Based on our EA, the response to public comments, and other pertinent scientific data, APHIS has reached a finding of no significant impact (FONSI) with regard to the preferred alternative identified in the EA (to make a determination of nonregulated status of MON 88702 cotton).

#### Determination

Based on APHIS' analysis of field and laboratory data submitted by Monsanto, references provided in the petition, peer-reviewed publications, information analyzed in the EA, the PPRA, the public comments, and information provided in APHIS' response to those public comments, APHIS has determined that MON 88702 cotton is unlikely to pose a plant pest risk and therefore is no longer subject to our regulations governing the introduction of certain organisms developed using genetic engineering.

Copies of the signed determination document, PPRA, final EA, and FONSI, as well as the previously published petition and supporting documents, are available as indicated under **ADDRESSES** and from the person listed under the **FOR FURTHER INFORMATION CONTACT** section in this notice.
