

the collection listed below. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Title: Core Principles and Other Requirements for Swap Execution Facilities (OMB Control No. 3038–0074). This is a request for extension of a currently approved information collection.

Abstract: Title VII of the Dodd-Frank Wall Street Reform and Consumer Protection Act (“Dodd-Frank Act”) added new section 5h to the Commodity Exchange Act (“CEA”) to impose requirements concerning the registration and operation of swap execution facilities (“SEFs”), which the Commission has incorporated in part 37 of its regulations. These information collections are needed for the Commission to ensure that SEFs comply with these requirements. Among other requirements, part 37 of the Commission’s regulations imposes SEF registration requirements for a trading platform or system, obligates SEFs to provide transaction confirmations to swap counterparties, and requires SEFs to comply with 15 core principles. Collection 3038–0074 was created in response to the part 37 regulatory requirements for SEFs.

In April 2018, the Commission published a 30-Day Notice of Intent to Renew Collection 3038–0074 (30-Day Renewal Notice) and stated that 25 SEFs were registered with the Commission.¹ However, since publication of the 30-Day Renewal Notice, the Commission has granted permanent registration to several additional SEFs, while others SEFs have had their registrations vacated or have been deemed dormant under part 40 of the Commission regulations, for a total of 21 registered SEFs.² Therefore, the Commission is revising the below burden statement for OMB Control No. 3038–0074 to account for the decrease in the number of registered SEFs.

With respect to the collection of information, the CFTC invites comments on:

- Whether the proposed collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have a practical use;

- The accuracy of the Commission’s estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

- Ways to enhance the quality, usefulness, and clarity of the information to be collected; and

- Ways to minimize the burden of collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology; e.g., permitting electronic submission of responses.

You should submit only information that you wish to make available publicly. If you wish the Commission to consider information that you believe is exempt from disclosure under the Freedom of Information Act, a petition for confidential treatment of the exempt information may be submitted according to the procedures established in § 145.9 of the Commission’s regulations.³

The Commission reserves the right, but shall have no obligation, to review, pre-screen, filter, redact, refuse or remove any or all of your submission from <http://www.cftc.gov> that it may deem to be inappropriate for publication, such as obscene language. All submissions that have been redacted or removed that contain comments on the merits of the ICR will be retained in the public comment file and will be considered as required under the Administrative Procedure Act and other applicable laws, and may be accessible under the Freedom of Information Act.

Burden Statement: The Commission is revising its estimate of the burden for this collection to account for the change in the number of SEFs currently registered with the Commission. The respondent burden for this collection is estimated to be as follows:

Estimated Number of Respondents: 21.

Estimated Average Burden Hours per Respondent: 21,000.

Estimated Total Annual Burden Hours: 21,000.⁴

Frequency of Collection: As applicable.

There are no capital costs or operating and maintenance costs associated with this collection.

Authority: 44 U.S.C. 3501 *et seq.*

³ 17 CFR 145.9.

⁴ The Commission notes that collection 3038–0074 includes an additional 1,200 burden hours for SEF registration applicants that have not been affected by this amendment. Therefore, the total burden for this collection is 22,200 hours.

Dated: January 13, 2021.

Robert Sidman,

Deputy Secretary of the Commission.

BILLING CODE 6351–01–P

CONSUMER PRODUCT SAFETY COMMISSION

[Docket No. CPSC–2020–0021]

Agency Information Collection Activities; Submission for OMB Review; Comment Request—Child Strength Study

AGENCY: Consumer Product Safety Commission.

ACTION: Notice.

SUMMARY: As required by the Paperwork Reduction Act of 1995, the Consumer Product Safety Commission (CPSC or Commission) announces that CPSC has submitted to the Office of Management and Budget (OMB) a new proposed collection of information for a study that will assess the strength capabilities of children. On August 31, 2020, CPSC published a notice in the **Federal Register** announcing the agency’s intent to seek approval of this collection of information. After reviewing and considering the comments CPSC received, by publication of this notice, the Commission announces that CPSC has submitted to OMB a request for approval of this collection of information.

DATES: Submit written comments on this request for approval of information collection requirements by February 18, 2021.

ADDRESSES: Send written comments and recommendations for the proposed information collection within 30 days of publication of this notice to: www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting, “Currently under 30-day Review—Open for Public Comments,” or by using the search function. In addition, written comments that are sent to OMB also should be submitted electronically at: <http://www.regulations.gov>, under Docket No. CPSC–2020–0021.

FOR FURTHER INFORMATION CONTACT: Cynthia Gillham, Consumer Product Safety Commission, 4330 East-West Highway, Bethesda, MD 20814; (301) 504–7791, or by email to: CGillham@cpsc.gov.

SUPPLEMENTARY INFORMATION:

A. Background

Under the Paperwork Reduction Act of 1995 (PRA; 44 U.S.C. 3501–3520),

¹ 83 FR 15557 (Apr. 21, 2018).

² This includes 20 SEFs that are currently registered with the Commission and one dormant SEF that is in the process of filing for reinstatement in accordance with Commission regulation 37.3(d) and is currently operating under staff no-action relief. See CFTC Letter No. 20–29, available at <https://www.cftc.gov/csl/20-29/download>.

federal agencies must obtain approval from OMB for each collection of information they conduct or sponsor. "Collection of information" is defined in 44 U.S.C. 3502(3) and 5 CFR 1320.3(c) and includes agency data-collection studies. The PRA establishes procedures agencies must follow to obtain OMB approval for a collection of information, including notice and a review of comments, among others. Agencies must provide notice of the proposed collection of information in the **Federal Register**, and provide a 60-day comment period, before submitting the collection to OMB for approval. 44 U.S.C. 3506(c)(2)(A). Agencies then must evaluate any public comments and publish another notice in the **Federal Register**. *Id.* 3507(a)(1).

In accordance with these procedures, on August 31, 2020, CPSC published a notice in the **Federal Register** announcing the agency's intent to seek approval of a new collection of information on a CPSC Child Strength Study that will assess the strength capabilities of children. 85 FR 53800 (Aug. 31, 2020). Section C. Comments, below, summarizes and addresses the comments CPSC received.

B. Study

Section 5(a) of the Consumer Product Safety Act (CPSA; 15 U.S.C. 2051–2089) authorizes the Commission to conduct studies and investigations relating to the causes and prevention of deaths, accidents, injuries, illnesses, other health impairments, and economic losses associated with consumer products. 15 U.S.C. 2054(a). Section 5(b) of the CPSA further provides that the Commission may conduct research, studies, and investigations on the safety of consumer products or test consumer products and develop product safety test methods and testing devices. *Id.* 2054(b).

CPSC uses data on human strength capabilities to develop product safety standards and inform other CPSC staff activities. CPSC's product safety work includes developing mandatory standards, enforcing existing safety requirements, and working with voluntary standards organizations to improve the safety of consumer products, including children's products. Products that are intended for children, and products that are not intended for children, can pose a hazard to a child (e.g., if the product or a component of it breaks, collapses, or liberates a small part). Information about children's strength capabilities is essential to improving product safety, because it can inform the development of performance requirements that consider children's

interactions with product components. Manufacturers can also use this information when designing products.

In the 1970s, CPSC sponsored studies to conduct research on human size and strength; specifically, Snyder et al. (1975¹ and 1977²), studied child anthropometry and Owings *et al.* (1975³ and 1977⁴), studied child strength. The research results were instrumental for many years in developing product safety standards; however, because the strength studies occurred more than 40 years ago, the information needs to be updated. Moreover, more recent studies lack information on younger children and additional strength measures, and only collected data from a very small number of children. CPSC expects that the proposed information-collection activity would provide CPSC staff with information that reflects more accurately the strength capabilities of children today, as well as data that are not available in literature currently, including data on younger children and additional strength measures.

The proposed study would collect data from a sample of up to approximately 800 children between the ages of 3 months and 5 years to assess children's strength capabilities. The proposed study would collect data on bite strength for children ages 3 months through 5 years, and strength data for children ages 6 months through 5 years. The information collected from the proposed study would provide CPSC staff with updated child strength measures, including upper and lower extremities and bite strength for expanded age ranges. With this information, CPSC would have more accurate and current data for developing voluntary and mandatory safety standards. This information will also help staff to analyze injuries and deaths

⁴ Owings, C.L., Norcutt, R.H., Snyder, R.G., Golomb, D.H., and Lloyd, K.Y. (1977). Gripping Strength Measurements of Children for Product Safety Design (Contract No. CPSC-C-76-0119).

of children interacting with consumer products and determine whether a product presents a safety hazard.

CPSC has contracted with the University of Michigan to conduct the proposed study and collect the data. A team of researchers at the University of Michigan Transportation Research Institute (UMTRI) will lead the study, and the study will be conducted at UMTRI Laboratories in Ann Arbor, MI. The contractor will recruit children to participate through their caregivers, using the University of Michigan Engage site, Craigslist, and flyers placed at UMTRI. The contractor will create a customized tool for data collection and feedback. The contractor will assign participants a random identification number that is not linked to any personal identifying information and will de-identify photos and videos of participants, taken to document their exertion postures, by blurring the faces. Participation will be voluntary, and information collected from participants will be kept confidential and used only for research purposes. Following data collection, the contractor will provide CPSC staff with raw strength and position data (with identifying information removed), as well as a final report. After CPSC staff has reviewed and approved the final report, CPSC will release the report on the agency's website and through presentations at meetings and conferences related to the subject matter, in accordance with applicable laws and Commission policy.

A copy of the proposed study, titled, "Child Strength Study-Final Supporting Statement and Justification," is available at: www.regulations.gov under Docket No. CPSC-2020-0021, Supporting and Related Material.

C. Comments

CPSC received four comments in response to the August 31, 2020 notice. All four commenters supported the information collection; however, two of the commenters also suggested specific or additional measures to collect or analyze as part of the study.

One commenter recommended collecting metrics on children's hand grip strength, push strength, pull strength, push-up head strength, and seated leg press strength. CPSC already plans to collect information about children's hand grip strength, push strength, pull strength, and seated leg press strength, as part of this study. Although CPSC does not plan to collect information about children's push up head strength, the commenter suggested this measure for purposes of evaluating entrapment hazards, and CPSC already plans to collect children's head

entrapment measures as part of the study.

The same commenter also recommended directly correlating data with the age of the child tested, to provide more detailed information to identify safe product designs. CPSC plans to group data into 3-month, 6-month, and 1-year age ranges, with smaller groupings for younger ages. Each age group will include approximately 50 participants. This approach will provide more age-specific information than previous studies, which grouped children into 3-year age ranges. CPSC could provide results for specific ages, however, this information would have limited use, because each specific age likely will have a small number of participants.

Another commenter recommended collecting a wide range of information on static anthropometry, functional anthropometry, physical abilities, and psychological abilities. The static anthropometry measures (e.g., weight, head breadth) that the commenter requested would not require any modifications to the study. Rather, they would involve additional analysis of information that will already be collected as part of the body scan data in the study. CPSC agrees that this information may be useful and plans to request this additional data analysis as part of the final study report.

In contrast, the functional anthropometry measures (e.g., overhead reach to grip) that the commenter requested would require modifying the study to collect additional measures. Based on study design and participant fatigue, child participants can only be in the laboratory for 2 hours. The data collection that is already part of the study will take 2 hours; additional measures would exceed the 2-hour allotted time. If CPSC determines, upon review of the final study report, that more information is necessary, and that additional measures need to be evaluated, staff will consider collecting supplemental information at that time.

CPSC already plans to collect most of the physical abilities measures (e.g., pushing forward, pinch force) that the commenter recommended. CPSC is not collecting the psychological abilities measures (e.g., reaction time to visual stimuli) that the commenter requested because those measures are not within the scope of this study. The focus of this study is on children's anthropometrics and strength.

This commenter also recommended compiling data for children from various countries, so that a comprehensive data set is available for companies that distribute products

globally. CPSC cannot collect data from participants in other countries or compel other countries to collect child strength data. However, the data CPSC collects as part of this study will be publicly available, so interested parties may combine it with information from other countries to create a comprehensive data set.

CPSC's review and consideration of the comments yielded no basis for modifying the supporting statement for the study. Therefore, by publication of this notice, the Commission announces that CPSC has submitted to OMB a request for approval of this collection of information.

D. Burden Hours

The only change to the supporting statement corrects typographical errors to the burden hours for the federal government. The correct burden hours and costs are below. Although CPSC's 60-day **Federal Register** notice correctly stated these numbers, the supporting statement on www.Regulations.gov reflected slightly different numbers based on older Employer Costs for Employee Compensation. The final supporting statement, which is available in the docket for this notice, corrects those errors.

CPSC estimates that the study will involve 3,050 respondents and take a total of 1,813 hours over the duration of the study. The monetized hourly cost for the adult caregiver of a participant is \$37.73, as defined by the average total hourly cost to employers for employee compensation for all civilian employees across all occupations as of March 2020, reported by the Bureau of Labor Statistics, Employer Costs for Employee Compensation. Accordingly, CPSC estimates the total cost burden to be \$68,404 (1,813 hours × \$37.73 = \$68,404).

The estimated cost to the federal government for the contract to design and conduct the study issued to the University of Michigan under contract number 61320618D0004 is \$1,134,502. The estimated salary and benefits costs for government personnel assigned to this study are \$170,356, based on 12 staff months in 2020, at an average level of GS-13 step 5 in the Washington, DC area, effective January 2020 (\$116,353) and a 68.3 percent ratio of wages and salary to total compensation (all civilian management, professional, and related workers) from Table 2 of the March 2020 Employer Costs for Employee Compensation, published by the Bureau of Labor Statistics. Therefore, the total estimated cost to the federal government is \$1,134,502 for the contract, plus

\$170,356 in government labor costs, for a total of \$1,304,858.

Alberta E. Mills,

Secretary, Consumer Product Safety Commission.

DEPARTMENT OF DEFENSE

Defense Acquisition Regulations System

[Docket DARS-2020-0041; OMB Control Number 0704-0525]

Information Collection Requirement; Defense Federal Acquisition Regulation Supplement; Prohibition of Foreign Commercial Satellite Services From Certain Foreign Entities—Representations

AGENCY: Defense Acquisition Regulations System, Department of Defense (DoD).

ACTION: Notice.

SUMMARY: The Defense Acquisition Regulations System has submitted to OMB for clearance the following proposed revision and extension of a collection of information under the provisions of the Paperwork Reduction Act.

DATES: Consideration will be given to all comments received by February 18, 2021.

FOR FURTHER INFORMATION CONTACT: Ms. Kimberly Bass, 571-372-6174.

SUPPLEMENTARY INFORMATION:

Title and OMB Number: Defense Federal Acquisition Regulation Supplement (DFARS), Prohibition on Acquisition of Commercial Satellite Services from Certain Foreign Entities—Representations; OMB Control Number 0704-0525.

Type of Request: Revision and extension of a currently approved collection.

Affected Public: Businesses or other for-profit and not-for-profit institutions.

Obligation to Respond: Required to obtain or retain benefits.

Number of Respondents: 235.

Responses Per Respondent: 1.

Annual Responses: 235.

Average Burden Per Response: 0.25 hours.

Annual Burden Hours: 58.

Frequency: On Occasion.

Needs and Uses: DFARS provision 252.225-7049, Prohibition on Acquisition of Commercial Satellite Services from Certain Foreign Entities—Representations, is used by contracting
