114.6(G) to clarify that both the distribution of photographs and the offering of one or more copies of a photograph to someone for the purpose of further distribution or public display constitute publication. These new examples should also assist applicants in determining the date of first publication of their photographs. One of the examples explicitly discusses the scenario raised by the National Press Photographers Association (''NPPA'') in which a photographer posts photographs in a password-protected site with authorization for clients to download and distribute the photographs, and clarifies that this constitutes publication. The Office also revised section 1906.1, as requested by NPPA, to clarify that sending an image to *any* client, as opposed to only newspapers, magazines or websites, with a license authorizing further distribution constitutes publication.[14] The Office revised the definition of ''copies'' and ''phonorecords'' in the Glossary to clarify that they include the singulars ''copy'' and ''phonorecord,'' so that distributing a single copy or phonorecord of a work can constitute publication. The Office made a similar revision to sections 1905 and 1905.1, which discuss distribution to the public. The Office also revised section 1008.3 to clarify that streaming is a performance, which may not constitute publication of the streamed work absent the distribution or offering of copies of the work, including for purposes of furthering the performance or enjoyment of the work.[15]

The Office declined the request of one commenter to revise language in section 1906.1 that ''[o]ffering a work directly to the public constitutes publication where the offeror has completed all the steps necessary for distribution to the public, such that the only further action required is an offeree's action in obtaining a copy or phonorecord.'' [16] This sentence in section 1906.1 and the examples that follow focus on defining what constitutes an offer. The definition of publication in the statute and the language in the surrounding paragraphs of this section of the *Compendium* make it sufficiently clear that an offer to distribute copies of a work only constitutes publication if the purpose is for the copies to be further distributed, publicly performed, or publicly displayed.

**6. Duplicate Submissions**

Two commenters raised a concern regarding perceived inconsistent implementation of the Office's policy to not knowingly issue multiple registrations for the same claim, described in section 602.4(E) of the *Compendium.* Because the system does not allow the public to access information about pending applications, more than one music publisher may attempt to register the same composition without knowing that another application was filed previously. The commenters claimed that, in this situation, the Office has refused some applications and directed applicants to seek a supplementary registration that identifies additional authors and claimants, while the Office has instructed other applicants to remove the co-author/co-claimant identified on the first application from the second application, which results in the same work being registered twice.[17] The commenters requested that applicants in this situation be permitted to file applications for supplementary registrations at no cost.[18]

The Office is aware that multiple registrations for the same work can be issued if the examiner is not aware of

[17] The Office is not aware of any instances in which it has instructed an applicant seeking to register a work that has already been registered to remove the name of a co-author or co-claimant from an application, but it would be happy to discuss any such instances with applicants.

[18] National Music Publishers' Association Comment at 2–3; Copyright Alliance Comment at 7.

the prior registration at the time of the examination. There are also adverse claims, in which a second applicant claims to be the true author or owner of the copyright rather than the first applicant. If the examiner is aware of the prior registration and the applicant claims to be a co-claimant, the examiner should generally advise the applicant to seek a supplementary registration to identify additional authors and claimants, which would require payment of an additional fee. Additionally, recordation can be used to establish the filer's co-ownership in the previously registered work. To the extent the application is filed by a new owner after a transfer from a previous owner, that is established in the public catalog by recording the transfer rather than amending the registration.

**7. Copyright Protection and Other Forms of Legal Protection**

As suggested by the Kernochan Center,[19] the Office revised sections 310.11, 905, and 924.5 to clarify that a work may be eligible for copyright protection, regardless of whether it may or may not be protected by other forms of legal protection.

**8. Useful Articles and Works of Artistic Craftsmanship**

Chapter 900 of the *Compendium* has been updated to reflect the Supreme Court's decision in *Star Athletica* v. *Varsity Brands,* 137 S. Ct. 1002 (2017). In providing new guidance for claims involving useful articles, the chapter also addresses claims concerning works of artistic craftsmanship. In light of our new guidance, the Kernochan Center and attorney Daan Erikson requested additional guidance on how to determine whether a work is a useful article.[20]

In reviewing Chapter 900, the Kernochan Center noted that ''there are no examples of useful articles that in their entirety might be perceived as [pictorial, graphic, or sculptural] works.'' [21] It advised the Office ''to say up front that separability analysis doesn't apply to the entire shape of the article.'' [22] In consideration of this comment, the Office revised several sections, including sections 924, 924.2, 924.3(B), 924.3(E), 924.3(F), and 925.3, to confirm that copyright does not protect the overall shape of a useful article. Rather, copyright protects the design features that can be conceptually separated from a useful article.

In addition, the Office revised the draft to provide guidance on how to determine whether an item has an intrinsic utilitarian function and thus should be treated as a ''useful article.'' The *Compendium* makes clear that the Office does not consider the intended use of articles in industry when deciding whether a design is copyrightable. The Kernochan Center probed, however, ''[d]oesn't 'intended use' bear on whether the article has an 'intrinsic utilitarian purpose'?'' [23] In response, the Office revised sections 924.1 and 924.3(D) to confirm that when determining whether an article has an intrinsic utilitarian function, the Office focuses on the inherent, observable characteristics of the article, but will not consider the subjective intent or subjective reaction of any person in relation to that article. The Office also expanded sections 911, 920.2, 924.1, and 924.3(A) to list additional examples of two- and three-dimensional useful articles and confirmed that templates, stencils, and many costume designs are useful articles.[24]

Even if an article has an intrinsic utilitarian function, it will not necessarily be considered a useful article. Copyright law defines a useful article as ''an article having an intrinsic utilitarian function that is not merely to portray the appearance of the article or to convey information.'' [25] In response to a comment,[26] the Office revised several sections to explain that certain articles, including maps, x-rays, and technical drawings, are not useful articles because their only utilitarian function is to convey information.

The Office has made other revisions to clarify the two-step test to determine whether the design of a useful article may be eligible for copyright protection.[27] Regarding the first prong, the *Compendium* further explains that the artistic feature that is extracted must ''qualify as a nonuseful pictorial, graphic, or sculptural work on its own.'' *Star Athletica,* 137 S. Ct. at 1013. Because prior to the imaginary removal of the feature the work was a useful article and the removed feature must not be a useful article, at least some portion of the useful article must remain in the viewer's mind after the artistic feature has been imaginatively removed from the article. The Kernochan Center asked the Office to confirm whether '''some portion' needs to remain physically or imaginatively,'' and, ''if the latter,'' whether the Office is adopting the test proposed in *Kieselstein Cord* v. *Accessories by Pearl*.[28] 632 F.2d 989 (2d Cir. 1980). The Office revised the *Compendium* to specify that the Supreme Court explicitly declined to adopt alternate tests that had previously been applied by lower courts, and therefore the Office only applies the separability test set forth in *Star Athletica,* 137 S. Ct. at 1010–12. The Kernochan Center also suggested revisions to sections 924.3(A) and (B), which the Office adopted for clarity.[29]

In addition to revising chapter 900 to provide additional guidance on useful articles, the Office also revised several sections addressing works of artistic craftsmanship. The Kernochan Center requested clarification on how the Office distinguished a useful article from a work of artistic craftsmanship.[30] In response, the Office revised sections 925.1, 925.2, and 925.3 to modify the definition of works of artistic craftsmanship, add context from legislative history and examples of works with mechanical or utilitarian aspects, and provide additional information about the test the Office uses to determine if a work of artistic craftsmanship is copyrightable. The Office also clarified in section 908.1 that jewelry may be registered as works of artistic craftsmanship in certain circumstances (such as earrings, necklaces, rings), but jewelry designs affixed to useful articles are subject to the separability test.

**9. Puppets**

Shaftel & Schmelzer suggested that the *Compendium* explicitly address how puppets are examined and whether applicants should classify them as works of artistic craftsmanship or sculptures.[31] The Office edited several sections of the *Compendium,* including sections 503.1(B), 618.4(C), 808.11(D), 904, 910, to clarify that toys, dolls, stuffed animals, and puppets are typically treated as three-dimensional sculptural works.

**10. Short Online Literary Work**

The Final Version includes several sections that discuss the short online literary work group registration option, which was announced in the **Federal Register** on June 22, 2020.[32] Sections 1111.1 through 1111.7(R) discuss the

eligibility requirements for this group registration option, as well as the filing fee and deposit requirements, and provide guidance on completing the application. The Office revised sections 1407 and 1802 to add the new procedure for correcting or amending the information in a registration for short online literary works. This group registration option is also now listed as one of the available group registration options in numerous sections of the *Compendium.*

**11. Architectural Works**

The Final Version reflects the new requirements for registering architectural works, as described in the final rule published on April 23, 2019.[33] Section 503.1(B) includes updated examples of what constitutes an architectural work. Sections 609.2, 618.4(B), 619.13(E) and 1509.3(D) have been updated to reflect the requirement to submit an online application and provide a digital deposit when applying to register an architectural work. Sections 1404 and 1411 clarify that paper applications may not generally be used to register architectural works and describe the procedure for requesting a waiver to permit a paper application.

**12. Group Newspapers**

The Office amended several parts of section 1108 to reflect the changes to the regulations for the group registration option for newspapers that were finalized in November 2019.[34] The Office revised sections 1108.5 and 1116 to reflect the requirement to upload digital deposits and the phase-out of the option to submit microfilm as a deposit. The Office also updated section 1108.5(B) to explain the new procedure for requesting special relief from the digital deposit requirement.

**13. Group Newsletters**

The Final Version reflects the changes to the group registration option for newsletters, as described in the final rule published in May 2020.[35] The Office revised sections 1109 and 1116 and the Glossary to remove the requirement that newsletters be published at least two days per week to qualify for this registration option. Section 1109.5(B) was edited to clarify that special characters should not be included in the file name for the deposits. Section 1109.5(D) was updated to reflect the new procedure for requesting special relief from the digital deposit requirement.

**14. Group Serials**

The Office amended the Public Draft to reflect the changes to regulations for the group registration option for serials that were finalized in November 2019.[36] The Office revised several parts of sections 1107.5, 1107.6, 1116 and the Glossary to reflect the requirement to upload digital deposits and the phase-out of paper applications and physical deposits. The Office also updated section 1107.5(B) to explain the new procedure for requesting special relief from the digital deposit requirement.

**15. Group Photographs**

The NPPA requested clarification regarding a few points relating to group registration options for photographs. First, with respect to registration of a group of published photographs, the NPPA requested that the *Compendium* state more clearly that each photograph in the group must have been *first* published in the same calendar year, and that the applicant must specify the date each photograph was *first* published.[37] The Office revised section 1114.1 of the *Compendium* to make that point more clearly.

NPPA also requested clarification on the title and file names for specific photographs.[38] The Office revised section 1114.6(A) to specify that the title and file name for a particular photograph can be the same or different and that the file names provided with the list of titles must correspond to the file names included in the deposit. It is essential that the applicant provide title and file names and that each file name correspond to the file name of a photograph included in the deposit. If there is a discrepancy between the file names listed in the application and/or title list and those included in the deposit, section 1114.6 provides that the examiner may ask the applicant to exclude certain photographs from the claim or may refuse registration for the entire group, depending on the scope of the discrepancy.

**16. Unpublished Works**

The Office recently created a new group registration option for Unpublished Works. Since it issued the Public Draft, the Office developed new practices relating to the most common problems it has observed relating to these applications. The new practices are reflected in sections 1106, 1106.2, 1106.4, 1106.5, 1106.5(B), and 1106.5(E).

Specifically, sections 1106.4 and 1106.5(B) explain that, if the titles provided in the application do not match the file names shown in the deposit, the examiner may remove the mismatched titles and files from the record. These sections also include new examples that illustrate this practice. Section 1106.5(B) explains that if the applicant fails to provide titles of the works, the examiner may correspond with the applicant or may refuse registration. It also indicates that if an applicant provides a ''collection'' title (in addition to providing separate titles for each work), the collection title will be removed.

Section 1106 has been revised to specify that if any of the works are uncopyrightable, the examiner will refuse to register those works and issue a registration for any remaining works in the group, rather than requesting permission to remove the uncopyrightable works. This section also provides that applicants may appeal the examiner's decision.

Section 1106.2 explains that an application for a group registration for unpublished works must be filed using the online application designated for a ''Group of Unpublished Works.'' This section has been revised to clarify that if an applicant attempts to use the Standard Application or a paper application to register a group of unpublished works, the examiner may register the first copyrightable work listed in the application or the first copyrightable work uploaded to the electronic registration system. The examiner may notify the applicant that the registration extends only to the title listed in the certificate and explain how the remaining works may be registered. The examiner may also add an annotation stating that the registration only extends to the title listed in the certificate and remove the titles and deposits for the remaining works from the record.

The Office removed the language in section 1106.4 that encouraged applicants to submit their files in a zip folder. The Office has determined that PA/SR claims account for the majority of GRUW submissions, and it is difficult to examine these claims if they are submitted in a zip folder.

Sections 1802.4 and 1802.7(C) were revised to clarify that a supplementary registration may not be used to transform a registration for a group of unpublished works into a registration for a single published work. This is similar to the rule that applies to a

[38] *Id.* at 7.

registration for an unpublished collection.

In addition to these changes in the *Compendium,* the Office plans to create a new landing page with links to a new circular, a set of FAQs, video tutorials, and help text for this new group registration option. The Office believes these new practices and updated materials will clarify the application procedures for this group registration option, making it easier for applicants to comply with the requirements.

**17. Unpublished Collections**

Chapter 1100 of the *Compendium* notes in several places that the unpublished collections registration option was eliminated as of March 15, 2019. Graphic Artists Guild commented that visual artists used that registration option frequently in the past and requested that the note regarding its elimination appear as a separate section for ease of reference.[39] The Office added section 1106.6, which discusses the elimination of the unpublished collections registration option in detail.

The Office also added cross-references in section 901 to the sections in the *Compendium* discussing the group registration option for unpublished works, as well as all other available registration options for visual art works.[40]

**18. Collective Works**

The Copyright Alliance criticized the description of the originality requirement for compilations in section 312.2 of the *Compendium,* which states that the Office ''generally will not register a compilation containing only two or three elements, because the selection is necessarily de minimis.'' The Copyright Alliance claims the Office relies on this language to refuse to register compilations containing fewer than four works.[41]

The Office has not revised this section of the *Compendium.* Section 312.2 clearly states that a compilation is registrable if there is ''some minimal degree of creativity'' in the selection, coordination, or arrangement of the component materials. The Office believes it is helpful to inform the public that, in general, the selection of fewer than four elements will not satisfy the originality requirement. However, the Office does not have a bright line rule, either in the *Compendium* or in practice, regarding the number of works that must be included in a compilation to be registrable. Each application is examined individually to determine if the work displays the requisite originality.

**19. Sound Recording/Recorded Work**

Section 1104 discusses the option to register a sound recording and a musical work embodied in that recording in one application with one filing fee. It explains that if the Office determines the works are eligible to be registered in one application, it will issue one certificate of registration for both works with a registration number beginning with the prefix SR or SRu, depending on whether the works are published or unpublished. NMPA expressed concern that the policy of registering a sound recording and a musical work with only an SR registration number may confuse those seeking to locate a musical work copyright owner and suggested that the Office grant two separate registration numbers in this situation, one for the sound recording and one for the musical work.[42] The Office appreciates this concern, but longstanding regulations only permit the Office to issue one registration based on one application. Applicants who want to have separate registration numbers for a sound recording and the musical work may submit separate applications on Form PA and Form SR.

**20. Musical Works**

The Final Version includes changes to the sections discussing the deposit requirements for musical works, which were updated in January 2018.[43] The Office revised Circular 50 (Musical Compositions) to reflect this change prior to releasing the Public Draft, but it inadvertently failed to make similar edits to the *Compendium.* Several parts of section 1509.2 were updated to explain that ''best edition'' copies are required if a musical work is published in printed form, but are not required if the work is published solely on phonorecords or in a motion picture.

**21. Artificial Intelligence**

Engine Advocacy and the Cyberlaw Clinic offered suggestions for evaluating the registrability of works created using artificial intelligence.[44] The Office recognizes that the increasing use of artificial intelligence in developing creative works raises important copyright issues. This is an evolving area of copyright law, and the Office is participating in and monitoring discussions on these issues. For example, the Office held a symposium with the World Intellectual Property Organization (WIPO) entitled Copyright in the Age of Artificial Intelligence in February 2020. The Office has no plans to amend the relevant sections of the *Compendium* at this time.

**22. Statutory Developments**

The Copyright Alliance noted that the Public Draft did not mention many new procedures the Office has established under the Music Modernization Act, including procedures for filing schedules for pre-1972 sound recordings, notices of noncommercial use, or opt-outs, and that references to pre-1972 sound recordings are inaccurate or out of date.[45] The Office is considering updating the *Compendium* to reflect all changes made in response to the passage of the Music Modernization Act, including new procedures adopted by the Office in connection with pre-1972 sound recordings and other procedures noted by the Copyright Alliance. Those changes would be made in a future revision of the *Compendium.* In the meantime, the Office added the Music Modernization Act to the list of major copyright legislation, explained that it provides remedies for unauthorized use of pre-1972 sound recordings if certain schedules are filed, revised its discussion of preemption, and provided a link to the Copyright Office's web page discussing pre-1972 sound recordings. Sections 102.5, 102.7, 202.1, 313.5, 608, 803.5(D), 1702.

The Final Version adds the Marrakesh Treaty to the list of copyright treaties the United States has ratified in sections 102.7 and 2004.1. And section 313.6(C)(1) indicates that certain literary works created by civilian faculty members of U.S. military academies and institutions are not ''U.S. Government Works,'' based on the National Defense Authorization Act for Fiscal Year 2020.

**23. Other Issues**

The Office revised various sections of the Public Draft to reflect new fees or new terminology added to the fee schedule adopted on February 19, 2020.[46] The Office made a number of additional changes in the Final Version to ensure that the contents are consistent with regulatory requirements and that the *Compendium* is internally consistent. These changes include revisions to:

[39] Graphic Artists Guild Comment at 4.

[40] Shaftel & Schmelzer Comment at 4.

[41] Copyright Alliance Comment at 6.

[42] National Music Publishers' Association Comment at 4.

[43] *See* 83 FR 2371 (Jan. 17, 2018).

[44] Engine Advocacy Comment at 8–11 (May 14, 2019); Cyberlaw Clinic Comment at 1–8 (May 31, 2019).

[45] Copyright Alliance Comment at 8.

[46] *See* 85 FR 9374 (Feb. 19, 2020).

• Section 611.2(B) to use language that matches language used in the eCo application;

• section 617.3 to clarify that an organization need not provide its country of citizenship if it has completed the domicile space;

• section 618.4 to remove language suggesting that ''direction'' is an acceptable authorship statement for a dramatic work;

• section 609 to clarify that Form SE may not be used to register an unpublished serial and to clarify which administrative classes the Office has established for registration purposes;

• sections 607, 1509.1(F) and 1509.1(F)(4)(b) to clarify that a computer program containing trade secrets may be registered with object code, but the applicant must include at least ten pages of source code in the deposit;

• sections 1010.3 and 1010.4 to clarify that, although digital uploads are preferred, physical deposits for claims involving online works may be sent to the Office by a commercial carrier, such as FedEx or UPS;

• section 1509.2(B)(4) to summarize the deposit requirements for sound recordings first published in a foreign country;

• sections 624.3, 1802.8(B)(6) and 1802.9(F) to explain that a typed or printed signature will be accepted on a paper application;

• section 625.3 to clarify that if there is a ''short fee,'' the effective date of registration will be the date the full fee is received;

• section 1807.4(B) to clarify that if the payment for a registration application ''bounces,'' the Office will cancel the registration and notify the applicant, as required by regulation;

• sections 618.4(A), 1010.4, and 1508.1 to reflect technical upgrades that have been made to the eCO system; and

• various sections to reflect a new format used for annotating registration certificates and to include commonly-used annotations.

The Final Version also corrects typographical errors and errors in citations or cross-references, replaces outdated terminology, and makes formatting changes. The Table of Authorities has been updated to reflect new citations used in or removed from the *Compendium.* Finally, the Office has added references to additional court decisions that have cited the *Compendium* since the 2017 version was released.

Dated: January 8, 2021.

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

**[Notice: 21–001]**

### Notice of Intent To Grant a Partially Exclusive Patent License

**AGENCY:** National Aeronautics and Space Administration.

**ACTION:** Notice of intent to grant a partially exclusive patent license.

**SUMMARY:** NASA hereby gives notice of its intent to grant an exclusive, co-exclusive or partially exclusive patent license in the United States of America to practice the invention(s) described and claimed in U.S Patent No. 9,023,642 B2, Method and Apparatus for a Miniature Bioreactor System for Long-Term Cell Culture to Brand Labs USA, LLC, having its principal place of business in Pompano Beach, Florida. The fields of use may be limited. NASA has not yet made a determination to grant the requested license and may deny the requested license even if no objections are submitted within the comment period.

**DATES:** The prospective exclusive may be granted unless NASA receives written objections including evidence and argument, no later than January 29, 2021 that establish that the grant of the license would not be consistent with the requirements regarding the licensing of federally owned inventions as set forth in the Bayh-Dole Act and implementing regulations. Competing applications completed and received by NASA no later than January 29, 2021 will also be treated as objections to the grant of the contemplated exclusive, co-exclusive or partially exclusive license. Objections submitted in response to this notice will not be made available to the public for inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act.

**ADDRESSES:** Objections relating to the prospective license may be submitted to Patent Counsel, Office of Chief Counsel, MS AL, NASA Johnson Space Center, 2101 NASA Parkway, Houston, TX 77058. Phone (281) 483–4871. Facsimile (281) 483–6936. Email: *jsc-patentof@mail.nasa.gov.*

**FOR FURTHER INFORMATION CONTACT:** Mr. Walter Ugalde, Technology Transfer and Commercialization Office/XT1, Johnson Space Center, Houston, TX 77058, (281) 483–8615.

**SUPPLEMENTARY INFORMATION:** This notice of intent to grant an exclusive, co-exclusive or partially exclusive patent license is issued in accordance with 35 U.S.C. 209(e) and 37 CFR 404.7(a)(1)(i). The patent rights in these inventions have been assigned to the United States of America as represented by the Administrator of the National Aeronautics and Space Administration. The prospective license will comply with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

Information about other NASA inventions available for licensing can be found online at *http://technology.nasa.gov.*

**Helen M. Galus,**

## NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

**[Notice: (21–002)]**

### Notice of Intent To Grant a Partially Exclusive License

**AGENCY:** National Aeronautics and Space Administration.

**ACTION:** Notice of intent to grant partially exclusive patent license.

**SUMMARY:** NASA hereby gives notice of its intent to grant a partially exclusive patent license in the United States to practice the inventions described and claimed in U.S. Patent No. 7,075,295 B2 for an invention titled ''Magnetic Field Response Sensor for Conductive Media,'' NASA Case Number LAR–16571–1; U.S. Patent No. 7,589,525 B2 for an invention titled ''Magnetic Field Response Sensor for Conductive Media,'' NASA Case Number LAR–16571–2; U.S. Patent No. 7,759,932 B2 for an invention titled ''Magnetic Field Response Sensor for Conductive Media,'' NASA Case Number LAR–16571–3; U.S. Patent No. 7,086,593 B2 for an invention titled ''Magnetic Field Response Measurement Acquisition System,'' NASA Case Number LAR–16908–1; U.S. Patent No. 7,047,807 B2 for an invention titled ''Flexible Framework for Capacitive Sensing,'' NASA Case Number LAR–16974–1; U.S. Patent No. 7,159,774 B2 for an invention titled ''Magnetic Field Response Measurement Acquisition System,'' NASA Case Number LAR–17280–1; U.S. Patent No. 8,430,327 B2 for an invention titled ''Wireless Sensing System Using Open-Circuit, Electrically-Conductive

Spiral-Trace Sensor,'' NASA Case Number LAR–17294–1; U.S. Patent No. 8,673,649 B2 for an invention titled ''Wireless Chemical Sensor and Sensing Method for Use Therewith,'' NASA Case Number LAR–17579–1; U.S. Patent No. 9,329,149 B2 for an invention titled ''Wireless Chemical Sensor and Sensing Method for Use Therewith,'' NASA Case Number LAR–17579–2; U.S. Patent No. 9,733,203 B2 for an invention titled ''Wireless Chemical Sensing Method,'' NASA Case Number LAR–17579–3; U.S. Patent No. 10,031,031 B2 for an invention titled ''Wireless Temperature Sensing Method Using No Electrical Connections,'' NASA Case Number LAR–17747–1–CON; U.S. Patent No. 10,605,673 B2 for an invention titled ''Wireless Temperature Sensor Having No Electrical Connections,'' NASA Case Number LAR–17747–2–CON; U.S. Patent No. 10,180,341 B2 for an invention titled ''Multi-Layer Wireless Sensor Construct for Use at Electrically-Conductive Material Surfaces,'' NASA Case Number LAR–18399–1; and U.S. Patent Application No. 10,193,228 B2 for an invention titled ''Antenna for Far Field Transceiving,'' NASA Case Number LAR–18400–1 to Aquatherm LP, having its principal place of business in Lindon, UT. The fields of use may be limited to polypropylene and plastic containers and pipes, and associated fittings and joints, within residential structures, and including but not limited to the non-destructive evaluation of the aforementioned containers and pipes and the detection of conditions and states of the contents therein, and/or similar field(s) of use thereto. NASA has not yet made a determination to grant the requested license and may deny the requested license even if no objections are submitted within the comment period.

**DATES:** The prospective partially exclusive license may be granted unless NASA receives written objections including evidence and argument, no later than January 29, 2021 that establish that the grant of the license would not be consistent with the requirements regarding the licensing of federally owned inventions as set forth in the Bayh-Dohl Act and implementing regulations. Competing applications completed and received by NASA no later than January 29, 2021 will also be treated as objections to the grant of the contemplated partially exclusive license. Objections submitted in response to this notice will not be made available to the public for inspection and, to the extent permitted by law, will not be released under the Freedom of Information Act.

**ADDRESSES:** Objections relating to the prospective license may be submitted to Patent Counsel, Office of the General Counsel, NASA Langley Research Center. Phone (757) 864–3221. Email: *robin.w.edwards@nasa.gov.*

**FOR FURTHER INFORMATION CONTACT:** Robin W. Edwards, Patent Counsel, Office of the General Counsel, NASA Langley Research Center. Phone (757) 864–3221. Email: *robin.w.edwards@nasa.gov.*

**SUPPLEMENTARY INFORMATION:** This notice of intent to grant a partially exclusive patent license is issued in accordance with 35 U.S.C. 209(e) and 37 CFR 404.7(a)(1)(i). The patent rights in these inventions have been assigned to the United States of America as represented by the Administrator of the National Aeronautics and Space Administration. The prospective partially exclusive license will comply with the requirements of 35 U.S.C. 209 and 37 CFR 404.7.

## NATIONAL FOUNDATION ON THE ARTS AND THE HUMANITIES

### Institute of Museum and Library Services

### Notice of Proposed Information Collection Requests: 2022–2024 IMLS Native Hawaiian Library Services Grant Program Notice of Funding Opportunity

**AGENCY:** Institute of Museum and Library Services, National Foundation for the Arts and the Humanities.

**ACTION:** Submission for OMB Review, comment request.

**SUMMARY:** The Institute of Museum and Library Services announces that the following information collection has been submitted to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The purpose of this Notice is to solicit comments about this assessment process, instructions, and data collections.

A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **ADDRESSES** section of this notice.

**DATES:** Written comments must be submitted to the office listed in the **FOR FURTHER INFORMATION CONTACT** section below on or before February 15, 2021.

OMB is particularly interested in comments that help the agency to:

- Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
- Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
- Enhance the quality, utility, and clarity of the information to be collected; and
- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (*e.g.,* permitting electronic submission of responses).

**ADDRESSES:** Written comments and recommendations for proposed information collection requests should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection request by selecting ''Institute of Museum and Library Services'' under ''Currently Under Review;'' then check ''Only Show ICR for Public Comment'' checkbox. Once you have found this information collection request, select ''Comment,'' and enter or upload your comment and information. Alternatively, please mail your written comments to Office of Information and Regulatory Affairs, Attn.: OMB Desk Officer for Education, Office of Management and Budget, Room 10235, Washington, DC 20503, or call (202) 395–7316.

**FOR FURTHER INFORMATION CONTACT:** Connie Bodner, Ph.D., Director of Grants Policy and Management, Office of Grants Policy and Management, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW, Suite 4000, Washington, DC 20024–2135. Dr. Bodner can be reached by telephone at 202–653–4636 or by email at *cbodner@imls.gov.* Office hours are from 8:30 a.m. to 5 p.m., E.T., Monday through Friday, except Federal holidays.

**SUPPLEMENTARY INFORMATION:** The Institute of Museum and Library Services is the primary source of federal support for the nation's libraries and museums. We advance, support, and empower America's museums, libraries, and related organizations through grant making, research, and policy development. Our vision is a nation where museums and libraries work together to work together to transform the lives of individuals and communities. To learn more, visit *www.imls.gov.*

*Current Actions:* The purpose of this collection is to support existing Native Hawaiian library operations and maintain core library services, particularly as they relate to the following goals in the Museum and Library Services Act (20 U.S.C. 9141).

1. Expanding services for learning and access to information and educational resources in a variety of formats (including new and emerging technology), in all types of libraries, for individuals of all ages in order to support such individuals' need for education, lifelong learning, workforce development, economic and business development, health information, critical thinking skills, digital library skills, and financial literacy and other types of literacy skills.

2. Establishing or enhancing electronic and other linkages and improved coordination among and between libraries and entities, as described in 20 U.S.C. 9134(b)(6), for the purpose of improving the quality of and access to library and information services.

3. Providing training and professional development, including continuing education, to enhance the skills of the current library workforce and leadership, and advance the delivery of library and information services; and enhancing efforts to recruit future professionals, including those from diverse and underrepresented backgrounds, to the field of library and information services.

4. Developing public and private partnerships with other agencies, tribes, and community-based organizations.

5. Targeting library services to individuals of diverse geographic, cultural, and socioeconomic backgrounds, to individuals with disabilities, and to individuals with limited functional literacy or information skills.

6. Targeting library and information services to persons having difficulty using a library and to underserved urban and rural communities, including children (from birth through age 17) from families with incomes below the poverty line (as defined by the Office of Management and Budget and revised annually in accordance with 42 U.S.C. 9902(2)) applicable to a family of the size involved.

7. Developing library services that provide all users access to information through local, State, regional, national, and international collaborations and networks.

8. Carrying out other activities consistent with the purposes of the Library Services and Technology subchapter of the IMLS statute (20 U.S.C. 9121).

Nonprofit organizations that primarily serve and represent Native Hawaiians (as the term is defined in 20 U.S.C. 7517) are eligible to apply for funding under the Naïve Hawaiian Library Program.

This action is to renew the forms and instructions for the Notice of Funding Opportunities for the next three years. The 60-day notice for the 2022–2024 IMLS Native Hawaiian Library Services Grant Program Notice of Funding Opportunity was published in the **Federal Register** on October 9, 2020, (85 FR 64169–64170). No comments were received.

*Agency:* Institute of Museum and Library Services.

*Title:* 2022–2024 IMLS Native Hawaiian Library Services Grant Program Notice of Funding Opportunity.

*OMB Number:* 3137–0102.

*Frequency:* Once per year.

*Affected Public:* Nonprofit organizations serving Native Hawaiians.

*Number of Respondents:* 13.

*Estimated Average Burden per Response:* 40 hours.

*Estimated Total Annual Burden:* 520 hours.

*Total Annualized capital/startup costs:* n/a.

*Total Annual costs:* $15,480.40.

*Total Federal costs:* $1,768.88.

*Public Comments Invited:* Comments submitted in response to this notice will be summarized and/or included in the request for OMB's clearance of this information collection.

Dated: January 11, 2021.

**Kim Miller,**

*Senior Grants Management Specialist,Institute of Museum and Library Services.*

## NATIONAL FOUNDATION FOR THE ARTS AND THE HUMANITIES

### Institute of Museum and Library Services

### Submission for OMB Review, Comment Request, Proposed Collection Requests: Request for Advance or Reimbursement Web Form

**AGENCY:** Institute of Museum and Library Services, National Foundation for the Arts and the Humanities.

**ACTION:** Submission for OMB review, comment request.

**SUMMARY:** The Institute of Museum and Library Services announces that the following information collection has been submitted to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This program helps to ensure that requested data can be provided in the desired format, reporting burden (time and financial resources) is minimized, collection instruments are clearly understood, and the impact of collection requirements on respondents can be properly assessed. The purpose of this Notice is to solicit comments about the web form used by IMLS awardees to request advance or reimbursement payments. A copy of the proposed information collection request can be obtained by contacting the individual listed below in the **ADDRESSES** section of this notice.

**DATES:** Written comments must be submitted to the office listed in the **FOR FURTHER INFORMATION CONTACT** section below on or before February 10, 2021.

OMB is particularly interested in comments that help the agency to:

• Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

• Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

• Enhance the quality, utility, and clarity of the information to be collected; and

• Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology (*e.g.,* permitting electronic submission of responses).

**ADDRESSES:** Written comments and recommendations for proposed information collection requests should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection request by selecting ''Institute of Museum and Library Services'' under ''Currently Under Review,'' then check ''Only Show ICR for Public Comment'' checkbox or mail to Office of Information and Regulatory Affairs, *Attn.:* OMB Desk Officer for Education, Office of Management and Budget, Room 10235, Washington, DC 20503, 202–395–7316.

**FOR FURTHER INFORMATION CONTACT:** Connie Bodner, Ph.D., Director of Grants Policy and Management, Office of Grants Policy and Management, Institute of Museum and Library Services, 955 L'Enfant Plaza North SW, Suite 4000, Washington, DC 20024–2135. Dr. Bodner can be reached by telephone at 202–653–4636 or by email at *cbodner@imls.gov.* Office hours are from 8:30 a.m. to 5 p.m., E.T., Monday through Friday, except Federal holidays.

**SUPPLEMENTARY INFORMATION:** The Institute of Museum and Library Services is the primary source of federal support for the nation's libraries and museums. We advance, support, and empower America's museums, libraries, and related organizations through grant making, research, and policy development. Our vision is a nation where museums and libraries work together to work together to transform the lives of individuals and communities. To learn more, visit *www.imls.gov.*

*Current Actions:* The purpose of this collection is to administer the IMLS process by which IMLS awardees request advance or reimbursement payments. The proposed form will be embedded in the electronic grants management system that the agency uses to monitor and service all active awards during the period of performance and through closeout.

The 60-day notice for the IMLS Grant Application Forms was published in the **Federal Register** on October 22, 2020, (85 FR 67379). No comments were received.

*Agency:* Institute of Museum and Library Services.

*Title:* Request for Advance or Reimbursement Web Form.

*OMB Number:* 3137–NEW.

*Frequency:* Annual.

*Affected Public:* Library and Museum funding awardees.

*Number of Respondents:* 5,000.

*Average Minutes per Response:* 60 minutes.

*Total Estimated Number of Annual Burden Hours:* 5,000.

*Cost Burden (dollars):* $145,500.00.

*Total Federal Costs:* $43,750.00.

Dated: January 8, 2021.

## NATIONAL FOUNDATION ON THE ARTS AND HUMANITIES

## National Endowment for the Humanities

## Civil Penalty Adjustments for 2021

**AGENCY:** National Endowment for the Humanities; National Foundation on the Arts and the Humanities.

**ACTION:** Notice of civil penalty adjustments for 2021.

**SUMMARY:** The National Endowment for the Humanities (NEH) is giving notice of the adjusted maximum and minimum civil monetary penalties that it may impose for violations of its New Restrictions on Lobbying, as required by the Federal Civil Penalties Inflation Adjustment Act Improvements Act of 2015 (the 2015 Act). The updated penalty amounts are adjusted for inflation and are effective from January 15, 2021 through January 14, 2022.

**DATES:** The updated civil penalties in this notice are applicable to penalties assessed on or after January 15, 2021 if the associated violations occurred after November 2, 2015.

**FOR FURTHER INFORMATION CONTACT:** Elizabeth Voyatzis, Deputy General Counsel, Office of the General Counsel, National Endowment for the Humanities, 400 7th Street SW, Room 4060, Washington, DC 20506; (202) 606–8322; *gencounsel@neh.gov.*

**SUPPLEMENTARY INFORMATION:**

### 1. Background on NEH's New Restrictions on Lobbying Regulation

On April 21, 2020, NEH published an interim final rule implementing the 2015 Act (28 U.S.C. 2461 note) and adjusting the civil penalties found in its New Restrictions on Lobbying regulation (45 CFR 1168) pursuant to the 2015 Act.[1] The interim final rule incorporated the initial ''catch up'' adjustment and the annual adjustment for 2020. NEH announced in its interim final rule that, for all future adjustments to penalties under its New Restrictions on Lobbying regulation required by the 2015 Act, NEH will publish a Notice in the **Federal Register** to notify the public of the updated penalty amounts no later than January 15 of each year.

NEH published a final rule on June 11, 2020, adopting the interim final rule without change.[2]

### 2. 2021 Adjustment to Civil Penalties Under NEH's New Restrictions on Lobbying Regulation

For 2020, the penalty range for violations under NEH's New Restrictions on Lobbying regulation was a minimum of $20,489 and a maximum of $204,892.[3] Therefore, the new, post-adjustment minimum penalty for 2021 under NEH's New Restrictions on Lobbying regulation is $\$20,489 \times 1.01182 = \$20,731.18$ which rounds to $20,731.

The new, post-adjustment maximum penalty for 2021 under NEH's New Restrictions on Lobbying regulation is $\$204,892 \times 1.01182 = \$207,313.823$, which rounds to $207,314. These post-adjustment penalties are less than 250 percent of the pre-adjustment penalties, so they do not implicate the post-adjustment amount limitation in the 2015 Act.

Thus, the range of penalties under NEH's New Restrictions on Lobbying regulation, for the purposes of the 2021 adjustment, is a minimum of $20,731 and a maximum of $207,314.

## SECURITIES AND EXCHANGE COMMISSION

**[SEC File No. 270–146, OMB Control No. 3235–0134]**

### Submission for OMB Review; Comment Request

*Upon Written Request, Copies Available From:* U.S. Securities and Exchange Commission, Office of FOIA Services, Washington, DC 20549–2736

*Extension:*
Rule 15c1–7

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 (''PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for approval of extension of the existing collection of information provided for in Rule 15c1–7 (17 CFR 240.15c1–7) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*) (''Exchange Act'').

Rule 15c1–7 states that any act of a broker-dealer designed to effect securities transactions with or for a customer account over which the broker-dealer (directly or through an agent or employee) has discretion will be considered a fraudulent, manipulative, or deceptive practice under the federal securities laws, unless a record is made of the transaction immediately by the broker-dealer. The record must include (a) the name of the customer, (b) the name, amount, and price of the security, and (c) the date and time when such transaction took place. The Commission estimates that 362 respondents collect information related to approximately 400,000 transactions annually under Rule 15c1–7 and that each respondent would spend approximately 5 minutes on the collection of information for each transaction, for approximately 33,333 aggregate hours per year (approximately 92.1 hours per respondent).

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o Cynthia Roscoe, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

Dated: January 11, 2021.

## SECURITIES AND EXCHANGE COMMISSION

**[Release Nos. 33–10919; 34–90882; File No. 265–32]**

### SEC Small Business Capital Formation Advisory Committee

**AGENCY:** Securities and Exchange Commission.

**ACTION:** Notice of meeting.

**SUMMARY:** The Securities and Exchange Commission Small Business Capital Formation Advisory Committee, established pursuant to Section 40 of the Securities Exchange Act of 1934 as added by the SEC Small Business Advocate Act of 2016, is providing notice that it will hold a public meeting by videoconference. The public is invited to submit written statements to the Committee.

**DATES:** The meeting will be held on Friday, January 29, 2021, from 10:00 a.m. to 2:30 p.m. (ET) and will be open to the public. Written statements should be received on or before January 29, 2021.

**ADDRESSES:** The meeting will be conducted by remote means (videoconference). Members of the public may attend the meeting by viewing the webcast on the Commission's website at *www.sec.gov.* Written statements may be submitted by any of the following methods:

*Electronic Statements*

- Use the Commission's internet submission form (*https://www.sec.gov/rules/submitcomments.htm*); or
- Send an email message to *rule-comments@sec.gov.* Please include File Number
265–32 on the subject line; or

*Paper Statements*

- Send paper statements to Vanessa A. Countryman, Secretary, Securities and Exchange Commission, 100 F Street, NE, Washington, DC 20549–1090.

All submissions should refer to File No. 265–32. This file number should be included on the subject line if email is used. To help us process and review your statement more efficiently, please use only one method. The Commission will post all statements on the SEC's website at *www.sec.gov.*

Statements also will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. (ET). All statements received will be posted without change; we do not edit personal identifying information from submissions. You should submit only information that you wish to make available publicly.

**FOR FURTHER INFORMATION CONTACT:** Julie Z. Davis, Senior Special Counsel, Office of the Advocate for Small Business Capital Formation, at (202) 551–5407, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–3628.

**SUPPLEMENTARY INFORMATION:** The meeting will be open to the public. Persons needing special accommodations because of a disability should notify the contact person listed in the section above entitled **FOR FURTHER INFORMATION CONTACT**. The agenda for the meeting includes matters relating to rules and regulations affecting small and emerging companies and their investors under the federal securities laws.

Dated: January 11, 2021.

**Vanessa A. Countryman,**

*Secretary.*

## SECURITIES AND EXCHANGE COMMISSION

**[SEC File No. 270–422, OMB Control No. 3235–0471]**

## Submission for OMB Review; Comment Request

*Upon Written Request, Copies Available From:* U.S. Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

*Extension:*
Rule 15c1–5

Notice is hereby given that pursuant to the Paperwork Reduction Act of 1995 ('PRA'') (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (''Commission'') has submitted to the Office of Management and Budget (''OMB'') a request for approval of extension of the previously approved collection of information provided for in Rule 15c1–5 (17 CFR 240.15c1–5) under the Securities Exchange Act of 1934 (15 U.S.C. 78a *et seq.*).

Rule 15c1–5 states that any broker-dealer controlled by, controlling, or under common control with the issuer of a security that the broker-dealer is trying to sell to or buy from a customer must give the customer written notification disclosing the control relationship at or before completion of the transaction. The Commission estimates that 181 respondents provide notifications annually under Rule 15c1–5 and that each respondent would spend approximately 10 hours per year complying with the requirements of the rule for a total burden of approximately 1,810 hours per year. There is no retention period requirement under Rule 15c1–5. This Rule does not involve the collection of confidential information.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information under the PRA unless it displays a currently valid OMB control number.

The public may view background documentation for this information collection at the following website: *www.reginfo.gov.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function. Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to (i) *www.reginfo.gov/public/do/PRAMain* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o Cynthia Roscoe, 100 F Street NE, Washington, DC 20549, or by sending an email to: *PRA_Mailbox@sec.gov.*

Dated: January 11, 2021.

**J. Matthew DeLesDernier,**

*Assistant Secretary.*

**[Release No. 34–90880; File No. SR–Phlx–2021–03]**

## Self-Regulatory Organizations; Nasdaq PHLX LLC; Notice of Filing of Proposed Rule Change To Modify Phlx Options 8, Section 26, "Trading Halts, Business Continuity and Disaster Recovery"

January 8, 2021.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 (''Act''),[1] and Rule 19b–4 thereunder,[2] notice is hereby given that on January 7, 2021 Nasdaq PHLX LLC (''Phlx'' or ''Exchange'') filed with the Securities and Exchange Commission (''SEC'' or ''Commission'') the proposed rule change as described in Items I, II, and III, below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

### I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange proposes to modify Phlx Options 8, Section 26, ''Trading Halts, Business Continuity and Disaster Recovery'' to permit a Virtual Trading Crowd in the event that the Trading Floor is unavailable.

The text of the proposed rule change is available on the Exchange's website at *https://listingcenter.nasdaq.com/rulebook/phlx/rules,* at the principal office of the Exchange, and at the Commission's Public Reference Room.

### II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

[1] 15 U.S.C. 78s(b)(1).

[2] 17 CFR 240.19b–4.

*A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change*

1. Purpose

Phlx proposes to modify Phlx Options 8, Section 26, ''Trading Halts, Business Continuity and Disaster Recovery.'' This proposal creates an additional contingency within Phlx's Business Continuity Plan (''BCP'') to prepare for potential closure of its physical Trading Floor in light of COVID–19. Specifically, the Exchange proposes to amend Options 8, Section 26(g) to permit Phlx to operate a newly proposed Virtual Trading Crowd in the event the physical Trading Floor is unavailable.

Background

Currently, Options 8, Section 26(g) describes certain actions the Exchange may take as part of its BCP, if its Trading Floor became inoperable, so that it may maintain fair and orderly markets if unusual circumstances were to occur which may impact the Exchange's ability to conduct its options floor business. Specifically, in the event of loss of the Trading Floor, if the physical location [3] designated as the ''Trading Floor'' becomes unavailable Phlx will enact its BCP and designate the Philadelphia Navy Yard as its ''Back-Up Trading Floor.'' Further, in the event that the Back-Up Trading Floor becomes unavailable or inoperable, the Exchange will only operate its electronic market and will not operate a Trading Floor. The Exchange will operate only its electronic market until the Exchange's Trading Floor facility is operational. Open outcry trading will not be available in the interim.[4]

Phlx's Trading Floor closed on March 17, 2019,[5] as a result of precautions taken with respect to COVID–19.[6] The Exchange continued to operate in an all-electronic configuration during this time period. Since that time, Phlx has been exploring alternatives to permit open outcry trading in the event of an extended closure related to COVID–19 or potentially a second closure in 2020 and/or 2021 given the uncertainty related to the ongoing pandemic. Phlx notes that an all-electronic trading environment cannot fully replicate open outcry trading, and therefore, the Exchange continues to evaluate potential enhancements that it believes would permit trading, in the event the Trading Floor is inoperable, to more closely replicate its trading environment that exists during normal operations.[7]

Phlx proposes to amend Options 8, Section 26(g)(2) to provide,

> *Back-up Trading Floor Unavailable.* In the event that the Back-Up Trading Floor becomes inoperable, or the Exchange otherwise determines not to operate its Back-Up Trading Floor the Exchange will operate its electronic market and may elect to enact a Virtual Trading Crowd pursuant to subsection (g)(3).

Today, Options 8, Section 26(g)(2) provides that if the Back-Up Trading Floor becomes inoperable, the Exchange will only operate its electronic market and will not operate a Trading Floor. Further, the rule provides the Exchange will operate only its electronic market until the Exchange's Trading Floor facility is operational. Open outcry trading will not be available in the interim.

At this time, the Exchange desires to adopt a virtual option in the event the physical Trading Floor is unavailable, the Back-Up Trading Floor becomes inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor.[8] Specifically, Phlx's proposal would permit certain aspects of open outcry trading, which are normally conducted in-person on the Trading Floor, to be conducted in a virtual trading crowd (''Virtual Trading Crowd''). This proposal is intended to enhance Phlx's BCP by offering an alternative which comports with shelter-in-place and social distancing guidelines and would provide institutional investors with a means to execute orders that are unable to meet guidelines of the electronic market.[9] Specifically, this proposal would further enhance the Exchange's trading environment when the Trading Floor is unavailable, the Back-up Trading Floor is inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor, by permitting market participants that generally operate on the physical Trading Floor to continue to interact in a substantially similar manner as they do on the Trading Floor. Specifically, the Exchange proposes to further amend Options 7, Section 26(g) to permit it to make available an audio and video communication program to serve as a ''Virtual Trading Crowd'' if the physical Trading Floor is unavailable, the Back-Up Trading Floor becomes inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor. The Exchange would create ''Virtual Trading Crowds,'' in each of which the Exchange will determine which options class(es) will be available for trading. This is similar to the Exchange's authority with respect to open outcry trading on the Trading Floor.[10] Phlx members will access a Virtual Trading Crowd via ''zones.'' [11] Multiple classes may trade in a single Virtual Trading Crowd available for trading in a single zone. This is similar to the physical Trading Floor today. The Exchange may determine to have only one zone or several zones as necessary to ensure a fair and orderly market. The Exchange will assign each Floor Market Maker to a zone and Floor Brokers may determine in which zone(s) they will be present. This is similar to the arrangement on the Exchange's physical Trading Floor. Unlike Cboe, Phlx has a requirement that each trading crowd have a Floor Market Maker present.[12] Phlx ensures that this requirement is met by assigning Floor Market Makers to a trading crowd.[13] If a Floor Market

[3] Phlx's physical Trading Floor is located at 2929 Walnut Street, Philadelphia, PA.

[4] This Rule does not preclude the Exchange from conducting business, in the event the Trading Floor and Back-Up Trading Floor are rendered inoperable, pursuant to Options 4, Section 10. Current Options 4, Section 10, Backup Trading Arrangements, outlines rules applicable to hosting Phlx at another exchange in the event Phlx is disabled.

[5] *See* Options Trader Alert #2020–07. Phlx's Trading Floor did not re-open until June 3, 2020. *See* Options Trader Alert #2020–08.

[6] On March 11, 2020, the World Health Organization characterized COVID–19 as a pandemic and to slow the spread of the disease, federal and state officials implemented social-distancing measures, placed significant limitations on large gatherings, limited travel, and closed non-essential businesses.

[7] Certain aspects of open outcry trading, particularly the ability for persons to negotiate pricing and to facilitate executions of larger orders in a trading crowd as well as the handling of high-risk and complicated strategies, are not easily replicated in electronic markets.

[8] The proposed rule regarding the Virtual Trading Crowd is located in the Exchange's broader rule regarding disaster recovery and business continuity, as the Exchange currently only plans to use the Virtual Trading Crowd for business continuity purposes if the physical Trading Floor becomes unavailable, the Back-Up Trading Floor becomes inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor. If the Exchange were to determine to use the Virtual Trading Crowd in more permanent manner, it would submit a separate rule filing.

[9] For example, there are certain aspects of trading where the rules differ electronically and on the Trading Floor. Complex Orders are traded differently electronically versus on the Trading Floor based on Exchange rules.

[10] *See* Options 8, Section 25(l) which provides, ''In the interest of fair and orderly markets, the Exchange may adopt policies affecting the location of members in the trading crowd on a crowd-by-crowd basis.''

[11] A ''zone'' is a virtual room representing a Virtual Trading Crowd. For example, each trading crowd will have its own zoom password-protected log-in.

[12] *See* Options 8, Section 28, ''. . . An Options Floor Broker shall ascertain that at least one Floor Market Maker is present at the trading post prior to representing an order for execution. . . .''

[13] The Exchange notes that as a result of COVID–19, the Exchange implemented various safety

Maker hears a Floor Broker located in another trading crowd represent an order, the Floor Market Maker may attempt to trade with that order. The Exchange intends that the concept of a zone replicate a crowd on the physical Trading Floor.

Phlx proposes to replicate the open outcry features on the physical Trading Floor within a Virtual Trading Crowd. The Exchange will use a communication program that has audio, video, and ''chat'' functionality.[14] Floor members would log into the Virtual Trading Crowd, as described in more detail below, and would communicate trades within the conferencing feature. This will allow the same communication capabilities floor members generally have on the physical Trading Floor so that they may conduct open outcry trading in the Virtual Trading Crowd in the same manner as they do on the physical Trading Floor.

All Options 8 Rules will apply to open outcry trading in the Virtual Trading Crowd, in the same manner as they apply to open outcry trading on the physical Trading Floor, except as otherwise provided for in proposed Options 8, Section 26(g)(3)(E). The proposed changes are described below. The Exchange proposes to adopt a new Options 8, Section 26(g)(3) to permit the Exchange to make available an audio and video communication program to serve as a ''Virtual Trading Crowd'' if the physical Trading Floor is not available.

Proposed Options 8, Section 26(g)(3)(A) lists certain terms in the Rules related to open outcry trading on the physical Trading Floor that will be deemed to refer to corresponding terms related to trading in the Virtual Trading Crowd. Specifically,

- References in the Rules to the ''floor,'' ''Trading Floor,'' and ''Exchange floor'' (and any other terms with the same meaning) will be deemed to refer to the ''Virtual Trading Crowd''; and
- References in the Rules to ''physical presence'' or ''on-floor'' or ''floor'' (and any other terms with the same meaning) will be deemed to refer to ''presence'' in a Virtual Trading Crowd.

The proposal does not amend or replace any aspects of Phlx's Options Floor Based Management System (''FBMS'') or order execution functionalities.[15] Today, FBMS is designed to execute orders entered by Floor Brokers,[16] including multi-leg orders up to 15 legs, after representation in the trading crowd. When a Floor Broker submits an order for execution through FBMS, the order will be executed based on market conditions at the time of execution and in accordance with Phlx rules. FBMS execution functionality checks the Order Book to ensure compliance with priority rules. Orders that do not comply with priority and trade-through rules will not be executed. All FBMS order and transaction data that would normally be available from the physical Trading Floor would continue to be captured by FBMS and the System. These compliance checks, which are crucial to ensuring compliance with Exchange rules, will continue with the Virtual Trading Crowd model.

Access to the Virtual Trading Crowd will be substantially similar to access to the physical Trading Floor. Only members registered to access Phlx's Trading Floor would be permitted to participate. The Exchange is not proposing to amend its membership requirements with respect to virtual open outcry trading. Currently, admission to the physical Trading Floor is limited to members and member organizations, Exchange employees, clerks employed by members and member organizations, Inactive Nominees, and Exchange visitors that receive authorized admission to the Trading Floor pursuant to Exchange policy, and any other persons that the Exchange authorizes admission to the Trading Floor.[17] Persons and entities may apply to become a Phlx member by complying with the membership requirements noted within Phlx General 3, Membership and Access. Proposed Options 8, Section 26(g)(3)(B) provides, ''Admission to the Virtual Trading Crowd is limited to members and member organizations, Clerks, Exchange employees, and any other persons the Exchange authorizes admission to the Virtual Trading Crowd.''

The Exchange proposes to limit the number of members, per member organization, that may participate in a Virtual Trading Crowd based on the ability of Phlx to accommodate members within the remote conferencing feature in an orderly fashion. The Exchange would limit personnel in a fair and equitable manner ensuring there is fair and equal representation from each member and member organization. This proposal would allow each of the trading crowds that exist on Phlx's physical Trading Floor to participate in this ''Virtual Trading Crowd'' in one or more separate zones as described above.

While clerks may access the Virtual Trading Crowd, they may only perform the same functions for their associated member organizations in connection with open outcry trading in the Virtual Trading Crowd as they do for open outcry trading on the physical Trading Floor. The Exchange understands permitting access to Clerks to access the Virtual Trading Crowd will provide them with access to the information that they normally have access to on the physical Trading Floor, which will make it more efficient for them to perform their tasks. Also, the Exchange would not permit visitors into the Virtual Trading Crowd as the Exchange believes that allowing these types of persons to have access to the Virtual Trading Crowd is unnecessary as these persons are not essential to the functioning of the Virtual Trading Crowd. As is the case with the physical Trading Floor, the Exchange will provide access to the Virtual Trading Crowd to members the Exchange has approved to perform a Trading Floor function (including Floor Brokers and Floor Market Makers).

While floor members would not be required to display badges, pursuant to Options 8, Section 39 at Regulation 3, in the Virtual Trading Crowd, as the size of the view on the communication program may not permit badges to be visible, members would be required to join the Virtual Trading Crowd in a manner that clearly identifies the member or member's employee.

Pursuant to proposed Options 3, Section 26(g)(3)(E)(8)(a), prior to speaking on remote conferencing, each member must announce themselves each time.[18] As specified within

protocols including socially distancing floor members by assigning spaces to all floor market participants on the physical Trading Floor.

[14] Currently available programs with this functionality include Zoom, Webex, Microsoft Teams, and others.

[15] FBMS, an order management system, is the gateway for the electronic execution of equity, equity index and U.S. dollar-settled foreign currency option orders represented by Floor Brokers on the Exchange's Options Floor. Floor Brokers contemporaneously upon receipt of an order and prior to the representation of such an order in the trading crowd, record all options orders represented by such Floor Broker to FBMS, which creates an electronic audit trail. The execution of orders to Phlx's electronic trading system also occurs via FBMS. The FBMS application is available on hand-held tablets and stationary desktops.

[16] The term ''Floor Broker'' means an individual who is registered with the Exchange for the purpose, while on the Options Floor, of accepting and handling options orders. *See* Options 8, Section 2(2).

[17] *See* General 3, Section 1, Options 8, Sections 5–9, and Options 8, Sections 11 and 12.

[18] Members would also be visible on video, however the Exchange will still require members to announce themselves.

proposed Options 8, Section 26(g)(3)(E)(2), members must join via a computer and either (a) computer audio; (b) cell phone; or (c) hard-wired phone, as determined by Nasdaq. Phlx will send a password-protected invitation to each floor participant permitted access to the Virtual Trading Crowd. This invitation will permit each permitted participant to access the Virtual Trading Crowd in a safe and secure manner. Any floor member may access any zone within the Virtual Trading Crowd, although Floor Market Makers will be required to be present in their assigned zone if present within the Virtual Trading Crowd. Any unidentified attendee will be removed from the Virtual Trading Crowd. The Exchange will have an audit trail of the telephone numbers that have joined each remote conferencing session in order to ensure that only members join the remote conferencing feature. Every member in the Virtual Trading Crowd must provide Market Operations with a contact number where Market Operations will be able to reach them during the trading day. The contact number may not be the same number that is being used to connect to the Virtual Trading Crowd. Floor members are responsible for maintaining updated contact information. This number must be updated immediately if it changes. Nasdaq staff must be able to reach a member if there is an issue with trading.[19] Nasdaq non-regulatory staff would be responsible for the operation of the remote conferencing feature, which includes monitoring members to ensure that only floor members and member's employees are admitted into remote conferencing and are properly identified.

As specified within proposed Options 3, Section 26(g)(3)(E)(1), every member and the member's employees in the Virtual Trading Crowd must consent to video and audio recording in order to participate in the Virtual Trading Crowd. Members and members' employees will be asked to provide this consent, as well as other consents, before being permitted to join the Virtual Trading Crowd. For example, member organizations would be required to execute an addendum to the Nasdaq Services Agreement regarding their use of the remote conferencing feature in addition to consenting to voice recording.

Today, pursuant to Options 8, Section 38, floor members must register their means of communication with the Exchange.[20] Pursuant to proposed Options 8, Section 26(g)(3)(E)(4), members and member organizations may use any equipment to access the Virtual Trading Crowd and do not need to register devices they use while in the Virtual Trading Crowd. Floor members and member organizations would be permitted remote access to FBMS when the Virtual Trading Floor is enacted.[21] The Exchange proposes to provide within Options 8, Section 26(g)(3)(C) that, ''. . . Notwithstanding Options 8, Section 28(g) and Options 8, Section 30(e), members and member organizations would be permitted remote access to the Options Floor Based Management System (''FBMS'') when the Virtual Trading Floor is enacted for the purpose of executing transactions which require exposure in open outcry.'' Floor members must use Exchange-provided FBMS, to the extent applicable, while transacting in the Virtual Trading Crowd. As noted above, prior to using a communications device for business purposes on the Trading Floor of the Exchange, members and member organizations must register the communications device in a form and manner prescribed by the Exchange. Because individuals in the Virtual Trading Crowd will not be on the Exchange's premises (and thus will not be using Exchange-provided bandwidth to be shared with all market participants and do not pose the same security risks), the proposed rule change will not require members and member organizations to register devices they use while in the Virtual Trading Crowd. Options 8, Section 38 will otherwise apply in the same manner to the Virtual Trading Crowd as it does to the physical Trading Floor (to the extent the context requires). This includes requirements related to audit trail and record retention, prohibition on using any device for the purpose of recording activities in the Virtual Trading Crowd or maintaining an open line of continuous communication whereby a person not located in the trading crowd may continuously monitor the activities in the trading crowd, and the prohibition on using devices to disseminate quotes or last sale reports. Surveillance staff will be present in each Virtual Trading Crowd to monitor the activity of each participant, who must be present by video, and to observe participant behavior. The Exchange will continue to surveil options transactions, as it does today, to identify transactions which are violative of Phlx Rules.[22] Phlx surveils for transactions which have been executed on its market to determine if those transactions utilized information which would have been available in open outcry trading and was not yet public or otherwise ascertainable due to the execution of a transaction. The Exchange notes that in both the electronic market and on the trading floor, members and member organizations must ensure that they have procedures reasonably designed to prevent the misuse of material, non-public information by employees.[23] Further, the Exchange proposes to provide within proposed Options 8, Section 26(g)(3)(E)(8)(g) that ''A member may not permit any unauthorized other person to gain audio or video access to the Virtual Trading Crowd. A member shall not record any trading sessions,'' to make clear that the Exchange will enforce the prohibitions of Options 8, Section 38 with respect to the remote conferencing aspects as well. Finally, the Exchange represents that it has the proper security infrastructure in place to offer FBMS remotely and securely to floor participants.

Today, members on the physical Trading Floor only verbalize their interest to trade against a represented order, so not requiring bids and offers to be included in a chat conforms to current practice on the Trading Floor. However, given potential limitations of communication software (such as

[19] The conferencing room would be password protected and equipped with audio, video and text capabilities. Attendance control requirements would be in place. Private chat features will not be permitted on the platform. Unknown callers would be removed from the conferencing room. Nasdaq non-regulatory staff would be in control of the conference room.

[20] Options 8, Section 38(a) provides, ''No member or member organization shall establish or maintain any private wire connection, private radio, television or wireless system, between the Exchange Trading Floor and a nonmember without application to and approval by the Exchange. Every such means of communication shall be registered with the Exchange. Notice of the discontinuance of any such means of communication shall be promptly given to the Exchange.''

[21] At the time of the Phlx Trading Floor closure in March 2020, the Exchange permitted Floor Brokers, who otherwise had no means of trading on Phlx in an electronic environment, to utilize FBMS remotely, solely for the purpose of submitting limit orders to the electronic limit order book pursuant to Options 8, Section 28(g), or submitting a Floor Qualified Contingent Cross Order to the System pursuant to Options 8, Section 30(e). *See* Options Trader Alert #2020–8.

Recently, the Exchange filed a proposal to amend Options 8, Section 28(g) and Options 8, Section 30(e) to continue to allow Floor Brokers the ability to submit limit orders to the electronic limit order book and Floor Qualified Contingent Cross Orders to the System via FBMS remotely, notwithstanding the existence of BCP measures. *See* SR–Phlx–2021–01. This recent proposal did not permit FBMS to be utilized remotely for the purpose of executing transactions which require exposure in open outcry.

[22] *See* Phlx Options 9, Section 1; and Options 9, Section 5. *See also* Options 3, Section 22(d).

[23] *See* Phlx General 9, Section 21.

limitations on how many people may be heard at the same time in a Virtual Trading Crowd or potential buffering or echoing), the Exchange believes it may be appropriate to require members to use a chat tool in the communication program to indicate their interest in participating in a trade so that the representing Floor Broker is able to know the market from the trading crowd and fairly allocate the trade pursuant to the Rules.[24] The Exchange would require members to utilize the chat function if Surveillance determines that increased volume or activity in the Virtual Trading Crowd warrant mandatory use of the chat feature for members to maintain a fair and orderly market. Chats will be visible to all participants in a zone and will not be permitted directly between individual participants (*i.e.,* the Exchange will disable direct messaging functionality within the communication program). The Exchange believes the flexibility to impose this requirement in a Virtual Trading Crowd is appropriate, as these limitations may ultimately not interfere with a Floor Broker's ability to hear all interest (particularly in Virtual Trading Crowd) and thus the additional requirement may potentially slow down executions. Flexibility will permit the Exchange to balance system limitations with the additional burden of a new workflow step for each class, some of which have different open outcry trading environments than others.

The Exchange will retain records of the chats as well as consents, and any other records related to the Virtual Trading Crowds that are subject to the Exchange's record retention obligations under the Exchange Act.

Pursuant to Options 3, Section 26(g)(3)(E)(8)(b), if a member experiences a technical issue accessing the remote conferencing, the Exchange will not be responsible for unexecuted trades. Also, pursuant to Options 3, Section 26(g)(3)(E)(8)(c), Floor Market Maker quotes will be considered firm in the event the Floor Market Maker is disconnected from the Virtual Trading Crowd and the parties have a meeting of the minds with respect to the terms of the transaction. A ''Meeting of the Minds'' means the contra-side(s) verbally confirmed participation in the trade. In the event that a Floor Market Maker is disconnected from the Virtual Trading Crowd, a Floor Market Maker quote would not be considered firm if the quote were provided and the parties did not have a Meeting of the Minds with respect to the terms of the transaction.

Today, Floor Market Maker quotes are considered firm when announced in open outcry [25] and once accepted the transaction may be effectuated within FBMS. A Floor Market Maker may declare he or she is ''out'' prior to a Meeting of the Minds occurring in open outcry and the Floor Broker submitting the trade into FBMS.[26] Today, a Floor Market Maker that experiences issues with internet connection,[27] makes an error or otherwise is unaware of recent news in a particular option, would be held to a quote verbalized in open outcry. In the event that the negotiation continues and the terms change, the Floor Marker Maker would not be held to the new terms without additional acceptance of those terms. In the event that the transaction is not effectuated in FBMS, the trade would not stand. To that end, the Exchange believes continuing to require quotes to remain firm once the parties have arrived at a Meeting of the Minds with respect to the terms of the transaction creates fair and equitable expectations for members trading in the Virtual Trading Crowd.

Today, FLEX transactions are permitted on the Trading Floor in accordance with Options 3, Section 34. With this proposal, FLEX Trade tickets must be sent by email to the Phlx Correction Post pursuant to proposed Options 8, Section 26(g)(3)(E)(8)(d). This proposal would allow the Exchange to receive these in a timely manner.

The Exchange notes within proposed Options 8, Section 26(g)(3)(E)(8)(e) that a break-out room may be utilized to declare a dispute or otherwise notify an Options Floor Official of any required notifications. The Exchange would establish a break-out room within the remote conferencing for each dispute. This would provide an effective manner in which to communicate disputes and maintain a record of those disputes.

Pursuant to proposed Options 8, Section 26(g)(3)(E)(8)(f) disruptive or unnecessary conversations or comments in the remote conferencing or on chat feature will not be permitted. This type of behavior would subject a member to disciplinary action. Today, disruptive behavior on the Trading Floor is subject to Options 8, Section 39 at Regulation 4.[28]

As noted above, the Exchange may determine to make the Virtual Trading Crowd available if the physical Trading Floor is unavailable, the Back-Up Trading Floor becomes inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor. Proposed Options 8, Section 26(g)(3) provides that ''The Exchange may elect to permit open outcry trading to take place in a Virtual Trading Crowd if the Trading Floor becomes unavailable, the Back-Up Trading Floor becomes inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor.'' These amendments to the Options 8 Rules are intended to make trading in a Virtual Trading Crowd similar to open outcry trading when open outcry trading is not available by replicating certain features of open outcry trading in the Virtual Trading Crowd. The Virtual Trading Crowd will permit open outcry trading to continue in a separate environment if the physical Trading Floor becomes unavailable, the Back-Up Trading Floor becomes inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor. Therefore, trading opportunities that are generally only available in open outcry trading will continue to be available in the Virtual Trading Crowd.

All trading in the Virtual Trading Crowd will occur in the same manner, including priority and allocation rules.[29] The Exchange will make the same order types and instructions available in the Virtual Trading Crowd as it makes available on the physical Trading Floor.[30] Floor Brokers will be subject to the responsibilities in each

---

[24] The Exchange would issue an Options Trader Alert announcing any determination to require bids and offers to be expressed in a chat within the communication program pursuant to proposed Options 8, Section 26(g)(3)(D). The Exchange will provide such notice with sufficient advance notice.

[25] *See* Options 8, Section 22(c) Public Outcry—Pursuant to Options 8, Section 24 (this citation is being amended in this rule change from Section 35 to the correct Section 24) at Supplementary Material .01, bids and offers must be made in an audible tone of voice. A member shall be considered ''in'' on a bid or offer, while he remains at the post, unless he shall distinctly and audibly say ''out.'' A member bidding and offering in immediate and rapid succession shall be deemed ''in'' until he shall say ''out'' on either bid or offer. Once the trading crowd has provided a quote, it will remain in effect until: (A) A reasonable amount of time has passed, or (B) there is a significant change in the price of the underlying security, or (C) the market given in response to the request has been improved. In the case of a dispute, the term ''significant change'' will be interpreted on a case-by-case basis by an Options Exchange Official based upon the extent of the recent trading in the option and, in the case of equity and index options, in the underlying security, and any other relevant factors.

[26] *Id* at 25.

[27] The Exchange notes that today members are responsible for the operation of their own equipment while on the Trading Floor.

[28] Options 8, Section 39, Regulation 4(a) provides, ''Members and associated persons shall not conduct themselves in a disorderly manner on the trading floor or on the premises immediately adjacent to the trading floor. Further, members, participants and associated persons shall not conduct themselves in an indecorous manner that is disruptive to the conduct of business on the trading floor, including but not limited to the use of profanity.''

[29] *See* Options 8, Sections 25 and 30.

[30] *See* Options 8, Section 32.

environment.[31] Additionally, members and member organizations participating in the Virtual Trading Crowd will be subject to the same regulatory requirements as they are on the physical Trading Floor.[32] Orders must be systematized, and represented, and transactions reported, in connection with the Virtual Trading Crowd floor in the same manner as they are when trading on the physical Trading Floor.[33] Therefore, the audit trail for open outcry trading in the Virtual Trading Crowd will capture the same information that it does for open outcry trading on the physical Trading Floor.

Surveillance

Phlx Surveillance staff would remotely surveil transactions in the Virtual Trading Crowd, in real-time. Specifically, there would be an Options Floor Official present in each Virtual Trading Crowd. Nasdaq Surveillance would conduct real-time surveillance for violations of Phlx rules, as is the case with physical open outcry. Floor Surveillance Procedures would be updated to account for the conferencing and chat requirements, as well as any changes to surveil a Virtual Trading Crowd. All surveillance patterns would be operable and function normally.

The Exchange also proposes to re-number current Options 3, Section 26(g)(3) as (4). The Exchange notes that this proposal does not amend the manner in which fees or other pricing incentives, such as caps, apply to floor participants. Any transaction originating from open outcry on the Trading Floor is considered a floor transaction and would continue to be considered a floor transaction for purposes of the Virtual Trading Crowd. With offering FBMS remotely, the Exchange does not propose to amend the manner in which fees are assessed or rebates are paid for purposes of Options 7 pricing to Floor Brokers.

The Exchange has conducted several town halls with floor members in which the Exchange presented the functionality of the Virtual Trading Crowd and has made the Virtual Trading Crowd available for testing so that the Exchange will be ready to implement it if necessary. The Exchange has received positive feedback from floor members regarding the Virtual Trading Crowd and will continue to make updates as necessary and appropriate in response to comments it receives to make the Virtual Trading Crowd replicate the open outcry trading experience on the physical Trading Floor as much as possible. The Exchange believes this will provide the opportunity for as seamless a rollout as possible if circumstances cause the Exchange to make the Virtual Trading Crowd available.

Technical Amendments

The Exchange proposes to amend Options 8, Section 22, Execution of Options Transactions on the Trading Floor, to correct two citations in Options 8, Sections 22(b) and (c). The citations to Options 8, Section 35 should be to Options 8, Section 24. These corrections will ensure the rule text is accurate.

2. Statutory Basis

The Exchange believes that its proposal is consistent with Section 6(b) of the Act,[34] in general, and furthers the objectives of Section 6(b)(5) of the Act,[35] in particular, in that it is designed to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.

In particular, the Exchange believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest, as it will permit open outcry trading to continue in the event the Exchange's Trading Floor is unavailable, the Back-Up Trading Floor becomes inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor. As discussed above, there are certain features of open outcry trading that are difficult to replicate in an electronic trading environment. The Exchange has observed, and understands from various market participants, that they have had difficulty executing certain orders, such as larger orders and high-risk and complicated strategies, in an all-electronic trading configuration without the element of human interaction to negotiate pricing for these orders. The proposed rule change would provide an environment in which this interaction would be available despite the potential unavailability of the physical Trading Floor. The Exchange believes the proposed rule change may facilitate continued trading of these orders if and when the physical Trading Floor is unavailable, the Back-Up Trading Floor becomes inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor. As a result, the Exchange believes providing continuous access to open outcry trading when the physical Trading Floor is unavailable, the Back-Up Trading Floor becomes inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor will remove impediments to a free and open market and will ultimately benefit investors, particularly those desiring to execute high-risk and complex trading strategies.

The Virtual Trading Crowd would have the same capability to utilize FBMS as the primary Trading Floor today with the availability of remote FBMS.[36] The Exchange also believes the proposed rule change will promote just and equitable principles of trade as open outcry trading in a Virtual Trading Crowd will occur in accordance with the same trading rules and be subject to the same regulatory requirements that apply to open outcry trading on the physical Trading Floor, all of which have previously been filed with the Commission. The proposed rule change will merely permit this open outcry trading to occur in a virtual setting rather than a physical setting (which may be appropriate for health and safety purposes). For the Virtual Trading Crowd, open outcry trading will occur while market participants operate remotely as they do when they trade electronically. Open outcry trading on a physical Trading Floor or in a Virtual Trading Crowd will be subject to the same priority and allocation rules as open trading on the physical Trading Floor, as set forth in Options 8, Sections 25 and 30.

As is the case for open outcry trading on a physical Trading Floor, open outcry trading in a Virtual Trading Crowd is consistent with Section 11(a) of the Act, as Rule 5.85(a)(2)(E) (which will apply to open outcry trading in a Virtual Trading Crowd) requires members and member organizations relying on Section 11(a)(1)(G) of the Act and Rule 11a1–1(T) thereunder (the so called ''G exemption rule'') as an exemption must yield priority to any bid (offer) at the same price of Public Customer orders and broker-dealer orders resting in the Order Book, as well as any other bid (offer) that has priority over those broker-dealer orders under this Rule.

[31] *See* Options 8, Sections 18 and 28.

[32] *See* Options 8 generally.

[33] *See* Options 8 generally.

[34] 15 U.S.C. 78f(b).

[35] 15 U.S.C. 78f(b)(5).

[36] *See* note 15 above.

The Exchange further believes the proposed rule change will remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest by permitting the Exchange to establish zones. As discussed above, the zones are intended to replicate the physical Trading Floor's organization and will permit floor members to interact in a substantially similar way as they do on the physical Trading Floor. The zones will also encourage interaction of a reasonable number of people within the communication program. While the zones will include additional functionality that is not otherwise available on the physical Trading Floor, such as the chat functionality, the Exchange believes the creation of zones and inclusion of this functionality will create a virtual environment that promotes fair and orderly trading given the potential limitations of communication software.

The Exchange will make the same order types and instructions available in a Virtual Trading Crowd as it makes available on a physical Trading Floor pursuant to Options 8, Section 32. Floor Brokers will be subject to the responsibilities set forth in Options 8, Sections 18 and 28 in a Virtual Trading Crowd, as they are on a physical Trading Floor. Additionally, members and member organizations participating in a Virtual Trading Crowd will be subject to the same regulatory requirements in a Virtual Trading Crowd as they are on a physical Trading Floor, including those set forth generally within Options 8. Orders must be systematized and represented, and transactions reported, in connection with a Virtual Trading Crowd in the same manner as they are when trading on a physical Trading Floor. The Exchange will retain records of the chats as well as consents, and any other records related to the Virtual Trading Crowd that are subject to the Exchange's record retention obligations under the Exchange Act.

Pursuant to Options 3, Section 26(g)(3)(E)(8)(c), Floor Market Maker quotes will be considered firm in the event the Floor Market Maker is disconnected from the Virtual Trading Crowd and the parties have a Meeting of the Minds with respect to the terms of the transaction. A ''Meeting of the Minds'' means the contra-side(s) verbally confirmed participation in the trade. In the event that a Floor Market Maker is disconnected from the Virtual Trading Crowd, a Floor Market Maker quote would not be considered firm if the quote were provided and the parties did not have a Meeting of the Minds with respect to the terms of the transaction. Today, Floor Market Maker quotes are considered firm when announced in open outcry [37] and once accepted the transaction may be effectuated within FBMS. A Floor Market Maker may declare he or she is ''out'' prior to a Meeting of the Minds occurring in open outcry and the Floor Broker submitting the trade into FBMS.[38] Today, a Floor Market Maker that experiences issues with internet connection,[39] makes an error or otherwise is unaware of recent news in a particular option, would be held to a quote verbalized in open outcry. In the event that the negotiation continues and the terms change, the Floor Marker Maker would not be held to the new terms without additional acceptance of those terms. In the event that the transaction is not effectuated in FBMS, the trade would not stand. To that end, the Exchange believes continuing to require quotes to remain firm once the parties have arrived at a Meeting of the Minds with respect to the terms of the transaction is consistent with the Act as it creates fair and equitable expectations for members trading in the Virtual Trading Crowd as a Meeting of the Minds was arrived out between the parties, each of whom had an opportunity to participate in the trade.

The audit trail for open outcry trading in a Virtual Trading Crowd will capture the same information that it does for open outcry trading on a physical Trading Floor. The FBMS execution checks for compliance with priority and trade-through rules remain intact. The Exchange's proposal only seeks to replace the open outcry negotiations with a Virtual Trading Crowd. FBMS compliance checks were adopted to protect investor and the general public by automated enforcement of priority and trade-through rules. The Exchange would continue to cancel orders that failed to meet these compliance checks, as is the case today. These compliance checks ensure that allocation rules are complied with and that the proposed execution would not cause Phlx to trade-through an away market. Surveillance staff would remotely surveil transactions in a Virtual Trading Crowd, in real-time. Specifically, there would be an Options Floor Official present in each Virtual Trading Crowd. Nasdaq Surveillance would conduct real-time surveillance for violations of Phlx rules, as is the case with physical open outcry. Floor Surveillance Procedures would be updated to account for the conferencing and chat requirements, as well as any changes to surveil a Virtual Trading Crowd. All surveillance patterns would be operable and function normally. The Exchange believes that the proposed rule change would remove impediments to and perfect the mechanism of a free and open market and a national market system because it would promote fair and orderly trading. The Exchange believes it will promote just and equitable principles of trading for all open outcry trading to occur in substantially the same manner, whether it occurs while market participants are in the same physical setting or in remote settings being connected through a technological solution.

Controls and security features are proposed to ensure that the appropriate market participants are participating in trades and to minimize any disruptions. Nasdaq non-surveillance staff would be responsible for the operation of the remote conferencing feature, which includes monitoring members to ensure that only floor members and members' employees are admitted into remote conferencing and are properly identified. Member organizations would be required to execute an addendum to the Nasdaq Services Agreement regarding their use of the remote conferencing feature in addition to consenting to voice recording.

In addition, the Exchange believes the proposed rule change will not be designed to permit unfair discrimination between customers, issuers, brokers, or dealers, as all individuals authorized to act on the physical Trading Floor (both member organizations authorized at the time the physical Trading Floor becomes unavailable, the Back-Up Trading Floor becomes inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor and any member organization that becomes authorized

[37] *See* Options 8, Section 22(c) Public Outcry—Pursuant to Options 8, Section 35 at Supplementary Material .01, bids and offers must be made in an audible tone of voice. A member shall be considered ''in'' on a bid or offer, while he remains at the post, unless he shall distinctly and audibly say ''out.'' A member bidding and offering in immediate and rapid succession shall be deemed ''in'' until he shall say ''out'' on either bid or offer. Once the trading crowd has provided a quote, it will remain in effect until: (A) A reasonable amount of time has passed, or (B) there is a significant change in the price of the underlying security, or (C) the market given in response to the request has been improved. In the case of a dispute, the term ''significant change'' will be interpreted on a case-by-case basis by an Options Exchange Official based upon the extent of the recent trading in the option and, in the case of equity and index options, in the underlying security, and any other relevant factors.

[38] *Id* at 25.

[39] The Exchange notes that today members are responsible for the operation of their own equipment while on the Trading Floor.

after the physical Trading Floor becomes unavailable) will be provided with access to the Virtual Trading Crowd. Additionally, the proposed rule change to permit the Exchange to elect a Virtual Trading Crowd if the physical Trading Floor is unavailable will provide individuals unable to trade on the physical Trading Floor as a result of certain restrictions to participate in open outcry trading remotely.

Surveillance staff will be present in each Virtual Trading Crowd to monitor the activity of each participant, who must be present by video, and to observe participant behavior. The Exchange will continue to surveil options transactions, as it does today, to identify transactions which are violative of Phlx Rules.[40] Phlx surveils for transactions which have been executed on its market to determine if those transactions utilized information which would have been available in open outcry trading and was not yet public or otherwise ascertainable due to the execution of a transaction. The Exchange notes that in both the electronic market and on the trading floor, members and member organizations must ensure that they have procedures reasonably designed to prevent the misuse of material, non-public information by employees.[41]

The Exchange has conducted several town halls with floor members in which the Exchange presented the functionality of the Virtual Trading Crowd and has made the Virtual Trading Crowd available for testing so that the Exchange will be ready to implement it if necessary. The Exchange has received positive feedback from floor members regarding the Virtual Trading Crowd and will continue to make updates as necessary and appropriate in response to comments it receives to make the Virtual Trading Crowd replicate the open outcry trading experience on the physical Trading Floor as much as possible. The Exchange believes this will provide the opportunity for as seamless a rollout as possible if circumstances cause the Exchange to make the Virtual Trading Crowd available.

Finally, this proposal does not amend the manner in which fees or other pricing incentives, such as caps, apply to floor participants. Any transaction originating from open outcry on the Trading Floor is considered a floor transaction. With offering FBMS remotely, the Exchange has not amended the manner in which fees are assessed or rebates are paid for purposes of Options 7 pricing to floor participants.

Technical Amendments

The Exchange's proposal to update citations to Options 8, Section 35 to Options 8, Section 24 are consistent with the Act as these non-substantive amendments will ensure the rule text is accurate.

*B. Self-Regulatory Organization's Statement on Burden on Competition*

The Exchange does not believe that the proposed rule change will impose any burden on competition not necessary or appropriate in furtherance of the purposes of the Act. The Exchange does not believe that the proposed rule change will impose any burden on intra-market competition that is not necessary or appropriate in furtherance of the purposes of the Act, as all member organizations authorized by the Exchange, or that become authorized by the Exchange, to transact on the Trading Floor will receive access to the Virtual Trading Crowd.

The Exchange does not believe that the proposed rule change will impose any burden on inter-market competition that is not necessary or appropriate in furtherance of the purposes of the Act, as it relates solely to the location of open outcry trading on the Exchange. The proposed rule change will merely permit open outcry trading that generally occurs while market participants are located in the same physical setting to occur while market participants are in a remote setting, connected by a technological solution (as electronic trading does).

The Exchange believes that the proposed rule change will relieve any burden on, or otherwise promote, competition. The Exchange believes the proposed rule change will provide market participants with continuous access to open outcry trading when the physical Trading Floor is unavailable, the Back-Up Trading Floor becomes inoperable or the Exchange otherwise determines not to operate the Back-Up Trading Floor. The Exchange believes this may facilitate continued, competitive price negotiations and trading of orders that the Exchange understands are more difficult to execute in an all-electronic trading environment without human interaction. Additionally, the proposed rule change will provide customer orders represented for open outcry execution with access to the same pool of liquidity when the Trading Floor is unavailable to which those orders would have access when the Trading Floor is operating in its normal state. Maintenance of this level of liquidity at all times, even when the Trading Floor is unavailable, may promote competition by providing these customer orders with increased liquidity than may otherwise be available, and thus increased execution opportunities and price discovery. Every Floor Market Maker and Floor Broker is permitted access to FBMS.

With respect to inter-market competition, the Exchange notes that each options market has a business continuity plan. Because the options markets are physically located in different regions of the United States, the conditions under which a business continuity plan is deployed may differ, based on regional differences. In addition, any options exchange with a trading floor could amend its rules to adopt similar business continuity plans that engaged similar controls.

Technical Amendments

The Exchange's proposal to update citations to Options 8, Section 35 to Options 8, Section 24 do not impose an undue burden on competition as these non-substantive amendments will ensure the rule text is accurate.

*C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others*

No written comments were either solicited or received.

## III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 45 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the Exchange consents, the Commission shall: (a) By order approve or disapprove such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

## IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

[40] *See* Phlx Options 9, Section 1; and Options 9, Section 5. *See also* Options 3, Section 22(d).

[41] *See* Phlx General 9, Section 21.

*Electronic Comments*

• Use the Commission's internet comment form (*http://www.sec.gov/rules/sro.shtml*); or

• Send an email to *rule-comments@sec.gov.* Please include File Number SR–Phlx–2021–03 on the subject line.

*Paper Comments*

• Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549–1090.

All submissions should refer to File Number SR–Phlx–2021–03. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (*http://www.sec.gov/rules/sro.shtml*). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549, on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of the filing also will be available for inspection and copying at the principal office of the Exchange. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR–Phlx–2021–03 and should be submitted on or before February 4, 2021.

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.[42]

**J. Matthew DeLesDernier,**

*Assistant Secretary.*

## SECURITIES AND EXCHANGE COMMISSION

**[SEC File No. 270–184, OMB Control No. 3235–0236]**

## Submission for OMB Review; Comment Request

*Upon Written Request, Copies Available From:* Securities and Exchange Commission, Office of FOIA Services, 100 F Street NE, Washington, DC 20549–2736

*Extension:*
Form N–54C

Notice is hereby given that, pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), the Securities and Exchange Commission (the ''Commission'') has submitted to the Office of Management and Budget a request for extension of the previously approved collection of information discussed below.

Certain investment companies can elect to be regulated as business development companies, as defined in section 2(a)(48) of the Investment Company Act of 1940 (''Investment Company Act''), under sections 55 through 65 of the Investment Company Act. Under section 54(a) of the Investment Company Act,[1] any company defined in section 2(a)(48)(A) and (B) of the Investment Company Act may, if it meets certain enumerated eligibility requirements, elect to be subject to the provisions of Sections 55 through 65 of the Investment Company Act by filing with the Commission a notification of election. Under section 54(c) of the Investment Company Act,[2] any business development company may voluntarily withdraw its election under section 54(a) of the Investment Company Act by filing a notice of withdrawal of election with the Commission. The Commission has adopted Form N–54C as the form for the notification of withdrawal of election to be subject to Sections 55 through 65 of the Investment Company Act. The purpose of Form N–54C is to notify the Commission that the business development company withdraws its election to be subject to Sections 55 through 65 of the Investment Company Act.

The Commission estimates that on average approximately eight business development companies file notifications on Form N–54C each year. Each of those business development companies need only make a single filing of Form N–54C. The Commission further estimates that this information collection imposes a burden of one hour, resulting in a total annual burden of eight hours. Based on the estimated wage rate, the total cost to the business development company industry of the hour burden for complying with Form N–54C would be approximately $2,944.[3] The Commission also estimates that cost burden for outside professionals associated with the filing of Form N–54C increased to $560 because the Commission believes that filers use third-party vendors to comply with this requirement.

The collection of information under Form N–54C is mandatory. The information provided by the form is not kept confidential. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid control number.

The public may view the background documentation for this information collection at the following website, *www.reginfo.gov.* Comments should be directed to: (i) Desk Officer for the Securities and Exchange Commission, Office of Information and Regulatory Affairs, Office of Management and Budget, Room 10102, New Executive Office Building, Washington, DC 20503, or by sending an email to: *Lindsay.M.Abate@omb.eop.gov;* and (ii) David Bottom, Director/Chief Information Officer, Securities and Exchange Commission, c/o Cynthia Roscoe, 100 F Street NE, Washington, DC 20549 or send an email to: *PRA_Mailbox@sec.gov.* Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to *www.reginfo.gov/public/do/PRAMain.* Find this particular information collection by selecting ''Currently under 30-day Review—Open for Public Comments'' or by using the search function.

Dated: January 11, 2021.

[1] 15 U.S.C. 80a–53(a).

[2] 15 U.S.C. 80a–53(c).

[3] The industry burden is calculated by multiplying the total annual hour burden to prepare Form N–54C (eight) by the estimated hourly wage rate of $368 for a compliance attorney or other business development company employee with similar duties and responsibilities. The estimated wage figure is based on published rates for compliance attorneys from the Securities Industry and Financial Markets Association's Report on Management & Professional Earnings in the Securities Industry 2013, modified by Commission staff to account for an 1800 hour work-year and inflation, and multiplied by 5.35 to account for bonuses, firm size, employee benefits and overhead, yielding an effective hourly rate of $2,944.

## DEPARTMENT OF STATE

**[Public Notice: 11304]**

### In the Matter of the Amendment of the Designation of ISIL Sinai Province (and Other Aliases) as a Specially Designated Global Terrorist

Based upon a review of the administrative record assembled in this matter, and in consultation with the Attorney General and the Secretary of the Treasury, I have concluded that there is a sufficient factual basis to find that ISIL Sinai Province, uses the additional aliases ISIS-Sinai Province, Islamic State of Iraq and ash-Sham—Sinai Province, Islamic State of Iraq and the Sham—Sinai Province, ISIS–SP, and Wilayat Sayna.

Therefore, pursuant to Section 1(b) of Executive Order 13224, I hereby amend the designation of ISIL Sinai Province as a Specially Designated Global Terrorist to include the following new aliases: ISIS-Sinai Province, Islamic State of Iraq and ash-Sham—Sinai Province, Islamic State of Iraq and the Sham—Sinai Province, ISIS–SP, and Wilayat Sayna.

This notice shall be published in the **Federal Register**.

Dated: December 22, 2020.

## DEPARTMENT OF STATE

**[Public Notice 11310]**

### Designation of Fuad Ahmad Nuri Ali al-Shakhan as a Specially Designated Global Terrorist

Acting under the authority of and in accordance with section 1(a)(ii)(B) of Executive Order 13224 of September 23, 2001, as amended by Executive Order 13268 of July 2, 2002, Executive Order 13284 of January 23, 2003, and Executive Order 13886 of September 9, 2019, I hereby determine that the person known as Fuad Ahmad Nuri Ali al-Shakan, also known as Bilal al-Chamchamali, also known as Bilal Kirkuki, also known as Mam Karim, is a foreign person who is a leader of al-Qa'ida Kurdish Battalions, a group whose property and interests in property are concurrently blocked pursuant to a determination by the Secretary of State pursuant to Executive Order 13224.

Consistent with the determination in section 10 of Executive Order 13224 that prior notice to persons determined to be subject to the Order who might have a constitutional presence in the United States would render ineffectual the blocking and other measures authorized in the Order because of the ability to transfer funds instantaneously, I determine that no prior notice needs to be provided to any person subject to this determination who might have a constitutional presence in the United States, because to do so would render ineffectual the measures authorized in the Order.

This notice shall be published in the **Federal Register**.

Dated: January 6, 2021.

### Notice of Public Meeting To Prepare for International Maritime Organization Session

The Department of State will conduct a public meeting at 10:00 a.m. on Wednesday, February 10, 2021, by way of teleconference. Members of the public may participate up to the capacity of the teleconference phone line, which will handle 500 participants. To access the teleconference line, participants should call (202) 475–4000 and use Participant Code: 415 533 25#. The primary purpose of the meeting is to prepare for the seventh session of the International Maritime Organization's (IMO) Sub-Committee on Human Element, Training and Watchkeeping (HTW) to be held remotely, February 15–19, 2021.

The agenda items to be considered include:

—Adoption of the agenda
—Decisions of other IMO bodies
—Role of the human element
—Implementation of the STCW Convention
—Comprehensive review of the 1995 STCW–F Convention
—Development of amendments to the STCW Convention and Code for the use of electronic certificates and documents of seafarers
—Development of measures to ensure quality of onboard training as part of the mandatory seagoing service required by the STCW Convention
—Development of measures to facilitate mandatory seagoing service required under the STCW Convention
—Biennial status report and provisional agenda for HTW 8
—Election of Chair and Vice-Chair for 2022
—Any other business
—Report to the Maritime Safety Committee

*Please note:* The Sub-committee may, on short notice, adjust the HTW 7 agenda to accommodate the constraints associated with the virtual meeting format. Although no changes to the agenda are anticipated, if any are necessary, they will be provided to those who RSVP.

Those who plan to participate may contact the meeting coordinator, Mr. Kenneth Doyle, by email at *Kenneth.j.Doyle@uscg.mil,* by phone at (202) 372–1046, or in writing at 2703 Martin Luther King Jr. Ave. SE, Stop 7509, Washington DC 20593–7509.

Additional information regarding this and other IMO public meetings may be found at: *https://www.dco.uscg.mil/IMO.*

## DEPARTMENT OF TRANSPORTATION

**Federal Aviation Administration**

**[FAA–2021–0007]**

### Notice of Availability of the Las Vegas Metroplex Project Written Re-Evaluation/Record of Decision for Changes to the Final Environmental Assessment Designs

**AGENCY:** Federal Aviation Administration (FAA), Department of Transportation.

**ACTION:** Notice of availability of the Written Re-evaluation/Record of Decision (WR/ROD).

**SUMMARY:** The FAA is issuing this notice to advise the public that it has issued a WR/ROD for changes to the Las Vegas Metroplex Project Final Environmental Assessment (EA) Design for five flight procedures.

**FOR FURTHER INFORMATION CONTACT:** Emily Sturnfield, Operations Support Group, Northwest Mountain Regional Office, Federal Aviation Administration, 2200 216th Street, Des Moines, Washington 98198; telephone: (206) 231–2415.

**SUPPLEMENTARY INFORMATION:** On July 17, 2020, the FAA published in the **Federal Register** notice of the availability of a Finding of No Significant Impact and Record of Decision (FONSI/ROD) for the Las Vegas Metroplex (LAS Metroplex) Final EA. The designs for five proposed procedures analyzed in the Final EA and approved for implementation in the FONSI/ROD require changes to comply with FAA safety criteria. This notice refers to these changes as the ''Design Changes.''

Four of the Design Changes are to the designs of procedures at McCarran International Airport (KLAS): (1) HOOVER SEVEN Standard Instrument Departure (SID), (2) Area Navigation (RNAV) (Required Navigation Performance [RNP]) Z Runway (RWY) 19R approach, (3) RNAV (Global Positioning System [GPS]) Y RWY 19R approach, and (4) RNAV (RNP) Z RWY

19L approach. The fifth change is to the design of a procedure at nearby Henderson Executive Airport (KHND), the GAMES Standard Terminal Arrival Route (STAR).

To determine whether the Design Changes require supplementation of the Final EA, the FAA has analyzed the potential environmental effects from the Design Changes, consistent with FAA Order 1050.1F, Paragraph 9–2.c.(1), to determine whether the changes to the Final EA Design would be ''substantial'' and ''relevant to environmental concerns,'' *i.e.,* ''paint[s] a dramatically different picture of impacts compared to the description of impacts in the [Final] EA'' (id., Paragraph 9–3). The FAA's analysis and determination are documented in a WR/ROD dated December 21, 2020. The WR/ROD analyzes the same environmental impact categories analyzed in the Final EA.

As documented in the WR/ROD, the FAA has determined that the Design Changes are not a substantial change in the FAA's proposed action, as analyzed in the Final EA for the Las Vegas Metroplex Project and approved in the FONSI/ROD, relevant to environmental concerns. The data and analyses contained in the Final EA and FONSI/ROD are still substantially valid and there are no significant new circumstances or information relevant to environmental concerns and bearing on the proposed action or its impacts. Accordingly, the WR/ROD also documents the FAA's decision not to prepare a supplement to the Final EA.

The WR/ROD is publicly available at *https://www.faa.gov/air_traffic/community_involvement/las/* and *http://www.metroplexenvironmental.com/las_metroplex/las_docs.html.*

Issued in Des Moines, WA, on January 6, 2021.

### Federal Highway Administration

### Rescinding the Notice of Intent for a Supplemental Environmental Impact Statement: Lafourche Parish, LA

**AGENCY:** Federal Highway Administration (FHWA), DOT.

**ACTION:** Rescind notice of intent.

**SUMMARY:** The FHWA is issuing this notice to advise the public that effective immediately, we are rescinding a Notice of Intent (NOI) to prepare a Supplemental Environmental Impact Statement (SEIS) for the 2002 LA 1 Final Environmental Impact Statement (FEIS) in Lafourche Parish, LA.

**FOR FURTHER INFORMATION CONTACT:** Charles Bolinger, Division Administrator, Louisiana Division, Federal Highway Administration, 5304 Flanders Drive, Suite A, Baton Rouge, LA 70808 Telephone: 225.757.7600.

**SUPPLEMENTARY INFORMATION:** The FHWA, in cooperation with the Louisiana Department of Transportation and Development (LADOTD), issued a NOI on March 15, 2017, to prepare a Supplemental Environmental Impact Statement (SEIS) to study local access modifications and right-of-way impacts to roadway approaches beyond the initial Final Environmental Impact Statement (FEIS) project limits.

The FHWA has determined, in conjunction with LADOTD, the NOI for the SEIS shall be rescinded due to the numerous impacts to traffic and right-of-way beyond the initial project limits identified in the FEIS. The project layout as previously identified in the FEIS will remain as the selected alternative.

Issued on: January 11, 2021.

### Federal Railroad Administration

**[Docket Number FRA–2020–0099]**

### Notice of Application for Approval of Discontinuance or Modification of a Railroad Signal System

Under part 235 of title 49 Code of Federal Regulations (CFR) and 49 U.S.C. 20502(a), this document provides the public notice that on December 22, 2020, Norfolk Southern Corporation (NS) petitioned the Federal Railroad Administration (FRA) seeking approval to discontinue or modify a signal system. FRA assigned the petition Docket Number FRA–2020–0099.

Applicant: Norfolk Southern Corporation, Tommy A. Phillips, Senior Director—C&S Engineering, 1200 Peachtree Street, NE, Atlanta, GA 30309.

Specifically, NS requests permission to discontinue an automatic block signal (ABS) system which includes the control point (CP) at BV&E Junction, 20 automatic signals on the H Line, and all 9 automatic signals on the J-Line. An operative approach signal will be placed at milepost (MP) H–223.8 in approach to CP Columbus Junction. Two operative approach signals will be installed at MP H–239.7 and MP H–242.6 in approach to CP North Oglethorp. The main track between MP H–220 and MP J–295.0 on the Albany Line of the Georgia Division will be converted to NS Rule 171 operation.

The reason for the proposed discontinuance is that operations no longer require a signal system.

A copy of the petition, as well as any written communications concerning the petition, is available for review online at *www.regulations.gov.*

Interested parties are invited to participate in these proceedings by submitting written views, data, or comments. FRA does not anticipate scheduling a public hearing in connection with these proceedings since the facts do not appear to warrant a hearing. If any interested parties desire an opportunity for oral comment and a public hearing, they should notify FRA, in writing, before the end of the comment period and specify the basis for their request.

All communications concerning these proceedings should identify the appropriate docket number and may be submitted by any of the following methods:

- *Website: http://www.regulations.gov.* Follow the online instructions for submitting comments.
- *Fax:* 202–493–2251.
- *Mail:* Docket Operations Facility, U.S. Department of Transportation (DOT), 1200 New Jersey Ave., SE, W12–140, Washington, DC 20590.
- *Hand Delivery:* 1200 New Jersey Ave., SE, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except Federal Holidays.

Communications received by March 1, 2021 will be considered by FRA before final action is taken. Comments received after that date will be considered if practicable. Anyone can search the electronic form of any written communications and comments received into any of our dockets by the name of the individual submitting the comment (or signing the document, if submitted on behalf of an association, business, labor union, etc.). Under 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its processes. DOT posts these comments, without edit, including any personal information the commenter provides, to *www.regulations.gov,* as described in the system of records notice (DOT/ALL–14 FDMS), which can be reviewed at *https://www.transportation.gov/privacy.* See also *https://www.regulations.gov/privacyNotice* for the privacy notice of regulations.gov.

Issued in Washington, DC.

## Requested Administrative Waiver of the Coastwise Trade Laws: Vessel NEVER ENOUGH II (Power Convertible); Invitation for Public Comments

**AGENCY:** Maritime Administration, DOT.

**ACTION:** Notice.

**SUMMARY:** The Secretary of Transportation, as represented by the Maritime Administration (MARAD), is authorized to grant waivers of the U.S.-build requirements of the coastwise trade laws to allow the carriage of no more than twelve passengers for hire on vessels, which are three years old or more. A request for such a waiver has been received by MARAD. The vessel, and a brief description of the proposed service, is listed below.

**DATES:** Submit comments on or before February 16, 2021.

**ADDRESSES:** You may submit comments identified by DOT Docket Number MARAD–2020–0001 by any one of the following methods:

- *Federal eRulemaking Portal:* Go to *http://www.regulations.gov.* Search MARAD–2020–0001 and follow the instructions for submitting comments.
- *Mail or Hand Delivery:* Docket Management Facility is in the West Building, Ground Floor of the U.S. Department of Transportation. The Docket Management Facility location address is: U.S. Department of Transportation, MARAD–2020–0001, 1200 New Jersey Avenue SE, West Building, Room W12–140, Washington, DC 20590, between 9 a.m. and 5 p.m., Monday through Friday, except on Federal holidays.

*Note:* If you mail or hand-deliver your comments, we recommend that you include your name and a mailing address, an email address, or a telephone number in the body of your document so that we can contact you if we have questions regarding your submission.

*Instructions:* All submissions received must include the agency name and specific docket number. All comments received will be posted without change to the docket at *www.regulations.gov,* including any personal information provided. For detailed instructions on submitting comments, see the section entitled Public Participation.

**FOR FURTHER INFORMATION CONTACT:** Russell Haynes, U.S. Department of Transportation, Maritime Administration, 1200 New Jersey Avenue SE, Room W23–461, Washington, DC 20590. Telephone 202–366–3157, Email *Russell.Haynes@dot.gov.*

**SUPPLEMENTARY INFORMATION:** As described by the applicant the intended service of the vessel Never Enough II is:

—Intended Commercial Use of Vessel: ''Charter fishing''

—Geographic Region Including Base of Operations: ''North Carolina'' (Base of Operations: Beaufort, NC)

—Vessel Length And Type: 35′ Power Convertible

The complete application is available for review identified in the DOT docket as MARAD–2020–0001 at *http://www.regulations.gov.* Interested parties may comment on the effect this action may have on U.S. vessel builders or businesses in the U.S. that use U.S.-flag vessels. If MARAD determines, in accordance with 46 U.S.C. 12121 and MARAD's regulations at 46 CFR part 388, that the issuance of the waiver will have an unduly adverse effect on a U.S.-vessel builder or a business that uses U.S.-flag vessels in that business, a waiver will not be granted. Comments should refer to the vessel name, state the commenter's interest in the waiver application, and address the waiver criteria given in section 388.4 of MARAD's regulations at 46 CFR part 388.

### Public Participation

*How do I submit comments?*

Please submit your comments, including the attachments, following the instructions provided under the above heading entitled **ADDRESSES**. Be advised that it may take a few hours or even days for your comment to be reflected on the docket. In addition, your comments must be written in English. We encourage you to provide concise comments and you may attach additional documents as necessary. There is no limit on the length of the attachments.

*Where do I go to read public comments, and find supporting information?*

Go to the docket online at *http://www.regulations.gov*, keyword search MARAD–2020–0001 or visit the Docket Management Facility (see **ADDRESSES** for hours of operation). We recommend that you periodically check the Docket for new submissions and supporting material.

*Will my comments be made available to the public?*

Yes. Be aware that your entire comment, including your personal identifying information, will be made publicly available.

*May I submit comments confidentially?*

If you wish to submit comments under a claim of confidentiality, you should submit three copies of your complete submission, including the information you claim to be confidential business information, to the Department of Transportation, Maritime Administration, Office of Legislation and Regulations, MAR–225, W24–220, 1200 New Jersey Avenue SE, Washington, DC 20590. Include a cover letter setting forth with specificity the basis for any such claim and, if possible, a summary of your submission that can be made available to the public.

### Privacy Act

In accordance with 5 U.S.C. 553(c), DOT solicits comments from the public to better inform its rulemaking process. DOT posts these comments, without edit, to *www.regulations.gov,* as described in the system of records notice, DOT/ALL–14 FDMS, accessible through *www.dot.gov/privacy.* To facilitate comment tracking and response, we encourage commenters to provide their name, or the name of their organization; however, submission of names is completely optional. Whether or not commenters identify themselves, all timely comments will be fully considered. If you wish to provide comments containing proprietary or confidential information, please contact the agency for alternate submission instructions.

## DEPARTMENT OF THE TREASURY

### Office of Foreign Assets Control

### Notice of OFAC Sanctions Action

**AGENCY:** Office of Foreign Assets Control, Treasury.

**ACTION:** Notice.

**SUMMARY:** The Department of the Treasury's Office of Foreign Assets Control (OFAC) is publishing the names of one or more persons that have been placed on OFAC's Specially Designated Nationals and Blocked Persons List based on OFAC's determination that one or more applicable legal criteria were satisfied. All property and interests in property subject to U.S. jurisdiction of this person are blocked, and U.S. persons are generally prohibited from engaging in transactions with them.

**DATES:** See **SUPPLEMENTARY INFORMATION** section for applicable date(s).

**FOR FURTHER INFORMATION CONTACT:** OFAC: Associate Director for Global Targeting, tel.: 202–622–2420; Assistant Director for Sanctions Compliance & Evaluation, tel.: 202–622–2490; Assistant Director for Licensing, tel.: 202–622–2480.

**SUPPLEMENTARY INFORMATION:**

#### Electronic Availability

The Specially Designated Nationals and Blocked Persons List and additional information concerning OFAC sanctions programs are available on OFAC's website (*www.treas.gov/ofac*).

#### Notice of OFAC Action(s)

On January 8, 2021, OFAC determined that the property and interests in property subject to U.S. jurisdiction of the following person are blocked under the relevant sanctions authority listed below.

*Individual*

1. AL–FAYYADH, Falih (a.k.a. AL FAYYADH, Falih Faisal Fahad; a.k.a. ALFAYYADH, Faleh; a.k.a. ALFAYYADH, Falih), Iraq; DOB 27 Mar 1956; POB Iraq; nationality Iraq; Gender Male; Passport D1019262 (Iraq) expires 14 Jul 2026 (individual) [GLOMAG].

Designated pursuant to section 1(a)(ii)(C)(1) of Executive Order 13818 of December 20, 2017, ''Blocking the Property of Persons Involved in Serious Human Rights Abuse or Corruption,'' 82 FR 60839, 3 CFR, 2018 Comp., p. 399, (E.O. 13818) for being a foreign person who is or has been a leader or official of an entity, including any government entity, that has engaged in, or whose members have engaged in, serious human rights abuse relating to the leader's or official's tenure.

Dated: January 8, 2021.

**BILLING CODE 4810–AL–P**

## DEPARTMENT OF TREASURY

### Internal Revenue Service

### Electronic Tax Administration Advisory Committee (ETAAC); Nominations

**AGENCY:** Internal Revenue Service, Department of Treasury.

**ACTION:** Request for nominations.

**SUMMARY:** The Internal Revenue Service (IRS) is requesting applications from individuals with experience in such areas as state tax administration, cybersecurity and information security, tax software development, tax preparation, payroll and tax financial product processing, systems management and improvement, implementation of customer service initiatives, public administration, and consumer advocacy to be considered for selection as members of the Electronic Tax Administration Advisory Committee (ETAAC).

**DATES:** Written nominations must be received on or before March 1, 2021.

**ADDRESSES:** Applications may be submitted via fax to 855–811–8020 or via email to *PublicLiaison@irs.gov.* Application packages are available on the IRS website at *https://www.irs.gov/e-file-providers/apply-for-membership-on-the-electronic-tax-administration-advisory-committee-etaac.* Application packages may also be requested by telephone from National Public Liaison, 202–317–6247 (not a toll-free number).

**FOR FURTHER INFORMATION CONTACT:** Sean Parman at (202) 317–6247, or send an email to *publicliaison@irs.gov*.

**SUPPLEMENTARY INFORMATION:** The IRS strongly encourages representatives from consumer groups with an interest in tax issues to apply.

Nominations should describe and document the proposed member's qualifications for ETAAC membership, including the applicant's knowledge of regulations and the applicant's past or current affiliations and involvement with the particular tax segment or segments of the community that the applicant wishes to represent on the committee. Applications will be accepted for current vacancies from qualified individuals and from professional and public interest groups that wish to have representation on ETAAC. Submissions must include an application and resume.

ETAAC provides continuing input into the development and implementation of the IRS organizational strategy for electronic tax administration. The ETAAC provides an organized public forum for discussion of electronic tax administration issues—such as prevention of identity theft-related refund fraud—in support of the overriding goal that paperless filing should be the preferred and most convenient method of filing tax and information returns. ETAAC members work closely with the Security Summit, a joint effort of the IRS, state tax administrators and the nation's tax industry, to fight identity theft and refund fraud. ETAAC members convey the public's perceptions of IRS electronic tax administration activities, offer constructive observations about current or proposed policies, programs and procedures, and suggest improvements.

This is a volunteer position. Members will serve three-year terms on the ETAAC to allow for a rotation in membership and ensure different perspectives are represented. Travel expenses within government guidelines will be reimbursed. In accordance with Department of Treasury Directive 21–03, a clearance process including fingerprints, annual tax checks, a Federal Bureau of Investigation criminal check and a practitioner check with the Office of Professional Responsibility will be conducted.

The establishment and operation of the Electronic Tax Administration Advisory Committee (ETAAC) is required by the Internal Revenue Service (IRS) Restructuring and Reform Act of 1998 (RRA 98), Title II, Section 2001(b)(2). ETAAC follows a charter in accordance with the provisions of the Federal Advisory Committee Act (FACA), 5 U.S.C., App. 2. The ETAAC provides continued input into the development and implementation of the IRS's strategy for electronic tax administration. The ETAAC will research, analyze, consider, and make recommendations on a wide range of electronic tax administration issues and will provide input into the development of the strategic plan for electronic tax administration. Members will provide an annual report to Congress by June 30.

Applicants must complete the application form, which includes describing and documenting the applicant's qualifications for ETAAC membership. Applicants must submit a short one or two-page statement including recent examples of specific skills and qualifications as they relate to: cybersecurity and information security, tax software development, tax preparation, payroll and tax financial product processing, systems management and improvement, implementation of customer service initiatives, consumer advocacy and public administration. Examples of critical thinking, strategic planning and oral and written communication are desirable.

An acknowledgement of receipt will be sent to all applicants.

Equal opportunity practices will be followed in all appointments to the ETAAC in accordance with Department of Treasury and IRS policies. The IRS has a special interest in assuring that women and men, members of all races and national origins, and individuals with disabilities have an opportunity to serve on advisory committees. Therefore, IRS extends particular encouragement to nominations from such appropriately qualified individuals.

Dated: January 11, 2021.

## DEPARTMENT OF THE TREASURY

### United States Mint

### Notification of Citizens Coinage Advisory Committee January 19, 2021, Public Meeting

**ACTION:** Notice of meeting.

Pursuant to United States Code, Title 31, section 5135(b)(8)(C), the United States Mint announces the Citizens Coinage Advisory Committee (CCAC) teleconference public meeting scheduled for January 19, 2021.

*Date:* January 19, 2021.

*Time:* 10:30 a.m.–12:00 p.m.

Location: This meeting will occur via teleconference. Interested members of the public may dial in to listen to the meeting at (888) 330–1716; Access Code: 1137147.

*Subject:* Review and discussion of obverse and reverse candidate designs for the 2021 ''Morgan'' and ''Peace'' silver dollars authorized by Public Law 116–286, the 1921 Silver Dollar Coin Anniversary Act.

Interested persons should call the CCAC HOTLINE at (202) 354–7502 for the latest update on meeting time and access information.

The CCAC advises the Secretary of the Treasury on any theme or design proposals relating to circulating coinage, bullion coinage, Congressional Gold Medals, and national and other medals; advises the Secretary of the Treasury with regard to the events, persons, or places to be commemorated by the issuance of commemorative coins in each of the five calendar years succeeding the year in which a commemorative coin designation is made; and makes recommendations with respect to the mintage level for any commemorative coin recommended.

For members of the public interested in listening in to the provided call number, this is a reminder that the public attendance is for listening purposes only. Any member of the public interested in submitting matters for the CCAC's consideration is invited to submit them by email to *info@ccac.gov.*

**FOR FURTHER INFORMATION CONTACT:** Jennifer Warren, United States Mint Liaison to the CCAC; 801 9th Street, NW; Washington, DC 20220; or call 202–354–7208.

(Authority: 31 U.S.C. 5135(b)(8)(C))

## DEPARTMENT OF VETERANS AFFAIRS

### National Research Advisory Council, Notice of Meeting

The Department of Veterans Affairs (VA) gives notice under the Federal Advisory Committee Act, 5 U.S.C. App. 2, that the National Research Advisory Council will hold a meeting on Wednesday, March 3, 2021, by WebEx. The teleconference number is 1–404–397–1596, meeting number 199 427 0701. The weblink is: *https://veteransaffairs.webex.com/veteransaffairs/j.php?MTID=m6d6c6d2ab3141a185f0cb686798a3585.* The meeting will convene at 11:00 a.m. and end at 2:00 p.m. Eastern daylight time. This meeting is open to the public.

The purpose of the National Research Advisory Council is to advise the Secretary on research conducted by the Veterans Health Administration, including policies and programs targeting the high priority of Veterans' health care needs.

On March 3, 2021, the agenda will include a discussion of diversity, equity, and inclusion activities undertaken by the Office of Research and Development; alternative strategies for funding research in response to the Scott Hannon Act; report from the subcommittee on sensitive species; and report from the subcommittee on management of extramural funding. No time will be allocated at this meeting for receiving oral presentations from the public. Members of the public wanting to attend, have questions or presentations to present may contact Dr. Marisue Cody, Designated Federal Officer, Office of Research and Development (14RD), Department of Veterans Affairs, 810 Vermont Avenue NW, Washington, DC 20420, at 202–443–5681, or *Marisue.Cody@va.gov* no later than close of business on January 29, 2021. All questions and presentations will be presented during the public comment section of the meeting. Any member of the public seeking additional information should contact Dr. Cody at the above phone number or email address noted above.

Dated: January 8, 2021.

**LaTonya L. Small,**

*Federal Advisory Committee Management Officer.*

BILLING CODE P

# FEDERAL REGISTER

Vol. 86 Thursday,

No. 9 January 14, 2021

Part II

## Commodity Futures Trading Commission

17 CFR Parts 1, 15, 17, et al.

Position Limits for Derivatives; Final Rule

**COMMODITY FUTURES TRADING COMMISSION**

**17 CFR Parts 1, 15, 17, 19, 40, 140, 150 and 151**

**RIN 3038–AD99**

## Position Limits for Derivatives

**AGENCY:** Commodity Futures Trading Commission.

**ACTION:** Final rule.

**SUMMARY:** The Commodity Futures Trading Commission (''Commission'' or ''CFTC'') is adopting amendments in this final rule (''Final Rule'') to conform regulations concerning speculative position limits to the relevant Wall Street Transparency and Accountability Act of 2010 (''Dodd-Frank Act'') amendments to the Commodity Exchange Act (''CEA''). Among other regulatory amendments, the Commission is adopting: New and amended Federal spot-month limits for 25 physical commodity derivatives; amended single month and all-months-combined limits for most of the agricultural contracts currently subject to Federal position limits; new and amended definitions for use throughout the position limits regulations, including a revised definition of ''bona fide hedging transaction or position'' and a new definition of ''economically equivalent swaps''; amended rules governing exchange-set limit levels and grants of exemptions therefrom; a new streamlined process for bona fide hedging recognitions for purposes of Federal position limits; new enumerated bona fide hedges; and amendments to certain regulatory provisions that would eliminate Form 204 while also enabling the Commission to leverage and receive cash-market reporting submitted directly to the exchanges by market participants.

**DATES:**

*Effective date:* This Final Rule will become effective on March 15, 2021.

*Compliance date:* Compliance dates for this Final Rule shall be as follows:

- January 1, 2022 in connection with the Federal speculative position limits for the 16 non-legacy core referenced futures contracts subject to Federal position limits for the first time under this Final Rule. This compliance date also applies to any associated referenced contracts other than economically equivalent swaps. Such swaps are subject to a separate compliance date noted below.
- January 1, 2022 in connection with an exchange's requirements under § 150.5, as adopted in this Final Rule.
- January 1, 2023 in connection with Federal speculative position limits for economically equivalent swaps, as defined under this Final Rule.
- January 1, 2023 in connection with the elimination of previously-granted risk management exemptions described in § 150.3(c), as adopted in this Final Rule.

**FOR FURTHER INFORMATION CONTACT:** Dorothy DeWitt, Director, (202) 418–6057, *ddewitt@cftc.gov*; Rachel Reicher, Chief Counsel, (202) 418–6233, *rreicher@cftc.gov*; Steven A. ## I. Background

### A. Introduction

The Commission has long established and enforced speculative position limits for futures contracts and options on futures contracts on nine agricultural commodities as authorized by the CEA.[1] These nine agricultural commodity contracts, which have been subject to Federal position limits for decades, are generally referred to as the ''nine legacy agricultural contracts.'' Under this Final Rule, the Commission additionally will establish Federal speculative position limits for certain commodity derivatives contracts associated with 16 additional commodities. The Commission refers to these 16 new commodities and their associated commodity derivatives contracts throughout this release as the ''non-legacy'' contracts since they are subject to Federal position limits for the first time under this Final Rule. Accordingly, under the Final Rule, certain commodity derivatives contracts associated with 25 commodities are subject to Federal position limits.

The Commission's existing position limits regulations [2] in existing part 150

[1] 7 U.S.C. 1 *et seq.*

[2] 17 CFR part 150. Part 150 of the Commission's regulations establishes Federal position limits (that is, position limits established by the Commission) on the nine legacy agricultural contracts. The nine legacy agricultural contracts are: CBOT Corn (and Mini-Corn) (C), CBOT Oats (O), CBOT Soybeans (and Mini-Soybeans) (S), CBOT Wheat (and Mini-Wheat) (W), CBOT Soybean Oil (SO), CBOT Soybean Meal (SM), MGEX Hard Red Spring Wheat (MWE), CBOT KC Hard Red Winter Wheat (KW),

of the Commission's regulations include three components:

First, the Commission's existing regulations establish separate position limit levels for each of the nine legacy agricultural contracts. These Federal position limit levels set the maximum speculative positions in each of the nine legacy agricultural contracts that a person may hold in the spot month, individual month, and all-months-combined.[3]

Second, the existing Federal position limits framework provides exemptions to the Federal position limit levels for positions that constitute ''bona fide hedging transactions or positions'' and for certain ''spread or arbitrage'' positions.[4]

Third, the Commission's existing regulations determine which accounts and positions a person must aggregate for the purpose of determining compliance with the Federal position limit levels.[5]

The existing Federal speculative position limits function in parallel to exchange-set position limits and/or exchange-set position accountability required by designated contract market (''DCM'') Core Principle 5.[6] As a result, the nine legacy agricultural contracts are subject to both Federal and exchange-set limits, whereas other exchange-traded futures contracts and options on futures contracts are subject only to DCM-set limits and/or position accountability.

As part of the Dodd-Frank Act, Congress amended the CEA's position limits provisions, which since 1936 have authorized the Commission (and its predecessor) to impose limits on speculative positions to prevent the harms caused by excessive speculation. As discussed below, the Commission interprets these amendments as, among other things, tasking the Commission with establishing such position limits as it finds are ''necessary'' for the purpose of ''diminishing, eliminating, or preventing'' excessive speculation causing sudden or unreasonable fluctuations or unwarranted changes in the price of such commodity.[7] The Commission also interprets these amendments as tasking the Commission with establishing position limits on any ''economically equivalent'' swaps.[8]

The Commission previously issued proposed and final rules in 2011 (''2011 Final Rulemaking'') to implement the provisions of the Dodd-Frank Act regarding position limits and the bona fide hedge definition.[9] A September 28, 2012 order of the U.S. District Court for the District of Columbia vacated the 2011 Final Rulemaking, with the exception of the rule's amendments to 17 CFR 150.2.[10]

Subsequently, the Commission proposed position limits regulations in 2013 (''2013 Proposal''), in June of 2016 (''2016 Supplemental Proposal''), and again in December of 2016 (''2016 Reproposal'').[11] The 2016 Reproposal would have amended part 150 of the Commission's regulations to, among other things: Establish Federal position limits for 25 physical commodity futures contracts and their linked futures contracts, options on futures contracts, and ''economically equivalent'' swaps; revise the existing exemptions from such limits, including for bona fide hedges; and establish a framework for exchanges[12] to recognize certain positions as bona fide hedges and thus exempt from position limits.

To date, the Commission has not issued any final rulemaking based on the 2013 Proposal, 2016 Supplemental Proposal, or 2016 Reproposal. The 2016 Reproposal generally addressed comments received in response to the 2013 Proposal and the 2016 Supplemental Proposal. In a separate 2016 proposed rulemaking, the CFTC also proposed, and later adopted in 2016, amendments to rules in § 150.4 of the Commission's regulations governing aggregation of positions for purposes of compliance with Federal position limits.[13] These aggregation rules currently apply only to the nine legacy agricultural contracts subject to existing Federal position limits. Going forward, these aggregation rules will apply to all commodity derivative contracts that are subject to Federal position limits under this Final Rule.

The Commission published a notice of a proposed rulemaking in the **Federal Register** on February 27, 2020 for a new position limits proposal (''2020 NPRM''). After reconsidering the prior proposals, including reviewing the comments responding thereto, the Commission in the 2020 NPRM withdrew from further consideration the 2013 Proposal, the 2016 Supplemental Proposal, and the 2016 Reproposal.[14]

In the 2020 NPRM, the Commission intended to: (1) Recognize differences across commodities and contracts, including differences in commercial hedging and cash-market reporting practices; (2) focus on commodity derivative contracts that are critical to price discovery and distribution of the underlying commodities such that the burden of excessive speculation in the commodity derivative contracts may have a particularly acute impact on interstate commerce for the underling commodities; and (3) reduce duplication and inefficiency by leveraging existing expertise and processes at DCMs.

The public comment period for the 2020 NPRM ended May 15, 2020,[15] and

and ICE Cotton No. 2 (CT). *See* 17 CFR 150.2. The Federal position limits on these agricultural contracts are referred to as ''legacy'' limits because these contracts have been subject to Federal position limits for decades.

[3] *See* 17 CFR 150.2.

[4] *See* 17 CFR 150.3.

[5] *See* 17 CFR 150.4.

[6] 7 U.S.C. 7(d)(5); 17 CFR 38.300. Paragraph (A) of DCM Core Principle 5 provides: To reduce the potential threat of market manipulation or congestion (especially during trading in the delivery month), the board of trade shall adopt for each contract of the board of trade, as is necessary and appropriate, position limitations or position accountability for speculators. Position limits generally cannot be exceeded absent an exemption, whereas position accountability allows an exchange to establish a level at which market participants, including those participants who do not qualify for an exemption, are required to: Provide position information to the exchange prior to increasing a position above the accountability level; halt further position increases; and/or reduce positions in an orderly manner. Core Principle 6 in part 37 of the Commission's regulations for swap execution facilities (''SEFs'') contains similar language. 17 CFR 38.600.

Under the Final Aggregation Rulemaking, unless an exemption applies, a person's positions must be aggregated with positions for which the person controls trading or for which the person holds a 10% or greater ownership interest. The Division of Market Oversight has issued time-limited no-action relief from some of the aggregation requirements contained in that rulemaking. *See* CFTC Letter No. 19–19 (July 31, 2019), available at *https://www.cftc.gov/csl/19-19/download.*

[14] Because the earlier proposals were withdrawn in the 2020 NPRM, comments on the earlier proposals are not part of the administrative record with respect to the 2020 NPRM nor with respect to this Final Rule, except where expressly referenced herein. In the 2020 NPRM, the Commission stated that commenters to the 2016 Reproposal should resubmit comments relevant to the subject proposal; commenters who wish to reference prior comment letters should cite those prior comment letters as specifically as possible. (85 FR at 11597). Accordingly, this Final Rule will not discuss comments submitted in connection with the 2016 Reproposal unless such comments were resubmitted for the 2020 NPRM.

[15] Comments were originally due by April 29, 2020. Due to the COVID–19 pandemic, the

Continued

the Commission received approximately 75 public comment letters.[16] After reviewing these public comment letters, and for the general reasons discussed in this release, the Commission is adopting the 2020 NPRM with certain modifications in this Final Rule.[17]

Before addressing the specifics of the Final Rule, the Commission outlines several themes underscoring the Commission's approach in the Final Rule.

First, the Commission believes that any position limits regime must take into account differences across commodities and contract types. The existing Federal position limits regulations apply only to the nine legacy agricultural contracts, all of which are physically-settled futures on agricultural commodities. Limits on these nine legacy agricultural contracts have been in place for decades, as have the Federal rules governing both the exemptions from these Federal position limits and the exchange-set position limits on the nine legacy agricultural contracts. The existing framework is largely a historical remnant of an approach that predates cash-settled futures contracts, institutional-investor interest in commodity indexes, highly liquid energy markets, and the Commission's jurisdiction over certain swaps.

Congress has tasked the Commission with establishing such limits as it finds are ''necessary'' for the purpose of preventing the burdens associated with excessive speculation causing sudden or unreasonable fluctuations or unwarranted changes in the price of an underlying commodity; and establishing limits on swaps that are ''economically equivalent'' to any futures contracts or options on futures contracts subject to Federal position limits. An approach that is flexible enough to accommodate potential future, unpredictable developments in commercial hedging practices is well-suited for the current derivatives markets by accommodating differences in commodity types, contract specifications, hedging practices, cash-market trading practices, organizational structures of hedging participants, and liquidity profiles of individual markets.

The Commission is building this flexibility into several parts of the Final Rule, including: (1) Exchange-set limits or accountability levels outside of the spot month for referenced contracts based on commodities other than the nine legacy agricultural contracts; (2) the ability for exchanges to use more than one formula when setting their own limit levels; (3) an updated formula for Federal non-spot month position limit levels on the nine legacy agricultural contracts that is calibrated to recently observed open interest, which has generally increased over time; (4) a bona fide hedging definition that is broad enough to accommodate common commercial hedging practices, including unfixed-price transactions as well as anticipatory hedging practices, such as anticipatory merchandising; (5) a simplified process for market participants to submit a single application to obtain non-enumerated bona fide hedge recognitions for purposes of Federal and exchange-set position limits that are in line with common commercial hedging practices; (6) the elimination of a restriction for purposes of Federal position limits on holding positions during the last trading days of the spot month; and (7) broader discretion for market participants to measure risk in the manner most suitable for their businesses.

Second, the Final Rule establishes position limits with respect to 16 additional commodities during the spot month, for a total of 25 core referenced futures contracts, and certain derivative contracts linked thereto, for which the Commission finds that speculative position limits are necessary.[18] As described below, this necessity finding for the 25 core referenced futures contracts is based on two interrelated factors: (1) The importance of the 25 core referenced futures contracts to their respective underlying cash markets, including that they require physical delivery of the underlying commodity; and (2) the particular importance to the national economy of the commodities underlying the 25 contracts.[19]

Third, there is an opportunity for greater collaboration between the Commission and the exchanges within the statutorily created parallel Federal and exchange-set position limit regimes. Given the exchanges' obligations to carry out self-regulatory responsibilities, resources, deep knowledge of their markets and trading practices, close interactions with market participants, existing programs for addressing exemption requests, and direct ability to leverage these resources to generally act more quickly than the Commission, the Commission believes that cooperation between the Commission and the exchanges on position limits should not only be continued, but enhanced. For

---

Commission extended the deadline to May 15, 2020.

[16] The Commission states ''approximately 75 relevant comment letters'' since several commenters submitted additional, or supplemental, comments. As a result, the total could change slightly depending on whether one includes these supplemental comment letters in the total. Thus, for the avoidance of doubt, the Commission uses ''approximately.'' The Commission received comments from: American Cotton Shippers Association (''ACSA''); American Feed Industry Association (''AFIA''); American Gas Association (''AGA''); AQR Capital Management, LLC (''AQR''); Archer Daniels Midland (''ADM''); AMCOT; Americans for Financial Reform (''AFR''); Arthur Dunavant Investments (''Dunavant''); ASR Group International, Inc. [17] The Final Rule's regulations are discussed in detail throughout this release.

[18] *See infra* Section III.C.2.

[19] *Id.*

example, exchanges are particularly well-positioned to: Provide the Commission with estimates of deliverable supply in connection with their commodity contracts that require physical delivery; recommend limit levels for the Commission's consideration; and help administer the program for recognizing bona fide hedges. Further, given that the Final Rule requires exchanges to collect, and provide to the Commission upon request, cash-market information from market participants requesting recognition of bona fide hedges, the Commission is eliminating the Form 204 and part of the Form 304, which market participants with bona fide hedging positions in excess of position limits currently file each month with the Commission to demonstrate cash-market positions justifying such overages. Under enhanced collaboration, the Commission will maintain its access to such information from the exchanges, which will result in a more efficient administrative process, in part by reducing duplication of efforts.

*B. Executive Summary*

This executive summary provides an overview of the key components of the Final Rule. The summary only highlights certain aspects of the final regulations and generally uses shorthand to summarize complex topics. The executive summary is neither intended to be a comprehensive recitation of the Final Rule nor intended to supplement, modify, or replace any interpretive or other language contained herein. Section II of this release includes a more detailed and comprehensive discussion of all of the final regulations. The final regulations and related appendices and guidance follow Section IV (Related Matters) of this release.

1. Contracts Subject to Federal Speculative Position Limits

Federal position limits apply to ''referenced contracts,'' which, as described in turn below, include: (i) 25 ''core referenced futures contracts'' (*i.e.,* the nine legacy agricultural contracts together with the new 16 non-legacy contracts); (ii) futures contracts and options on futures contracts directly or indirectly linked to a core referenced futures contract; and (iii) ''economically equivalent swaps.''

i. Core Referenced Futures Contracts

Federal position limits under the Final Rule will apply to the following 25 [20] physically-settled core referenced futures contracts:

[20] Reference to, or discussion of, derivatives contracts listed on IFUS, the DCM and subsidiary of ICE, will be referred to herein as ''ICE [Commodity] [IFUS Commodity Code]'' (*e.g.,* ICE Sugar No. 16 (SF)). Additionally, ''CBOT'' refers to the DCM Board of Trade of the City of Chicago, Inc.; ''CME'' refers to the DCM Chicago Mercantile Exchange, Inc.; ''COMEX'' refers to the DCM Commodity Exchange, Inc.; and ''NYMEX'' refers to the DCM New York Mercantile Exchange, Inc.

ii. Futures Contracts and Options on Futures Contracts Linked to a Core Referenced Futures Contract

The term ''referenced contract'' encompasses any core referenced futures contract as well as any futures contract and any option on a futures contract that is: (1) Directly or indirectly linked to the price of a core referenced futures contract; or (2) directly or indirectly linked to the price of the same commodity underlying the applicable core referenced futures contract, for delivery at the same location as specified in that core referenced futures contract.[22] The term ''referenced contract,'' however, explicitly excludes location basis contracts, commodity index contracts, contracts that are based on prices across a month (*i.e.,* contracts commonly referred to as calendar month average contracts, trade month average contracts, or balance of month contracts), outright contracts that are based on a price reporting agency index price, swap guarantees, and trade options that meet certain requirements.

iii. Economically Equivalent Swaps

The term referenced contracts also includes economically equivalent swaps, defined as swaps with ''identical material'' contractual specifications, terms, and conditions to a referenced contract. Swaps in a commodity other than natural gas that have identical material specifications, terms, and conditions to a referenced contract are still deemed economically equivalent swaps even if they differ from the referenced contract with respect to one or more of the following: (a) Lot size specifications or notional amounts, (b) delivery dates diverging by less than one calendar day for physically-settled swaps, or (c) post-trade risk management arrangement (*e.g.,* uncleared swaps versus cleared futures contracts).

The same general definition applies to natural gas swaps, except that the definition is expanded to include swaps with delivery dates diverging from the corresponding core referenced futures contract by less than *two* calendar days.

Instruments that are exempt from Commission jurisdiction or otherwise not deemed to be swaps under the Commission's regulations (*e.g.,* instruments that are excluded by the CEA's ''swap'' definition or Commission regulations as physically-settled forward contracts) are not ''economically equivalent swaps'' even if they otherwise fall within the ''economically equivalent swap'' definition.

2. Federal Position Limit Levels During the Spot Month

[21] While the Final Rule includes Federal non-spot month limits only for referenced cintracts on the nine legacy agricultural contracts, the Final Rule requires exchanges to establish, consistent with Commission standards set forth in this Final Rule, exchange-set position limits and/or position accountability levels in the non-spot months for the 16 non-legacy core referenced futures contracts and for any associated referenced contracts.

[22] For clarity, clause (2) is intended to encompass potential physically-settled ''look-alike'' contracts that do not directly reference a core referenced futures contract but that are nonetheless based on the same commodity and delivery location as a core referenced futures contract.

Federal spot month position limits apply to all 25 core referenced futures contracts and their associated referenced contracts. The Final Rule establishes the spot month position limit levels summarized in the table below. Each spot month limit is set at or below 25% of deliverable supply, as estimated using recent data provided by the DCM listing the core referenced futures contract, and verified by the Commission. The Federal spot month position limits apply on a futures-equivalent basis based on the size of the unit of trading of the relevant core referenced futures contract.

BILLING CODE 6351–01–C

[23] As of October 15, 2020.

[24] The Federal spot month limit for Live Cattle adopted herein features a step-down limit similar to the CME's existing Live Cattle step-down exchange-set limit. The Federal spot month step-down limit is: (1) 600 at the close of trading on the first business day following the first Friday of the contract month; (2) 300 at the close of trading on the business day prior to the last five trading days of the contract month; and (3) 200 at the close of trading on the business day prior to the last two trading days of the contract month.

[25] ICE technically does not have an exchange-set spot month position limit level for ICE Sugar No. 16 (SF). However, it does have a single-month position limit level of 1,000 contracts, which effectively operates as a spot month position limit.

[26] As discussed below, the NYMEX Henry Hub Natural Gas (NG) Federal spot month limit for cash-settled look-alike referenced contracts will apply on a per-exchange and per-OTC swaps market basis rather than on an aggregate basis across exchanges.

[27] Currently, the cash-settled natural gas contracts are subject to an exchange-set spot month position limit level of 1,000 equivalent-sized contracts *per exchange*. As of publication of the Final Rule, there are three exchanges that list cash-settled natural gas contracts: NYMEX, IFUS, and Nodal. As a result, a market participant may hold up to 3,000 equivalent-sized cash-settled natural gas contracts under existing exchange-set limits.

The exchanges also have a conditional position limit framework for natural gas contracts. This exchange-set conditional spot month position limit permits up to 5,000 cash-settled NYMEX NG equivalent-sized referenced contracts *per exchange* that lists such contracts, provided that the market participant does not hold positions in the physically-settled NYMEX NG referenced contract.

[28] The Federal spot month limit for Light Sweet Crude Oil adopted herein features the following step-down limit: (1) 6,000 contracts as of the close

i. Application of Federal Spot Month Limits to Commodities Other Than Natural Gas

With the exception of natural gas, the Federal spot month position limit levels apply in the aggregate across exchanges and the over-the-counter (''OTC'') swap markets.

During the spot month, Federal position limits apply ''separately'' to physically-settled and cash-settled referenced contracts.[29] Accordingly, during the spot month, a market participant is required to aggregate its net physically-settled positions, and separately its net cash-settled positions, across exchanges and the OTC swaps markets, but may not net cash-settled referenced contracts with physically-settled referenced contracts.

ii. Application of Federal Spot Month Limits to Natural Gas

For the NYMEX Henry Hub Natural Gas (''NYMEX NG'') physically-delivered core referenced futures contract and its associated cash-settled referenced contracts, the Final Rule modifies the 2020 NPRM by providing that Federal position limits apply to NYMEX NG cash-settled referenced contracts on a per-exchange and per-OTC swaps market basis (*i.e.,* cash-settled positions are *not* aggregated across different exchanges and the OTC swaps market).

Specifically, a market participant may hold up to 2,000 cash-settled NYMEX NG referenced contracts (*i.e.,* the NYMEX NG Federal spot month position limit) on each exchange that lists for trading a cash-settled NYMEX NG referenced contract as well as the OTC swap market. Currently, three exchanges (NYMEX, IFUS, and Nodal)[30] list cash-settled ''look-alike'' NYMEX NG referenced contracts. Thus, a market participant is able to hold 2,000 cash-settled NYMEX NG referenced futures contracts on each exchange, which is 6,000 cash-settled look-alike NYMEX NG referenced contracts in total. In addition, a market participant is able to hold a position of 2,000 cash-settled NYMEX NG equivalent-sized economically equivalent swaps in the OTC swaps markets for a total position of 8,000 cash-settled NYMEX NG referenced contracts across the four markets (*i.e.,* NYMEX, IFUS, Nodal, and the OTC swaps market).

As noted above, because Federal spot month position limit levels apply ''separately'' to cash-settled and physically-settled referenced contracts, a market participant further is able to hold an additional position of 2,000 physically-settled NYMEX NG referenced contracts for a total position of 10,000 NYMEX NG referenced contracts.

As discussed further below, market participants may hold additional cash-settled NYMEX NG referenced contracts under the Final Rule's Federal spot month conditional position limit exemption as long as the market participant satisfies certain requirements. However, for the avoidance of doubt, the Commission notes that the per-exchange 2,000 contract Federal spot month position limit level for cash-settled NYMEX NG referenced contracts discussed above is not part of the Federal spot month conditional position limit exemption but rather constitutes the default speculative Federal spot month position limit.

3. Federal Position Limit Levels Outside of the Spot Month

Under the Final Rule, Federal position limits outside of the spot month (''non-spot month'' position limits) apply only to the nine legacy agricultural contracts and their associated referenced contracts.

In contrast, referenced contracts based on the 16 core referenced futures contracts subject to Federal position limits for the first time under the Final Rule are only subject to Federal position limits during the spot month, and are otherwise only subject to exchange-set limits or position accountability outside of the spot month.

The following Federal non-spot month position limit levels, summarized in the table below, are set at 10% of open interest for the first 50,000 contracts, with an incremental increase of 2.5% of open interest thereafter, and apply on a futures-equivalent basis based on the size of the unit of trading of the relevant core referenced futures contract:

of trading three business days prior to the last trading day of the contract; (2) 5,000 contracts as of the close of trading two business days prior to the last trading day of the contract; and (3) 4,000 contracts as of the close of trading one business day prior to the last trading day of the contract.

[29] As discussed further under Section II.B.3.vi, cash-settled NYMEX NG referenced contracts under the Final Rule are subject to per-exchange and per-OTC swaps market Federal position limits. As a result, market participants are not required to aggregate their positions in natural gas referenced contracts across different exchanges and the OTC swaps markets but also may not net such positions across different exchanges or the OTC swaps market.

[30] ''Nodal'' refers to the Nodal Exchange, LLC.

| Core Referenced Futures Contract | 2020 Final Rule Federal Single Month[31] and All-Months-Combined Limit Levels | 2020 Proposed Federal Single Month and All-Months-Combined Limit Levels | Existing Federal Single Month and All-Months-Combined Limit Levels | Existing Exchange-Set Single Month and All-Months-Combined Limit Levels[32] |

4. Exchange-Set Limits and Exemptions Therefrom

i. Contracts Subject to Federal Position Limits

An exchange that lists a contract subject to Federal position limits, as specified above, is required to set its own limits for such contracts at a level that is no higher than the Federal level. Exchanges may grant exemptions from their own limits to a level that exceeds the applicable Federal limit, provided the exemption is self-effectuating (*e.g.,* an enumerated bona fide hedge or a spread that satisfies the ''spread transaction'' definition) or provided the exemption is recognized by the Commission for purposes of Federal position limits (pursuant to an application submitted either directly to the Commission under § 150.3 or indirectly to the Commission through an exchange under § 150.9, as applicable). Exchanges may grant exemptions that are not recognized by the Final Rule; however, such exemptions must be capped at a level that is not higher than the applicable Federal position limit level.

ii. Physical Commodity Contracts Not Subject to Federal Position Limits

For physical commodity contracts, for which no necessity finding was supported, and which are therefore not subject to Federal position limits, an exchange is generally required to set spot month position limit levels at no greater than 25% of deliverable supply, but has flexibility to submit other approaches for review by the Commission, provided the approach results in spot month position limit levels that are ''necessary and appropriate to reduce the potential threat of market manipulation or price distortion of the contract's or the underlying commodity's price or index'' and complies with all other applicable regulations.

Outside of the spot month, an exchange has additional flexibility to set either position limits or position accountability levels, provided the levels are ''necessary and appropriate to reduce the potential threat of market manipulation or price distortion of the contract's or the underlying commodity's price or index.'' Non-exclusive Acceptable Practices are included in new Appendix F to part 150 under the Final Rule and provide several examples of formulas that the Commission has determined meet this standard, but an exchange has flexibility to develop other approaches.

An exchange has flexibility to grant a variety of exemption types. Exchanges must take into account whether the exemption results in a position that is

31 With the exception of the ICE Cotton No. 2 (CT) contract discussed below, for each of the legacy agricultural contracts, the single month limit is equal to the all-months-combined limit under the Final Rule.

32 As of October 15, 2020.

33 The single month limit for ICE Cotton No. 2 (CT) is set at 50% of the all-months-combined limit, or 5,950 contracts, as discussed more fully below.

''not in accord with sound commercial practices'' in the market for which the exchange is considering the application, and/or ''exceed[s] an amount that may be established and liquidated in an orderly fashion in that market.''

5. Limits on ''Pre-Existing Positions''

As discussed above, only swaps that qualify as ''economically equivalent swaps'' are subject to Federal position limits under the Final Rule. However, economically equivalent swaps entered into in good faith prior to the Final Rule's Effective Date, including both ''Pre-Enactment Swaps,'' which are swaps entered into prior to the Dodd-Frank Act whose terms have not expired, and ''Transition Period Swaps,'' which are swaps entered into between July 22, 2010 and the Final Rule's effective date, are not subject to Federal position limits. Other pre-existing positions (*i.e.,* pre-existing positions that are futures contracts or options on futures contracts) will be subject to the Final Rule's Federal position limits.[34]

Market participants may net down their post-Effective Date positions in commodity derivatives contracts with any pre-existing swaps (as long as such swaps qualify as economically equivalent swaps) for purposes of complying with non-spot month Federal position limits. In contrast, during the spot month, market participants may not apply these pre-existing swap positions to net down their positions so as to avoid rendering Federal spot month position limits ineffective. The Commission is particularly concerned about protecting the spot month in physically-delivered futures from price distortions or potential manipulation and consequent disruption of the hedging and price discovery utility of the related futures contract.

6. Legal Standards for Exemptions From Federal Position Limits

i. Bona Fide Hedge Recognition

A bona fide hedging transaction or position may exceed Federal position limits if the hedge position satisfies all three elements of the Final Rule's ''general'' bona fide hedging definition. That is, (1) the position represents a substitute for transactions or positions made or to be made at a later time in a physical marketing channel (''temporary substitute test''); (2) the position is economically appropriate to the reduction of price risks in the conduct and management of a commercial enterprise (''economically appropriate test''); and (3) the position arises from the potential change in value of actual or anticipated assets, liabilities, or services (''change in value requirement'').

The Final Rule makes several changes to the existing bona fide hedging definition, including those described immediately below:

First, the Commission is expanding the existing list of ''enumerated'' bona fide hedges to cover additional hedging practices, including adding a bona fide hedge for anticipated merchandising.[35] To provide greater certainty, the list of enumerated bona fide hedges is now incorporated into the regulation. In contrast, in the 2020 NPRM, this list of enumerated bona fide hedges was proposed in the form of non-binding acceptable practices in Appendix A to part 150. While the enumerated bona fide hedges will remain listed in Appendix A under the Final Rule, Appendix A to part 150 is now explicitly incorporated into Commission regulations and is part of the regulatory text rather than acceptable practices.

A person who holds a position that qualifies as a bona fide hedge and that is one of the enumerated hedges in Appendix A to part 150 is not required to request prior approval from the Commission to hold such bona fide hedge position above the Federal position limit. That is, the enumerated bona fide hedges are ''self-effectuating'' for purposes of Federal position limits. A person with an enumerated bona fide hedge position, however, would still need to request an exemption from the relevant exchange for any exchange-set limits.[36]

Second, with respect to the treatment of unfixed-price forward transactions and bona fide hedging under the Final Rule, the Commission clarifies that a commercial market participant may qualify for one of the Final Rule's enumerated anticipatory bona fide hedges (*i.e.,* enumerated bona fide hedges for unsold anticipated production, unfilled anticipated requirements, and anticipated merchandising) with respect to an unfixed-price forward transaction. The Commission believes that an unfixed-price forward transaction should not preclude a commercial market participant from qualifying for one of these enumerated anticipatory bona fide hedges, because such unfixed-price forward transactions do not give rise to outright price risk for a commercial market participant and do not otherwise fix an outright price. Accordingly, unfixed-price transactions do not ''fill'' or ''address'' the hedging need for which the enumerated anticipatory bona fide hedges are predicated.

The Commission notes that an unfixed-price forward transaction does not itself allow a market participant to qualify for one of these enumerated anticipatory bona fide hedges, and that a market participant must still satisfy the requirements of the applicable anticipatory bona fide hedge to qualify (*e.g.,* as an initial matter, by the commercial market participant being able to demonstrate its anticipated unsold production, anticipated unfilled requirements, and/or anticipated merchandising).

Third, the Final Rule clarifies whether and when market participants may measure risk on a gross basis rather than on a net basis. Instead of only being permitted to hedge on a ''net basis'' except in a narrow set of circumstances, a market participant is also able to generally hedge positions on a ''gross basis,'' provided that the participant has done so over time in a consistent manner and is not doing so to evade Federal position limits. Among other items, the Final Rule differs from the 2020 NPRM in that the Final Rule: (1) Eliminates the requirement that exchanges document their justifications when allowing gross hedging; (2) clarifies that market participants are not required to develop written policies or procedures that set forth when gross

[34] However, as discussed further below, the Commission is providing for a compliance period until January 1, 2022 for the 16 non-legacy referenced contracts that will be subject to Federal position limits for the first time under this Final Rule. Similarly, the Commission is providing for a compliance period for any economically equivalent swaps, as well as in connection with the elimination of the risk management exemption, until January 1, 2023.

[35] The existing definition of ''bona fide hedging transactions and positions'' enumerates the following hedging transactions or positions: (1) Hedges of inventory and cash commodity fixed-price purchase contracts under 1.3(z)(2)(i)(A); (2) hedges of unsold anticipated production under 1.3(z)(2)(i)(B); (3) hedges of cash commodity fixed-price sales and (4) hedges of fixed price sales of their cash products and byproducts contracts under 1.3(z)(2)(ii)(A) and (B); (5) hedges of unfilled anticipated requirements under 1.3(z)(2)(ii)(C); (6) hedges of offsetting unfixed price cash commodity sales and purchases under 1.3(z)(2)(iii); and (7) cross-commodity hedges under 1.3(z)(2)(iv). The following additional hedging practices are not enumerated in the existing regulation, but are included as enumerated hedges in the Final Rule: (1) Hedges of anticipated merchandising; (2) hedges by agents; (3) hedges of anticipated royalties; (4) hedges of services; and (5) offsets of commodity trade options.

[36] The processes for obtaining bona fide hedge recognitions and non-enumerated bona fide hedge recognitions are summarized in Section 7 below of this executive summary (Processes for Requesting Bona Fide Hedge Recognitions and Spread Exemptions).

versus net hedging is appropriate; and (3) clarifies that gross hedging is permissible for both enumerated and non-enumerated hedges.

Fourth, market participants are permitted to hold bona fide hedges in excess of Federal position limits during the last five days of the spot period (or during the time period for the spot month if less than five days). While the Final Rule does not include a Federal restriction on holding bona fide hedging positions in excess of Federal position limits during the spot period, exchanges continue to have the discretion to adopt such restrictions (commonly referred to by market participants as the "Five-Day Rule"), or similar restrictions, for purposes of exchange-set limits. The Final Rule also includes guidance on the application of spot-period restrictions, including factors for exchanges with such restrictions to consider when determining to grant exemptions that are not subject to any such restrictions for purposes of their own limits.

Finally, the Final Rule modifies the "temporary substitute test" to require that a bona fide hedging transaction or position in a physical commodity must *always,* and not just *normally,* be connected to the production, sale, or use of a physical cash-market commodity. Therefore, a market participant is generally no longer allowed to treat positions entered into for "risk management purposes" [37] as a bona fide hedge, unless the position qualifies as either: (i) An offset of a pass-through swap, where the offset reduces price risk attendant to the pass-through swap executed opposite a counterparty for whom the swap qualifies as a bona fide hedge; or (ii) a "swap offset," where the offset is used by a counterparty to reduce price risk attendant to a swap that qualifies as a bona fide hedge and that was previously entered into by that counterparty.

ii. Spread Exemption

A transaction or position may also exceed Federal position limits if it qualifies as a "spread transaction," which includes the following common types of spreads: Intra-market spreads; inter-market spreads; intra-commodity spreads; inter-commodity spreads; calendar spreads; quality differential spreads; processing spreads (such as energy "crack" or soybean "crush" spreads); product and by-product differential spreads; and futures-options spreads.[38]

Spread exemptions may be granted using the process described in Section 7 below of this executive summary (Processes for Requesting Bona Fide Hedge Recognitions and Spread Exemptions).

iii. Financial Distress Exemption

This exemption allows a market participant to exceed Federal position limits if necessary to take on the positions and associated risk of another market participant during a potential default or bankruptcy situation. This exemption is available on a case-by-case basis, depending on the facts and circumstances involved.

iv. Conditional Spot Month Limit Exemption in Natural Gas

As long as a market participant holds no physically-settled NYMEX NG contracts, the Final Rule allows that market participant to exceed the NYMEX NG Federal spot month position limit level of 2,000 cash-settled referenced contracts per exchange (and an additional 2,000 equivalent-sized economically equivalent OTC swaps) by holding 10,000 cash-settled NYMEX NG referenced contracts per DCM that lists cash-settled NYMEX NG referenced contracts, as well as an additional 10,000 equivalent-sized cash-settled economically equivalent NYMEX NG swaps. The Final Rule clarifies that market participants may not use a spread exemption to exceed the aforementioned conditional spot month limit for natural gas.

7. Processes for Requesting Bona Fide Hedge Recognitions and Spread Exemptions

i. Self-Effectuating Enumerated Bona Fide Hedges

A position that complies with the bona fide hedging definition in § 150.1 and falls within one of the enumerated bona fide hedges is self-effectuating for purposes of Federal position limits, provided the market participant separately applies to the relevant exchange for an exemption from exchange-set limits. Such market participants are no longer required to file Form 204/304 with the Commission on a monthly basis to demonstrate cash-market positions justifying Federal position limit overages. Instead, the Commission will have access to cash-market information that such market participants submit as part of their applications to an exchange for an exemption from exchange-set limits, typically filed on an annual basis.

ii. Bona Fide Hedges That Are Not Self-Effectuating

The Commission may consider adding to the list of enumerated bona fide hedges at a later time, as the Commission may find appropriate. Until that time, all bona fide hedge positions that are not enumerated in Appendix A to part 150 must be granted pursuant to one of the processes for requesting a non-enumerated bona fide hedge recognition, as explained below.

A market participant seeking to exceed Federal position limits for a non-enumerated bona fide hedging transaction or position is able to choose whether to apply directly to the Commission or, alternatively, apply indirectly to the Commission through the applicable exchange using a new streamlined process. If applying directly to the Commission, the market participant must also separately apply to the relevant exchange for relief from exchange-set position limits. If applying to an exchange using the new streamlined process, a market participant may file an application with an exchange, generally at least annually, which will be valid both for purposes of Federal and exchange-set position limits.

Under this streamlined process, if the exchange determines to grant a non-enumerated bona fide hedge recognition for purposes of its exchange-set position limits, the exchange must notify the Commission and the applicant simultaneously. Then, 10 business days (or two business days in the case of retroactive applications filed late due to sudden or unforeseen bona fide hedging needs) after the exchange issues such a determination, the bona fide hedge exemption may be deemed approved for purposes of Federal position limits unless the Commission (and not Commission staff) notifies the market participant otherwise. That is, after the 10 (or two) business days expire, the bona fide hedge exemption is considered approved for purposes of Federal position limits. Under the Final Rule, once the exchange notifies the Commission and the applicant of the exchange's determination to approve the application, the applicant may, at its own risk, exceed Federal position limits during the Commission's 10 business-day review period.

If the Commission determines to deny an exemption application, the applicant will not be subject to any Federal position limits violation, provided the

[37] The phrase "risk management" as used in this instance refers to derivatives positions, typically held by a swap dealer, used to offset a swap position, such as a commodity index swap, with another entity for which that swap is not a bona fide hedge.

[38] The Final Rule expands the 2020 NPRM's list of exempt spread transactions by also including intra-market spreads, inter-market spreads, and intra-commodity spreads.

person filed the application in good faith and brings the position into compliance with the applicable Federal position limit within a commercially reasonable amount of time, as applicable.

The Final Rule also allows a market participant with sudden or unforeseen hedging needs to file a request for a bona fide hedge exemption within five business days after exceeding the Federal limit (*i.e.,* commonly referred to as a ''retroactive'' exemption application). If the Commission denies such application, the market participant will not be subject to a Federal position limit violation, provided the market participant filed the application in good faith and brings the position into compliance with the applicable Federal position limit within a commercially reasonable amount of time, as applicable.

Among other changes, market participants are no longer required to file Forms 204 or 304, as applicable, with the Commission on a monthly basis to demonstrate cash-market positions justifying position limit overages. Under the Final Rule, the Commission will instead leverage cash-market information submitted directly to the exchanges.

iii. Spread Exemptions

For a referenced contract on any commodity, a spread exemption is self-effectuating for purposes of Federal position limits, provided that (1) the position falls within one of the categories set forth in the ''spread transaction'' definition, and (2) the market participant separately applies to the applicable exchange for a spread exemption from exchange-set position limits.[39]

A market participant with a spread position that does not fit within the ''spread transaction'' definition with respect to any of the commodities subject to Federal position limits may apply directly to the Commission, and must also separately apply to the applicable exchange.

8. Compliance Date and Effective Date

i. Summary

The Final Rule's effective date is March 15, 2021 (the ''Effective Date''). This means that all aspects of the Final Rule will be effective as of the Effective Date, including the new enumerated bona fide hedges (*e.g.,* anticipated merchandising) as well as the higher Federal position limits for the nine legacy agricultural contracts. However, as discussed below, the Commission is also providing for compliance dates that extend beyond the Effective Date in connection with several of the Final Rule's requirements.

The Final Rule provides market participants with a compliance date of January 1, 2022 for purposes of compliance with the Federal position limits for the 16 non-legacy core referenced futures contracts that are subject to Federal position limits for the first time under this Final Rule. This compliance date also applies to any referenced contracts (other than economically equivalent swaps, which have a separate compliance date as discussed further below) related to these 16 non-legacy core referenced futures contracts.

The Final Rule also provides exchanges with a compliance date of January 1, 2022 for purposes of establishing exchange-set position limits and provisions associated with exemptions therefrom, including certain obligations to collect cash-market information from market participants in connection with market participants' applications for bona fide hedging exemptions to exchange-set limits, and to share the same with the Commission, consistent with the requirements under the Final Rule.

Additionally, the Final Rule provides a compliance date of January 1, 2023 with respect to (i) the elimination of previously-granted risk management exemptions,[40] and (ii) Federal position limits for economically equivalent swaps.

Because the nine legacy agricultural contracts are currently subject to Federal position limits under the existing Federal framework, the Final Rule does not provide a compliance date for the new Federal position limits under the Final Rule for such contracts, or a formal phase-in period. Therefore, such limits go into effect on the Effective Date. Thus, as of the Effective Date, market participants will be able to avail themselves of the Federal position limits under the Final Rule for the nine legacy agricultural contracts, all of which are higher than the existing Federal position limits (except for CBOT Oats, which will maintain the existing Federal position limit levels). However, the Commission notes that exchange-set position limits will remain at current levels unless and until the relevant exchange submits a rule amendment pursuant to part 40 of the Commission's regulations to amend the relevant exchange-set position limit.

Furthermore, the Commission is delaying implementation of exchange-set position limits on swaps since exchanges cannot view market participants' positions in swap positions across the various places they trade, including on competitor exchanges.[41] However, after the January 1, 2023 compliance date for economically equivalent swaps (discussed above), the Commission underscores that it will enforce Federal position limits in connection with swaps.

For convenience, the Commission is providing a table below identifying the Final Rule's Effective Date and compliance dates for market participants and exchanges in connection with certain obligations.

**BILLING CODE 6351–01–P**

[39] The Commission understands that certain exchanges may distinguish between the terms ''spread,'' ''arbitrage,'' and ''straddle.'' For the purposes of the Commission's discussion and the Final Rule in general, the Commission's use of the term ''spread'' is meant to include all of these related trading strategies, and any Commission reference to ''spread'' rather than ''arbitrage'' or ''straddle'' is not intended to suggest a substantive difference in meaning.

[40] As discussed above in Section 6 of this executive summary (Legal Standards for Exemptions from Federal Position Limits), the Commission is no longer recognizing risk management exemptions as bona fide hedges under the Final Rule.

[41] In two years, the Commission will reevaluate the ability of exchanges to establish and implement appropriate surveillance mechanisms to implement DCM Core Principle 5 and SEF Core Principle 6 with respect to swaps.

| | |
|---|---|
| ***Effective Date*** | |
| All Final Rule provisions are effective on the Effective Date. | March 15, 2021 |
| For example, because all provisions of the Final Rule are effective on the Effective Date, this means, among other things, market participants may immediately avail themselves on the Effective Date of:<br>• The new enumerated bona fide hedge and spread exemptions<br>• The higher Federal position limits for the nine legacy agricultural contracts[42] | |
| ***Compliance Date*** | |
| **For market participants** | |
| Market participants must comply with Federal position limits for the 16 non-legacy core referenced futures contracts that are subject to Federal position limits for the first time under the Final Rule. | No later than January 1, 2022 |
| Market participants must comply with Federal position limits for economically equivalent swaps. | No later than January 1, 2023 |
| Positions based on previously-granted risk management exemptions must be reduced to levels that comply with the applicable Federal position limits.[43] | No later than January 1, 2023 |

| | |
|---|---|
| Until the applicable exchange that lists a given referenced contract implements § 150.5 under the Final Rule, market participants, if using bona fide hedges for Federal position limit purposes, must continue to provide the Commission with Form 204 and Parts I and II of Form 304 to the Commission consistent with the status quo.[44] | Exchanges must implement § 150.5 no later than January 1, 2022. |
| **For exchanges** | |
| Exchanges must comply with the processes and procedures in connection with § 150.5 (exchange-set position limits and exemptions therefrom). | No later than January 1, 2022 |

| Enforcement of exchange-set position limits on economically equivalent swaps. | No earlier than January 1, 2023.<br><br>In two years, the Commission will reevaluate the ability of exchanges to establish and implement appropriate surveillance mechanisms to implement DCM Core Principle 5 and Swap Execution Facility ("SEF") Core Principle 6 with respect to swaps. |

BILLING CODE 6351–01–C

*C. Section-by-Section Summary of Final Rule*

The Commission is adopting revisions to §§ 150.1, 150.2, 150.3, 150.5, and 150.6 and to parts 1, 15, 17, 19, 40, and 140, as well as adding §§ 150.8, 150.9, and Appendices A–G to part 150.[45] Most noteworthy, the Commission is adopting the following amendments to the foregoing rule sections, each of which, along with all other changes in the Final Rule, is discussed in greater detail in Section II of this release. The following summary is not intended to provide a substantive overview of this Final Rule, but rather is intended to provide a guide to the rule sections that address each topic. For an overview of this Final Rule organized by topic (rather than by section number), please see the executive summary above.

• The Commission finds that Federal speculative position limits are necessary for 25 core referenced futures contracts, and for any futures contracts and options on futures contracts linked thereto. The Commission adopts Federal position limits on physically-settled and linked cash-settled futures contracts, options on futures contracts, and ''economically equivalent swaps'' for such commodities. The 25 core referenced futures contracts include the nine ''legacy'' agricultural contracts currently subject to Federal position limits and 16 additional non-legacy contracts, which include: Seven additional agricultural contracts, four energy contracts, and five metals contracts.[46] Federal spot and non-spot

[42] As noted above, under the Final Rule the Federal position limit levels for all of the nine legacy agricultural contracts will increase, other than CBOT Oats. However, the Commission notes that exchange-set position limits will remain at current levels unless and until the relevant exchange submits a rule amendment pursuant to part 40 of the Commission's regulations to amend the relevant exchange-set position limit.

[43] As discussed further in this release, the Commission will no longer recognize risk management exemptions under the Final Rule. However, positions that are entered into based on a market participant's previously-granted risk management exemptions will be subject to an extended compliance date until January 1, 2023 with respect to Federal position limits. That is, a market participant with a previously granted risk management exemption will have a compliance date of January 1, 2023 with respect to the elimination of such risk management exemption.

[44] Form 204 (for all nine legacy agricultural contracts other than cotton) and Parts I and II of Form 304 (for cotton) are submitted by a market participant to the Commission under the existing Federal position limits regulations in connection with Federal enumerated bona fide hedges employed by the market participants.

[45] The 2020 NPRM proposed to remove and reserve part 151. It did not propose to amend current § 150.4 dealing with aggregation of positions for purposes of compliance with Federal position limits, which was amended in 2016 in a prior rulemaking. *See* Final Aggregation Rulemaking, 81 FR at 91454.

[46] The seven additional agricultural contracts that are subject to Federal spot month limits are: CME Live Cattle (LC), CBOT Rough Rice (RR), ICE Cocoa (CC), ICE Coffee C (KC), ICE FCOJ–A (OJ), ICE Sugar

Continued

month limits apply to the nine ''legacy'' agricultural contracts currently subject to Federal position limits,[47] and only Federal spot-month limits apply to the additional 16 non-legacy contracts. Outside of the spot month, these 16 non-legacy contracts are subject to exchange-set limits and/or accountability levels if listed on an exchange.

• Amendments to § 150.1 add or revise several definitions for use throughout part 150, including: New definitions of the terms ''core referenced futures contract'' (pertaining to the 25 physically-settled futures contracts explicitly listed in the regulations) and ''referenced contract'' (pertaining to futures contracts and options on futures contracts that have certain direct and/or indirect linkages to the core referenced futures contracts, and to ''economically equivalent swaps'') to be used as shorthand to refer to contracts subject to Federal position limits; an expanded ''spread transaction'' definition; and a ''bona fide hedging transaction or position'' definition that is broad enough to accommodate hedging practices in a variety of contract types, including hedging practices that may develop over time.

• Amendments to § 150.2 list the 25 core referenced futures contracts which, along with any associated referenced contracts, are subject to Federal position limits; and specify the Federal spot and non-spot month position limit levels. Federal spot month position limit levels are set at or below 25 percent of estimated deliverable supply, whereas Federal non-spot month limit levels are set at 10% of open interest for the first 50,000 contracts of open interest, with an incremental increase of 2.5% of open interest thereafter.

• Amendments to § 150.3 specify the types of positions for which exemptions from Federal position limit requirements may be granted, and set forth and/or reference the processes for requesting such exemptions, including recognitions of bona fide hedges and exemptions for spread positions, financial distress positions, certain natural gas positions held during the spot month, and pre-enactment and transition period swaps. For all contracts subject to Federal position limits, bona fide hedge exemptions listed in Appendix A to part 150 as an enumerated bona fide hedge are self-effectuating for purposes of Federal position limits. For non-enumerated bona fide hedges, market participants must submit an application either directly to the Commission under § 150.3 or indirectly through an exchange for Federal position limit purposes under new § 150.9 (discussed below).

• Amendments to § 150.5 refine the process, and establish non-exclusive methodologies, by which exchanges may set exchange-level limits and grant exemptions therefrom with respect to futures and options on futures, including separate methodologies for contracts subject to Federal position limits and physical commodity derivatives not subject to Federal position limits.[48] While the Commission will oversee compliance with Federal position limits on swaps, the Commission has also determined to delay the enforcement of exchange-set position limits on swaps otherwise required in amended § 150.5 because exchanges cannot view market participants' positions in swaps across the various places they trade, including on competitor exchanges.[49]

• New § 150.9 establishes a streamlined process for addressing requests for bona fide hedging recognitions for purposes of Federal position limits, and leveraging exchange expertise and resources. This process will be used by market participants with non-enumerated bona fide hedge positions. Under the Final Rule, market participants can provide one application for a non-enumerated bona fide hedge to a DCM or SEF, as applicable, and receive approval of such request based on the same application from both the exchange for purposes of exchange-set limits and from the Commission for purposes of Federal position limits.

• New Appendix A to part 150 contains a list of enumerated bona fide hedges. Positions that comply with the bona fide hedging transaction or position definition in § 150.1 and that are enumerated in Appendix A may exceed Federal position limits to the extent that all applicable requirements in part 150 are met. Persons holding such positions enumerated in Appendix A may exceed Federal position limits without being required to request prior approval under § 150.3 or § 150.9. Positions that do not fall within any of the enumerated hedges could still potentially be recognized as bona fide hedging positions, provided the positions otherwise comply with the proposed bona fide hedging definition and all other applicable requirements, including the approval process under § 150.3 or § 150.9.

• Amendments to part 19 and related provisions eliminate Form 204 (and corresponding Parts I and II of Form 304 for cotton), enabling the Commission to leverage cash-market reporting submitted directly to the exchanges under §§ 150.5 and 150.9. The Final Rule maintains Part III of Form 304, related to the cotton on-call report.

### *D. Effective Date and Compliance Period*

The 2020 NPRM included proposed § 150.2(e), which provided that the Federal position limit levels for the 25 core referenced futures contracts would have a compliance date 365 days after publication of the final position limits regulations in the **Federal Register**. Additionally, proposed § 150.3(c) provided that previously-granted risk management exemptions shall not be effective after the Final Rule's effective date.

The Commission is removing from the Final Rule the compliance date requirements in proposed §§ 150.2(e) and 150.3(c) and instead addressing the effective and compliance dates together within this **Federal Register** release. The Commission is making two modifications from the 2020 NPRM relating to the effective date and compliance period of the Final Rule.

First, as noted above in the executive summary, the Commission is providing a general compliance date of January 1,

No. 11 (SB), and ICE Sugar No. 16 (SF). The four energy contracts that are subject to Federal spot month limits are: NYMEX Light Sweet Crude Oil (CL), NYMEX New York Harbor ULSD Heating Oil (HO), NYMEX New York Harbor RBOB Gasoline (RB), and NYMEX Henry Hub Natural Gas (NG). The five metals contracts that are subject to Federal spot month limits are: COMEX Gold (GC), COMEX Silver (SI), COMEX Copper (HG), NYMEX Palladium (PA), and NYMEX Platinum (PL). As discussed below, any contracts for which the Commission is adopting Federal position limits only during the spot month are subject to exchange-set limits and/or accountability levels outside of the spot month.

[47] The Commission currently sets and enforces speculative position limits with respect to certain enumerated agricultural products. The ''enumerated'' agricultural products refer to the list of commodities contained in the definition of ''commodity'' in CEA section 1a; 7 U.S.C. 1a. These agricultural products consist of the following nine currently traded contracts: CBOT Corn (and Mini-Corn) (C), CBOT Oats (O), CBOT Soybeans (and Mini-Soybeans) (S), CBOT Wheat (and Mini-Wheat) (W), CBOT Soybean Oil (SO), CBOT Soybean Meal (SM), MGEX HRS Wheat (MWE), CBOT KC HRW Wheat (KW), and ICE Cotton No. 2 (CT). *See* 17 CFR 150.2.

[48] Rule § 150.5 addresses exchange-set position limits and exemptions therefrom, whereas § 150.3 addresses exemptions from Federal position limits, and § 150.9 addresses a streamlined process for recognizing non-enumerated bona fide hedges for purposes of Federal position limits. Exchange rules typically refer to ''exemptions'' in connection with bona fide hedging and spread positions, whereas the Commission uses the nomenclature ''recognition'' with respect to bona fide hedges, and ''exemption'' with respect to spreads.

[49] With respect to exchange-set position limits on swaps, in two years the Commission will reevaluate the ability of exchanges to establish and implement appropriate surveillance mechanisms to implement DCM Core Principle 5 and SEF Core Principle 6.

2022 for both market participants and exchanges. In contrast, the 2020 NPRM did not provide a specific date as the compliance date but rather stated 365 days after publication in the **Federal Register**.[50]

This compliance date of January 1, 2022 applies to (i) the Federal position limits set forth in Appendix E to part 150 for only the 16 non-legacy core referenced futures contracts that are subject to Federal position limits for the first time under this Final Rule, and (ii) exchange obligations under final § 150.5. This compliance date also applies to referenced contracts for any of the 16 non-legacy core referenced futures contracts (other than economically equivalent swaps, which have a separate compliance date as discussed immediately below). In contrast, the 2020 NPRM's compliance date applied only to market participants' compliance with the new Federal position limit levels. However, as discussed below, the Final Rule does not provide a separate compliance date for the nine legacy agricultural contracts since they are already subject to existing Federal position limits.

Second, the Commission is establishing a separate compliance date of January 1, 2023 in connection with (i) economically equivalent swaps and (ii) the elimination of previously-granted risk management exemptions (*i.e.,* market participants may continue to rely on their previously-granted risk management exemptions until January 1, 2023). As noted above, the 2020 NPRM only had a single general compliance date and did not provide a separate compliance date for economically equivalent swaps or related to previously-granted risk management exemptions.

In this section, the Commission will discuss the following related issues: (i) Compliance with Federal position limits for the nine legacy agricultural contracts; (ii) compliance by exchanges with § 150.5 under the Final Rule and market participants' related obligation to temporarily continue providing Forms 204/304 in connection with bona fide hedges; (iii) exchanges' voluntary implementation of § 150.9 under the Final Rule; and (iv) comments received in connection with the compliance date proposed in the 2020 NPRM.

i. Compliance With Federal Position Limits for the Nine Legacy Agricultural Contracts

With respect to the nine legacy agricultural contracts, the Commission is not providing a compliance date with respect to the spot month and non-spot month Federal position limit levels. Accordingly, the new Federal position limit levels under the Final Rule will become effective on the Effective Date. The nine legacy agricultural contracts are currently subject to Federal position limits and will continue to be subject under the Final Rule, which, as noted above, is increasing the Federal position limit levels for the nine legacy agricultural contracts (other than CBOT Oats, which will maintain the existing Federal position limit levels). The Commission has determined not to provide a separate compliance date for the nine legacy agricultural contracts since market participants trading in these markets already are familiar with Federal position limits and have established the necessary monitoring and compliance oversight processes, in connection with these legacy contracts.

With respect to exchange-set position limits, the Final Rule does not require exchanges to increase their respective exchange-set position limit levels. Rather, the Final Rule only requires that exchange-set position limits are established at a level no higher than the corresponding Federal position limits. As a result, in response to the Final Rule, an exchange may: (1) Raise its exchange-set limits to be as high as (or lower than) the corresponding Federal position limits immediately on the Effective Date or anytime thereafter; (2) implement a phase-in period where exchange-set position limits increase from existing exchange-set levels over time; or (3) not increase the exchange-set position limit levels at all, in each case as the exchange may determine appropriate for its markets.

ii. Exchange Implementation of § 150.5 and Market Participants' Obligations To Continue Providing Forms 204 and 304, as Applicable, in Connection With Federal Enumerated Bona Fide Hedges

For clarity, in connection with the nine legacy agricultural contracts, market participants may avail themselves of the new enumerated bona fide hedges (*e.g.,* anticipatory merchandising) immediately upon the Effective Date (market participants will not need to be concerned with availing themselves of bona fide hedge recognitions for the 16 non-legacy contracts upon the Effective Date since these contracts will have a compliance date of January 1, 2022). To the extent that market participants seek to rely on any Federal enumerated bona fide hedges, market participants must continue to provide, as applicable, the Commission with Forms 204/304, which are otherwise eliminated by the Final Rule upon the Effective Date, until the relevant exchange that lists the applicable referenced contract implements § 150.5 under the Final Rule. As discussed below, final § 150.5 governs, among other things, exchange rules and procedures, including (i) the exchange's collection of certain cash-market information from market participants in connection with their bona fide hedge applications for exchange-set limits and (ii) the exchange's sharing of related information with the Commission. As discussed further below, the Final Rule predicates the elimination of Forms 204/304 on the relevant exchange's sharing of the information with the Commission under final § 150.5 (which provides for a new process for the exchange to share data with the Commission similar to data that the Commission previously obtained through Forms 204/304 under the Federal framework existing prior to the Final Rule).[51] Exchanges must implement final § 150.5 by the Final Rule's general compliance date of January 1, 2022.

iii. Exchange Implementation of § 150.9 in Connection With the Market Participants' Applications Through Exchanges for Non-Enumerated Bona Fide Hedges for Purposes of Federal Position Limits

As discussed above, the Final Rule establishes a streamlined process for market participants to apply through exchanges for non-enumerated bona fide hedges for purposes of Federal position limits. That is, a market participant may submit a single non-enumerated bona fide hedge exemption application to an exchange for purposes of both Federal and exchange-set position limits, and the Commission will review, and make a determination based on, the application that the market participant submitted to the exchange. For clarity, the Commission notes that the Final Rule does not require exchanges to participate in such process.

However, if an exchange chooses to do so, the Commission is clarifying, for

[50] The Commission is adopting calendar dates for compliance to provide clarity rather than the 2020 NPRM's approach of stating that the compliance period ends 365 days after publication in the **Federal Register** since the Commission believes that providing a set calendar date provides greater clarity to market participants. Based on the timing of the Final Rule, the Commission believes that the January 1, 2022 general compliance date will not reduce the compliance period compared to the 2020 NPRM's approach and may provide slightly more time prior to the commencement of the compliance period.

[51] For further discussion of the elimination of Form 204 and Parts I and II of Form 304, *see* Section II.H.2, *infra.*

the avoidance of doubt, that the exchange may implement this streamlined process for non-enumerated bona fide hedge applications as soon as the Effective Date, or anytime thereafter (or not at all). In response to certain concerns by market participants and exchanges, discussed immediately below, the Commission believes that, to the extent an exchange chooses to participate in this streamlined application process, the implementation of § 150.9 soon after the Effective Date may help ensure minimal disruption to market participants' existing trading strategies as well as avoid having the potentially unfeasible situation of requiring the exchanges to process a number of non-enumerated bona fide hedge applications simultaneously at the end of the general compliance period on January 1, 2022. Furthermore, the Commission clarifies in Section II.G.3.iii that market participants with existing Commission-granted non-enumerated or anticipatory bona fide hedge recognitions in connection with the nine legacy agricultural contracts under the existing framework are *not* required to reapply to the Commission for a new recognition under the Final Rule.

iv. Comments—Compliance Period

Generally, commenters supported the proposed compliance date, noting that an adequate compliance period would afford sufficient time to make necessary business adjustments (*e.g.,* time to build compliance systems, develop technology, train personnel, etc.).[52] The Commission agrees with these observations and believes that a general compliance date of January 1, 2022, except for economically equivalent swaps and positions based on a previously-granted risk management exemption, will provide exchanges and market participants sufficient time to adjust their operations and compliance and monitoring systems.

Some commenters also requested an extended compliance date (beyond the general compliance date) for economically equivalent swaps to mitigate the numerous legal, operational, and compliance challenges of implementing position limits for swaps for the first time.[53] Unlike exchange-listed contracts that are currently subject to either Federal position limits or exchange-set limits, commenters noted that exchanges do not have existing compliance and monitoring resources for economically equivalent swaps from which to leverage. The Commission agrees with commenters that additional time for economically equivalent swaps is warranted, and, as discussed above, is thus delaying the compliance date for economically equivalent swaps for an additional year, until January 1, 2023.

CME Group expressed concern that it may receive an influx of exemption applications at the end of the compliance period, and therefore suggested a rolling process where market participants are grandfathered into their current exemptions, permitting them to file for those exemptions on the same annual schedule.[54] The Commission believes this concern is mitigated since exchanges, at their discretion, may implement final § 150.9 as soon as the Effective Date, which will allow exchanges to review non-enumerated bona fide hedge applications on a rolling basis between the Effective Date and the end of the compliance period rather than having to process a large number of applications at once. Furthermore, as noted above, market participants with existing Commission-granted non-enumerated or anticipatory bona fide hedge recognitions are *not* required to reapply to the Commission for a new recognition under the Final Rule.

*E. The Commission Construes CEA Section 4a(a) To Require the Commission To Make a Necessity Finding Before Establishing Position Limits for Physical Commodities Other Than Excluded Commodities*

The Commission is required by *ISDA* to determine whether CEA section 4a(a)(2)(A) requires the Commission to find, before establishing a position limit, that such limit is ''necessary.'' [55] The provision states in relevant part that ''the Commission shall'' establish position limits ''as appropriate'' for futures contracts in physical commodities other than excluded commodities ''[i]n accordance with the standards set forth in'' the preexisting section 4a(a)(1).[56] That preexisting provision requires the Commission to establish position limits as it ''finds are necessary to diminish, eliminate, or prevent'' certain enumerated burdens on interstate commerce.[57] In the 2011 Final Rulemaking, the Commission interpreted this language as an unambiguous mandate to establish position limits without first finding that such limits are necessary, but with discretion to determine the ''appropriate'' levels for each.[58] In *ISDA,* the U.S. District Court for the District of Columbia disagreed and held that section 4a(a)(2)(A) is ambiguous as to whether the ''standards set forth in paragraph (1)'' include the requirement of an antecedent finding that a position limit is necessary.[59] The court vacated the 2011 Final Rulemaking and directed the Commission to apply its experience and expertise to resolve that ambiguity.[60] The Commission has done so and determines that section 4a(a)(2)(A) should be interpreted to require that before establishing position limits, the Commission must determine that limits are necessary.[61] A full legal analysis is set forth *infra* at Sections III.C.–E.

The Commission finds that position limits are necessary for the 25 core referenced futures contracts, including certain commodity derivative contracts that are directly or indirectly linked to a core referenced futures contract. The Commission's finding with respect to the 25 core referenced futures contracts is based on two interrelated factors: The particular importance of the 25 core referenced futures contracts to their respective underlying cash markets, including that they require physical delivery of the underlying commodity, and, the commodities' particular importance to the national economy. Separately, the Commission finds that position limits are necessary during the spot month for all 25 core referenced futures contracts and outside of the spot month only for the nine legacy agricultural commodity contracts (in each instance including certain commodity derivative contracts that are directly or indirectly linked to a core referenced futures contract). A full discussion of the necessity findings is set forth *infra* at Sections III.C.–E.

*F. The Commission's Use of Certain Terminology*

The Commission is aware that this Final Rule will likely be reviewed by a diverse range of members of the public from varied backgrounds and industries and with different levels of knowledge and experience with derivatives markets. Furthermore, even among experienced market participants, terminology may differ by industry, commodity, or exchange. The Commission also recognizes that certain

[61] *See infra* Section III.B.

terms commonly referenced by market participants may differ from the technical legal terms used in the Commission's regulations and/or the CEA.

Accordingly, unless otherwise noted, the Commission will attempt to use terms and phrases in their ordinary, plain English sense. When required, the Commission will explicitly identify technical or nuanced legal/regulatory or industry ''terms of art.'' The Commission wishes to briefly review certain terms and phrases used throughout this release below, as follows:

- *Bona fide hedges.* The CEA uses the legal term ''bona fide hedging transaction or position'' in both the singular and plural. The Commission currently defines the term in existing § 1.3 in the plural as ''bona fide hedging transactions or positions'' while the Final Rule now incorporates the singular ''bona fide hedging transaction or position.'' The Commission understands that most market participants simply refer to ''bona fide hedge(s)'' (in both the singular and the plural). Accordingly, for short hand throughout this release, the Commission may refer to ''bona fide hedges,'' ''bona fide hedge positions,'' ''bona fide hedge transactions,'' ''bona fide hedges,'' ''bona fide hedging positions,'' and similar phrasing.

These terms are meant to apply as short hand and are not intended to imply a substantive difference either with the defined legal term ''bona fide hedging transaction or position'' or with one another.

Similarly, the plural term in the existing Commission regulations and the singular in the Final Rule, as discussed below, are not intended to reflect a substantive difference.

- *Federal position limits.* The Final Rule creates a new defined term, ''speculative position limit,'' in part 150 of the Commission's regulations to refer to the maximum position, net long or net short, that a market participant may maintain in a referenced contract. Throughout this release, the Commission will use as a general term either ''position limits'' or ''Federal position limits'' to refer to the general Federal position limits framework and related regulations, including the defined term ''speculative position limit.'' When discussing the individual ''speculative position limit'' levels for each commodity derivative contract, as opposed to the Final Rule's general Federal regulatory framework, the Commission instead may refer to the ''Federal position limit *levels,*'' although all these phrases are intended to refer to the same general concept. The Commission may also specifically refer to *exchange-set* position limits when referring to the general framework, process, or specific position limit levels established by the respective exchanges.
- *Exchanges.* This Final Rule applies to both DCMs and SEFs. Unless otherwise distinguished, the Commission will refer to ''exchanges'' throughout this release to refer to any relevant DCM or SEF.
- *Cash-Settled* and *Physically-Settled.* The Commission throughout this release refers to ''cash-settled'' and ''physically-settled'' commodity derivative contracts.

When a futures contract expires, all open futures contract positions in such contract are settled by either: (1) Physical delivery, which the Commission refers to as a ''*physically-settled*'' contract, or (2) cash settlement, which the Commission refers to as a ''*cash-settled*'' contract, in each case depending on the contract terms set by the exchange. Deliveries on ''physically-settled'' futures contracts are made through the exchange's clearinghouse, and the delivery of the physical commodity must be consummated between the buyer and seller per the exchange rules and contract specifications. On the other hand, other futures contracts are ''cash-settled'' because they do not involve the transfer of physical commodity ownership and require that all open positions at expiration be settled by a transfer of cash to or from the clearinghouse based upon the final settlement price of the contracts.

The Commission further notes that some market participants may instead use the terms ''physical-delivery'' contracts or ''financially-settled'' contracts instead of the Commission's terms ''physically-settled'' contracts and ''cash-settled'' contracts, respectively. The Commission does not intend a substantive difference in meaning with the choice of its terms.

- *Spread Positions.* The Commission views its use of the term ''spread'' to mean the same as ''arbitrage'' or ''straddle'' as those terms are used in CEA section 4a(a) and existing § 150.3(a)(3) of the Commission's regulations. Consistent with existing regulations, the Commission's sole use of the term ''spread'' in this Final Rule is intended to also capture arbitrage or straddle strategies referred to in CEA section 4a(a) and existing § 150.3(a)(3), and referring to ''spread'' rather than ''arbitrage'' or ''straddle'' is not intended to be a substantive difference. The Commission notes that certain exchanges may distinguish between ''spread'' and ''arbitrage'' positions for purposes of exchange exemptions, but the Commission does not make that distinction here for purposes of its ''spread transaction'' definition as used in this release.
- *Unfixed Price Forward Transactions.* Throughout this release, the Commission will use as general terms either ''unfixed price forward transactions,'' ''unfixed price transactions,'' ''unfixed price forward contracts,'' and/or ''unfixed price contracts'' to refer to transactions that are either purchases or sales of a cash commodity where the purchase or sales price, as applicable, is determined based on the settlement price of a benchmark, such as the settlement price of a commodity derivative contract on a certain date (*e.g.,* the price on the settlement date of a core referenced futures contract) or other index price (*e.g.,* a spot index price). Market participants may also refer to unfixed price transactions as ''floating price'' transactions, and the Commission does not intend a substantive difference in meaning with the choice of these terms.

### *G. Recent Volatility in the WTI Contract*

Several commenters noted the volatility in the NYMEX Light Sweet Crude Oil (CL) contract, also known as the West Texas Intermediate crude oil contract (''WTI contract''), that occurred in April 2020 (subsequent to the issuance of the 2020 NPRM) in their comments to the 2020 NPRM. Some commenters suggested that the volatility may have been caused, in part, by excessive speculation [62] or highly leveraged traders,[63] or both. Better Markets suggested that a combination of passive exchange-traded funds,[64] the use of trading-at-settlement (''TAS'') orders,[65] automated trading,[66] and, according to Better Markets, a lack of ''meaningful position limits,'' [67] may have contributed to the volatility. Other commenters suggested that this event could have been mitigated through additional liquidity provided by financial end users during the critical

[67] Better Markets at 10.

time period, among other measures.[68] Commenters also pointed to the event to bolster arguments for and against Commission deference to exchanges in implementing position limits.[69] A few commenters requested that the Commission refrain from finalizing the rule until it better understands this event and other issues.[70]

The Commission has been closely examining the circumstances surrounding the volatility in the WTI contract since it occurred in April 2020. The Commission will continue to analyze the events of April 2020 to evaluate whether any changes to the position limits regulations may be warranted in light of the circumstances surrounding the volatility in the WTI contract. Any proposed changes that the Commission finds may be warranted would be subject to public comment pursuant to the requirements of the Administrative Procedure Act.

*H. Brief Summary of Comments Received*

As stated previously, the Commission received approximately 75 relevant comment letters in response to the 2020 NPRM.[71] Though several commenters did not support the Commission adopting the 2020 NPRM and requested its withdrawal,[72] most of the 75 comments received generally supported the 2020 NPRM, or supported specific elements of the 2020 NPRM. However, many of these commenters suggested modifications to portions of the 2020 NPRM, which are discussed in the relevant sections discussing the Final Rule below. In addition, several commenters requested Commission action beyond the scope of the 2020 NPRM, also discussed in the relevant sections below.

**II. Final Rule**

*A. § 150.1—Definitions*

Definitions relevant to the existing position limits regime currently appear in both §§ 1.3 and 150.1 of the Commission's regulations.[73] The Commission proposed to update and supplement the definitions in § 150.1, including moving a revised definition of ''bona fide hedging transactions and positions'' from § 1.3 into § 150.1. The proposed changes were intended, among other things, to conform the definitions to certain of the Dodd-Frank Act amendments to the CEA.[74] Each proposed defined term is discussed in alphabetical order below.

1. ''Bona Fide Hedging Transaction or Position''

i. Background—Bona Fide Hedging Transaction or Position

Under CEA section 4a(c)(1), position limits shall not apply to transactions or positions that are shown to be bona fide hedging transactions or positions, as such terms shall be defined by the Commission.[75] The Dodd-Frank Act directed the Commission, for purposes of implementing CEA section 4a(a)(2), to adopt a bona fide hedging definition consistent with CEA section 4a(c)(2).[76] The existing definition of ''bona fide hedging transactions and positions,'' which first appeared in § 1.3 of the Commission's regulations in the 1970s,[77] is inconsistent, in certain ways described below, with the revised statutory definition in CEA section 4a(c)(2).

Accordingly, and for the reasons outlined below, the Commission proposed to remove the existing bona fide hedging definition from § 1.3 and replace it with a revised bona fide hedging definition that would appear alongside all of the other position limits related definitions in proposed § 150.1.[78] This definition would be applied in determining whether a position in a commodity derivative contract is a bona fide hedge that may exceed Federal position limits set forth in § 150.2.

This section of the release discusses the bona fide hedging definition and the substantive standards for bona fide hedges. The process for granting bona fide hedge recognitions is discussed later in this release in connection with §§ 150.3 and 150.9.[79]

The discussion in this section is organized as follows:

i. This background section discussion;

[68] AQR at 5–7 (''The inability of position limits themselves to eliminate the unpredictability of commodity futures markets highlights the importance of existing Commission and exchange oversight of these markets and the dangers of overreliance on a single regulatory tool to address market dynamics for which it may not have been designed . . . [W]e encourage the Commission to consider not only concerns around potential manipulation, but also the potential unintended consequences of such limits and the need for liquidity during sensitive time periods for commodity futures markets.''); SCM at 2–3 (''This liquidity, provided by financial trading firms and hedge funds . . ., is essential to balance, check and smooth the otherwise uncontrollable trading that can occur when only commercial firms and unsophisticated trading participants are active in a market.'').

[69] IATP suggested that the event demonstrates the problems of Commission deference to DCMs' ''experience and capacity'' on many of the provisions in the 2020 NPRM. *See* IATP at 18. Conversely, SEMI stated that a final rule should not be overly restrictive in response to the recent market conditions in WTI oil markets, given that it is the exchanges that ''have the expertise, experience and existing tools to effectively manage the orderly expiration of futures contracts that are in the spot month under such circumstances.'' SEMI at 13.

[70] AFR at 3; Rutkowski at 2; IATP at 2–3.

[71] *See supra,* n.16.

[72] *E.g.* AFR; Better Markets; IATP; Eric Matsen; NEFI; Public Citizen; Robert Rutkowski; SCM; and VLM.

[73] 17 CFR 1.3 and 150.1, respectively.

[74] In addition to the amendments described below, the Commission proposed to re-order the defined terms so that they appear in alphabetical order, rather than in a lettered list, so that terms can be more quickly located. Moving forward, any new defined terms would be inserted in alphabetical order, as recommended by the Office of the Federal Register. *See Document Drafting Handbook,* Office of the Federal Register, National Archives and Records Administration, 2–31 (Revision 5, Oct. 2, 2017) (stating, ''[i]n sections or paragraphs containing only definitions, we recommend that you do not use paragraph designations if you list the terms in alphabetical order. Begin the definition paragraph with the term that you are defining.'').

[75] 7 U.S.C. 6a(c)(1).

[76] 7 U.S.C. 6a(c)(2).

[77] *See, e.g.,* Definition of Bona Fide Hedging and Related Reporting Requirements, 42 FR 42748 (Aug. 24, 1977). Previously, the Secretary of Agriculture, pursuant to section 404 of the Commodity Futures Trading Commission Act of 1974 (Pub. L. 93–463), promulgated a definition of bona fide hedging transactions and positions. Hedging Definition, Reports, and Conforming Amendments, 40 FR 11560 (Mar. 12, 1975). That definition, largely reflecting the statutory definition previously in effect, remained in effect until the newly-established Commission defined that term. *Id.*

[78] In a 2018 rulemaking, the Commission amended § 1.3 to replace the sub-paragraphs that had for years been identified with an alphabetic designation for each defined term with an alphabetized list. *See* Definitions, 83 FR 7979 (Feb. 23, 2018). The bona fide hedging definition, therefore, is now a paragraph, located in alphabetical order, in § 1.3, rather than in § 1.3(z). Accordingly, for purposes of clarity and ease of discussion, when discussing the Commission's existing version of the bona fide hedging definition, this release will refer to the bona fide hedging definition in § 1.3.

Further, the version of § 1.3 that appears in the Code of Federal Regulations applies only to excluded commodities and is not the version of the bona fide hedging definition currently in effect. The version currently in effect, the substance of which remains as it was amended in 1987, applies to all commodities, not just to excluded commodities. *See* Revision of Federal Speculative Position Limits, 52 FR 38914 (Oct. 20, 1987). While the 2011 Final Rulemaking amended the § 1.3 bona fide hedging definition to apply only to excluded commodities, that rulemaking was vacated, as noted previously, by a September 28, 2012 order of the U.S. District Court for the District of Columbia, with the exception of the rule's amendments to 17 CFR 150.2. Although the 2011 Final Rulemaking was vacated, the 2011 version of the bona fide hedging definition in § 1.3, which applied only to excluded commodities, has not yet been formally removed from the Code of Federal Regulations. The currently-in-effect version of the Commission's bona fide hedging definition thus does not currently appear in the Code of Federal Regulations. The closest to a ''current'' version of the definition is the 2010 version of § 1.3, which, while substantively current, still includes the ''(z)'' denomination that was removed in 2018. The Commission proposed to address the need to formally remove the incorrect version of the bona fide hedging definition as part of the 2020 NPRM.

[79] *See infra* Section II.C. (discussing § 150.3) and Section II.G. (discussing § 150.9).

ii. An overview of the existing ''general'' elements of the bona fide hedging definition and the specific ''enumerated'' bona fide hedges listed in the existing bona fide hedge definition;

iii. A discussion of each of the elements of the existing ''general'' bona fide hedging definition, including the (a) temporary substitute test (and the related elimination of the risk management exemption), (b) economically appropriate test, (c) change in value requirement, (d) incidental test, and (e) orderly trading requirement;

iv. The treatment of unfixed-price transactions under the Final Rule;

v. A discussion of each enumerated bona fide hedge in the Final Rule;

vi. A discussion of the elimination of the Five-Day Rule;

vii. A discussion of the guidance on measuring risk (*i.e.,* gross versus net hedging);

viii. A discussion of the Final Rule's implementation of the CEA's statutory pass-through swap and pass-through swap offset provisions; and

ix. A discussion of the form, location, and organization of the enumerated bona fide hedges.

ii. Overview of the Commission's Existing Bona Fide Hedging Definition in § 1.3

Paragraph (1) of the existing bona fide hedging definition in Commission regulation § 1.3 contains what is currently labeled the ''general definition'' of bona fide hedging. This ''general'' bona fide hedging definition comprises five key elements which require that in order for a position to be deemed a bona fide hedge for Federal position limits, the position must:

• ''normally'' represent a substitute for transactions to be made or positions to be taken at a later time in a physical marketing channel (''temporary substitute test'');

• be economically appropriate to the reduction of risks in the conduct and management of a commercial enterprise (''economically appropriate test'');

• arise from the potential change in value of (1) assets which a person owns, produces, manufactures, processes, or merchandises or anticipates owning, producing, manufacturing, processing, or merchandising, (2) liabilities which a person owns or anticipates incurring, or (3) services which a person provides, purchases, or anticipates providing or purchasing (''change in value requirement'');

• have a purpose to offset price risks incidental to commercial cash or spot operations (''incidental test''); and

• be established and liquidated in an orderly manner (''orderly trading requirement'').[80]

As discussed more fully below, the Dodd-Frank Act's amendments to the CEA included the first three factors in the amended CEA, but did not include the last two factors.

Additionally, paragraph (2) of the bona fide hedging definition in existing § 1.3 currently sets forth a non-exclusive list of seven total enumerated bona fide hedges, contained in four general bona fide hedging transaction categories, that comply with the general bona fide hedging definition in paragraph (1). These bona fide hedge categories that are explicitly listed in existing § 1.3's bona fide hedging definition are generally referred to as the ''enumerated'' bona fide hedges, a term the Commission uses throughout in this release. Market participants thus need not seek approval from the Commission of such positions as bona fide hedges prior to exceeding limits for such positions. Rather, market participants must simply report any such positions on the monthly Form 204 (or Form 304 for cotton), as required by part 19 of the Commission's existing regulations.[81]

The seven existing enumerated hedges fall into the following four categories: (1) Sales of futures contracts to hedge (i) ownership or fixed-price cash commodity purchases and (ii) unsold anticipated production; (2) purchases of futures contracts to hedge (i) fixed-price cash commodity sales of the same commodity, (ii) fixed-price sales of the cash commodity's cash products and by-products, and (iii) unfilled anticipated requirements; (3) offsetting sales and purchases of futures contracts to hedge offsetting unfixed-price cash commodity sales and purchases; and (4) cross-commodity hedges.[82]

As discussed further below, market participants may not use either the existing enumerated bona fide hedges for unsold anticipated production or unfilled anticipated requirements to hedge more than twelve-months' unsold production or unfilled requirements, respectively (the ''twelve-month restriction''). Further, the existing enumerated bona fide hedges for unsold production and for offsetting sales and purchases of unfixed price transactions do not apply during the five last trading days. Similarly, the existing enumerated bona fide hedge for unfilled anticipated requirements has a modified version of the Five-Day Rule and provides that during the ''five last trading days'' a market participant may not maintain a position that exceeds the market participant's unfilled anticipated requirement for ''that month and for the next succeeding month.''

Paragraph (3) of the current bona fide hedging definition states that the Commission may recognize ''non-enumerated'' bona fide hedging transactions and positions pursuant to a specific request by a market participant using the process described in § 1.47 of the Commission's regulations.[83]

iii. Amended Bona Fide Hedge Definition for Physical Commodities in § 150.1; ''General'' Elements of the Bona Fide Hedge Definition Under the Final Rule

The Commission is adopting the proposed general elements currently found in the bona fide hedging definition in § 1.3 that conform to the revised statutory bona fide hedging definition in CEA section 4a(c)(2), as amended by the Dodd-Frank Act, and is eliminating the general elements that do not conform.[84] In particular, the Commission is adopting updated versions of the temporary substitute test, economically appropriate test, and change in value requirements that are described below, and eliminating the incidental test and orderly trading requirement, which are not included in the revised statutory text. Each of these changes is discussed in more detail below.[85]

a. Temporary Substitute Test

(1) Background—Temporary Substitute Test

The language of the temporary substitute test in the Commission's existing bona fide hedging definition is inconsistent with the language of the temporary substitute test that appears in the CEA, as amended by the Dodd-Frank Act. Specifically, the Commission's existing regulatory definition currently provides that a bona fide hedging

[80] 17 CFR 1.3.

[81] 17 CFR part 19.

[82] 17 CFR 1.3.

[83] *Id.*

[84] The Commission is also making a non-substantive change to the introductory language of § 150.3 by referring in the proviso to ''such person's transactions or positions.'' The Commission views this as a clarifying edit, and does not intend a substantive difference in meaning with the choice of these terms.

[85] Bona fide hedge recognition is determined based on the particular circumstances of a position or transaction and is not conferred on the basis of the involved market participant alone. Accordingly, while a particular position may qualify as a bona fide hedge for a given market participant, another position held by that same participant may not. Similarly, if a participant holds positions that are recognized as bona fide hedges, and holds other positions that are speculative, only the speculative positions would be subject to position limits.

position *normally* represents a substitute for transactions to be made or positions to be taken at a later time in a physical marketing channel.[86] Prior to the enactment of the Dodd-Frank Act, the temporary substitute test in section 4a(c)(2)(A)(i) of the CEA also contained the word ''normally,'' so that the Commission's existing bona fide hedging definition mirrored the previous section 4a(c)(2)(A)(i) of the CEA prior to the Dodd-Frank Act. The word ''normally'' acted as a qualifier for the instances in which a position must be a temporary substitute for transactions or positions made at a later time in a physical marketing channel. However, the Dodd-Frank Act removed that qualifier by deleting the word ''normally'' from the temporary substitute test in CEA section 4a(c)(2)(A)(i).[87]

In a 1987 interpretation, the Commission stated that, among other things, the inclusion of the word ''normally'' in connection with the pre-Dodd-Frank-Act version of the temporary substitute language indicated that the bona fide hedging definition should not be construed to apply only to firms using futures to reduce their exposures to risks in the cash market.[88] Instead, the 1987 interpretation took the view that to qualify as a bona fide hedge, a transaction in the futures market did not necessarily need to be a temporary substitute for a later transaction in the cash market.[89] In other words, that interpretation took the view that a futures position could still qualify as a bona fide hedging position even if it was not in connection with the production, sale, or use of a physical commodity.

Commission staff has previously granted so-called ''risk management exemptions'' on such grounds. In connection with physical commodities, the phrase ''risk management exemption'' has historically been used by Commission staff to refer to non-enumerated bona fide hedge recognitions granted under § 1.47 to allow swap dealers and others to hold agricultural futures positions in excess of Federal position limits in order to offset their positions in commodity index swaps or related exposure.[90] Risk management exemptions were granted outside of the spot month, and the related swap exposure that was being offset (*i.e.,* hedged by the futures or options position entered into based on the risk management exemption) was typically opposite an institutional investor for which the swap was not a bona fide hedge.

(2) Summary of the 2020 NPRM—Temporary Substitute Test

As described above, the Dodd-Frank Act clearly and unambiguously removed the word ''normally'' from the temporary substitute test in CEA section 4a(c)(2)(A)(i), as amended by the Dodd-Frank Act. As such, in the 2020 NPRM, the Commission interpreted the Dodd-Frank Act's removal of the word ''normally'' as reflecting Congressional statutory direction that a bona fide hedging position in physical commodities must *always* (and not just ''normally'') be in connection with the production, sale, or use of a physical cash-market commodity.[91] The Commission interpreted this change to signal that the Commission should cease to recognize ''risk management'' positions as bona fide hedges for physical commodities, unless the positions satisfy the pass-through swap/swap offset requirements in section 4a(c)(2)(B) of the CEA, further discussed below.[92]

In order to implement that statutory change, the Commission: (1) Proposed a narrower bona fide hedging definition for physical commodities in proposed § 150.1 that did not include the word ''normally'' currently found in the temporary substitute regulatory language in paragraph (1) of the existing § 1.3 bona fide hedging definition; and (2) proposed to eliminate all previously-granted risk management exemptions that did not otherwise qualify for pass-through treatment.[93] Under the 2020 NPRM, any such previously-granted risk management exemption would generally no longer apply 365 days after publication of final position limits rules in the **Federal Register**.[94]

(3) Summary of the Commission Determination—Temporary Substitute Test

As proposed, the Final Rule eliminates the word ''normally'' from the Commission's temporary substitute test and eliminates the risk management exemption for contracts subject to Federal position limits. However, as described below, the Final Rule is extending the compliance date for existing risk management exemption holders.

(4) Comments—Temporary Substitute Test

Commenters were divided regarding the proposed elimination of the risk management exemptions. Some public interest groups and the agricultural industry supported the proposed removal of the word ''normally'' and/or the accompanying rescission of risk management exemptions.[95] These commenters argued that risk management positions are harmful to the market and can adversely impact price dynamics.[96]

Commenters from the financial industry, ICE, and MGEX opposed the proposed removal of ''normally'' and/or the proposed elimination of the risk management exemption.[97] These commenters contended that the elimination of the risk management

[86] 17 CFR 1.3. As noted earlier in this release, the currently-in-effect version of the Commission's bona fide hedging definition does not currently appear in the current Code of Federal Regulations. The closest to a ''current'' version of the definition is the 2010 version of § 1.3, which, while substantively current, still includes the ''(z)'' denomination that was removed in 2018. The Commission proposed to address the need to formally remove the incorrect version of the bona fide hedging definition as part of the 2020 NPRM. *See supra* n.74.

[89] *Id.*

[90] As described below, due to differences in statutory language, the phrase ''risk management exemption'' often has a broader meaning in connection with excluded commodities than with physical commodities. *See infra* Section II.A.1.x. (discussing proposed pass-through language).

[91] 85 FR at 11596.

[92] 7 U.S.C. 6a(c)(2)(B).

[93] *See* final § 150.3(c). *See also infra* Section II.A.1.x.b. (discussing proposed pass-through language). Excluded commodities, as described in further detail below, are not subject to the statutory bona fide hedging definition. Accordingly, the statutory restrictions on risk management exemptions that apply to physical commodities subject to Federal position limits do not apply to excluded commodities.

[94] *See infra* Section II.A.1.iii.a(5) (discussing of revoking existing risk management exemptions).
