

of the local improvement that would constitute an integral part of a prospective Federal plan would be eligible to be recommended for credit toward required local cooperation. It was published, at that time, in the **Federal Register** to aid public accessibility. The solicitation of public comment for this removal is unnecessary because the rule is obsolete. The regulation authority ceased to be in effect after December 31, 1977, in accordance with Section 134a of Public Law 94–587.

This rule removal is being conducted to reduce confusion for the public as well as for the Corps regarding a regulation that is no longer in use as the authority is no longer in effect. The removal of the regulation will ensure the Corps' regulations comply with current authorities. In an effort to reduce the number of regulations the Corps has promulgated, the removal of an obsolete regulation is appropriate. Because the regulation does not place a burden on the public, its removal does not provide a reduction in public burden or costs.

This rule is not significant under Executive Order (E.O.) 12866, "Regulatory Planning and Review." Therefore, the requirements of E.O. 13771, "Reducing Regulation and Controlling Regulatory Costs," do not apply. This removal supports a recommendation of the DoD Regulatory Reform Task Force.

#### List of Subjects in 33 CFR Part 276

Flood control, Intergovernmental relations.

#### PART 276—[REMOVED]

■ Accordingly, for the reasons stated in the preamble and under the authority of 5 U.S.C. 301, the Corps removes 33 CFR part 276.

## DEPARTMENT OF DEFENSE

### Department of the Army, Corps of Engineers

#### 33 CFR Part 279

[COE–2020–0011]

RIN 0702–AA97

#### Resource Use: Establishment of Objectives

**AGENCY:** U.S. Army Corps of Engineers, Department of Defense.

**ACTION:** Final rule.

**SUMMARY:** This final rule removes the U.S. Army Corps of Engineers' part titled Resource Use: Establishment of Objectives. Each removed section of this part is redundant or otherwise covers internal agency operations that have no public compliance component or adverse public impact. Current policy and procedures on this subject can be found in internal documents. Therefore, this part can be removed from the Code of Federal Regulations (CFR).

**DATES:** This rule is effective on January 15, 2021.

**ADDRESSES:** Department of the Army, U.S. Army Corps of Engineers, ATTN: CECW–P (Ms. Patricia Mutschler), 441 G Street NW, Washington, DC 20314–1000.

**FOR FURTHER INFORMATION CONTACT:** Ms. Patricia Mutschler at (202) 761–4744 or by email at [Patricia.L.Mutschler@usace.army.mil](mailto:Patricia.L.Mutschler@usace.army.mil).

**SUPPLEMENTARY INFORMATION:** This final rule removes from the CFR 33 CFR part 279, Resource Use: Establishment of Objectives. The rule was initially published in the **Federal Register** on April 4, 1978 (43 FR 14014). The regulation provided policy and guidance for establishing resource use objectives for all Civil Works water resource projects during Phase I/Phase II post-authorization studies and reevaluation of completed projects. Resource use objectives, as defined in the regulation, are clearly written statements, specific to a given project, which specify the attainable options for resource use as determined from study and analysis of resource capabilities and public needs (opportunities and problems). It was published, at that time, in the **Federal Register** to aid public accessibility. The solicitation of public comment for this removal is unnecessary because the rule is redundant or otherwise covers internal agency operations that have no public compliance component or adverse public impact. For current

public accessibility purposes, implementation guidance and procedures for the establishment of resource use objectives related to the formulation of recommended plans for water resources development projects are now found in Engineer Regulation 1105–2–100, "Planning Guidance Notebook" (available at [https://www.publications.usace.army.mil/Portals/76/Publications/EngineerRegulations/ER\\_1105-2-100.pdf](https://www.publications.usace.army.mil/Portals/76/Publications/EngineerRegulations/ER_1105-2-100.pdf)); and Engineer Regulation and Pamphlet 1130–2–550, "Recreation Operations and Maintenance Guidance and Procedures, Chapter 3" (available at [https://www.publications.usace.army.mil/Portals/76/Publications/EngineerRegulations/ER\\_1130-2-550.pdf](https://www.publications.usace.army.mil/Portals/76/Publications/EngineerRegulations/ER_1130-2-550.pdf)). In addition, environmental evaluation is required under the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321–4347), and is implemented by the Corps pursuant to 33 CFR part 230.

This rule removal is being conducted to reduce confusion for the public as well as for the Corps regarding the current policy which governs the Corps' establishment of resource use objectives. Because the regulation does not place a burden on the public, its removal does not provide a reduction in public burden or costs.

This rule is not significant under Executive Order (E.O.) 12866, "Regulatory Planning and Review." Therefore, the requirements of E.O. 13771, "Reducing Regulation and Controlling Regulatory Costs," do not apply. This removal supports a recommendation of the DoD Regulatory Reform Task Force.
