SUPPLEMENTARY INFORMATION:

I. Abstract

The purpose of this research is to build a dataset that allows longitudinal documentation of (1) the novel resilience-based mitigation actions employed during the COVID–19 pandemic by small- and medium-sized enterprises (SMEs) by sector, (2) challenges in implementing resilience-based mitigation actions, (3) utilization of past strategies and approaches to provide assistance to the current situation, and (4) planned resilience actions and strategies. This is a cross-Department of Commerce (DOC) effort; the offices sponsoring the proposed data collection are the (1) Applied Economics Office (AEO), in NIST's Engineering Laboratory (EL) and (2) the Climate Program Office (CPO), National Oceanic and Atmospheric Association (NOAA). There has been considerable coordination on this effort with Federal agencies and other institutions that directly provide guidance to SMEs. NIST researchers have been actively engaged for over five years in understanding community resilience to natural hazard events and have developed expertise in that area of inquiry, especially as it relates to SME resilience.

A first wave of data collection took place July–August 2020 using the Wave 1 “Compound Risks—SME Recovery from a Pandemic in the Face of Natural Hazard Risks” electronic survey
