SUPPLEMENTARY INFORMATION:

Title: FERC-725S, Emergency Preparedness and Operations (EOP) Reliability Standards.

OMB Control No.: 1902-0270.

Type of Request: Three-year approval of the FERC-725S information collection requirements with no changes to the current reporting requirements.

Abstract: The Electricity Modernization Act of 2005, which is Title XII of the Energy Policy Act of 2005 (EPAct 2005), added a new section

215 to the Federal Power Act (FPA).¹ FPA section 215 requires a Commission-certified Electric Reliability Organization (ERO) to develop mandatory and enforceable Reliability Standards, subject to Commission review and approval. Section 215 of the FPA requires a Commission-certified ERO to develop mandatory and enforceable Reliability Standards, subject to Commission review and approval. In 2006, the Commission certified North American Electric Reliability Corporation (NERC) as the ERO pursuant to section 215 of the FPA. FERC-725S consists of Emergency Preparedness and Operations (EOP) Reliability Standards, EOP-004-4 (Event Reporting), EOP-005-3 (System Restoration from Blackstart Resources), EOP-006-3 (System Restoration Coordination), EOP-008-2 (Loss of Control Center Functionality), EOP-010-1 (Geomagnetic Disturbance Operations), and EOP-011-1 (Emergency Operations). These

Reliability Standards enhance reliability by:

- (1) Providing accurate reporting of events to NERC's event analysis group to analyze the impact on the reliability of the bulk electric system (Reliability Standard EOP-004-4).
- (2) delineating the roles and responsibilities of entities that support system restoration from blackstart resources which generate power without the support of the bulk electric system (Reliability Standard EOP-005-3).
- (3) clarifying the procedures and coordination requirements for reliability coordinator personnel to execute system restoration processes (Reliability Standard EOP-006-3).
- (4) refining the required elements of an operating plan used to continue reliable operations of the bulk electric system in the event that primary control center functionality is lost (Reliability Standard EOP-008-2).
- (5) addressing the effects of operating Emergencies by ensuring each Transmission Operator and Balancing Authority has developed Operating

Plan(s) to mitigate operating Emergencies, and that those plans are coordinated within a Reliability Coordinator Area (EOP-010-1).

(6) streamlining the requirements for Emergency operations of the Bulk Electric System. Attachment 1, which is incorporated into Requirements R2 and R6, provides the process and descriptions of the levels used by the Reliability Coordinator when communicating the condition of a Balancing Authority that is experiencing an Energy Emergency (EOP-011-1).

The 60-day notice was published on November 18, 2020 (85 FR 73477), and no comments were received.

Type of Respondents: Public utilities subject to the FPA.

*Estimate of Annual Burden² and cost:*³ With the exception of adjustments due to the Commission's recent experience with this information collection, the Commission estimates there will be no changes in the annual public reporting burden for the FERC-735S, as follows:

FERC-725S

Reliability standard and associated requirement	Number of respondents ⁴	Annual number of responses per respondent	Total number of responses	Average burden & cost per response	Total annual burden & total annual cost	Cost per respondent (\$)
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
EOP-010-1	181	1	181	20 hrs.; \$1,660	3,620 hrs.; \$300,460.	\$1,660
EOP-011-1	12	1	12	1,500 hrs.; \$124,500.	18,000 hrs.; \$1,494,000.	124,500
EOP-004-4, EOP-005-3, EOP-006-3, EOP-008-2.	280	1	280	250.58 hrs.; \$20,798.	70,162.4 hrs.; \$5,234,440.	20,798
Total EOP	473	91,782 hrs.; \$7,028,900.

Comments: Comments are invited on: (1) Whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency's estimate of the burden and cost of the collection of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use
